Undergraduate Catalog 2014-15

About This Bulletin

The Undergraduate Catalog is Washington University in St. Louis’s catalog of undergraduate courses and degrees. The catalog includes undergraduate programs, degree requirements, course descriptions, pertinent university policies and faculty for students earning a degree through one of the four undergraduate schools: College of Arts & Sciences, Olin Business School, Sam Fox School of Design & Visual Arts (College of Architecture, College of Art), and School of Engineering & Applied Science.

The degree requirements and policies in the 2014-15 Undergraduate Catalog apply to students entering Washington University during the 2014-15 academic year.

The 2014-15 Undergraduate Catalog is entirely online but may be downloaded in PDF format for printing. Individual pages may be printed using the Print icon in the top right corner of the page.

Every effort is made to ensure that the course information, applicable policies and other materials presented in the Catalog are accurate and correct. Washington University reserves the right to make changes at any time without prior notice. Therefore, the electronic version of the Catalog may change from time to time without notice. The governing document at any given time is the then-current version of the Catalog, as published online, and then currently applicable policies and information are those contained in that Catalog.

More information about the four undergraduate schools may be found by visiting their websites:

- College of Arts & Sciences: http://college.artsci.wustl.edu
- Olin Business School: http://olin.wustl.edu
- Sam Fox School of Design & Visual Arts (College of Architecture and Art): http://samfoxschool.wustl.edu
- Engineering & Applied Science: http://engineering.wustl.edu

For the most current information about available courses and class scheduling, visit https://acadinfo.wustl.edu (WebSTAC). Questions concerning the Undergraduate Catalog may be addressed to bulletin_editor@wustl.edu.

For catalogs and course information pertaining to other Washington University in St. Louis schools and programs, please visit http://wustl.edu/academics/bulletins.html.

Washington University in St. Louis
About WUSTL

Who We Are Today

Washington University, a medium-sized, independent university, is dedicated to challenging its faculty and students alike to seek new knowledge and greater understanding of an ever-changing, multicultural world. The university is counted among the world’s leaders in teaching and research, and draws students from all 50 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Students and faculty come from more than 100 countries around the world.

The university offers more than 90 programs and almost 1,500 courses leading to bachelor’s, master’s and doctoral degrees in a broad spectrum of traditional and interdisciplinary fields, with additional opportunities for minor concentrations and individualized programs. For more information about the university, please visit: http://wustl.edu/about/facts.

Undergraduate Enrollment by School

http://wustl.edu/about/facts/#students

Committed to Our Students: Mission Statement

Washington University’s mission is to discover and disseminate knowledge, and protect the freedom of inquiry through research, teaching and learning. Washington University creates an environment to encourage and support an ethos of wide-ranging exploration. Washington University’s faculty and staff strive to enhance the lives and livelihoods of students, the people of the greater St. Louis community, the country and the world.

Our goals are:

• to welcome students, faculty and staff from all backgrounds to create an inclusive community that is welcoming, nurturing and intellectually rigorous;

• to foster excellence in our teaching, research, scholarship and service;

• to prepare students with attitudes, skills and habits of lifelong learning and leadership thereby enabling them to be productive members of a global society; and

• to be an institution that excels by its accomplishments in our home community, St. Louis, as well as in the nation and the world.

To this end we intend:

• to provide an exemplary, respectful and responsive environment for living, teaching, learning and working for present and future generations; and

• to focus on meaningful measurable results for all of our endeavors.

Teaching and Learning at Washington University

A Statement of Best Practices and Expectations

Original statement endorsed by the Undergraduate Council, November 10, 1999.

Amended statement endorsed by the Undergraduate Council, February 2, 2010.

All members of the Washington University community share responsibility for creating an atmosphere conducive to learning. A collaborative learning environment involves the active participation of both instructors and students in the classroom and in activities outside the classroom. This environment requires:

• the best effort on the part of both faculty and students to enhance the learning experience for the benefit of all persons involved;

• the recognition that all present play important roles, all participants in the learning experience deserve respect for what they bring to it, and all should be sensitive to the importance of the others in this process;

• an atmosphere in the classroom of mutual respect for all persons regardless of political, ethnic, religious, gender, sexual orientation and disability considerations.

In response to changing classroom dynamics we the Undergraduate Council make the following recommendations:

Expectations and responsibilities of the faculty: The faculty member is involved in several major roles, including those of teacher, scholar-researcher and citizen in the university. For the unimpeded performance of these functions, the faculty member is guaranteed academic freedom. At the same time, the faculty member has clear responsibilities to the students and to the institution, particularly in her/his role as teacher. Instructors should provide the basic outlines for the learning experience and provide guidance as appropriate, generally in the form of a handout or easily accessible electronic document. Such guidance should normally involve:

• the presentation of a syllabus that:

  (A) clearly identifies the goals of the course and its prerequisites, a schedule of major assignments and examinations, explicit criteria for how student work will be evaluated;
(B) contains a clear articulation of ground rules for classroom interaction and consequences for infringement (How much active participation is expected of the student? Is attendance required? If the course meets over the lunch hour, is it acceptable to eat during class? Is it acceptable to use laptop computers in class?);

- reminding students of the university’s standards for academic integrity;
- bringing new perspectives and insights to assigned readings and other text materials;
- regularly meeting class and being punctual in starting and dismissing class;
- prompt and responsible grading, with evaluative comments and opportunities for students to discuss their grades with the faculty member;
- adherence to the announced office hour schedule and offering as many avenues as possible for contact, including by telephone and email;
- the use of appropriate technology as relevant both in and outside the classroom to enhance communication between faculty and students;
- uploading course materials and sending emails in a timely manner;
- the oversight of Teaching Assistants, especially to ensure grading uniformity in large classes;
- facilitation of regular student evaluations of the faculty member’s teaching methods and materials, including midterm evaluations, as a means of creating an atmosphere of shared responsibility within the classroom;
- when possible, avoiding prohibitive costs when ordering textbooks and other course materials, and making electronic text available;
- adhering to the published final examination schedule to avoid interfering with students’ preparation for other classes.

Expectations and responsibilities of the students. Students must take responsibility for their own learning. Students also share with the instructor the responsibility for providing an environment conducive to learning. Students should personally:

- be actively engaged with the material and with the process of education;
- build their own knowledge and skills (faculty guide students to materials and methods, but the learning is up to the student);
- attend all classes, both lecture and discussion sessions, and participate in class discussions; leave class only for emergencies; use streaming video recording of lectures only for review, not as a substitute for class;
- be punctual in completing assignments;
- behave in the classroom in a manner that demonstrates respect for students and faculty;
- share responsibility for the flow of information concerning a course by regularly checking the course web page and university email;
- be familiar with and adhere to matters of academic integrity as identified by their school within the university;
- participate in objective and constructive evaluations of the instructor and of the course (this helps to clarify problems and strengths that will help the instructor to improve the course in subsequent semesters);
- conform to the rules for laptop use stated in the syllabus;
- refrain from the use of texting and cell phones.

Special student concerns. Students should take the initiative in discussing special arrangements with the instructor in a timely manner when for any reason they miss class. Students also should recognize that the collective needs of the faculty and other students in a course may outweigh individual preferences. Faculty should be sensitive to individual student needs for special arrangements:

- to accommodate disabilities, illnesses, family emergencies or academic or professional opportunities that interfere with usual class attendance or performance;
- when students miss class because of religious holidays.

Responsibilities of the university administration. For its part, the university administration must:

- continue to provide facilities and ensure adequate classroom and laboratory space that is stocked with sufficient appropriate equipment;
- give priority to supporting both faculty and students in teaching and learning;
- be responsive when normal communications between faculty and students break down by providing for a process for discussion and negotiations;
- facilitate communications among various constituents of the university;
- facilitate the flow of visitors to the classroom by notifying faculty of such matters in a timely fashion.

Where to get help

For instructors: The departmental chair, the Teaching Center, colleagues and the relevant dean’s office can offer very useful advice on teaching techniques, materials, and methods.

For students: The instructor, the TAs and Cornerstone: The Center for Advanced Learning can be counted on for guidance on how best to learn; the Writing Center can be a very helpful resource for all sorts of written assignments.

The general process of a student concern is to:

1. raise it first with the faculty member,
2. go to their four-year adviser, and
3. then to the department chair.
Disagreements that have not been resolved by this process can be addressed to the ombudsperson.

**Class Size**

More than three-fourths of Washington University’s undergraduate classes range from one to 24 students. We believe smaller classes help students learn more through stimulating group discussion. Many classes may be larger at first, but they generally become smaller as students progress in their chosen fields.

Depending on the department, classes may be smaller or larger.

**University College**

University College is the evening division of Arts & Sciences and offers a wide range of courses in a variety of academic departments and interdisciplinary and professional areas of study. Part-time and full-time study in undergraduate degree programs, graduate degree programs, and certificate programs is available. In addition, University College offers several special credit programs, such as the College Credit Program for high school students, and special noncredit programs, such as short courses, writing workshops and career workshops. For more information, visit http://ucollege.wustl.edu.

**Trustees & Administration**

**Board of Trustees**

Please visit the Board of Trustees website at http://boardoftrustees.wustl.edu.

**University Administration**

In 1871, Washington University co-founder and then-Chancellor William Greenleaf Eliot sought a gift from Hudson E. Bridge, charter member of the university’s Board of Directors, to endow the chancellorship. Soon it was renamed the “Hudson E. Bridge Chancellorship.”

Led by the Chancellor, the officers of the University Administration are detailed on the university website. Please visit http://wustl.edu/about/leadership.

Washington University recognizes the individual student’s choice in observing religious holidays that occur during periods when classes are scheduled. Students are encouraged to arrange with their instructors to make up work missed as a result of religious observance, and instructors are asked to make every reasonable effort to accommodate such requests.
Campus Resources

Student Support Services

Cornerstone: The Center for Advanced Learning. Located on the first floor of Gregg Residence House on the South 40, Cornerstone is the hub of academic support at Washington University, providing students with help in a variety of forms, including course-specific mentors, study groups, advisers of the day and intensive intersession review programs in gateway courses such as chemistry, physics and mathematics. Other services include workshops on study skills, time management and note-taking, as well as walk-in help desks for calculus and writing. Cornerstone also offers final exam work sessions and free-based graduate and professional school entrance exam preparation courses. Take advantage of our Tech Lab, which features learning software, or use our classrooms and lounge to study or relax. Most services are free, and last year, about 2,100 students participated in one or more of our programs. For more information, visit our website at cornerstone.wustl.edu or call 314/935-5970.

Disability Resources. Cornerstone is also home to Disability Resources, the official source for students with disabilities or suspected disabilities. If students have received accommodations in the past or have any physical, learning or attention disorders, they may request accommodations and services to ensure equal access in the classroom. Visit our website at disability.wustl.edu or call Cornerstone at 314/935-5970 for more information. We are located within Cornerstone, on the first floor of Gregg Residence House on the South 40.

Office for International Students and Scholars. If a student is joining the university from a country other than the United States, this office can assist him or her through its orientation programs, by issuing certificates of eligibility (visa documents), and by offering a special program in the English Language Programs. In addition, the office provides personal and cross-cultural counseling and arranges social, cultural and recreational activities that foster international understanding on campus. The Office for International Students and Scholars is in the Stix International House at 6470 Forsyth Boulevard. For more information, visit the website at oiss.wustl.edu or call 314/935-5910.

The Writing Center. The Writing Center, a free service, offers writing advice to all Washington University students. Tutors will read and discuss any kind of work in progress, including student papers, senior theses, graduate school application materials, and oral presentations. The Writing Center staff is trained to work with students at any stage of the writing process, including brainstorming, developing and clarifying an argument, organizing evidence, and improving style. Rather than editing or proofreading, tutors will emphasize the process of revision and teach students how to edit their own work. Appointments are preferred. Call 314/935-4981 to make an appointment. The Writing Center is located on level 1 in Olin Library. For more information, visit the website at writingcenter.wustl.edu.

Research Affiliations

Washington University is affiliated with the Central Institute for the Deaf, the Donald Danforth Plant Science Center, the Missouri Botanical Garden, the Newberry Library for Medieval and Renaissance Studies in Chicago and the Saint Louis Zoo. The university also owns Tyson Research Center — 2,000 acres located 20 miles west of the campus, which houses additional facilities for biology and physics. The Sam Fox School also houses the Newman Money Museum, a numismatic center.

In addition, the university has two interdisciplinary research institutes — the Division of Biology and Biomedical Sciences and the Center for Computational Biology — plus a number of interdisciplinary research centers on the Danforth and Medical campuses.

Student Health Services

Student Health Services staff members include licensed professionals in Medical Services, Mental Health Services and Health Promotion Services. Please visit us in Dardick House on the South 40, or visit our website at shs.wustl.edu for more information about each of our services and staff members.

Hours:
Monday, Tuesday and Thursday 8 a.m.–6 p.m.
Wednesday 10 a.m.–6 p.m.
Friday 8 a.m.–5 p.m.
Saturday 9 a.m.–1 p.m.

A nurse answer line is available to answer any medical questions a student may have when SHS is closed. For after-hours care, please call: 314/935-6666.

Medical Services staff members provide care for the evaluation and treatment of an illness or injury, preventive health care and health education, and nutrition, physical therapy, travel medicine and women’s health services. Student Health Services' providers are considered in-network and are participating members of the Washington University in St. Louis Physician’s Network. Any condition requiring specialized medical services will be referred to an appropriate community specialist. Student Health Services accepts most health insurance plans and will be able to bill the plan according to plan benefits when care is accessed at SHS. The student health insurance plan requires a referral any time care is not provided at SHS. Call 314/935-6666 or visit shs.wustl.edu to schedule an appointment for medical care, including allergy injections prescribed by your allergist, health consultations, for HIV or other STD testing, or for immunizations.

Appointments also are available for assessment, treatment and referral for students who are struggling with substance abuse.
The SHS pharmacy is available to all WUSTL students and their dependents who participate in the student health insurance plan. The pharmacy accepts most prescription insurance plans; please check with the pharmacist to see if your prescription plan is accepted at the pharmacy.

The SHS lab provides full laboratory services. Approximately 20 tests can be performed in the SHS lab. The remainder of all testing that is ordered by SHS is completed by Quest Diagnostics. Quest serves as our reference lab and is on the student health insurance plan as a preferred provider. The SHS lab can collect any test ordered by our providers.

All incoming students must provide proof of immunization for two measles, mumps, rubella vaccines after the age of one year old. (A titer may be provided in lieu of the immunizations.) A PPD skin test in the past six months is required for students entering the university from certain countries. This list of countries may be found on our website. We suggest all students also have Tetanus Diphtheria immunization within the past five years, Meningococcal vaccine, Hepatitis A vaccine series, Hepatitis B vaccine series and Varicella vaccine. Medical History Forms are available online at shs.wustl.edu. Failure to complete the required forms will delay registration.

**Mental Health Services** staff members work with students to resolve personal and interpersonal difficulties, including conflicts with or worry about friends or family, concerns about eating or drinking patterns, and feelings of anxiety and depression. Although some concerns are more frequent than others, students’ experiences are as varied as the students themselves. Staff members help each person figure out her or his own situation. Services include individual, group and couples counseling; crisis counseling; psychiatric consultation; and referral for off-campus counseling. Call 314/935-6666 or visit shs.wustl.edu to schedule an appointment.

**Health Promotion Services** staff members provide information and resources on issues of interest to WU students including alcohol and other drugs, weight and body image, sexual health, sleep, and stress; customize professional health education programs for groups; and work with groups of students dedicated to educating their peers about healthy decision making. Call 314/935-7139 for more information.

**Important Information About Health Insurance**

Washington University has a student health fee designed to improve the health and wellness of the entire Washington University community. This fee supports health and wellness services and programs on campus. In addition, all full-time, degree-seeking Washington University students are automatically enrolled in the Student Health Insurance Plan upon completion of registration. Students may opt out of this coverage if there is proof of existing comprehensive insurance coverage. Information concerning opting out of the student health insurance plan can be found at shs.wustl.edu after June 1 of each year. Student Health Services does provide billing services to many of the major insurance companies in the United States. Specific fees and co-pays apply to students using Medical Services and Mental Health Services; these fees may be billable to your insurance plan. More information is available at shs.wustl.edu.

**Campus Security**

The Washington University campus is among the most attractive in the nation and enjoys a safe, relaxed atmosphere. Your personal safety and the security of your property while on campus is a shared responsibility. Washington University has made safety and security a priority through our commitment to a full-time professional police department, use of closed circuit television, card access, good lighting, shuttle services, emergency telephones and ongoing educational safety awareness programs. The vast majority of crimes that occur on college campuses are crimes of opportunity, which can be prevented.

The best protection against crime is an informed, alert campus community. Washington University has developed several programs to help make your experience here a safe and secure one. An extensive network of emergency telephones, including more than 100 “blue light” telephones, is connected directly to the University Police Department and can alert the police to your exact location. In addition to the regular shuttle service, an evening walking escort service or mobile Campus Circulator is available on the Danforth Campus.

The Campus2Home shuttle will provide a safe ride home for those living in four designated areas off campus — Skinker-DeBaliviere, Loop South, north of The Loop and just south of the campus — from 6:00 p.m. to 4:00 a.m. seven days a week. The shuttle leaves from both the Mallinckrodt Center and the Brooking Drive steps and takes passengers directly to the front doors of their buildings. Shuttle drivers then will wait and watch to make sure passengers get into their buildings safely.

The University Police Department is a full-service organization staffed by certified police officers who patrol the campus 24 hours a day throughout the entire year. The Police Department offers a variety of crime prevention programs including a high-security bicycle lock program, free personal-safety whistles, computer security tags, personal safety classes for women and men, property inventory services and security surveys. For more information on these programs, check out the police website at police.wustl.edu.

In compliance with the Campus Crime Awareness and Security Act of 1990, Washington University publishes online an annual report, *Safety and Security on the Danforth Campus — A Guide for Students, Faculty and Staff*, which is available to all current and prospective students on the Danforth Campus and university employees on the Danforth, North and West campuses at police.wustl.edu. To request a hard copy, contact
Admission Procedures

Freshman Admission

The admissions committee reviews and assesses each application personally. Admission to Washington University is both selective and competitive. Students who come to Washington University have challenged themselves academically and personally during their high school years and are required to have earned a high school diploma or equivalent. A student’s senior-year transcript should show that he or she continues to take demanding courses. Most applicants take advantage of honors, advanced placement and international baccalaureate courses, if offered by their high schools.

Most candidates’ transcripts include:
- four years of English
- four years of mathematics (Architecture, Business and Engineering strongly recommend calculus.)
- three to four years of history or social science
- three to four years of laboratory science (Engineering strongly recommends chemistry and physics.)
- at least two years of a foreign language
- both chemistry and physics, as well as the most challenging math programs available, for students who plan to do course work in sciences and/or pre-medicine

Other important parts of a student’s application:
- grades and class rank (if the student’s school ranks students)
- counselor and teacher recommendations
- essay
- extracurricular and community activities
- standardized test scores (Either SAT or ACT, writing is not required. SAT Subject tests are not required. Test results from any of the student’s high school years are acceptable, though we encourage senior-year testing. We consider only the highest individual scores, whenever they occurred.)

Applying for Admission

For a student’s application file to be complete, we must receive the following materials by the deadline for the decision plan selected:
- Common Application including Washington University’s brief supplemental questions. There is no supplemental essay.
- $75 fee
- All supporting materials, including the personal essay, a teacher recommendation, school report for freshman admission or dean’s report for transfer admission, and official transcript.

Decision Plans

Washington University offers a binding Early Decision option, with a deadline of November 15 and notification by December 15 each year, and Regular Decision, with a deadline of January 15 and notification by April 1 each year.

If Washington University is the student’s first choice, we encourage the student to apply under Early Decision. Applying under Early Decision signifies a binding commitment that the student will attend Washington University if admitted. This option requires the applicant to submit a nonrefundable enrollment deposit within two weeks of receiving a letter of admission. If admitted, the student must withdraw other applications. A student may apply only to one school under a binding Early Decision plan.

If English Is Not the Student’s Primary Language

Either TOEFL (Test of English as a Foreign Language) or IELTS (International English Language Testing System) is required of all international students for whom English is a second language and recommended for U.S. citizens whose second language is English. The tests administered in December of each year will be the last ones accepted for the following admission year.

Portfolios

In addition to the standard application materials mentioned above, applicants for the College of Architecture are encouraged and applicants for the College of Art are required to submit a portfolio of their work. All College of Art students will be considered for the Conway or Proetz Scholarship in art. Portfolios should be submitted through the Slideroom function of the Common Application and should include 12 to 15 pieces of recent work, which may include drawings, two- and three-dimensional pieces, or photographs. (If submitting an architecture portfolio, please do not include CAD drawings or examples of drafting skills.) The applicant may include additional information such as the title, medium, dimensions, and date completed.

Deferred Enrollment

Admitted students, who have submitted the enrollment deposit and wish to begin their studies at a later date, may defer enrollment at Washington University for a period of one year with an option to extend for one additional year. Deferred enrollment is designed for students who wish to travel or work between high school and college. Courses taken during the deferred period normally will not be accepted for credit; the final decision on transferability of credit lies with the dean’s office. Deferral should be requested in writing from the Office of Undergraduate Admissions. The Committee on Admissions
Transfer Admission

Transfer admission to Washington University is selective and competitive. The student should apply as a transfer student if he or she meets all of the following requirements:

1) The applicant has finished secondary school and completed some college study.

2) The applicant would like to be considered for admission with advanced standing at Washington University.

3) The applicant is interested in enrolling full-time in an undergraduate degree program with a specific academic focus.

4) The applicant has never attended any of Washington University’s full-time, degree-granting schools.

Washington University accepts applications for transfer admission in the fall semester. For current application deadlines, please visit http://admissions.wustl.edu/apply/Transfer-Student-Admission/. In any given year, any academic division may have from zero to a small handful of slots available. With this small number of transfer spots open, we recommend that the strongest candidates for admission present proof of a high school diploma or equivalent and proof of a high level of academic success at their current institution. Successful applicants present at least a B+ average from a two-year or four-year college in courses across a broad academic curriculum. Some of our academic divisions require specific grades in specific courses. For example, students with interests in engineering, business, or the physical or biological sciences must present a strong background in science and mathematics including calculus. In addition, applicants must have left their current institution and all previous institutions in good standing and be eligible to return.

If an applicant has been away from a formal academic setting for more than two years, we require the applicant to complete at least one year (30 hours) of work at another college or university before submitting an application for transfer admission.

Applicants who are in their first year of college must present at least one completed semester of full-time college work with an application for transfer admission or submit a completed Mid-Semester Progress Report.

Applicants must submit their high school transcripts, the application, official transcripts of all previous college work, standardized test scores (SAT or ACT taken during high school), a Transfer Academic Evaluation, a Transfer Registrar Report, and the nonrefundable application fee to the Office of Undergraduate Admissions. For admissions information, please visit the Admissions website at http://admissions.wustl.edu/.

Applicants who wish to be considered for financial assistance must file the Financial Aid Profile or Washington University’s Family Financial Profile (FFP) (https://sfs.wustl.edu/Pages/Family-Financial-Profile.aspx/). Detailed information on financial support (p. 29) can be found in this Bulletin.

Transfer admission information for individual schools is listed as follows.

Transferring into Arts & Sciences

Each year a number of students from other colleges and universities transfer into the College of Arts & Sciences. Upon their admission the transfer student adviser reviews and evaluates their previous academic work. Full credit is normally granted for courses taken at accredited institutions provided that the university offers comparable courses and the student has completed the courses with a grade of C or better (please note: online course work does not transfer). In addition, transfer credit may be counted where applicable and upon approval toward major or minor requirements. Transfer students must be enrolled for at least four consecutive full-time semesters to satisfy the residency requirement. They must complete a minimum number of units at Washington University, and a minimum number of units in the College of Arts & Sciences, according to the table found under the heading “Transfer Students” on the Arts & Sciences Degree Requirements (p. 147) page of the Arts & Sciences section of this Bulletin.

All transfer students are assigned an academic adviser. When they declare a major, they also meet with an adviser in the major department. The full range of curricular opportunities offered through the College is open to transfer students when prerequisites are satisfied. An applicant should direct specific questions about transfer credit and course sequences at Washington University to the College of Arts & Sciences.

Transferring into Architecture

Places for transfer students are extremely limited and require strong performance in an arts and sciences curriculum, and preferably preparation in the visual arts — in particular, freehand drawing and 3-D design. If transfer applicants have taken studio courses (design, drawing and others) at other schools, their application is best accompanied by a portfolio with samples of that work. Placement into the design studio sequence is determined by portfolio review.

A transfer applicant into the College of Architecture should consult with the associate dean of students of the Sam Fox School of Design & Visual Arts as early as possible to assist in appropriate placement. It is advisable that the transfer applicant have demonstrated experience in 2-dimensional and 3-dimensional design. The applicant’s previous work should
parallel as closely as possible the course work outlined on the Architecture Degree Requirements (p. 73) page.

Transferring into Art

The number of studio art credits a transfer applicant has already earned, combined with an evaluation of the applicant’s portfolio, determines the year and semester level at which the student is admitted. As much as possible, the studio art courses taken at other institutions should correspond to the program at Washington University.

Portfolio Requirements

1. Applicants submit a digital portfolio, consisting of 12 to 15 pieces of recent work, which may include drawings, 2- and 3-dimensional pieces, or photographs. If preferred, the applicant may include additional information such as title of work, medium, dimension and date completed.

Include examples of work from basic drawing and design classes that indicate the applicant’s technical and conceptual level of accomplishment — some drawing should be from direct observation. If possible, submit good examples of work in different media to demonstrate a range of art experiences. If applying to the second-year level, some of the work should be in the area of the applicant’s intended major.

Portfolio Instructions

1. Portfolios should be submitted through the Slideroom function of the Common Application.
2. Original work can be presented only during a meeting with the associate dean of students in the Sam Fox School.
3. To assist in appropriate placement, an interview with the associate dean of students, while not required, is strongly recommended. The applicant should plan to bring a transcript to the meeting.

Transferring into Business

The Olin Business School offers transfer enrollment in fall semester. The strongest candidates for admission present a strong academic performance from a two-year or four-year college that mirrors most of our academic requirements for our students at the freshman and sophomore levels. For a sophomore transfer candidate, this would include microeconomics and an equivalent to Calculus II at the college level. For a junior-level transfer candidate, this also would include financial accounting, macroeconomics and perhaps managerial accounting. All transfers to the Olin School must have completed an equivalent to Calculus II at the college level. Students who are admitted to the Olin Business School should expect a written course evaluation from the transfer student advisor within two weeks of receiving their acceptance letter, indicating which courses will be accepted by the Olin School. A maximum of 60 credits will be accepted toward our undergraduate degree. Students must earn at least a C grade in the course for the units to transfer to Washington University. Courses taken online are not accepted as transfer credit. Grades will not transfer to Washington University.

All transfer students are assigned an academic advisor. Transfer students must be enrolled for at least four consecutive full-time semesters to satisfy the residency requirement.

Please see the Degree Requirements (p. 900) for the Bachelor of Science in Business Administration degree.

Transferring into Engineering

Applicants may apply for admission if they have completed a minimum of one year of college work elsewhere. The transfer applicant must demonstrate academic achievement (grade average of B+ or better) with strength in mathematics (calculus) and science (chemistry/physics). Transfer applicants to the School of Engineering & Applied Science should have completed one semester of an English composition course, two semesters of calculus-based physics and sufficient calculus (typically three semesters) to be prepared to take differential equations. Applicants interested in biomedical or chemical engineering also should have completed sufficient chemistry to be prepared to take organic chemistry. Applicants interested in biomedical engineering should have completed an introductory biology sequence on cellular, molecular and developmental biology and genetics. After completing the application process, an evaluation of the applicant’s record will be made to determine the transferability of college credit. Grades earned do not transfer, but the applicant must earn a letter grade of C or better for the course credit to transfer. For English composition, a letter grade of B or better is required for the course credit to transfer. Courses taken pass/fail do not transfer.

To be recommended for any bachelor’s degree, a transfer applicant must satisfy applicable requirements of the School of Engineering & Applied Science shown under Degree Requirements (p. 911). Please note that all students earning an undergraduate engineering degree are required to complete a minimum of 60 course units at Washington University.

Pre-Matriculation Units

Pre-matriculation units of credit are earned before an applicant’s enrollment at Washington University as a first-year student, which can be applied toward a Washington University degree. A maximum of 15 units of pre-matriculation credit may be counted toward any undergraduate degree. These units will count toward graduation but will not meet general education requirements. Sources for pre-matriculation units of credit include Advanced Placement (AP) examinations, International Baccalaureate (IB), British Advanced (A) Levels, course credit earned by proficiency (e.g., back credit), and college credit earned after the student’s junior year in high school. Credits earned via the High School Summer Scholars or High School College Access
programs through University College are considered to be pre-matriculation units and are subject to the same regulations.

A student in the College of Arts & Sciences may be awarded up to 15 units of credit from all sources — standardized placement tests and college course work — that were completed prior to enrollment as a first-year student at Washington University. The units of credit awarded from these sources do not apply toward the distribution requirements.

A student earning the Bachelor of Science in Business Administration (BSBA) in the Class of 2015 and beyond may apply a maximum of 15 pre-matriculation units to the BSBA degree. The units of credit awarded from these sources do not apply toward the distribution requirements. A transcript notation is made of all pre-matriculation units earned before enrollment in Washington University.

A student in the College of Art may apply a maximum of 15 pre-matriculation units to the Bachelor of Fine Arts (BFA) degree. The units of credit awarded from these sources do not apply toward graduation requirements. A transcript notation is made of all pre-matriculation units earned before enrollment in Washington University.

A student should submit official score reports from AP examinations, College Board Achievement and Aptitude Tests, the International Baccalaureate (International Baccalaureate diploma, or have successfully passed examinations in the program, should consult a dean in their undergraduate division of the university about advanced placement and credit. Scores may be used for placement or granting of degree credit, according to the recommendations of the various departments. Subsidiary-level scores are not recognized.

British Advanced (A) Levels. These grades may be used for placement or granting of degree credit, according to the recommendations of the various departments.

Advanced Placement (AP) Examinations. These are used for placement, partial fulfillment of major or minor requirements, and the granting of degree credit, according to the recommendations of the various departments. Examinations are given by the College Board in May of each year for secondary school students who have been enrolled in a college-level course in the same subject or subjects of the exam. For the most current policy information, visit the website: college.artsci.wustl.edu/policies/placement_credit_ap.

Information about these exams may be obtained from the College Board Advanced Placement Examinations, Box 592, Princeton, NJ 08540 or by calling 1-888/225-5427.

SAT Subject Tests. These examinations in modern languages are administered by the College Board. They are required for study in certain languages.

College Level Examination Program (CLEP) scores are not accepted for credit or placement.
Washington University Placement Examinations (Back Credit)

**EAST ASIAN LANGUAGES**

Credit is typically awarded for completing the following courses with a grade of B– or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required.

**Chinese**

Chinese 211 = 3 units for Chinese 102D
Chinese 360 = 3 units for Chinese 102D and 3 units for Chinese 212

**Japanese**

Japan 213 = 3 units for Japan 104D
Japan 412 = 3 units for Japan 104D and 3 units for Japan 214

**Korean**

Korean 217 = 3 units for Korean 118D
Korean 417 = 3 units for Korean 118D and 3 units for Korean 218

**FRENCH (L34)**

Credit is awarded for the following courses with a grade B or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required. No back credit is awarded for 102 or 301.

French 201D = 3 units for French 102D
French 307D = 3 units for French 201D and 3 units for French 102D
French 308D = 3 units for French 307D and 3 units for French 201D (credit awarded for placement, completion of the course is not required)

**GERMANIC LANGUAGES AND LITERATURES (L21)**

Students receive the following back credit after successfully completing these courses with a grade of B– or better.

German 210D = 3 units for German 102D
German 301D = 3 units for German 102D and 3 units for German 210D
German 302D = 3 units for German 102D and 3 units for German 210D

**ITALIAN (L36)**

Credit is awarded for the following courses with a grade B or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required. No back credit is awarded for Ital 102 or Ital 301.

Ital 201D = 3 units for Ital 102D
Ital 307D = 3 units for Ital 201D and 3 units for Ital 102D
Ital 308D = 3 units for Ital 307D and 3 units for Ital 201D (credit awarded for placement, completion of the course is not required)

**JEWISH, ISLAMIC AND NEAR EASTERN LANGUAGES**

Credit is typically awarded for completing the following courses with a grade of B– or better. Native speakers are not eligible for back credit. Evidence of secondary or post-secondary study of the language is required.

**Arabic**

Arab 207D = 3 units for Arab 108D
Arab 307D = 3 units for Arab 108D and 3 units for Arab 208D

**Hebrew**

HBRW 213D or HBRW 214D = 3 units for HBRW 106D
HBRW 320D or 322 = 3 units for HBRW 106D and 3 units for HBRW 214D
HBRW 384 or 385 = 3 units for HBRW 106D and 3 for HBRW 214D
HBRW 4010 or HBRW 402 = 3 units for HBRW 214D and 3 units for HBRW 322D

**Hindi**

Hindi 201 = 3 units for Hindi 111D
Hindi 301 = 3 units for Hindi 111D and 3 units for Hindi 201

**Persian**

Pers 216D = 3 units for Pers 116D
Pers 316 = 3 units for Pers 116D and 3 units for Pers 216D

**MATHEMATICS (L24)**

If a student completes one of the following courses with a grade of C+ or better at Washington University, then he or she is eligible for back credit. Credit is not awarded twice for transfer or AP scores.

Math 132 = 3 units for Math 131
Math 233 = 3 units for Math 131 and 3 units for Math 132
All Other Courses = no credit

**RUSSIAN (L39)**

Students can receive back credit for up to 6 credits contingent upon successfully completion (C+ or higher) of the next level.

Russ 404, Russ 405 or Russ 431, Russ 432 = 3 units for Russ 322 and 3 units for Russ 324
Russ 322, 324 = 3 units for Russ 211 and 3 units for Russ 212
Russ 211, 212 = 5 credits for Russ 102
Russ 102 = 5 credits for Russ 101

**SPANISH (L38)**

Credit is awarded for the following courses with a grade B or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required. No back credit is awarded for Span 102 or Span 223.

Span 201D = 3 units for Span 102D
Span 307D = 3 units for Span 201D and 3 units for Span 102D
Span 308D = 3 units for Span 307D* and 3 units for Span 201D
(credit awarded for placement, completion of the course is not required)
* Span 307D can only be used for elective credit; it cannot be used toward a Spanish major or minor.

**International Baccalaureate**

**BIOLOGY (L41)**
Grade 7, 6: 6 units of credit for Biol 100A (elective credit).
Students who plan to major in Biology or who are pre-med normally will enroll in Biol 2960 in the spring of freshman year and Biol 2970 in the fall of sophomore year.
Grade 5, 4, 3, 2, 1: No credit given.

**BUSINESS/ORGANIZATION**
No credit given.

**CHEMISTRY (L07)**
Those students who receive a 6 or 7 on the IB test in Chemistry will receive 3 units each of Chem 103 and 104. Receipt of these credits has no bearing on fulfillment of chemistry requirements for pre-medicine or any science major and cannot be used to satisfy prerequisites for Organic Chemistry. All students who wish to pursue a major or a pre-professional preparatory curriculum requiring general chemistry must take Chem 111A and Chem 112A and the associated labs, Chem 151 and Chem 152. Students who wish to exempt either the first or second semester of general chemistry, including the labs, must pass a placement exam administered by the Department of Chemistry during the first week of classes in the fall.
Grade 7, 6: 6 units of credit: 3 units each of Chem 103 and 104. These units do not replace Chem 111A or Chem 112A. Chem 112A must be completed prior to registration in Chem 261 or Chem 401 or any advanced courses in Chemistry.
Grade 5, 4, 3, 2, 1: No credit given.

**CLASSICAL GREEK (L91)**
No credit awarded. Placement determined by departmental examination. Students who place into Greek 317 may be awarded 6 back credits upon completion of Greek 317 with a grade of B or better.

**COMPUTER SCIENCE (E81)**
No credit given but a student can take the CSE 131 placement exam. Contact the CSE office at 314/935-6160 for more information.

**DESIGN TECHNOLOGY (E81)**
No credit given but a student can take the CSE 131 (formerly CS 101G) placement exam. Contact the CSE office at 314/935-6160 for more information.

**ECONOMICS (L11)**
For students entering Spring 2009 or earlier:
Contact the department’s Academic Coordinator (dottie@wustl.edu).

For students entering Summer 2009–Spring 2012:
Grade 7: Placement in Econ 4011 or in any 300-level elective class, so long as the prerequisites — such as calculus — are met; no units of credit. Bypassing introductory courses may be disadvantageous, particularly with a score of 6 or lower. If Econ 1011 and/or Econ 1021 are bypassed, additional elective(s) are required. Students should consult with the department’s Academic Coordinator.
Grade 6, 5, 4, 3, 2, 1: No credit given. Not recommended to bypass Econ 1011 or Econ 1021.

For students entering Summer 2012 or later:
Grade 7: 3 units of undergraduate general degree credit, contingent upon completion of Econ 4011 with a grade of B or better. The credit will not count toward the Economics major/minor. Placement into any economics course is permitted (assuming other prerequisites are met); however, bypassing introductory courses may be disadvantageous, and students are strongly encouraged to consult with the department’s Academic Coordinator. Bypassing Econ 1011 and/or Econ 1021 requires the completion of additional economics elective credit for the major/minor.
Grade 6, 5, 4, 3, 2, 1: No credit given. Not recommended to bypass Econ 1011 or Econ 1021.

**ENGLISH COMPOSITION (L13) AND LITERATURE (L14)**
Grade 7: 3 units of elective credit (E Comp 0001) contingent upon completing WRIT 100 with a grade of B or better. Please note, no credit is given for Writing or Literature courses.
Grade 6, 5, 4, 3, 2, 1: No credit given.

**FRENCH (L34)**
No credit awarded. Need to take the departmental placement exam. Students who place into and complete higher-level courses can earn up to 6 units of back credit for preceding courses.

**GEOGRAPHY**
No credit awarded.

**GERMAN A1, GERMAN B (MODERN FOREIGN LANGUAGES) (L21)**
Students should take the departmental placement exam. Students who place into and complete these courses with a B– or better will receive the following credit:
German 210D – 3 units for German 102D
German 301D – 3 units for German 102D, and 3 units for German 210D
German 302D – 3 units for German 102D, and 3 units for German 210D

HISTORY (L22)
American History
No credit awarded.
European History
No credit awarded.
African History
No credit awarded.
Islamic World History
No credit awarded.
South and Southeast Asia History
No credit awarded.
South Asia and Middle East History
No credit awarded.

ITALIAN (L78)
No credit awarded. Need to take the departmental placement exam. Students who place into and complete higher-level courses can earn up to 6 units of back credit for preceding courses.

LATIN (L10)
No credit awarded. Placement determined by departmental examination. Students who place into Latin 301 or above may be awarded 6 back credits upon completion of Latin 301 or above with a grade of B or better.

MATHEMATICS (L24)
Grade 7, 6: 3 units of credit for Math 131.
Grade 5, 4, 3, 2, 1: No credit awarded.

MUSIC (L27)
Grade 7, 6: 3 units of elective credit for students who do not major or minor in music.
Grade 5, 4, 3, 2, 1: No credit awarded

NORWEGIAN
No credit awarded.

PHILOSOPHY (L30)
Grade 7, 6: 3 units of credit for Phil 125C.
Grade 5, 4, 3, 2, 1: No credit awarded

PHYSICS (L31)
Physics HL: Grade 7: 6 units of credit for Physics 113A and 114A
Grade 6, 5: 3 units of credit for Physics 113A
Grade 4, 3, 2, 1: No credit awarded.
Physics EE: No credit awarded.

PSYCHOLOGY (L33)
Grade 7, 6: Waives the Psych 100B Introduction to Psychology requirement, but no college credit given.

SOCIAL ANTHROPOLOGY (L48)
Credit is evaluated on an individual basis by the Anthropology department.

SPANISH (L38)
No credit awarded. Need to take the departmental placement exam. Students who place into and complete higher-level courses can earn up to 6 units of back credit for preceding courses.

VISUAL/STUDIO ARTS (F20)
Grade 7: 3 units of elective credit
Grade 6, 5, 4, 3, 2, 1: No credit given.

British A-Level

ACCOUNTING (B50)
Advanced Level grades of A, B, C & D to be awarded 3 units of credit for ACCT 2610.

ARABIC (L49)
Please see departmental advanced placement policy (Jewish, Islamic and Near Eastern Languages and Cultures (p. 238)) for more information.

BIOLOGY (L41)
Grades of A or B to be awarded 3 units of credit equivalent to Biol 100A.

BUSINESS STUDIES (B53)
Advanced Level grades of A, B, C & D to be awarded 3 units of management elective credit (B53 0001).

CHEMISTRY (L07)
A grade of A to be awarded 3 units each for the following courses: Chem 103 and Chem 104. A grade of B to be awarded 3 units for the following course: Chem 103.

COMPUTER SCIENCE (E81)
No credit given but a student can take the CSE 131 placement exam. Contact the CSE office at 314/935-6160 for more information.

ECONOMICS (L11)
For students entering Spring 2009 or earlier:
Contact the department’s Academic Coordinator (dottie@wustl.edu).

For students entering Summer 2009 — Spring 2012:
No credit given. Students with a grade of A may elect to bypass Econ 1011 and/or Econ 1021 and proceed to Econ 4011, so long as the prerequisites, such as calculus, are met. Bypassing introductory courses may be disadvantageous. If Econ 1011 and/or Econ 1021 are bypassed, additional elective(s) are required. Students should consult with the department’s Academic Coordinator.

For students entering Summer 2012 or later:
3 units of undergraduate general degree credit for students with a grade (on the A-level exam) of A, contingent upon completion of Econ 4011 with a grade of B or better. The credit will not count toward the Economics major/minor. Placement into any economics course is permitted (assuming other prerequisites are met); however, bypassing introductory courses may be disadvantageous, and students are strongly encouraged to consult with the department’s Academic Coordinator. Bypassing Econ 1011 and/or Econ 1021 requires the completion of additional economics elective credit for the major/minor.

ENGLISH (L13)
No credit or placement given.

FRENCH (L34)
A grade of A to be awarded 3 units for French 102D and 3 units of French 201D, with 3 additional units to be awarded contingent upon successful completion of a 300-level course (other than conversation). A grade of B to be awarded 3 units upon successful completion of a 300-level course.

GERMAN (L21)
Student should take the departmental placement exam. Students who place into and complete these courses with a B– or better will receive the following credit:
German 210D = 3 units for German 102D
German 301D = 3 units for German 102D, and 3 units for German 210D
German 302D = 3 units for German 102D, and 3 units for German 210D

HISTORY (L22)
Grades of A or B to be awarded 3 units of elective credit.

MATHEMATICS (L24)
Advanced level grades of A and B will be awarded 3 units of credit for Math 131 automatically. An Advanced Level grade of C will only receive credit for Math 131 upon successful completion of Math 132 with a grade of C+ or better at Washington University.

MATHEMATICS (Further) (L24)
Advanced Level grades of A and B will be awarded 6 units of credit for Math 131 and Math 132 automatically. An Advanced Level grade of C will only receive credit for Math 131–132 upon successful completion of Math 233, with a grade of C+ or better at Washington University (or credit for Math 131 will be given for completion of Math 132). This course essentially covers all the material in Math 131–132 together with some extra physics and probability statistics.

MUSIC (L27)
A grade of A to be awarded 3 units each for the following courses: Music 102E, Music 103E, Music 104E. A grade of B to be awarded 3 units each for the following courses: Music 101E and Music 102E.

PHYSICS (L31)
A grade of A on the physics A-level exam will earn 3 units of credit for Physics 113A and 3 units of credit for Physics 114A. A grade of B on the physics A-level exam will earn 3 units of credit for Physics 113A.

PSYCHOLOGY (L33)
No credit given.

SPANISH (L38)
Student should take the departmental placement exam. Students who place into and complete these courses with a B or better will receive the following credit:
Spanish 201D = 3 units for Span 102D
Spanish 307D = 3 units for Span 201D and 3 units for Spanish 102D
Spanish 308D = 3 units for Span 307D* and 3 units for Spanish 201D (credit awarded for placement, completion of the course is not required) *

* Spanish 307D can only be used for elective credit; it cannot be used toward a Spanish major or minor.

Advanced Placement

ART HISTORY (L01) — Test: AHS
Grade 5, 4: 3 units of elective credit (Art-Arch 0001) contingent upon the completion of a 300- or 400-level Art History course with a grade of B or better. Students in the Sam Fox School must complete Art-Arch 113.

Grade 3, 2, 1: No credit given.

BIOLOGY (L41) — Test: BIO
Grade 5, 4: 6 units of credit for Biol 100A (elective credit). Students who plan to major in Biology or who are pre-medicine
normally will enroll in Biol 2960 in the spring of freshman year and Biol 2970 in the fall of sophomore year.

Grade 3, 2, 1: No credit given.

**CHEMISTRY (L07) — Test: CHE**

Those students who receive a 5 on the AP test in Chemistry will receive 3 units each of Chem 103 and 104. Those students who receive a 4 receive 3 units of Chem 103. Receipt of these credits has no bearing on fulfillment of chemistry requirements for pre-medicine or any science major and cannot be used to satisfy prerequisites for Organic Chemistry. All students who wish to pursue a major or a pre-professional preparatory curriculum requiring general chemistry must take Chem 111A and Chem 112A and the associated labs, Chem 151 and Chem 152. Students who wish to exempt either the first or second semester of general chemistry, including the labs, must pass a placement exam administered by the Department of Chemistry during the first week of classes in the fall.

Grade 5: 6 units of credit: 3 units each of Chem 103 and 104. These units do not replace Chem 111A or 112A. Chem 112A must be completed prior to registration in Chem 261 or Chem 401 or any advanced courses in Chemistry.

Grade 4: 3 units of Chem 103. These units do not replace Chem 111A or 112A.

Grade 3, 2, 1: No credit given.

**COMPUTER SCIENCE (E81) — A TEST**

Grade 5, 4: 3 units of credit for CSE 131, only if the student passes the CSE 131 placement exam.

Grade 3, 2, 1: No credit given but a student can take the CSE 131 placement exam.

**ECONOMICS—MICRO (L11) — Test: EMA**

For students entering Spring 2009 or earlier:

Contact the department’s Academic Coordinator (dottie@wustl.edu).

For students entering Summer 2009–Spring 2012:

Grade 5, 4: Placement in Econ 4021 or in any 300-level class with an Econ 1021 prerequisite, so long as the other prerequisites, such as calculus, are met; no units of credit. Bypassing introductory courses may be disadvantageous, particularly with a score of 4. If Econ 1021 is bypassed, additional economics elective is required for the major/minor. Students should consult with the department’s Academic Coordinator.

Grade 3, 2, 1: No credit given. Not recommended to bypass Econ 1021.

**ENGLISH COMPOSITION (L13) AND LITERATURE (L14) — Test: ENG**

Grade 5: 3 credits of elective credit (E Comp 0001) contingent upon completing WRIT 100 with a grade of B or better. The credit will not count toward the Economics major/minor. Placement into any economics course having an Econ 1011 prerequisite is permitted; however, bypassing introductory courses may be disadvantageous, and students are encouraged to consult with the department’s Academic Coordinator. Bypassing Econ 1011 requires the completion of additional economics elective credit for the major/minor.

Grade 4, 3, 2, 1: No credit given. Not recommended to bypass Econ 1011.

**FRENCH LANGUAGE (L34) — Test: LNF**

To receive Advanced Placement credit in French for a score of 3 or 4, the student must complete a 300-level course with a grade of B or better.
Grade 5: 6 units of credit equivalent to French 102D and French 201D. Students may enroll in a 300-level course conducted in the language.

Grade 4: Automatically grants 3 credits for French 102D, and gives another 3 extra credits for French 201D contingent upon satisfactory completion of a 300-level course with a B or better — other than conversation — conducted in the language.

Grade 3: 6 units of credit equivalent to French 102D and French 201D, contingent upon completion of a 300-level course with a grade of B or better — other than conversation — conducted in the language.

Grade 2, 1: No credit given.

FRENCH LITERATURE (L34) — Test: LNF
To receive Advanced Placement credit in French for a score of 3 or 4, students must complete a 300-level course with a grade of B or better.

Grade 5: 6 units of credit equivalent to French 102D and French 201D. Students may enroll in a 300-level course conducted in the language.

Grade 4: Automatically grants 3 credits for French 102D, and gives another 3 extra credits for French 201D contingent upon satisfactory completion of a 300-level course with a B or better — other than conversation — conducted in the language.

Grade 3: 6 units of credit equivalent to French 102D and French 201D, contingent upon completion of a 300-level course with a grade of B or better — other than conversation — conducted in the language.

Grade 2, 1: No credit given.

GERMAN (L21) — Test: LNG
Grade 5: 3 units of credit for German 102D and 3 units for German 210D awarded automatically; students may enroll in a 300-level course: German 301D, German 302D, German 313, German 340G (German Literature and the Modern Era and German Tutorial).

Grade 4: 3 units of credit for German 102D awarded automatically; an additional 3 units of credit* for German 210D awarded upon satisfactory completion of German 301D (B– or better). *Please note: Students may receive this credit only if they start their language study at the 300-level.

Grade 3: 3 units of credit for German 102D* and 3 units for German 210D, awarded upon satisfactory completion of German 301D (B– or better). *Please note: Students may receive this credit only if they start their language study at the 300-level.

Grade 2, 1: No credit given. Should take departmental placement exam.

HISTORY (L22)

American History — Test: HSA
(A grade of 5 on the AP exam can fulfill Introductory Course requirements for the History major and minor.) (L22)
Grade 5: 3 units of credit for History 163.
Grade 4: 3 units of elective credit for History 0001.
Grade 3, 2, 1: No credit given.

European History — Test: HSE (A grade of 5 on the AP exam can fulfill Introductory Course requirements for the History major and minor.) (L22)
Grade 5: 3 units of credit for History 102.
Grade 4: 3 units of elective credit for History 0001.
Grade 3, 2, 1: No credit given.

World History — Test: HSW (A grade of 5 on the AP exam can fulfill Introductory Course requirements for the History major and minor.) (L22)
Grade 5: 3 units of credit for History 164.
Grade 4: 3 units of elective credit for History 0001.
Grade 3, 2, 1: No credit given.

LATIN (L10) — Test: LNL
Grade 5, 4: 6 units (total) of credit for Latin 101 and 102, upon completion of Latin 3171 with a grade of B or better.
Grade 3, 2, 1: No credit given.

MATHEMATICS (L24) — Test: MAB
The Mathematics Department gives a placement exam, available online and also during the fall orientation period. We ask that all entering students planning to enroll in a calculus course (except those with an AP score of 5) take the placement exam. This gives us one more piece of information to try to ensure correct placement into the calculus sequence. Only an AP score of 5 receives automatic credit and placement into the calculus sequence.

Grade 5: 3 units of credit for Math 131. The student will be placed into Math 132.
Grade 4: The student will probably be placed into Math 132.
Grade 3, 2, 1: Students with scores of less than 4 should consult with their advisers about placement based on the Math Department Placement Test, SAT scores and high school record. It will be helpful to the adviser if the student brings the title and the author’s name of the calculus book used in high school and a photocopy of its table of contents, indicating which chapters were covered.

MATHEMATICS (L24) — Test: MBC
The Mathematics Department gives a placement exam, available online and also during the fall orientation period. We ask that all
entering students planning to enroll in a calculus course (except those with an AP score of 5) take the placement exam. This gives us one more piece of information to try to ensure correct placement into the calculus sequence. Only an AP score of 5 receives automatic credit and placement into the calculus sequence.

Grade 5: 6 units of credit for Math 131 and Math 132. The student will be placed into Math 233. *An AB Subscore of 5 will earn 3 units of credit for Math 131.

Grade 4: The student probably will be placed into Math 233.

Grade 3, 2, 1: Students with scores of less than 4 should consult with their advisers about placement based on the Math Department Placement Test, SAT scores and high school record. It will be helpful to the adviser if the student brings the title and the author's name of the calculus book used in high school and a photocopy of its table of contents, indicating which chapters were covered.

**Any student entering the Calculus 131–132–233 sequence can receive AP credit for earlier courses in this sequence by successful completion, with a grade of C+ or better at Washington University, of the next course in the sequence. Students who successfully complete Math 128, with a grade of C+ or better at Washington University, can receive AP credit for Math 127. In all cases, this assumes that the student does not already have credit for the preceding courses (for example, by transfer from another college or university). Students who have already received credit for Math 131 (132) cannot also receive credit for Math 127 (128).

MUSIC LITERATURE/LISTENING (L27) — Test: MUL
Grade 5: 3 units of elective credit for Music 0001.
Grade 4: 3 units of elective credit for Music 0001.
Grade 3, 2, 1: No credit given.

MUSIC THEORY (L27) — Test: MUT
Grade 5: 3 units of elective credit for Music 0001.
Grade 4: 3 units of elective credit for Music 0001.
Grade 3, 2, 1: No credit given.

PHYSICS (L31)
B Test — Test: PB
Grade 5: 3 units of elective credit for Physics 113A. This corresponds to the first semester in a two-semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 117 or Physics 197 in the fall semester. Students who plan to major in physics or who have a strong interest in physics are encouraged to enroll in Physics 197.
Grade 4, 3, 2, 1: No credit given.

C Test (Mechanics) — Test: PCM
Grade 5: 4 units of credit for Physics 117. This corresponds to the first semester in a two-semester, calculus-based introductory physics sequence. Students may enroll in Physics 118, the second semester of this introductory calculus-based physics sequence, in the spring semester. Physics majors and students interested in an advanced treatment of introductory physics should enroll in Physics 197 in the fall semester, followed by Physics 198 in the spring semester. Students may not enroll in Physics 198 without first taking Physics 197.
Grade 4: 3 units of elective credit for Physics 113A. This corresponds to the first semester in a two-semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 117 or Physics 197 in the fall semester. Students who plan to major in physics or who have a strong interest in physics are encouraged to enroll in Physics 197.
Grade 3, 2, 1: No credit given.

C Test (Electricity and Magnetism) — Test: PCE
Grade 5: 4 units of credit for Physics 118. This corresponds to the second semester in a two-semester, calculus-based introductory physics sequence. Physics majors and students interested in an advanced treatment of introductory physics should enroll in Physics 197 in the fall semester, followed by Physics 198 in the spring semester.
Grade 4: 3 units of elective credit for Physics 114A. This corresponds to the second semester in a two-semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 117 or Physics 197 in the fall semester. Students who plan to major in physics or who have a strong interest in physics are encouraged to enroll in Physics 197.
Grade 3, 2, 1: No credit given.

POLITICAL SCIENCE (L32)
American Politics — Test: POA
Grade 5: 3 units of undergraduate credit, contingent upon completion of an advanced course (300-/400-level) in American Politics with a grade of B or better. The credit will not count toward the Political Science major/minor, but waives the Pol Sci 101B requirement.
Grade 3, 2, 1: No credit given.

Comparative Politics — Test: POC
Grade 5: 3 units of undergraduate credit, contingent upon completion of an advanced course (300-/400-level) in Comparative Politics with a grade of B or better. The credit will not count toward the Political Science major/minor, but waives the Pol Sci 102B requirement.
Grade 3, 2, 1: No credit given.
PSYCHOLOGY (L33)
Grade 5: Waives the Psych 100B Introduction to Psychology requirement, but no college credit given.
Grade 4, 3, 2, 1: No credit or placement given.

SPANISH LANGUAGE (L38) — Test: LNS
To receive Advanced Placement credit in Spanish for a score of 3 or 4, the student must complete a 300-level course with a grade of B or better.
Grade 5: 6 units of credit equivalent to Span 102D and Span 201D; students may enroll in a 300-level course conducted in the language.
Grade 4: Automatically grants 3 credits for Span 102D, and gives another 3 extra credits for Span 201D contingent upon satisfactory completion of a 300-level course with a B or better — other than conversation — conducted in the language.
Grade 3: 6 units of credit equivalent to Span 102D and Span 201D, contingent upon satisfactory completion of a 300-level course with a B or better — other than conversation — conducted in the language.
Grade 2, 1: No credit given.

SPANISH LITERATURE (L38) — Test: LNS
To receive Advanced Placement credit in Spanish for a score of 3 or 4, students must complete a 300-level course with a grade of B or better.
Grade 5: 6 units of credit equivalent to Span 102D and Span 201D; students may enroll in a 300-level course conducted in the language.
Grade 4: Automatically grants 3 credits for Span 102D, and gives another 3 extra credits for Span 201D contingent upon satisfactory completion of a 300-level course with a B or better — other than conversation — conducted in the language.
Grade 3: 6 units of credit equivalent to Span 102D and Span 201D, contingent upon satisfactory completion of a 300-level course with a B or better — other than conversation — conducted in the language.
Grade 2, 1: No credit given.

STATISTICS (L24) — Test: STA
Grade 5: Students with a 5 on the AP Statistics Exam will receive 3 units of credit for Math 2200.
Grade 4, 3, 2, 1: No credit given.

STUDIO 2-D DESIGN (F20) — Test: A2D
Grade 5: 3 units of elective credit for Fine Arts 0001.
Grade 4, 3, 2, 1: No credit given.

STUDIO 3-D DESIGN (F20) — Test: A3D
Grade 5: 3 units of elective credit for Fine Arts 0001.
Grade 4, 3, 2, 1: No credit given.

University Policies
Washington University has various policies and procedures that govern our faculty, staff and students. Highlighted below are several key policies of the university, with which you should be familiar. Web links to key policies and procedures are available on the University Registrar’s website at http://registrar.wustl.edu and on the university’s Compliance and Policies page, available at http://wustl.edu/policies. Please note that the policies identified on these websites and in this Bulletin do not represent an entire repository of university policies, as schools, offices and departments may implement policies that are not listed. In addition, policies may be amended throughout the year.

Non-Discrimination Statement
Washington University encourages and gives full consideration to all applicants for admission, financial aid and employment. The university does not discriminate in access to or treatment or employment in its programs and activities on the basis of race, color, age, religion, sex, sexual orientation, national origin, gender identity or expression, veteran status or disability. Inquiries about compliance should be addressed to the university’s Vice Chancellor for Human Resources, Washington University in St. Louis, Campus Box 1184, One Brookings Drive, St. Louis, MO 63130.

Policy on Discrimination and Discriminatory Harassment
Washington University is committed to having a positive learning and working environment for its students, faculty and staff. University policy prohibits discrimination on the basis of race, color, age, religion, gender, sexual orientation, gender identity or expression, national origin, veteran status, disability or genetic information. Harassment based on any of these classifications violates university policy and will not be tolerated. In some circumstances such harassment may also violate federal, state or local law. A copy of the Policy on Discrimination and Discriminatory Harassment is available on the Human Resources website.

Sexual Harassment
Sexual harassment is a form of discrimination that violates university policy and will not be tolerated. It is also illegal under state and federal law. Title IX of the Education Amendments of 1972 prohibits discrimination based on sex (including sexual harassment and sexual violence) in the university's
educational programs and activities. Title IX also prohibits retaliation for asserting claims of sex discrimination. The university has designated the Title IX Coordinator identified below to coordinate its compliance with and response to inquiries concerning Title IX. You may also submit a complaint or inquiry regarding Title IX by contacting the United States Department of Education’s Office of Civil Rights at 400 Maryland Avenue, SW, Washington, DC 20202-1100 or by visiting www.ed.gov or calling 1-800-421-3481. A copy of the Policy on Sexual Harassment (http://hr.wustl.edu/policies/Pages/SexualHarassment.aspx) is available on the Human Resources website.

For more information or to report a violation under either the Policy on Discrimination and Discriminatory Harassment or the Sexual Harassment policy, please contact:

Discrimination and Harassment Response Coordinators
Danforth Campus: Apryle Cotton, 314/935-8095, apryle.cotton@wustl.edu
School of Medicine Campus: Legail Chandler, 314/362-4900, legal_chandler@wustl.edu

Title IX Coordinator:
All campuses: Jessica Kennedy, 314/935-3118, jw kennedy@wustl.edu

Drug and Alcohol Policy
Washington University is committed to maintaining a safe and healthful environment for members of the university community by promoting a drug-free environment as well as one free of the abuse of alcohol. Violations of this policy will be handled according to existing policies and procedures concerning the conduct of faculty, staff and students. This policy is adopted in accordance with the Drug-Free Workplace Act and the Drug-Free Schools and Communities Act.

Tobacco-Free Policy
Washington University is committed to providing a healthy, comfortable and productive work and learning environment for all students, faculty and staff. Research shows that tobacco use in general, including smoking and breathing secondhand smoke, constitutes a significant health hazard. The university strictly prohibits all smoking and other uses of tobacco products within all university buildings and on university property, at all times. A copy of our complete tobacco-free policy is available on the Human Resources website.

Medical Examinations
Entering students must provide medical information to Student Health Services. This will include completion of a health history and a record of all current immunizations. The university strongly recommends appropriate vaccination for meningococcal disease.

If students fail to comply with these requirements prior to registration, they will be required to obtain vaccinations for measles, mumps and rubella at Student Health Services, if there is no evidence of immunity. They will be assessed the cost of the vaccinations. Students will be unable to complete registration for classes until all health requirements have been satisfied.

If students are unimmunized, they may be barred from classes and from all university facilities, including housing units, if in the judgment of the university their continued presence would pose a health risk to themselves or to the university community.

Medical and immunization information is to be given via the shs.wustl.edu website. All students who have completed the registration process should access the website and create a student profile by using their WUSTL key. Creating a student profile enables a student to securely access the medical history form. Fill out the form and follow the instructions for transmitting it to Student Health Services. Student information is treated securely and confidentially.

Student Conduct
The university Student Judicial Code addresses conduct expectations and discipline procedures for university students. The primary purpose of the behavior expectations set forth in the code is the protection of the campus community and the maintenance of an environment conducive to learning and inquiry.

Disciplinary proceedings are meant to be informal, fair and expeditious. Charges of non-serious misconduct are generally heard by the judicial affairs officer. With limited exceptions, serious or repeated allegations are heard by the campus-wide University Judicial Board or the University Sexual Assault Investigation Board where applicable.

Complaints against students that include allegations of sexual assault or certain complaints that include allegations of sexual harassment in violation of the Judicial Code are governed by the procedures found in the University Sexual Assault Investigation Board Policy, which is available online at www.wustl.edu/policies/sexualassault.html or in hard copy from the Title IX Coordinator or the Judicial Administrator.

Students may be accountable to both governmental authorities and to the university for acts that constitute violations of law and the Student Code.

For a complete copy of the university Student Judicial Code visit www.wustl.edu/policies/judicial.html.

Undergraduate Student Academic Integrity Policy
Effective learning, teaching and research all depend upon the ability of members of the academic community to trust one another and to trust the integrity of work that is submitted for academic credit or conducted in the wider arena of scholarly research. Such an atmosphere of mutual trust fosters the free
exchange of ideas and enables all members of the community to achieve their highest potential.

In all academic work, the ideas and contributions of others must be appropriately acknowledged, and work that is presented as original must be, in fact, original. Faculty, students and administrative staff all share the responsibility of ensuring the honesty and fairness of the intellectual environment at Washington University.

**Scope and Purpose**

This statement on academic integrity applies to all undergraduate students at Washington University. Graduate students are governed by policies in each graduate school or division. All students are expected to adhere to the highest standards of behavior.

The purpose of the statement is twofold:

- To clarify the university’s expectations with regard to undergraduate students’ academic behavior, and
- To provide specific examples of dishonest conduct. The examples are only illustrative, NOT exhaustive.

**Violations of this policy include, but are not limited to:**

1. **Plagiarism**

   Plagiarism consists of taking someone else’s ideas, words or other types of work product and presenting them as one’s own. To avoid plagiarism, students are expected to be attentive to proper methods of documentation and acknowledgment. To avoid even the suspicion of plagiarism, a student must always:

   - Enclose every quotation in quotation marks and acknowledge its source.
   - Cite the source of every summary, paraphrase, abstraction or adaptation of material originally prepared by another person and any factual data that is not considered common knowledge. Include the name of author, title of work, publication information and page reference.
   - Acknowledge material obtained from lectures, interviews or other oral communication by citing the source (name of the speaker, the occasion, the place and the date).
   - Cite material from the internet as if it were from a traditionally published source. Follow the citation style or requirements of the instructor for whom the work is produced.

2. **Cheating on an examination**

   A student must not receive or provide any unauthorized assistance on an examination. During an examination a student may use only materials authorized by the faculty.

3. **Copying or collaborating on assignments without permission**

   When a student submits work with his or her name on it, this is a written statement that credit for the work belongs to that student alone. If the work was a product of collaboration, each student is expected to clearly acknowledge in writing all persons who contributed to its completion.

   Unless the instructor explicitly states otherwise, it is dishonest to collaborate with others when completing any assignment or test, performing laboratory experiments, writing and/or documenting computer programs, writing papers or reports, and completing problem sets.

   If the instructor allows group work in some circumstances but not others, it is the student’s responsibility to understand the degree of acceptable collaboration for each assignment, and to ask for clarification if necessary.

   To avoid cheating or unauthorized collaboration, a student should never:

   - Use, copy or paraphrase the results of another person’s work and represent that work as his or her own, regardless of the circumstances.
   - Refer to, study from or copy archival files (e.g., old tests, homework, solutions manuals or backfiles) that were not approved by the instructor.
   - Copy another’s work, or to permit another student to copy his or her work.
   - Submit work as a collaborative effort if he or she did not contribute a fair share of the effort.

4. **Fabrication or falsification of data or records**

   It is dishonest to fabricate or falsify data in laboratory experiments, research papers or reports or in any other circumstances; to fabricate source material in a bibliography or “works cited” list; or to provide false information on a résumé or other document in connection with academic efforts. It is also dishonest to take data developed by someone else and present them as one’s own.

   Examples of falsification include:

   - Altering information on any exam, problem set or class assignment being submitted for a re-grade.
   - Altering, omitting or inventing laboratory data to submit as one’s own findings. This includes copying laboratory data from another student to present as one’s own; modifying data in a write-up; and providing data to another student to submit as his or her own.

5. **Other forms of deceit, dishonesty or inappropriate conduct**

   Under no circumstances is it acceptable for a student to:
• Submit the same work, or essentially the same work, for more than one course without explicitly obtaining permission from all instructors. A student must disclose when a paper or project builds on work completed earlier in his or her academic career.
• Request an academic benefit based on false information or deception. This includes requesting an extension of time, a better grade or a recommendation from an instructor.
• Make any changes (including adding material or erasing material) on any test paper, problem set or class assignment being submitted for a re-grade.
• Willfully damage the efforts or work of other students.
• Steal, deface or damage academic facilities or materials.
• Collaborate with other students planning or engaging in any form of academic misconduct.
• Submit any academic work under someone else’s name other than his or her own. This includes but is not limited to sitting for another person’s exam; both parties will be held responsible.
• Engage in any other form of academic misconduct not covered here.

This list is not intended to be exhaustive. To seek clarification, students should ask the professor or teaching assistant for guidance.

**Reporting Misconduct**

**Faculty responsibility**

Faculty and instructors are strongly encouraged to report incidents of student academic misconduct to the academic integrity officer in their school or college in a timely manner, so that the incident may be handled fairly and consistently across schools and departments. Teaching assistants are expected to report instances of student misconduct to their supervising instructors. Faculty members are expected to respond to student concerns about academic dishonesty in their courses.

**Student responsibility**

If a student observes others violating this policy, he or she is strongly encouraged to report the misconduct to the instructor, to seek advice from the academic integrity officer of the school or college that offers the course in question, or to address the student(s) directly.

**Exam proctor responsibility**

Exam proctors are expected to report incidents of suspected student misconduct to the course instructor and/or the Disability Resource Center, if applicable.

**Procedure**

**Jurisdiction**

This policy covers all undergraduate students, regardless of their college of enrollment. Cases will be heard by school-specific committees according to the school in which the class is listed, not the school in which the student is enrolled. All violations and sanctions will be reported to the student’s college of enrollment.

**Administrative procedures**

Individual undergraduate colleges and schools may design specific procedures to resolve allegations of academic misconduct by students in courses offered by that school, so long as the procedures are consistent with this policy and with the university Student Judicial Code.

**Student rights and responsibilities in a hearing**

A student accused of an academic integrity violation — whether by a professor, teaching/graduate assistant, academic integrity officer or student — is entitled to:

• Review the written evidence in support of the charge.
• Ask any questions.
• Offer an explanation as to what occurred.
• Present any material that would cast doubt on the correctness of the charge.
• Determination of the validity of the charge without reference to any past record of misconduct.

When responding to a charge of academic misconduct, a student may:

• Deny the charges and request a hearing in front of the appropriate academic integrity officer or committee.
• Admit the charges and request a hearing to determine sanction(s).
• Admit the charges and accept the imposition of sanctions without a hearing.
• Request a leave of absence from the university. The academic integrity matter must be resolved prior to re-enrollment.
• Request to withdraw permanently from the university with a transcript notation that there is an unresolved academic integrity matter pending.

A student has the following responsibilities in resolving the charge of academic misconduct:

• Admit or deny the charge. This will determine the course of action to be pursued.
• Provide truthful information regarding the charges. It is a Student Judicial Code violation to provide false information to the university or anyone acting on its behalf.
Sanctions

If found not in violation of the Academic Integrity Policy

If the charges of academic misconduct are not proven, no record of the allegation will appear on the transcript.

If found in violation of the Academic Integrity Policy

If, after a hearing, a student is found to have acted dishonestly, or if a student has admitted to the charges prior to a hearing, the school’s academic integrity officer or committee may impose sanctions, including but not limited to the following:

• Issue a formal written reprimand.
• Impose educational sanctions, such as completing a workshop on plagiarism or academic ethics.
• Recommend to the instructor that the student fail the assignment. (A grade is ultimately the prerogative of the instructor.)
• Recommend to the instructor that the student fail the course.
• Place the student on Disciplinary Probation for a specified period of time or until defined conditions are met. The probation will be noted on the student’s transcript and internal record while it is in force.
• In cases serious enough to warrant suspension or expulsion from the university, refer the matter to the University Judicial Board for consideration.

Additional educational sanctions may be imposed. This list is not intended to be exhaustive.

Withdrawing from the course will not prevent the academic integrity officer or hearing panel from adjudicating the case, imposing sanctions or recommending grade penalties, including a failing grade in the course.

A copy of the sanction letter will be placed in the student’s academic file.

Appeals

If a student believes the academic integrity officer or the committee did not conduct a fair hearing, or if a student believes the sanction imposed for misconduct is excessive, he or she may appeal to the University Judicial Board within 14 days of the original decision. Appeals are governed by Section VII C of the University Student Judicial Code.

Records

Administrative record-keeping responsibilities

It is the responsibility of the academic integrity officer in each school to keep accurate, confidential records concerning academic integrity violations. When a student has been found to have acted dishonestly, a letter summarizing the allegation, the outcome and the sanction shall be placed in the student’s official file in the office of the school or college in which the student is enrolled.

Additionally, each school’s academic integrity officer shall make a report of the outcome of every formal accusation of student academic misconduct to the Director of University Judicial Programs, who shall maintain a record of each incident.

Multiple offenses

When a student is formally accused of academic misconduct and a hearing is to be held by an academic integrity officer, a committee, or the University Judicial Board, the person in charge of administering the hearing shall query the director of Judicial Programs about the student(s) accused of misconduct. The director shall provide any information in his or her records concerning that student to the integrity officer. Such information will be used in determining sanctions ONLY if the student is found to have acted dishonestly in the present case. Evidence of past misconduct may not be used to resolve the issue of whether a student has acted dishonestly in a subsequent case.

Reports to faculty and student body

School and college academic integrity officers are encouraged to make periodic (at least annual) reports to the students and faculty of their school concerning accusations of academic misconduct and the outcomes, without disclosing specific information that would allow identification of the student(s) involved.

Statement of Intent to Graduate

Students are required to file an Intent to Graduate at WebSTAC prior to the semester in which they intend to graduate. Additional information is available in the dean’s office and in the Office of the University Registrar.

Student Academic Records and Transcripts

The Family Educational Rights and Privacy Act of 1974 (FERPA) — Title 20 of the United States Code, Section 1232g, as amended — provides current and former students of the university with specific rights of access to and control over their student record information. In compliance with the statute, appropriate federal regulations and guidelines recommended by the American Association of Collegiate Registrars and
Admissions Officers, the university has adopted procedures that implement these rights.

A copy of the university policies regarding educational records and the release of student record information is available from the Office of the University Registrar and the university website.

Transcript requests may be submitted to the Office of the University Registrar through WebSTAC. Instructions and additional information are available online at registrar.wustl.edu.

**Tuition & Fees**

**Tuition**

Washington University relies on tuition income to pay more than 60 percent of the cost of undergraduate education. Most of the remaining cost is generously funded by gifts from the university’s alumni and friends and from income from the university’s endowment.

In setting the tuition rate, our emphasis is on being able to hire a high-caliber faculty and to offer extensive extracurricular opportunities.

Tuition for the 2014-15 academic year is $22,850 per semester for full-time study. Full-time study is considered to be 12 to 18 units. If students enroll in more than 21 units per semester, they will pay additional tuition of $1,904 for each credit unit beyond the 21. Freshman and sophomore architecture students who wish to enroll in more than 18 units per semester must have permission of the dean or associate dean and pay additional tuition of $1,904 for each credit unit beyond 18. Junior- and senior-year architecture students who wish to enroll in more than 16 units must have the permission of the dean or associate dean of the College of Architecture.

First-year, first-semester students may register over the summer or after arriving on campus in August. For all subsequent semesters, continuing students have the chance to register in April for the fall semester and in November for the spring semester. Students will be billed for tuition in July for the fall semester and in December for the spring semester. Students must pay tuition by the date specified on the bill or they will incur a late fee.

If a student cannot afford to pay the full tuition bill, he or she should explore the university’s extensive financial assistance opportunities, which are described in the Financial Support (p. 29) section of this *Bulletin*.

Many families prefer to pay educational expenses on a monthly basis. The interest-free monthly payment plan, TuitionPay, allows students and families to spread all or part of the academic year’s expenses over equal monthly payments. The Washington University Partners in Education with Parents (PEP) plan may provide tax savings for some families and offers monthly payment options over a period as long as 10 years at a competitive, fixed-interest rate. The PEP plan is described in the Financial Support (p. 29) section of this *Bulletin*.

A student’s family should begin planning for educational costs as soon as possible following the decision to enroll. It is important to allow sufficient time to complete financial arrangements prior to registration.

**Fees**

**Student Activities:** The mandatory student activities fee is 1 percent of tuition; for the 2014-15 academic year, it is $228.50 per semester. This special fee may vary from year to year. You may obtain information about the fee from the Office of Student Activities.

**Student Health and Wellness:** Washington University has a student health and wellness fee designed to improve the health and wellness of the entire Washington University community. The fee of $155 is billed to the student tuition statement each semester. In addition, to protect the health of our entire community, the university requires all full-time degree-seeking students to have health insurance. Students either must purchase the Washington University Student Health Insurance Plan or prove that they have adequate coverage through another plan. The cost of the Washington University Student Health Insurance Plan, as well as instructions for obtaining a waiver through proof of adequate coverage, will be provided to enrolled students.

**Late Registration:** Students may register for classes through the end of the second week of the semester. If students register after the second week, they must do so in person in the dean’s office, and they may be assessed a late registration fee of $100 per week. A 5 percent late payment fee also may be assessed by the dean’s office if payment in full is not made with late registration.

The late registration fee is not applicable to graduate resident and nonresident candidates. Students in University College programs will incur a flat late fee of $30. Part-time engineering students will incur a late fee of $50 per week.

**Returned Checks:** The university assesses a service charge for handling and processing returned checks.

**Enrollment Deposit**

First-year students and transfer students are required to pay a deposit upon admission to Washington University. The $200 enrollment deposit is not credited toward tuition and will be forfeited if the student does not complete one full semester at Washington University. However, after a student graduates, or if a student withdraws for any reason after the first semester, his or her deposit will be refunded (minus any unpaid bills, such as parking or library fines).
Withdrawals from the University and Refunds

The College of Arts & Sciences, the Olin Business School, the Sam Fox School of Design & Visual Arts, and the School of Engineering & Applied Science have similar policies on withdrawals and refunds. During the first two weeks of a semester, a student may withdraw from all course work via the online registration system or by notifying the dean’s office in writing. After the second week of classes, a written request to be withdrawn from courses must be received by the dean’s office.

Tuition Refund Schedule (as of Fall 2010)

Refunds are calculated based on the date the student notifies the university of withdrawal.

If a medical condition makes attendance for the balance of the semester impossible or medically inadvisable, the university will make a pro rata tuition refund, as of the date of withdrawal when that date occurs prior to the 12th week and the condition is verified by the Student Health Services or a private physician. The date of withdrawal may correspond to the date of hospitalization or the date on which the medical condition is determined.

If a Federal Title IV aid recipient withdraws from school before the end of the academic semester, Washington University must refund (send loan funds back to the lender) the unearned (amount of time in the academic semester that the student did not attend) amount of Title IV funds. Unearned Title IV funds will be returned to the Title IV program. Students will be responsible for any disbursed but unearned portion of their Title IV funds.

An example of a typical refund calculation can be obtained from Student Financial Services.

Changes in Fees

The university reserves the right to change the fees stated or to establish additional fees at any time without prior written notice. When fee changes or additions are made, they become effective with the next payment due.

Nonpayment of Fees

Nonpayment of tuition or other charges due the university or otherwise affecting the university will prohibit the student from receiving certain services. Students with outstanding financial obligations to the university will not be allowed to register or to obtain transcripts or official verification of enrollment.

Financial Support

Washington University bases most financial assistance on a careful assessment of financial need. The university also offers a limited number of academic scholarships and fellowships based solely on academic merit. Other financing options and innovative plans, such as the Partners in Education with Parents and TuitionPay, the monthly payment plan, assist students and parents in financing the university’s costs.

Eligible Washington University undergraduate students receive need-based financial assistance, which is offered in combinations of scholarships and grants, long-term subsidized loans, and in many cases, part-time campus employment.

Applicants’ financial circumstances are considered individually in the financial assistance process. In evaluating the extent of each applicant’s need, the university considers many factors besides family income, such as the number of people in their family, the number of children in college at the same time, and special financial circumstances. When students apply for need-based financial assistance, they are considered for all types of assistance — grants, student loans and part-time employment.

The university strives to make attendance a financial reality for qualified students, even when financial need is great. Information about application procedures may be obtained from Student Financial Services.

Veterans. If applicants are seeking benefits from the Veterans Administration, they should contact the Office of the University Registrar at registrar.wustl.edu.

Scholarship Funds

Many scholarship funds, which are administered by Washington University, are provided by generous donors to assist the university in supporting financially needy and deserving students. These scholarships are included in financial assistance awards. In addition, merit scholarship funds are available to undergraduates in any school. For scholarship information, please visit the Admissions website at: admissions.wustl.edu/scholarships/Pages/default.aspx.

Army ROTC Scholarships

High school seniors may compete for four-year Army Reserve Officers’ Training Corps (ROTC) scholarships. Current students may compete for three- and two-year scholarships. These scholarships are awarded based on merit. Army ROTC scholarships provide the full amount of tuition and mandatory fees for undergraduate study at Washington University. Army ROTC scholarships also include support for textbook purchases and a monthly allowance during the period the student is in school on scholarship status. Some students who receive Army ROTC scholarships also receive stipends from the university for room and board. The source of the student’s stipend will be the university; federal or state government; or other scholarships, depending on the student’s eligibility for assistance. For more information, write the Military Science Department, Washington University in St. Louis, 700 Rosedale Ave., Suite 1120, St. Louis, MO 63112, or call 314/935-5521, or visit the Washington University Army ROTC website at rotc.wustl.edu. The Four-Year Scholarship application may be submitted through the Army ROTC National Headquarters website, goarmy.com/rotc/.
Air Force ROTC Scholarships

High school seniors and current students may compete for two-, three- or four-year AFROTC scholarships, which cover up to full tuition at Washington University, plus a stipend and allowance for books. In College Scholarship Program (ICSP) requirements vary year to year and require at least one semester of AFROTC participation prior to application. Extensive information and the electronic application portal can be found at www.afrotc.com. Informational interviews are required of qualified applicants.

Different types of Air Force ROTC merit-based scholarships are available to students studying at Washington University. However, a scholarship is not required to join ROTC or to successfully earn a commission. For scholarship details, contact AFROTC, Gateway Detachment 207 at 314/977-8332 or afrotc@slu.edu.

Corporation Awards to Children of Employees

A number of companies have scholarship programs open to children of their employees. Inquiries about such plans should be made through their parents’ employer(s).

Loans

Washington University participates in the federal student and parent loan programs. These loans provide reasonable interest rates and long-term repayment schedules. They make attendance possible for many of the university’s students.

Partners in Education with Parents (PEP)

Partners in Education with Parents (PEP) is an innovative multiple-option program financed and operated by Washington University to help parents pay university charges — tuition, fees and room and board.

PEP continues Washington University’s commitment to a partnership with the families of our students. This partnership includes a variety of choices to make parents’ contributions as affordable as possible. Parents may choose the Multiyear Option, Prepayment Option or Annual Option.

The PEP Multiyear Option allows families to borrow one initial amount at the start of the freshman year to cover all, or part of, all four years of tuition, fees and room and board charges. This option freezes the charges covered by PEP at the freshman-year rate, based on the percentage of costs covered by the PEP (participation rate). Families can benefit from the competitive, fixed interest rate and take up to 10 years to repay. There is no penalty for prepayment.

The PEP program also offers the choice to prepay, without borrowing from Washington University, all or part of the tuition, fees and room and board charges for all four undergraduate years at the freshman-year rate. This option, the Prepayment Option, assures families that the prepaid portion of college expenses is covered and will not be subject to later increases in university costs.

Students can also choose the Combination Option, which allows their family to prepay a portion of the charges and borrow the rest from Washington University. This combination works well for parents who may have saved for a portion or most of their student’s college expenses and who want to take advantage of the benefit of increasing their participation rate by using PEP to finance the remaining charges.

If the family prefers to borrow for college costs one year at a time, then the PEP Annual Option might be their best choice. Each year they can borrow an amount up to or equal to that year’s tuition, fees and room and board charges and take up to 10 years to repay. There is no penalty for prepayment and they can benefit from the competitive fixed interest rate.

Financing under the Multiyear or Annual Options requires no security or collateral from participants. A prospective participant must have a good credit rating and provide evidence of being able to meet the required monthly payments to be approved for a loan.

More information about Partners in Education with Parents is available from Student Financial Services, Washington University in St. Louis, Campus Box 1041, One Brookings Drive, St. Louis, MO 63130-4899; 314/935-4139 or 800/468-0569, fax 314/935-4037; e-mail: financial@wustl.edu; or the website at sfs.wustl.edu.

TuitionPay (Monthly Payment Plan)

TuitionPay, the monthly payment plan, provides for the payment of total annual university charges — tuition, fees and room and board — in nine or 10 monthly installments. Information about this plan is provided to all admitted students or may be obtained directly from Student Financial Services. For details, visit sfs.wustl.edu.

Federal Work-Study

If students apply for financial assistance, they are considered for the Federal Work-Study program (FWS). FWS employees work an average of 10 to 12 hours a week on campus and typically earn $2,500 over the course of the academic year.

University Affiliations

Washington University is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools (http://www.ncahlc.org/ or 800/621-7440). Washington University is a member of the Association of American Universities, the American Council on Education, the College Board and the Independent Colleges and Universities of Missouri.
The College of Arts & Sciences is a member of the Center for Academic Integrity, the Council of Colleges of Arts and Sciences, the American Association of College Registrars and the Association of American Colleges and Universities (AACU).

The College of Architecture was one of the eight founding members of the Association of Collegiate Schools of Architecture (ACSA) in 1912.

The Graduate School of Architecture & Urban Design’s Master of Architecture degree is accredited by the National Architectural Accreditation Board (NAAB). The Sam Fox School of Visual Arts & Design (Art) is a founding member of, and is accredited by, the National Association of Schools of Art and Design (NASAD).

The Olin Business School is a charter member of the Association to Advance Collegiate Schools of Business International (1921).

In the School of Engineering & Applied Science, many of the professional degrees are accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

The School of Law is accredited by the American Bar Association.

The School of Medicine is a member of the Liaison Committee on Medical Education.

George Warren Brown School of Social Work is accredited by the Council on Social Work Education.

The University Libraries are a member of the Association of Research Libraries.

The Mildred Lane Kemper Art Museum is nationally accredited by the American Alliance of Museums.

**Majors (all schools)**

The following is an alphabetical list of all majors from all undergraduate schools.

* Accounting (p. 884)
* African and African-American Studies (p. 157)
* American Culture Studies (p. 173)
* Ancient Studies (p. 303)
* Anthropology (p. 212)
* Anthropology: Global Health and Environment (p. 212)
* Applied Linguistics (p. 382)
* Applied Science (Chemical Engineering) (p. 985)
* Applied Science (Computer Science) (p. 936)
* Applied Science (Electrical Engineering) (p. 959)
* Applied Science (Mechanical Engineering) (p. 1002)
* Applied Science (Systems Science and Engineering) (p. 959)
* Arabic (p. 238)
* Archaeology (p. 242)
* Architecture (p. 48)

* Art (p. 81)
* Art (Painting concentration) (p. 81)
* Art (Photography concentration) (p. 81)
* Art (Printmaking concentration) (p. 81)
* Art (Sculpture concentration) (p. 81)
* Art History and Archaeology (p. 251)
* Biology (p. 271)
* Biology: Biochemistry and Molecular Biology (p. 271)
* Biology: Ecology and Evolution (p. 271)
* Biology: Genomics and Computational Biology (p. 271)
* Biology: Neuroscience (p. 271)
* Biomedical Engineering (p. 919)
* Chemical Engineering (p. 985)
* Chemistry (p. 291)
* Chemistry: Biochemistry Concentration (p. 291)
* Chinese Language and Culture (p. 297)
* Classics (p. 303)
* Communication Design (p. 81)
* Comparative Arts (p. 312)
* Comparative Literature (p. 312)
* Computer Engineering (p. 936)
* Computer Science (p. 936)
* Dance (p. 322)
* Development/International Area Studies (p. 597)
* Drama (p. 332)
* Earth and Planetary Sciences (p. 349)
* Earth and Planetary Sciences: Geochemistry (p. 349)
* Earth and Planetary Sciences: Geology (p. 349)
* Earth and Planetary Sciences: Geophysics (p. 349)
* East Asian Studies (p. 362)
* Economics (p. 374)
* Economics and Strategy (p. 884)
* Educational Studies (p. 382)
* Electrical Engineering (p. 959)
* Elementary Teacher Education (p. 382)
* English Literature (p. 396)
* English Literature: Creative Writing Focus (p. 396)
* Entrepreneurship (p. 884)
* Environmental Biology (p. 271)
* Environmental Earth Sciences (p. 349)
* Environmental Policy (p. 743)
* Environmental Studies (p. 418)
* Eurasian Studies/International and Area Studies (p. 599)
* European Studies/International and Area Studies (p. 425)
* Fashion Design (p. 81)
* Film and Media Studies (p. 439)
Minors (all schools)

The following is a list of all minors from all departments and schools.

- Accounting (p. 887)
- Aerospace Engineering (p. 1004)
- African and African-American Studies (p. 157)
- American Culture Studies (p. 174)
- Ancient Studies (p. 304)
- Anthropology (p. 213)
- Anthropology: Global Health and Environment (p. 213)
- Applied Linguistics (p. 384)
- Applied Microeconomics (p. 374)
- Arabic (p. 239)
- Archaeology (p. 242)
- Architectural History (p. 49)
- Art History and Archaeology (p. 251)
- Art (p. 82)
- Astrophysics and Astroparticle Physics (p. 734)
- Ballet (p. 323)
- Bioinformatics (p. 939)
- Biology (p. 274)
- Biomedical Physics (p. 734)

• Writing (p. 869)
Interdisciplinary Opportunities

Washington University offers courses through Interdisciplinary Programs that include studies in a variety of disciplines that cross traditional academic boundaries and support academic areas outside the schools.

• Courses in the Gephardt Institute for Public Service and the Global Certificate are all cross-listed with specific schools and departments.

• A limited opportunity for some Washington University students to enroll in courses at Saint Louis University and the University of Missouri-St. Louis is available through the Inter-University Exchange Program.

• ROTC courses are offered in conjunction with the U.S. Air Force and U.S. Army.

Use the light blue navigation bars at left to visit the pages describing these opportunities.

Gephardt Institute for Public Service

Community-based teaching and learning is embraced by schools and departments across Washington University.

Also referred to as service-learning, key elements include learning activities in service to an organization or community, course content and assignments connected to the service, and faculty oversight.

We have identified more than 75 undergraduate- and graduate-level courses for academic year 2014-2015, enhanced by community-based teaching and learning at Washington University. These courses enable students of all disciplines, from business to art, to provide service to the community while applying their learning in a real life context.

To nurture growth in this area, the Gephardt Institute of Public Service offers educational sessions, individual consultation and faculty mini-grants.

Global Certificate

Learn Globally, Compete Globally

The Global Certificate is an interdisciplinary program developed to enhance and internationalize a student’s undergraduate experience at Washington University. Open to students of all majors in Arts & Sciences, Engineering, Business, Art and Architecture, the Global Certificate is designed to expose students to diverse perspectives and teach them practical skills needed to thrive in today’s dynamic international landscape.

Global Certificate = Global Competence

Through this program, students will develop a nuanced understanding of international social, political and economic issues, and their ethical dimensions, as well as gain the intercultural skills to confidently apply this knowledge to real world problems. The Global Certificate’s interdisciplinary course work and integrated international experiences will challenge students to become more competent as global citizens.

Global Certificate Program Requirements:

- 6-9 units Foundation Seminars (lower-level)
- 6-9 units electives (upper-level)
- 3-6 units international experience (study abroad, research abroad, internship abroad with a minimum requirement of four consecutive weeks in one country)
- Global Certificate Portfolio project and presentation (completed senior year)

The Global Certificate Program is flexible and we strongly encourage students to design their own educational experience by seeking course work that addresses their diverse disciplines.

There are two options for completing the Global Certificate Program:

Option 1: “Choose Your Own Academic Adventure”

With option 1, students design their own educational experiences with guidance from the GC Program Manager and faculty associated with the Global Certificate Program. Students identify an important global issue, region or question that they would like to learn more about through the Global Certificate Program. Once students select their focus areas, they will work with the GC Program Manager to identify relevant course work.

Option 2: For students seeking more guidance, we’ve created six interest areas. These interest areas and related course work offer students a chance to have a more concentrated experience by focusing on one large topic facing the world today. The six interest areas are:

1. Global Economy (poverty, economy and the world markets)
2. Global Health (culture, nutrition and world health systems)
3. Global Conflict (peace, law and politics)
4. Innovation and the Environment: the Business of Being Green
5. Innovation and the Arts
6. Cultural Diversity, Education and Community Development

Students interested in the Global Certificate should apply early (freshman or sophomore year at the latest) to ensure there is enough time to plan for the GC course work and the international experience.

Global Certificate Interest Areas and Related Course Work

Foundation Courses

I51 Global 174 Medicine East and West: Comparing Healthcare in the US and China

This course provides a foundational introduction to comparative health studies by examining the health care systems of the
United States and China. Using the tools and interpretive frameworks of the field of medical anthropology, students in this course are exposed to a broad range of topics dealing with health and healthcare in Eastern and Western contexts. These include the study of medical pluralism, meaning of illness, health care financing, preventive care, political-economic perspectives, and sociobehavioral perspectives on health and wellness. Students taking this class will be better prepared to understand and address on-going health care concerns affecting U.S. and Chinese society.

Same as Anthro 174

Credit 3 units. A&S: SS A&S: IQ, SSC AR: SSP EN: S FA: SSP

I51 Global 210 Bugs, Drugs and Global Society: Topics in Global Health

Humans and microbes have co-existed for thousands of years. While some microorganisms are innocent bystanders in the body, others have the potential to become a dangerous pathogen. Some microbes are highly infectious and have been responsible for major global health epidemics and millions of deaths. This course takes a historical perspective to investigate major global health issues and discusses how bacteria, protists, fungi, prions, and viruses have contributed to major epidemics or pandemics. We discuss the basic biology of these organisms, and address the ecological, social, and political implications of these infectious diseases. Material from this course provides useful background for someone considering further study in medicine, social work, or health policy, as well those interested in better understanding the health issues specific to each geographical region. This course may be of particular interest to students with background in political science, sociology, and epidemiology. Discussion of current events/outbreaks, readings from mainstream and scientific literature, and group projects are integral parts of this course. There are no prerequisites for this course and no prior knowledge of biology or chemistry is required. This course is being offered in the Global Certificate.

Same as U43 210

Credit 3 units.

I51 Global 250 Engineering Impacts on Global Culture

Engineering research, practice, and products influence the human condition and society worldwide. Approaches, tools, and solutions that arise from engineering can help unite the world in solving problems both locally and internationally. Research centers, departments, and individual labs within SEAS impact the world through fields including medicine, energy, environment, security, and information technology. In this course students study and explore these impacts. Engineers and scientists from WUSTL detail the global societal impact of their work. Students, through these lectures and introductory sessions, identify a global issue of their own choosing. They research this topic in consultation with local experts to develop a term-project exploring the societal problem detailing how engineering has helped thus far, and making recommendations to further improvement. This course serves as a Foundational Seminar for the Global Certificate.

Same as Engr 250

Credit 3 units. EN: S

I51 Global 308 Introduction to International Business

Focus on the aspects of management of a business enterprise that are necessary to compete in the global marketplace. The course begins with a survey of the environmental context in which international companies operate (economic systems and cultural factors). This is followed by a review of International Trade Theory and Economics. This forms a basis for concentration in the second half of the course on strategies and structure for global operations. The course deals with the situations in Europe, Japan, Latin America and China through case studies and discussion of current topics and their relation to the fundamental aspects of global business management.

Prerequisite: junior standing or permission of instructor.

Same as MGT 308

Credit 3 units. BU: IS

I51 Global 311 Global Development and Health

Our course aims at introducing students to state-of-the-art methods for the impact evaluation of global health and development policy interventions. Our course follows a transdisciplinary approach to public health that uses perspectives from demography, economics and social work (as well as other areas of social inquiry such as anthropology, epidemiology, and sociology) to understand why some countries are healthier and more developed than others. To do so we carefully distinguish the notion of correlation from causation; here, understanding the concept of identification of causal effects is an important methodological tool of the course. We introduce two currently dominant approaches that identify causal effects and that are useful for impact evaluations of public health policies: the experimental approach (field experimental design and evaluation of experimental results) and the quantitative theory approach (e.g., microfounded models of health behavior, risk and insurance, and schooling choices). Third, we explore and review the debate about the usefulness of qualitative and participatory approaches.

Same as Econ 3111

Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

I51 Global 318 Reading Culture: 19th Century Russian Literature in Context

Developing the skills necessary to navigate an increasingly interconnected world is becoming a crucial part of today’s education. This course provides an opportunity to explore and increase global competency by reading short stories and novellas written by Russia’s greatest writers — Pushkin,
I51 Global 3248 Intercultural Communication
This course is designed to further students' sensibility toward cultural variables and to cultivate their practical skills in managing cultural diversity in everyday life and business. Our interrogation focuses on how cultural variables affect the thought, behavior, value systems, the transmission and interpretation of messages, and characteristics of interpersonal and cross-cultural communication. We learn key concepts in this field (verbal and non-verbal communication, individualism and collectivism, stereotypes and ethnocentrism, etc.) and issues of particular concern in the current world (inter-ethnic/racial relations, and intercultural communication in classrooms, medical care, and international business, etc.).
Same as IAS 3248
Credit 3 units. A&S: IQ, LCD EN: H

I51 Global 325 Global Discourses in Art & Architecture
This course examines art, architecture and urbanism from the perspective of global production, dissemination and reception. It focuses on the global exchange of people and ideas as one of the main vehicles of visual culture, both historical and contemporary. Through a series of focused case studies, the course probes inherent dichotomies within art and architecture driven by their site-specificity, yet also by their constant global displacement across various disciplinary, cultural and geographical boundaries. The course content includes lectures, discussion sessions, readings and visual projects that examine cross-cultural aspects of art and architecture.
*Enrollment limit will be set at zero and students will be enrolled from the waitlist. The course is offered as part of the University-wide Global Certificate and is open to all students at Washington University regardless of their major field of study. Sam Fox School sophomores will have priority.
Same as XCORE 325
Credit 3 units.

I51 Global 332 Metabolic City: Spaces of Bodily and Environmental Wellness
Metabolic City probes bodily and environmental wellness as intertwined cultural, social, and technological constructs. From the British Archigram Group, to the Japanese Metabolists and the Dutch artist Constant, a number of visionary projects in the 1960s re-imagined our notion of the body, city and the environment. By means of individual and collective gadgets, tools and spaces, they bridged the scales of the body and the city, weaving together issues of bodily and environmental performance. Through a combination of texts, discussions and projects, the course engages in a delayed conversation with these projects, proposing the concept of “metabolism” both as a bodily function, but also as an environmental mechanism that operates on a global scale. Some of the key concepts discussed in the class include global citizenry, urban imagination, networks, performance, virus, urban protest and insurgence. The course fulfills the Sam Fox Commons Course requirement and the architectural history/theory elective requirement and is also open to all Washington University students through the Global Certificate.
Same as XCORE 332
Credit 3 units.

I51 Global 343 Design as Export
This course introduces students to the contemporary global characteristics of design in the late 20th & 21st century. The marketing, fabrication, distribution and consumption of design is global, yet the cultural and formal identity of most design products are national and regional. How do traditions of design and quality based on centuries of a national and regional design culture react and adapt to a global market? What is the culture of design? What is design identity? Italian design is the primary focus of this course, followed by Japanese and Asian design & manufacturing. Case studies include examples of industrial design, fashion design, communication design and automobile design. The course also includes presentations by design curators and representatives of various international design companies.
Credit 3 units.

L43 General Studies 122S Global Culture, Literature and the Individual

1. Global Economy (Poverty, Economy and the World Markets)
Potential electives:
L97 IAS 4761 Politics of Global Finance

L32 Pol Sci 331 Topics in Politics: Theories of Social Justice
L32 Pol Sci 372 Topics in International Politics: Ethnic Conflict: Causes and Remedies
L32 Pol Sci 3292 Topics in Politics: Modern South Asian Politics
L32 Pol Sci 3090 Civil War and Peace
L77 WGSS 38A8 Women, Men and Gender in Africa
4. Innovation and the Environment: the Business of Being Green

Potential electives:
- U19 SUST 344 International Development and Sustainability
- B53 MGT 421 Introduction to Entrepreneurship
- B99 INTL 320 Business, Innovation and Entrepreneurship in Israel
- A46 ARCH 404D For Purpose: Art and Design as an Ethics-based Model of Entrepreneurship
- L41 Biol 2950 Introduction to Environmental Biology
- L97 IAS 4761 Politics of Global Finance
- L11 Econ 451 Environmental Policy
- L32 Pol Sci 332B Environmental and Energy Issues
- L48 Anthro 4517 Anthropology and Development: The Bolivia-Brazil Project
- A46 ARCH 376 Design Thinking for Science, Engineering, Business and the Liberal Arts
- L32 Pol Sci 3752 Globalization, Urbanization and the Environment
- L04 Chinese 4011 Popular Culture and Consumption in Modern China

5. Innovation and the Arts

Potential electives:
- A46 ARCH 376 Design Thinking for Science, Engineering, Business and the Liberal Arts
- A46 ARCH 404D For Purpose: Art and Design as an Ethics-based Model of Entrepreneurship
- L97 IAS 383 Reading the Scores: Understanding Brazilian Music through Social Categories
- L97 IAS 305 Music of the African Diaspora
- L23 Re St 585 Islam, Music, Muslim Media
- L97 IAS 4250 Zen Buddhism (prerequisite L23 Re St 311 Buddhist Traditions or instructor’s permission)
- L27 Music 3132 Romantic Revolutions in European Music and Culture
- F20 ART 1386 The Art of Advertising (Art Elective)
- L29 Dance 343 West African Music and Dance in Context
- L27 Music 1021 Musics of the World
- L48 Anthro 4481 Writing Culture
- L01 Art-Arch 3442 Tradition and Innovation: Chinese Painting from the 4th to 20th Centuries
- L01 Art-Arch 4867 The Impressionist Landscape: Style, Place and Global Legacies 1870–1920

6. Cultural Diversity, Education and Community Development

Potential electives:
- L97 IAS 328B Gateway to Development
- L32 Pol Sci 4030 Political Theory of Education
- L22 History 218 Culinary Citizenship: Food, Identity and Belonging in the 20th Century
- U19 SUST 344 International Development and Sustainability
- L22 History 2188 African Urban History
- L22 History 3673 Gurus, Saints and Scientists: Religion in Modern South Asia

- L90 AFAS 4211 New Media Literacy, Culture and Education
- L98 AMCS 4621 The Political Economy of Urban Education
- L18 URST 3036 Migration and Modernity: Human Mobility, Identity and State Formation — Russian/Soviet/Post-Soviet Context
- L18 URST 3301 Topics in Chinese Literature and Culture: Chinese Cities in the Global Context
- L61 Focus 2601 Focus: The Argentine Experience: History, Literature, Culture
- L90 AFAS 433 Culture, Language and the Education of Black Students

Inter-University Exchange Program

The Inter-University Exchange program between Washington University, Saint Louis University and the University of Missouri–St. Louis began in 1976 as an exchange agreement encouraging greater inter-institutional cooperation at the graduate level. Over time, this program has evolved to include undergraduate education, however, the basic provisions of the original agreement are still in place today and participation continues to be at the discretion of each academic department or unit.

At Washington University, there are several schools that DO NOT PARTICIPATE in this program (i.e. degree-seeking students in these schools are not eligible to participate in the IE
program and courses offered in these schools are not open to SLU and UMSL students attending WU through the IE program. They are the School of Law, the School of Medicine, University College and the Summer School. The WU schools that are open to participation in the Inter-University Exchange program may have specific limitations or requirements on participation; details are available in those offices.

The following provisions apply to all course work taken by Washington University students attending Saint Louis University or the University of Missouri–St. Louis through the Inter-University Exchange program:

- Such courses will be used in the fulfillment of degree or major requirements.
- Such courses are not regularly offered at Washington University.
- Registration for such courses requires preliminary approval of the student’s major/department adviser, the student’s division office or dean, and the academic department of the host university.
- Students at the host institution have first claim on course enrollment (i.e. a desired course at SLU or UMSL may be fully subscribed and unable to accept WU students).
- Academic credit earned in such courses will be considered as resident credit, not transfer credit.
- Tuition for such courses will be paid to Washington University at the prevailing WU rates; there is no additional tuition cost to the student who enrolls in IE course work on another campus. However, students are responsible for any/all fees charged by the host school.
- Library privileges attendant on enrolling in a course on a host campus will be made available in the manner prescribed by the host campus.

Instructions

Washington University students must be enrolled full-time in order to participate in the IE program and have no holds, financial or otherwise, on their academic record at WU or at the host institution.

1. The student must complete the Inter-University Exchange application form. Forms are available from the Office of the University Registrar and on its website (link below).
2. The student must provide all information requested in the top portion of the form and indicate the course in which they wish to enroll.
3. The student must obtain the approval signature of the professor teaching the class (or department chair) at SLU or UMSL, preferably in person.
4. The student also must obtain approval signatures of his/her major adviser at WU and the appropriate individual in his/her dean’s office.

5. Completed forms must be submitted to the Office of the University Registrar in the Women’s Building a minimum of one week before the start of the term.

Course enrollment is handled administratively by the registrars of the home and host institutions. WU students registered for IE course work will see these courses on their class schedule and academic record at WebSTAC under departments I97 (SLU) and I98 (UMSL). Final grades are recorded when received from the host institution. The student does not need to obtain an official transcript from SLU or UMSL to receive academic credit for IE course work at WU.

Contact Person: Office of the University Registrar
Phone: 314/935-5959
E-mail: registrar@wustl.edu
Departmental website: http://registrar.wustl.edu/student-records/registration/inter-university-exchange-program/

Reserve Officers Training Corps (ROTC)

Air Force ROTC — Aerospace Studies

Professor

Michael Cook
Major, U.S.A.F.

Military Aerospace Science. Our Core Values: Integrity First, Service Before Self, Excellence In All We Do. Air Force operations are currently conducted in the technologically demanding environments of air, space and cyberspace.

AFROTC is a four-year officer development program, producing the leaders of tomorrow’s Air Force. The program’s purpose is to train and develop outstanding college students to earn commissions as U.S. Air Force Officers. Numerous Washington University students have participated in Air Force ROTC and gone on to distinguish themselves as Air Force aviators, engineers, physicians and astronauts.

In AFROTC, Washington University students have the opportunity to be challenged within a unique leadership environment, with the potential to earn a commission as a second lieutenant. Participation in Air Force ROTC is available to freshman and possibly sophomore Washington University students and will not obligate a student to serve in the U.S. Air Force.

Air Force ROTC attracts the very best and brightest college students. The categorization of officer candidates within Air Force ROTC is based upon competitive selection criteria.
For more information, contact the AFROTC Detachment 207 in St. Louis at 314/977-8227 or www.slu.edu/organizations/afrotc; or 1-888-4-AFROTC or www.afrotc.com.

For AFROTC scholarship information, see the Scholarship page of this Bulletin.

Army ROTC

Military Science. Army ROTC is a program that develops leadership, management and training skills regardless of a student’s career plans. Those who successfully complete the program will earn a commission as a second lieutenant in the U.S. Army, Army Reserve or Army National Guard.

All students are eligible to participate in Army ROTC courses. Introductory courses are available in which students will develop confidence, self-esteem and motivation. The intent is to develop and refine a student’s leadership traits and skills to ensure success. Instruction also includes the role of the military in national defense strategy. Once a student accepts a scholarship or enters the advanced courses (300- and 400-levels), he or she incurs a military obligation. For more information, write the Military Science Department, Washington University in St. Louis, 700 Rosedale Ave., Suite 1120, St. Louis, MO 63112, or call 314/935-5521, or visit the Washington University Army ROTC website at www.rotc.wustl.edu.

For Army ROTC scholarship information, see the Scholarship page (p. 29) of this Bulletin.

Air Force ROTC — Aerospace Studies

I02 MAIR 101 Foundations of the United States Air Force I
A survey course designed to introduce students to the U.S. Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officer and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets, and it complements this course by providing students with followership experiences and prepares them for Field Training. Classroom activity, one hour per week; Leadership Laboratory two hours per week. Aerospace Studies courses (MAIR 101 through MAIR 202) are basic courses designed to acquaint students with the U.S. Air Force and the opportunities available as an officer.

I02 MAIR 102 Foundations of the United States Air Force II
A survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officer and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory is mandatory for Air Force ROTC cadets, and it complements this course by providing students with followership experiences and prepares them for field training.

Classroom activity, one hour per week; Leadership Laboratory two hours per week. Aerospace Studies courses (MAIR 101 through MAIR 202) are basic courses designed to acquaint students with the United States Air Force and the opportunities available as an officer.

I02 MAIR 201 Evolution of USAF Air and Space Power I
A survey course concerned with the beginnings of manned flight and the development of aerospace power in the United States, including the employment of air power in WWI, WWII, Korea, Vietnam, the Gulf War and the peaceful employment of U.S. air power in civic actions, scientific missions and support of space exploration. Leadership Laboratory is mandatory for Air Force ROTC cadets and it complements this course by providing cadets with their first opportunity for applied leadership experiences and prepares them for Field Training. Classroom activity, one hour per week; Leadership Laboratory two hours per week. Aerospace Studies courses (MAIR 101 through MAIR 202) are basic courses designed to acquaint students with the United States Air Force and the opportunities available as an officer.

I02 MAIR 202 Evolution of USAF Air and Space Power II
A survey course concerned with the beginnings of manned flight and the development of aerospace power in the United States, including the employment of air power in WWI, WWII, Korea, Vietnam, the Gulf War and the peaceful employment of U.S. air power in civic actions, scientific missions and support of space exploration. Leadership Laboratory is mandatory for Air Force ROTC cadets and it complements this course by providing them with their first opportunity for applied leadership experiences and prepares them for Field Training. Classroom activity, one hour per week; Leadership Laboratory two hours per week. Aerospace Studies courses (MAIR 101 through MAIR 202) are basic courses designed to acquaint cadets with the United States Air Force and the opportunities available as an officer.

I02 MAIR 301 Air Force Leadership Studies, Principles of Leadership and Management I
This course is a study in the anatomy of leadership, the need for quality and management leadership, the role of discipline in leadership situations and the variables affecting leadership. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts. Cadets deal with actual problems and complete projects associated with planning and managing the Leadership Laboratory. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving cadets opportunities to apply leadership and management principles of this course. Classroom activity, three hours per week; Leadership Laboratory two hours per week. Aerospace Studies courses (MAIR 301 through MAIR 402) are advanced
courses designed to improve communication and management skills required of Air Force officers.

**I02 MAIR 302 Air Force Leadership Studies, Principles of Leadership and Management II**

This course continues the study in the anatomy of leadership, the need for quality and management leadership, the role of discipline in leadership situations and the variables affecting leadership. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts. Cadets deal with actual problems and complete projects associated with planning and managing the Leadership Laboratory. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving cadets opportunities to apply leadership and management principles of this course. Classroom activity, three hours per week; Leadership Laboratory two hours per week. Aerospace Studies courses (MAIR 301 through MAIR 402) are advanced courses designed to improve communication and management skills required of Air Force officers.

**I02 MAIR 401 National Security Studies and Preparation for Active Duty I**

Cadets learn about the role of the professional military leader in a democratic society; societal attitudes toward the armed forces; the requisites for maintaining adequate national defense structure; the impact of technological and international developments on strategic preparedness and the overall policy-making process; and military law. In addition, cadets study topics that prepare them for their first active-duty assignment as officers in the Air Force. A mandatory Leadership Laboratory complements this course. Leadership Laboratory provides advanced leadership experiences and gives cadets opportunities to develop and apply fundamental leadership and management skills while planning and conducting corps activities. Classroom activity three hours per week; Leadership Laboratory two hours per week. Aerospace Studies courses (MAIR 301 through MAIR 402) are advanced courses designed to improve communication and management skills required of Air Force officers.

**I02 MAIR 402 National Security Studies and Preparation for Active Duty II**

Cadets learn about the role of the professional military leader in a democratic society; societal attitudes toward the armed forces; the requisites for maintaining adequate national defense structure; the impact of technological and international developments on strategic preparedness and the overall policy-making process; and military law. In addition, cadets study topics that prepare them for their first active-duty assignment as officers in the Air Force. A mandatory Leadership Laboratory complements this course. Leadership Laboratory provides advanced leadership experiences and gives cadets opportunities to develop and apply fundamental leadership and management skills while planning and conducting corps activities. Classroom activity three hours per week; Leadership Laboratory two hours per week. Aerospace Studies courses (MAIR 301 through MAIR 402) are advanced courses designed to improve communication and management skills required of Air Force officers.

**Army ROTC**

**I25 MILS 101C Leadership and Personal Development**

Students examine the challenges and competencies that are critical for effective leadership. Students learn how the personal development of life skills such as cultural understanding, goal setting, time management, mental/physical resiliency, and stress management relate to leadership, officership, and the U.S. Army profession. MILS 101C is open to all students, and enrollment does not require a commitment to join the U.S. Army. Engineering students may petition Engineering Student Services (Lopata Hall, Room 303) to have 2 units display on their transcripts; however, the units will not count toward their degree program.

**I25 MILS 102C Introduction to Tactical Leadership**

Students investigate leadership fundamentals such as problem solving, listening, presenting briefs, providing feedback, and using effective writing skills. Students explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive exercises. Students also learn fundamental military concepts and explore the Army’s leadership philosophy. Aspects of personal motivation and team building are practiced by planning, executing and assessing team exercises. MILS 102C is open to all students, and enrollment does not require a commitment to join the U.S. Army. Engineering students may petition Engineering Student Services (Lopata Hall, Room 303) to have 2 units display on their transcripts; however, the units will not count toward their degree program.

**I25 MILS 201C Foundations of Leadership**

Students explore the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and leadership theories. The course continues to build on developing knowledge of leadership attributes and core leader competencies through the understanding of Army rank, structure and duties as well as broadening knowledge of land navigation and squad tactics. Enrollment in MILS 201C does not require a commitment to join the U.S. Army. Engineering students may petition Engineering Student Services (Lopata Hall, Room 303) to have 3 units display on their transcripts; however, the units will not count toward their degree program.

**I25 MILS 202C Foundations of Tactical Leadership**

Students develop greater self-awareness as they assess their leadership styles and practice communication and team building skills. Students examine and practice the challenges of
leading teams in complex operational environments, and study dimensions of terrain analysis, patrolling, and operation orders. Further study of the theoretical basis of the Army Leadership Requirements Model explores the dynamics of adaptive leadership in the context of military operations. Case studies give insight into the importance and practice of teamwork and tactics in real-world scenarios. Enrollment in MILS 202C does not require a commitment to join the U.S. Army. Engineering students may petition Engineering Student Services (Lopata Hall, Room 303) to have 3 units display on their transcripts; however, the units will not count toward their degree program.

I25 MILS 301C Adaptive Leadership
This is an academically challenging course where students study, practice, and apply the fundamentals of leadership; Army values and ethics; and small unit tactics using the service learning model in leadership labs and assigned leadership roles. Cadets receive systematic and specific feedback on their leadership attributes and actions. Based on such feedback, as well as their own self-evaluations, cadets continue to develop their leadership abilities and critical thinking abilities as well as their physical fitness and ability to manage stress. At the conclusion of this course students will be capable of planning, coordinating, navigating, motivating and leading a squad in the execution of tactical missions during classroom practical exercises, leadership labs, and during military situational training exercises in field environments. Prerequisite for this course is the successful completion of MILS 101C through 202C; or attendance at the Leader’s Training Course. Engineering students may petition Engineering Student Services (Lopata Hall, Room 303) to have 3 units display on their transcripts; however, the units will not count toward their degree program.

I25 MILS 302C Applied Team Leadership
Students continue to learn and apply the fundamentals of Army leadership, offiership, Army values and ethics as they hone their leadership abilities in a variety of environments including classroom instruction, leadership labs, and assigned leadership roles while utilizing the service learning model. At the conclusion of this course, students will be capable of planning, coordinating, navigating, motivating and leading a platoon in the execution of tactical missions during classroom practical exercises, leadership labs, and during military situational training exercises in field environments. Successful completion of MILS 302C helps prepare students for success at the ROTC Leader Development and Assessment Course (LDAC) which cadets attend during the summer at Fort Knox, Kentucky. Cadets receive systematic and specific feedback on their leadership attributes, values and core leader competencies from instructors, other ROTC cadre, and senior cadets. Prerequisite for this course is the successful completion of MILS 301C. Engineering students may petition Engineering Student Services (Lopata Hall, Room 303) to have 3 units display on their transcripts; however, the units will not count toward their degree program.

I25 MILS 401C Adaptive Leadership
The MILS 401C course transitions the focus of student learning from being trained, mentored and evaluated as a military science 3 cadet to learning how to train, mentor and evaluate underclass cadets. This course focuses on practical application using the service learning model to gain knowledge of adaptive leadership. Students are assigned key battalion leadership roles and are responsible for the daily operation, assessment, and development of the cadet battalion. Throughout the semester, students learn the duties and responsibilities of an Army staff officer, apply the principles of training and management, utilize the military decision making process, design and employ a comprehensive fitness program, mentor underclass cadets, and use effective verbal and written communication. Students study ethics, the law of war, risk management, counseling, and the Army officer’s role in the Uniform Code of Military Justice. Cadets also learn about the special trust reposed to Army Officers by the U.S. Constitution — a special confidence given to no other civilian profession. Prerequisite for this course is the successful completion of the ROTC Leader Development and Assessment Course (LDAC) or permission of the Professor of Military Science. Engineering students may petition Engineering Student Services (Lopata Hall, Room 303) to have 3 units display on their transcripts; however, the units will not count toward their degree program.

I25 MILS 402C Leadership in a Complex World
This course builds on the lessons of MILS 401C. Students continue to use the service learning model to gain leadership experience and knowledge while serving in assigned key battalion leadership roles and are responsible for the daily operation and development of the cadet battalion. MILS 402C explores the dynamics of leading Soldiers in Full-Spectrum Operations in the current operating environment. Students examine military customs and courtesies, military law, principles of war, and rules of engagement in a complex environment against an adaptive enemy. Students also explore aspects of interacting with non-government organizations, civilians on the battlefield, and host nation support. Military science 4 cadets develop and present a battle analysis and participate in a Staff Ride to Pilot Knob, an historic military site. The course also places significant emphasis on preparing cadets for their first unit of assignment. It uses case studies and exercise scenarios to prepare cadets to face the complex ethical and practical demands of leading as commissioned officers in the United States Army. Prerequisite for this course is the successful completion of MILS 401C or permission of the Professor of Military Science. Engineering students may petition Engineering Student Services (Lopata Hall, Room 303) to have 3 units display on their transcripts; however, the units will not count toward their degree program.

EN: S
Architecture

Sam Fox School of Design & Visual Arts

The Sam Fox School of Design & Visual Arts is a unique collaboration in architecture, art and design education, linking professional studio programs with one of the country’s finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art, and the Mildred Lane Kemper Art Museum.

Architecture

Throughout history, architects have played a leading role in forming the environment and in interpreting the aspirations of societies in all parts of the world. As a practical and useful art, architecture embraces aesthetic, ethical, social and technical responsibilities. Architecture responds to the way people live and, in turn, influences their lives.

Students considering an architectural education and architecture as a potential career express an excitement about design and building, as well as a commitment to the environment. If students plan to study architecture, they should have artistic ability and a good academic base. Personal interests in such areas as drawing, painting, photography, sculpture, building and the environment suggest a possible aptitude for architecture.

Architecture reflects culture; architects must know their culture deeply. To gain an understanding of all aspects of architecture and to develop the attitudes and skills necessary to deal with them, students must have a broad liberal arts education. This base of cultural understanding and critical thinking is combined with a curriculum that focuses intensely on the study of architecture.

Architecture is an absorbing, fascinating profession. Choosing architecture as a professional career requires a major educational commitment at the undergraduate level and to further study in a professional degree program. With a professional degree in architecture, a graduate may choose to work in small or large architectural firms, in academia, in community or governmental organizations, with development teams, and in a variety of related fields.

Architecture at Washington University

Washington University established the Department of Architecture as part of the School of Engineering and Architecture in 1902. The School of Architecture became an independent division of the university in 1910.

In 1932, Givens Hall was constructed to house the school as a result of a generous gift in memory of Joseph W. and Kate Abbey Givens. The Art & Architecture Library and the Mildred Lane Kemper Art Museum are in the new Kemper Art Museum building. Steinberg Hall also houses studio and review space.

In 1967, the School of Architecture became one of the first schools in the United States to offer a pioneering six-year joint-degree (Bachelor of Arts and Master of Architecture) program. The 4+2 program now leads to a thorough four-year Bachelor of Science in Architecture degree, followed by two years of graduate study for the accredited professional Master of Architecture degree. In 2005, as part of the formation of the Sam Fox School of Design & Visual Arts, the School of Architecture was reorganized as the College of Architecture and the Graduate School of Architecture & Urban Design.

Equally, the college offers the four-year Bachelor of Design degree with a major in architecture — a strong, flexible undergraduate curriculum that also prepares students for graduate study in architecture, usually for three years. These undergraduate degree programs offer students the opportunity to gradually focus their undergraduate studies within the college and allow them to make an incremental commitment to a career in architecture.

The College of Architecture faculty are nationally and internationally renowned practitioners and researchers who are committed to students’ undergraduate experience. As academic advisers, they work with the dean and associate dean to help students build an individualized curriculum, select specific courses and chart plans for their future careers.

Undergraduate Degree Programs

The College of Architecture offers course work leading to two undergraduate degrees: the Bachelor of Science in Architecture and the Bachelor of Design in Architecture. The requirements for both degrees are the same through the junior year.

Students begin with a Sam Fox School foundation drawing course taken with first-year students in the College of Art and two design courses particular to architecture. They take required courses in the College of Arts & Sciences and electives in architecture and the Sam Fox School.

For the Bachelor of Science degree, students continue to study architecture in depth through the senior year. For those in the Bachelor of Design program, the fourth year offers flexibility in studying outside of architecture or pursuing other electives in architecture and art.

Continuing for graduate study years:

Students receiving the Bachelor of Science in Architecture degree can apply to two-year Master of Architecture programs. Students receiving the Bachelor of Design degree with a major
combined studies

Washington University offers students the option to study across disciplines and to take advantage of the wide range of courses available. Students may choose to major in architecture and minor in another subject; major in architecture and choose a second major in another area within the College of Arts & Sciences; or major in architecture and choose a second major in an area from a different undergraduate school.

special programs and resources

cooperative program in architecture

The Graduate School of Architecture & Urban Design has established agreements with a number of primarily undergraduate liberal arts schools in the United States to allow their students to take advantage of the Cooperative Program in Architecture. Cooperative Program students are able to begin their architectural studies at Washington University in their senior year, or still enrolled as undergraduates. Their undergraduate degrees will come from the home institution where they reside for three years, yet they include within their four-year baccalaureate degree program one year of study at Washington University. For more information, contact: Cooperative Program in Architecture, Washington University in St. Louis, Campus Box 1079, One Brookings Drive, St. Louis MO 63130. Call 314/935-6227 or 800/295-6227 (continental U.S.) or e-mail wuarch@samfox.wustl.edu.

study abroad

A summer Architecture Study Abroad Program (Arch 484A) is available for sophomores and juniors in the College of Architecture. This six-week, 6-credit program takes students through significant European or South American cities, in a directed curriculum of urban and building analysis and appreciation. In the spring semester of the sophomore year, architecture students may apply for the college’s junior year, spring semester architecture program in Florence, Italy. In the fall of the senior year, architecture students can study a full architecture curriculum with the Denmark International Studies program in Copenhagen, Denmark. These course credits are approved for full transfer to degree studies in the College of Architecture. For more information, contact the Office of the Dean in the College of Architecture.

Architecture students are eligible to participate in the university’s study abroad programs.

independent study

opportunities for independent study are available to all graduate and undergraduate students. Registration in an independent study course requires sponsorship by an instructor and permission of the dean. A maximum of 5 units (graduate students), 3 units (juniors and seniors), and 1 unit (freshmen and sophomores) may be taken per semester. Independent study courses cannot replace architectural design studios or other required courses. An independent study proposal sheet approved by a faculty sponsor must be submitted to the Office of the Dean at registration time.

summer school

The College of Architecture offers a limited number of courses during the summer, primarily ARCH 447A Structures I and ARCH 448A Structures II.

graduate degree programs

The Graduate School of Architecture & Urban Design’s degree programs include a range of curricula for students with a variety of educational backgrounds, professional degree needs and career ambitions.

most states require that an individual intending to become an architect hold an accredited professional degree. The National Architectural Accrediting Board (NAAB) accredits two types of degrees: (1) the Bachelor of Architecture (not offered by this College of Architecture), which requires a minimum of five years of study, and (2) the Master of Architecture, which requires a minimum of three years of study following an unrelated bachelor’s degree or two years of study following a related pre-professional bachelor’s degree. These professional degrees are structured to educate those who aspire to registration/licensure as architects.

The graduate school’s Master of Architecture degree (MArch 3 and MArch 2 programs) is an NAAB-accredited professional degree. The school’s NAAB-accreditation status was evaluated and confirmed in the spring of 2005.

Master of Architecture Degree

Students holding bachelor’s degrees in fields other than architecture are invited to apply to the graduate school’s accredited professional MArch 3 degree program. Elementary calculus and physics are required as prerequisites for enrollment. While the curriculum typically spans seven semesters, students may complete this professional studies program in a minimum of three years including two summers.
Students with the Bachelor of Arts degree with a major in architecture, including studios at both the 300- and 400-levels, or the equivalent, are placed within the MArch 3 curriculum on the basis of their previous design studio experience and overall academic record.

The Graduate School of Architecture & Urban Design welcomes graduates of other schools with the undergraduate degrees in architecture (Bachelor of Science in Architecture) or the equivalent as candidates for the accredited professional Master of Architecture degree program (MArch 2). This curriculum typically spans four semesters.

Postgraduate programs, for students already possessing accredited professional degrees (Bachelor of Architecture or the equivalent), include the three-term MArch 1 degree curriculum or the Master of Urban Design degree program.

**Master of Urban Design Degree**

Students with a professional degree or the equivalent in architecture, urban planning or landscape architecture may apply for admission to the program leading to the Master of Urban Design degree. This degree is awarded upon completion of a three-term graduate curriculum devoted to urban design in metropolitan conditions.

**Master of Landscape Architecture Degree**

In the fall of 2010, the college and Graduate School of Architecture & Urban Design at Washington University in St. Louis launched a new graduate program in landscape architecture leading to a professional Master of Landscape Architecture (MLA). Two- and three-year degree options accommodate students with design and other undergraduate degrees. The landscape program further develops cross-disciplinary connections among architecture, urban design, and visual arts in the Sam Fox School of Design to grant MLAUD and MArch degrees.

This new program in landscape architecture focuses on the three subjects of design, ecology and urbanism. The transformative process of design — linking cultural, historical and technological investigations — forms the pedagogical basis for research. Ecology informs design practice to address a multiplicity of scales and natural systems within the environment. Urbanism serves as a terrain of contemporary landscape practice. As heirs to design, ecological and urban traditions, landscape architects are uniquely suited to articulate a spatial vision for today’s environment. This three-pronged approach is geared to develop the students’ critical and conceptual abilities, and prepare them to become leaders within professional and academic spheres.

The curriculum is centered on studio teaching supported by instruction in technology, history and theory. Following the core sequence of design studios and classes, students are encouraged to develop their own research interests through advanced design studios and electives. Interdisciplinary and international option studios foster a multiplicity of perspectives leading to a research-based degree project (thesis or independent study). In addition, students have opportunities to further their investigations within and beyond the school through teaching and research assistantships and scholarships.

The landscape architecture program draws on a unique set of institutional, regional and international resources available at the Sam Fox School. St. Louis functions as a laboratory for understanding and testing ecological and urban theories at the local scale, from brownfield reclamation to urban agriculture systems. Washington University’s outstanding programs in environmental studies, environmental engineering and American Culture Studies expand curricular offerings in ecology, technology and landscape studies, and the internationally renowned Missouri Botanical Garden serves as an exceptional tool of research and teaching. Finally, through the extensive international offerings of the school in Barcelona, Buenos Aires, Helsinki, Seoul and Tijuana, students experience different landscapes, cultures and cultures of practice.

**Combined Degree Programs**

The Graduate School of Architecture & Urban Design offers the following combined degree programs at the graduate level:

- Master of Architecture — Master of Urban Design
- Master of Architecture — Master of Business Administration
- Master of Architecture — Master of Social Work
- Master of Architecture — Master of Construction Management
- Cooperative 3+4 Program

Information on these combined degree programs can be obtained from the respective school’s Office of Graduate Admissions. In all cases, application must be made separately to each graduate or professional program.

**Information and Applications**

An application to the graduate programs should include a portfolio of student work in the visual arts (drawing, painting, sculpture, etc.) or architectural design work if the applicant has completed architectural design studio courses, along with a transcript or record from the institutions attended, and letters of recommendation. The Test of English as a Foreign Language (TOEFL) is required of international applicants along with verification of availability of funds.

For more information about graduate degree programs and requirements, contact the Director of Graduate Admissions, Graduate School of Architecture & Urban Design, Sam Fox School of Design & Visual Arts, Washington University in St. Louis, Campus Box 1079, One Brookings Drive, St. Louis, MO 63130-4899, or send e-mail to: samfoxschool@wustl.edu.

Full-Time Positions
Faculty members have nine- or 11-month full-time renewable appointments. These may be tenured or nontenured positions and are titled professor, associate professor and assistant professor of architecture.

Visiting Positions
Faculty members have full-time appointments for a limited period of time, usually no less than a semester and no more than one full academic year. These are nontenured positions and are titled visiting professor, visiting associate professor, visiting assistant professor of architecture and visiting architect.

Part-Time Positions
Faculty members, who usually are practicing architects, have less than full-time appointments. These individuals may teach as many as two courses each semester or as few as one course, one semester a year. These are nontenured positions and are titled affiliate professor, affiliate associate professor, affiliate assistant professor of architecture and lecturer.

The Major in Architecture
Bachelor of Design Degree
The major requirements for the Bachelor of Design degree, with a major in architecture, are as follows:

- ARCH 311 Architectural Design I: 6
- ARCH 312 Architectural Design II: 6
- ARCH 3284 Architectural History II: Architecture Since 1880: 3
- ARCH 333 Case Studies in 20th-Century Architecture: 3
- ARCH 346 Building Systems I: 3
- Capstone Course: 3
- Electives

For additional information on current requirements, please visit the Degree Requirements (p. 73) page.

Bachelor of Science in Architecture Degree
The major requirements for the Bachelor of Science in Architecture degree are as follows:

- ARCH 311 Architectural Design I: 6
- ARCH 312 Architectural Design II: 6
- ARCH 411 Architectural Design III: 6
- ARCH 412 Architectural Design IV: 6
- ARCH 3284 Architectural History II: Architecture Since 1880: 3
- ARCH 333 Case Studies in 20th-Century Architecture: 3
- ARCH 346 Building Systems I: 3
- ARCH 447A Structures I: 3
- ARCH 448A Structures II: 3
- ARCH 438 Environmental Systems I: 3

and completion of at least one architectural elective from the following groups:
• Urban Issues Electives group, or
• Architectural History/Theory Electives group.

For additional information on current requirements, please visit the Degree Requirements (p. 73) page.

The Minor in Architectural History

Minor Degree Adviser: Seng Kuan, skuan@samfox.wustl.edu

The Minor in Architectural History is open to all students at Washington University in St. Louis, regardless of their major. Students interested in the minor should contact the designated Minor Degree Adviser.

Units required: 18* including:

6 units of architectural history survey:

ARCH 3283 Architectural History I: Premodern Encounters in World Architecture 3
ARCH 3284 Architectural History II: Architecture Since 1880 3

3 units of methodology course work:

ARCH 4xx Theories and Methods of Historical Research 3

OR

Another methodology-based course approved by the minor adviser 3

9 units of architectural history and theory electives (300-level or above):

ARCH 3823 Rethinking Renaissance Visual Culture - Florence Summer Program 3
ARCH 3xx Elective architectural history and theory courses approved by the minor adviser 3

*12 units must be in the minor only and cannot be double-counted toward another major or minor.

The Minor in Architecture

Minor Degree Adviser: Derek Hoeferlin, hoeferlin@wustl.edu

With a new curriculum in place, there will be changes in the minor. Please consult with the Associate Dean of Students for current requirements.

