Rehabilitation and Participation Science

The Rehabilitation and Participation Science (RAPS) PhD program aims to develop rehabilitation scientists whose research questions are chosen based explicitly on their potential to generate fundamental knowledge that will enhance health, improve quality of life, and reduce illness and disability. Our doctoral model is that of mentored research, wherein students devote the majority of their time to research activities beginning in the first semester and become increasingly independent. Students may choose their area of study to be in rehabilitation neuroscience, pediatric rehabilitation, outcome science, community health, and productive aging.

This program is designed to be completed in four to five years of full-time study. The maximum time allowed for completion is seven years, and there is no provision for part-time study. A tuition stipend and fellowship is provided for up to five years.

Graduates of the RAPS PhD program will be prepared for careers as independent scientists and academicians in research universities, research institutes, or industry settings.

Faculty

Chair  
Carolyn Baum (http://www.ot.wustl.edu/about/our-people/faculty/carolyn-m-baum-254)  
Elias Michael Director and Professor of Occupational Therapy, Neurology, and Social Work  
PhD, Washington University  
OTR/L, University of Kansas

Associate Professor  
Allison King (http://www.ot.wustl.edu/about/our-people/faculty/allison-king-265)  
Associate Professor of Occupational Therapy, Medicine, Pediatrics, Surgery (Prevention and Medicine) and Education  
MD, University of Missouri  
MPH, Saint Louis University  
PhD, Saint Louis University

Assistant Professor  
Kerri Morgan (http://www.ot.wustl.edu/about/our-people/faculty/kerri-morgan-288)  
Assistant Professor of Occupational Therapy and Neurology  
PhD, Washington University School of Medicine, Program in Physical Therapy  
OTR/L, Washington University School of Medicine, Program in Occupational Therapy  
ATP

Bobbi Pineda (http://www.ot.wustl.edu/about/our-people/faculty/bobbi-pineda-270)  
Assistant Professor of Occupational Therapy and Pediatrics  
PhD, University of Florida  
OTR/L, University of Florida

Susan Stark (http://www.ot.wustl.edu/about/our-people/faculty/susy-stark-271)  
Assistant Professor of Occupational Therapy, Neurology, and Social Work  
PhD, University of Missouri  
OTR/L, Washington University School of Medicine Program in Occupational Therapy

Alex Wong (http://www.ot.wustl.edu/about/our-people/faculty/alex-wong-399)  
Assistant Professor of Occupational Therapy and Neurology  
PhD, Hong Kong Polytechnic University  
DPhil, University of Illinois at Urbana-Champaign

Instructor  
Benjamin Philip (http://www.ot.wustl.edu/about/our-people/faculty/benjamin-philip-478)  
Instructor in Occupational Therapy and Neurology  
PhD, Brown University

Degree Requirements

PhD in Rehabilitation and Participation Science (RAPS)

Applicant Background

RAPS PhD students may enter the program from a variety of clinical backgrounds. All students chose to pursue the RAPS PhD degree because of their desire to generate knowledge to improve rehabilitation practices and thus people's lives through participation. Prior research experience is strongly encouraged.

Curriculum

Students must complete core courses, electives to enhance their learning, research in their mentor's laboratory and a dissertation. Prior graduate courses that explicitly meet the program requirements may be considered (syllabus must be submitted for review and approval of the RAPS PhD Chair).
All RAPS PhD students will join faculty in a biweekly seminar where faculty and student research is presented and discussed. Presentations will also be made by Washington University faculty and visiting professors who will be invited to spend time with faculty and students.

**Core Courses**

- Theories, Models and Classifications of Rehabilitation and Participation Science (RAPS, 3 units)
- Biopsychosocial Factors Affecting Performance (RAPS, 3 units)
- Environmental Factors and Participation (RAPS, 3 units)
- Measurement Theory and Development (RAPS, 3 units)
- RAPS Seminar (RAPS, 1 unit)

Additional courses will be required in research design methods and graduate statistics.

**Research Units**

It is expected that all students will be involved in research beginning in their first semester and continuing through completion of the degree. Prior to completion of courses and the qualifying exam, each student is expected to spend at least 15-20 hours per week actively engaged in research. After passing the qualifying exam, students are expected to focus full-time on their dissertation and other research projects. It is anticipated that these efforts will lead to refereed publications.

It is possible that a student may find that their interests lie in an area different from that originally selected. In this case, the student may switch laboratories and mentors with the approval of the new mentor and the RAPS PhD Chair and necessary adjustments in course and laboratory experiences.
