Department of Otolaryngology

The Department of Otolaryngology-Head & Neck Surgery (http://oto.wustl.edu) at Washington University in St. Louis has a rich, 130-year history of leadership in our field that is built on the foundations of academic medicine: patient care, research, training and service. Our past leaders include luminaries in the field of otolaryngology, such as John Blasdel Shapleigh, MD; Greenfield Sluder, MD; Lee Wallace Dean, MD; Theodore Walsh, MD; Joseph Ogura, MD; John Fredrickson, MD; Richard A. Chole, MD, PhD; and, presently, Craig A. Buchman, MD, FACS. Even from our earliest days, prior to the inception of the McMillan Eye, Ear, Nose and Throat Hospital (circa 1943), excellence has been an integral part of the department's fabric. A look at former faculty and program graduates reveals many of the true innovators in our field. While we remain humbled by our beginnings and past achievements, we choose not to rest on our laurels. Rather, we aspire to further our commitment to improving patients' lives by leading our field and its clinical application. Today, more than ever, we are driven to provide highest-quality, cutting-edge patient care that is both safe and effective. Our Washington University physicians and team, together with our Honor Roll Award-winning hospital, Barnes-Jewish Hospital (U.S. News, 2018-19), are second to none when it comes to tackling the full spectrum of conditions involving the ear, nose, throat, head and neck. Our basic, translational and clinical research programs are remarkable, providing answers to a variety of relevant questions that build on our foundations of knowledge, lay the groundwork for future clinical trials, and provide state-of-the-art patient solutions. Our educational programs for medical and graduate students, physicians in training, and established practitioners are committed to creating a culture of lifelong learning that firmly establishes our next generation of leaders in the field. Our residency program is highly rated by all metrics, providing balanced training across the clinical subspecialties and unique opportunities for growth and development as clinician-scientists (T32 training grant) and educators. We are most proud that these activities are ongoing in a work culture that values collegiality, inclusivenes, diversity and mutual respect. The Department of Otolaryngology-Head & Neck Surgery at Washington University in St. Louis is a really outstanding place!

CID at Washington University School of Medicine

The consortium of graduate education, research and clinical programs known today as CID at Washington University School of Medicine was born out of the pioneering efforts of St. Louis physician Max Goldstein, MD. In 1914, he founded the Central Institute for the Deaf (CID), where doctors and teachers worked together to help deaf people. When CID’s school building opened two years later, its auditory/oral methods for instructing deaf children were groundbreaking.

Washington University and CID first joined forces in 1931, when CID’s established teacher training program became the first deaf education undergraduate program to affiliate with a university. Graduate programs in deaf education, audiology, and speech and hearing sciences soon followed.

CID’s research efforts began in the 1930s to study the anatomy and science of hearing. During World War II, CID’s research on hearing loss in military personnel laid the foundation for the field of audiology. CID also pioneered hearing testing and hearing aids, and it opened the country’s first hearing aid clinic in 1941. In September 2003, a new affiliation transferred CID’s graduate degree programs, research programs and adult audiology clinic — along with its building — to Washington University School of Medicine. The CID school continues to operate on the School of Medicine campus as CID — Central Institute for the Deaf.

Today, these programs continue to work together to fulfill a shared mission to serve people with hearing loss.

Faculty

Department Head

Craig A. Buchman, MD, FACS (https://oto.wustl.edu/people/craig-a-buchman-md)

Visit our website for more information about our faculty (http://oto.wustl.edu/About-Us/Faculty-Physicians/) and their appointments.

A

Azadeh Afshari, DDENT, MS
Instructor in Clinical Otolaryngology (primary appointment)
DDENT Univ of Texas Med Sch Houston 2014
BS West Virginia University 2004
MS Univ of Texas Med Sch Houston 2013

B

Sean B Bailey, MS, MD
Instructor in Clinical Otolaryngology (primary appointment)
BS Tulane University 1981
MS Tulane University 1988
MD Tulane University 1987

Jianxin Bao, PHD
Adjunct Associate Professor of Otolaryngology (primary appointment)
PHD University of Florida 1992

Lynda Cheryl Berkowitz, MS
Instructor in Otolaryngology (primary appointment)  
Instructor in Audiology and Communication Sciences  
BS University of Illinois 1981  
MS Washington Univ in St. Louis 1983  