Units required: 18

Required courses:

6 units minimum of introductory design chosen from the following:

ARCH 111 Introduction to Design Processes I 3
ARCH 112 Introduction to Design Processes II 3

3 units minimum of history chosen from the following:

ARCH 3283 Architectural History I: Premodern Encounters in World Architecture 3
ARCH 3284 Architectural History II: Architecture Since 1880 3

Elective courses: 9 units chosen from the following:

ARCH 211B Introduction to Design Processes III 4.5
ARCH 212B Introduction to Design Processes IV 4.5
ARCH 302 Freehand Drawing 3
ARCH 333 Case Studies in 20th-Century Architecture 3

Other elective courses as approved by the Associate Dean

The Minor in Landscape Architecture

Minor Degree Advisers: Dorothée Imbert (imbert@samfox.wustl.edu) and Natalie Yates (yates@samfox.wustl.edu)

The Minor in Landscape Architecture is for students who will be receiving either a Bachelor of Science in Architecture degree or a Bachelor of Arts degree with a Major in Architecture or a Bachelor of Design with a Major in Architecture. Students interested in the minor should contact the designated Minor Degree Advisers.

Units required: 18* including:

6 units of design course work:

ARCH 312 Architectural Design II 6
or ARCH 412 Architectural Design IV

3 units of history course work:

LAND 570 Landscape Architecture: History & Theory I 3
LAND 571 Landscape History II: Prehistory to 1850 3
LAND 572 History of Regional and Urban Planning 3

Or other history/theory courses as approved by the minor adviser

3 units of natural systems course work:

LAND 551 Principles of Ecology 3

Or other natural systems elective courses as approved by the minor adviser

6 units of landscape architecture electives:

X10 307 Community Building, Building Community 3
LAND 462 Landscape Materials 1.5
LAND 480 Case, Trace, Displace: Dialogue between River and City 3
LAND 573 Territorial Contexts 3

Or other elective courses in Landscape Architecture as approved by the minor adviser
*12 units must be in the minor only and cannot be double-counted toward another major or minor.

**The Minor in Urban Design**

Minor Degree Adviser: Patty Heyda, heyda@samfox.wustl.edu

The Minor in Urban Design is for students who will be receiving either a Bachelor of Science in Architecture degree or a Bachelor of Arts degree with a Major in Architecture or a Bachelor of Design with a Major in Architecture. Students interested in the minor should contact the designated Minor Degree Adviser.

**Units required:** 18* including:

- 6 units of foundational course work:
  - X10 307 Community Building, Building Community 3
  - ARCH 241 Community Dynamics 3

- 6 units of design course work:
  - ARCH 312 /ARCH 412 Urban Design Focused Studio (6 units)

- 6 units of advanced course work:
  - ARCH 654D Metropolitan Landscapes 3
  - ARCH 656 Metropolitan Urbanism 3
  - Or an approved MUD track elective 3

*12 units must be in the minor only and cannot be double-counted toward another major or minor.

**Additional Information**

Students should check the current course descriptions carefully to verify their eligibility to enroll in courses that have specific prerequisites.

**X10 XCORE:** Sam Fox foundation and commons courses

College of Art and College of Architecture majors will have enrollment priority in X10 courses.

**Design & Visual Arts — Core (X10)**

**X10 XCORE 101 Drawing I**

An introductory course which teaches students to recognize and manipulate fundamental elements of composition, line, form, space, modeling and color. Emphasis is placed on working accurately from observation, with an introduction to other methodologies. Students work in a variety of media. Demonstrations and illustrated lectures supplement studio sessions and outside projects.

Credit 3 units. EN: H

**X10 XCORE 102 Drawing II**

Continuing as an introductory course which teaches students to recognize and manipulate fundamental elements of composition, line, form, space, modeling and color. This course is an intensive studio course which builds on the perceptual and conceptual skills and experiences developed in Drawing I. A main objective will be to develop a higher level of critical and studio practice. Prerequisite: X10 XCORE 101.

Credit 3 units. EN: H

**X10 XCORE 181 Practices in Architecture + Art + Design**

This course offers first-year students in architecture and art an introduction to the subjects, theories and methodologies of the disciplines of art, design, architecture, landscape architecture, and urban studies. Examples, drawn from a range of historical periods as well as contemporary practice, highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap. Part 1 of 2.

Credit 1 unit. EN: H

**X10 XCORE 182 Practices in Architecture + Art + Design**

This course offers first-year students in architecture and art an introduction to the subjects, theories and methodologies of the disciplines of art, design, architecture, landscape architecture, and urban studies. Examples, drawn from a range of historical periods as well as contemporary practice, highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap. Part 2 of 2.

Credit 1 unit. EN: H

**X10 XCORE 301 From Propaganda to Decoration**

This is a studio course that is conceptually driven and anchored in the philosophical terrain of the print multiple. The fundamental attributes of the multiple, including its accessibility and repeatability, are from private to public and from political to aesthetic. Given this orientation, we examine the place where the public and private spheres meet. Considering urban communication and social space, reproduction and distribution, gifting and exchange, private practice and public intervention, this course uses the print multiple as a starting point to explore a continuum that runs from propaganda to decoration.

Credit 3 units. EN: H

**X10 XCORE 303 Visualizing Information**

This project-based studio course brings students from diverse backgrounds in Art, Architecture, and Design together to learn to compose information-rich surfaces. The course explores principles of information design on paper initially, and offers the opportunity to extend some applications to the screen. Course topics include content organization, visual structure, hierarchy, typography, color, sequencing, audience and usability. Students have the chance to select subject and media for some of their projects. Projects are supplemented with readings and lectures about contemporary information design, with some historical references. This course combines the rigor of a disciplinary classroom with the flexibility of a multidisciplinary one. Topics likely to emerge in the interdisciplinary conversation include information in three-dimensional spaces, communicating information with a particular voice or editorial perspective,
analytical versus poetic information design, function, audience and programming. All of these are supported, and students develop a set of tools which can be adapted to their own disciplinary work in a meaningful way. Credit 3 units.

X10 XCORE 304 Data Visualization
In this hybrid lecture/studio course, students learn basic skills to develop data visualizations focusing on clarity, relevance to the user, and visual expression. The course spans several themes within data visualization, including principles of two-dimensional design, storytelling and sequence, and interactivity and user navigation. It is organized into four units, each with a different content focus and data type, including topics as diverse as urban issues, rural landscapes, conditions in public health, and literary production. Students apply their own areas of interdisciplinary expertise to the final project. Students need a laptop with Adobe Illustrator and may need to acquire inexpensive or free software. This course is appropriate for sophomores through graduate students with or without visual training who are interested in data, information design, user interface, and computer programming. Course counts as a multidisciplinary course in the Humanities (IPH). Credit 3 units. EN: H

X10 XCORE 305 Topics in Visual Culture: Commercial Modernism in America, 1865–1965
This survey course explores contributions to and expressions of visual modernism within the commercial tradition in the United States. Lectures, readings and screenings engage the intertwined histories of commerce, technology, society and aesthetics. Topics include periodical illustration from Harper’s Weekly to the Ladies Home Journal, the newspaper comic strip and the comic book, animation from vaudeville to television, and science fiction and transportation design. Context provided by the advent of industrial production; modernist art theory and high cultural disdain for mass markets (with resulting effects on the academy); avant-garde and commercial cross-pollination; the social histories of ethnic depiction (i.e. blackface minstrelsy); consideration of women as consumers and producers of commercial images. Students make use of materials in the collections of the Modern Graphics History Library at Washington University. Three animation screenings are required. Attendance at these screenings is required. Credit 3 units. EN: H

X10 XCORE 306 Commercial Modernism in America 1865–1965
Credit 3 units. EN: H

X10 XCORE 307 Community Building
This course looks at the intersection of the built fabric and the social fabric. Using St. Louis as the starting point, this course takes students out of the classroom and into a variety of neighborhoods — old, new, affluent, poor — to look at the built environment in a variety of contexts and through a variety of lenses. Almost every week for the first half of the semester, students visit a different area (or areas), each trip highlighting some theme or issue related to the built environment (architecture, planning, American history, investment and disinvestment, community character and values, race, transportation, immigrant communities, future visions, etc.). Running parallel to this, students are involved in an ongoing relationship with one particular struggling neighborhood, in which students attend community meetings and get to know and become involved with the people in the community in a variety of ways. Students learn to look below the surface, beyond the single obvious story, for multiple stories, discovering their complexity, contradictions and paradoxes. They also come to consider the complex ways in which architecture and the built environment can affect or be affected by a host of other disciplines. Credit 3 units. EN: H

X10 XCORE 309 Convergences: Studies in Art & Architecture
This interdisciplinary course examines the convergence of artistic and architectural ideas, techniques, and practices through selected historical and contemporary studies. Emphases range from the figure of the artist/architect (Michelangelo and Leonardo, for example, to Le Corbusier and Libeskind), to critical reflections (Vasari, Gennough, Serra) to boundary-crossing practices (Whiteread, Webster, Irwin, Kin, Judd, Miss) to collaborations and collaborative works (Ando/Kelly/Serra and the Pulitzer Foundation). The course emphasizes empathy and productive work across artistic disciplines. Field trips to the Pulitzer Foundation for the Arts (St. Louis) and the Chinati Foundation (Marfa, Texas) are planned. Credit 3 units.

X10 XCORE 311 Materials & Mechanisms: Site Specific Design Installation
In this course students are guided to explore the nature of materials and simple mechanisms (mechanically driven kinetics) in the making of art and/or utilitarian objects. This course investigates the qualities of materials and how they might be used thoughtfully to develop a conceptual and physical experience for an audience or user. Specific materials are assigned, at times, yet students have the opportunity to self-select materials based on project needs. Throughout the semester, students balance designing with finding — the process of playfully exploring materials and methods without preconception of a final resolution. Looking for possibilities can lead to unexpected discoveries.
Credit 3 units. EN: H

X10 XCORE 313A Creative Practice and Natural Systems: An Ecology of Art
In this studio course, students learn to use basic ecological principles as a lens through which to investigate and evaluate productive, meaningful and sustainable creative practices. Ecology is community-focused, involving the study of relationships with a given community. It establishes a model by which students can establish a more complete understanding of the inspirations, expectations and ramifications of creative practice. We visit local gardens, parks, farms and neighborhoods while seeking to understand the complexity of our own role in nature and culture. This diverse range of ecological engagement allows for a broad array of creative applications in the studio, arts, design and architecture. The class format challenges students with new ways of thinking while allowing them to select materials, specific topics of study, and methods of engagement appropriate to their own developing interests. The course consists of fieldwork, readings and lectures, the content of which is examined through individual and collaborative projects. At midterm students identify opportunities for focused research and production, and the course culminates with the public presentation of this work. College of Architecture and College of Art sophomores have priority. Fulfills Sam Fox Commons requirement.
Credit 3 units.

X10 XCORE 315 Cycles
Students design and build human-powered vehicles from discarded bicycles. The course collaborates with student mechanics involved with Bicycle Works (Bworks). Bworks collaborates in teams with Washington University students to design and build the work.
Credit 3 units.

X10 XCORE 317 Furniture Design
The seat is an intimate interface between the building and the body. It embodies a complex set of structural conditions, material opportunities and possibilities for expression. Architects, artists and industrial designers covet opportunities to make the chair. The result is that seemingly infinite perfect solutions exist — and still the seat remains a provocative challenge. In this course students design and build a chair. Emergent technologies are combined with traditional techniques of metal fabrication, woodworking and plastic forming in the design and making of the work. The course objective is for students to learn how to work directly with machinery and materials in the realization of their design. It is expected that students will have basic shop skills addressed in course prerequisites. Advanced techniques are introduced in this course and students select those most appropriate to their work to build upon. There is a great deal of independent investigation required to excel in this course.
Students propose ideas and then develop them using drawings, models and mock-ups in order to realize the best potential for their design.
Credit 3 units.

X10 XCORE 319 Digital Fabrications: A Primer Course in the Use of Computer Modeling for Art & Design
This course focuses on fabrications both real and virtual. The ubiquity of computers in design, studio art, communications, construction and fabrication demand that professionals become comfortable with their use. It is also important in a group of ever-specializing fields that one knows how to translate between different software and output platforms. This comfort and the ability to translate between platforms allow contemporary artists and designers to fabricate with ever-increasing freedom and precision. This course introduces students to 3-D software with a focus on 2-D, 3-D, and physical output. Through a series of projects, students learn to generate work directly from the computer and translate it into different types of output. Starting from first principles, the course covers the basics from interface to output for each platform used. The course also familiarizes students with a range of CNC technology and other digital output for both small- and large-scale fabrication. The course is broken into three projects. In the first, students focus on computer-generated geometry and control systems. In the second, students generate physical output and line drawings. The final project focuses on rendering, context and cinematic effects. The software covered includes, but is not limited to, Rhinoceros 3-D, Maya, Illustrator and Photoshop. Additionally, students use the 3-D printer, laser cutter and/or other digital output tools.
Credit 3 units. EN: H

X10 XCORE 321 Mapping Soft Bodies
This course develops digital design skills with conceptual understanding of the transformative process of artistic production. Mapping Soft Bodies investigates artificial objects and industrial products as a basis for inspiration. Through digital modeling and scanning the human body, each student develops a transformation process that analyzes the social and cultural conditions of a new emerging design. New body armatures are modeled through CAD/CAM (laser cutting) and Rapid Prototyping (3-D printing) for physical outputs. The course is for students who are interested in emerging technologies and digital production. This course is for students interested in design, sculpture, architecture and digital media by enhancing 3-D technologies and allows each student to develop abstract thinking and making processes.
Credit 3 units. EN: H

X10 XCORE 325 Global Discourses in Art & Architecture
This course examines art, architecture and urbanism from the perspective of global production, dissemination and reception. It focuses on the global exchange of people and ideas as
one of the main vehicles of visual culture, both historical and contemporary. Through a series of focused case studies, the course probes inherent dichotomies within art and architecture driven by their site-specificity, yet also by their constant global displacement across various disciplinary, cultural and geographical boundaries. The course content includes lectures, discussion sessions, readings and textual and visual projects that examine cross-cultural aspects of art and architecture.

*Enrollment limit will be set at zero and students will be enrolled from the waitlist. The course is offered as part of the University-wide Global Certificate and is open to all Washington University students regardless of their major field of study. Sam Fox School sophomores will have priority.

Credit 3 units.

X10 XCORE 327 Color Systems
This course is a sustained investigation of color. Students study how color is affected by light, by space, by arrangement, by culture, and by commerce. The course aims to deepen the understanding of color’s complexity and pervasiveness as a fundamental element of shared visual culture. The course develops both technical and conceptual skills to aid in visual translation. In addition to color-specific inquiry, a goal is to expand ideas of research and enable students to integrate various methods of acquiring knowledge into their art and design practice. Throughout the course, students discuss various processes of making/constructing, the connection between color/form/concept, and strategies for idea generation and brainstorming. The course allows for much individual freedom and flexibility within varying project parameters.

Credit 3 units.

X10 XCORE 330 Cell Phones, Snapshots and the Social Network
This course is designed around the cell phone camera as a means of art production using blogs, interactive websites, social networking and mass distribution of digital images and videos. Students explore the art-making potential of the cell phone camera as a snapshot camera of the modern age. Students post daily images/videos on blogs and other social media sites. Readings and discussion topics include the culture and aesthetic of the snapshot, the vernacular image, and the role of social networks in image production and distribution. Students are required to design and maintain at least two social networking sites and to supply a cell phone with the ability to upload images to the Internet.

Credit 3 units. EN: H

X10 XCORE 332 Metabolic City: Spaces of Bodily and Environmental Wellness
Metabolic City probes bodily and environmental wellness as intertwined cultural, social, and technological constructs. From the British Archigram Group, to the Japanese Metabolists and the Dutch artist Constant, a number of visionary projects in the 1960s re-imagined our notion of the body, city and the environment. By means of individual and collective gadgets, tools and spaces they bridged the scales of the body and the city, weaving together issues of bodily and environmental performance. Through a combination of texts, discussions and projects, the course engages in a delayed conversation with these projects, proposing the concept of “metabolism” both as a bodily function, but also as an environmental mechanism that operates on a global scale. Some of the key concepts discussed in the class include global citizenry, urban imagination, networks, performance, virus, urban protest and insurgency. The course fulfills the Sam Fox Commons Course requirement and the architectural history/theory elective requirement and is also open to all Washington University students through the Global Certificate.

Credit 3 units.

X10 XCORE 336 Urban Books
Since the beginning of the 20th century, art, architecture and urbanism together have investigated the production of images that shape the symbolic dimension of our experience of large cities. The main goal of this course is to critically embrace this tradition through the format of the artist’s book. St. Louis is the focus for our observations because it is familiar to our everyday lives and also because it provides key situations for understanding contemporary forms of urbanity and how urban space is produced and imagined. The course bridges the curricular structures of art and architecture by enhancing the collaboration between the practical and scholarly work developed in both schools, with additional support from Special Collections at Olin Library. It combines the reading, lecture, and discussion format of a seminar with the skill building and creative exploration of a studio. This course is divided into three progressive phases of development: the first consists of weekly readings, discussion and responses in the form of artist’s books. The second phase focuses on the Derive with physical activities and assignments based on interacting directly with the urban environment. The third phase focuses on individual research, documentation, and final book design and production.

Credit 3 units.

X10 XCORE 338 Shifting from Lines to Surfaces/Virtual to Empirical
Digital Media Design: Introduction to Exploring Digital and CAD/CAM Technology. This is a course in computing theory and techniques on 2-dimensional digital software and advanced 3-dimensional modeling software. Weekly demonstrations on software operations and individual projects are developed. This course bridges the gap between 2-D computational tools that define lines and the 3-D tools that develop complex surfaces. These surfaces explore the possibilities of creating and articulating the non-linear geometries manipulated on the digital environment. The final project consists of 2-dimensional
drawings, digital models, and physical models produced by advanced CAD/CAM technology. By employing alternative techniques and emerging technologies of manufacturing, new forms of objects and perceptions will re-define multiple design processes.
Credit 3 units. EN: H

X10 XCORE 342 Florence Commons
This is a required course for all students in the Florence Study Abroad Program. Content for the course fosters the idea of collaboration, approaching how art, architecture, urbanism and design are related in Italian visual and material culture. All faculty work together to establish a shared semester theme and media and conduct collective introductory activities and reviews, as well as combined field trips. The instructor determines a specific approach to these shared goals. This framework allows for both cross-disciplinary work and increased breadth and focus regarding their semester study topics, a format that is unique to the undergraduate Florence Program. Students will be enrolled by the registrar in a section that best suits their area of study.
Credit 3 units. EN: H

X10 XCORE 344 Digital Filmmaking: City Stories
Digital Filmmaking: City Stories is a cross-University video art course for students interested in making short films through a transdisciplinary and time-based storytelling in both narrative and non-narrative formats. Whether documentary or abstract, individually produced or collaborative, all projects in this course will have a required social and urban engagement component. In this course the City becomes a laboratory for experimentation and contribution. Students meaningfully engage St. Louis, and their projects address sites of concern to explore the complex fabric of the city by way of framing and poetic juxtaposition. City Stories merges several arts and humanities disciplines, including experimental cinema and documentary journalism, and creates an opportunity for empathic listening and inquiry as students discover stories built from collective as well as individual memories.
Credit 3 units. EN: H

X10 XCORE 345 Shopping
This seminar examines shopping as a social and cultural construct that operates at several levels in relation to art, architecture and urban planning. Shopping is the fundamental activity of the capitalist marketplace. It is also inextricably linked with major aspects of public and foreign policy, where national consumerism is closely linked to global tourism, and it is at the core of economic development. Shopping is, as well, a common denominator of popular culture, frequently satirized in contemporary art, film and literature. Participants in the seminar read selections from various writings about shopping and the marketplace. We also view several films examining the shopping environment in narratives of power and desire. Prerequisite is completion of Sam Fox foundations year. Open to sophomores and above.
Credit 3 units.

Architecture

A46 ARCH 211B Introduction to Design Processes III
Introduction to Design Processes III engages design through the lens of perception investigating the relationship between materiality and inhabitable space situated in a natural context. Prerequisites: Successful completion of ARCH 111 and 112 with a grade of C- or better; or successful completion of ARCH 210, with a grade of C- or better.
Credit 4.5 units.

A46 ARCH 212B Introduction to Design Processes IV
Studio which initiates architectural and building issues such as: building analysis, structure, organization systems, and programming. Prerequisites: Successful completion of ARCH 211B with a grade of C- or better.
Credit 4.5 units.

A46 ARCH 111 Introduction to Design Processes I
This introductory architectural design studio engages the basic principles of architectural context, composition and experience. Through various fieldwork strategies, students explore architectural context through observation, analysis and invention. The site-specific design processes bridge two-dimensional and three-dimensional work, including drawing, drafting and making. The experiential qualities of architecture are introduced through basic considerations of scale and human interaction. The course work includes studio, work, lectures, presentations by students, readings, writing assignments and field trips.
Credit 3 units.

A46 ARCH 112 Introduction to Design Processes II
This core design studio engages the basic principles of architectural design through iterative processes of drawing and making, using a variety of tools, media and processes. The course work includes studio work, lectures, student presentations and local field trips. Prerequisite: A grade of C– or better in Arch 111 or coregistration in Arch 111.
Credit 3 units.

A46 ARCH 121 Community Building, Building Community (Hewlett Program)
Credit 3 units.
A46 ARCH 209 Design Process
Open to Engineering, Arts & Sciences, Business and Art students at all levels. This studio course engages students in the process of design with an emphasis on creative thinking. Course content relates directly to the interests of engineers as well as arts and science, business and art students who wish to problem solve about positively shaping the texture and quality of the built world. A series of 2-D and 3-D hands-on problem-solving projects introduce students to design concepts as they apply to site (ecosystems and outdoor places), to humanistic place making (personal and small public spaces), to structure and materials (intuitive exploration of structural principles through model building), to environmental issues (effects of climate, light, topography, context and sensible use of natural resources). No technical knowledge or special drawing/model-making skills are required. There are informal group and individual discussions of each person’s stages in inquiry. The investigations take the form of study models made of recycled materials. Guest lecturers participate throughout the semester. The concluding project for the semester allows each student to work with their unique academic and personal interests, utilizing the process of lateral thinking.
Credit 3 units.

A46 ARCH 210 Introduction to Design
A lecture/studio course for students not majoring in design. Lectures on creativity, general issues in design and architecture. Studio work providing hands on exploration of two-dimensional and three-dimensional design ideas related to the lectures as well as discussions of assigned readings. Aimed at providing a broad view of design and the role of the designer. Class meetings for one hour of lecture and three hours of studio discussion each week.
Credit 3 units.

A46 ARCH 241 Community Dynamics
Credit 3 units.

A46 ARCH 2661 Semester Abroad Program Seminar
This course prepares students participating in the College of Architecture’s Spring Semester Abroad Program in Florence, Italy. The seminar meets eight times over the course of the semester. Attendance is required.
Credit 1 unit.

A46 ARCH 275 Service Learning Course: Environmental Issues
Credit 2 units.

A46 ARCH 302A Advanced Freehand Drawing
Application of the principles presented in ARCH 302 to more ambitious and individualized work. Work can include drawing, color, painting, printmaking, etc. The final target is a suite of independent works that explores a chosen medium or subject and that could constitute a small one-person show, but exploration and growth are given precedence over production. Weekly/bi-weekly critiques. Prerequisite: ARCH 302 or equivalent previous studies.
Credit 3 units.

A46 ARCH 302B Advanced Freehand Drawing (and Painting)
Credit 3 units.

A46 ARCH 303A Drawing on the City
Credit 3 units.

A46 ARCH 308A Digital Fabrications
Credit 3 units.

A46 ARCH 309 Special Topics: Photography for Architecture Students
The scope of this course is to offer both a technical and theoretical understanding of architectural photography. The course also emphasizes 4x5 view camera skill, use of DSLR and digital input, studio lighting as related to model reproduction, discussion of work, and development of individual projects. Students must provide a digital camera.
Same as ART 309
Credit 3 units.

A46 ARCH 310 Photography for Architecture Students
Same as ART 310
Credit 3 units.

A46 ARCH 311 Architectural Design I
Prerequisite: Arch 212 with a grade of C– or better. There is a required weekend, out-of-town field trip.
Credit 6 units.

A46 ARCH 312 Architectural Design II
CBTL course. Prerequisite: satisfactory completion of Arch 311.
Credit 6 units.

A46 ARCH 312A Architectural Design II (Study Abroad)
Prerequisite: Satisfactory completion of Arch 311.
Credit 6 units.

A46 ARCH 317 Architectural Design I (MArch 3)
The first of a three-semester sequence that introduces students to architectural design, focusing on conceptual, theoretical and tectonic principles. First-semester MArch 3 students only.
A46 ARCH 318 Architectural Design II (MArch 3)
The second of a three-semester sequence of design studios. Continues examination of issues raised in ARCH 317. Second-semester MArch 3 students only. Credit 6 units.

A46 ARCH 323A Architectural Representation I (MArch 3)
Credit 3 units.

A46 ARCH 323B Architectural Representation II (MArch 3)
The course examines the history/theory and practice of representation, specifically the systems of drawing used in architecture. The objective is to develop the requisite discipline, accuracy and visual intelligence to conceptualize and generate a relationship between space and form. The course focuses on two concurrent tasks: first, to outline and analyze the historical development of representational logics and their impact on architectural ideation, and second, to explain the codification and usage of specific geometries, including orthographic and isometric projection, central and parallel perspective, and architectural axonometric. We see that, rather than a translation of reality, representation operates between perception and cognition as a transcription of reality and is a powerful instrument in the design and making of architecture. The relationship between the drawing forms and the tools used to produce them are brought into focus as manual, digital, photographic and physical applications driven by drawing intentions. This course is organized as a lecture/lab with emphasis on the practice of digital media and physical modeling. Emphasis is on participation and excessive absences are noted. Please note: The second half of the semester focuses on computing, for which each student is required to have a laptop computer. Credit 3 units.

A46 ARCH 326G Digital Fabrications
Credit 3 units.

A46 ARCH 3283 Architectural History I: Premodern Encounters in World Architecture
This course explores the history of architecture from its origins until the beginnings of the modern period from a global perspective, focusing on patterns of interaction and exchange between and within both elite and vernacular building cultures. Using selected examples from Eurasia, sub-Saharan Africa and the Americas, the course traces the major elements of change and development in the design of the earth’s built environment, including technologies and materials, typology, the organization of labor and capital systems to the profession and the public. Course requirements include a mid-term, final exam and research paper. Credit 3 units. EN: H

A46 ARCH 3284 Architectural History II: Architecture Since 1880
An introductory survey of the history and theory of architecture and urbanism in the context of the rapidly changing technological and social circumstances of the past 120 years. In addition to tracing the usual history of modern architecture, this course also emphasizes understanding of the formal, philosophical, social, technical and economic background of other important architectural directions in a global context. Topics range from architects’ responses to new conditions in the rapidly developing cities of the later 19th century, through early 20th-century theories of perception and social engagement, to recent efforts to find new bases for architectural interventions in the contemporary metropolis. Credit 3 units. EN: H

A46 ARCH 333 Case Studies in 20th-Century Architecture
Through a series of analytical, critical and interpretative studies of singular works of architecture in the 20th century, this course focuses on the manifold processes and contexts of their production. Each work is examined as a physical and cultural artifact with precise formal, intellectual and ideological intentions and meanings. The architectural object, understood as a synthesis of multiple criteria and frameworks, is explored from its conception through its realization based on certain principles (fundamental precepts of the discipline of architecture) and a broad range of concepts (abstract ideas understood as the products of speculative and reflective thought). Credit 3 units.

A46 ARCH 336D Biomimicry: A Biokinetic Approach to Sustain(Able) Design
There is a conceptual similarity between the way an organism and a building engage their respective environments. A biological system responds to the unique condition of its ecosystem; architecture responds to the unique conditions of the site. Building on this principle are the fields of biomimicry, the study of design and process in nature, and biokinetics, the study of movement within organisms, and their ability to address architectural problems with elegant, technologically advanced, sustainable solutions. Biomimicry: A Biokinetic Approach to Sustain(Able) Design focuses on kinetics as an essential element of biomimicry in the context of architecture and employs the study of the kinetic aspects of biological systems — structure, function and movement — to inform the design and engineering of buildings. A systematic approach to researching and translating the kinetic function of organisms leads to a successful bridging of biological and architectural concepts. Credit 3 units.
A46 ARCH 336E Biomimicry, Teleology and Organic Architecture
This seminar is intended to develop an understanding of the history and evolution of biomimicry as a significant design tool from the emergence of biology as a science in the early 19th century to the present. Biology was the first discipline to confront the problem of teleology, of design in nature. For the past 100 years, biological references and ideas are present in the work of architects and in the writings of architectural theorists. Biomimicry, a term coined by Janine Benyus, has developed into a new discipline that studies well-adapted organisms' designs and processes and then imitates life's genius to design human applications, aiming at a sustainable development. The intent of this seminar is to establish a systematic approach to research and analysis of the history and theory of this biological analogy and its influence on the history of environmental architecture, as seen through the lens of biomimicry. In addition to a historical analysis, students analyze case studies that exemplify the relationship of architecture to biology, focusing not only on built work, but on the writings and the designer's positions in terms of this relationship. Classes consist of a combination of formal lectures and facilitated discussion periods. In addition, each student chooses a particular architect and, through research and analysis, assesses the influence of biomimicry in his or her work and presents these results in a paper that includes a critical analysis and a proposal on how to advance the architect's work to the highest level of biomimicry. Credit 3 units.

A46 ARCH 339 Concepts and Principles of Architecture I
This weekly seminar course addresses issues of Western architectural thought through a focused series of readings and discussions. The necessity and role of architectural theory in general is examined. Issues of tectonics, historicism, typology, regionalism, modernism, postmodernism and other critical frameworks for the consideration of architecture are thematic subjects of discussion. Selected readings include Vitruvius, Alberti, Laugier, Semper, Ruskin, Le Corbusier, Gropius, Kahn, Rossi, Venturi, Eisenman, Libeskind and Koolhaas. Weekly reading assignments, attendance, participation, one summary and discussion introduction based on a reading topic, final paper. Required for first-semester MArch 3 students. Fulfills history/theory elective for MArch 2 students. Credit 3 units.

A46 ARCH 346 Building Systems I
The first of a two-course building systems sequence. The course progresses from a survey of the physical and structural properties of building materials through an analysis of building assemblies and systems. Structural systems are examined relative to their performance characteristics and issues related to manufacturing and construction. Structural systems in wood, steel and concrete along with masonry systems are reviewed in this class. Additionally, the primary and secondary performance characteristics of enclosure systems are identified and analyzed in this course. This course also covers the design of egress systems and vertical transportation systems in buildings. Though the course focuses primarily on the underlying principles associated with these building systems, industry standards and building code requirements are an integral part of the review. Credit 3 units.

A46 ARCH 347 Building Systems II
Building Systems II is a lecture/workshop course. It is the capstone course in the technology sequence. The course is composed of a series of lectures related to technical theory, an analysis of technical precedent, and an integration exercise. The lectures focus on structure and enclosure systems, active and passive climate control systems, natural and artificial lighting systems, mechanical and electrical services for buildings. The lectures take place over the course of the semester. During the first half of the course, students conduct the analysis of technical precedent in architecture exercise. Technical precedents are analyzed relative to their performance characteristics and their relationship to other technologies in the building. During the second half of the semester, students conduct an integration exercise. Technical systems are selected based on architectural issues, performance characteristics and systems integration. Credit 3 units.

A46 ARCH 347A Building Systems II
Credit 3 units.

A46 ARCH 350 Service Learning Course: Environmental Issues
This service learning experience allows Washington University students to bring their knowledge and creativity about the many subjects they are studying to students at the Compton-Drew Middle School, adjacent to the Science Center, in the City of St. Louis. This course is for arts and sciences students of differing majors and minors, business, architecture and art students, and engineering students from all engineering departments. In the first third of the semester students: (1) begin learning the creative process of lateral thinking (synthesizing many variables, working in cycles); (2) work with a teammate to experiment with the design of 2-D and 3-D hands-on problem-solving workshops about exciting environmental issues, for small groups of students at Compton-Drew Middle School; 3) devise investigations for the workshops about environmental issues embracing the sciences, the humanities and the community; (4) work with the professor individually and in their team, as well as seeking advice of faculty from a specific discipline, through the semester in the preparation of their evolving curricular plan. During the last two thirds of the semester, WU students are on-site during the Compton-Drew school day, once a week on each Monday from noon to 1:30 p.m. to teach small group workshops for some of...
the sixth- and seventh-grade students. There is also a one-hour
class meeting on Wednesday at a time to be finalized later.
Credit 3 units.

A46 ARCH 363 Architectural Photography
This course offers a technical and theoretical understanding
of architectural photography. Basic operation and orientation
of digital and analog cameras are covered, as well as best
practices for photographing interior and exterior spaces with both
natural and artificial lighting. Students learn how to document
artwork and architectural models/structures for portfolio
presentation purposes, preparing them for working relationships
with professional photographers in the industry. This course
emphasizes 4x5 view camera skill, use of DSLR and digital
input, studio lighting, and development of individual projects.
Digital camera required; 4x5 camera provided by photography
department.
Same as ART 363
Credit 3 units.

A46 ARCH 375B STL City Studio Programming:
Understanding, Engaging and Organizing Columbus Square
Citizenry
This class dedicates itself to designing programs for future
community projects in the Columbus Square neighborhood.
Programming occurs organically through understanding,
engaging and organizing the neighborhood. These projects
are cross-disciplinary, not limited to any particular practice or
discipline. They are realized in future semesters (or in certain
cases, this semester) through the support of STL City Studio.
The class builds on relationships established during last year’s
City Studio design/build project, Learning Landscapes at Patrick
Henry Elementary School, a series of gardens at the center
of the neighborhood. To define and develop projects, we use
narrative to clarify both our own values and the values of the
neighborhood. Students regularly visit Columbus Square and
its adjacencies, particularly Downtown St. Louis, uncovering
visible and invisible stories. We listen to what residents, officials,
experts and planners have to tell us about the place and what
the place could become. Throughout the semester, students
present their findings through narratives, diagrams and other
representations. Projects emerge out of this collaborative,
narrative-based process. All students, from any discipline or at
any level, may take this class.
Credit 3 units.

A46 ARCH 376 Design Thinking for Science, Engineering,
Business and the Liberal Arts
This introductory course outlines strategies and methodologies
drawn from a wide range of creative design practices, including
architecture, landscape architecture, urban design, industrial
design and others. The course explores how these ideas and
techniques are similar to practices in science, engineering,
business and the liberal arts and how they might be applicable
to multidisciplinary problem solving. Topics include perception,
representation, technology, group intelligence, bio-mimicry and
context-based learning, among others. Emphasis is given to the
intersection of design thinking with environmental problems and
the relationship between design thinking and innovation. The
course includes lectures, guest lectures with case studies, and
design projects. Open to all undergraduate students.
Credit 1 unit.

A46 ARCH 394 New Topic (Sam Fox School)

Credit 3 units.

A46 ARCH 402A Measured Representation
Credit 3 units.

A46 ARCH 402C Advanced Freehand Drawing II
Credit 3 units.

A46 ARCH 403 Sustainable Design
Credit 3 units.

A46 ARCH 404 Advancing Integrated Sustainability
Do you want to work differently? Toward more effective
outcomes? This course is a call to students from all disciplines
with the conviction that it is necessary for us to work together
while contributing from our specific fields of study to find
solutions to challenges in our built environment. Students apply
the knowledge base they acquire in this course to formulating
ideas for actual community projects in St. Louis. Students learn
to integrate and apply a holistic range of social, economic and
technical systems inspired and optimized by models in the
natural world. A foundation in natural and biomimetic systems is
overlaid with analysis of corporate mission, principles and triple
down-line thinking in order to learn how to build defensible,
value-based arguments for implementation of sustainable
systems. With the expressed intent of achieving net positive
outcomes in the built environment, the following topics are
addressed: brownfield property reuse; storm/wastewater
management; urban heat island management; air quality;
potable water issues and opportunities; material cycles and
flows including embedded energy, emissions, toxicity, virgin vs.
recycled content and waste diversion; energy efficiency and
renewable energy opportunities; transportation, accessibility
and mobility choices; vernacular and cultural expression;
local and healthy food availability; fitness advocacy and other
health issues; education; public outreach and transparency;
governance; and the economics of these systems. Lectures, case studies, readings and class discussions support application exercises and experimental projects to propose ideas for improving the built environment at multiple scales. Assignments are reviewed often to assist each student’s learning and questions. Complementing leading-edge theory with practical outcomes are provided with the intention that students develop valuable skills to be incorporated in their other academic projects. Please visit http://samfoxschool.wustl.edu for work samples and student manifestos from previous classes. Credit 3 units.

A46 ARCH 404A Contemporary Exhibition Studies
Credit 1 unit.

A46 ARCH 404C Topics in Architectural Entrepreneurship
Entrepreneurship has become a very important issue for businesses small and large. What can the profession of architecture learn from these ideas? This course, offered in partnership with the Skandalaris Center for Entrepreneurial Studies, offers students a chance to gain exposure to the entrepreneurial ideas that are innovating the architectural community, and begin to foster a mindset of architectural entrepreneurship that has the potential to be widely beneficial to the profession. Each week the course welcomes a guest speaker who, as the owner of a firm or innovator of a new business proposal in the design field, provides case studies to show students what type of entrepreneurial ideas are shifting the architectural discipline. From sustainability, to urbanization and localism, to emerging global growth engines, and the future structure of the architectural network, each lecturer brings new insight to what it is to be an architectural entrepreneur. Credit 3 units.

A46 ARCH 404D For Purpose: Art and Design as an Ethics-based Model of Entrepreneurship
Working from the premise that art and design have the ability to enrich and transform lives and communities in a tangible way, students redefine social, environmental and cultural problems as opportunities. Students are encouraged to bring ideas that have the potential to address these problems through the creative processes of art and design. Students work in teams to develop a proposal for a project, product or service-based organization with the potential to address a specific issue. Students draw lessons from researching established individuals, companies and not-for-profit organizations that are involved in the production of culturally significant, creative work that also supports a larger social mission, and students apply this research to their own proposal. Each proposal is developed into a business/sustainability plan that demonstrates the value of the proposal and explains the resources required to meet specific goals. This course introduces students to the uncertainty that is inherent in the entrepreneurial process. Students work to develop skills to evaluate ideas in relation to their personal values, the idea’s ability to address a specific problem, and the resources required to implement a sustainable solution. The process helps students navigate the uncertainty and assess the risk associated with implementing their proposal through morphing the idea concept, seeking advice and building a coalition of stake holders. This course is open to disciplines outside of architecture. Students in Art, Social Work and Engineering are encouraged to register. Credit 3 units.

A46 ARCH 405A Furniture Design for the Architect
Students design and fabricate furniture. The box and chair are used as vehicles to study historic examples of furniture design, structure, fabrications and finishing techniques. Other issues that are addressed are: material awareness and craftsmanship. Evaluation of the final products is based on design, structure, craftsmanship, material use, beauty and finish. Credit 3 units.

A46 ARCH 405D Furniture Design
The course focuses on the design of tables using wood as the primary material in response to “rational and irrational strategies” (systematic and emotional). Each student designs, develops and builds prototypes of two tables using the same material. One table is the product of a systematic analysis of material qualities, production procedures and other constructivist principles. The other table is the product of more explicitly intuitive, emotional and interpretive responses to the nature of the material and its production. Course limited to 10 students. Credit 3 units.

A46 ARCH 405F Furniture Design (Study Abroad)
Credit 3 units.

A46 ARCH 405G Furniture Design in Finland
Credit 3 units.

A46 ARCH 406J Woodworking
The content of this workshop is woodworking technique and craftsmanship, material use, beauty and finish. Credit 1 unit.

A46 ARCH 406L Perspective Drawing
A study in perspective drawing methods, using the traditional construction methods as a starting point, and then exploring alternative approaches. The fundamentals of one-point and two-point are covered along with rendering techniques for formal and informal representations. A variety of rendering techniques are presented depending on situation of design and time allowed. Credit 1 unit.
A46 ARCH 406M Mold-Making and Casting
Credit 1 unit.

A46 ARCH 406N GIS Workshop
Credit 1 unit.

A46 ARCH 406P 3-D Digital Tools for Studio
Credit 1 unit.

A46 ARCH 406R Model Making
Credit 1 unit.

A46 ARCH 406S Real Estate Workshop
Credit 1 unit.

A46 ARCH 406W Simple Book Structures
Students investigate the form of the visual book through construction of several different book structures, among them the accordion, the flag book, the tunnel, simplified case binding and a portfolio case. This class investigates the organization of the visual book through the sequencing of images and the structure of the book as a reflection of content. It is hoped that the class permits the student to pursue new approaches to presenting visual information in book form.
Credit 1 unit.

A46 ARCH 406Y The Diagram
The purpose of this workshop is to fully understand how we can exploit the concept and method of the diagram in order to better access ideas, reveal themes, discover underlying processes and relationships, and ultimately, to better represent our final design intentions. The goal of the workshop is: to understand the position of the diagram in the architectural design process by looking at examples of architect’s drawings/other diagrams; to understand what diagrams can mean, and specifically how to use them in design; to test methods of drawing and diagramming through a series of targeted exercises; and to be able to further exploit ideas and designs through their representation — skills for the larger context of the architecture studio and for future analyses.
Credit 1 unit.

A46 ARCH 406Z Vertical and Horizontal Structures
Designing with advanced digital modeling and CAD cam output through laser cutting and CNC milling. Students develop complex structural systems through virtual design tools and translate them into physical objects that can be programmed for human interaction.
Credit 1 unit.

A46 ARCH 408A Digital Visualization Workshop: 2-D Representation
This workshop is an introduction to basic Auto CAD drawing layout and organization with printing process. The workshop introduces students to importing and exporting into other graphic softwares (Photoshop and Illustrator) allowing a basic understanding of resolution and line types with articulated graphic awareness to develop complex 2-D drawing capabilities. Required for all 317-level MArch 3 students, who are given priority in enrolling. Open to all other architecture students as space allows.
Credit 1 unit.

A46 ARCH 408B Digital Visualization Workshop: Advanced 3-D Modeling
Credit 1 unit.

A46 ARCH 408C Digital Visualization Workshop: Advanced Rendering
This workshop is an introduction to complex digital rendering in Rhino 4.0 with plug-ins Flamingo, VRay, Maxwell and Fry Rendering Engines. These skills are needed for sophisticated rendering outputs for more hyper-real visualization. The workshop introduces students to material, lighting, camera and global illumination processes. This workshop is required for all MArch students at the 419 level, who are given priority for registration in this course. Open to other upper-level undergraduate and graduate architecture students as space allows.
Credit 1 unit.

A46 ARCH 408D BIM 101 Workshop
Credit 1 unit.

A46 ARCH 408H #technology.today.tomorrow
The design industry is changing and the need to understand this change is critical. Before students graduate, they should make themselves aware of the way technology is impacting the process of delivering projects today and tomorrow. This evening workshop exposes students to various technologies within different parts of the building industry. We review technology used in design and construction with special guests, from leaders in the industry demonstrating how they are using these tools today. We explore technology on the horizon and hear from those developing tools for the future. This workshop is not meant to be a software instruction class, but more of a window into the profession. #BIM #technology #future #AEC #design #construction #cloud #knowledge #parametric #computation #collaboration.
Credit 1 unit.
A46 ARCH 408M Atmospheric Animations
This course explores the capacity of modifying perception, as a way of thinking and making in design process. We recognize the ambient complex environment base on the concept of each element in space as a figure of motion, being sensitive to a specific period of time. Each student begins with selecting a certain way of observing, and developing a method to document and analyze a piece of dynamic perception which is then re-constructed through drawings or models, primarily focusing on one aspect of the experience, such as material performance, light reflections, air flow, etc. Final part of the project is representing the synthetic perception, by creating the atmospheric imagery in motion. Students are introduced to various techniques of recording ocular perceptions with the aid of digital tools, 2-D representation, 3-D modeling and animation rendering throughout the course, both as general workshops and individual project basis. Credit 3 units.

A46 ARCH 409B Material Drawings, Unforeseen Drawings, Expanding Drawings
Credit 1 unit.

A46 ARCH 409C Watercolor Painting for Architects, Urban Designers and Landscape Architects
Credit 3 units.

A46 ARCH 4102 Lively City: Behavioral Studies & Public Space Design
Credit 1 unit.

A46 ARCH 410D Printmaking
Credit 1 unit.

A46 ARCH 410W Perspective E: Architectural Education and the Public Good
This discussion-based course explores Perspective E of the Five Perspectives from the National Architecture Accreditation Board’s Conditions for Accreditation: Architecture Education and the Public Good. Changing the perspective into a question, [What does it mean] “to be active, engaged citizens; to be responsive to the needs of a changing world; to acquire the knowledge needed to address pressing environmental, social and economic challenges through design,” … provides the context for a series of discussions. Discussions include student presentations of case studies in education and practice as well as speculation about how this perspective might be met within the Graduate School of Architecture, Landscape and Urban Design. Credit 1 unit.

A46 ARCH 410X Special Topics Workshop
Credit 1 unit.

A46 ARCH 411 Architectural Design III
Prerequisite: satisfactory completion of Arch 312. Credit 6 units.

A46 ARCH 412 Architectural Design IV
CBTL course. Prerequisite: satisfactory completion of Arch 411. Credit 6 units.

A46 ARCH 418P Realizing: Pulitzer Foundation for the Arts
A transdiscipline, material-based workshop providing insight into the process, dedication and collaboration required to realize a signature work of architecture. Design, construction and management team representatives serve as primary sources. Construction of an architectural concrete wall-corner is central to the workshop effort. Attendance and involvement with the associated spring Colloquia is required. Working in conjunction with the Pulitzer Foundation for the Arts, the workshop includes two types of instruction: active participation and topic discourse. A colloquium celebrating the 10-year anniversary of the Pulitzer Foundation’s opening divide the workshop’s calendar and the two instruction types. An investigation and thorough understanding of the Pulitzer Foundation for the Arts initiates the workshop, followed by the planning, construction and placement of an architectural concrete wall. Required participation in the semester’s Lecture Series includes compiling question/answer responses related to profession feedback. The workshop endeavors to provide each student with a sound understanding of current practice methods involving design team, project delivery and material investigation/application. Instruction methods consist of readings, discussions, expert commentary, hands-on construction and site visits. A materials fee is required. Enrollment is limited. Credit 1 unit.

A46 ARCH 419 Architectural Design III (MArch 3)
The third of a three-semester sequence of design studios. Continues examination of issues raised in ARCH 317 and ARCH 318. Credit 6 units.

A46 ARCH 421J Building a Better World: Architecture and Social Reform in America
Architects, planners and social reformers have addressed urban issues of poverty, crime, delinquency, labor unrest and class and ethnic tensions through activist models of the public library and school, the YMCA, the playground and the model home — or by a retreat from the city in the form of utopian settlements. This seminar examines the history of environmentalist thinking and social reform in the United States and to some extent, Europe,
from the Enlightenment to World War II, including the work of Andrew Jackson Downing, Frederick Law Olmstead, Ernest Flagg and Frank Lloyd Wright and critics such as Jane Jacobs and Prince Charles. The class becomes familiar with reform architecture and its context and assesses the effectiveness of this strategy as a solution to social problems. Open to graduate and upper-level undergraduate students. Fulfills history/theory requirement. Credit 3 units.

A46 ARCH 421K Modern vs. American: Rethinking the Architectural Relationship
What is American about American architecture? Architects, historians and theorists have asked this question throughout our nation’s history, but it gains renewed importance in this age of globalization. Can we, should we, continue to apply national labels to our architecture? This seminar examines the architectural culture of the United States in the 20th century, with special attention to the relationship between national identity and the internationalizing forces of modernity, particularly European modernism. Through analysis of theoretical writings, developments in education and practice, and key projects such as the Chicago Tribune Tower Competition, the Illinois Institute of Technology and U.S. embassies around the world, students gain insight into the dynamic between the local and the global in the design of the built environment. Course requirements include in-class presentations, field trips and a substantial research paper. Fulfills history/theory elective requirement. Credit 3 units.

A46 ARCH 421P Marina City: Bertrand Goldberg and the Aura of Chicago Modernism
Credit 3 units.

A46 ARCH 421R Gender, Race and Architecture in the American City, 1865–1960
Credit 3 units.

A46 ARCH 421S American and International Urbanism
This advanced history and urban issues seminar explores the history of urbanism as it developed in the United States in the late 19th and early 20th centuries and trace some of its international outcomes. We examine changing theories of how urban environments should be shaped, placing efforts by designers to transform the built environment within the context of major social, cultural and political changes. These include public urban parks and parkways, City Beautiful neo-Classical urban environments, regional planning, auto-based planned communities and shopping centers, high-rise hotels, theme parks, and megastructural airports. We explore the relationships between the built environment, social change, political struggle and design theory. We, in addition, track the establishment, professionalization, growth and contests over the fields of architecture, landscape architecture, urban planning and design. We pay close attention to shifting conceptions of, conflicts over, definitions of the urban public, the boundaries of the “public sphere,” the relationship between public and private spaces, and the role of government in shaping and policing the urban landscape. By using historical methods to analyze documentary evidence, the course facilitates greater understanding of the complexity and layering of the urban landscape and critical urban design and landscape practices. Fulfills History/Theory and Urban Issues elective requirements. Credit 3 units.

A46 ARCH 421T Urbanism: Cambridge MA
Credit 3 units.

A46 ARCH 422G GIS for Site Design
This course module introduces GIS mapping software and its application to methods used in site planning and design. The focus of this half-semester course is to understand the potential of GIS to analyze, visualize and utilize complex data. Students learn techniques and tools in ArcGIS software and explore how these can be applied to projects specific to individual sites. This course introduces new skills and analytical complexity while building upon previously learned representation techniques. Same as LAND 422
Credit 1.5 units.

A46 ARCH 423 History of Landscape Architecture
This seminar reviews the history of gardening in the Western tradition from the Renaissance to the present and in the Chinese and Japanese traditions. Park-making, neighborhood design and the rise of landscape architecture as a profession receive attention, including several classes held at notable St. Louis examples. Course requirements include readings, a design or research project, and a final exam. Fulfills History/Theory elective. Credit 3 units.

A46 ARCH 425D Meso-American Architecture
Credit 3 units.

A46 ARCH 426F Discover Latin America: Literature, Culture and Cinema
Credit 3 units.

A46 ARCH 426G Latin American Literature
Credit 3 units.

A46 ARCH 4280 Architectural History I: Antiquity to Baroque
This lecture course introduces major historical narratives, themes, sites and architects from ancient Greece to the end
of the Baroque period. We take an extended look at the dawn of the modern period in the 15th and 16th centuries through a global perspective, turning eastward from Renaissance Europe to the Ottoman, Mughal, Chinese and Japanese empires. The great chronological and geographic span of this course is pulled together around the themes of (1) classicism and its subsequent reinterpretations, and (2) the pursuit of the tectonic ideal. Our aim is to recognize how these ideological pursuits of modern architecture evolved out of longer historical processes. We also pay close attention to major sites of landscape and urban-scale work. Requirements include a mid-term, final exam and a series of short papers. Credit 3 units.

**A46 ARCH 4284 Architectural History II: Architecture Since 1880**

An introductory survey of the history and theory of architecture and urbanism in the context of the rapidly changing technological and social circumstances of the past 120 years. In addition to tracing the usual history of modern architecture, this course emphasizes understanding of the formal, philosophical, social, technical and economic background of other important architectural directions in a global context. Topics range from architects’ responses to new conditions in the rapidly developing cities of the later 19th century, through early 20th-century theories of perception and social engagement, to recent efforts to find new bases for architectural interventions in the contemporary metropolis. This course is required for all MArch 3 students. Credit 3 units.

**A46 ARCH 4285 Architectural History I: Premodern Encounters in World Architecture**

This course explores the history of architecture from its origins until the beginnings of the modern period from a global perspective, focusing on patterns of interaction and exchange between and within both elite and vernacular building cultures. Using selected examples from Eurasia, sub-Saharan Africa and the Americas, the course traces the major elements of change and development in the design on the earth’s built environment including technologies and materials, typology, the organization of labor and capital systems, and the codification and transmission of architectural knowledge and symbolism to the profession and the public. Course requirements include a mid-term, final exam and research paper. Credit 3 units.

**A46 ARCH 4286 Architectural History I: Antiquity to the Enlightenment**

This course addresses the development of architecture and urbanism from Greco-Roman antiquity to the European Enlightenment, while also paying close attention to contemporary developments in the non-Western world, especially in the Islamic world and East Asia. The course’s objective is to set the stage for major ideological pursuits of modern architecture as they developed in the 19th and 20th centuries, examining how these ideas evolved out of longer-term historical processes. We focus on issues of classicism, tectonic culture and historicity, and discuss commonalities and differences toward them across time and cultures in the premodern world. Credit 3 units.

**A46 ARCH 434Q Materials Research Seminar**

Credit 3 units.

**A46 ARCH 434R Decoding Sustainability**

This course engages worldwide conversations regarding current global environmental issues in relation to the production of building materials. Students begin by defining dilemmas faced by designers and architects in the selection of materials, followed by introductory information on biomimicry, natural capitalism, true cost and lifecycle analysis. This course then looks at national, international and industry environmental standards that govern building materials with respect to the triple bottom line: environmental impact, economic impact and social equity. By
analyzing specific “certified” building materials, students see how much or how little is being measured and how transparent the certification processes are. Building materials and the environmental standards that govern them will continue to evolve throughout the entirety of a designer’s life. Therefore, developing a thinking/filtering process to employ in the selection aids each designer in his or her career. This course seeks to develop design thinking in relation to the environment while developing tools to understand how building materials can be evaluated for sustainability. Credit 3 units.

A46 ARCH 435D Surface It, With Pieces

The seminar focuses on the in-depth understanding and development of ideas based on the technical, experiential and aesthetic exploration of one material: concrete, into a specific application; pavers. The students design a module and then explore different pattern options. The pattern modules consider the limitations of the material in terms of strength, weight, size, etc. The goal is to make a single piece or pieces that can be lifted by a single person without much effort and combine them in different ways in order to create an artificial topography. Students learn about the material itself as well as the act of construction, assemblage and mass production, which include methods and technology, ranging from tools to form work. The forms for the concrete pieces are built through a process of CNC milling and/or vacuum-formed plastic. The challenge is to define environmentally sensitive strategies for problem solving, conceptual development and poetic expression at both levels of the design process, conceptual and real. Sustainable principles, such as the use of recycled materials as an aggregate in the concrete mix, are an important consideration for this class. Students also are asked to investigate water run-off in a given area and alter the percentage of open grids as a way to create a pervious, though walkable surface. Construction is the ultimate goal. Credit 3 units.

A46 ARCH 436 Coding Growth: Scripting and Computational Methods for Design

The course covers an array of advanced design techniques using scripting within the rhino/grasshopper environment. Although, thorough knowledge of grasshopper is not required, it helps to ease the transition away from graphic algorithm creation and into the C# scripting language. While C# is slightly more difficult than its technical equal, VB, the language can be used in a wide variety of other programs and applications, such as Processing and the Arduino microcontroller, which students have the opportunity to explore should they feel comfortable in those environments. The foundation of the class is based around three major categories: mathematical systems, agent-based systems and simulated growth. Before covering the base material, a three-week intensive overview of grasshopper covers nearly everything students need to know in order to succeed. We begin basic scripting exercises by duplicating existing grasshopper components and proceed to the advanced categories from there. In the first category, mathematical systems, students learn how to create and control useful L-Systems such as branching, fractals and generational scaling. We then move into topological algorithms, in order to learn how to sort and search through the scripted results uncovered through the digital representation. The mapping procedures are developed to trace and project the human scale and material interface imposed by the fluctuating movements of the bodies in dynamics. Through the making of these forms, each student manufactures new objects through alternative prototyping techniques. Credit 3 units.

A46 ARCH 4362 Advanced Grasshopper

Credit 3 units.

A46 ARCH 436A Information Modeling and Technology

Credit 3 units.

A46 ARCH 436B BIM in Practice

Building Information Modeling (BIM) is a developing method of creating, sharing and managing project data through a visualized 3-D or 4-D model. While it continues to deliver on an initial promise to increase design consistency and efficiency while minimizing errors, the focus of attention is shifting to the use of BIM to facilitate integrated methods of project delivery. The course explores the use of the BIM platform and the development of data exchange methods in architectural design through a case study and subsequent design project. Students are provided instruction in Revit covering the creation, management and extraction of data from a model, but also look at the technology more broadly, discussing the changes advanced by the deployment of BIM processes in practice. Credit 3 units.

A46 ARCH 436C Mapping Soft Bodies/Constructing Complex Objects

Theory and research on digital design and manufacturing. “Body and soul are thus constructed in the same manner, at the intersection of a cluster of radii of curvature. Both are then simply effects of convergence that are constituted in space, on either side of the surface of the work that envelops them. It follows that the body is no less ideal than the mind” (Bernard Cache, Earth Moves). This course explores the complex systems of geometries that compose the human body. The students invent techniques of digital-mapping the contours of the soft bodies and define the potential for developing new forms of spatial effects
to quantify their success or failure. Once single codes can be executed relatively successfully, the course progresses into agent-based systems. The topic is introduced through simple investigations in basic geometrical relationships such as circle packing and mesh relaxation. We then study the behaviors of birds, ants, fish and termites in order to extract the necessary parameters to mimic their behavior. Building complexity yet again, students investigate the ways in which one can code growth. This ultimately leads to an architectural project at the pavilion scale for which students are asked to design a single unit that will mutate and deform itself iteratively in order to achieve explicit performance criteria that have been laid out for them. Students learn how to use genetic and generative algorithms, (a combination of the previous lessons) to design the building unit and appropriate transformation criteria and, hopefully, by the end of all of this, each student has designed a site-adaptable, feasible pavilion without knowing what that pavilion will look like in any given application.

A46 ARCH 440 Explorations in Structural Principles
This course begins with a series of presentations (lectures) about primary systems in an effort to familiarize students with basic structural principles. This is a non-mathematical exploration of how structures “work” and why. We attempt to become conversant in “the language of structures.” Students identify a particular system and do case studies exploring its characteristics and how, where and why the system has been used. These explorations ultimately lead to the development of large-scale (testable) models.
Credit 3 units.

A46 ARCH 444A Lightweight Prototyping
Credit 3 units.

A46 ARCH 445 Building Systems
Credit 3 units.

A46 ARCH 447A Structures I
Statics and strength of materials through beam and column theory. Loads are defined and states of stress are identified and analyzed. The context of structural behavior is identified and optimal structural behavior and material efficiency structural design is reviewed. Form-active, bulk-active and vector-active structural options are explored relative to the transference of load along the length of structural members. The course applies structural theory to the analysis and design of structural members — beams, trusses, arches and columns.
Credit 3 units.

A46 ARCH 448A Structures II
Continuation of Arch 447A with consideration of the effects of forces on structural members of various materials. Introduction to the design of structural members in steel, reinforced concrete and wood. Prerequisite: Arch 447A.
Credit 3 units.

A46 ARCH 450B Readings in Architecture
This weekly seminar course addresses issues of Western architectural thought through a focused series of readings and discussions. The necessity and role of architectural theory in general are examined. Issues of tectonics, historicism, typology, regionalism, modernism, postmodernism and other critical frameworks for the consideration of architecture are thematic subjects of discussion. Selected readings include Vitruvius, Alberti, Laugier, Semper, Ruskin, Le Corbusier, Gropius, Kahn, Rossi, Venturi, Eisenman, Libeskind and Koolhaas. Weekly reading assignments, attendance, participation, one summary and discussion introduction based on a reading topic, final paper. Fulfills history/theory requirement.

A46 ARCH 452G Modern Architecture in Japan
Credit 3 units.

A46 ARCH 452H Tokyo: Destruction and Renewal of Japan’s Capital
Tokyo was leveled twice over the course of the 20th century, first by the Great Kanto Earthquake in 1923 and then in the final months of World War II. One of the world’s largest and most technologically advanced cities, Tokyo is also an agglomeration of neighborhoods and still manifests the unique heritage of its Edo-past. In this seminar, we examine themes of continuity and change, local and global, through these cycles of destruction and renewal. In addition to the built environment, we also incorporate other visual and artistic media, such as literature and film. Enrollment in the course does not require prior knowledge of
Tokyo or the history of modern Japan. Fulfills History/Theory elective requirement. Credit 3 units.

**A46 ARCH 452J Empires in Distress**
This seminar examined the processes of modernization to building cultures and cities in the non-Western world, focusing on major imperial regimes such as China, Japan, India and Ottoman and Austro-Hungarian empires. We critique the idea of modern architecture emanating from the West as a hegemonic phenomenon and identify localized points of resistance and appropriation. Among the themes are nationalism, regionalism, technology, historiography, institutions of the building industry and culture, vernacular and preservation. MArch students should have completed the Architectural History I & II sequence. The course is open to graduate students and advanced undergraduates. Fulfills the History/Theory elective requirement. Credit 3 units.

**A46 ARCH 452k The Ambiguity of Scale: Japan’s Landscape Tradition**
Credit 3 units.

**A46 ARCH 454A Contemporary Discourses on Public Space**
Since the 1980s, public space has been a subject of intense theoretical debate and the key to urban revitalization strategies in cities such as Barcelona, Amsterdam, Berlin, London, Jerusalem, Curitiba, Toronto, New York, etc. Evident from the investigation into this theory and practice is the notion that the design of public space according to the typology of either the 19th century or modern city does not suffice and that the domain of contemporary public space demands a new discourse. This seminar investigates the theoretical framework and practice of various contemporary discourses on public space in order to reveal the implicit intellectual frameworks and practices. Discourses investigated include public space as the mimicry of history to public space as non-place; and from public space as the enclaves of fear and marginality to public space as the theater of economic and social exchange. The seminar also situates the design discourse in the broader political, social and philosophical discourses of the public sphere. Credit 3 units.

**A46 ARCH 455A Urban Books: Imag(in)ing St. Louis**
Since the beginning of the 20th century, art, architecture and urbanism together have investigated the production of images that shape the symbolic dimension of our experience of large cities. This seminar critically embraces this tradition and brings together different methodologies for the visual analysis and representation of contemporary urban phenomena, using St. Louis as a focal point. The goal is to design and produce individual books as a result of research, visual documentation, readings and discussions in a seminar and workshop structure. Each student selects and develops a theme related to the urbanization of St. Louis that is organized into books that present how this metropolitan area has been conceived through images. The course is divided into three parts combining readings, research and design activities, each of which culminates in the presentation of an individual project: a total of two study books and a final book. Fulfills urban issues elective requirement. Credit 3 units.

**A46 ARCH 455C DuBois Meets Churchill: Social Justice and the Built Environment**
Winston Churchill famously stated, “We shape our buildings and afterwards, our buildings shape us.” W.E.B. DuBois equally famously stated, “The problem of the 20th century is the problem of the color-line.” This course is about what happens (and has happened, and perhaps could happen) at the intersection of those two quotes. With the built environment always in the middle of the table, but never in isolation, students in this course consider its role relative to social justice as viewed through a multitude of lenses. Schedules permitting, faculty from other schools in the university also might offer their perspectives on how their respective disciplines touch on issues of social justice and the built environment. There also might be field trips to a few selected locations around St. Louis where some of these issues have played out or are playing out. This course deals with many of the issues that the fall course, Community Building/Building Community, deals with, but in a lecture format. This is partly the result of weather constraints (the spring semester is not as amenable to extensive field trips as the fall semester is), but it also allows students who can only take a spring course to do so, and in a more traditional lecture format, without as many tours and without the community service requirement. Credit 3 units.

**A46 ARCH 462H Information Modeling for Sustainable Design**
Credit 3 units.

**A46 ARCH 462K Productive Systems: Ecological Articulations in Architecture**
Credit 3 units.

**A46 ARCH 462L Articulating an Idea**
Credit 3 units.

**A46 ARCH 462M Pattern Recognition**
Interrogates a recent history of architecture replete with pattern. Case studies of patterning in contemporary projects are undertaken through the production of analytical, computational models to reveal an underlying logic of performance and
construction. In parallel, the course presents a theoretical survey of related issues in art, psychology, computation and ecology. In this context, pattern is understood as a performative expression of an ecological system, distinct from historical issues of ornament and representations. Informed by the analysis, students then digitally produce an original pattern, both graphically operative and spatially materialized. Credit 3 units.

A46 ARCH 463A Emerging (Re)Development Strategies
Credit 3 units.

A46 ARCH 463B Emergent Urbanisms
This course surveys emergent models of urbanization in globalizing cities that thus far defy categorization or exist peripherally in studies of urban form. The goal of the course is to equip students with the theoretical and historical background, the analytical tactics, and the critical awareness necessary to reposition themselves as designers in these increasingly challenging contexts. Through case study examples and supporting readings, the course deciphers the formal, social and environmental effects of particular processes defining new urban spatial configurations in city-regions around the globe. Most of these processes are driven by discourses of “efficiency,” such that urban forms are increasingly inflected by economic operating systems as they are subsequently detached from traditional concerns of livability and public interest. Emerging urban assemblages include: massive manufacturing warehouse landscapes or logistical distribution centers and “aerotropolis” transit hubs as well as those spaces left behind by regional restructuring: de-urbanizing (or deliberately erased) environments that contradictorily “enable growth” in other areas (or over the same areas); and the informal settlements that emerge more spontaneously on the margins of mainstream urban policy. Students use their understanding of these spatial and logistical configurations to project creative models for re-direction or engagement. Sources and analytical tactics are drawn from across fields including design, sociology, geography and history. Fulfills Urban Issues elective requirement, MUD-Track elective requirement.
Same as MUD 463B
Credit 3 units.

A46 ARCH 464A Architecture and Photography
Seminar deals with issues raised by use of photography by architects, historians and critics. Seminar confronts the assumption that our knowledge of notable buildings and architectural space is based primarily on the photographic image. Photographs are tacitly accepted as objective facts, and the pervasiveness of photography in magazines, books and exhibits as substitute for direct experiences is rarely questioned. Goal of seminar: to foster a healthy skepticism of photographs, and to investigate the role of photography as a means of record and convey complex spatial conditions by the ordering conventions of the frame. While not technical, the course introduces students to technical aspects of photography that are particularly relevant to architectural photography: parallax, lighting, lens distortion, depth of field, format and grain, cropping, photomontage and point of view. Fulfills history/theory requirement.
Credit 3 units.

A46 ARCH 464E Spatial Representations in Contemporary Culture
The main objective of this seminar is to analyze the crisis of representation in contemporary culture and its relationship to architecture and the urban landscape, looking for a critique of architecture beyond formal aspects. The framework for the seminar is the transition of modernity into the contested terrain of postmodernity, and the limitations and possibilities faced by architects in the thinking and in the production of space. The activities are mainly organized along the reading and discussion of texts drawn from a multidisciplinary theoretical approach, and by the analysis of examples of representation from films, artworks, architecture and the city. Credit 3 units.

A46 ARCH 464F Contemporary Theories in Architecture and Urban Practices
Since the 1960s the practice of design in architecture and urbanism has been increasingly associated with a theoretical framework. Theory has both provided support to the investigation of the phenomena related to the built environment and has faced problems in the translation of abstract constructs into the practice of design. This seminar presents examples of relevant contemporary interpretive and critical theory and confronts them with current practices in architecture and urbanism. The purpose of this confrontation is to develop skills to articulate individual critiques of design as a mediation between discourse and practice. Required work: The seminar activities take place in the form of reading and discussion of texts, and analyses of current examples of architecture and urban practices. Each student must investigate an individual case study to be presented in the form of a seminar as well as a final paper. Prerequisite: ARCH 222 or ARCH 223. Fulfills history/theory elective.
Credit 3 units.

A46 ARCH 464G Drawing and Urbanism
Credit 3 units.

A46 ARCH 467 The Visible and the Invisible
A seminar on philosophy, criticism and architecture providing an intellectual framework for making architecture, by investigating the development of thought and ideas in other disciplines and the effect they have had in the arts. Specific assigned readings are presented and discussed by the class weekly. Emphasis
placed on the discussion and the formulation of personal interpretations developed after careful and thoughtful reading. Offers an arena in which theory and practice, often seen as irreconcilable, can be understood as inseparable aspects of the same realm, informing both the author and the work. Fulfills history/theory requirement.
Credit 3 units.

**A46 ARCH 469B Appraising the Opaque: Studies of Architectural Opacity**
Credit 3 units.

**A46 ARCH 470D The Description of Place**
The means by which we come to an understanding of a place profoundly effects any subsequent action taken in that place — specifically the action of building. The possibility for place to gather and hold, not only things, but also ourselves, our memories and our imaginations — the event of place — is defined as place becomes concretely defined and choreographed as a static background for action, rather than as a fluid and dynamic action itself. In order to reassert the active reflecting and gathering power of place and, subsequently, of architecture, the process of knowing and describing where we build needs to be reconsidered. This seminar focuses on the potential for visual description to effect alternative readings of place that are otherwise obscured, and speculate regarding the implications of such readings on the making of architecture. The course is divided equally between theory and making. In addition to discussions surrounding assigned readings, students select a specific place of study in St. Louis from which they develop different methodologies for observation and description over the course of the semester. Students have a choice of submitting either a final paper or project, which speculates as to what new understandings have emerged and what possible actions could result from their study.
Credit 3 units.

**A46 ARCH 470E Extreme Architecture**
Credit 3 units.

**A46 ARCH 471A Continuity and Transformation**
Throughout history and across cultures, certain ideas, concepts and organizational strategies have persisted in architecture, despite advances in social ideals and technological capabilities. The seminar explores the phenomenon of this continuity with the goal of uncovering the manner in which these ideas and strategies are transformed. Whether classified by use, characteristic form or compositional device, the continuity of these notions is clearly traceable as a body of knowledge waiting to be revealed, understood, assessed and, when valid, built upon. The transformation of ideas and strategies is one of the most fundamental activities of the designer, but relies on careful study. We discover evidence of this phenomenon in vernacular architecture, patterns of settlement and habitation, and in the work on many of our most influential practitioners, such as Le Corbusier, Kahn, Moneo and Zumthor, as well as in the realm of painting and sculpture including Cubism, Suprematism and Expressionism.
Credit 3 units.

**A46 ARCH 472 Sustainable Development**
Credit 3 units.

**A46 ARCH 475D Landscapes Through Time: The History of St. Louis' Built Environment**
Credit 3 units.

**A46 ARCH 475E History of the Modern Art Museum**
This seminar explores the development of the modern art museum as an architectural type, measured against evolving nature of display objects, curatorial practices, and demands of the viewing public. Since the consolidation of the type in the early 19th century, the art museum has been the primary site where the symbiotic trajectories between artistic and architectural development have played out. Also examined is the importation of this program into non-Western countries, which responded with their own canons and classifications of fine art. The course ends with recent case studies in which architecture has made new, often aggressive, commentaries on objects it is designed to display. The course is open to graduate students and advanced undergraduate Architectural History minors. Fulfills history/theory elective requirement.
Credit 3 units.

**A46 ARCH 476 Approach: A Studio in Publication Design**
Credit 3 units.

**A46 ARCH 477 Contemporary Landscapes**
This course examines current practices in landscape architecture and the discourses that shaped the field during the last 20 years. Organized thematically around the topics of ecology, infrastructure and sustainability, the course aims to provide a number of critical perspectives on the relevance of landscape architecture as a cultural practice. Readings and discussions supplement lectures to trace back contemporary ideas to the late 19th and early 20th centuries. The course also incorporates field trips and presentations by visitors, as well as applied research. The seminar is open to all graduate students. Undergraduates can enroll with the instructor’s permission.
Same as LAND 477
Credit 3 units.

**A46 ARCH 4782 Modern Architecture in St. Louis**
Credit 3 units.
A46 ARCH 478A Mid-Century Modernism in St. Louis 1930–1965
Credit 3 units.

A46 ARCH 480B Mapping the Metropolitan Mississippi
This seminar explores the relationship of city to river through reading, recording and mapping. Students document their research, create proposals and develop simulations and/or prototypes for a site on the St. Louis riverfront. Methods of inquiry combine hand-recording, photography, GIS techniques and DIY devices. The course alternates discussion sessions, field research and lab. Open to all graduate students; undergraduates require the instructor’s approval.
Same as LAND 480B
Credit 3 units.

A46 ARCH 484B Notations on Florentine Architecture
This seminar proposes a historical survey of significant buildings and urban spaces in Florence through the graphic documentation and spatial analysis of selected sites and buildings from antiquity to the Renaissance and to modernism. The general framework of our analysis is to understand the relationship between the historic development of the city and its most symbolic architecture. This approach is based on the work of Italian scholars, such as Giulio Carlo Argan, who define the history of architecture as the history of the city. The course is methodically divided into two blocks of exercises. In the first part of the semester, we focus on readings, site visits, sketches, analytical drawings and photos, as well as the mapping of the urban development of Florence. In the second part of the semester, students focus on the tectonic study of specific buildings through the construction of representational and experimental models. Each student’s individual work contributes to a collective 2-D and 3-D final project to be presented as an exhibition in the Florence Studio during the spring and to be shown at the College of Architecture in the fall.
Credit 3 units.

A46 ARCH 484C Metabolic City: Drawing and Urbanism
Credit 3 units.

A46 ARCH 484D Space, Society and the Digital
Credit 3 units.

A46 ARCH 484F Monte Carlo Seminar: Drawing the Body, Imagining the City
In 1969, Archigram released one of its most iconic, yet probably also most enigmatic projects — Features: Monte Carlo. A mixed-use proposal for a performance and recreational space, it was both a building blueprint and a discursive device that operated on the scale of the human body and the city. It wove together issues of bodily and environmental wellness and performance, critically engaging the complexities of emerging global culture: mass media, entertainment industry and various environmental issues. The seminar revisits these questions through a combination of theoretical texts and projects, challenging the students to unpack the environment as a complex cultural, social and technological construct. The rich cultural history of Monaco serves as a springboard for these conversations — from the projects by Charles Garnier, Le Corbusier, Archigram and Yona Friedman to the wide-reaching experiments in modern art, design and dance of the Ballet Russe, including its avant-garde choreography by Serghei Diaghilev, stage set designs by Pablo Picasso and costume designs by Leon Bakst, Monaco sustained a highly innovative level of cultural production that was often eclipsed by its socioeconomic peculiarities. By unpacking these innovations within a larger historical and theoretical context informed by the texts of Walter Benjamin, Reyner Banham, Dean MacCannell and others, the seminar draws together bodily experiences and global cultures in modern cities. Open to graduate and upper-level undergraduate students. Fulfills history/theory elective requirement.
Credit 3 units.

A46 ARCH 486A NOMA National Design Competition
Credit 3 units.

A46 ARCH 487 American Architectural Culture Since 1945
This seminar focuses on new ways of thinking about American architecture in the postwar period, to develop new conceptual frameworks to better understand American architecture in the postwar years in its larger context of social, political and urbanist change. Unlike a history survey course, it not only focuses on the canonical works of well-known designers such as Mies van der Rohe or Louis Kahn, but also situates such work within the various new spatial, technological and social directions of the postwar era. It begins by examining how American architecture changed from the neo-Classical- and Arts and Crafts-inspired directions of the prewar years into the more fragmented and complex situation after 1945. This course also considers the complicated ways that American cities in that period were transformed from dense, streetcar-based industrial environments into sprawling suburban metro areas, typically also becoming racially divided in this process. It also looks at some of the complexities within modern architecture itself, some of which developed directly into postmodernism. These included important innovations in spatial organization, environmental planning and new building technologies, as well as fundamental changes in landscape design, campus design and public school design that have since become part of mainstream practice. Important changes in building technology in this era, which have also tended to be undervalued in the shadow of later concerns about building imagery, also are addressed. Open to graduate students and advanced undergraduates in architecture, art, art history and history. Prerequisite: ARCH 4284 Architectural
History II or equivalent course taken elsewhere. Fulfills history/theory elective requirement.
Credit 3 units.

A46 ARCH 488 Architecture Service Learning Practicum
The Sam Fox School of Design & Visual Arts, College of Architecture and Graduate School of Architecture & Urban Design give a problem-solving studio workshop about architecture, community and the environment. Fourth- through 10th-grade students from schools in the St. Louis Public School District do 2-D and 3-D hands-on problem-solving projects, use the libraries and computer labs on campus, and be introduced to the field of architecture through lectures and discussions about design projects they undertake. Architecture faculty member Gay Lorberbaum leads the curriculum. Washington University graduate and undergraduate students in architecture participate in the important responsibility of being teaching assistants.
Credit 2 units.

A46 ARCH 490 Architecture Service Learning Practicum
The Sam Fox School of Design and Visual Arts, College of Architecture and Graduate School of Architecture & Landscape Architecture & Urban Design, give a problem-solving studio workshop about architecture, community and the environment. Fourth through 10th grade students from schools in the St. Louis Public School District do 2-D and 3-D hands-on problem-solving projects, use the libraries and computer labs on campus, and are introduced to the field of architecture through lectures and discussions about design projects they undertake. Architecture faculty member Gay Lorberbaum leads the curriculum. Washington University graduate and undergraduate students in architecture participate in the important responsibility of being teaching assistants.
Credit 2 units.

Credit 3 units.

A46 ARCH 499 Senior Capstone in Architecture
Credit 3 units.

Landscape Architecture

A48 LAND 317 Architectural Design I (Landscape)
The first of a three-semester sequence that introduces students to architectural design, focusing on conceptual, theoretical, and tectonic principles. First-semester MArch 3 students only. Same as ARCH 317
Credit 6 units.

A48 LAND 401 Landscape Architecture Design Studio I
This core studio explores design principles common to architecture and landscape architecture as well as their own specificity. A series of problems focuses on the relation of component to space through conceptual, analytical, formal and perceptual investigations.
Credit 6 units.

A48 LAND 402 Landscape Architecture Design Studio II
In this core studio course, students develop a spatial understanding of landscape architecture through a series of exercises of varying scale and complexity. Building design skills incrementally, students acquire facility with the manipulation of ground plane and the elaboration of vegetation and material strategies at both site and urban scales. The studio fosters an appreciation of landscape architecture as a systemic construct with formal, ecological and social implications.
Credit 6 units.

A48 LAND 421 Landscape Representation I: Hand Drafting, Drawing and Sketching
The beginning course in the representation sequence introduces students to freehand and mechanical representation as a means for developing and communicating design ideas. Students build a basic understanding of orthographic drawing typologies and traditional drawing materials. Emphasis is placed on development of observational skills, building a design vocabulary, basic drawing skills, and the techniques of landscape architecture and architectural representation.
Credit 3 units.

A48 LAND 422 GIS
This course module introduces GIS mapping software and its application to methods used in site planning and design. The focus of this half-semester course is to understand the potential of GIS to analyze, visualize and utilize complex data. Students learn techniques and tools in ArcGIS software and explore how these can be applied to projects specific to individual sites. This course introduces new skills and analytical complexity while building upon previously learned representation techniques.
Credit 1.5 units.

A48 LAND 431 Landscape on Structure
This course examines materials and technologies for landscapes on structure — green roofs and vertical gardens, among others. Through a series of case studies, students gain an understanding of the relationships between structure (architecture and infrastructure) and substrate, soil, water and plants. Topics covered include innovative planting and urban streetscape systems, and infrastructural adaptation and reuse. Exercises range from analytical diagrams of construction methods to design concepts for living systems adapted to a
variety of structural and environmental conditions. Open to students in architecture, landscape architecture and urban design. Credit 3 units.

**A48 LAND 451 Plants & Environment**
Credit 1.5 units.

**A48 LAND 452 Planting Design I**
Credit 1.5 units.

**A48 LAND 452k The Ambiguity of Scale: Japan’s Landscape Tradition**
Same as ARCH 452k
Credit 3 units.

**A48 LAND 461 Grading + Landform**
Credit 1.5 units.

**A48 LAND 462 Landscape Materials**
Credit 1.5 units.

**A48 LAND 465 Landscape Technology**
Throughout the world of spatial design, there has been a strong resurgence of interest in landscape methods as a comprehensive and innovative approach toward defining and engineering sites. Techniques of working the land engage dynamic processes, molding conditions and creating forms in order to control erosion, conserve water and minimize human impacts. As such, landscape methods have created new standards of performance for sites of all sizes and circumstances. Accordingly, this course, intended for students across disciplines, presents an integrated approach to site planning through the intensive study of applied landscape systems. The material covers the spatial and functional systems of designed landscapes and their associated computational and technical aspects: micro- and macrograding, path alignment and drainage calculation. Through studying these techniques, students learn to implement and quantify water management, microclimate manipulation and low-impact circulation, parking and servicing. The principles and methods are presented through short lectures and supported by case studies, class workshops and design exercises, tying theory to practical applications. Credit 3 units.

**A48 LAND 477 Contemporary Landscape**
This course examines current practices in landscape architecture and the discourses that shaped the field during the last 20 years. Organized thematically around the topics of ecology, infrastructure, and sustainability, the course aims to provide a number of critical perspectives on the relevance of landscape architecture as a cultural practice. Readings and discussions supplement lectures to trace back contemporary ideas to the late 19th and early 20th centuries. The course also incorporates field trips and presentations by visitors, as well as applied research. The seminar is open to all graduate students. Undergraduates can enroll with the instructor’s permission. Credit 3 units.

**A48 LAND 480 Case, Trace, Displace: Dialogue between River and City**
Credit 3 units.

**A48 LAND 480B Mapping the Metropolitan Mississippi**
This seminar explores the relationship of city to river through reading, recording and mapping. Students document their research, create proposals and develop simulations and/or prototypes for a site on the St. Louis riverfront. Methods of inquiry combine hand-recording, photography, GIS techniques and DIY devices. The course alternates discussion sessions, field research and lab. Open to all graduate students; undergraduates require the instructor’s approval. Credit 3 units.

About Us
The Sam Fox School of Design & Visual Arts is a unique collaboration in architecture, art and design education, linking professional studio programs with one of the country’s finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art and the Mildred Lane Kemper Art Museum.

The College of Architecture, founded in 1879, was the first professional, university-affiliated art school in the United States. In the 1940s, its broad-based core program helped set the standards for the bachelor of fine arts degree. Faculty over the years have included Max Beckmann, Philip Guston and other internationally known artists.

The College of Architecture, established in 1910, was one of eight founding members of the Association of Collegiate Schools of Architecture (ACSA). In 1962, Architecture launched one of the nation’s first Master of Urban Design programs. Four winners of the Pritzker Prize, considered architecture’s highest honor, have taught at the school.

The Mildred Lane Kemper Art Museum dates back to 1881, making it the first art museum west of the Mississippi River. The collection has historically focused on contemporary work. Today the Kemper Art Museum holds roughly 3,500 important paintings, sculptures, photographs and installations by 19th-, 20th- and 21st-century American and European artists, along with significant antiquities and a large number of prints and drawings.

Additional collaborative opportunities are provided by the Department of Art History & Archaeology in Arts & Sciences and the Kenneth and Nancy Kranzberg Art & Architecture Library.

Inquiry, Creativity and Synthesis
The Sam Fox School offers rigorous art and architecture education at both the undergraduate and graduate levels, within the unique context of an independent, nationally prominent research university.

The student body is composed of approximately 300 undergraduate and 50 graduate students in Art, as well as 200 undergraduate and 280 graduate students in Architecture. In all, they represent 17 countries, 47 states and the District of Columbia. Roughly 30 percent of undergraduates pursue combined studies within another university area.

Both core and advanced studios integrate contemporary theory and practice. Among the innovative programs are:

• Multidisciplinary courses co-taught by Art, Architecture, and Art History & Archaeology faculty. Recent seminars have explored the history of illustrated entertainment, combined urban theory with book design and production, and crafted a variety of online publications. Courses in exhibition studies are being offered and a new program of exhibition studies is under development.

• International studios in Barcelona, Buenos Aires, Florence and Helsinki are taught by Washington University faculty and offer a range of distinctive programs in art and architecture.

• Community projects include the University City Sculpture Series, which funds student-designed public artworks; WashUcity, a mentoring program for local high school artists; and Architecture’s Building Community/Community Building, which explores relationships between St. Louis’ inner city, nearby municipalities and outlying suburbs.

Uniting Creativity and Scholarship
The Sam Fox School boasts a unique combination of academic and intellectual resources.

The Architecture faculty includes practicing architects, urban designers and landscape architects as well as eminent architectural theorists and historians and a select number of international visitors. The resident, full-time faculty members have won national and regional awards for design excellence and planning, including more than two dozen from the American Institute of Architects alone.

Art’s full-time faculty members include prominent painters, sculptors, printmakers and mixed-media artists as well as leading illustrators, graphic designers, fashion designers and photographers. In the past decade, design faculty have won numerous professional honors while fine art faculty have been featured in more than 100 solo exhibitions and 300 group shows on five continents.

The nationally recognized Kemper Art Museum maintains a vital program of exhibitions, publications and educational events. Major thematic shows are drawn from institutions and private collections around the world, while the Contemporary Projects
Series highlights nationally and internationally emerging artists. The acclaimed permanent collection includes key works by modern and contemporary artists from Henri Matisse, Pablo Picasso and Jackson Pollock to Christian Boltanski, Candida Hofer and Olafur Eliasson.

Public events include concerts, film screenings, lectures and discussions with distinguished visitors, and museum tours led by student docents. The museum also provides workspace for faculty- and student-curated exhibitions (usually relating to Sam Fox School curriculum). Courses in Art History and Archaeology further complement the critical and practical study of exhibitions while facilitating student involvement in professional curatorial projects.

A Comprehensive Campus

The Sam Fox School is housed in a comprehensive, five-building campus for design and the visual arts. Conceived around a central courtyard, it both reflects and updates Washington University’s original campus plan, developed in 1895 by Frederick Law Olmsted, the founder of American landscape architecture.

The architectural centerpiece is prize-winning Japanese architect Fumihiko Maki’s new Kemper Art Museum. This elegant, 65,000-square-foot limestone clad structure — a gathering point for scholars and the general public — includes more than 10,000 square feet of exhibition space, art storage facilities, and the Florence Steinberg Weil Sculpture Garden. The museum also houses the new Kranzberg Art & Architecture Library, Art History & Archaeology, and the Newman Money Museum, a state-of-the-art numismatics center.

Adjacent to the Kemper Art Museum is Maki’s Earl E. and Myrtle E. Walker Hall. The three-story, 38,000-square-foot building contains painting and sculpture studios and the Nancy Spirtas Kranzberg Studio for the Illustrated Book.

Flanking the new buildings are Bixby and Givens Halls — historic homes to Art and Architecture, respectively — as well as Steinberg Hall, Maki’s iconic modernist pavilion. Recent renovations include state-of-the-art computing environments; accessible, light-filled studios; additional workspaces; an auditorium; and a café.

Visiting Artists and Architects

The Sam Fox School invites distinguished academics and professionals to lecture, attend critiques and visit major studios. Recent visitors include:

Degree Requirements

Undergraduate Degree

Students in the College of Architecture select, in consultation with their advisers, a course of study that satisfies the formal degree requirements, addresses their interests and best meets their overall goals.

General

Students will earn either a Bachelor of Science in Architecture or Bachelor of Design in Architecture. The degree program requirements are the same for both degrees through the junior year (300-level). Students then choose which degree program they wish to pursue at the conclusion of the junior level.

College of Architecture Requirements

Students in the classes of 2018 and beyond must fulfill the following degree requirements:

A. Academic Requirements
1. Writing I: Every student must demonstrate proficiency in reading and writing the English language and must begin to develop mature skills in framing and revising arguments by completing course work as determined by the Department of English with a grade of C- or better.

2. Calculus I (Natural Sciences/Math)

3. Physics I (Natural Sciences/Math)

4. Humanities (3 units)

5. Social and Behavioral Sciences (3 units)

6. Art History (History of Western Art, Architecture and Design)

7. Art History (Introduction to Modern Art, Architecture and Design)

B. Academic Electives

In addition to the courses listed above, every student is required to take at least 27 units of course work in Arts & Sciences electives.

C. Foundation Courses

1. Drawing I

D. Sam Fox Commons, Architecture, Art or Design Electives

Every student is required to take at least 6 units of Sam Fox Commons (X10 300-level), Architecture, Art or Design interdisciplinary courses.

E. Major Required Courses: Bachelor of Science in Architecture

Typical Freshman and Sophomore Programs for Architecture Students

The following typical programs for the freshman and sophomore years are based on the requirements of the College of Arts & Sciences and on the prerequisite introductory architecture sequences for the undergraduate degrees in architecture:

**Freshman Year**

Academic Requirements/Electives 15

Total units 31

If a student plans to enter the architectural design sequence ARCH 311-ARCH 312 in the fall of the junior year, the student must complete 60 units of academic work by the end of the sophomore year.

**Minor in Architecture Requirements**

Minor degree candidates are required to complete 18 units including:

1. 6 to 9 units of introductory design, from the following:
   - ARCH 111 & ARCH 112 Introduction to Design Processes I 6
   - ARCH 211B Introduction to Design Processes III 9
   - ARCH 212B and Introduction to Design Processes IV

2. 3 units (minimum) of the architectural history survey:
   - ARCH 3283 Architectural History I: Premodern Encounters in World Architecture 3
   - ARCH 3284 Architectural History II: Architecture Since 1880 3

3. 3 to 9 units chosen from the following electives:
   - ARCH 302 Freehand Drawing 3
   - ARCH 333 Case Studies in 20th-Century Architecture 3
   - ARCH 336D Biomimicry: A Biokinetic Approach to Sustain(Able) Design 3
   - ARCH 404 Advancing Integrated Sustainability 3
   - ARCH 405A Furniture Design for the Architect 3
   - ARCH 434R Decoding Sustainability 3
   - ARCH 455C DuBois Meets Churchill: Social Justice and the Built Environment 3

Additional courses as approved by the associate dean of students or dean.

**Additional Requirements**

Each undergraduate student shall complete 122 units with a grade of D or better (or credit) and at least 30 units in advanced courses (numbered 300, 400 or 500). The 30 units in advanced courses may include the minimum number of advanced units required by the major areas of concentration. Courses required for the major (see College of Architecture Requirements) must be passed with a grade of C– or better.

Each student shall spend at least three semesters in full-time residence (at least 12 units per semester) at Washington University. Unless excused by the dean of the College of Architecture, the student must earn the last 30 units at Washington University. The dean of the College of Architecture may waive the full-time residence requirement for students who are employed full-time and have completed at least two years of college.

**Regulations**

A. No more than eight courses, exclusive of general studies courses, may be taken pass/fail.

B. Students may enroll for credit in only one supervised performance course in any semester. Students may earn a maximum of 12 units toward the degree in supervised performance and/or in group and individual performance courses combined.

**The 4+2 Program: Bachelor of Science in Architecture and Master of Architecture**

The College of Architecture’s Bachelor of Science degree curriculum leads directly into the Graduate School of Architecture & Urban Design’s two-year Master of Architecture degree program, providing for the attainment of the accredited professional degree in six years.

Students who have satisfactorily completed, or who are about to complete, the Bachelor of Science requirements can apply to the Graduate School of Architecture & Urban Design’s Master of Architecture degree program by submitting an application to the Graduate Admissions Office and by requesting a review of their undergraduate work by the Graduate Admissions Committee. Admission is not automatic, however, and requires approval from the Graduate Admissions Committee. A portfolio is not required for students in the senior year of the Bachelor of Science curriculum at the time of application.

Bachelor of Science in Architecture students thus accepted into the two-year Master of Architecture degree program are required to complete the following courses to fulfill the requirements of the MArch 2 degree:

<table>
<thead>
<tr>
<th>Course Code</th>

<td>Professional Practice I</td>
<td>3</td>
</tr>
</tbody>
</table>

Total units 33

Additionally, students entering the two-year Master of Architecture degree program with the college’s Bachelor of Science degree must complete course work not addressed during the Bachelor of Science curriculum, as follows:

1. Completion of both ARCH 438 Environmental Systems I and ARCH 439 Environmental Systems II;
2. Completion of at least one elective course in Architectural History and Theory; and
3. Completion of at least one elective course in Urban Issues.

Students in the MArch 2 degree program have 18 units (six courses) of additional elective credits to complete.

Information

For more information about graduate degree programs and requirements, contact the Director of Graduate Admissions, Graduate School of Architecture & Urban Design, Sam Fox School of Design & Visual Arts, Washington University in St. Louis, Campus Box 1079, One Brookings Drive, St. Louis, MO 63130-4899, or send an e-mail to: wuarch@samfox.wustl.edu.

Academic Honors & Awards

Dean’s List: In recognition of exceptional scholarship, the Office of the Dean compiles, at the end of each academic year, a list of those students whose work has been particularly worthy of commendation. Students will be eligible for the Dean’s List if they:
1. Elect to take a minimum of 14 hours of course work per semester on the grade option, and;
2. Achieve a semester grade point average of 3.5 or better.

All undergraduate students electing the grade option are candidates for the Dean’s List unless they notify the Office of the Dean in writing that they do not wish to be considered.

Latin Honors: Senior Honors may be awarded to graduating students whose academic performance has been outstanding. To be eligible for Senior Honors, a student must have achieved a cumulative grade point average of 3.5 or above through his or her final semester. A student may be considered for the Bachelor of Design and Bachelor of Science degrees cum laude, magna cum laude or summa cum laude as determined by the dean. Nomination for Senior Honors will ultimately depend on the student’s attitude toward learning demonstrated by academic records and faculty recommendations.

Special Awards, Medals and Prizes

Undergraduate

Betty Lou Custer Award. The St. Louis Chapter of the American Institute of Architects presents a book award in memory of Betty Lou Custer, longstanding executive director of the chapter, to an outstanding graduate receiving either undergraduate degree. In recognition of Custer’s service to the profession of architecture, the prize is awarded to a student who has contributed willing service to the College of Architecture.

Faculty Award. The faculty of the College of Architecture offers a book award to an outstanding BDAs or BS undergraduate in the College.

Sophomore Book Prize. Presented to an outstanding sophomore who has completed the basic design sequence within the College. Given in honor of Leslie J. Laskey, professor emeritus, whose inspired teaching formed the basis of the basic design program and whose influence is carried on in the lives and work of the students who studied with him.

Graduate

Alpha Rho Chi Medal. Alpha Rho Chi, a national social fraternity in architecture, awards a medal to the graduating sixth-year student who has shown an ability for leadership, has performed willing service for the Graduate School of Architecture & Urban Design, and has given promise of real professional merit.

American Institute of Architects Medal. Each year, the AIA medal is awarded to a member of the graduating class in recognition of scholastic achievement, character and promise of professional ability. The student so honored receives the engraved medal. The runner-up also may be awarded a certificate, depending on the decision of the faculty. The awards are made in the name of the Henry Adams Fund by the AIA.

All School

James Walter Fitzgibbon Prize. Mrs. James Fitzgibbon and friends of the family established a fund to honor Professor Fitzgibbon’s memory and to recall his long and distinguished service on the faculty of Architecture. The annual income from this fund provides for the Fitzgibbon Prize, given to a 300- to 600-level student who has the winning solution to a one-day sketch problem.

William Tao Prize. Established by William K.Y. Tao, P.E., alumnus, emeritus trustee and affiliate professor at Washington University, the William Tao Prize provides an annual cash award to students who have demonstrated excellence in the understanding and application of building systems in architecture, including illumination, electrical and mechanical engineering, and energy-efficient design.

Frederick Widmann Prize in Architecture. Through a bequest from the late Frederick Widmann, an annual prize of at least $1,500 is offered to the best architectural student in the University. The selection is made by the faculty of the architecture college.

Scholarship Funds

Scholarships with applications

St. Louis Chapter American Institute of Architects Scholarship Fund. For students from the St. Louis metropolitan area who have completed the first two years of their architectural studies. Inquiries should be addressed to the St. Louis Chapter AIA, 911 Washington Ave., #225, St. Louis, Missouri 63101. Separate application is required.
The James W. Fitzgibbon Scholarship in Architecture. Awarded to support four years of study leading to either undergraduate architecture degree. The Fitzgibbon Scholar is selected in recognition of outstanding academic performance and promise in the field of architecture. The scholarship is in the amount of full tuition, renewable for a total of four years of undergraduate study. Up to five partial-tuition scholarships are also available. For more information, contact the Office of Undergraduate Admissions. Separate application is required.

Scholars in Architecture
The Scholars in Architecture program provides named scholarship funds that have been donated to the university by individuals or companies specifically for this purpose. Selection is based on financial need and academic achievement. There is no application process. The total amount of the student’s financial assistance package does not change.

Loan Fund
Gustel and Edith H. Kelwitt Scholarship Loan Fund.

Academic Regulations
Students in the College of Architecture are required to complete 48 credits in Arts & Sciences. Transfer credit and University College courses do not count toward these 48 credits.

No more than 15 units of pre-matriculation credit from all sources — Advanced Placement (AP) examinations, International Baccalaureate (IB), British Advanced (A) Levels — will be awarded. The units of credit awarded do not apply toward the 48 credits required in Arts & Sciences.

Attendance
Regular attendance at all classes and studio meetings is expected of each student. If, in the opinion of the instructor, any student has accumulated absences to such an extent as to preclude the possibility of satisfying the course requirements, the student’s registration in that course will be canceled, subject to the approval of the dean.

Units and Grades
A unit is the amount of credit given for one hour of lecture or up to three hours of studio work a week for one semester. All students in the College of Architecture may take one nonrequired course on a pass/fail basis each semester. All students in the Graduate School of Architecture & Urban Design may select one of the following two grading options as they register for each semester: (1) grade option or (2) pass/fail option. Under the grade option, a student may take one nonrequired course under pass/fail. Under the pass/fail option, all courses must be taken pass/fail.

Symbols used for both options have the following meanings:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points per Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A–</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B–</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C–</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>D–</td>
<td>0.7</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
<tr>
<td>P#</td>
<td>Pass</td>
</tr>
<tr>
<td>F#</td>
<td>Failing</td>
</tr>
<tr>
<td>I</td>
<td>Course work incomplete</td>
</tr>
<tr>
<td>W</td>
<td>Withdrawal</td>
</tr>
<tr>
<td>R</td>
<td>Repeat</td>
</tr>
<tr>
<td>L</td>
<td>Successful audit</td>
</tr>
<tr>
<td>Z</td>
<td>Unsuccessful audit</td>
</tr>
<tr>
<td>N</td>
<td>No grade submitted</td>
</tr>
</tbody>
</table>

Pluses and minuses are used. Each grade earned for a course taken for credit receives a specified number of grade points, and these points are affected by plus and minus grades as well.

F grades for a semester may be changed only through the last day of classes of the following semester and then only in extraordinary circumstances. The Office of the Dean will approve no changes of F grades after this interval.

In addition to grading under either the regular grade option or the pass/fail option, instructors teaching architectural design courses complete an evaluation form for each student; a copy is made available to the student, and the original is filed in the student’s folder in the Office of the Dean.

Auditing a Course
With prior approval from their academic adviser, students may audit an elective course.

Incomplete Grades
Incomplete marks in all architectural design courses (100- to 600-level) must be removed by the first day of classes of the following semester. Failure to remove the incomplete will prevent the student from continuing in another architectural design course.

In all other courses, the grade of I must be removed no later than the last day of classes of the next full semester. On failure to make up an I within the next semester, the student
shall automatically receive an F in the course unless explicitly excused by the dean. An F grade, so received, may not be changed. Students will not be allowed to continue in courses requiring prerequisites if the prerequisite has an Incomplete grade. A student who carries more than 9 units of incomplete work may be declared ineligible to re-enroll.

**Pass/Fail Option**

No more than eight courses, exclusive of general studies, major and minor courses, may be taken pass/fail.

**Minimum and Maximum Loads**

Freshman and sophomore undergraduates will normally enroll in either 15 or 16 units each semester, although enrollment in up to 18 units is possible. Juniors and seniors in the architecture degree programs are strongly recommended to enroll in no more than 16 units each semester in order to maintain focus on the design studio and major requirements. This guideline can only be waived by the dean or associate dean. The normal load for graduate students is a maximum of 16 units each semester.

An enrollment above 18 units will be charged at the established university rate per hour of the additional credits and must be approved by the dean or associate dean of the College of Architecture.

Refer to the About WUSTL (p. 7) section of this Bulletin that covers tuition and fees (p. 28) for both the annual tuition rate and the per credit hour breakdown applicable to the College of Architecture.

Partial load enrollment is possible when circumstances warrant it and requires the permission of the dean.

Students are expected to proceed at a pace that enables them to finish their degree within the appropriate time limit. For undergraduates, this is usually eight semesters, and for graduates it is established by the letter of admission. Students are expected to complete no fewer than the minimum number of hours set forth in the schedule below:

**Undergraduate Program**

<table>
<thead>
<tr>
<th>Semester</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>10</td>
</tr>
<tr>
<td>2</td>
<td>20</td>
</tr>
<tr>
<td>3</td>
<td>32</td>
</tr>
<tr>
<td>4</td>
<td>45</td>
</tr>
<tr>
<td>5</td>
<td>60</td>
</tr>
<tr>
<td>6</td>
<td>75</td>
</tr>
<tr>
<td>7</td>
<td>97</td>
</tr>
<tr>
<td>8</td>
<td>120</td>
</tr>
</tbody>
</table>

**Graduate Program**

<table>
<thead>
<tr>
<th>Semester</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>6</td>
</tr>
<tr>
<td>2</td>
<td>12</td>
</tr>
<tr>
<td>3</td>
<td>24</td>
</tr>
<tr>
<td>4</td>

</tr>
<tr>
<td>5</td>
<td>48</td>
</tr>
<tr>
<td>6</td>
<td>60</td>
</tr>
<tr>
<td>7</td>
<td>75</td>
</tr>
<tr>
<td>8</td>
<td>90</td>
</tr>
<tr>
<td>9</td>
<td>105</td>
</tr>
</tbody>
</table>

Exceptions to these minimum standards may be granted only with the written consent of an academic adviser or the associate dean or dean.

**Repeating a Course**

When a student retakes a course in which a passing grade has been received, both enrollments will show on the transcript. If the second grade is equivalent to or better than the first grade, the first grade may be changed to R, indicating the re-enrollment upon request of the student and with department approval. If the second grade is lower, both grades will stand. Credit toward the degree will be allowed for only one of the enrollments. When a student retakes a course in which an F has been received, both enrollments for the course will appear on the transcript. If a passing grade is received in the second enrollment, the first enrollment may be changed to R, indicating the re-enrollment upon request of the student and with the approval of the dean.

**Academic Warning and Suspension**

A student whose semester grade point average is below 2.0 (grade of C) or who falls below a pace of 66 2/3 percent (number of credits earned divided by the number of credits attempted) will be placed on academic probation. If, after the following semester, the semester grade point average is still below 2.0 or the pace is below 66 2/3 percent, the student may be ineligible for normal advancement or may be suspended. While the College desires to give all students the opportunity to prove themselves, it is not in the best interest of either the student or the College to permit a student to continue indefinitely in educational programs in which they are not producing satisfactory results.

**Leave of Absence**

A leave of absence for one or two semesters is normally granted to a student when individual circumstances, medical or personal, warrant it. A leave of absence assumes that the student will not be taking any academic work at another institution, and it guarantees re-enrollment at its conclusion. A letter from the dean granting a leave of absence will normally require notification by
February 15 or November 15 of the student's intention to re-enroll in the following semester.

**Transfer Credit**

Students wishing to transfer credit for course work completed at another institution should bring a full description of the course(s) to the associate dean for preapproval. Upon receipt of an official transcript indicating a grade of C or better, courses will be considered for transfer. Grades for transfer courses will not appear on the student’s Washington University record and will not figure into the student's grade point average.

**Retention of Student Work**

The College of Architecture and Graduate School of Architecture & Urban Design reserve the right to retain any student work submitted for course credit. Normally this work will be returned to the student at the end of the semester, except that which has been retained for publications, exhibitions or accreditation reviews. It is highly recommended that students photographically reproduce or electronically store their work in order to keep a record of their work.

**Withdrawals**

Students wishing to withdraw for any reason from the College of Architecture before the end of the semester should consult in person with the associate dean. No such withdrawal will be official until the request in writing has been approved by the associate dean and the appropriate changes have been made in the student's record.

**Academic Integrity**

Students and members of the faculty of a university have an obligation to uphold the highest standards of scholarship. Plagiarism or other forms of cheating will not be tolerated. Where a student has violated the integrity of the academic community, an instructor may recommend that the student be brought before the Committee on Academic Integrity. A list of university policies can be found on the website of the University Registrar.

Art

Sam Fox School of Design & Visual Arts

The Sam Fox School of Design & Visual Arts is a unique collaboration in architecture, art and design education, linking professional studio programs with one of the country’s finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art, and the Mildred Lane Kemper Art Museum.

A Professional Art College Within a University

The College of Art offers students the opportunity to study art or design while taking both required and elective courses through other schools and divisions of the university. The College of Art, which has its own faculty and facilities, has been a degree-conferring division of Washington University since 1879.

Undergraduate students at the College of Art have a wide variety of options from which to choose to meet their individual needs and to satisfy their interests. The Bachelor of Fine Arts (BFA) curriculum has been designed around the philosophy that the study of art has no natural boundaries; all human experience — intellectual, technological and social — can at some point become part of the purposes of an artist or designer. College of Art courses provide a structural base upon which students are able to build.

When students major in art at Washington University, they may choose to study communication design, fashion design, and art with optional concentrations in painting, photography, printmaking or sculpture.

Our diverse student body is composed of young people who have records of high achievement in both art and academic subjects. Because the college provides such a comprehensive learning environment, it is an excellent place for a student to mature as an artist or designer.

Facilities

The College of Art studios are in William K. Bixby Hall, Earl E. and Myrtle E. Walker Hall, Mark C. Steinberg Hall, and Lewis Center. Bixby Hall, located on the university’s Danforth Campus, was built for the College of Art in 1926. Walker Hall was completed in the summer of 2006 as part of the Sam Fox School of Design & Visual Arts. The renovation of Steinberg Hall was completed in fall 2007. Lewis Center, located one mile from the Danforth Campus, offers 28,000 square feet of space for graduate studios.

Resources at the College of Art include the Whitaker Learning Laboratory, which has computers and software for graphics and design, as well as video equipment, and the Nancy Spirtas Kranzberg Studio for the Illustrated Book, located in Walker Hall.

**Associate Professor Emeritus**

Jeigh Singleton

**Bachelor of Fine Arts**

Second-year studio courses introduce students to the different areas of focus.
A student’s last two years include intense study in his or her chosen focus area and a capstone experience. The capstone studio brings together all seniors in the studio areas and separately in the communication design and fashion areas for critical dialogue beyond disciplinary boundaries to guide preparation for a culminating BFA exhibition.

For specific degree requirements, visit the Degree Requirements (p. 135) page for the College of Art.

The Major in Art
Majors are offered in:
• Art — with optional concentrations in:
  • Painting
  • Photography
  • Printmaking
  • Sculpture
• Communication Design
• Fashion Design

The Second Major or Minor
Art students may earn a second major or minor in the College of Arts & Sciences, the Olin Business School or the School of Engineering & Applied Science (computer science) while completing the requirements for the BFA degree. If students choose to take advantage of these opportunities, they will graduate with a BFA degree with two majors — one in art and one in another school, or a BFA degree with a major in art and a minor in another school.

Students must successfully complete all of the degree requirements for the BFA, all of the requirements for the second major or minor, and a minimum of 48 credits in Arts & Sciences.

The second major and minor option can be completed within four years if careful planning begins during the first year. If a student is interested in these options, he or she should consult with the associate dean of students in the College of Art.

Art Education
Students who wish to teach art at the elementary and secondary levels may obtain Missouri state certification by taking additional credit units of required education courses offered by the university’s Department of Education in the College of Arts & Sciences. These courses may be taken as academic electives within the BFA program.

In addition to course work in education, prospective art teachers must complete specific courses in general education (communications, humanities, mathematics, natural sciences and social sciences). For information on general education requirements, students should consult with the associate dean of students (Bixby Hall, Room 1) or the Department of Education (Seigle Hall, Room 107). Missouri state certification normally takes an additional semester of study. Application to enroll in the teacher education program is made through the Department of Education and should be done no later than the beginning of the sophomore year. Part of the application process involves successfully passing College Base, an achievement test focused on general education content. (This test is periodically given on the Washington University campus.) Acceptable scores on the SAT or the ACT also must be submitted. Interested students may also apply for admission to the Master of Education degree program offered by the Education Department.

Students in an undergraduate degree program at Washington University may pursue a minor from the College of Art. Students must consult with the associate dean of students or the assistant dean/registrars (Bixby Hall, Room 1). Students may declare a minor in WebStac.

A minor requires a total of 15 credits from F10, F20, X10 or X20 courses with a grade of C– or better. Visit the Sam Fox School website for specific requirements.

Minors are offered in:
• Art
• Design

F10 Art: Art foundation and major studio courses
F20 Art: Art elective courses

X10 XCORE: Sam Fox foundation and commons courses

College of Art majors have enrollment priority in F10 and F20 courses. College of Art and College of Architecture majors have enrollment priority in X10 courses. Elective (F20) courses may be offered at the 100–400 levels; students must enroll as applicable — 100-level courses are for freshmen, 200-level for sophomores, 300-level for juniors and 400-level for seniors.

Design & Visual Arts — Core (X10)

X10 XCORE 101 Drawing I
An introductory course which teaches students to recognize and manipulate fundamental elements of composition, line, form, space, modeling and color. Emphasis is placed on working accurately from observation, with an introduction to other methodologies. Students work in a variety of media. Demonstrations and illustrated lectures supplement studio sessions and outside projects.
Credit 3 units. EN: H

X10 XCORE 102 Drawing II
Continuing as an introductory course which teaches students to recognize and manipulate fundamental elements of composition, line, form, space, modeling and color. This course is an intensive studio course which builds on the perceptual and conceptual skills and experiences developed in Drawing I. A main objective will be to develop a higher level of critical and studio practice.
Prerequisite: X10 XCORE 101.
Credit 3 units. EN: H

**X10 XCORE 181 Practices in Architecture + Art + Design**
This course offers first-year students in architecture and art an introduction to the subjects, theories and methodologies of the disciplines of art, design, architecture, landscape architecture, and urban studies. Examples, drawn from a range of historical periods as well as contemporary practice, highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap. Part 1 of 2.
Credit 1 unit. EN: H

**X10 XCORE 182 Practices in Architecture + Art + Design**
This course offers first-year students in architecture and art an introduction to the subjects, theories and methodologies of the disciplines of art, design, architecture, landscape architecture, and urban studies. Examples, drawn from a range of historical periods as well as contemporary practice, highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap. Part 2 of 2.
Credit 1 unit. EN: H

**X10 XCORE 301 From Propaganda to Decoration**
This is a studio course that is conceptually driven and anchored in the philosophical terrain of the print multiple. The fundamental attributes of the multiple, including its accessibility and repeatability, are from private to public and from political to aesthetic. Given this orientation, we examine the place where the public and private spheres meet. Considering urban communication and social space, reproduction and distribution, gifting and exchange, private practice and public intervention, this course uses the print multiple as a starting point to explore a continuum that runs from propaganda to decoration.
Credit 3 units. EN: H

**X10 XCORE 303 Visualizing Information**
This project-based studio course brings students from diverse backgrounds in Art, Architecture, and Design together to learn to compose information-rich surfaces. The course explores principles of information design on paper initially, and offers the opportunity to extend some applications to the screen. Course topics include content organization, visual structure, hierarchy, typography, color, sequencing, audience and usability. Students have the chance to select subject and media for some of their projects. Projects are supplemented with readings and lectures about contemporary information design, with some historical references. This course combines the rigor of a disciplinary classroom with the flexibility of a multidisciplinary one. Topics likely to emerge in the interdisciplinary conversation include information in three-dimensional spaces, communicating information with a particular voice or editorial perspective, analytical versus poetic information design, function, audience and programming. All of these are supported, and students develop a set of tools which can be adapted to their own disciplinary work in a meaningful way.
Credit 3 units.

**X10 XCORE 304 Data Visualization**
In this hybrid lecture/studio course, students learn basic skills to develop data visualizations focusing on clarity, relevance to the user, and visual expression. The course spans several themes within data visualization, including principles of two-dimensional design, storytelling and sequence, and interactivity and user navigation. It is organized into four units, each with a different content focus and data type, including topics as diverse as urban and rural landscapes, conditions in public health, and literary production. Students apply their own areas of interdisciplinary expertise to the final project. Students need a laptop with Adobe Illustrator and may need to acquire inexpensive or free software. This course is appropriate for sophomores through graduate students with or without visual training who are interested in data, information design, user interface, and computer programming. Course counts as a multidisciplinary course in the Sam Fox Commons, an elective course in Communication Design, or a course in the Interdisciplinary Project in the Humanities (IPH).
Credit 3 units. EN: H

**X10 XCORE 305 Topics in Visual Culture: Commercial Modernism in America, 1865–1965**
This survey course explores contributions to and expressions of visual modernism within the commercial tradition in the United States. Lectures, readings and screenings engage the intertwined histories of commerce, technology, society and aesthetics. Topics include periodical illustration from Harper’s Weekly to the Ladies Home Journal, the newspaper comic strip and the comic book, animation from vaudeville to television, and science fiction and transportation design. Context provided by the advent of industrial image production; modernist art theory and high cultural disdain for mass markets (with resulting effects on the academy); avant-garde and commercial cross-pollination; the social histories of ethnic depiction (i.e. blackface minstrelsy); consideration of women as consumers and producers of commercial images. Students make use of materials in the collections of the Modern Graphics History Library at Washington University. Three animation screenings are required. Attendance at these screenings is required.
Credit 3 units. EN: H

**X10 XCORE 306 Commercial Modernism in America 1865–1965**
Credit 3 units. EN: H

**X10 XCORE 307 Community Building**
This course looks at the intersection of the built fabric and the social fabric. Using St. Louis as the starting point, this
course takes students out of the classroom and into a variety of neighborhoods — old, new, affluent, poor — to look at the built environment in a variety of contexts and through a variety of lenses. Almost every week for the first half of the semester, students visit a different area (or areas), each trip highlighting some theme or issue related to the built environment (architecture, planning, American history, investment and disinvestment, community character and values, race, transportation, immigrant communities, future visions, etc.). Running parallel to this, students are involved in an ongoing relationship with one particular struggling neighborhood, in which students attend community meetings and get to know and become involved with the people in the community in a variety of ways. Students learn to look below the surface, beyond the single obvious story, for multiple stories, discovering their complexity, contradictions and paradoxes. They also come to consider the complex ways in which architecture and the built environment can affect or be affected by a host of other disciplines.

Credit 3 units. EN: H

X10 XCORE 309 Convergences: Studies in Art & Architecture
This interdisciplinary course examines the convergence of artistic and architectural ideas, techniques, and practices through selected historical and contemporary studies. Emphases range from the figure of the artist/architect (Michelangelo and Leonardo, for example, to Le Corbusier and Libeskind), to critical reflections (Vasari, Gennough, Serra) to boundary-crossing practices (Whiteread, Webster, Irwin, Kin, Judd, Miss) to collaborations and collaborative works (Ando/Kelly/Serra and the Pulitzer Foundation). The course emphasizes empathy and productive work across artistic disciplines. Field trips to the Pulitzer Foundation for the Arts (St. Louis) and the Chinati Foundation (Marfa, Texas) are planned.

Credit 3 units.

X10 XCORE 313A Creative Practice and Natural Systems: An Ecology of Art
In this studio course, students learn to use basic ecological principles as a lens through which to investigate and evaluate productive, meaningful and sustainable creative practices. Ecology is community-focused, involving the study of relationships with a given community. It establishes a model by which students can establish a more complete understanding of the inspirations, expectations and ramifications of creative practice. We visit local gardens, parks, farms and neighborhoods while seeking to understand the complexity of our own role in nature and culture. This diverse range of ecological engagement allows for a broad array of creative applications in the studio arts, design and architecture. The class format challenges students with new ways of thinking while allowing them to select materials, specific topics of study, and methods of engagement appropriate to their own developing interests. The course consists of fieldwork, readings and lectures, the content of which is examined through individual and collaborative projects. At midterm students identify opportunities for focused research and production, and the course culminates with the public presentation of this work. College of Architecture and College of Art sophomores have priority. Fulfills Sam Fox Commons requirement.

Credit 3 units.

X10 XCORE 315 Cycles
Students design and build human-powered vehicles from discarded bicycles. The course collaborates with student mechanics involved with Bicycle Works (Bworks). Bworks collaborates in teams with Washington University students to design and build the work.

Credit 3 units.

X10 XCORE 317 Furniture Design
The seat is an intimate interface between the building and the body. It embodies a complex set of structural conditions, material opportunities and possibilities for expression. Architects, artists and industrial designers covet opportunities to make the chair. The result is that seemingly infinite perfect solutions exist — and still the seat remains a provocative challenge. In this course students design and build a chair. Emergent technologies are combined with traditional techniques of metal fabrication, woodworking and plastic forming in the design and making of the work. The course objective is for students to learn how to work directly with machinery and materials in the realization of their design. It is expected that students will have basic shop skills addressed in course prerequisites. Advanced techniques are introduced in this course and students select those most appropriate to their work to build upon. There is a great deal of independent investigation required to excel in this course. Students propose ideas and then develop them using drawings, models and mock-ups in order to realize the best potential for their design.
Credit 3 units.

**X10 XCORE 319 Digital Fabrications: A Primer Course in the Use of Computer Modeling for Art & Design**

This course focuses on fabrications both real and virtual. The ubiquity of computers in design, studio art, communications, construction and fabrication demand that professionals become comfortable with their use. It is also important in a group of ever-specializing fields that one knows how to translate between different software and output platforms. This comfort and the ability to translate between platforms allow contemporary artists and designers to fabricate with ever-increasing freedom and precision. This course introduces students to 3-D software with a focus on 2-D, 3-D, and physical output. Through a series of projects, students learn to generate work directly from the computer and translate it into different types of output. Starting from first principles, the course covers the basics from interface to output for each platform used. The course also familiarizes students with a range of CNC technology and other digital output for both small- and large-scale fabrication. The course is broken into three projects. In the first, students focus on computer-generated geometry and control systems. In the second, students generate physical output and line drawings. The final project focuses on rendering, context and cinematic effects. The software covered includes, but is not limited to, Rhinoceros 3-D, Maya, Illustrator and Photoshop. Additionally, students use the 3-D printer, laser cutter and/or other digital output tools.

Credit 3 units. EN: H

**X10 XCORE 321 Mapping Soft Bodies**

This course develops digital design skills with conceptual understanding of the transformative process of artistic production. Mapping Soft Bodies investigates artificial objects and industrial products as a basis for inspiration. Through digital modeling and scanning the human body, each student develops a transformation process that analyzes the social and cultural conditions of a new emerging design. New body armatures are modeled through CAD/CAM (laser cutting) and Rapid Prototyping (3-D printing) for physical outputs. The course is for students who are interested in emerging technologies and digital production. This course is for students interested in design, sculpture, architecture and digital media by enhancing 3-D technologies and allows each student to develop abstract thinking and making processes.

Credit 3 units. EN: H

**X10 XCORE 325 Global Discourses in Art & Architecture**

This course examines art, architecture and urbanism from the perspective of global production, dissemination and reception. It focuses on the global exchange of people and ideas as one of the main vehicles of visual culture, both historical and contemporary. Through a series of focused case studies, the course probes inherent dichotomies within art and architecture driven by their site-specificity, yet also by their constant global displacement across various disciplinary, cultural and geographical boundaries. The course content includes lectures, discussion sessions, readings and textual and visual projects that examine cross-cultural aspects of art and architecture.

*Enrollment limit will be set at zero and students will be enrolled from the waitlist. The course is offered as part of the University-wide Global Certificate and is open to all students at Washington University regardless of their major field of study. Sam Fox School sophomores will have priority.

Credit 3 units.

**X10 XCORE 327 Color Systems**

This course is a sustained investigation of color. Students study how color is affected by light, by space, by arrangement, by culture, and by commerce. The course aims to deepen the understanding of color’s complexity and pervasiveness as a fundamental element of shared visual culture. The course develops both technical and conceptual skills to aid in visual translation. In addition to color-specific inquiry, a goal is to expand ideas of research and enable students to integrate various methods of acquiring knowledge into their art and design practice. Throughout the course, students discuss various processes of making/constructing, the connection between color/form/concept, and strategies for idea generation and brainstorming. The course allows for much individual freedom and flexibility within varying project parameters.

Credit 3 units.

**X10 XCORE 330 Cell Phones, Snapshots and the Social Network**

This course is designed around the cell phone camera as a means of art production using blogs, interactive websites, social networking and mass distribution of digital images and videos. Students explore the art-making potential of the cell phone camera as a snapshot camera of the modern age. Students post daily images/videos on blogs and other social media sites. Readings and discussion topics include the culture and aesthetic of the snapshot, the vernacular image, and the role of social networks in image production and distribution. Students are required to design and maintain at least two social networking sites and to supply a cell phone with the ability to upload images to the Internet.

Credit 3 units. EN: H

**X10 XCORE 332 Metabolic City: Spaces of Bodily and Environmental Wellness**

Metabolic City probes bodily and environmental wellness as intertwined cultural, social, and technological constructs. From the British Archigram Group, to the Japanese Metabolists and the Dutch artist Constant, a number of visionary projects in the 1960s re-imagined our notion of the body, city and the environment. By means of individual and collective gadgets,
tools and spaces they bridged the scales of the body and the city, weaving together issues of bodily and environmental performance. Through a combination of texts, discussions and projects, the course engages in a delayed conversation with these projects, proposing the concept of “metabolism” both as a bodily function, but also as an environmental mechanism that operates on a global scale. Some of the key concepts discussed in the class include global citizenry, urban imagination, networks, performance, virus, urban protest and insurgence. The course fulfills the Sam Fox Commons Course requirement and the architectural history/theory elective requirement and is also open to all Washington University students through the Global Certificate. 
Credit 3 units. EN: H

**X10 XCORE 336 Urban Books**

Since the beginning of the 20th century, art, architecture and urbanism together have investigated the production of images that shape the symbolic dimension of our experience of large cities. The main goal of this course is to critically embrace this tradition through the format of the artist’s book. St. Louis is the focus for our observations because it is familiar to our everyday lives and also because it provides key situations for understanding contemporary forms of urbanity and how urban space is produced and imagined. The course bridges the curricular structures of art and architecture by enhancing the collaboration between the practical and scholarly work developed in both schools, with additional support from Special Collections at Olin Library. It combines the reading, lecture, and discussion format of a seminar with the skill building and performance. Through a combination of texts, discussions and responses in the form of artist’s books. The second phase focuses on the Derive with physical activities and assignments based on interacting directly with the urban environment. The third phase focuses on individual memories. 
Credit 3 units.

**X10 XCORE 338 Shifting from Lines to Surfaces/Virtual to Empirical**

Digital Media Design: Introduction to Exploring Digital and CAD/CAM Technology. This is a course in computing theory and techniques on 2-dimensional digital software and advanced 3-dimensional modeling software. Weekly demonstrations on software operations and individual projects are developed. This course bridges the gap between 2-D computational tools that define lines and the 3-D tools that develop complex surfaces. These surfaces explore the possibilities of creating and articulating the non-linear geometries manipulated on the digital environment. The final project consists of 2-dimensional drawings, digital models, and physical models produced by advanced CAD/CAM technology. By employing alternative techniques and emerging technologies of manufacturing, new forms of objects and perceptions will re-define multiple design processes. 
Credit 3 units. EN: H

**X10 XCORE 342 Florence Commons**

This is a required course for all students in the Florence Study Abroad Program. Content for the course fosters the idea of collaboration, approaching how art, architecture, urbanism and design are related in Italian visual and material culture. All faculty work together to establish a shared semester theme and media and conduct collective introductory activities and reviews, as well as combined field trips. The instructor determines a specific approach to these shared goals. This framework allows for both cross-disciplinary work and increased breadth and focus regarding their semester study topics, a format that is unique to the undergraduate Florence Program. Students will be enrolled by the Registrar in a section that best suits their area of study. 
Credit 3 units. EN: H

**X10 XCORE 344 Digital Filmmaking: City Stories**

Digital Filmmaking: City Stories is a cross-University video art course for students interested in making short films through a transdisciplinary and time-based storytelling in both narrative and non-narrative formats. Whether documentary or abstract, individually produced or collaborative, all projects in this course will have a required social and urban engagement component. In this course the City becomes a laboratory for experimentation and contribution. Students meaningfully engage St. Louis, and their projects address sites of concern to explore the complex fabric of the city by way of framing and poetic juxtaposition. City Stories merges several arts and humanities disciplines, including experimental cinema and documentary journalism, and creates an opportunity for empathic listening and inquiry as students discover stories built from collective as well as individual memories. 
Credit 3 units. EN: H

**X10 XCORE 345 Shopping**

This seminar examines shopping as a social and cultural construct that operates at several levels in relation to art, architecture and urban planning. Shopping is the fundamental activity of the capitalist marketplace. It is also inextricably linked with major aspects of public and foreign policy, where national consumerism is closely linked to global tourism, and it is at the core of economic development. Shopping is, as well, a common denominator of popular culture, frequently saturated in contemporary art, film and literature. Participants in the seminar read selections from various writings about shopping and the marketplace. We also view several films examining the shopping environment in narratives of power and desire. Prerequisite is completion of Sam Fox foundations year. Open to sophomores and above. 
Credit 3 units.
Art

F10 ART 101 Drawing
An introductory course that teaches students to recognize and manipulate fundamental elements of composition, line, form, space and modeling. Emphasis is placed on working accurately from observation, with an introduction to other methodologies. Students work in a variety of media. Demonstrations and illustrated lectures supplement studio sessions and outside projects.
Credit 3 units. EN: H

F10 ART 102 Drawing
An introductory course that teaches students to recognize and manipulate fundamental elements of line, tone, texture, volume and plane with relation to representational drawing. Students work in a wide variety of media and techniques (charcoal, pencil, pastels and wet media) from the model, still life and environment. Demonstrations and illustrated lectures supplement studio sessions and outside projects.
Credit 3 units. EN: H

F10 ART 105 2-D Design
An introduction to basic design principles and their application on a 2-dimensional surface. Investigation of the functions and properties of the formal elements and their organization through the use of relational schemes. Includes an introduction to color and basic color theory. Problems stress systematic approach to visual communication.
Credit 3 units. EN: H

F10 ART 106 2-D Design
An introduction to basic design principles and their application on a 2-dimensional surface. Investigation of the functions and properties of the formal elements and their organization through the use of relational schemes. Includes an introduction to color and basic color theory. Problems stress systematic approach to visual communication.
Credit 3 units. EN: H

F10 ART 107 3-D Design
An introduction to basic design principles and their application to 3-dimensional form and real space and time. The design vocabulary is broadened through exercises that deal with mass, volume, weight, gravity and movement. Students learn to use hand and power tools.
Credit 3 units. EN: H

F10 ART 108 3-D Design
An introduction to basic design principles and their application to 3-dimensional form and real space and time. The design vocabulary is broadened through exercises that deal with mass, volume, weight, gravity and movement. Students learn to use hand and power tools.

