Master of Engineering in Computer Science and Engineering

The Master of Engineering (MEng) in Computer Science and Engineering is specifically designed for students who would like to combine studies in computer science and computer engineering, possibly in conjunction with graduate-level work in another discipline, or for other reasons need a more flexible structure to their master’s studies. The MEng offers more flexibility by allowing for approved outside courses (i.e., courses not specifically taken in computer science, such as various business courses) to count toward the degree; in this manner, an MEng student can customize their program, incorporating interdisciplinary components when/if approved by the faculty adviser. Work in the program culminates in a capstone project highlighting each student’s ambitions, interests, and accomplishments in the program. MEng students typically move directly into the industry. All students in the MEng program must have previously completed (as documented by their undergraduate transcript), successfully test to place out of, or complete at the start of their program, the following courses: CSE 501N Introduction to Computer Science and CSE 502N Data Structures and Algorithms, or equivalent courses offered at other institutions.

Degree Requirements

- The MEng requires 30 total units including 24 units of graduate-level course work and 6 units of CSE 598 Master’s Project culminating in a successful project defense.
- 12 of the remaining 24 units must be departmental courses at the 400 level or above. Of these 12 units, 9 units must be at the 500 level.
- With departmental approval, up to 12 units may be taken from outside of the department. Such approval shall be contingent on the credits being suitably technical graduate-level content. To count more than 6 units from outside the CSE department, an appropriate justification for the additional increment shall be provided by the adviser and student. Departmental approval shall be evaluated with increasing stringency for each additional increment.
- Up to 15 units of 400-level courses can count for graduate credit.
- None of the 30 units may be taken as independent study (i.e., CSE 400 or CSE 500).
- Courses with an “N” designation do not count toward the master’s degree.
- All courses must be taken for a grade of C- or better.
- As per Engineering School guidelines, students must maintain a GPA of at least 2.70.