Pablo M Blazquez Gamez, PHD  
Associate Professor of Otolaryngology (primary appointment)  
PHD University of Seville 1998  

Andrew E Bluher, MD  
Assistant Professor of Otolaryngology (Pending Executive Faculty Approval) (primary appointment)  
MD University of Maryland 2014  
BS Princeton University 2009  

Joseph P Bradley, MD  
Assistant Professor of Otolaryngology (primary appointment)  
BS Washington Univ in St. Louis 2003  
MD University of Kansas Medical 2008  

Gregory Harris Branham, MD  
Professor of Otolaryngology (primary appointment)  
BS University of South Carolina 1979  
MD University of South Carolina 1983  

Craig Alan Buchman, MD  
Lindburg Professor of Otolaryngology (primary appointment)  
Head of the Department of Otolaryngology  
BA University of Georgia 1986  
MD University of Florida 1990  

John Jeonhwan Chi, MD, MS  
Associate Professor of Otolaryngology (primary appointment)  
MD SUNY DOWNSTATE MED BROOKLYN 2007  
BS Columbia University 2001  
MS City College 2003  

John N Chiapel  
Instructor in Clinical Otolaryngology (primary appointment)  

Richard A Chole, PHD, MD  
Professor of Otolaryngology (primary appointment)  
Professor of Audiology and Communication Sciences  
Professor of Developmental Biology  
PHD University of Minnesota 1977  
MD University of Southern Calif 1969  

William W. Clark, PHD, MS, PHD1  
Professor of Otolaryngology (primary appointment)  
Professor of Audiology and Communication Sciences  
Professor of Education  
BA University of Michigan 1969  
PHD University of Michigan 1975  
MS University of Michigan 1973  
PHD1 University of Michigan 1975  

Sheldon C Cohen, DDENT  
Instructor in Clinical Otolaryngology (primary appointment)  
DDENT Southern Illinois University 1976  
BS Washington Univ in St. Louis 1973  

Lisa S. Davidson, MS, PHD  
Associate Professor of Otolaryngology (primary appointment)  
Associate Professor of Audiology and Communication Sciences  
MS Washington Univ in St. Louis 1987  
BS East Tennessee State Universi 1985  
PHD Washington Univ in St. Louis 2003  

Sheldon L Davis  
Assistant Professor of Clinical Otolaryngology (primary appointment)  

Andrew J. Drescher, MD  
Associate Professor of Otolaryngology (primary appointment)  
MD University of Michigan 2002  
BS Yale University 1998  

Norman Steven Druck, MD  
Assistant Professor of Clinical Otolaryngology (primary appointment)  
MD University of Illinois 1970  
BA Washington Univ in St. Louis 1967  

Katherine Dunsky, MD  
Assistant Professor of Otolaryngology (primary appointment)  
MD Saint Louis University 2010  

Nedim Durakovic, MA, MD  
Assistant Professor of Otolaryngology (primary appointment)  
MA Brown University 2012  
MD Brown University 2012  
BA Brown University 2007  

Nyssa F Farrell, MD  
Assistant Professor of Otolaryngology (Pending Executive Faculty Approval) (primary appointment)  
BS University of South Carolina 2010  
MD University of South Carolina 2014  

Charles Coleman Finley  
Adjunct Research Associate Professor of Otolaryngology (primary appointment)  

Jill B Firszt, MS, PHD  
Professor of Otolaryngology (primary appointment)  
Professor of Audiology and Communication Sciences  
MS University of Illinois 1982  
BS University of Illinois 1978  
PHD University of Illinois 1998  

Debra Ann Gonzalez, MD  
Assistant Professor of Otolaryngology (primary appointment)  
BS Wellesley College 1982
MD Cornell University 1987

James Dean Gould, MD
Instructor in Clinical Otolaryngology (primary appointment)
BA University of Virginia 1989
MD University of Virginia 1993

Heather Jean Grantham, M ED, PHD
Associate Professor of Otolaryngology (primary appointment)
Associate Professor of Audiology and Communication Sciences
Director of Deaf Education Studies in Audiology and
Communication Sciences
M ED Smith College 2005
BA Emory University 1995
PHD Washington Univ in St. Louis 2009