F20 ART 111 Painting
Introduction to painting processes and materials. While there is emphasis on oil painting, students also are introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model. Technical skills and content are dealt with at the individual student’s level.
Credit 3 units. EN: H

F20 ART 112 Painting
Introduction to painting processes and materials. While there is emphasis on oil painting, students also are introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model. Technical skills and content are dealt with at the individual student’s level.
Credit 3 units. EN: H

F20 ART 113A Sculpture
Explores contemporary sculptural concepts and processes in various media, including latex, plaster, plastics, metal and wood fabrication, with emphasis on development of technical skills at whatever level of advancement is suited to the experience of the student.
Credit 3 units. EN: H

F20 ART 113F Sculpture: Foundry
Same as F20 ART 213F, F20 ART 313F, F20 ART 413F.
Freshmen (only) register for F20 ART 113F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: freshman standing or departmental approval.
Credit 3 units. EN: H

F20 ART 113G Sculpture: Wood
Same as F20 ART 213G, F20 ART 313G, F20 ART 413G.
Freshmen (only) register for F20 ART 113G. The focus of this
course is to introduce students to the basic principles of wood
sculpture with an emphasis on furniture making. College of Art
majors and non-art students pursuing an art minor have priority.
Prerequisite: freshman standing or departmental approval.
Credit 3 units. EN: H

F20 ART 113H Sculpture: Blacksmithing
This course is an introduction to blacksmithing materials, tools
and techniques. Students explore the fundamental techniques
of hand-forged metal. Metal can be manipulated as a plastic
material and offers enormous possibilities for 3-dimensional
form. In this class we explore these possibilities and expand our
sculptural vocabulary.
Credit 3 units. EN: H

F20 ART 113I Sculpture: Metal Fabrication
Metal is the backbone of our modern world and a viable medium
for self-expression. It can be employed as structure or as
surface, it can be deformed plastically to create compound
shapes, or it can be connected to most any other material.
Students explore the creative potential of this material in the
fabrication of sculptural forms. Students learn to weld using both
gas and electric arc machines and learn the safe operation of
drilling, grinding and finishing tools.
Credit 3 units. EN: H

F20 ART 114A Sculpture
Explores contemporary sculptural concepts and processes in
various media, including latex, plaster, plastics, metal and wood
fabrication, with emphasis on development of technical skills at
whatever level of advancement is suited to the experience of the
student. College of Art majors and non-art students pursuing an
art minor have priority.
Credit 3 units. EN: H

F20 ART 114F Sculpture: Foundry
Same as F20 ART 214F, F20 ART 314F, F20 ART 414F.
Freshmen (only) register for F20 ART 114F. The focus of this
course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method.
Students learn mold making, direct organic burnout, ceramic
shell investment, metal chasing and patination in order to create
finished sculpture. In addition to metal casting, students use
other materials such as plaster, resin, steel, wood, rubber,
plastic and foam to create a mixed-media project that explores
a specific idea or theme. Additional work outside the regularly
scheduled class time is required. Prerequisite: freshman
standing or departmental approval.
Credit 3 units. EN: H

F20 ART 114G Sculpture: Wood
Same as F20 ART 214G, F20 ART 314G, F20 ART 414G.
Freshmen (only) register for F20 ART 114G. The focus of this
course is to introduce students to the basic principles of wood
sculpture with an emphasis on furniture making. Prerequisite:
freshman standing or departmental approval.
Credit 3 units. EN: H

F20 ART 114I Sculpture: Metal Fabrication
Metal is the backbone of our modern world and a viable medium
for self-expression. It can be employed as structure or as
surface, it can be deformed plastically to create compound
shapes, or it can be connected to most any other material.
Students explore the creative potential of this material in the
fabrication of sculptural forms. Students learn to weld using both
gas and electric arc machines and learn the safe operation of
drilling, grinding and finishing tools.
Credit 3 units. EN: H

F20 ART 115 Printmaking
Survey of printmaking covering basic processes in intaglio,
lithography, relief and monotype. Emphasis on mixed media and
experimentation with a foundation in traditional, historical and
philosophical aspects of printmaking. Students are encouraged
to work at a level suited to their individual technical skills and
conceptual interests.
Credit 3 units. EN: H

F20 ART 116 Printmaking
Students explore various mixed-media approaches to relief
printmaking in combination with collagraph, photo lithography
and drawing. Relief techniques covered include wood and
linoleum cuts using the black line and white line approaches.
(Students are encouraged to work at a level suited to their
individual technical skills and conceptual interests.)
Credit 3 units. EN: H

F20 ART 1171 Special Topics in Photography: Cell Phones,
Snapshots and Social Network
This course is designed around the cell phone camera as a
means of art production using blogs, interactive web sites, social
networking and mass distribution of digital images and videos.
Students explore the art-making potential of the cell phone
camera as a snapshot camera of the modern age. Students are
expected to post daily images/videos on blogs and other social
media sites. Readings and discussions on topics such as the
culture and aesthetic of the snapshot, the vernacular image, and
the role of social networks in image production occur throughout
the semester. Students are required to design and maintain at
least two social networking sites and must supply their own cell
phone with the ability to upload images to the Internet.
Credit 3 units. EN: H
F20 ART 1181 Photography I
Designed to acquaint students with the fundamentals of camera handling, darkroom and photographic processes and using photography as a means of personal, creative self expression. Course is structured around the use of color transparency and the craft of printing with color negative materials.
Credit 3 units. EN: H

F20 ART 1183 Digital Photography
This introductory-level course explores digital technology for capturing, enhancing and producing still lens-based images. The course addresses basic digital camera operations, the visual language of camera-generated images, computer workflow and the connoisseurship of digital image output. The course assumes no prior knowledge or experience with digital imaging technologies or materials.
Credit 3 units. EN: H

F20 ART 1184 Digital Photo II/Digital Imaging
This course addresses the use of technology and pixel-based software for generating, manipulating and compositing still digital images. The course examines the visual language and poetics of additive lens-based images while providing students with knowledge of software tools, input devices, production techniques, color management strategies and output devices.
Credit 3 units. EN: H

F20 ART 1185 Kinetic Image/Digital Video
This introductory-level course addresses the use of digital technology and software for capturing, editing and producing moving images. The course examines the visual language and poetics of moving images while providing students with foundation knowledge of camera operations, production storyboarding, software tools and presentation strategies. The course assumes no prior knowledge or experience with kinetic imaging technologies or software.
Credit 3 units. EN: H

F20 ART 1186 Black-and-White Photography
Introduction to the fundamentals of black-and-white photography. Emphasis on control of film, paper and black-and-white photographic processes in the classical fine arts tradition. Topics may include portrait, landscape, street photography, the figure and contemporary issues in photography.
Credit 3 units. EN: H

F20 ART 119 Ceramics
An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students are introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual’s level.
Credit 3 units. EN: H

F20 ART 120 Ceramics
An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students are introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual’s level.
Credit 3 units. EN: H

F20 ART 123D Fashion Design 2-D
Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.
Credit 3 units. EN: H

F20 ART 123E Fashion Design 3-D
Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design and appreciation of the processes involved in the design and manufacturing of apparel.
Credit 3 units. EN: H

F20 ART 123G Fashion: Textile Design
Same as F20 ART 223G, F20 ART 323G, F20 ART 423G. Freshmen (only) register for F20 ART 123G. Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: freshman standing or departmental approval.
Credit 3 units. EN: H

F20 ART 124D Fashion Design 2-D
Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.
Credit 3 units. EN: H
F20 ART 124E Fashion Design 3-D
Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design and appreciation of the processes involved in the design and manufacturing of apparel.
Credit 3 units. EN: H

F20 ART 124I Fashion: Textile Design
Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing.
Credit 3 units. EN: H

F20 ART 127A History of Photography
Survey of the history of photography and a look at the medium form the camera obscura to contemporary developments. Social and technological developments examined in terms of their influences on the medium.
Credit 3 units. EN: H

F20 ART 128A History of Photography
Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.
Credit 3 units. EN: H

F20 ART 133 Basic Illustration
An introduction to concepts, media techniques and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented.
Credit 3 units. EN: H

F20 ART 134 Basic Illustration
Same as F20 Art 233, F20 Art 333, F20 Art 433. Freshmen (only) register for F20 Art 133. An introduction to concepts, media techniques and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented.
Credit 3 units. EN: H

F20 ART 135F Interactivity and Web Design
This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.
Credit 3 units. EN: H

F20 ART 135G The Licensed Image: Development and Distribution
An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students.
Credit 3 units. EN: H

F20 ART 135I Communication Design I
An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing.
Credit 3 units. EN: H

F20 ART 135J Introduction to Animating in Three Dimensions
This course addresses the fundamental principles of designing and constructing the 3-dimensional modeled world for film and video. Students progress from an overview of the 3-D animation process to defining and implementing filmic ideas using their own modeled creations. Sketches are imported into modeling software (Maya), which is used to build and animate characters, create environments and produce effects. Three-dimensional animation is created in its own virtual space and is navigated by cameras much like a traditional film studio or sound stage. Therefore, cinematic shot design and camera navigation within the virtual world are examined in depth. An animated 3-D short is produced to convey a simple story in a model environment.
Credit 3 units. EN: H

F20 ART 135L Communication Design and Business
This course provides an introduction to business communications in a visual environment. Subjects addressed include visual organization, introductory typography, basic identity development, message construction and business presentation development.
Credit 3 units. EN: H

F20 ART 1361 Advertising 1
Same as F20 ART 2361, F20 ART 3361, F20 ART 4361 - Freshmen (only) register for F20 ART 1361. This hybrid studio/
lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary. Credit 3 units.

F20 ART 1362 Advertising I
Credit 3 units. EN: H

F20 ART 1363 Advertising in the Digital Age
Same as F20 ART 2363, ART 3363, ART 4363 - Freshmen (only) register for F20 ART 1363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study “game changing” developments in advertising communications; changing dynamics in audience behavior — including the ability to “opt out”; the advertising industry’s adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one. Credit 3 units.

F20 ART 1364 Advertising in the Digital Age
Credit 3 units. EN: H

F20 ART 136F Interactivity and Web Design
This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development. Credit 3 units. EN: H

F20 ART 136G The Licensed Image: Development and Distribution
An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images. Design minors, and students outside the College of Art interested in developing visual products, including business students. Credit 3 units. EN: H

F20 ART 136I Communication Design I
An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing. Credit 3 units. EN: H

F20 ART 136J Introduction to Animating in Three Dimensions
This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 Art 101 Drawing or equivalent or permission of instructor. Credit 3 units. EN: H

F20 ART 1386 The Art of Advertising
This course introduces students to the field by defining the role of advertising in American culture and economy. It begins by exploring the evolving and devolving aspects of American advertising and the forces that both compel and repel consumer audiences. The class explains the processes and criteria that, when properly utilized, elevate advertising and validate it as an art form. The course consists of lectures and visiting instructors, brief essay quizzes and a series of exercises designed to acquaint each student with administrative and creative processes and various disciplines within the advertising field. Major emphasis is upon the creative disciplines. Credit 3 units. EN: H

F20 ART 138J Advanced Animation
Credit 3 units. EN: H

F20 ART 1481 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods
may include relief and letterpress; engraving and intaglio; offset lithography; and digital, “virtual” media. Certain projects may require a second semester of study to complete.

Credit 3 units. EN: H

F20 ART 1482 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress, engraving and intaglio, offset lithography and digital (“virtual”) media. Certain projects may require a second semester of study to complete.

Credit 3 units. EN: H

F20 ART 171 Introduction to Letterpress Printing
This class serves as an introduction to printing with the Vandercook handpress. Through a series of assignments students learn a systematic approach to planning, arranging and printing type on a page. The students receive a basic introduction to typography, history of letterforms and history of the book. The mechanics of relief printing with the cylinder proof press, ink composition and resolution of the typographic image also are explored. As an exploration of the publishing process, students produce a chapbook of a short literary work. The class primarily focuses on typographic composition, but one assignment employs a combination of word and image.

Credit 3 units. EN: H

F20 ART 1713 Introduction to Book Binding
Same as F20 Art 2713, F20 Art 3713, F20 Art 4713. Freshmen (only) register for F20 ART 1713. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings. Freshmen only.

Credit 3 units. EN: H

F20 ART 1714 Introduction to Book Binding
This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings. Freshmen only.

Credit 3 units. EN: H

F20 ART 196 Design, Artisanship and Sustainability as Cultural Catalyst
This course investigates the ways in which artisanship is a stimulus to design thinking and innovation. The prerequisite to the course is a 16-day trip to India over winter break in which students work closely with leading Indian designers of textiles, products and architecture as well as accomplished artisans working with methods both ancient and modern. We discuss how craft informs design and how design acts as a force in entrepreneurship and job creation. A major focus of our research is investigating how craft and design are catalysts for innovation in a sustainable use of materials and water. For more information, contact Belinda Lee at Lee@samfox.wustl.edu. Students should obtain a visa on their own.

Credit 3 units. EN: H

F10 ART 203B Anatomy/Figure Structure
A rigorous drawing course focusing on human anatomy (muscular and skeletal systems), various proportional systems, as well as bio/psycho/social/political conditions having influenced figural representations. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F10 ART 204B Anatomy/Figure Structure
A rigorous drawing course focusing on human anatomy (muscular and skeletal systems), various proportional systems, as well as bio/psycho/social/political conditions having influenced figural representations. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F20 ART 211 Painting
Introduction to painting processes and materials. While there is emphasis on oil painting, students also are introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model.
Technical skills and content are dealt with at the individual student’s level.
Credit 3 units. EN: H

F20 ART 2115 Intensive Intermediate Painting
Same as F20 ART 3115, F20 ART 4115. Sophomores (only) register for course F20 ART 2115. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve at oil painting in its traditional 20th-century use and gain some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments as well as a few reading assignments. This is a very structured course, designed to develop a student’s strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor. Credit 3 units. EN: H

F20 ART 2116 Intensive Intermediate Painting
Same as F20 ART 3116, F20 ART 4116. Sophomores (only) register for course F20 ART 2116. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve at oil painting in its traditional 20th-century use and gain some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments as well as a few reading assignments. This is a very structured course, designed to develop a student’s strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor. Credit 3 units. EN: H

F20 ART 212 Painting
Introduction to painting processes and materials. While there is emphasis on oil painting, students also are introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model. Technical skills and content are dealt with at the individual student’s level.
Credit 3 units. EN: H

F20 ART 2122 Special Topics in Painting
Credit 3 units. EN: H

F20 ART 212B Painting II
Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner’s familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: a beginning painting elective or permission of instructor. Credit 3 units. EN: H

F10 ART 213 Introduction to Sculpture
This course introduces students to the materials, processes and concepts specific to sculpture. Students develop an understanding of, and dexterity with, multiple materials and modes of production ranging from additive, assembled, molded, modeled, to subtractive or carved. This course promotes independent working and problem solving in regard to content and intention. Students engage in discourse about their work through critical analysis and explorations of historical and cultural precedent. This course involves lectures, material and process demonstrations, and assigned readings along with creative and technical explorations. Students in the classes of 2015 and later must complete either F10 ART 213 or ART 214 as an introduction to the sculpture major. The course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F10 ART 213A Sculpture Studio: Material and Culture
Explores contemporary sculptural concepts and processes in various media, including latex, plaster, plastics, metal and wood fabrication, with emphasis on development of technical skills at whatever level of advancement is suited to the experience of the student.
Credit 3 units.
F20 ART 213F Sculpture: Foundry  
Same as F20 ART 113F, F20 ART 313F, F20 ART413F.  
Sophomores (only) register for F20 ART 213F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: sophomore standing or departmental approval.  
Credit 3 units. EN: H

F20 ART 213G Sculpture: Wood  
Same as F20 ART 113G, F20 ART 13G, F20 ART 413G.  
Sophomores (only) register for F20 ART 213G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: sophomore standing or departmental approval.  
Credit 3 units. EN: H

F20 ART 213H Sculpture: Blacksmithing  
This course is an introduction to blacksmithing materials, tools and techniques. Students explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for three-dimensional form. In this class we explore these possibilities and expand our sculptural vocabulary.  
Credit 3 units. EN: H

F20 ART 213I Sculpture: Metal Fabrication  
Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.  
Credit 3 units. EN: H

F10 ART 214 Introduction to Sculpture  
This course introduces students to the materials, processes and concepts specific to sculpture. Students develop an understanding of, and dexterity with, multiple materials and modes of production ranging from additive, assembled, molded, modeled, to subtractive or carved. This course promotes independent working and problem solving in regard to content and intention. Students engage in discourse about their work through critical analysis and explorations of historical and cultural precedent. This course involves lectures, material and process demonstrations, and assigned readings along with creative and technical explorations. Students in the classes of 2015 and later must complete either F10 ART 213 or ART 214 as an introduction to the sculpture major. The course is open to nonmajors and minors as space permits.  
Credit 3 units. EN: H

F20 ART 214A Sculpture  
Explores contemporary sculptural concepts and processes in various media, including latex, plaster, plastics, metal and wood fabrication, with emphasis on development of technical skills at whatever level of advancement is suited to the experience of the student.  
Credit 3 units. EN: H

F20 ART 214F Sculpture: Foundry  
Same as F20 ART 114F, F20 ART 314F, F20 ART 414F.  
Sophomores (only) register for F20 ART 214F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. Prerequisite: sophomore standing or departmental approval.  
Credit 3 units. EN: H

F20 ART 214G Sculpture: Wood  
Same as F20 ART 114G, F20 ART 214G, F20 ART 414G.  
Sophomores (only) register for F20 ART 214G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. Prerequisite: sophomore standing or departmental approval.  
Credit 3 units. EN: H

F20 ART 214I Sculpture: Metal Fabrication  
Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.  
Credit 3 units. EN: H
F20 ART 215 Introduction to Printmaking
Survey of printmaking covering basic processes in intaglio, lithography, relief and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests. Credit 3 units. EN: H

F10 ART 215A Printmaking Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in printmaking and is open to others as space permits. It introduces printmaking as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Relief, intaglio, digital, and planographic processes are introduced alongside theoretical frameworks that help guide students through directed and self-determined projects. The resulting work will generate critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students pursuing the printmaking concentration must complete either F10 ART 215A (fall) or ART 216A (spring). Prerequisites: X10 ART 101 and ART 102, F10 ART 105 or ART 106, F10 ART 107 or ART 108 or permission of instructor. Credit 3 units.

F20 ART 216 Introduction to Printmaking
Students explore various mixed-media approaches to relief printmaking in combination with collagraph, photo lithography and drawing. Relief techniques covered include wood and linoleum cuts using the black line and white line approaches. (Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.) Credit 3 units. EN: H

F10 ART 217 Introduction to Photography
This course introduces photography as a dialogue between material and cultural histories, personal experience, tradition and contemporary practice. Students gain full manual control of the digital camera apparatus, learn how to import and edit raw images, and print according to fine art professional standards. The resulting work fosters critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students must provide a fully manual digital camera capable of capturing RAW images. Students in the classes of 2015 and later must complete either F10 ART 217 or ART 218 as an introduction to the Art major or minor. The course is open to nonmajors and minors as space permits. Credit 3 units. EN: H

F10 ART 217B Photography Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in photography and is open to others as space permits. It introduces photography as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Students gain full manual control of the digital camera apparatus, learn how to import and edit raw images, and print according to fine art professional standards. The resulting work will foster critical evaluations of form, content and intention. In additional to studio production, this course includes lectures, readings and discussions. Student must provide a fully manual digital camera capable of capturing RAW images. Students pursuing the photography concentration must complete either F10 ART 217B (fall) or ART 218B (spring). Prerequisites: X10 ART 101 and ART 102, F10 ART 105 or ART 106, F10 ART 107 or ART 108 or permission of instructor. Credit 3 units.

F20 ART 217I Advanced Photography Seminar
Designed for non-art students fulfilling Art minor requirements. Topics covered include studio lighting and large format photography. Credit 3 units. EN: H

F20 ART 217J Alternative Process Photography
(Formerly Non-Silver Photography). Same as F20 ART 317J, F20 ART 417J. Sophomores (only) register for F20 ART 217J. An exploration into the use of non-silver and alternative photographic processes. The use of such processes as blue and brown printing and gum printing explored, as well as photomechanical processes such as photocopying and color photocopying. Prerequisite: F20 ART 1186 Black-and-White Photography or permission of instructor. Credit 3 units. EN: H

F10 ART 218 Introduction to Photography
This course introduces photography as a dialogue between material and cultural histories, personal experience, tradition and contemporary practice. Students gain full manual control of the digital camera apparatus, learn how to import and edit raw images, and print according to fine art professional standards. The resulting work fosters critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students must provide a fully manual digital camera capable of capturing RAW images. Students in the classes of 2015 and later must complete either F10 ART 217 or ART 218 as an introduction to the Art major or minor. The course is open to nonmajors and minors as space permits. Credit 3 units. EN: H
F20 ART 2182 Photography II
Introduction to the fundamentals of black-and-white photography. Emphasis on control of film, paper and black-and-white photographic process in the classical fine arts tradition. Course adds to the experience of Photography I. Topics may include portrait, landscape, street photography, the figure and contemporary issues in photography. Prerequisite: F10 ART 2181 Photography I or permission of department. College of Art students and Art minors have priority. Credit 3 units. EN: H

F20 ART 218I Advanced Photography Seminar
Designed for non-art students fulfilling Art minor requirements. Topics covered include studio lighting and large format photography. Credit 3 units. EN: H

F20 ART 219 Ceramics
An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students are introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual’s level. Credit 3 units. EN: H

F20 ART 220 Ceramics
An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students are introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual’s level. Credit 3 units. EN: H

F10 ART 221 Introduction to Painting
This studio course introduces painting as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Students employ a variety of oil and water-based media in this concept-driven approach to new and established methodologies. The resulting work will generate critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students pursuing the painting concentration must complete either F10 ART 221A (fall) or ART 222A (spring). Prerequisites: X10 ART 101 and ART 102, F10 ART 105 or ART 106, F10 ART 107 or ART 108 or permission of instructor. Credit 3 units.

F20 ART 222 Introduction to Painting
This studio course introduces painting as a dialogue between material and cultural histories, personal experience, tradition and contemporary practice. Students employ a variety of oil and water-based media in this concept-driven approach to new and established methodologies. The resulting work will generate critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students in the classes of 2015 and later must complete either F10 ART 221 or ART 222 as an introduction to the painting major. The course is open to nonmajors and minors as space permits. Credit 3 units. EN: H

F20 ART 223D Fashion Design 2-D
Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included. Credit 3 units. EN: H

F20 ART 223E Fashion Design 3-D
Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel. Credit 3 units. EN: H

F10 ART 221A Painting Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in painting and is open to others as space permits. It introduces painting as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Students employ a variety of oil and water-based media in this concept-driven approach to new and established methodologies. The resulting work will generate critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students pursuing the painting concentration must complete either F10 ART 221A (fall) or ART 222A (spring). Prerequisites: X10 ART 101 and ART 102, F10 ART 105 or ART 106, F10 ART 107 or ART 108 or permission of instructor. Credit 3 units.
pursuing an art minor have priority. Prerequisite: sophomore standing or departmental approval.
Credit 3 units. EN: H

F20 ART 224D Fashion Design 2-D
Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.
Credit 3 units. EN: H

F20 ART 224E Fashion Design 3-D
Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel.
Credit 3 units. EN: H

F20 ART 224I Fashion: Textile Design
Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing.
Credit 3 units. EN: H

F10 ART 225 Artist and Self
A course that investigates the self-portrait from both the studio/visual aspect as well as the psychodynamic. Through assignments, readings and in-class discussions, students examine the motivations and implications of the portrait from internal as well as external descriptions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.
Credit 3 units. EN: H

F10 ART 226 Artist and Self
A course that investigates the self-portrait from both the studio/visual aspect as well as the psychodynamic. Through assignments, readings and in-class discussions, students examine the motivations and implications of the portrait from internal as well as external descriptions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.
Credit 3 units. EN: H

F20 ART 227A History of Photography
Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.
Credit 3 units. EN: H

F20 ART 228A History of Photography
Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.
Credit 3 units. EN: H

F10 ART 231 Introduction to Fashion Design
A structured discourse on fashion designers of the 20th and 21st centuries for study of the body as site and inspiration for apparel design. Class discussions and projects engage concept, materials and process. Through exploration of shapes, forms and their role in the development of 3-dimensional ideas, the student learns the fundamentals of fashion design. Students in the classes of 2015 and later must complete either F10 ART 231 or ART 232 as an introduction to the fashion design major. This course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F10 ART 232 Introduction to Fashion Design: Materials, Volume and the Body
A structured discourse on fashion designers of the 20th and 21st centuries for study of the body as site and inspiration for apparel design. Class discussions and projects engage concept, materials and process. Through exploration of shapes, forms and their role in the development of three-dimensional ideas, the student learns the fundamentals of fashion design. Students in the classes of 2015 and later must complete either F10 ART 231 or ART 232 as an introduction to the fashion design major. This course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F20 ART 233 Basic Illustration
An introduction to concepts, media techniques and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented.
Credit 3 units. EN: H

F10,F20 ART 234 Basic Illustration
Credit 3 units. EN: H
F10,F20 ART 234 Basic Illustration
Same as F20 ART 134, F20 ART 334, F20 ART 436.
Sophomores (only) register for F20 ART 234. An introduction to concepts, media techniques and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented.
Credit 3 units.

F20 ART 235A Interaction Design: Applications for Public Health
Through a blend of presentations from practitioners, classroom lectures, readings, discussion and hands-on exercises, this class engages principles and methods of interaction design within the context of health challenges. Broadly defined, interaction design is the practice of designing products, environments, systems, and services with a focus on behavior and user experience. We take on an in-depth challenge in an area such as transportation or community health resources and work in cross-disciplinary design teams with an external partner organization. Students gain experience in planning and executing a human-centered design process featuring research, ideation, synthesis, concept development, prototypes and a final presentation, which may include visual design, animation, and sound. Students work in teams to develop several intermediate project deliverables, such as prototypes and sketches. No prior course work is necessary, though experience with Adobe Photoshop, Illustrator and InDesign are helpful. No prerequisites. Open to sophomores through graduate-level students across the university.
Credit 3 units.

F20 ART 235F Interactivity and Web Design
This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.
Credit 3 units.

F20 ART 235G The Licensed Image: Development and Distribution
An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors and students outside the College of Art interested in developing visual products, including business students.
Credit 3 units.

F20 ART 235J Introduction to Animating in Three Dimensions
This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise.
Prerequisite: F10 ART 101 Drawing or equivalent or permission of instructor.
Credit 3 units.

F20 ART 235L Communication Design and Business
This course provides an introduction to business communications in a visual environment. Subjects addressed include visual organization, introductory typography, basic identity development, message construction and business presentation development.
Credit 3 units.

F10 ART 236 Textile Design
Credit 3 units.

F20 ART 2361 Advertising 1
Same as F20 ART 1361, F20 ART 3361, F20 ART 4361. Sophomores (only) register for F20 ART 2361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary.
Credit 3 units.
F20 ART 2362 Advertising I  
Credit 3 units. EN: H

F20 ART 2363 Advertising in the Digital Age  
Same as F20 ART 1363, ART 3363, ART 4363 - Sophomores (only) register for F20 ART 2363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study “game changing” developments in advertising communications; changing dynamics in audience behavior — including the ability to “opt out”; the advertising industry’s adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one. Credit 3 units.

F20 ART 2364 Advertising in the Digital Age  
Credit 3 units. EN: H

F20 ART 236F Interactivity and Web Design  
This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development. Credit 3 units. EN: H

F20 ART 236G The Licensed Image: Development and Distribution  
An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors and students outside the College of Art interested in developing visual products, including business students. Credit 3 units. EN: H

F20 ART 236I Communication Design I  
An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing. Credit 3 units. EN: H

F20 ART 236J Introduction to Animating in Three Dimensions  
This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 ART 101 Drawing or equivalent or permission of instructor. Credit 3 units. EN: H

F10 ART 236M Special Topics in Communication Design  
Credit 3 units. EN: H

F20 ART 2384 Special Topics in Visual Communications: Presenting a Visual Business Case  
Learn firsthand what it takes to sell a new idea to business decision makers. Work with executives and entrepreneurs to build a compelling business case. Help create visual presentations designed to take the target audience through a step-by-step value proposition. Learn how to make things happen in business by working with executives at Charter Communications; Rivervest, an $89 million biotech venture fund; and others. Course taught by Dave Gray, founder and CEO of XPLANE Corp. Credit 3 units. EN: H

F20 ART 2385 The Art of Advertising  
The Art of Advertising elective introduces students to the field by defining the role of advertising in American culture and economy. It begins by exploring the evolving and devolving aspects of American advertising and the forces that both compel and repel consumer audiences. The class explains the processes and criteria that, when properly utilized, elevate advertising and validate it as an art form. The course consists of lectures and visiting instructors, brief essay quizzes and a series of exercises designed to acquaint each student with administrative and creative processes and various disciplines within the advertising field. Major emphasis is placed upon the creative disciplines. Credit 3 units. EN: H

F20 ART 2386 The Art of Advertising  
Same as F20 ART 1386, F20 ART 3386, F20 ART 4386. Sophomores (only) register for F20 ART 2386. This course introduces students to the field by defining the role of advertising in American culture and economy. It begins by exploring the evolving and devolving aspects of American advertising and the
forces that both compel and repel consumer audiences. The class explains the processes and criteria that, when properly utilized, elevate advertising and validate it as an art form. The course consists of lectures and visiting instructors, brief essay quizzes and a series of exercises designed to acquaint each student with administrative and creative processes and various disciplines within the advertising field. Major emphasis is placed upon the creative disciplines. Credit 3 units. EN: H

F10 ART 238B Word and Image I
This course centers on the creation of word-image relationships. It focuses on intensive visual methodology and clear communication. Students make illustrations, explore typography and bring visual elements together into a unified whole. Projects take the form of posters, image sets, books, icons, maps, labels, infographics, etc. As the course progresses, the student works to narrow his or her focus within the field of visual communications by selecting particular projects from a suite of offerings. Required for the communication design major. Prerequisite: Digital Studio (F10 ART 241 or ART 242) or Digital Design (F10 ART 243 or ART 244). The course is open to nonmajors and minors as space permits. Credit 3 units. EN: H

F10 ART 238C Typography I
This course introduces the language and standards of typography. Through a series of exercises and projects, students explore type as a vehicle for conveying information and as an expressive and interpretive tool. Required for the communication design major. Prerequisite: Digital Studio (F10 ART 241 or ART 242) or Digital Design (F10 ART 243 or ART 244). The course is open to nonmajors and minors as space permits. Credit 3 units. EN: H

F20 ART 238J Advanced Animation
Credit 3 units. EN: H

F10 ART 241 Digital Studio
This course introduces students to basic digital tools to aid in conceptual and technical development of artwork. Students become familiar with pixel, vector, and moving-image software within a context of visual thinking and artmaking. Students in the classes of 2015 and later must complete either Digital Studio (F10 ART 241 or ART 242) or Digital Design (F10 ART 243 or ART 244). This course is strongly recommended for painting, printmaking and sculpture majors. Credit 3 units. EN: H

F10 ART 243 Digital Design
Students are introduced to digital tools in the context of applied design thinking for graphic design, surface design and image-making. Students pursue projects using Adobe Photoshop, Adobe Illustrator and Adobe InDesign. This course engages software learning in the service of design thinking. Students in the classes of 2015 and later must complete either Digital Studio (F10 ART 241 or ART 242) or Digital Design (F10 ART 243 or ART 244). This course is strongly recommended for communication design, fashion design and photography majors. Credit 3 units. EN: H

F10 ART 244 Digital Design
Students are introduced to digital tools in the context of applied design thinking for graphic design, surface design and image-making. Students pursue projects using Adobe Photoshop, Adobe Illustrator and Adobe InDesign. This course engages software learning in the service of design thinking. Students in the classes of 2015 and later must complete either Digital Studio (F10 ART 241 or ART 242) or Digital Design (F10 ART 243 or ART 244). This course is strongly recommended for communication design, fashion design and photography majors. Credit 3 units. EN: H

F20 ART 2481 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, “virtual” media. Certain projects may require a second semester of study to complete. Credit 3 units. EN: H

F20 ART 2482 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods
may include relief and letterpress; engraving and intaglio; offset lithography; and digital, "virtual" media. Certain projects may require a second semester of study to complete. Credit 3 units. EN: H

**F20 ART 250 Independent Study**
Designed for sophomores fulfilling art minor requirements. Prerequisites: Permission of instructor and submission of a written proposal to the associate dean of students (Room 1, Bixby Hall). Credit variable, maximum 3 units. EN: H

**F10 ART 261 Issues in Pictorial Space**
A drawing course that examines spatial systems, traditions and contemporary usages; students develop artwork using traditional and experimental techniques. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 ART 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor. Credit 3 units. EN: H

**F10 ART 262 Issues in Pictorial Space**
A drawing course that examines spatial systems, traditions and contemporary usages; students develop artwork using traditional and experimental techniques. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor. Credit 3 units. EN: H

**F20 ART 2643 Italian Level II**
This course is a continuation of the conversational Italian course required for study abroad students. Taught entirely in Italian, this class concentrates on conversational Italian. There is an emphasis on class participation accompanied by readings and writing. The student develops facility speaking the language on an everyday basis. Credit 5 units. EN: H

**F20 ART 2644 Italian Level II**
This course is a continuation of the conversational Italian course required for the Study Abroad students. Taught entirely in Italian, this class concentrates on conversational Italian. There is an emphasis on class participation accompanied by readings and writing. The student develops facility speaking the language on an everyday basis. Prerequisite: College of Art sophomores in the Study Abroad Program in Florence, Italy. Credit 5 units. EN: H

**F20 ART 2646 Italian Language**
This course covers Italian grammar and conversation for study abroad students in Florence. Taught entirely in Italian. There is an emphasis on class participation accompanied by readings and writings. The student develops facility speaking the language on an everyday basis. Credit 5 units.

**F10 ART 265 Conceptual Methods in Drawing**
Communication of conceptual content through the invention of systems of signification related to language structure. Equates drawing with the primary formation of concepts — anthropological models, serial structures, symbolic languages, spatial systems. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor. Credit 3 units. EN: H

**F10 ART 266 Conceptual Methods in Drawing**
Communication of conceptual content through the invention of systems of signification related to language structure. Equates drawing with speech in the primary formation of concepts — anthropological models, serial structures, symbolic languages, spatial systems. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor. Credit 3 units. EN: H

**F20 ART 2661 Semester Abroad Program Seminar**
This course prepares students participating in the Sam Fox School’s Semester Abroad Programs. The seminar meets eight times over the course of the semester. Attendance is mandatory for students going abroad. Prerequisite: College of Art and College of Architecture students selected for the Sam Fox School Abroad Programs. Credit 1 unit. EN: H

**F20 ART 2662 Semester Abroad Program Seminar**
This course prepares students participating in the College of Art’s Semester Abroad Program in Florence, Italy. The seminar meets eight times over the course of the semester. Attendance is required. Prerequisite: students selected for the Semester Abroad Program only. Credit 1 unit. EN: H

**F10 ART 267 Dimension Studies**
An investigation of surface and volume. Production of objects carried out in relation to the motivating idea of dimensional forms as evolved choices. Exploration of tension and movement between two and three dimensions. Prerequisites: F10 ART 101 or X10 CORE 101, F10 ART 102 or X10 CORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.
F10 ART 267A Pattern, Repetition and Accumulation
The exploration of excessiveness with materials, images and/or gestures. Students investigate the relationships between such issues as part/whole, order/chaos, seen/secrets, permanence/ephemerality, formalism/meaning. Studio and site-specific work is open to 2-, 3-, and 4-dimensional solutions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor. Credit 3 units. EN: H

F10 ART 268 Dimension Studies
An investigation of surface and volume. Production of objects carried out in relation to the motivating idea of dimensional forms as evolved choices. Exploration of tension and movement between two and three dimensions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108, or permission of instructor. Credit 3 units. EN: H

F10 ART 268A Pattern, Repetition and Accumulation
The exploration of excessiveness with materials, images and/or gestures. Students investigate the relationships between such issues as part/whole, order/chaos, seen/secrets, permanence/ephemerality, formalism/meaning. Studio and site-specific work is open to 2-, 3-, and 4-dimensional solutions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. Credit 3 units. EN: H

F20 ART 271 Narrative, Sequence and Seriality
The investigation of narrative structure and strategy, both implied and explicit. The definition of narrative extends to purely formal issues of sequence and arrangement. Relationships between visual and verbal structures, attention to the architecture of stories. Consideration of historical and contemporary visual narratives; exploration of personal and public forms. Studio production; open to 2- and 3-dimensional solutions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 108 or permission of instructor. Credit 3 units. EN: H

F20 ART 2714 Introduction to Book Binding
Same as F20 ART 1714, F20 ART 3714, F20 ART 4714. Sophomores (only) register for F20 ART 2714. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings. Credit 3 units. EN: H

F20 ART 2713 Introduction to Book Binding
Same as F20 ART 1713, F20 ART 3713, F20 ART 4713. Sophomores (only) register for F20 ART 2713. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings. Credit 3 units. EN: H

F20 ART 273 Time Arts
This course explores media not found in the traditions of painting and sculpture. Rather, it uncovers the mysteries behind the 20th-century phenomenon of Performance Art. “Performance” explores the interrelationship between numerous aesthetic approaches, a few of which are: time observation, duration works, four-dimensional works, body art and monologue. Students become facilitators of events. Four-dimensional structures of sequence, narrative and compilation become the constructs for investigation. Under this heading, hands-on experience with film making, video production, sound recording and performance art are explored. Students work independently, choosing from a menu of options. Students gain conceptual strategies, historical perspective and technical skills relating to each media and their interplay. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10
ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.
Credit 3 units. EN: H

F10 ART 273A Durational Systems
Investigation of duration as a mode of artistic production. Explores time-based objects and events. Open to digital, 3-D and 4-D solutions. Students harness the power of new media to interpret concepts such as time, distance, collaboration and interactivity through traditional, digital and web-based platforms. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 274 Time Arts
This course explores media not found in the traditions of painting and sculpture. Rather, it uncovers the mysteries behind the 20th-century phenomenon of Performance Art. “Performance” explores the interrelationship between numerous aesthetic approaches, a few of which are: time observation, duration works, four-dimensional works, body art and monologue. Students become facilitators of events. Four-dimensional structures of sequence, narrative and compilation become the constructs for investigation. Under this heading, hands-on experience with film making, video production, sound recording, and performance art are explored. Students work independently choosing from a menu of options. Students gain conceptual strategies, historical perspective and technical skills relating to each media and their interplay. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 274A Durational Systems
Investigation of duration as a mode of artistic production. Explores time-based objects and events. Open to digital, 3-D and 4-D solutions. Students harness the power of new media to interpret concepts such as time, distance, collaboration and interactivity through traditional, digital and web-based platforms. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108 or permission of instructor.
Credit 3 units. EN: H

F10 ART 275 Critical Frameworks in the Visual Arts
A lecture course addressing basic issues in modern and postmodern criticism presented in historical context. Lectures alternating with discussion. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 XCORE 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 276 Critical Frameworks in the Visual Arts
A lecture course addressing basic issues in modern and postmodern criticism presented in historical context. Lectures alternating with discussion. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 XCORE 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. BU: ETH EN: H

F10 ART 277 Special Topics in Core
Studies in special subjects. Topics vary from semester to semester. Consult Course Listings. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 2782 Special Topics in Core
Studies in special subjects. Topics vary from semester to semester. Consult Course Listings. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 2783 Special Topics in Core — Florence, Italy
Studies in special subjects. Topics vary from semester to semester. Consult Course Listings. Prerequisite: College of Art sophomores in the Study Abroad Program in Florence, Italy. Credit 3 units. EN: H

F10 ART 2784 Special Topics in Core — Florence, Italy
Study abroad in Florence, Italy. Studies in special subjects. Topics vary from semester to semester. Consult Course Listings. Prerequisite: College of Art sophomores in the Study Abroad Program in Florence, Italy. Credit 3 units. EN: H

F10 ART 2787 Visiting Faculty Workshops — Florence, Italy
Students participate in month-long workshops with visiting faculty from the College of Art. This course provides students with the opportunity to examine different artistic disciplines. The course can be modified to accommodate the student’s experience abroad. Prerequisite: College of Art sophomores in the Study Abroad Program in Florence, Italy. Credit 3 units. EN: H
F10 ART 2788 Visiting Faculty Workshops — Florence, Italy
Students participate in three month-long workshops with visiting faculty from the College of Art. This course provides students with the opportunity to examine different artistic disciplines. The course can be modified to accommodate the student’s experience abroad. Prerequisite: College of Art sophomores in the Study Abroad Program in Florence, Italy. Credit 3 units. EN: H

F10 ART 279 Recognition, Construction and the Found
In this course students juxtapose, combine and edit found objects, imagery and text to create 2- and 3-dimensional artwork. Historical precedents such as assemblage, collage and installation are examined. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. Credit 3 units. EN: H

F10 ART 280 Recognition, Construction and the Found
In this course students juxtapose, combine and edit found objects, imagery and text to create 2- and 3-dimensional artwork. Historical precedents such as assemblage, collage and installation are examined. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. Credit 3 units. EN: H

F10 ART 282A Special Topics
Credit 3 units. EN: H

F10 ART 283 Typography and Letterform: The Design of Language
As an investigation of the formal qualities of familiar objects, letters, this is an introductory-level course in design thinking using families of letterforms as our focus. Students explore design strategies required to make individual forms into a family of types through exercises in tracing, drawing, letterpress printing and collage. Particular emphasis is devoted to the concept of modularity, including an assignment to design and print a modular typeface. Students in the class of 2015 and later must complete either F10 ART 295, ART 296, ART 283 or ART 284 or other F10 200-level introductory studio as an introduction to the communication design major. Prerequisites: X10 XCORE 101, X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. This course is open to nonmajors and minors as space permits. Credit 3 units. EN: H

F10 ART 284 Typographic and Letterform: The Design of Language
As an investigation of the formal qualities of familiar objects, letters, this is an introductory-level course in design thinking using families of letterforms as our focus. Students explore design strategies required to make individual forms into a family of types through exercises in tracing, drawing, letterpress printing and collage. Particular emphasis is devoted to the concept of modularity, including an assignment to design and print a modular typeface. Students in the class of 2015 and later must complete either F10 ART 295, ART 296, ART 283 or ART 284 or other F10 200-level introductory studio as an introduction to the communication design major. Prerequisites: X10 XCORE 101, X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. This course is open to nonmajors and minors as space permits. Credit 3 units. EN: H

F10 ART 285 Color Systems
A sustained experience in color which includes the study of optical, theoretical and cultural issues. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. Credit 3 units. EN: H

F20 ART 286 Special Topics
A sustained experience in color which includes the study of optical, theoretical and cultural issues. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. Credit 3 units. EN: H

F10 ART 287 Material Systems
Investigates object making via materials and various processes to explore visual and physical metaphor. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. Credit 3 units. EN: H

F10 ART 288 Material Systems
Investigates object making via materials and various processes to explore visual and physical metaphor. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. Credit 3 units. EN: H
F10 ART 291 Core New Topic
Studies in special subjects. Topics vary from semester to semester. Consult Course Listings. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 292 Core New Topic
Studies in special subjects. Topics vary from semester to semester. Consult Course Listings. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 294 Core New Topic
Studies in special subjects. Topics vary from semester to semester. Consult Course Listings. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 295 Pictures for Communication
Students investigate the realm of functional pictures through pictograms, comic strips, diagrammatic maps, visual metaphors and narratives. Each project focuses on a particular aspect of conceptual and formal clarity. Significant attention is paid to aesthetics. Students use a variety of media and are introduced to Adobe Illustrator. Students in the class of 2015 and later must complete either F10 ART 295, ART 296, ART 283 or ART 284 or other F10 200-level introductory studio as an introduction to the communication design major. Prerequisites: X10 XCORE 101, X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. This course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F10 ART 296 Pictures for Communication
Students investigate the realm of functional pictures through pictograms, comic strips, diagrammatic maps, visual metaphors and narratives. Each project focuses on a particular aspect of conceptual and formal clarity. Significant attention is paid to aesthetics. Students use a variety of media and are introduced to Adobe Illustrator. Students in the class of 2015 and later must complete either F10 ART 295, ART 296, ART 283 or ART 284 or other F10 200-level introductory studio as an introduction to the communication design major. Prerequisites: X10 XCORE 101, X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. This course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F10 ART 297 Studio Methods
There are many methods for making decisions in the practice of making art. This course investigates different strategies and structural devices for examining and enhancing your making process and the visual impact of the product. The product is open ended. The process is particular and specific. The challenge is to maximize the conditions for effective and efficient decision making. The course is organized around individual works as analyzed and evaluated through such systems as Bloom’s taxonomies, inductive and deductive reasoning, analogous thinking systems, hypothesis and visual evidentiary argument, and emergence theory. Substantial reading and writing are included as complimentary to the making process. Studies in special subjects. Topics vary from semester to semester. Consult Course Listings. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108, or permission of instructor. This course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F10 ART 301A Drawing: Art Practice
Prerequisites: Drawing I (X10 CORE 101), Drawing II (X10 CORE 102), and junior standing. Open to BFA students who have taken the prerequisites, and others, including minors, with consent of instructor.
Credit 3 units. EN: H

F10 ART 302A Drawing: Art Practice
Credit 3 units. EN: H

F20 ART 309 Special Topics: Photography for Architecture Students
The scope of this course is to offer both a technical and theoretical understanding of architectural photography. The course also emphasizes 4x5-view camera skill, use of DSLR and digital input, studio lighting as related to model reproduction, discussion of work, and development of individual projects. Students must provide a digital camera.
Credit 3 units. EN: H

F20 ART 310 Special Topics: Photography for Architecture Students
The scope of this course is to offer both a technical and theoretical understanding of architectural photography. The course also emphasizes 4x5-view camera skill, use of DSLR and digital input, studio lighting as related to model reproduction, discussion of work, and development of individual projects. Students must provide a digital camera.
Credit 3 units. EN: H
F20 ART 311 Painting
Advanced study in painting with individualized criticism, lectures and seminars, leading toward the development of personal idioms.
Credit 3 units. EN: H

F20 ART 3115 Intensive Intermediate Painting
Same as F20 ART 2115, F20 ART 4115. Juniors (only) register for course F20 ART 3115. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve at oil painting in its traditional 20th-century use and gain some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments as well as a few reading assignments. This is a very structured course, designed to develop a student’s strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor.
Credit 3 units.

F20 ART 3116 Intensive Intermediate Painting
Same as F20 ART 2116, F20 ART 4116. Juniors (only) register for course F20 ART 3116. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve at oil painting in its traditional 20th-century use and gain some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments as well as a few reading assignments. This is a very structured course, designed to develop a student’s strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor.
Credit 3 units.

F10 ART 311A Painting: Art Practice
Prerequisite: Introduction to Painting (ART 221 or ART 222).
Credit 3 units. EN: H

F20 ART 311B Painting II
Same as F20 ART 411B. Juniors (only) register for F20 ART 311B. Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner’s familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course.
Credit 3 units.

F10 ART 311D Painting: Art Practice
Prerequisite: Introduction to Painting (F10 ART 221 or ART 222). Open to BFA students who have taken the prerequisite and others, including minors, with consent of instructor.
Credit 3 units.

College of Art majors and non-art students pursuing an art minor have priority. Prerequisites: junior standing and a beginning painting elective or permission of instructor.
Credit 3 units. EN: H

F10 ART 312A Painting: Art Practice
Prerequisite: Introduction to Painting (F10 ART 221 or ART 222). Open to BFA students who have taken the prerequisite and others, including minors, with consent of instructor.
Credit 3 units.

F10 ART 312B Painting II
Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner’s familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course.
Credit 3 units.

F10 ART 312D Painting: Art Practice
Credit 3 units. EN: H

F10 ART 312E Painting: Art Practice
Credit 3 units. EN: H
F20 ART 313A Sculpture
Exploration of advanced concepts and techniques. Involvement with larger scale, environmental relationships and architectural considerations. Processes and materials include construction in a large variety of materials, firing, plaster mold making, direct plaster work, wood and stone carving, foundry, plastics laminations, soft sculpture, welding, soldering, brazing, metalwork.
Credit 3 units. EN: H

F10 ART 313D Sculpture: Art Practice
Contemporary practice in sculpture exists in plural modes at the intersection of diverse cultural traditions, material and process applications, and ideological positions. In this studio, students explore sculpture through sustained investigations in concept, material, media and process. Juniors and seniors participate in demonstrations, workshops and level-specific seminars that focus on individual topical research. Juniors expand their studio activity to include public art projects as part of a long-running program in University City. Seniors build a portfolio of work and prepare to enter the professional field. Critique structures are geared toward intellectual development, oral presentation and writing skills as they relate to studio practice. Required for sculpture majors. Prerequisite: F10 ART 213 or ART 214.
Credit 3 units. EN: H

F20 ART 313F Sculpture: Foundry
Same as F20 ART 113F, F20 ART 213F, F20 ART 413F. Juniors (only) register for F20 ART 313F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: junior standing or departmental approval.
Credit 3 units. EN: H

F20 ART 313G Sculpture: Wood
Same as F20 ART 113G, F20 ART 213G, F20 ART 413G. Juniors (only) register for F20 ART 313G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: junior standing or departmental approval.
Credit 3 units. EN: H

F20 ART 313H Sculpture: Blacksmithing
This course is an introduction to Blacksmithing materials, tools and techniques. Students explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for 3-dimensional form. In this class we explore these possibilities and expand our sculptural vocabulary.
Credit 3 units. EN: H

F20 ART 313I Sculpture: Metal Fabrication
Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.
Credit 3 units. EN: H

F20 ART 314A Sculpture
Exploration of advanced concepts and techniques. Involvement with larger scale, environmental relationships and architectural considerations. Processes and materials include construction in a large variety of materials, firing, plaster mold making, direct plaster work, wood and stone carving, foundry, plastics laminations, soft sculpture, welding, soldering, brazing, metalwork.

F10 ART 314D Sculpture: Theory and Practice
Contemporary practice in sculpture exists in plural modes at the intersection of diverse cultural traditions, material and process applications, and ideological positions. In this studio, students explore sculpture through sustained investigations in concept, material, media and process. Juniors and seniors participate in demonstrations, workshops and level-specific seminars that focus on individual topical research. Juniors expand their studio activity to include public art projects as part of a long-running program in University City. Seniors build a portfolio of work and prepare to enter the professional field. Critique structures are geared toward intellectual development, oral presentation and writing skills as they relate to studio practice. Required for sculpture majors. Prerequisite: F10 ART 213 or ART 214; F10 ART 313D.
Credit 3 units. EN: H

F20 ART 314F Sculpture: Foundry
Same as F20 ART 114F, F20 ART 214F, F20 ART 414F. Juniors (only) register for F20 ART 114F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell
investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. Prerequisite: junior standing or departmental approval. Credit 3 units.

F10 ART 315B Printmaking: Art Practice
Students explore the spectrum of print media and culture, find points of intersection with other media and disciplines, and develop and individual, sustained investigation as an artist. Advanced techniques and concepts are imparted through participatory workshops, focusing on sets of skills such as silkscreen, etching and monotype around strategies in the field of printmaking and contemporary art. Juniors and seniors participate in level-specific seminars that are focused on topical research and critique structures, and are geared toward intellectual development, oral presentation and writing skills as they relate to studio practice. Required for printmaking majors. Prerequisite: F10 ART 215 or ART 216. Credit 3 units. EN: H

F20 ART 316 Printmaking
Students explore various mixed-media approaches to relief printmaking in combination with collagraph, photo lithography and drawing. Relief techniques covered include wood and linoleum cuts using the black line and white line approaches. (Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.) Credit 3 units. EN: H

F20 ART 3162 Special Topics in Printmaking
Same as F20 ART 1162, F20 ART 2162, F20 ART 4162. Juniors (only) register for F20 ART 3162. Credit 3 units. EN: H

F10 ART 316A Printmaking/Drawing
A comprehensive investigation of both traditional and experimental drawing and printmaking techniques. Students have facilities available in papermaking and printmaking with capabilities for computer and photographic techniques. Credit 8 units. EN: H

F10 ART 316B Printmaking: Art Practice
Students explore the spectrum of print media and culture, find points of intersection with other media and disciplines, and develop and individual, sustained investigation as an artist. Advanced techniques and concepts are imparted through participatory workshops, focusing on sets of skills such as silkscreen, etching and monotype around strategies in the field of printmaking and contemporary art. Juniors and seniors participate in level-specific seminars that are focused on topical research and critique structures, and are geared toward intellectual development, oral presentation and writing skills as they relate to studio practice. Required for printmaking majors. Prerequisites: F10 ART 215 or ART 216; F10 ART 315B.
Credit 3 units. EN: H

F10 ART 316F Printmaking: Art Practice
Credit 3 units. EN: H

F10 ART 317 Photography
Refining methods, materials and techniques of photography, as well as developing working knowledge of chemistry, film and paper. Assignments challenge students’ insights into their own portfolios of photographs as well as those of other photographers.
Credit 8 units. EN: H

F20 ART 3173 Photography III
This class is designed for the student who is seeking to explore advanced issues in photography using a broad range of photographic practices and media. In addition to further mastering of technique and craft, students, through readings and class discussion, place their work within a context of contemporary issues in photographic image making, theory and criticism.
Credit 3 units. EN: H

F10 ART 317A Digital Imaging and Photography
Refining methods, materials and techniques of photography, as well as developing a working knowledge of chemistry, film and paper. Assignments challenge the students’ insight into their own portfolio of photographs as well as those of other photographers.
Credit 8 units. EN: H

F20 ART 317B Photography II (Black-and-White)
Course adds to the experience of Photography I (Black-and-White). Students investigate phenomena relative to the camera and photography. Students develop the vision necessary to take intelligent and articulate photographs, as well as establish the notion of high craft in terms of the negative and the print. Topics may include portrait, landscape, street photography, the figure and the photo story.
Credit 3 units. EN: H

F20 ART 317E Color Photography II
The use of color negative materials and the development of a technical and aesthetic vocabulary with color materials. Use of color analyzers, masking systems, and alternatives within negative color systems.
Credit 3 units. EN: H

F10 ART 317H Photography: Art Practice
Prerequisite: Introduction to Photography (F10 ART 217 or ART 218). Open to BFA students who have taken the prerequisite and others, including minors, with consent of instructor.

Credit 3 units.

F20 ART 317I Advanced Photography Seminar
Designed for non-art students fulfilling Art minor requirements. Topics covered include studio lighting and large-format photography.
Credit 3 units. EN: H

F20 ART 317J Alternative Process Photography
(Formerly Non-Silver Photography). Same as F20 ART 217J, F20 ART 317J. Juniors (only) register for F20 ART 317J. An exploration into the use of nonsilver and alternative photographic processes. The use of such processes as blue and brown printing and gum printing is explored, as well as photomechanical processes such as photocopying and color photocopying. Prerequisite: F10 ART 1186 Black-and-White Photography or permission of instructor.
Credit 3 units. EN: H

F10 ART 318 Photography
Refining methods, materials and techniques of photography, as well as developing working knowledge of chemistry, film and paper. Assignments challenge students’ insights into their own portfolios of photographs as well as those of other photographers.
Credit 8 units. EN: H

F20 ART 3183 Photography III
This class is designed for the student who is seeking to explore advanced issues in photography using a broad range of photographic practices and media. In addition to further mastering of technique and craft, students, through readings and class discussion, place their work within a context of contemporary issues in photographic image making, theory and criticism.
Credit 3 units. EN: H

F20 ART 3184 Photography III
This class is designed for the student who is seeking to explore advanced issues in photography using a broad range of photographic practices and media. In addition to further mastering of technique and craft, students, through readings and class discussion, place their work within a context of contemporary issues in photographic image making, theory and criticism.
Credit 3 units. EN: H

F20 ART 318A Digital Imaging and Photography
Refining methods, materials and techniques of photography, as well as developing working knowledge of chemistry, film and paper. Assignments challenge the students’ insight into
their own portfolios of photographs as well as those of other photographers.
Credit 3 units. EN: H

**F20 ART 318B Photography II (Black-and-White)**
Course adds to the experience of Photography I (Black-and-White). Students investigate phenomena relative to the camera and photography. Students develop the vision necessary to take intelligent and articulate photographs, as well as establish the notion of high craft in terms of the negative and the print. Topics may include portrait, landscape, street photography, the figure and the photo story.
Credit 3 units. EN: H

**F20 ART 318E Color Photography II**
This course adds to the experience of Color Photography I. Students expand their knowledge and handling of color negative materials and begin to learn the basics of color printing with transparency films and reversal printing. Some advanced printing and shooting techniques covered. Emphasis on developing a personal color sensibility and producing a cohesive body of work that represents that vision.
Credit 3 units. EN: H

**F10 ART 318H Photography: Art Practice**
Credit 3 units. EN: H

**F20 ART 318I Advanced Photography Seminar**
Designed for non-art students fulfilling Art minor requirements. Topics covered include studio lighting and large-format photography.
Credit 3 units. EN: H

**F10 ART 318J Painting: Art Practice**
Credit 3 units. EN: H

**F20 ART 319 Ceramics**
Advanced ceramics/glass study focuses on the student acquiring working knowledge of a variety of available materials and technologies to develop a personal direction and pursue self-determined goals. Experimentation is encouraged in both glass and clay. This may involve working in traditional or contemporary, vessel or sculptural concepts. Available to students is a variety of materials, equipment and technical information. Ceramics, porcelain, stoneware, terra-cotta and low-temperature clays are used in conjunction with extensive study of glazing and firing technology. Students explore and develop skills in Raku, low-temperature, oxidation, reduction, electric, high-temperature and pit firings.
Credit 3 units. EN: H

**F20 ART 320 Ceramics**
Advanced ceramics/glass study focuses on the student acquiring working knowledge of a variety of available materials and technologies to develop a personal direction and pursue self-determined goals. Experimentation is encouraged in both glass and clay. This may involve working in traditional or contemporary, vessel or sculptural concepts. Available to students is a variety of materials, equipment and technical information. Ceramics, porcelain, stoneware, terra-cotta and low-temperature clays are used in conjunction with extensive study of glazing and firing technology. Students explore and develop skills in Raku, low-temperature, oxidation, reduction, electric, high-temperature and pit firings.
Credit 3 units. EN: H

**F10 ART 323 Fashion Design**
A creative approach to fashion design, with flat pattern and draping skills used in the development of original sample garments. Construction techniques and industrial methods are presented and applied to specific structured design problems. Students work with visiting designer-critics. Garments are reviewed by a professional jury in the spring semester and selected for the annual student fashion show.
Credit 8 units. EN: H

**F10 ART 323A Three-Dimensional Fashion Design Foundation**
Study of fundamental apparel design issues. Students begin with basic draping methods and explore evolution and craft, decoration and adornment for apparel. Research for class exercises is based upon the most elementary forms of historical and contemporary dress.
Credit 3 units. EN: H

**F10 ART 323B Two-Dimensional Fashion Design Foundation**
Review and practice of applicable material from Fashion Illustration: Visualizing Apparel (F10 ART 234) course for presenting the figure in garment design. Students explore a variety of media for expressive fashion communication and learn to combine page elements with compelling design strategies. Research and study of landmark and innovative illustrators are conducted as well as application of their ideas in practice. Additionally, the course covers incorporation of technical drawings, text and textile swatches with illustration style to convey design vision for fashion presentation.
Credit 3 units. EN: H

**F10 ART 323C Digital Fashion and Textile Design**
Review of practice of introductory material from Fashion Illustration: Visualizing Apparel (F10 ART 234). In depth exploration of vector-based illustration for garment and textile schematics. Establishment of strategies for designing apparel,
wovens, knits, prints and patterns using universal and industry software.  
Credit 3 units. EN: H

**F20 ART 323D Fashion Design 2-D**
Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.  
Credit 3 units. EN: H

**F20 ART 323E Fashion Design 3-D**
Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel.  
Credit 3 units. EN: H

**F20 ART 323G Fashion: Textile Design**
Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing.  
Credit 3 units. EN: H

**F20 ART 324 Fashion Design**
A creative approach to fashion design, with flat pattern and draping skills used in the development of original sample garments. Construction techniques and industrial methods are presented and applied to specific structured design problems. Students work with visiting designer-critics. Garments are reviewed by a professional jury in the spring semester and selected for the annual student fashion show.  
Credit 8 units. EN: H

**F20 ART 324D Fashion Design 2-D**
Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.  
Credit 3 units. EN: H

**F20 ART 324E Fashion Design 3-D**
Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel.  
Credit 3 units. EN: H

**F20 ART 324I Fashion: Textile Design**
Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing.  
Credit 3 units. EN: H

**F20 ART 327A History of Photography**
Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.  
Credit 3 units. EN: H

**F20 ART 328A History of Photography**
Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.  
Credit 3 units. EN: H

**F10 ART 329C Time-Based Media: Art Practice**
Prerequisite: Digital Design (F10 ART 243) or Digital Studio (F10 ART 242). Open to BFA students who have taken the prerequisite and others, including minors and MFA students, with consent of instructor.  
Credit 3 units.

**F20 ART 333 Visual Communication: Graphic Design**
Offered as emphasis with the Communication Design major, the course employs intensive projects in graphic design, typography and production to extend the student’s capacity for conceptual and visual thinking. Along with orientation toward professional standards and practices, students are encouraged to identify and develop their special talents and interests. Fundamentals in computer-assisted design are covered.  
Credit 3 units. EN: H

**F20 ART 334 Visual Communication: Graphic Design**
Continuation of F10 Art 333. Offered an an emphasis within the Communication Design major, the course employs intensive projects in graphic design, typography and production to extend the student’s capacity for conceptual and visual thinking. Along with orientation toward professional standards and practices, students are encouraged to identify and develop their special...
talents and interests. Fundamentals in computer-assisted design are covered.
Credit 3 units. EN: H

F20 ART 3352 Commercial Modernism in America 1865–1965
This course explores contributions to and expressions of image-based visual modernism in the commercial tradition. We focus on periodical illustration, the comic strip and animated film. Content addresses the birth and expansion of industrial image production; the history of relevant technologies; modernist art theory and the experience of modernity; the parallel but culturally distinct traditions of illustration and cartooning; and issues of race and gender in the production and reception of these works. A sampling of practitioners considered: E.W. Kemble, Howard Pyle, Jessie Willcox Smith, Elizabeth Shippen Green, N.C. Wyeth, Winsor McCay, J.C. Leyendecker, Norman Rockwell, Chester Gould, Milton Caniff, Al Parker, Robert Weaver, Mary Blair, Saul Bass, Paul Rand, Ezra Jack Keats and Jack Kirby. Three required film screenings are scheduled during the semester. Images from the commercial tradition typically fall into a cultural and academic blind spot. They exist outside the realm of art history as traditionally defined and receive primarily textual analyses in culture studies contexts. As a result, many careers and works that would otherwise attract interest remain effectively invisible. This course seeks to integrate the close study of objects associated with art history and the embrace of the embedded in culture studies. We draw on the collections of the recently founded Modern Graphic History Library at Washington University.
Credit 3 units. EN: H

F20 ART 335A Interaction Design: Applications for Public Health
Through a blend of presentations from practitioners, classroom lectures, readings, discussion and hands-on exercises, this class engages principles and methods of interaction design within the context of health challenges. Broadly defined, interaction design is the practice of designing products, environments, systems and services with a focus on behavior and user experience. We take on an in-depth challenge in an area such as transportation or community health resources and work in cross-disciplinary design teams with an external partner organization. Students gain experience in planning and executing a human-centered design process featuring research, ideation, synthesis, concept development, prototypes and a final presentation, which may include visual design, animation and sound. Students work in teams to develop several intermediate project deliverables, such as prototypes and sketches. No prior course work is necessary, though experience with Adobe Photoshop, Illustrator and InDesign are helpful. No prerequisites. Open to sophomores through graduate-level students across the university.
Credit 3 units.

F20 ART 335D Prototyping the Responsive Dynamic Media Wall
Same as Arch 326D.
Credit 3 units. EN: H

F20 ART 335F Interactivity and Web Design
This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.
Credit 3 units. EN: H

F20 ART 335G The Licensed Image: Development and Distribution
An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students.
Credit 3 units. EN: H

F20 ART 335I Communication Design I
An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing.
Credit 3 units. EN: H

F20 ART 335J Introduction to Animating in Three Dimensions
This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 ART 101 Drawing or equivalent or permission of instructor.
Credit 3 units. EN: H
F20 ART 335L Communication Design and Business
This course provides an introduction to business communications in a visual environment. Subjects addressed include visual organization, introductory typography, basic identity development, message construction and business presentation development.
Credit 3 units. EN: H

F20 ART 3361 Advertising 1
Same as F20 ART 1361, F20 ART 2361, F20 ART 4361 - Juniors (only) register for F20 ART 3361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary.
Credit 3 units.

F20 ART 3362 Advertising I
Credit 3 units. EN: H

F20 ART 3363 Advertising in the Digital Age
Same as F20 ART 1363, ART 2363, ART 4363 - Juniors (only) register for F20 ART 3363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study “game changing” developments in advertising communications; changing dynamics in audience behavior-including the ability to “opt out”; the advertising industry’s adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one.
Credit 3 units.

F20 ART 3364 Advertising in the Digital Age
Credit 3 units. EN: H

F20 ART 336F Interactivity and Web Design
This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.
Credit 3 units. EN: H

F20 ART 336G The Licensed Image: Development and Distribution
An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students.
Credit 3 units. EN: H

F20 ART 336I Communication Design I
An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing.
Credit 3 units. EN: H

F20 ART 336J Introduction to Animating in Three Dimensions
This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 Art 101 Drawing or equivalent or permission of instructor.
Credit 3 units. EN: H

F20 ART 336K Communication Design II
This course continues the elements of communication design in a more professional context. Students advance their understanding of concept development and visual execution. They also examine contemporary professional work in the field and are introduced to the business of the profession, including work with clients. Course work integrates fundamental design skills with business presentations and team-based projects. The final course assignment comes from an external firm. Students work in groups and make a professional presentation to the client.
Credit 3 units. EN: H
F10 ART 336M Special Topics in Communication Design
Credit 3 units. EN: H

F10 ART 337B Communication Design: Word and Image Studio I
This course centers around the study of word-image relationships. It values intensive visual exploration and clear communication. Students are challenged to make illustrations, explore typography, and bring visual elements together into a unified whole. Projects take the form of posters, image sets, books, icons, maps, labels, infographics, etc. As the course progresses, the student works to narrow his or her focus within the field of visual communications by selecting particular projects from a suite of offerings. Prerequisite: junior standing, College of Art majors only. Students also must enroll in F10 ART 337C and F10 ART 337D.
Credit 3 units. EN: H

F10 ART 337C Communication Design: Typography I
This course examines typography as a vehicle for conveying information across contexts and as an expressive and interpretive medium. Students complete a series of exercises and projects. Prerequisite: junior standing, College of Art majors only. Students also must enroll in F10 ART 337B and F10 ART 337D.
Credit 2 units. EN: H

F10 ART 337D Communication Design: Digital Adventure
Students are introduced to the digital tools of graphic design and image making. Through content-driven design projects, supplemented by in-class exercises, students explore and learn Adobe Illustrator, Photoshop and InDesign. Prerequisite: junior standing, College of Art majors only. Students also must enroll in F10 ART 337B and F10 ART 337C.
Credit 3 units. EN: H

F10 ART 337E Communication Design: Word and Image II
This course continues Communication Design: Word and Image I (F10 ART 238B), presenting design and illustration projects simultaneously. It focuses on methodologies for a range of problems. It emphasizes the development of content, illustration, typography, sequential narrative and information design. Students are expected to become self-directed about their synthesis of word and image and select an area of emphasis within design and illustration for deeper study. Prerequisite: Word and Image I. Required for Communication Design majors; open to Sam Fox School students as space permits.
Credit 3 units. EN: H

F10 ART 337F Communication Design: Typography II
This course builds on the typographic principles introduced in Typography I (F10 ART 238C). Students generate typographic systems and expressions relevant to professional practice. Prerequisite: Typography I. Required for Communication Design majors; open to Sam Fox School students as space permits.
Credit 3 units. EN: H

F10 ART 337G Communication Design: Introduction to Motion and Interactivity
This course explores screen-based design. It uses the language of cinema as a tool for examining narrative. Provides an introductory experience with interactivity, using both digital and analog technologies. Prerequisite: Digital Design (F10 ART 243) or Digital Studio (F10 ART 242). Required for Communication Design majors; open to Sam Fox School students as space permits.
Credit 3 units. EN: H

F10 ART 337H Communication Design: Interaction Design I
This course is a hands-on application of interaction design for digital media (primarily browser-based). Participants learn and apply the fundamentals of HTML and CSS, explore how user-interaction adds bidirectionality to communication, examine the intricacies of seemingly-simple digital interactions, and become familiar with the attributes of digital device as “canvas.” Students work both independently and collaboratively to design interactive solutions for a selection of communication challenges. Prerequisites: Digital Design (F10 ART 243) or Digital Studio (F10 ART 242). Required for Communication Design majors; open to Sam Fox School students as space permits.
Credit 3 units.

F20 ART 3386 The Art of Advertising
This course introduces students to the field by defining the role of advertising in American culture and economy. It begins by exploring the evolving and devolving aspects of American advertising and the forces that both compel and repel consumer audiences. The class explains the processes and criteria that, when properly utilized, elevate advertising and validate it as an art form. The course consists of lectures and visiting instructors, brief essay quizzes and a series of exercises designed to acquaint each student with administrative and creative processes and various disciplines within the advertising field. Major emphasis is placed upon the creative disciplines.
Credit 3 units. EN: H

F10 ART 338B Communication Design: Word and Image II
This course continues the study of word-image relationships from Word and Image I. It focuses on methodologies for realizing clear communication across a range of problems, including the construction of narrative, messaging, poster design and information design. Students are expected to become self-
directed about their own synthesis of word and image and select an area of emphasis within design and illustration for deeper study in the senior year. Prerequisites: Word and Image I, junior standing, College of Art majors only. Students also must enroll in F10 ART 338C and F10 ART 338D.
Credit 3 units.

F10 ART 338C Communication Design: Typography II
This course builds on the basic typographic principles introduced in Typography I. Course work examines typography as a vehicle for conveying information across contexts and as an expressive and interpretive medium. Students complete a series of projects relevant to the development of professional practice in communication design. Prerequisites: Typography I, junior standing, College of Art majors only. Students also must enroll in F10 ART 338B and F10 ART 338D.
Credit 3 units.

F10 ART 338D Communication Design: Introduction to Motion and Interactivity
This course explores screen-based experiences and uses the language of cinema as a tool for thinking about sequential narratives. The class provides a beginning experience with interactivity, using both digital and analog technologies. Students complete a series of projects. Prerequisite: Digital Adventure. Junior standing, College of Art majors only. Students also must enroll in F10 ART 338B and F10 ART 338D.
Credit 2 units.

F10 ART 338H Comm. Design: Interaction Design II
Credit 3 units.

F10 ART 338J Comm. Design: Illustration Projects
Credit 3 units.

F10 ART 338K Comm. Design: Illustration Concepts & Media
Credit 3 units.

F10 ART 338L Comm. Design: Experimental Typography
Credit 3 units.

F10 ART 338M Voice
Credit 3 units.

F20 ART 339A History of Communication Design
Historical development of communication design based on a survey of significant artists and designers and the ideas, styles, movements, forces and individuals who influenced their work. This course is a component of the Communication Design major.
Credit 3 units.

F20 ART 345 Topics in the History of Book Illustration: The Book as Subject
Within the past half-century, the book has moved from periphery to center, becoming the subject of an expanding body of work by writers and artists. Its formal qualities and physical processes, its habitual means of organizing, its strengths, its limitations and the meanings we attach to them, have become the subject of seemingly self-conscious, inward-looking books. Postmodern as if by definition, playfulness and irony attend these works and their complexities and subtleties often prove elusive a virtue. They command a reshaping of our sense of how books, texts and illustrations react to and interact with one another and how a reader/viewer experiences and makes sense of them. We look at work by Vladimir Nabokov, Julio Cortazar, Italo Calvino, William H. Gass, Samuel Beckett, Jasper Johns, Tom Phillips, Anselm Kiefer, Susan Baron, Peter Greenaway and others. This seminar explores aspects of the history of image and text conjoined in the western book, at once an object and a concept, a thing experienced and a conduit, a means of transmission. Utilizing a variety of analytical and critical approaches - psychoanalytical, deconstructive, New Historicism — we examine the ways in which texts and images make and unmake meanings. Students are asked to write two papers, one brief (six to eight pages), the other more extended (12 to 20 pages) and to give one in-class presentation.
Credit 3 units.

F20 ART 346 Topics in the History of Book Illustration: Technologies and Empires: The Book in the Age of Victoria
Credit 3 units.

F20 ART 347 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress, engraving and intaglio, offset lithography, and digital, “virtual” media. Certain projects may require a second semester of study to complete.
Credit 3 units.

F20 ART 348 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods
may include relief and letterpress, engraving and intaglio, offset lithography, and digital, “virtual” media. Certain projects may require a second semester of study to complete.
Credit 3 units. EN: H

---

**F20 ART 3481 The Illustrated Book: Design and Production**

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, “virtual” media. Certain projects may require a second semester of study to complete.
Credit 3 units. EN: H

---

**F20 ART 3482 The Illustrated Book: Design and Production**

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, “virtual” media. Certain projects may require a second semester of study to complete.

---

**F10,F20 ART 350 Independent Study**

Designed for juniors fulfilling art minor requirements.
Prerequisites: permission of instructor and submission of a written proposal to the associate dean of students (Room 1, Bixby Hall).
Credit variable, maximum 3 units. EN: H

---

**F10,F20 ART 350 Independent Study**

Designed for juniors fulfilling art minor requirements.
Prerequisites: permission of instructor and submission of a written proposal to the associate dean of students (Room 1, Bixby Hall).
Credit variable, maximum 3 units. EN: H

---

**F10 ART 361 Time-Based Media: Art Practice**

This course explores the body as a time-based medium and a vehicle of expression that interacts with cinematic and sound technologies, undergoing gradual semantic, virtual and visceral transformations. Students create performance-based video and sound works that are mediated with electronic/digital technology and performed or screened in public. Collaborative, individual political and poetic actions and happenings are encouraged. Students focus on the production of conceptually rigorous and technically convincing work that embodies their performative, experimental and individually designed ideas. Projects are informed by readings in media theory, writing assignments, and active participation in critiques of works by contemporary media artists. Prerequisite: Digital Design (F10 ART 243) or Digital Studio (F10 ART 242). Open to BFA students who have taken the prerequisite and others, including minors and MFA students, with consent of instructor.
Credit 3 units. EN: H

---

**F20 ART 363 Architectural Photography**

This course offers a technical and theoretical understanding of architectural photography. Basic operation and orientation of digital and analog cameras are covered, as well as best practices for photographing interior and exterior spaces with both natural and artificial lighting. Students learn how to document artwork and architectural models/structures for portfolio presentation purposes, preparing them for working relationships with professional photographers in the industry. This course emphasizes 4x5 view camera skill, use of DSLR and digital input, studio lighting, and development of individual projects. Digital camera required; 4x5 camera provided by photography department.
Credit 3 units.

---

**F20 ART 3644 Italian Level II**

Credit 5 units. EN: H

---

**F20 ART 371 Introduction to Letterpress Printing**

This class serves as an introduction to printing with the Vandercook handpress. Through a series of assignments students learn a systematic approach to planning, arranging and printing type on a page. The students receive a basic introduction to typography, history of letterforms, and history of the book. The mechanics of relief printing with the cylinder proof press, ink composition, and resolution of the typographic image also are explored. As an exploration of the publishing process students produce a chapbook of a short literary work. The class primarily focuses on typographic composition, but one assignment employs a combination of word and image.
Credit 3 units. EN: H

---

**F20 ART 3713 Introduction to Book Binding**

Same as F20 ART 1713, F20 ART 2713, F20 ART 4713. Juniors (only) register for F20 ART 3713. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations.
Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings. Credit 3 units. EN: H

F20 ART 3714 Introduction to Book Binding
Same as F20 ART 1714, F20 ART 2714, F20 ART 4714. Juniors (only) register for F20 ART 3714. This class serves as an introduction to the book as an artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers, and produce a variety of decorated papers to be used in their bindings. Credit 3 units. EN: H

F20 ART 3715 Hybrid Studio
Same as F20 ART 4715. Juniors (only) register for F20 ART 3715. Hybrid Studio is an opportunity for undergraduate and graduate students from across the campus to engage the book as a truly interdisciplinary subject and object. This course combines equal parts seminar and applied studio experience. Historical models of the book as framework for ideas and physical artifact are studied and modeled. The intention of this course is to combine work in allied disciplines, supporting students in the integration of their chosen major areas of study and incorporating photography, painting, sculpture, design, architecture, engineering and writing and history. The class moves between group discussions and individual mentoring with regularly scheduled demonstrations of book studio equipment. Limited to junior-level and above only. Prior experience in book studio courses is recommended, but not required. Undergraduates must have permission from faculty to miss major studio time on Friday afternoon to take this course. Credit 3 units. EN: H

F10 ART 371A Book Arts: Art Practice
This course investigates various forms of visuality as primary content in the book format, with a focus on the construction of non-textual narratives. Through lectures and demonstrations, students explore topics such as page format, book design, serial and sequential structures and approaches toward binding. The primary project is the production of a printed book. Students work with letterpress and intaglio printing, bookbinding and photopolymer plate making. Prerequisite: Introduction to Printmaking (F10 ART 215 or F10 ART 216) or Introduction to Letterpress or Introduction to Book Binding. Open to BFA students who have taken the prerequisite and others, including minors and MFA students, with consent of instructor. Credit 3 units. EN: H

F10 ART 381 Public Practice: Art Practice
Students examine, critically explore and execute work in the public sphere. Readings, discussions and presentations generate a framework for understanding historical, theoretical and practical considerations for creating artwork in relation to the material/social conditions of public space. Projects may respond to any number of approaches in the contemporary field, including public sculpture, participatory art and ephemeral art practices. Students learn the discipline of proposal development and present final projects that are adjudicated by an outside jury. Students whose work is selected by the jury must enroll in the spring semester course From Design to Realization. Open to BFA students with junior-level standing and others, including minors and MFA students, with consent of instructor. Credit 3 units. EN: H

F10 ART 3822 Art Practices Florence: Present/Past/Past/Present
Credit 3 units. EN: H

F20 ART 3823 The Italian Renaissance in the City of Florence
This course encompasses the Renaissance from Giotto through the High Renaissance. Students are able to examine firsthand the works they are studying. Credit 3 units. EN: H
F20 ART 3824 F10 Methods and Contexts II (Florence)
Required for BFA in Art majors. This team-taught course expands on methodologies encountered in Methods and Contexts I and related courses. Students are encouraged to take charge of their artistic process through faculty-supported and self-directed creative investigation. Through lectures, class discussions and critiques, students critically engage the evolving manner in which visual culture is produced and distributed. Students learn how to best present their work and incorporate discourse inherent to and generated by their practice. The goal of this course is to ensure a strong Capstone experience by helping students develop their artistic position within the public realm and contemporary contexts.
Credit 3 units. EN: H

Credit 3 units. EN: H

F10 ART 385A Public Practice: Art Practice
Students examine, critically explore and execute work in the public sphere. Readings, discussions and presentations generate a framework for understanding historical, theoretical and practical considerations for creating artwork in relation to the material/social conditions of public space. Projects may respond to any number of approaches in the contemporary field, including public sculpture, participatory art and ephemeral art practices. Students learn the discipline of proposal development and present final projects that are adjudicated by an outside jury. Students whose work is selected by the jury must enroll in the spring semester course “From Design to Realization.” It is highly recommended that students who wish to concentrate in sculpture enroll in this course. Open to BFA students with junior-level standing and others, including minors, with consent of instructor.
Credit 3 units.

F10 ART 391 Methods and Contexts I
Required for those pursuing the Bachelor of Fine Arts in Art majors. This team-taught course integrates and synthesizes knowledge resulting from Theory and Practice and related courses. Supported by lectures, class discussions and student critiques, this course fosters a creative environment and critical discourse surrounding artistic practices. Students are guided through the art-making process, from conceptualization to resolution, emphasizing experimentation with various methods of production and distribution. The goal of this course is to help students contextualize their own artistic interests within the contemporary art field by promoting critical analysis skills necessary for initiating, interpreting and evaluating artistic production.
Credit 3 units.

Credit 3 units.

F20 ART 394 New Topic (Sam Fox School)
Credit 3 units. EN: H

F20 ART 396 Design, Artisanship and Sustainability as Cultural Catalyst
This course investigates the ways in which artisanship is a stimulus to design thinking and innovation. The prerequisite to the course is a 16-day trip to India over winter break where students work closely with leading Indian designers of textiles, products and architecture as well as accomplished artisans working with methods both ancient and modern. We discuss how craft informs design and how design acts as a force in entrepreneurship and job creation. A major focus of our research is investigating how craft and design are catalysts for innovation in a sustainable use of materials and water. For more information, contact Belinda Lee at Lee@samfox.wustl.edu. Students should obtain a visa on their own.
Credit 3 units.

F20 ART 396A From Design to Realization
Credit 3 units.

F10 ART 401A Drawing: Art Practice
Prerequisites: Drawing I (X10 CORE 101), Drawing II (X10 CORE 102), and junior standing. Open to BFA students who have taken the prerequisites, and others, including minors, with consent of instructor.
Credit 3 units.

F20 ART 402A Drawing: Art Practice
Credit 3 units.

F20 ART 404A Contemporary Exhibition Studies: Maya Lin's Systematic Landscapes
Same as ARCH 404A
Credit 1 unit.

**F20 ART 411 Painting**  
*Continuation of ART 311-ART 312*. Advanced study in painting with individualized criticism, lectures and seminars, leading toward the development of personal idioms.  
Credit 3 units. EN: H

**F20 ART 4115 Intensive Intermediate Painting**  
*Same as F20 ART 2115, F20 ART 3115*. Seniors (only) register for course F20 ART 4115. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve very much at oil painting, both in its traditional 20th-century use and in gaining some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments, as well as a few reading assignments. This is a very structured course, designed to develop a student’s strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor.  
Credit 3 units. EN: H

**F20 ART 4116 Intensive Intermediate Painting**  
*Same as F20 ART 2116, F20 ART 3116*. Seniors (only) register for course F20 ART 4116. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve very much at oil painting, both in its traditional 20th-century use and in gaining some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments, as well as a few reading assignments. This is a very structured course, designed to develop a student’s strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor.  
Credit 3 units. EN: H

**F10 ART 411A Painting: Art Practice**  
This major course of study for juniors and seniors expands the dialogue between material and cultural histories, personal experience, tradition and current practice in contemporary painting. The learning sequence consists of comprehensive investigations of painting processes and materials through assigned and self-directed projects, leading to the development of a unique body of work. Critical assessment of work produced occurs in discussion with faculty and peers. In addition to studio production, this course includes level-specific seminars and visits to galleries and museums. Required for painting majors. Prerequisites: F10 ART 221 or ART 222; F10 ART 311A and ART 312A.  
Credit 6 units. EN: H

**F20 ART 411B Painting II**  
*Same as F20 ART 311B*. Seniors (only) register for F20 ART 411B. Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner’s familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: senior standing and a beginning painting elective or permission of the instructor.  
Credit 3 units. EN: H

**F10 ART 411D Painting: Art Practice**  
Prerequisite: Introduction to Painting (F10 ART 221 or ART 222). Open to BFA students who have taken the prerequisite and others, including minors, with consent of instructor.  
Credit 3 units.

**F20 ART 412 Painting**  
*Continuation of ART 311-ART 312*. Advanced study in painting with individualized criticism, lectures and seminars, leading toward the development of personal idioms.  
Credit 3 units. EN: H

**F20 ART 412B Painting II**  
Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner’s familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course. College of Art majors and non-art students pursuing an art minor have priority.  
Credit 3 units. EN: H

**F20 ART 412E Painting: Art Practice**  
Credit 3 units.

**F20 ART 413A Sculpture**  
*Continuation of ART 313A-ART 314A*. Exploration of advanced concepts and techniques. Involvement with larger scale, environmental relationships and architectural considerations. Processes and materials include construction in a large variety of materials, firing, plaster mold making, direct plaster work, wood
and stone carving, foundry, plastics laminations, soft sculpture, welding, soldering, brazing, metalwork.
Credit 3 units. EN: H

**F20 ART 413D Sculpture: Art Practice**
Required for sculpture majors. Prerequisite: ART 213 or ART 214.
Credit 3 units. EN: H

**F20 ART 413F Sculpture: Foundry**
The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required.
Credit 3 units. EN: H

**F20 ART 413G Sculpture: Wood**
Same as F20 ART 113G, F20 ART 213G, F20 ART 313G.
Seniors (only) register for F20 ART 413G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: senior standing or departmental approval.
Credit 3 units. EN: H

**F20 ART 413H Sculpture: Blacksmithing**
This course is an introduction to blacksmithing materials, tools and techniques. Students explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for 3-dimensional form. In this class we explore these possibilities and expand our sculptural vocabulary.
Credit 3 units. EN: H

**F20 ART 413I Sculpture: Metal Fabrication**
Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.
Credit 3 units. EN: H

**F20 ART 414A Sculpture**
*Continuation of ART 313A-ART 314A.* Exploration of advanced concepts and techniques. Involvement with larger scale, environmental relationships and architectural considerations. Processes and materials include construction in a large variety of materials, firing, plaster mold making, direct plaster work, wood and stone carving, foundry, plastics laminations, soft sculpture, welding, soldering, brazing, metalwork.
Credit 3 units. EN: H

**F20 ART 414F Sculpture: Foundry**
Same as F20 ART 114F, F20 ART 214F, F20 ART 314F.
Seniors (only) register for F20 ART 414F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. Prerequisite: senior standing or departmental approval.
Credit 3 units. EN: H

**F20 ART 414G Sculpture: Wood**
Same as F20 ART 114G, F20 ART 214G, F20 ART 314G.
Seniors (only) register for F20 ART 414G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. Prerequisite: senior standing or departmental approval.
Credit 3 units. EN: H

**F20 ART 414I Sculpture: Metal Fabrication**
Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.
Credit 3 units. EN: H

**F20 ART 414J Photography: Art Practice**
Credit 3 units.

**F20 ART 415 Printmaking**
Survey of printmaking covering basic processes in intaglio, lithography, relief and monotype. Emphasis on mixed-media and experimentation with a foundation in traditional, historical and philosophical aspects of printmaking. Students are encouraged...
to work at a level suited to their individual technical skills and conceptual interests.
Credit 3 units. EN: H

F10 ART 415A Printmaking/Drawing
Continuation of F10 ART 315A-ART 316A. A comprehensive investigation of both traditional and experimental drawing and printmaking techniques. Students are encouraged to explore large-scale mixed-media processes with an emphasis on the development of individual images and marking styles. Students have facilities available in papermaking and printmaking with capabilities for computer and photographic techniques.
Credit 10 units. EN: H

F10 ART 415B Printmaking: Art Practice
Students explore the spectrum of print media and culture, find points of intersection with other media and disciplines, and develop and individual, sustained investigation as an artist. Advanced techniques and concepts are imparted through participatory workshops, focusing on sets of skills such as silkscreen, etching and monotype around strategies in the field of printmaking and contemporary art. Juniors and seniors participate in level-specific seminars that are focused on topical research and critique structures, and are geared toward intellectual development, oral presentation and writing skills as they relate to studio practice. Required for printmaking majors.
Prerequisites: F10 ART 215 or ART 216; F10 ART 315B and ART 316B.
Credit 3 units. EN: H

F20 ART 416 Printmaking
Students explore various mixed-media approaches to relief printmaking in combination with collagraph, photo lithography and drawing. Relief techniques covered include wood and linoleum cuts using the black line and white line approaches. (Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.)
Credit 3 units. EN: H

F10 ART 416A Printmaking/Drawing
Continuation of ART 315-ART 316, ART 415A. A comprehensive investigation of both traditional and experimental drawing and printmaking techniques. Students are encouraged to explore large-scale mixed-media processes with an emphasis on the development of individual images and marking styles. Students have facilities available in papermaking and printmaking with capabilities for computer and photographic techniques.
Credit 10 units. EN: H

F20 ART 416F Printmaking: Art Practice
Credit 3 units.

F10 ART 417 Photography
Courses deal with the establishment of the student’s personal vision and the presentation of that vision. Weekly critiques and in-class discussions are primary format, in conjunction with visiting artists and professionals. The class assists students in preparing their portfolios and provides the necessary support material to enter the post-academic environment.
Credit 10 units. EN: H

F20 ART 417A Digital Imaging and Photography
Courses deal with the establishment of the student’s personal vision and the presentation of that vision. Weekly critiques and in-class discussions are primary format, in conjunction with visiting artists and professionals. The class assists students in preparing their portfolios and provides the necessary support material to enter the post-academic environment.
Credit 3 units. EN: H

F20 ART 417B Photography II (Black-and-White)
Course adds to the experience of Photography I (Black-and-White). Students investigate phenomena relative to the camera and photography. Students develop the vision necessary to take intelligent and articulate photographs, as well as establish the notion of high craft in terms of the negative and the print. Topics may include portrait, landscape, street photography, the figure and the photo story.
Credit 3 units. EN: H

F20 ART 417E Color Photography II
The use of color negative materials and the development of a technical and aesthetic vocabulary with color materials. Use of color analyzers, masking systems and alternatives within negative color systems.
Credit 3 units. EN: H

F10 ART 417H Photography: Art Practice
Prerequisite: Introduction to Photography (F10 ART 217 or ART 218). Open to BFA students who have taken the prerequisite and others, including minors and MFA students, with consent of instructor.
Credit 3 units.

F20 ART 417J Alternative Process Photography
(Formerly Non-Silver Photography). Same as F20 ART 217J, F20 ART 317J. Seniors (only) register for F20 ART 417J.
An exploration into the use of non-silver and alternative photographic processes. The use of such processes as blue and brown printing and gum printing explored, as well as photomechanical processes such as photocopying and color photocopying. Prerequisite: Black-and-White Photography or permission of instructor.
Credit 3 units. EN: H
F20 ART 418A Digital Imaging and Photography
Courses deal with the establishment of the student’s personal vision and the presentation of that vision. Weekly critiques and in-class discussions are primary format, in conjunction with visiting artists and professionals. The class assists students in preparing their portfolios and provides the necessary support material to enter the post-academic environment. Credit 3 units. EN: H

F20 ART 418B Photography II (Black-and-White)
Course adds to the experience of Photography I (Black-and-White). Students investigate phenomena relative to the camera and photography. Students develop the vision necessary to take intelligent and articulate photographs, as well as establish the notion of high craft in terms of the negative and the print. Topics may include portrait, landscape, street photography, the figure and the photo story. Credit 3 units. EN: H

F20 ART 418E Color Photography II
This course adds to the experience of Color Photography I. Students expand their knowledge and handling of color negative materials and begin to learn the basics of color printing with transparency films and reversal printing. Some advanced printing and shooting techniques covered. Emphasis on developing a personal color sensibility and producing a cohesive body of work that represents that vision. Credit 3 units. EN: H

F20 ART 418G Color Photography I
Introduction to the use of color photographic materials using 35mm transparency and reversal printing processes, with emphasis on camera work with color materials and developing a personal color vision. Credit 3 units. EN: H

F20 ART 418I Advanced Photography Seminar
Designed for non-art students fulfilling Art minor requirements. Topics covered include studio lighting and large format photography. Credit 3 units. EN: H

F20 ART 418J Painting: Art Practice
Credit 3 units.

F20 ART 419 Ceramics
Continuation of F10 ART 319-ART 320. Advanced ceramics/glass study focuses on the student acquiring working knowledge of a variety of available materials and technologies to develop a personal direction and pursue self-determined goals. Experimentation is encouraged in both glass and clay. This may involve working in traditional or contemporary, vessel or sculptural concepts. Available to students in a variety of materials, equipment and technical information. Ceramics, porcelain, stoneware, terra-cotta and low-temperature clays are used in conjunction with extensive study of glazing and firing technology. Students explore and develop skills in Raku, low-temperature, oxidation, reduction, electric, high-temperature and pit firings. Credit 3 units. EN: H

F20 ART 420 Ceramics
Continuation of F10 ART 319-ART 320. Advanced ceramics/glass study focuses on the student acquiring working knowledge of a variety of available materials and technologies to develop a personal direction and pursue self-determined goals. Experimentation is encouraged in both glass and clay. This may involve working in traditional or contemporary, vessel or sculptural concepts. Available to students in a variety of materials, equipment and technical information. Ceramics, porcelain, stoneware, terra and low-temperature clays are used in conjunction with extensive study of glazing and firing technology. Students explore and develop skills in Raku, low-temperature, oxidation, reduction, electric, high-temperature and pit firings. Credit 3 units. EN: H

F10 ART 423 Fashion Design
Original design concepts are developed in sketch, pattern and muslin stages, prior to constructing each garment. Senior Design Studio is professionally equipped, affording the student an opportunity to work in design room setting. Fashion drawing develops techniques and skills necessary for preparing a senior portfolio. Designer-critics work with students on specific design problems in the development of a senior collection. Garments are reviewed by a jury in the spring semester and selected for the annual student fashion show — a professional showcase for student work. Credit 10 units. EN: H

F10 ART 423A Capstone 1: Fashion Design (Pre-Collection Studio)
Same as F20 ART 123A, F20 ART 223A, F20 ART 323A. Seniors only register of F20 ART 423A. Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing. Credit 3 units.
F10 ART 423B Apparel Strategy
The study and analysis of the apparel collection and its functional components in an effort to merchandise ideas for groups, seasonal deliveries, and lines. Thoughtful synthesis of the spectrum of knowledge and skills acquired through prior fashion design course work. Development of design and marketing strategies for specific customer profiles and specialty markets. Open to senior Fashion Design majors only. Credit 3 units.

F10 ART 423C Patternmaking and Digital Labs
This lab, offered concurrent with the preliminary study for the creation of both 3-D and 2-D culminating work by senior majors. Resolution of patternmaking, technical drawing, and digital illustration problems are addressed. Additionally, patternmaking and digital skills are enhanced as appropriate. Open to senior Fashion Design majors only. Credit 1.5 units.

F20 ART 423D Fashion Design 2-D
Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included. Credit 3 units. EN: H

F20 ART 423E Fashion Design 3-D
Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel. Credit 3 units. EN: H

F20 ART 423G Fashion: Textile Design
Same as F20 ART 123G, F20 ART 223G, F20 ART 323G. Seniors (only) register for F20 ART 423G. Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: senior standing or departmental approval. Credit 3 units. EN: H

F10 ART 424 Fashion Design
Original design concepts are developed in sketch, pattern and muslin stages, prior to constructing each garment. Senior Design Studio is professionally equipped, affording the student an opportunity to work in design room setting. Fashion drawing develops techniques and skills necessary for preparing a senior portfolio. Designer-critics work with students on specific design problems in the development of a senior collection. Garments are reviewed by a jury in the spring semester and selected for the annual student fashion show — a professional showcase for student work. Credit 10 units. EN: H

F20 ART 424D Fashion Design 2-D
Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included. Credit 3 units. EN: H

F20 ART 424E Fashion Design 3-D
Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel. Credit 3 units. EN: H

F20 ART 424I Fashion: Textile Design
Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing. Credit 3 units. EN: H

F20 ART 427A History of Photography
Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium. Credit 3 units. EN: H

F20 ART 427A History of Photography
Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium. Credit 3 units. EN: H
F10 ART 429C Time-Based Media: Art Practice
Prerequisites: Digital Design (F10 ART 243) or Digital Studio (F10 ART 242). Open to BFA students who have taken the prerequisite and others, including minors and MFA students, with consent of instructor.
Credit 3 units.

F20 ART 429D Special Topics
Credit 3 units. EN: H

F20 ART 429E Special Topics
Credit 3 units. EN: H

F20 ART 430D Special Topics: Beyond Words, Beyond Images: Representation After History
Credit 3 units. EN: H

F10 ART 431 Visual Communication: Advertising Design
Continuation of F10 ART 331 and F10 ART 332 Visual Communication: Advertising Design, with advanced projects in advertising design and the development of a professional portfolio. Options within the major include History of Graphic Design, a senior studio working with actual clients, and internships.
Credit 10 units. EN: H

F10 ART 432A Professional Practices in Design
Credit 5 units. EN: H

F10 ART 432B Professional Practices in Advertising
Credit 5 units. EN: H

F10 ART 432C Professional Practices in Illustration
Credit 5 units.

F20 ART 433 Visual Communication: Graphic Design
Continuation of F10 Art 333 and F10 Art 334 Visual Communication: Graphic Design, with advanced projects in graphic design, a senior thesis project, and the development of a professional portfolio. Options within the major include History of Graphic Design, senior design studio working with actual clients, and internships.
Credit 3 units. EN: H

F10 ART 433C Capstone in Design 1: Research Methods (Form and Function)
This course explores the development of compelling and refined visual vocabularies to respond to a wide variety of narrative and interactive contexts. Students hone their methods for brainstorming and visual iteration with emphasis on composition, type, color, and word and image relationships. An expansive approach-making to visual work is then linked to a set of ideas about design function and user response, ultimately providing students with tools to develop wide-ranging design artifacts that perform specific kinds of “work.” Some projects are done in collaborative groups; all projects have components that students create individually. Artifacts may include books, maps, apps and presentations. Permission of instructor. Senior standing; College of Art majors only.
Credit 3 units.

F10 ART 433D Capstone in Design 1: Research Methods (Form and Interaction)
This course helps students to develop and refine methodologies for making strong and varied visual work in the context of interactive products. Specific deliverables may include apps, websites, presentations, and user research studies. Permission of instructor. Senior standing; College of Art majors only.
Credit 3 units.

F10 ART 433E Capstone in Illustration 1: Research Methods Image and Story
Required for senior majors in Communication Design with an emphasis in illustration. An advanced course in image-making for functional contexts. Students develop projects which isolate issues of approach, production, distribution and market in the landscape of illustration and cartooning today. Targeted research questions are posed in response to individual student work. Successful completion of the course requires the development of and commitment to an aesthetic and creative position within the fields of illustration and cartooning. Readings address the history and culture of illustration, comics and animation. The course anticipates the work of Capstone Studio 2.
Credit 3 units.

F10 ART 433J Interaction Design: Advanced Applications
This course allows students to hone and apply visual skills to interaction projects, with some emphasis on technical development. Specific deliverables may include websites across platforms, apps and other digital applications. Permission of instructor. Senior standing; College of Art majors only.
Credit 3 units.

F10 ART 433K The Illustrator’s Sketchbook
The sketchbook has long been seen as the artist’s personal playground. In this course, students are making images that explore concepts and visual narratives — but the raw materials for these illustrations come from exploration inside the pages of their sketchbooks. This course develops a discipline of daily drawing. In addition to sketchbook work, project assignments include both conceptual and applied projects like illustrated book jackets and short stories. Significant time is spent in
media exploration, development of technique, and professional practices. Senior standing, College of Art majors only. Credit 3 units.

F20 ART 434 Visual Communication: Graphic Design
Continuation of F10 ART 333, F10 Art 334 and F10 Art 433 with advanced projects in graphic design, a senior thesis project, and the development of a professional portfolio. Options within the major include History of Visual Communication, senior design studio working with actual clients, and internships. Credit 3 units. EN: H

F10 ART 434A Senior Design Capstone
Credit 5 units. EN: H

F10 ART 434B Senior Illustration Capstone
Credit 5 units. EN: H

F20 ART 434L Material Study: History, Technology and Design: Concrete
Same as ARCH 434L
Credit 3 units.

F20 ART 4352 Commercial Modernism in America
Credit 3 units.

F20 ART 4354 Readings in Post-war American Visual Culture: 1945–1965
This course explores the interpretation of visual artifacts from the post-war period in America, including book and periodical illustration, animation design in film and television, and package design for music and consumer products. A basic grounding in visual modernism is established. Readings include John Updike’s Rabbit Run, Betty Friedan’s The Feminine Mystique, David Halberstam’s The Fifties, Ben Shahn’s The Shape of Content, and other works. Students draw on the resources of the Modern Graphic History Library at Washington University to view, read and explicate primary materials from the period. One research report and a major paper are required. Credit 3 units. EN: H

F20 ART 4355 Drawing Conclusions
When Harper’s Weekly published its first issue in 1857, not a single image appeared on the front page. Within five years, wood-engraved pictures dominated the publication. In the process, a new profession was created: that of the artist-correspondent. Baudelaire called such people flaneurs, or passionate observers. Others saw them as visual stenographers. This course addresses the artist-correspondent as a cultural figure, shifting conceptions of the press, and modes of visual reportage. The course focuses primarily on illustration, but also touches upon photojournalism, newsreels, television news and contemporary social media. We draw on the periodical illustration collections of the Modern Graphic History Library. The student selects a research topic and presents findings to the seminar, culminating in a substantial paper/project. NOTE: The illustrated newspaper was an international phenomenon from the mid-19th century to the turn of the 20th century. Such publications provided a first chapter in the development of global visual culture. Research projects that focus on international publications are supported if sufficient language skills and subject knowledge can be established. Credit 3 units. EN: H

F10 ART 435A F20 Interaction Design Workshop: Introduction to Research About People
A deep understanding of people with an emphasis on behavior is central to contemporary design, as IDEO’s Tim Brown explained in the Harvard Business Journal in 2008. This workshop introduces students from all disciplines across the university to ethnography data communication and synthesis as a way to begin the process of designing effective and innovative interactive tools. Credit 1 unit. EN: H

F10 ART 435B Interaction Design Workshop: Introduction to (Rapid) Prototyping
Students learn a broadly relevant process for generating ideas and prototypes quickly, based on user and context insight. This workshop is open to students from all disciplines across the university. Credit 1 unit. EN: H

F10 ART 435C Interaction Design Workshop: Visualizing Data
Information visualization has permeated much of online media. This workshop challenges Communication Design majors to create an interactive data visualization. Senior standing; College of Art majors only. Credit 1 unit. EN: H

F10 ART 435D Interaction Design Workshop: Building a Mobile App
Communication Design majors work in groups to develop a prototype application for a mobile device, targeted to a particular, universal challenge. Prerequisites: F10 ART 435A, ART 435B and ART 435C; senior standing; College of Art majors only. Credit 2 units. EN: H

F10 ART 435E Interaction Design Workshops
Credit 2 units. EN: H
F20 ART 435F Interaction Design Workshops
This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development. Credit 3 units. EN: H

F20 ART 435G The Licensed Image: Development and Distribution
An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students. Credit 3 units. EN: H

F20 ART 435I Communication Design I
An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing. Credit 3 units. EN: H

F20 ART 435J Introduction to Animating in Three Dimensions
This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 Art 101 Drawing or equivalent or permission of instructor. Credit 3 units. EN: H

F20 ART 435L Communication Design and Business
This course provides an introduction to business communications in a visual environment. Subjects addressed include visual organization, introductory typography, basic identity development, message construction and business presentation development.

F20 ART 4361 Advertising I
Same as F20 ART 1361, F20 ART 2361, F20 ART 3361 - Seniors (only) register for F20 ART 4361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary. Credit 3 units.

F20 ART 4362 Advertising I
Credit 3 units.

F20 ART 4363 Advertising in the Digital Age
Same as F20 ART 1363, ART 2363, ART 3363 - Seniors (only) register for F20 ART 4363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study “game changing” developments in advertising communications; changing dynamics in audience behavior—including the ability to “opt out”; the advertising industry’s adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one. Credit 3 units.

F20 ART 4364 Advertising in the Digital Age
Credit 3 units.

F20 ART 436F Interactivity and Web Design
This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development. Credit 3 units. EN: H

F20 ART 436G The Licensed Image: Development and Distribution
An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of
Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students. Credit 3 units. EN: H

F20 ART 436I Communication Design I
An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing. Credit 5 units. EN: H

F20 ART 436J Introduction to Animating in Three Dimensions
This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 Art 101 Drawing or equivalent or permission of instructor. Credit 3 units. EN: H

F10 ART 436M Special Topics in Communication Design
Credit 3 units. EN: H

This course explores the function of information in visual design in a wide variety of contexts. Students develop multiple kinds of information (from analytic to poetic) and employ a variety of approaches for conceptual and visual realization. Deliverables include books, maps and presentations; motion graphics optional. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 437C Communication Design: Voice
Type and image work together to foment social awareness and political change. Poster, magazine, book, newspaper, flyer, advertising design and the web are all media that directly influence public opinion, alter our perceptions and expose social and political ills. This course integrates research, writing and design to voice perspectives on current issues. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 437D Communication Design: Vision (and the Brain)
Studying the physical and cognitive function of the visual stream is an important step in understanding the many factors influencing interpretation of visual design. Students conduct directed research on one aspect of the visual processing stream, design fundamental visual models and author a chapter based upon their research which is part of a publication produced by the class. Emphasis on research, authorship and publication design. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 437E Communication Design: Editorial Illustration
This class focuses entirely on the professional practice of conceptual illustration for editorial venues. We practice the methodology of creating visual metaphors, visualizing concise ideas and working under short deadlines. The projects cover the range of editorial image making in the professional world today including portraiture, multiple images, working with text/layouts, time and color restrictions, Op-Ed and difficult art direction. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 437F Communication Design: Motion Graphics II
Students are introduced to motion applications taken from various contexts of graphical motions and computer-animated information. Channels for this course include public interest motion, i.e. title sequence design, animated logos/brands, mobile phone graphic applications and kiosk/museum display graphics. Students develop kinetic and informational sequences for the screen to explore the public interest motion, applying methodological guidelines that articulate motion grouping principles to influence interpretation and that ensure efficient communication of expressive content. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D,
ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. 
Credit 5 units. EN: H

All professional cartoonists and illustrators must bring a coherent vision and reliable approach to their work. Each successful practitioner builds his/her own world, guided by a set of conceptual and visual “rules” that emerge over time. This course poses a series of problems designed to identify the visual themes, formal properties and conceptual patterns present in the work of every student. Shared studio projects yield to directed assignments. Focused research, methodological experimentation and class critique play important roles in the course. Students should be well advanced toward the definition and development of an appropriate individualized visual signature in pictorial work. Applicable to anticipated career directions in illustration, comics, visual development for animation and image licensing. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.
Credit 5 units. EN: H

F10 ART 437H Communication Design: Illustrating Texts
Most illustration is in service of a verbal concept, typically a form of text. Using different applied outcomes — nonfiction and fiction illustration, including graphic novels/mini comics and advertising — this studio introduces different strategies for visualizing texts. Students should have a coherent set of methodologies to draw upon when setting the communication goals for their illustrations. Along with producing illustrations, students write both analyses of assigned texts and are responsible for creating and writing their final project. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.
Credit 5 units. EN: H

F10 ART 437I Design Methods: Image and Story
Through a series of shared projects yielding to an increasingly tutorial format, students explore means, media and methodologies for isolating critical visual concerns in the broad realm of image construction and iconographic development. Designed to cultivate and focus visual expertise in pictorial design for illustrators, cartoonists and graphic designers. An early focus on image design shifts to an animating concern with graphic narrative and storytelling. Culminating project is expected to demonstrate professional competence and emerging orientation within the field. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.
Credit 5 units. EN: H

F20 ART 4386 The Art of Advertising
This course introduces students to the field by defining the role of advertising in American culture and economy. It begins by exploring the evolving and devolving aspects of American advertising and the forces that both compel and repel consumer audiences. The class explains the processes and criteria that, when properly utilized, elevate advertising and validate it as an art form. The course consists of lectures and visiting instructors, brief essay quizzes and a series of exercises designed to acquaint each student with administrative and creative processes and various disciplines within the advertising field. Major emphasis is placed upon the creative disciplines. Credit 3 units. EN: H

F10 ART 438B Communication Design: Designer as Author
What are the principles of authorship? How do we set out to develop content for publication? What role could a designer have in shaping that content? Can design itself function as content? These questions and others are confronted and challenged in a semester-long capstone project. Each student produces a project, ambitious in scope, in which they act as both author and designer. The work may be either print or screen-based, but must have a rationale for being one or the other. This course is appropriate for developing graphic designers, writers, visual journalists, art directors and students seeking to enter the publishing industry. Topic definition occurs before the winter break in consultation with the professor. Corequisites: students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.
Credit 5 units. EN: H

F10 ART 438C Communication Design: Information Design-Building Sets
Students investigate subject areas drawing on a body of data provided by the instructor, which may include material from the fields of health, culture studies and the sciences. Two projects are assigned to enable students to create contemporary visual products from the source data. Students choose from a menu of formats: print or online journalism; maps; multiframe animations; touch-screen or product/service designs; and other such visualizations. This course emphasizes content development, targeted visual exploration, and the development of a system of designs across multiple-media forms and modes. This course is appropriate for developing information designers, graphic designers, content developers, visual journalists and...
art directors. Corequisites: students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438D Communication Design: Illustrated Fiction — A Sustained Investigation
Students select a work of fiction [a poetry collection, a novel, a short story collection, a children’s tale or mythological narrative] of sufficient length and depth to accommodate a minimum of 15 story illustrations, including one double page spread and three additional images for cover, title page and dedication — making a total of 18. Text and image relationships are addressed and considered, leading to a final project that includes both. This course is appropriate for developing illustrators, writers, art directors and students seeking to enter the publishing industry. Topic definition occurs before the winter break in consultation with the professor. Students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438E Communication Design: Nonfiction Illustrated for Page and Screen
This course is devoted to the development and production of a visual book or screen-based illustrated work which communicates nonfictional content. Project content is produced in one of two ways: onsite social observation and reportage (example: the culture of amateur wrestling), or the presentation of preexistent factual material (e.g., the evolution of hominids). In the latter case, the student is expected to present evidence of substantial subject knowledge before the project begins. Screen-based texts may be typeset or delivered through the use of a soundtrack. This course is appropriate for developing illustrators, writers, visual journalists, story artists and designers for image-driven contexts. Topic definition occurs before the winter break in consultation with the professor. Corequisites: students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438F Communication Design: Exhibition Design
This course exposes students to the fundamental principles of exhibition design. We begin through the translation of a 2-dimensional design to one that is 3-dimensional. Issues of scale, line, shape and form in space, and the translation of typographic material to human scale make up the focus of the first assignment. The second assignment focuses on how space may be used expressively to translate a historic, social or scientific event into a more visceral experience for the viewer. The final project is based on subject matter of the student’s choice. Final designs are presented as Illustrator drawings: to scale elevations and plan views, along with rough working models. Photography is used as a design tool. The class takes a field trip (required) to Washington, D.C., as part of the work of the course. Corequisites: students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438G Communication Design: The Narrative Sketchbook
The sketchbook has long been seen as an artist’s greatest internal resource. In this course, students make images that explore visual narratives — but the raw materials for these stories come from exploration inside the pages of their sketchbook. This course develops the vital discipline of daily drawing. The assignments include both conceptual and applied projects such as illustrated book jackets and short stories. Significant time is spent in media exploration, technical mastery and professional practices. Corequisites: Students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438H Communication Design: Motion/Web Design — Visualizing Information in Time
In this class, we explore motion, sound and interactivity to produce dynamic visual information for the screen. The first assignment reviews differences and similarities between print-based media and motion design. The second assignment creates a real-time production using interactivity and concurrency. The final project includes theme development, self-running (synchronized) diagrams and animation. Incorporating sound effects and/or music is required for all projects. We intend to gather and upload all three projects for a website. For example, the first assignment is used for a banner, the second assignment is used for an optional link, and the final project is used as the main information of the website. Software for this course includes Illustrator and Photoshop; Flash and/or After Effects for motion, and Dreamweaver for web editing. This course focuses more on the quality of ideas and the structuring of visual information in time than on software instruction. Corequisites: students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.
Credit 5 units. EN: H

F10 ART 438I Communication Design: Visual Identities and Symbols
This course builds on previously learned graphic design principles including a continued investigation of typography and its application. Students explore the representation of abstract ideas in the form of symbols for the purpose of building identity. The class focuses on the development of visual identity through a systems approach to design with application to various printed collateral. This course prepares students to design a symbol, a logotype, stationery system, and collateral products, keeping the identity consistent and intact throughout the process. Students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.
Credit 5 units. EN: H

F20 ART 438J Advanced Animation
Credit 3 units.

F10 ART 438K Communication Design: Informational Books
Students enrolled in InfoBooks select a subject and create a single or set of books. The project moves from content development and research to concept, visual development, and final execution and craft. Emphasis is placed on clear communication of the content through a mix of complementary visual languages (typographic, information design, photographic, illustrated, etc.). Appropriate for students who are interested in pursuing professional work in publishing, book design, information design and brand/print collateral literature. Students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.
Credit 5 units. EN: H

F10 ART 438N Special Topics in Communication Design
Credit 5 units. EN: H

F20 ART 439A History of Communication Design
Historical development of communication design based on a survey of significant artists and designers and the ideas, styles, movements, forces and individuals who influenced their work. This course is a component of the Communication Design major.
Credit 3 units. EN: H

F20 ART 445 Topics in the History of Book Illustration: The Book as Subject
Within the past half-century, the book has moved from periphery to center, becoming the subject of an expanding body of work by writers and artists. Its formal qualities and physical processes, its habitual means of organizing, its strengths, its limitations, and the meanings we attach to them, have become the subject of seemingly self-conscious, inward-looking books, Postmodern as if by definition, playfulness and irony attend these works, and their complexities and subtleties often prove elusive a virtue. They command a reshaping of our sense of how books, texts and illustrations react to and interact with one another, and how a reader/viewer experiences and makes sense of them. We look at work by Vladimir Nabokov, Julio Cortazar, Italo Calvino, William H. Gass, Samuel Beckett, Jasper Johns, Tom Phillips, Anselm Kiefer, Susan Baron, Peter Greenaway and others. This seminar explores aspects of the history of image and text conjoined in the Western book, at once an object and a concept, a thing experienced and a conduit, a means of transmission. Utilizing a variety of analytical and critical approaches — psychoanalytical, deconstructive, New Historicist — we examine the ways in which texts and images make and unmake meanings. Students are asked to write two papers, one brief (six to eight pages), the other more extended (12 to 20 pages), and to give one in-class presentation. Special topics rotate from semester to semester.
Credit 3 units. EN: H

F20 ART 446 Topics in the History of Book Illustration: Technologies and Empires: The Book in the Age of Victoria
The history of 19th-century book illustration is the story of the search for an ever more perfect and more direct medium of reproduction, gradually eliminating the layers of artisans between the artist and the finished page, from the steel engravings of Cruikshank and Phiz early in the century through the reemergence of wood cut in the form of wood engraving to lithography and chromolithography to the increasing use of photography. By century’s end, the photograph offered what seemed to some the perfect, nearly unimpeding medium for artistic expression, eliminating the intercessions of engravers and artists: the eye’s triumph over the hand. In photography, the artist’s “pure vision” could be discovered and, perhaps more importantly, readily reproduced within a text, as advances made it possible to produce typographically compatible plates, merging text and image into a single reproductive process. Yet technology ran counter to the developing aesthetic theories and to the unfolding trends of high art and low. In an ever more mechanized age, the hand-crafted, the unique, the anciently made it possible to produce typographically compatible plates, merging text and image into a single reproductive process. Yet technology ran counter to the developing aesthetic theories and to the unfolding trends of high art and low. In an ever more mechanized age, the hand-crafted, the unique, the anciently done underwent a renaissance, a reevaluation. Both Pater and the Arts and Crafts Movement set themselves against the new age, reclaiming for a luxuriant market processes that had once been commonplace for all production. Aesthetics experienced itself as nostalgia, and merged a hatred of industrialized life and its cheapened products with the moral injunction to purity and simplicity. This seminar explores aspects of the history of image and text conjoined in the Western book, at once and object and a concept, a thing experienced and a conduit, a means of transmission. Utilizing a variety of analytical and critical
Credit 3 units.

**F20 ART 447 The Illustrated Book: Design and Production**

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, “virtual” media. Certain projects may require a second semester of study to complete. Credit 3 units. EN: H

**F20 ART 4472 Topics in the Illustrated Book: Advanced Topics in the Book**

This class is intended for students who have taken “Special Topics in the Illustrated Book: Design and Production” and desire to do advanced work. This course is a further examination of the book structure and relationship of content to form. Special attention is paid to integration of text and image and to a variety of compositional techniques with image as well as text. Students are expected to begin the semester with a concept for an advanced book project and spend the semester in consultation with the instructor and in intensive investigation of the book form. Demonstrations of advanced techniques accompany lectures. Primary modes of production include letterpress and computer applications, among others. Credit 3 units. EN: H

**F20 ART 448 The Illustrated Book: Design and Production**

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, “virtual” media. Certain projects may require a second semester of study to complete. Credit 3 units. EN: H

**F20 ART 4481 The Illustrated Book: Design and Production**

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, “virtual” media. Certain projects may require a second semester of study to complete. Credit 3 units.

**F20 ART 4482 The Illustrated Book: Design and Production**

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, “virtual” media. Certain projects may require a second semester of study to complete. Credit 3 units. EN: H

**F20 ART 450 Independent Study**

Designed for seniors fulfilling art minor requirements. Permission of instructor and submission of a written proposal to the associate dean of students (Room 1, Bixby Hall). Credit variable, maximum 3 units. EN: H

**F20 ART 455A Urban Books: Imag(en)ing St. Louis**

Since the beginning of the 20th century, art, architecture and urbanism together have investigated the production of images that shape the symbolic dimension of our experience of large cities. This seminar critically embraces this tradition and brings together different methodologies for the visual analysis and representation of contemporary urban phenomena, using St. Louis as a focal point. The goal is to design and produce individual books as a result of research, visual documentation, readings and discussions in a seminar and workshop structure. Each student selects and develops a theme related to the urbanization of St. Louis that is organized into books that present how this metropolitan area has been conceived through images. The course is divided into three parts combining readings, research, and design activities, each of which culminates in the presentation of an individual project; a total of two study books; and a final book. The outcome of the course will be a collection of student-produced books that will be presented in an exhibition titled “Imag(en)ing St. Louis” to take place consecutively at Olin Library and the Art and Architecture Library during the spring of 2015. Fulfills Urban Issues elective requirement. Same as ARCH 455A

Credit 3 units.
**F10 ART 461 Capstone Studio I**

Required for majors in painting, photography, printmaking and sculpture, beginning with the class of 2015. This is an advanced course in studio art conceptualization and production. Students develop creative concepts, objects and gestures; successful completion of the course entails the development of, and commitment to, an artistic position, evidenced by studio production, presentation and writing. Responsibilities include preparation of drawings, models, maquettes and other documentation. This course anticipates the work of Capstone Studio II, which culminates in a senior exhibition. This course includes practice, critique and occasional museum/gallery visits. Corequisite: must be taken concurrently with F10 ART 411A, ART 413D, or ART 415B.

Credit 3 units. EN: H

---

**F10 ART 462 Capstone Studio II**

Continuation of Capstone Studio I. Required for majors in painting, photography, printmaking and sculpture, beginning with the class of 2015. Course participants design, prepare and complete a body of materially and conceptually resolved work for the spring Capstone exhibition. The course fosters an intellectual dialogue among seniors making the transition from studio to artist. Completion of a body of work is accompanied by intensive critical analysis of the ideas and methods from which it arises. Course includes practice, critique and occasional museum/gallery visits. Corequisite: must be taken concurrently with F10 ART 412A, ART 4143D, ART 416B or ART 418G.

Credit 3 units. EN: H

---

**F20 ART 471 Introduction to Letterpress Printing**

This class serves as an introduction to printing with the Vandercook handpress. Through a series of assignments students learn a systematic approach to planning, arranging and printing type on a page. The students receive a basic introduction to typography, history of letterforms and history of the book. The mechanics of relief printing with the cylinder proof press, ink composition and resolution of the typographic image also are explored. As an exploration of the publishing process, students produce a chapbook of a short literary work. The class primarily focuses on typographic composition, but one assignment employs a combination of word and image.

Credit 3 units. EN: H

---

**F20 ART 4714 Introduction to Book Binding**

Same as F20 ART 1714, F20 ART 2714, F20 ART 3714. Seniors (only) register for F20 ART 4714. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings.

Credit 3 units. EN: H

---

**F20 ART 4715 Hybrid Studio**

Same as F20 ART 3715. Seniors (only) register for F20 ART 4715. Hybrid Studio is an opportunity for undergraduate and graduate students from across the campus to engage the book as a truly interdisciplinary subject and object. This course combines equal parts seminar and applied studio experience. Historical models of the book as framework for ideas and physical artifact are studied and modeled. The intention of this course is to combine work in allied disciplines, supporting students in the integration of their chosen major areas of study and incorporating photography, painting, sculpture, design, architecture, engineering and writing and history. The class moves between group discussions and individual mentoring with regularly scheduled demonstrations of book studio equipment. Limited to junior-level and above only. Prior experience in book studio courses is recommended, but not required. Undergraduates must have permission from faculty to miss major studio time on Friday afternoon to take this course.

Credit variable, maximum 3 units. EN: H

F20 ART 476 Approach: A Studio in Publication Design
Same as ARCH 476
Credit 3 units.

F20 ART 484D Space, Society and the Digital
Same as ARCH 484D
Credit 3 units.

F10 ART 485A Public Practice: Art Practice
Students examine, critically explore and execute work in the public sphere. Readings, discussions and presentations generate a framework for understanding historical, theoretical and practical considerations for creating artwork in relation to the material/social conditions of public space. Projects may respond to any number of approaches in the contemporary field, including public sculpture, participatory art and ephemeral art practices. Students learn the discipline of proposal development and present final projects that are adjudicated by an outside jury. Students whose work is selected by the jury must enroll in the spring semester course “From Design to Realization.” It is highly recommended that students who wish to concentrate in sculpture enroll in this course. Open to BFA students with senior-level standing and others, including minors, with consent of instructor. Credit 3 units.

About Us

The Sam Fox School of Design & Visual Arts is a unique collaboration in architecture, art and design education, linking professional studio programs with one of the country’s finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art and the Mildred Lane Kemper Art Museum.

The College of Architecture, founded in 1879, was the first professional, university-affiliated art school in the United States. In the 1940s, its broad-based core program helped set the standards for the bachelor of fine arts degree. Faculty over the years have included Max Beckmann, Philip Guston and other internationally known artists.

The College of Architecture, established in 1910, was one of eight founding members of the Association of Collegiate Schools of Architecture (ACSA). In 1962, Architecture launched one of the nation’s first Master of Urban Design programs. Four winners of the Pritzker Prize, considered architecture’s highest honor, have taught at the school.

The Mildred Lane Kemper Art Museum dates back to 1881, making it the first art museum west of the Mississippi River. The collection has historically focused on contemporary work. Today the Kemper Art Museum holds roughly 3,500 important paintings, sculptures, photographs, and installations by 19th-, 20th- and 21st-century American and European artists, along with significant antiquities and a large number of prints and drawings.

Additional collaborative opportunities are provided by the Department of Art History & Archaeology in Arts & Sciences and the Kenneth and Nancy Kranzberg Art & Architecture Library.

Inquiry, Creativity and Synthesis

The Sam Fox School offers rigorous art and architecture education at both the undergraduate and graduate levels, within the unique context of an independent, nationally prominent research university.

The student body is composed of approximately 300 undergraduate and 50 graduate students in Art, as well as 200 undergraduate and 280 graduate students in Architecture. In all, they represent 17 countries, 47 states and the District of Columbia. Roughly 30 percent of undergraduates pursue combined studies within another University area.

Both core and advanced studios integrate contemporary theory and practice. Among the innovative programs are:

- Multidisciplinary courses co-taught by Art, Architecture, and Art History & Archaeology faculty. Recent seminars have explored the history of illustrated entertainment, combined with book design and production, and crafted a variety of online publications. Courses in exhibition studies are being offered and a new program of exhibition studies is under development.
- International studios in Barcelona, Buenos Aires, Florence and Helsinki are taught by Washington University faculty and offer a range of distinctive programs in art and architecture.
- Community projects include the University City Sculpture Series, which funds student-designed public artworks; WashUCity, a mentoring program for local high school artists; and Architecture’s Building Community/Community Building, which explores relationships between St. Louis’ inner city, nearby municipalities and outlying suburbs.

Uniting Creativity and Scholarship

The Sam Fox School boasts a unique combination of academic and intellectual resources.

The Architecture faculty includes practicing architects, urban designers and landscape architects as well as eminent architectural theorists and historians and a select number of international visitors. The resident, full-time faculty members have won national and regional awards for design excellence and planning, including more than two dozen from the American Institute of Architects alone.

Art’s full-time faculty members include prominent painters, sculptors, printmakers and mixed-media artists as well as leading illustrators, graphic designers, fashion designers and photographers. In the past decade, design faculty have won numerous professional honors while fine art faculty have been featured in more than 100 solo exhibitions and 300 group shows on five continents.

The nationally recognized Kemper Art Museum maintains a vital program of exhibitions, publications and educational events. Major thematic shows are drawn from institutions and private collections around the world, while the Contemporary Projects Series highlights nationally and internationally emerging artists. The acclaimed permanent collection includes key works by modern and contemporary artists from Henri Matisse, Pablo Picasso and Jackson Pollock to Christian Boltanski, Candida Hofer and Olafur Eliasson.

Public events include concerts, film screenings, lectures and discussions with distinguished visitors, and museum tours led by student docents. The museum also provides workspace for faculty- and student-curated exhibitions (usually relating to Sam Fox School curriculum). Courses in Art History and Archaeology further complement the critical and practical study of exhibitions while facilitating student involvement in professional curatorial projects.

A Comprehensive Campus

The Sam Fox School is housed in a comprehensive, five-building campus for design and the visual arts. Conceived around a
central courtyard, it both reflects and updates Washington University’s original campus plan, developed in 1895 by Frederick Law Olmstead, the founder of American landscape architecture.

The architectural centerpiece is prize-winning Japanese architect Fumihiko Maki’s Kemper Art Museum. This elegant, 65,000-square-foot limestone clad structure — a gathering point for scholars and the general public — includes more than 10,000 square feet of exhibition space, art storage facilities and the Florence Steinberg Weil Sculpture Garden. The museum also houses the Kranzberg Art & Architecture Library, Art History & Archaeology, and the Newman Money Museum, a state-of-the-art numismatics center.

Adjacent to the Kemper Art Museum is Maki’s Earl E. and Myrtle E. Walker Hall. The three-story, 38,000-square-foot building contains painting and sculpture studios and the Nancy Spirtas Kranzberg Studio for the Illustrated Book.

Flanking these buildings are Bixby and Givens Halls — historic homes to Art and Architecture, respectively — as well as Steinberg Hall, Maki’s iconic modernist pavilion. Recent renovations include state-of-the-art computing environments; accessible, light-filled studios; additional workspaces; an auditorium; and a café.

**Visiting Artists and Architects**

The Sam Fox School invites distinguished academics and professionals to lecture, attend critiques and visit major studios. Recent visitors include:

**2013–14**

- Alfredo Payá Benedito
- Maggie Breslin
- Gaby Brink
- Huey Copeland
- Freecell (Lauren Crahan & John Hartmann)
- Lisa Freiman
- Coco Fusco
- Michelle Grabner
- K. Michael Hays
- Robert Herrmann
- Junya Ishigami
- Alfredo Jaar
- Sharon Johnston
- Flavin Judd
- Erica Kochi
- Won Ju Lim

- Angela Miller
- Michael Murphy
- Shaun O’Dell
- Chris Reed
- Lisa Sanditz
- Renata Stih & Frieder Schnock
- Yoshiharo Tsukamoto
- David van der Leer

Departmental website: http://www.samfoxschool.wustl.edu/

**Degree Requirements**

To receive the Bachelor of Fine Arts degree, a student must meet the requirements of the College of Art and take academic courses with other undergraduates. Work in art can be combined with studies in architecture, business, humanities, natural and social sciences, and the other arts. Students may take these courses for educational and intellectual enrichment or in direct correlation with their primary interests.

Students must complete 48 credits from the College of Arts & Sciences. Advanced Placement, International Baccalaureate, University College courses or those taken away from Washington University do not count toward these 48 credits.

The specified number of credit units in courses in the areas listed below are required for the BFA, in addition to the Studio Art and additional art elective requirements. (Specific courses that meet these requirements are listed in the College of Arts & Sciences section.)

**Writing:** (C– or better) is required in the first year. Transfer students must fulfill the Writing 1 requirement by taking CWP 100 College Writing 1 or by review of a writing portfolio. For more information, visit http://transferportfolio.artsci.wustl.edu.

**Humanities:** Humanities courses examine the human condition as it has been documented and expressed in both past and contemporary times. This area includes courses from Literature (both in English and other languages), Classics, History, Philosophy, and Religious Studies, as well as some courses in the creative arts such as Dance, Drama, Music and Writing. Courses designated “FA HUM” fulfill a humanities requirement.

**Natural Sciences or Mathematics:** These courses seek to understand the natural and physical world, using objective and empirical observation and controlled experimentation. This area includes courses from Biology, Chemistry, Environmental Biology or Policy, Earth & Planetary Sciences, Math, and Physics as well as some courses from departments such as Anthropology and Psychology. Courses designated “FA NSM” fulfill a natural sciences or mathematics requirement.
Social and Behavioral Sciences: These courses use qualitative and quantitative observation to explore the social environment, relationships with society, and forms of human behavior. This area includes courses from Anthropology, Economics, Education, International and Area Studies, Political Science, and Psychology, and courses from other areas, including interdisciplinary studies. Courses designated “FA SSC” fulfill the Social and Behavioral Sciences requirement.

Electives in Arts & Sciences: Includes all courses in Arts & Sciences except physical education, lessons, and independent studies.

Art History: Two one-semester introductory courses (Art-Arch 113 and 215) and three additional courses (or related courses with permission of the associate dean of students). Courses designated “FA AH” fulfill an art history requirement.

Students must fulfill the following degree requirements:

This curriculum includes the Sam Fox Foundation Sequence and the Capstone studio for all seniors in the College of Art. The Capstone studio brings together all seniors in the studio areas and separately in the Communication Design and Fashion areas for critical dialogue beyond disciplinary boundaries and to guide preparation for each area’s culminating BFA exhibition.

Academic Honors & Awards

Dean’s List: In recognition of exceptional scholarship, first-year, sophomore, junior and senior art students who have completed at least 14 credit hours (excludes courses taken P/F or Audit) with a semester grade point average of 3.5 or higher during a semester will be cited on the Dean’s List.

Latin Honors: A student may be considered for the Bachelor of Fine Arts degree cum laude, magna cum laude or summa cum laude as determined by the dean.

Senior Honors: An undergraduate art student may be named an Eliot Scholar if his or her academic performance has been outstanding, with a cumulative grade point average of 3.5 or higher through the final semester.

Prizes and Awards

The Scholars in Art Program provides named scholarship funds that have been donated to the university by individuals or companies specifically for this purpose. Selection is based on financial need and academic achievement. There is no application process.

Academic Scholarships

The College of Art offers one full-tuition and up to five partial-tuition scholarships each year solely on the basis of merit. Applicants for this award may also qualify for scholarship aid based on need and will be considered for this as well. The full-tuition Conway or Proetz Scholarship is awarded to an entering first-year student whose artistic and academic potential is judged outstanding by a faculty selection committee. The scholarship is supported by two endowed funds. The Fred Conway Scholarship
was established in memory of a distinguished professor of painting in the College of Art. The Arthur and Esther Proetz Scholarship was established to honor the commitment and dedication to the arts of these two individuals.

Competition is national in scope, with finalists invited each year to visit the College of Art at the college’s expense. At this time, one student is chosen to receive the full-tuition scholarship, and the other finalists are awarded partial scholarships. These are renewable for each year of undergraduate study, assuming continued academic and artistic excellence.

To be eligible, an applicant must be a high school senior who meets the following criteria:

1. Ranks high in the senior class.
2. Has SAT or ACT scores in the upper range.

To enter the competition, the applicant must follow the usual admission application procedures by completing a Washington University freshman application and sending a digital portfolio of art work. Portfolios should be submitted through the Slideroom function of the Common Application.

**Awards and Prizes**

Several awards are made each year to art students who are selected by the faculty. These awards and prizes include the following:

- The Paul Edward Birdsall Award in Visual Communications
- The Susan Sanders Block Silver Ripper Award in Fashion Design
- The Belle Cramer Award in Printmaking
- The Eda L. and Clarence C. Cushing Memorial Prize in Painting
- The Anne Fuller Dillon Prize in Graphic Communications
- The Mary Cowan Harford Award in Watercolor
- The Marsha Hertzman Blasingame Award in Printmaking
- The Morris M. Horwitz Award in Photography
- The Hazel H. Huntsinger Memorial Prize in Painting
- The Caroline Risque Janis Prize in Sculpture
- The Nancy Spirtas Kranzberg Illustrated Book Award
- The John J. and Marjory B. Lewin Photography Prize
- The Peter Marcus Prize in Printmaking
- The Dominic Michael Silver Scissors Designer of the Year Award
- The Al Parker Award for Excellence in Illustration

---

**Academic Regulations**

Students in the College of Art are required to complete 48 credits in Arts & Sciences. University College courses do not count toward these 48 credits.

No more than 15 units of pre-matriculation credit from all sources — Advanced Placement (AP) examinations, International Baccalaureate (IB), British Advanced (A) Levels — will be awarded. The units of credit awarded do not apply toward the 48 credits required in Arts & Sciences.

Transfer credit may not count toward the 48 units required in Arts & Sciences or toward the art major. Students wishing to transfer credit for course work completed at another institution must bring a course description to the associate dean of students for review. Grades for transfer courses will not appear on the student’s Washington University record and will not figure into the student’s grade point average.

**Attendance**

The College of Art allows the professor of each course to decide how many absences a student may have and still pass the course. Professors are expected to give reasonable consideration to unavoidable absences and to the feasibility of making up work that has been missed. Students are expected to explain to their professors the reasons for any absences and to discuss with them the possibility of making up missed assignments.

**Units and Grades**

In the College of Art, one semester unit of credit is assigned for every two hours of work completed in class and one hour of work completed outside of class per week for one semester. A student’s undergraduate grade point average is determined by dividing the number of grade points earned by the number of semester units for which grades of A, B, C, D or F have been recorded. Grades of P and F received for courses taken on the pass/fail option are not figured into the grade point average. A grade of C– or better must be received in major classes during the second, third and fourth year to count toward degree requirements. Students must maintain a minimum 2.0 cumulative grade point average to graduate.

A grade point is a measure of quality assigned to units according to the following system:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points per Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
</tbody>
</table>

---
Grades of I, X and N will become grades of F if the deficiency is not made up within the next two semesters of residence. For a course repeated, students earn credit and grade points based on the second grade received.

### Auditing a Course

A student must get permission from the associate dean of students or the assistant dean/registrar in the College of Art before auditing a class.

