Philosophy

The Department of Philosophy houses two doctoral programs: a PhD in Philosophy and an interdisciplinary PhD in Philosophy-Neuroscience-Psychology (PNP). The Philosophy program covers a broad array of philosophy, with particular strengths in ethics, moral psychology, and political philosophy; philosophy of mind, philosophy of language, and metaphysics; and the history of philosophy. The PNP program draws on a core faculty in philosophy and on Washington University’s exceptional psychology and neuroscience programs.

The department accepts about 10% of the applicants to these programs and maintains about 25 students in both programs. We are especially open to interdisciplinary work and are committed to providing methodologically and substantively broad training. Applicants from a wide range of backgrounds are welcome; the most successful applicants have evidence of philosophical talent and promise.

Both programs take six years, during which all PhD students are fully supported. The first six or seven semesters are dedicated primarily to course work, which may include independent studies and courses in other programs, such as classics, law, political science, and women’s studies. Students in their first seven semesters must also complete two or three qualifying papers that bridge the gap between seminar papers and professional publications. In addition, the department houses two dissertation workshops, one required for Philosophy students in their third year and beyond and the other for PNP students in all years. Students in their fourth year finish their third qualifying paper, devise a dissertation prospectus, and defend the prospectus in an oral exam. Then, the fifth year typically offers fellowship support to draft the full dissertation, before a sixth year is given over to revisions, a required colloquium, and job applications.

The department also works hard to prepare its students as teachers and as potential academic job applicants. Students typically serve as teaching assistants for four of their six years in residence, and teach at least one of their own courses in University College or Summer School. Placement efforts begin during the first-years’ orientation and intensify in the spring of the student’s fifth year.