Michael Anne Gratton, PHD
Professor of Otolaryngology (primary appointment)
PHD State Univ of NY Buffalo 1989

Christine Hilleary Gustus, MS
Instructor in Otolaryngology (primary appointment)
Instructor in Audiology and Communication Sciences
BS Purdue University 1973
MS Washington Univ in St. Louis 1975

Jason M. Hanson, MD
Instructor in Clinical Otolaryngology (primary appointment)
BA Johns Hopkins University 1988
MD Northwestern University 1992

Eugenio Guidote Herbosa
Instructor in Clinical Otolaryngology (primary appointment)

Jacques A Herzog, MD
Associate Professor of Otolaryngology (primary appointment)
MD University of MO Kansas City 1980
BA University of Missouri 1980

Keiko Hirose, MD
Professor of Otolaryngology (primary appointment)
Professor of Audiology and Communication Sciences
Professor of Pediatrics
Vice Chairman for Pediatrics Dept of Otolaryngology
MD Harvard University 1993

Dee Jay Hubbard, MA, PHD, MA1
Adjunct Assistant Professor of Otolaryngology (Speech Pathology) (primary appointment)
MA University of Iowa 1965
PHD University of Iowa 1967
BS Kansas State University 1962
MA1 University of Missouri 1999

Margaret Naunheim Huston, MD
Assistant Professor of Otolaryngology (primary appointment)
BA Duke University 2009
MD University of Chicago 2013

Ryan Scott Jackson, MD
Assistant Professor of Otolaryngology (primary appointment)
MD Saint Louis University 2009
BA Saint Louis University 2004

Arnold Scott Jacobson, DENT, MS
Instructor in Clinical Otolaryngology (DMD) (primary appointment)
DENT Washington Univ in St. Louis 1976
MS University of Missouri 1977
BA University of Missouri 1970

Susan Jerger
Adjunct Research Professor of Otolaryngology (primary appointment)

Eugenia Kardaris
Instructor in Clinical Otolaryngology (DDS) (primary appointment)

Cristine Nicole Klatt-Cromwell, MD
Assistant Professor of Otolaryngology (primary appointment)
BS University of Oklahoma 2007
MD University of Oklahoma 2011

Carl Wesley Lee
Instructor in Clinical Otolaryngology (primary appointment)

David Seamus Leonard, MBCHB, MHA
Associate Professor of Otolaryngology (primary appointment)
BA Dartmouth College 1995
MBCHB National University of Irelan 2000
MHA Harvard University 2012

Jeffery Lichtenhan, PHD, BAS, MSSH
Assistant Professor of Otolaryngology (primary appointment)
Assistant Professor of Audiology and Communication Sciences
PHD University of Kansas 2006
BAS University of Kansas 2000
MSSH University of Kansas Medical 2002

Judith E Lieu, MD
Professor of Otolaryngology (primary appointment)
Vice Chairman Education Department of Otolaryngology
MD Washington Univ in St. Louis 1992
BS University of CA Davis 1988

Richard W Maack, MD
Instructor in Clinical Otolaryngology (primary appointment)
BS Muhlenberg College 1981
MD University of Maryland 1985

Marshall S Manne, MS, DENT
Instructor in Clinical Otolaryngology (DDS) (primary appointment)
BA Washington Univ in St. Louis 1956
MS Indiana University Bloomington 1964
DDENT Washington Univ in St. Louis 1960

Sean Massa, MD
Assistant Professor of Otolaryngology (primary appointment)
MD University of Pennsylvania 2013
BS Northwestern University 2008

Claire Matthews, MA, PhD
Adjunct Assistant Professor of Otolaryngology (Speech Pathology) (primary appointment)
BA University of Kansas 1969
MA University of Kansas 1978
PHD University of Kansas 1980

Angela Liu Mazul, PHD, MS
Assistant Professor of Otolaryngology (primary appointment)
Assistant Professor of Surgery (Public Health Sciences)
PHD University of North Carolina 2016
MS Tulane University 2010
BS Georgia Tech 2009

Murray D McGrady, MD
Instructor in Clinical Otolaryngology (primary appointment)
MD University of Illinois 1986
BS University of Illinois 1982