### Incomplete Grades

If, following the last day for withdrawal from courses, a student experiences medical or personal problems that make satisfactory completion of course work unlikely, he or she may request a grade of I (incomplete) from one or more instructors and should take the following steps:

1. Discuss the request with the instructor before the final critique or portfolio review.
2. With the instructor's consent, complete an Incomplete Grade Petition signed by both the instructor and the student.
3. Return the signed petition to the associate dean of students for final approval.

### Pass/Fail Option

A student may take one non-art course per semester on a pass/fail basis (exclusive of courses that must be taken pass/fail). Any additional courses taken pass/fail in a given semester will not be counted toward the degree. All courses with an F10, F20, X10 and X20 department number must be taken for credit, unless otherwise noted. CWP 100 College Writing 1 also must be taken for credit.

### Repeating a Course

If a student retakes a course, both registrations will show on the transcript. The symbol R will appear next to the grade for the first enrollment; the grade and units in the second enrollment will be used to calculate the GPA. No student may use the retake option to replace a grade received as a sanction for the violation of the Academic Integrity Policy. A retaken course must be taken for the same grade option as the original course. Courses completed at institutions other than Washington University are not applicable under this policy.

### Academic Probation and Suspension

A student whose semester grade point average is below 2.0 (grade of C) or who falls below a “pace” of 66 2/3 percent (number of credits earned divided by the number of credits attempted) will be placed on academic probation. If, after the following semester, the semester grade point average is still below 2.0, or if the pace is below 66 2/3 percent, the student may be ineligible for normal advancement or may be suspended. While the college desires to give all students the opportunity to prove themselves, it is not in the best interest of either the students or the college to permit students to continue indefinitely in educational programs in which they are not producing satisfactory results.

### Major Declaration and Transfer

A student declares an art major simply by registering for one using the university’s online registration system (WebSTAC). Once the student has selected and registered for a major in the College of Art, he or she must obtain written permission to change to another major within the College. Students requesting a transfer of major must be in good academic standing. Major Transfer Request forms are available in Bixby Hall, Room 1, and must be filed before the course drop deadline of the semester in which they wish to transfer. Credit transfers between majors are at the discretion of the accepting major faculty.

### Study Abroad

The Sam Fox School and Washington University offer a wide range of undergraduate study abroad programs. For more information, visit http://samfoxxschool.wustl.edu/node/4133.
Leave of Absence

A student may request a leave of absence from the college for one semester at a time, up to one year. If this is granted, the student may re-enroll at the end of that time without going through further admission or readmission procedures. A Request for Leave of Absence form, available in Bixby Hall, Room 1, must be completed before a leave of absence will be granted. In the case of a medical leave of absence, a letter of clearance is required from the director of Student Health Services before the student will be permitted to re-enroll.

Digital Technologies

Technology plays a critical role in the educational experience. The College of Art is committed to the integration of relevant technology into the curriculum. Students entering the sophomore year are required to have an advanced computer and software. Supplemental purchases (monitors, scanners, tablets, etc.) may be necessary as students advance and declare a major. Information is available at http://samfoxschool.wustl.edu/node/6747.

Retention of Student Work

The College of Art reserves the right to hold a student’s work(s) for exhibition purposes and holds reproduction rights of any work(s) executed in fulfillment of course requirements.

Administration

College of Art/Graduate School of Art

Heather Corcoran
MFA, Yale University
Director, College and Graduate School of Art
Jane Reuter Hitzeman and Herbert F. Hitzeman Jr. Professor of Art

Patricia Olynyk
MFA, California College of the Arts
Director, Graduate School of Art
Florence and Frank Bush Professor of Art

Majors (directory)

Below is a list of majors offered by the College of Art. Click the link to view more information about a specific major.

- Art — with optional concentrations in:
  - Painting (p. 81)
  - Photography (p. 81)
  - Printmaking (p. 81)
  - Sculpture (p. 81)
- Communication Design (p. 81)
- Fashion Design (p. 81)

Minors (directory)

Below is a list of minors offered by the College of Art.
Art (p. 82)
Design (p. 82)
Visit the Sam Fox School website for specific requirements.
Arts & Sciences

The College of Arts & Sciences is the largest undergraduate program at Washington University, offering students the most diverse range of courses in more than 50 different fields, ranging from anthropology and biochemistry to mathematics and performing arts.

The college draws on the rich and varied resources that this distinguished university has to offer — a creative and internationally recognized faculty, a diverse and able student body, a superior library, and excellent opportunities for advanced study. As the center of intellectual life on the campus, the College of Arts & Sciences benefits from and contributes to the studies of architecture, art, business, engineering, law, medicine and social work.

Of central importance to the life of the college is the quality of teaching. Undergraduate students have the opportunity to learn from and work beside stimulating teacher-scholars who are leaders in their fields. Our nationally recognized faculty, which numbers more than 500, is made up of artists, biologists, chemists, economists, historians, philosophers and poets, all of whom bring the excitement and diversity of new ideas into the classroom.

Governance

The College of Arts & Sciences is bound by the charter of the university and is ultimately responsible to the University Board of Trustees, which delegates to the chancellor the administration of the university. In turn, the chancellor delegates to the deans and faculty of the College of Arts & Sciences responsibility for its internal governance.

Because the college is continually reassessing its objectives and policies, faculty and students alike may take the initiative in proposing changes in curriculum and policies. New programs or proposed modifications are reviewed by committees whose members represent the diverse points of view of the academic community.

By action of the Faculty of Arts & Sciences in January 1969, revised in May 1971, the ArtSci Council shares joint responsibility with the faculty for college-wide degree requirements, the grading system, and those policies that directly affect the lives of students. The ArtSci Council appoints representatives to various standing and ad hoc college committees.

The Curriculum

The College of Arts & Sciences fosters in its students the quintessential qualities of a liberal arts education: a heightened spirit of inquiry, an ability to organize and synthesize information, skills in written and oral expression, and a familiarity with the ways in which thoughtful men and women discover those commitments and values that make life worthwhile. By incorporating the college’s manifold intellectual resources — people, libraries, laboratories, studios — Arts & Sciences students “learn how to learn,” developing both the flexibility and the habits of thought necessary to the ever-evolving worlds of work and global citizenship.

The college’s academic program has two principal objectives. First, it provides students with an understanding of the range of human knowledge and attainment by developing an appreciation of the characteristic problems, achievements and limitations of the various fields of human endeavor. The curriculum works to ensure this understanding by requiring a minimum amount of study (9 units/three courses) in each of three broad areas of study — Natural Sciences & Mathematics; Social & Behavioral Sciences; and the Humanities — and three to four courses (9–12 units) in a fourth area, Language & Cultural Diversity. Collectively, these area requirements make up approximately one-third of the units needed to graduate.

Second, the college’s academic program gives students the opportunity to study a subject or area in a sustained, intensive way. After a period of initial investigation (typically two to three semesters) during which students explore the richness inherent in the various fields of study, a student declares an area of concentration, the major. The college offers more than 30 traditional subject majors, such as chemistry, English and music, and more than 20 interdisciplinary majors, such as American Culture Studies; International & Area Studies; and Women, Gender, and Sexuality Studies. Students also may develop an individualized special major.

In all departments, students are encouraged to proceed as their strengths and interests lead them. Placement examinations are used in many departments to enroll undergraduates in courses at the levels their previous training warrants; in other departments, proficiency examinations are available (see the Proficiency and Placement Examinations page of this Bulletin, or the college’s placement website.

The degree requirements and policies in the 2014–15 Undergraduate Catalog (Bulletin) apply to students entering Washington University during the 2014–15 academic year. To view catalogs from prior years, choose Prior Bulletins from the left-hand menu, or click here.

Academic Advising

To assist students with their undergraduate planning, the college provides a closely coordinated academic advising program. Matriculating students have a specially selected four-year academic adviser with whom they will meet regularly during the first year to help with the transition into the university and to help select courses for the fall and spring semesters. After the first year, students meet each semester with their four-year academic advisers prior to registration to discuss interests, goals and academic course work. Students are encouraged to consult with
their four-year academic advisers any time they need assistance throughout the school year.

Upon declaring a major, students are also assigned a major adviser in the department of their principal area of study. The extent of the adviser’s assistance depends on a student’s individual needs and wishes. Consultation with a major adviser, in addition to the four-year academic adviser, is required each time a student prepares to register for courses.

Students with problems or questions related to academic issues are invited to visit the College Office at any time. One of the deans is available every day on a walk-in basis to answer questions or to provide references to an appropriate source of help. Important among these sources are individual faculty members with particular specialties who may be able to answer the student’s questions. In addition, the Writing Center, Career Center, Student Health Services, and Cornerstone: The Center for Advanced Learning provide a wide range of services, including individual and group instruction; interest tests and advice; individual sessions with trained counselors about educational and personal problems; and the improvement of learning skills.

Pre-Matriculation Credit

Students may earn pre-matriculation credit for college-level courses completed before enrollment at Washington University as a first-year student. Sources for pre-matriculation credit include Advanced Placement (AP) examinations, International Baccalaureate (IB), British Advanced (A) Levels, course credit earned by proficiency (e.g., back credit), and college credit earned after the junior year of high school that was not applied to high school graduation. (Credits earned via the High School Summer Scholars or High School College Access programs through University College are considered to be pre-matriculation units and are subject to the same regulations).

Although all accepted pre-matriculation work is noted on the transcript so that the student may go directly into advanced courses, the maximum number of pre-matriculation units of credit awarded is 15. Pre-matriculation course work does not fulfill distribution requirements, but it may fulfill requirements for majors and minors. If a student enrolls in and completes a course equivalent to that for which pre-matriculation credit has been granted, the pre-matriculation units for the course in question will be removed from the student’s record. For more information, see the section titled “Pre-Matriculation Units” on the Admissions Procedures (p. 12) page of this Bulletin.

Academic Programs for Entering Students

First-year students may choose one of the following programs that provides a basic structure for their course selection. Each option provides an effective means of discovering personal and intellectual interests.

Focus Program

Focus is a one-year program of linked seminars designed to bring students with similar intellectual interests into a close mentoring relationship with members of the faculty. A number of Focus programs are offered every year, each built around a seminar topic reflecting the professor’s particular area of expertise. Students in each Focus program also may attend a “companion” course chosen to encourage exploration of the seminar topic from varying perspectives. The Focus program provides a coherent, group-oriented learning experience, while still allowing time for electives (see Focus (p. 451) page).

Global Citizenship Program

Through this year-long program, selected first-year students acquire fundamental skills relevant to International and Area Studies (IAS). The program consists of two courses, one taught each semester, and a weekly, one-credit workshop that runs the entire academic year. The Global Citizenship program examines what it means to be a citizen of the world while challenging its participants to engage both demanding texts and real-life scenarios. The fall semester seminar provides students with a useful theoretical framework for their second semester practicum. The practicum may consist of case studies, proposals and field research. Students work together and with recognized experts in a variety of professions to produce substantive case proposals and action-based documents. As part of the weekly workshop, students collaborate with their peers to produce well-researched and nuanced events geared toward the Washington University community, greater St. Louis, and internet publication.

The Mind, Brain and Behavior Program

The Mind, Brain and Behavior Program is a two-year program that introduces students to the key ideas about the mind-brain interaction by examining attention, memory and language — three central mental abilities that are primary areas of research in cognitive science. Professor-led discussion groups explore questions such as: What is the relation between attention and consciousness? Why do we misremember past experience? When the brain is damaged, why are only certain functions lost?

In the second year, students engage in hands-on research under the guidance of a faculty mentor (see Mind, Brain and Behavior).

Medicine and Society

The Medicine and Society Program is an exciting opportunity for undergraduate students in Arts & Sciences to address the important social and cultural foundations of health and illness in human societies, with a specific emphasis on service and research opportunities in health-related sites in St. Louis. Students who are accepted into the Medicine and Society Program are enrolled in a year-long Freshman Seminar on culture, health and society in the Department of Anthropology. This seminar provides the academic foundation for future community health work in St. Louis.
Beginning in the sophomore year, students identify and select a local community health site for their internship. Internship sites may include the St. Louis city and county health departments, various nongovernmental health aid agencies, sites for delivery of clinical care and research, and health-related philanthropic foundations.

The final requirement for the Medicine and Society Program is the Rivers Project, a fourth-year paper, thesis, or other project designed to demonstrate the student’s mastery of essential concepts and ideas in health and wellness. This experience provides an excellent foundation for future study in medicine and public health, as well as any of the allied health professions (see Medicine and Society (p. 674)).

**Pathfinder Program**

The Pathfinder Program in Environmental Sustainability gives participating students a chance to engage in interactive study of the environment with a small group of motivated undergraduates and a senior faculty member. Through case studies and field trips, students examine the issues surrounding environmental sustainability and the preservation of the environment for future generations. While participating in the Pathfinder Program, students may pursue a major in biology, chemistry, earth and planetary sciences, environmental studies, mathematics, or physics in the College of Arts & Sciences, or pursue a major within the School of Engineering & Applied Science. The Pathfinder Program supports the concept that taking interrelated courses and learning both analytical and technical skills not only positions students to undertake a senior-year capstone research experience but also prepares them for their future careers or graduate studies (see Pathfinder).

**Text and Tradition Program**

This two-year program explores many of the fundamental texts and concepts of Western history, which have served as both foundations and obstacles for the development of some of the most significant cultural, moral and political institutions of modern society. Through close reading, critical analysis and frequent writing, two seminars each term explore texts by such writers as Homer, Plato, Machiavelli, Cervantes, Locke and Marx. The discovery of the self, the origin of ideas such as liberty and property, and the impact of the scientific revolution are some of the themes examined. The program’s professors serve as participating students’ academic advisers. Text and Tradition courses serve as introductory courses for many of the humanities departments and programs in Arts & Sciences; they also provide a foundation for students interested in pursuing an interdisciplinary major in the humanities under the auspices of the Interdisciplinary Project in the Humanities (see Interdisciplinary Project in the Humanities).

**Standard Program**

Although encouraged, Focus and multiyear programs are not required. Students who have already made a firm commitment to a particular discipline in the natural sciences, social sciences or humanities, or who are uncertain about what they would like to pursue, also have a rich array of academic choices throughout their college careers. The course schedule can be either widely exploratory or oriented toward a particular objective such as pre-health studies. Such students are strongly encouraged to consider enrolling in a freshman seminar when selecting courses in consultation with their four-year academic advisers.

**Major Fields of Study**

At a minimum, a major consists of 18 advanced (300-level and above) units, all letter-graded and completed with at least a C–. Individual departments may specify additional units or stricter minimum-grade requirements. Students should refer to the department program pages in this Bulletin for program-specific requirements.

A student graduating with a Bachelor of Arts may receive no more than a total of two majors and a minor or one major and two minors.

Major declaration is initiated online through WebSTAC. The relevant department or interdisciplinary committee will receive notification of the student’s request to declare the major. The declaration of major will not be processed until the student completes any action required by the department as indicated in the WebSTAC application. When the declaration of major is complete, the new major will appear in the Current Programs section of the student’s Major Programs page in WebSTAC, and an adviser for the new major will be assigned by the department.

**Second Majors**

Students may complete more than one major, including a second major in the Olin Business School or in the School of Engineering & Applied Science. A second major is not required to earn the degree.

If a student has two majors, each major must have 18 upper-level units of credit independent of the other. Individual academic departments may enforce a stricter rule regarding double-counting of courses between majors, second majors and minors.

Students in business, engineering, architecture or art may choose to pursue a second major in the College of Arts & Sciences. These students will receive one degree, a BS or BFA, with two majors — one in the professional school and one in the College of Arts & Sciences.

**Minor Fields of Study**

Students developing a significant interest in one or more fields of study beyond the major may choose to pursue a minor in those fields. A minor is not required to earn the degree. Minors may be fulfilled in an area closely related to the major or, to add more breadth to the student’s educational program, in a very different area of study. A minor typically comprises 15 to 21 units of credit, all letter-graded and completed with a
grade of C– or better. At least nine of these units of credit must be at the 300-level or above and at least half of the courses must be completed in residence at Washington University. Specific course requirements for a minor are determined by each department or program and are detailed in the department program pages in this Bulletin.

If a student has a major and a minor, the major must have 18 upper-level units independent of the minor. The minor must have 12 units independent of the major. If a student has two minors, each minor must have 12 units independent of the other.

In addition to pursuing the broad array of minor programs offered through the college, students may undertake minors in Architectural Studies, Art, and Business as well as Computer Science, Electrical Engineering and Systems Engineering in the School of Engineering & Applied Science.

Minor declaration is initiated online through WebSTAC. The relevant department or interdisciplinary committee will receive notification of the student’s request to declare the minor. The declaration of minor will not be processed until the student completes any action required by the department as indicated in the WebSTAC application. When the declaration of minor is complete, the new minor will appear in the Current Programs section of the student’s Major Programs page in WebSTAC.

The Special Major and Special Minor

On some occasions, a student’s interests may fall in the intersection of two or more formally organized major programs, in which case a student may propose a special major that brings the related course work together. Students who propose a special major should be prepared to undertake honors-level work, as all special majors must complete a capstone project of 3 to 6 units the senior year.

Students interested in creating a special major or minor must confer with the dean charged with coordinating this program. After consultation, students must submit to the coordinator a formal proposal consisting of: (1) a description of the program of study, including an explanation of the program’s integrating idea; (2) a list of courses to be taken; (3) a letter of support from the proposed academic adviser; and (4) a letter of support from a faculty member in a second, related department who has approved the proposal.

A proposal for a special major or minor must be submitted no later than the fifth semester of undergraduate enrollment. The Committee on the Special Major and Minor is responsible for final action on proposals.

Special Academic Options

Overseas Study Programs

The guiding principle of international study through the College of Arts & Sciences is to encourage students to acquire the broad cultural knowledge, the languages and the practical skills to enable them to participate fully in a global society.

For information about the 100-plus study abroad programs offered in more than 50 countries, visit the Overseas Programs web page or the web pages of specific departments and programs.

Study abroad also may serve as a component of the Global Certificate, a unique program enabling students to “globalize” any major in any school. To learn more about the Global Certificate Program and its opportunities, visit the program’s website or its Bulletin page (p. 35).

Individual and Group Performance

Opportunities for individual and group performance include participation in various musical organizations sponsored by the Department of Music (such as symphony orchestra, wind ensemble and mixed choir) and in courses offered in physical education. To encourage students to pursue such physical, social and creative activities, the college allows up to 12 units of credit toward the bachelor’s degree for successful completion of enrollment in individual and group performance. Exceptions to the minimums can be made for students majoring in departments requiring a large number of performance courses, such as dance, drama and music.

Internships

Students participating in internships that contribute to their academic or professional development may earn credit for unpaid internships. Registration in an internship for credit shall be conditional on satisfactory completion of the “Learning Agreement” form provided by the Career Center and the approval of this completed form by the Career Center and the internship sponsor.

Credit awarded for an internship shall correspond to the time spent in work activities. The student is expected to work 60 hours of internship experience over a period of six to eight weeks for each unit of credit. Registration for 1 to 3 units of credit is possible.

Students may complete the work for an internship over the summer and receive credit during the subsequent semester. Any internship completed this way, however, must satisfy all requirements stated here. The learning agreement must be submitted and approved prior to beginning work at the internship site.

Internship courses shall be offered for credit/no credit grades only and therefore count toward the maximum of 24 credit/no credit units that may be applied toward graduation requirements. Internships do not count toward the advanced units requirement and may count toward the major only with departmental approval. Students may not receive more than 3 units of internship credit in any semester and may count no more than 6 units of internship credit toward the 120 units required for
Part-Time Study: Nontraditional Students
The university recognizes that for certain students with high educational goals, full-time study may not be feasible or appropriate. Employment in demanding positions, extensive family responsibilities or other obligations may prevent an otherwise serious and competent student from completing the bachelor’s degree at a rate of 15 units a semester. With their varied experiences outside the university, such students make valuable contributions to the classroom environment as they pursue programs of study suitable to their special circumstances. Please contact University College at 314/935-6700 for more information about part-time study.

Tuition Reduction
Students who have completed eight full-time semesters in the College of Arts & Sciences and paid full tuition for eight semesters may seek reduced tuition for a ninth or subsequent semester, provided that they have 12 or fewer units to complete. Students must petition the Dean’s Office, College of Arts & Sciences, 104 Cupples II Hall. Students who successfully petition for tuition adjustment for the ninth or subsequent semester will pay only for the units of credit that they attempt (proportionate to the full-time standard for tuition).

Combined Undergraduate Degree Opportunities
Students may work toward the Bachelor of Arts degree in the College of Arts & Sciences while simultaneously earning another undergraduate degree in business, engineering, architecture or art. Students undertaking this “Dual Degree” program must earn 150 units, 90 of which must be in the College of Arts & Sciences; fulfill the requirements for a major in each of the two schools; and complete the distribution requirements for both schools. Interested students should contact both a dean in the college and the designated dean in the appropriate professional school as early as possible in the undergraduate career.

Majors Across Schools
Students may earn an AB degree with a first major in the College of Arts & Sciences and a second major in business or engineering by fulfilling all the distribution requirements for the AB degree and completing the requirements both for the first major in Arts & Sciences and for the second major in business or engineering. With careful planning, this can be accomplished within the 120 units required for the AB degree although students should keep careful count to ensure that they complete at least 90 units of credit in the College of Arts & Sciences. For further information on second majors in business, visit olin.wustl.edu, and for further information on the second major in engineering, visit engineering.wustl.edu.

The Accelerated AB/AM Program
Exceptional students who bring to the university a definite commitment to a field of study in the College of Arts & Sciences and a demonstrated capacity for intensive work may be able to complete a Master of Arts (AM) degree in a one-year accelerated program after completing the AB degree. This accelerated program, which begins each year in the fall semester, is open exclusively to students graduating in the immediately preceding December, May or August. Applications may be submitted anytime during the senior year through August 1st, and Graduate Record Examination (GRE) scores are not required. The application for admission must be made to the department, which forwards the application and recommendation for admission to the Graduate School of Arts & Sciences. Application forms are available on the graduate school’s website. Some departments may not participate in this program, and some departments that do not otherwise offer a master’s degree may provide this opportunity to Washington University undergraduates. Contact the relevant department for more specific information about its admission policies and requirements. Students admitted to the program will be regular, full-time graduate students enrolled in the Graduate School of Arts & Sciences at Washington University.

Most AM degrees in Arts & Sciences require 36 credits. The accelerated program allows Washington University undergraduates to complete a master’s degree in one academic year by applying up to five 3-credit courses or four 4-credit courses (a maximum of 16 units), taken as an undergraduate at the 400-level or above, toward the master’s degree requirements. For master’s programs requiring fewer than 36 units, three courses at the 400-level or above (9–12 units) may be applied toward the AM degree. These undergraduate courses must be in an appropriate discipline, approved by the department, and completed with a grade of B or higher.

The AB and Master’s Degrees in the Professional Schools
The College of Arts & Sciences, in conjunction with the Olin Business School, the School of Engineering & Applied Science, the School of Medicine (Program in Occupational Therapy), and the George Warren Brown School of Social Work, offers joint (3-2) degree programs. If accepted into a 3-2 degree program, a student may work toward the AB degree during the initial three years at Washington University and the professional degree during the fourth and fifth years. A student electing to do a 3-2 program must complete a combined 150 academic units to earn both the AB degree and the professional degree.

Prior to entry into a 3-2 program, a student in the College of Arts & Sciences must complete:
Undergraduate students are encouraged to contact a pre-health professions adviser to discuss academic plans.

The 3-2 program combines three years of undergraduate liberal arts course work (at least 90 academic units in Arts & Sciences) with two years of graduate study in occupational therapy. The 90 units of Arts & Sciences course work must include the prerequisites for entry into the Program in Occupational Therapy. Application to the OT program occurs in the fall of the junior year. Qualified, recommended 3-2 students from Washington University receive priority admission status to the Program in Occupational Therapy. The AB will be awarded following successful completion of the fourth year of course work; the Master’s of Science in Occupational Therapy will be awarded following the fifth academic year and six months of fieldwork.

The following prerequisite courses must be completed with a grade of B– or better prior to matriculation in the Program in Occupational Therapy:

- 3 units in biology (200-level or above)
- 3 units in physiology
- 3 units in other physical sciences, such as anatomy, neuroscience, chemistry or physics
- 3 units in developmental psychology (introductory psychology is a prerequisite)
- 3 units in other social sciences, such as abnormal psychology, anthropology or economics
- 3 units in statistics (behavioral, psychological, educational or mathematical)

Interested students are encouraged to take OT courses available to undergraduates, such as Images of Disability in Film & Literature, or Disability, Quality of Life & Community Responsibility, both offered through the college’s General Studies department.

Applicants must also take the Graduate Record Exam and demonstrate competency in medical terminology and computer skills. Completion of at least 30 hours of volunteer/observation time in an occupational therapy-related setting is also required.

The Doctor of Occupational Therapy (OTD) is a professional degree providing students the opportunity to focus their OT studies in one of four areas of concentration: Productive Aging; Social Participation and the Environment; Work and Industry; and Pediatrics. The OTD requires 39 months of course work and fieldwork. A full description of degrees in occupational therapy is available from the office of the Program in Occupational Therapy and at the website: www.ot.wustl.edu.

Information on financial aid for this program may be obtained from the Office of Financial Aid at the medical school.

Occupational therapy merit scholarships are available for students entering the program.
Social Work

This 3-2 program leads to an AB degree from the College of Arts & Sciences and an MSW degree from the George Warren Brown School of Social Work. Interested students should apply to the George Warren Brown School of Social Work during the first semester of the junior year. Applicants to 3-2 will be evaluated on the same basis as students applying with an undergraduate degree. All applicants must have completed at least 30 units in the social sciences (anthropology, economics, political science or psychology) and must have maintained at least a B+ average in all undergraduate work.

After the fourth year of study, students in this program complete the AB degree and earn the MSW at the end of five years.

Undergraduate Pre-professional Preparation

Students planning to pursue pre-professional studies should refer to the general recommendations given below. For more specific recommendations, visit the appropriate web pages.

Architecture

See the College of Architecture (p. 44) section in this Bulletin.

Business Administration

Students in the College of Arts & Sciences are welcome to consult with the associate dean for the undergraduate program in the Olin Business School concerning any aspect of preparation for careers in business. For more information, visit the Olin Business School’s website.

Law

The two most significant factors law schools use in determining whom to admit for legal study are the undergraduate GPA (taking into consideration the difficulty of courses attempted and the breadth of study) and the score on the Law School Admission Test (LSAT). Admission to law school requires a bachelor’s degree.

There is no required set of courses for pre-law study at the undergraduate level. Many law school applicants have majors in political science, history, philosophy, economics, and English, but law schools also seek students with undergraduate majors in science, engineering, business and other disciplines. Whatever area(s) pre-law students choose to emphasize in their undergraduate studies, they should take courses that require significant amounts of writing, that develop analytic thinking skills, that encourage application of principles or theories to new situations, and that require original writing and revision of written work in response to comment and critique. It is also important to learn to read and analyze complex written material and to develop sound research skills.

Political science, history, philosophy and economics courses can help to develop an understanding of the traditions behind and the development of the U.S. legal system. Logic, accounting and statistics courses also provide valuable background for legal study and the practice of law.

The pre-law advisers in the College of Arts & Sciences are available to help plan a course of study and prepare a strategy for applying for admission to law school. For more information, visit the Pre-Law website.

Medicine

Pre-medical students in the College of Arts & Sciences of Washington University complete the bachelor’s degree before admission to a medical school. In addition to fulfilling the requirements for the AB, pre-medical students must fulfill the entrance requirements of the medical schools to which they plan to apply. Specific requirements, which may vary, are summarized in the Medical College Admission Requirements handbook, published annually online by the Association of American Medical Colleges.

Pre-medical students must demonstrate high academic achievement and must possess the character, responsibility and level of commitment suitable for a career in medicine. While requirements for specific medical schools are increasingly varied, most schools have traditionally required at least one year each of English, general biology, inorganic chemistry, organic chemistry and physics, with laboratory components traditionally required for all of the core science courses. Medical schools also encourage applicants to develop a broad intellectual background that includes the humanities, the social and behavioral sciences, and a demonstrated understanding of and appreciation for social and cultural diversity.

Students interested in the health professions may choose a major in any field — the humanities, the social sciences or the natural sciences — as long as they complete the pre-medical requirements. Any student planning to apply to MD–PhD programs is strongly advised to major in one of the natural sciences and to begin gaining bench research experience no later than the beginning of the sophomore year. Research opportunities are available both on the Danforth Campus and at the School of Medicine and are open to both science and nonscience majors. Health-related volunteer opportunities are also widely available.

Students entering the university planning to apply to medical school should, with the aid of their advisers, structure their course of study to include the medical school requirements. There is no one right or best sequence of courses: There are numerous pathways to medical school. Because each student’s pathway is different, students interested in a career in the health professions are encouraged to consult the pre-health deans in the college in addition to their academic advisers. Additional information can be found at the pre-health website.
Physical Therapy

Students interested in pursuing a career in physical therapy must complete a bachelor’s degree before entering the Doctor of Physical Therapy (DPT) program.

Prerequisites for the DPT vary from school to school but generally include the following course work:

- 8 units in general biology
- 8 units in chemistry with laboratories
- 8 units in physics with laboratories
- 3 units in anatomy (human, vertebrate, comparative or anatomical kinesiology)
- 3 units in physiology (human physiology preferred)
- 3 units in trigonometry (calculus is acceptable)
- 3 units in statistics
- 6 units in psychology (to include abnormal psychology)
- 6 units in English (to include English composition or an upper-level writing course)
- 6 units in social sciences or the humanities

DPT programs also require applicants to take the Graduate Record Examination (GRE) and to demonstrate competence in medical terminology. Admission factors include grade point average, GRE scores, letters of recommendation and written essays.

Interested students will find additional information about Washington University School of Medicine’s Program in Physical Therapy at physicaltherapy.wustl.edu.

University College

Students in the college may enroll in course work offered by University College as long as they do not exceed one course a semester and a maximum of 24 units. University College courses are subject to the degree requirement that stipulates only 30 total units from the other schools of the university may be applied to the Bachelor of Arts degree. University College courses do not fulfill distribution requirements and can only count for a major or minor with approval from the relevant department. Students in the College of Arts & Sciences do not receive credit for online courses offered by University College.

Degree Requirements

The faculty of the College of Arts & Sciences believes each student should strive toward breadth and depth of study, as represented in the formal requirements. The faculty also believes that primary responsibility for selection of an academic program rests with the student, in consultation with academic advisers. This freedom of choice carries with it a corresponding responsibility for the consequence of such choices, and students are therefore expected to familiarize themselves with and meet the requirements detailed below.

Planning

The degree requirements for the Bachelor of Arts degree in Arts & Sciences are designed to provide students with strong and sustained training in writing and numerical applications; to enable students to construct a coherent program in which courses reinforce each other in challenging and productive ways; and to take advantage of two distinctive features of the academic environment at Washington University — the strong tradition of cooperation among faculty working in different disciplines and the fact that teaching and learning at Washington University draw energies from an environment of vigorous and creative research.

The College of Arts & Sciences regards active student engagement in curricular planning as central to successful student learning. Each semester, students’ advisers will help them project a personalized academic plan that responds to what they have already learned — about the university, about the structure and aims of intellectual disciplines, and about themselves.

*By the end of the sophomore year, students must have declared a major and constructed and nominated a preliminary online curricular plan that will satisfy all the following General Education requirements:*

**Basic Skills**

A. College Writing I (3 units): Students demonstrate proficiency in reading and writing English and begin to develop mature skills in framing and revising arguments by completing course work determined by The College Writing Program with grades of C– or better. This requirement should be completed in the freshman year.

B. Applied Numeracy (3 units): Students develop their skills in numerical applications by completing one of an approved list of “AN” courses with a grade of C– or better. Students often find that there is an AN course in their major field of interest. This course may also satisfy other degree requirements.

C. Social Differentiation (3 units): Students take one course that substantially engages in the analysis of such forms of social differentiation as race, class, ethnicity and gender. This course, which may be taken credit/no credit, must be selected from an approved list of “SD” courses; it may also satisfy other requirements.

D. Writing-Intensive Course (3 units): To consolidate their written communication skills, students must take a writing-intensive course, preferably in their major field. The course, selected from an approved list of “WI” courses, must be completed with a C– or better; it may also satisfy other requirements.
Area Requirements

A. Students must complete course work in each of the following academic areas:

1. Humanities (HUM): three courses totaling at least 9 units
2. Natural Sciences and Mathematics (NSM): three courses totaling at least 9 units
3. Social Sciences (SSC): three courses totaling at least 9 units
4. Linguistic and Cultural Diversity (LCD): in this area, students take either three sequenced courses of at least 3 units each in a single foreign language, or at least four courses designated “LCD” of at least 3 units each

Up to 12 units of the area requirements may be taken credit/no credit.

B. To achieve depth and coherence, students must complete three integrations in at least two of the four areas of study (HUM, NSM, SSC, LCD). There are four types of integrations:

- Majors, second majors and minors
- Focus and other multisemester first-year programs
- Designated study away programs
- Integrated inquiries

For a detailed list of Integrations, visit the Course Listings website.

The Major

Students must complete a major of no fewer than 18 units of courses numbered 300 or above with a grade of C– or better. Degree completion is based on the primary major of record. At least half of the units for the major must be completed in residence. Students are strongly encouraged to complete a capstone experience in their major as a way of culminating their undergraduate education.

For more details regarding majors, including information on second majors, special majors and majors across schools, see the main Arts & Sciences section of this Bulletin. For more information regarding specific departments’ major requirements, visit the individual program web pages (p. 154).

Additional Requirements

A. Students must complete 120 units with at least 30 units in advanced courses (numbered 300-level and above). The 30 units in advanced courses may include the number of advanced units required for the major.

B. Students must have an overall GPA of at least 2.0.

C. Students must earn the final 30 units toward the degree at Washington University, enrolled in the College of Arts & Sciences. Students pursuing 3-2 degrees should follow the requirements laid out by their master’s programs.

D. Students must be recommended by the College of Arts & Sciences to the Board of Trustees.

Regulations

A. No more than 24 units may be earned using the credit/no credit option, and no more than 12 of the 24 credit/no credit units may be for area distribution requirements.

B. No more than 15 units of pre-matriculation credit may be counted toward the degree. Pre-matriculation sources include Advanced Placement (AP), International Baccalaureate (IB), British Advanced (A) Levels, course credit earned by proficiency (i.e. back credit), and college courses taken after the junior year in high school but not applied toward the high school diploma. Credits earned via the High School Summer Scholars or High School College Access programs through University College are considered to be pre-matriculation units and are subject to the same regulation.

C. Students may not earn more than 12 units toward the bachelor’s degree in group and/or individual performance courses. Exceptions may be made for students majoring in departments requiring a large number of performance courses for the major, such as dance, drama and music.

D. No more than 12 units of work may be taken outside the College of Arts & Sciences during the first and sophomore years. Thereafter, additional work may be taken with the approval of the adviser, provided that the student earns at least 90 units of credit in Arts & Sciences course work.

E. No more than 18 units of credit in independent study may be applied to the AB; no more than 6 units of independent study may be attempted in a single semester.

F. No more than 6 units of internship credit may be applied to the AB; no more than 3 units of internship credit may be attempted in a single semester.

G. A student may receive no more than a total of two majors and one minor or one major and two minors.

Transfer Students

Transfer students matriculating in the academic year 2014–15 will follow the requirements of the Integrated Inquiry Curriculum, outlined above. Where appropriate, previous course work may be applied to the distribution requirements based on the following guidelines:

A. Transfer students who have not taken a college writing course at their prior school will take College Writing 1 in their first year at Washington University. Students who have taken such a course may be eligible to submit a writing portfolio to the College Writing Program for evaluation. The program director will review the portfolio to determine if the College Writing 1 requirement has been satisfied or if the student must complete additional writing course work.
B. The transfer advisers will evaluate a student’s transcript on an individual basis. Generally speaking, a student transferring after one year at another school may count the other institution’s course work toward the college’s area requirements; however, the three required integrations must be completed through courses taken in residence.

C. Transfer students must be enrolled for at least four consecutive full-time semesters to satisfy the residency requirement. They must complete a minimum number of units at Washington University, and a minimum number of units in the College of Arts & Sciences, according to the following table. No more than 3 units per semester may be taken on a credit/no credit basis.

Finalization of the Transcript

Conferral of the degree finalizes the student’s academic record at Washington University. No changes can be made to the student’s academic record after May 31 for a spring degree, October 31 for a summer degree, or January 31 for a fall degree. All students are strongly advised to obtain a copy of their final transcript, available for order from the Office of the University Registrar via WebStac.

Academic Honors & Awards

Dean’s List: At the end of each semester, in recognition of exceptional scholarship, the college compiles a list of those students whose work has been particularly worthy of commendation. Students will be cited on the Dean’s List if they complete a minimum of 14 units of graded work while achieving a grade point average of 3.6 for the semester. No incomplete or “N” grades may be outstanding as part of the semester record. All work must be completed and grades posted by the first day of the following semester in order to be considered for Dean’s List. For Spring semester courses, all work must be completed by the beginning of Summer Session II (typically mid-June).

College Honors: Upon assessment by the College Office, the AB with College Honors will be awarded to students who achieve college-wide academic excellence as measured by a cumulative grade point average of 3.6 (for students in the class of 2016 and beyond) or better throughout eight semesters, but who have chosen not to participate in a departmental honors program.

Latin Honors: To be eligible for Latin honors, the student must have maintained a 3.65 grade point average through the sixth semester and must be accepted for candidacy by the relevant department or program. Latin Honors candidates must enroll in such courses as their department or program may require, satisfactorily complete a significant project appropriate to the nature of the discipline, and pass such written and/or oral examinations as the department or program may set. To earn such honors, they must also have maintained the minimum 3.65 grade point average through the final semester.

Upon certification by the department that the Honors program has been satisfactorily completed, the student may be awarded the AB cum laude, magna cum laude, or summa cum laude according to the following proportions: the top 15 percent in overall grade point average of the full cohort of Latin Honors candidates who complete the necessary requirements of their major departments will graduate summa cum laude; the next 35 percent magna cum laude; the next 50 percent cum laude.

To be eligible for Latin Honors, transfer students must have earned a minimum of 48 letter-graded Washington University units prior to the final semester. Grades earned at other institutions do not figure in the calculation of minimum averages required for eligibility for Latin Honors.

Phi Beta Kappa: For more than 200 years, election to Phi Beta Kappa has been a distinctive recognition of intellectual accomplishment in the liberal arts and sciences. The Washington University Chapter, Beta of Missouri, established in 1913, strives to enhance worthy intellectual endeavors and to recognize individual achievement.

Candidates for Phi Beta Kappa should have demonstrated both superior scholarship and breadth and depth of interest in the liberal arts. Study of a foreign language and of mathematics, while not required, strongly enhances candidacy. Extensive study in pre-professional fields detracts from candidacy.

Students do not apply for Phi Beta Kappa; rather, each year the Washington University chapter elects students into membership from the College of Arts & Sciences. The chapter also gives the annual Burton M. Wheeler Book Award for distinguished achievement in the first year. Selection committees are composed of Washington University faculty who are members of Phi Beta Kappa.

Departmental Prizes and Awards

Several departments recognize the superior achievement of graduating seniors with election to the honor societies of their major fields. These honor societies include Sigma Gamma Epsilon for earth and planetary sciences students, Omicron Delta Epsilon for economics students, Delta Phi Alpha for German students, Phi Alpha Theta for history students, Sigma Iota Rho for international and area studies students, Pi Mu Epsilon for mathematics students, Mu Phi Epsilon for music students, Pi Sigma Alpha for political science students, and Psi Chi for psychology students.
Departments may recognize work a student has accomplished within the major by awarding the major with highest distinction, high distinction, or distinction.

In a number of academic fields, special recognition is given to students whose accomplishments have been exceptionally noteworthy. The majority of such awards carry modest monetary prizes and include the following, listed alphabetically by department:

- Best essay on any subject related to African-American culture and life in the United States (African and African-American Studies)
- Henry Hampton Prize for Best Civil Rights Essay
- James Baldwin Essay Prize for Best Essay on African-American Culture and Life in the U.S.
- Julius Nyerere Essay Prize for Best Essay on African Culture and Life
- Louis Lomax Journalism Prize in African and African-American Studies
- Ralph Bunche Prize for Best Political Science Essay about Africans or African-Americans
- Sylvia Wynter Essay Prize for Best Essay on African Culture and Life Outside of the U.S.
- Lynne Cooper Harvey Undergraduate Writing Prize in American Culture Studies
- John W. Bennett Prize to the Outstanding Graduating Senior in Anthropology
- Mark S. Weil Prize for Distinction in Art History and Museum Practice
- Murphy Family Prize for Outstanding Honors Thesis in Art History and Archaeology
- Yale Book Prize for Distinction in Art History and Archaeology
- Harrison D. Stalker Prize in Biology
- Marian Smith Spector Prize for Outstanding Graduate in Biology
- John C. Snowden Prize for Outstanding Senior in Chemistry
- The Hemholtz Award in Chemistry
- The Lipkin Award in Chemistry
- The Wahl Award in Chemistry
- The Weissman Award in Chemistry
- Stanley Spector Memorial Award for Outstanding Paper in East Asian Languages and Cultures
- Ansehl Prize for Excellence in Chinese
- Yukiko Takahashi Prize for Excellence in Japanese
- Carl Conrad Prize for Excellence in Classical Studies
- Eugene Tavenner Prize for Excellence in the Study of Classics
- Edward Weltin Award for Excellence in the Study of Ancient History
- Liselotte Dieckmann Prize for Excellence in Comparative Literature
- William H. Matheson Prize for Excellence in Comparative Literature
- A.E. Hotchner Playwriting Competition Award
- Annelise Mertz Memorial Award for Outstanding Achievement in Modern Dance
- Ian D.W. Cramer Prize for Outstanding Achievement in Dance
- John J. Jutkowitz Memorial Prize for Outstanding Contributions in Performing Arts
- Margaret Ewing Memorial Prize for Outstanding Achievement in Acting
- Stephen H. Duncan Prize for Outstanding Achievement in Design and Technical Theatre
- Courtney Werner Memorial Prize for Outstanding Academic Achievement in Earth and Planetary Sciences

### Academic Regulations

#### Attendance

Successful education at the college level depends to a large extent on regular attendance at classes and laboratories. The College of Arts & Sciences has no fixed rules for “cuts” or “excused absences” but leaves to the judgment of each department or instructor the number of absences of any kind a student may have and still expect to pass a course. The faculty expects each instructor to give reasonable consideration to unavoidable absences and to the feasibility of making up missed work. The student is expected to explain to instructors the reasons for such absences and to discuss the possibility of completing missed assignments.

#### Units and Grades

The grading system used by the College of Arts & Sciences assumes that evaluation is useful to effective learning and that grades provide an indicator of accomplishment to the student, to advisers and the College Office, to graduate and professional schools, and to employers to whom the student chooses to submit them. Grades are symbols of achievement in a particular endeavor and should not be confused either with achievement itself or with personal worth.

Grades are important, particularly for students with pre-professional interests, but the student whose concern for grades is primary may lose sight of the total educational process.

Grades earned in physical education courses are not included in calculating the student’s GPA.
Auditing a Course

Students may register for a specific course as an auditor, which entitles them to all the privileges of a regularly enrolled member of the class. Audit courses do not count toward the degree. Consult the instructor on the requirements of a successful audit, as unsatisfactory performance results in a grade of Z. A successful audit results in a grade of L.

Incomplete Grades

If a student experiences medical or personal problems that make satisfactory completion of course work difficult or unlikely, he or she may request a grade of Incomplete (I) from one or more instructors. In such a situation, the student should take the following steps:

1. Meet with the instructor before the final examination or due date for the final paper to discuss the request.
2. If the instructor consents, agree on the work remaining to complete the course and on a date when it will be submitted.

If these steps are not followed, the instructor is under no obligation to award a grade of I. Failure to submit completed work by the last day of classes of the next full semester will result in the grade being changed automatically to a grade of F.

For spring semester courses, this will be the last day of summer classes, typically mid-August.

By action of the Faculty of the College of Arts & Sciences and the ArtSci Council, the college limits the number of accrued grades of Incomplete (I). The policy is intended to protect the student from building an overwhelming burden of unfulfilled course work. The regulation reads as follows: “Students who accrue three or more Incompletes will not be permitted to enroll for any subsequent semester until the number is reduced to two or fewer.” Should students have too many Incompletes, they will be declared ineligible for subsequent semesters until they have complied with the regulation. Compliance is normally achieved by the posting of grades online, but it also may be achieved by a note from the professor(s) to the College Office confirming that the student has turned in all requisite assignments for the relevant class(es).

Pass/Fail Option

To encourage students to enroll in courses they might not otherwise take, the faculty has established the credit/no credit option under which a student may register in courses and receive a grade of credit (CR) or no credit (NCR). In any semester, a full-time student may enroll in one course under the credit/no credit option. A maximum of 24 units earned under this option may be applied toward the AB degree. Students must designate which course is to be taken under the credit/no credit option each semester at the time of registration. No change into or out of the option may be made after the dates designated in the dates and deadlines calendar, published online in Course Listings each semester.

No more than 12 of the 24 units allowed for the credit/no credit option may be applied to area distribution requirements.

It is the student’s responsibility to discuss with the faculty member what constitutes a successful pass/credit in a particular course. Although the general pass mark is a C–, instructors have the discretion to set the pass mark higher in their individual courses.

The first-year writing course, the writing-intensive course, the applied numeracy course, and courses in the major and minor are excluded from the credit/no credit option. Pre-professional and prospective graduate students should also consider seriously the strong probability that professional schools may seek more definite grades than CR in courses that are required or strongly recommended for admission to professional or graduate study.

A few courses particularly designated by departments may require enrollment on a credit/no credit basis. When so required, students are permitted to elect an additional course to be taken credit/no credit but should consider carefully the consequences of that choice.

Reading Days and Final Examination Period

When registering for classes at Washington University, students commit to all course requirements including the examination procedures chosen and announced by the course instructor. In selecting courses, students are advised to take note of all final exam information. Students anticipating conflicts in their final examination schedule should seek to resolve them with the relevant instructors before enrolling. Students should not register for courses that result in three or more final examinations on one day. If a student does so, the instructors are not obligated to offer an alternative exam. For further information, visit the website of the Office of the Provost.

Final exam days and times are subject to change. The most current final exam schedule information can be found on the Course Listings website.

Minimum and Maximum Course Loads

The average course load necessary to fulfill the required 120 units for the bachelor’s degree in a timely fashion is 15 units — typically five courses — in each semester. Except for reasons of health or other special circumstances, students must take a minimum of 12 units to be considered full-time. Students may not enroll for more than 21 units without permission and an additional per-unit tuition charge. Any enrollment between 12 and 18 units is considered typical.
Courses in the college that require more preparation and class time than average — foreign languages, mathematics, and science — may carry 4 or 5 units of credit. When enrolled in these and other demanding courses, students should consider taking fewer than 15 units of academic work in a particular semester, then balancing such intensive semesters with modest increased units in subsequent semesters.

Repeating a Course
Students whose performance in a course has not met their expectations are permitted to retake the course, receive a second grade, and have the letter R, denoting the retake, placed next to the grade for the first enrollment. All registrations will show on the transcript; however, only the grade and units of the final enrollment will be used to calculate the GPA.

Please note: This procedure is not pedagogically sound and should be avoided in all but serious cases, such as a grade of D or less. The second grade, and have the letter R, denoting the retake, placed next to the grade for the first enrollment. All registrations will show on the transcript; however, only the grade and units of the final enrollment will be used to calculate the GPA.

Regulations: While courses initially taken credit/no credit (pass/fail) may be retaken for a letter grade, courses initially taken for a letter grade must be retaken for a letter grade. Credit earned in the original enrollment will not be revoked should a failing grade be earned in the second or subsequent enrollments. Except in the case of a retake of an unsuccessful audit, the retake policy will not be invoked if the grade option for any of the enrollments is audit.

No student may use the retake option to replace a failing course grade received as a sanction for violation of the Academic Integrity Policy.

Academic Probation and Suspension
Students are expected to maintain the highest level of scholarship during their time at Washington University. At a minimum, however, students must meet the standards set by the faculty as well as those mandated by the U.S. Department of Education. Those who do not complete at least 12 units or achieve a semester grade point average of 2.0 or better for each semester are subject to probation or, in extreme cases of poor academic performance, suspension. In certain cases, students who have completed at least 12 units and have a semester grade point average of at least 2.0 for each semester may still be placed on academic warning or probation if the Committee on Academic Progress identifies areas of significant concern about a student’s progress.

Students must make acceptable progress toward meeting degree requirements. Students must be on pace to complete their program by attempting no more than 150 percent of the credits required. Anytime students fall below completing 2/3 or fewer of the credits they have attempted overall, they are considered to not be achieving satisfactory academic progress (SAP). The College will work with those students to develop a plan to help them achieve acceptable pace within a set period of semesters. Additionally, if it is determined that a student cannot complete his or her program within the 150 percent maximum credits, the student may not continue their program of study at Washington University.

In the event of an academic warning or probation, or failure to meet SAP, the student will be matched with a progress counselor for the following semester. The student must complete an academic agreement with the progress counselor to map out how improvement will be achieved. Failure to establish these guidelines with the progress counselor by the deadline the Committee provides may result in the termination of the student’s enrollment for that semester. Furthermore, should a student agree to, but persistently fail to abide by, the terms established in the agreement, suspension may be invoked during the semester.

In order to be eligible for a return to good academic standing, a student on warning or probation must complete at least 12 units of credit and earn no single grade of C– or lower. Students who do not meet this standard may be subject to academic suspension from the college. Students suspended for academic deficiency are not eligible for readmission to the College of Arts & Sciences until they demonstrate, under the conditions set for each individual case, a capacity to work productively at the level required by the college curriculum.

Leaves of Absence
For certain students, time spent away from the academic setting is of great value in discovering objectives and gaining experiences not available within the academic community. Undergraduates in good standing at the completion of a term are eligible to take a leave of absence (LOA) upon petition to the College Office. Students on an LOA are assured reinstatement for the next two years. Before returning, students are asked to notify the College Office and submit a Reinstatement Form at least six weeks prior to the beginning of the appropriate term.

A student wishing to take a medical leave of absence (MLOA) must have a recommendation from Student Health Services submitted to the appropriate dean in the College Office prior to leaving and prior to re-enrollment. Upon reviewing the recommendations from Student Health Services and the student’s file, the dean in the College Office will decide whether or not to grant the request for the MLOA and/or for re-enrollment.

Transfer Credit
With preapproval, courses from accredited colleges and universities can be transferred to Washington University and will count toward a student’s 120 units required for the Bachelor of Arts degree; such courses may also serve as prerequisites to advanced courses and may count, with prior departmental approval, toward a student’s major or minor. They do not, however, substitute in Integrations or count toward other Arts & Sciences distribution requirements.
For further information pertaining to transfer credit, matriculating freshmen should visit the Pre-matriculation Credit section in this Bulletin (p. 140); transfer students, visit the transfer student section in this Bulletin (p. 147).

**University College Courses**

Students in the College may enroll in course work offered by University College as long as they do not exceed one course a semester and a maximum total of 24 units. University College courses are subject to the degree requirement that stipulates only 30 units from any of the other schools of the university may be applied to the Bachelor of Arts degree. University College courses do not fulfill distribution requirements and can only count for a major or minor with approval from the relevant department. Students in the College of Arts & Sciences do not receive credit for online courses offered by University College.

African and African-American Studies

The program in African and African-American Studies offers opportunities for students to explore the social, political and intellectual history as well as the literature, culture and artistic life of various peoples in the world who are African or of African descent.

The program examines a wide spectrum of experiences and issues and is both multidisciplinary and interdisciplinary in its approach. Courses are offered in the humanities, the social sciences and the performing arts. Main areas of concentration are East, West and Central Africa; the United States; and the Caribbean.

Students who major in the program are encouraged to design a course of study that focuses on either a particular area of interest or a more comprehensive examination of black culture and life. Students also have opportunities to do research with faculty or to take internships with organizations such as the Missouri Historical Society. Our summer programs in Kenya and Senegal as well as study abroad in other African countries can further enrich the student experience.

Courses in the program are numbered to assist students to progress from introductory courses (100-/200-level), to intermediate courses (300-level or higher), to advanced courses (400-level). The program also regularly sponsors lectures on topics of interest in all areas of the black experience. In many cases, lecturers participate in classes by giving special lectures within the classroom setting.

Departmental Prizes: The program also sponsors writing competitions that include monetary awards. They include the James Baldwin Prize for the best essay on any aspect of black culture and life in the United States; the Julius Nyerere Prize for the best essay on any aspect of black culture and life in Africa; the Sylvia Wynters Prize for the best essay on any aspect of black culture and life in the Caribbean, Central America, South America or North America (outside of the United States); the Henry Hampton Prize for the best essay on the civil rights movement or any book by the Rev. Dr. Martin Luther King Jr.; and the Ralph Bunche Prize for the best essay related to Africans or people of African descent and political science.

The Major in African and African-American Studies

Total units required: 27 credits

Required courses:
- AFAS 208B African-American Studies: An Introduction 3
- AFAS 209B African Studies: An Introduction 3
- AFAS 401 Senior Seminar 3

Elective courses: 18 units in advanced classes from the selections within our course offerings

Additional Information

Co-Curricular Requirements for Majors: The program regularly sponsors lectures and events, such as plays, film festivals, exhibits, field trips, and panels and speakers, which focus on contemporary or perennial topics of interest in all areas of the black experience. In many cases, guest lecturers and artists visit classes and interact directly with students. These program-sponsored events are, in part, designed to foster a vibrant social and intellectual community within the program and to give majors and minors a sense of identity of what it means to be part of the African and African-American Studies community. Majors must attend a minimum of six (and at least two per year) and minors must attend a minimum of three (and at least one per year) such African and African-American Studies–sponsored events to fulfill the program’s co-curricular requirement. (African and African-American Studies subsidizes events that require admission fees.)

Senior Honors: If a student maintains an overall grade point average of at least 3.65 and a major grade point average of 3.50 by the second semester of her or his junior year, she or he may be eligible to conduct a Latin Honors thesis with a core faculty member in the program in African and African-American Studies. Completed application forms for Honors should be submitted to the honors program director as early as possible, preferably before May 1 of the junior year.

The Minor in African and African-American Studies

Units required: 18

Required courses:
- AFAS 208B African-American Studies: An Introduction 3
- AFAS 209B African Studies: An Introduction 3

Elective courses: 12 units at the 300-level or above. Courses should be selected in consultation with the adviser.
Additional Information

Co-Curricular Requirements for Minors: The program regularly sponsors lectures and events, such as plays, film festivals, exhibits, field trips, and panels and speakers, which focus on contemporary or perennial topics of interest in all areas of the black experience. In many cases, guest lecturers and artists visit classes and interact directly with students. These program-sponsored events are, in part, designed to foster a vibrant social and intellectual community within the program and to give majors and minors a sense of identity of what it means to be part of the African and African-American Studies community. Majors must attend a minimum of six (and at least two per year) and minors must attend a minimum of three (and at least one per year) such African and African-American Studies-sponsored events to fulfill the program’s co-curricular requirement. (African and African-American Studies subsidizes events that require admission fees.)

L90 AFAS 1002 Foundations in African and African-American Studies
Designed to introduce the student to issues in African and African-American Studies and how students with AFAS degrees utilize their knowledge in graduate and professional programs or the working world. Particular attention is paid to the discipline of African and African-American studies, which engages with the artistic, cultural, historical, literary and theoretical expressions of the peoples and cultures of Africa and the African Diaspora. Faculty members as well as St. Louis professionals give one-hour lectures on their particular disciplinary approach, their research or their professional lives. Students are required to attend three outside lectures or performances. May be taken before declaring major, and may be taken by non-major.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS BU: IS

L90 AFAS 103D Beginning Swahili I
A beginning language course emphasizing acquisition of reading, writing and conversational skills in Swahili language. Through video and other multimedia presentations, students also are introduced to the culture of Swahili-speaking communities living in more than a dozen African countries. Five hours a week including culture and language laboratory hours. This course is strongly recommended for students participating in the Summer in Kenya Program. CBTL course.
Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: IS

L90 AFAS 1045 Wolof Language and Culture
This course introduces students to Wolof language and culture. Wolof is a West African language spoken in Senegal and the Gambia. It is also spoken on a smaller scale in Mauritania, Mali, French Guinea and in the migrant communities in the United States and France. This is the first course of a beginning-level of a Wolof program. In order to acquire a basic proficiency, students practice speaking, reading, writing and listening. Each module begins with a thematic and practical dialogue from which we can study vocabulary, aspects of grammar as well as a cultural lesson. Interactive material, including texts, images, videos, films and audio, are provided. Its aim is to provide students with knowledge of the basic structures of the language and the ability to communicate. Students also learn important aspects of life and culture of the Wolof.
Credit 3 units. A&S: LA A&S: IQ, LCD EN: H

L90 AFAS 1046 Wolof Language and Culture II
This course continues the introductory study of Wolof language and culture. Wolof is a West African language spoken in Senegal and the Gambia. It is also spoken on a smaller scale in Mauritania, Mali, French Guinea and in the migrant communities in the United States and France. In this second course of a beginning level of a Wolof program, students practice speaking, reading, writing and listening. Each module begins with a thematic and practical dialogue from which we can study vocabulary, aspects of grammar as well as a cultural lesson. Interactive material, including texts, images, videos, films and audio, are provided. The course’s aim is to provide students with knowledge of the more advanced structures of the language and the ability to communicate. Students learn important aspects of life and culture of the Wolof.
Credit 3 units. A&S: LA A&S: IQ, LCD EN: H

L90 AFAS 1096 Ragtime
Same as Music 109
Credit 2 units. A&S: LA A&S: IQ, LCD, LS BU: IS

L90 AFAS 1099 Ragtime
Same as Music 109
Credit 2 units. A&S: LA A&S: IQ, LCD, LS BU: IS

L90 AFAS 111 Freshman Seminar: Race and Ethnicity on American Television
Same as Film 110
Credit 3 units. A&S: TH, CD, SD A&S: IQ, LCD, LS BU: IS EN: H
L90 AFAS 1181 Freshman Seminar: Beats and Rhymes — Hip-Hop in American Culture
On its surface, hip-hop is fundamentally about making music: a creative combination of beats, flow, samples and rhymes. And yet, beneath the surface lies so much more. Although hip-hop culture writ large (lyrics, fashion, dance and lifestyle) influences many on a global level, this class explores the meaning of hip-hop primarily from African-American informed social and political perspectives. In what ways does hip-hop intersect with American culture, specifically on the fields of race, ethnicity, class, gender and sexuality? Without a doubt, it does so in intriguing, contested and often problematic ways.

L90 AFAS 127 Popular Music in American Culture
American popular music from 1800s to the present, with emphasis on technology, social and political contexts, and popular music as a realm of interracial encounter. Musics covered include early jazz, classic blues, swing, classic pop, rock and roll, soul, disco, hip hop and the changing relationship between popular music, film, and television.
Same as Music 1022
Credit 3 units. A&S: LA, SD A&S: IQ, HUM, SD BU: HUM

L90 AFAS 1277 Musics of the World
This course provides an introduction to the field of ethnomusicology as well as a survey of selected musics from around the world. We investigate not only musical sound itself but how music interacts with other cultural domains, such as religion/cosmology, politics, economics and social structure.
The course uses case studies from regions around world (such as Indonesia, India, the Middle East, Sub-Saharan Africa and Latin America) to illustrate the conceptual problems and methodologies raised by the cross-cultural study of music, as well as acquaint students with the rich variety of music around the globe.
Same as Music 1021

L90 AFAS 136 Freshman Seminar: The Concept of Race in Black Thought
Although many people now believe that the idea of biologically distinct human races is a socially constructed fiction, the color of one’s skin can play a major role in determining such aspects of life as where one lives, the quality of one’s education, and one’s access to health care. Clearly, perceptions of race still hold a great deal of power, whether or not they are based upon scientifically sound reasoning. Therefore, we must attempt to understand how notions of race emerged and where they seem to be headed. In this course, we examine the role of race in American life, past and present.
Credit 3 units. A&S: CD A&S: IQ, LCD EN: H

L90 AFAS 162 Freshman Seminar: Contextualizing Problems in Contemporary Africa
Africa is typically presented in the United States and international media as a continent in constant turmoil. This freshman seminar challenges this simplistic and common myth by exploring the historical and global roots of key issues facing contemporary Africa. Case studies include the 1994 genocide in Rwanda; post-Apartheid violence in South Africa; HIV/AIDS in Africa; oil and corruption in Nigeria; the legacy of colonialism; the quest for modernity; refugees and forced migration; and commercial sex work.
In each of these cases students explore how the issue emerged within a specific historical, social and global context. We investigate the implications of various forms of inequalities (e.g., between the global north and global south, within Africa, and among generations and genders) in shaping each topic and how differently situated people within Africa understand, respond to and cope with everyday realities. Readings include anthropological and historical analysis, African literature, journalist’s accounts and popular articles. By the end of the course, students should be able to critically assess the value of using a contextual analysis in understanding problems in contemporary Africa. This class is a discussion-based seminar and students are expected to actively participate. Students are graded on a series of analytical essays, a final project and in-class participation.

L90 AFAS 178 Imagining and Creating Africa: Youth, Culture, and Change
The goal of this course is to provide a glimpse into how youth reshape African society. Whether in North Africa with the Arab Spring, in West Africa with university strikes, or in East Africa through a linguistic full bloom, youth have been shaping social responses to societies for a long period. In this course, we study social structures, including churches, NGOs, and developmental agencies as well as learn about examples of Muslim youth movements and the global civil society. The course explores how youth impact cultural movements in Africa and how they influence the world. In particular, we examine hip-hop movements, sports, and global youth culture developments that center on fashion, dress, dance, and new technologies. By the end of the course, students will have enriched ideas about youth in Africa and ways to provide more realistic comparisons to their counterparts in the United States.
Credit 3 units. A&S: CD A&S: IQ, LCD EN: H
L90 AFAS 188 Freshman Seminar: Self and Identity in African-American Literature
For whom should the black author write? In this seminar we consider how African-American literature examines the meaning of African-American identity, the individual’s relationship with the community, and the often vexed relationship of the black author to the American mainstream. We read classic authors as well as some less familiar ones. W.E.B. Du Bois, Nella Larsen, James Baldwin and Octavia Butler are just some of the possibilities. Class participation and regular reading logs are required. Freshmen only.

L90 AFAS 195C Introduction to African-American Images in Film: A Freshman Seminar
This seminar for freshmen introduces students to an array of films depicting African Americans at different points in the history of filmmaking, as well as the relevance of these films to the advancement of civil rights in America and, by extension, the world. Students are introduced to elementary documentary film production in collaboration with Washington University library staff and hands-on utilization of the Henry Hampton Archive. The course provides a balanced introduction to various civil rights topics that are relevant to African Americans, their depiction in film, and knowledge of how documentary film production can be used to overcome past discrimination.

L90 AFAS 196C Images of Africa in Literature and Art, ca. 1800 to Present Day
This course examines representations of Africa, African peoples and African cultures from the early 19th-century to the present day. Drawing on a wide variety of African and colonial source materials — including novels, photographs, art, advertising and movies — we critically explore the ways in which historical developments and cultural products helped to shape conceptions of African identities and ethnicities. Among other issues, we address the legacy of the slave trade; gender and the construction of cultural “traditions”; colonial society, nationalist resistance and the rise of pan-Africanism; and South African Apartheid. Emphasis is placed on critical engagement with the source materials through written assignments and participation in class discussion. Freshmen only.

L90 AFAS 203D Intermediate Swahili III
Enhanced acquisition of language fundamentals acquired in first-year Swahili through performance, reading and writing. Students gain skills performing role-plays such as asking for directions, booking a bus ticket, ordering food in a restaurant, etc. Students read more authentic Swahili texts including plays, short stories, newspapers and poems. Prerequisite: AFAS 103D(Q) – 104D(Q) or the equivalent. CBTL course.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L90 AFAS 204D Intermediate Swahili IV
Fourth-semester Swahili language course emphasizes the development of the ability to discuss a wide range of cultural and literary topics with native speakers of the language. These topics are introduced by reading authentic Swahili texts such as plays, novels, poems and newspapers. Students enhance their writing skills and creativity in the language through group-writing projects. Prerequisite: Swahili 103D(Q), 104D(Q) and 203 D(Q). CBTL course.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS BU: IS

L90 AFAS 208B African-American Studies: An Introduction
Lectures, readings, films and discussions reflect a range of academic approaches to the study of African-American people. Course materials drawn from literature, history, archeology, sociology and the arts to illustrate the development of an African-American cultural tradition that is rooted in Africa, but created in the Americas. Required for the major.
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD AR; SSP BU: HUM EN: H FA: SSP

L90 AFAS 209B African Studies: An Introduction
This course introduces students to a variety of approaches to the study of Africa by considering the ways that scholars have understood the African experience. It exposes students to the history, politics, literary and artistic creativity of the continent. Emphasis is placed on the diversity of African societies, both historically and in the present, and explore Africa’s place in the wider world. Required for the major.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD AR; Lit BU: IS EN: H FA: SSP

L90 AFAS 210 The Linguistic Legacy of the African Slave Trade in Interdisciplinary Perspective
This course explores the linguistic consequences of the African slave trade, and in so doing introduces students to basic concepts in linguistic science that are relevant to human language development and controversial educational theories that are based on race. Anthropological, linguistic and psychological dimensions of African-American culture are embedded within complementary evaluations of educational controversies surrounding the teaching of (standard) English to American slave descendants, including the Ebonics controversy and its relevance to larger questions of social efficacy, and the affirmative action debate that has consumed the nation. Students work individually or in groups to produce a major intellectual artifact (e.g., a term paper, a scholarly web page or a project) pertaining to the linguistic plight of citizens within this African
Diaspora. Students are introduced to foundational African-American studies in anthropology, education, English, linguistics and psychology.
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD AR: SSP BU: BA EN: S FA: SSP

L90 AFAS 2150 Freshman Seminar: The Enigma of Thomas Jefferson
Who was Thomas Jefferson, and why has his reputation undergone so many changes? This course is an exercise in understanding how professional historians and the general public discover and use the past. It therefore sets four primary goals: to recover the past on its own terms; to understand the many different methods and standards applied in interpreting the past; to understand how and why each generation changes the way it views the past as it seeks to make it “usable”; and to develop the skills of exposition and argumentation necessary to describe and analyze complex historical issues and to express critical ideas effectively.
Same as History 2030
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L90 AFAS 2155 Introduction to Comparative Practice
This course permits the close examination of a particular theme or question studied comparatively, that is, with a cross-cultural focus involving at least two national literatures. Topics are often interdisciplinary; they explore questions pertinent to literary study that also engage history, philosophy and/or the visual arts. Although the majority of works studied are texts, the course frequently pursues comparisons of texts and images (painting, photography, film). Requirements may include frequent short papers, response papers and/or exams.

L90 AFAS 2231 Cross-Cultural Women Playwrights
Same as Drama 223
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD BU: BA FA: Lit

Black women, much like their male counterparts, have shaped the contours of African-American history and culture. Still, close study of African-American women's history has burgeoned only within the past few decades as scholars continue to uncover the multifaceted lives of Black women. This course explores the lived experiences of Black women in North America through a significant focus on the critical themes of violence and sexuality. We examine African-American women as the perpetrators and the victims of violence and as the objects of sexual surveillance and we explore a range of contemporary debates concerning the intersections of race, class and gender, particularly within the evolving hip-hop movement. We take an interdisciplinary approach through historical narratives, literature, biographies, films and documentaries.
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD AR: SSP BU: BA EN: H FA: SSP

L90 AFAS 2251 Topics: The Ebonics Controversy
This course examines the controversy regarding the status of Ebonics and its role in education. Ebonics is the term often used to describe the distinct speech of 85 percent of the African-American population. The controversy reached the national limelight in 1996 and 1997 due to a resolution by the Oakland (California) School Board, which identified Ebonics as a legitimate form of speech that should be respected. The arguments about Ebonics are multifaceted and highlight significant linguistic as well as educational and political issues. There is the basic question of just what is Ebonics: Is it a separate language, a dialect, slang, bad grammar, broken English or really not a distinct entity? There are issues related to the term Ebonics as evidenced by the various names that academicians have used for the speech of African Americans, i.e. African-American (vernacular) English and African-American Language. Its origins and history also have been debated: Is it a variant of Southern English or are its origins traceable to the language systems of Africa? Further, there is a fundamental, practical question of how to approach the education of African-American children whose home speech is Ebonics: Should a goal in the education of these children be the purging of Ebonics so that it does not interfere with the mastery of Standard English, or should Ebonics be used as a vehicle for learning Standard English? This course examines these and other issues, such as the portrayal of Ebonics in the popular media as well as its use within African-American communities, through readings, films, small and large group discussions, writing assignments and lectures.

L90 AFAS 2674 Sophomore Seminar: Slavery and Memory in American Popular Culture
Sophomores receive priority registration. The history of slavery has long created a sense of unease within the consciousness of many Americans. Recognizing this continued reality, this seminar examines how slavery is both remembered and silenced within contemporary popular culture. Although slavery scholarship continues to expand, how do everyday Americans gain access to the history of bondage? Moreover, how does the country as a whole embrace or perhaps deny what some deem a “stain” in American history? Taking an interdisciplinary approach to these intriguing queries, we examine a range of sources: literature, public history, art/poetry, visual culture, movies and documentaries, as well as contemporary music including reggae and hip hop. The centerpiece of this course covers North American society, however, in order to offer a critical point of contrast, students are challenged to explore the varied ways slavery is commemorated in other parts of the African Diaspora.
Same as History 2674
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H

L90 AFAS 301 A History of African-American Theater
A survey of African-American theater from post-Civil War “coon” shows and reviews to movements for a national black theater, such as Krigwa, Lafayette and Lincoln, and the Black Arts Movement. Early black theater and minstrelsy; black theater movement and other ethnic theater movements in America. Critical readings of such plays as Amiri Baraka’s Dutchman, Lorraine Hansberry’s A Raisin in the Sun, and Langston Hughes and Zora Neale Hurston’s Mule Bone. Also works by August Wilson, Ed Bullins, Charles Fuller, Georgia Douglas Johnson. Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD AR: Lit BU: HUM EN: H FA: AH, Lit

L90 AFAS 3015 Speaking Truth to Power: The Black Prophetic Voice in America
To comprehend the origins and development of the Black prophetic voice, one must first understand the religious history of African Americans. As such, this course investigates how African Americans have historically employed Christianity as a vessel of protest and empowerment. To illustrate how African Americans practiced faith has ultimately become a platform for speaking out against their oppression, students engage some of the following questions: What makes Black Christianity so distinct, if at all? What is the so-called “prophetic voice”? And how do African Americans use this prophetic voice to bring attention to various issues of social, political and economic concern? Ultimately students decide for themselves what Black prophetic voice is and if it is still a viable part of the American fabric.
Credit 3 units. A&S: TH AR: SSP FA: SSP

L90 AFAS 302 Black Theater Workshop III
A performance-oriented course that explores the black experience through acting, directing and play writing. Students develop through classroom improvisation short performance pieces during the semester. They also are required to attend three to five plays. Each student must participate in a final performance, which is in lieu of a written final examination. Credit 3 units. A&S: LA, SD A&S: IQ, HUM, SD EN: H

L90 AFAS 3062 Islam, Culture and Society in West Africa
This course explores the introduction of Islam into West Africa beginning in the 10th Century and explores its expansion and development in the region, placing emphasis on the 19th century to present day. It focuses on the development of West African Muslim cultural, social, religious and political life, to understand not only how the religion affected societies, but also how West African local societies shaped Islam. The course also aims to introduce students to a critical understanding of Islamic writing in West Africa. It also examines the organization of Muslim Sufi orders in West Africa through time and space. The course is organized around a series of lectures and readings, as well as print and visual media.

L90 AFAS 3101 “Give Up the Mic”: Black Feminism in the United States
It is a mistaken, but widely held assumption that Black feminism in the United States emerged from the second-wave women’s movement of the 1960s. This course offers a different view: the black feminist movement has a long history with roots in the slavery era. This course charts the historical evolution of black feminist theory and praxis from the 19th century to the present through reading texts from a variety of black feminists including abolitionists, anti-lynching advocates, clubwomen, blues artists, unionists, communists, civil rights and black power movement activists, poets, leaders of formal feminist organizations, and
hip-hop feminists. We examine essays and books that articulate the complexity of black American women’s demand for social, economic and political equality as well as the desire for a vision of liberation based on historical and ongoing struggles against race and gender oppression. We identify the central concerns of black feminist thought, salient theoretical models such as the intersection of race, gender, sexuality and class, and how the movement changed over time.

L90 AFAS 311 Modern Dance and the African-American Legacy
This course examines the works of several African-American choreographers and their contributions to the field of modern dance in America. These works, considered modern day classics, depict important historical events and reveal cultural influences that people of African descent have impressed upon our society. Through the medium of dance aided by discussions, video and class reading assignments, the choreographers’ works are analyzed for form, content and social relevance. Studio work includes technique to support learning the repertory. Prerequisite: one to two years training in modern, jazz or ballet. Same as Dance 311
Credit 2 units. A&S: LA A&S: IQ, HUM BU: HUM FA: AH

L90 AFAS 3161 African-American Politics
This course examines the historical and contemporary efforts by African Americans to gain full inclusion as citizens in the U.S. political system. The course focuses on topics such as the politics of the civil rights movement; African-American political participation; and the tension between racial group politics and class politics.

L90 AFAS 321C African Civilization to 1800
Beginning with an introduction to the methodological and theoretical approaches to African history, this course surveys African civilization and culture from the Neolithic age until 1800 AD. Topics include African geography and environmental history; migration and cross-cultural exchange; the development of Swahili culture; the Western Sudanese states; the trans-Atlantic slave trade; and the historical roots of Apartheid.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD AR: SSP BU: HUM, IS FA: SSP

L90 AFAS 322C African Civilization: 1800 to the Present
Beginning with social and economic changes in 19th-century Africa, this course is an in-depth investigation of the intellectual and material culture of colonialism. It is also concerned with the survival of precolonial values and institutions, and examines the process of African resistance and adaptation to social change. The survey concludes with the consequences of decolonization and an exploration of the roots of the major problems facing modern Africa.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD AR: SSP BU: IS FA: SSP

L90 AFAS 3231 Black Power Across Africa and the Diaspora: International Dimensions of the Black Power Movement
This seminar explores the Black Power Movement as an international phenomenon. By situting Black Power within an African World context, this course examines the advent and intersections of Black Power politics in the United States, parts of Africa (including Ghana, Algeria, Nigeria and Tanzania), the Caribbean (Jamaica, Bermuda, the Bahamas and Cuba), South America (Brazil) and Canada. Particular emphasis is placed upon unique and contested definitions of “Black Power” as it was articulated, constructed and enacted in each region.

L90 AFAS 3232 Introduction to African-American Psychology
This course provides an introduction to the experiences of African Americans from a psychological perspective. Throughout the course, we consider a range of theoretical and methodological approaches that scholars have developed to conceptualize the thoughts, styles and behaviors of African Americans. The course begins with an overview of these theories, methodologies and frameworks. The second part of the course is devoted to exploring psychological research around pertinent topics in the field such as racism and discrimination, gender, achievement and schooling, kinship and family, racial identity, religion and spirituality, and mental health. Finally, we conclude the course with discussions of current topics, controversies and recent advances in African-American psychology. Prerequisite: Psych 100B or permission of instructor.

L90 AFAS 3254 African Americans and Children’s Literature
This course explores two distinct themes: how African-descended people have been depicted in American and British children’s literature and how African Americans have established a tradition in writing for children and young adults. It also examines two related questions: How has African-American childhood been constructed in children’s literature and how have African-American writers constructed childhood in children’s
literature? We look at such classic white writers for children like Helen Bannerman, Annie Fellows Johnston, and Mark Twain as well as efforts by blacks like the Brownies Book, published by the NAACP, and children’s works by black writers including Langston Hughes, Ann Petry, Shirley Graham Du Bois, Arna Bontemps, Virginia Hamilton, Walter Dean Myers, Mildred Taylor, Floyd and Patrick McKissack, Julius Lester, Rosa Guy, Sharon Bell Mathis, bell hooks, and others. L90 AFAS 326 Literature of the Color Line
In 1903’s The Souls of Black Folk, W.E.B. Dubois wrote “for the problem of the 20th century is the problem of the color-line.” This literature course includes texts written by African-American authors to examine the ways African Americans came to be portrayed in American literature and culture by writers of color, paying special attention to the changing concept of race and African-American citizenship as influenced by American political thought at a time when many of the gains made by African Americans during the period of Reconstruction were repealed. We read fiction, poetry, essays and pamphlets by African-American writers writing through the late 19th and early 20th century, including but not limited to Charles Chesnutt, W.E.B Dubois, Booker T. Washington, Ida B. Wells-Barnett, Pauline Hopkins, Frances E.W. Harper, Paul Laurence Dunbar. In addition to the texts, students are asked to briefly examine portrayals of African Americans in other forms of media, such as visual culture and film. Credit 3 units. L90 AFAS 3282 Sexuality in Africa
An examination of various themes of African sexuality, including courtship, marriage, circumcision, STDs and AIDS, polygamy, homosexuality, child marriages, and the status of women. Course materials include ethnographic and historical material, African novels and films, and U.S. mass media productions. Using sexuality as a window of analysis, students are exposed to a broad range of social science perspectives such as functionalist, historical, feminist, social constructionist, Marxist and postmodern. Credit 3 units. A&S: SS, CD AR: SSP BU: BA FA: SSP

L90 AFAS 330 Topics in Linguistics: The American Languages
Our perceptions about language are shaped by our linguistic backgrounds and practices as well as our social and political ideologies. This course examines the history of American languages in the United States and explores the social, educational and political issues that surround them. Four types of languages are studied: Native American, colonial, immigrant and new languages (e.g., Hawaiian Pidgin and American Sign Language). We also take a special look at the history and structure of African-American language, which challenges linguistic categorizations as well as language policy and education. Among the major questions discussed in this course are: what makes American languages distinct in terms of their history and social status; and what do they all have in common beyond the simple geographic classification of being “American.” In addressing these questions, we also study the politics of language, the history of language policy and education in the U.S. as well as issues of current debate, such as indigenous language reclamation, the “Ebonics controversy,” bilingual education and the official English movement. Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD AR: SSP EN: S FA: SSP

L90 AFAS 3340 Gender, Health and Resistance: Comparative Slavery in the African Diaspora
Same as History 3340
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H

L90 AFAS 3405 For Freedom’s Sake: The Civil Rights Movement in America
This course provides an introduction to the period of struggle in American history known as the Civil Rights Movement. Our primary task is to survey the major historical figures, organizations, locations, strategies and ideas that coalesce to make the history of the movement. The course broadly covers the years of the Black Freedom Struggle between 1945 and 1971, with a sharper focus on the pivotal years of 1954–1965. By placing the movement within a broader context, the course seeks to identify the historical developments and social realities that made the movement necessary and possible. The class also looks at the years following the movement, and the general transition from Civil Rights to Black Power. Credit 3 units. A&S: TH A&S: IQ, HUM AR: SSP EN: H FA: SSP

L90 AFAS 343 Capitalism, Exchange and Inequality in Africa
This course explores issues of power and inequality related to exchange and the emergence of market economies in Africa. Case studies include examinations of cattle and bride wealth among pastoralists in Sudan, welfare policies in contemporary South Africa, and sex work in West Africa. In each of these cases there is a complex balance between the value placed on maintaining social relationships and accumulating private

L90 AFAS 3447 Visualizing Blackness: Histories of the African Diaspora Through Film
The African Diaspora and, more importantly, variations of blackness, black bodies, and black culture have long captured the imagination of audiences across the globe. Taking a cue from exciting trends in popular culture, this course bridges the world of history, film and culture to explore where and how historical themes specific to African-descended peoples are generated on screen (film and television). Fusing the film world with digital media (i.e. online series and “webisodes”) this class allows students to critically engage diasporic narratives of blackness that emerge in popular and independent films not only from the United States but other important locales including Australia, Brazil, Britain and Canada. Moving across time and space, class discussions center on an array of fascinating yet critical themes including racial/ethnic stereotyping, gender, violence, sexuality, spirituality/conjuring and education. Students should be either of junior- or senior-level and have taken at least one AFAS course. Permission of the instructor is required for enrollment.

L90 AFAS 3542 The Quest for Racial Reconciliation
This course is based within African and African-American studies, and it explores the quest for racial reconciliation, with emphasis equally divided between the United States and racial strife in other parts of the world. Although racial considerations are inherent to central themes within this course, we explore various sources of linguistic, cultural, social, political, racial and ethnic foundations of strife at different points in history, and in different regions of the world. Particular attention is devoted to nonpartisan strategies to advance racial harmony within the United States, and other regions of the world that are of personal interest to students.

L90 AFAS 3582 Race, Class and Writing in the United States and the Caribbean, 1900–1950
This is a comparative course that focuses on African-American literature and Anglophone Caribbean literature during the period from 1900 to 1950. The cultures of the United States and the Caribbean both have been profoundly shaped by the relationship between race and power, yet the intersection of these forces has affected the societies and their writers in distinct ways. Studying fictional texts from the first half of the 20th century, we discuss the differences in literary tradition that arose from the divergent social, racial and educational milieus of the United States and the West Indies. For example, we compare the racial and class concerns of the Beacon Group in Trinidad with those of the Harlem Renaissance. We also study writers, such as Claude McKay and C.L.R. James, whose consciousness of the African diaspora problematized the national and regional identities to which literature contributed.
Same as E Lit 3582
Credit 3 units. A&S: TH, SD BU: BA, HUM

L90 AFAS 359 (Re)Writing Slavery
This special topics course considers black-authored texts ranging from the 18th to the 21st century to examine the ways slavery has been discussed in American literature and culture. We pay attention to the role of slavery in creating the African diaspora, the contribution of slave narratives to the Abolitionist movement, and how the structures of American slavery did not disappear after the Civil War. We look at the ways Civil Rights-era and contemporary African-American writers such as Margaret Walker, Toni Morrison, and Charles Johnson have appropriated the slave narrative to engage and critique present day concerns. Their works are read against 19th century slave narratives by ex-slaves such as Frederick Douglass and Harriet Jacobs. In addition to the texts, students are asked to consider how slavery and its aftereffects have been portrayed in film and other forms of media.
Credit 3 units.

L90 AFAS 361 Culture and Environment
An introduction to the ecology of human culture, especially how “traditional” cultural ecosystems are organized and how they change with population density. Topics include foragers, extensive and intensive farming, industrial agriculture, the ecology of conflict, and problems in sustainability.
Same as Anthro 361
Credit 3 units. A&S: SS A&S: IQ, SSC BU: ETH FA: SSP

L90 AFAS 363 Mapping the World of “Black Criminality”
Ideas concerning the evolution of violence, crime and criminal behavior have been framed around many different groups. Yet, what does a typical criminal look like? How does race — more specifically blackness — alter these conversations, inscribing greater fears about criminal behaviors? This course taps into this reality, examining the varied ways people of African descent have been and continue to be particularly imagined as a distinctly criminal population. Taking a dual approach, students consider the historical roots of the policing of black bodies alongside the social history of black crime while also foregrounding where and how black females fit into these critical conversations of crime and vice. Employing a panoramic approach, students examine historical narratives, movies and documentaries, literature, popular culture through poetry and contemporary music, as well as the prison industrial complex system. Prerequisite: AFAS 3880 (Terror and Violence in the Black Atlantic) and/or permission from the instructor, which is determined based on a student’s past experience in courses that explore factors of race and identity. Enrollment limit: 20.

L90 AFAS 3651 Black Women Writers
When someone says “black woman writer,” you may well think of Nobel Prize winner Toni Morrison. But not long ago, to be a black woman writer meant to be considered an aberration. When Thomas Jefferson wrote that Phillis Wheatley’s poems were “beneath the dignity of criticism,” he could hardly have imagined entire Modern Language Association sessions built around her verse, but such is now the case. In this class we survey the range of Anglophone African-American women authors. Writers covered may include Phillis Wheatley, Harriet Wilson, Nella Larsen, Lorraine Hansberry, Octavia Butler and Rita Dove, among others. Be prepared to read, explore, discuss and debate the specific impact of race and gender on American literature.

L90 AFAS 3670 The Civil Rights Movement
The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically, and thematically. It pays special attention to struggles fought in the North, West and Southwest; it seeks to question binaries constructed around “confrontational” and “accommodationist” leaders; it reveals how Latinos, Native Americans, and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics.

L90 AFAS 3672 Medicine, Healing and Experimentation in the Contours of Black History
Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, we examine the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus extends toward the underpinnings of race and gender in the medical treatment allocated across time and space — the U.S., Caribbean and Latin America — to give further insight into the roots of contemporary practice of medicine.

L90 AFAS 370 Youth, Generation and Age in Africa
It is estimated that children and youth constitute more than 60 percent of the population in Africa. In a context of economic decline associated with neoliberal policies of structural adjustment, many of these young people will face extreme difficulty in finding work, supporting families and taking on the social responsibilities of adults. In recent years, disaffected African youth have been increasingly blamed for political and social instability. This course examines the condition of youth in contemporary Africa. The course begins with classic anthropological texts on generation, youth and the life cycle in Africa. Readings address the implications of colonialism,
education, wage labor and urbanization for relations between generations. The second half of the course examines recent research concerning the position of African youth in a context of economic and cultural globalization.

**L90 AFAS 372C Law in American Life: 1776 to Present**

Among the many contradictions of American history, none has been more recurrent than the tension of justice and law — of aspiration and reality — as Americans have sought to make good on the promises of the Revolution. Although we pride ourselves as a nation devoted to the principle of “equal justice under the law,” the terms “equal” and “justice” have prompted bitter debate, and the way we place them “under law” has divided Americans as often as it has united them. This course examines the many and conflicting ways in which Americans have sought to use “law” to achieve the goals of the republic established in 1776. Viewing “law” as the contested terrain of justice, cultural construction, social necessity and self-interest, this course pays close attention to the way Americans have used, abused or evaded “law” throughout their national history.

**L90 AFAS 388 African-American Literature: African-American Writers Since the Harlem Renaissance**

African-American literature in the 20th and 21st centuries grows from a Harlem Renaissance into a world-shaping institution. Guggenheim, Pulitzer and Nobel prize winners; card-carrying Communists, rock-ribbed Republicans and Black Power nationalists; Broadway playwrights, Book-of-the-Month Club novelists and even a U.S. President are among the many whose fictions and memoirs we study with special attention to the intimate links between black writing and black music. The syllabus thus features authors ranging from poet Alice Dunbar Nelson (born 1875) to satirist Colson Whitehead (born 1969), with more than a dozen stops in between. Written assignments may include two papers and two exams. Prerequisite: none, but related classes such as E Lit 215 and/or AFAS 208 are suggested. Satisfies the American literature requirement in English, and/or one 300-level elective requirement in AFAS.

**L90 AFAS 3880 Terror and Violence in the Black Atlantic**

From the period of bondage through the 21st century, terror and racialized violence have consistently been used as a form of social control. This course is constructed to explore the historical foundations of extreme threats of violence inflicted among populations of African descent. The fabric of American culture
has given birth to its own unique brand of terrorism, of which this
class spends considerable time interrogating. Yet, in recognizing
that these practices are commonly found in other parts of the
Black Atlantic, students are encouraged to take a comparative
view to better tease out the wider strands of violence operative
in places like England, the Caribbean and Latin America. Within
this course, we explore the varied ways in which music, films,
novels and historical narratives shed light on these often
life-altering stories of the past. Some of the themes touched
upon include: the use of punishment/exploitation during the era
of slavery, lynching, sexual violence, race riots, police brutality,
motherhood, black power and community activism.

FA: SSP

L90 AFAS 388C African-American Literature: African-
American Writers Since the Harlem Renaissance
African-American literature in the 20th century moves from a
renaissance into an institution. Guggenheim, Pulitzer and Nobel
prize winners; Communist and Conservative Party sympathizers;
Black Power advocates, inaugural poets, Broadway playwrights,
Book-of-the-Month Club novelists, along with writers whose
allusive and elliptical pages may never win them legions of fans,
are among the many whose works we discover together.
Written assignments may include two papers and two exams.
Prerequisites: none, but related classes such as E Lit 215
and/or AFAS 208 are suggested. Satisfies the American
literature requirement in English, and/or one 300-level elective
requirement in AFAS.

L90 AFAS 400 Independent Study
Permission of the director of the African and African-American
Studies Program and an African-American Studies instructor
required prior to registering.
Credit variable, maximum 6 units.

L90 AFAS 4001 Interrogating Health, Race and Inequalities:
Public Health, Medical Anthropology and History
Interrogating Health, Race and Inequalities is intended for
graduate students in the School of Social Work and in Arts
& Sciences as well as advanced undergraduates in Arts
& Sciences who have previous course work in medical
anthropology, public health or urban policy. The fundamental
goal of the course is to demonstrate that health is not merely
a medical or biological phenomenon but more importantly
the product of social, economic, political and environmental
factors. To meet this goal the course is designed to examine the
intersection of race/ethnicity and health from multiple analytic
approaches and methodologies. Course readings draw from
the fields of public health, anthropology, history and policy
analysis. Teaching activities include lectures, group projects
and presentations, videos, and discussions led by the course
instructors. These in-class activities are supplemented with
field trips and field-based projects. By the end of the course,
students are expected to have a strong understanding of race
as a historically produced social construct as well as how race
interacts with other axes of diversity and social determinants
to produce particular health outcomes. Students gain an
understanding of the health disparity literature and a solid
understanding of multiple and intersecting causes of these
disparities.
Same as InterD 4001
Credit 3 units.

L90 AFAS 4002 Urban Education in Multiracial Societies
This course offers students an analysis of the historical
development and contemporary contexts of urban education
in English-speaking, multiracial societies. It examines legal
decisions, relevant policy decisions and salient economic
determinants that inform urban systems of education in
Western societies including, but not limited to, the United
States, Canada, Great Britain and South Africa. The course
draws on quantitative, qualitative and comparative data as
an empirical foundation to provide a basis for a cross-cultural
understanding of the formalized and uniform system of public
schooling characteristic of education in urban settings. Given
the social and material exigencies that shape urban school
systems in contemporary societies, special attention is given in
this course to the roles of migration, immigration urbanization,
criminal justice, industrialism, de-industrialism and globalization
in shaping educational outcomes for diverse students in the
aforementioned settings. Prerequisite: junior standing or
permission of instructor.

L90 AFAS 4005 Video Microanalysis: Methods and Tools
The purpose of this course is to explore video microanalysis
as a methodological tool for studying and valuing unconscious
aspects of culturally diverse settings. Utilizing social cultural
theoretical lens, this type of analysis reveals fleeting
actions, subtle movements, peripheral events and nonverbal
communication that are not easily identified in real time viewing.
Specifically we may look at facial expressions, direction of gaze,
hand movements, body position and use of material resources
as micro techniques to expand our capacity to explore minute
aspects and alternative interpretations of social interactions.

Course designed with instructor. Permission of instructor required.
Credit 3 units. A&S: TH A&S: IQ, LS AR: Lit FA: Lit

L90 AFAS 4042 Beginning Graduate-Level Swahili II
Second-semester graduate-level Swahili language course emphasizing conversational competence and knowledge of Swahili-speaking cultures of East Africa. Introduction to elementary-level Kenyan and Tanzanian Swahili texts, grade school readers, newspapers and government educational material. Prerequisite: AFAS 4041.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS EN: H

L90 AFAS 4043 Intermediate Graduate-Level Swahili III
Enhanced acquisition of language fundamentals acquired in first-year graduate-level Swahili through performance, reading and writing. Students gain skills performing role-plays such as asking for directions, booking a bus ticket, ordering food in a restaurant, etc. Students read more authentic Swahili texts including plays, short stories, newspapers and poems. Prerequisite: AFAS 4041, 4042 or permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS EN: H

L90 AFAS 4046 Sexual Health and the City: A Community-Based Learning Course
In this community-based learning course students partner with a St. Louis AIDS service organization (ASO) or sexual health agency to explore how the interrelationships among gender, class, race/ethnicity and sexual identity shape sexual health decisions, outcomes and access to services. Students also examine the complex relationship between men’s and women’s life goals and constraints, on the one hand, and the public health management of sexual health, on the other. In collaboration with their community partner and its clients, students develop a project that addresses an identified need of the organization and the community it serves. Course readings draw from the fields of anthropology, public health, feminist studies and policy making. Prerequisite: PHealth 4134 The AIDS Epidemic: Inequalities, Ethnography and Ethics or permission from the instructor, which is determined based on past student’s experience in the fields of medical anthropology or sexual/reproductive health. CBTL course.

L90 AFAS 4121 Rainbow Radicalisms!: Ethnic Nationalism(s), the 1960s and the Politics of the New Left
The Black Panther Party remains one of the most iconic groups of the 1960s and 1970s. Perhaps one of the most understudied aspects of the Panthers’ legacy is their radical influence upon other American racial and ethnic groups, including Asian Americans, Mexican Americans, Puerto Ricans and American Indians, among others. This seminar considers the emergence of ethnic and racial nationalism among these various groups, as a result of their contact and relationship(s) with the Black Panther Party. Considering the politics of groups like the Red Guard, the Brown Berets, the Young Lords and the American Indian Movement, this course charts the rise and fall of rainbow radicalism as a general offspring of the Black Power Movement and part and parcel of what is commonly referred to as “the New Left.” It also considers these groups in relation to the state by probing the dynamic push and pull between repression and democracy. Ultimately, this course grants insight into the contemporary racial domain and current political landscape of America as we discuss how these groups helped to shape modern identity formations, discourses on multiculturalism and definitions of “minority,” “diversity” and “equality.”

L90 AFAS 4134 The AIDS Epidemic: Inequalities, Ethnography and Ethics
In the year 2000, HIV became the world’s leading infectious cause of adult death, and over the next 10 years, AIDS killed more people than all wars of the 20th century combined. As the global epidemic rages on, our greatest enemy in combating HIV/AIDS is not knowledge or resources, but global inequalities and the conceptual frameworks with which we understand health, human interaction and sexuality. This course emphasizes the ethnographic approach for cultural analysis of responses to HIV/AIDS. Students explore the relationship between local communities and wider historical and economic processes, and theoretical approaches to disease, the body, ethnicity/race, gender, sexuality, risk, addiction, power and culture. Other topics include the cultural construction of AIDS and risk, government responses to HIV/AIDS, origin and transmission debates, ethics and responsibilities, drug testing and marketing, the making of the AIDS industry and “risk” categories, prevention and education strategies, interaction between bio-medicine and alternative healing systems, and medical advances and hopes.

L90 AFAS 417 Topics in African History: Middle Passages: African Americans and South Africa
This upper-division seminar explores the fascinating transnational relationship between African Americans and black South Africans during the 20th century. These two populations became intimately familiar with each other as African-American missionaries, sailors, musicians, educators and adventurers regularly entered South Africa while black South African students, religious personnel, political figures, writers and entertainers found their way to America. This course details why these two populations gravitated toward each other, how they assisted each other in their respective struggles against racial segregation and apartheid, and how these shared histories influence their relationship today. Readings for this course draw from key books, articles and primary documents within this exciting new field of intellectual inquiry.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD AR: SSP BU: BA FA: SSP

L90 AFAS 4213 Sufism and Islamic Brotherhoods in Africa
Muslim societies are prevalent in Africa — from the Horn, the North, the East to the West, with smaller conclaves in Central and South Africa. Islam has played an influential role in these diverse societies, particularly through its Sufi form. Even though Sufism originated in the Arabian Peninsula, it has fit well with African beliefs and cultures. This course aims to explore Sufi beliefs, values and practices in Africa. It reconsidered the academic constructions of “African Islam” by exploring education, intellectual life, economics, gender roles, social inequalities and politics. The goal is to show that Africa is a dynamic part of the Muslim world and not a peripheral one, as it is most often portrayed by the international media or historically, through travelers and colonial accounts. African Muslim brotherhoods have served as political mediators between countries and people (i.e. the role of the Tijaniyya in the diplomatic rivalry between Morocco and Algeria, or its role in reconciliation of clanic rivalries in Sudan). In addition, the course pays attention to hierarchy in particular tariqa. Finally, the course examines how African Sufi orders have shaped their teachings to fit transnational demands over the 20th and 21st century. We explore these issues through readings, current media, lectures and special guest speakers.

L90 AFAS 438 Islam, Transnationalism and the African Diaspora
This course is designed for students who are interested in religion among African immigrants and African diaspora communities living mostly, but not exclusively, in Europe and North America, especially during waves of migration to the Americas. We begin in the days of the transatlantic slave trade, where we examine how interactions, bricolage, and influences of Christianity, Judaism, African indigenous religions, and Islam have impacted the African Diaspora living in the Americas. We equally examine how Islam served as a means of resistance to slavery and provided a spiritual connection with the motherland.

Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H

L90 AFAS 4433 Who’s Afraid of Post-Blackness?: The Spectrum and Specter of Blackness in Post-Racial America
In 2001, Thelma Golden, the director and chief curator of the Studio Museum in Harlem, boldly claimed that a new generation of African Diasporic artists had officially heralded a new day in "post-Black art.” Six years later a young presidential candidate, born of a white mother from Kansas and a Kenyan father, motivated a Black writer for Time magazine to ask, “Is Obama Black enough?” Since 2001, and in the wake of America’s first Black president, both public and scholarly discourse on Blackness has virtually exploded. New terms and ideas about the “end of Blackness” — as conservative Debra Dickerson put it — seem to enter the popular and scholarly lexicon everyday. It is now quite common to hear the phrases “disintegration,” “post-racial,” “biracial,” “post-Blackness,” and even “the end of Black politics.” This course explores this expanding discourse and attempt to pinpoint what scholars, pundits and cultural critics mean when they employ these terms. It also unpacks the socio-historical context that has given birth to these terms, asking “why now?” Has the social and political landscape of America changed so much that we are indeed living in a “post-racial society?” Or does the specter of “Blackness” still loom large, haunting American politics, popular culture, sexuality, media discourse, punitive measures, political economy and our understanding of “Africa” in “African-American” and “African diaspora”? Through the use of fictional texts, history, cultural essays and films this course explores the intraracial spectrum that characterizes Black America, while paying particular attention to issues of class, sexuality, ethnicity, ancestry, diaspora formation and global migration.

L90 AFAS 4448 Race Politics in 19th- and 20th-Century America
This course explores the efforts of black Americans to use the political processes to claim civil rights and economic improvements in the 19th and 20th centuries. It tracks the aims, ideals and organizing strategies of African-American leaders and of grass-roots organizers. Readings and research highlight the ways African Americans debated agendas, fought over strategies and worked to mobilize voters. We study the ways various groups of people — in rural and urban America — argued over priorities, set agendas for their communities, produced a political language, came together with neighbors to fight for civil rights and economic necessities, and, in short, established a dynamic and conflicted political culture.

L90 AFAS 4973 Advanced Seminar: Gender, Race and Class in South Africa, 1880–present
By focusing on the complex historical dynamics of race, gender and class in South Africa over the past 120 years, this course is aimed at understanding the development of segregation, apartheid, and racial capitalism, as well as the emergence of multiple forms of resistance to counter white minority rule. Topics include: white settler expansion and the defeat of the African peasantry; the rise of mining capital and the emergence of a racially divided working class; the origins of African and Afrikaner nationalisms; migrant labor and the subordination of African women; and the prospects for a non-racial, non-sexist democracy in a unified South Africa.

L90 AFAS 499 Independent Work for Senior Honors: Research
Prerequisite: permission of director and appropriate grade point average. Application forms available in program office.
Credit 3 units.

L90 AFAS 4991 Independent Work for Senior Honors: Thesis
Prerequisite: satisfactory standing as a candidate for senior honors and permission of the director of the African and African-American Studies program.
Credit 3 units.

American Culture Studies

American Culture Studies (AMCS) is a multidisciplinary program that provides both a broader context for study in different fields and a deeper understanding of American culture in all of its complexities. AMCS students explore culture-related topics and issues that demand multiple perspectives and methodologies. They also consider the mutual relevance of various disciplines to any single object of study in American culture — a place, an event, a work of art, a political institution and so on — while developing the knowledge and skills necessary to study a wide array of cultural objects.

The program offers a major and a minor, coordinating offerings across the disciplines so that students from any field or school can explore an array of ideas and approaches as they complete their course work. Pairing the major with a second major in a complementary discipline is an enriching model of cultural study, and AMCS will work closely with students to ensure that double-majoring works well.

The program offers especially attentive advising, helping students to have a cohesive experience and to pursue their specific interests within a diverse curriculum.

Contact Person: Jennifer Gallinat, Administrative Assistant
Phone: (314) 935-5216
E-mail: amcs@artssci.wustl.edu
Departmental website: http://amcs.wustl.edu

The American Culture Studies program is enriched by its diverse community of faculty, lecturers, students and staff. Please visit our AMCS Directory page for a description and list of our teaching and affiliated faculty and other important members of our community.

The Major in American Culture Studies

Total units required: 30-39 credits, 24 of which must be 300-level or above. A suitable second program of study may be used toward the Disciplinary Foundations course work (9 credits) requirement.

Visit our Course Listings web page for a complete list of courses, by semester, that count toward the AMCS major. For more information about the major, including past examples of projects, leadership opportunities, and an FAQ, please visit our AMCS Undergraduate page.

Requirements:

• “Introductory Course” (3 credits) as designated by American Culture Studies, which recently have included AMCS 220 Topics in American Culture Studies: Introduction to American Culture Studies, AMCS 206 “Reading” Culture: The Cultural Lives of Things, and AMCS 202 The Immigrant Experience. Visit our Course Listings web page for additional offerings by semester.

• AMCS 375A American Culture: Methods and Visions (3 credits)

• Fieldwork Experience (3 credits): a multidisciplinary field-based project (independent design or placement-based project) or completion of an approved fieldwork-focused course such as AMCS 479: On Location: Exploring America.

• Concentration Area course work (9 credits): three (3) courses on American subjects in a single concentration area, two (2) of which must be at the 300-level or higher. See below for a list of established concentrations (students may also propose their own).

• Distribution course work (9 credits): Either three (3) courses on American subjects in a second concentration area, or three (3) courses in three (3) different disciplines; in either case, at least two (2) of these courses must be at the 300-level or higher.

• Disciplinary Foundations course work (9 credits): three (3) courses with heavy methodological content and approved by the student’s adviser/the program, at least two (2) of which must be in a single discipline and two (2) of which must be at the 300-level or higher. A suitable second program of study may be applied toward this requirement.

• Senior Capstone Project (3 credits): a multidisciplinary project culminating the course work and past fieldwork study. Proposed during the spring of the junior year, this 3-credit independent design project is granted academic credit through either AMCS 4011 Independent Study in the fall semester or through AMCS 4004/AMCS 4005 if the Senior Honors Thesis option is approved. For more information on the Capstone Project and proposal process, including important dates, please visit our website.
• At least two (2) multidisciplinary (MD) courses, taken as part of the above major requirements and designated by AMCS (this does not usually require additional course work). Students are encouraged to take MD courses that connect to the subjects or issues in their concentration area.

Additional Information

Established Concentration Areas

These areas reflect areas of longstanding student interest. Majors are welcome to propose new concentrations or to tailor an established one to suit their interests. AMCS currently has nine established Concentration Areas:

• 20th-Century America
• Early America
• The Construction of Race and Ethnicity in American Life
• Policy-Making in American Society
• Popular Culture
• A Sense of Place: Community, Region, & Landscape
• Social Thought and Social Problems
• Visual, Material and Digital Cultures in the United States
• War and Peace

AMCS gives majors considerable freedom in defining their course of study, allowing them to learn how cultural study is done in multiple fields and periods even as they define concentration areas in ways that suit their specific interests. Pairing the AMCS major with a second major in a complementary discipline is an especially enriching model of cultural study, and AMCS will work closely with students to ensure that double-majoring works well.

Study Abroad: Majors intending to study abroad should consult with the AMCS Study Abroad adviser well in advance to plan a course of study and discuss its impact on their work in the major (including their fieldwork and capstone projects). For further information, please visit the Study Abroad page on our Undergraduate page or review the AMCS approved programs on the Study Abroad web page, searching for “American Culture Studies” as the approved department under the “Search for a Program” option.

Senior Honors: Writing an AMCS honors thesis is one way to fulfill the Capstone Project requirement. It allows students to complete an extended study of a cultural topic with the input of faculty from more than one discipline, and it provides both a support system and an audience of peers for that study. For more information on the honors thesis and Capstone Project process, including important dates and criteria, please visit our Senior Honors Thesis web page.

The Minor in American Culture Studies

Units required: 15 credits, at least 9 of which must be 300-level or above.

Requirements:

• “Introductory Course” (3 credits): Courses designated as such by American Culture Studies have recently included AMCS 220 Topics in American Culture Studies: Introduction to American Culture Studies, AMCS 206 “Reading” Culture: The Cultural Lives of Things, and AMCS 202 The Immigrant Experience. Visit our Course Listings web page for the full listing by semester.

• Distribution course work (9 credits): at least three courses on American subjects (two of which must be upper-level) either in a single established Concentration Area (see below for a list of established concentrations, or students may propose their own) — or — in three distinct disciplines outside the student’s major.

• One additional AMCS course (3 credits).

• At least two multidisciplinary (MD) courses, taken as part of the above minor courses and designated by AMCS. Minors who opt to do a concentration are encouraged to take at least one MD course that connects to the subjects or issues in the chosen concentration area. AMCS 375A American Culture: Methods and Visions (a junior-level methods seminar) also is encouraged and may count as an MD course. Visit our Course Listings web page for a complete list of general and MD courses that count toward the AMCS major.

Additional Information

Established Concentration Areas

These reflect areas of longstanding student interest. Minors are welcome to propose new concentrations or to tailor an established one to suit their interests. AMCS currently has nine established Concentration Areas:

• 20th-Century America
• Early America
• The Construction of Race and Ethnicity in American Life
• Policy-Making in American Society
• Popular Culture
• A Sense of Place: Community, Region, & Landscape
• Social Thought and Social Problems
• Visual, Material and Digital Cultures in the United States
• War and Peace

Visit our online Undergraduate Page for more information about the minor requirements and concentration areas, as well as other resources and announcements for AMCS students.
L98 AMCS 101B American Politics
This course provides an overview of the politics of the American system of government. Among the topics to be covered are the historical developments of American politics, federalism, political participation (voting, interest groups, parties), institutions (congress, the courts, the president), and public opinion. A theme underlying our examination of these and other topics is the fact that political actors are purposive in their strategic pursuit of various objectives. We explore the many ways in which this aspect of political behavior impacts institutions and the interactions between political actors throughout the American political system.

L98 AMCS 130 Freshman Seminar: Cahokia: Perspectives on a Mississippian Ritual Center
The purpose of this class is to engage and challenge freshman students in an open discussion about the prehistoric Mississippian community of Cahokia. The focus of this course is two-fold. The first is to study the way in which the archaeological evidence has been interpreted. The second is to examine other perspectives on Cahokia, especially from the Native American descendants who consecrated this landscape.
nearly a millennium ago. An underlying tenet of this seminar in understanding Cahokia can also be achieved through the traditions and literature of Native Americans. In the end we want to understand the basis for Cahokia’s organization as a prehistoric Native American community, and the role that ritual and religion played in the rather dramatic and dynamic history of this community and the surrounding region.

L98 AMCS 150 Rattle and Hum: Reading Music in Literature
This freshman seminar presents an overview of novels and autobiographies, some written by musicians, that deal with the meaning of music and music-making as a core theme. Moving from classical music to contemporary hip-hop, the seminar covers a variety of musical genres and considers the ways in which these different forms have been depicted in literature. How is music described in literature? Can music be understood metaphorically? How does the life story of a musician differ from that of other creative artists or does it? Do we romanticize the musician and the making of music? Has the presentation of the meaning of music and music-making as a core theme. Moving from classical music to contemporary hip-hop, the seminar covers a variety of musical genres and considers the ways in which these different forms have been depicted in literature. L98 AMCS 163 Freedom, Citizenship and the Making of American Culture from the Colonial Era to the Present
This course offers a broad survey of American history from the era before European settlement of North America to the late 20th century. The course explores the emergence and geographic expansion of the United States and addresses changes in what it meant to be an American during the nation's history. Tracing major changes in the nation’s economic structures, politics, social order and culture, the course chronicles, among other issues, changes in the meanings of freedom, citizenship and American identity. Introductory course to the major and minor.

L98 AMCS 165 Survey of Latin American Culture
This class is an introduction to Latin American Studies. At the end of the semester, students will be able to recognize some of the main issues in Latin American politics, history and culture, both in the region at large and in the specific regions and sub-regions within it. Students develop research tools to approach the study of Latin America. The class begins with a discussion on the concept of Latin America and then proceeds to case studies regarding the cultures of different regions. Prerequisite: None. This class is required of majors and minors in Latin American Studies and fulfills some requirements of IAS majors.

Credit 3 units. A&S: TH, CD A&S: IQ, LCD BU: IS FA: SSP

L98 AMCS 2010 Religion and American Society
This course explores religious life in the United States. We focus our study on groups and movements that highlight distinctive ways of being both “religious” and “American,” including the Americanization of global religions in the U.S. context. Major themes include religious encounter and conflict; secularization, resurgent traditionalism, and new religious establishments; experimentalism, eclecticism, and so-called “spiritual” countercultures; the relationship between religious change and broader social and political currents (including clashes over race, class, gender, and sexuality); and the challenges of religious multiplicity in the US. Students: 1) acquire knowledge of the disparate religions practiced in North America during the 20th century and beyond; 2) examine some of the chief conflicts as well as alliances between religion and the American social order in a global context; and 3) develop interpretive tools for understanding religion’s present and enduring role in the U.S. and the world.

L98 AMCS 2032 Freshman Seminar: The Enigma of Thomas Jefferson
Who was Thomas Jefferson, and why has his reputation undergone so many changes? This course is an exercise in
understanding how professional historians and the general public discover and use the past. It therefore sets four primary goals: to recover the past on its own terms; to understand the many different methods and standards applied in interpreting the past; to understand how and why each generation changes the way it views the past as it seeks to make it “usable”; and to develop the skills of exposition and argumentation necessary to describe and analyze complex historical issues and to express critical ideas effectively.

L98 AMCS 2055 Forever War: American Literature and Culture from Vietnam to Afghanistan

You have now lived more of your life since 9/11 than before it. How does your personal and generational experience help us to define and interact with such an impenetrable concept as war, let alone the “forever” war of contemporary memory? The term itself is relatively recent. Indeed, if you search “forever war” in the library catalog, you will get two hits: a 1974 sci-fi novel The Forever War written by veteran Joe Haldeman that fictionalizes his experiences with the endless futility of the Vietnam War (but in outer space); and a 2008 nonfiction book The Forever War by Pulitzer Prize-winning journalist Dexter Filkins that chronicles Iraq, Afghanistan, and the long history of the War on Terror. In line with Haldeman’s and Filkins’ fatigue over modern war’s interminability, this course studies the literature and culture of contemporary American war from Vietnam to Afghanistan. Because this is an introductory course to American Culture Studies, we pay particular attention to how our strategies for interpreting the culture of contemporary warfare connects with our understanding of contemporary culture more broadly.

Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L98 AMCS 206 “Reading” Culture: The Cultural Lives of Things

It has been said that ours is a culture defined by material things — the everyday stuff such as iPhones and disposable coffee cups as well as the Harley-Davidson bikes, antiques and national monuments we particularly revere. In this multidisciplinary course we study objects of many kinds — from the utilitarian and mostly disregarded to the strange, rare and long-celebrated — asking how they have come to be imbued with cultural meaning. What economic, social and psychological purposes do they serve? How do they give expression to individual experience, collective identity and cultural memory? How have momentous shifts, events and issues (world’s fairs, economic depressions, environmental degradation, September 11) altered our relationship to them? In short, why do things have such a hold on us? We explore different strategies for reading objects as answers to such questions and as cultural evidence more generally. Our work is informed by various models of material-culture study from anthropology, history, sociology, literature and museum studies, and we read the work of theorists and others who have influenced modern views of material culture (among them Freud, Marx, Bourdieu, Clifford, Henry James and Walter Benjamin). And we do some in-the-field analysis of different historic, museum and personal objects as well as monuments around St. Louis (field trips!). The final assignment is a multimedia project in which students document the complex cultural lives of especially compelling objects.

L98 AMCS 208B African-American Studies: An Introduction

Lectures, readings, films, and discussions reflect a range of academic approaches to the study of African-American people. Course materials drawn from literature, history, archaeology, sociology, and the arts to illustrate the development of an African-American cultural tradition that is rooted in Africa but created in the Americas. Required for the major.

L98 AMCS 2101 The Linguistic Legacy of the African Slave Trade in Interdisciplinary Perspective

This course explores the linguistic consequences of the African slave trade, and in so doing introduces students to basic concepts in linguistic science that are relevant to human language development and controversial educational theories that are based on race. Anthropological, linguistic, and psychological dimensions of African-American culture are embedded within complementary evaluations of educational controversies surrounding the teaching of (standard) English to American slave descendants, including the Ebonics controversy and its relevance to larger questions of social efficacy, and the affirmative action debate that has consumed the nation. Students work individually or in groups to produce a major intellectual artifact (e.g., a term paper, a scholarly web page, or a project pertaining to the linguistic plight of citizens within this African Diaspora). Students are introduced to foundational African-American studies in anthropology, education, English, linguistics, and psychology.

Same as AFAS 210
L98 AMCS 2120 Archaeological Fantasies and Hoaxes
American popular culture is saturated with pseudoscientific and fictionalized accounts of archaeological discoveries and interpretations. How can students of the past distinguish between fraud, fantasy, hype, and valid archaeological research? What potential merit do films, TV-oriented documentaries, and historical fiction offer? What role has racism played in attempts to deny indigenous peoples credit for their past achievements? This course looks at the popular culture of archaeology, providing tools for critical evaluation as well as lifetime enjoyment of the field as it is frequently sold to both the informed and the unwary public. Anthropology majors and non-majors are all welcome as are sophomores and motivated first-year students who have not yet declared majors.

L98 AMCS 215D Introduction to Comparative Practice I
This course permits the close examination of a particular theme or question studied comparatively, that is, with a cross-cultural focus involving at least two national literatures. Topics are often interdisciplinary; they explore questions pertinent to literary study that also engage history, philosophy, and/or the visual arts. Although the majority of works studied are texts, the course frequently pursues comparisons of texts and images (painting, photography, film). Requirements may include frequent short papers, response papers, and/or exams.
Same as Comp Lit 215C
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L98 AMCS 220 Topics in American Culture Studies: Introduction to American Culture Studies
This course introduces students to the different approaches and methodologies within the American Culture Studies field, including those represented by literature, history, sociology and political science; at the same time, they learn key concepts within the field that informs their future work. These are presented in a semester-specific topic of focus; please see Course Listings for a description of the current offering. The course is ideal for AMCS majors and minors, but others are welcome. This course fulfills the introductory course requirement for AMCS majors and minors.

L98 AMCS 220S Social Inquiry: An Introduction to Sociology
Sociologists possess a secret knowledge that allows them to dissect subjects ranging from how class, race, gender and sexual orientation affect educational outcomes, family life and crime to apparently trivial issues such as why people cross-dress, are attracted to cults, or become pot smokers. Sociology illuminates the connection between private concerns and public issues. Inspired by this approach, the mission of this course is to first understand what is sociology — its methods and its theories, and then use this foundation to explore issues of class, inequality, race, gender, culture, power, social engagement and activism. Required readings consist of three(ish) articles or chapters per class. Grades are based on three in-class short-answer exams, three workshop and applied assignments, and enthusiastic participation.
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD EN: S FA: SSP

L98 AMCS 229 Topics in American Culture Studies
The topic of this course varies from semester to semester. Please see Course Listings for a description of the current offering.

L98 AMCS 236 Cultural History of the American Teenager
This course explores the recent history of the teenager in the United States, from the rise of teen culture in the 1950s to the current state of adolescence in the new century. Why have so many novels and films memorialized adolescence? How has the period of development been portrayed in books and film? How have depictions and attitudes toward teen culture changed over the past sixty years? In our consideration of teen culture, we take a multidisciplinary approach when tackling a variety of materials — including historical readings, literary fiction, Young Adult fiction, comic books, popular films, and popular music. In an attempt to come to a better understanding of how the notion of the American teenager has evolved over the past sixty years, we begin with J.D. Salinger’s classic novel of adolescence alienation, The Catcher in the Rye, a book that in many ways helped initiate the rise of the youth movement in the 1950s and ‘60s. Our readings focus on the middle decades of the 20th century, when teen culture moved to the forefront of American life, but we end the semester by considering how teen life has recently been imagined in such novels as The Hunger Games.
Our class also discusses a few films, such as Rebel Without a Cause and American Graffiti, which have helped shape our conception of the American teenager. Ultimately, we question what these depictions of teen culture can tell us about larger trends and concerns in American life. As this course serves as an introduction to American Culture Studies, we focus on the different methods that we can employ when attempting to interpret and analyze American culture.
Credit 3 units. A&S: TH A&S: IQ, HUM

L98 AMCS 239 Performance and Culture
What does putting on a play have to do with having a wedding? What’s the difference between St. Louis sports fans and primates at the Saint Louis Zoo? What does the “Mr. WashU” pageant say about the Washington University community? How is a dance concert like a Native American Pow Wow? In this course we explore the vocabulary and concepts of performance studies to address these and other questions. We bring the vital lens of performance to focus on an array of cultural activities through readings, field trips and activities. Three short essays, a mid-term and a take-home final are required.
Same as Drama 239
Credit 3 units. A&S: LA A&S: IQ, HUM BU: BA EN: H

L98 AMCS 244 War, Rebellion and the Formation of American Identity, 1754–1865
This course surveys the United States’ experiences with rebellion and organized armed conflict from the origins of the American Revolution until the Civil War. Though the class deals with war, its focus is not on military tactics or the outcome of battles — indeed several of the conflicts it considers were entirely bloodless. Rather, the course utilizes war and rebellion as a prism through which to view the ways in which Americans conceived of themselves. Students address a number of questions: How and why did people in North America conceive of themselves as distinct from Europeans? Did war lead to more inclusive or exclusive views of who was considered “American?” How did people of different backgrounds view violent conflict? Why did some wars become central to American myth and others largely forgotten? Did war and rebellion promote a newly formed nationalism or did they help lead to sectionalism and the Civil War? Readings consist of secondary materials from a range of disciplines and primary documents that include novels, speeches, newspaper articles, letters, memoirs, editorial cartoons and paintings.

L98 AMCS 2441 Freshman Seminar: Immigration and American Identity
This small-group discussion course looks at how Americans have debated questions about the “fitness” of immigrants for freedom and citizenship, and how those debates in turn have shaped immigrant experiences and American identity. The
course connects immigrant experiences to broader trends in U.S. history. Students explore processes of memory-formation and the construction of national narratives that still shape our understandings of immigration today.

Same as History 2441
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L98 AMCS 245 Images of Disability: Portrayal in Film and Literature
This course critically examines the portrayal of persons with disabilities in literature and film, exploring how those images either shape or mimic general public impressions. We discuss the implications of messages from the media on American responses to people with disabilities, as well as formulating strategies for promoting positive, inclusive messages. Perspectives from social science, health care, communications and other fields provide frameworks for analysis. Literature includes fiction, biography and autobiography in books, essays, drama, poetry and short stories. Selections from fictional, educational and documentary films are reviewed during the semester. We also investigate images in newspapers, magazines and advertising.

Credit 3 units. BU: BA

L98 AMCS 246 Introduction to Film Studies
How do film images create meaning? What are the tools the film artist uses to create images? This course introduces students to basic techniques of film production and formal methodologies for analyzing film art. Students learn the essential components of film language — staging, camera placement, camera movement, editing, lighting, special effects, film stock, lenses — to heighten perceptual skills in viewing films and increase critical understanding of the ways films function as visual discourse. The course is foundational for the major in Film and Media Studies. Required screenings.

L98 AMCS 248 Latino/a Experiences in the United States
Identity is a term that begins to give humans a sense of understanding who we are. In terms of the Latino/a diaspora in the United States, issues of ethnicity, gender, nation, class, sexuality and race are key theoretical categories that aid us in theoretical and practical understandings of identity. In this course we analyze and discuss the concept of order to understand the constructions and varied meanings of the term. A special emphasis is placed on anthropological, historical and social science literatures of the Caribbean, Latin America and the United States as they pertain to deeper understandings of identity. Prerequisite: membership in the Annika Rodriguez Program.

L98 AMCS 252 Introduction to Latino/a Studies: Exploring Memory
The course is an interdisciplinary introduction to Latino Studies, a discipline that studies the experiences and conditions of U.S. Latinos drawing from both the Social Sciences and Humanities. The course presents and analyzes works that include methodological strategies and analytical approaches to learning about U.S. Latinos. We analyze the social, political, and cultural forces that have affected the experiences of Latinos/as with particular attention to the ways in which historical, collective, family, and personal memories have shaped and continue to shape these experiences. We explore the intersections of history, place, and identity through a selection of works, including literary and media studies, in order to understand the principle questions and concerns in the major fields of interest to U.S. Latino Studies.

L98 AMCS 2590 Freshman Seminar: From the “City on a Hill” to 9/11: Religion and Social Justice in America
From the Puritans' search to build the “city on a hill,” to the growing conflation of Islam with terrorism, Americans have long nurtured a self-identity as “God’s chosen people,” an idea that has helped them justify and normalize a theology of both conquest and suffering. This course analyzes how religion served to both buttress and contest notions of social domination, punishment, reform, and revolution in the U.S. from the colonial era to the present. Attention is paid to the voices of established religious leaders for whom the Church was their home, as well as religious dissidents who were often outcast as lunatics. Topics include the American Jeremiad, abolitionism, slave rebellions, Native American Catholicism, Fundamentalism, the Catholic Worker Movement, Pacifism, the Black Freedom Struggle, the Moral Majority, and Post-9/11 military and gender interventions with the Islamic world.

L98 AMCS 2600 Religion in the African-American Experience: A Historical Survey
This course introduces students to important themes in the history of African-American, and thus in American, religious history, among them slavery, emancipation, urbanization, migration, consumer culture, sexuality, politics, and media technologies. Primary attention is given to Afro-Protestantism in North America and the cultural, social, and religious practices and traditions of these black communities. However, students are also introduced to specific expressions of religious diversity and varying religious traditions and practices in African-American communities.

L98 AMCS 2674 Sophomore Seminar: Slavery and Memory in American Popular Culture
Sophomores receive priority registration. The history of slavery has long created a sense of unease within the consciousness of many Americans. Recognizing this continued reality, this seminar examines how slavery is both remembered and silenced within contemporary popular culture. Although slavery scholarship continues to expand, how do everyday Americans gain access to the history of bondage? Moreover, how does the country as a whole embrace or perhaps deny what some deem a stain in American history? Taking an interdisciplinary approach to these intriguing queries, we examine a range of sources: literature, public history, art/poetry, visual culture, movies and documentaries, as well as contemporary music including reggae and hip-hop. The centerpiece of this course covers North American society, however, in order to offer a critical point of contrast, students are challenged to explore the varied ways slavery is commemorated in others parts of the African Diaspora.

L98 AMCS 297 Undergraduate Internship in American Culture Studies
Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities, e.g., 8-10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours. Students may not receive credit for work done for pay but are encouraged to obtain written evaluations about such work for the student’s academic adviser and career placement file.
Credit variable, maximum 3 units.

L98 AMCS 298 Directed Fieldwork in American Culture Studies
Fieldwork under the direction of an AMCS-affiliated faculty. All proposals for study must be submitted for review and approved by the AMCS adviser. See the AMCS website for the appropriate form. By permission of instructor.
Credit variable, maximum 3 units. FA: SSP

L98 AMCS 299 The Study of Cities and Metropolitan America
This course serves as the introductory course analyzing the forces shaping America’s cities and surrounding metropolitan areas. It examines, as well, strategies for dealing with many of the profound social issues affecting urban/metropolitan America. Emanating from an historical perspective, it examines the ways in which industrialization and deindustrialization shaped Northern American cities and the consequences of deindustrialization on urban citizenry. It further surveys the demographic and spatial transformation of American cities, examining the consequences of urban transformation on federal, state and local politics, on society and on her institutions. Similarly, the course focuses on the origin and societal changes and emerging goals of urban development, gentrification and evolving patterns of metropolitanism and the necessity for central city as well as neighborhood reconstruction. The dynamics of racial residential segregation, crime and punishment, issues of academic achievement and under-achievement, the social cleavages of urban marginalized communities, family structure, urban homelessness, urban sprawl, and health care, among others, are viewed from the perspective of social justice by exploring social, political, economic, racial and ethnic factors that impact on access, equity and care. Various theoretical perspectives and philosophies are introduced that have dominated the discourse on race and urban poverty. A field-based component complements the course work, and is designed to build interest, awareness and skills in preparation for outreach to urban communities. Prerequisite: sophomore standing.

Credit variable, maximum 3 units.

L98 AMCS 3015 Topics in Popular Culture: End of the Century: American Culture during the 1990s
Starting with Allan Bloom’s The Closing of the American Mind, a book that helped re-ignite the Culture Wars, this course considers the debates and problems that pervaded American culture during the 1990s. From the end of the Cold War to the sexual scandals that rocked Bill Clinton’s presidency, from the emergence of the internet to the rise of grunge and rap, the 1990s were a time of vast change in American culture. It was a period when we, as a nation, reconsidered the legacy of the 1960s, the Reagan revolution, and the end of the Cold War, a time of economic expansion and cultural tension. In our consideration of the 1990s, we consider a variety of materials — ranging from news reports and political essays, literary fiction (Philip Roth’s The Human Stain and Jonathan Franzen’s The Corrections) and popular films (Spike Lee’s Do the Right Thing and The Cohen brothers’ The Big Lebowski), to the music of Nirvana and Public Enemy — in an attempt to come to a better understanding of our recent history. By examining a wide variety of texts, we not only explore the cultural and political questions that Americans faced in the years between the fall of the Berlin Wall and the terrorist attacks of September 11, 2001, but also come to a better understanding of how cultural studies can be performed.

L98 AMCS 3027 Religion and Politics in 20th Century U.S. History
This course provides both a chronological and thematic overview of the history of religion, political culture, and society in 20th-century America. While moving sequentially through key transformations running from the beginning to the end of the century, we also pause each week to examine particular episodes and themes that illuminate substantive and symbolic societal turns. Specifically, this course encourages us to think more deeply about the ways religious ideas, institutions, and individuals intersect with and weave through broad political developments like populism and progressivism, corporate and labor activism, the rise and decline of New Deal liberalism, war and American empire building, the power shift to the Sunbelt, urban and suburban power struggles, social movements of the Left and the Right, the politics of family, education, and community, civil rights and ethnic identity, conservatism and globalization. The overarching goal of this course is to place religion at the center of political development in the twentieth century, and at the center of our understanding of this recent past. Here religion is not (as is often done by political historians) cordoned off as an agent of change worthy of consideration only under exceptional circumstances and in rare moments, but rather is considered as a consistent, powerful player that always brings competing passions and interests, drama and controversy to the political realm. This primary agenda is accompanied by a couple of others. In addition to absorbing the historical “facts and figures” of religion and politics in the 20th century (on which students are tested), students also are encouraged to encounter and critique different styles of historical writing, from biographies and autobiographies to traditional monographs, articles and essays to editorials. What makes “good writing”? “Good history writing”? What are the challenges inherent to writing effective religious and political history? This set of issues is important for us to consider because they lead to yet a final set of questions: how does one actually go about researching history? Writing it? In addition to taking time for extensive reading in this subject area, students also are expected to complete a major term paper based on both primary and secondary sources. Students begin this project early in the semester and, while in consultation with members of their peer group and instructor, see it through to its conclusion by the last week of class.

L98 AMCS 3029 And Justice for All? American Inequalities
In recent decades social inequalities have deepened and calcified in the United States. But just what does that mean? How should we conceptualize the particular modes and forms of inequality in the contemporary United States? What is the empirical reality? How did we get here? Why do inequalities persist? How are they reproduced? What are the consequences of such drastic disparities? In this course we examine the empirical reality of social inequality in the United States. At the same time, we raise questions about how social position shapes identity and lived experience in America. Because the focus is on the contemporary U.S., much of the course is devoted to the examination and analysis of patterns and trends in class, race, and gender inequality in this country. Course readings are drawn from sociology, urban history, economics, social epidemiology, and education. Throughout the course we focus on the development of inequality, what it looks like today, the mechanisms of its reproduction, the culturally diverse ways it is experienced, and possible strategies to ameliorate the stark social disparities characteristic of contemporary America. We also keep in mind the interdisciplinary debate among scholars about how best to define and measure social disparities. We begin the course with an examination of the historical and structural roots of American inequality. Next, we look at some conceptual and methodological tools social scientists use to examine social disparities. We then turn to the central institutions and mechanisms that sociologists argue are responsible for creating, reproducing, reducing and changing the structure of inequalities in the U.S. today, including education, labor markets, families and social policies, neighborhoods and segregation, and the criminal justice system. Within each topic area, we pay special attention to the significance of race and ethnicity, social class, and gender as well as their intersections and cleavages. We focus on the present period but place each topic in a broader historical context. In the final part of the course, we turn our attention to social change via social policy and social movement. Credit 3 units.

L98 AMCS 3042 Making Sex and Gender: Understanding the History of the Body
This course provides an overview of the history of the body from antiquity to modern times using an interdisciplinary approach. By exploring selections from medical texts, literature, fashion, art, accounts of “new world” exploration, legal records, self-help books and contemporary media representations of human bodies, we consider the changing historical perception of the body. The intersection of gender, race and class factor significantly in our discussions of how the body has been construed historically and how it is currently being constructed in contemporary American culture. This course also provides an introduction to feminist/gender methodologies that apply to understanding the history of the body. This course is not open to students who have taken WGSS 204. Prerequisite: any 100- or 200-level Women, Gender, and Sexuality Studies course or permission of instructor.

