

School of Engineering & Applied Science

The School of Engineering & Applied Science offers programs of instruction and research leading to specified master's degrees and doctoral degrees.

Both full-time and part-time students may pursue most of the graduate programs offered by Engineering. A few graduate programs are designed primarily for full-time students. However, numerous locally employed engineers, scientists and technical managers have earned master's degrees through part-time study. Many evening graduate courses are offered, and many other graduate courses are taught during the late afternoon. Students who are employed full-time and are interested in investigating the possibility of doctoral graduate work should consult directly with the director of the particular department or program in which they are interested.
