Admission Procedures

Eligibility

Washington University encourages and gives full consideration to all applicants for admission and financial aid, without regard to race, color, age, religion, sex, sexual orientation, gender identity or expression, national origin, veteran status, disability or genetic information.

McKelvey School of Engineering is strongly interested in recruiting, enrolling, retaining and graduating students from diverse backgrounds. Applications for admission by students from diverse backgrounds to any of our degree programs are encouraged and welcomed. To the greatest extent possible, students with disabilities are integrated into the student population as equal members.

To be considered for admission into a graduate degree program, applicants must hold a bachelor’s degree from an accredited institution prior to starting the graduate program. Most of the engineering degree programs require a previous degree in science, technology, engineering or mathematics.

Current engineering graduate students who wish to be admitted into another engineering graduate program must be admitted at least one semester prior to their anticipated graduation semester.

Students may be admitted to study for the PhD degree directly from baccalaureate study or after undertaking other graduate or professional education, whether at Washington University or at another accredited institution.

Application Process

Degree programs set their own application deadlines, which must be no later than January 15 for doctoral programs. Master’s program deadlines are later; applicants should check deadlines through the McKelvey School of Engineering. It is generally advantageous to the applicant to complete the application well in advance of the deadline.

The application is available online through the School of Engineering website. Applications are ready for final consideration after the required items from the application checklist have been submitted.

All applicants for full-time graduate programs are required to submit Graduate Record Examination (GRE) scores at the time of application, with the exception of the Master of Engineering degree in the Biomedical Innovation program.
