Imaging Science (Interdisciplinary PhD)

The PhD in Imaging Science program at Washington University in St. Louis is one of only two such programs in the United States. This program offers an interdisciplinary curriculum that focuses on the technology of imaging with applications that range from cancer diagnosis to virtual reality.

What is Imaging Science?

Imaging Science is an interdisciplinary academic discipline that broadly addresses the design and optimization of imaging systems and the extraction of information from images. It builds on contributions from traditional fields including biomedical engineering, electrical engineering and computer science as well as from physics, applied mathematics, biology and chemistry.

What Can You Do with a PhD in Imaging Science?

The high demand for personnel with training in imaging science is reflected in government policy and funding opportunities. Many academic, industrial and national laboratory positions exist for highly qualified candidates. Graduates of the program will be prepared for careers in academic research or in industry that requires expertise in the quantitative principles of imaging.

Curriculum Focus

- Mathematical and computational principles of image formation
- Image analysis
- Image understanding
- Image quality assessment

This interdisciplinary program is unique and brings together expert faculty from the McKelvey School of Engineering (https://engineering.wustl.edu/Pages/home.aspx) and the School of Medicine (https://medicine.wustl.edu) to provide students with the freedom and flexibility to learn from leading imaging experts and to engage in impactful research.

History

Washington University has been a leader in the technology and advancement of imaging science for more than 125 years. In the 1920s, Washington University researchers were the first to use X-rays to view the gallbladder. In the 1970s, research by Michel Ter-Pogossian at the university's Mallinckrodt Institute of Radiology led to the development of the PET scanner.

Faculty

Jody O'Sullivan (https://engineering.wustl.edu/Profiles/Pages/Joseph-OSullivan.aspx)
Co-Director
Samuel C. Sachs Professor of Electrical Engineering
PhD, University of Notre Dame
Electrical & Systems Engineering

Joe Culver (https://www.mir.wustl.edu/research/research-laboratories/optical-radiology-laboratory-orl/people/joseph-culver)
Co-Director
Professor
PhD, University of Pennsylvania
Radiology; Biomedical Engineering

Sam Achilefu (http://orl.wustl.edu/index.php?id=122)
Michel M. Ter-Pogossian Professor of Radiology
University of Nancy, France
Radiology; Biomedical Engineering

Hongyu An (https://www.mir.wustl.edu/research/research-laboratories/biomedical-magnetic-resonance-laboratory-bmrl/people/bio-an)
Associate Professor
PhD, Washington University
Radiology; Biomedical Engineering

Beau Ances (https://neuro.wustl.edu/research/research-labs-2/ances-laboratory/team)
Professor
MD, University of Pennsylvania
PhD, University of Pennsylvania
Neurology; Biomedical Engineering

Deanna Barch (https://psychiatry.wustl.edu/people/deanna-barch-phd)
Gregory B. Couch Professor of Psychiatry
PhD, University of Illinois
Psychological & Brain Sciences; Biomedical Engineering

Phil Bayly (https://engineering.wustl.edu/Profiles/Pages/Philip-Bayly.aspx)
Lilyan and E. Lisle Hughes Professor of Mechanical Engineering
PhD, Duke University
Mechanical Engineering & Materials Science

Aaron Bobick (https://engineering.wustl.edu/Profiles/Pages/Aaron-Bobick.aspx)
James M. McKelvey Professor and Dean
PhD, Massachusetts Institute of Technology
Computer Science & Engineering
Frank Brooks (https://bme.wustl.edu/faculty/Pages/Frank-Brooks.aspx)
Research Assistant Professor
PhD, Washington University
Biomedical Engineering

Ayan Chakrabarti (https://engineering.wustl.edu/Profiles/Pages/Ayan-Chakrabarti.aspx)
Assistant Professor
PhD, Harvard University
Computer Science & Engineering

Hong Chen (https://engineering.wustl.edu/Profiles/Pages/Hong-Chen.aspx)
Assistant Professor
PhD, University of Washington
Biomedical Engineering

James Fitzpatrick (http://neurosci.wustl.edu/people/faculty/james-fitpatrick)
Associate Professor
PhD, University of Bristol, United Kingdom
Cell Biology & Physiology; Biomedical Engineering

Michael Gach (https://radonc.wustl.edu/faculty/michael-gach)
Associate Professor
PhD, University of Pittsburgh
Radiation Oncology; Biomedical Engineering

