Philosophy

The Department of Philosophy houses two doctoral programs: a PhD in Philosophy and an interdisciplinary PhD in Philosophy-Neuroscience-Psychology (PNP). The Philosophy program covers a broad array of philosophy, with particular strengths in ethics, moral psychology, and political philosophy; philosophy of mind, philosophy of language, philosophy of science, and metaphysics; and the history of philosophy. The PNP program draws on a core faculty in philosophy and on Washington University’s exceptional psychology and neuroscience faculty.

The department accepts about 10 percent of the applicants to these programs and maintains about 25 students in both programs. We are especially open to interdisciplinarity, and we are committed to providing methodologically and substantively broad philosophical development. Applicants from a wide range of backgrounds are welcome; the most successful applicants have evidence of philosophical talent and promise.

Both programs take at most six years, during which all PhD students are fully supported. The first six or seven semesters are dedicated primarily to courses, which may include independent studies and courses in other programs, such as classics, law, political science and women's studies. Students in their first seven semesters must also complete two qualifying papers that bridge the gap between seminar papers and professional publications. In addition, the department houses two dissertation workshops: one that is required for Philosophy students in their third year and beyond and the other for PNP students in all years. Students in their fourth year devise a dissertation prospectus and defend the prospectus in an oral exam. The fifth year then typically offers fellowship support for the drafting of the full dissertation, before a sixth year is given over to revisions, a required colloquium, and job applications.

The department also works hard to prepare its students as teachers and as potential academic job applicants. Students are required to participate in mentored teaching experiences for two of their six years in residence, and they may serve as the instructors of record for their own courses in University College or Summer School. Placement efforts begin during first-year orientation and intensify during the spring of the student’s fifth year.