L98 AMCS 3070 Politics and Policymaking in the American States
The American federal system is often overlooked in discussions about politics in the United States; however, state governments unquestionably touch the lives of Americans everyday. As such, an education in American politics is not complete without serious examination of state governments and their political institutions. This course illuminates the importance of the American states in U.S. politics and policy making by critically examining topics such as: intergovernmental relations; the historical evolution of American federalism; the organization and processes associated with state legislative, executive and judicial branches; state elections; political parties; interest groups; and specific state policy areas including budgeting, welfare, education and the environment. Prerequisite: Pol Sci 101B.
Same as Pol Sci 3070
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA EN: S

L98 AMCS 3073 The Global War on Terrorism
This course presents an historical assessment of the Global War on Terrorism (GWOT) from the perspective of its major participants: militant Sunni Islamist jihadists, especially the Al-Qaeda network, and the nation states that oppose them, particularly the United States and its allies. The course then concludes by analyzing the current state and future of Islamist jihad and the GWOT.
Same as History 3073

L98 AMCS 3083 Cracks in the Republic: Discontent, Dissent and Protest in America During the 1960s and 1970s
This course examines the rise and impact of several major political, social and cultural protest movements in the United States during the middle part of the 20th century. It focuses on the Beats, Civil Rights, New Left, Anti-Vietnam War, Counterculture, Black Nationalism, Ethnic Consciousness, Women’s Liberation and Gay/Lesbian Liberation, and contextualizes these movements within major national and international developments including Jim Crow and de facto segregation, middle-class ennui and the Cold War. We pay special attention to the role of youth activism and the methods of dissent and protest used to challenge the status quo. Throughout the course we ask and seek answers to the following questions: What was the nature of these movements? What were their differences and similarities? How was the United States changed significantly during this period and what remained relatively the same? Were those engaged in activism unrealistic in their assumptions, discontent, dissent and protest, or was it a time when many Americans, even those who were passive or who opposed the protesters,
reflected upon issues of privilege and political, economic and social power?
Same as History 3072

L98 AMCS 3081 City on a Hill: The Concept and Culture of American Exceptionalism
This course examines the concept, history and culture of American exceptionalism: the idea that America has been specially chosen or has a special mission to the world. First, we examine the Puritan sermon that politicians quote when they describe America as a “city on a hill.” This sermon has been called the “ur-text” of American literature, the foundational document of American culture; learning and drawing from multiple literary methodologies, we re-investigate what that sermon means and how it came to tell a story about the Puritan origins of American culture — a thesis our class reassesses with the help of modern critics. In the second part of this class, we broaden our discussion to consider the wider (and newer) meanings of American exceptionalism, theorizing the concept while looking at the way it has been revitalized, redefined and redeployed in recent years. Finally, the course ends with a careful study of American exceptionalism in modern political rhetoric, starting with JFK and proceeding through Reagan to the current day. In the end, students gain a firm grasp of the long history and continuing significance — the pervasive impact — of this concept in American culture.

L98 AMCS 3131 Topics in English and American Literature
Called the “Age of Revolution,” the Romantic Age of British literature, 1770-1830, witnessed the birth of new lyric forms,
the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, oversimply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal "Jerusalem." It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we consider the historical contexts, and the sometimes competing histories of ideas, that shaped the six major British Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron, and John Keats. We follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts also assigned include Mary Shelley’s Frankenstein and Byron’s Don Juan.

L98 AMCS 316F Rediscovering the Child: Interdisciplinary Workshops in an Urban Middle School
It is said that at this time in history the entire country must make a commitment to improve the positive possibilities of education. We must work to lift people who are underserved; we must expand the range of abilities for those who are caught in only one kind of training; and we must each learn to be creative thinkers contributing our abilities to many sectors of our society. In this course, we expand our views about learning by experimenting with the creative process of lateral thinking. In the first six weeks of the semester, we learn about learning by meeting with exceptional people with many scholarly, professional, and civic engagement accomplishments. We also learn by working in teams to develop an exciting set of 2-D/3-D, hands-on, problem-solving workshops for middle-schoolers from economically disadvantaged urban families; the workshop curriculum is based upon students’ knowledge and passion as well as their interests. During the last eight weeks, we deliver these workshops once a week to students at Compton-Drew Middle School (adjacent to the Science Center in the city of St. Louis). In this course we celebrate the choices of studies we each pursue, and expand our experience by learning from each other’s knowledge bases and creativity. The course is open to students from all disciplines and schools, freshmen through seniors, and meets the multidisciplinary fieldwork requirement for AMCS majors.

L98 AMCS 3202 Civic Scholars Program Semester One: Self Awareness, Civic Life and Citizenship
This is the first-semester, foundation course for students in the Civic Scholars Program of the Gephardt Institute for Public Service. This course provides students with a context for examining civic engagement and developing civic leadership skills. Through lectures, guest speakers, readings, excursions and class discussion, students (1) explore the history and current status of civic engagement and (2) prepare for the implementation of a civic project the summer between their junior and senior years. Students meet in a structured class to discuss concepts, engage in critical reflection, and develop leadership skills. In addition, students critically reflect on course content to enrich their learning. Prerequisite: acceptance into the Civic Scholars Program.

Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L98 AMCS 3203 Civic Scholars Program Semester Two: Civic Engagement, Social Activism, and Civic Life
This is the second-semester, foundation course for students in the Civic Scholars Program of the Gephardt Institute for Public Service. This course provides students with a context for examining civic engagement and developing civic leadership skills. Through lectures, guest speakers, readings, excursions and class discussion, students (1) explore the history and current status of civic engagement and (2) prepare for the implementation of a civic project the summer between their junior and senior years. Students meet in a structured class to discuss concepts, engage in critical reflection, and develop leadership skills. In addition, students critically reflect on course content to enrich their learning. Prerequisite: acceptance into the Civic Scholars Program.

L98 AMCS 3203 Civic Scholars Program Semester Two: Civic Engagement in Action
This is the second-semester, foundation course for students in the Civic Scholars Program of the Gephardt Institute for Public Service. This course provides students with a context for developing their civic projects. Students engage in a semester-long research and project planning process tied to their civic projects. Through research, lectures, workshops and presentations, students develop a project proposal for their civic projects. Students meet in class to discuss concepts, engage in critical reflection, and develop skills. Prerequisite: AMCS 3202. Credit 2 units. A&S: SS A&S: IQ, SSC AR: SSP EN: S

L98 AMCS 3204 Bodies Out of Bounds: Feminist and Queer Disability Studies
For many, “disability” seems like a concept with a relatively stable definition and a fairly straightforward relationship to questions of health and well-being. But in the past few decades, scholars and activists have begun to challenge the notion that disability is a tragedy to be medically prevented or inspirationally “overcome.” These scholars have instead focused their attention on the social aspects of disability: how it came to be constructed as a category of identity, the physical and institutional barriers that have excluded disabled people from public life, and the distortion of disabled lives within the mainstream representation. More recently, writers have turned their attention to the way disability had been defined though norms of race, gender and sexuality. These intersections are the focus of this course. From the diagnoses of hysteria, to debates over selective abortion, and the recent proliferation of breast cancer memoirs, we consider how the politics of disability has both complemented and complicated the usual goals of feminism. We also explore some of the ways that disability studies as a discipline has redefined, and in turn been shaped by, the fields of queer theory, masculinity studies, and critical race theory. We consider how deviant genders have been the target of medicalization, the relationship between “corrective surgery” and compulsory gendering, the desexualization and hypersexualization of disabled bodies, and the role that medicine has played in justifying colonial conquest and perpetuating racial inequalities. Prerequisite: any 100- or 200-level Women, Gender, and Sexuality Studies course. Same as WGSS 3203

L98 AMCS 323C Children and War
This course considers 20th century representations of war in American children’s literature. Our scope stretches from the run-up to World War II in the 1930s through the current conflicts in Iraq and Afghanistan. This period produced texts that debated not only the role of war in childhood development but also the role of the child in war’s development. Genres include picture and comic books, career and adventure fiction, science fiction, and childhood memoir. Same as L66 323
Credit 3 units.

L98 AMCS 3253 Food Fights: The Politics of American Jewish Consumption, 1890-2014
This course explores the politics of religion, food, and eating among Jews in the United States from the late 19th century through the present day. The subject is not Jewish food per se but instead American Jewish foodways — the cultural, social, historical, political, and economic practices relating to the production and consumption of food. The course is organized chronologically but also by themes that loom large in American Jewish history: the great wave of Jewish immigration from Eastern Europe from 1890 to 1924; contention over kashrut, including its increasing industrialization and commercialization; iconic American Jewish foods; and the present-day “new Jewish food movement,” which aims to align Jewish foodways with sustainability and the slow foods movement. The course focuses attention not only on narratives of American Jewish foodways
but on core issues of American Jewish identity politics: where are the sources of power and who is recognized as an authority? What is at stake in delineating between Judaism (the religion) and Jewishness (the culture)? How do American Jews present themselves to non-Jewish Americans and how do they respond to Jews who are different from them? How have the politics of place affected the distribution and reception of Jewish food and how have these politics changed over time?

L98 AMCS 3255 Development of the American Constitution

The practical meaning of the Constitution has changed since 1787, not only as a result of normal amendments and court interpretations, but also through normal politics and unconventional transformations. After initial discussion of the nature of the Constitution and of constitutional interpretation, the course examines important instances of such change processes. These have resulted in important reformulations, usually gradual but occasionally sudden, of executive branch powers, the judicial system, the electoral system, federalism, economic regulation, and civil rights. The course then devotes special attention to several present-day issues of constitutional politics, such as presidential war powers, the use and misuse of secret agencies, the “unitary executive theory,” and the special constitutional significance of the Justice Department. Prerequisites: Pol Sci 101B American Politics. Formerly Pol Sci 3254 Constitutional Politics in the U.S.: Students who have taken that class are not eligible.

L98 AMCS 3263 Introduction to Research Design

The purpose of this course is to introduce students to a range of research designs found in the social sciences. We work on ways to ask and operationalize research questions as well as examine appropriate research designs and strategies. We begin the course with the problem of developing informed research questions, the accompanying hypotheses and developing them around a so-called scientific method. We concern ourselves with understanding the role and importance of literature reviews and then examine sources of data and four types of research strategy through cases that use them: ethnmethodology, an historical methodology, a quantitative approach, and a hybrid of quantitative and qualitative approaches.

Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA EN: S FA: SSP

L98 AMCS 3270 Comics, Graphic Novels and Sequential Art

This course traces the evolution of comics in the America from the “comic cuts” of the newspapers, through the development of the daily and Sunday strips, into the comic book format, and the emergence of literary graphic novels. While not a uniquely American medium, comics have a specifically American context that intersects with issues of race, class, gender, nationalism, popular culture, consumerism and American identity. Comics have repeatedly been a site of struggle in American culture; examining these struggles illuminates the way Americans have constructed and expressed their view of themselves. The way comics have developed as a medium and art form in this country has specific characteristics that can be studied profitably through the lens of American Culture Studies.

Credit 3 units. A&S: LA A&S: IQ, HUM AR: Lit EN: H FA: Lit

L98 AMCS 3272 The Superhero in American Culture

The superhero is an American cultural figure that enjoys great metaphoric resonance in contemporary America and about contemporary America, much as the Western did during the Cold War. But this metaphoric resonance has existed since the genre came into being with Superman in 1938 as part of the nation’s response to modernity, and predates the creation of the genre through the hero figures that contributed tropes to the superhero genre. Through a cultural historical and transmedia approach,
this course examines the superhero and the superhero genre as a myth medium and contested site for portraying and shaping ideas about American identity, masculinity, modernism, race, class, gender and humanity. The prehistory of the superhero is examined in 19th- and early 20th-century frontier stories, science fiction and pulp fiction. The definition of the superhero and the genre’s evolution in comics, film, television, and fan-produced works are examined, with a focus on how the genre has served and mediated the conflicting needs of creators and audiences. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L98 AMCS 3273 American Graphic Storytelling and Identity
From editorial cartoons presenting African Americans in racist caricature during the Civil War and Reconstruction, to the appearance of the “Yellow Kid” in the comic strip “Hogan’s Alley,” to graphic narratives that reinforce (or challenge) racial and gender stereotypes in the late 20th century, comics in the United States have long been preoccupied with identity. In this course we trace the development of identity as a major preoccupation in the comics medium. Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD EN: H

L98 AMCS 3283 Introduction to Global Health
This course provides a general introduction to the field of public health. It examines the philosophy, history, organization, functions, activities, and results of public health research and practice. Case studies include infectious and chronic diseases, mental health, maternal and reproductive health, food safety and nutrition, environmental health, and global public health. Students are encouraged to look at health issues from a systemic and population level perspective, and to think critically about health systems and problems, especially health disparities and health care delivery to diverse populations. No background in anthropology or public health is required.

L98 AMCS 330 Topics in American Culture Studies: Exploring America, 1957
In contrast with our conventional understanding of exploration as a geographical adventure, the movement in this course is in time. Taking one year as the focal point for study — in this case, 1957 — we read newspapers, books and magazines, watch TV, listen to speeches and music, go to the movies and, in general, examine the documents we can recover from that period in an effort both to better understand American culture and to discover how such a large and nebulous subject might be studied. The work for this course involves collaboration, with a division of materials and regular reports to the class concerning individual (or small group) areas of responsibility. Continuous participation is a requirement rather than an option. Credit 3 units. A&S: TH A&S: IQ, HUM AR: SSP BU: BA EN: H FA: SSP

L98 AMCS 3301 History of American Cinema
This course traces the history of the American cinema from the earliest screenings in vaudeville theaters through the birth of the feature film to movies in the age of video. The course examines both the contributions of individual filmmakers as well as the determining contexts of modes of production, distribution and exhibition. The course aims to provide an understanding of the continuing evolution of the American cinema, in its internal development, in its incorporation of new technologies, and in its responses to other national cinemas. Required screenings. Same as Film 330

L98 AMCS 3325 Topics in Politics: Constitutional Politics in the United States
The principal purpose of this course is to introduce students to the politics of constitutional interpretation. We first discuss the origins of the constitution, the structure operation and work of courts, and judicial decision-making. Afterward, we examine various areas of the law relating to institutional powers and constraints (e.g., federalism, presidential powers, Congressional authority). In so doing, we develop an understanding for the legal doctrine in each area of the law and also examine explanations for the legal change we observe.

L98 AMCS 336C The Cultural History of the American Teenager
This course explores the recent history of the teenager in the United States, from the rise of teen culture in the 1950s to the current state of adolescence in the new century. How have so many novels and films memorialized adolescence? How has the period of development been portrayed in books and film? How have depictions and attitudes toward teen culture changed over the past fifty years? We begin with J.D. Salinger’s classic novel of adolescence alienation, The Catcher in the Rye, a book that in many ways helped initiate the rise of the youth movement in the 1950s and ‘60s. From there, we read a series of novels and historical studies that trace the changes in teen culture that have occurred over the past half century. Our class also considers a few films, such as Rebel Without a Cause and Dazed and Confused, which have helped shape our conception of the American teenager. Ultimately, we question what these depictions of teen culture can tell us about larger trends and concerns in American life. Readings include Judy Blume’s Forever, Stephanie Meyer’s Twilight, and Colson Whitehead’s Sag Harbor.
Same as L66 336
Credit 3 units.

L98 AMCS 3370 Music and Performance
In his 1998 book, Musicking, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography, and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater
We examine artists whose work blurs the line between “music” and “theater,” including George Clinton, Taylor Mac, and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome.

**L98 AMCS 340P Performing Gender**

This course investigates an array of contemporary performances to explore manifestations of and challenges to gender norms in American culture. An initial reading of crucial performance theories by Judith Butler, Jill Dolan and others helps set the stage for our examination of a diverse collection of contemporary texts, including plays, solo performances, stand-up and pop culture phenomenon. We raise questions about feminist performance strategies, butch/femme performance, camp, cross-dressing, feminist spectatorship, multimedia performances and the representation of lesbian desire. Prerequisite: any 100-level Women, Gender and Sexuality Studies course.

**L98 AMCS 341 Understanding the Evidence: Provocative Topics of Contemporary Women's Health and Reproduction**

Contemporary topics of women’s health and reproduction are used as vehicles to introduce the student to the world of evidence-based data acquisition. Selected topics span and cross a multitude of contemporary boundaries. Issues evoke moral, ethical, religious, cultural, political and medical foundations of thought. The student is provided introductory detail to each topic and subsequently embarks on an independent critical review of current data and opinion to formulate his or her own said notions. Examples of targeted topics for the upcoming semester include, but are not limited to: Abortion, Human Cloning, Genetics, Elective Cesarean Section, Fetal Surgery, Hormone Replacement, Refusal of Medical Care, Medical Reimbursement, Liability Crisis and Gender Bias of Medical Care.

Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA, FA: SSP
L98 AMCS 3422 Americans and Their Presidents
How have Americans understood what it means to be President of the United States? This seminar uses that question as a point of departure for a multidisciplinary cultural approach to the presidency in the United States, examining the shifting roles of the chief executive from George Washington through Barack Obama. In addition to a consideration of the President’s political and policymaking roles, this course examines how the lived experiences of presidents have informed the ways Americans have conceived of public and private life within a broader political culture. In the process, this course uses the presidency as a means to explore topics ranging from electioneering to gender, foreign policy to popular media. Readings are drawn from a broad range of fields.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: SSP

L98 AMCS 344 Courts and Civil Liberties
This course focuses on constitutional law principles in the Bill of Rights, and examines how Supreme Court decisions influence these principles in everyday life. We explore how the courts, and particularly the Supreme Court, have interpreted these rights in light of changing times and emerging issues. Topics include the First Amendment; free exercise of religion and the establishment clause; freedom of speech, assembly and association; freedom of the press; the Fourth Amendment and the rights of those accused and convicted of crimes; the right to privacy, including reproductive freedom and the right to die; equal protection and civil rights, including race, gender, sexual orientation; immigrants’ rights and voting rights; and civil liberties after September 11. Recommended for the Liberal Arts and Business (LAB) Certificate.
Same as Pol Sci 344
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA, ETH, HUM FA: SSP

L98 AMCS 3441 Defendant’s Rights
This course explores the operations of the American criminal justice system. Substantial emphasis on the constitutional rights accorded to the criminally accused. Readings consist primarily, but not exclusively, of Supreme Court cases.
Same as Pol Sci 3441
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA, ETH FA: SSP

L98 AMCS 3450 Sexual Politics in Film Noir and Hardboiled Literature
Emerging in American films most forcefully during the 1940s, film noir is a cycle of films associated with a distinctive visual style and a cynical worldview. In this course, we explore the sexual politics of film noir as a distinctive vision of American sexual relations every bit as identifiable as the form’s stylized lighting and circuitous storytelling. We explore how and why sexual paranoia and perversion seem to animate this genre and why these movies continue to influence “neo-noir” filmmaking into the 21st century, even as film noir’s representation of gender and sexuality is inseparable from its literary antecedents, most notably, the so-called “hard-boiled” school of writing. We read examples from this literature by Dashiell Hammett, James Cain, Raymond Chandler and Cornell Woolrich, and discuss these novels and short stories in the context of other artistic and cultural influences on gendered power relations and film noir. We also explore the relationship of these films to censorship and to changing post-World War II cultural values. Films to be screened in complete prints or in excerpts include many of the following: The Maltese Falcon, Double Indemnity, Murder My Sweet, Phantom Lady, Strangers on a Train, The Big Sleep, The Killers, Mildred Pierce, The High Wall, Sudden Fear, The Big Combo, Laura, The Glass Key, The Big Heat, Kiss Me Deadly, The Crimson Kimono, Touch of Evil, Alphaville, Chinatown, Taxi Driver, Devil in a Blue Dress, The Bad Lieutenant, and Memento. Required screenings.

L98 AMCS 3504 A Cultural History of Conservatism In The United States Since World War II
Beginning with Hayek’s *The Road to Serfdom* and Buckley’s *God and Man at Yale*, this course examines some of the major conservative writers and thinkers in the United States since World War II. The course includes readings by Russell Kirk, Richard Weaver, Barry Goldwater, Phyllis Schlafly, Irving Kristol, Newt Gingrich, and Pat Buchanan as well younger conservatives like Mark Steyn, Jonah Goldberg, Ramesh Ponnuru, S.E. Cupp, and Kevin Williamson. Several classes are devoted to black conservatives including Thomas Sowell, Shelby Steele, and Walter Williams. We try to answer the questions: What is conservatism and who are its adherents? Can we speak of conservatism in the singular or are there several types of conservatism? Are the various forms of conservatism politically and intellectually compatible? How has conservatism changed since Reagan and the 1980s? What inroads has conservatism made in the cultural and political life of the United States? Is the United States essentially a conservative nation? Time permitting, we may also watch a few Hollywood movies by conservative filmmakers.

L98 AMCS 3551 The Welfare State and Social Policy in America
How can we understand the recent debate about fundamental health care reform? Should social security be partially or wholly privatized? Was the 1996 welfare reform a success? Contemporary political questions frequently focus on the American welfare state and the social policies that comprise it. The first half of this course describes the American welfare state broadly construed, places it in a comparative context, and elucidates major political science explanations for the size and scope of American social policy. We touch on several areas of social policy while constructing the generalized lenses through which particular political outcomes can be understood. The second part of the course then focuses on three major aspects of the American welfare state: health care, old age pensions, and policies related to work, poverty and inequality.
Same as Pol Sci 3551
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA FA: SSP

L98 AMCS 3561 Women and the Law
We explore the development of women’s legal rights by examining the ways in which social constructions of gender, race, class and sexuality have shaped American legal concepts within the limited bounds of traditional legal reasoning. We begin by placing our current legal framework, and its gender, race and other societal assumptions, in an historical and Constitutional context. We then examine many of the critical questions raised by feminist theory, feminist legal thought and other critical perspectives. For example, is the legal subject gendered as male, and if so, how effectively can women use the law to gain greater social equity? What paradoxes have emerged in areas, such as employment discrimination, family law or reproductive
rights, as women have sought liberal equality? What is the equality/difference debate about and why is it important for feminists? The course is thematic, but we spend time on key cases that have influenced law and policy, examining how they affect the everyday lives of women.

L98 AMCS 3570 Quality Television and the "Primetime Novel"
Over the past four decades, the cultural status of television in the United States has been reconfigured and complicated with changes in industrial structures, audience formations, regulatory presumptions, and production techniques and strategies. This course examines these interrelated forces, particularly as they have fostered a set of programs and practices often hailed as Quality Television. The class surveys the institutional paradigms that gave rise to particular generations of programming celebrated as “quality” and analyze the systems of distinction and cultural value that make the label socially and industrially salient. We critically investigate the role of audiences and the conceptions of viewer choice at play in these developments. In addition, the course analyzes the textual features that have come to signify narrative complexity and aesthetic sophistication. We examine foundational historical examples of this phenomenon from The Mary Tyler Moore Show to Hill Street Blues, and Cagney & Lacey to Northern Exposure, as well as more contemporary broadcast and cable fiction such as LOST, The Wire, and Mad Men. In addition, students are expected to watch a complete series, chosen in consultation with the instructor, as part of their final research project. Required screening. Prerequisite: Film Studies 220 or Film Studies 350 or consent of instructor.

L98 AMCS 358 Law, Politics and Society
This course is an introduction to the functions of law and the legal system in American society. The course material stresses the realities of the operation of the legal system (in contrast to legal mythology), as well as the continuous interaction and feedback between the legal and political systems. There are four specific objectives to the course: (1) to introduce students to legal concepts and legal theories; (2) to analyze the operation of the appellate courts, with particular emphasis on the U.S. Supreme Court; (3) to analyze the operation of American trial courts, especially juries and the criminal courts; and (4) to examine the linkages between culture and law.

L98 AMCS 3581 Scribbling Women: 19th-Century American Women Writers
In 1855, Nathaniel Hawthorne wrote to his publisher, William Tichnor, that “America is now wholly given over to a damned mob of scribbling women and I should have no chance of success while the public taste is occupied with their trash.” In this class, we examine works of those scribbling women of the 19th century. We read one of the best-selling novels of the century, one that created a scandal and ruined the author’s literary reputation, along with others that have garnered more attention in our time than their own. In addition to focusing on these women writers, we also explore questions about the canon and American literature: What makes literature “good”? What constitutes American literature? How does an author get in the canon and stay there? Finally, in this writing intensive course, there are frequent writing assignments and a strong emphasis on the essential writing process of drafting and revising.

L98 AMCS 3621 Colonial America to the Revolution
This course examines the history of the North American British colonies, up to the American Revolution. We pay particular attention to the political, economic and cultural differences separating colonial regions — New England; the Mid-Atlantic; the Chesapeake; and the southern colonies of Georgia and the Carolinas — while also examining their shared British identity. Drawing from readings consisting of both primary texts and scholarly readings, we also examine how colonists’ place on the periphery of the British empire shaped their vision of what it meant to be “British,” and what role that vision played in shaping the colonial response to British rule, and eventually, their decision to fight for Independence.

L98 AMCS 366 The Civil War and Reconstruction: 1848–1877
This course is a survey of American history from 1848-1877, focusing on the Civil War and Reconstruction. The bloody conflict, and its causes and consequences, are explored from multiple perspectives. Those of individuals such as Lincoln, McClellan, Davis, Douglass, and Lee, who made momentous choices of the era; of groups such as the Radical Republicans and the black freed people that helped shape the actions of individuals; and of the historians, novelists, filmmakers and social movements that have struggled to define the war’s legacy for modern America.

L98 AMCS 367 Modern America, 1877–1929
This course explores dramatic changes in American society during the half-century from the Civil War to the end of WWI. We discuss industrialization; mass immigration from Europe, Asia and Latin America; the vast movement of rural people to cities; the fall of Reconstruction and rise of Jim Crow; the expansion of organized labor; birth of American Socialism; and the rise of the American empire in the Caribbean and the Philippines. The course, in addition, analyzes the many and varied social reform efforts of the turn of the 20th century, from women’s suffrage to anti-lynching campaigns; from trust-busting and anti-immigrant crusades to the settlement house movement.
Same as History 367
Credit 3 units.

L98 AMCS 3671 The Long Civil Rights Movement
The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically, and thematically. It pays special attention to struggles fought in the North, West and Southwest; it seeks to question binaries constructed around “confrontational” and “accommodationist” leaders; it reveals how Latinos, Native Americans, and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics.

L98 AMCS 3671H Medicine, Healing and Experimentation in the Contours of Black History
Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, this course
examines the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus is extended toward the underpinnings of race and gender in the medical treatment allocated across time and space — the United States, Caribbean and Latin America — to give further insight into the roots of contemporary practice of medicine.

L98 AMCS 369 American Horrors
Horror movies. Fright films. Blood and gore fests. Why should we want to look at movies that aim to frighten us? What is the attraction of repulsion? Is there an aesthetics of ugliness? Except for some early prestige literary adaptations like Dr. Jekyll and Mr. Hyde, the horror film began as a low class genre, a notch above exploitation movies. In the 1970s-1980s, it became the dominant commercial genre by offering increasingly graphic images of violence and mayhem. The horror film had arrived: lavish budgets, big stars, and dazzling special effects in mainstream major studio films competed with low-budget, no frills productions that helped establish artistically ambitious and quirky filmmakers like George Romero and David Cronenberg.

By a chronological survey of the American horror film, this course explores how differing notions of what is terrifying reflect changing cultural values and norms. Throughout, we consider the difficult questions raised by horror’s simple aim of scaring its audience. In addition to weekly screenings, work for the course includes analytical and theoretical essays on the horror film. Written analyses of films with a close attention to visual style are required. Prerequisite: Film 220. Required screenings.

L98 AMCS 3711 The History of Popular Culture in the United States
This course surveys major developments in the history of popular culture in America, stretching from the mid-19th century to the present. It explores topics such as literature, drama/theater, dance halls, movies, radio, advertising, television, music and the Internet; it covers different types of popular culture such as printing, performance, image and audio; it looks at how popular culture has been depicted in terms of icons, myths, stereotypes, heroes, celebrities and rituals; it addresses the rise of mass production and consumption; it examines the ways in which race, class, gender, ethnicity and sexuality have been perceived and are portrayed in popular culture; and it illustrates how the content of popular culture shapes and reflects our personal, social, political and intellectual beliefs and values.

L98 AMCS 372C History of Law in American Life II: 1776 to the Present
Among the many contradictions of American history, none has been more recurrent than the tension of justice and law — of aspiration and reality — as Americans have sought to make good on the promises of the Revolution. Although we pride ourselves as a nation devoted to the principle of “equal justice under the law,” the terms “equal” and “justice” have prompted bitter debate, and the way we place them “under law” has divided Americans as often as it has united them. It is the purpose of this course to examine the many and conflicting ways in which Americans have used, abused or evaded “law” throughout their national history.

L98 AMCS 373 Making War
This course examines the cinematic representation of war. Using World War II as a case study, students examine a series of combat pictures, documentaries, and “home front” films from the 1940s to the present. Several key questions guide the class discussion: How do war films respond to and shape the political worlds in which they are produced? How do these films confront the aftermath of war and the soldier’s homecoming? Where is the line between the home front and the front line? More broadly, what does it mean to portray the violence and suffering that war inevitably brings? At the close of the semester, students partake in an in-class symposium presenting their research on the cinematic treatment of other conflicts, from the Civil War to the “War on Terror.” Films include: The Boat, Saving Private Ryan, The Thin Red Line, Why We Fight, and Mrs. Miniver. Readings include works by Susan Sontag, Kaja Silverman, and W.G. Sebald. Required screenings.

L98 AMCS 3742 Social Landscapes in a Global View
From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as “landscapes.” This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We cover various urban landscapes, rural landscapes, nomadic landscapes (and others) and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 BCE to 2009 CE and we cover all the continents. This course also traces the intellectual history of the study of landscape as a social phenomenon and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world and trace the global currents of your social landscape!

L98 AMCS 3755 Disability, Quality of Life and Community Responsibility
The increasing prevalence of disability presents major challenges for American society. Social participation can be a challenge for people with disabilities, while resources to address these needs tend to be limited. This course begins by critically analyzing concepts of disability, quality of life, health and social participation. We construct a framework for examining social participation and community resources across the lifespan. Public health, educational and environmental theories and methods are applied to programs and services that aim to enhance quality of life with disabilities. We analyze ecological approaches to enhancing social participation. Upon completion of this course, students are equipped to analyze challenges and prioritize resources for individual and population health.

L98 AMCS 375A American Culture: Methods and Visions
What does it mean to study American culture? How should we go about doing this work? In this methods seminar, students explore different approaches to American culture, focusing
on a specific topic and a corresponding set of cultural objects especially suited to multidisciplinary investigation. (The particular topic, and associated cultural objects, may vary from semester to semester, and are specified by the instructor in advance; see Course Listings for further details.) Drawing upon their training in different fields, students engage with the many questions, materials and strategies of cultural study, and find new perspectives on work in their “home” discipline. Much of this work focuses on primary sources and ways of interpreting them. The course is shaped by discussions about research methodologies and preparatory work for a final project (which, if appropriate, may become part of an AMCS web-project). As a writing-intensive course, AMCS 375A also serves as an occasion for students to think about matters of argument and presentation, and to develop ideas and models for future research. This course is intended for students at the junior level or higher. Preference given to AMCS majors and minors. Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI EN: H FA: SSP

L98 AMCS 3778 Another Country: Land, Diaspora, and the Vernacular Beyond the Cities
The history of aesthetic and cultural modes of modernity is often told with an urban inflection, omitting a narrative of mobility, artistic experimentation, and social change found in the space beyond the 20th-century city. This course applies a broad interdisciplinary perspective to consider the historical contexts of these diverse rural cultures, their intersections with technology and global economies, and the ways in which these communities and their modes of expression commute between the rural and the urban — writing, speaking, and singing in a vernacular that documents and dramatizes their modern condition. From Mississippi hill country blues to the agricultural photographers, and the everyday practices of the snapshot. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. The course explores these issues by looking closely at several American and translated European texts that have been challenged on moral, sociopolitical or religious grounds to determine what some readers have found so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments. L98 AMCS 3785 Photography in America
This course considers the practice and use of photography in America from its invention up to the present, offering various ways of thinking about the medium and its relation to society and culture. Students come to understand the ways photographic practices shape public perceptions of national identity, ethnicity and gender, nature, democratic selves, and a host of other concerns. We discuss famous practitioners such as Matthew Brady, Jacob Riis, Lewis Hine, Walker Evans, and Robert Frank. We consider not only the social and public uses of the medium through such episodes as the New Deal/FSA and photojournalism, but also the private explorations of “fine art” photographers, and the everyday practices of the snapshot. Prerequisites: Intro to Western (Art-Arch 112) or Intro to Modern (211), or one course in American History, American Cultural Studies, or permission of the instructor. Same as Art-Arch 3785

L98 AMCS 379 Banned Books
Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago a Russian student was exiled to Siberia for possessing a copy of Emerson’s Essays; today, school boards in the United States regularly call for the removal of Huckleberry Finn and The Catcher in the Rye from classrooms and library shelves. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments. Same as E Lit 381 Credit 3 units. A&S: TH A&S: IQ, HUM BU: ETH FA: Lit
L98 AMCS 3802 Politics of Representation in American Religion: Media, Technology, and Display
The role of media in both politics and religion is often presumed to be one of broadcasting information to the public. And yet forms of communication are seldom detached entirely from the processes of creating the information that is conveyed. The entanglement of religion, public identities, and media began well before the introduction of cable television and Twitter. This course is designed to draw students’ attention to modes of mediating public identities in American history by focusing on ways in which religion and religiously have been represented through visual and material artifacts. Students become familiarized with visual and material culture methods and modes of analysis in historical research as well as learn to identify and analyze relationships between religion, representation, and public identities in multiple periods of American history and through a variety of technologies.

L98 AMCS 3840 Gender and Consumer Culture in U.S. Fiction of the Late 19th and Early 20th Century
The decades between the end of the Civil War and the 1930s saw the rise of a mass consumer culture that would dramatically reshape America. The fiction writers of this period, keen to capture the spirit of the age, helped to create the enduring idea that consumerism and an orientation toward material acquisition are at the heart of gendered concepts of American identity. Their stories documented, and sometimes celebrated, the emergence of recognizable “types” of American womanhood and manhood — such as self-made millionaires, ambitious “working girls,” bargain-hunting middle-class housewives, and the commercially-minded women and men of the social and intellectual elite. At the same time, their stories articulated anxieties about U.S. consumer culture and its impact on the world. Students in this course read, discuss, and write about novels and short stories by writers such as Henry James, Mary Wilkins Freeman, Kate Chopin, Theodore Dreiser, Edith Wharton, Nella Larsen, Langston Hughes, and F. Scott Fitzgerald. Students in the course also examine primary materials such as magazine advertisements, and read and respond to relevant scholarship on the period. Writing intensive course.

Credit 3 units. A&S: TH, SD, WI A&S: IQ, HUM, SD, WI EN: H

L98 AMCS 385 Topics in American History
Since World War II, American cities have undergone enormous changes. Industrial decline, rumbling neighborhoods, rigid segregation, racial trauma and suburban sprawl have all contributed to a troubled urban world. This course equips students with an historical perspective on the urban crisis. Rather than simply identifying urban problems, we use the tools of historical inquiry to grapple with the underlying causes of these problems. Students learn the value of history as a method for illuminating the social, cultural, political and economic forces that underlie the current urban crisis. Students also apply their historical understandings toward the creation of an informed position on metropolitan policy and planning issues.

L98 AMCS 3880 Terror and Violence in the Black Atlantic
From the period of bondage through the 21st century, terror and racialized violence have consistently been used as a form of social control. This course is constructed to explore the historical foundations of extreme threats of violence inflicted among populations of African descent. The fabric of American culture has given birth to its own unique brand of terrorism, of which this
class spends considerable time interrogating. Yet, in recognizing that these practices are commonly found in other parts of the Black Atlantic, students are encouraged to take a comparative view to better tease out the wider strands of violence operative in places like England, the Caribbean and Latin America. Within this course, we explore the varied ways in which music, films, newspapers and historical narratives shed light on these often life altering stories of the past. Some of the themes touched upon include: the use of punishment/exploitation during the era of slavery, lynching, sexual violence, race riots, police brutality, motherhood, black power and community activism.

L98 AMCS 3889 Understanding Lincoln: Writing-Intensive Seminar
This course explores the life, art (political and literary) and historical significance of Abraham Lincoln. It focuses first on how he understood himself and foregrounds his inspired conception of his own world-historical role in the Civil War. The course also traces how the larger world furnished the contexts of Lincoln’s career, how his consciousness, speeches and writings, and presidential decisions can be understood against the backdrop of the revolutionary national democratic upheavals of the 19th century. Finally the course investigates how the 16th president, so controversial in his day, has remained a site of cultural contestation, with historians, novelists, poets, cartoonists, filmmakers, advertisers and politicians struggling over his memory and meaning, to the present.

L98 AMCS 3900 Mormonism and the American Experience
The focus of this seminar is Mormonism, meaning, primarily, the Church of Jesus Christ of Latter-day Saints (or LDS Church), which is the largest Mormon body. Mormons in the United States have gone from being one of the most intensely persecuted religious groups in the country’s history to the fourth largest religious body in the U.S. (by one count), with a reputation for patriotism and conservative family values. In addition to introducing who the Mormons are, their beliefs and religious practices, this seminar explores issues raised by Mormonism’s move toward the religious mainstream alongside its continuing distinctiveness. These issues include: What is the religious “mainstream” in the U.S.? How did conflicts over Mormonism during the 19th century, especially the conflict over polygamy, help define the limits of religious tolerance in this country? How have LDS teachings about gender and race, or controversies about whether or not Mormons are Christian, positioned and repositioned Mormons within U.S. society?

Same as RelPol 390
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L98 AMCS 391 Topics in Women’s Studies: Violence Against Women
This course explores the issue of violence against women within families, by strangers in the workplace, and within the context on international and domestic political activity. In each area, issues of race, class, culture and sexuality are examined as well as legal, medical and sociological responses. Readings cover current statistical data, research and theory as well as information on the history of the battered women’s movement, the rape crisis center movement, violent repression of women’s political expressions internationally, and the effect of violence on immigrant and indigenous women in the United States and abroad. Not open to students who have taken U92 WoSt 363 Domestic Violence.

L98 AMCS 394 Urban Development and the Global Economy
This course is designed to familiarize students with the urban effects of economic globalization and to provide students with tools that enable them to engage in scholarly and practical debates on economic growth and the city. Students are exposed to a variety of theoretical statements comparative studies, and case-specific research focusing on cities and the global economy. Topics include: industrial reorganization and its connection to the urban form, the ability of “dead” cities to adapt to economic change; how economic innovation is encouraged or suppressed within cities; growth coalitions and urban politics, networks and culture in relation to capitalist commitment to urban space; and the role of the arts and entertainment in new development versus production-based paradigms.

L98 AMCS 395 American Indians and American Empire
Through readings of historical and contemporary texts drawn from American Indian testimonial, scholarship and literature; anthropology; and history, we explore past struggles for cultural and political survival and contemporary politics of self-determination of indigenous peoples. We consider these issues alongside American “Empire”: the past and present politics of nation-building, expansion and rule that characterize the United States. Topics include race, anthropology and 19th-century imperialism; education, the Indian and American democracy; sovereignty and tribal self-determination; Indian
political movements; and the contemporary politics of energy, resources and Indian lands.

L98 AMCS 3975 Wolves of Wall Street: American Business and Popular Culture
America’s perceptions about Big Business and the Free Enterprise system have evolved and changed over time from the 1920s to the present. During the 1980s, for example, Oliver Stone’s Wall Street seemed to endorse the notion that “greed is good.” Today, however, the topic of rising income inequality has been connected with the collapse of prestigious Wall Street firms, the “housing bubble,” a declining middle class, and widespread fear about the future of “The American Dream.” This course examines a variety of artistic, ethical and historical perceptions about American Business as depicted in popular culture and the arts over the past hundred years. How have America’s foremost artists (among them F. Scott Fitzgerald, Eugene O’Neill, Arthur Miller, Martin Scorsese), dealt with questions of conspicuous consumption, the acquisition of capital for its own sake, and the disparity between rich and poor? We survey several artistic genres and artistic forms, including American tragic works like The Great Gatsby and Death of a Salesman, to popular musicals such as How to Succeed in Business without Really Trying and The Producers.

L98 AMCS 4020 The Legal Landscape in a Changing American Society
This course is designed to examine the qualitative relationship between transformations in law in America and the structure of American values and behavioral patterns and in the institutions and culture of American law. The materials cover the structural aspects of the legal system and its place in American society and not the law’s doctrinal features (i.e. the specific substantive areas of the law). Rather the course examines how the organization and functioning of the law incorporates the values and changes in the American society. To achieve this, the course topics include: (a) Americans’ perceptions of their legal institutions and agents; (b) changing links between law and the mass media; (c) concerns about the jury system; (d) the use (and abuse?) of litigation and its alternatives (ADR); (e) inequalities in access to the legal system; and (f) the transformations within the legal profession, both in law firms and in the careers of attorneys.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L98 AMCS 4023 Models of Social Science
What distinguishes the social sciences from the natural sciences? What goals and assumptions do they share? Does studying “humans” with free will pose any problems for applying the methods of the natural sciences to the study of society? How do various social sciences — in particular anthropology, economics and political science — differ from one another? And where did the social sciences (both the disciplines and the conceptual issues) come from historically? These are the animating questions of this course. This class explores these questions in historical and contemporary perspective, as they relate to the rise of the social sciences as a set of academic disciplines. We set out the theoretical structure of the scientific method, paying particularly close attention to the relationships between theory and evidence, inference and hypotheses. Next we consider four problems and methods of the social sciences. These include questions of (1) treating human beings as a rational actor; (2) attributing causal forces other than a person’s own will to human behavior; (3) empirical observations and inference; and (4) the role of interpretation. In all four cases, we are interested in asking: Toward what solutions have these problems lead social scientists, and what other sets of difficulties do their solutions raise? We also pay particularly close attention to the role that concepts play in social analysis.
Credit 3 units.

L98 AMCS 403 Culture and History of the Southwestern United States
This course integrates archaeological, historical, and early ethnographic dimensions of American Indian societies in the southwestern United States and northwest Mexico, a region famous for its challenging environment, cultural diversity, and the contributions made by its Native inhabitants. Emphasis is placed on the development of sophisticated desert agriculture and on the rise of regionally integrated cultures including Chaco Canyon and Mesa Verde. The impact of Spanish, Mexican, and American colonization are explored. Ethnographies of Tohono O’odham (Papago), Hopi, Zuni, Rio Grande Pueblo, and Navajo societies are discussed.

L98 AMCS 407 Democracy and the Rhetorical Society
The growth of democracy around the world has placed renewed focus on the practice of democracy and the conditions under which democracy can work effectively as a method of cooperation and decision-making. In this seminar we step back and reflect on what it means to communicate, interact and
govern together in a democratic society. With special emphasis on the role of rhetoric in democratic practice, we study a variety of classic and contemporary texts to see what is at stake in making democracy work in the 20th century.

L98 AMCS 4120 Rainbow Radicalisms!: Ethnic Nationalism(s), the 1960s and the Politics of the New Left
The Black Panther Party remains one of the most iconic groups of the 1960s and 1970s. Perhaps one of the most understudied aspects of the Panther’s legacy is their radical influence upon other American racial and ethnic groups, including Asian Americans, Mexican Americans, Puerto Ricans and American Indians, among others. This seminar considers the emergence of ethnic and racial nationalism among these various groups, as a result of their contact and relationship(s) with the Black Panther Party. Considering the politics of groups such as the Red Guard, the Brown Berets, the Young Lords and the American Indian Movement, this course charts the rise and fall of rainbow radicalism as a general offspring of the Black Power Movement and part and parcel of what is commonly referred to as “the New Left.” It also considers these groups in relation to the State by probing the dynamic push and pull between repression and democracy. Ultimately, this course grants insight into the contemporary racial domain and current political landscape of America as we discuss how these groups helped to shape modern identity formations, discourses on multiculturalism and definitions of “minority,” “diversity” and “equality.”

L98 AMCS 4134 Tobacco: History, Culture, Science and Policy
This course examines tobacco’s important role in shaping the modern world over the course of the past five centuries, from indigenous uses of tobacco in the New World to the politics of smoking in the 21st century. Through in-depth historical and anthropological case studies, tobacco provides a window onto broad trends in government, law, economy and society, including changing social meanings of gender, race, individualism, risk, responsibility and health in the United States and worldwide. This course also introduces students to public health approaches to noncommunicable disease prevention and healthy lifestyle promotion. No background in anthropology or public health is required.

L98 AMCS 4203 Civic Scholars Program Semester Four: Civic Engagement across the Lifespan
This is the fourth-semester course for students in the Civic Scholars Program of the Gephardt Institute for Public Service. This culminating course provides students with the opportunity to integrate the Civic Scholars experience, explore civic engagement opportunities post-college, and discuss ethics and civic engagement. Through group discussions, readings, lectures and guest speakers, students (1) understand civic engagement over the life course; (2) discuss ethics and civic engagement; and (3) develop a one-, five-, 10-, and 20-year civic vision. This 1-credit course meets weekly for one hour during the spring semester. Students are expected to take an active
role in their learning through sharing their experiences, engaging with reading material and participating in reflection exercises. Prerequisites: AMCS 3202, AMCS 3203 and AMCS 4202. Credit 1 unit. A&S: SS A&S: IQ, SSC EN: S

L98 AMCS 4209 New Media Literacy and Popular Culture in Education
At the closing of the 20th century, the “digital turn” began to shape how individuals learn, communicate and interact with one another. Current and emerging media technologies have continued to change how individuals (youth and adults alike) gather information; consume, produce and disseminate texts; and participate in both local and global communities through print- and screen-based platforms such as email, blog, podcast and mash-ups, among others. In this course, we explore what we mean by technology, the various types and uses of technology and the relationship of technology to literacy and education. We begin with characteristics of “new media” and consequences of the digital revolution. Then, we examine conceptualizations of literacy in a historical context—from literacy as reading and writing to literacy as multimodality, convergence and participation. Finally, we shift our inquiry to investigate how new media literacies and technologies are shaping (and are shaped by) different forms of popular culture in U.S. and international contexts, including parts of Asia, Australia, Europe, Africa, and North and South American. We make explicit the connections to education and explore possible directions for research and practice, including copyright and fair use issues present in educational settings. Readings, discussions and activities online and in actual communities culminate in individual- and class-based new media productions. Prerequisite: at least junior standing or permission of the instructor. Same as Educ 4211

L98 AMCS 4241 Topics in American Literature II
This course offers an advanced introduction to both the literature and the concept of Modernism, the “ism” used to mark the experimental verve of early 20th-century writing and to grasp its ties to modernity, or the modern social world. As the course title suggests, we devote most of our time to the career of modernism in the United States, a place imagined as both the modernist nation par excellence and the desert modernism escaped to be born. Three groups of primary texts—early modernist experiments, 1920s modernist landmarks and Great Depression revisions—illuminate the grand ambitions of eccentric literary forms and sequestered avant-garde movements; the public disputes and buried alliances between “high” expatriate and Harlem Renaissance modernisms; and the influential Depression-era reinterpretation of modernism as reactionary self-indulgence. The syllabus features fiction, poetry and drama by old and new literary celebrities: Djuna Barnes, John Dos Passos, T. S. Eliot, F. Scott Fitzgerald, Mike Gold, Ernest Hemingway, Nella Larsen, Meridel LeSueur, Claude McKay, Clifford Odets, Tillie Olsen, Ezra Pound, Jean Toomer and Richard Wright. A shorter list of critical essays highlight Modernism’s tendency to theorize itself while introducing 21st-century perspectives from the “New Modernist Studies.” Satisfies the American requirement. For undergraduates, junior or senior standing is required. Same as E Lit 424

L98 AMCS 4370 Music and Performance
In his 1998 book, *Musicking*, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography, and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater, and rock. We examine artists whose work blurs the line between “music” and “theater;,” including George Clinton, Taylor Mac, and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome.

L98 AMCS 441 In the Field: Ethnographic and Qualitative Methods
This course provides an introduction to ethnographic and qualitative research. Ethnography is the study of culture and social organization primarily through participant observation and interviewing. Ethnographic research provides descriptive and interpretative analyses of the routine practices of everyday life. Ethnographic accounts represent different ways people live and make sense of their experiences and describe the types of social organization (for example, gender relations, class systems, racial divisions or cultural contexts) that, in part, serve to structure or pattern social behavior. Students conduct a small-scale qualitative research project, and in the process they gain skills in various qualitative research methods. This course is suitable for both undergraduate and graduate students. One purpose of the course is to help students plan for subsequent thesis research, independent study projects or dissertation research.
L98 AMCS 442 Oil Wars: America and the Cultural Politics of Global Energy
This seminar explores the historical, cultural and political relationship between America and global energy, focusing specifically on oil and natural gas. Our central objective is to examine how oil and natural gas shape our own lives and entangle us in the cultural, political and economic lives of the rest of the world. We ask what anthropological and social science approaches might contribute to our understanding of a situation that has become, in most popular terms, a national “crisis” of global dimensions.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L98 AMCS 444 Seminar
Rotating upper-level seminar. Senior seminar normally offered each semester and meant to satisfy the 400-level requirement for the drama major.

L98 AMCS 4510 American Television Genres
Questions of genre are central to any exploration of television’s texts, whether they are being analyzed as craft, commerce, or cultural phenomenon. Genre has been used by critics and historians to ascribe “social functions” to groups of programs and to diagnose cultural preoccupations, while genre has been used industrially to manage expectations among audiences, advertisers, programmers, producers, and creative professionals. Investigating genres ranging from the soap opera to the western, workplace situation comedies to sports, and game shows to cop shows, this course explores the role of genre in the production, distribution and reception of American television. Students gain a critical understanding of genre theory and key arguments about the form and function of television texts and develop a set of tools for analysis of televisual narrative and style, the social uses and meanings of genre, the institutional practices and presumptions of the American television industry, and the persistence of textual forms and audience formations in the face of structural changes such as deregulation, media convergence, and globalization. Required screenings.
Same as Film 451
Credit 3 units. A&S: TH A&S: IQ, HUM BU: BA EN: H

L98 AMCS 451B Controversies in Criminal Law and Criminal Justice: Homicide
Seminar investigates current controversies surrounding the homicide laws. Topics include the definitions of homicide and claims of self-defense, the controversies about admissions of evidence at various stages of prosecution, and the debates about the use of capital punishment (including the capital punishment of youths). Includes general academic readings, readings of recent court opinions, and guest discussants from the legal community. Prerequisite: senior standing.
Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI EN: S FA: SSP

L98 AMCS 452 Race, Ethnicity and Culture: Qualitative Inquiry in Urban Education
Drawing on traditional and recent advances in the field of qualitative studies, this course is the first in a series to examine ethnographic research at the interlocking domains of race, ethnicity, class, gender, and culture. The emphasis in this course is on how these concepts are constructed in urban educational
institutions. The course includes a field component that involves local elementary and/or middle schools.
Same as AFAS 4511
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD AR: SSP BU: BA EN: S FA: SSP

**L98 AMCS 4520 Industrial Organization**
Theoretical and empirical analysis of the presence and value of competitive forces in the United States economy. Theories of industrial organization and development of criteria for performance of noncompetitive industries. Prerequisite: Econ 4011.
Same as Econ 452
Credit 3 units. A&S: SS, A&S: IQ, SSC, SD BU: BA, ETH, HUM, IS FA: SSP

**L98 AMCS 453 Sociology of Education**
How does society shape schools and schools shape society? An examination of cultural, political and economic factors and their relationship to the structure of our educational institutions; how control is exercised in classrooms; how knowledge and learning are defined, and basic values about equality, gender and social justice are shaped by teachers' educational decisions. Students analyze their own schooling experience, visit at least two schools, interview teachers and students, and consider what changes are needed to make schools more responsive to students and communities. Prerequisite: sophomore standing.
Same as Educ 453B
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD BU: BA, ETH, HUM, IS FA: SSP

**L98 AMCS 454 Environmental Policy**
This course examines the relationship between environmental economics and environmental policy. The course focuses on air pollution, water pollution, and hazardous wastes, with some attention given to biodiversity and global climate change. The course examines critically two prescriptions that economics usually endorses: (1) “balancing” of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; (2) use of market incentives (e.g., prices, taxes, or charges) or “property rights” instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011.
Same as Econ 451
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA, ETH FA: SSP

**L98 AMCS 4540 American Film Melodrama and the Gothic**
American film melodrama has been considered both the genre of suffering protagonists, incredible coincidences, and weeping spectators as well as a mode of action, suspense, and in-the-nick-of-time rescues. In this course, we examine American film melodrama as a dialectic of sentiment and sensation which draws heavily on Gothic tropes of terror, live burial, and haunted internal states. We trace the origins of film melodrama and the cinematic Gothic to their literary antecedents, the horrors of the French Revolution, and classical and sensational stage melodramas of the 19th century. In addition to the 1940s Gothic woman's film cycle, we excavate the Gothic in the maternal melodrama, the suspense thriller, film noir, domestic melodrama, the slasher film, and the supernatural horror film. Required screenings.
Same as Film 454
Credit 3 units. A&S: TH A&S: IQ, SSC BU: ETH, HUM EN: H

**L98 AMCS 4551 Seminar in Political Economy**
This research seminar introduces the student to recent work on the political economy of democracy. We start with a historical account of the development of democratic institutions in Britain and the United States, and then continue with recent work on modeling elections. We compare elections in countries that make use of proportional electoral systems, such as Israel, with those like the United States and Britain that are highly majoritarian. Finally we discuss the forces of democratization and globalization. The required work for the seminar is a research paper approximately 20pp (double-spaced) in length.
Same as Pol Sci 4551
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

**L98 AMCS 456 Topics in American Politics: Supreme Court**
This seminar has two purposes: to introduce students to the state of the art in studies of the Supreme Court and to cover a series of particular topics with emphasis on the major controversies within the field of law and the courts.
Same as Pol Sci 451
Credit 3 units. A&S: SS FA: SSP
L98 AMCS 4563 Business, Government and the Public
The increasingly complex interrelationships among business, government and the public, focused on a set of major problems currently involving these relationships. Prerequisites: Econ 1011, Econ 1021 and junior standing.
Same as Econ 456
Credit 3 units. A&S: SS, QA A&S: IQ, SSC, AN FA: SSP

L98 AMCS 457 American Film Genres
By close examination of three or four specific types of film narratives, this course explores how genre has functioned in the Hollywood mode of production. Students gain an understanding of genre both as a critical construct as well as a form created by practical economic concerns, a means of creating extratextual communication between film artist/producers and audience/consumers. Genres for study are chosen from the western, the gangster film, the horror movie, the musical, screwball comedy, science fiction, the family melodrama, the woman’s film, and others. In addition to film showings, there are readings in genre theory as well as genre analyses of individual films. Required screenings.

L98 AMCS 4608 The Education of Black Children and Youth in the United States
This course provides an overview of the education of Black children and youth in the United States. Covering both pre- and post-Brown eras, this course applies a deep reading to the classic works of DuBois and Anderson as well as the more recent works of Kozol, Delpit, and Foster. The social, political, and historical contexts of education, as essential aspects of American and African-American culture and life, are placed in the foreground of course inquiries.

L98 AMCS 470 American Intellectual History Since 1865
This course concentrates on social, cultural, philosophical and political thought since the end of the Civil War, and investigates how American thinkers have responded to the challenge of modernity. After an examination of the end of the old religious order and the revolt against Victorianism, it analyzes the subsequent rise of pragmatism, progressivism, literary modernism, radical liberalism, political realism, protest movements and the New Left, neo-conservatism and the New Right, and the current state of intellectuals in post-911 America.

Same as History 469
Credit 3 units. A&S: TH A&S: IQ, HUM

L98 AMCS 472 American Art and Culture, 1945–1960
The rise and “triumph” of Abstract Expressionism has long dominated the story of American art following World War II. This seminar puts Abstract Expressionism into context with parallel developments in the arts, photography and film. Among the topics we consider: the conversation between émigré artists and American culture during and after the war; the emergence of a “noir” aesthetic in film and literature; the early work of Jasper Johns and Robert Rauschenberg and the so-called “aesthetic of indifference” in relation to Ab. Ex.; artistic collaborations at Black Mountain College; New York school photography and photojournalism; and the cultural impact of the A-bomb. Prerequisites: a 300-level course on 20th-century art, photography or history, or permission of the instructor.

Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L98 AMCS 474 Americans and Their Presidents
How have Americans understood what it means to be President of the United States? This seminar uses that question as a point of departure for a multidisciplinary cultural approach to the presidency in the United States, examining the shifting roles of the chief executive from George Washington through Barack Obama. In addition to a consideration of the president’s political and policy-making roles, this course examines how the lived experiences of presidents have informed the ways Americans have conceived of public and private life within a broader political culture. In the process, this course uses the presidency as a means to explore topics ranging from electioneering to gender, foreign policy to popular media. Readings are drawn from a broad range of fields.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: SSP

L98 AMCS 476 The City in American Arts and Popular Culture
Using visual media — painting; prints and illustration; film and animation — along with studies of vaudeville and other forms of popular and mass entertainment, this seminar analyzes the presence of the city as a theme that registers a range of cultural attitudes toward the modern. Through close readings of visual and verbal texts, we consider such issues as the relationship between work and leisure, and between high culture and popular arts. We look at critiques and celebrations as well as at how the popular arts help the ordinary man and woman to negotiate the challenges of the new mechanized and overscaled urban environment. Prerequisites: 300-level course in American 20th-century cultural history, American art, literature, or permission of instructor.
Same as Art-Arch 475

Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L98 AMCS 481 History of Education in the United States
Examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy in different periods of our history.
Same as Educ 481  

L98 AMCS 4850 Research Seminar in Post-War Urbanism: Shrinking City or Growth Machine?  
This course explores the way that American cities have evolved in the face of shrinking de-industrialized economies and the shift to neo-liberal post-industrial growth. Focusing on the 1960s to the present, the class examines the process of urban change in the late 20th century, including: de-industrialization; urban decline; growth policies; and gentrification.

L98 AMCS 490 Religion and the Politics of Place in Modern America  
The history of U.S. religion in the long 20th century (1890s forward) is flourishing as of late, in part because of scholars’ efforts to ground their story in the gritty and messy realities of “secular” spaces, realms outside the pulpit, pew, and seminary classroom once deemed tangential by traditional church historians. Though respectful of developments within overtly sacred spheres, new religious historians have worked to broaden and enrich their renderings of this country’s religious past by applying new methodologies of “lived religion,” pursuing new types of primary source bases (from bottom-up accounts of labor activism to top-down records of corporate power), and applying fresh lines of questioning that dovetail with fresh thinking in other areas of American history. The results of this effort are striking and sure to be long lasting, not just for the study of religion in U.S. history but also for historical treatment of politics and popular culture, diplomacy, capitalism, race, gender, and myriad impulses that have worked (and continue to work) in and on American history through time. This course provides both a chronological and thematic overview of religion and the politics of place in modern America. While moving sequentially through time, pausing to assess transformative moments in U.S. religion and its broader political contexts, the course focuses on particular locations — physical, social, ideological — in which this pattern of development unfolds. Students are, in this sense, asked to read, digest and assess recently published and highly influential books that place religion at the center of dramatic and contested, but also quiet and subtle, social spaces in which the meanings of faith and its role in society are challenged or altered by the encounter, and from which religion emerges with renewed urgency, vigor and determination to revolutionize or reform its surroundings.

L98 AMCS 4946 “The Federalist” Papers — Ideas and Politics in the Creation of the American Republic  
An intensive examination of the debates generated over the ratification of the United States Constitution. At the center of the debate were the 85 Federalist essays composed by Alexander Hamilton, James Madison and John Jay under the collective pseudonym of “Publius.” Though of limited impact at the time, The Federalist essays framed the agenda for continuing debate and have become a foundation of American political thought. Their support of an unprecedented national plan of an entirely revamped system of national government raised issues of politics, philosophy, economics and human psychology. For that reason, this course title announces that we study the interaction of political philosophy and the practical realities of politics.

Anthropology

Anthropology offers the opportunity to study human existence in the present and the past and to explore how and why humans vary in their behaviors, cultures and biology. Students choose to study anthropology because they want to understand some of the most intriguing and troubling issues faced by modern society: the origin and meaning of ethnic and gender differences; the role of institutions in social, political and economic life; learned vs. innate behavior; the similarities and differences among human societies; and the meaning of religion, community and family.

The Anthropology Department offers courses in the four subfields of anthropology: archaeology, biological anthropology, sociocultural anthropology and linguistics.

The faculty in the Anthropology Department are active in research around the world and bring a diversity of experiences to their teaching.

- Faculty research expertise in archaeology includes the origins of food production; the cultures of prehistoric North, Central and South America; African and Central Asian prehistory; environmental archaeology; geographic information systems (GIS).
- Biological anthropology faculty focus on the evolution of humans and on the ecology, behavior and evolution of nonhuman primates.
- Sociocultural faculty conduct research on a wide range of topics, including states, societies, and beliefs; political ecology, demography, fertility and population; sociolinguistics; medical anthropology and public health; bodies, gender and sexuality; science and technology, mind and cognition; and religion and politics.

The Major in Anthropology

- Students should register under the L48 code for any courses that will count toward the major or minor.
- Courses taken pass/fail and courses in which a student earned less than a C- do not fulfill the major or minor requirements.
- Anthropology courses taken in University College (U69) can be counted toward the major or minor. Required courses and courses listed as electives for the GHE track that are offered in University College can be counted toward the GHE track major or minor.

Total units required: 34 units

- **Required courses:** 10 units
  - Anthro 150A Introduction to Human Evolution 3
  - Anthro 160B Introduction to Cultural Anthropology 3
  - Anthro 190B Introduction to Archaeology 3
  - Anthro 397 Proseminar: Issues and Research in Anthropology 1

Total units 10

- **Elective courses:** 24 advanced units (300-level or higher) of which 9 units must be at the 400-level.
Optional Anthropology Major Track:  
Global Health and Environment  

Anthropology majors may choose an optional track within the major called Global Health and Environment if the students’ interests lie primarily within this area of Anthropology. The Global Health and Environment major track provides strong training for professional and graduate study. Students enrolled in the Global Health and Environment track must complete the Anthropology major required courses and the Global Health and Environment required and elective courses as outlined below.

**Total units required:** 34 units

- **Required courses:** 16 units
  - Departmental requirements: 10 units
    - Anthro 150A Introduction to Human Evolution 3
    - Anthro 160B Introduction to Cultural Anthropology 3
    - Anthro 190B Introduction to Archaeology 3
    - Anthro 397 Proseminar: Issues and Research in Anthropology 1
  
- **Elective courses:** 18 advanced units (300-level or higher) of which 9 units must be at the 400-level — taken from this list of GHE electives.

Students may petition to have up to 6 study abroad credits count toward the electives in the GHE major track. Students should contact Prof. David Brown (dibrowma@wustl.edu), study abroad coordinator for the anthropology department, to discuss the requirements for study abroad credit.

Students also must petition to count a thesis course (either Anthro 4951 or 4961), independent study course (either 490 or 491), or internship (300) toward the major. Please contact Kirsten Jacobsen (kjacobsen@wustl.edu) for a petition form.

### Additional Information

- **NOTE:** Students who entered Washington University before fall 2012 and want to major in Anthropology fall under the 28-credit major requirements. For information about the 28-credit Anthropology major visit the department website.

### Internships:

Anthropology majors can gain pre-professional experience and earn up to 3 units of credit by taking part in supervised internships in businesses, cultural institutions and community agencies. Students must have department approval for an internship and must work with an anthropology faculty sponsor during the fall or spring semesters.

### Research:

Many anthropology courses include research components and final projects. Majors also can take part in research and gain credit through approved independent study with faculty who have ongoing research projects. Research opportunities in anthropology labs include projects in archaeology, paleoethnobotany, geoarchaeology, zooarchaeology, genetic studies, GIS, human osteology, human ecology and primate studies.

### Senior Honors:

Students who wish to conduct a research project for Latin Honors and who have the minimum GPA of 3.65 and the approval of a faculty adviser may be enrolled in the honors program. Latin Honors involves both demonstration of acquired knowledge (based in part on GPA) and a report on an original research project. Two courses, Anthro 4951 and Anthro 4961, are available to allow students to receive credit for the extra research involved in the honors thesis. Students may count one of these courses toward their 400-level course requirement for the major.

### Study Abroad:

The department recognizes and accepts courses from a number of semester or year abroad programs. Specific information on study abroad policies is available on the Anthropology Department website at http://anthropology.artsci.wustl.edu/undergraduate/major/global-education or by consultation with the study abroad coordinator.

### Transfer Credit:

Students who wish to transfer credits from other institutions, including those abroad, must have approval from the curriculum coordinator.

### The Minor in Anthropology

- **Students should register under the L48 code for any courses that will count toward the major or minor.**
- **Courses taken pass/fail and courses in which a student earned less than a C- do not fulfill the major or minor requirements.**
- **Anthropology courses taken in University College (U69) can be counted toward the major or minor. Required courses and courses listed as electives for the GHE track that are offered in University College can be counted toward the GHE track major or minor.**

**Total units required:** 18 units

- **Required courses:** 6 units
  
  Minimally, two of the following three courses; recommended that all three be taken:
  - Anthro 150A Introduction to Human Evolution 3
  - Anthro 160B Introduction to Cultural Anthropology 3
  - Anthro 190B Introduction to Archaeology 3

- **Elective courses:** 12 additional units, at least 9 of which must be at the 300-level or higher.

Optional Anthropology Minor Track: Global Health and Environment

Anthropology minors may choose an optional track called Global Health and Environment if the student’s interests lie primarily within this area of Anthropology. The Global Health and Environment minor track provides a solid foundation for those who might be interested in professional and graduate study but who do not choose to major in Anthropology. Students enrolled in the Global Health and Environment minor track must complete the Anthropology minor requirements listed below as well as elective courses as outlined.

Total units required: 18 units

- Required courses: 9 units
  
  Departmental requirement: 3 units
  Any 100-level Introductory Anthropology course from the following list:
  - Anthro 150A Introduction to Human Evolution 3
  - Anthro 160B Introduction to Cultural Anthropology 3
  - Anthro 190B Introduction to Archaeology 3

- Global Health and Environment Track requirement: 6 units
  - Anthro 3283 Introduction to Global Health 3
  - Anthro 361 Culture and Environment 3

- Elective courses: 9 units taken from this list of GHE electives.

The purpose of this class is to engage and challenge freshman students in an open discussion about the prehistoric Mississippian community of Cahokia. The focus of this course is two-fold. The first is to study the way in which the archaeological evidence has been interpreted. The second is to examine other perspectives on Cahokia, especially from the Native American descendants who consecrated this landscape nearly a millennium ago. An underlying tenet of this seminar in understanding Cahokia also can be achieved through the traditions and literature of Native Americans. In the end we want to understand the basis for Cahokia’s organization as a prehistoric Native American community, and the role that ritual and religion played in the rather dramatic and dynamic history of this community and the surrounding region.

Credit 3 units. A&S: SS A&S: IQ, SSC AR: SSP BU: HUM FA: SSP

L48 Anthro 141 Medicine and Society

This course provides the basic foundation in medical anthropology and cultural anthropology for students enrolled in the Medicine and Society Program. The purpose of the course is to introduce students to the central themes and theoretical approaches employed by medical anthropologists to study health and illness in cross-cultural perspective. Topical areas include analyses of disease, illness and sickness at micro and macro levels; impact of personal and interpersonal factors on health; health effects of social, political and economic factors; relationship of anthropology to biological and social science approaches; ecology of health and development; and cross-cultural health studies of language, gender and race/ethnicity.

Note: Content for this course overlaps with and replaces Anthro 160 for students enrolled in the Medicine and Society Program. Open only to students enrolled in the Medicine and Society Program. CBTL course.

L48 Anthro 142 Medicine and Society

This course is the required second-semester sequence of the introduction to medical anthropology and cultural anthropology for students enrolled in the Medicine and Society Program. The course builds upon material introduced in Anthro 141 and provides greater ethnographic context for the cross-cultural study of health and illness. Topical areas include analyses of disease, illness and sickness at micro and macro levels; impact of personal and interpersonal factors on health; health effects of social, political and economic factors; relationship
of anthropology to biological and social sciences approaches; ecology of health and development; and cross-cultural health studies of language, gender and race/ethnicity. CBTL course.

Credit 3 units. A&S: SS, CD, SD A&S: IQ, SSC, LCD AR: SSP BU: BA EN: S FA: SSP

L48 Anthro 150A Introduction to Human Evolution
A survey of the fossil evidence for human evolution. The course includes discussion of the genetics of human variation and evolution, the study of living non-human primates, and the fossil record and its interpretation. An evolutionary perspective is used in an attempt to understand modern humans from the naturalistic point of view.

Credit 3 units. A&S: SS, CD, SD A&S: IQ, SSC, LCD, SD AR: SSP BU: BA, HUM FA: SSP

L48 Anthro 170D Introduction to Linguistics
Language is one of the fundamental capacities of the human species, and there are many interesting and meaningful ways in which it can be studied. This course explores the core components of linguistic theory: speech sounds (phonetics and phonology), word formation (morphology), sentence structure (syntax), and meaning (semantics). It also provides an overview of interdisciplinary ideas and research on how language is acquired and processed, its relation to the mind-brain and to society, and the question of whether the essential properties of language can be replicated outside the human mind (specifically, in chimpanzees or computer programs).

Same as Ling 170D

Credit 3 units. A&S: LA A&S: IQ, SSC BU: BA, HUM EN: H, S

L48 Anthro 174 Medicine East and West: Comparing Healthcare in the U.S. and China
This course provides a foundational introduction to comparative health studies by examining the health care systems of the United States and China. Using the tools and interpretive frameworks of the field of medical anthropology, students in this course are exposed to a broad range of topics dealing with health and health care in Eastern and Western contexts. These include the study of medical pluralism, meaning of illness, health care financing, preventive care, political-economic perspectives, and sociobehavioral perspectives on health and wellness. Students taking this class are prepared to understand and address ongoing health care concerns affecting U.S. and Chinese society.

Credit 3 units. A&S: SS A&S: IQ, SSC AR: SSP EN: S FA: SSP

L48 Anthro 190B Introduction to Archaeology
Archeology plays a critical and unique role in understanding the human past. Through study of the methods and theories of archaeology, and a survey of important firsts in the human past, this course introduces students to the way archaeologists use material culture to reconstruct and understand human behavior. Chronologically ordered case studies from around the globe are used to look at social, ecological and cultural issues facing humans from the earliest times to the present. Students gain practice reconstructing the past through hands-on participation in two one-hour labs focusing on lithics and animal bones. By the end of the course, students are expected to be able to think critically about how the past is presented and why, and the importance of the past as it relates to the present and future.

L48 Anthro 209C World Archaeology: Global Perspectives on the Past
If we carefully peer beneath the earth’s surface, we discover a hidden world that is being rediscovered by archaeologists. A considerable amount of excitement is generated by the discovery of lost civilizations and societies. Archaeologists from every corner of the earth come to Washington University to share their experiences as they use the most sophisticated technology to rediscover those forgotten and sometimes embarrassing aspects of our human past.

Same as ARC 200C

Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: IS FA: SSP

L48 Anthro 212 Archaeological Fantasies and Hoaxes
American popular culture is saturated with pseudoscientific and fictionalized accounts of archaeological discoveries and interpretations. How can students of the past distinguish between fraud, fantasy, hype and valid archaeological research? What potential merit do films, TV-oriented documentaries and historical fiction offer? What role has racism played in attempts to deny indigenous peoples credit for their past achievements? This course looks at the popular culture of archaeology, providing tools for critical evaluation as well as lifetime enjoyment of the field as it is frequently sold to both the informed and the unwary public. Anthropology majors and nonmajors are all welcome, as are sophomores and motivated first-year students who have not yet declared majors.

Credit 3 units. A&S: SS A&S: IQ, SSC, LCD AR: SSP EN: S

L48 Anthro 2151 Language, Culture and Society
This course explores the relationships between linguistic practice and other social and cultural processes. Among the topics discussed are language and social identity, language and thought, language and gender, multilingualism and language shift as well as the connections between language and the
identity of ethnically or nationally defined communities. The course format alternates between “classic” theoretical readings and ethnographic case studies on the interplay between linguistic practice and ideology as well as cultural and social processes. Same as IAS 260
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H

L48 Anthro 290 Independent Study
Designed to give undergraduates research experience in the various subdisciplines of Anthropology. May be taken more than once for credit. Prerequisite: consent of the faculty member under whom the research is done. Credit variable, maximum 3 units. FA: SSP

L48 Anthro 300 Internships in Anthropology
Anthropology majors may acquire professional experience outside the classroom by participating in a faculty-sponsored internship. Before work begins, the student and faculty sponsor must agree on a final written project, which is then approved by the Anthropology Academic Coordinator. Students are evaluated by the faculty sponsor on the basis of the written project and input from the internship supervisor. Course may be taken only one time. Prerequisites: 9 hours of anthropology and permission of department. Credit 3 units.

L48 Anthro 3013 Greek Mythology
This course introduces students to the major myths of ancient Greek culture and the functions that those myths served in ancient society. The readings in the course come almost entirely from actual ancient texts (in translation) but students are encouraged to think beyond those texts to consider the broad and dynamic living mythological tradition in which the stories developed. The course also introduces students to the varied approaches through which such mythology has been studied, from ancient society’s own reflections on Greek mythology to recent academic theories. Same as Classics 301C
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD BU: HUM EN: H FA: Lit, SSP

L48 Anthro 302B Peoples and Cultures of the Middle East
This course introduces the cultural diversity and unity of the peoples of the Middle East. The emphasis is on historical and ethnological relationships, social and political structure, religious pluralism and contemporary youth issues. We explore the lived experiences of the peoples in the modern nation-states of Egypt, Lebanon, Syria, Jordan, Israel, the Palestinian Territories, Turkey, Saudi Arabia and the countries of the Arabian Peninsula, Iraq and Iran. We access this material through short stories, poetry, biographies, essays, videos, blogs and political and anthropological reports. Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD BU: IS FA: SSP

L48 Anthro 3036 Migration and Modernity: Human Mobility, Identity and State Formation — Russian/Soviet/post-Soviet Context
Same as IAS 384
Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD, SD EN: H

L48 Anthro 3051 Anthropology of Tibet and the Himalayas
This course is an anthropological and historical examination of Tibetan societies inhabiting the Tibetan Plateau and the highlands of Nepal. In addition to providing basic ethnographic descriptions of Tibetan societies, the course explores the changing nature of relations between Tibet and China, and between Tibet and the West. Guiding concepts include adaptation (both social and ecological), the politics of ethnicity and identity, and processes of culture change. Credit 3 units. A&S: SS A&S: IQ, SSC BU: IS EN: S FA: SSP
L48 Anthro 3053 Nomadic Strategies and Extreme Ecologies
This course explores the archaeology and anthropology of nomadic pastoral societies in light of their ecological, political and cultural strategies and adaptation to extreme environments (deserts, mountains, the arctic). The aim of the course is to understand both the early development of pastoral ways of life and how nomads have had an essential role in the formation and transfer of culture, language and power from prehistoric time to the current era.
Credit 3 units. A&S: SS A&S: IQ, SSC, LCD BU: BA, IS EN: S FA: SSP

L48 Anthro 3055 Contemporary Chinese Culture and Society
This course provides an introduction to emerging trends in Chinese culture and society. We explore processes of change and continuity in the People's Republic, examining the complexity of social issues and the dynamics of cultural unity and diversity. While we focus on the post-Mao reform era (1978 to the present), we consider how contemporary developments draw upon the legacies of the Maoist revolution as well as the pre-socialist past. The course provides an overview of anthropological approaches to the study of contemporary China, introducing students to key concepts, theories and frameworks integral to the analysis of Chinese culture and society. Readings, lectures and discussions highlight not only macro-level processes of social change and continuity but also the everyday experiences of individuals involved in these processes. We pay particular attention to issues of family life, institutional culture, migration, religion, ethnicity, gender, consumption and globalization.
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD EN: S FA: SSP

L48 Anthro 3056 Material Culture in Modern China
In this course, we explore change and continuity from late imperial to postsocialist China through an analysis of everyday material culture. Drawing upon material objects, historical texts, ethnographic studies and films, we investigate values, beliefs and attitudes toward the material world in modern Chinese life. Readings, lectures and discussions focus on how political, ethnic, regional, religious and gender identities have been constructed and shaped by the use and production of material artifacts ranging from household goods and tomb objects to built forms and bodily dispositions. Case studies include foot-binding, opium use, fashion, tea culture, fast food consumption, sports and nation building, contemporary art markets, the privatization of housing, and worker discipline in transnational factories.
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S FA: SSP

L48 Anthro 306B Africa: Peoples and Cultures
An anthropological survey of Africa from the classic ethnographies to contemporary studies of development. Emphasis on the numerous social and economic changes African peoples have experienced from precolonial times to the present.
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD BU: HUM, IS FA: SSP

L48 Anthro 307A Human Variation
A survey of human biological diversity, considering its adaptive and taxonomic significance from the perspective of origins and distribution of traits and adaptation. Prerequisite: Anthro 150A or introductory biology.
Credit 3 units. A&S: NS, SD, QA A&S: IQ, NSM, AN, SD BU: SCI FA: NSM

L48 Anthro 3092 Indigenous Peoples and Movements in Latin America
An overview of Amerindian peoples, cultures and contemporary sociopolitical movements in core indigenous regions of Latin America (the Maya highlands of Mexico and Guatemala, and the Andes, Chaco and Amazon of South America). Expressions of indigenous cultural, linguistic and social difference are considered in relation to histories of European colonialism and modern Latin-American nation-building. Emphasis is placed on current dimensions of indigenous demands for territorial, political and cultural rights in the context of global economic development, natural resource exploitation, military violence and legal recognition of ethnic pluralism in some Latin-American nations.
Credit 3 units. A&S: SS, CD, SD A&S: IQ, SSC, LCD BU: ETH FA: SSP

L48 Anthro 3093 Anthropology of Modern Latin America
A survey of current issues in the anthropological study of culture, politics and change across contemporary Latin American and the Caribbean. Topics include machismo and feminismo, the drug war, race and mestizaje, yuppies and revolutionaries, ethnic movements, pop culture, violence, multinational business, and the cultural politics of U.S.–Latin American relations. Attention is given to the ways that anthropology is used to understand complex cultural and social processes in a region thoroughly shaped by globalization.
Credit 3 units. A&S: SS A&S: IQ, SSC BU: IS EN: S FA: SSP

L48 Anthro 310C Ancient Civilizations of the New World
An examination of the Inca empire in Peru, and the Maya and Aztec empires in Mexico, through the inquiry into the roots, development, form and evolutionary history of pre-Colombian civilization in each region from its earliest times to the rise of the classic kingdoms. Examples of respective artistic accomplishments are presented and discussed.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: AH
L48 Anthro 3122 From Country to Heavy Metal: Ancient Civilizations of the Old World
This course explores the archaeology of Europe, the Near East and Central Asia from approximately 10,000 years ago to classical times (ending before Ancient Greece). This prehistoric epoch saw major developments among various civilizations of the Old World, such as the introduction of agriculture, animal domestication, the growth of cities, and technological developments such as pottery, metallurgy and horse-riding. A major focus is the trajectory of cultural regions of populations through time, and the complexity of their social, political and ritual practices. We also investigate the variation in human adaptive strategies to various environmental and social contexts, from hunter-gatherers to early Neolithic farmers, to the interactions between nomadic populations and larger scale, urban societies in the Bronze and Iron Ages.
Credit 3 units. A&S: SS A&S: IQ, SSC BU: IS EN: S FA: SSP

L48 Anthro 3142 Topics in AMCS: Twenty Thousand Years on Turtle Island: A Deep History of North America
Same as AMCS 336

L48 Anthro 314B First Americans: Prehistory of North America
The predecessors of the Eskimo, Northwest Coast Indians, Pueblo mound builders and other North American Indians. Concentrates on deductions from archaeological data for cultural developments.
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD BU: BA EN: S FA: SSP

L48 Anthro 3151 Evolution of the Human Diet
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L48 Anthro 3154 Indian Barbie, Asian Tigers and IT Dreams: Politics of Globalization and Development in South Asia
Same as IAS 315
Credit 3 units. A&S: SS, CD, SD A&S: IQ, SSC, LCD BU: IS EN: S

L48 Anthro 3156 Topics in Chinese Social Development at Fudan
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 3182 Ancient Africa: Social Mosaics and Environmental Challenges
This class introduces students to the basics of the archaeological record of humans in Africa from 3.6 million years ago to 1000 years ago. The first third of the course focuses on early humans, the origins of meat eating, expansion of diet and cuisine, technical and cultural responses to changing environments. The second section of the course emphasizes African rock art, socioeconomic variability among hunter-gatherers, the origins of African pastoralism, mobile responses to climate change and African contributions to world food supply including domestication of sorghum, also coffee. The last third of the course is devoted to the complex urban societies of ancient Africa, Egypt, Axum, Great Zimbabwe and Jenne Jeno. Course format is lecture and discussion. There are two mid-terms and students are expected to participate in interactive stone tool use, rock art creation and discussion of ethnographic and archaeological data on pastoral decision-making in times of drought and war and of issues surrounding the purchase of African antiquities and conservation of cultural heritage.
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S FA: SSP

L48 Anthro 3201 Gender, Culture and Madness
This course explores the relationships among gender constructs, cultural values and definitions of mental health and illness. Understandings of the proper roles, sensibilities, emotions and dispositions of women and men are often culturally and morally loaded as indicators of the “proper” selves permitted in a given context. Across cultures, then, gender often becomes an expressive idiom for the relative health of the self. Gender identities or presentations that run counter to these conventions are frequently identified as disordered and in need of fixing. In this course, we take up these issues through three fundamental themes: the social and cultural (re)production of gendered bodies and dispositions; the normalization of these productions and the subsequent location of “madness” in divergent or dissonant experiences of embodiment; and the situation of discourses of “madness” within debates of resistance and conformity, selfhood and agency.
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD BU: BA, ETH EN: S FA: SSP

L48 Anthro 3206 Global Gender Issues
This course compares the life experiences of women and men in societies throughout the world. We discuss the evidence regarding the universal subordination of women, and examine explanations that propose to situate women’s and men’s personality attributes, roles and responsibilities in the biological or cultural domains. In general, through readings, films and lectures, the class provides a cross-cultural perspective on ideas regarding gender and how gendered meanings, practices, performances serve as structuring principles in society.
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S FA: SSP

L48 Anthro 3256 Religion and Politics in South Asia: Writing-Intensive Seminar
Same as History 38C8
Credit 3 units. A&S: TH, CD, WI A&S: IQ, HUM, LCD EN: H
L48 Anthro 3262 Medicinal Botany
Same as Biol 3262
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L48 Anthro 3271 Becoming Human: Archaeology of Human Origins
Humanity, before the advent of agriculture and cities, evolved a series of behaviors that enabled them to survive as hunter-gatherers in diverse environments with complex cultural systems. These behaviors included hunting, control of fire, shelters and clothing, elaborate tools of diverse materials, burials, jewelry and representational art. These characteristics emerged over more than 2 million years of the Pleistocene across several species of humans, to coalesce into what we would recognize as modern human foragers 30,000 years ago. This course traces that emergence of what it means to be human, through the Paleolithic archeological record in its context of past environments and past human forms.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 3283 Introduction to Global Health
This course provides a general introduction to the field of public health. It examines the philosophy, history, organization, functions, activities and results of public health research and practice. Case studies include infectious and chronic diseases, mental health, maternal and reproductive health, food safety and nutrition, environmental health, and global public health. Students are encouraged to look at health issues from a systemic and population level perspective, and to think critically about health systems and problems, especially health disparities and health care delivery to diverse populations. No background in anthropology or public health is required.
Credit 3 units. A&S: SS A&S: IQ, SSC BU: SCI EN: S FA: SSP

L48 Anthro 3284 Public Health Research and Practice
In-depth exploration of current theory and methods involved in public health research and practical applications. Emphasis on fundamentals of epidemiology, which forms the scientific rationale for public health assessment, assurance and policy development. Survey of current public health practice and research areas including biological foundations of public health, social and behavioral interventions, maternal-child health and environmental health. Relationships among public health, medicine, nursing, social work and related disciplines.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 3293 Religion and Society
We take a broad and practice-oriented view of “religion,” including uttering spells, sacrificing to a god, healing through spirit possession, as well as praying and reciting scripture. We consider religious practices in small-scale societies as well as those characteristic of forms of Judaism, Islam, Christianity and other broadly based religions. We give special attention to the ways religions shape politics, law, war, as well as everyday life in modern societies.
Credit 3 units. A&S: SS A&S: IQ, SSC BU: ETH EN: S FA: SSP

L48 Anthro 3303 Experimental Archaeology
Experiments are an extremely important part of the scientific process. Although archaeology is often treated as an historical science, the nature of the material record does provide an opportunity to use experimentation as an important way of interpreting what we excavate. The class works with the most tangible materials recovered from archaeological contexts, that is, stone and pottery. After reviewing the history of experimentation in archaeological investigations, we turn to the material record. This is followed in our initial weeks of setting up the experiments and how they are used to compare with available data sets derived from archaeological contexts. As part of the class we take several field trips to areas where materials exist in a natural setting. Each class member selects a specific material for the focus of their experiments. In the end students produce several experiments using different materials, document their experiments in written reports, and finally present their results to the class for discussion and evaluation.
Credit 3 units. FA: SSP

L48 Anthro 3304 Bones to Behavior: Undergraduate Research in the Lab and at the Zoo
We undertake zooarchaeological study of equid skeletons in the zooarchaeology laboratory at Washington University, and in collaboration with the Saint Louis Zoo, participate in a behavioral study of the courtship and breeding behavior of the ancestor of the domestic donkey — the African wild ass. The research questions that we focus on are how the biology and behavior of the African wild ass influenced the domestication of the donkey by prehistoric African herders or ancient Egyptians and how the behavior of the African wild ass continues to affect prospects for conservation of this highly endangered animal. During the first half of the semester, we meet once a week for 2.5 hours in the zooarchaeology laboratory. In the second half of the semester, we no longer meet in the lab, and each student spends two mornings of their choice per week at the Saint Louis Zoo conducting observations of the wild ass. Students may choose two days that fit their schedule. Saturdays and Sundays are included as choices of days. Permission of instructor is required.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: BA FA: SSP

L48 Anthro 3305 Bones to Behavior II
In this class, students undertake zooarchaeological research on skeletal material in the zooarchaeology laboratory at Washington University and/or preparation of animal skeletons for comparative study and, in collaboration with the Saint Louis Zoo,
participate in behavioral studies of the ancestor of the donkey — the African wild ass. Collections housed in the zoarchaeological laboratory for study include ancient food-remains from African sites. These collections bear on questions regarding cultural and climate change in the Horn of Africa 2,000 to 12,000 years ago and include animals ranging from African antelopes to domestic camels. During the first half of the semester, students meet once a week for 2.5 hours in the zoarchaeological laboratory. In the second half of the semester, we meet twice a week in the laboratory or at the zoo. Location depends on projects selected for study. Permission of instructor is required. May be repeated for credit. Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA FA: SSP

L48 Anthro 3310 Health, Healing and Ethics: Introduction to Medical Anthropology
A cross-cultural exploration of cultures and social organizations of medical systems, the global exportation of biomedicine, and ethical dilemmas associated with medical technologies and global disparities in health. Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD BU: BA FA: SSP

L48 Anthro 3313 Women and Islam
An anthropological study of the position of women in the contemporary Muslim world, with examples drawn primarily from the Middle East but also from Asia, Africa, Europe and the United States. Students examine ethnographic, historical and literary works, including those written by Muslim women. Topics having a major impact on the construction of gender include Islamic belief and ritual, modest dress (veiling), notions of marriage and the family, modernization, nationalism and the nation-state, politics and protest, legal reform, formal education, work, and Westernization. The course includes a visit to a St. Louis mosque, discussions with Muslim women, and films. Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD BU: BA FA: SSP

L48 Anthro 3322 Brave New Crops
This course introduces students to the major issues surrounding the development and use in genetically modified (GM) crops. Its focus is international, but with particular focus on the developing world. A variety of experts, available locally or through the Internet, contribute perspectives. The course also includes field trips. For further information, see arschr.wustl.edu/~anthro/courses/3322. Credit 3 units. A&S: SS A&S: IQ, SSC BU: IS FA: NSM

L48 Anthro 333 Culture and Health
This course explores culture and health, with a focus on global health. Assigned readings explore cross-cultural perspectives on health, healing, and the body, as well as important concepts in medical anthropology. Through class discussions and close examination of ethnographies of health and illness, students develop an understanding of how cultural and political-economic forces articulate with the emerging field of global health. Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA FA: SSP

L48 Anthro 3331 Anthropology of Clothing and Fashion
This course takes clothing as a starting point for examining broad themes in anthropology, including gender and sexuality, race and the body, history and colonialism. We look at the ritual significance of clothing and other practices of bodily adornment in traditional societies and the role of style in constituting contemporary social movements and identity categories. We investigate the globalization of the apparel industry, from production and circulation to marketing and branding, in order to understand the relationship between citizenship and consumption, labor and power in the global economy. The course encourages students to reflect on their relationship to the wider society and economy as producers and consumers of material culture through the lens of clothing and fashion. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 3351 The Ancient Maya: Archaeology and History
This course focuses on the ancient Maya civilization because there are many exciting new breakthroughs in the study of the Maya. The Olmec civilization and the civilization of Teotihuacan in the Valley of Mexico are considered as they related to the rise and development of the Maya civilization. The ancient Maya were the only Pre-Columbian civilization to leave us a written record that we can use to understand their politics, religion and history. This course is about Maya ancient history and Maya glyphic texts, combined with the images of Maya life from their many forms of art. The combination of glyphic texts, art and archaeology now can provide a uniquely detailed reconstruction of ancient history in a New World civilization. Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S FA: SSP

L48 Anthro 3373 Law and Culture
We live in an age when social policy is increasingly displaced into the realm of law, when justice and equality are matters of courtroom debate rather than public discussion. Legal language has become a key resource in all kinds of struggles over livelihood and ways of life. In this course, we study the cultural dimensions of law and law’s changing relationship to state power, the global economy, social movements and everyday life. We approach law as a system of rules, obligations and procedures, but also a cultural practice, moral regime and disciplinary technique. How are relationships between legal, political and economic realms structured and with what consequences? How does law provide tools for both social struggle and social control? What does anthropology contribute to research on these issues? In exploring these questions, we combine readings from classical legal anthropology with recent ethnographic work from around the globe.
Credit 3 units. A&S: SS A&S: IQ, SSC, LCD EN: S FA: SSP

L48 Anthro 3386 Language, Culture and Society
Although this is an introductory course, students who have taken Linguistics 170D Introduction to Linguistics benefit from knowledge of phonology, morphology, syntax and semantics. The primary content of this course explores the relationship between linguistic practice and other social and cultural processes. Anthropological linguistics, including alternative approaches to fieldwork and data collection are introduced, along with various studies of language usage in social and cultural contexts that consider language and thought, language and identity, language and gender, as well as multilingualism and other forms of language contact. The ethnography of speaking and communication are central to this course, as is conversation analyses, which introduces a combination of qualitative and quantitative linguistic research methods. Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S FA: SSP

L48 Anthro 3391 Economies as Cultural Systems
Many contemporary approaches to economics downplay or bracket the importance of culture in the workings of economic systems. In this class we focus on approaches to distribution and exchange in which culture and social institutions figure prominently, if not pre-eminently. We sample a diverse array of economies, from gift exchange to the ceremonial destruction of wealth, from Melanesia to Wall Street, in order to evaluate some of the assumptions that undergird market capitalism. These assumptions include the perception of market actors exclusively as calculative, maximizing individuals. Topics covered include the Industrial Revolution; utilitarianism; economic anthropology; the formal vs. substantivist debates; ethnography of finance; and Marxist sociology. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 3414 Topics in Social Research at Fudan
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L48 Anthro 3432 Topics in Africa: Capitalism, Exchange and Inequality in Africa
Same as AFAS 343
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD AR: SSP EN: S FA: SSP

L48 Anthro 3461 Native Americans at Westward Expansion
Issues precipitated by Euro-American contact, colonization and expansion between 1492 and 1810 across Eastern North America, the Plains and the Rocky Mountains. Impacts of exploration and settlement and responses by native peoples: epidemics; population loss; breakdown of Southeastern chiefdoms; resistance; relocation; and shifts in economic strategies. Perspectives and policies of Native Americans as well as Europeans and non-Indian Americans, including Lewis and Clark. Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD FA: SSP

L48 Anthro 3472 Global Energy and the American Dream
This lecture course explores the historical, cultural and political relationship between America and global energy, focusing on oil, coal, natural gas, biofuels and alternatives. Through case studies at home and abroad, we examine how cultural, environmental, economic and geopolitical processes are entangled with changing patterns of energy-related resource extraction, production, distribution and use. America’s changing position as global consumer and dreamer is linked to increasingly violent contests over energy abroad while our fuel-dependent dreams of boundless (oil) power give way to uncertainties and new possibilities of nation, nature and the future. Assuming that technology and markets alone will not save us, what might a culturally, politically and socially minded inquiry contribute to understanding the past and future of global energy and the American dream? Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 347B Ancient Mound Builders of the Mississippi Valley
Study of the peoples in North America who built mounds and other earthen structures beginning more than 4000 years ago; why they erected earthworks; what the structures were used for; how they varied through time and across space; and what significance they had to members of society. Credit 3 units. A&S: SS, CD BU: BA FA: SSP

L48 Anthro 361 Culture and Environment
An introduction to the ecology of human culture, especially how “traditional” cultural ecosystems are organized and how they change with population density. Topics include foragers, extensive and intensive farming, industrial agriculture, the ecology of conflict, and problems in sustainability. Credit 3 units. A&S: SS A&S: IQ, SSC BU: ETH FA: SSP

L48 Anthro 3612 Population and Society
This review of population processes and their social ramifications begins with an introduction to the basic terminology, concepts and methods of population studies, followed by a survey of human population trends through history. The course then investigates biological and social dimensions of marriage and childbearing, critically examines family planning policies, deals with the social impacts of epidemics and population aging, and looks at connections between population movements and sociocultural changes. The overall objective of the course is to understand how population processes are not just biological in nature, but are closely related to social, cultural, political and economic factors.
L48 Anthro 3617 Past and Present Cultural Environments
Human societies are situated within and interact with their ecological and environmental systems. Even social relationships within and between groups imply spatial relationships and geographic orientation, advantages, influence and limitations. Beyond subsistence, environment and the “natural world” play an integral role in how humans pattern the landscape, structure society, develop their world view, and, in turn, alter and adapt the world in which they live. This upper-division undergraduate and graduate seminar course introduces students to anthropological conceptions of human-environmental relationships, past and present. Topics include environmental and landscape archaeology; historical, political, and human behavioral ecology; world view and conceptualizations of nature; human adaptation, resilience theory, and niche construction; anthropological case studies; the intersections of humans, animals and the environment; and end with environmental politics.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L48 Anthro 362 The Biological Basis of Human Behavior
Infidelity, marriage customs, inner-city violence, infanticide, intelligence. Are the behavioral patterns we see genetically fixed and racially variable? What is the evolutionary and biological basis of human behavior? This course offers a critical evaluation of these from an anthropological perspective.
Credit 3 units. A&S: NS, CD, SD A&S: IQ, NSM, LCD, SD BU: BA FA: NSM

L48 Anthro 3620 Anthropological Perspectives on the Fetus
Where do we come from? How do we get here? When does “life” begin? Is the fetus a “person” or something else? How could we decide? This course integrates biological, medical, philosophical and cross-cultural perspectives to examine how various societies (including our own) understand the nature of the human fetus. The course examines basic human embryology, beliefs about conception and fetal development, ideas about the moral status of the fetus, controversies surrounding prenatal care and antenatal diagnostic testing (including sex selection and genetic screening tests), current controversies about fetal medicine and surgery, and the problem of abortion in cross-cultural perspective.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L48 Anthro 3621 Anthropology of Human Birth
This course examines the interaction between human biology and culture in relation to childbirth. Emphasis is placed on understanding the cultural challenges posed by the physiology of human reproduction, the ways various cultures have attempted to meet those challenges, and the resultant consequences that this has had for women’s lives. The course draws on material from human anatomy and embryology, paleoanthropology, clinical obstetrics, public health, social anthropology, the history of medicine and contemporary bioethics.
Credit 3 units. A&S: SS A&S: IQ, SSC BU: ETH EN: S FA: SSP

L48 Anthro 3625 The Female Life Cycle in Cross-Cultural Perspective
This course examines the biology of the female reproductive cycle — menarche, menstruation and menopause — and its cultural interpretation around the world. Topics covered include the embryology of human sexual differentiation; and the biology of the menstrual cycle and how it influences or is influenced by various disease states, contraception, infertility, cultural taboos and beliefs about menstruation and menopause, etc. The course utilizes materials drawn from human biology, clinical gynecology, ethnography, social anthropology and the history of medicine and examines the interplay between female reproductive biology and culture around the world.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L48 Anthro 3626 Adventures in Nosology: The Nature and Meaning of Disease
What is a “disease” and how do you diagnose one? What are “medicines” and how, when, and for what purpose should they be used? These questions reflect universal human concerns, but the answers given to these questions have varied enormously in different times and places. The course considers the nature of health, illness, disease and its treatment, beginning with a detailed examination of the traditional ethnomedical system of the Hausa people of northern Nigeria. Using this West African medical system as a baseline for comparison, the course then explores the nature of “nosology” (the classification of diseases) and the underlying logic of different therapeutic systems in different times and cultures, including our own. The course draws on ethnography, the history of medicine, bioethics and human biology to understand how these questions are asked and answered in different societies, times and places.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L48 Anthro 3627 The “Abortion Wars” in Text and Film
No controversy in recent American culture has been as heated, as protracted and as insoluble as the controversy over elective abortion. What is an abortion? Are they ever justified? Why are people so polarized over this issue? Just what is it that makes “the abortion problem” so seemingly refractory to solution? This course explores differing facets of “the abortion wars” through a multimedia approach. Participants read selected books on abortion and view a series of documentaries and dramatic films depicting abortion-related themes. The class is conducted in seminar fashion. Due to the length of many of the films, the class meets once per week for 2.5 hours each session. Students submit an extended research paper at the end of the course and take a comprehensive final examination over the material covered.
### L48 Anthro 3628 The Anthropology of Health Disparities
This course approaches the subjects of race, ethnicity, gender, sexuality and class-related health disparity epidemiologically and anthropologically. Students in this course explore these cultural categories both as factors that contribute to systematic differences in health status and outcomes and as dynamic frameworks through which those systematic differences can be examined and understood. The grounding assumptions of this course are 1) that race, ethnicity, gender, sexuality and class are cultural constructs employed by humans in an effort to account for observed physical, dispositional and behavioral group-level diversity; 2) that disparity, and particularly health disparity, is meaningfully associated with diversity but is not caused by it; and 3) that because humans are the product of two dynamic, complex systems (biology and culture), health disparities are most usefully engaged as conditions of process and interconnectedness.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

### L48 Anthro 365 Human Growth and Development
This course focuses on the life-history of humans from birth to death. Through a series of lectures we consider how humans grow and change both biologically and psychologically over the course of our lives. Topics include: human growth curves, sex-differences, adolescence and puberty, nutrition, environment, growth disorders, death, and the evolution of human growth.
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA FA: SSP

### L48 Anthro 3656 Behavioral Ecology of the Great Apes
This course introduces undergraduate students to the behavioral ecology of great apes. Lectures and readings provide an overview of the distribution, feeding ecology, social system and behavior of African and Asian apes. The main objective of this class is to examine variation in behavioral ecology with and between ape species. The comparative content within each lecture gradually increases throughout the course, and students are asked to synthesize this material in their final exam. Readings mainly consist of book chapter assignments from three recent texts on the ecology, behavior and geographic variation observed in great apes.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

### L48 Anthro 3661 Primate Biology
This course takes a multifaceted introductory approach to the primates, the closest relatives of human beings, by investigating anatomy, growth and development, reproduction, behavioral adaptations, ecology, geographic distribution, taxonomy and evolution. Emphasis is placed not only on the apes and monkeys, but also on the lesser-known lemurs, lorises, bushbabies, tarsiers and many others. The importance of primate biology to the discipline of anthropology is discussed.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

### L48 Anthro 3662 Primate Conservation Biology
This class focuses on the ecological diversity of primates and how these and other traits are related to their present day abundance and distribution. In addition, the biological, abiotic and anthropogenic factors related to extinction risk are examined. It also reviews the endangered species of primates; case histories of conservation programs; and management practices in Asia, Africa, South America and Madagascar.
Prerequisite: Anthro 150 or Biol 2970, or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

### L48 Anthro 3665 Observing Animal Behavior at the St. Louis Zoo
This course is an introduction to methods for the collection of behavioral data in studies of animal behavior. Students are trained in the design of research projects and the analysis and interpretation of behavioral data. Students learn how different methods are used to answer specific questions in animal behavior research. Research is conducted at the Saint Louis Zoo.
Credit 3 units. A&S: NS FA: NSM

### L48 Anthro 3666 Comparative Primate Socioecology
This course focuses on the interface between the behavior and ecology of non-human primates and its applications to primate conservation. We examine how the basic principles of animal ecology can help us understand primate behavior. We look at a wide range of primates from a comparative perspective as we explore primate habitats, diets, life histories and communities, social relationships, and much more. Because most primate species are threatened, endangered or even facing extinction, we also focus on how various aspects of ecology are used in the conservation of primates. We draw heavily on field studies and particular research projects of primates and emphasize their behavior in natural environmental and social settings. The objectives of the course are: (1) to gain an understanding of principles of animal behavior by using primates as a model, (2) to understand variation in behavior and how ecology influences this variation in living primates, (3) to use the comparative approach to better understand why primate societies differ, and (4) to understand how we address and answer questions about primate behavior through field research.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

### L48 Anthro 367 Paleoanthropology
The prehistoric Pliocene and Pleistocene evidence for human emergence and evolution. The emphasis is on the human fossil
record and its interpretation in functional and behavioral terms. This is placed in the context of the Paleolithic archaeological record and issues regarding the biological relationships between various human groups. Prerequisite: Anthro 150 or equivalent. Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L48 Anthro 3693 Introduction to GIS for Anthropologists
Use of GIS is rapidly becoming standard practice in anthropological research. This course introduces students to the basic theories and techniques of GIS. Topics include the application of GIS in archaeological survey and ethnoarchaeological research, as well as marketing, transportation, demography and urban and regional planning. This course enables students to become familiar not only with GIS software such as ArcGIS but also the methodologies and tools used to collect and analyze spatial data. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 376 Warriors, Merchants, Monks and Courtesans: Ancient Narratives of Globalization in Google Earth
This introductory seminar-style course examines the history of globalization through the narrative accounts of those who lived along some of the great trade routes of the Old World. Through a combination of in-class discussion and hands-on tutorials and projects in Google Earth, we examine how day-to-day local interactions and the experiences of individuals contributed to broader cultural exchanges and the shaping of ancient cosmopolitan centers. We use a bottom-up approach to understand the process of globalization, and why it is not only a phenomenon of the modern world. This course covers a large geographic and temporal span, but it is not about memorizing lists of dates and places or putting dots on a map — it is about learning how to interpret multiple strands of knowledge and put them together into a cohesive narrative of history. The course covers four broad anthropological themes related to Old World history and globalization in conjunction with weekly lessons in Google Earth; there are no prerequisites for either. The knowledge and skills gained in the course lead to a final independent research project consisting of a short paper and an interactive digital map that can be shared online through the Google Earth community. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 372 Geoa rchaeology
Geoarchaeology involves the application of analytical techniques, concepts and field methods from the earth sciences to help solve archaeological problems. Issues explored in this course include human and environmental processes involved in archaeological site formation; the sedimentary context of archaeological remains, soils and sediments relevant to archaeology; and the relationship between past settlement and landscape evolution, paleoclimatic reconstruction, human impacts on the environment, geological sourcing of artifact proveniences, and remote sensing of the physical environment. Several field trips to local archaeological/geological sites provide an opportunity to understand how geoa rchaeology is applied to specific research problems. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 374 Social Landscapes in Global View
From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as “landscapes.” This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We cover various urban landscapes, rural landscapes, nomadic landscapes (and others), and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 BCE to 2009 CE and we cover all the continents. This course also traces the intellectual history of the study of landscape as a social phenomenon, and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world, and trace the global currents of your social landscape. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP
L48 Anthro 3773 Culture and Society in East Asia
This course presents an overview of cultures and contemporary social/political changes in East Asia. In Western society, East Asia often has been viewed as a place of enduring cultural identities, but it also has been a region of one of the world’s most dynamic and rapid transformations. In this course, we examine both the continuity and change of cultural and social patterns in this region. Students compare anthropological and ethnographic studies of the Peoples’ Republic of China, Taiwan, South Korea and Japan, supplemented by selected research from sociology, history and political science. The course focuses on specific areas of cultural and social change in each society, including kinship and family; gender; ethnicity; economic and political development; and health and social policy.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 3775 Ancient Eurasia and the New Silk Roads
This course explores the rise of civilization in the broad region of Eurasia, spanning from the eastern edges of Europe to the western edges of China. The focus of the course is the unique trajectory of civilization that is made evident in the region of Central Eurasia from roughly 6000 BC to the historical era (ca. AD 250). In addition to this ancient focus, the course aims to relate many of the most historically durable characteristics of the region to contemporary developments of the past two or three centuries. Fundamentally, this course asks us to reconceptualize the notion of “civilization” from the perspective of societies whose dominant forms of organization defied typical classifications such as “states” and “empires” and, instead, shaped a wholly different social order over the past 5,000 years or more. This class provides a well-rounded experience of the geography, social organization and social interconnections of one of the most essential and pivotal regions in world history and contemporary political discourse.
Credit 3 units. A&S: SS, CD, SD A&S: IQ, SSC, LCD, SD EN: S FA: SSP

L48 Anthro 379 Meltdown: The Archaeology of Climate Change
This course examines the temporal, geographical and environmental aspects of past climate changes, and by using specific examples, explores how climate changes may have affected the evolution of human culture and the course of human history. Archaeological and documentary examples from the Americas, Africa, Asia, Europe and the Near East are used to explore if or how significant events in human history have been influenced by changes in climate.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 380 Applications in GIS
This introductory course in Geographic Information Systems (GIS) is designed to provide basic knowledge of GIS theory and applications using the existing state-of-the-art GIS software. The course is taught using a combination of lectures, demonstrations and hands-on, interactive tutorials in the classroom. The first weeks of the course provide a broad view of how you can display and query spatial data and produce map products. The remainder of the course focus on applying spatial analytical tools to address questions and solve problems. As the semester develops, more tools are added to your GIS toolbox so that you can complete a final independent project that integrates material learned during the course. Students are encouraged to design individualized final projects using their own or other available data; however, some already prepared final projects also are available.
Same as EnSt 380
Credit 3 units. A&S: NS A&S: IQ, NSM

L48 Anthro 3832 Music and Healing
In this course, we broadly consider issues of music and healing, drawing from the fields of medical ethnomusicology, medical anthropology, music therapy, and psychology. Our case studies are multi-sited, as we interrogate musical healings and healing music from diverse global and historical perspectives. We approach our study of musical practices with the understanding that the social, cultural and political contexts where “music” and “healing” are themselves created inform the sounds of the music and its various — and often conflicting — interpretations and meanings. We read a variety of academic literature and use media texts and listening examples to develop interdisciplinary and cross-cultural analyses of music and healing. Issues of national consciousness, post/colonialism, gender, sexuality, race, ethnicity, class, religion, dis/ability and the role of history/memory remain central to our explorations of music and healing.
Same as Music 3031
Credit 3 units. A&S: CD A&S: IQ, LCD EN: H

L48 Anthro 3833 Performance and Healing: The Politics of Health Representation
Credit 3 units. A&S: SS A&S: IQ, SSC

L48 Anthro 3851 History and Theory of Anthropology
This course examines the history of anthropology and the major theoretical frameworks of the field to the present. Key theorists discussed in this class include Geertz, Foucault, Marx, Mead and Weber, as well as the deep roots of anthropology in strands of philosophy and social thought running back centuries. Ethnographic case studies from around the world are read in order to keep the theories palpable and grounded. Key themes discussed in the class include the concept of culture, how and why societies change and evolve, ways that meanings and identities are made, the role of history in the present, diverse forms of power and experience, and issues of diversity amid contemporary global life.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP
L48 Anthro 3874 International Public Health
This course explores current topics in international public health using a case-study–based approach, emphasizing public health issues affecting low- and middle-income countries; introduction to the tools and methods of international public health research and programs; in-depth examination and critique of the roles of local and national governments, international agencies and third-party donors in international public health work; and the contributions of anthropology to the international public health agenda. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 3875 Pharmaceutical Personhood
This course examines sociocultural dimensions of pharmaceutical production and consumption in the contemporary world. Pharmaceuticals have brought remarkable promises. Their consumption also reflects various social inequalities and substantial transformations in human experience that demand critical attention. We examine the history and global reach of the pharmaceutical industry, the content of pharmaceutical advertising, and pharmaceutical use in the treatment of various kinds of illness, including common mental disorders, post-traumatic experience, chronic illness, eating disorders and lifestyle disorders. Case studies are drawn from diverse societies. We also explore various angles of public criticism about the pharmaceutical industry. No background in anthropology is required. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 3876 Darwin and Doctors: Evolutionary Medicine and Health
Back pain, diabetes, obesity, colds, even morning sickness. These are all common human health problems. But have you ever wondered why we have these and other health conditions? In this class, we investigate this question — and others — specifically using evolutionary theory to inform current understandings of contemporary health problems. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L48 Anthro 3882 Psychological Anthropology
The objective of this course is to introduce students to the central topics and methods of psychological anthropology. Psychological anthropology is concerned with the interplay of psychology and culture on both the individual and group levels. We look cross-culturally at such topics as child and adolescent development; religious experience; illness and healing; self and identity, gender and sexuality; reasoning and symbolism; and psychopathology. This class draws upon a range of sources, including ethnographies, psychoanalytic theory, contemporary critical theory and cross-cultural materials. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 3893 Introduction to Archaeological Field Techniques
Introduction to archaeological fieldwork. Includes a variety of techniques employed by archaeologists, the underlying purpose of excavations, and the manner in which they are used to explore past societies. Field mapping and testing an archaeological site near Cahokia Mounds links this project to ongoing excavations with other institutions and relates it to the “Redefining Cahokia” project. Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L48 Anthro 3932 An Introduction to Archaeological Site Survey
The study and interpretation of the archaeological record begins in most instances with an archaeological survey. The purpose of this course is to provide students with an introductory level, hands-on experience to archaeological survey as practiced in eastern North America. This involves an introduction in the field to the various methods employed in the identification and mapping of archaeological sites. Students spend Saturdays in the field mapping and recording archaeological sites, including the mapping of monumental earthworks such as those at the prehistoric site of Cahokia or nearby mound centers. Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L48 Anthro 3937 Proseminar: Issues and Research in Anthropology
Designed to introduce the student to current issues in Anthropology and to research being carried out by faculty. Topics vary each year. Each departmental member addresses issues in his or her particular specialty. Required of all majors; may be taken before declaring major, and may be taken by nonmajors. Credit 1 unit. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 3999 Undergraduate Teaching Assistant
Open to advanced undergraduates only. Usual duties of teaching assistant in laboratory or other selected courses. Prerequisite: permission of instructor. Credit 3 units.

L48 Anthro 3999 Class Mentor
Classroom instructional assistance through mentoring activities assigned by instructor. Limited to advanced undergraduates only. Permission of instructor required. Credit variable, maximum 3 units. FA: SSP

L48 Anthro 4002 Internship in Interrogating Health, Race and Inequalities
Internship in Interrogating Health, Race and Inequalities
and who have previous course work in (medical) anthropology, public health, urban policy, or African and African-American Studies. The internship experience is designed to facilitate students' familiarity with research and evaluation strategies that both address structural factors shaping health outcomes and are sensitive to community needs and sociocultural contexts. The internship experience contributes to students' in-class understanding of the ways that race as a historically produced social construct interacts with other axes of diversity and social determinants to produce particular health outcomes. Prerequisite: permission of the instructor. Corequisite: Anthro 4003.
Same as InterD 4002
Credit 1 unit.

L48 Anthro 4003 Interrogating Health, Race and Inequalities: Public Health, Medical Anthropology and History
Interrogating Health, Race and Inequalities is intended for graduate students in the School of Social Work and in Arts & Sciences as well as advanced undergraduates in Arts & Sciences who have previous course work in medical anthropology, public health or urban policy. The fundamental goal of the course is to demonstrate that health is not merely a medical or biological phenomenon but more importantly the product of social, economic, political and environmental factors. To meet this goal the course is designed to examine the intersection of race/ethnicity and health from multiple analytic approaches and methodologies. Course readings draw from the fields of public health, anthropology, history and policy analysis. Teaching activities include lectures, group projects and presentations, videos, and discussions led by the course instructors. These in-class activities are supplemented with field trips and field-based projects. By the end of the course students are expected to have a strong understanding of race as a historically produced social construct as well as how race interacts with other axes of diversity and social determinants to produce particular health outcomes. Students gain an understanding of the health disparity literature and a solid understanding of multiple and intersecting causes of these disparities.
Same as InterD 4001
Credit 3 units.

L48 Anthro 401 Evolution of Non-Human Primates
Discussion and analysis of primate evolution with emphasis on comparative and functional anatomy and primate paleontology. Prerequisite: permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L48 Anthro 4011 Popular Culture and Consumption in Modern China
This writing-intensive seminar explores transformations in popular culture and everyday life in Chinese society since 1949 through an analytical focus on political economy and material culture. Drawing upon ethnographic texts, films and material artifacts, we investigate how the forces of state control and global capitalism converge to shape consumer desires and everyday habits in contemporary China. Case studies include eating habits, fashion standards, housing trends, entertainment, sports and counterfeit goods. Prerequisite: previous course in China studies (anthropology, economics, history, literature, philosophy or political science) required. Enrollment by instructor approval only.
Credit 3 units. A&S: SS, CD, WI A&S: IQ, SSC, LCD EN: S FA: SSP

L48 Anthro 4021 The Meaning of National Security in the 21st Century
The 21st century has brought with it new challenges to national security. Standard assumptions about nations and the borders that separate them have been brought into question, and one of the results of this is that the very meaning of national security is undergoing change. Instead of threats to security coming from outside national boundaries, they now often exist within and across borders. This course focuses on contemporary ideas about these issues. It includes a brief overview of current discussions of national security, but it is primarily devoted to examining the conceptual resources we have for making sense of national security in a new world.
Same as IAS 402
Credit 3 units. A&S SS A&S: IQ, SSC EN: S

L48 Anthro 4022 Transnational Reproductive Health Issues: Meanings, Technologies, Practices
This course covers recent scholarship on gender and reproductive health, including such issues as reproduction and the disciplinary power of the state, contested reproductive relations within families and communities, and the implications of global flows of biotechnology, population and information for reproductive strategies at the local level. We also explore how transnational migration and globalization have shaped reproductive health, the diverse meanings associated with reproductive processes, and decisions concerning reproduction. Reproduction serves as a focus to illuminate the cultural politics of gender, power and sexuality.
Credit 3 units. A&S: SS, CD, SD A&S: IQ, SSC, LCD, SD BU: BA EN: S FA: SSP

L48 Anthro 403 Archaeology and Early Ethnography of the Southwest
This course integrates archaeological, historical and early ethnographic dimensions of American Indian societies in the
southwestern United States and northwest Mexico, a region famous for its challenging environment, cultural diversity and the contributions made by its Native inhabitants. Emphasis is placed on the development of sophisticated desert agriculture and on the rise of regionally integrated cultures including Chaco Canyon and Mesa Verde. The impact of Spanish, Mexican and American colonization are explored. Ethnographies of Tohono O’odham (Papago), Hopi, Zuni, Rio Grande Pueblo and Navajo societies are discussed.

Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S FA: SSP

L48 Anthro 4033 Culture, Illness and Healing in Asia
This course examines the place of health, illness and healing in Asian societies. We explore how people experience, narrate and respond to illness and other forms of suffering — including political violence, extreme poverty and health inequalities. In lectures and discussions we discuss major changes that medicine and public health are undergoing and how those changes affect the training of practitioners, health care policy, clinical practice and ethics. The course familiarizes students with key concepts and approaches in medical anthropology by considering case studies from a number of social settings including China, India, Indonesia, Japan, Korea, Taiwan, Tibet, Thailand, Vietnam and Asian immigrants in the United States. We also investigate the sociocultural dimensions of illness and the medicalization of social problems in Asia, examining how gender, ethnicity, socioeconomic status, disability and other forms of social difference affect medical knowledge and disease outcomes. This course is intended for anthropology majors, students considering careers in medicine and public health, and others interested in learning how anthropology can help us understand human suffering and formulate more effective interventions.

Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S FA: SSP

L48 Anthro 4034 Family Change in East Asia
This course explores the process of family transformations in contemporary East Asia, focusing on China, Japan, Korea, Hong Kong and Taiwan, from an anthropological perspective. Topics covered in this course include traditional mainstream East Asian family systems, childbirth, the experience of coming of age, romance and courtship, marriage and family relations, the experience of aging and old-age support, divorce, singlehood and same-sex partnership, family separation and reunion, cross-borderer marriages, and transnational adoption. Alternative family systems among ethnic minorities in East Asia also are addressed.

Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4041 Islam and Politics
Blending history and ethnography, this course covers politics in the Islamic world in historical and contemporary times. Topics include history of Islam; uniformity and diversity in belief and practice (global patterns, local realities); revolution and social change; women and veiling; and the international dimensions of resurgent Islam. Geographical focus extends from Morocco to Indonesia; discussion of other Muslim communities (Bosnia, Chechnya, sub-Saharan Africa, United States) is included.

Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD BU: IS FA: SSP

L48 Anthro 4042 Islam Across Cultures
In this seminar, we examine the variety of historical and contemporary ways of interpreting and practicing Islam, with special attention to issues of ritual, law and the state, and gender. Cases are drawn from Asia, Europe, Africa and the Middle East, and students engage in fieldwork or library research projects.

Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD FA: SSP

L48 Anthro 4046 Primate Ecology and Social Structure
Survey of the ecology and individual and social behavior, adaptations and interactions of the major groups of primates. Emphasis on studies designed to examine the relationships among ecology, morphophysiology and behavior. Methods used in collecting data on primates in the field. Prerequisite: Anthro 150A or one 100-level biology course.

Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L48 Anthro 4062 The Art of Borrowing: The “West” in Japanese Life
This course aims to examine Western influences in Japan and Japan’s reconceptualizing the “West” in various aspects of popular culture, including cuisine, sports, music, language, advertising, entertainment and domesticity. It is primarily an anthropological survey with historical references on Japan’s turn to Western civilization in the modern era. The course explores Japanese perceptions of the “West,” and how Japanese consume the “West” by attaching meanings to “Western” symbols and practices, and making them part of Japanese culture and life. Rather than explicating Japan’s relationship with the West, the course scrutinizes the “West” constructed within Japanese discourse, as both a racial/ethnic other and a cultural fantasy. Course assignments include a round table discussion on specific topics relating to cultural integration and internationalization, and globalization and localization.

Same as IAS 4062

Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H

L48 Anthro 4091 Sexuality, Gender and Change in Africa

L48 Anthro 4102 Latin America and the Rise of the Global South
The rise of the global south — and the reordering of global geopolitics, economics and cultural imaginaries — is characterized by progressive change and intense conflict. Economic growth coincides with the impacts of global warming, the assault on natural resources, the rise of new consumers and the entrenchment of deep inequalities. We also see the emergence of cultural and political formations that range from the horrific to the inspiring. Latin America is a central node of the new global south. Here history takes unpredictable turns in the face of declining U.S. hegemony, the economic growth of Brazil, legacies of militarism and political violence, a feverish attack on nature, resurgent economic nationalism, and defiant “anti-globalization” movements. Through close reading of contemporary ethnographies of Latin America we explore emergent cultural and political-economic processes in the region; we consider south-south articulations (theoretical, cultural, political-economic) between Latin America, China, Africa and India; and we reflect on the changing role, meaning and relationships of the United States in the region.
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S

L48 Anthro 4112 Body and Flesh: Theorizing Embodiment
This seminar explores a wide range of readings on “the body” as a site of theoretical analysis in social scientific and humanistic inquiry. Issues include: How do we think about the body as simultaneously material (flesh and bone) and constructed in and through social and political discourse? How do we think about the relationship between these contingent bodies and subjective experiences of “self” in various contexts? The course focuses upon the different ways in which these questions have been posed and engaged, and the implications of these formulations for the theorizing of human experience. Prerequisite: Anthro 3201 or permission of instructor.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4113 Advanced Psychological Anthropology
This course examines the intersection of psychological and anthropological theories and methods and their utility in the study of culture and human experience. The course is a comprehensive exploration of some of the key theorists and theoretical domains that have defined the field of psychological anthropology and beyond, including Bakhtin, Bateson, Chodorow, D’Andrade, Ewing, Freud, Goffman, Hallowell, Holland, Irigaray, Kleinman, Kohut, Lacan, Lutz, Rosaldo, Strauss, Sapir, Scheper-Hughes and Vygotsky, among others. By the end of the course, students have a solid grounding in linguistic, psychoanalytic, cognitive, symbolic, developmental, interactionist and critical approaches within psychological anthropology. Prerequisites: at least one of the following: Anthro 3201, Anthro 3882, graduate standing or permission of instructor.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4114 Anthropology and Existentialism
This course examines what it means to be human. Drawing on existentialist philosophy and ethnography, this course is about appreciating the richness, the deep emotional tone, and also the dangers of human experience. Case studies look at profound aspects of existence, such as suffering, healing, mercy and hope, across diverse cultures. Specific themes covered include the ordinary life, how we perceive the world around us, the feeling of being at home and senses of place, how we experience pain, what makes our bodies powerful or vulnerable, why things really matter, and how communities cope with trauma and violence. This course is especially relevant for students interested in medical anthropology and social dimensions of health and illness. No background in anthropology or philosophy is required.
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S FA: SSP

L48 Anthro 4115 Anthropology of Deviance
This course provides an anthropological perspective on notions of “deviance” as social, psychological, moral and medical mechanisms of control and regulation. Students learn to critically engage and evaluate dominant etiological theories of deviance, local and global contexts of deviance, and social responses to deviance as cultural processes through which communities make (and unmake) meaningful human relationships. Through academic texts, ethnographic accounts, clinical case materials and firsthand accounts, students explore multiple dimensions of what it means to be “deviant” or “normal” in a given social or cultural context. Sample topics include: historical trajectories of deviance, deviance and criminality, social class and inequality, prison cultures, deviance and resistance, deviant personalities, forensic psychiatry, deviant vs. socially sanctioned violence, and stigma.
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD EN: S FA: SSP

L48 Anthro 4116 Anthropology and Experiment
In recent years, many cultural anthropologists have described their work as “experimental.” On the surface, the notion of experimentation leads something of a double life. On the one hand, in its ideal form, it stands for rigidly held methodological tenets aimed at answering questions in rigorous ways. This kind of experimentations is the hallmark of “scientific” inquiry. On the other hand, experimentation implies something of open-endedness, of tentative and flexible exploration. Through an examination of works on experiments, as well as purportedly experimental ethnographies, we pursue the question: What is an experimental mode of inquiry in cultural anthropology, and how does it square with the two idealized meanings of experimentation? We examine the links and resonances between different notions of what experiments do, what they describe in terms of both form and method, how they begin and end, how they are assessed as successes or failures, and what sort of knowledge they produce. This course involves
reading across cultural anthropology, science studies and the philosophy of science to better understand different approaches to experiments across domains of research and writing. Can we learn something about what anthropologists do in experimental works from the wealth of thoughtful scholarship on experiments in other fields? Is there something common to experimentation in cultural anthropology and experimentation elsewhere in the social sciences and beyond?
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 411W Anthropology and Existentialism — Writing-Intensive Seminar
This course examines what it means to be human. Drawing on existentialist philosophy and ethnography, this course is about appreciating the richness, the deep emotional tone, and also the dangers of human experience. Case studies look at profound aspects of existence, such as suffering, healing, mercy and hope, across diverse cultures. Specific themes covered include the ordinary life, how we perceive the world around us, the feeling of being at home and senses of place, how we experience pain, what makes our bodies powerful or vulnerable, why things really matter, and how communities cope with trauma and violence. This course is especially relevant for students interested in medical anthropology and social dimensions of health and illness. No background in anthropology or philosophy is required. This is the writing-intensive version of Anthro 4114.
Credit 3 units. A&S: SS, CD, WI FA: SSP

L48 Anthro 4123 Argumentation Through Ethnography
Ethnography is the traditional mainstay of anthropological academic writing. Through ethnography, anthropologists do more than simply describe a culture or a group of people; rather, they organize and present their field materials in particular ways in order to make intellectual, theoretical and sometimes even political arguments. This seminar explores the different ways anthropologists have used ethnography to make intellectual claims and frame theoretical or practical arguments. The aim of the course is to help students develop critical reading skills for engaging ethnographic materials as well as to explore the ways in which ethnography, when done well, can be a persuasive and engaging means of academic argumentation. This course is designed as a sequel to Anthro 472. Prerequisite: Anthro 472 or permission of instructor.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4134 The AIDS Epidemic: Inequalities, Ethnography and Ethics
In the year 2000, HIV became the world’s leading infectious cause of adult death, and in the next 10 years, AIDS was expected to kill more people than all wars of the 20th century combined. As the global epidemic rages on, our greatest enemy in combating HIV/AIDS is not lack of knowledge or resources, but global inequalities and the conceptual frameworks with which we understand health, human interaction and sexuality. This course emphasizes the ethnographic approach for cultural analysis of responses to HIV/AIDS. Students explore the relationship between local communities and wider historical and economic processes, and theoretical approaches to disease, the body, ethnicity/race, gender, sexuality, risk, addiction, power and culture. Other topics covered include the cultural construction of AIDS and risk, government responses to HIV/AIDS, origin and transmission debates; ethics and responsibilities; drug testing and marketing; the making of the AIDS industry and “risk” categories; prevention and education strategies; interaction between biomedicine and alternative healing systems; and medical advances and hopes.
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD EN: S FA: SSP

L48 Anthro 4135 Tobacco: History, Culture, Science and Policy
This course examines tobacco’s important role in shaping the modern world over the course of the past five centuries, from indigenous uses of tobacco in the New World to the politics of smoking in the 20th century. Through in-depth historical and anthropological case studies, tobacco provides a window into broad trends in government, law, economy and society, including changing social meanings of gender, race, individualism, risk, responsibility and health in the United States and worldwide. This course also introduces students to public health approaches to noncommunicable disease prevention and healthy lifestyle promotion. No background in anthropology or public health is required.
Credit 3 units. A&S: SS, SD A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4136 Sexual Health and the City: A Community-Based Learning Course
Same as AFAS 406
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD AR: SSP EN: S

L48 Anthro 419 Primate Behavior
Discussion and analysis of recent research on the social behavior of nonhuman primates. Data from both field and laboratory study. Prerequisite: Anthro 406 or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L48 Anthro 4191 Primate Cognition
This course investigates historical and current views regarding the cognitive capacities of non-human primates, and the extent to which these abilities are shared with humans. Topics for this class include: social cognition, problem-solving, tool use, culture, communication, theory of mind, deception, self-recognition, imitation and numerical cognition. The classes involve discussion and critical evaluation of theory and methods in this challenging and exciting area of primate cognitive research.
L48 Anthro 4202 Anthropological Genetics
This course examines the principles of evolutionary genetics as applied to complex characters such as morphology, behavior, life history and disease. Mathematical models of quantitative inheritance and evolution are discussed. Special topics include kin selection, sexual dimorphism and conservation genetics. Prerequisite: Anthro 150A or introductory biology. Credit 3 units. A&S: NS A&S: IQ, NSM A&S: IQ, NSM FA: NSM

L48 Anthro 4211 Paleoethnobotany and Ethnobotany
Interrelationships between plants and people, especially in past societies. Recovery and analysis of plant remains from archaeological sites; interpreting subsistence and vegetation changes; medicinal, ritual and technological uses of plants; plant domestication and agricultural intensification. Modern efforts to understand and preserve threatened traditional ethnobotanical practices. Prerequisite: Anthro 190BP or an introductory botany course, or permission of instructor. Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI FA: SSP

L48 Anthro 4212 Advanced Methods in Paleoethnobotany
Advanced analytical techniques for the study of archaeological plant remains. Tools and methods for micromorphological recognition, including electron microscopy. Photomicroscopy at low magnification, management, tabulation and reporting of data. Prerequisite: Anthro 4211 or permission of instructor. Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L48 Anthro 4214 The Archaeology of Food and Drink
Studies of past human diets have moved beyond analyses of animal bones and seeds to encompass new theoretical goals and innovative analytical techniques. In this seminar-style course, students explore methods of understanding food-related social interactions such as evidence including residues, ancient DNA, isotopes and trace elements, along with more traditional artifacts and archaeobotanical and zooarchaeological remains. By examining case studies from around the world, we evaluate the current state of research attempting to integrate the biological and cultural aspects of eating and drinking. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4215 Anthropology of Food
The rising interest in food research crosses various academic disciplines. This seminar focuses on aspects of food of particular interest in anthropology. The first two-thirds of the course is reading-intensive and discussion-intensive. Each student writes short review/response papers for major readings. For the final third, we still are reading and discussing, but the reading load is lighter (and we have a field trip) as students devote more time to their research papers. The research paper is a major effort on a topic discussed with and approved by the professor. In most cases it has to deal with cultural and historical aspects of a food, set of foods, form of consumption or aspect of food production. Papers are critiqued, assigned a provisional grade, revised and resubmitted. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4240 The Plundered Past: Archaeology's Challenges in the Modern World
The public imagination thrills at the fantastic adventures of Indiana Jones and Laura Croft, Tomb Raider, but the reality of modern archaeology is more complex, ethically challenging and interesting than a simple treasure hunt. In the United States and Canada, our science museums and museums of anthropology still display artifacts that are regarded as sacred and culturally definitive by Indian nations, although such holdings are now subject to negotiation and repatriation. Art museums in Europe and the U.S. still are stocked with looted ancient masterpieces that are revered as vital heritage by the nations from which they were stolen. We display looted art alongside a much smaller number of legitimately excavated artifacts of masterpiece quality, so it is no surprise that our popular images of archaeologists as avid and undiscerning collectors raise little concern. But modern archaeologists are not extractors of art or even of scientific information, from places as passive and inert as the museums' objects ultimately occupy. Archaeologists work with living people inhabiting societies and states that care deeply about their pasts and the relics of it. They are active agents engaged with many other people in the production of knowledge about the past. In our rapidly shrinking world, educated sensitivity to the many ancient cultural legacies that shape the values of modern global society is more than a moral imperative; it is a basic form of collaboration in the common project of survival. Archaeologists are ethically charged to advance that project through education about the complex contemporary arena of artifacts, sites and information they occupy. Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H FA: SSP

L48 Anthro 4253 Researching Fertility, Mortality and Migration
Students undertake research projects centering on the most fundamental demographic processes — fertility, mortality and migration. The first section covers basic demographic methodology so that students understand how population data is generated and demographic statistics analyzed. Then, course readings include seminal theoretical insights by anthropologists on demographic processes. Meanwhile, students work toward the completion of a term paper in which they are expected to undertake some original research on a topic of their choice (e.g., new reproductive technologies; cross-cultural adoption; ethnicity and migration). Each assignment in this course is a component of the final term paper. Prerequisite: Anthro 3612 Population and Society or permission of instructor.
L48 Anthro 4254 The Anthropology of Maternal Death
No other commonly recorded health indicator shows such great disparities between rich and poor nations as does maternal mortality. More than 500,000 women die each year around the world from complications of pregnancy and childbirth, but 99 percent of these deaths occur in impoverished, non-industrialized countries. This course examines the reasons for this stunning discrepancy, looking at the biological, social, political and economic factors involved in maternal death. The course is conducted as a seminar based on detailed readings of relevant journal articles, group discussion, case studies and class presentations. Prerequisite: Anthro 3621.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4282 Political Ecology
An exploration of how the interactions between culture and environment are mediated by local, national and global politics. Topics include "overpopulation," agricultural intensification, Green Revolution, biotechnology, corporate agriculture, green movements and organic farming. Each student prepares an in-depth research paper that may be presented to the class. Prerequisites: graduate standing, Anthro 361 or permission of instructor.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4311 Biocultural Perspectives on Obesity and Nutrition
From pink slime to red wine, causes and treatments for obesity are constantly in the headlines. With more than 35 percent of Americans currently obese, this is a tremendous biological and social issue in the United States. Obesity rates also are increasing globally despite billions of dollars spent on diets and public health interventions. Why is this happening and what can be done to change this? Why are humans fat and prone to obesity? How do we interpret appropriate body size? These are some of the questions we investigate in this class, specifically looking at the important physiological functions of adipose tissue and how both biological and cultural factors shape our perceptions of body image, health and the obesity epidemic.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4321 History of Physical Anthropology
The history of physical (or biological) anthropology are traced from Darwin’s time to the present. Factors that influenced major theories and subfields of physical anthropology are discussed along with current directions.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4322 Brave New Crops
This course introduces students to the major issues surrounding the development and use in genetically modified (GM) crops. Its focus is international, but with particular focus on the developing world. A variety of experts, available locally or through the internet, contribute perspectives. The course also includes field trips. For further information, see artscl.wustl.edu/~anthro/courses/3322.
Same as Anthro 3322
Credit 3 units. A&S: SS A&S: IQ, SSC BU: IS FA: NSM

L48 Anthro 434 Behavioral Research at the St. Louis Zoo
Students conduct research at the St. Louis Zoo. Training in designing of projects and analysis and interpretation of data. May be repeated for credit. Prerequisite: permission of instructor.
Credit variable, maximum 6 units. A&S: NS, WI A&S: IQ, NSM, WI BU: BA FA: NSM

L48 Anthro 4363 Sex, Gender and Power
This seminar explores various ways anthropologists have conceptualized the intersection of sex, gender and power in their ethnographies. Key questions revolve around the processes through which biological categories of sex become socially significant, and interact with various regimes of power such as the state, family, religion, medicine, the market and science in everyday life. We examine how the social processes and regulatory mechanisms associated with gender and sexuality create systems of hierarchy, domination, resistance, meaning, identity and affection. Course materials are primarily ethnographies, supplemented with articles. The aim of the course is to develop students’ critical reading, discussion and writing skills. Prerequisite: upper-level Anthro or Women, Gender and Sexuality Studies courses, or permission of instructor.
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD EN: S FA: SSP

L48 Anthro 4366 Europe’s New Diversities
Since the late 1980s, three major upheavals have transformed European senses of identity. The demise of the Soviet Union has forced citizens of new “post-socialist” nations to forge new senses of belonging and new strategies of survival. The rise of a new public presence of Islam, and the growth of children of Muslim immigrants to adulthood, have challenged notions that Europe is a secular or post-Christian space. Finally, the heightened authority of European institutions has challenged the nation-state from above, and by granting new forms of subnational autonomy to regions and peoples, from below. The new Europe is increasingly constituted by way of regional identifications and transnational movement(s), and by umbrella European legal and political organizations; these new realities occasion new rhetorics of secularism, nationalism and ethnic loyalties. We examine these forms of diversity, movement and debate by way of new works in anthropology, sociology and political science.
L48 Anthro 4367 Culture, Power, Knowledge
We often think of knowledge as universal and objective. But anthropologists have long studied ways in which knowledge varies in different cultural settings. In this course, we ask: What is knowledge, how does it arise, and what does it do? Is there such a thing as universal validity or is knowledge always tied to specific cultural practices? What happens when knowledge travels and how does knowledge figure in relations of power? We approach these questions through works in anthropology, philosophy and science studies.
Credit 3 units. A&S: SS A&S: IQ, SSC: EN: S FA: SSP

L48 Anthro 4392 Capitalism and Culture
Capitalism is perhaps the most important historical and social phenomenon in the modern world. In tribal settings and major cities alike, its complex impacts are evident. Through rich case studies of how capitalism touches down in diverse cultures, this course provides an introduction to anthropological perspectives on the economy and economic development. Themes covered include the history of capitalism and globalization, the cultural meanings of class and taste, the relationship between capitalism and popular culture, major artistic responses to capitalism, social movements such as environmentalism, and the field of international development. No background in anthropology or economics is required.
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD: EN: S FA: SSP

L48 Anthro 4393 The Archaeology of Trade and Exchange
Studies of trade and exchange are fundamental to our past, as cultures in contact result in new imaginings of self, communities, and place in the world. This course engages in archaeological and anthropological discussions about the interconnectedness that results from trade. This seminar concentrates on the discourse of material trade and the mechanisms for exchange, redistribution, dependency and resistance. It also examines the immaterial exchange of ideas, perceptions and values that alter concepts of identity, space and time. Globalization, political economies, and power are also addressed, along with ideas about territory, value, and social and political consequences of trade.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L48 Anthro 4408 Trauma and Memory
A thorough investigation of the effects of trauma on memory in both individuals and collective groups. Topics include flashback memories, forgetting and repression, post-traumatic stress and memory, and effects of trauma on individual and group identity. Prerequisites: Psych 100B + 6 units of advanced-level Psychology or Anthropology course work.
Same as Psych 4408
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L48 Anthro 4441 Bubblegum, Baseball and Boom: Latin American Cities Go Pop
Same as IAS 4581
Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI: EN: S

L48 Anthro 4452 In the Field: Ethnographic and Qualitative Methods
Same as AMCS 441
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4453 Studying the City: Approaches to Social Research
Same as URST 418
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L48 Anthro 4454 Cultures of Science and Technology
This seminar explores questions of theory, method and ethics in the anthropology of science and technology. How is biomedicine changing what it is to be human? How can technologies and scientific practices be studied ethnographically? How are the politics of difference linked to the production of scientific knowledge? Through close reading of ethnographic texts and fieldwork experience both on- and offline, we investigate how scientific practice and technological innovation reorganize various aspects of human life on both global and local scales. Topics include the social construction of knowledge, the reproduction of racial categories in genomics, the cultures of cyberspace, the commodification of bodies in medical science, and the ways in which various technoscientific projects reshape natural and political orders in diverse locales.
Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI: EN: S FA: SSP

L48 Anthro 4455 Ethnographic Fieldwork
This is a practice-based course in ethnographic fieldwork. Using a local case study (the cultural politics of schooling), we examine ethnographic fieldwork as an academic instrument and public social action. The course prepares students for independent research in academic or professional fields developing skills in critical thought, thesis and question development, background and internet research, perspective and empathy, social and political-economic analysis, observation, interviewing, oral histories, note-taking, data analysis, cultural interpretation, and writing. Student work contributes to the ongoing “St. Louis Schools’ Ethnographic Documentation Project.”
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP
L48 Anthro 448 Contemporary Issues in Cultural Anthropology
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4481 Writing Culture
Different ways of writing about people, culture and society in past and present times. Readings include anthropological works as well as works of fiction that represent people and the times, places and circumstances in which they live. Students conduct and write about their own ethnographical observations. Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI FA: SSP

L48 Anthro 4517 Anthropology and Development
The Bolivia-Brazil Project. This writing-intensive seminar examines the cultural politics of global “development” through an in-depth focus on Bolivia and Brazil. Brazil, a rising giant, has taken a central place in global energy and agroindustry and leads the Global South on the world stage. Bolivia, rich with natural gas, fuels Brazil and suffers collateral resource conflicts, yet inspires many through indigenous struggles to rethink economy, nature and society. Both countries express changing global geopolitics repositioning Latin American economies along east-west (China-India-Africa) — as well as north-south (U.S./Europe) — axes. In this course we consider how global political economies linking Bolivia and Brazil are interwoven with change in public cultures, territorial orders and flows, environmental dislocations, nationalism and identity, and how social movement struggles gendered inequalities, poverty, racism, indigeneity and democracy. Students acquire a foundation in anthropological approaches to development theory and ethnography and in-depth knowledge of Bolivia and Brazil. Through independent case studies tied to the instructor’s “Bolivia-Brazil Project,” students gain skills in research and writing on the cultural, social and political complexities of this thing we call development. Knowledge of Spanish and/or Portuguese and some prior knowledge of Latin American is encouraged, though not required. Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI EN: S FA: SSP

L48 Anthro 4561 Ceramic Analysis
Method, techniques and models for analyzing prehistoric ceramics. Students conduct hands-on analyses of collections from Cahokia Mounds and the St. Louis region. Prerequisite: Anthro 314, graduate standing or permission of instructor. Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L48 Anthro 4562 Artifact Analysis: Mississippian Cultures
The purpose of this course is to provide students with an introductory, hands-on experience of the methods employed in the analysis of archaeological materials common to the Mississippian culture. Students conduct class projects based on collections from Cahokia Mounds and the St. Louis region. Prerequisite: Anthro 314 or equivalent, or graduate standing, or permission of instructor.

