Admission Requirements for the Study of Medicine

Entrance requirements to the School of Medicine include:

1. Evidence of superior intellectual ability and scholastic achievement;
2. Completion of at least 90 semester hours of college courses in an approved college or university;
3. Completion of the Medical College Admission Test of the Association of American Medical Colleges; and
4. Evidence of character and integrity, a caring and compassionate attitude, scientific and humanitarian interests, effective communication skills, and motivation suitable for a career in medicine.

Chemistry, physics and mathematics provide the tools for modern biology, for medicine and for the biological basis of patient care. Thus, a firm grounding in these subjects is essential for the study of medical sciences. Entering students are expected to have accomplished at least the equivalent of one-year courses at the undergraduate level in physics and biology; mathematics through calculus, including integral equations and differential equations; and chemistry, including one year of general or inorganic chemistry and one year of organic chemistry. Course work in biochemistry is encouraged although not required. In addition, one semester of biochemistry can be substituted for one semester of organic chemistry. Similarly, one semester of statistics can be substituted for one semester of calculus. In selected instances, one or more of these prerequisites may be waived by the Committee on Admissions, but applicants are strongly advised to pursue their interests in these and in other areas of science.

A major goal of undergraduate college work should be development of the intellectual talents of the individual. This often involves the in-depth pursuit of some area of knowledge, whether in the humanities, social sciences or natural sciences. At the same time, a diversity of background is encouraged in order to provide a necessary foundation for the development of cultural awareness, sensitivity and competence. Specific courses, other than the few in the natural sciences, are not prerequisites because a great variety of courses and life experiences may prepare students for the many roles they may play in their medical careers.

Technical Standards Statement

Graduates of Washington University with a Doctor of Medicine degree are expected to have broad competence in the basic skills that underlie the general practice of medicine and surgery. All graduates must be able to take a history, examine a person, and synthesize the findings into a diagnosis and plan of evaluation and treatment independently. Thus, medical students must possess the requisite sensory, motor, communicative and cognitive capabilities to accomplish these requirements in a reliable manner in order to be competent and safe medical practitioners.

Application Procedure

General information for prospective medical students and instructions about how to apply can be found on the Medical Student Admissions website (http://mdadmissions.wustl.edu).

Washington University School of Medicine participates in the American Medical College Application Service (AMCAS) of the Association of American Medical Colleges. AMCAS provides a centralized system for applying to any participating medical school with only one application and one set of official transcripts of academic work.

The AMCAS Application for Admission (https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas), common to all participating medical schools, is available online. Applicants are urged to file their applications as early as possible.

Applicants to the first-year class must submit their AMCAS application no later than December 1 of the year prior to that in which they want to matriculate. Additionally, applicants must complete a supplemental application (https://mdapply.wustl.edu), submit letters of recommendation, and pay a nonrefundable application fee of $100. These materials must be received no later than December 31. The Committee on Admissions will only evaluate an application when it is complete.

Selected applicants are invited for a personal interview, as well as a tour of the School of Medicine and the Washington
University Medical Center. This visit provides extensive
opportunities for the applicant to meet and talk with students and
faculty members.

If an applicant is planning a trip to the St. Louis area, it is
appropriate to contact us by email (mdadmissions@wustl.edu)
to inquire if an interview has been authorized. The inquiry should
be submitted at least three weeks in advance of the anticipated
tavel. The Office of Admissions is open weekdays from 8:00
a.m. to 5 p.m. Central Time.

Admission decisions are made by the Committee on Admissions
on a rolling schedule beginning in early November. Applicants
are notified as soon as a final decision has been made on their
application, but by April 1, every applicant should be notified
whether they are accepted, on the waiting list or not accepted.

Upon notification of acceptance for admission to the school, the
applicant is required to file a Statement of Intent to Matriculate
within four weeks. Three options are presented: 1) accept the
offer of admission; 2) accept the offer of admission and request
financial aid materials; or 3) decline the offer of admission.
The School of Medicine abides by the traffic rules regarding
application timelines as established by AMCAS. Accepted
applicants who are noncompliant with AMCAS traffic rules and
medical school deadlines may have their acceptance into the
class rescinded.

After the applicant has been accepted, matriculation is
contingent upon sustained superior academic performance
as well as continued ethical, honest and mature
department. Accepted applicants must report to the Registrar
of the School of Medicine all institutional judicial or academic
sanctions and/or legal actions in which they have been a party
prior to matriculation at the School of Medicine. Accepted
applicants must report all institutional judicial and academic
charges and/or legal charges brought against them before
matriculation at the School of Medicine where such charges
could result in sanctions. Concealing or failing to report such
sanctions and/or charges promptly and, more generally, failure
to maintain high standards of moral and ethical behavior may
result in rescission of acceptance or dismissal from the School
of Medicine or revocation of the Doctor of Medicine degree.