Roc Guérin (https://engineering.wustl.edu/Profiles/Pages/Roc-Guerin.aspx)
Harold B. and Adelaide G. Welge Professor of Computer Science
PhD, California Institute of Technology
Computer Science & Engineering

Dennis Hallahan (https://wuphysicians.wustl.edu/for-patients/find-a-physician/dennis-hallahan)
Elizabeth H. and James S. McDonnell III Distinguished Professor of Medicine
MD, Rush University
Radiation Oncology; Biomedical Engineering

Tim Holy (http://neurosci.wustl.edu/people/faculty/timothy-holy)
Alan A. and Edith L. Wolff Professor of Neuroscience
PhD, Princeton University
Neuroscience; Biomedical Engineering

Geoff Hugo (https://radonc.wustl.edu/faculty/geoffrey-hugo-phd)
Professor
PhD, University of California, Los Angeles
Radiation Oncology; Biomedical Engineering

Abhinav Jha (https://engineering.wustl.edu/Profiles/Pages/Abhinav-Jha.aspx)
Assistant Professor
PhD, University of Arizona
Biomedical Engineering; Radiology

Tao Ju (https://engineering.wustl.edu/Profiles/Pages/Tao-Ju.aspx)
Professor
PhD, Rice University
Computer Science & Engineering

Ulugbek Kamilov (https://engineering.wustl.edu/Profiles/Pages/Ulugbek-Kamilov.aspx)
Assistant Professor
PhD, École Polytechnique Fédérale de Lausanne, Switzerland
Computer Science & Engineering; Electrical & Systems Engineering

Gregory Lanza (https://cardiology.wustl.edu/faculty/gregory-m-lanza-md-phd-facc)
Oliver M. Langenberg Chair, Distinguished Professor of the Science and Practice of Medicine
MD, Northwestern University
PhD, University of Georgia
Medicine; Biomedical Engineering

Associate Professor
PhD, University of Laval, Canada
Radiology

Matthew Lew (https://engineering.wustl.edu/Profiles/Pages/Matthew-Lew.aspx)
Assistant Professor
PhD, Stanford University
Electrical & Systems Engineering

Harold Li (https://radonc.wustl.edu/faculty/harold-li)
Associate Professor
PhD, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany
Radiation Oncology; Biomedical Engineering

Hua Li
Assistant Professor
PhD, Huazhong University of Science and Technology, China
Radiation Oncology; Biomedical Engineering

Daniel Marcus (https://www.mir.wustl.edu/research/research-support-facilities/neuroimaging-informatics-analysis-center-niac/our-staff/niac-staff-dan-marcus)
Associate Professor
PhD, Washington University
Radiology; Biomedical Engineering

Sasa Mutic (https://radonc.wustl.edu/faculty/sasa-mitic)
Professor
PhD, University of Missouri-Columbia
Radiation Oncology; Biomedical Engineering
Arye Nehorai (https://engineering.wustl.edu/Profiles/Pages/Arye-Nehorai.aspx) 
Eugene and Martha Lohman Professor of Electrical Engineering 
PhD, Stanford University 
Electrical & Systems Engineering

Philip Payne (https://publichealth.wustl.edu/scholars/philip-r-payne) 
Robert J. Terry Professor 
PhD, Columbia University 
Medicine; Biomedical Engineering

Jonathan E. Peelle (http://oto.wustl.edu/About-Us/Faculty-Physicians/Jonathan-E-Peelle) 
Associate Professor of Otolaryngology 
PhD, Brandeis University 
Otolaryngology

David Piston (https://pistonlab.wustl.edu) 
Professor 
PhD, University of Illinois 
Cell Biology & Physiology; Biomedical Engineering

Yoram Rudy (https://engineering.wustl.edu/Profiles/Pages/Yoram-Rudy.aspx) 
Fred Saigh Distinguished Professor of Engineering 
PhD, Case Western Reserve University 
Biomedical Engineering

Joshua Shimony (https://sites.wustl.edu/nillabs/people/joshua-s-shimony) 
Professor of Radiology 
PhD, University of Tennessee 
Department of Radiology

Associate Professor 
PhD, University of California, Los Angeles 
Radiology; Biomedical Engineering

