Public Health

The purpose of this joint degree is to train physicians in the knowledge and skills needed to recognize, analyze and solve the key problems affecting the health of our community and society. The Master of Public Health (MPH) degree offered through the Brown School is unique in that it prepares students to apply public health sciences and transdisciplinary approaches to problem solving for improving population health, especially in vulnerable communities. Courses involve learning systematic approaches to implement and sustain public health discoveries regionally, nationally and internationally. Both the Brown School and the School of Medicine are top-ranked academic centers, which makes this joint degree an outstanding opportunity.

Additional Information
For more information about the MD/MPH program, please contact Angela Hobson, PhD, assistant dean for Public Health, by phone at 314-935-2760 or by email at hobsona@wustl.edu; information can also be obtained by sending an email to Brown School admissions (brownschooladmissions@wustl.edu).

Degrees & Requirements

MD/MPH

Applicants should be in the third year of their medical school program. Prior to entering the MPH program, students should have taken courses (up to 11 credit hours) that count toward the MPH degree.

The MD/MPH provides medical students with an opportunity to supplement their clinical training with courses and experiences designed to create transdisciplinary competencies related to the improvement of population health. Students learn the basics of public health from the foundations courses. MD/MPH students can also choose from a wide variety of Transdisciplinary Problem-Solving Courses (two are required), and they will participate in small-group public health discussions in Public Health Seminar. The faculty and staff at the Brown School will help guide students toward relevant practicum experiences. When course work and practicum are completed, MD/MPH students take a comprehensive case study exam that is the final MPH requirement (Culminating Experience). In addition to completing their course work at Brown, MD/MPH students have the opportunity to apply for the Master's Research Fellows program, which allows them to work on research projects during their MPH program.

Requirements

Program format

Medical students will spend their fourth year in the MPH program. The MD/MPH curriculum comprises three full-time semesters of course work (summer, fall, and spring) at the Brown School, followed by the MPH Practicum and Culminating Experience. Students will meet the 52 required credit hours with the 11 credits earned in the MD program, 40 credits earned at the Brown School, and 1 additional credit earned in either program.

Core MPH courses
- Cross-cutting Themes in Public Health
- Epidemiology
- Biostatistics
- Environmental Health
- Health Policy and Administration
- Health Behavior and Health Promotion

Research

Please visit the Brown School MPH website for more information about our public health research (https://brownschool.wustl.edu/Academics/Master-of-Public-Health/Curriculum).

Faculty

Associate Dean for Public Health
Lora Iannotti
Associate Professor
PhD, Johns Hopkins University Bloomberg School of Public Health

Assistant Dean for Public Health
Angela Hobson (https://brownschool.wustl.edu/faculty-and-research/pages/angela-hobson.aspx)
Senior Lecturer
PhD, Saint Louis University