**Merit-Based Scholarships**

Merit-based scholarships are awarded in various amounts as
funds allow. Recipients are selected based on their personal
and academic accomplishments and on their perceived potential
to lead and contribute to the profession. There are multiple
full and partial awards available. All accepted students are
considered for merit-based scholarships without additional
applications. Please consult the Financial Information section
(http://bulletin.wustl.edu/medicine/financial/#md) of this Bulletin
for further details.

**Background Checks and Screening for Controlled Substances**

Students entering the School of Medicine who will have contact
with patients are required to have criminal background checks
and screening for controlled substances (THC-cannabis,
cocaine, opiate, amphetamine, PCP-phencyclidine) in order to
qualify for participation in patient care activities at Washington
University School of Medicine-affiliated facilities. Drug screening
usually will be conducted during student orientation prior to
the start of classes. Incoming, prematriculant students, or
visiting students will be disqualified to study at the School of
Medicine if they do not consent to background checks, if they
have significant positive findings on the background checks, or
if they have illicit substances detected on drug screening without
a bona fide medical indication. Disqualified prematriculant
students and disqualified visiting students will be precluded from
matriculation and will not be registered as students in the School
of Medicine.

**Third-Year Class Transfer Program**

Each year, Washington University School of Medicine accepts
a limited number of transfer students into its third-year class
depending on the availability of positions. Transfer applications
are accepted from well-qualified second-year students who
are enrolled in good standing and eligible to continue in their
LCME-accredited U.S. medical schools. Applicants must also
have a compelling personal reason for requesting transfer and
must have the full approval of the dean of their current school.

Accepted students are required to successfully complete the
USMLE Step 1 examination.

Transfer application forms for admittance into the third-year class
are available after October 1 for the following academic year.
The deadline for submission of applications is March 31. Those
applicants selected for an interview will be invited to visit the
Washington University Medical Center. Applicants will be notified
of the decision of the Committee on Admissions by May 15 or
when a position becomes available. Inquiries should be directed
to:

Joint

Medical Scientist Training Program (MSTP)

Admission Procedures

Individuals interested in applying to the Medical Scientist Training Program must complete the MD-PhD sections on the AMCAS application (https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas) and the Washington University School of Medicine supplemental application. The MSTP requires letters of recommendation from the applicant’s research mentors. All application materials are due by 11:59 p.m. on October 31. Approximately 100 applicants will be invited to interview for 25 first-year MD-PhD slots. Interviews (http://mstp.wustl.edu/admissions/Pages/Interview-Visit.aspx) are conducted on designated Fridays from September through January (http://mstp.wustl.edu/admissions/Pages/Interview-Dates.aspx). Decisions are made on a rolling basis, with the first decisions being released in November.

Admissions Requirements

Only individuals who have spent the equivalent of at least two years or four semesters in laboratory research should apply to the Medical Scientist Training Program. Applicants must meet the requirements for admission to both the School of Medicine and the doctoral program of their choice. The GRE is not accepted. Superior scholastic performance and outstanding potential for a career in research are key components of a successful application. Applications from international students (http://mstp.wustl.edu/admissions/Pages/International-Students.aspx) are welcome.

Transfer Applicants

Although most individuals enter the program as first-year students, applications will be accepted from students who have already initiated MD or PhD training. The deadline for transfer applications is 11:59 p.m. on October 15. Please review the MSTP Transfer Policy (http://mstp.wustl.edu/admissions/Pages/MD-Transfers.aspx) for additional information.

Doctor of Medicine and Master of Science in Clinical Investigation (MD/MSCI)

Admissions

Applications are open September 15-November 1 for January start date, and January 1-April 17 for summer or fall start dates. Applicants must submit the following:

- Application form (https://crtcapply.dom.wustl.edu)
- Current Biosketch or CV
- Individual Development Plan
- Research Plan
- Mentor Letter of Support
- Department Chair or Division Chief Recommendation Letter
- Official Transcripts

Individuals who participate in a Clinical Research Training Center (CRTC) training program (i.e., Postdoctoral MTPCI, KL2, TL1 Intensive, or K12) are eligible to pursue the MSCI degree as their didactic course of study and do not need to complete a separate application.

Doctor of Medicine and Master of Population Health Sciences (MD/MPHS)

Prospective Students

Applicants should be in the process of completing a degree in a clinical training program at the doctoral level or should have
completed such a degree. The pace of course work assumes students have familiarity with clinical medicine.

Application Deadlines
For 2018-19 academic year: March 15, 2018
Notification to students of admission decision: April 15, 2018
Commitment deadline: May 1, 2018

Doctor of Medicine and Master of Public Health (MD/MPH)

Prospective Students
Applicants should be in the third year of their medical school program. Prior to entering the MPH program, students should have taken courses (up to 11 credit hours) that count toward their MPH degree.

Application Deadlines for 2018-19 Academic Year
Applicants will apply online (https://sophasexpress.liaisoncas.com).
Application deadline: December 15, 2018
Admission decisions sent: February 1, 2019
Commitment deadline: April 1, 2019