L48 Anthro 4564 Archaeobotanical Analysis
Advanced laboratory and analytical techniques. Prerequisite: Anthro 4211 or permission of instructor. Credit 3 units. A&S: SS FA: SSP

L48 Anthro 4581 Principles of Human Anatomy and Development
This course is designed for both undergraduate and graduate students in the anthropological, biological and/or premedical sciences who wish to learn about human anatomy from various evolutionary, functional, developmental and clinical perspectives. Lectures emphasize the organizational and developmental principles of various organ systems of the human body. The course also makes use of our extensive anatomy museum of labeled dissected human specimens as well as our vast collections of numerous specimens from the human fossil record where appropriate. Frequent use of X-rays, CT and MRI scans also are used to help students visualize human anatomy from a number of different imaging modalities. Prerequisite: undergraduate or graduate students in the anthropological, biological and/or premedical sciences must have had at least one course in physical anthropology and/or biology, or consent of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L48 Anthro 4582 Human Life History Theory
Life history theory postulates that organisms must allocate finite time and finite resources between growth, maintenance and reproductive effort. This balance necessitates trade-offs in specific traits related to body size and energy allocation between competing functions across the life of the organism. In this class, we start from this broad theory and look at the specific application of life history theory within anthropology. Humans, in particular, present unique and unusual life history characteristics, which we discuss in depth. Credit 3 units. A&S: NS A&S: IQ, NSM FA: SSP

L48 Anthro 459 Human Osteology
Analysis of skeletal material recovered in human paleontological and archaeological excavations. The development of bone and major diseases that affect skeletal structure. Prerequisite: permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L48 Anthro 4591 Human Functional Morphology
A detailed consideration of the biological basis for variation in recent and past human skeletal anatomy as a framework for the interpretation of prehistoric human skeletal and fossil remains. Emphasis is placed on the structure, development and degeneration of bones and joints, the soft tissues which impinge
upon individual bones; and the biomechanical patterns relating to bone and joint structures. Prerequisite: Anthro 3661, Anthro 459 or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L48 Anthro 4595 Developmental Plasticity and Human Health
A look at how early life — gestation plus infancy and childhood — contributes to the establishment of long-term physiology, variation and individual health from an anthropological perspective. The course includes current disease models of developmental origins, combined with evolutionary and adaptive perspectives on developmental plasticity and the construction of human health.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L48 Anthro 4596 Biomarkers: Measuring Population Health, Reproductive and Social Endocrinology
How do we study contemporary human biology and population-level health? How do we investigate individual differences in health within a larger population? In this course, we specifically address these questions by looking at how anthropologists, nutritionists and public health workers investigate individual and population-level health. This is done through the study of biomarkers collected from individuals. In this class, we discuss the theory behind the use of biomarkers, the underlying biology and physiology of the human body reflected in these data, and the methods used in collection and analyses of biomarkers. Finally, we discuss how biomarkers can be integrated into studies of population and individual-level health.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L48 Anthro 4601 Topics in African-American Studies: Health in the Black Community: A Social Science Perspective
This course examines contemporary issues affecting black teenagers. Topics include risk and protective factors, resiliency, racial identity development, and reducing gaps in educational achievement between Blacks and Whites.
Same as AFAS 4601
Credit 3 units. A&S: SS, SD A&S: IQ, SSC AR: SSP BU: BA EN: S FA: SSP

L48 Anthro 4623 Art and Science of Inferential Statistics
This course examines the historical roots, the scholarly development and the current applications of inferential statistics in a research context. The emphasis is on how social and natural variables are distributed, framing testable research questions, and choosing appropriate statistical tests. This course covers the testing of univariate, bivariate and multivariate hypotheses using parametric, non-parametric and re-sampling methods. Requires students to undertake statistical analyses of their own on real data sets. Familiarity with descriptive statistics is assumed. Designed for graduate students and advanced undergraduates. Permission of instructor is required for undergraduate enrollment.
Credit 3 units. A&S: SS, QA A&S: IQ, SSC, AN EN: S FA: NSM

L48 Anthro 4655 New Advances in Archaeology
Archaeological research is moving at an increasingly rapid pace, with advances in archaeological methods and theory propelling new interpretations and understandings of archaeological findings. In this course we focus on contemporary developments in archaeology, with an emphasis on current trends in theory, method and discovery. The objectives of the course are to place emerging trends in archaeological research in a historical context, to understand new methods and to explore how various theoretical approaches influence the conduct of archaeological research around the globe.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4661 Historical Archaeology
This course focuses upon the methods and techniques employed in historical archaeology. We include methods of integration of written records through contextual studies, discussion of specific artifact type identification techniques and seminar-type treatments of other aspects of the field. The class includes some hands-on lab work, working primarily with materials from the first American fort west of the Mississippi (Fort Belle Fontaine) and two Civil War period mansions. Prerequisite: 3 credits of archaeology or permission of instructor.
Credit 3 units. A&S: TH, CD, WI A&S: IQ, HUM, LCD FA: SSP

L48 Anthro 4682 Ethnoarchaeology
Theories, methods and techniques applied by archaeologists to contemporary societies and materials to aid their understanding of extinct societies. Analysis of ethnographic research in both the Old and New Worlds. Participation with Professors Watson, Browman and Fritz is included in relevant topics. Prerequisites: Anthro 160B or 190BP, and permission of instructor.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H FA: SSP

L48 Anthro 472 Social Theory and Anthropology
A seminar on social theory and its ethnographic implications. Course combines major works of modern social theory, including Marx, Weber and Durkheim, with current work by contemporary anthropologists, such as Clifford Geertz, Eric Wolf, Marshall Sahlins and Fredrik Barth, and ethnographers from related disciplines, such as Pierre Bourdieu and Paul Willis.
Prerequisite: previous anthropology course work or permission of instructor.
Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP
L48 Anthro 474 National Narratives and Collective Memory
This course examines how national narratives shape the ideas of nation-states about themselves and others. It considers cultural, psychological and political aspects of narratives used to interpret the past and understand the present. In addition to reviewing conceptual foundations from the humanities and social sciences, particular national narratives are considered as case studies. Same as IAS 474
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L48 Anthro 4761 The Pleistocene Peopling of Eurasia
The paleolithic archaeology, human paleobiology and paleoecology of the geographical expansions and adaptations of Eurasian humans through the Pleistocene. Prerequisite: Anthro 150A or 190B.
Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L48 Anthro 4771 Out of the Wild: Domestication and Socioeconomic Diversity in Africa
The reason for the beginnings and spread of food production during the early Holocene in so many parts of the world is one of the most interesting questions in archaeology. It now seems likely that there are many different pathways to domestication. In Africa, there is a record of up to several million years of human existence as hunter-gatherers before some human populations adopted food production. Domestication of plants and animals about 10,000 years ago resulted in fundamental changes in human societies. It provided the basis for the increase in settlement densities, specialization and social stratification, and general decrease in mobility and dietary diversity characteristic of non-hunter-gatherer societies in the modern world. In this seminar, the class explores the phenomenon of domestication and the spread of food production, surveying the evidence for manipulation and domestication of plant and animal species by prehistoric peoples in Africa. We focus on how and why domestication occurred and factors that influenced its spread; interactions between late hunter-gatherers and early pastoralists; and intersections with complex societies of the Nile. We also look at the contributions of Africa to understanding pathways to food production world wide.
Credit 3 units. A&S: SS, WI A&S: IQ, SSC WI EN: S FA: SSP

L48 Anthro 4791 Archaeological Study of Social Complexity
A hallmark of anthropological theory is the idea that human societies evolve toward greater complexity or higher levels of organization through time. Yet accurately defining complexity or organization is such a difficult and frustrating undertaking that many people give up and fall back on an intuitive understanding, similar to Supreme Court Justice Potter Stewart’s famous definition of pornography: “I know it when I see it.” But what exactly does it mean to be socially complex? How does complexity in human societies emerge and how is it perpetuated? How can we infer social complexity from the archaeological record? In this seminar we examine theoretical and methodological aspects of social complexity as investigated by archaeologists. By means of case studies drawn from around the globe and ranging from the earliest humans to the recent past, we seek to define, describe and understand the concept of social complexity and its manifestations in diverse societies at different times.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4792 The Many Paths Leading Toward the Creation of the Ancient City
The purpose of this class is to examine the emergence of the Ancient City across the globe. We want to begin with the concepts of urbanism, city and metropolis. These are words whose derivation are to be found in the classical languages of the Mediterranean. Is there any means to reach an understanding of how other civilizations and societies characterized these special places on the landscape? In the past, many scholars have argued that market economies and state-level societies are essential to their existence. Such arguments reflect issues of sustainability in terms of the economy and the effective control of large populations through state-level institutions. While we want to understand the role of the economy and the level(s) of political integration involved in the process of urbanism, are there other cultural institutions such as religion that play a much larger and more significant role? Do these places reflect the “citizens” perception of the cosmos?
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4803 Advanced GIS Modeling and Landscape Analysis
The aim of this course is to learn to analyze archaeological data in terms of its spatial layout, geography, ecology and temporal dynamics, using Geographic Information Systems and associated computer modeling techniques. A focus is placed on the relationship between natural environments, cultural geography and the mapping of archaeological landscapes, and on the archaeologist’s ability to accurately recover, reconstruct and analyze this relationship in a virtual environment.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4861 Zooarchaeology
Methods and techniques of analysis of faunal remains recovered in archaeological context, including aging, sexing and the study of cultural modification of archaeological faunas. Prerequisites: any advanced course in archaeology and permission of instructor.
Credit 3 units. A&S: SS A&S: IQ, NSM FA: SSP

L48 Anthro 4851 Topics in Jewish Studies: Critical Issues in the Study of Popular Music
Consult Course Listings for current topic. Prerequisite: permission of instructor.
Same as JINE 485
Credit 3 units. A&S: TH EN: H

L48 Anthro 4881 Medicine and Anthropology
Explores the fundamental relationship of anthropology to the art and science of medicine. Emphasis on the impact of anthropology on current modes of biomedical research; alternative systems of health and healing; role of anthropologist in biomedicine and public health; critical medical anthropology; anthropology and epidemiology. Prerequisite: junior standing. Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L48 Anthro 4882 Anthropology and Public Health
Anthropological approaches to public health practice and research; role of anthropology in public health systems; cross-cultural public health research; community vs. institutional bases of public health advocacy. Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L48 Anthro 4883 The Political Economy of Health
This course reviews social science contributions to understanding health as a function of political and economic influences. Considers the ways in which personal health is affected by macrosocial processes. Examines effects of globalization, international development and political instability on the health of individuals. Examples drawn from the United States and international contexts. Prerequisite: junior standing or above. Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L48 Anthro 4884 Anthropology of Sexually Transmitted Infections
Sexually transmitted infections (STIs) continue to exert a major toll on developed and developing countries alike. Systems for STI surveillance, control and prevention help limit the spread of these infections, but they are often incompletely implemented due to political or financial barriers. This seminar addresses the biological, cultural and political dimensions of STIs in local, national and global contexts. Issues include viral vs. bacterial STIs, chemotherapy and prophylaxis, sociocultural factors of STI epidemiology, structural aspects of partner management, and transnational STI control and prevention. Prerequisite: prior course work in medical anthropology, graduate standing or permission of the instructor. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4885 Senior Seminar: Medicine and Society
This course provides a forum for graduating seniors in the Medicine and Society Program to reconvene for a semester of facilitated discussion about issues related to illness, healing and culture. Prerequisites: Students must be seniors in good standing in the Medicine and Society Program. Credit 1 unit. A&S: IQ, SSC EN: S

L48 Anthro 489 Seminar: Pathways to Domestication
Survey of the evidence of the domestication of plants and animals, focusing on processes leading to domestication, and on the recognition of pristine features of domestication in the archaeological record. Prerequisite: one 300- or 400-level course in archaeology. Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L48 Anthro 4892 Hunter-Gatherer Socioeconomic Variation
This class explores the nature and extent of variation in hunter-gatherer socioeconomic systems as documented in the literature on recent hunter-gatherers, and in the archaeological record of the past 20,000 years. We discuss Woodburn’s concept of delayed return hunter-gatherers, Testart’s writing on hunter-gatherer socioeconomic organization, and archaeological concepts of simple and complex hunter-gatherers. We examine case studies of both delayed and immediate return hunter-gatherers from the Americas, Asia, Africa and Australia and emphasize understanding underlying reasons for differences between groups, and implications of differences for patterns of cultural change, including the adoption of food production. Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L48 Anthro 489W Seminar: Pathways to Domestication
Limited to those students who have successfully completed Anthro 490 and have a qualifying continuing research project.
Prerequisites: Anthro 490 and permission of the faculty member supervising the continuing research project. Credit variable, maximum 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L48 Anthro 4951 Senior Honors Research
Limited to students who have qualified for the Anthropology honors program and who are conducting research for an honors thesis. Prerequisites: permission of the Anthropology faculty member supervising the honors research, and concurrent filing of notification with the Anthropology senior honors coordinator. Credit variable, maximum 3 units. FA: SSP

L48 Anthro 4961 Senior Honors Thesis
Limited to students who have qualified for the Anthropology honors program and who are actively engaged in writing a senior honors thesis. Prerequisite: permission of the Anthropology senior honors coordinator. Credit variable, maximum 3 units. FA: SSP

L48 Anthro 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories
Same as Art-Arch 4975
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L48 Anthro 4999 Capstone Experience
The Department of Anthropology offers several options for completing a capstone experience, which is recommended by the College of Arts & Sciences. One option is for students in any 400-level course in the department to secure permission of the instructor to simultaneously enroll in Anthro 4999. The instructor and student develop an individualized plan for expanding the normal content of the selected 400-level course into a capstone experience. Prerequisite: junior or senior standing. Enrollment requires permission of the department and the instructor. Credit 1 unit.

Arabic

The Department of Jewish, Islamic and Near Eastern Languages and Cultures offers a major and a minor in Arabic. As majors in Arabic, students can expect to gain proficiency in the language, study the area’s literary and cultural landmarks, and gain familiarity with Near Eastern history and civilizations.

Language Placement: Placement tests are required for all students entering our language programs. Students may be eligible for up to 6 units of back-credit based on advanced placement and successful completion of the recommended course. Native speakers are not eligible for back-credit; evidence of secondary or post-secondary study of the language is required. Any units received from back-credit cannot be counted toward the major or minor.

Phone: 314/935-5110 or 314/935-8567
E-mail: jinetc@artsci.wustl.edu
Departmental website: http://jinetc.wustl.edu

For a list of affiliated faculty, please visit the Department of Jewish, Islamic and Near Eastern Languages and Cultures (p. 615) faculty page.

The Major in Arabic

Prerequisites
- Arabic language study: Beginning Arabic I (Arab 107D), Beginning Arabic II (Arab 108D), Intermediate Arabic I (Arab 207D), Intermediate Arabic II (Arab 208D) — whether by course work or placement

Required courses (30 Units)
- Introduction to Islamic Civilization (JINE 210C)
- History, Text and Identity: Introduction to Jewish Civilization (JINE 208F)
- 12 units from 300- or 400-level Arabic language courses
- 6 units from 300- or 400-level courses in Islamic studies and Arabic literature and culture
- 3 additional elective units at the 300- or 400-level in Jewish, Islamic and Near Eastern Studies
- Arab 4001 Capstone Seminar

Senior honors
- Arab 488, Arab 489 + thesis. (A student must take capstone even when writing a senior honors thesis).

Additional Information

Regulations for language and culture majors
- Two semesters of the field language must be taken at Washington University.
- 300- or 400-level courses of a language may be counted toward the major.
- A maximum of 12 units from 300- or 400-level language courses can be counted toward the major.
- Note that 300- or 400-level courses that include the study of texts in the original language may be considered courses about history, literature, or religious studies rather than language courses.
- Back-credit granted for language courses does not count for the major.
- Students enrolled in WU study abroad programs (during the regular academic semester) can earn a maximum of 9 units subject to review by adviser and DUS. Summer programs and transfer courses can be granted as much as 6 units subject to review by adviser and DUS. However, a limit of 9 units in total
can be applied to the major, whether the units are earned in study abroad, summer programs, or transfer courses.

- No credit will be given for courses taken outside the department other than those which are cross-listed.
- A minimum of 27 units is required for the major. 21 of those must be from 300- or 400-level courses.
- Double counting courses: a maximum of 3 units used for the major can be counted toward another major or minor.
- To be eligible for Senior Honors a student must maintain a GPA of 3.65 through the sixth semester.
- A Capstone Seminar may be taken in junior or senior year.
- Students have to maintain an average of B in all courses for the major. A grade of B- must be earned in each language course in order to advance to next level.
- No pass/fail course can count toward either prerequisites or major.

Study Abroad: Students majoring in Arabic are encouraged to participate in the Washington University Study Abroad program. The university currently sponsors preapproved programs of study at the Hebrew University in Jerusalem, the University of Haifa, Aalim Arabic Program in Morocco, Boğaziçi University in Istanbul, and the American University of Cairo. Students may enroll in summer programs anytime at their discretion; however, semester abroad is usually during the junior year and after a minimum of one year of language study at Washington University.

Senior Honors: Jewish, Islamic and Near Eastern Studies majors who have a cumulative GPA of 3.65 or higher after six semesters are eligible to apply for candidacy for departmental senior honors. Once they receive departmental approval, candidates must satisfactorily complete a senior honors thesis in order to be considered for departmental honors. Please visit the department web page for further information and requirements at http://jinelc.wustl.edu/undergraduate/senior-honors-guidelines-and-evaluation-form.

The Minor in Arabic

Prerequisites
- Beginning Arabic I (JINE 107D), Beginning Arabic II (JINE 108D) — whether by course work or placement

Required courses (18 Credits)
- Introduction to Islamic Civilization (JINE 210C)
- 9 units from 200-, 300-, or 400-level courses in Arabic language
- 6 units from 300- or 400-level courses in Islamic studies and Arabic literature and culture.

Additional Information

Regulations for all language and culture minors

- Two semesters of the language must be taken at Washington University.
- No more than 12 credit units can be from language courses.
- Note that 300- or 400-level courses that include the study of texts in the original language may be considered courses about history, literature, or religious studies rather than language courses.
- Preapproved WU study abroad programs during the regular academic semester, summer programs, and transfer courses can earn a maximum of 3 credits subject to review by adviser and DUS.
- Back-credit granted for language courses does not count for the minor.
- No credits will be given for courses taken outside the department other than those which are cross-listed.
- A minimum of 18 credits is required for minor.
- Double counting courses: a maximum of 3 credits used for the minor can be counted for another major or minor.
- Students have to maintain an average of B for the minor. A grade of B- must be earned in each language course in order to advance to the next language course.
- No pass/fail course can count toward either prerequisites or minor.

L49 Arab 107D Beginning Arabic I
Introduction to modern Arabic; concentrates on rapidly developing basic skills in reading, writing, speaking and understanding. Five class hours, including one culture hour and additional drill or laboratory hours. Students with previous Arabic language background must take a placement examination. Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L49 Arab 108D Beginning Arabic II
Continuation of Arab 107D. Emphasis on enhancing skills in reading, writing, speaking and aural comprehension of modern Arabic. Prerequisite: grade of B– or better in Arab 107DQ or placement by examination. Five class hours a week with additional drill or laboratory hours arranged by instructor. Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L49 Arab 207D Intermediate Arabic I
Study of grammar of literary Arabic and reading of annotated classical and modern prose texts; elementary composition; practice in speaking and comprehending modern Arabic. Prerequisite: grade of B– or better in Arab 108DQ or placement by examination. Five class hours a week with additional drill or laboratory hours set by instructor. Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS
L49 Arab 208D Intermediate Arabic II
Continuation of Arab 207D. Study of grammar of literary Arabic and reading of annotated classical and modern prose texts; elementary composition; practice in speaking and comprehending modern Arabic. Prerequisite: grade of B– or better in Arab 207D or placement by examination. Five class hours a week with additional drill or laboratory hours arranged by instructor.
Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L49 Arab 307D Advanced Arabic I
Continuation of Arabic 208D. Competence in reading, writing, speaking, listening and culture is developed through intensive exposure to classical and modern standard Arabic in its written and audiovisual forms. Prerequisite: grade of B– or better in Arab 208D or placement by examination. Three class hours a week with one additional laboratory hour as assigned by instructor.
Credit 4 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L49 Arab 308D Advanced Arabic II
A continuation of Arabic 307D. Continued integration of language development through reading, writing, speaking and listening activities centered on advanced authentic material. This semester proves critical for making the transition from Modern Arabic to Classical Arabic, including Qur’anic Arabic. Continued development of colloquial Arabic. Prerequisite: Arab 307D or equivalent.
Credit 4 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L49 Arab 325 Introduction to Arabic Literature
A survey of the major genres and themes in Arabic literature from the pre-Islamic era to the modern period. Texts include pre-Islamic, classical and Sufi poetry, as well as popular tales and critical prose from the Umayyad and Abbasid empires and Andalusia. The modern sections of the course interrogate political commitment in Arabic literature and introduce students to feminist and magical realist novels from North Africa and the Levant. All readings are in English translation.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H

L49 Arab 329C Middle Eastern Islamic Literatures in Translation
This course studies, in English translation, several great works of Islamic literature that still influence or reflect the ways in which we perceive Islamic culture today. We critically consider great and disparate literary works, originally written in a variety of languages including Arabic, Turkish and Persian and stretched from Spain to India, that share the common backdrop of an urban and educated milieu in which they were produced, widely read and circulated. The course aims at exploring the literary cultures in their historical and social context. Possible themes include court literature, politics, Sufi literature, history, theology and literature of romance. All readings are in English.

L49 Arab 355C The Flowering of Islamic Literature, 500–1200
Same as Comp Lit 355C
Credit 3 units. A&S: TH, CD BU: HUM FA: Lit

L49 Arab 361 City of Peace: Baghdad in Medieval Times (ca. 762–1250)
Same as JINE 361
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L49 Arab 4001 Capstone Seminar
Same as JINE 4001
Credit 3 units.

L49 Arab 405 Colloquial Arabic
The aim of this course is to introduce the students to colloquial Arabic through their knowledge of Modern Standard Arabic (MSA). We focus on the main differences between colloquial and MSA so that the students can use the colloquial form for practical purposes in everyday life. Prerequisite: Arab 208D or instructor’s permission.
Credit 3 units. A&S: LA A&S: IQ, LCD BU: IS EN: H

L49 Arab 407 Fourth-Level Arabic I
Focused reading and discussion of classical and modern texts centered on selected topics in Arabic literature, poetry and media. Continued development of oral, aural and writing skills. Students’ interests are taken into consideration before finalizing the selection of texts. Practice in writing and grammar. Prerequisite: grade of B– or better in Arab 308D or placement by examination.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS BU: IS FA: Lit

L49 Arab 408 Fourth-Level Arabic II
Readings and discussion in Arabic of selected classical texts. Students’ interests are taken into consideration before finalizing the selection of texts. Practice in writing and grammar. Continued development of colloquial Arabic.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS BU: IS FA: Lit

L49 Arab 450 Topics in Classical Arabic Literature and Culture
Exploration of medieval Arabic Belles-Lettres (Adab). All texts read in Arabic. Prerequisite: senior standing.
Credit 3 units. A&S: TH AR: Lit BU: IS FA: Lit
L49 Arab 451 Topics in Modern Arabic Literature and Culture
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD AR: Lit BU: HUM FA: Lit

L49 Arab 464 Arabic Textual Analysis
This course introduces the advanced student of Arabic to a variety of prose narratives in the modern language. Readings, which include literary texts and topical essays on aspects of Arabic society and culture, reflect the needs and interests of the enrolled students.
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD, LS EN: H FA: Lit

L49 Arab 465 Topics in Arabic
This course is an in-depth study of a particular segment of Arabic literature and/or culture.
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD AR: Lit EN: H FA: Lit

L49 Arab 470 Topics in Classical Arabic Literature in Translation
Various themes in Arabic religious literature and Belles-Lettres (Adab), e.g., the intertwining of religion and politics, court culture and fashions, social critiques, gender roles, etc., are read in English.
Credit 3 units. AR: Lit BU: ETH FA: Lit

L49 Arab 471 Topics in Modern Arabic Literature in Translation
Modern Arabic narratives read in English translation foregrounding themes such as the conflict between tradition and modernity, civil war, poverty, alienation, religion and politics, and changing gender roles.
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD AR: Lit BU: ETH FA: Lit

L49 Arab 488 Independent Work for Senior Honors
This course to be taken in the fall semester. Prerequisites: senior standing, eligibility for honors, and permission of the department.
Credit 3 units.

L49 Arab 489 Independent Work for Senior Honors
This course to be taken in the spring semester. Prerequisite: senior standing, eligibility for honors, and permission of the department.
Credit 3 units.

L49 Arab 497 Guided Readings in Arabic
Prerequisites: senior standing and permission of instructor and department chair.
Credit variable, maximum 5 units. A&S: LA

L49 Arab 498 Guided Readings in Arabic
Prerequisites: senior standing and permission of the instructor and the department chair.
Credit 3 units. A&S: LA

Archaeology
Archaeology provides the opportunity to investigate the material remains of past societies and cultures and the methods by which they are recovered, analyzed, interpreted and reconstructed.

Archaeologists investigate the entire human past from the first evidence of tool use 2.5 million years ago to historical studies as recent as the 20th century. To provide a comprehensive understanding of archaeology, the department emphasizes two approaches: the humanistic, which is represented by classical archaeology, and the social scientific, which is represented by anthropological archaeology.

Archaeology students will encounter a range of specialties within the field, from topical studies, such as prehistoric pastoralism, hunter-and-gatherer societies, Mayan archaeology, or Greek and Roman archaeology, to methodological approaches such as historical archaeology, ethnoarchaeology, zooarchaeology, paleoethnobotany, geoarchaeology, geographic information systems (GIS) and radiometric dating. A strength of this institution in anthropological archaeology is the focus upon biologically based studies (paleoethnobotany, zooarchaeology and GIS) to investigate such questions as the origins of food production or complex societies. The strength of the classical archaeological program capitalizes on ancient documents in investigating the more recent Eurasian human past.

While acquiring basic training in archaeology, students may choose to concentrate on a specific region, such as the Eastern Woodlands of the United States, the Andes, Mesoamerica, Africa, Central Asia, China or the Mediterranean world. Ancient and/or modern languages, as well as history and art, are essential for some areas of study. Students, in conjunction with their advisers, can identify a specialized set of courses that meet their goals.

Washington University archaeology faculty members are involved in research projects in many regions, such as Central Asia, Northern Africa, Greece, the Andes, the Mayan area, New Mexico and the Mississippi River valley. With a degree in archaeology, a graduate can work in academia, private consulting firms, government conservation and compliance agencies, and museums. Academic and museum positions generally require graduate-level training.

The Major in Archaeology

Total units required: 27

Required courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARC 190B</td>
<td>Introduction to Archaeology</td>
<td>3</td>
</tr>
<tr>
<td>ARC 200C</td>
<td>World Archaeology: Global Perspectives on the Past</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective courses:

The major requires 21 advanced (300-/3000- or 400-/4000-level) units in addition to the two introductory courses. These 21 advanced units should be distributed from the offerings in anthropological and classical archaeology. All majors must complete a supervised archaeological field school of six weeks or the equivalent, approved by the departmental director.

Additional Information

Internships/Research: The hands-on experience of archaeological fieldwork is particularly attractive to many students. Undergraduate majors in archaeology will complete at least one supervised field project, which is selected to best meet the student’s long-term goals. Most field research projects are small, which allows students to work closely with faculty and staff. Recently, students have worked at excavations in such diverse areas as Ireland, France, Kazakhstan, Greece, Israel, China, Japan, Guatemala, Bolivia, the U.S. Southwest and Cahokia, Illinois. Students focusing on North American archaeology often take an internship at one of the local private firms to gain experience in contract archaeology. Undergraduate participation in research is encouraged particularly for students working on Senior Honors theses.

Senior Honors: Archaeology majors are encouraged to work for Senior Honors, for which students may apply in the junior or senior year. Acceptance into the program is based on previous academic performance, a proposal accepted by an archaeology faculty member who agrees to supervise the honors research, and approval of the Archaeology program director. The Honors thesis will be evaluated by a three-member faculty committee.

Study Abroad: In addition to field schools in the summer, many students also opt to take a semester abroad, particularly those focusing in classical archaeology.
The Minor in Archaeology

Units required: 15

Required courses: The minor in the Interdisciplinary Program in Archaeology requires completion of 15 course credits. The minor should include one of the two introductory courses (ARC 190B Introduction to Archaeology and ARC 200C World Archaeology: Global Perspectives on the Past), and at least 12 advanced units from 300- and 400-level courses.

Additional Information

The Archaeology minor is usually fulfilled by a concentration in either the humanistic or in the social science areas. Thus, the minor will satisfy the Textual and Historical Studies distribution area or the Social Sciences distribution area, depending on which courses the minor includes.

L52 ARC 130 Freshman Seminar: The Ritual Landscape of Cahokia: Perspectives on the Politics of Religion and Chiefly Power

The purpose of this class is to engage and challenge freshman students in an open discussion about the prehistoric Mississippian community of Cahokia. The focus of this course is two-fold. The first is to study the way in which the archaeological evidence has been interpreted. The second is to examine other perspectives on Cahokia, especially from the Native American descendants who consecrated this landscape nearly a millennium ago. An underlying tenet of this seminar in understanding Cahokia can also be achieved through the traditions and literature of Native Americans. In the end we want to understand the basis for Cahokia’s organization as a prehistoric Native American community, and the role that ritual and religion played in the rather dramatic and dynamic history of this community and the surrounding region.

Same as Anthro 130

Credit 3 units. A&S: SS A&S: IQ, SSC AR: SSP BU: HUM FA: SSP

L52 ARC 190B Introduction to Archaeology

Archaeology plays a critical and unique role in understanding the human past. Through study of the methods and theories of archaeology, and a survey of important firsts in the human past, this course introduces students to the way archaeologists use material culture to reconstruct and understand human behavior. Chronologically ordered case studies from around the globe are used to look at social, ecological and cultural issues facing humans from the earliest times to the present. Students gain practice reconstructing the past through hands-on participation in two one-hour labs focusing on lithics and animal bones. By the end of the course, students are expected to be able to think critically about how the past is presented, and why, and the importance of the past as it relates to the present and future.

Same as Anthro 190B

L52 ARC 200C World Archaeology: Global Perspectives on the Past

If we carefully peer beneath the earth’s surface, we discover a hidden world that is being rediscovered by archaeologists. A considerable amount of excitement is generated by the discovery of lost civilizations and societies. Archaeologists from every corner of the earth come to Washington University to share their experiences as they use the most sophisticated technology to rediscover those forgotten and sometimes embarrassing aspects of our human past.

Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: IS FA: SSP

L52 ARC 212 Archaeological Fantasies and Hoaxes

American popular culture is saturated with pseudoscientific and fictionalized accounts of archaeological discoveries and interpretations. How can students of the past distinguish between fraud, fantasy, hype, and valid archaeological research? What potential merit do films, TV-oriented documentaries, and historical fiction offer? What role has racism played in attempts to deny indigenous peoples credit for their past achievements? This course looks at the popular culture of archaeology, providing tools for critical evaluation as well as lifetime enjoyment of the field as it is frequently sold to both the informed and the unwaried public. Anthropology majors and non-majors are all welcome as are sophomores and motivated first-year students who have not yet declared majors.

Same as Anthro 212

Credit 3 units. A&S: SS A&S: IQ, SSC, LCD AR: SSP EN: S

L52 ARC 300 Internship in Archaeology

Internship with an archaeological project or organization where the primary objective is to obtain professional experience outside of the classroom. Student must have a faculty sponsor and a site or project supervisor. Prerequisites: open only to Archaeology majors with junior standing and permission of department. Credit variable, maximum 3 units.

Credit variable, maximum 3 units. FA: SSP

L52 ARC 3003 Writing Intensive in Ancient Studies: The Greek Theater

Study of selected topics in Classics. This is a Writing Intensive Course.

Same as Classics 3003

Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI EN: H
L52 ARC 3053 Nomadic Strategies and Extreme Ecologies
This course explores the archaeology and anthropology of nomadic pastoral societies in light of their ecological, political and cultural strategies and adaptation to extreme environments (deserts, mountains, the arctic). The aim of the course is to understand both the early development of pastoral ways of life, and how nomads have had an essential role in the formation and transfer of culture, language and power from prehistoric time to the current era.
Same as Anthro 3053
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA, IS EN: S FA: SSP

L52 ARC 310C Ancient Civilizations of the New World
An examination of the Inca empire in Peru, and the Maya and Aztec empires in Mexico, through the inquiry into the roots, development, form, and evolutionary history of pre-Columbian civilization in each region from its earliest times to the rise of the classic kingdoms. Examples of respective artistic accomplishments are presented and discussed.
Same as Anthro 310C

L52 ARC 3303 Homeric Archaeology
The art and culture of prehistoric Greece as reflected in The iliad and The Odyssey of Homer. The course examines, analyzes and researches the Minoan/Mycenaean civilization and its legacy that resulted in the renaissance of the eighth century bc. Topics range from the 20th to the eighth centuries bc and focuses on major sites like Knossos, Phaistos and Mycenae, burial customs, trade, warfare and the emergence of the Greek city-state. No prerequisite.
Same as Art-Arch 3301
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: IS FA: AH

L52 ARC 3304 Bones to Behavior: Undergraduate Research in the Lab and at the Zoo
Same as Anthro 3304
Credit 3 units. A&S: NS A&S: IQ, NSM BU: BA FA: SSP

L52 ARC 3305 Bones to Behavior II
Same as Anthro 3305
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L52 ARC 331 Greek Art and Archaeology
A survey of the artistic achievements and material culture of the Greeks in the first millennium BCE (Iron Age through the Hellenistic period). Development of architecture, sculpture, and painting, as well as minor arts and utilitarian objects, with emphasis on the insights they offer into Greek society and interactions with the wider Mediterranean world.
Same as Art-Arch 331
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L52 ARC 334 Roman Art and Archaeology
The art and archaeology of the Romans, with emphasis on the late Republic and the Imperial period. Major monuments of sculpture and architecture, as well as town planning, domestic architecture, and the minor arts are used as evidence for reconstructing ancient life.
Same as Art-Arch 334
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L52 ARC 3351 The Ancient Maya: Archaeology and History
This course focuses on the ancient Maya civilization because there are many exciting new breakthroughs in the study of the Maya. The Olmec civilization and the civilization of Teotihuacan in the Valley of Mexico are considered as they related to the rise and development of the Maya civilization. The ancient Maya were the only Pre-Columbian civilization to leave us a written record that we can use to understand their politics, religion and history. This course is about Maya ancient history and Maya glyphic texts, combined with the images of Maya life from their
many forms of art. The combination of glyphic texts, art and archaeology now can provide a uniquely detailed reconstruction of ancient history in a New World civilization.
Same as Anthro 3351
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S FA: SSP

L52 ARC 336 Ancient Sanctuaries: The Archaeology of Sacred Space in the Ancient Mediterranean
Same as Art-Arch 336
Credit 3 units. A&S: TH, CD BU: HUM FA: AH

L52 ARC 3369 Underwater Archaeology
Survey of the history, techniques and results of underwater excavation worldwide, with emphasis on the ancient Mediterranean. Prerequisite: Archaeology 190 or 200, or permission of instructor.
Credit 3 units. A&S: TH BU: HUM FA: SSP

L52 ARC 345E The Art and Archaeology of Ancient China
Same as Art-Arch 345E(Q).
Credit 3 units. A&S: TH BU: IS FA: AH

L52 ARC 3461 Native Americans at Westward Expansion
Issues precipitated by Euro-American contact, colonization and expansion between 1492 and 1810 across Eastern North America, the Plains and the Rocky Mountains. Impacts of exploration and settlement and responses by native peoples: epidemics; population loss; breakdown of Southeastern chiefdoms; resistance; relocation; and shifts in economic strategies. Perspectives and policies of Native Americans as well as Europeans and non-Indian Americans, including Lewis and Clark.
Same as Anthro 3461
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD FA: SSP

L52 ARC 347B Ancient Mound Builders of the Mississippi Valley
Same as Anthro 347B
Credit 3 units. A&S: SS, CD BU: BA FA: SSP

L52 ARC 3617 Past and Present Cultural Environments
Human societies are situated within and interact with their ecological and environmental systems. Even social relationships within and between groups imply spatial relationships and geographic orientation, advantages, influence and limitations. Beyond subsistence, environment and the “natural world” play an integral role in how humans pattern the landscape, structure society, develop their world view, and, in turn, alter and adapt the world in which they live. This upper-division undergraduate and graduate seminar course introduces students to anthropological conceptions of human-environmental relationships, past and present. Topics include environmental and landscape archaeology; historical, political, and human behavioral ecology; world view and conceptualizations of nature; human adaptation, resilience theory, and niche construction; anthropological case studies; the intersections of humans, animals and the environment; and end with environmental politics.
Same as Anthro 3617
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L52 ARC 3693 Anthropology of Death, Mourning and Burial
This course offers anthropological analysis of death, mourning and burial. It draws on data and theoretical explanations from different sub-disciplines of anthropology (archaeology, cultural anthropology, and physical anthropology). In addition to theoretical conceptualization of mortuary practices, specific case studies are used to address a wide range of topics. The course covers cross-cultural comparison of burial among hunter-gatherers, pastoralists and complex societies. Mortuary practices also are conceptualized based on religion and secularity, social organization and biological approaches (e.g., paleodiet, paleodemography, disease). Ethical and legal issues of using human remains worldwide also are addressed. This course helps train and stimulate academic enquiry into ancient and modern societal treatment of death around the globe. The time covered in this course ranges from the Lower Palaeolithic to the contemporary world.
Same as Anthro 3693

L52 ARC 372 Geoarchaeology
Geoarchaeology involves the application of analytical techniques, concepts, and field methods from the earth sciences to help solve archaeological problems. Issues explored in this course include human and environmental processes involved in archaeological site formation, the sedimentary context of archaeological remains, soils and sediments relevant to archaeology, the relationship between past settlement and landscape evolution, paleoclimatic reconstruction, human impacts on the environment, geological sourcing of artifact proveniences, and remote sensing of the physical environment. Several field trips to local archaeological/geological sites provide an opportunity to understand how geoarchaeology is applied to specific research problems.

L52 ARC 374 Social Landscapes in Global View
From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as “landscapes.” This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We cover various urban landscapes, rural landscapes, nomadic landscapes (and others) and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 bce to 2009 ce and we cover all the continents. This course also traces the intellectual history of the study of landscape as a social phenomenon, and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world and trace the global currents of your social landscape!

L52 ARC 376 Warriors, Merchants, Monks and Courtesans: Ancient Narratives of Globalization in Google Earth
This introductory seminar-style course examines the history of globalization through the narrative accounts of those who lived along some of the great trade routes of the Old World. Through a combination of in-class discussion and hands-on tutorials and projects in Google Earth, we examine how day-to-day local interactions and the experiences of individuals contributed to broader cultural exchanges and the shaping of ancient cosmopolitan centers. We use a bottom-up approach to understand the process of globalization, and why it is not only a phenomenon of the modern world. This course covers a large geographic and temporal span, but it is not about memorizing lists of dates and places or putting dots on a map — it is about learning how to interpret multiple strands of knowledge and put them together into a cohesive narrative of history. The course covers four broad anthropological themes related to Old World history and globalization in conjunction with weekly lessons in Google Earth; there are no prerequisites for either. The knowledge and skills gained in the course lead to a final independent research project consisting of a short paper and an interactive digital map that can be shared online through the Google Earth community.
Same as Anthro 376
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L52 ARC 3775 Ancient Eurasia and the New Silk Roads
This course explores the rise of civilization in the broad region of Eurasia, spanning from the eastern edges of Europe to the western edges of China. The focus of the course is the unique trajectory of civilization that is made evident in the region of Central Eurasia from roughly 6000 BC to the historical era (ca. AD 250). In addition to this ancient focus, the course aims to relate many of the most historically durable characteristics of the region to contemporary developments of the past two or three centuries. Fundamentally, this course asks us to reconceptualize the notion of “civilization” from the perspective of societies whose dominant forms of organization defied typical classifications such as “states” or “empires” and, instead, shaped a wholly different social order over the past 5000 years or more. This class provides a well-rounded experience of the geography, social organization, and social interconnections of one of the most essential and pivotal regions in world history and contemporary political discourse.

L52 ARC 379 Feast or Famine: Archaeology and Climate Change
This course examines the temporal, geographical and environmental aspects of past climate changes, and by using specific examples, explores how climate changes may have affected the evolution of human culture and the course of human history. Archaeological and documentary examples from the Americas, Africa, Asia, Europe and the Near East are used to explore if or how significant events in human history have been influenced by changes in climate.

L52 ARC 403 Culture and History of the Southwestern United States
This course integrates archaeological, historical, and early ethnographic dimensions of American Indian societies in the southwestern United States and northwest Mexico, a region famous for its challenging environment, cultural diversity, and the contributions made by its Native inhabitants. Emphasis is placed on the development of sophisticated desert agriculture and on the rise of regionally integrated cultures including Chaco Canyon and Mesa Verde. The impact of Spanish, Mexican, and American colonization are explored. Ethnographies of Tohono O’odham (Papago), Hopi, Zuni, Rio Grande Pueblo, and Navajo societies are discussed.

L52 ARC 426 Ancient Athens
Athens was one of the great cities of antiquity. From lavishly decorated marble temples on the Acropolis, to public office buildings and inscriptions in the Agoraios (civic center), to the houses of the living and the monuments for the dead, the city has left a rich record of her material culture. These buildings and objects, together with an exceptionally large number of literary and historical texts, make it possible to paint a vivid picture of the ancient city. The course concentrates on the physical setting and monuments of Athens, as revealed by both archaeology and texts, and how they functioned within the context of Athenian civic and religious life. Prerequisite: Classics 345C, Classics 350 or permissions of instructor.
Same as Classics 426
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: AH

L52 ARC 4393 The Archaeology of Trade and Exchange
Studies of trade and exchange are fundamental to our past, as cultures in contact result in new imaginings of self, communities, and place in the world. This course engages in archaeological and anthropological discussions about the interconnectedness that results from trade. This seminar concentrates on the discourse of material trade and the mechanisms for exchange.
redistribution, dependency and resistance. It also examines the immaterial exchange of ideas, perceptions and values that alter concepts of identity, space and time. Globalization, political economies, and power are also addressed, along with ideas about territory, value, and social and political consequences of trade.

Same as Anthro 4561
Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L52 ARC 4562 Artifact Analysis: Mississippian Cultures
The purpose of this course is to provide students with an introductory, hands-on experience of the methods employed in the analysis of archaeological materials common to the Mississippian culture. Students conduct class projects based on collections from Cahokia Mounds and the St. Louis region. Prerequisite: Anthro 314 or equivalent, or graduate standing, or permission of instructor.
Same as Anthro 4562
Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L52 ARC 4655 New Advances in Archaeology
Archaeological research is moving at an increasingly rapid pace, with advances in archaeological methods and theory propelling new interpretations and understandings of archaeological findings. This course we focus on contemporary developments in archaeology, with an emphasis on current trends in theory, method and discovery. The objectives of the course are to place emerging trends in archaeological research in a historical context, to understand new methods, and to explore how various theoretical approaches influence the conduct of archaeological research around the globe.

L52 ARC 4791 Archaeological Study of Social Complexity
A hallmark of anthropological theory is the idea that human societies evolve toward greater complexity or higher levels of organization through time. Yet accurately defining complexity or organization is such a difficult and frustrating undertaking that many people give up and fall back on an intuitive understanding, similar to Supreme Court Justice Potter Stewart's famous definition of pornography: “I know it when I see it.” But what exactly does it mean to be socially complex? How does complexity in human societies emerge and how is it perpetuated? How can we infer social complexity from the archaeological record? In this seminar we examine theoretical and methodological aspects of social complexity as investigated by archaeologists. By means of case studies drawn from around the globe and ranging from the earliest humans to the recent past, we seek to define, describe and understand the concept of social complexity and its manifestations in diverse societies at different times.
Same as Anthro 4791

L52 ARC 4792 The Many Paths Leading Toward the Creation of the Ancient City
Same as Anthro 4792
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L52 ARC 4803 Advanced GIS Modeling and Landscape Analysis
The aim of this course is to learn to analyze archaeological data in terms of its spatial layout, geography, ecology, and
temporal dynamics, using Geographic Information Systems and associated computer modeling techniques. A focus is placed on the relationship between natural environments, cultural geography, and the mapping of archaeological landscapes, and on the archaeologist’s ability to accurately recover, reconstruct and analyze this relationship in a virtual environment.
Same as Anthro 4803
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L52 ARC 481 Zooarchaeology
Methods and techniques of analysis of faunal remains recovered in archaeological context, including aging, sexing, and the study of cultural modification of archaeological faunas. Prerequisite: any advanced course in archaeology and permission of instructor.
Same as Anthro 481
Credit 3 units. A&S: SS A&S: IQ, NSM FA: SSP

Same as Anthro 4892
Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L52 ARC 489W Seminar: Pathways to Domestication
The origins of agriculture led to one of the most important transitions in human history, continuing to fascinate anthropologists and all who depend on farmers for food. We examine evidence for the development and spread of settled and mobile farming systems in diverse regions of the world. We discuss old and new theoretical approaches and apply increasingly sophisticated methods for recovering and interpreting the evidence. Recent research puts us in a better position than ever before to understand the preconditions, processes, and possibly the causes of domestication and the spread of food production. This course is the WI version of Anthro 489 Seminar: Pathways to Domestication.
Same as Anthro 489W
Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI EN: S

L52 ARC 491 Archaeological Research
Undergraduate research experience sponsored by one of the archaeology staff. May be taken more than once for credit.
Prerequisite: permission of the faculty member under whom the research will be done.
Credit variable, maximum 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L52 ARC 492 Independent Studies
Supervised independent research. For advanced undergraduates only. Prerequisite: permission of the faculty member under whom the work will be done.
Credit variable, maximum 3 units. FA: SSP

L52 ARC 493 Honors Thesis
Limited to students accepted into the honors program.
Prerequisite: permission of department.
Credit 3 units. A&S: SS EN: S FA: SSP

L52 ARC 497 Senior Project
Designed for majors in Archaeology who have not satisfied their college capstone experience in another manner, or who are not satisfying this requirement through ARC 493 Honors Thesis. This course involves a structured research assignment, internship, fieldwork or independent project under the supervision of one of the department’s faculty. Limited to students in the junior level and above. Permission of instructor who will supervise the work is required.
Credit variable, maximum 3 units. A&S: SS EN: S FA: SSP

L52 ARC 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories
Same as Art-Arch 4975
Credit 3 units.

L52 ARC 498 Intensive Writing Course: Archaeology
Designed for majors who have not satisfied their college writing requirement in another fashion. This course ordinarily is taken in tandem with another 300- or 400-level course in Archaeology, with the required permission to enroll granted by the instructor in that course. The student prepares a portfolio of papers, which undergo revision and rewriting, as assigned by that course instructor. In some cases, this writing-intensive course may be taken as an independent study course with one of the Archaeology professors. This latter option requires permission of both the department and the instructor. When the course is integrated with another 300- or 400-level course, credit is limited to 1 unit. If taken as an independent study course, credit is no more than 3 units. Permission of instructor required; limited to juniors and seniors.
Credit variable, maximum 3 units. A&S: SS, WI A&S: IQ, SSC, WI EN: S FA: SSP
Art History and Archaeology

Art history provides the opportunity to explore the fine arts, architecture and visual culture, as well as the social, aesthetic and personal values that help shape it.

Students are introduced to the study of art history and archaeology through general introductory courses that focus on European, Asian and American art, as well as world archaeology. In more advanced courses, students enjoy studying original works of art owned by the Washington University Mildred Lane Kemper Art Museum, the Saint Louis Art Museum, the Pulitzer Foundation and local private collectors. Students also are invited on annual field trips organized by the faculty to visit cities with major museum collections.

A variety of career paths are available to majors in art history and archaeology. Many graduates earn advanced degrees in both related and unrelated fields and work in museums or academia or for art publishers, commercial art galleries, auction houses, nonprofit organizations and other arts-related organizations.

**The Major in Art History and Archaeology**

**Total units required:** 30 (33 for those students undertaking Senior Honors)

**Required courses:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Art-Arch 111</td>
<td>Introduction to Asian Art (spring)</td>
<td>3</td>
</tr>
<tr>
<td>Art-Arch 113</td>
<td>History of Western Art, Architecture and Design (fall)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total units** 6

* A score of 4 or 5 on the AP Art History exam may be substituted for Art-Arch 113. To substitute a 4 or 5 on the AP Art History exam, a student must earn at least a B in a related upper-division departmental course.

**Elective credits:**

24 upper-level (300-level or above) art history credits. (Students may substitute one 200-level course for one upper division course). One course at the 300-level or above is required in three of the five distribution areas: Ancient/Medieval, Renaissance/Baroque, European and American Modern, non-Western, and Architecture. Students undertaking honors complete 3 additional credits of independent study in the second semester of their senior year. All courses for the major must be taken for a letter grade.

Majors are encouraged to acquire a good reading knowledge of French, Italian or German. For a concentration in ancient Mediterranean art and archaeology or Medieval art, Greek, Latin or both will be useful. Similarly, Chinese, Japanese, Hindi or Arabic, for example, will be useful for a concentration in non-Western art. Majors also are encouraged to take studio courses in art and/or architecture in the Sam Fox School of Design & Visual Arts.

**Prerequisites:** Students should have the proper prerequisites before enrolling in 300- or 400-level courses. Courses in other departments (including courses in the Sam Fox School of Design & Visual Arts) do not count for the major unless they are cross-listed as Art History and Archaeology courses.

**Additional Information**

**Internships:** Internships in the curatorial and education departments of local museums, arts organizations or commercial galleries are available to undergraduate art history and archaeology majors. Students may enroll in up to 6 credit hours of a voluntary internship, or secure a paid internship for no credit. Such internships provide invaluable experience and may help lead to employment opportunities after graduation. Internship credit may not be applied to the major but does count toward graduation.

**Study Abroad:** Students are encouraged to participate in a variety of international programs available in a number of overseas locations. Although students are strongly encouraged to acquire and use foreign languages, programs based in English also are available in most countries. Students may work with the department’s Study Abroad adviser to find the program that best meets the student’s particular interests and needs.

**Senior Honors:** Exceptional students who hold a 3.65 grade point average or better in advanced courses (300-level or higher) and an overall GPA of 3.65 may apply to work toward honors in the department. Honors are awarded to students for maintaining their GPA during their senior year and writing an honors thesis (enrolling in Art-Arch 4900 in fall and Art-Arch 499 in spring semester of the senior year), which is defended before at least two full-time faculty members, who are both usually from the department. Students completing the thesis accrue 33 (rather than the usual 30) course credits in the major.

**The Minor in Art History and Archaeology**

**Units required:** 18

**Required courses:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Art-Arch 111</td>
<td>Introduction to Asian Art (spring)</td>
<td>3</td>
</tr>
<tr>
<td>Art-Arch 113</td>
<td>History of Western Art, Architecture and Design (fall)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total units** 6

* A score of 4 or 5 on the AP Art History exam may be substituted for Art-Arch 113. To substitute a 4 or 5 on the AP Art History exam, a student must earn at least a B in a related upper-division departmental course.

**Elective courses:**

Four courses at the 300-level or above must be from at least two of the following areas:

1. Ancient Mediterranean and Medieval Art and Archaeology
2. European Renaissance and Baroque Art
3. Modern American and European Art
4. Non-Western Art and Archaeology (such as Asian, Islamic, Oceanic or African)
5. Architecture

Each of these upper-level courses must be taken for a letter grade.

Additional Information

Courses at the 200-level and courses in the colleges of Architecture or Art do not count for the minor. Students should have the proper prerequisites before enrolling in 300- or 400-level courses. Courses in other departments (including courses in the Sam Fox School of Design & Visual Arts) do not count for the minor unless they are cross-listed as Art History and Architecture courses at the 300-level or above. At least two of the 300-level courses must be completed in residence at Washington University. Space in 400-level seminars is limited, and majors will be given priority over minors, even from wait lists. Internship credit may not be applied to the minor but does count toward graduation. To declare a minor, students must have completed at least four of the six required courses.

L01 Art-Arch 106 Freshman Seminar: Van Gogh and the Avant-Garde
This freshman seminar focuses on the art and career of Vincent Van Gogh, and his relationship to artists of the 1880s in France. We explore his art in connection to the movements of Impressionism, Japonism and Symbolism. We examine the avant-garde world of Paris, and Van Gogh’s relationship to such figures as Gauguin, Bernard and Toulouse-Lautrec. The larger current of fin-de-siècle nostalgia for the countryside informs our study of his work in the south of France. Van Gogh’s life and the critical reception of his art offer an excellent opportunity to study how the legends of modern art are formed. Visits to the St. Louis Art Museum complement our study. Readings include the critical reception of his art; visits to the St. Louis Art Museum; Contemporary Art Museum, the Pulitzer Foundation for the Arts and the Museum of Contemporary Religious Art). Works in both new and traditional media are discussed (ranging from photography and sculpture to installation, performance, film and mixed media). Readings include artists’ statements, theoretical texts, art criticism and art historical essays. Students with little or no background in art history are encouraged to register. Class meetings are smaller, bi-weekly discussion sections. No prerequisite.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 107 Freshman Seminar: Public Art/Art and Its Publics in St. Louis
The course considers the history and functions of public art, with special attention to public art in St. Louis. Part of our investigation is to inquire into the conditions that seem to be necessary for visual art to be considered public. So we consider not only the obvious forms of public art in urban sculpture and murals, but also less traditional intersections of art and public in such sites as video and the internet. We also examine the operations of institutions — national and local arts agencies, international exhibitions, nonprofit centers and the like — that foster a public engagement with contemporary art. After studying aspects of the history of public art, we proceed to selected case studies today, many of them in St. Louis, including projects for Arts in Transit (the MetroLink), the Regional Arts Commission, Grand Center and Missouri SOS (Save Outdoor Sculpture). This leads us, finally, to theorize the function of public art in a variety of contemporary forms. Local field trips to study important public art; visiting speakers from arts agencies; student projects proposing a work of public art in St. Louis, which acquaint students with procedures in arts administration.
Credit 3 units. A&S: TH BU: HUM FA: AH

L01 Art-Arch 1075 Freshman Seminar: What’s New? Contemporary Art in St. Louis and Beyond
Freshman seminar. This course introduces a broad range of practices within the field of contemporary art (art of the past two to three decades), paying particular attention to museum collections and exhibitions in St. Louis (Kemper Art Museum, Saint Louis Art Museum, Contemporary Art Museum, the Pulitzer Foundation for the Arts and the Museum of Contemporary Religious Art). Works in both new and traditional media are discussed (ranging from photography and sculpture to installation, performance, film and mixed media). Readings include artists’ statements, theoretical texts, art criticism and art historical essays. Students with little or no background in art history are encouraged to register. Class meetings are complemented by local field trips and some visits to artists' studios. No prerequisite.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 111 Introduction to Asian Art
Selected topics in the arts of South and East Asia from earliest times to the present day. Emphasis on the cultural setting and roles of the arts in Asian societies. Attention to cross-cultural comparisons and to media and technique. Classroom lectures; smaller, bi-weekly discussion sections. No prerequisite.
Credit 3 units. A&S: LA, CD A&S: IQ, HUM, LCD BU: HUM, IS EN: H FA: AH

L01 Art-Arch 113 History of Western Art, Architecture and Design
A history of the visual arts, including architecture, sculpture, painting and design, from the ancient world to the present with emphasis on the relationship of art to society and to political and cultural events.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 1135 Freshman Seminar: The World of Cleopatra
Same as Classics 1135
Credit 3 units.
L01 Art-Arch 116 Pompeii: Uncovering the Past
This course examines the Roman city of Pompeii from archaeological, art historical and literary perspectives. Topics include the city’s public spaces and religious sanctuaries, its grand mansions and common houses, its political systems and leisure activities. Class discussions probe the problems inherent in the interpretation of a city captured in a moment of crisis, and how ancient literary tropes have affected our understanding of the archaeological remains. Students also investigate modern interpretations of the site in the form of novels, exhibitions and documentaries. Freshmen and sophomores only. No prerequisites.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 120 Majors’ Colloquium
This one-credit course provides students the chance to explore opportunities available to majors in the history of art and archaeology both during their time at Washington University and post-graduation. It was developed in response to the suggestion of past graduating seniors, who requested more formal guidance in professional development. Topics discussed include, among others: securing internship and fieldwork experience; preparing for an honors thesis; applying to graduate school in art history and archaeology; preparing for careers in museum, gallery and academic fields; and transferring the undergraduate degree to graduate programs in business, law and medicine. Guest speakers from the university and from the St. Louis community attend various sessions to provide current professional perspective on relevant topics. Prerequisite: a declared major in the Art History and Archaeology. Other students with a strong interest in Art History and Archaeology are admitted at the discretion of the instructor.
Credit 1 unit. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 131 Art and War at the Dawn of Civilization
War is evil and has caused great harm to society. Contrary to commonly held belief, war — as opposed to strife — is neither a natural state of mankind nor has it always been a necessary evil. This course explores the origins, development and impact of warfare by examining works of art. Warfare emerged during the Bronze Age and was documented not in historical treatises but in various works of art and architecture that need art historical interpretation. In this class, we analyze normal strife as documented in pre-dynastic Egypt and the more normal state of affairs in pre-dynastic Mesopotamia where there was no war whatsoever but the society was instead completely matriarchal. We then witness how the discovery of metallurgy ca. 3000 BCE quickly brought about warfare in Mesopotamia and follow the extraordinary developments of warfare in the ancient world that gradually made it the necessary evil we know today. No prerequisites.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 145 Freshman Seminar: Creating the Universe: Ritual and Science in Buddhist Art
Art in Buddhist cultures is frequently created to express well-known ideologies and fill specific, prescribed ritual and religious functions. This class examines the “science” behind the creation of such artworks as a kind of ritual “technology,” which both determines their forms and makes them effective tools for the spread and practice of Buddhism. The course focuses on a few major conceptual areas behind Buddhist art and ritual, especially topics of cosmology and biology, including the Buddhist model of the cosmos, the cycles of life and death of various types of beings, and the construction of sacred space. By the end of the course, students develop an ability not just to see, but to interpret artworks in a specific cultural context, thereby gaining tools to understand a variety of other cultures and their artistic forms. The course involves works of art from the past 2000 years of history in regions of South Asia including northern India, Nepal and Tibet.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H FA: AH

L01 Art-Arch 146 Freshman Seminar: Beijing and the Forbidden City
The Forbidden City has been the heart of Beijing for nearly six hundred years, and continues to influence both China and its capital today. Through art, architecture and urban design, this seminar examines the intertwined relationship of the palace and its surrounding city: their origins and constructions, the coded symbolisms of their plans, their most influential characters, their modern identities as the backdrops to major political events, and their roles in contemporary art and the Olympics. This discussion-based seminar also aims to help students develop their skills in writing and critical analysis as a foundation for future classes. No previous experience with art history or Asian studies required.
Credit 3 units.

L01 Art-Arch 190B Introduction to Archaeology
Archaeology plays a critical and unique role in understanding the human past. Through study of the methods and theories of archaeology, and a survey of important firsts in the human past, this course introduces students to the way archaeologists use material culture to reconstruct and understand human behavior. Chronologically ordered case studies from around the globe are used to look at social, ecological and cultural issues facing humans from the earliest times to the present. Students gain practice reconstructing the past through hands-on participation in two one-hour labs focusing on lithics and animal bones. By the end of the course, students are expected to be able to think critically about how the past is presented, and why, and the importance of the past as it relates to the present and future.
Same as Anthro 190B
Credit 3 units. A&S SS A&S: IQ, SSC AR: SSP BU: BA EN: S FA: AH
L01 Art-Arch 200C World Archaeology
If we carefully peer beneath the earth’s surface, we discover a hidden world that is being rediscovered by archaeologists. A considerable amount of excitement is generated by the discovery of lost civilizations and societies. Archaeologists from every corner of the earth come to Washington University to share their experiences as they use the most sophisticated technology to rediscover those forgotten and sometimes embarrassing aspects of our human past.
Credit 3 units. A&S: LA, CD A&S: IQ, HUM, LCD BU: IS FA: AH

L01 Art-Arch 215 Introduction to Modern Art, Architecture and Design
An introduction to major developments in modern art, architecture and design in Europe, the Americas and across the globe from the mid-19th century to the present. Focus is on the history and theories of modernism and its international legacies, and the relationship of the visual arts, architecture and visual culture more generally to the social, cultural and political contexts of the modern era. While the precise topics covered may vary from one instructor to another, foundational movements and trends discussed typically include Beaux-Arts style, the Arts and Crafts Movement, Impressionism, Symbolism, Art Nouveau, Cubism, Dada, Surrealism, Purism, Art Deco, the Bauhaus, the International Style, Abstract Expressionism, Pop Art, Minimalism and Postmodernism. Cross-currents in various media are emphasized as we seek to understand the origins and complexity of modern visual forms in relation to political and cultural history and to critical theory. Students engage a wide range of readings in historical sources, theories composed by artists, architects and designers, critical responses to the arts, and secondary critical literature.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: IS FA: AH

L01 Art-Arch 225 Matisse and Picasso
These artists are considered individually, and in relation to such artistic movements as Cubism, Fauvism and Surrealism. Examines work in all media (painting, sculpture, decorative arts, theater and printmaking). Explores response to the political environment of modern France, including the two World Wars. Weekly class meetings, plus several required visits to the exhibit and to special lectures at the Saint Louis Art Museum. Class limited to 10. Prerequisite: Art-Arch 112 or 211, or permission of instructor.
Credit 3 units. A&S: TH BU: HUM FA: AH

L01 Art-Arch 232 Myths and Monuments of Antiquity
An introduction to the ancient world (ca. 3500 BC to 400 AD) based on masterpieces of art and architecture from Mesopotamia, Egypt, Greece and the Roman Empire. The monuments are accompanied by a selection of myths and documents representing the cultural life of these ancient societies and constituting their legacy to our modern world.
Credit 3 units. A&S: LA, CD A&S: IQ, HUM, LCD BU: IS FA: AH

L01 Art-Arch 299 Internship in the Art Community
Prerequisite: a major or minor in Art History; permission of the undergraduate adviser requested in advance; and a letter from the sponsoring institution stating the nature of the internship.
Credit variable, maximum 3 units. FA: AH

L01 Art-Arch 3001 Writing-Intensive in Art History and Archaeology
Selected topics in Art History and Archaeology. Writing-intensive course; topics vary. See current semester listings. Prerequisite: permission of the instructor.
Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI BU: HUM EN: H FA: AH

L01 Art-Arch 307 Northern Renaissance Art
A survey of the major artistic developments in Northern Europe, ca. 1400–1575. The course looks at the production of painting, sculpture, printmaking, drawing, manuscript illumination and architecture in social, political and religious contexts. The major artists covered include Jan van Eyck, Rogier van der Weyden, Albrecht Durer, Hans Holbein, Hieronymus Bosch and Pieter Bruegel the Elder.
Credit 3 units. A&S: TH BU: HUM FA: AH

L01 Art-Arch 307 Northern Renaissance Art
A survey of the major artistic developments in Northern Europe, ca. 1400–1575. The course looks at the production of painting, sculpture, printmaking, drawing, manuscript illumination and architecture in social, political and religious contexts. The major artists covered include Jan van Eyck, Rogier van der Weyden, Albrecht Durer, Hans Holbein, Hieronymus Bosch and Pieter Bruegel the Elder.
Credit 3 units. A&S: TH BU: HUM FA: AH

L01 Art-Arch 311C Ancient Civilizations of the New World
An examination of the Inca empire in Peru, and the Maya and Aztec empires in Mexico, through the inquiry into the roots, development, form, and evolutionary history of pre-Colombian civilization in each region from its earliest times to the rise of the classic kingdoms. Examples of respective artistic accomplishments are presented and discussed.
Same as Anthro 310C
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: AH

L01 Art-Arch 313 Art Restoration: Issues and Techniques
Focuses on the history, concepts and methods of art restoration and conservation. Focuses on construction techniques and the applied science of modern restoration. Emphasis on the importance of photographic documentation and restoration reports. Discussion of ethics. Includes visits to museums and restoration workshops. Final paper related to piece of art chosen during a museum or workshop visit, using acquired knowledge and insight. This course is part of the Art History Program in Florence and is taken in Florence, Italy.
L01 Art-Arch 3161 Special Topics in Printmaking: History and Practice of Printmaking
This course focuses on the history and creation of prints. We examine the specificities of the medium, historically and in the present, that contribute to its particular meaning, and that render it distinct from other forms of visual culture. Ideas of expression, interpretation and ideological investment are seen on the continuum that ranges from the highly personal relationship of a print to its maker, to the commodification of the print within popular culture. Weekly lectures on the history of prints complement the studio sessions, as do field trips to studios of St. Louis artists, and visits to local museums. We look at prints in their historical role as reproductions in a pre-photographic age, as representations of shared religious and social values, and as vehicles of social or political critique. Artists discussed include, among others, Durer, Rembrandt, Daumier, Degas, Gauguin, Kirchner, Kollwitz, Warhol, Spero, Rauschenberg, Gonzales-Torres and Kiki Smith. All students make prints, and all write critical and historical analyses. Prerequisite: Art-Arch 112 or Art-Arch 113.
Credit 3 units. A&S: TH BUM: HUM FA: AH

L01 Art-Arch 3211 Art in the Egypt of the Pharaohs
A penetrating study of the artistic achievements in ancient Egypt during the Old, Middle and New Kingdom (ca. 3000–1100 BC) The great monuments of Egypt are considered both for their aesthetic importance and as expressions of the superior culture developing, flourishing and declining in the pristine valley of the Nile. Prerequisite: sophomore standing or permission of the department.
Credit 3 units. A&S: CD A&S: IQ, HUM LCD BU: HUM FA: AH

L01 Art-Arch 3301 Homeric Archaeology
The art and culture of prehistoric Greece as reflected in The Iliad and The Odyssey of Homer. The course examines, analyzes and researches the Minoan/Mycenaean civilization and its legacy that resulted in the renaissance of the 8th century BC. Topics range from the 20th to the 8th centuries BC and focus on major sites such as Knossos, Phaistos and Mycenae, burial customs, trade, warfare, and the emergence of the Greek city-state. No prerequisite.
Credit 3 units. A&S: CD A&S: IQ, HUM LCD BU: IS FA: AH

L01 Art-Arch 3311 Greek Art and Archaeology
A survey of the artistic achievements and material culture of the Greeks in the first millenium BCE (Iron Age through the Hellenistic period). Development of architecture, sculpture, and painting, as well as minor arts and utilitarian objects, with emphasis on the insights they offer into Greek society and interactions with the wider Mediterranean world.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L01 Art-Arch 334 Roman Art and Archaeology
The art and archaeology of the Romans, with emphasis on the late Republic and the Imperial period. Major monuments of sculpture and architecture, as well as town planning, domestic architecture and the minor arts are used as evidence for reconstructing ancient life.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L01 Art-Arch 3355 From Parthenon to Pantheon: The Architecture of Ancient Greece and Rome
Classical architecture, defined as the architecture of the cultures of ancient Greece and Rome, forms a major part of the foundation of Western architecture. Consistently updated, responded to, rejected, revived, dismissed and revived again, classical architecture has been a touchstone for architects for more than two and a half millennia. This course examines the invention of classical forms in Greece and their subsequent development and spread throughout the Mediterranean region by the cultures of Greece and Rome. We study form, function, style and construction techniques, and we see how these characteristics interact and influence one another over the course of time. We see how different cities and cultures appropriated and interpreted canonical forms to create distinct regional styles. In the Roman period, we see how emperors used architecture as a form of communication and propaganda to interact with their subjects. At the end of the class, we briefly chart the course of classical architecture in later periods, to see how it has been accepted and rejected at different times. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215, or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 336 Ancient Sanctuaries: The Archaeology of Sacred Space in the Ancient Mediterranean
Like the Vatican today, ancient sanctuaries were both the focus of religious activities and repositories for artistic treasures. Marked off from the secular world by physical boundaries, the sanctuary provided a common ground where gods and humans came together through sacrifice, shared meals and other rituals. Shrines were often spectacularly sited and adorned with splendid architecture with both temples for the divinities and treasuries for the gifts they received. The course focuses on the great shrines of ancient Greece: Eleusis, the setting of the mysteries of Demeter; Olympia, home of the Olympic games.
Credit 3 units. A&S: TH, CD BU: HUM FA: AH

L01 Art-Arch 3415 Early Chinese Art: From Human Sacrifice to the Silk Road
This course examines Chinese art and material culture from the prehistoric period through the end of the medieval Tang dynasty, when the Chinese capital boasted a cosmopolitan population of more than 1 million people. Topics covered include Neolithic...
ceramics and jades, the bronzecasting tradition, funerary art and architecture, the Terracotta Army, the origins of Chinese brush arts, Buddhist painting and sculpture, and the varied exotica of the Silk Road. Each class teaches recent works together with the ancient to demonstrate how the origins of Chinese art and architecture continue to influence contemporary works. Prerequisite: Art-Arch 111 Introduction to Asian Art or permission of instructor. Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H FA: AH

**L01 Art-Arch 3422 Art of the Islamic World**
This course surveys the art and architecture of societies where Muslims were dominant or where they formed significant minorities from the 7th through the 20th centuries. It examines the form and function of architecture and works of art as well as the social, historical and cultural contexts, patterns of use, and evolving meanings attributed to art by the users. The course follows a chronological order, by which selected visual materials are treated along chosen themes. Themes include the creation of a distinctive visual culture in the emerging Islamic polity; the development of urban institutions; key architectural types such as the mosque, madrasa, caravanserai, palace and mausoleum; art objects and the arts of the illustrated book; cultural interconnections along trade and pilgrimage routes; Westernization and modernization in architecture. Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H FA: AH

**L01 Art-Arch 3425 Classical to Contemporary Chinese Art**
Surveying Chinese art and architecture from the 10th century through today, this course examines classical and imperial works as the foundation for modern and contemporary art. Engaging with the theoretical issues in art history, we also pay particular attention to questions of gender, social identity, cultural politics and government control of art. No prerequisites. Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H FA: AH

**L01 Art-Arch 3426 20th-century Chinese Art**
This course explores the ways in which Chinese artists of the 20th century have defined modernity and tradition against the complex background of China’s history. Through examining art works in different media along with other documentary materials, we engage with the theoretical issues in art history, such as modernity, cultural politics, and government control of art. Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H

**L01 Art-Arch 3442 Tradition and Innovation: Chinese Painting from the 4th to 20th Centuries**
This course examines the representative works by Chinese painting masters from the 4th to 20th centuries, with special emphasis on landscape paintings by scholar painters. We explore the innovations the masters created with the visual traditions from previous artists, to represent the development of Chinese painting in the history of 1,800 years. The course also traces the influence of Western masters on the different genres of modern Chinese paintings from the early 20th century to contemporary period. Readings and discussions cover Chinese traditional ink painting and Chinese oil painting. The development of specific iconographies and issues of Chinese painting masters also are discussed. Prerequisites: Art-Arch 111 Introduction to Asian Art or one course in East Asian Studies recommended. Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H FA: AH

**L01 Art-Arch 3466 Visualizing Buddhism: Art, Religion and Philosophy**
One of the most powerful ways that a religion can realize its central beliefs and practices is through art and material culture. Rather than focusing on the historical development of Buddhist artwork itself, this course is organized around conceptual themes concerning the evolution of key philosophies and rituals. By the end of the course, students have a good understanding of the basic religious ideas and history of Himalayan Buddhism, much as they might gain from a standard introductory course on religion. However, students in this class will also understand the inestimable role of art and material culture in Himalayan Buddhism, as well as the ways in which artworks can express philosophical ideas, epitomize esoteric practices, aid in the transmission/propagation of religion, and in short be one of the most meaningful ways to explore and understand another culture. The course involves works of art from the past 2000 years of history in regions of South Asia including northern India, Nepal and Tibet. Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LS EN: H

**L01 Art-Arch 3528 Introduction to Early Medieval Art and Architecture**
This course surveys the artistic achievements of the medieval era in Western Europe from the fourth to the 9th century and in the eastern Mediterranean from the fourth to the 13th century. In addition to early Christian art of the late Roman, Carolingian, Ottonian, Anglo-Saxon and Byzantine worlds, we also consider works of art and architecture from the medieval Islamic and Jewish spheres as well as arts of the Migration Period. A broad geographic and chronological span — from England to the Near East and Constantinople to Spain; from the establishment of Constantinople in the 330s to cross-cultural exchange of the Crusader era — allows for full exposure to the rich variety of objects and monuments that fall under the rubric of early medieval art. Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H FA: AH

**L01 Art-Arch 353 History of Ancient Architecture**
A survey of architectural history in ancient Greece and Italy. Selected groups of monuments illustrate the development of religious and secular buildings during the Minoan-Mycenaean,
classical, Hellenistic and Roman periods. Prerequisite: Art-Arch 112 or 113, or permission of the department.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L01 Art-Arch 3545 The Art and Architecture of Ancient Mesoamerica: Objects of Ritual, Places of Power
This course examines the artistic and architectural achievements of the civilizations of ancient Mesoamerica, a cultural region covering most of modern-day Mexico, Guatemala, Belize and Honduras. From the emergence of complex societies in the second millennium BC through the rise of the spectacular cities of the Maya and ending with the violent fall of the Aztec Empire in the 16th century AD, rulers of ancient Mesoamerica relied on a consistent set of themes, images and media to proclaim their religious and political authority. This class explores how artists, farmers, priests, elites, kings and other community members created a vast array of images and objects that expressed cultural ideals, political and religious narratives, and distinct ethnic and civic identities. Prerequisites: Art-Arch 112, ARCH 200, Anthro 335 or permission of the instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 3591 Rembrandt van Rijn: A Lesson in Connoisseurship
The focus of the course is on modes of studying and understanding the work of Rembrandt van Rijn, one of the dominant artists of the Netherlands in the 17th century. Students are introduced to the history, culture and art of the Netherlands in the 17th century and to the work of Rembrandt as well as the analytical methods art historians have used to explain his work. Class sessions include the study of original Rembrandt etchings in the collections of the Saint Louis Art Museum, The Mildred Lane Kemper Art Museum and a private collection.
Credit 1 unit. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 360 Renaissance Architecture
The modern concept of the architect as creator and genius began with Filippo Brunelleschi, the great innovator of 15th-century Florentine art. The course explores the spread of architecture and architectural theory as it begins in the hands of the innovator and is expressed and changed by other men of genius such as Leon Battista Alberti, Donato Bramante, Michelangelo Buonarroti and Andrea Palladio.
Credit 3 units. A&S: TH BU: HUM FA: AH

L01 Art-Arch 361 Art of Early Italian Renaissance
A survey of Italian Renaissance art from its origins to the end of the 15th century, examining artists such as Giotto, Masaccio, Donatello, Botticelli and Leonardo da Vinci. Prerequisite: Art-Arch 112 or 113.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L01 Art-Arch 362 High Renaissance Art
A general survey focusing on such outstanding figures of the period as Leonardo da Vinci, Michelangelo and Raphael. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215, or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L01 Art-Arch 3620 Mannerism in Italy
This course surveys the various embodiments of Mannerism, “maniera,” or what has been called the “stylistic style,” in Italian art following in the wake of the High Renaissance. The nature of this self-conscious response to the achievements of the Raphael, Michelangelo and the revival of the antique has resisted easy classification both in contemporary writings and modern scholarship. The works of the “maniera” have been framed both in terms of decadence and refinement. The period was also a time of great social and religious upheaval, leading some to define Mannerism as a style of crisis. On the other hand, the deliberate elegance and grace that characterizes so many works responded to the tastes of court society. The course addresses the conflicting definitions of Mannerism by analyzing the works of art themselves and placing them in their social and cultural contexts.
Credit 3 units. A&S: TH BU: HUM FA: AH

L01 Art-Arch 3632 Renaissance Bodies: Art, Magic, Science
Against the notion of ideal classical form commonly associated with Early Modern art, this course pursues the complex and often contradictory conception of Renaissance bodies at the intersection of aesthetic ideal, empirical study and superstition. Topics include anatomical illustration, pornographic prints, bodily metaphors for the artist, and the corporeal representation of sin, holiness and savagery. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215, or permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 3635 Baroque Art
A survey of the development of painting and sculpture in 17th-century Europe. Emphasis on the works of Caravaggio, Bernini, Poussin, Rubens, Rembrandt and Velazquez. Prerequisite: Art-Arch 112 or permission of the department.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L01 Art-Arch 3653 Physicality, Spirituality and Emotion: Mastering the Messages of Baroque Art
Baroque Art, that is artwork made in Europe between 1580 and 1700, encompasses some of the most moving images ever created, made by artists who were consciously and unconsciously expanding the expressive repertoire available for visual communication. This course examines how artists approached artistic production, ranging from multi-room extravaganzas commissioned by ecclesiastical dignitaries to personal portraits and genre scenes intended for intimate
contemplation within a domestic environment. The achievements of personalities such as Michelangelo Merisi da Caravaggio, Gentileschi, Guercino, Rubens, Rembrandt, and Velazquez are discussed and analyzed, together with the accomplishments of lesser-known painters whose contributions are not always acknowledged. Visits to the Saint Louis Art Museum enable students to experience paintings firsthand in order to understand how pictures work. Classroom and museum sessions explore how 17th-century artists combined technical innovation with iconographical invention as they responded to their patrons' wishes and to the social and political contexts in which they worked. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215, or permission of instructor.
Credit 3 units.

L01 Art-Arch 3671 Michelangelo: Painter, Sculptor, Architect
An examination of his life, his work and his time. A consideration of the artist's painting, sculpture and architecture in relation to his contemporaries and to the broad historical, political and artistic currents of his day. Prerequisite: Art-Arch 112.
Credit 3 units. A&S: TH BU: HUM FA: AH

L01 Art-Arch 3681 Rembrandt’s Amsterdam: Piety, Profit, Prostitution
Drugs and prostitution may be its catchwords today, but in the 17th century Amsterdam was the most powerful and culturally thriving city in Europe. Rembrandt van Rijn — Amsterdam's most famous citizen — embodies in his art and biography the fascinating contradictions of a city caught between Calvinist morals and licentiousness, lucrative global trade and fears of worldly vanity. This course surveys the history of Amsterdam and the Dutch Golden Age through the lens of Rembrandt's works as well as the those of Johannes Vermeer, Frans Hals and other contemporaries.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L01 Art-Arch 370 The American West: The Image In History
Examines representations of the American West and of the frontier encounter between Euro-American and Native American cultures, from the early 19th to the early 20th centuries. We consider travel accounts, fiction painting, ledger drawings, photography and film in order to analyze the ways in which historical circumstances have shaped artistic and literary representations. At the same time, we look at how images and texts have shaped formative myths about the West that in turn leave their impact on history.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: AH

L01 Art-Arch 3712 Art and Culture in America's Gilded Age
Developments in American culture from the end of the Civil War to the turn of the century: novels, buildings, images, public and private spaces of this transitional period — a time of new class formation, of unparalleled social diversity, and of new urban forms. The connections between art, literature and social experience. Representative figures include Henry James, Henry Adams, Louis Sullivan, Stanford White, Thomas Eakins, Louis Tiffany.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: BA FA: AH

L01 Art-Arch 372 American Art to 1980
From the beginnings of modernism in the visual arts of the United States, around 1900, to Abstract Expressionism and the Beat aesthetic. Focus on the cultural reception and spread of modernism, native currents of modernist expression, from organicism to machine imagery, the mural movement and the art of the WPA, the creation of a usable past, abstraction and figuration, regionalism and internationalism, photography and advertising.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L01 Art-Arch 3761 Michelangelo: Painter, Sculptor, Architect
An examination of his life, his work and his time. A consideration of the artist's painting, sculpture and architecture in relation to his contemporaries and to the broad historical, political and artistic currents of his day. Prerequisite: Art-Arch 112.
Credit 3 units. A&S: TH BU: HUM FA: AH

L01 Art-Arch 3762 American Modernisms, 1900–1940
American modernism: what is it? What is the nature of its encounter with mass culture? What happened to modernism as it migrated from its “high” European origins to its “middlebrow” version in America between the turn of the century and the eve of World War II? What was the rhetoric of modernism in everyday life — its impact on design, photography, advertising? In addition to the fine arts, we look at popular media, film and photography. Lecture/discussion. Prerequisite: Art-Arch 211 Introduction to Modern Art or permission of the instructor.
Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI BU: ETH FA: AH

L01 Art-Arch 3762 American Modernisms, 1900–1940
American modernism: what is it? What is the nature of its encounter with mass culture? What happened to modernism as it migrated from its “high” European origins to its “middlebrow” version in America between the turn of the century and the eve of World War II? What was the rhetoric of modernism in everyday life — its impact on design, photography, advertising? In addition to the fine arts, we look at popular media, film and photography. Lecture/discussion. Credit 3 units. A&S: TH FA: AH

L01 Art-Arch 3782 Modern Art 1905–1960
This course investigates topics in European painting, sculpture, architecture, photography and film. Lectures and readings address major artistic developments, including Cubism, De Stijl, Futurism, Expressionism, Dadaism, Constructivism, Surrealism, the Bauhaus and Art Brut. Prerequisite: Art-Arch 211 Introduction to Modern Art or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH
The course surveys major tendencies in painting and sculpture from Fauvism in France and Expressionism in Germany to the beginnings of Postmodernism in photo-based work in the U.S. About two-thirds of the course treats European art, about one-third treats American art. Photography, architecture and work in other forms are considered selectively when pertinent to the individual class topics. Within the lecture topics, emphasis is on avant-garde innovation; the tension in modernist art between idealism and critique; reaction by artists to current events; relationship between art and linguistics, philosophy, literature, economics and science; the role of geopolitics in art production; intersections of art and society; the role of mass culture; issues of race and gender in the production and reception of art; the challenge to the concept of authorship and creativity posed by Postmodernism at the end of this period. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 3785 Photography in America
This course considers the practice and use of photography in America from its invention up to the present, offering various ways of thinking about the medium and its relation to society and culture. Students come to understand the ways photographic practices shape public perceptions of national identity, ethnicity and gender, nature, democratic selves, and a host of other concerns. We discuss famous practitioners such as Matthew Brady, Jacob Riis, Lewis Hine, Walker Evans and Robert Frank. We consider not only the social and public uses of the medium through such episodes as the New Deal/FSA and photojournalism, but also the private explorations of “fine art” photographers, and the everyday practices of the snapshot. Prerequisites: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art or one course in American History, American Cultural Studies or permission of the instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 3831 Art in the Age of Revolution: 1789–1848
European painting, sculpture and printmaking from the French Revolution to the mid-19th century; French, English, German and Spanish artists discussed in social and aesthetic context, with a focus on links between art and ideology in times of political turmoil. The styles of classicism and romanticism, the rise of history painting, and the development of realism in both landscape and genre painting. Prerequisite: Art-Arch 112 or permission of the instructor. Credit 3 units. A&S: TH BU: HUM FA: AH

L01 Art-Arch 3833 Realism and Impressionism
An examination of the development of European art from approximately 1848 to the mid-1880s, with a focus on the development of Realism and Impressionism in England and France. Issues explored include the breakdown of academic art, the rise of landscape and naturalist themes, the emergence of alternative exhibition spaces and new dealer systems, and the relationship between gender and avant-garde practice. Prerequisite: Art-Arch 112 or Art-Arch 211 or permission of instructor. Credit 3 units. A&S: TH BU: HUM FA: AH

L01 Art-Arch 3835 The Art Museum: History, Theory and Design
The course studies the conceptual basis of the institution of the art museum in the United States and Europe, including its history, theoretical foundations, design and cultural function. We begin with the origins of the modern museum in the 18th century and earlier; trace the development in the 19th century of the earliest national art museums in the U.S. and Europe; consider the opportunities and problems of museums of modern and contemporary art in the 20th century; address the question of appropriate architectural strategies for art museums of the past and the present; and consider a variety of developments in the art museum today. We study and visit art museums in St. Louis and take a field trip to selected art museums in Davenport and Des Moines. Prerequisite: Art-Arch 211 Introduction to Modern Art or ARCH 2284/ARCH 4284 Architectural History II or permission of instructor. Students in the College of Architecture may register for this course under the assigned College of Architecture course number. Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H FA: AH

L01 Art-Arch 3838 Modern Art in Fin-de-Siècle Europe, 1880–1907
This course examines artistic production at the turn of the century in France, Belgium, England and Scandinavia. Beginning with the re-evaluation of impressionism and naturalism in France, we examine Neo-Impressionism (Seurat and Signac) and Symbolism (Moreau, Van Gogh, Gauguin, the Nabis, Rodin,
Munch), as well as later careers of Impressionists (Cassatt, Monet, Degas, Renoir). Considers cross-national currents of Symbolism in Belgium and Scandinavia; the Aesthetic Movement in Britain; the rise of expressionist painting in French art (particularly with the Fauvism of Matisse and Derain), and the juncture of modernist primitivism and abstraction in early Cubism (Picasso). Prerequisite: Art-Arch 112 or permission of the instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L01 Art-Arch 3862 The Mediterranean and French Modernism
This course surveys the development of the Mediterranean region as an important site of modernist artistic practice. Among the artists considered are Pierre-Auguste Renoir, Henri Matisse, Pablo Picasso, Marc Chagall and Yves Klein. Excursions to museums and other artistic sites.
Credit 1 unit. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 3875 Dada and Surrealism in Europe and the United States
In this multimedia, interdisciplinary course, we consider the history, theory and practice of Dada and Surrealism, from its Symbolist and Expressionist roots at the end of the 19th and the beginning of the 20th centuries through its late expressions in Beat culture and Pop art of the 1950s and 1960s. Dada’s emergence in Zurich and New York in the midst of World War I set the tone for its stress on irrationality as an oppositional strategy. Surrealist research into the domain of the unconscious continued this extreme challenge to dominant culture, but in a revolutionary spirit that proposed new possibilities for personal and collective liberation. The international character of the movements, with substantial cross-transmission between Europe and the United States, are emphasized. Prerequisite: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 388 Contemporary Art
A survey of global contemporary art from 1970 to the present. Topics: happenings, minimalism, body art and neo-expressionism, placed in their social and political contexts. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215, or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: IS FA: AH

L01 Art-Arch 3888 Museum Theory and Practice
This course explores the history of fine art museums and related debates on the nature of collecting and modes of display. Using historical and theoretical texts as well as select case studies, we focus on how the evolving structure and mission of the museum impact our understanding of art. Topics include the Renaissance “cabinet of curiosities,” the Salon controlled by the French Academy, the rise of the modern art museum, and the proliferation of contemporary curatorial strategies in today’s global art world. In addition to the study of the history of exhibitions and the role of the museum, the course also investigates the various jobs and responsibilities that people hold within museums. Guest speakers include members of the curatorial, publications, registration, education and installation staff at the Mildred Lane Kemper Art Museum. We also take advantage of the distinct art institutions in St. Louis, exploring exhibitions and permanent collection displays at the Kemper Art Museum, Saint Louis Art Museum, the Pulitzer Foundation for the Arts, and the Contemporary Art Museum. Prerequisite: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 3892 Modern Sculpture: Canova to Koons
This course surveys sculpture in Europe and the United States from about 1800 to the present, with an emphasis on the period 1890–1980. A rapid traverse of Neoclassicism, Realism and the rage for statuary in the later 19th century take us to the work of Rodin and a more systematic exploration of developments in sculpture of the 20th century. Particular emphasis also is given to the work of Brancusi, Picasso, Matisse, Duchamp, Giacometti, Oppenheim, David Smith, Serra, Morris, Judd, Hesse and Bourgeois. An important theme running through the course as a whole, from an age of nationalism and manufacturing to our own time of networks and information, is the changing definition of sculpture itself within its social and political context. We also explore various new artistic practices — video, performance, installations and body art, for instance — and interrogate their relationship to sculptural tradition and innovation. Prerequisite: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art, or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 3972 Alterna-Art
Can contemporary art be truly alternative? What does the term even mean, when the channels for distributing art are available to all? This course presents a survey of art created outside of institutions and official channels. Students are exposed to a variety of different media, from graffiti and muralism to performance and Internet art. The course also deals with questions of agency, “authenticity,” and co-optation of street art by commercial means. Classes consist of a hybrid lecture/discussion format with weekly readings. Prerequisites: Intro to Western, Intro to Modern or permission of the instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L01 Art-Arch 3973 New Media, New Technologies
In summer of 2013, Random International’s *Rain Room* was installed at the Museum of Modern Art in New York. Lines to experience the sensation of being rained on without getting wet
wet ranged up to seven hours at times. This merging of new technology with the gallery space proved irresistible, but also raises questions as to the uses of technology in contemporary art, and whether or not this could be much more than a gimmick. As one Yelp reviewer put it, “The Rain Room is definitely an experience. Let’s be honest... I’m mostly upset that I didn’t get a cool, new Facebook profile pic out of it.” This course considers technological developments in modern and contemporary art, from photography, video and new media, digital and Internet art, as well as forays into new technology that blur the lines between art and science. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; or permission of the instructor. Credit 3 units.

L01 Art-Arch 3975 Art and Activism
This course examines political and social activism in art and visual culture, focusing on the role that visual representation has played in social movements and how artists/activists have employed visual media to challenge and resist dominant visual representations and political formations. We explore key theoretical developments in activist discourse, as well as the role of art practices and aesthetic commitments in these developments. This course seeks to represent the development of the relation of art and activism in its broadest intellectual and cultural context within the 20th century and encourage an appreciation of the complex array of disciplinary perspectives that are implicated in this development. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215, or permission of instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4000 Topics in Art History and Archaeology
Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4002 The Decorative Aesthetic in Modernism, 1860–1960
In the criticism of modern art, decoration and decorative have often been used as pejorative terms, designating art that has no intellectual basis but is merely pleasing, intended to fill space and delight the eye. But in the late 19th century, these terms carried important cultural value, and opened the door to significant experiments in abstraction. Moreover, the decoration of a public space or surface may have political implications. This course investigates decoration and theories of “the decorative” in modern art in Europe and the United States, with special attention to the evolution of ideas of modernism in both 2-dimensional and 3-dimensional environments. We also consider some of the political meanings that may be borne by both public mural painting and domestic decoration, as well as easel painting that aspires to conditions of the decorative. Key figures include Puvis de Chavannes, Morris, the Nabis, Van de Velde, Monet, Matisse, the Mexican muralists, Pollock and Shapiro. Prerequisite: Art-Arch 211 Introduction to Modern Art, or any 300-level course in art history, or permission of instructor. Credit 3 units. A&S: TH FA: AH

L01 Art-Arch 4015 Theories of Modern Art and Architecture
The course presents theories of art and architecture from the 19th to the 21st century in their historical contexts through a set of in-depth investigations of selected topics. Some knowledge of history and theory is integral to contemporary understandings of the disciplines of art, art history and architecture. To foster a historical understanding of theories of modern art and architecture, we discuss a selection of key texts, divided into three sections: theoretical sources of modern art and architectural history in the 19th century; theories of modernism, from the formalist to the Marxist; postmodern critiques of modernism, in such areas as feminist theory and poststructuralism. Class visits to Sullivan and Adler’s Wainwright Building (1890–91), Saarinen’s Arch at the Jefferson National Expansion Memorial (completed 1964), Ando’s Pulitzer Foundation for the Arts (2001), and Maki’s Kemper Museum of Art (2006) are integral to the work of the course. Prerequisite: Either Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art and any 300-level course in art history; or permission of instructors. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4224 The 1904 St. Louis World’s Fair: German and Austrian Art Exhibited
Same as IAS 4224
Credit 3 units.

L01 Art-Arch 4240 The Plundered Past
Same as Anthro 4240
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H FA: SSP

L01 Art-Arch 426 Ancient Athens
Athens was one of the great cities of antiquity. From lavishly decorated marble temples on the Acropolis, to public office buildings and inscriptions in the Agora (civic center), to the houses of the living and the monuments for the dead, the city has left a rich record of her material culture. These buildings and objects, together with an exceptionally large number of literary and historical texts, make it possible to paint a vivid picture of the ancient city. This course concentrates on the physical setting and monuments of Athens, as revealed by both archaeology and texts, and how they functioned within the context of Athenian civic and religious life. Prerequisites: Classics 345C, Classics 350 or permission of the Instructor. Same as Classics 426
L01 Art-Arch 427 Athenian Vase Painting
From the late 7th to the late 4th century BCE, Athenian artisans produced pottery of high quality that was particularly outstanding for its figured decoration. This seminar investigates the technology and history of this craft, with particular emphasis on the iconography of the figured scenes. Topics discussed include the relationship of form, decoration and function; the relationship between figured decoration and the textual sources; the role of pottery as an export; and genre scenes as a basis for investigating ancient Athenian society. Prerequisite: Art-Arch 311 Greece Art and Archaeology, ARCH 331, Classics 350 or permission of instructor.
Credit 3 units. A&S: TH: FA: AH

L01 Art-Arch 430 Topics in Northern Renaissance Art
Credit 3 units. A&S: TH: FA: AH

L01 Art-Arch 4321 Ancient Coins
The seminar is designed to research the rich world of Greek and Roman coinage by using the university’s own resource, the J.M. Wulfing collection of coins. Emphasis on coin typology, works of art or buildings illustrated on our coins, and the history of coinage. We use actual coins in the gallery. Due to the delicate nature of the material, the course is by permission of the instructor only.
Credit 3 units. A&S: TH: FA: AH

L01 Art-Arch 433 Greek Vase Painting
This seminar examines vase painting from the geometric period (ca. 800 BC) to the end of the red-figure style (ca. 350 BC), but the majority of class time is spent looking at Attic vase-painting of the 6th and 5th centuries BC. The iconography of Greek vases, particularly Attic black-figure and red-figure, provides an extraordinary view into the culture and beliefs of contemporary society. Some vases are clearly made as grave offerings, others as votive offerings at sanctuaries, and still others for use at home. The focus of this seminar is the relationship of a vase’s images to the context of its use. How much does the intended use and audience for the vase determine the images on it? These important questions have not received much attention by scholars, and class papers may possibly result in publications. Enthusiastic class participation required. Occasional responsibility for presentation of weekly readings. Class paper and presentation.
Credit 3 units. A&S: TH: FA: AH

L01 Art-Arch 435 The Parthenon
A study of the architectural design, aesthetic principles, engineering and construction of the greatest Greek building.

Its architecture is considered in conjunction with its immense sculptural program that revolutionized European art. We penetrate deeply into the background of this remarkable work of art and try to understand it by placing it in its proper context and comparing it with other similar efforts in Classical Greece. Prerequisite: junior or senior standing or permission of instructor.
Credit 3 units. A&S: TH: IQ, HUM: FA: AH

L01 Art-Arch 4375 Ancient Greek Sculpture in Context
Sculpture counts among one of the greatest artistic achievements of ancient Greece, and one that has had the greatest impact on the art of later periods. This course focuses on original works of art of the Archaic and Classical periods (600–300 BCE), placing emphasis on how study of their contexts — the places in which they were produced, displayed and found — contributes to our understanding of their place in the ancient world. Background material, which is covered at the beginning of the semester, includes the origins of monumental Greek sculpture at the beginning of the Archaic period (late 7th to early 6th century BCE), and the stylistic development of the Archaic and Classical periods. We then proceed to discussion of various types of sculpture (architectural, cult statue, votive, commemorative, funerary) and how these works functioned within the context of the Panhellenic sanctuary, the city sanctuary, the secular center of the city, and the necropolis. In a different view of context, we also consider sculpture recovered from ancient shipwrecks, looted art on its way to the ancient Roman art market. Prerequisite: Art-Arch 331 or permission of the instructor.
Credit 3 units. A&S: TH: IQ, HUM: FA: AH
L01 Art-Arch 4376 Pictorial Illusion in the Ancient Mediterranean
Among the many accomplishments in the history of Greco-Roman art, ancient writers especially valued the development of pictorial illusion. Pictorial illusion refers to the techniques of reproducing or approximating aspects of the visual perception of the material world on a two-dimensional surface. These include foreshortening, the application of highlights, and the indication of multiple points of depth in space relative to the picture plane. The purpose of the course is to explore the material, stylistic and technical history of illusionistic painting practices in the ancient Mediterranean world from Classical Greece to Late Antique Rome and to seek to understand the cultural and social significance of those practices. In addition to examining specific historical questions in the development of ancient painting, the course investigates trans-historical connections between vision, visuality and methods of representation. Prerequisites: one of Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units.

L01 Art-Arch 4393 Greek Art in Rome: Discourse, Dedication and Reflection
Throughout the modern period, Ancient Greek art has been perceived of as a genuinely original and creative tradition, in which both individual artists and regional schools made some of the most significant advances in the long development of European art. Roman art, by contrast, has been seen as derivative and secondary; Johann Joachim Wincklemann, the founder of modern art history, classified it among the “style of the imitators.” But this traditional dichotomy rests in large part on the Romans’ own reactions to their encounters with the arts of Greece. Through the analysis of textual sources, architecture, statuary and painting, this course investigates the status and influence of Greek art in the city of Rome from the third-century BCE until the late Imperial period, and seeks to understand how Roman responses to and uses of Greek art have come to shape the modern perception of both traditions. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L01 Art-Arch 4444 The Forbidden City
Home to 24 emperors of the Ming and Qing dynasties (1368–1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace, its construction in early Ming, the coded symbolism of its plan and decoration, the rituals of court, and the lives of its denizens, from emperors (including Pu Yi, the “last emperor”) to concubines, from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and the backdrop to major political events, as well as its role in the urban design and contemporary art of 21st century Beijing. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H FA: AH

L01 Art-Arch 4482 Japanese Prints: Courtesans, Actors and Travelers
Woodblock prints of the 18th and 19th centuries and their relationship to literature and popular culture. Topics include the life of the pleasure quarters, sexuality and the “erotic,” parody, kabuki theater and the representation of women. Prerequisite: 3 units in Japanese painting, or permission of instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4489 The Three Emperors: Redefining Chinese Art in the Golden Age
Ruling imperial China during its last Golden Age, the Qing emperors Kangxi, Yongzheng and Qianlong patronized the arts during an unprecedented period of prosperity and international exchange. Many of the works they commissioned are now icons of Chinese culture, but in their time these three Manchus redefined Chinese art with ideas and styles from Baroque Europe, Tibet, Mongolia and even Islamic Central Asia. This seminar focuses on the ethnically and culturally diverse art, architecture and material culture patronized by these three emperors to examine how they and their multi-ethnic empire changed the definition of Chinese art during the long 18th century. Prerequisites: Art-Arch 111 Introduction to Asian Art; or one 300-level course in Asian art history, history or literature; or permission of instructor. Credit 3 units. A&S: TH CD A&S: IQ, HUM, LCD

L01 Art-Arch 4494 East, Meet West: Cross-Cultural Aesthetics in Chinese and Japanese Art
This seminar grounded in cross-cultural aesthetics examines East Asian visual responses to European art and science from
the 16th through 19th centuries. First introduced by Jesuit missionaries, continued by merchants, and culminating with colonial enterprises, the same Western ideas and works left very different impressions on China and Japan. An introduction to cross-cultural aesthetics from both Western and East Asian perspectives lays the theoretical foundation to engage these works of art, before proceeding thematically through time to cover painting, cartography, woodblock prints, ceramics and photography within transregional and transcultural contexts. Prerequisites: at least one course in Asian art or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4615 Caricature: The Culture and Politics of Satire
This course examines the golden age of caricature. Beginning with the prints of William Hogarth, we look at the caricatural traditions in France and England from the late 18th-century through the early 20th century. Special emphasis is placed on visual satire as a vehicle for social and political critique, on theories of humor (particularly Baudelaire and Bakhtin), and the development of a mass market for this imagery. Other figures discussed include Rowlandson, Cruikshank, Daumier, Gavarni, Philipon, and Gil. We take advantage of a major collection of French caricature in the Mildred Lane Kemper Art Museum at Washington University, as well as collections available for study in Olin Library and at the St. Louis Art Museum. Prerequisites: Art-Arch 112 or Art-Arch 211, or a 300-level course in modern European history or literature, or permission of the instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4621 Leonardo da Vinci
Leonardo da Vinci is universally recognized to be one of the greatest artists of all time. But who was Leonardo? Artist or scientist? Master, magus or myth? This seminar explores the reality and fiction of a fascinating, yet enigmatic genius, as well as placing this unique individual in the contexts of Renaissance Italy and the modern imagination.
Credit 3 units. A&S: TH A&S: IQ, HUM FA: AH

L01 Art-Arch 4624 Michelangelo
An examination of the life and works of Michelangelo. The most important developments in his architecture, painting and sculpture; with special attention to his assistants, friends, family and contemporaries. Prerequisite: permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM FA: AH

L01 Art-Arch 4625 Venice
A seminar focusing on the art of Venice, in particular on Bellini, Giorgione and Titian. Special attention to the international reputations of these three artists and to problems of patronage, connoisseurship and interpretation. Prerequisite: Art-Arch 361 or 362, or permission of the instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM FA: AH
weekend before the semester starts, is granted only through an application made directly to Professor Bass. Please sign up on the wait list, and contact her if you are interested in the course. Credit 3 units. A&S: CD A&S: IQ, LCD EN: H FA: AH

L01 Art-Arch 4643 Art in Crisis: The Protestant Reformation from Durer to Michelangelo
How do artists respond when art is forbidden? Or when it is destroyed before their eyes? This course explores the visual impact of the Protestant Reformation through the history of iconoclasm, propaganda prints, censorship and the exploration of new religious iconographies in 16th-century Renaissance art. Artists to be discussed include Albrecht Dürer, Hans Baldung Grien, Lucas Cranach the Elder, Hans Holbein and Michelangelo.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L01 Art-Arch 4662 Michelangelo the Architect
When, why and how did the great Renaissance sculptor, painter and poet Michelangelo Buonarroti become an architect? This seminar surveys Michelangelo’s built and unbuilt architecture, his methods and extant drawings, and the process and influence of his creations.
Credit 3 units. A&S: TH FA: AH

L01 Art-Arch 467 Topics in Baroque Art
Credit 3 units. FA: AH

L01 Art-Arch 4678 Bosch and Bruegel
Humor, monstrosity, violence and vernacular culture pervade the oeuvres of Hieronymus Bosch and Pieter Bruegel the Elder, two of the most seminal artists of the Northern Renaissance. This course addresses the complexity of their oeuvres and the methodological problems raised in the interpretation of their enigmatic imagery, with a particular focus on the dissemination of their artistic personas in print. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4721 American Art and Culture, 1945–1960
The rise and “triumph” of Abstract Expressionism has long dominated the story of American art following World War II. This new seminar puts Abstract Expressionism into context with parallel developments in the arts, photography and film. Among the topics we consider: the conversation between émigré artists and American culture during and after the war; the emergence of a “noir” aesthetic in film and literature; the early work of Jasper Johns and Robert Rauschenberg and the so-called “aesthetic of indifference” in relation to Abstract Expressionism; artistic collaborations at Black Mountain College; New York school photography and photojournalism; and the cultural impact of the bomb. Prerequisite: a 300-level course on 20th-century art, photography or history; or permission of the instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 473 Art and Culture in Fin-de-Siècle America
The particular climate of the fin-de-siècle and its expression in art, architecture and letters. Concurrent development in Vienna, Paris and London as basis for comparison. Themes include new theories of mind and perception, the fate of rationalism, the “crisis in bourgeois values,” and redefinitions of gender. Prerequisite: permission of instructor.
Credit 3 units. A&S: TH FA: AH

L01 Art-Arch 474 Topics in American Art
Credit 3 units. A&S: TH FA: AH

L01 Art-Arch 4743 Imagining the West
The historical, visual, literary and scientific encounter of Europeans and European-Americans with the North American frontier. Examines how the West as myth and reality was assimilated into, and imaginatively colonized by, both Europe and America from the pre-discovery period through the end of the 19th-century. Images of the first encounter, cultural dynamics of the colonization process, cultural resistance of native Americans. Field trips, guest lectures. Prerequisite: 100-, 200- or 300-level courses in art history; or 300-level courses in European or American 19th-century comparative literature, history; or permission of instructors.
Credit 3 units. A&S: TH FA: AH

L01 Art-Arch 475 The City in American Arts and Popular Culture, 1910–1940
Using visual media-painting; prints and illustration; film and animation — along with studies of vaudeville, and other forms of popular and mass entertainment — this seminar analyzes the presence of the city as a theme that registers a range of cultural attitudes toward the modern. Through close readings of visual and verbal texts, we consider such issues as the relationship between work and leisure, and between high culture and popular arts. We look at critiques and celebrations as well as at how the popular arts help the ordinary man and women to negotiate the challenges of the new mechanized and overscaled urban environment. Prerequisites: 300-level course in American 20th-century cultural history, or American art or literature; or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM FA: AH

L01 Art-Arch 4770 Cosmopolitan and Native Modernisms: The U.S. and Europe between the Wars
This seminar focuses on two contrasting currents within American and European modernism between the two world wars: native and cosmopolitan. Alternating between the United...
State and France, it begins in the years before World War I and concludes with the rise of virulent forms of cultural nationalism in the late 1930s. We consider the subjects, personalities, aesthetic strategies, and political and social investments associated with these alternative modernisms, linked to a search for roots, on the one hand, and on the other, to a desire for forms of spatial and social mobility. Comparing "homegrown" and expatriate experience, we consider divergent attitudes toward identity, gender, nation, time and nature, analyzing these two fundamental responses to modernity in relation to one another. Prerequisites: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4771 Gender in 19th-Century Art
An examination of the representation of gender, i.e. the construction of male and female identities through images, and the role of gender in artistic practice. Readings and class discussion focus on American, French and English art. Prerequisite: Survey of modern art; any 300-level course in 19th-century American/European art or culture; or permission of instructor. Credit 3 units. A&S: TH, SD FA: AH

L01 Art-Arch 4776 Art and Culture in 1930s America
An interdisciplinary look at the production of culture in the United States during the Depression years between the stock market crash and the nation’s entry into World War II. Focus on the evolving dialogue between aesthetic concerns and political commitment. We consider the role of the state as an agent of commitment. We consider the role of the state as an agent of culture, the relationship between leftist politics and modernism, regionalism and internationalism, debates over the nature of documentary photography, and attitudes toward the past in New Deal art, among other topics. Prerequisite: 300-level course in 19th-century American/European art or culture; or permission of instructor. Credit 3 units. A&S: TH A&S: IQ, HUM FA: AH

L01 Art-Arch 4781 The Century of Picasso
The art of Pablo Picasso (1881-1973) spanned three-quarters of the 20th century, and posthumous critical response to his work
shows no sign of abating. Picasso was a leading figure in the European primitivist trends at the beginning of the last century, and with Georges Braque, he developed the aesthetic system of Cubism, which rewrote the rulebook of artistic representation. Although he was not an activist, his art routinely engaged momentous political events. Toward the end of his career, he strove to shape his legacy through artistic dialogues with artists of the past by appropriating their styles or subjects, and making them his own. Such eclectic activity, coupled with his creativity and prolific output, has ensured his place among the most influential artists of his century. Prerequisites: one 300-level course in modern art or permission of instructor; junior, senior or graduate standing.

Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L01 Art-Arch 4854 Gauguin in Polynesia: The Late Career
This seminar focuses on the late career of Paul Gauguin, in Tahiti and the Marquesas. This course examines closely the colonial context of fin-de-siècle French Polynesia, Gauguin’s response to indigenous culture, his ongoing interests in European currents of theosophy and anarchism, the development of his primitivist style in response to the French avant-garde, and Gauguin’s legacy to modern art and culture in the early 20th century. Readings range from primary texts (literature and journals read by the artist, his letters, his satirical articles and caricatures produced for a Tahitian newspaper, his treatises on religion), to postcolonial theory and recent critiques of primitivism. French reading skills are useful, but not required for the course. We visit the Saint Louis Art Museum to view both the Oceanic collection, and prints and paintings by Gauguin.

Prerequisite: at least one upper-level course in modern art history, or permission of the instructor.

Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4856 French Art and Politics in the Belle Epoque
This interdisciplinary seminar addresses the rich intersection of politics, fine arts and visual culture in modern France from the Franco-Prussian War to World War I (1870–1914). We study the political trends, historical events and cultural conditions of the era and their direct influence on the production and reception of a wide range of visual arts, ranging from official paintings and monuments to popular culture such as tourist and documentary photography, commercial posters and political caricature. We also examine the question of what it meant in the Belle Epoque to be an avant-garde artist and how such artists expressed political sentiment in their work. Prerequisite: permission of instructor.

Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4859 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000
This seminar examines film and modern art within the framework of “Orientalism.” Reading foundational texts by Said, and incorporating theory and historical discourse concerned with race, nationalism and colonialism, we explore artistic practice in European photography, painting and decorative arts from 1850 to recent times, and European and Hollywood film. We study how power and desire have been inscribed in western visual culture across the bodies of nations and peoples through conventions such as the harem, the odalisque, the desert, and the mysteries of ancient Egypt. To that end, we look at artists such as Delacroix, Ingres, Gérôme, Beardsley, and Matisse and screen films such as The Sheik, The Mummy, Salome, Cleopatra, Pepe le Moko, Naked Lunch, Shanghai Gesture, Thief of Bagdad, Princess Tam Tam and The Sheltering Sky. Subjects include the representation of gender, sexuality, desire, race and identity as well as the cultural impact of stereotype and “exotic” spectacle. Students study methods of visual analysis in film studies and art history. All students must attend film screenings.

Same as Film 485

Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD EN: H

L01 Art-Arch 4861 Paul Gauguin in Context
An examination of the art and career of Paul Gauguin (1848–1903) and the artistic, social and political milieu in which he worked in France and Polynesia. Readings include the artist’s writings; studies of avant-garde culture and primitivism in fin-de-siècle France; and postcolonial theory. Special emphasis is given to the relationship of the artist and his work to indigenous Polynesian and French colonial cultures of the 1890s. Prerequisite: Art-Arch 211 or any 300-level course in art history, or permission of instructor. Reading knowledge of French useful, but not required.

Credit 3 units. A&S: TH A&S: IQ, HUM FA: AH

L01 Art-Arch 4863 The Photographic Muse: The Modern Artist and the Camera
An examination of the interplay of photography with painting and sculpture in European art from 1850 to World War I, with an emphasis on the fin-de-siècle. Readings address the history of the medium; the critical debates (starting with Baudelaire) over photography as a tool of science or of art; the rise of ethnographic photography; the Symbolist ambivalence toward technology; and the development of Pictorialism at the turn of the century. Artists studied include Nadar, Moreau, Degas, Rodin, Steichen, Gauguin, Munch, the Nabis, Brancusi and Picasso.

Prerequisite: graduate standing.

Credit 3 units. A&S: TH FA: AH
L01 Art-Arch 4864 Exoticism and Primitivism in Modern Art
An interdisciplinary investigation of the development of exoticism and primitivism in European and American art from the Enlightenment to World War II. Topics include exoticist representations of non-Western cultures; the links between colonialism and orientalism; the intersection of discourses on race and gender with exoticism; and the anti-modernist impulse of fin-de-siècle primitivism. Sample artists and authors include Delacroix, Flaubert, Gauguin, LaFarge, Picasso and Matisse. Prerequisites: any 300-level course in art history and permission of the instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4867 The Impressionist Landscape: Style, Place and Global Legacies 1870–1920
We consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism, but soon expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. We examine the place of individual perception, the physiology of sight, and theories of the natural in the development of the Impressionist landscape, through the consideration of style, genre, artistic theory and these artists’ investment in particular sites. Furthermore, the social, commercial and critical networks that supported the movement are analyzed. Particular attention is given to Monet, and a special exhibition of his water lily paintings on view at the Saint Louis Art Museum. Other key artists include Degas, Morisot, Renoir and Cassatt. We also discuss the relationship of the Impressionist landscape to the development of modernist abstraction, and the aesthetic and nationalist motivations for its appropriation across the globe. Prerequisite: Art-Arch 112 Introduction to Western Art, Art-Arch 211 Introduction to Modern Art, or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM LCD EN: H FA: AH

L01 Art-Arch 4868 Impressionism and the Nation in France and Beyond: Painting and Photography 1860-1920
We consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism, but expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. Our central question is the relationship of individual perception, the physiology of sight, and theories of the natural in relation to the importance of place — both region and nation — in the political imagination of the era. We also address the relationship of the Impressionist landscape to the development of modernist abstraction, and the aesthetic and nationalist motivations of its adaptation as a modernist style around the globe. Particular attention is focused around an exhibition “Impressionist France: Visions of Nation” at the St. Louis Art Museum. This seminar has a required travel component to see related works of art in Kansas City and on the east coast; students’ expenses are covered. Prerequisite: senior major in art history, or graduate student standing and permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L01 Art-Arch 4877 Critical Studies in Portraiture, Ancient to Contemporary
To study portraiture is to confront the complexity of human identity. The central theoretical question of this course is how identity can be expressed in a portrait. Following consideration of theories of portraiture, identity and artistic representation, we treat specific historical and cultural instances of portrait-making, from ancient Greece to the present. Non-Western cultural examples broaden the scope beyond the conventional conceptions of portraiture. We conclude by trying to understand the continuing allure of the portrait today as digital media challenge our conventional ideas of visibility, and perhaps even the urgency of portraiture in the post-human age.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4878 Cold War Cultures, United States and Europe, ca. 1945–1955
This seminar examines the art worlds that emerged in France and Germany after the end of World War II, and the ensuing dialogue with the United States, newly established as the most influential center for art and culture. We consider the social and political conditions of the post-war years, along with the aesthetic, cultural and philosophical reactions to the devastating consequences brought about by World War II. We pay particular attention to the intellectual and ideological debates that would — by 1949 — give rise to the extreme polarities between East and West, democracy and communism — in short, the confrontations that distinguish the Cold War. Artists such as Jackson Pollock and Willem de Kooning in the United States, Hans Hartung and K.O. Götz in Germany, and Jean Fautrier and Alberto Giacometti in France are examined, as well as the broader artistic movements that are known under such labels as Abstract Expressionism, Informel, Tachisme or Un art autre. Prerequisites: Art-Arch 112 Introduction to Western Art, Art-Arch 211 Introduction to Modern Art, or Art-Arch 215 Introduction to Modern Art, Architecture and Design; one 300-level course in art history preferred; or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4900 Independent Study and Research
Credit variable, maximum 3 units. FA: AH

L01 Art-Arch 4921 Theory for Art History: Modernism/Modernity/Postmodernism
This course introduces key modern theories. Considering diverse thinkers, this seminar focuses on concepts that have framed and re-framed the study and interpretation of aesthetic modernism and postmodernism over the past century. We read and discuss primary theories and probe their application through close
visual readings of individual works of art. Discussions seek a better understanding of the role and meaning of the aesthetic object within a variety of theoretical contexts, extending from an investment in the universalist modern artistic subject, to the shifting role of the contingent viewer within modernity to an expansion of the traditional boundaries of the discipline of art history into visual studies. Prerequisites: advanced undergraduate standing, permission of the Instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4922 From the Death of the Author to the Birth of YouTube: Identity in Contemporary Art
What constitutes an artist today, when anyone can upload his or her musings to the entire world? Is the question even relevant? This course introduces students to the construction of artistic identity in contemporary art. Students consider major themes governing the production of contemporary art. We cover such topics as the death of the author and the end of art, identity politics and “authenticity,” and the effects of new media on the construction of artistic persona. This course assumes a basic familiarity with the methods of art history, as well as general knowledge of art history before 1960. Prerequisites: Introduction to Western Art or Introduction to Modern Art and one 300-level course in art history, or permission of the instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L01 Art-Arch 4923 Globalization and Contemporary Art
What does globalization mean for contemporary art? And what do we even mean when we use the term? This upper-level seminar course considers recent art (1985–present) in the context of theories of development, postcolonialism and globalization. We focus on the tensions between the global and the local, as well what it means for an artist to be national or international. We also consider the impact of neoliberal economic policies on art production and the art market, as well as the role museums play in this international context. Finally, we consider the Internet and social networks as globalizing influences that affect the production and distribution of contemporary art. Prerequisites: Art-Arch 111 Introduction to Western Art or Art-Arch 112 Introduction to Modern Art and one 300-level course in art history, or permission of the instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L01 Art-Arch 4924 1968 and its Legacy
The events of 1968, including the May riots in Paris, the Tucuman Arde exhibition in Argentina, the Tlatelolco Massacre in Mexico City, and the Prague Spring (and Russian winter) in the Czech Republic, just to name a few, ushered in a new political and social imperative for artists. This class starts with 1968 and traces its legacy to the social and cultural movements of the 1980s, 1990s and early 2000s. We seek to understand the historical underpinnings of contemporary activist art and determine the roles of socially-motivated art in the current political and intellectual climate. Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units.

L01 Art-Arch 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories
This seminar examines the theory and the cultural history of the collecting of art objects and artifacts from a range of cultures and periods, considering how and why both individuals and institutions create collections. What social and psychological factors drive this passion? What are the various cultural, political and aesthetic priorities that have driven this practice historically? How is cultural patrimony defined, and how do law, the art market and cross-cultural ethics impact the placement, study and display of a culture’s material heritage? We build the seminar around the history of collecting in America, with a focus on Midwestern examples, and particularly, important case studies in St. Louis. We, for example, consider the significant local collections built by Joseph and Emily Rauh Pulitzer (modern art), and Morton May (modern and oceanic art), as well as the histories of both modern and non-Western collections now owned by the St. Louis area museums. This course is complemented by various local field trips (SLAM, Pulitzer, Kemper and Cahokia). Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 4976 The American Trauma: Representing the Civil War in Art, Literature and Politics
This seminar is an interdisciplinary examination of how Americans represented the Civil War during and after the titanic conflict, with special attention given to the period between 1865 and 1915. The course explores how painters, novelists, photographers, sculptors, essayists, journalists, philosophers, historians and filmmakers engaged the problems of constructing narrative and reconstructing national and individual identity out of the physical and psychological wreckage of a war that demanded horrific sacrifice and the destruction of an enemy that could not be readily dissociated from the self. Thomas Eakins, Walt Whitman, Herman Melville, the Jameses (William and Henry), Mark Twain, Augustus St. Gaudens, Kate Chopin, W.E.B. Du Bois, Frederick Douglass, Henry Adams, Mary Chesnut, Charles Chesnutt, George Barnard and Alexander Gardner are some of the figures considered. Same as History 4976 Credit 4 units. A&S: TH A&S: IQ, HUM EN: H

L01 Art-Arch 4982 Public Art: History, Practice, Theory
The course considers the history and functions of public art, with special attention to public art in St. Louis. We survey not only the obvious forms of public art in urban sculpture and mural
painting, but also less traditional intersections of art and public in such sites as the internet. We also examine the operations of institutions — national and local arts agencies, international exhibitions, nonprofit centers and the like — that foster a public engagement with contemporary art. Finally, we consider new priorities and projects in public art, especially socially oriented and environmentally sustainable initiatives. Prerequisites: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art; one 300-level course in art history preferred, or permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L01 Art-Arch 499 Honors Art and Archaeology
A major research paper acceptable to the department.
Prerequisite: permission of the department.
Credit 3 units. A&S: TH EN: H FA: AH

Biology

Biology is an exciting, diverse field ranging from the molecular biology of individual cells to interactions among entire populations of organisms. Members of the biology faculty are recognized internationally for their research and bring a variety of strengths and teaching styles into the classroom. The major program in biology provides a thorough education in the history of scientific discovery in biology, the logical and statistical procedures used to formulate and to test biological hypotheses, and technical skills needed for conducting contemporary biological research. The biology major program emphasizes the hierarchical nature of biological complexity and the major structures and functions that emerge at the molecular, cellular, organismal, populational and ecosystem levels. Each student masters at least one dimension of contemporary research in sufficient detail to describe the major hypotheses currently being tested and to demonstrate techniques used to test those hypotheses. Mastery of this material is evident in a student’s ability to critique published data, identifying ambiguities and uncertainties in conclusions drawn from those data, and to evaluate the societal importance of the research. Biology majors are prepared to make creative contributions to biology.

The biology major program provides a wide range of research opportunities. Because more than 400 faculty members conduct research in biology and biomedical sciences at Washington University, it is easy to find a project that suits a student’s main interests. Many students complete their research projects at the Washington University School of Medicine, one of the top-ranked medical schools in the country. Summer research fellowship programs are available, funded by sources including the Howard Hughes Medical Institute, Children’s Discovery Institute, National Science Foundation and the Washington University Office of Undergraduate Research. Visit http://www.nslc.wustl.edu/courses/Bio500/bio500.html for detailed information on finding a research mentor. The biology department publishes a handbook that describes relevant careers in the biotechnology industries, agriculture, science communication, academic research and teaching, and health-related areas such as medicine, veterinary medicine, dentistry and genetic epidemiology (visit http://www.nslc.wustl.edu/handbook/handbook.html).

or Math 201 Freshman Seminar: How Mathematics Thinks: Multivariable Calculus
or Math 2200 Elementary Probability and Statistics
or Math 3200 Elementary to Intermediate Statistics and Data Analysis
(optional for students matriculating prior to fall 2012)

Physics 117A General Physics I 4
or Physics 197 Physics I
Physics 118A General Physics II 4
or Physics 198 Physics II

Students may substitute Chem 401 Physical Chemistry I for Chem 262 Organic Chemistry II with Lab. Students who plan to take physical chemistry must take Math 233 Calculus III. Math 2200 Elementary Probability and Statistics, required for tracks in Ecology and Evolution and in Genomics and Computational Biology, and Math 322 Biostatistics are valuable, particularly for students interested in research. Students who have taken Math 233 may take Math 3200 Elementary to Intermediate Statistics and Data Analysis rather than Math 2200 Elementary Probability and Statistics for a more advanced treatment of statistics.