Monica Shokeen (https://www.mir.wustl.edu/research/research-laboratories/optical-radiology-laboratory-orl/people/bio-page-template/monica-shokeen) 
Assistant Professor 
PhD, Washington University 
Radiology

Associate Professor 
PhD, University of California, Los Angeles 
Radiology; Biomedical Engineering

David Van Essen (http://dbbs.wustl.edu/faculty/Pages/faculty_bio.aspx?SID=1569) 
Alumni Endowed Professor 
PhD, Harvard University 
Neuroscience; Biomedical Engineering

Elizabeth E. Mallinckrodt Professor of Radiology 
MD, Washington University 
Radiology

Yong Wang (https://reproductivesciences.wustl.edu/people/yong-wang) 
Assistant Professor 
PhD, Washington University 
Obstetrics & Gynecology; Radiology; Biomedical Engineering

Professor 
MD, Duke University 
Radiology; Biomedical Engineering

Deshan Yang (https://radonc.wustl.edu/faculty/deshan-yang-phd) 
Associate Professor 
PhD, University of Wisconsin-Madison 
Radiation Oncology; Biomedical Engineering

Tiezhi Zhang (https://radonc.wustl.edu/faculty/tiezhi-zhang-phd) 
Assistant Professor 
PhD, University of Wisconsin-Madison 
Radiation Oncology; Biomedical Engineering

Associate Professor 
PhD, University of Cincinnati 
Radiology; Biomedical Engineering

Quing Zhu (https://engineering.wustl.edu/Profiles/Pages/Quing-Zhu.aspx) 
Professor 
PhD, University of Pennsylvania 
Biomedical Engineering

Professor Emeritus

Martin Arthur (https://ese.wustl.edu/faculty/Pages/Martin-Arthur.aspx) 
Newton R. and Sarah Louisa Glasgow Wilson Professor of Engineering 
PhD, University of Pennsylvania 
Electrical & Systems Engineering
Degree Requirements

PhD in Imaging Science

Requirements
To complete the PhD in Imaging Science, students must do the following:

• Maintain an average grade of B (3.0 grade-point average) for all 72 units (up to 24 graduate units may be transferred with approval)
• Complete courses with no more than one grade below B-
• Complete at least one semester-long research rotation
• Become integrated with a research group
• Pass a qualifying exam
• Successfully defend a thesis proposal
• Present and successfully defend a dissertation
• Complete the mentored teaching experience required by their administrative home department

Courses

Required Core Courses (22 units)
• BME/CSE/ESE Mathematics of Imaging Science (3 units)
• BME 593 Computational Methods for Imaging Science (3 units)
• ESE 506 Seminar in Imaging Science and Engineering (1 unit)
• ESE 589 Biological Imaging Technology (3 units)
• BME/ESE 5907 Theoretical Imaging Science (3 units)
• BME/CSE/ESE Image Analysis and Data-Driven Imaging (3 units)
• BME/ESE/CSE Practicum in Computational Imaging (3 units)
• BME 601 Research Rotation (3 units) (refer to Research Rotations (p. 5) section)

At least 12 units in elective imaging courses that span any of the following categories must be completed:
• Computational Imaging & Theory
• Imaging Sensors & Instrumentation
• Image Formation & Imaging Physics
• Translational Biomedical Imaging
• Medical Physics

Progression of Courses (Typical)

First Semester
• BME/CSE/ESE Mathematics of Imaging Science (3 units)
• ESE 506 Seminar in Imaging Science & Engineering (1 unit)

Second Semester
• BME 601 Research Rotation (3 units) (refer to Research Rotations (p. 5) section)
• Elective (3 units)

Elective Courses — Computational Imaging & Theory
• BME/ESE Adaptive Imaging
• BME/ESE Wave Physics and Applied Optics for Imaging Scientists
• CSE 501N Programming Concepts and Practice
• CSE 511A Introduction to Artificial Intelligence
• CSE 512A Statistical Computing for Scientific Research
• CSE 513T Theory of Artificial Intelligence & Machine Learning
• CSE 515T Bayesian Methods in Machine Learning
• CSE 517A Machine Learning
• CSE 519T Advanced Machine Learning
• CSE 543T Algorithms for Nonlinear Optimization
• CSE 546T Computational Geometry
• CSE 554A Geometric Computing for Biomedicine
• CSE 555A Computational Photography
• CSE 559A Computer Vision
• CSE 566S High Performance Computer Systems
• ESE 518 Optimization Methods in Control
• ESE 523 Information Theory
• ESE 524 Detection and Estimation Theory
• ESE 588 Quantitative Image Processing

Elective Courses — Imaging Sensors & Instrumentation
• BME Imaging Instrumentation
• CSE 568M Imaging Sensors

Elective Courses — Image Formation & Imaging Physics
Research Rotations

During their first year, students are required to register for and complete at least one research rotation (3 units) with program faculty mentors. The research rotation(s) allow students to sample different research projects and laboratory working environments before selecting the group in which they will carry out the PhD dissertation research.