Jonathan L McJunkin, MD
Associate Professor of Otolaryngology (primary appointment)
BS Northwestern University 2001
MD Jefferson Medical College 2005

Maithilee D Menezes, MD
Assistant Professor of Otolaryngology (primary appointment)
MD Grinnell College 2002
BS Grinnell College 1997

David W. Molter, MD
Professor of Otolaryngology (primary appointment)
MD Duke University 1988
BS Duke University 1980

Nancy Tye Murray, MS, PHD
Professor of Otolaryngology (primary appointment)
Professor of Audiology and Communication Sciences
MS University of Iowa 1979
BS Texas Christian University 1977
PHD University of Iowa 1984

Margaret A Ogden, MD
Professor of Otolaryngology (primary appointment)
Vice Chairman for Clinical Operations Dept of Otolaryngology
MD Washington Univ in St. Louis 2002
BA Amherst College 1997

Kevin Kenneth Ohlemiller, PHD
Associate Professor of Otolaryngology (primary appointment)
Associate Professor of Audiology and Communication Sciences
BS Indiana University Bloomington 1983
PHD Northwestern University 1990

Amanda J Ortman, MS, PHD
Assistant Professor of Otolaryngology (primary appointment)
Assistant Professor of Audiology and Communication Sciences
Director of Audiology Studies in Audiology and Communication Sciences
MS Washington Univ in St. Louis 2003
BS Missouri Baptist College 2001
PHD University of Pittsburgh 2012

Randal C Paniello, MD, BS1, MS, MBA
Professor of Otolaryngology (primary appointment)
MD University of Illinois 1984
BS1 University of Illinois 1979
MS University of Illinois 1980
BS University of Illinois 1979
MBA Washington Univ in St. Louis 1999

Margaret Grace Peak, MA, PHD
Adjunct Assistant Professor of Otolaryngology (Audiology) (primary appointment)
MA Saint Louis University 1961
BS Maryville University 1959
PHD Columbia University 1975

Jonathan Erik Peelle, BAS, PHD, MS PSYC
Associate Professor of Otolaryngology (primary appointment)
Associate Professor of Psychological & Brain Sciences
BAS Houghton College 1999
PHD Brandeis University 2005
MS PSYC Brandeis University 2002

Jay Francis Piccirillo, MD
Professor of Otolaryngology (primary appointment)
Professor of Biostatistics
Professor of Medicine
Professor of Occupational Therapy
Vice Chairman for Research, Dept of Otolaryngology
MD University of Vermont 1985
BA University of Vermont 1979

Patrik Pipkorn, MD
Assistant Professor of Otolaryngology (primary appointment)
MD University of Gothenburg 2007

Gerald Raymond Popelka
Adjunct Professor of Otolaryngology (primary appointment)

Lisa Gayle Potts, PHD, MS
Assistant Professor of Audiology and Communication Sciences (primary appointment)
Assistant Professor of Audiology and Communication Sciences
BS Southern Illinois University 1988
Sidharth Venkata Puram, MD, PHD  
Assistant Professor of Otolaryngology (primary appointment)

MPH Univ of Texas Med Sch Houston 2014  
BS Middlebury College 2000  
MD Rutgers University 2005

Research Electives

Otolaryngology Research Electives

During the fourth year, opportunities exist for many varieties of advanced clinical or research experiences. The type of research will depend upon the current phase of the research program in each laboratory. Students should contact the director of each laboratory to negotiate.
This lab studies the role of the vestibulocerebellum and its target nuclei for eye movement control and spatial orientation. We use a range of methodologies, including single and multiunit recordings, electrical brain stimulation, computational methods, pharmacology and behavioral studies. Our main lines of research are as follows: (1) signal transformations carried out by the the vestibulocerebellum during visual and vestibular stimulation; (2) neuronal computations performed by the anterior and posterior cerebellar vermis for spatial navigation in mice; and (3) the role of the cerebellum-brainstem loop in motor learning in the vestibulo-ocular reflex.

Students will be instructed in one or several techniques and are expected to contribute significantly to the development of specific lab projects.