At least 18 units in advanced biology courses (numbered 300 or above) are required. These 18 units may not include Biol 303A, Biol 307A, Biol 387, Biol 388, Biol 393, Biol 487, Biol 488; cross-listed courses originating in other departments (except Biol 360, Biol 4202, Biol 4580, Biol 4810 and Biol 4820, which count as biology major credit despite external origins); courses in University College; or more than 3 units of history-of-science courses. Majors are required to take at least one course from each of these three areas:

Area A: Cellular and Molecular Biology
Biol 3041 Plant Biology and Genetic Engineering 4
Biol 334 Cell Biology 3
Biol 3371 Eukaryotic Genomes 4
Biol 349 Microbiology 4
Biol 4028 From Seed to Senescence: The Genetics, Development and Cell Biology of Plants 3
Biol 424 Immunology 4
Biol 451 General Biochemistry 4
Biol 4810 General Biochemistry I 3
Biol 4820 General Biochemistry II 3

Area B: Organismal Biology
Biol 3151 Endocrinology 3
Biol 328 Principles in Human Physiology 4
Biol 3411 Principles of the Nervous System 3
Biol 3421 Introduction to Neuroethology 3
Biol 3422 Genes, Brains and Behavior 3

Area C: Evolution, Ecology and Population Biology
Biol 3501 Evolution 4
Biol 372 Behavioral Ecology 4
Biol 381 Introduction to Ecology 3
Biol 4170 Population Ecology 3
Biol 4181 Population Genetics (and Microevolution) 3
Biol 4182 Macroevolution 3
Biol 4183 Molecular Evolution 3
Biol 419 Community Ecology 3
Biol 4202 Evolutionary Genetics 3

Majors also must take an advanced laboratory course from the following list:
Biol 3110 Vertebrate Structure Laboratory 4
Biol 3491 Microbiology Laboratory 3
Biol 3492 Laboratory Experiments with Eukaryotic Microbes 3
Biol 360 Biophysics Laboratory 3
Biol 404 Laboratory of Neurophysiology 4
Biol 4193 Experimental Ecology Laboratory 4
Biol 4241 Immunology Laboratory 3
Biol 4330 Electron Microscopy of Cellular Structures and Processes 4
Biol 4342 Research Explorations in Genomics 4
Biol 434W Research Explorations in Genomics (Writing-Intensive) 4
Biol 437 Laboratory on DNA Manipulation 4
Biol 4520 Protein Function in Model Cellular Systems 3
Biol 4522 Laboratory in Protein Analysis, Proteomics and Protein Structure 3

All courses to be counted toward a major in biology must be taken for a letter grade if a letter grade is offered. A grade of C– or better must be earned in all of these courses.

In special cases, students may earn credit for graduate courses offered by the Division of Biology and Biomedical Sciences.

Optional Biology Major Tracks
A biology major may choose one of four optional tracks within the major if the student’s interests lie primarily within one of these subfields of biology. A track provides strong training for graduate study in its subfield. All tracks require completion of
the biology major requirements as stated above but provide concentrated study in one of the four subfields.

The Major in Biology: Ecology and Evolution Track

Additional requirements include Math 2200 or Math 3200. Students whose main interest is ecology must take at least two ecology electives and one evolution elective; students whose main interest is evolution must take at least two evolution electives and one ecology elective (ecology electives: Biol 372, Biol 381, Biol 4170, Biol 419; evolution electives: Biol 3501, Biol 4181, Biol 4182, Biol 4183, Biol 4202). Also required are one elective in analytical methodology (CSE 131, CSE 424 or Math 322) and one elective in earth and planetary sciences (EPSc 201, EPSc 323 or EPSc 418). The course used to fulfill the advanced laboratory requirement for the major must be Biol 4193, Biol 437, Biol 4342 or Biol 434W.

The Major in Biology: Genomics and Computational Biology Track

Additional requirements include Biol 3371 (or Biol 4183 or Biol 548), Math 2200 or Math 3200, and an outside elective (CSE 131 or CSE 241). The course used to fulfill the advanced laboratory requirement for the major must be Biol 3492, Biol 4342, Biol 434W or Biol 437. Biology courses recommended for students in this track include Biol 334, Biol 349, Biol 3491, Biol 4028, Biol 4181, Biol 4202 and Biol 4810. Recommended electives outside biology include CSE 240, CSE 447T, Math 217 and Math 309.

The Major in Biology: Biochemistry and Molecular Biology Track

Additional requirements include both Biol 4810 and Biol 4820; either Biol 334, Biol 3371 or Biol 349; and one of the following: Math 2200, Math 233 or Math 3200. The advanced laboratory course used to fulfill major requirements must be one of the following: Biol 3491, Biol 3492, Biol 4342/Biol 434W, Biol 437, Biol 4520 and Biol 4522. Additional biology courses recommended for students in this track include Biol 3041, Biol 3191, Biol 4023, Biol 4183 and Biol 5312.

The Major in Biology: Neuroscience Track

Biology major requirements must be met with the following courses: Biol 3058, area A (Biol 334, Biol 451 or Biol 4810), area B (Biol 3411), any course in area C, and advanced laboratory (Biol 360 or Biol 404). Students must select at least one biology elective (Biol 3110, Biol 3151, Biol 3191, Biol 328, Biol 3371, Biol 337W, Biol 3421, Biol 3422, Biol 4031, Biol 437 or Biol 4580) and one outside elective either in physics (Physics 350, Physics 352, Physics 355 or Physics 360) or in psychology (Psych 330, Psych 360, Psych 3604 or Psych 4604). Math 2200 (or Math 3200) is recommended.

See also related majors in Biomedical Engineering, Philosophy–Neuroscience–Psychology (PNP) and Philosophy of Science.

The Major in Environmental Biology

Students interested in environmental biology typically take Biol 2950 Introduction to Environmental Biology during fall of the freshman year, although it may be taken later. A 400-level class to be required for Latin honors in Environmental Biology will be introduced. All other courses required for the environmental biology major are currently listed.

One upper-level Biology lab course:

We recommend: Biol 4193 Experimental Ecology Laboratory (4 credits, writing-intensive)

One of the following Biol 300+ courses (Area A and B in Biology):

273
Biol 3041 Plant Biology and Genetic Engineering 4
Biol 334 Cell Biology 3
Biol 349 Microbiology 4
Biol 3151 Endocrinology 3
Biol 328 Principles in Human Physiology 4
Biol 3411 Principles of the Nervous System 3
Biol 3421 Introduction to Neuroethology 3
Biol 3422 Genes, Brains and Behavior 3
Biol 4023 How Plants Work: Physiology, Growth and Metabolism 3
Biol 4028 From Seed to Senescence: The Genetics, Development and Cell Biology of Plants 3
Biol 4030 Biological Clocks 3
Biol 451 General Biochemistry 4
Biol 4580 Principles of Human Anatomy and Development 3
Biol 4810 General Biochemistry I 3

One of the following Biol 300+ (Area C in Biology):

Biol 3501 Evolution 4
Biol 372 Behavioral Ecology 4
Biol 4170 Population Ecology 3
Biol 4181 Population Genetics 3
Biol 4182 Macroevolution 3
Biol 419 Community Ecology 3

One additional Biol 300+ major-track course (may include Biol 500):

• See Biology Course Listings

One of the following EPSC 300+ courses:

EPSc 323 Biogeochemistry (only if not already taken for chemistry requirement) 3
EPSc 352 Earth Materials 5
EPSc 353 Earth Forces 4
EPSc 385 Earth History 3
EPSc 408 Earth’s Atmosphere and Global Climate 3
EPSc 409 Surface Processes 4
EPSc 413 Introduction to Soil Science 3
EPSc 422 Sedimentary Geology 4
EPSc 428 Hydrology 3
EPSc 443 Methods in Biogeochemistry 3
EPSc 444 Environmental Geochemistry 3
EPSc 448 Microbial Geochemistry 3

Additional Information

Research: Research opportunities are available in your first or second year through Biol 200; such opportunities are available in the third and fourth years through Biol 500. A research emphasis in the major requires at least 6 credits (two semesters) of Biol 500 research and an approved senior thesis on this research. The research emphasis is acknowledged on the degree either by Latin honors or by a research milestone (for students who do not meet the GPA requirements for Latin honors as described below).

Senior Honors: Biology majors are encouraged to work for senior honors, which requires a 3.30 grade point average in biology, a 3.30 average in nonbiological sciences (mathematics, chemistry and physics courses) and a 3.65 overall grade point average at the time of graduation. Also required are 6 units of Biol 500 research and an approved thesis from this work. Students interested in Senior Honors should begin Biol 500 no later than spring of the junior year.

The biology department awards the Marian Smith Spector Prize to an undergraduate who has an excellent academic record and submits an outstanding honors thesis. It also awards the Harrison D. Stalker Prize to a graduating senior whose college career is distinguished by scholarship, service and breadth of interest.

The Minor in Biology

Units required: 18 units of Biology and 9 units of Chemistry

Required courses:

Biol 2960 Principles of Biology I (prerequisite Chem 111A) 4
Biol 2970 Principles of Biology II (prerequisite Chem 112A) 4
Chem 111A General Chemistry I 5
& Chem 151 General Chemistry Laboratory I
Chem 112A General Chemistry II 5
& Chem 152 General Chemistry Laboratory II
Chem 261 Organic Chemistry I with Lab 4

Total units 22

Elective courses:

The minor requires 10 advanced units in Biology selected from the following:

Biol 3041 Plant Biology and Genetic Engineering 4
Biol 3058 Physiological Control Systems 2
Biol 3110 Vertebrate Structure Laboratory 4
Biol 3151 Endocrinology 3
Biol 3182 History of the Life Sciences in the 20th Century 3
Biol 3183 A History of Genetics in the 20th Century 3
Biol 328 Principles in Human Physiology 4
Biol 334 Cell Biology 3
Biol 3371 Eukaryotic Genomes 4
Biol 3411 Principles of the Nervous System 3

All courses utilized for the Biology minors must be taken for a letter grade if a letter grade is offered. A grade of C– or better must be earned in all of these courses.

**L41 Biol 112 Freshman Seminar: Introduction to Problem-based Learning in Biology**

Small groups of students take responsibility for their own active learning in their team with guidance from an instructor. Each group in rotation considers four problems of biological importance such as rainforest destruction, coral reefs, laboratory diagnoses, sleep, high altitude, deafness, infertility, modern epidemics, clinical cases, genetic engineering and cloned animals. Students find the background information by library searches and integrate this knowledge in group discussions. Enrollment limited. Intended for but not limited to prospective biology majors. Prerequisite: high school biology, preferably an AP class. For freshmen only.

Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

**L41 Biol 181 Freshman Seminar in Biology**

A lecture course intended for first-year students that focuses on the practice and culture of biomedical research. Active researchers describe the biological context of their research, the specific questions formulated, the means by which they pursue the answers, and their data and conclusions. The focus is on process: how biologists pursue their profession in a research setting. Additional topics of clinical and contemporary interest are often included. Students are expected to attend all lectures. Must be taken credit/no credit.

Credit 1 unit. A&S: NS A&S: IQ, NSM FA: NSM

**L41 Biol 1810 Freshman Seminar in Imaging Sciences**

An introduction to the breadth and depth of imaging sciences across the schools of Arts & Sciences, Medicine and Engineering, on topics from radiology to cell biology. Seminars are presented by experts in these fields to acquaint undergraduate students with advances in imaging sciences and research opportunities in these areas. This seminar is the preferred entry point for freshman and sophomores for the Imaging Sciences Pathway (imagingpathways.wustl.edu/). No prerequisites, primarily for freshmen and sophomores, but open to all students.

Credit 1 unit. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

**L41 Biol 191 Phage Hunters**

A research-based laboratory class for freshmen. Students join a national experiment organized by HHMI, with the goal of isolating and characterizing bacteriophage viruses found in the soil in the St. Louis area. Laboratory work includes isolation and purification of your own phage, DNA isolation and restriction mapping, and EM characterization of your phage. Several WU phage are selected for genome sequencing over winter break, and are annotated in the spring in Bio 192, Phage Bioinformatics. Students who successfully isolate and
annotate a phage may become co-authors on a scientific paper. Prerequisites: high school courses in biology and chemistry, at least one at the AP or International Baccalaureate level; permission of the instructor. Limited to 40 students. One hour lecture, one hour discussion, and three hours lab per week. Same as Focus 1910
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI

L41 Biol 192 Phage Bioinformatics
A research-based laboratory class for freshmen. Students join a national experiment organized by HHMI, with the goal of genomic characterization of a local phage. Laboratory work focuses on learning computer-based tools for genome analysis followed by annotation and comparative analysis of the genome of a phage (bacterial virus) that was isolated fall semester at WU and sequenced over winter break. Prerequisites: high school courses in biology, chemistry and physics, at least one at the AP or International Baccalaureate level; permission of the instructor. Limited to 40 students; preference given to those completing Biol 191 Phage Hunters. One hour lecture, one hour discussion and three hours lab per week. Same as Focus 1920
Credit 3 units. A&S: NS A&S: IQ, NSM

L41 Biol 200 Introduction to Research
An introduction to laboratory and field research in biology for first- and second-year students. Students work under the supervision of a sponsor in a setting of established, ongoing research. Prerequisite: permission of sponsor and the department. For online enrollment instructions see: http://www.nslc.wustl.edu/courses/Bio500/bio500.html. Students are registered by the department after approval is granted. Registration may not appear in Webstac until mid-semester. Credit variable, maximum 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 224 Infectious Diseases: Past, Present and Future
A variety of important infectious diseases are discussed. Attention is paid to the causative agent, natural source, disease symptoms, mode of transmission, treatment, prevention, evolution, eradication and historical impact of each. Lectures and assigned reading include discussions of small pox, yellow fever, Ebola and Marburg fevers, AIDS, influenza, rabies, SARS, bubonic plague, typhus, cholera, syphilis and malaria. The mechanisms underlying the emergence of “new” diseases are emphasized. Two-one hour lectures per week; three in-class exams and a final constitute the basis for grades. Not available to students who have credit for Biol 2960.
Credit 2 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 2431 Focus: Missouri’s Natural Heritage
Missouri’s Natural Heritage is a multidisciplinary two-semester Freshman Focus course. The first semester of the sequence focuses on Missouri geology, climate, archaeology, and native megafauna. This provides a foundation on which to examine the ecology, restoration and management of our diverse habitats (prairie, forest, glade and stream) and the biology of our diverse plant and animal wildlife (arthropods, mollusks, fish, salamanders, lizards, birds and mammals) in the second semester. We also introduce basic concepts in biodiversity and resource management with attention to resolution of conflicts of interest. In addition to weekly lecture and discussion, students in this class visit sites across the state during three weekend camping trips and a longer camping trip during winter break. Attendance on field trips is an essential component of the course and grade. Lab fee of $480 covers transportation and meals for all field trips.
Same as Focus 2431
Credit 3 units. A&S: IQ, NSM

L41 Biol 265 Experience in the Life Sciences
Section 01: Earn credit for nonclassroom learning in the life sciences in a variety of activities: accompany a physician on rounds and prepare a paper on an organ system or disease; participate in a clinical or applied ecological study and report on it; participate in science outreach teaching, etc. Participants must meet regularly with a supervisor and commit at least 140 hours over two semesters. A work plan is approved prior to registration. A progress report is due after one semester and a final paper after two semesters. Does not count toward the major. Credit: 1.5 units per semester, contingent upon completion of two semesters. See http://www.nslc.wustl.edu/research.html. CBTL course. Credit/no credit only.

Section 02: Participate in teaching anatomy and physiology, exercise science (fitness education) and/or nutrition in the St. Louis area. Students serve the community by offering knowledge-based teaching assistance, including development of educational materials, to a diverse population of students and/or adults. Participants spend at least 72 hours per semester as a classroom teaching assistant and/or as a health educator during community health fairs. Mandatory seminars include readings relevant to the semester plan. A class schedule and a contract for successful completion of the course is reviewed and approved by the course coordinator (Ruth Clark, P.T., Ph.D.), high school instructor (TBD) and individual student. Permission of course coordinator required via interview. Prerequisites: minimum 6 credits of college-level anatomy and/or physiology course work, minimum science GPA of 3.2. Does not count toward the major. Credit: 2–3 credits/semester; Credit/no credit only.

Section 03: Conduct a clinical research project with an emergency-medical faculty member. Activities may include screening/enrolling patients, chart reviews, collecting and
analyzing data, and clinical shadowing time. Goals include submitting an abstract for a national research meeting and coauthoring a manuscript for publication. Prerequisite: Biol 2652 or Biol 2653. Does not count toward the major. Credit: 1.5 units per semester, contingent upon completion of two semesters. CBTL course. Credit/no credit only.
Credit 1.5 units. FA: NSM

L41 Biol 2651 MedPrep Program — Experience in Life Sciences
MedPrep I is a unique lecture series taught by a physician, medical school Course Master and member of the Committee on Admissions for the School of Medicine. Through a weekly two-hour lecture, this course gives students accurate, honest and detailed information regarding every step of the application and admissions process to medical school and the educational process and life of a physician. MedPrep I is particularly useful for freshmen and sophomores in that it reviews the common pitfalls encountered by unsuccessful applicants to medical school. There is no outside course work and no exam. Attendance at all classes is required. Registration for Biol 2651 is done through the MedPrep website at medprep.wustl.edu. Registration is NOT done through WebStac. Credit 1 unit.

L41 Biol 2652 Pediatric Emergency Medicine Research Associates Program: Experiences in Life Sciences
The Pediatric Emergency Medicine Research Associates Program (PEMRAP) offers undergraduate premedical students an opportunity to participate in clinical, patient-oriented research projects in a hospital setting. Students have the opportunity to work in the St. Louis Children’s Hospital Emergency Department, a nationally recognized pediatric emergency medicine and trauma care facility. A number of research projects are currently under way in various areas of pediatric emergency medicine. Credit/no credit research associates are expected to work two four-hour shifts per week in the St. Louis Children’s Hospital Emergency Department and to attend a weekly two-hour lecture on Tuesdays in conference room 10A of the Northwest Tower Building (across from Children’s Hospital) from 1:30 – 3:30 p.m. Weekly meetings include lectures given by Emergency Department faculty members. This program offers students the unique opportunity to be a vital part of the ED research team. In addition, the RA’s experience in the ED may help students determine if medicine is truly the career path they wish to choose. May not be taken concurrently with Biol 2654 MedPrep II. CBTL course. Credit 3 units.

L41 Biol 2653 Course for Associates of Research in Emergency Medicine (CAREm)
CAREm is a unique program designed specifically for students considering a career in medicine and/or research. In this course, students introduced to clinical research work in the Emergency and Trauma Center of Barnes-Jewish Hospital at Washington University School of Medicine. Students assist investigators on various research studies, including traumatic brain injury, diabetes, influenza, pneumonia, radiology and more. CAREm is limited to 12 students per semester. Spots in the course are given to the first 12 students who have submitted a completed registration packet and fulfilled the requirements of the Barnes-Jewish Hospital Volunteer Program. Students are contacted individually prior to the first week of class to ensure that the mandatory requirements are met and to schedule times for other specific requirements to take place. Each student is required to dedicate eight hours per week as a research assistant (RA) for clinical research trials. As research assistants, students’ duties require them to screen patients in the Emergency Department, consent eligible patients, complete various documentation, and perform other research-related activities. Through a weekly two-hour lecture, students are educated on the importance of ethical research and the different types of research conducted. In addition, students are introduced to methodological concepts of the various clinical research projects. Weekly lectures include presentations given by faculty members and the course masters. The lecture series includes topics such as basics of clinical research, types of clinical research, study design and methodology, and basic statistics. Credit/no credit only. Prerequisite: sophomore, junior and senior level only. CBTL course. Credit 1 unit.

L41 Biol 2654 MEDPREP II — Experience in the Life Sciences
MedPrep II offers students a real world, behind-the-scenes experience of a life in medicine. For three hours every other week, students shadow physicians in the Charles F. Knight Emergency and Trauma Center of Barnes-Jewish Hospital, the main teaching hospital of the Washington University School of Medicine. A weekly one-hour class is also held on the Danforth campus for group discussion regarding the clinical experiences of the students. There is no outside course work and no exam. Attendance at all classes is required. Because of the orientation material covered, students must be present at the first class to take this course. Registration for Biol 2651 is done through the new MedPrep website at medprep.wustl.edu, not through WebStac. Successful completion of Biol 2651 is required to take Biol 2654. Credit 1 unit.

L41 Biol 2656 Introduction to Health Professions: Occupational Therapy, Physical Therapy and Audiology
This course provides students interested in health professions with an overview of occupational therapy, physical therapy and audiology. Students gain a better understanding of the scope of practice, markets and skills required to succeed in these professions. Students learn about graduate and professional
education options and how to build a competitive application for these programs. Finally, students are introduced to field experiences in each area and culminate their study with an interprofessional education session illustrating the role of each of the professions in a single case. Students finish the course with a better understanding of whether a career in health professions is right for them.
Credit 1 unit.

L41 Biol 2950 Introduction to Environmental Biology
This course introduces students to our major environmental problems, and gives examples about how research in biology, chemistry, physics and math is necessary to solve these problems.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 2951 Environmental Debates
Solving major environmental problems requires understanding the range of interests, priorities and perspectives surrounding each issue and developing solutions that satisfy all constituencies. In this seminar, you research and discuss both sides of each issue. This helps you to develop informed opinions and foster a sense of civic engagement. You present your debate points to students in Biol 2950 Introduction to Environmental Biology. Debate topics include: Is China’s one child policy an appropriate way to stabilize human population growth? Coal: energy of the future or energy of the past? Should edible crops be used for biofuels? Will genetic engineering make our agriculture more sustainable? Is the economic development of developing countries more important than protecting the environment? Should DDT be banned worldwide? Seminar requires concurrent enrollment in Biol 2950.
Credit 1 unit. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 2952 Freshman Seminar: Controversies in Conservation Biology
The goal of this course is the development of critical thinking skills needed to evaluate conservation and biodiversity controversies in a complex and rapidly deteriorating world. We are currently in the sixth known mass extinction of life on earth; it is estimated that 60,000 species now go extinct annually. Human-caused changes in natural environments will have long-lasting consequences for the 5 percent of all current life forms expected to survive this mass extinction. Although conservation and management of biodiversity are needed to address these changes, the solutions are often controversial. Therefore, it is important to develop critical thinking skills necessary for handling biases on all sides of controversial conservation issues. Sound conservation ethics and scientific information are needed to be an informed citizen. This reading-intensive course is divided into three modules. In the first, we explore popular literature on conservation biology to gain a general understanding of common topics and concerns. In Module 2, current scientific literature and news articles are used to evaluate both sides of a controversial issue in conservation biology. The last module allows students to focus on a controversial topic of their choice, present it to the class, and take action by sending a letter to a political figure. The topics presented in this course are designed for freshmen and sophomores in the field of environmental sciences. No prerequisites required. Class limited to 16 students.
Credit 2 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 2960 Principles of Biology I
The course provides an introduction to cellular, molecular and developmental biology. An understanding of cellular architecture and the properties of biological macromolecules is integrated with discussion of the flow of genetic information within cells. The final section of the course covers investigation and manipulation of genetic information by molecular genetic technologies, as well as developmental strategies employed by multicellular eukaryotes. Weekly labs reinforce concepts from lectures and explore common laboratory techniques and computer-based resources. Prerequisites: Chem 111 and Chem 112 (concurrently). Three hours of lecture and two hours of lab per week.
Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 2961 Collaborative Phage Bioinformatics
A research-based laboratory for those enrolled in Biol 2960, this class provides an opportunity to join a research team with the goal of genomic characterization of a locally isolated phage (a virus that infects a bacterial host). Similar to Biol 192, but using a condensed format and a larger team to tackle each phage. Lab work focuses on learning computer-based tools for genome analysis, followed by careful annotation of several genes from your phage, and in-depth investigation of one gene. Requires concurrent enrollment in Biol 2960 Principles of Biology I; not open to students enrolled in Biol 192. One 2-hour pre-class online review/preparation session, nine 2-hour laboratory sessions, and a final poster presentation. (Lab does not meet in weeks with a scheduled Biol 2960 midterm.) May be taken for a letter grade or Credit/No Credit.
Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 2970 Principles of Biology II
A broad overview of genetics, including Mendelian assortment, linkage, chromosomal aberrations, variations in chromosome number, mutation, developmental genetics, quantitative genetics, population genetics, mechanisms of evolution, and phylogenetics. Three lectures and one laboratory period each week. Does not fulfill the laboratory requirement of the biology major. Students must sign up for a lab during preregistration. Prerequisite: Biol 2960 or permission of instructor. Examination schedule: tests, at which attendance is required, are given on specific Wednesday evenings to be announced.
Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM
L41 Biol 303A Human Biology
How did Elvis, Socrates and Babe Ruth die? How did David Letterman and Dick Cheney survive? In this course we work toward understanding the biology behind human health and disease. We examine cases from the news, literature and history. We work like detectives to understand how and why the characters were affected and healed or died. This course is designed for students who do not plan to major in science, and no prior science background is expected. Prerequisite: sophomore standing or permission of instructor. A student may not receive credit for both Biol 303A and Biol 100A, 2960, 2970, or UCollege B320, B3201, B321, B3211. Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 3041 Plant Biology and Genetic Engineering
A 4-credit lecture course that provides an introduction to plant development, genetics, physiology and biochemistry with emphasis on processes that can be manipulated or better understood through genetic engineering. The course is divided into three sections. The first section of the course discusses basic plant biology, development and genetics. The second part emphasizes gene structure, expression and cloning as well as methods for introducing foreign DNA into plant cells and regenerating fertile plants in tissue culture. During the third part of the course we discuss a variety of examples of genetically regenerating fertile plants in tissue culture. During the third part of the course we discuss a variety of examples of genetically engineered traits, including: herbicide resistance; fruit ripening; pathogen and/or insect resistance; and the use of plants for production of industrial and pharmaceutical compounds. Friday discussion sections focus on critical reading of the primary literature related to the material covered in lecture. Prerequisites: Biol 2960 and Biol 2970. Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 3058 Physiological Control Systems
Systems physiology with emphasis on human physiology. Prerequisites: Biol 2960 and Chem 112A. Credit 2 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 307A Human Variation
A survey of human biological diversity, considering its adaptive and taxonomic significance from the perspective of origins and distribution of traits and adaptation. Prerequisite: Anthro 150A or introductory biology. Same as Anthro 307A
Credit 3 units. A&S: NS, SD, QA A&S: IQ, NSM, AN, SD BU: SCI FA: NSM

L41 Biol 3110 Vertebrate Structure Laboratory
A lecture/laboratory course designed to provide an integrative framework for how vertebrate form and function evolved. Weekly lectures emphasize development and the relationship between the structural and functional design of organ systems, the importance of these relationships in maintaining homeostasis while providing opportunity for adaptation, and examples of how vertebrate organ systems communicate to accomplish functional and physiological integration. 1.5 hour lecture and five hours lab each week. Prerequisite: Biol 2970. Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 3151 Endocrinology
An overview of mammalian endocrine systems with an emphasis on human physiology and development. The interplay between systemic, local cell and tissue interactions as well as the cell and molecular events associated with hormone action are discussed. Examples of endocrine evolution and pathological conditions related to endocrine imbalances also are included. Prerequisite: Biol 2970. Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 3182 History of the Life Sciences in the 20th Century
This course explores the vast changes that the life sciences underwent between 1890 and 2000, from a largely descriptive and qualitative science to a highly experimental and quantitative science. Topics include the rejection of Haeckelian morphology; the rise of experimental embryology; the rediscovery of Mendel and development of the Mendelian-chromosome theory; the new “ecology” of the Chicago school; the introduction of feedback and control systems in physiology; the synthesis of Mendelism and Darwinism; the rise of biochemistry and molecular biology; and the genomic revolution. In each topic, biological ideas are placed in their historical and social contexts. Prerequisites: at least a high school or, preferably, college-level introductory course in biology and/or permission of the instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 3183 A History of Genetics in the 20th Century
After a brief survey of pre-20th century theories of heredity, this course examines the work of Gregor Mendel and its rediscovery in 1900, as well as its expansion as an interfield theory in combination with the chromosome theory, which was pioneered beginning in 1910 by T.H. Morgan at Columbia and R.A. Emerson at Cornell and which led to the expansion of classical genetics up to World War II. The beginnings of biochemical and molecular genetics in the 1920s and 1930s developed rapidly after the war with the double-helix theory of DNA and the rise of molecular genetics. The course ends with examination of the Human Genome Project (Initiative) and the ramifications of genetic biotechnology. Throughout, emphasis is placed not only on the technical and theoretical developments comprising genetics as an epistemic field, but also on the economic, social, political and philosophical interconnections between genetics and society. Agriculture, medicine and the ideology of social control (including such movements as eugenics and Nazi race
hygiene) both influenced and were influenced by genetics and played an integral part in the construction of the science itself. Readings are drawn from the primary and secondary literature. There are mid-term and final exams as well as periodic student reports. Prerequisite: Biol 2960 and Biol 2970.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 3191 Molecular Mechanisms in Development
One of the most exciting areas of modern biology is the study of embryonic development. The use of genetic engineering/recombinant DNA technology has revolutionized the way in which questions are asked and answered in this rapidly advancing field. Recent studies in model systems such as Drosophila, nematode and Xenopus (among others) have provided new insights into the molecular mechanisms utilized to establish cellular identities and generate the pattern of differentiation critical to multicellular organisms. Information being gained and experimental tools being developed in these model systems are leading to important advances in our understanding of developmental mechanisms used in all organisms, including mammals. This course provides an up-to-date and in-depth view of ongoing research in selected areas of developmental biology. Topics are introduced by lectures, but substantial class time is devoted to discussion. Reading assignments from the current scientific literature highlight the experimental approaches being used. How information from model systems is being applied to mammalian embryos is discussed. Enrollment limited to encourage discussion. Prerequisite: Biol 2970.
Credit 3 units. A&S: NS, WI A&S: IQ, NSM, WI BU: SCI FA: NSM

L41 Biol 324 Human Genetics
Broad coverage of the role of genetics in medicine, with a focus on the application of genomic technologies to the understanding of human disease. Areas covered include the identification of human disease genes, modern cytogenetics, risk assessment in pedigrees, biochemical genetics, imprinting, mitochondrial genetics, gene therapy, complex inheritance, assisted reproduction, prenatal diagnosis, immunity, cancer and pharmacogenetics. The profound ethical and legal considerations raised by modern genetic technologies also are discussed.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

Mechanisms of exercise physiology are integrated throughout the course. Prerequisite: Biol 3058 or equivalent.
Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 334 Cell Biology
Eukaryotic cell structure and function viewed from the perspective of modern cell biology. Lectures cover such topics as membrane transport; endocytosis and secretion; intracellular trafficking; hormones and signal transduction; extracellular matrix and tissue formation; cytoskeleton and motility; and cell cycle, apoptosis and the cellular basis of disease. Prerequisite: Biol 2970.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 3371 Eukaryotic Genomes
An advanced exploration of the structure and function of DNA within the eukaryotic nucleus. Lecture and discussion cover topics of chromatin and chromosome structure, control of gene transcription, RNA processing, and DNA replication and repair. The relevance of these topics to the genetic basis of human disease is discussed. Throughout, the experimental data that shape our current understanding are emphasized. Course grades based on exams, problem sets and short papers. Lecture three hours per week plus required discussion section meeting every other week. Prerequisites: Biol 2970, Chem 251 (may be taken concurrently). Offered every other fall in even-numbered years.
Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 3411 Principles of the Nervous System
The basic anatomical, physiological and chemical organization of the nervous system; how nerve cells communicate with each other, the ionic basis of nerve signals, the function and properties of chemical agents in the nervous system, the development of neural circuitry, and how neurons interact to produce behavior. Prerequisite: Biol 2960, Biol 2970 recommended, Biol 3058 recommended or Psych 3401 and permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 3421 Introduction to Neuroethology
The neural mechanisms of animal behavior from an evolutionary and ecological perspective. Topics include: contributions of model systems to understanding fundamental properties of nervous system structure and function; electrical signals of sensory cells, neurons and muscle; neural processing of sensory input; neural control of behavioral output; anatomy and physiology of sensory and motor systems; learning and memory; evolution of neural circuits. Prerequisite: one of the following courses: Biol 3058, Biol 3411 or Psych 3401.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM
L41 Biol 3422 Genes, Brains and Behavior
Genetic studies of physiological systems underlying animal behavior, including the genetic basis for normal and abnormal behaviors in animals and humans. Topics include: history of behavioral genetics; the ongoing debate about "nature vs. nurture"; contributions of genetic model systems including the nematode Caenorhabditis elegans, the fruit fly Drosophila melanogaster, zebrafish, the mouse Mus musculus and other animal models; molecular mechanisms underlying the evolution of behavioral phenotypes; the emerging role of epigenetics in regulating nervous-system functions and behavior; the use of genetic and genomic analyses in studies of human behavior and psychiatric disorders. Prerequisite: Biol 2970
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 346A The Darwinian Revolution
Examines the scientific, economic, social and political background to the development of evolutionary theory in Europe and the United States from 1750 through the end of the 20th century. How were naturalistic theories of the origin of species crafted out of economic and social metaphors? Why has Darwin's work generated such controversy for 150 years? What is the consensus on Darwinian theory today? The first part of the course focuses on the historical and philosophical development of ideas about evolution, natural selection and heredity, including the strong arguments mounted against Darwinian theory through the first two decades of the 20th century. The second part of the course deals with the development of evolutionary theory as it was integrated with Mendelian genetics (as population genetics), ecology and eventually molecular biology in the period after 1930. The course concludes with an examination of several controversies that have greatly affected the course of evolutionary theory: the conflict between evolution and Christian fundamentalism, the concept of punctuated equilibrium, sociobiology, mass extinctions and the extinction of dinosaurs, and the origin of life. Emphasis is on understanding the process of science as practiced in evolutionary biology. No prerequisites. Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 348 Emerging Infectious Diseases
The questions of why new diseases are continuing to appear, and why old diseases are re-emerging, are addressed in detail. Particular focus is on the role played by the natural environment in these processes; how disease risk can be enhanced by environmental change is a pervasive theme. Examples include Lyme disease, ehrlichiosis, E.coli 0157:H7 and Salmonella, as well as diseases caused by West Nile, hanta and polio viruses. Prerequisites: Biol 2960 and Biol 2970.
Credit 2 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 349 Microbiology
This 4-credit lecture course focuses on the molecular biology of bacteria, archaea and viruses. Topics include: the bacterial cell cycle, gene regulation, stress response, cell-cell communication, viral and bacterial pathogenesis, microbial ecology, and metabolic diversity. Friday tutorials stress analysis of the primary literature with an emphasis on current research related to material covered in lecture. Prerequisites: Biol 2960 and 2970, or permission of instructor.
Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 3491 Microbiology Laboratory
After introducing students to the basics of bacterial growth and maintenance, this laboratory class employs genetics, cell biology and genomics to explore various aspects of bacterial physiology, identification, gene structure and mutational analysis of physiological pathways. Prerequisite: Biol 349 required; may be taken concurrently. One-hour lecture and five hours of laboratory per week. Fulfills the upper-level laboratory requirement for the Biology major.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 3492 Laboratory Experiments with Eukaryotic Microbes
This research-intensive course provides an introduction to diverse molecular and cell biology techniques used in model experimental organisms to explore fundamental biological questions. Experiments are performed using selected fungi and protozoans commonly used in major research efforts. Emphasis is placed on choosing the appropriate organism for the question posed using the most current technologies. Each semester, one cellular process is studied in detail and original research is carried out. Prerequisites: Biol 2960 and 2970 and permission of instructor — contact early to ensure enrollment. One hour of lecture and six hours of laboratory a week. Fulfills the upper-level laboratory requirement for the Biology major. Enrollment limited to 12.
Credit 3 units. A&S: NS, WI A&S: IQ, NSM, WI FA: NSM

L41 Biol 3501 Evolution
A general survey of organic evolution covering both micro and macroevolution. Topics include natural selection, adaptation, evolution of pathogens, formation of species and phylogeny. Prerequisite: Biol 2970.
Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L41 Biol 360 Biophysics Laboratory
This laboratory course consists of “table-top” experiments in biological physics that are designed to introduce the student to concepts, methods and biological model systems in biophysics. Most experiments combine experimentation with computer simulations. The list of available experiments includes electrophysiology, human bioelectricity, optical tweezers, ultrasonic imaging, mass spectrometer, and viscosity measurements. Prior completion of Physics 117A-118A, Physics 197-198 or permission of instructor.
Same as Physics 360
Credit 3 units. A&S: NS A&S: IQ, NSM, AN

L41 Biol 372 Behavioral Ecology
This course examines animal behavior from an evolutionary perspective and explores the relationships between animal behavior, ecology and evolution. Topics include foraging behavior, mating systems, sexual selection, predator-prey relationships, cooperation and altruism, competition, and parental care. Prerequisite: Biol 2970 or permission of instructor. Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 374 Drugs, Brain and Behavior
This course reviews information pertaining both to medications used to treat psychiatric disorders and to psychoactive drugs of abuse. By learning principles of pharmacology and mechanisms of action of these agents, students develop an enhanced knowledge of the brain mechanisms underlying abnormal human behavior. Prerequisites: Psych 100B and one of the following: Psych 354 or 3401 or 344.
Same as Psych 374
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI

L41 Biol 381 Introduction to Ecology
This course explores the science of ecology, including factors that control the distribution and population dynamics of organisms, the structure and function of biological communities, how energy and nutrients flow across ecosystems, and what principles govern ecological responses to global climatic and other environmental changes. The class format includes lectures, discussions and small group exercises. Assignments include quantitative data analysis, ecological modeling and scientific writing. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 387 Undergraduate Teaching
Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/no credit only. Credit variable, maximum 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 388 Undergraduate Teaching
Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not

L41 Biol 393 Practical Skills in Environmental Biology Research
Provides a broad overview of the skills and tools needed for a successful research career in environmental biology. Topics covered include: (1) developing ideas/approaches for research projects, (2) experimental design and analyses, (3) using the primary literature effectively, (4) writing successful small grant and fellowship proposals, (5) writing/reporting results. In addition, students learn other important field-biology skills, including a variety of field methods, as well as coping with rough field conditions. Some Saturday and night-time field trips required. Grading is based primarily on class participation and take-home assignments. Prerequisites/corequisites: permission of Professor Knight and at least one of the following courses: EnSt 370, EnSt 373, Biol 2950, Biol 3501, Biol 372, Biol/EnSt 381, Biol/EnSt 4170, Biol/EnSt 419, Biol 4191, Biol/EnSt 4193.
Same as EnSt 393
Credit 2 units. A&S: NS A&S: IQ, NSM

L41 Biol 4023 How Plants Work: Physiology, Growth and Metabolism
This course introduces students to the fundamentals of how plants grow, metabolize and respond to their environment. Topics covered include the conversion of light energy into chemical energy through photosynthesis and carbon fixation, nitrogen assimilation, water and mineral uptake and transport, source-sink relationships and long-distance transport of carbon and nitrogen, cell growth and expansion, hormone physiology and physiological responses to a changing environment. Prerequisite: Biol 2970 or permission of instructors. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4025 Current Approaches in Plant and Microbial Research
This course is designed to introduce graduate students and upper-division undergraduates to contemporary approaches and paradigms in plant and microbial biology. The course includes lectures, in-class discussions of primary literature and hands-on exploration of computational genomic and phylogenetic tools. Evaluations include short papers, quizzes, and oral presentations. Over the semester, each student works on conceptualizing and writing a short NIH-format research proposal. Particular emphasis is given to the articulation of specific aims and the design of experiments to test these aims, using the approaches taught in class. Students provide feedback to their classmates on their oral presentations and on their
specific aims in a review panel. Fundamentals of Biology II: Genetics (Biol 2970) or permission of the instructor. Credit 4 units. A&S: NS A&S: IQ, NSM

L41 Biol 4028 From Seed to Senescence: The Genetics, Development and Cell Biology of Plants
This course introduces students to the unique features of plant cells, plant genomes and plant development, and examines the many significant ways in which plants differ from animals. Major topics include how plant stem cells continuously give rise to leaves and flowers (unlike animals, where organs are pre-formed during embryogenesis), and how plants reproduce without a dedicated germline (animals set aside germ cells early in development). A number of mutants that are defective in important developmental transitions are discussed, some of which are the basis for familiar fruit and vegetable crops. Also covered are the genetic and genomic methods used to generate and to analyze plant mutants, and recent technical advances that have furthered our understanding of plant growth and development. Reading of primary literature and computer-based exploration of online genomics tools are parts of the course. Prerequisite: Biol 2970 or permission of Dr. Haswell. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4030 Biological Clocks
Biological clocks are the endogenous oscillators that coordinate physiological and behavioral rhythms in nearly all organisms. This course examines how these rhythms are generated and regulated. The material includes molecular, cellular and systems physiology and the relevance of biological timing to ecology and health in everything from protozoans to plants to people. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4040 Laboratory of Neurophysiology
Neurophysiology is the study of living neurons. Students record electrical activity of cells to learn principles of the nervous system including sensory transduction and coding, intercellular communication and motor control. The course meets for eight hours each week. Students may leave the lab for up to two hours. Prerequisites: Biol 3411 or Psych 4411, and permission of instructor. Biol 3411 may be taken concurrently. Credit 4 units. A&S: NS, WI A&S: IQ, NSM, WI FA: NSM

L41 Biol 4071 Developmental Biology
An introduction to the molecular and cell biology and biomechanics of animal development. The course is divided into thirds, which cover (1) an introduction to the major cell-cell signaling systems used during development and their study in model organisms, (2) molecular studies of early vertebrate development, and (3) application of the principles of solid mechanics to understanding events in tissue and organ morphogenesis including gastrulation, cardiac looping and brain folding. Prerequisites: Biol 2970 Principles of Biology II and Math 132 Calculus II. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4181 Population Genetics
An introduction to the basic principles of population and ecological genetics. Mechanisms of microevolutionary processes; integrated ecological and genetic approach to study the adaptive nature of the evolutionary process. Prerequisite: Biol 2970. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4182 Macroevolution
An advanced introduction to the study of macroevolutionary patterns and processes with emphasis on the systematic methodology employed. Topics: theories of classification, phylogenetic reconstruction, testing of historical hypotheses, hierarchy theory, adaptation, extinction, speciation, developmental mechanisms of organismal evolution, biogeography. Prerequisite: permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4183 Molecular Evolution
A rigorous introduction to the study of evolution at the molecular level. Topics include the origin, amount, distribution and significance of molecular genetic variation within species, and use of molecular data in systematics and in testing macroevolutionary hypotheses. Prerequisite: Biol 2970 or permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 419 Community Ecology
Basic principles of community ecology, including species interactions, spatial and temporal patterns of biodiversity, and ecosystem functioning. Analytical theory, statistical patterns and experimental approaches are emphasized. Intended for students wanting a rigorous overview of ecological principles. Prerequisites: at least one of the following courses: Biol 3501, Biol 372, Biol 381, Biol 4170, Biol 4193, EnSt 370 or permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4191 Biology Field Course in Ecology
An introduction to the study of organisms in relation to their environment, this field course focuses on the application of methods and techniques commonly used in ecological studies. Lectures focus on taxonomy, natural history, wildlife-habitat relations, hypothesis testing, experimental design and research techniques. Field trips to local sites are made to conduct ecological studies at the level of organisms, populations and communities. Lab time is used to process samples, collate and
analyze data. Prerequisites: Biol 381 or a comparable course with permission of the instructor. Credit 2 units. A&S: NS FA: NSM

L41 Biol 4193 Experimental Ecology Laboratory
Design and interpretation of ecological experiments, with an emphasis on hypothesis testing, sampling methodology and data analyses. Sessions address fundamental ecological questions and include field, greenhouse and laboratory (microcosm) studies on a variety of taxa and ecosystems. Generally work is done before dark (5 to 6 p.m.), although occasionally goes as late as 7 p.m. Includes occasional required Saturday field trips to local sites (e.g., forests, wetlands, prairies, streams) for in-depth study. Assignments are primarily several written assignments, including final projects and in-class participation. Fulfills the upper-level laboratory requirement for the Biology major. One hour of lecture and four hours of laboratory per week. Prerequisites: permission of instructor and at least one of the following: Biol 381 Introduction to Ecology, Biol 372 Behavioral Ecology, EnSt 370 Biological Conservation, Biol 4170 Population Ecology, Biol 419 Community Ecology or Biol 3501 Evolution. Credit is not awarded for both Biol 4191 and 4193. Enrollment is limited to 15 students. Credit 4 units. A&S: NS, WI A&S: IQ, NSM, WI FA: NSM

L41 Biol 4202 Evolutionary Genetics
Same as Anthro 4202
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 424 Immunology
Basic molecular and cellular aspects of the vertebrate immune system with emphasis upon the interrelationships of nonspecific and specific host defense against disease, the nature of immunological specificity and its underlying molecular biology. Includes complement systems, immunochemistry and immunoassay, systems, the nature of cellular activation and effector generation, immunodeficiency, tolerance, tissue transplantation, hypersensitivity, immune regulation and specific diseases illustrative of the successes and failures of the immune system. Prerequisites: Biol 2970 and Chem 252. Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4241 Immunology Laboratory
The Immunology Laboratory introduces students to a variety of common, broadly useful immunological techniques and then allow each student to employ most of the learned techniques in addressing a current research question. Experiments employ mouse cells in vitro and emphasize quantitative analysis of the data. Prerequisites: Biol 424 and permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 427 Problem-Based Learning in Biomedical Sciences
Groups of five to eight students are presented with medical case studies that are then researched and discussed under faculty guidance. Students take major responsibility for their own learning within their team. Enrollment limited to 30 students. Prerequisites: Biol 3050 and some experience in molecular biology. A biology or science background is required. Credit 3 units. A&S: NS, WI A&S: IQ, NSM, WI FA: NSM

L41 Biol 4330 Electron Microscopy of Cellular Structures and Processes
This course is designed to give the student skills in using transmission electron microscopy (TEM) to assess cell structure in biological samples, so that they can determine structure-function relationships by integrating biochemistry, physiology and molecular biology with ultrastructure. The course emphasizes thin section transmission electron microscopy but ancillary subjects include immunogold affinity labeling, electron tomography, negative staining, elemental analysis and cryo-EM analysis of macromolecular complexes. The goals of the course are to provide a fundamental understanding of theory and operation of a transmission electron microscope, hands-on experience in biological specimen preparation, and competence for independent operation of the Danforth Center's TEM. Prerequisites: Biol 2970 and permission of instructor. Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4331 Algae: Cell Biology and Molecular Evolution
Algae are ubiquitous and highly diverse photosynthetic organisms: they are prokaryotic (cyanobacteria) and eukaryotic, unicellular and multicellular, and central to soil, fresh water and marine ecosystems. This course considers their molecular taxonomy and evolution, specific lineage adaptations (e.g., silicon in diatoms), life cycles, cell cycle and cell-division mechanisms, light and nutrient acquisition, storage products, cell and cell-wall organization, ecological habitats and symbioses (e.g., lichens), and commercial applications (e.g., carotene, omega-3 fatty acids and other nutraceuticals; biodiesel). A course for upper-level biology and bioengineering undergraduates and graduate students. T/Th 3:30–5:30 p.m. until spring break, when a second course, Biol 4830, is highly recommended as a sequel. Assigned readings of research literature pertaining to each lecture topic; final take-home exam covering lecture and reading material. Prerequisite: Biol 334 or Biol 4810 or instructor’s permission. Credit 2 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4342 Research Explorations in Genomics
A collaborative laboratory investigation of a problem in genomics, involving generation of a large data set (either genomic sequence or microarray analysis of gene expression) and computer analysis of the data. Class meets at the WU
Genome Sequencing Center during the first half of the semester and in the Biology Department the second half of the semester. Prerequisites: Biol 297A, Chem 111/112 and Chem 151/152 and permission of the instructor. While Biol 3371 or Biol 437 and some familiarity with computers would be advantageous, this is NOT required. Fulfills the upper-level laboratory requirement for the Biology major.

Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 434W Research Explorations in Genomics (Writing-Intensive)
Content equivalent to Biol 4342. Students electing the writing option are required to revise each of three papers (on finishing of their fosmid; gene finding in a human/chip comparison; and annotating their fosmid) at least once.

Credit 4 units. A&S: NS, WI A&S: IQ, NSM, WI FA: NSM

L41 Biol 437 Laboratory on DNA Manipulation
This course provides investigation-driven research on experimental manipulation of DNA and RNA molecules. This includes the construction, isolation and analysis of plasmids, RNA, PCR products and DNA sequencing. Molecular cloning (genetic engineering), gene knockouts (mutants), RNA isolation, RT-PCR and microarray projects are performed. Prerequisites: Biol 2960 and Biol 2970. One hour of lecture and eight hours of laboratory each week. This course fulfills the upper-level laboratory requirement for the Biology major. Enrollment is limited to 12. A laboratory fee is required for students who are not full-time Washington University undergraduates.

Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 450W Topics in the History of Eugenics
This is a research-based seminar that explores the history of eugenics both in the United States and abroad, roughly in the period 1890–1960. The seminar begins with reading of some of the seminal works in the history of eugenics coupled with a discussion of historiographical problems associated with this topic. The second part of the seminar is devoted to reading primary sources on various topics (race-crossing, family pedigrees, inheritance of specific traits such as criminality, feeblemindedness, manic depression, pauperism, etc. The third part of the course examines the transformation of eugenics in the population control movement of the 1950s and 1960s. Students give class reports on various readings and prepare four short papers (five to seven pages) as part of the writing-intensive requirement. Emphasis is on both the biological content and social/economic/political context of eugenics work in the first half of the 20th century.

Credit 3 units. A&S: NS, WI A&S: IQ, NSM, WI FA: NSM

L41 Biol 451 General Biochemistry
A study of structure-function relationships as applied to carbohydrates, proteins and lipids; intermediary metabolism of principal cellular components; and general aspects of regulation. Prerequisites: Biol 2970 and Chem 252 and permission of department. Recommended for students who have achieved grades of B or better in the prerequisites. Students may not receive credit for both Biol 4801 and Biol 451. Small class.

Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4520 Protein Function in Model Cellular Systems
The goal of this 3-credit laboratory course is to train students in the scientific method. Throughout this course, they study a protein involved in a cellular process. Students, working in small groups, use bioinformatics to identify this protein in a number of species, then use this information to hypothesize which residues of the protein are important for its function. Over the course of the semester, students test their hypotheses in two model systems for studying cellular function — the unicellular eukaryote Saccharomyces cerevisiae and the multicellular eukaryote Physcomitrella patens. The weekly lecture gives students the background necessary to understand and perform their experiments, including information on a variety of bioinformatics tools, phylogeny, protein structure, molecular techniques, cell biology and microscopy. In addition, students use primary literature to understand the role their assigned protein plays in their cellular process. Prerequisites: Biol 2960 and Biol 2970.

Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4522 Laboratory in Protein Analysis, Proteomics and Protein Structure
In this laboratory course, students learn principles and methods of protein quantitation, protein purification, assessment of purity using SDS-polyacrylamide gel electrophoresis, separation of complex protein mixtures by 2-dimensional gel electrophoresis, definition of units of enzymatic activity, and identification of proteins using antibodies and/or mass spectrometry. The final part of the course introduces students to concepts of structural biology including protein crystallization, X-ray crystallography and computer modeling of protein structures. Fulfills the upper-level laboratory requirement for the Biology major. Prerequisites: Chem 252 and either Biol 451 or Biol 4501/Chem 456. Permission of instructor required. Limit: eight students. Eight hours of laboratory/lecture per week.

Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4580 Principles of Human Anatomy and Development
This course is designed for both undergraduate and graduate students in the anthropological, biological, and/or pre-medical sciences who wish to learn about human anatomy from various evolutionary, functional, developmental and clinical perspectives. Lectures emphasize the organizational and developmental principles of various organ systems of the human body. The course also makes use of our extensive anatomy museum of labeled dissected human specimens as well as our cast
collections of numerous specimens from the human fossil
record where appropriate. Frequent use of X-rays, CT, and MRI
scans also are used to help students visualize human anatomy
from a number of different imaging modalities. Prerequisites:
undergraduate or graduate students in the anthropological,
biological, and/or pre-medical sciences who have had at least
one course in physical anthropology and/or biology, or consent
of instructor.
Same as Anthro 4581
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 472 Behavioral Ecology
This course examines animal behavior from an evolutionary
perspective and explores the relationships between animal
behavior, ecology and evolution. Topics include mating systems,
sexual selection, parental care, kin selection, and cooperation.
There is a strong active learning component. Prerequisite: Biol
2970 or permission of instructor.
Credit 4 units.

L41 Biol 4810 General Biochemistry I
Topics include the properties and structures of biomolecules,
including amino acids, nucleotides, lipids, carbohydrates,
proteins and nucleic acids. Additional topics include enzyme
kinetics and mechanisms, membrane structure and properties,
protein folding, an introduction to metabolism, oxidative
phosphorylation and photosynthesis. This course is the first
semester of an integrated two-semester sequence. The second
half of the course covers photosynthesis. This course is the first
half of a two-semester course that focuses on the biochemical,
cellular and physiological processes regulating how plants grow,
metabolize and respond to their environment. Prerequisite:
Biol 2970, Chem 262.
Same as Chem 482. Prerequisites: Biol 2970, Chem 262.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4820 General Biochemistry II
Continuation of General Biochemistry I. Topics include
carbohydrate, lipid and amino acid metabolism, signal
transduction, transport across membranes, DNA replication
and repair, transcription and translation, molecular motors,
mechanisms of drug action and natural products biosynthesis.
Prerequisite: Chem 481 or Biol 481.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4830 Bioenergy
A broad overview of the flow of energy, captured from sunlight
during photosynthesis, in biological systems and current
approaches to utilize the metabolic potentials of microbes
and plants to produce biofuels and other valuable chemical
products. An overall emphasis is placed on the use of large-scale
genomic, transcriptomic and metabolomic datasets in
biochemistry. The topics covered include photosynthesis; central
metabolism; structure and degradation of plant lignocellulose;
and microbial production of liquid alcohol, biodiesel, hydrogen
and other advanced fuels. Course meets during the second half
of the spring semester. Prerequisite: Biol 4810 or permission of
instructor.
Credit 2 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4831 Green Machines: Plant Physiology, Growth
and Bioenergy
This course introduces students to the fundamentals of plant
physiology and biochemistry and provides a broad overview of
the flow of energy captured from sunlight during photosynthesis,
in plants and microbes. The first half of the course focuses on
the biochemical, cellular and physiological processes regulating
how plants grow, metabolize and respond to their environment.
Topics covered include water and mineral uptake and transport;
source-sink relationships; long-distance transport of carbon and
nitrogen; cell growth and expansion; physiological responses
to changes in the environment; and interactions with other
organisms. The second half of the course covers photosynthesis
and bioenergetics and explores current approaches for
utilizing the metabolic potentials of plants and microbes to
produce biofuels and other valuable chemical products. An
overall emphasis is placed on the use of large-scale genomic,
transcriptomic and metabolomic datasets in biochemistry. The
topics covered also include central metabolism, structure and
degradation of plant lignocellulose, and microbial production
of liquid alcohol, biodiesel, hydrogen and other advanced fuels.
Note: Students interested primarily in the material covered
in the second half of the course, should enroll in Biol 4830
(offered during the second half of the spring semester). Because
this class includes the material of Biol 4830, a student may
not receive separate credit for this class and for Biol 4830.
Prerequisite: Biol 4810 or permission of instructor.
Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4832 Molecular Mechanisms of Photosynthesis and
Respiration
Photosynthesis is a biological process whereby the sun's
energy is captured and stored by a series of events that convert
the pure energy of light into the free energy needed to power
life. Respiration is a biological process that extracts energy
in a usable form from high-energy compounds produced by
photosynthesis. This course examines these essential biological
processes at the molecular level in both bacterial and eukaryotic
organisms. Emphasis is on chemiosmotic principles as well as
the structure and mechanism of action of the protein complexes
that carry out photosynthesis and respiration. Additional topics
include the assembly and regulation of these protein complexes
and the origin and evolution of these processes. Prerequisite:
Chem 482, Biol 4820 or Biol 451 or permission of instructor.
Credit 3 units.

L41 Biol 487 Undergraduate Teaching
Exceptional undergraduates serve as teaching assistants for
laboratory and/or discussion sections in departmental courses.
Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/no credit only. Credit variable, maximum 3 units. A&S: NS FA: NSM

L41 Biol 488 Undergraduate Teaching
Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/no credit only. Credit variable, maximum 3 units. A&S: NS

L41 Biol 493 Seminar in Advanced Biology
In special cases, credit may be given for individual study. Topics of study and credit must be arranged with a faculty sponsor and approved by the department. 
Credit variable, maximum 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L41 Biol 4933 Molecular Biology on the Cutting Edge
Recent biomedical discoveries have been greatly advanced through the development of innovative, state-of-the-art techniques. For example, Nuclear Magnetic Resonance (NMR) has proved to be an invaluable tool in both efforts to determine the atomic structure of proteins and small molecules, as well as in clinical settings, as MRI to identify tumors that would otherwise go unnoticed. This course introduces students to a variety of cutting-edge laboratory techniques, and discusses the impact of these techniques on biology and medicine. Students have the unique opportunity to learn from graduate students employing these approaches in their doctoral studies. Topics to be covered include: high-throughput sequencing of genetic disorders, x-ray crystallography, and single molecule force spectroscopy by AFM. Weekly classes consist of a 30-45 minute presentation on a particular technique, followed by a 60-minute discussion of the assigned readings. Prerequisites: Biol 2960 and 2970 and at least one semester of Biol 500 or equivalent research experience approved by the course master. Credit 2 units. A&S: NS A&S: IQ, NSM

Center for the Humanities

The Center for the Humanities, in partnership with the College of Arts and Sciences, offers the Merle Kling Undergraduate Honors Fellowship Program Seminar for juniors and seniors who apply to the program as second-semester sophomores. The Center also occasionally offers small freshman and sophomore seminars promoting humanistic thinking and preparing students for upper-level programs and research opportunities across Arts & Sciences.

The Minor in Children’s Studies is housed in the Center for the Humanities. In the Children’s Studies Minor, students learn about children and childhood while drawing on the expertise of departments and programs from across Arts & Sciences. Children’s Studies minors will develop a sophisticated interdisciplinary understanding of childhood and the issues surrounding the treatment and status of children throughout history. The minor combines social science courses that measure and analyze how children mature and how institutions have affected children with courses in the humanities that examine how children are portrayed and constructed in art, literature and film. Thus, a minor in Children’s Studies will supplement students’ majors while exposing them to an interconnected set of ideas about children as objects and subjects in a variety of essential disciplines.

Old Requirements: for students entering WU before Fall 2014:

Units required: 15

Required course (3 units):
CFH 300a Interdisciplinary Introduction to Children’s Studies 3

Core courses (6 units):
CFH 100B Introduction to Psychology 3
CFH 321 Developmental Psychology 3
CFH 334 History of Golden Age of Children’s Literature 3
CFH 313A Education Childhood and Society 3

Plus 6 additional units from either the core list or from elective courses (see above for a list of recently offered electives).

Additional Information

Under Arts & Sciences policy, this minor must have 12 units independent of any other majors or minors.

Under the Center for the Humanities (L56) designation, our courses have included:

CFH 101 Freshman Seminar: The Humanities: What They Are, Where They Are Going, and Why They Still Matter 3
CFH 102 Freshman Seminar: The Clash of Cultures: The Humanities in an Age of Science 3
CFH 121 Freshman Seminar: Blood, God and Country: American Soldiers as Writers 3
CFH 150 Freshman Seminar: Rattle and Hum: Reading Music in Literature 3
CFH 201 Bridging The Gap: The Scholar as Leader and Activist 2
CFH 202 Human Versus Computer: How Humanities and Technologies Are Changing Each Other 3
CFH 400W Merle Kling Undergraduate Honors Fellowship Seminar 3

Under the Children’s Studies (L66) designation, our courses include:

ChSt 178 Imagining and Creating Africa: Youth, Culture and Social Change 3
ChSt 236 Cultural History of the American Teenager 3
ChSt 299 Internship in Children’s Studies up to 3
ChSt 300 Interdisciplinary Introduction to Children’s Studies 3
ChSt 301C The American School 3
ChSt 304 Educational Psychology 3
ChSt 313B Education, Childhood and Society 3
ChSt 314 Children’s Literature Since World War II: From E.B. White to J.K. Rowling 3
ChSt 316F Rediscovering the Child: Interdisciplinary Workshops in an Urban Middle School 3
ChSt 316W Girls’ Fiction From Little Goody Two-Shoes to Nancy Drew 3
ChSt 3195 Abnormal Child Psychology 3
ChSt 321 Developmental Psychology 3
ChSt 323 Children and War 3
ChSt 325 Psychology of Adolescence 3
ChSt 3254 African Americans and Children’s Literature 3
ChSt 3270 Comics, Graphic Novels, and Sequential Art 3
ChSt 330 Children and Censorship: What We Permit Children to Read and Why 3
ChSt 331 Topics in Holocaust Studies: Children in the Shadow of the Swastika 3

Arts & Sciences (10/06/14)

Chemistry

For students interested in discovering insights into nature and exploring new ways to meet the needs of our technological society and new methods for creating novel compounds and useful materials, chemistry is an excellent major to pursue.

Chemistry is a multifaceted science that extends into biology, medicine, physics, mathematics, business and commerce. Studying chemistry provides the opportunity to explore the structure and constitution of the microworlds of atoms and molecules, the chemical and physical transformations that occur, and the principles that govern these changes.

Our program provides a strong foundation in the core areas of chemistry: organic, physical, inorganic, nuclear, theoretical. Special emphases in the department include such emerging interdisciplinary fields as organometallic, bioorganic, biophysical, macromolecular, polymer, environmental and materials chemistry. The department has close research ties with the departments of Physics; Earth and Planetary Sciences; Biology; Biomedical Engineering; Energy, Environmental and Chemical Engineering; Mechanical Engineering and Materials Science; and with departments at the Washington University School of Medicine.

Undergraduate majors in chemistry study chemistry with renowned scientists, who are teacher-scholars dedicated to the students’ learning experience. The department is small, and it has world-class instruments and facilities, which allows students to receive individualized instruction and to participate in cutting-edge science. Each student works closely with a faculty member to design and carry out an original research project. Students also may participate in interdisciplinary research at the School of Medicine or the School of Engineering & Applied Science. Research internships at local companies also can be arranged.

A variety of creative and productive careers are available to graduates with a degree in chemistry. Graduates may pursue a career in chemistry or such related professions as biochemistry, medicine and chemical engineering. Most students continue in graduate or medical school, and some go on to business or law school. Positions in government, industry and education are also available.

The Major in Chemistry

Total units required: 54-62

Required courses: To prepare for a major in chemistry, students will take:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 111A</td>
<td>General Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>Chem 112A</td>
<td>General Chemistry II</td>
<td>3</td>
</tr>
<tr>
<td>Chem 151</td>
<td>General Chemistry Laboratory I</td>
<td>2</td>
</tr>
<tr>
<td>Chem 152</td>
<td>General Chemistry Laboratory II</td>
<td>2</td>
</tr>
<tr>
<td>Chem 261</td>
<td>Organic Chemistry I with Lab</td>
<td>4</td>

<tr>
<td>Math 233</td>
<td>Calculus III</td>
<td>3</td>
</tr>
</tbody>
</table>

Majors in chemistry must take a minimum of 18 units in advanced courses in chemistry or biochemistry, among which must be included:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 401</td>
<td>Physical Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>Chem 402</td>
<td>Physical Chemistry II</td>
<td>3</td>
</tr>
<tr>
<td>Chem 461</td>
<td>Inorganic Chemistry</td>
<td>3</td>
</tr>
</tbody>
</table>

plus 9 units in chemistry at the 300-level or above (not all in the same chemistry subdiscipline and not including Chem 490 Introduction to Research or Chem 495 Advanced Undergraduate Research in Chemistry).

At least 3 of these 9 advanced units must be in a laboratory course, chosen from:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 358</td>
<td>Organic Chemistry Laboratory II</td>
<td>4</td>
</tr>
<tr>
<td>Chem 435</td>
<td>Nuclear and Radiochemistry Lab</td>
<td>3</td>
</tr>
<tr>
<td>Chem 445</td>
<td>Instrumental Methods: Physical Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>Chem 470</td>
<td>Inorganic Chemistry Laboratory</td>
<td>3</td>
</tr>
</tbody>
</table>

Also, Physics 217 Introduction to Quantum Physics and additional mathematics courses are recommended. Chem 181 Freshman Seminar in Chemistry, a seminar to introduce first-year students to research activities in the department, is optional. A working knowledge of computer programming and a foreign language, such as German or Russian, is encouraged but not required.
Students have the advantage of planning their course program with their adviser in accordance with personal interests. Some graduate courses also are available to seniors.

All Chemistry course work must be taken in residence at Washington University to be eligible to earn a Chemistry Major.

The Major with Concentration in Biochemistry

Chemistry majors with a concentration in biochemistry should add Biol 2960 Principles of Biology I and Biol 2970 Principles of Biology II as prerequisites to the major and specify a minimum of 18 units in advanced courses in biology and chemistry, among which must be included:

- Biol 334 Cell Biology 3
- or Biol 349 Microbiology
- Chem 481 General Biochemistry I 3
- Chem 401 Physical Chemistry I 3
- Chem 402 Physical Chemistry II 3
- Chem 461 Inorganic Chemistry 3

and at least one advanced lab chosen from:

- Chem 358 Organic Chemistry Laboratory II 4
- Chem 435 Nuclear and Radiochemistry Lab 3
- Chem 445 Instrumental Methods: Physical Chemistry 3
- Chem 470 Inorganic Chemistry Laboratory 3
- Biol 437 Laboratory on DNA Manipulation 4
- Biol 4522 Laboratory in Protein Analysis, Proteomics and Protein Structure 3

All Chemistry course work must be taken in residence at Washington University to be eligible to earn a Chemistry Major.

Additional Information

Latin Honors for the major in Chemistry: To qualify for Latin honors, students must complete a minimum of 21 units in advanced courses in chemistry or biochemistry, among which must be included Chem 401 Physical Chemistry I, Chem 402 Physical Chemistry II, Chem 461 Inorganic Chemistry; two additional advanced courses in chemistry; and two additional laboratories: one synthetic laboratory course (either Chem 358 Organic Chemistry Laboratory II or Chem 470 Inorganic Chemistry Laboratory) and one physical chemistry laboratory course (Chem 435 Nuclear and Radiochemistry Lab or Chem 445 Instrumental Methods: Physical Chemistry). Neither Chem 490 Introduction to Research nor Chem 495 Advanced Undergraduate Research in Chemistry can be used to satisfy the advanced laboratory requirements, but Chem 495 can be used to satisfy an elective.

Latin Honors for the major in Chemistry with Concentration in Biochemistry: To qualify for Latin honors, students must complete a minimum of 21 units in advanced courses and have one laboratory course in advanced chemistry or biology chosen from Chem 358 Organic Chemistry Laboratory II, Chem 435 Nuclear and Radiochemistry Lab, Chem 445 Instrumental Methods: Physical Chemistry, Chem 470 Inorganic Chemistry Laboratory, Biol 437 Laboratory on DNA Manipulation, or Biol 4522 Laboratory in Protein Analysis, Proteomics and Protein Structure, and both biochemistry courses, Chem 481 General Biochemistry I and Chem 482 General Biochemistry II.

Departmental Honors for the majors in Chemistry and Chemistry with a Concentration in Biochemistry: To graduate “with distinction,” a student must maintain a Chemistry GPA of 3.5 and complete at least one semester of Chem 490 research. To graduate “with high distinction,” a student must maintain a Chemistry GPA of 3.65 and complete at least two semesters of chemistry research, one of which is Chem 495. To graduate “with highest distinction,” a student must maintain a Chemistry GPA of 3.8 and complete at least two semesters of chemistry research, one of which is Chem 495. Chemistry research is defined as a research project performed under the direction of a Chemistry faculty member, or a research project approved by the Chemistry Department Undergraduate Work Committee. A Chemistry GPA is calculated from the grades received in Chemistry courses and Chemistry prerequisites. The level of Departmental Honors a student achieves will appear on the student’s final transcript.

The Minor in Chemistry

Units required: 27 in chemistry; 17 in math and physics

Required courses:

- Chem 111A General Chemistry I 3
- Chem 112A General Chemistry II 3
- Chem 151 General Chemistry Laboratory I 3
- Chem 152 General Chemistry Laboratory II 3
- Chem 261 Organic Chemistry I with Lab 4
- Chem 262 Organic Chemistry II with Lab 4
- Math 131 Calculus I 3
- Math 132 Calculus II 3
- Math 233 Calculus III 3
- Physics 117A General Physics I 4
- or Physics 197 Physics I 4
- Physics 118A General Physics II 4
- or Physics 198 Physics II 4

Elective courses:

9 units of Chemistry encompassing three courses in at least two subdisciplines. Courses must be 300-level or above, but Chem 490 Introduction to Research is specifically excluded.

All Chemistry course work must be taken in residence at Washington University to be eligible to earn a Chemistry Minor.
L07 Chem 111A General Chemistry I
Systematic treatment of fundamental chemical principles and their applications. Particular reference to the concept of energy and its uses, gas laws, kinetic molecular theory, atomic and molecular structure, chemical bonding, and the periodic classification of the elements. Prerequisites: two years of high school algebra and one of high school chemistry, or permission of instructor.
Credit 3 units. A&S: NS, QA A&S: IQ, NSM, AN BU: SCI FA: NSM

L07 Chem 112A General Chemistry II
Introduction to the principles of chemical equilibrium and to ionic solutions. Topics: ionic equilibria, galvanic cells, elementary chemical thermodynamics and kinetics, and molecular structure of coordination compounds. Three lecture hours and a problem-solving subsection hour. Sign-up for subsections is conducted during the first two weeks of the semester. Prerequisite: Chem 111A or permission of instructor.
Credit 3 units. A&S: NS, QA A&S: IQ, NSM, AN BU: SCI FA: NSM

L07 Chem 151 General Chemistry Laboratory I
This course provides an introduction into basic laboratory techniques, the experimental method, and the presentation of scientific data, as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in the Chem 111A lecture course. Students attend a lab lecture every Monday and perform experiments during their scheduled lab section every week. The first lab lecture is scheduled on August 25. However, students with weak chemistry backgrounds are strongly recommended to attend the two extra lectures scheduled at 5 p.m. on August 25 and September 8. They also are encouraged to attend the help sessions offered every Monday at 5 p.m. Students should pay careful attention to the fall calendar for special events such as religious holidays, athletic activities and other travel when selecting a laboratory section. A mid-term examination during the first two weeks of the semester. Prerequisite: concurrent enrollment in Chem 111A or permission of the instructor.
Credit 2 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 152 General Chemistry Laboratory II
This course provides an introduction into basic laboratory techniques, the experimental method, and the presentation of scientific data as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in the Chem 112A lecture course. Students attend one four-hour laboratory session and one one-hour laboratory lecture every other week. Prerequisite: concurrent enrollment in Chem 112A or permission of the instructor.
Credit 2 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 181 Freshman Seminar in Chemistry
A weekly lecture by a chemistry faculty member or other scientist from academia or industry on the lecturer’s current research activities. The goal is to provide students with a sampling of current research activities dealing with fundamental and applied problems in science and society that are being approached from a chemical point of view. Students see how fundamental chemical principles can be obtained from experiment and theory and used to both better understand and make better the world we live in. Each week a different scientist presents a lecture or offers an additional activity. Intended primarily for freshmen who anticipate majoring in science, but interested upperclass students also should find the lectures interesting and stimulating. Students are expected to attend all lectures and associated activities during the semester. Enrollment is limited. Credit/no credit only.
Credit 1 unit. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 261 Organic Chemistry I with Lab
The first part of a two-semester survey of organic chemistry. The course includes an introduction to organic structures, reactions and reaction mechanisms. The laboratory meets on alternate weeks and include an introduction to laboratory methods in organic chemistry, including separation and methods of purification of organic compounds. Prerequisites: Chem 112A, Chem 152.
Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 262 Organic Chemistry II with Lab
A course covering certain areas of organic chemistry in more detail than the prerequisite course, with special emphasis on the mechanisms and the synthetic applications of organic reactions and on the organic chemistry of biological compounds. The laboratory meets eight times and includes organic synthesis and spectroscopic techniques. Required course for chemistry majors.
Prerequisite: Chem 261.
Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 290 Freshman and Sophomore Research
Introduction to laboratory research for first- and second-year students. Students work under supervision of a faculty sponsor. Prerequisite: permission of the sponsor and the Department of Chemistry. Credit/no credit only.
Credit variable, maximum 3 units. A&S: NS A&S: IQ, NSM FA: NSM
L07 Chem 299 Chemical Laboratory Safety
An overview of current laboratory safety, regulatory and compliance practices. Safety and compliance issues that impact chemical, biological and materials research is covered through a series of lectures, demonstrations, activities and laboratory exercises.
Credit 0.5 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 358 Organic Chemistry Laboratory II
Initially, problem solving in organic chemistry is emphasized through an introduction to the methods of qualitative organic analysis, including the use of chromatographic and spectroscopic techniques. Each student then selects an independent synthetic project to perform. Prerequisite: Chem 262. Six laboratory hours per week. Lectures held three hours a week for the first half of the semester.
Credit 4 units. A&S: NS, WI A&S: IQ, NSM, WI FA: NSM

L07 Chem 400 Physical Science in 12 Problems
Exercises related to general chemistry, classical mechanics, quantum mechanics, statistical mechanics, thermodynamics and kinetics, are solved with numerical software. Each exercise is accompanied by a lecture, a software template solving a problem and a related take-home problem. The software allows us to focus on, and treat in a transparent fashion, physical problems without the unworldly idealizations and contrivances found in textbooks. Prerequisites: Chem 111A Chemistry I, concurrent enrollment with Chem 401 and prior or concurrent enrollment in Physics 117A Physics I.
Credit 1 unit. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 401 Chemical Kinetics
This lecture course provide an introduction to the kinetics of chemical reactions for graduate and upper-level undergraduate science and engineering students. Bulk and molecular level considerations are discussed and provide a foundation for the understanding of chemical reaction mechanisms and the techniques used for their study. Students gain an understanding of the importance and significance of the rate laws of reactions and in particular the reaction rate constant. Details of how the environment in which reactions occur (e.g., gas phase, solution phase and surface reactions) and molecular structure are reflected in the rate constant are discussed. Examples such as catalytic loss cycles in the atmosphere, enzyme catalysis, combustion systems, chain reactions and explosions are presented in detail to illustrate how the fundamental principles of chemical kinetics can be applied to predict reaction rates, chemical reactivity and the outcomes of particular processes.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 435 Nuclear and Radiochemistry Lab
Application of radiochemical techniques to problems in chemistry, physics and nuclear medicine. Prerequisites: 3 units of physical chemistry and permission of instructor. One lecture hour and five hours of laboratory a week.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM
L07 Chem 451 Organic Chemistry III
A lecture course that builds on the material in Chem 261 and Chem 262, covering in more detail certain topics in those courses while also introducing new topics. A transition to graduate-level study in organic chemistry; recommended for chemistry, biochemistry and biology majors. Prerequisite: Chem 262.
Credit 3 units. A&S: NS; A&S: IQ; NSM: FA: NSM

L07 Chem 453 Bioorganic Chemistry
The focus of this course is an overview of modern medicinal chemistry from the selection of a therapeutic target through the FDA-approval process. Each aspect is exemplified by examples of drugs currently in clinical use or in late-stage development. One aspect of particular interest to synthetic chemists is the underlying development chemistry that often determines the competitive success of a product. Topics covered include peptidomimetic HIV protease inhibitors, topoisomerase inhibitors, HMGCoA-reductase inhibitors (Liptor, etc.), receptor tyrosine-kinase inhibitors (Gleevec, etc.), a synthetic mimic of superoxide dismutase, and several others depending on the interests of the participants. Students are responsible for presenting to the class the synthetic routes developed for the discovery and commercialization of these drugs focusing on development chemistry. Prerequisite: Chem 262.
Credit 3 units. A&S: NS; A&S: IQ; NSM: FA: NSM

L07 Chem 458 Chemical Reaction Mechanism Journal Club
This seminar meets for one hour each week. During the meetings, student participants are responsible for presenting topics from the current literature. The format of the presentation varies from informal talks to student-authored problem sets. Attendance at meetings is strongly recommended for all students who are currently taking the organic cumulative examinations. Prerequisite: Chem 262.
Credit 1 unit. A&S: NS; A&S: IQ; NSM: FA: NSM

L07 Chem 459 Organometallic Chemistry
Survey of organometallic compounds with discussion of their synthesis, structure, spectroscopy and reactivity. Prerequisite: Chem 252.
Credit 3 units. A&S: NS; A&S: IQ; NSM: FA: NSM

L07 Chem 461 Inorganic Chemistry
Introduction to modern inorganic chemistry; emphasis on relation of structure and bonding to the chemical and physical properties of compounds. Prerequisite: Chem 401 or permission of instructor.
Credit 3 units. A&S: NS; A&S: IQ; NSM: FA: NSM

L07 Chem 464 Inorganic Biochemistry
A class in biological chemistry that emphasizes the role of metals in electron transfer and enzymatic catalysis. After a brief survey of essential concepts from biology, coordination chemistry and spectroscopy, topics include: electron transfer systems; oxygen transport and activation; metal ion acquisition, transport and homeostasis; enzymes catalyzing atom transfer reactions and radical-mediated processes. Prerequisites: Chem 252; Chem 461 recommended but not required.
Credit 3 units. A&S: NS; A&S: IQ; NSM: FA: NSM

L07 Chem 465 Solid-State and Materials Chemistry
The course begins with basic crystallography and common inorganic structure types. With the aid of computer modeling, students learn to analyze, index and refine X-ray powder-diffraction data. Students are then taught to use phase diagrams to assess the compositions and microstructures of materials produced by various synthetic or processing methods. Crystal nucleation and growth, defects, and ion-conduction mechanisms are also introduced. The course concludes with an analysis of the mechanical properties of materials from a chemistry perspective. What makes some materials strong, stiff and resistant to fracture? Prerequisites: Chem 111A-Chem 112A.
Credit 3 units. A&S: NS; A&S: IQ; NSM: FA: NSM

L07 Chem 470 Inorganic Chemistry Laboratory
A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises introduce novel synthetic techniques such as high-temperature synthesis and vacuum line manipulations. Compounds are spectroscopically characterized by UV-visible, gas-phase infrared, and multinuclear and dynamic NMR spectroscopy. Measurements of electrochemical behavior, magnetic susceptibility and electrical conductivity are performed. Prerequisite: Chem 461 or consent of the instructor.
Credit 3 units. A&S: NS; A&S: IQ; NSM: FA: NSM

L07 Chem 470W Inorganic Chemistry Laboratory — Writing Intensive
A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises introduce novel synthetic techniques such as high-temperature synthesis and vacuum line manipulations. Compounds are spectroscopically characterized by UV-visible, gas-phase infrared, and multinuclear and dynamic NMR spectroscopy. Measurements of electrochemical behavior, magnetic susceptibility and electrical conductivity are performed. Prerequisite: Chem 461 or consent of the instructor. This course satisfies the writing-intensive requirement.
Credit 3 units. A&S: NS, WI; A&S: IQ, NSM, WI FA: NSM
L07 Chem 475 Chemical Biology

This course is a survey of modern chemical biology focusing on the application of a broad array of chemical tools to biological problems. The course is roughly divided into four sections: biopolymers; computational methods and bioinformatics; tools for chemical biology; and applications of chemical biology. A mandatory discussion section accompanies the course and is used to review current and classical literature in the field. Prerequisites: Chem 262 and Biol 2970, or permission of the instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 477 Modern Medicinal Chemistry

The focus of this course is an overview of Modern Medicinal Chemistry from the selection of a therapeutic target through the FDA-approval process. Each aspect is exemplified by examples of drugs currently in clinical use, or in late-stage development. One aspect of particular interest to synthetic chemists is the underlying development chemistry that often determines the competitive success of a product. Topics covered include peptidomimetic HIV protease inhibitors, topoisomerase inhibitors, HMGCoA-reductase inhibitors (Lipitor, etc.), receptor tyrosine-kinase inhibitors (Gleevec, etc.), a synthetic mimetic of superoxide dismutase, and several others depending on the interests of the participants. Students are responsible for presenting to the class the synthetic routes developed for the discovery and commercialization of these drugs focusing on development chemistry. Prerequisite: Chem 262 or permission of the instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 478 Molecular Modeling

A survey of a wide range of techniques and applications in molecular modeling and computational chemistry, including "ab initio" quantum mechanics, semi-empirical MO theory, molecular mechanics, molecular dynamics simulation, coarse-grained models, electrostatic methods and biomolecular structure prediction. In addition to traditional lectures, students gain hands-on experience with a variety of computer modeling programs, and are expected to complete an individual project in their particular area of interest. Prerequisites: previous course experience in physical chemistry at the level of Chem 401–Chem 402, or permission of the instructor. Some familiarity with computer basics (text editing, simple scripting and using the "command line" in either Linux, Windows or Mac OS X) is recommended. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 481 General Biochemistry I

Topics include the properties and structures of biomolecules, including amino acids, nucleotides, lipids, carbohydrates, proteins and nucleic acids. Additional topics include enzyme kinetics and mechanisms, membrane structure and properties, protein folding, an introduction to metabolism, oxidative phosphorylation, and photosynthesis. This course is the first semester of an integrated two-semester sequence. The second course is Chem 482. Prerequisites: Biol 2970, Chem 262. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 482 General Biochemistry II

Continuation of General Biochemistry I. Topics include carbohydrate, lipid and amino acid metabolism, signal transduction, transport across membranes, DNA replication and repair, transcription and translation, molecular motors, mechanisms of drug action and natural products biosynthesis. Prerequisite: Chem 481 or Biol 481. Same as Biol 4820. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 488 Modern Spectroscopy

This course focuses on the fundamental principles and methodologies associated with numerous optical spectroscopy techniques that are commonly utilized in physical and life sciences research laboratories. In order to develop a solid understanding of the material as well as best practices, and the strengths and limitations of the techniques, this course combines lectures with laboratory experiments. Students also learn how to analyze and interpret data and succinctly describe their results. During one lecture each week the underlying principles of a specific type of spectroscopy are presented. The second lecture each week is spent covering the general details of the instrumentation and methods for acquiring spectra on different types of samples. The students then acquire spectra using the spectroscopic methods presented during the laboratory session. The students independently analyze the data and write brief reports of their findings. During the last two weeks of class, pairs of students are given an unknown, and they need to identify and characterize the sample. Students then write and submit a final report describing this independent research and their findings. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 490 Introduction to Research

Advanced laboratory work on a selected topic in chemistry. Prerequisite: permission of the department. Credit/no credit only. If this course is to be submitted for Honors, the student must file the Honors form available at the chemistry department office before the end of junior year. Arrangements for registration should be completed during the preregistration period. Credit variable, maximum 6 units. A&S: NS A&S: IQ, NSM FA: NSM

L07 Chem 495 Advanced Undergraduate Research in Chemistry

The student conducts research supervised by a chemistry department faculty member. At the end of the semester, the
The Major in Chinese Language and Culture

Units required: 27 upper-level (300-level or above) units, no more than 12 of which may be in language.

Prerequisites:
1. First- and second-level Modern Chinese or the equivalent
2. Chinese 227C Chinese Civilization

Requirements:
1. Chinese 427 Fourth-Level Modern Chinese I and
   Chinese 428 Fourth-Level Modern Chinese II or the equivalent
2. A minimum of one semester of Traditional Literary Chinese
   (Chinese 410 Introduction to Traditional Literary Chinese I or Chinese 411 Introduction to Literary Chinese II) or the equivalent. Chinese 410 can only be counted as a language course; Chinese 411 may be counted as either a language or a literature course.
3. Chinese 341 Literature of Early and Imperial China and
   Chinese 342 Literature of Modern and Contemporary China
4. Three additional upper-level courses in Chinese literature and/or culture
5. Senior Capstone Experience. All students for whom Chinese is a primary major may satisfy their capstone requirement in one of two ways, both of which require participation in the EALC Senior Symposium in the spring.
   a) Successful completion of a senior honors thesis.
      This option, which also entitles the student to Latin Honors, requires a minimum of a 3.65 GPA. The thesis is researched and written over two semesters, for a total of 6 units, which are in addition to the 27 upper-level units required for the major.
   b) Successful completion of an approved 400-level seminar course, to be taken in the senior year. (This course may be included among the three additional required upper-level courses for the major.)

Please note that all majors, including second majors, must participate in the EALC Senior Symposium.

Additional Information
1. Students must earn at least a B– in language courses in order to continue to the next level. They must also maintain at least a B– average in all required courses for the major. Students who do not meet this requirement may either repeat the course(s) in question or earn at least a B– in an
approved equivalent course or courses (either during the summer or in a study abroad program).

2. Courses for the major may not be taken Credit/No Credit.

3. Normally, no more than 6 units of transfer or study abroad non-language courses may be applied to the major.

4. Normally, no more than 3 units of Independent Study may be counted toward the required upper-level 27 units.

The Minor in Chinese Language and Culture

Units required: 18 units, no more than 12 of which may be in language.

Requirements:

• At least two years of modern Chinese or the equivalent
• At least 9 units must be 300-level or above
• And the following courses:

  Chinese 227C  Chinese Civilization (and)  3
  Chinese 341   Literature of Early and Imperial China  3
  or Chinese 342  Literature of Modern and Contemporary China

Additional Information

• Students must earn at least a B– in their language courses in order to continue to the next level. They must also maintain at least a B– average in all courses taken to fulfill the minor requirements. Students who do not meet this requirement may either repeat the course(s) in question or successfully complete an approved equivalent course or courses (either during the summer or in a study abroad program).

• Students who place out of our language courses, in consultation with their adviser, must enroll in Traditional Literary Chinese and/or additional content courses that are home-based in EALC to meet the required total units for the minor.

• Courses for the minor may not be taken Credit/No Credit.

• Normally, no more than 3 units of transfer or study abroad non-language courses may be applied to the minor.

L04 Chinese 101D First-Level Modern Chinese I
Introduction to the modern spoken and written national language of China. Five regular hours and additional drill or laboratory sessions as assigned by instructor. Students with some previous Chinese language background must take placement examination.
Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L04 Chinese 102D First-Level Modern Chinese II
Continuation of 101D. Prerequisite: grade of B– or better in 101D, or placement by examination. Five regular hours and additional drill or laboratory sessions as assigned by instructor.
Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L04 Chinese 106 Beginning Chinese for Heritage Speakers I
This course is designed for students who have basic speaking and listening skills and some background in writing or reading. Three class hours plus one additional hour are required. Prerequisite: placement by examination.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS BU: HUM

L04 Chinese 107 Beginning Chinese for Heritage Speakers II
Continuation of 106. Emphasis on improving basic reading and writing skills. Three class hours plus one additional hour are required. Prerequisite: grade of B– or better in Chinese 106 or placement by examination.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS BU: HUM

L04 Chinese 150 Freshman Seminar
Credit 3 units. A&S: TH

L04 Chinese 206 Intermediate Chinese for Heritage Speakers I
Designed for students who have either completed Chinese 107 or who have basic speaking and listening skills and mastery of at least 300 written characters. Three class hours plus one additional drill hour. Prerequisite: grade of B– or better in Chinese 107, or placement by examination.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS BU: HUM

L04 Chinese 207 Intermediate Chinese for Heritage Speakers II
Designed for students who have either completed Chinese 206 or who have basic speaking and listening skills and mastery of at least 800 written characters. Four class hours a week. Prerequisite: grade of B– or better in Chinese 206, or placement by examination.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS BU: HUM

L04 Chinese 211 Second-Level Modern Chinese I
The standard second-year level of instruction in modern Chinese. Students learn both long and short forms of characters. Prerequisite: grade of B– or better in Chinese 102D or placement by examination. Five hours a week, plus drill and laboratory sessions as required by instructor.
Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L04 Chinese 212 Second-Level Modern Chinese II
The standard second-year level of instruction in modern Chinese. Students learn both long and short forms of characters. Prerequisite: grade of B– or better in Chinese 211 or placement by examination. Five hours a week, plus drill and laboratory sessions as required by instructor.
Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS
L04 Chinese 227C Chinese Civilization
An introduction to Chinese culture through selected topics that link various periods in China’s past with the present. Ongoing concerns include social stratification, political organization and the arts, gender relationships and the rationales for individual behavior, and the conceptions through which Chinese have identified their cultural heritage. Our readings include literary, philosophical and historical documents as well as cultural histories. Regular short writing assignments: take-home final. No prerequisites.
Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD, SD BU: BA, IS EN: H

L04 Chinese 303 The Taoist Tradition
This course offers an introduction to the ethical aspects of the Taoist tradition through the study of a select number of literary and philosophical texts ranging from ca. 300 BCE through the present day. We explore questions regarding the relationship between nature and culture, conceptions of the self, and ideas about the good life.
Same as Re St 303
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: ETH EN: H

L04 Chinese 3055 Contemporary Chinese Culture and Society
Same as Anthro 3055
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD EN: S FA: SSP

L04 Chinese 306 Advanced Chinese for Heritage Speakers I
This course is designed for heritage students who have studied at least two years of Chinese (or equivalent) with grade B– or better to achieve greater proficiency in the oral and written use of the language through reading, listening, speaking and writing.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS EN: H

L04 Chinese 307 Advanced Chinese for Heritage Speakers II
Continuation of Chinese 306.
Credit 3 units. A&S: LA A&S: IQ, LCD, LS EN: H

L04 Chinese 3160 Merchants, Monarchs, Monasteries and Mosques: China & Eurasia Since the Middle Ages
Same as History 3160
Credit 3 units.

L04 Chinese 3162 Early Modern China
This course examines political, socioeconomic and intellectual-cultural developments in Chinese society from the middle of the 14th century to 1800. This chronological focus largely corresponds to the last two imperial dynasties, the Ming (1368–1644) and Qing (1644–1911). Thematically, the course emphasizes such early modern indigenous developments as increasing commercialization, social mobility and questioning of received cultural values.
Same as History 3162
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: IS EN: H

L04 Chinese 3163 Historical Landscape and National Identity in Modern China
This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campus, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens and churches. Using methods of historical and cultural anthropological analysis, the course investigates the places where we see with historical meaning. Through exploring the ritual, political and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory and changing over time are an important concern of this course.
Same as East Asia 3163
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H

L04 Chinese 316C Modern China
Same as History 316C
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: IS FA: SSP

L04 Chinese 330 Topics in Chinese Literature and Culture
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD

L04 Chinese 3310 19th-century China: Violence and Transformation
This course traces the history of China over the course of the 19th century, with an emphasis on social and cultural history. This was one of the most tumultuous centuries in Chinese history, during which China faced threats from abroad in the form of Western and Japanese imperialism, and from within, in the form of environmental degradation and rebellions resulting in an unprecedented loss of human life. The 19th century has thus often been portrayed as a period of sharp decline for China. At the same time, we explore the ways in which the origins of the dynamic society and economy found in China today, as well as
the worldwide influence of overseas Chinese, can be traced to this century of turmoil.
Same as History 331
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD

L04 Chinese 3352 China’s Urban Experience: Shanghai and Beyond
Same as East Asia 3352
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L04 Chinese 341 Literature of Early and Imperial China
An introduction to important genres and themes of Chinese literature through the study of major writers. Brief lectures on the writers’ personal, social, intellectual and historical contexts; most class time is devoted to student discussions of masterworks as an avenue for understanding Chinese culture during selected historical periods. Required for all Chinese majors, and recommended for all Japanese and East Asian Studies majors. No prerequisites; all readings available in English translation.
Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD, SD BU: HUM EN: H FA: Lit

L04 Chinese 3415 Early Chinese Art: From Human Sacrifice to the Silk Road
Same as Art-Arch 3415
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H FA: AH

L04 Chinese 342 Literature of Modern and Contemporary China
An introduction to the major writers and works of Chinese literature from the turn of the 20th century to the present, including fiction, poetry and film. We look at these works in their relevant literary, sociopolitical and cultural contexts (including Western influences). Required for all Chinese majors, and recommended for all Japanese and East Asian Studies majors. No prerequisites; all readings available in English translation.
Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD BU: ETH FA: Lit

L04 Chinese 3425 Classical to Contemporary Chinese Art
Surveying Chinese art and architecture from the 10th century through today, this course examines classical and imperial works as the foundation for modern and contemporary art. Engaging with the theoretical issues in art history, we also pay particular attention to questions of gender, social identity, cultural politics and government control of art. No prerequisites.
Same as Art-Arch 3425
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L04 Chinese 3426 20th-century Chinese Art
This course explores the ways in which Chinese artists of the 20th century have defined modernity and tradition against the complex background of China’s history. Through examining art works in different media along with other documentary materials, we engage with the theoretical issues in art history, such as modernity, cultural politics, and government control of art.
Same as Art-Arch 3426
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H

L04 Chinese 360 Third-Level Modern Chinese I
Emphasis on improving speaking, listening, reading and writing skills. Texts include Chinese newspapers and modern literary texts. Open to undergraduates only. Prerequisite: grade of B– or better in Chinese 212 or placement by examination.
Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L04 Chinese 361 Third-Level Modern Chinese II
Continuation of advanced work in reading Chinese newspapers and modern literary texts. Open to undergraduates only. Prerequisite: grade of B– or better in Chinese 360 or placement by examination.
Credit 5 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS

L04 Chinese 376 Topics in Comparative Literature
Same as Comp Lit 375
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD FA: Lit

L04 Chinese 382 Writing Women of Imperial China
Women writers can be found throughout most of China’s imperial history, and from the 16th century on, there was an extraordinary number of women writing and publishing their poetry collections. Despite this fact, only a very few writings by women were included in the traditional literary canon and until recently, they were not considered worthy of scholarly attention. Fortunately, there is now a growing body of critical studies on, and translations of, these women writers. In this course, we explore the writings of Chinese women from the 1st to the early 20th centuries and discuss the changing historical and social contexts within which these women wrote and the obstacles of both genre and gender that had to be overcome in order to ensure that their voices were heard. Prerequisite: at least one course in Chinese literature or culture or instructor’s permission.
Credit 3 units. A&S: TH, CD, WI A&S: IQ, HUM, LCD, WI BU: HUM EN: H

L04 Chinese 399 Undergraduate Independent Study
Prerequisite: permission of instructor and section head.
Credit variable, maximum 6 units.
L04 Chinese 4011 Popular Culture and Consumption in Modern China
This writing-intensive seminar explores transformations in popular culture and everyday life in Chinese society since 1949, through an analytical focus on political economy and material culture. Drawing upon ethnographic texts, films and material artifacts, we investigate how the forces of state control and global capitalism converge to shape consumer desires and everyday habits in contemporary China. Case studies include eating habits, fashion standards, housing trends, entertainment, sports and counterfeit goods. Prerequisite: previous course in China studies (anthropology, economics, history, literature, philosophy or political science) required. Enrollment by instructor approval only.

Credit 3 units. A&S: SS, CD, WI A&S: IQ, SSC, LCD EN: S FA: SSP

L04 Chinese 403 Topics in East Asian Religion and Thought
Same as Re St 403
Credit 3 units. A&S: TH, CD A&S: IQ, HUM EN: H

L04 Chinese 410 Introduction to Traditional Literary Chinese I
Selected readings in premodern Chinese texts. Required of all majors in Chinese and students in fields of specialization where knowledge of literary Chinese is normally expected. Prerequisite: grade of B– or better in Chinese 427 or instructor's permission. Credit 3 units. A&S: LA A&S: IQ, LCD, LS BU: HUM, IS FA: Lit

L04 Chinese 411 Introduction to Literary Chinese II
Selected readings in premodern Chinese texts. Required of all majors in Chinese and students in fields of specialization where knowledge of literary Chinese is normally expected. Prerequisite: grade of B– or better in Chinese 410 or instructor's permission. Credit 3 units. A&S: LA A&S: IQ, LCD, LS FA: Lit

L04 Chinese 414 Readings in Classical Chinese Philosophy
In this course we study Chinese philosophical texts from the classical period (ca. 6th to 3rd centuries BCE). We read selections from the Analects, the Menczi, the Xunzi, the Zhuangzi, the Dao de Jing and the Hanyu, in addition to commentaries on these primary texts. The readings are in classical Chinese with occasional supplemental readings in English and modern Chinese. The aim of the course is to familiarize students with the language and grammar of Chinese philosophical texts, introduce students to the tradition of scholarly commentary, and explore a set of influential Chinese texts in the original language. Prerequisite: Chinese 411 or instructor's permission. Credit 3 units. A&S: TH, CD

L04 Chinese 416 Advanced Composition in Chinese II
This course is a continuation of Chinese 413. Students continue to work to improve their ability to write letters, essays, reports and other types of compositions in Chinese. This course is conducted entirely in Chinese. Credit 3 units. A&S: LA A&S: IQ, LCD EN: H

L04 Chinese 418 Gender and Sexuality in East Asian Religions
In this course we explore some of the primary gender ideals and realities, images and self-representations in the religions of China, Japan and Korea. Primary emphasis on East Asian Buddhism (esp. Zen and Pure Land), Daoism, Shinto and popular religious traditions such as Shamanism, with a discussion of Confucianism. Selected reading and discussion materials include scriptural texts, poetry, fiction, drama (in English translation), painting and archaeological evidence, films and videos, and secondary scholarly and ethnographic studies. Prerequisite: at least one introductory course in East Asian religions or civilizations (Chinese, Japanese or Korean) is recommended. Same as Re St 418
Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD EN: H

L04 Chinese 427 Fourth-Level Modern Chinese I
Readings in advanced texts covering a wide variety of fields in social sciences and humanities. Prerequisite: grade of B– or better in Chinese 361 or 421, or placement by examination. Credit 3 units. A&S: LA A&S: IQ, LCD, LS

L04 Chinese 428 Fourth-Level Modern Chinese II
Readings in advanced texts covering a wide variety of fields in social sciences and humanities. Required of all students desiring subsequent tutorial assistance from the department. Prerequisite: grade of B– or better in Chinese 427 or placement by examination. Credit 3 units. A&S: LA A&S: IQ, LCD, LS

L04 Chinese 449 Topics in Comparative Literature
Topics in Comparative Literature. Subject matter varies from semester to semester. Same as Comp Lit 449
Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L04 Chinese 460 Fifth-Level Modern Chinese I
This course is designed for advanced students wishing to improve their skills in conversation, reading and writing of letters, essays, reports and other types of compositions in Chinese. The reading material includes a variety of authentic texts, including newspapers, short stories and essays. This course is conducted
entirely in Chinese. Required of all students desiring subsequent tutorial assistance from the department. Prerequisite: grade of B– or better in Chinese 428 or Chinese 411, by result of the placement examination, or by instructor’s permission. Credit 3 units. A&S: LA A&S: IQ, LCD, LS EN: H

L04 Chinese 461 Fifth-Level Modern Chinese II
This course is designed for advanced students wishing to improve their skills in conversation, reading and writing of letters, essays, reports and other types of compositions in Chinese. The reading material comprises various authentic texts, including newspapers, short stories and essays. This course is conducted entirely in Chinese. Prerequisite: grade of B– or better in Chinese 428 or Chinese 411, by result of the placement examination, or by instructor’s permission. Credit 3 units. A&S: LA A&S: IQ, LCD, LS EN: H

L04 Chinese 4631 Business Chinese I
In the present globalization, China has been fertile ground for foreign joint business ventures, and this course focusing specifically on business Chinese attests to that fact. This course aims at teaching Chinese business communication using a series of case studies to involve and challenge the students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts, from resolving contract disputes, to developing a business strategy, to establishing a franchise overseas. The course is designed to simulate real business environments where students interact with Chinese businesspeople in business settings and are motivated to achieve business goals. Prerequisite: grade of B– or better in Chinese 428 or instructor’s permission. Credit 3 units. A&S: LA A&S: IQ, LCD EN: H

L04 Chinese 4632 Business Chinese II
Continuation of Business Chinese 4631. This course uses a series of case studies to involve and challenge students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts. Credit 3 units. A&S: LA A&S: IQ, LCD EN: H

L04 Chinese 467 The Chinese Theater
Survey of the performance and literary traditions of the Chinese theater from their pre-Tang origins to the present day. The course focuses on three forms: 14th-century zaju plays, 16th- and 17th-century chuanqi plays, and recent films from China, Taiwan and Hong Kong. Background in either China studies or theater in other cultures recommended. Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD SD

L04 Chinese 470 Readings in Chinese Literature
Selected literary masterpieces in Chinese, including examples of poetry and prose. All readings and discussion in Chinese. Open to both graduate and undergraduate students. Prerequisite: permission of instructor. Credit 3 units. A&S: TH FA: Lit

L04 Chinese 4711 Topics in Religious Studies: Gender and Religion in China
In this course, we explore the images, roles and experience of women in Chinese religions: Confucianism, Daoism, Buddhism, and so-called “popular” religion. Topics to be discussed include: gender concepts, norms and roles in each religious tradition; notions of femininity and attitudes towards the female body; biographies of women in Confucian, Daoist and Buddhist literature; female goddesses and deities; and the place of the Buddhist and Daoist nun and laywoman in Chinese society. All readings are in English or in English translation. Prerequisite: senior/graduate standing. Students with no previous background in Chinese religion, literature or culture need to obtain instructor’s permission before enrolling. Same as Re St 4711
Credit 3 units. A&S: TH A&S: IQ, HUM FA: SSP

L04 Chinese 476 Reading Seminar in Chinese Traditional Fiction
Extensive readings in major critical works in Chinese and English concerning fiction of imperial China, with emphasis on vernacular fiction of the Ming and Qing periods. Weekly discussions and short reading reports. Knowledge of Chinese language and literature normally required, but arrangements can be made for graduate students in such programs as East Asian Studies and Comparative Literature. Credit 3 units. A&S: TH A&S: IQ, HUM, LCD FA: Lit

L04 Chinese 477 Reading Seminar in Chinese Traditional Poetry
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H FA: Lit

L04 Chinese 478 Reading Seminar in Chinese Traditional Theater and Drama
Credit 3 units. A&S: TH FA: Lit

L04 Chinese 479 Reading Seminar in Modern Chinese Literature
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: ETH FA: Lit

L04 Chinese 480 Reading Seminar in Popular Literature and Culture
Credit 3 units. A&S: TH FA: Lit
L04 Chinese 481 Reading Seminar in Religion and Chinese Literature
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD FA: Lit

L04 Chinese 482 Reading Seminar in Gender and Chinese Literature
Prerequisite: Chinese 341 or instructor’s permission.
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD FA: Lit

L04 Chinese 486 Independent Work for Senior Honors
This course is taken in the fall semester. Prerequisites: senior standing, eligibility for honors and permission of the department.
Credit 3 units.

L04 Chinese 487 Independent Work for Senior Honors
This course is taken in the spring semester. Prerequisites: senior standing, eligibility for honors, and permission of the department.
Credit 3 units.

L04 Chinese 489 Topics in Modern Chinese Literature
Prerequisite: permission of instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD FA: Lit

L04 Chinese 4891 Topics in Chinese Literature and Culture
Credit 3 units. A&S: SS A&S: IQ, SSC, LCD EN: S

L04 Chinese 490 Topics in Chinese Literature and History
Prerequisite: permission of the department.
Credit variable, maximum 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H FA: Lit, SSP

L04 Chinese 498 Guided Readings in Chinese
Prerequisites: graduate standing and permission of the instructor and the graduate adviser. Course normally taken after successful completion of Chinese 428. May be repeated once for credit.
Credit variable, maximum 3 units. A&S: LA

Classics
Classics is the study of all aspects of the rich cultures handed down by the ancient Greeks and Romans: their language, history, literature, thought and material culture, as well as their important influence on later societies, including our own. The Classics Department offers two options for students interested in studying Greek and Roman antiquity: the Classics major and the Ancient Studies major. The major in Classics focuses on study of the Latin and/or ancient Greek languages. The major in Ancient Studies is for students who want to explore the whole spectrum of the classical world with little or no work in the ancient languages. Resources on campus supporting the study of Classics include a substantial library collection of materials related to the ancient world, collections of Greek papyri and art, and the Wulfing Coin Collection, one of the largest collections of ancient coins owned by an American university.

PhD, Cornell University
The Major in Classics

Total units required: 24

Required courses:
A minimum of 24 credits, with at least 18 credits in advanced courses. The specific program will be determined by the student and the adviser, according to the student's interests. Courses may be chosen from among Greek, Latin and Classics offerings, but all majors must include in their programs a minimum of 12 advanced credits in Greek or Latin, at least 6 of them at the 400-level. Those who are able to enter the program at the advanced level because of previous language study will normally take 15 or more advanced credits in language. Competence in more than one language, though strongly encouraged and necessary for those planning to go on to graduate study in Classics, is not required. Majors, especially those planning graduate work, should enter the Honors Program if time permits.

The Major in Ancient Studies

Total units required: 24

Required courses:
24 units drawn from courses in the Department of Classics and those in related departments. Of these, 18 units must be at the advanced level, including 6 units at the 400-level. Greek and Latin 102 and above may be used in partial fulfillment of this requirement. In this major, students are encouraged to develop a certain depth in one special field of interest (e.g., literature, art, history or philosophy). Therefore, at least 9 of the 18 advanced units of the major should be taken in one such specific area.

Certain courses in related departments may be used in partial fulfillment of the requirements for a major in Classics or Ancient Studies, including:

Art-Arch 331 Greek Art and Archaeology 3
Art-Arch 334 Roman Art and Archaeology 3
Art-Arch 437 Greek Sculpture 3
Phil 451 Plato 3
Phil 452 Aristotle 3

Additional Information

Study Abroad: Study abroad for a semester in Rome or Athens is an option many Classics majors select. Washington University is a member of the Intercollegiate Center for Classical Studies (ICCS) consortium, and many majors attend the one-semester ICCS program in Rome. A knowledge of Latin or Greek to at least the intermediate level is required for admission to the Rome program. Students interested in studying at the Intercollegiate Center in Rome should consult Professor Tim Moore. Students interested in the College Year in Athens Program should consult Professor Robert Lamberton.

Senior Honors: Students who are planning to pursue graduate work should enter the honors program. To apply, a student must have junior standing, an average of A– or better in courses numbered 300 or above in Greek and/or Latin (for Classics majors) or in Classics (for Ancient Studies majors), an overall GPA of 3.65 or above, and permission of the chair. A formal application should be submitted in May of the junior year. A thesis of substantial nature and length is prepared and written under the direction of a member of the department, beginning in the fall semester of the senior year. A final draft is submitted to the director no later than February 1, a final copy to the full thesis committee before March break. Credit of 6 units is awarded upon presentation of an acceptable thesis. These will be in addition to the 24 credits of the major; those who complete senior honors will therefore graduate with a total of 30 credits in the major.

The Minor in Classics

Elective courses:

Students need three other courses in the culture of Greece and Rome, the selection to be mutually agreeable to the department adviser and to the student. No more than two courses may be at the 200-level. Classics 225D may not be counted.
Classics

L08 Classics 1135 Freshman Seminar: The World of Cleopatra
Cleopatra, the last queen of ancient Egypt, captivated her contemporaries and has fascinated the Western world ever since her famous suicide by asp in 31 BCE. She was a woman of contrasts: Pharaoh of Egypt and Greco-Macedonian queen; seductive woman and shrewd political strategist; a ruthless monarch using every means available to consolidate her position in the face of the encroaching power of the Roman Empire. Through texts and material culture, the seminar seeks to understand Cleopatra in the context both of her native Egypt and of the wider Mediterranean world. We thus examine the traditions of Pharaonic Egypt; the historical events that brought Egypt under the control of the Macedonian Ptolemies (Cleopatra’s dynasty); the wider stage of East-West tension and conquest in which Cleopatra struggled to maintain her power; her relationships (political and personal) with famous men of her day (Caesar, Herod, Mark Antony); her capital city of Alexandria, the largest metropolis of its day; Cleopatra’s brilliant court and its luxury arts; and finally the many Cleopatras that have populated art and literature of later times. We emerge with a sense of Cleopatra, both as a unique individual and as a product of her time.
Credit 3 units.

L08 Classics 116 Freshman Seminar: Magicians and Witches in Greco-Roman Literature
This course examines the representation of “magicians” and “witches” in ancient Greek and Roman literature. The starting point is Apuleius’ Metamorphoses (or The Golden Ass as St. Augustine dubbed it), written in the 2nd Century CE. This work of narrative prose collects several tales of witches, magical transformations and religious revelation. From there, we examine other tales of magicians and witches, paying particular attention to the role of gender in these representations and the conflict between magic and religion. The goal is to understand how these representations function within their particular society, what anxieties they reveal, and how they relate to the archaeological evidence we have for these practices.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L08 Classics 1165 Freshman Seminar: Pompeii: Uncovering the Past
This course examines the Roman city of Pompeii from archaeological, art historical and literary perspectives. Topics include the city’s public spaces and religious sanctuaries, its grand mansions and common houses, its political systems and leisure activities. Class discussions probe the problems inherent in the interpretation of a city captured in a moment of crisis, and how ancient literary tropes have affected our understanding of the archaeological remains. Students also investigate modern interpretations of the site in the form of novels, exhibitions and documentaries. Freshmen and sophomores only. No prerequisites.
Same as Art-Arch 116
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L08 Classics 137 Freshman Seminar: The Emperor Nero: Prince, Monster, Artist
The destructive, scandal-ridden career of the Roman emperor Nero (mid-first century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the “Bad Emperors,” and seen as a symbol of the decline of Rome itself — especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the Life of Nero by Suetonius (second century CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills.
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H

In ancient Athens, each citizen had the power to prosecute others for wrongs committed not only against him but also against society as a whole. Each citizen defended himself without aid of lawyers and judges. This system depended upon an intensely democratic structure of jury courts and laws, and upon the development of rhetoric as an artful speech by which to persuade fellow citizens to find one way or the other. Nearly one hundred speeches survive from Athenian courts and they provide a remarkable window into Athenian society, politics and law. In addition to reading translations of many of these speeches, we examine the physical setting of Athenian courts and explore the manner in which this legal system was integral to Athens’ democracy.

L08 Classics 200C World Archaeology: Global Perspectives on the Past
If we carefully peer beneath the earth’s surface, we will discover a hidden world that is being rediscovered by archaeologists. A considerable amount of excitement is generated by the discovery of lost civilizations and societies. Archaeologists from every corner of the earth come to Washington University to share their experiences as they use the most sophisticated technology to
rediscover those forgotten and sometimes embarrassing aspects of our human past.

L08 Classics 225D Latin and Greek in Current English
This course provides a study of the impact of Latin and Greek on the English language through intensive study of the Latin and Greek roots, prefixes and suffixes that are most commonly found in English technical and nontechnical vocabulary. Some attention also is paid to the linguistic principles by which these elements have entered the English language.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L08 Classics 228 Theater Culture Studies I: Antiquity to Medieval
Required of the drama major. An examination of ancient, medieval, and Renaissance theater and performance. Close reading of dramatic texts written by such authors as Aeschylus, Sophocles, Euripides, Aristophanes, Plautus, Marlowe, Shakespeare, and Jonson, with attention also given to the collaborative theaters of the medieval period (the Corpus Christi play) and the Italian Renaissance. In tandem with the close study of dramatic literature, we study theater history (playing spaces, costumes, actors, etc.) and performance (ritual, performances of everyday life, etc.) from antiquity to the Renaissance.
Same as Drama 228C
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM

L08 Classics 235C The Greek Imagination
An introduction to Greek culture with emphasis on Archaic and Classical ideas about man, the gods and the cosmos. Considerable attention also is given to the Athenian democracy, its institutions, festivals and arts. The course is designed to offer a broad and interdisciplinary view of the most memorable Greek achievements in literature, the visual arts, and social thought and practice.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: SSP

L08 Classics 236C The Roman World
An introduction to the society and culture of the ancient Roman Republic and Empire, including national identity, moral and political thought, family, religion and entertainment. Emphasis on primary texts.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: AH, Lit

L08 Classics 240 Not Members of This Club: Women and Slaves in the Greco-Roman World
Both the Athenian Democracy and the Roman Senatorial Oligarchy were societies in which political power was the exclusive property of free, citizen males. With very few exceptions, the astounding accomplishments of those societies were also the creations of free, citizen males. This course examines the lives of two disparate but comparable groups of outsiders within Greek and Roman society. The status, rights and accomplishments of Athenian and Roman women are explored and placed in the context of other premodern societies. Likewise, the institution of slavery in Greece and Rome is explored and compared with other slave-holding societies, ancient and modern.

L08 Classics 341C Ancient History: The Roman Republic
From the legendary origins of the city through the establishment and collapse of its republican government. Emphasis on political history, imperialism, slavery, Greek culture and the Roman aristocracy.
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD BU: HUM FA: SSP

L08 Classics 342C Ancient History: The Roman Empire
From the establishment of the Augustan principate to the sack of Rome in 410. Emphasis on social and cultural history, including life in the provinces, slavery, the family, legal developments, the rise of Christianity, and the general question of Roman imperialism and its consequences.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM, IS EN: H FA: SSP

L08 Classics 345C Greek History: The Dawn of Democracy
From the so-called Dark Ages to the death of Socrates, a survey of the political, social, economic and military development of early Greece, with emphasis upon citizenship and political structure, religion and culture, and the complex relationships between Greeks and neighboring peoples.

L08 Classics 346C Greek History: The Age of Alexander
From the death of Socrates until the foundation of the Roman Empire, Greece and the Ancient Near East underwent profound changes that still resonate today. This course surveys the political, social, economic and military developments of this period, especially Alexander the Great’s legacy.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM EN: H FA: SSP

L08 Classics 347C Ancient Philosophy
An examination of the high-water marks of philosophy in ancient Greece and Rome, focusing primarily on Plato and Aristotle. A wide range of philosophical problems are discussed, including the nature of the good life, the justification of knowledge, and the ultimate nature of mind and world. Attention is paid to how these problems unfolded in their historical context and to how the ancient treatments of them compare to contemporary efforts. Prerequisites: one course in Philosophy at the 100- or 200-level, or permission of the instructor.
Same as Phil 347C
Credit 3 units. A&S: TH A&S: IQ, HUM BU: ETH FA: SSP

L08 Classics 350 Greek Art and Archaeology
A survey of the artistic achievements and material culture of the Greeks in the first millennium BCE (Iron Age through the Hellenistic period). Development of architecture, sculpture, and painting, as well as minor arts and utilitarian objects, with emphasis on the insights they offer into Greek society and interactions with the wider Mediterranean world.
Same as Art-Arch 331
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: AH

L08 Classics 3582 Ancient Rome in Film and Fiction
Examines a group of novels starting with *The Last Days of Pompeii* (1834) and a group of films beginning with *The Sign of the Cross* (1936) to see how writers and filmmakers have conjured up an image of Roman excess and exoticism in line with their own artistic and cultural viewpoints. We read both popular successes such as *Ben-Hur* and “high art” such as *Marius the Epicurean* and see such commercial successes as *The Robe* and art house films such as Fellini’s *Satyricon*.
Credit 3 units. A&S: TH BU: HUM FA: AH, Lit

L08 Classics 3676 Rhetoric: Ancient and Modern
Rhetoric, or the art of persuasion, has played a prominent and controversial role in political and educational theory and practice. We survey rhetorical texts, ranging from Plato and Aristotle through Augustine and Edmund Burke, to Kenneth Burke and Jürgen Habermas.
Credit 3 units. A&S: TH BU: HUM FA: AH, Lit

L08 Classics 371 The Ancient Family
Examination of the roles of the family in the ancient world through readings and discussions of primary sources (literature, legal texts, inscriptions, art) and recent scholarship. Topics include: demography; relationship between family and state; economic, social and religious roles of the family; roles of women, men, children and slaves; death and inheritance; marriage; children; family relationships; household space; comparisons with the modern family.
Credit 3 units. A&S: TH, SD, WI A&S: IQ, HUM, SD, WI BU: BA EN: H
L08 Classics 375 Topics in Classics
Study of one or more themes recurring in the traditions of Greek, Roman and European literature.
Credit 3 units. A&S: TH BU: HUM FA: SSP

L08 Classics 375W Writing about the Ancient World
Classics courses at the 300-level with enhanced requirements in writing may be taken under this designation as writing-intensive courses. Required: permission of instructor.
Credit 3 units. A&S: TH, WI A&S: IQ, HUM BU: HUM EN: H

L08 Classics 3831 Magicians, Healers and Holy Men
Magic is perhaps not one of the first words one associates with Greco-Roman antiquity. Yet for most individuals living in the ancient Mediterranean, including philosophers, businessmen and politicians, magic was a part of everyday life. Casting spells, fashioning voodoo dolls, wearing amulets, ingesting potions and reading the stars are just some of the activities performed by individuals at every level of society. This course examines Greco-Roman, early Christian and Judaic “magical” practices. Students read spell-books that teach how to read the stars, make people fall in love, bring harm to enemies, lock up success in business, and win fame and the respect of peers. Students also look at what is said, both in antiquity and in contemporary scholarship, about magic and the people who practiced it, which helps illuminate the fascinating relationship between magic, medicine and religion.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H

L08 Classics 386 Old Jokes: Laughter in the Greco-Roman World
An exploration of the theory and practice of comedy in the Greco-Roman world. Readings include examples of iambic (mocking) poetry, comic theater, satiric verse and prose fiction, as well as philosophical discussions of the relationship of humor and laughter to human behavior and values. As comedy in all contexts engages and shapes cultural values just as much as “serious” literature does, its history and reception raise major social and aesthetic issues. Critical topics include: how ancient thinkers imagined comedy’s historical “birth,” how public comic performances may have encouraged either social cohesion or disruption, how communities defined “beneficial” and “offensive” humor, and how ancient elite writers and readers felt about the often lowbrow and obscene content of “classic” comic literature. Combination of lectures and discussions.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: SSP

L08 Classics 389C The Ancient Novel
Many modern readers are familiar with the mythological and dramatic literature of Greco-Roman antiquity, but fewer are aware that the same cultures developed a tradition of prose fiction concerned with romance, human psychology and sexuality, exotic travel and adventure, and religious experience.
The European tradition of extended fictional narrative begins with the Greeks, and their novels, along with Apuleius’ Golden Ass and Petronius’ Satyricon, had a formative influence on later narrative traditions. Students read and analyze all the surviving examples of the Greco-Roman novel, including some fragmentary works, with the goal of throwing light on the history and conventions of the genre, its appeal and its influence.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L08 Classics 391 History of Classical Political Thought: Justice, Virtue and the Soul
This course offers a critical introduction to the main issues and debates in western political theory, including but not limited to the topics of justice, legitimacy, equality, democracy, liberty, sovereignty, and the role of history in the political and social world. This course is designed to be the first in a three-semester sequence on the history of political thought, and students are encouraged, but not required, to take the courses in chronological sequence. The first semester begins with ancient Greek political thought, and follows its development up to the early 16th century.
Same as Pol Sci 391
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA EN: S

L08 Classics 392E Greek and Roman Drama
Survey of the tragic and comic dramas produced in Ancient Greece and Rome. Study of the plays’ religious and civic performance contexts, responses of the ancient audiences, and literary interpretations.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L08 Classics 393 The Tragic Muse
Intensive study of the major tragic playwrights of Ancient Greece (Aeschylus, Sophocles and Euripides) and some of their imitators and critics in the western tradition. We consider tragedy’s origins, its literary elements and theory, its performance and religious contexts, and its social functions. Lectures with discussions.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H

L08 Classics 4001 Independent Study
Credit 3 units.

L08 Classics 426 Ancient Athens
Athens was one of the great cities of antiquity. From lavishly decorated marble temples on the Acropolis, to public office buildings and inscriptions in the Agora (civic center), to the houses of the living and the monuments for the dead, the city has left a rich record of her material culture. These buildings and objects, together with an exceptionally large number of literary and historical texts, make it possible to paint a vivid picture of the ancient city. The course concentrates on the physical setting
and monuments of Athens, as revealed by both archaeology and texts, and how they functioned within the context of Athenian civic and religious life. Prerequisite: Classics 345C, Classics 350 or permission of instructor.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: AH

<tr>
<td>L08 Classics 4376 Pictorial Illusion in the Ancient Mediterranean</td>
<td>Same as Art-Arch 4376</td>
<td>Credit 3 units.</td>
</tr>
<tr>
<td>L08 Classics 439 Greek Art in Rome: Discourse, Dedication and Reflection</td>
<td>Throughout the modern period, Ancient Greek art has been perceived of as a genuinely original and creative tradition, in which both individual artists and regional schools made some of the most significant advances in the long development of European art. Roman art, by contrast, has been seen as derivative and secondary; Johann Joachim Wincklemann, the founder of modern art history, classified it among the “style of the imitators.” But this traditional dichotomy rests in large part on the Romans’ own reactions to their encounters with the arts of Greece. Through the analysis of textual sources, architecture, statuary and painting, this course investigates the status and influence of Greek art in the city of Rome from the third-century BCE until the late Imperial period, and seeks to understand how Roman responses to and uses of Greek art have come to shape the modern perception of both traditions. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Same as Art-Arch 439</td>

<tr>
<td>L08 Classics 442 The Later Roman Empire: From Constantine to Justinian</td>
<td>Covers the period from ca. 300 through the reign of Justinian. Focus on legal developments and codification of law, social changes, rise of Christianity and fall of the Roman Empire in the west. Prerequisite: Classics 342C or permission of instructor. Credit 3 units. A&amp;S: TH A&amp;S: IQ, HUM EN: H</td>
<td></td>
</tr>
<tr>
<td>L08 Classics 443 The Age of Nero: Writing, Performance and Politics at the End of a Dynasty</td>
<td>This course examines the reign of Nero (54–68 CE) as a distinct and remarkable period of literary and artistic production in ancient Rome and its empire. We study the career of the emperor himself, learning about imperial politics and policies during his reign, his own artistic career (his “fiddling while Rome burned,” literary endeavors and notorious stage tour), and the violent end of his rule and dynasty. We examine the literature, philosophy, satire and other writings of the period, both those that take the emperor himself as their subject and those that treat other aspects of history, myth and culture from a “Neronian” perspective. We also examine art (both public and private), public entertainment (the amphitheater, the circus and the stage), and other cultural achievements and issues associated with the last Julio-Claudian emperor. Credit 3 units. A&amp;S: TH</td>
<td></td>

</table>
L08 Classics 450 Topics in Classics
The topic for this seminar differs every year. Previous topics have included Pilgrimage and Sacred Space in Antiquity, Religion in a Global Context, and Engendering Religion. The seminar is offered every spring semester and is required of all Religious Studies majors, with the exception of those writing an Honors thesis. The class is also open, with the permission of the instructor, to other advanced undergraduates with previous course work in Religious Studies. Credit 3 units. EN: H

L08 Classics 450W Topics in Classics
Classics courses at the 400-level with enhanced requirements in writing may be taken under this designation as writing-intensive courses. Required: permission of instructor. Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI EN: H

L08 Classics 451 Plato
An examination of some of Plato’s most important dialogues, typically including the Gorgias, Phaedo and Republic, with the aim of grasping the development of Plato’s most influential thoughts in ethics and in metaphysics and epistemology. In order to provide both historical understanding and philosophical evaluation, attention is paid to the context and structure of the dialogues and to the best of recent secondary literature. Prerequisites: one course in Philosophy at the 300-level, graduate standing or permission of the instructor. Same as Phil 451 Credit 3 units. A&S: TH A&S: IQ, HUM FA: SSP

L08 Classics 452 Aristotle
This course offers a maximally full and detailed introduction to the works of Aristotle. His logic, natural philosophy, psychology, metaphysics, ethics, and political philosophy are discussed, and stress is laid on the interpretive problems facing contemporary philosophers seeking to understand Aristotle’s achievement. Prerequisites: one course in Philosophy at the 300-level, graduate standing or permission of the instructor. Same as Phil 452 Credit 3 units. A&S: TH A&S: IQ, HUM FA: SSP

L08 Classics 462 Ancient Greek and Roman Music
Music played a vital role in Ancient Greece and Rome. New resources and perspectives now allow us to appreciate the ancients’ music better than ever before. This course addresses the nature of ancient music (instruments, melody and rhythm, modes), ancient attitudes toward music, and its contribution to public and private life. The focus throughout is on our ancient sources, both literary and archaeological. Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H

L08 Classics 4647 Ancient Madness
In this course we ask what madness meant in Greek and Roman culture. We find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating, and categorizing people treated as mad. While we concentrate on literary (particularly tragic and epic), philosophical and medical texts, we also look at visual representations and evidence from ritual and cult. An important part of our project involves tracing the afterlife of classical ideas. The history of melancholia grounds this aspect of the course. We then consider how antiquity informs psychoanalysis, and how ancient madness might partake in a critique of contemporary understandings of what it means to be mentally ill. Credit 3 units.

L08 Classics 465 Topics in the History of Philosophy
Same as Phil 465 Credit 3 units. A&S: TH A&S: IQ, HUM

L08 Classics 476 Money, Exchange and Power: Economy and Society in the Ancient Mediterranean World
From chattel slavery, temple treasure and the moral effects of maritime commerce to the nature of the family and status of women, the economy of the ancient Greeks, Romans and others constitutes a particularly dynamic field in the study of ancient societies. This course engages directly with the evidence for the particular economic behaviors, patterns and institutions that lay behind the development of ancient Mediterranean societies, and also bridges a gap between cultural and social science approaches toward ancient society. We also explore the methodological challenges and implications of working with ancient evidence, as well as a variety of modern theoretical approaches and their implications. Prerequisites: Classics 345C and 346C or Classics 341C and 342C, or permission of instructor. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L08 Classics 493 Senior Project
Recommended for all majors in Classics or Ancient Studies who have not completed their college capstone experience in another major, or who are not satisfying this requirement by means of a Senior Honors Thesis in Classics, Greek or Latin. A structured research assignment or independent project under the supervision of one of the department’s faculty is required. Prerequisites: senior standing and permission of the chair of the department. Credit 3 units.

L08 Classics 495 Beginning Sanskrit
Credit 1 unit.
L08 Classics 497 Study for Honors
Prerequisites: junior standing, grades averaging A– in courses numbered 300 or above in Classics, and permission of the department chair.
Credit 3 units.

L08 Classics 498 Study for Honors
Prerequisites: junior standing, grades averaging A– in courses numbered 300 or above in Classics, and permission of the department chair.
Credit 3 units.

Latin
For Latin courses, see the Latin (p. 642) page of this Bulletin.

Comparative Literature
Comparative Literature studies literature across national, cultural and linguistic boundaries. The broad perspective of Comparative Literature generates sustained critical thinking about what literature is and does; how literature relates to other fields and kinds of writing; how literary texts produce their complex webs of meaning; and the ethical valence of literature in a globalized world. Advanced knowledge of a foreign language is essential for understanding and appreciating a given literature and culture. Therefore, all majors study a foreign language and literature at an advanced level. Moreover, the study of works in translation, especially those originally written in non-European languages, facilitates cross-cultural comparisons and helps prepare students for a multilingual, pluralistic and global world. Comparison of literature to other arts, media and other modes of writing develops one’s understanding of literature and culture, as well as of technologies and aesthetic forms of mediation and transmission of world views, values and critiques.

Comparative Literature offers students:
• A high degree of flexibility in their course selection and in their chosen program.
• A rich array of courses spanning national, temporal or medial boundaries organized by genre (e.g., postmodern narrative, comedy, the novel, lyric poetry); cultural issues (e.g., exile, diaspora, cross-cultural encounters); themes (e.g., memory, love in the novel, mysticism in poetry); period (Romanticism, the Renaissance); and transnational region (e.g., Middle Eastern literature, African literature).
• Courses that instruct the student in the central practices, approaches and theories of the discipline: an entry-level course titled “World Literature,” a required introductory course on comparative methods, and courses on literature, literary theory and translation.
• Preparation for life in a global, multicultural and pluralistic world. The critical thinking developed in all of our courses can help students succeed in law and other professional schools. Many of our graduates have gone on to careers in secondary or higher education. With the help of our major and the semester or year abroad that we encourage, some graduates have gone into the Peace Corps and careers in international affairs.

Comparative Literature and the Arts & Sciences Curriculum
Comparative Literature offers freshman seminars, writing-intensive courses and various capstone experiences, including directed research, creative projects and internships appropriate to a student’s field.

The Major in Comparative Literature
Units required: 30
Required courses:
• 21 units of Comparative Literature courses, which include:
  - Comp Lit 211 World Literature (3 units)
  - Comp Lit 3050 Literary Modernities (3 units)
  - Five additional courses in Comparative Literature at both the 300- and 400-levels (15 units).*
• 9 units advanced study (300-level or above) in a single language other than English.

*With permission of the Director of Undergraduate Studies or Program Director, a student may substitute for one of these courses two semesters of study of a second foreign language.

The Major in Comparative Arts
Units required: 30
Required courses:
• 15 units in Comparative Literature courses, which include:
  - Comp Lit 211 World Literature (3 units)
  - Comp Lit 313E Introduction to Comparative Arts (3 units)
  - Three additional courses at both the 300- and 400-levels (9 units)* including one course on interrelations between literature and other art forms.
• 6 units advanced study (300-level or above) in theoretical or historical courses in aesthetics, art history, dance, drama, film or music. (For students specializing in literature and music, Music 221 Music Theory III and Music 222 Music Theory IV fulfill this requirement.)
• 9 units advanced study (300-level or above) in a single language other than English.
• Comparative Arts majors also take an additional four semesters of study (4–12 units) in an applied art form: music,
Senior Honors: To be considered for honors, a student must have a 3.65 GPA by the end of the sixth semester and must be approved by either the Director of Comparative Literature or the Director of Undergraduate Studies to write a Senior Honors thesis. Honors courses (Comp Lit 497 Independent Work for Senior Honors and Comp Lit 498 Independent Work for Senior Honors) supplement the major and do not satisfy any of the above requirements.

Additional Information

The Minor in Comparative Literature

Units required: 18

Required courses: 18 units of study distributed as follows:

- 6 units of advanced study (300-level or above) in a language other than English.
- 12 units of courses in Comparative Literature, including at least 6 units at the 300-level or above. Two of the following introductory courses may be counted toward the minor:
  - Comp Lit 211 World Literature
  - Comp Lit 215C Introduction to Comparative Practice

The Minor in Comparative Arts

Units required: 18

Required courses: 18 units of study, distributed as follows:

- 6 units in Comparative Literature, which include:
  - Comp Lit 211 World Literature (3 units)
  - Comp Lit 313E Introduction to Comparative Arts (3 units)
- 6 units of advanced study (300-level or above) in theoretical or historical courses in music, art history, drama, dance, film or aesthetics. (For students specializing in literature and music, music theory fulfills this requirement.)
- 6 units of advanced study (300-level or above) in a language other than English.

L16 Comp Lit 115 Freshman Seminar
A variety of topics in comparative literature, designed for first-year students — no special background is required — to be conducive to the investigation and discussion format of a seminar.