A rotation will be chosen in consultation with program faculty and must be mutually agreeable to both the student and the mentor. At the completion of each rotation, the student must submit to the mentor and director a written report approved by the mentor.

Qualifying Exam

A written qualifying exam will be administered during the spring of the student’s second year of graduate school. The examining committee, who will develop and grade the exams, will consist of three members of the Imaging Science PhD Program Committee. The director of the graduate program will approve the committee, whose members will be suggested by the thesis adviser.

Students will choose three out of the following four exam topics:

- Mathematics of Imaging Science
- Imaging Physics & Image Formation Methods
- Image Analysis & Data-Driven Imaging
- Theoretical Image Science

Finding a Thesis Research Mentor

Because the PhD is a research degree, the student is expected to become integrated within a research group. By the end of the first year of study, students should have found a thesis adviser who will oversee their PhD research and assume financial responsibility for their stipend, tuition, health insurance and student fees. The thesis adviser must be a faculty member in the Imaging Science PhD Program Committee with the title of professor, associate professor or assistant professor. Failure to find a research adviser by May 1 will result in the student being placed on probation that can last until August 31. During that time, the student must continue to seek a research adviser. Failure to find a research adviser by August 31 will lead to dismissal from the PhD program and termination of funding.

The student’s admission application should include transcripts and letters of evaluation. The Graduate Admissions Committee will review all applications and construct a ranked list of candidates. This list and the associated application packages will be forwarded to the dean of the Graduate School for approval for admission to the program. Following approval by the dean of the Graduate School and the director of the graduate program, the chair of the Graduate Admissions Committee will notify the students accepted by letter.
Research Presentation/Thesis Proposal

Before the end of the student's third year, the student will give an oral presentation of their proposed PhD project, with the necessary background to support it, to the Thesis Committee. This committee will consist of six members. Four members must be members of the Imaging Science PhD Program Committee. At least one committee member must be chosen from outside the Imaging Science PhD Program Committee, and this individual must be a tenured or tenure-track faculty member at Washington University. The committee will be chaired by the PhD mentor. At least two weeks prior to the presentation, the student will present to the Thesis Examination Committee a written document outlining the research background, proposed procedures, preliminary results and plans for completion. The required document will be typically between 15 and 30 pages in length, and it must contain a comprehensive bibliography.

The student will be placed on probation if they fail to pass their Thesis Proposal by the sixth semester. The student will be given a second opportunity to pass the exam during their seventh semester. If the student passes the second exam and meets the other program requirements (e.g., grades), they may continue the program without prejudice. If the student fails the exam a second time, they will be terminated from the PhD program.

Dissertation

The student will prepare a written dissertation for examination by the Thesis Examination Committee and will defend the dissertation before this committee. Should a member of this committee be unable to participate, the director of the graduate program, in consultation with the PhD mentor, will choose a replacement. If the committee members feel that the dissertation has deficiencies, they may recommend that the candidate address them and send the revised dissertation to the committee members for approval. The committee may also recommend that the candidate present another oral defense of the modified work. The Thesis Committee will inform the director of the graduate program, and they will warn the student in writing that the student must submit a revised dissertation and pass the oral defense (if recommended) in order to complete the PhD program. If, after revision and reexamination, the Thesis Committee still finds deficiencies and cannot reach unanimous agreement to approve the dissertation, the Graduate School's Policy on Dissenting Votes will apply.

Teaching Requirements

Students in the PhD program will receive formal pedagogical training by attending a minimum of two Teaching Workshops offered by the Washington University Teaching Center (http://teachingcenter.wustl.edu/graduate-students/workshops). They will be expected to fulfill the teaching requirements of their designated administrative home department. The teaching requirements must be completed before the student submits their doctoral dissertation to the Graduate School.