Our focus is clinical outcomes research in pediatric otolaryngology. The Clinical Outcomes Research office performs clinical epidemiology and health services research. (Please reference the research elective offered by Dr. Jay Piccirillo for more details.) These techniques and methodologies are applied to investigate clinical problems in children. Projects currently underway include the evaluation of the quality of life of young children with hearing loss, the evaluation of hearing loss on the perception of fatigue in children, and the use of MRI to investigate the effects of hearing loss in children. Potential studies include evaluating changes in the quality of life of children who begin using hearing amplification devices. Other projects of the student’s choosing that would utilize these research techniques may also be pursued.

The focus of this lab is on gene–environment interactions in cochlear injury. We study the interaction of genes and environment that increase cochlear injury due to noise and ototoxic exposure, with an emphasis on how these may yield apparent presbycusis. Because cochlear function and injury is the same in mice and humans and governed by the same genes, we use mostly mouse models. Methods employed include standard auditory brainstem response assessment and intracochlear recording, quantitative light microscopy, immunohistochemistry, and Western blots. We also collaborate

to map and perform the expression profiling of genes that underlie traits we have discovered. We and our collaborators have identified specific genes and inbred strains of mice that mimic the three major forms of human presbycusis (sensory, neural and strial). Sensory presbycusis appears to be promoted by alleles and mutations that impair protective factors (e.g., antioxidant enzymes) or that impair ion homeostasis. Neural presbycusis can be modeled by mutations that alter the function of cholinergic receptors. Although we are not sure what types of genes and mutations can lead to strial presbycusis, we have discovered four mouse strains that show the key feature of this disease (age-related endocochlear potential reduction) and that also show distinct types of strial pathology.

We have shown that some of the same gene alleles and mutations that promote presbycusis also promote cochlear noise injury. Such findings point to an interpretation of sensory presbycusis as principally cumulative injury. We have also published evidence for one or more quantitative trait loci that impact the qualitative character of noise injury. Important implications of our findings are (1) that there exists no single ‘mammalian’ archetype of cochlear noise injury and (2) that injury to the organ of Corti and the lateral wall are mechanistically and genetically independent.

Our research is eminently adaptable in difficulty and scale to students’ schedules and other requirements. Students may expect to learn the full range of methods we employ, including physiology, immunohistochemistry, histopathology and cellular molecular techniques.
Courses

M55 Oto 660B Clinical Topics In Otolaryngology
This course consists of nine introductory lectures on common diseases of the head and neck, including voice disorders, head and neck cancer, hearing loss, management of vertigo, pediatric otolaryngology, salivary gland disorders, sinusitis, otolaryngologic emergencies and facial trauma. Additionally, there is a case-based roundtable focusing on otolaryngology disorders affecting the geriatric population and the involvement of allied health care disciplines in the evaluation and management of these patients. Each lecture is highlighted by case presentations and treatment options in addition to pathophysiology. This course follows the physical examination practicum given earlier in the academic year. Credit 9 units.

M55 Oto 801 Otolaryngology Subinternship
Four-week rotation includes evaluation of ENT problems presented to specialist for diagnosis and treatment. The student participates in the clinic, hospital, and operating room. This may also include time on the Pediatric ENT Service, Audiology, Voice Laboratory, and Vestibular Evaluation Laboratory. Option of rotation on the ENT Service at VAMC is possible.

M55 Oto 803 Pediatric Otolaryngology
The student will actively participate in the clinical office, inpatient consultations, and surgery with the attending staff at St. Louis Children's Hospital. Care would be taken to provide experience in the common problems one would see in primary care pediatrics or family practice. Participation in sub-specialty/multidisciplinary clinics such as the Cleft and Craniofacial clinic is encouraged. Opportunity will be provided to learn the fundamentals of audiological evaluation. Students participating in this elective will attend academic conferences in both the pediatric and adult divisions.

M55 Oto 833 Ambulatory Otolaryngology for the Primary Care Physician
This course offers a four-week exposure to ambulatory care of patients with diseases of the head and neck. Eight half-day sessions per week will be offered in attending clinics for general otolaryngology, head and neck cancer, otology, and pediatric otolaryngology. Two half-day sessions are reserved for audiology, vestibular lab, and voice lab experience. Surgical exposure is available for selected cases as identified by the student and attending physician, but the main goal of this rotation is outpatient diagnosis and management.

M55 Oto 900 Research Elective - Otolaryngology
Research opportunities may be available. If interested, please contact the Department of Otolaryngology.