L16 Comp Lit 137A Freshman Seminar
The destructive, scandal-ridden career of the Roman emperor Nero (mid-1st century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the “Bad Emperors,” and seen as a symbol of the decline of Rome itself — especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the Life of Nero by Suetonius (2nd c CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills.
Same as Classics 137
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H

L16 Comp Lit 1511 The Birth of Venus
This course examine the art, politics and history of Renaissance Florence, Venice, Ferrara and Rome. We study how love, beauty, religion and politics were intertwined in these cities. We consider how the flourishing of the arts occurred along with the oppressive rule of the Church; why, for one out of two women in upper-class families, the choice was the convent rather than marriage; the rise of courtesan culture and pornography; conspicuous consumption; healing as a matter of faith and a matter of science. Professor Wallace presents the great artists who worked in these cities, including works by Donatello, Masaccio, Brunelleschi, Botticelli, Michelangelo, Leonardo and Vasari. Professor Stone examines Sarah Dunant’s trilogy of best-selling historical novels: The Birth of Venus, set in Florence; In the Company of the Courtesans, set in Venice; and Sacred Hearts, set in Ferrara. Ms. Dunant, who is a visitor to the University during part of the semester, introduces the class to historical documents that she used in creating her novels. Guest lecturer Professor Monson (Music Department) explores connections between nuns who make both music and magic. Open to freshmen and sophomores only.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L16 Comp Lit 151C Freshman Seminar
Reading courses, each limited to 15 students. Topics: selected writers, varieties of approaches to literature, e.g., Southern fiction, the modern American short story, the mystery; consult Course Listings. Prerequisite: first-year standing.
Same as E Lit 151
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L16 Comp Lit 153 Laughter: From Aristotle to Seinfeld
Same as E Lit 153
Credit 3 units. A&S: TH A&S: IQ, HUM

L16 Comp Lit 201A Classical to Renaissance Literature: Text and Tradition
As we study some of the most influential of ancient works we address the basic questions of liberal education. Why ought the classics be read in the first place? How is it that Western culture has come to value certain fundamental questions, even to the point of encouraging opposition? Texts include selections from the Old Testament, Homer, Aeschylus, Sophocles, Virgil, Ovid, Petrarca, Montaigne and Shakespeare. Preference given to Text and Tradition and IPH students.
Same as IPH 201C
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L16 Comp Lit 204 Crossing Borders: An Introduction to Comparative Literature
An introduction to some of the ideas and practices of literary studies at the beginning of the 21st century. This course is designed for majors and prospective majors in comparative literature and comparative arts — and other students interested in reading literature from many parts of the world and exploring issues in literary studies including questions of epistemology and representation, the cultural biases of readers, semiotics, translation theory and Orientalism. Plays, novels and poems by writers including Euripides, Vergil, Racine, Rilke, Henry James, Borges, Melville and Murakami, and closely related short excerpts by theorists from Aristotle to Bhabha. Prerequisite: sophomore standing or permission of the instructor.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L16 Comp Lit 206 Opera
Opera combines media like no other art form: music, drama, visual spectacle, and virtuosic vocal performance. In this course, we ask such enduring questions as: Why sing stories and not merely speak them? Why have so many cultures turned to musical theater to portray iconic narratives and characters? By exploring works ranging from Baroque opera to Broadway musicals (including Monteverdi, Mozart, Donizetti, Verdi, Bizet, Sondheim, and Adams), students gain a panoramic view of this tradition and develop the skills to understand and interpret the rich interaction of music, text, and drama at the heart of opera. No previous musical experience required.

Same as IPH 209
Credit 3 units. A&S: TH CD A&S: IQ, HUM, LCD BU: ETH EN: H

L16 Comp Lit 211 World Literature
This course teaches ways of reading literature across Eastern and Western cultures, introducing students to works of great imaginative power from many different regions of the world. The course focuses on a given historical period, such as the modern period or antiquity (the latter including Near Eastern as well as European texts). Organizing themes may include cultural translation, cross-cultural encounter (e.g., Orientalism), hybridity and displacement.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H FA: Lit

L16 Comp Lit 213E Introduction to Comparative Arts
A variety of topics in comparative literature, designed for first-year students — no special background is required — to be conducive to the investigation and discussion format of a seminar.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L16 Comp Lit 2140 Cross-Currents I
Same as IPH 214
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H FA: Lit

L16 Comp Lit 215C Introduction to Comparative Practice I
This course permits the close examination of a particular theme or question studied comparatively, that is, with a cross-cultural focus involving at least two national literatures. Topics are often interdisciplinary; they explore questions pertinent to literary study that also engage history, philosophy and/or the visual arts. Although the majority of works studied are texts, the course frequently pursues comparisons of texts and images (painting, photography, film). Requirements may include frequent short papers, response papers and/or exams.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L16 Comp Lit 219C Topics in Comparative Literature
An examination of how life, suffering and hope are reflected in stories by major Israeli and Arab writers of the 20th century. Themes examined: war, sacrifice, modernity, the erosion of religious faith. Short stories by Ben Ner, Yehoshua, Agnon, Mahfouz, Idris, Habibi and others are discussed. Analysis focuses on differences and similarities in society, culture and national concerns.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: ETH FA: Lit
L16 Comp Lit 255C Text and Tradition: The Emergence of the Modern Mind: Modern Literature
Through a wide sampling of Western literary works, the course explores themes and tones characteristic of the rise of modern consciousness from the Renaissance forward: we trace debates on aesthetics, the transformation of autobiography, writers’ persistent distrust of books, and their relentless assaults on perversions of cultural idealism. Books by such authors as Cervantes, Diderot, Rousseau, Goethe, Balzac, Dostoevsky, Twain, Freud, Kafka and Beckett. Preference given to Text and Tradition and IPH students.
Same as IPH 205C
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L16 Comp Lit 260 Cityscapes
Uses literature to explore past urban societies.

L16 Comp Lit 300 Undergraduate Independent Study
Students pursue personalized projects not normally covered in standard courses at this level. Prerequisites: acceptance by an appropriate instructor of a proposed project and permission of the chair of the committee.
Credit 3 units. FA: Lit

L16 Comp Lit 3040 Introduction to Digital Humanities: Introduction to Digital Humanities: Cultural Analysis
It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course enables students to consider how these technologies might transform the humanities. We explore the various ways in which ideas and data in the humanities can be represented, analyzed and communicated. We also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork are supplemented by small assigned digital projects culminating in a project chosen by the students themselves.

L16 Comp Lit 307A The Writing of the Indian Subcontinent
The Indian subcontinent has in recent years yielded a number of writers, expatriate or otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed to be an introductory survey of such writing, drawing on select subcontinental writers. Covering both fiction and nonfiction by several authors including R.K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatjie and Romesh Gunesekera, we discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles.
Same as E Lit 307
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: Lit

L16 Comp Lit 311A Topics in English and American Literature: International Modernism

L16 Comp Lit 312A Medieval Romance and Arthurian Legend
The romance grows out of the epic: how we get from the fall of Troy to the fall of Troilus. Readings from Vergil’s Aeneid to Sir Gawain and the Green Knight.
Same as E Lit 3121
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit
L16 Comp Lit 3132 Romantic Revolutions in European Music and Culture
The early 19th century in Europe witnessed sweeping changes in social, political, and cultural life, but some of the most fascinating happened in music. This course considers intersections between Romantic thinking about music — which inspired an idealistic vision of the art form as a source of quasi-spiritual experience — and other contemporary “revolutions.” To what extent was Romantic music a “holy art” that offered a refuge from the world? In what ways was it a worldly participant in larger currents in society and culture? By exploring these questions and more, students develop the skills and framework needed to incorporate works of music into their investigation of enduring issues in history and the humanities. Although this course requires listening and viewing of musical works, it is designed for students with intellectual curiosity but without prior musical background. We also require weekly readings, occasional presentations, three short papers, and spirited class discussion.
Same as Music 3132

L16 Comp Lit 327 Gender and Literary History
Credit 3 units. A&S: IQ, HUM FA: Lit

L16 Comp Lit 3270 The Medieval Stage
Medieval drama, which was performed in churches, monasteries, inns and marketplaces, was the pop culture of the Middle Ages. With a focus on major plays from medieval France, Germany, the Netherlands and England, this course uses an interdisciplinary approach to reconstruct how these plays were staged in their original settings. Additional topics include the architecture of theater spaces and stage types; the use of music in drama; the nature of acting, mimesis and performativity in the Middle Ages; and the importance of the “theater” of medieval art. Students end the class with a historically accurate performance of a medieval play.
Credit 3 units. A&S: TH BU: HUM FA: Lit

L16 Comp Lit 331C Tragedy
What is the relationship between freedom and luck? How do men and women respond to large forces beyond their control? Is character a struggle against outside events, or is it a submission to destiny? What happens when two ethical principles, taken absolutely, collide together? What is the nature of evil, and how does good respond to it? In ancient Greece, Renaissance England, 17th-century Europe, modern Europe and postcolonial Africa, the form of tragedy has grappled with these questions, generating both a rich body of imaginative literature and equally compelling philosophical reflections about tragedy. This course explores great works of tragic literature by authors such as Homer, Aeschylus, Sophocles, Shakespeare, Racine, Ibsen, Dostoevsky, Miller and Soyinka, and examines philosophers such as Plato, Aristotle, Hegel, Kierkegaard, Nietzsche, Weil and Arendt in order to explore the questions raised by tragedy.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L16 Comp Lit 332 Literature and Art
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L16 Comp Lit 332C Comedy
This comparative course examines and enjoys the substances and forms of humor and comedy in different times and places. Some attention to jokes, gags and comics precedes a wide-ranging examination of literary comedy. A study of various plays and comic texts illuminates different forms of comedy, such as farce, satire, romantic comedy, comedy of manners, absurdist comedy and contemporary political comedy. Authors include Aristophanes, Plautus, Rabelais, Shakespeare, Molière, Fielding, Gogol, Wilde, Stopard and Dario Fo.
Credit 3 units. A&S: TH BU: HUM FA: Lit
L16 Comp Lit 334 Love in the Novel/Love of the Novel
Our focus is our own pleasure in reading. How do we assure that this pleasure survives into the next century now that the visual, the sound bite, the video clip permeate our lives? We attempt to answer this question by rediscovering one of the great love stories of all times, Leo Tolstoy's Anna Karenina. Daniel Pennac's Reads Like A Novel, a recent work about the pleasures of reading for pleasure, guides us as we isolate elements of Tolstoy's story that compel us, that teach us about our own needs and desires as readers. The class considers novels whose love stories are molded by the characters' own reading: Austen's Northanger Abbey, Flaubert's Madame Bovary (1856), Proust's Swann In Love, Skarmet's Burning Patience, Bernhard Schlink's The Reader. Far from being immune to or eclipsed by history and politics, the pleasure of reading is shown to reflect the reader's appreciation of the larger fabric of society, where passion is set against war, prostitution, mental illness, adultery and prejudice.

L16 Comp Lit 338C Postmodern Fiction and Graphic Novels
Genre as a comparative laboratory. A close examination of the nature, function and pleasures of given literary genres, such as epic or postmodern narrative.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L16 Comp Lit 3405 History of World Cinema
The course surveys the history of cinema as it developed in nations other than the United States. Beginning with the initially dominant film producing nations of Western Europe, this course considers the development of various national cinemas in Europe, Asia, and third world countries. The course seeks to develop an understanding of each individual film both as an expression of a national culture as well as a possible response to international movements in other art forms. Throughout, the course considers how various national cinemas sought ways of dealing with the pervasiveness of Hollywood films, developing their own distinctive styles, which could in turn influence American cinema itself. Priority given to majors.
Required screenings.
Same as Film 340

L16 Comp Lit 340A American Literature, 1914–1945
An introduction to major American works and writers from the later 19th century through the mid-20th century. Writers studied include Twain, James, Crane, Fitzgerald, Hemingway, Faulkner, Frost, Eliot and Stevens. The course assumes no previous acquaintance with the material and is directed toward a broad range of majors and non-majors with a serious but not scholarly interest in the subject. Students with little or no background in literature might be advised to take E Lit 213C (Chief American Writers), while English majors looking to do advanced work should consider the 400-level American literature sequence. Students who have taken E Lit 213C should not enroll in this course.

L16 Comp Lit 360A Women and Contemporary European Cinema
What binds society together? One of the most influential answers to this question was offered by French anthropologist Claude Lévi-Strauss. He argued that the fabric of a society is formed by a network of exchanges among kinship groups, which circulate three kinds of objects: economic goods, linguistic signs and women. In this course, we inquire into the place of women in this argument. We trace rudiments of the traditional marriage system (a father figure still “gives away” the bride in the marriage
ceremony), its range of displacements in a global economy (transnational wives, nannies and domestic servants), the role of new media in the formation of new systems of trafficking (internet brides), and the place of the debate on gay marriage within the larger conversation. We read texts by Friedrich Engels, Sigmund Freud, Marcel Mauss, Claude Lévi-Strauss, Gayle Rubin, Luce Irigaray, Judith Butler, Barbara Ehrenreich and Arlie Russell Hochschild; and we watch a number of films that dramatize the traffic in women in the context of contemporary Europe: Coline Serreau’s Chaos, Lukas Moodysson’s Lilja 4-ever, Cristian Mungiu’s Occident, Nilita Vachani’s When Mother Comes Home for Christmas, Fatih Akin’s Head-on, Jean-Pierre and Luc Dardenne’s The Silence of Lorna.

L16 Comp Lit 3751 In the Beginning: Creation Myths of the Biblical World
This course studies myths and epic literature from the Bible, ancient Egypt, the ancient Near East and ancient Greece about the birth of the gods, the creation of the world and of humanity, and the establishment of societies. These masterpieces of ancient literature recount the deeds of gods and heroes and humanity’s eternal struggle to come to terms with the world, supernatural powers, love, lust and death. This course examines how each culture borrows traditions and recasts them in a distinct idioms. The course further examines different approaches to mythology and to the study of ancient cultures and the Bible.

L16 Comp Lit 394 Worldwide Translation: Language, Culture, Technology
This course considers the crucial role played by translation across the world today: from new technologies and digital media, to the global demands of professionals working in fields as diverse as literature, law, business, anthropology and health care. We begin by exploring the concept of translation as a mechanism of transmission between different languages by looking at works of literature, film and journalism. Our course examines how different cultures have historically required translation in their encounter with each other, studying how translation constitutes a necessary bridge both from a colonial and postcolonial point of view. We also analyze from practical and real-world perspectives whether concepts such as war, human rights, democracy or various deadly illnesses have the same meaning in different societies by considering the diverse frames of reference of linguists, lawyers, anthropologists and medical doctors across the world. Finally, we focus on translation from a technological perspective by examining various modes of transfer of information required for the functioning of digital media such as Google, Twitter or various Iphone applications. Readings include works by Robert McCrum, Talal Asad, Lawrence Venuti, Michael Cronin and Vicente Rafael among others.
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: Lit

L16 Comp Lit 396 Lyric Poetry
A study of the sounds, forms, devices, voices and pleasures of lyric poetry from international and comparative points of view. Attention to theories of lyric, formal devices and problems of translation. The study of various lyric forms such as the ode, the elegy and the sonnet, generates comparisons across time and space.
Credit 3 units. A&S: TH, WI FA: Lit

L16 Comp Lit 402 Introduction to Comparative Literature
An introduction to the discipline and practice of Comparative Literature, this course explores the concepts most frequently discussed and the methods most successfully practiced. We study what texts reveal when they are examined cross-culturally. Students consider the various differences that emerge between texts when themes and genres are followed across more than one national literature. The course includes a short history of the discipline and recent debates about the nature and scope of the field. Topics discussed include genres and forms, influence and intertextuality, translation, world literature, exile and cross-cultural encounter.
Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L16 Comp Lit 405A Theory and Methods in the Humanities
This course familiarizes advanced undergraduate and graduate students with some of the basic issues in humanistic study. It follows the conversations between Marxist, psychoanalytical, anthropological, historicist and linguistic approaches. Our work highlights the boundaries between these fields and identifies incursions across them. Some of the questions that animate our discussions are: What does truth mean in the humanities? What is an object of study and how does one go about identifying it? Is it useful to view the past as a strange country? What is interpretation and what are its procedures? Preference given to Text and Tradition and IPH students.
Same as IPH 405
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L16 Comp Lit 406 Translation
This course looks at the practice and theory of literary translation. While the main focus is on the literary and linguistic processes involved in translating a text from one language to another, we spend much time exploring the cultural significance of translation in an increasingly interconnected world. Translation is one of the best ways to make the world accessible to us. Successful translation requires in-depth knowledge of the social and cultural conditions in which the original text is produced. It is equally important to be aware of the expectations of the readers who read the translated version. To balance these theoretical discussions with practical matters, we invite translators to the class to speak about their published works. The requirements include translation projects to add experience to the analysis carried out in class. Prerequisite: fluency in a language other than/in addition to English.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: Lit

L16 Comp Lit 409 Correlation Between East and West
Extensive comparative study of a period, topic, theme or genre in Chinese or Japanese literature with a body of texts from one or more European languages that serve to illuminate the literary similarities and cultural differences between the two. Texts vary, depending upon the interests of the instructor(s). All texts available in English translations as well as in the original languages.

L16 Comp Lit 419 Feminist Literary and Cultural Theory
This course is intended to acquaint students with basic ideas and issues raised by a diversity of voices in contemporary feminist and cultural theory. Readings cover a wide range of approaches and tendencies within feminism, among them: French feminism, Foucauldian analyses of gender and sexuality, lesbian and queer theories, Third World/postcolonial feminism, and feminism by women of color. Given that feminist theories developed in response to and in dialogue with wider sociopolitical, cultural and philosophical currents, the course explores feminist literary and cultural theory in an interdisciplinary context. Note: This course is in the core curriculum for the Women, Gender and Sexuality Studies graduate certificate. Prerequisites: advanced course work in WGSS or in literary theory (300-level and above) or permission of the instructor required.
Same as WGSS 419
Credit 3 units. A&S: TH A&S: IQ, HUM

L16 Comp Lit 420 Film Theory
This course is an introduction to both classical and contemporary film theory. Beginning with the earliest attempts to treat cinema as a new and unique art form, the course initially reviews the various ways in which film theory attempted to define cinema in terms of its most essential properties. The course then examines more contemporary developments within film theory, more specifically its attempt to incorporate the insights of other critical and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory and postmodernism. Throughout the course, we consider questions regarding the ontology of cinema, its relation to spectators, and the various ways in which its formal properties create meaning. Readings for the course include the major works of Sergei Eisenstein, Andre Bazin, Christian Metz, Laura Mulvey and Fredric Jameson. Required screenings.

Credit 3 units. A&S: TH

L16 Comp Lit 444C Psychoanalysis and Its Literary Cultures
This course examines interactions between texts from the domains of literature and psychoanalysis. We read theory and literature side by side, in order to ask the following questions: Does the relationship between literary text and theory necessarily entail the subjection of literature to analysis, or can one, as Pierre Bayard asks, apply literature to psychoanalysis? What can psychoanalytic readings tell us more broadly about the act of reading? How can psychoanalysis enrich our sense of the ethical import of reading and writing, and how can literature challenge psychoanalytic goals and values? In terms of psychoanalytic authors, we focus on Freud, Lacan, Klein, Winnicott and Bayard. In terms of literature, we range widely from Sophocles to Henry James.
Same as IPH 444

Topics in Comparative Literature. Subject matter varies from semester to semester.
Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L16 Comp Lit 450A Topics in the Humanities
This course examines the genre of historical fiction in both its “classic” phase and in its recent resurgence in contemporary literature. “Historical fiction” is, on the face of it, a paradox. The study of history requires evidence from primary sources, the evaluation of facts and testimony, and reference to actual persons and events. Fiction, on the other hand, is neither tied to the disciplinary restrictions and subjects of historical research nor to a particular time period. So what does history offer to fiction and fiction to history? Why do writers and readers keep returning to a form which for most of the 20th century, at least, fell out of favor with the advent of postmodern skepticism about the “real”? The course considers the importance of historical fiction in the development of the genre of the novel and its relation to the modern discovery of history itself. Among the works we read are Penelope Fitzgerald’s The Blue Flower, Edward P. Jones’s The Known World, Walter Scott’s Waverley, and Dickens’s A Tale of Two Cities. We always bear in mind a practitioner’s perspective, and students have the option to respond to the literature in part through researching and writing their own historical fiction.

L16 Comp Lit 4561 Marxism After Marx: Philosophy and Radicalism in the 20th Century
As claims around the supposed “post-modernity” of our contemporary situation have ebbed, so scholars have returned once more to perhaps the defining philosophical and political voice of modernity, Karl Marx. This course prepares students to engage in current debates in the humanities over the nature of the political, the dynamics of class, the relative importance of the economy to “culture,” and the historical situatedness of philosophical knowledge, all through close readings of the Western Marxist philosophical tradition. That tradition, developing in Continental Europe and later the United States, sought to revitalize Marx’s account of historical development through attention to art, literature and the broader Western philosophical canon, often with the intention of accounting for the failures of Soviet Communism. The course begins with a condensed primer to Marx’s original ideas, before turning to the extension of Marxist philosophy in the ideas of Lenin, Lukács, the Frankfurt School, Louis Althusser, the British New Left, Lucio Colletti and Antonio Negri, before addressing more contemporary authors including Fredric Jameson and Alain Badiou.

L16 Comp Lit 471A Topics in Modern Arabic Literature
Modern Arabic narratives read in English translation foregrounding themes such as the conflict between tradition and modernity, civil war, poverty, alienation, religion and politics, and changing gender roles.
Undergraduate Bulletin 2014-15
Arts & Sciences (10/06/14)

Students who study dance at Washington University learn from faculty members who have both professional experience and academic degrees. Students also have the opportunity to study with guest artists in residence who teach master classes and set choreography.

Students may audition for the Washington University Dance Theatre, which holds annual auditions for students. Selected students will appear in faculty and guest artist-choreographed concerts in Edison Theatre. Students may also participate in departmental drama productions as well as student work in choreography and theater. Each year, students have the opportunity to attend the regional American College Dance Conference to perform and take master classes.

The Major in Dance

Total units required: 35–36

Prerequisites (8–9 units):

- WU dance course (2-3 units) or advanced placement in dance

Dance 203 Composition I max 3
Dance 212E Introduction to Theater Production 3

Required courses (18 units):

- Dance 303 Composition II 3
- or Dance 361 MADE in France II : Choreography and Construction Collaborations

Dance 305Z Music Resources for Dance 2
- or Dance 312 Accompaniment Techniques for Dance

Dance 3101 Dance Improvisation: Spontaneous Composition and Performance Techniques 1

and 6 units from:

Dance 301 Theory and Technique of Modern Dance III 3
Dance 3021 Theory and Technique of Modern Dance IV 3
Dance 321 Classical Ballet: Intermediate I 2
Dance 3221 Classical Ballet: Intermediate II 2
Dance 401 Theory and Technique of Modern Dance V max 3
Dance 4021 Theory and Technique of Modern Dance VI max 3
Dance 415 High Intermediate Ballet I 2
Dance 416 High Intermediate Ballet II 2

Dance

Students may select dance as a major through the Performing Arts Department. (p. 697) This course of study combines intensive studio work in technique and theory of modern dance, ballet and composition with seminars examining dance as a global phenomenon with forms reflecting culturally specific historical, aesthetic and anthropological features. The program also includes a broad range of courses such as stagecraft, music resources, improvisation, anatomy for dancers, pedagogy, dance therapy, musical theater dance, world dance forms, jazz and tap. Students also may choose to minor in modern dance, ballet, or world music, dance and theater. The interdisciplinary minor in world music, dance and theater encourages students already interested in the performing arts to explore those outside Euro-American traditions. A certificate program in somatic studies is offered through the University College division of Arts & Sciences.
Dance 4281 Classical Ballet III  2
Dance 4291 Classical Ballet IV  2

And choose 6 units from among the following. Any of these courses may be taken as an elective if not taken in fulfillment of the requirement:

Dance 315 Dance Spectrum  3
Dance 316E From Romantic to Postmodern Dance  3
Dance 340 Ballet as Ethnic Dance and Classical Art  3
Dance 342 Critical Thinking in Western Theatrical Dance: Questioning Meets Creative Thinking and Collaboration  3

Elective courses (minimum of 9 units):

Dance 300 Jazz Dance II  2
Dance 305Z Music Resources for Dance  2
Dance 311 Modern Dance and the African-American Legacy  2
Dance 312 Accompaniment Techniques for Dance  2
Dance 3224 Intermediate Pointe Technique  1
Dance 328 Contemporary Dance and the Michio Ito Method  2
Dance 343 West African Music and Dance in Context  2
Dance 360 MADE in France I: Old Paris/New Europe  3
Dance 361 MADE in France II: Choreography and Construction Collaborations  3
Dance 372 Advanced American Musical Theatre  3
Dance 403 Jazz III  3
Dance 404 Composition IV max 3
Dance 413 Modern Dance and the African American Legacy II  2
Dance 418 Variations in the Ballet  1
Dance 423 Pointe Technique  1
Dance 424 Pointe Technique  1
Educ/Psych 366 Psychology of Creativity  3

Elective Courses Units
UCollege Dance 305 Structured Improvisation for Dance  1
UCollege Dance 328 Dance of West Africa  2
UCollege Dance 335 Bharata Natyam as Movement Narrative  1
UCollege Dance 363 Dunham Dance Technique  2
UCollege Dance 370 Dance for Camera  3
UCollege Dance 411 Teaching Creative Movement to Children  2
UCollege Dance 423 Dance/Movement Therapy  2
UCollege Dance 430 Applied Anatomy for the Performer  2
UCollege Dance 440 Curriculum and Instruction in Dance  3
UCollege Dance 454 Seminar in Arts Management  3

The dance major must take at least one upper-level course in both ballet and modern dance technique and theory. Course work in at least one of the following is strongly recommended: West African Dance, Classical Indian Dance, Dunham Technique, Musical Theater Dance, Jazz Dance.

Additional Information

Study Abroad: Study abroad opportunities for dance students include the summer program MADE in France, an innovative, five-week course integrating dance and design that meets for two weeks in Paris, featuring museum outings and the viewing of dance performances, and then goes to the French countryside (Normandy) for a three-week period of training and performance workshops coordinating dance and design. The program is taught by seasoned professors in dance and design from Washington University and Connecticut College, and enhanced by master classes with European artists. Dance majors may substitute 6 credits from MADE for upper-level courses in composition and modern dance technique. Washington University students can pursue dance studies abroad during the academic year at the University of Auckland, New Zealand; University of Ghana, Legon; and Roehampton University, London.

The Minor in Ballet

Total units required: 15-18

Required courses: 7-9 units
Option 1

Dance 203 Composition I (3 units) AND 2-3 units of modern dance technique (OR choose a modern technique class as the co-requisite for Dance 203)

Option 2

Dance 208 Composition and Technique (with modern dance as the technique requisite. Dance 208 technique may be ballet if the modern dance requirement is fulfilled in a separate course as in Option 1.)

Also required with Option 1 or Option 2:

Dance 316E From Romantic to Postmodern Dance 3
or Dance 340 Ballet as Ethnic Dance and Classical Art

Choose 6 units from among the following:

Dance 222 Fundamentals of Classical Ballet 2
Dance 321 Classical Ballet: Intermediate I 2
Dance 3221 Classical Ballet: Intermediate II 2
Dance 415 High Intermediate Ballet I 2
Dance 416 High Intermediate Ballet II 2
Dance 4281 Classical Ballet III 2
Dance 4291 Classical Ballet IV 2

Electives: choose at least 2 units from among the following:

Dance 305Z Music Resources for Dance 2
Dance 311 Modern Dance and the African-American Legacy 2
Dance 312 Accompaniment Techniques for Dance 2
Dance 315 Dance Spectrum 3
Dance 328 Contemporary Dance and the Michio Ito Method 2
Dance 360 MADE in France I: Old Paris/New Europe 3

Elective Courses:

Choose 2–3 units from among the following courses:

Dance 305Z Music Resources for Dance 2
Dance 311 Modern Dance and the African-American Legacy 2
Dance 312 Accompaniment Techniques for Dance 2
Dance 315 Dance Spectrum 3
Dance 328 Contemporary Dance and the Michio Ito Method 2
Dance 360 MADE in France I: Old Paris/New Europe 3

L29 Dance 104 Body Conditioning

A complete body conditioning program designed to increase strength and flexibility. Uses some floor barre and Pilates-related floor exercises. Credit variable, maximum 2 units.

L29 Dance 106E Introduction to Dance as a Contemporary Art Form

Introduction to dance as a creative art form. Through practical work in the studio, students gain an understanding of the human body as an instrument of expression and of motion as the medium of dance. Technique, analysis and creative work. Not open to majors. May be repeated once for credit. Credit 2 units. A&S: LA A&S: IQ, HUM BU: HUM FA: AH
L29 Dance 111 Contemporary Dance for the Male Dancer
For men who may have athletic or other physical and kinesthetic skills, but little to no formal dance training. This course is designed to meet the specific needs of the male body in its capacity for dynamic, aesthetic, expressive movement. Introduction to dance as a creative art form using the body as the instrument of expression and motion as the medium of dance. Technique, analysis and creative work.
Credit 2 units. A&S: LA

L29 Dance 120 Yoga and Relaxation Techniques
Systematic introduction to the methods and theory of yoga as a means of stretching, strengthening, energizing and relaxing the body. Incorporates meditation, massage and other release techniques to help sharpen both body and mind. Students should wear comfortable clothing permitting freedom of movement and bring a mat or towel. Related readings assigned.
Credit 1 unit.

L29 Dance 200 Tutorial
Supplementary work at the low intermediate level in ballet and modern dance at times to be announced. Prerequisites: sophomore standing and permission of the Coordinator of the Dance Division. Credit to be determined in each case.
Credit variable, maximum 6 units. A&S: LA A&S: IQ, HUM

L29 Dance 201E Theory and Technique of Modern Dance I
Fundamental theory and techniques of American modern dance. Studio work investigating the expressive potential of human movement and developing individual rhythmic and kinesthetic awareness, coordination and breadth of movement vocabulary. Related reading and video expand on theory embodied in the class work and give an historical overview of modern dance in the United States. Attendance of two to three performances required. Prerequisite: some previous dance training or permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 202 Theory and Technique of Modern Dance II
A course for students familiar with the basic concepts and technique of modern dance. Emphasis on expanding individual movement versatility with increasing difficulty of choreographic phrase materials. Related readings and videos, some focused on American postmodern dance. Attendance at two to three performances required. Prerequisite: Dance 201 or permission of the instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 203 Composition I
Finding personal movement and transforming it into dance. Through a series of class projects the formal elements of composition are introduced. Prerequisite: Dance 201 or permission of the instructor; concurrent registration in a technique class required.
Credit variable, maximum 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 208 Composition and Technique
Introduction to dance composition supported by two modern or ballet technique classes each week at the level appropriate to the individual student. Work on composition assignments outside of class is expected. Prerequisite: Dance 201E or permission of instructor.
Credit 4 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 211 Yoga and Relaxation Techniques II
A more vigorous yoga discipline incorporating flow series and held postures. This class concentrates on the movement and distribution of energy throughout the body. Prior yoga experience recommended.
Credit 2 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 212E Introduction to Theater Production
An introductory study of the major elements involved with mounting a theatrical production. Utilizing guest speakers in both theater arts and theater studies, the course addresses such topics as scenic, costume, lighting and sound design; production management and procedures; and the history and culture of theatrical space and design. Students are required to serve as a crew member on one departmental production and attend productions of the Edison Theatre Ovations series and the Performing Arts Department. Same as Drama 212E
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 213 Improvisation I
This course explores the process and art form of creative, expressive, spontaneous dance making. Students learn to move and respond simultaneously in the moment, developing skills of communication, observation, performance and composition in the language of movement. Open to dancers of all levels. Light reading; in class and out-of-class projects.
Credit 1 unit. A&S: LA BU: HUM

L29 Dance 221 Fundamentals of Classical Ballet
Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on American Ballet Theatre as a repository for classical and modern ballet repertoire of both American and European choreographers. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary. Prerequisite: none.
L29 Dance 222 Fundamentals of Classical Ballet
Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on New York City Ballet as a repository for the choreography of George Balanchine. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary.
Credit 2 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 226 Tap Dance: Beginning
Instruction in basic tap steps and rhythms. Development of varied tap dance styles. Primarily a studio course with some assigned reading. No prerequisite dance training required.
Credit 2 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 2340 Classical Dances of India
An introduction to the classical dance of South India in its cultural context. Students learn to appreciate the Bharata Natyam style and to perform its basic movements. May be repeated once for credit.
Credit 2 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 257 Dance Theater Production
Experience in technical production. Required stage work includes two studio dance productions supervised by faculty. Prerequisite: Dance 212E.
Credit 1 unit. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 272 Introduction to American Musical Theater
Students are taught basic interpretation of musical theater repertoire. The student learns to analyze and perform songs with regard to melody and musical form. Acting techniques are developed through lyric interpretation. Students also are introduced to basic audition practice and etiquette. Prerequisite: permission of instructor. $25.00 lab fee.
Same as Drama 272
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 280 Hip-Hop Jazz
Hip-hop jazz and music video dance combine in this exciting, high-energy course. Students learn elements from each of these dance styles and focus on how they have been adapted into pop culture choreography. This course is designed for students with at least one year of dance training. It is expected that by the end of the course, students have a greater knowledge of dance and dance terminology and an increased ability to perform set choreography. Primarily a studio course; some related reading assigned.
Credit 2 units.

L29 Dance 296 Internship
Students may receive up to 3 units of credit for an approved internship with an organization where the primary objective is to obtain professional experience outside the classroom. Students must file a Learning Agreement with the Career Center, a faculty sponsor and the site supervisor. This must be approved by all three constituencies before proceeding. A final written project is agreed upon between the student and faculty sponsor before work begins, and is evaluated by the faculty sponsor at the end of the internship.
Credit variable, maximum 3 units. A&S: LA EN: H

L29 Dance 297 Fundamentals of Jazz Dance
This course introduces the basic principles and vocabulary of traditional jazz dance as influenced by American social dances and its relationship to the rise in popularity of jazz music. Both are unique to America and are rooted in African-American and European-American culture. Prerequisite: one year of training in ballet technique or modern dance.
Credit 2 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 300 Jazz Dance II
Intermediate to advanced work in jazz dance technique, including choreographic phrases emphasizing stylistic clarity and more complex rhythmic structure. Variable content; may be repeated once for credit in a subsequent semester. Preference given to students registering for the first time. Prerequisite: Dance 297 or permission of instructor.
Credit 2 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 301 Theory and Technique of Modern Dance III
Technique and related concepts for the intermediate-level student. Greater emphasis on the ability to accurately replicate or individually interpret choreographic material. Related reading and video assignments on contemporary dance developments and attendance at two to three performances required. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: Dance 202 and permission of the instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 302 Theory and Technique of Modern Dance IV
Continuation of Dance 301. Variable content; may be repeated for credit in a subsequent semester. Prerequisite: Dance 301 and permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 303 Composition II
A workshop for students with experience in choreography. Study of approaches to dance composition with related improvisation problems. Work outside of studio hours expected. Prerequisites:
Dance 203 or 208 and permission of the instructor; concurrent registration in a technique course required.
Credit 3 units. A&S: LA A&S: IQ, HUM

L29 Dance 305Z Music Resources for Dance
Analysis of Western (Europe, America), world (Africa, India, Indonesia) and global popular musics. Emphasis on rhythm/form, style/genre, instrumentation and function/context. Basic music theory; notation, time signatures, subdivisions and polyrhythms. Major composers for dance (Lully, Tchaikovsky, Debussy, Ravel, Stravinsky, Cage, etc.). Introduction to percussion techniques for dance accompaniment using hand drums, drumset and hand-held instruments. Introduction to basic studio techniques including microphones, recording and editing equipment, and the use of synthesizer and drum machines. Prerequisites: for dance students at the intermediate or advanced level.
Credit 2 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 307A Stage Costumes: Prehistoric to 1800
Basic presentation of costume design from conception through final renderings, development of drawing and painting techniques for the costume plate, and the history of stage costume in the principal periods and styles of drama from prehistoric periods through 1800.
Same as Drama 307
Credit 3 units. A&S: LA A&S: IQ, HUM

L29 Dance 308 Dance Composition Projects
Choreography juried by dance faculty or supervised choreography on themes assigned by the instructor or formulated by the student and approved by the instructor.
Prerequisite: minimum of one semester course work in composition or permission of the instructor.
Credit variable, maximum 3 units. A&S: LA A&S: IQ, HUM

L29 Dance 309 Composition and Technique II
Continuing work in dance composition supported by two technique classes each week at the level appropriate to the individual student. Work on composition assignments outside of class are expected. Prerequisite: Dance 201, Dance 203 or permission of instructor.
Credit 4 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 310 Dance Improvisation II
*Continuation of Dance 213. Prerequisites: Dance 213 or permission of instructor; concurrent registration in a dance technique course at the 300 level or higher is required. May be repeated once for credit.*
Credit 1 unit. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 311 Modern Dance and the African-American Legacy
This course examines the works of several African-American choreographers and their contributions to the field of modern dance in America. These works, considered modern-day classics, depict important historical events and reveal cultural influences that people of African descent have impressed upon our society. Through the medium of dance aided by discussions, video and class reading assignments, the choreographers’ works are analyzed for form, content and social relevance. Studio work includes technique to support learning the repertory.
Prerequisite: one to two years training in modern, jazz or ballet.
Credit 2 units. A&S: LA A&S: IQ, HUM BU: HUM FA: AH

L29 Dance 312 Accompaniment Techniques for Dance
A wide variety of percussion instruments and techniques are studied to determine what makes effective dance accompaniment. The course includes: examples and discussion of dance musics from Western and non-Western cultures; basic notation of rhythm and form; demonstrations of musical styles and discussion of social contexts. Students have opportunities to assist in accompanying modern dance classes. Minimum of two to three hours a week of individual practice and/or listening to recordings expected.
Credit 2 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 315 Dance Spectrum
Introductory consideration of dance as a human activity with culturally specific forms and functions. The course material is multicultural and organized both thematically and chronologically. Topics include: dance as ritual and art, dance and politics, dance as reflection and subversion of gender...
norms, classical Asian dance forms, and a brief overview of the
development of Euro-American theatrical dancing, especially
ballet and modern dance. Seminar format with emphasis on
discussion based on reading and extensive video materials.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD

L29 Dance 316E From Romantic to Postmodern Dance
An overview of European and American theatre dance from
the early 19th century to the present. Topics include: Isadora
Duncan’s work as transition and revolution, Orientalism
in early modern dance and the Diaghilev Ballets Russes,
the “reconstruction” of the dancer’s body, gender issues in
movement vocabulary, choreographic content and professional
working conditions, the emergence of modernism and
postmodernism in dance. Seminar format emphasizing
discussion of reading and dance videos.
Credit 3 units. A&S: TH A&S: IQ, HUM FA: AH

L29 Dance 321 Classical Ballet: Intermediate I
A course designed for those with a solid foundation in the
fundamentals of ballet technique. Related reading and video
assignments; attendance at one to two ballet performances.
Variable content; may be repeated in a subsequent semester.
Prerequisites: permission of the instructor and B- or better in
Dance 221 and 222.
Credit 2 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 3221 Classical Ballet: Intermediate II
Special emphasis on the development of adagio, allegro and turn
sequences. Variable content; may be repeated in a subsequent
semester. Prerequisites: permission of instructor and B+ or
better in Dance 221 and 222.
Credit 2 units. A&S: LA A&S: IQ, HUM BU: HUM

L29 Dance 3224 Intermediate Pointe Technique
This course is designed for dancers with a basic foundation
and understanding of pointe technique. The focus of the course
is the strengthening of the overall presentation of the pointe
technique while additionally developing the performance quality
of the dancer. Variable content; may be repeated for credit in a
subsequent semester. Prerequisites: concurrent registration in
Dance 3221, 416 or 4291, and permission of the instructor.
Credit 1 unit. A&S: TH A&S: IQ, HUM EN: H

L29 Dance 332 Topics in Theater
Same as Drama 321
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 328 Contemporary Dance and the Michio Ito
Method
Primarily a studio course of classes combining contemporary
modern dance technique, some ballletic barre work and
instruction in the Michio Ito method. Inspired by elements in
his own training at the Dalcroze Institute, Ito preceded Martha
Graham in developing a systematized approach to modern
dance that reflected the artist’s individual aesthetic preferences
and that played a role in his choreography. The course examines
similarities and contrasts between contemporary modern dance
training and the Ito method, which emphasizes development of
musicality, coordination and performing presence. Some reading
and video material and one final project with both written and
movement components. Prerequisite: upper-level placement in
modern dance, ballet or jazz.
Credit 2 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 332 Mind-Body: Integral Practices
The mind and the body are not only connected, they are a
fundamental unity, always functioning in a coordinated state.
Whether we coordinate them well or badly is a choice we make,
whether we are conscious of choosing or not. Many so-called
“physical” exercises, activities and arts suffer from a lack of
adequate skills of sensation, attention, perception and conscious
control. Conversely, many so-called “mental” activities lack
adequate awareness of the bodily underpinnings of thought. Like
a person learning to play a musical instrument, one’s ability to
coordinate the mental and physical aspects of Self toward one’s
best personal potential is a skill requiring study of strategies
and techniques for good practice in “being well.” Such ideas
and methods are not “new age,” but can be traced back through
more than a century in the work of investigators such as F.M.
Alexander, progressive educator John Dewey, anthropologist
Raymond Dart, and many others. Through direct experience
and related readings, this class introduces students to “somatic,”
or “integral” practices — activities that are inherently more
effective at developing the aspects of Self in a coordinated
and authentically holistic manner. We then learn to apply our
understanding to all kinds of activities, both mental and physical,
from chores to exercise, from arts to sports, from hobbies to
vocations. Some kind of prior movement training (e.g., athletics,
martial arts, dance, etc.) is preferable, but not required.
Credit 2 units. A&S: LA

L29 Dance 340 Ballet as Ethnic Dance and Classical Art
This course examines the origins and major developments in
ballet theory, technique and production practice, emphasizing
their relationship to concepts of ethnicity and classicism. Issues
considered include: the influence of classic Greco-Roman
theater on the themes, aesthetic ideals and theorization of
ballet; analysis of ethnic content not only in thematic material
but in ballet movement vocabulary and training process; the
conscious reformulation in the United States of European
ballet as an equally American art form; the expansion of Euro-
American “classical ballet” in the work of Balanchine and Tudor; the appropriation of ballet by non-Western countries (such as China and Japan) and its impact on native dance genres; typical construction of the ballet dancer’s body and movement, including gender definition, in relationship to a specific ethnic community context. Seminar format with lectures, discussion and video materials. Three five- to seven-page papers and final. No prerequisites. Credit 3 units. A&S: TH, SD, WI A&S: IQ, HUM, SD, WI BU: HUM

L29 Dance 342 Critical Thinking in Western Theatrical Dance: Questioning Meets Creative Thinking and Collaboration
This is a course designed to introduce the student to the intersections of creative, collaboration and critical thinking in Western Theatrical Dance. This course begins with a review of the literature on creativity, creative collaboration, the process of creating Western Theatrical Dance, and critical thinking. The course continues as an overview of these issues while presenting the intersection and interaction of these elements, which form the creative collaboration of Western Theatrical Dance. The students read from both texts and articles on creativity, creative collaboration, the process of creating Western Theatrical Dance in the 20th and 21st centuries, and critical thinking.
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 343 West African Music and Dance in Context
A West African dance course specifically focused on the Ivorian dance traditions of the Baule, Bete Dan, Lobi, Makinke and Senufo peoples. The course addresses the relationship between music and dance as well as their social and cultural significance. We include study of myths, art, costumes and masks as they relate to various dances and musics. A studio course with related reading material.
Credit 2 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 360 MADE in France I: Old Paris/New Europe
Students are introduced to the city’s rich artistic history as well as the world of contemporary movement arts in Europe through two weeks of dramaturgical field research in Paris. With a diversified sampling of performances, museum visits and discussions animated by program faculty, students experience hands-on the rich history Paris has on display. Museums visited include the Musée du Louvre, Musée de la Mode et du Costume, Musée d’Orsay, Centre Georges Pompidou, Musée des Arts et Métiers, Musée Cluny and the Rodin Museum. Museums and live performances serve as our main “books” for this intensive hands-on course. Museum visits and performances are supplemented by readings and assignments on a chosen theme and performance history; and regular seminars with the specific aim of investigating a variety of dramaturgical approaches that contemporary European directors employ when considering the use of objects, props, costume design, sound design, lighting design and movement. Additionally, students attend several contemporary dance theater performances. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 361 MADE in France II: Choreography and Construction Collaborations
Continuing upon the field research carried out in Paris, student work groups begin to concretize their creative projects at a rural retreat center for artists in Normandy, France. Beginning with a day of intensive introduction to design and construction principles in accordance with the program theme, the design faculty helps students prepare for the “Imagination Fair” presentations that mark the midway point and serve to launch each group’s creative process collaboration. After these presentations, students get to work on realizing their choreography and construction projects: the collaborative creation of dances (solos, duos and trios) using a variety of found objects, props, costumes and/or instruments created by dancers and designers for the final production. Each year, in addition to the U.S. teaching faculty, a number of European artists active in their profession offer valuable master classes that coincide with the program theme and help prepare students for their final projects. Work hours are interspersed with French-language meals during which students are encouraged to speak French with the host family and with their peers and teachers. Additional field trips are organized to introduce students to the rich cultural and agricultural heritage of the Normandy region. Prerequisite: Dance 360 Made in France I: Old Paris/New Europe.
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 400 Dance Production Projects
Students may receive credit for work on special dance-related production projects conceived by students and supervised by faculty. Contracts must be signed by the student, faculty supervisor, and the coordinator of Dance 400 before work on the project commences. Students should register for this course after work is completed. Prerequisite: permission of the dance faculty.
Credit variable, maximum 3 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 401 Theory and Technique of Modern Dance V
Emphasis on versatility in movement vocabulary and on more complex and intensive technical work with discussion of theory inherent in the studio work. Related reading and projects. Variable content: may be repeated for credit in a subsequent semester. Prerequisite: Dance 302 or permission of the instructor. Students with class conflicts may, with the permission of the instructor, enroll for 2 rather than 3 units.
Credit variable, maximum 3 units. A&S: LA A&S: IQ, HUM EN: H
L29 Dance 4021 Theory and Technique of Modern Dance VI
Continuation of Dance 401 with emphasis on more complex and intensive technical work. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: Dance 401 and permission of the instructor. Students with class conflicts may, with the permission of the instructor, enroll for 2 rather than 3 units. Credit variable, maximum 3 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 403 Jazz III
This contemporary jazz class combines the embodied movement traditions of jazz dance styles with the principles of modern dance and ballet techniques. The primary focus of the class is on increased technical proficiency. The studio work introduces exercises and movement phrases that challenge the dancer’s skill level, and encourage a personal exploration that further enhances the dancer’s individual expression and style. Studio work is supported by individual research in the field of jazz dance. Prerequisites: advanced training in jazz dance technique and permission of the instructor. Credit 3 units.

L29 Dance 404 Composition IV
The exploration of choreographic problems in small and large groups. Prerequisite: completion of Dance 303, senior standing or permission of instructor. Previous or concurrent registration in Dance 401 or 4021 recommended. Credit variable, maximum 3 units.

L29 Dance 4041 Composition III
The exploration of choreographic problems for small and large groups. Prerequisite: senior standing or permission of instructor. Previous or concurrent registration in Dance 401 or 4021 recommended. Credit variable, maximum 3 units. A&S: LA A&S: IQ, HUM

L29 Dance 407 Topics in Dance Techniques and Somatic Practices: Alexander Technique for the Dancer
An upper-level movement training course that focuses on one or more specific approaches to developing the dancer’s expertise in movement performance and analysis. Specific content varies with the semester. Primarily a studio course with supplementary reading and video assignments appropriate to the topic. Open to students at the 300 or higher level in any dance genre or by permission of the instructor. Credit variable, maximum 3 units. A&S: IQ, HUM

L29 Dance 413 Modern Dance and the African American Legacy II
This course focuses on works by 2-3 renowned African-American choreographers. The selected choreographers are chosen for their contributions to the field of American modern dance based primarily on their explorations regarding the process and dynamics of building community — the sense of community as experienced through the lens of African-American cultural values and aesthetics as it pertains to the creative process. Therefore, the course focuses on viewing the body as a site for the exchange of ideas concerning humanity. Students investigate these choreographers through learning excerpts of their choreography and choreographing personal responses, as well as through related readings, videos and independent research. Credit 2 units. A&S: IQ, HUM EN: H

L29 Dance 414 Advanced Stage Lighting
An advanced-level continuation of Drama 310. Emphasis is placed on design aesthetics and their application in a laboratory setting. Students explore color theory, lightboard programming and design analyses as well as execute a variety of finished projects. These projects cover a wide range of production styles and performance venues. Prerequisite: permission of instructor. Same as Drama 410
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L29 Dance 415 High Intermediate Ballet I
A course designed as preparation for the advanced level. Emphasis on vocabulary review and individual technique assessment, including placement, movement quality and musicality. Related readings and video assignments; attendance at and critical analysis of one to two ballet performances. Variable content; may be repeated in a subsequent semester. Prerequisites: B+ or better in Dance 221, 222, 321, 322 and/or permission of instructor. Credit 2 units. A&S: LA A&S: IQ, HUM

L29 Dance 416 High Intermediate Ballet II
A course designed for the high intermediate dancer in preparation for Dance 4281/429. Emphasis on placement, movement quality and musicality. Related readings and projects supplement the classical vocabulary. Prerequisites: B+ or better in Dance 221, 222, 321, 322 and/or permission of instructor. Credit 2 units. A&S: LA A&S: IQ, HUM

L29 Dance 418 Variations in the Ballet
Introduces classical choreography within various ballets. Prerequisites: Dance 321 or Dance 4281 with some pointe training, and permission of instructor. Credit 1 unit. A&S: LA A&S: IQ, HUM

L29 Dance 423 Pointe Technique
Designed for dancers with a basic foundation in pointe work. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: concurrent registration in Dance 321
or 4281 and B+ or better in Dance 221, 222, 321, 322 and/or permission of instructor.
Credit 1 unit. A&S: LA &S: IQ, HUM

L29 Dance 4234 Performing Knowledge: Arts Integration Pedagogy in Theory and Practice
Same as Drama 4234
Credit 3 units. A&S: LA &S: IQ, HUM EN: H

L29 Dance 424 Pointe Technique
Designed for dancers with a basic foundation in pointe work.
Prerequisites: concurrent registration in Dance 321, 322, 4281 or 4291, and permission of instructor.
Credit 1 unit. A&S: LA &S: IQ, HUM

L29 Dance 4281 Classical Ballet III
Designed for dancers with a solid foundation in beginning and intermediate ballet technique. Related reading, research paper/discussion, video assignments; attendance at one to two ballet performances. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: permission of instructor and B+ or better in Dance 3221 and Dance 415 or Dance 416.
Credit 2 units. A&S: LA &S: IQ, HUM

L29 Dance 4291 Classical Ballet IV
A course designed for dancers with a solid foundation in beginning and intermediate ballet technique. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: permission of instructor and B+ or better in Dance 3221 and Dance 416.
Credit 2 units. A&S: LA &S: IQ, HUM EN: H

L29 Dance 457 Dance Repertory
Under the direction of an experienced choreographer, students rehearse and perfect repertory concert dances. All students perform or understudy the choreographies. May be repeated for credit. Enrollment by audition. Prerequisite: concurrent registration in a technique class required.
Credit 1 unit. A&S: LA &S: IQ, HUM

L29 Dance 458 Dance Repertory
Under the direction of an experienced choreographer, students rehearse and perfect repertory concert dances. May be repeated once for credit. Enrollment by audition. Concurrent registration in a technique class is required.
Credit 1 unit. A&S: LA &S: IQ, HUM

L29 Dance 479 Fundamentals of Sound Design
Encompassing both creative and technical aspects of sound in the performing arts, the course gives theoretical knowledge of, and practical experience in the following areas: fundamental rules of physics and electronics related to sound, use of standard digital recording studio equipment, “training” of the ear and basic techniques of sound montage. Students are expected to participate in a variety of conceptual and research oriented exercises as well as complete several lab projects. Sound-related work on Performing Arts Department productions may be required. Prerequisite: Drama 212 and permission of instructor. Same as Drama 479
Credit 3 units. A&S: LA &S: IQ, HUM EN: H

L29 Dance 493 Senior Project
Specialized project in a selected area in dance. The student works individually under the supervision of a faculty member. Prerequisite: permission of the coordinator of the Dance Division.
Credit variable, maximum 3 units.

L29 Dance 499 Study for Honors
An honors thesis or performance and thesis project designed by the student, and supervised and assessed by a faculty committee. Prerequisites: senior standing; grade point average of 3.5 and 3.5 in dance classes; and permission of the coordinator of the dance division.
Credit variable, maximum 6 units.

Drama
Students may select drama as a major through the Performing Arts Department (p. 697). This major combines the historical, cultural and literary study of theater and performance with a full array of courses regarding theatrical production, including acting, directing, performance art, design (set, costume, lighting, sound) and playwriting. The Performing Arts Department strongly believes in the mutually beneficial relationship between the study and the practice of theater. A major in drama provides an academically rigorous course of study — with a strong grounding in theater history, dramatic literature, performance studies and dramatic theory — that also develops students’ knowledge of theater by means of practice.

The rigorous three-semester Theater Culture Studies sequence provides a solid background in history, literature and performance, and students take an additional three courses in theater and performance studies. Within theater arts, students with their advisers may design their own course of study or be guided by diverse “paths” of study in acting, directing, playwriting or design. Our theater arts courses, regularly drawing from exemplars such as Shakespeare, Chekhov and Beckett, are based on a liberal arts, rather than a conservatory, model.

We also offer two special programs that can be credited toward the major. Since 1991, we have been holding a national summer program at Shakespeare’s Globe in London, which consists of a 3-unit course on acting Shakespeare and a 3-unit course
on Shakespeare studies, in addition to several master classes taught by Globe personnel. We also offer an intensive semester-long playwriting program in New York City held at Primary Stages, one of Off-Broadway’s leading producers of new works and home of the Einhorn School of Performing Arts.

The Major in Drama

Total units required: 39

The major requires six courses in Theater and Performance Studies and seven courses in Theater Arts.

Theater and Performance Studies Component

A minimum of six theater and performance studies courses must be taken for the major. The specific requirements are:

• Three courses, preferably taken in order, in the Theater Culture Studies sequence:
  - Drama 228C Theater Culture Studies I: Antiquity to Renaissance 3
  - Drama 229C Theater Culture Studies II: From Renaissance to Romanticism 3
  - Drama 365C Theater Culture Studies III: Melodrama to Modernism 3

• Two electives, 300-level or above, including courses in non-western/minority theater, theory and performance studies. It is strongly recommended that one of these two courses be a writing-intensive course taken in the junior year.

• The senior drama capstone, taken in the fall semester of the senior year: Drama 4452.

Theater Arts Component

A minimum of seven theater arts courses must be taken for the major. The specific requirements are:

Drama 212E Introduction to Theater Production 3

All majors must take one of the following:

- Drama 240E Acting I: Fundamentals of Acting 3
- Drama 307 Stage Costumes: Prehistoric to 1800 3
- Drama 310 Stage Lighting 3
- Drama 311M Scene Design 3

For the five remaining courses students may choose from four suggested paths or, with the help of an adviser, students may develop their own path within the major:

Directing Path

- Drama 227 Playwriting 3
  - OR
  - Drama 307 Stage Costumes: Prehistoric to 1800 3
  - OR
  - Drama 310 Stage Lighting 3
  - OR
  - Drama 311M Scene Design 3
  - AND
  - Drama 341 Acting II 3
  - Drama 343 Fundamentals of Directing 3
  - Drama 403 Dramaturgical Workshop 3
  - Drama 444 Directing II 3

Acting Path

- Drama 314 Voice-Speech Laboratory 3
  - OR
  - Drama 340 Topics in Stage Movement 3
  - AND
  - Drama 341 Acting II 3
  - Drama 342 Acting III 3
  - Drama 343 Fundamentals of Directing 3
  - Drama 440 Acting IV 3

Playwriting Path

- Drama 227 Playwriting 3
  - (See also E Comp 224 Playwriting) 3
- Drama 343 Fundamentals of Directing 3
- Drama 403 Dramaturgical Workshop 3
- Drama 473 Advanced Playwriting 3
- AND
- Drama 4990 Independent Work 1-6
  - OR
  - Drama 4995 Literature, Theory, Criticism 1-3

Design Path

• One Introduction to Design course: Drama 307, Drama 310 or Drama 311M

• Two electives, 300-level or above, or an independent study in mainstage design (Drama 4993)

  AND

- Drama 343 Fundamentals of Directing 3
  - OR
Drama 460  The Creative Impulse  3
AND
Drama 410  Advanced Stage Lighting  3
or
Drama 416  Period Style and Design History  3
or
Drama 421  Costume Construction and Design  3
or
Drama 450  Advanced Scene Design  3

Additional Information

Study Abroad: Since 1991, the Performing Arts Department and Globe Education (London) have been running a national summer program held at Shakespeare's Globe in London. This four-week program includes a 3-unit course on the textual, historical and cultural study of Shakespeare; a 3-unit course on acting Shakespeare (with particular attention to acting on the Globe stage); master classes taught by Globe personnel; playgoing in London and Stratford; and more.

MADE in France (Movement Arts and Design in Europe) offers a hands-on historical survey of European art, dance and design. Courses are developed to stimulate collaborative engagement between young choreographers, designers (costume/scenic/sound), actors, experimental musicians and visual artists wishing to learn more about multi-disciplinary performance involving choreography. Participants collaborate directly with European artists and scholars. This summer program splits time and study between Paris and Normandy.

Study Away: The Performing Arts Department offers an intensive semester-long playwriting program in New York City, called PS[NYC], held at Primary Stages, one of Off-Broadway’s leading producers of new works and home of the Einhorn School of Performing Arts. Six courses in playwriting, American dramatic literature and American theatre production are available through the PS[NYC] program.

The Minor in Drama

Units required: 18

Required courses:

Drama 212E  Introduction to Theater Production  3
6 units from the Theater Culture Studies Sequence:
Drama 228C  Theater Culture Studies I: Antiquity to Renaissance  3
Drama 229C  Theater Culture Studies II: From Renaissance to Romanticism  3
Drama 365C  Theater Culture Studies III: Melodrama to Modernism  3

Elective courses:

At least 9 credit units at the 300-level or above. No more than 3 units may be production credits.

The Minor in World Music, Dance and Theater

For the World Music, Dance and Theater minor, visit the Performing Arts (p. 699) page.

L15 Drama 115 Freshman Seminar: What is Art?
Great works of literature, cinema, painting, drama, music and dance provide us with new, provocative and sometimes completely unexpected methods of perceiving reality. In this Freshman Seminar, we examine the meanings of art by looking at works that have radically altered or challenged the ways in which people saw the world around them — along with works that are doing the same today. In addition to analyzing texts in a classroom setting, this course also incorporates meetings with artists and directors practicing their crafts, and attendance at theatrical performances and museums both on and off campus. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: Lit

L15 Drama 135 Freshman Seminar Ideation: Idea Generation
Ideation exists at all phases of a creative process: brainstorming, idea generation, innovation, prototyping, development and actualization. But Ideation is less like a line and more like a loop from observing to reflecting to making — and back again. It is a rarely understood but essential part of any creative or design process. Through collaboration and conversations with classmates, readings on the topic and group exercises, Ideation is a course that strives to define and demystify what we mean by “creativity,” help students identify their creative strengths and weaknesses, encourage artistic experimentation of new ideas, establish methods of design thinking and make it clear that collaboration among varied backgrounds and disciplines is the key to coming up with creative solutions for complex problems. Successful companies such as IDEO led by visionaries in the form of Tim Brown and David Kelley have pioneered the notion of Design Thinking. “Design thinking” is defined as “the ability to combine empathy for the context of a problem, creativity in the generation of insights and solutions, and rationality to analyze and fit solutions to the context.” This course encourages students to explore their collaborative talents in new ways that they find apply to virtually any discipline and career path: from A to Z. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L15 Drama 200 Theater Projects
Independent study. Students may contract with a faculty supervisor for credit for their work on theatrical productions or research. Contracts must be signed by the student, the faculty supervisor and the coordinator of Drama 200 before the student’s work on the project commences. Credit and grade option are determined in each case.
Credit variable, maximum 3 units.

L15 Drama 2001 Acting
Independent study.
Credit variable, maximum 3 units.

L15 Drama 2002 Directing
Independent study.
Credit variable, maximum 3 units.

L15 Drama 2003 Technical Theater
Independent study.
Credit variable, maximum 3 units.

L15 Drama 2004 Voice, Speech
Independent study.
Credit variable, maximum 3 units.

L15 Drama 2005 Literature, Theory, Criticism
Independent study.
Credit variable, maximum 3 units.

L15 Drama 212E Introduction to Theater Production
An introductory study of the major elements involved with mounting a theatrical production. Utilizing guest speakers in both theater arts and theater studies, the course addresses such topics as scenic, costume, lighting and sound design; production management and procedures; and the history and culture of theatrical space and design. Students are required to serve as a crew member on one departmental production and attend productions of the Edison Theatre Ovations series and the Performing Arts Department.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L15 Drama 214 Public Speaking: Embodied Communication
The ability to speak well and to communicate effectively in the public forum is an essential skill for all students. This course aims to offer a comprehensive and wide-ranging approach to developing the skills of the contemporary speaker. While acknowledging and utilizing traditional approaches to public speaking, this course expands its reach to include applicable techniques from the world of the Performing Arts — especially theater and dance. The course does not intend to train the student as a dancer or actor, but it maintains that the successful speaker would do well to harness some of the transferable skill sets from these disciplines. The speaker, like the performer, must stand before an audience with an objective to communicate something well. Both should be dedicated advocates for the message. They share the common ground of requiring a strong voice for a sure delivery of the material, and an expressive physicality willing to fully embody and serve the message.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L15 Drama 223 Cross-Cultural Women Playwrights
This course provides an introductory survey of the work of African-American, Caribbean-American, Asian-American and Native American women playwrights. We explore the playwrights’ strategies for creating work that is by turns beautiful, fascinating, humorous, moving and occasionally terrifying as they chart for contemporary theater the intersection of race and gender in performative terms. Playwrights addressed include Adrienne Kennedy, Ntozake Shange, Suzan-Lori Parks, Anna Deavere Smith, Diana Son, Jessica Hagedorn, Cherie Moraga, Wakako Yamauchi, Migdalia Cruz, Spiderwoman Theatre, Marga Gomez and Velina Hasu Houston.
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD BU: BA FA: Lit

L15 Drama 227 Playwriting
An introductory course in playwriting. Limited to eight students. Prerequisite: Writing 1 and permission of the instructor.
Same as Writing 224
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM EN: H

L15 Drama 228C Theater Culture Studies I: Antiquity to Renaissance
Required of the drama major. An examination of ancient, medieval and Renaissance theater and performance. Close reading of dramatic texts written by such authors as Aeschylus, Sophocles, Euripides, Aristophanes, Plautus, Marlowe, Shakespeare and Jonson, with attention also given to the collaborative theaters of the medieval period (the Corpus Christi play) and the Italian Renaissance. In tandem with the close study of dramatic literature, we study theater history (playing spaces, costumes, actors, etc.) and performance (ritual, performances of everyday life, etc.) from antiquity to the Renaissance.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM

L15 Drama 229C Theater Culture Studies II: From Renaissance to Romanticism
The second course in an interdisciplinary, three-semester sequence that examines Western and non-Western dramatic literature and theater history from its known origins to the present. This course proceeds historically from the Baroque period to the 19th century but is also organized according to four themes: (1) “Theater of the World” (the idea that human existence is intrinsically theatrical). In this section we read Shakespeare’s _The Tempest_, Calderón’s _Life is a Dream_, Corneille’s _The Comic Illusion_, and an extract of one Chinese play from the Ming period. (2) Comedy. In this part of the course, we study the European comic tradition from the commedia dell’arte to Molière to Goldoni to Beaumarchais. (3) Tragedy. Here, we contrast Racine’s neo-classical tragedy to the new bourgeois tragedy emerging in the 18th century, and then
examine German Romantic tragedy (Schiller, Hegel). (4) The Public Sphere. This section includes play texts such as John Gay’s The Beggar’s Opera but concentrates somewhat more on the establishment of theater in the 18th century as a central institution in the European “public sphere.” The fourth unit — and the course — ends with a delightful and probing Russian comedy: Gogol’s The Inspector General, studied in the context of the emerging Russian stage and its relationship to public life. In addition to reading, discussion and writing, the course includes some simple theater exercises and staging, drawing from the practical interests of those taking the course (acting, directing, design-tech, research). Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L15 Drama 230 Topics in Theater
Explores a variety of special interest topics in theater not included in the Theater Culture Studies sequence. Consult the Course Listings. Credit 3 units. A&S: LA

L15 Drama 239 Performance and Culture
What does putting on a play have to do with having a wedding? What’s the difference between St. Louis sports fans and primates and the Saint Louis Zoo? What does the “Mr. WashU” pageant say about the Washington University community? How is a dance concert like a Native American powwow? In this course we explore the vocabulary and concepts of performance studies to address these and other questions. We bring the vital lens of performance to focus on an array of cultural activities through readings, field trips and activities. Three short essays, a mid-term and a take-home final are required. Credit 3 units. A&S: LA A&S: IQ, HUM BU: BA EN: H

L15 Drama 240E Acting I: Fundamentals of Acting
This course offers an opportunity to investigate the nature of the theater by way of performance. Students study a variety of theatrical texts in the most direct and experiential way, by acting in them. The course is designed for those who want to understand the interpretive work of the actor. Students are introduced to the practical work of building a character for the stage, and they also gain an understanding of how dramatic texts work both on the page and on the stage. Textual analysis, movement work and vocal production skills are developed using monologues, scene work and exercises. These skills also should provide significant benefits outside the confines of the class itself, in the professional and personal lives of the students taking this class. Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L15 Drama 250 Topics in Stage Movement
This is a rotating topics course on movement for actors. Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 253 Introduction to Performance Art
The focus of this course is on the history, theory and practice of performance art and performance theater. The class engages in exercises that generate text, movement, sound and performance scores. Students create original performances that incorporate contemporary critical concepts. Performance production is supplemented by readings and videos that introduce the history and theory of experimental performance and work by specific performance artists. Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L15 Drama 256 Contemporary Comedy: Stand-up, Sketch and Improv
The U.S. is in the midst of a second comedy boom. The first boom, during the 1980s, turned stand-up comedy into a major force in American entertainment, creating stars like Jerry Seinfeld, Eddie Murphy and Ellen DeGeneres. The second, defined in part by new social media, podcasting, and online digital video, is remaking the way comedians find their voices and their audiences. But even as Louis C.K., Natasha Leggero, Aziz Ansari, Rob Delaney and others chart new paths through a dynamic media landscape, live performance is still the heart of the modern comedy universe. This class is a detailed survey of the contemporary American comedy scene, in select historical context. Pioneering artists from vaudeville and the 1970s are introduced, the stand-up boom of the 1980s is presented as a formative force in today’s comedy business, and modern philosophical perspectives on comedy are read and discussed (though we studiously avoid explaining jokes). Topics include alt-comedy, “blue collar” comedy, anti-comedy, heckling, joke theft, twitter, podcasting, the “scenes” of New York, L.A., San Francisco, and major clubs and festivals. Sketch unit covers The State, Mr. Show, Tim and Eric, and Key & Peele; Improv unit covers Del Close, Groundlings and Upright Citizens Brigade. Credit 3 units. A&S: IQ, HUM

L15 Drama 257 Dance Theater Production
Experience in technical production. Required stage work includes two studio dance productions supervised by faculty. Prerequisite: Dance 212E. Same as Dance 257 Credit 1 unit. A&S: LA A&S: IQ, HUM BU: HUM

L15 Drama 272 Introduction to American Musical Theater
Students are taught basic interpretation of musical theater repertoire. The student learns to analyze and perform songs with regard to melody and musical form. Acting techniques are developed through lyric interpretation. Students also are introduced to basic audition practice and etiquette. Prerequisite: permission of instructor. $25 lab fee. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H
L15 Drama 285 Theater Arts Workshop
The focus of this class is to give students a technical introduction to different theater arts disciplines including acting, directing and scenic design. During the 14-week course students apply these newly acquired skills in developing plays written by the student playwrights. General Theater Studies’ students occasionally meet in this workshop with the First Draft Playwriting Students. Credit 4 units.

L15 Drama 290 Exploring the Boundaries of Playwriting
The objective of this class is to teach writers the art of playwriting, including: character, relationships, conflict, scene structure, style, language and dramatic arc. Students analyze a variety of texts in class and at home as examples of the weekly lessons or discussion. In-class exercises are part of the lessons in order to develop a practical understanding of each week’s topic of discussion. The students present scenes in class on a bi-monthly basis: half of the class shares work for discussion on alternating weeks. Credit 3 units.

L15 Drama 295 Portfolio Review
This course is intended as a one-hour credit to meet every Friday for two contact hours. While the main focus of this course is to dedicate time to learning and preparing a solid professional portfolio, resume and web page, this class also trains the students how to interact and conduct themselves through the interview process. We review numerous résumés from industry professionals, develop our own, develop both physical and digital portfolios consisting of students’ academic and professional work, and culminate in building a strong and evocative web page. Upon completion, the student has a solid understanding of the theater job market and be ready to face the world. Credit 1 unit. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 296 Internship
Students may receive up to 3 units of credit for an approved internship with an organization where the primary objective is to obtain professional experience outside the classroom. Students must file a Learning Agreement with the Career Center, a faculty sponsor and the site supervisor. This must be approved by all three constituencies before proceeding. A final written project is agreed upon between the student and faculty sponsor before work begins, and is evaluated by the faculty sponsor at the end of the internship.
Credit variable, maximum 3 units.

L15 Drama 300 Production Practicum
Practicum experience in technical theater. Available positions include stage manager; publicist; assistant designer for costumes, scenery or lighting; or crew head of props, sound and makeup design.

L15 Drama 303 Greek Theatre
Study of selected topics in Classics. This is a Writing Intensive Course.
Same as Classics 3003
Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI EN: H

L15 Drama 3011 History of African-American Theater
A survey of African-American theater from post-Civil War “coon” shows and reviews to movements for a national black theater, such as Krigwa, Lafayette and Lincoln, and the Black Arts Movement. Early black theater and minstrels; black theater movement and other ethnic theater movements in America. Critical readings of such plays as Amiri Baraka’s Dutchman, Lorraine Hansberry’s A Raisin in the Sun, Langston Hughes and Zora Neale Hurston’s Mulebone. Also works by August Wilson, Ed Bullins, Charles Fuller, Georgia Douglas Johnson. Same as AFAS 301
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD AR: Lit BU: HUM EN: H FA: AH, Lit

L15 Drama 304 Makeup for the Stage
Introduction to techniques for the alteration of the face through makeup to create convincing illusions of character. Individualized selection and personal application of makeup appropriate to the actor’s face. Students are required to purchase a makeup kit.
Credit 2 units. A&S: LA A&S: IQ, HUM

L15 Drama 307 Stage Costumes: Prehistoric to 1800
Basic presentation of costume design from conception through final renderings, development of drawing and painting techniques for the costume plate, and the history of stage costume in the principal periods and styles of drama from prehistoric periods through 1800.
Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 3071 19th- and 20th-Century Costume Design and History II
Basic presentation of costume design from initial conception through final renderings. Development of drawing and painting techniques on design projects taken from plays set in the 19th and 20th centuries. History of costume and fashion silhouette is illuminated through slide and video presentation of primary and secondary source materials.
Credit 3 units. A&S: TH A&S: IQ, HUM

L15 Drama 309 Stage Technology
Practical study of technical theater procedures and scene shop; production techniques. Course outline includes lectures, demonstrations of equipment, production assignments and
research-oriented project work. Prerequisite: Drama 212E or permission of instructor.
Credit 3 units. A&S: LA

L15 Drama 310 Stage Lighting
This course places an emphasis in the aesthetic practice of lighting design through the understanding of technology as it relates to time and space. Early on the student learns how to properly use and apply designer's tools and then through reading, research and experimentation explore the limitless boundaries of color and texture. This culminates in a stage design in collaboration with directing or dance class. Upon completion of the course, the student is able to speak eloquently on design theory and be able to move on to further design study in Drama 410 Advanced Lighting Design.
Credit 3 units.

L15 Drama 311M Scene Design
An introduction to the process of scene design, as it relates to aesthetics, dramatic literature, collaboration and production. Projects involve design conceptualization, documentation, graphics and realization. Prerequisite: Drama 212E or permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM EN: H

L15 Drama 314 Voice-Speech Laboratory
Fundamentals of speech for the stage focusing on breath support, resonance, articulation and speech as an expression of an individual's needs. The course includes an introduction to stage dialects. Preference given to majors.
Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 3201 Concepts in Theater Architecture and Performance Space
Can a cloakroom or a stairwell become a theater? How do site and placement affect the meaning potential of performance? How does contemporary environmental staging conjure a world different from that of the modern box set, the baroque perspective stage or Shakespeare's Globe? We engage such questions by drawing on theory, history and hands-on creation to examine historical, actual and potential performance spaces. Readings in architectural and dramatic theory, theater history, performance studies and philosophy provide both a critical descriptive vocabulary and a conceptual repertoire for use in creative class assignments — both informing students' investigations of actual theaters or other performance — ready spaces and provoking their creation of experimental performance spaces. Readings cover semiotic, materialist and situationist approaches to space, as well as concepts including site specificity, space vs. place, framing, perspective, miniature, the door, the curtain, the cloakroom and the monument.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L15 Drama 321 Topics in Theater
Explores a variety of special interest topics in theater. Consult the Course Listings.
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 3212 Topics in Theater
Rotating topics course.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L15 Drama 3221 Traditions of Italian Theater
Same as Ital 322
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD BU: HUM EN: H

L15 Drama 323 Topics in American Drama
A rotating topics course on various subjects relating to the history and theatrical practice of modern American drama.
Credit 3 units. A&S: TH BU: HUM

L15 Drama 3301 Performing Gender
This course investigates an array of contemporary performances to explore manifestations of and challenges to gender norms in American culture. An initial reading of crucial performance theories by Judith Butler, Jill Dolan and others help set the stage for our examination of a diverse collection of contemporary texts, including plays, solo performances, stand-up and pop culture phenomenon. We raise questions about feminist performance strategies, butch/femme performance, camp, cross-dressing, feminist spectatorship, multimedia performances and the representation of lesbian desire. Prerequisite: Any 100-level Women, Gender, and Sexuality Studies course.
Same as WGSS 3401
Credit 3 units.

L15 Drama 331C Tragedy
What is the relationship between freedom and luck? How do men and women respond to large forces beyond their control? Is character a struggle against outside events, or is it a submission to destiny? What happens when two ethical principles, taken absolutely, collide together? What is the nature of evil, and how does good respond to it? In ancient Greece, Renaissance England, 17th-century Europe, modern Europe and postcolonial Africa, the form of tragedy has grappled with these questions, generating both a rich body of imaginative literature and equally compelling philosophical reflections about tragedy. This course explores great works of tragic literature by authors such as Homer, Aeschylus, Sophocles, Shakespeare, Racine, Ibsen, Dostoevsky, Miller and Soyinka, and examines philosophers such as Plato, Aristotle, Hegel, Kierkegaard, Nietzsche, Weil and Arendt in order to explore the questions raised by tragedy.
Same as Comp Lit 331C
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

**L15 Drama 332 Comedy**
An exploration of the theory and practice of comedy in the Greco-Roman world. Readings include examples of iambic (mocking) poetry, comic theater, satiric verse and prose fiction, as well as philosophical discussions of the relationship of humor and laughter to human behavior and values. As comedy in all contexts engages and shapes cultural values just as much as “serious” literature does, its history and reception raise major social and aesthetic issues. Critical topics include: how ancient thinkers imagined comedy’s historical “birth,” how public comic performances may have encouraged either social cohesion or disruption, how communities defined “beneficial” and “offensive” humor, and how ancient elite writers and readers felt about the often lowbrow and obscene content of “classic” comic literature. Combination of lectures and discussions. Same as Classics 386
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: SSP

**L15 Drama 3372 Music and Performance**
In his 1998 book, *Musicking*, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography, and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater and rock. We examine artists whose work blurs the line between “music” and “theater,” including George Clinton, Taylor Mac and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome. Same as AMCS 3370
Credit 3 units. A&S: TH A&S: IQ, HUM

**L15 Drama 338 Physical Theater: An Exploration of Viewpoints and Suzuki Training**
In this course students study two very different but complementary styles of movement training. Developed by the Saratoga International Theatre Institute, this method of actor training combines the improvisational exploration of time and space through “Viewpoints” with the rigid structure and physical demands of the Suzuki method. This combined approach is designed to develop heightened awareness and acute focus in the performer. In addition, it fosters greater impulsiveness and freedom in the moment while maintaining discipline and control. Students gain flexibility and strength and enhance their creative potential by balancing these seemingly opposing methods. Prerequisite: Drama 341 Acting II Fundamentals of Movement or Dance 106E Introduction to Dance as a Contemporary Art Form. Credit 3 units. A&S: LA

**L15 Drama 340 Topics in Stage Movement**
Exploration of a variety of theatrical and movement concepts with emphasis on process rather than product. Concentrates on developing the expressive flexibility of the body and linking the imaginative impulse with physical movement. Preliminary work in relaxation and efficient self-use. Prerequisite: Drama 240E or permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

**L15 Drama 341 Acting II**
Fundamental scene study using texts with emphasis on integration of voice and body and the playing of actions. Students are encouraged to precede this course with Drama 207C. Prerequisite: Drama 240E. Preference given to majors.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

**L15 Drama 341 Acting II — Acting Styles in Theory and Practice: Modern**
This 5-unit class fulfills both one theater studies and one theater arts requirement for the major. It combines fundamental actor training with dynamic, performance-oriented study of the stylistic foundations of modern acting. Text-based scene study that emphasizes the integration of voice and body and playing of actions is paired with units on contemporary and historical acting styles that give context to modern acting practice. Class units cover practical aesthetics and tactical choices for actors interpreting texts, as well as theories of the body in performance ranging from early modern notions of electric and vital passions, to oratorical gesture, Stanislavski, biomechanics, Brechtian alienation and postmodern practices including documentary theater and cross-media mimesis. Because it fulfills both the Acting II requirement and a Theater Studies requirement for the major, the class incorporates research, writing and critical thinking assignments. However, in keeping with the notion that performance constitutes a type of research outcome, student research projects involve kinetic elements. Acting styles are researched in archival sources and embodied in studio exercises and creative student projects. Credit 5 units. A&S: LA A&S: IQ, HUM EN: H
L15 Drama 342 Acting III
Emphasis on characterization while working with a diversity of playwriting styles. Prerequisites: Drama 341, either Drama 207C or 208C, and permission of instructor. Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L15 Drama 343 Fundamentals of Directing
The process of play directing from the selection of a script through production. Prerequisites: Drama 212E and 240E and permission of instructor. Preference given to Drama majors. Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L15 Drama 347 Shakespeare Globe Program: Acting
This Acting Shakespeare course is paired with Drama 3472 as part of a four-week summer intensive program held at the Shakespeare's Globe Education Centre in London. This course, as well as the companion Text and History course (Drama 3472), is taught by a Washington University faculty member, and the program also draws heavily on British theater professionals and educators from Globe Education, who teach a set of short courses on movement, voice, textual analysis, historical context, monologue performance and stage combat. Frequent access to the Globe stage allows actors to work in a spatial configuration very similar to that once used by Shakespeare's company itself. The course culminates with performances of scenes and monologues on the Globe stage. Application process must initiate through the Performing Arts Department office. Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM

L15 Drama 3473 Shakespeare and Early Modern Performance
Paired with Drama 347 Shakespeare Globe Program: Acting, this course uses the resources of London and the Globe Theatre as departure points for an examination of Shakespearean performance in its historical and cultural context. We pay close attention to the dramatic text: meter, style, metaphorical language, dramatic composition, rhetoric, genre, etc. We consider such topics as Shakespeare's playing spaces, the actor-audience relationship in the Globe Theatre, acting, movement, original rehearsal practices, the boy actor, costumes, sound, music, props and the culture of the Bankside (bear-baiting, taverns, violence, prostitution, etc.). Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L15 Drama 3491 Media Cultures
This course is an introduction to the interdisciplinary field of cultural and media studies. Through a focus on television and new media, it analyzes current theoretical ideas and debates about culture. Main topics include the relationship between new technologies and everyday life and popular culture; analysis of media messages and images; how media help construct new identities and mark differences between groups; analysis of the globalization of the production and circulation of media culture; the rise of multimedia cultural industries; and the role of the audience. Required screenings. Same as Film 349
Credit 3 units. A&S: TH A&S: IQ, HUM BU: BA EN: H

L15 Drama 361 Stage Management
A practical approach to the study of theater stage management focusing on organizational and communication skills. Workshops, lectures and discussion; guest speakers and field trips covering the pre-production, rehearsal and performance periods; labor relations/performing arts unions; career opportunities; and supporting the vision of the artistic team. Prerequisites: Drama 212E and Drama 240E. Credit 3 units. A&S: LA

L15 Drama 365 Theater Culture Studies III: Melodrama to Modernism
The third course in an interdisciplinary, four-semester sequence that examines western and non-western dramatic literature and theater history from its known origins to the present day. This class traces the origins of modern theater, moving from Romanticism at the beginning of the 19th century, through melodrama and other popular midcentury theatricals to the rise of modernist drama in Western Europe and the United States from about 1880-1930. We also examine theatrical experimentation in the works of Bonner, Pirandello, Treadwell, O'Neill and Brecht. Emphasis is placed on key developments in history, art and literature, as well as on expanding the traditional canon with plays by women and minority playwrights. Credit 3 units. A&S: TH

L15 Drama 365C Theater Culture Studies III: Melodrama to Modernism
The third of three historical survey courses in theater and performance studies, this course traces the origins of the modern theater. Beginning with Romanticism's self-conscious break with the past, we study the rise of bourgeois melodrama with its intensely emotional rendering of character and spectacular visual effects. We consider how those effects were made possible by advances in industrial stage technology that reproduced the everyday world with unprecedented realism, and how playwrights responded to those technologies by calling for the theater to become either a "total work of art" that plunged its spectators into a mythical realm, or a petri dish that analytically presented the struggles of the modern individual within his or her modern milieu. Exploring a range of aesthetic modes (including melodrama, Realism, Naturalism, Aestheticism, Symbolism, Expressionism, the Epic theater and the Theatre of the Absurd), we read classic plays by modern playwrights such as Ibsen, Chekhov, Shaw, Pirandello, Brecht and Beckett to consider how the modern theater helped its audiences understand as well as adapt to the rapidly changing conditions of modernity.
Consider whether so-called postmodern drama has broken with Bertolt Brecht, Georg Lukacs and Theodor Adorno. We also modernists such as Richard Wagner, William Archer, T.S. Eliot, and what constitutes its defining features. With such provisional theories that have been proposed as a way of understanding the theater, we start by considering when modern drama begins period begin? This course takes up such fundamental questions to produce clean and effective draftings for the theater. In order to successfully complete this class, the student is required to purchase a drafting board and related drafting materials. Credit 3 units. A&S: TH A&S: IQ, HUM BU: ETH FA: Lit, SSP

L15 Drama 367 Introduction to Drafting for the Theater
This course provides the student with a basic understanding of all of the various types of technical drawings needed to successfully execute a scenic design. Throughout the course the student masters all the technical and aesthetic skills needed to produce clean and effective draftings for the theater. In order to successfully complete this class, the student is required to purchase a drafting board and related drafting materials. Credit 3 units. A&S: LA A&S: IQ, HUM, SD EN: H

L15 Drama 368 Black Theater Workshop III
A performance-oriented course that explores the black experience through acting, directing and playwriting. Students develop through classroom improvisation short performance pieces during the semester. They also are required to attend three to five plays. Each student must participate in a final performance which is in lieu of a written final examination. Credit 3 units. A&S: LA, SD A&S: IQ, HUM, SD EN: H

L15 Drama 372 Advanced American Musical Theater
This course focuses on developing the acting, singing and dancing techniques required for performing in musical theater. The student develops group pieces and participates in scenes that explore character within a musical theater context. The class culminates in a workshop performance. Prerequisites: Drama 221 and permission of instructor, by audition. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 373 Issues in Theater and Performance Studies
Explores a variety of special interest topics in theater and performance studies. Consult the Course Listings. Credit 3 units. A&S: LA, WI A&S: IQ, HUM, WI EN: H

L15 Drama 374 Theories of Modern Drama
What makes modern drama “modern”? How does it differ from the drama of other cultural movements? When does the modern period begin? This course takes up such fundamental questions in order to examine not only the influential plays that have come to define the “canon” of modern drama, but the various theories that have been proposed as a way of understanding them in relation to the history of Western culture. From Friedrich Nietzsche’s The Birth of Tragedy to Walter Benjamin’s thesis on the Trauerspiel to Emile Zola’s Manifesto on Naturalism in the theater, we start by considering when modern drama begins and what constitutes its defining features. With such provisional definitions in place, we then engage the responses of fellow modernists such as Richard Wagner, William Archer, T.S. Eliot, Bertolt Brecht, Georg Lukacs and Theodor Adorno. We also consider whether so-called postmodern drama has broken with the modern period to introduce something altogether new, and how recent debates concerning interculturalism, the ideology of form and performance invite new ways of understanding the cultural function of modern drama and its legacy in our own historical moment. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: Lit

L15 Drama 379 Expressionism in Theater and Film
This course is designed as an advanced introduction to the aesthetic movement of Expressionism as it appeared in Germany and the United States in the media of theater and film. Characterized by stylized settings that “ex-press” the internal spiritual/emotional/psychological state of its central character, Expressionism is usually discussed as a reaction to Realism, given its overt symbolism, telegraphic diction and episodic action. Beginning with a brief general introduction to the movement (including its manifestation in the visual arts), we consider its cultural, political and critical history, while exploring more recent scholarly investigations into the significance of its performance dimensions. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: Lit

L15 Drama 3801 Producing New American Plays
This class focuses on all aspects of the business of producing theater. Weekly lectures and discussion include visiting artists who currently work as producers, critics, actors, casting directors, press representatives and designers in New York productions. Credit 2 units.

L15 Drama 3804 Modern American Plays and Playwrights
This class focuses on all aspects of the business of producing theater. Weekly lectures and discussion include visiting artists who currently work as producers, critics, actors, casting directors, press representatives and designers in New York productions. Credit 2 units.

L15 Drama 3806 First Draft Playwriting
The primary focus of this class is the creation of a new first draft of a play. The class is modeled after our highly successful Dorothy Strelsin New American Writers’ Group. Students bring in 10 pages each week sequentially to be read aloud
by other members of the class. Students have their material workshopped, and participate in the feedback process of their own work, and that of others. Students bring their work into the Theater Arts Lab at the end of the semester, so that they can see their plays performed and stages by student actors and directors. Credit 4 units.

L15 Drama 381 MADE in France I: Old Paris/New Europe
Students are introduced to the city’s rich artistic history as well as the world of contemporary movement arts in Europe through two weeks of dramaturgical field research in Paris. With a diversified sampling of performances, museum visits and discussions animated by program faculty, students experience hands-on the rich history Paris has on display. Museums visited include the Musée du Louvre, Musée de la Mode et du Costume, Musée d’Orsay, Centre Georges Pompidou, Musée des Arts et Métiers, Musée Cluny, and the Rodin Museum. Museums and live performances serve as our main “books” for this intensive hands-on course. Museum visits and performances are supplemented by readings and assignments on a chosen theme and performance history, and regular seminars with the specific aim of investigating a variety of dramaturgical approaches that contemporary European directors employ when considering the use of objects, props, costume design, sound design, lighting design and movement. Additionally, students attend several contemporary dance theater performances.
Same as Dance 360
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 382 MADE in France II: Choreography and Construction Collaborations
Continuing upon the field research carried out in Paris, student work groups begin to concretize their creative projects at a rural retreat center for artists in Burgundy, France. Beginning with a day of intensive introduction to design and construction principles in accordance with the program theme, the design faculty helps students prepare for the “Imagination Fair” presentations that mark the mid-way point and serve to launch each group’s creative process collaboration in Mélisey. After these presentations, students get to work on realizing their choreography and construction projects: the collaborative creation of dances (solos, duos and trios) using a variety of found objects, props, costumes and/or instruments created by dancers and designers for the final production. Each year, in addition to the US teaching faculty, a number of European artists active in their profession offer valuable master classes that coincide with the program theme and help prepare students for their final projects. Work hours are interspersed with French-language meals during which students are encouraged to speak French with the host family and with their peers and teachers. Additional field trips are organized to introduce students to the rich cultural and agricultural heritage of the Burgundy region.
Prerequisite: Dance 360 MADE in France I: Old Paris/New Europe.
Same as Dance 361
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 392E Greek and Roman Drama
Same as Classics 392E
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L15 Drama 393 The Tragic Muse
Intensive study of the major tragic playwrights of Ancient Greece (Aeschylus, Sophocles and Euripides) and some of their imitators and critics in the Western tradition. We consider tragedy’s origins, its literary elements and theory, its performance and religious contexts, and its social functions. Lectures with discussions.
Same as Classics 393
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H

L15 Drama 3950 American Musical Film
Film musicals were crucial to the success of the American film industry from the dawn of sound film in the early 1920s to the demise of the studio system in the late 1950s. This course examines the American film musical from a variety of aesthetic, critical and historical perspectives, with particular attention to how the genre interacted with popular music and dance and the major political and social trends of the ’30s, ’40s and ’50s. Required screening time: 2 p.m. Friday.
Same as Film 359
Credit 3 units. A&S: LA A&S: IQ, HUM BU: HUM EN: H

L15 Drama 395C Shakespeare
Introductory course emphasizing critical interpretation. Representative plays are studied in detail. Required of all English majors and minors.
Same as E Lit 395C
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L15 Drama 3975 Wolves of Wall Street: American Business and Popular Culture
In 1925, Calvin Coolidge, the 30th President of the United States, famously said: “After all, the chief business of the American people is business. They are profoundly concerned with buying, selling, investing and prospering in the world.” America’s perceptions about business and the Free Enterprise system have evolved and changed over time from the 1920s to the present day. For some, Oliver Stone’s Wall Street seemed to glamorize the notion that “Greed is good.” Today, the topic of rising income inequality has been connected with the collapse of numerous banks and Wall Street firms, a crippled
housing industry, the declining middle class, and widespread anxieties about the meaning and future of “The American Dream.” This course examines a variety of artistic, ethical and historical perceptions about American Business as depicted in popular culture and the arts over the past hundred years. How have some of America’s foremost novelists, filmmakers, and playwrights (including F. Scott Fitzgerald, Eugene O’Neill, Arthur Miller, Martin Scorsese, and David Mamet), treated questions of conspicuous consumption, the acquisition of capital, and the disparity between rich and poor? Our class surveys several genres and artistic forms, including tragic works like *The Great Gatsby* and *Death of a Salesman*, and popular musicals such as *How to Succeed in Business without Really Trying* and *The Producers*. No more than three (3) absences allowed during the semester.

**Same as HBRW 4010**

Credit 3 units.

**L15 Drama 4001 Computer-Assisted Design for the Theater**

This course is an in-depth study of how computers can assist designers in drafting and rendering processes. Primary study is focused on the program Vectorworks. We fully explore the use of this program in development of scenic and lighting design projects from basic line drawings to fully rendered 3D images. Other programs covered are Autocad, Google Sketch Up, AG132, Photoshop CS3 and some lighting design previsualization software. Projects are centered on theatrical applications and based on students’ imaginations.

Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

**L15 Drama 4010 Israeli Drama**

Same as HBRW 4010

Credit 3 units. A&S: LA, WI A&S: IQ, LCD, WI BU: HUM, IS

**L15 Drama 403 Dramaturgical Workshop**

A laboratory course that investigates dramaturgy from four vantage points: New Play Dramaturgy, Institutional Dramaturgy, Dramaturgy of Classics and Dramaturgical Approaches to Nontraditional and Devised Theater. This is a “hands-on” course where student dramaturges not only pursue the study of dramaturgy, but work actively and collaboratively with playwrights, actors and each other. Prerequisite: Drama 343.

Credit 3 units. A&S: LA A&S: IQ, HUM

**L15 Drama 4031 Black and White in American Drama**

This course addresses the complex issue of race in America through the 19th and 20th centuries as dramatized by American playwrights, black and white. Authors include Countee Cullen, Lillian Hellman, Eugene O’Neill, Jean Toomer, Langston Hughes and Arthur Miller. Prerequisites: junior standing, two 300-level courses or better.

Same as E Lit 403

Credit 3 units. A&S: TH FA: Lit

**L15 Drama 404 Topics for Writers: Beckett**

*Waiting for Godot, Happy Days, Krapp’s Last Tape:* These are but three of Samuel Beckett’s revolutionary texts for theater. The complete canon of plays are examined for structure and compositional elements. Students undertake exercises in dramatic composition and perform a chamber presentation of *Endgame*. Course is intended for writers with some experience of the dramatic form. Intending students MUST interview with instructor Nov. 12–14.

Same as E Lit 404

Credit 3 units. A&S: LA FA: Lit

**L15 Drama 4081 Theater for Social Change**

Drawing upon the principles and teachings of Brazilian director Augusto Boal, students explore ways of effecting positive social change in a theatrical context. Students study the aesthetic of Boal’s *Theatre of the Oppressed* and learn various games and exercises designed to mine issues of social (in)justice. Using Boal’s techniques of “image” and “forum” theater, students then create and perform plays focused on these issues. This public performance is an interactive event offered for and with the university community. No prior performance training or experience is required for this course.

Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

**L15 Drama 4082 Advanced Theater for Social Change**

This course is a continuation of exploration begun in Drama 4081, Theater for Social Change: a prerequisite for this advanced course. Students expand from exploring their own experience with oppression to facilitating that exploration with others. Students are introduced to the “Joker” system, developed by Brazilian director Augusto Boal. The Joker is the director of a forum theater event. He leads both the exploration and playmaking phases of the process. In preparation for stepping into this role, students read Paulo Freire’s *Pedagogy of the Oppressed* which gives them a foundation in the power and efficacy of collaborative educational techniques. In addition, students read *Theatre for Living*. Canadian director David Diamond’s book detailing his application of Boalian techniques in a less overtly oppressive society. Students begin their practical exploration by first working with one another, learning how
to lead exercises and games, followed by an exploration of playmaking and the facilitation of an interactive forum theater event. The course culminates in an outside project in which each student is placed with a St. Louis area school or social organization. The student applies skills he or she has acquired throughout the semester by serving as the "Joker" of the workshop. In this role, the student leads the entirety of the workshop process with a selected group exploring ways of effecting positive social change in a theatrical context. He or she facilitates exercises with the group that mine a chosen area of oppression with which the group is grappling. The student guides playmaking with the group that highlights this area of oppression. The resulting plays are presented then to the larger school or organization community. This culminating event is an interactive forum theater presentation that the student leads as "Joker." Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD EN: H

L15 Drama 409 The Modernist Revolution in the Arts
What is/was Modernism? How did this worldwide phenomenon impact the arts in every genre and medium from the turn of the 20th century to the present? Do we still live in the age of Modernism, or should we consider ours a new, Postmodern age? This course examines these and other questions as they relate to the theater, prose, poetry and the visual arts. Our investigation focuses on most of the major literary and artistic movements, including Naturalism, Impressionism, Symbolism, Surrealism and Expressionism. We examine literary manifestoes that help to illuminate the periods under discussion, as well as look at individual works themselves. Central to our approach in the course is an interdisciplinary perspective. Among the luminaries whose work is considered are Ibsen, Strindberg, Chekhov, Hemingway, Dali, Picasso, Stravinsky, Artaud, Kafka and Beckett. Credit 3 units. A&S: LA A&S: IQ, HUM FA: Lit

L15 Drama 410 Advanced Stage Lighting
An advanced-level continuation of Drama 310. Emphasis is placed on design aesthetics and their application in a laboratory setting. Students explore color theory, lightboard programming and design analyses as well as execute a variety of finished projects. These projects cover a wide range of production styles and performance venues. Prerequisite: permission of instructor. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 411 Lighting Technology
Lighting Technology is an extremely hands-on approach to learning how the top industry designers create major shows and concerts with the most state-of-the-art equipment. We spend a considerable amount of time learning how to use and program robotic/moving lights, LED fixtures and video integration for use in drama, dance, musical and concert settings. The student gains intensive training in the use and programming of the ETC Express, ETC Ion and GrandMA 2 Light consoles with a full range of Vari*Lite robotic fixtures. In addition, the student receives training in Isadora, a very powerful video design program. Due to the amount of programming time required outside of class, this is a 4-credit lab course. Prerequisites: Drama 212 and Drama 310. Credit 4 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 412 Advanced Practicum in Technical Theater
Independent Study. Intensive practical experience in scenic design building and painting; lighting design and installation; costume design, coordination and construction; makeup; and audio production. Prerequisites: Drama 212E, credits on at least two productions, and permission of staff. Credit variable, maximum 3 units. A&S: LA EN: H

L15 Drama 413 Costume Rendering and Design
An exploration of media and rendering techniques used in producing an effective costume design. Basic figure drawing, proportion, color, concepts, exaggeration and period style. Drawing and painting materials are provided by student. Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 414 Period Style and Design History
Examination of period styles as they relate to theatrical design and history. Study of architecture, furniture and props from Greek to contemporary periods. Prerequisite: Drama 212E. Credit 3 units. A&S: TH A&S: IQ, HUM

L15 Drama 421 Costume Construction and Design
Practical techniques in theatrical costume construction, including patternmaking, cutting and draping, and execution of design concepts. Research and design projects culminate in finished period garments and related accessories. Topics explored include corsetry and foundation garments, millinery, mask making, and dyeing and painting. Prerequisite: Drama 307 or permission of instructor. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 422A Film Stardom, Performance and Fan Culture
This course focuses on the Hollywood star system. We explore stars in relation to celebrity and consumerism, especially how
“stardom” is created by a system that seeks to create effects in film viewers whether conceived as audiences, fans or spectators. We examine the performance element of stardom and its relationship to genre, style and changing film technology. Also of concern is how stars and the discursive construction of stardom intersect with gender representation, race, ideology, sexuality, age, disability, nationality and other points of theoretical interest to and historical inquiry in contemporary film studies. While emphasis is placed on mainstream commercial U.S. cinema, students are encouraged to pursue questions beyond this framework within their own research. Required screenings.

Same as Film 422

Credit 3 units. A&S: LA A&S: IQ, HUM BU: BA EN: H

L15 Drama 4234 Performing Knowledge: Arts Integration Pedagogy in Theory and Practice
This course invites students interested in the performing arts to apply their talents to the K-12 classroom through a service-learning component that allows them to develop and implement an arts-integrated curriculum grounded in current research in the cognitive sciences. Divided into four units, the course begins with a survey of recent research in cognitive science that traces the effects of arts-related activities on brain development. The second unit builds upon that theoretical grounding, focusing on a model of arts-integrated pedagogy developed through Harvard University’s Project Zero. The third and fourth units are practice-based, with students developing a lesson plan in a core subject area that incorporates the performing arts. Then — in consultation and collaboration with an Interchange artist-in-residence and a master teacher in the St. Louis or Normandy Public Schools — students implement their curriculum in a K-12 classroom, testing its efficacy as well as the theoretical assumptions upon which it is based. This course is open to all students across campus who have a strong interest and/or background in the arts, and who wish to explore opportunities in service learning. CBTL course.
Credit 3 units. A&S: LA A&S: IQ, HUM BU: BA EN: H

L15 Drama 431 English Drama Exclusive of Shakespeare to 1642
Studies of selected major plays against a background of change and tradition in English drama from its beginnings to the closing of the theaters.
Same as E Lit 431

Credit 3 units. A&S: TH FA: Lit

L15 Drama 432 Topics in Renaissance Drama
A study of Elizabethan and Jacobean theatrical culture — the plays, players, playwrights and audiences of public theaters, private theaters and banqueting halls. Study includes the plays of Lyly, Kyd, Marlowe, Jonson, Chapman, Ford, Beaumont, Fletcher, Marston, Middleton, Webster and Shakespeare.

Same as E Lit 432

Credit 3 units. A&S: TH FA: Lit

L15 Drama 435 Expressionism in the Arts
A close study of expressionism as an international phenomenon in the arts, from the anti-naturalist movements of the 1890s to Hitler’s condemnation of expressionism as decadent. The evolution of expressionist theater from Wedekind to Toller and Kaiser and such composers as Schoenberg and Berg; in the visual arts, such groups as Der blaue Reiter and Die Brucke, such independents as Kokoschka; in cinema, such figures as Pabst, Murnau, Von Sternberg and Lang. Prerequisite: Drama 208E, Drama 336 or permission of instructor.
Credit 3 units. A&S: TH

L15 Drama 436 Seminar in Comparative Drama
The course begins with Plato’s critique of mimesis and Aristotle’s defense, as we read The Poetics as a response to Plato. We take some of Aristotle’s basic concepts, such as mimesis, plot, character and thought, and attempt to apply them to drama up to the present day. We also consider fundamental elements of both the dramatic text and the dramatic production, such as space, time, dialogue, narrative devices and perspective. Brecht’s theory of “epic drama” form the other conceptual pole in the course, opposing Aristotle. Besides these two theorists, other figures include Ben Jonson, Corneille, Dryden, Diderot, Schiller, Hegel, Zola, Artaud and Grotowski. The course, then, has both chronological and thematic axes. Three papers and one oral presentation.
Same as Comp Lit 436

Credit 3 units. A&S: TH FA: Lit

L15 Drama 4361 Architecture and Ritual in Greek Sanctuaries
Study of one or more themes recurring in the traditions of Greek and Roman literature, history and culture. Topic varies each semester.
Same as Classics 4361

Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L15 Drama 4370 Music and Performance
In his 1998 book, Musicking, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music...
Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater and rock. We examine artists whose work blurs the line between “music” and “theater,” including George Clinton, Taylor Mac and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome. 

Same as AMCS 4370 

Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L15 Drama 440 Acting IV
Acting IV synthesizes the student’s performance training; creative and scholarly writing skills; and knowledge of dramatic literature. The advanced acting student is encouraged to develop and articulate his/her own aesthetic convictions. The course includes intensive solo performance projects, including writing and performing original monologues. Also, significant emphasis is placed on preparing the student for the work of professional acting, including workshops on audition monologues, head shots, résumés and economic issues. In addition, the students become familiar with various American theater cities, the regional theater system, and prominent working theater artists. The course closes with a public performance of the original, scripted and audition material developed over the semester. 

Prerequisite: Drama 342. 

Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 444 Directing II
Further study in the fundamentals of directing. Emphasis on the director’s work with actors, designers and a realized metaphorical concept. Prerequisites: Drama 343 and permission of instructor. 

Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 445 Seminar
Rotating upper-level seminar. Senior seminar normally offered each semester and meant to satisfy the 400-level requirement for the drama major. 

Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 4452 Senior Drama Capstone: Manifesto Now
This capstone course invites students to synthesize their critical, historical and theoretical studies of theater and performance by exploring in-depth the theatrical manifesto. Theater history is littered with declarations of theatrical vision, from the Italian Futurists of the early 20th century to the feminist collectives of the 1970s to the 21st-century drag queen and music theater innovator, Taylor Mac. Together, we explore the manifesto as both form and performance, as well as their competing visions of the roles and responsibilities of the theater artist to the society in which he or she works and lives. Naturally, we also attempt our own manifestos, putting into words our own deep convictions about the theater and its importance in our contemporary world. 

Credit 3 units. A&S: IQ, HUM

L15 Drama 446 Meta-Theater: Theater Which Reflects Itself
The notion that works may be self-relection is a familiar one to the student of the postmodern in the arts. Nevertheless, the concept is not a new one and may be found frequently in the history of the theater from the Elizabethan to the present day. In this course, we identify and examine the history and significance of the term “meta-theater” in a number of important dramatic works from Shakespeare to Tom Stoppard. Along the way we consider examples of the “play-within-the-play” such as Hamlet and A Midsummer Night’s Dream, works that use the theater itself and the art of the stage as a focal point (Pirandello’s Six Characters, Stoppard’s Rosencrantz and Guildenstern Are Dead, Michael Frayn’s Noises Off, Ronald Harwood’s The Dresser, David Mamet’s A Life in the Theatre), and plays which focus their energies on the act of scripting one’s life such as Shepard’s True West or Shaffer’s Gift of the Gorgon. In addition to the above, our investigation also considers examples from other literary genres, especially the visual arts which are explicitly self-referential in nature. Prerequisite: one 300-level drama literature course or permission of the instructor. 

Credit 3 units. A&S: TH FA: Lit

L15 Drama 447 Seminar in Theater History
Rotating upper-level seminar in theater history. 

Same as Comp Lit 425 

Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L15 Drama 448 The History of Theater Design
Survey course covering the history of the performance space and the scenic design elements contained within that space. The visual elements and theater architecture of each period are examined in relationship to the art and technology of the time. Prerequisites: Drama 207C or Drama 208C, and Drama 212E. 

Credit 3 units. A&S: TH

L15 Drama 450 Advanced Scene Design
Advanced projects in scene design including drafting, rendering, model building and conception. Prerequisite: Drama 311M or permission of instructor. 

Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 4505 Playwright’s Workshop
This course offers an organized independent study for advanced students in playwriting. The class is structured by the
L15 Drama 451 Topics in Period Style: Baroque Opera and Neoclassical Style
An exploration of the dynamic interplay between high Baroque culture and the perceived style of the ancient Greeks and Romans. Primary sources used are paintings, sculpture and renderings for Baroque operas, as well as rare artifacts that exist from that time as these sources relate to classical evidence extant in that period. Secondary sources are journal articles and records of fully staged productions of intervening years. Primary interest is retracing the thought processes of the designers of Baroque opera. Focus is on Purcell's Dido and Aeneas, looking at the libretto and its relationship to source texts, both ancient and contemporary, and also its place within the cultural history of the theater. Projects include: in-class presentations and a research paper or fully realized design project.
Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 451 American Television Genres
Questions of genre are central to any exploration of television's texts, whether they are being analyzed as craft, commerce or cultural phenomenon. Genre has been used by critics and historians to ascribe "social functions" to groups of programs and to diagnose cultural preoccupations, while genre has been used industrially to manage expectations among audiences, advertisers, programmers, producers and creative professionals. Investigating genres ranging from the soap opera to the western, workplace situation comedies to sports, and game shows to cop shows, this course explores the role of genre in the production, distribution and reception of American television. Students gain a critical understanding of genre theory and key arguments about the form and function of television texts and develop a set of tools for analysis of televisual narrative and style, the social uses and meanings of genre, the institutional practices and presumptions of the American television industry, and the persistence of textual forms and audience formations in the face of structural changes such as deregulation, media convergence, and globalization. Required screenings.
Same as Film 451

L15 Drama 453 American Drama
Topics in American Drama.
Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L15 Drama 455 Practicum in Arts Management
Assigned work and projects under faculty supervision in Washington University's Edison Theatre or off-campus cooperating institutions. Prerequisite: permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 456 A Madman in the Theater: The History of Insanity on Stage from Sophocles to Shaffer
The image of the madman and the theme of insanity have been extraordinarily captivating to theater artists from the Greeks to the present. In this course we consider some of the most remarkable examples from the classical period, including Sophocles' Ajax and Euripides' Medea and The Bacchae, and the Renaissance (Hamlet, Othello, The Spanish Tragedy, The Duchess of Malfi, Life is a Dream). We investigate these works both for what they tell us about the image of the madman in the historical period and culture in which they were written as well as in order to closely examine the texts themselves. We also examine plays from the 19th and 20th centuries, including Buchner's Woyzeck, O'Neill's Emperor Jones, Anouilh's The Madwoman of Chaillot, Miller's Death of a Salesman and Shaffer's Equus. Finally, the course makes extensive use of the Performing Arts Department's production of Peter Weiss' extraordinary work Marat/Sade and incorporate theoretical writings such as Michael Foucault's Madness and Civilization into discussions.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L15 Drama 459 The Filmed Stage Play
Close textual analyses of stage plays and their film adaptations, examining structural parameters such as space, time point of view, spectator position and performance in the two art forms. Prerequisite: permission of the instructor.
Credit 3 units. A&S: TH

L15 Drama 460 The Creative Impulse
Developed with the director and designer in mind, this course encourages imaginative theater making by developing the student's own sense of creative confidence and ability, by expanding the source options for artistic inspiration, by recognizing and valuing the synergistic properties of transcendent theater making, and by strengthening the collaborative skills essential to the art. The course includes creativity exercises, comprehensive forms of text analysis, exploration of other art forms, cooperative conceptual projects, and field trips to area productions and museums. Students is expected to complete several individual projects, presentations and research papers, as well as intensive small-group projects. Prerequisite: one of the following courses: Drama 307, 310, 311 or 343.
Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 465 The Chinese Theater
Survey of the performance and literary traditions of the Chinese theater from their pre-Tang origins to the present day. The course focuses on three forms: 14th-century zaju plays, 16th- and 17th-century chuanqi plays, and recent films from China,
Taiwan, and Hong Kong. Background in either China studies or theater in other cultures recommended. Same as Chinese 467
Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD, SD

L15 Drama 469 Topics in Shakespearean Production
This course examines Shakespeare’s comedies in performance. Combining scene work and production history, students gain access to the world of the comedies from a hands-on, theoretical and historical perspective. Prerequisites: Drama 395C or permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 471 Millinery Design and Construction
A practical course exploring the basic techniques and different methods of constructing hats and accessories. Students work with a variety of materials including buckram, straw, felt and wire that they purchase. Research and design projects culminate in the construction of several projects in class. Prerequisite: Drama 307 or 421 or permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 473 Advanced Playwriting
This course explores the tendencies and relationship between each individual student writer and the page. Exercises dispel any lingering doctrine that presupposes a certain style of writing. A large part of the class centers around collaborations. The writers write scenes as a final project for an acting class, and also work with two professional actors in an extended writing project that culminates in a script-in-hand presentation. The informal moments between collaborations look at the process beyond the first draft — i.e. the playground of language, nonverbal options, and the maintaining of “the work” through rewrites, readings, workshops and productions. Prerequisite: Drama 227.
Credit 3 units. A&S: LA A&S: IQ, HUM

L15 Drama 474 Acting Theories
This course explores in depth the major theoretical texts on acting and performance theory. Pertinent philosophical texts, dramatic theories, acting systems and methodologies are studied. The survey operates chronologically from early documents on acting (Greek, Roman, Italian Renaissance) through to modern and contemporary documents that inform acting and acting training today (Stanislavsky, Brecht, Grotowski, Meisner, Spolin, Suzuki). Methodologies and practices of select major stage actors are explored as well. In some cases, directing theories that have had major influence on acting theory are examined.
Credit 3 units. A&S: TH A&S: IQ, HUM

L15 Drama 478 The Eye of the Mask: A Multicultural History of the Theater through Mask Making and Design
An exploration of the history of masks used in the theater. Topics include drama of ancient Greece, the ancient No Theater of Japan, the Italian theater of commedia dell’arte, the dance drama of Bali, the Venetian and Mardi Gras Carnival celebrations, and ritual and ceremonial masks of other cultures: Africa, Latin America and Asia, using the instructor’s extensive collection of masks as primary research subjects. Projects include: an in-class presentation and research paper with three to five fully realized mask designs are constructed within class and at an additional lab time discussed on the first day.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H

L15 Drama 479 Fundamentals of Sound Design
Encompassing both creative and technical aspects of sound in the performing arts, the course gives theoretical knowledge of and practical experience in the following areas: fundamental rules of physics and electronics related to sound, use of standard digital recording studio equipment, “training” of the ear, and basic techniques of sound montage. Students are expected to participate in a variety of conceptual and research-oriented exercises as well as complete several lab projects. Sound-related work on Performing Arts Department productions may be required. Prerequisites: Drama 212 and permission of instructor.
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 487 Theater Culture Studies Seminar
Rotating upper-level topics course. Topics come from Theater Culture Studies sequence.
Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI

L15 Drama 492 Performing and Fine Arts in Progress
The objective of this course is to provide a total immersion into the live theater and arts experience in New York City, offering students the opportunity to see at least two fully produced plays per week over the course of the 14-week semester. Students attend professionally presented readings in the New York theater community, providing an insider’s look at the development of plays. Students attend group retreats to MOMA, the Guggenheim, the Metropolitan Museum of Art, and galleries. They attend weekly forums to discuss different aspects of the production, focusing on design, concept, direction, performance, execution and the text/material. They also examine how they might do things differently, putting their own artistic vision to use. Students also discuss current events in the arts community at the weekly meetings and occasionally, there are guest artists from the shows and readings we have seen. Students are required to keep a journal filled with their experiences and reflections that are graded monthly by instructors. Students attend performance at theaters including but not limited to: BAM, St. Ann’s Warehouse, Manhattan Class Company, the New Group, Lincoln Center, La Mama, Classic Stage
Company, Manhattan Theatre Club, Roundabout, on Broadway, Playwright’s Horizons, Second Stage, Cherry Lane, PS122, the Vineyard, American Ballet Theatre, the Metropolitan Opera and others.

Credit 2 units.

L15 Drama 493 Senior Project
Specialized study in a selected area in drama. Required of all drama majors not taking Drama 499. Prerequisite: 15 units of advanced work in drama at the 300- or 400-level.
Credit 3 units.

L15 Drama 497 Performance Theory
This course introduces students to contemporary theories of performance, with “performance” understood as both metaphor and event. From a multi-disciplinary perspective, students consider how cultures produce meanings — and, indeed, perform those meanings — to create and/or disrupt their own social coherence. Theories likely to be studied include: J.L. Austin’s speech-act theory and its engagement by John Searle and Jacques Derrida; Victor Turner’s analysis of ritual as social process and Richard Schechner’s use of it to transform “theater studies” into “performance studies;” Erving Goffman’s sociology of the self and its relation to a post-structuralist model of subjectivity; Michael Fried’s screed against minimalist art and its relation to Happenings, Body Art, Fluxus, and other mid- to late-20th century examples of “performance art;” and Judith Butler’s influential revision of Austin’s performative in her theory of queer “performativity.”
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L15 Drama 499 Study for Honors
Prerequisites: senior standing, a cumulative and a major GPA of 3.5, and permission of the chair of the Performing Arts Department.
Credit variable, maximum 6 units.

L15 Drama 4990 Independent Work
Students may contract with a faculty supervisor for credit for their work on theatrical productions or research. Contracts must be signed by the student and the coordinator of Drama 500 before the student’s work on the project commences. Credit and grade option to be determined in each case. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit variable, maximum 6 units.

L15 Drama 4991 Acting
Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit variable, maximum 3 units.

L15 Drama 4992 Directing
Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit variable, maximum 3 units.

L15 Drama 4993 Technical Theater
Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit variable, maximum 3 units.

L15 Drama 4994 Voice, Speech
Independent study.
Credit variable, maximum 3 units.

L15 Drama 4995 Literature, Theory, Criticism
Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit variable, maximum 3 units.

Earth and Planetary Sciences
For students interested in studying the world beneath their feet, or worlds farther away, the Department of Earth and Planetary Sciences provides the tools for understanding the processes that shaped our planet and other bodies within our solar system. Understanding the Earth system is also the key to addressing many environmental challenges, including climate change, water supply, and energy issues. An Earth scientist is uniquely poised to help solve some of society’s most pressing problems. Because planets are complex systems, Earth and planetary sciences is by necessity an interdisciplinary field. It applies biology, chemistry, physics, and math to the investigation of topics such as early life on Earth, the structure of the Earth’s deep interior, the nature of contaminant transport, and the evidence for water on Mars.

For a student who has developed a passion for the basic sciences and is looking for a way to study these sciences outside traditional disciplinary boundaries, Earth and Planetary Sciences is an ideal choice of major. The department offers majors and minors in Earth and Planetary Sciences and in Environmental Earth Sciences. Both the EPS and EES majors offer a range of customization that allows students to focus on topics with the greatest relevance to their academic interests and career plans.

All students in the major have the opportunity, but are not required, to participate in faculty research programs. Many of our students take advantage of these varied research opportunities, providing them with valuable experience for future employment.
or for graduate school. Each year, several scientific papers and scientific abstracts are co-authored by undergraduates, and undergraduates have presented papers at national science meetings.

**Department Policies for Majors and Minors**

**Minimum grade performance:** A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. Courses with grades of D may fulfill the College’s 120 total hours requirement, but they do not meet the departmental requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.

**Transfer Credits and University College:** Course work completed at another college or university must have prior approval of the department to be used to fulfill requirements for the EPS major. Courses taken at the University College (evening school) normally may not be substituted for the courses required for an EPS major. Written consent from the Director of Undergraduate Studies is required for any such substitutions to apply and must be sought before the course is taken.

**Graduate level courses:** All EPS graduate courses (course numbers 500 and above) are open to advanced undergraduates with permission of the undergraduate adviser and the specific course instructor.

There are two majors in this department: EPS (Earth and Planetary Sciences) and EES (Environmental Earth Sciences).

All students completing the EPS or EES majors are required to complete a Capstone Experience. Information regarding
the capstone experience can be found on our website: http://eps.wustl.edu/Capstone_Experiences.

The Major in Earth and Planetary Sciences

For the most current information visit our website: http://eps.wustl.edu/undergraduate

The Major in Earth and Planetary Sciences (EPS) focuses on the application of chemistry, biology, and physics to Earth and planetary sciences, and on the nature of planets, their resources, and their relationships to human activity. The curriculum is broad, and the requirements are flexible enough to accommodate diverse needs and interests. Many courses present hands-on, problem-oriented experiences, including ample opportunity for fieldwork, laboratory work, and the use of state-of-the-art computational facilities and research instrumentation.

There are three tracks to the EPS major — geology, geophysics, and geochemistry — each of which includes course offerings in both Earth science and planetary science. Students, in consultation with their major adviser, are encouraged to concentrate on one of these tracks.

Earth and Planetary Sciences Major: Geology Track

Geology addresses the formation processes, spatial organization and tectonic origins, age, and chemistry of rocks on Earth and other planets. In addition to other requirements, geology track students take EPSc 437 Introduction to Petrology and a 6-credit field camp.

Core courses: EPSc 201 Earth and the Environment, EPSc 352 Earth Materials, EPSc 353 Earth Forces, and EPSc 437 Introduction to Petrology

Electives: At least four courses must be selected from those listed below, with at least three in Geology and one in Geophysics or Geochemistry.

Geology: EPSc 385 Earth History, EPSc 409 Surface Processes, EPSc 413 Introduction to Soil Science, EPSc 422 Sedimentary Geology, EPSc 430 Environmental Mineralogy, EPSc 460 Introduction to Structural Geology, EPSc 473 Planetary Geology

Geochemistry: EPSc 323 Biogeochemistry, EPSc 401 Earth Systems Science, EPSc 441 Introduction to Geochemistry, EPSc 443 Methods in Biogeochemistry, EPSc 444 Environmental Geochemistry, EPSc 445 Organic Geochemistry, EPSc 446 Stable Isotope Geochemistry, EPSc 474 Planetary Geochemistry

Field camp: Students must complete an approved geology field camp worth at least 6 units of credit. The field camp must be attended during the summer, after either the junior or the senior year. It is important to take the appropriate courses (usually listed by the camp) before attending field camp.

Prerequisites: Chem 111A, Chem 112A (or a score of 4 or 5 on the AP Chemistry Exam); Math 131, Math 132, Math 233; Physics 117A, Physics 118A (or Physics 197, Physics 198).

Optional: Senior Honors Thesis is required for Senior Honors (see Seniors Honors and Research Distinction).

Recommended writing-intensive courses: The department offers two courses that satisfy the college writing-intensive requirement, EPSc 498 Undergraduate Research Seminar and EPSc 404 Ideas and Controversies In the Geosciences. These courses are recommended to students majoring in EPS.

Earth and Planetary Sciences Major: Geophysics Track

Geophysics uses methods of physics to understand the structure and evolution of the Earth and other planets. In addition to other requirements, geophysics track students must take courses in differential equations and matrix algebra. These are prerequisites for the advanced level geophysics courses that are available to the geophysics track students. Field camp is not required.

Core courses: EPSc 201 Earth and the Environment, EPSc 352 Earth Materials, and EPSc 353 Earth Forces.

Electives: At least four courses must be selected from those listed below, with at least three in Geophysics & Remote Sensing and one in Geology or Geochemistry.

Geology: EPSc 385 Earth History, EPSc 409 Surface Processes, EPSc 413 Introduction to Soil Science, EPSc 422 Sedimentary Geology, EPSc 430 Environmental Mineralogy, EPSc 460 Introduction to Structural Geology, EPSc 473 Planetary Geology

Geochemistry: EPSc 323 Biogeochemistry, EPSc 401 Earth Systems Science, EPSc 441 Introduction to Geochemistry, EPSc 443 Methods in Biogeochemistry, EPSc 444 Environmental Geochemistry, EPSc 445 Organic Geochemistry, EPSc 446 Stable Isotope Geochemistry, EPSc 474 Planetary Geochemistry

Optional: Senior Honors Thesis is required for Senior Honors (see Seniors Honors and Research Distinction).

Recommended writing-intensive courses: The department offers two courses that satisfy the college writing-intensive requirement, EPSc 498 Undergraduate Research Seminar and EPSc 404 Ideas and Controversies In the Geosciences. These courses are recommended to students majoring in EPS.

**Prerequisites:** Chem 111A, Chem 112A (or a score of 4 or 5 on the AP Chemistry Exam); Math 131, Math 132, Math 233, Math 217, Math 309; Physics 117A, Physics 118A (or Physics 197, Physics 198).

**Optional:** Senior Honors Thesis is required for Senior Honors (see Seniors Honors and Research Distinction).

**Recommended writing-intensive courses:** The department offers two courses that satisfy the college writing-intensive requirement, EPSc 498 Undergraduate Research Seminar and EPSc 404 Ideas and Controversies In the Geosciences. These courses are recommended to students majoring in EPS.

### Earth and Planetary Sciences Major: Geochemistry Track

Geochemistry uses methods of chemistry to understand the chemical composition of the Earth and other planets. In addition to other requirements, geochemistry track students take EPSc 441 Introduction to Geochemistry, and one additional math course either in differential equations, matrix algebra, or probability & statistics. These are prerequisites for the advanced level geochemistry courses that are available to the geochemistry track students. Field camp is not required.

**Core courses:** EPSc 201 Earth and the Environment, EPSc 352 Earth Materials, EPSc 353 Earth Forces, and EPSc 441 Introduction to Geochemistry.

**Electives:** At least four courses must be selected from those listed below, with at least three in Geochemistry and one in Geology or Geophysics & Remote Sensing.

**Geology:** EPSc 385 Earth History, EPSc 409 Surface Processes, EPSc 413 Introduction to Soil Science, EPSc 422 Sedimentary Geology, EPSc 430 Environmental Mineralogy, EPSc 437 Introduction to Petrology, EPSc 460 Introduction to Structural Geology, EPSc 473 Planetary Geology.

**Geochemistry:** EPSc 323 Biogeochemistry, EPSc 401 Earth Systems Science, EPSc 443 Methods in Biogeochemistry, EPSc 444 Environmental Geochemistry, EPSc 445 Organic Geochemistry, EPSc 446 Stable Isotope Geochemistry, EPSc 474 Planetary Geochemistry, EPSc 511 Minerals in Aqueous Environments, EPSc 544 Methods Mass Spectrometry, EPSc 545 Radiogenic Isotope Geochemistry, EPSc 569 Thermo & Phase Equilibria, EPSc 571 Meteorites.

**Geophysics & Remote Sensing:** EPSc 319 Physical Oceanography, EPSc 407 Remote Sensing, EPSc 408 Earth’s Atmosphere and Global Climate, EPSc 410 Earth Remote Sensing Methods and Instrumentation, EPSc 428 Hydrology, EPSc 452 Introduction to Seismology, EPSc 453 Interior of the Earth, EPSc 454 Exploration and Environmental Geophysics, EPSc 459 Geodynamics

**Prerequisites:** Chem 111A, Chem 112A (or a score of 4 or 5 on the AP Chemistry Exam); Math 131, Math 132, Math 233, and either Math 217 or Math 309 or Math 2200 or Math 3200; Physics 117A, Physics 118A (or Physics 197, Physics 198).

**Optional:** Senior Honors Thesis is required for Senior Honors (see Seniors Honors and Research Distinction).

**Recommended writing-intensive courses:** The department offers two courses that satisfy the college writing-intensive requirement, EPSc 498 Undergraduate Research Seminar and EPSc 404 Ideas and Controversies In the Geosciences. These courses are recommended to students majoring in EPS.

### The Major in Environmental Earth Sciences

For the most current information visit our website: http://eps.wustl.edu/undergraduate

The Environmental Earth Sciences (EES) major is designed to enable students to delve deeply into the interdisciplinary study of critical environmental topics. Student understanding of environmental science is fostered both by a broad base of course work across the natural sciences, and by the unique perspective earth science provides on the context and complexity of environmental systems.

The major consists of four components: 1) required courses for all majors, 2) Tier 1 science electives, 3) elective classes in a focus area or theme, and 4) a capstone experience. A senior thesis is optional but required for senior honors. For a specific list of courses in these areas, see the tables below.

**Required classes:** Because environmental science is a fundamentally interdisciplinary endeavor, all students, at the beginning of their course of study, complete introductory classes in earth and planetary sciences, biology, math, chemistry, and philosophy (ethics), in order to acquire the basic skills and knowledge required to address environmental problems. It is also critical for students to be able to apply and communicate what they have learned both outside the classroom and in an interdisciplinary fashion. Therefore, after the student has reached junior standing, we require a capstone consisting of 3 credits of an environmentally-related field school, internship, or independent research project.

**Tier 1 science electives:** Through Tier 1 science electives, students begin to build a depth in environmental earth sciences (three courses in the EPSc department). They also obtain grounding in environmental engineering, and/or build on the foundation they gained in math, chemistry, biology, and physics by completing their required courses (an additional two courses).

**Themes:** A theme consists of five courses, at least three in the natural sciences and up to two in the social sciences. Students
may choose these classes from established theme areas, or may design their own theme (subject to faculty approval). The list of courses within each focus is designed to foster an interdisciplinary understanding of the topic at hand. Current foci are: “climate and energy,” “human-altered environments,” and “life in its environment.” These themes, and the list of courses involved in each theme, are expected to evolve as the faculty changes.

Substituting classes into a theme or designing your own theme: Students may, within reason, petition to substitute courses into the non-EPSc Tier 1 science electives or into a theme (See “Proposal for Course Substitution”). Students should discuss these substitutions initially with their major adviser; if the adviser approves, the petition should be forwarded to the director of undergraduate studies, who must also approve the petition. Petitions to substitute or utilize more than two social science courses in themes will not be considered. If a student wishes to substitute more than two courses into a theme, the student should instead design his or her own theme (see below).

If a student wishes to focus in a topical area other than those defined, the student may design his or her own theme (See “Proposal for a Student Defined Theme”). Themes may have no more than two courses outside the natural sciences/mathematics/engineering and should be easily recognizable as important areas within environmental earth sciences. Students should develop this proposal with their adviser and then forward the completed proposal to the director of undergraduate studies.

Capstone experiences in EES: By the end of the spring semester of the junior year, the student must submit and have a capstone proposal accepted (see “Capstone Proposal Form”).

Optional: Senior Honors Thesis is required for Senior Honors (see Seniors Honors and Research Distinction).

Recommended writing-intensive courses: The department offers two courses that satisfy the college writing-intensive requirement, EPSc 498 Undergraduate Research Seminar and EPSc 404 Ideas and Controversies In the Geosciences. These courses are recommended to students majoring in EES.

Themes

- Choose one specialization and take five courses total. No more than two social sciences/humanities allowed.
- Students may propose substitution of relevant classes for those listed here or design their own theme (subject to approval).
- Courses may not double-count for a theme and a Tier 1 elective.
- ChemE 542 and EECE 590 count as a social science.
- No more than two social science classes can be taken in a theme area.
• Pathfinder students may substitute Path 201/Path 202 for one of the non-required courses in each theme.

Visit the department website for examples of themes: Climate and Energy, Life in its Environment, Human-altered Environments.

The Minor in Earth and Planetary Sciences

For more information please contact: Phil Skemer at pskemer@wustl.edu (Director of Undergraduate Studies)

Because the Earth and planetary sciences have natural links with many other disciplines, an EPS minor is an attractive option for students majoring in a variety of other fields, such as biology, chemistry, economics, engineering, mathematics, and physics. The growing national concern for the natural environment and natural resources means that an EPS minor is also valuable professionally to students who intend to pursue these and other fields including law and architecture. Furthermore, students in other disciplines who are also interested in the planetary sciences may find an EPS minor of interest. The diversity of the Earth and planetary sciences facilitates the selection of a set of courses with an emphasis tailored to the student’s particular interests.

Requirements

A minor in Earth and Planetary Sciences consists of at least 16 units of EPS courses, including EPSc 201 Earth and the Environment, EPSc 352 Earth Materials, and EPSc 353 Earth Forces. At least one additional EPS course numbered 300 or above, not including EPSc 390 Independent Study and EPSc 490 Independent Study, is required.

A faculty adviser is assigned to each student at the time that the minor is declared. Minor programs must be approved by the student’s minor adviser. The grades and performance policy for EPS and EES majors applies to all course work required for the EPS minor program. The department requirements also meet those for a minor as defined by the College of Arts & Sciences.

The Minor in Environmental Earth Sciences

For more information please contact: David Fike at dfike@wustl.edu (Director of EES programs)

The Minor in Environmental Earth Sciences is an attractive option for students majoring in a variety of other fields. The growing national concern for the natural environment and natural resources means that an EES minor is also valuable professionally to students who intend to pursue these and other fields including law and architecture. Following the philosophy of the EES major, the minor combines interdisciplinarity with a solid grounding in earth science.

Requirements

A minor in Environmental Earth Sciences consists of three core courses, EPSc 201 Earth and the Environment, Biol 2950 Introduction to Environmental Biology, and Pol Sci 2001 Introduction to Environmental Policy, and at least three elective courses from the following list:

- EPSc 308 Topics in Environmental Sustainability 3
- EPSc 323 Biogeochemistry 3
- EPSc 336 Minerals and Rocks in the Environment 3
- EPSc 352 Earth Materials (5 credits, counts as 2 courses) 5
- EPSc 353 Earth Forces 4
- EPSc 401 Earth Systems Science 3
- EPSc 413 Introduction to Soil Science 3
- EPSc 428 Hydrology 3
- EPSc 429 Environmental Hydrogeology 3
- EPSc 430 Environmental Mineralogy 4
- EPSc 443 Methods in Biogeochemistry 3
- EPSc 444 Environmental Geochemistry 3
- EPSc 454 Exploration and Environmental Geophysics 4

A faculty adviser is assigned to each student at the time that the minor is declared. Minor programs must be approved by the student’s minor adviser. The grades and performance policy for EPS and EES majors applies to all course work required for the EES minor program. The department requirements also meet those for a minor as defined by the College of Arts & Sciences.

L19 EPSc 103A Oceanography

Emphasis on geological, chemical and physical oceanography. Topics: topography and origin of ocean basins; origin and composition of sea water; effect of compositional variations on biological productivity; dynamics of water movements, including coastal processes.

Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 106 Freshman Seminar: Earth and Planetary Sciences

Each week a different faculty member presents a lecture or laboratory demonstration relating to recent discoveries in geology and the planetary sciences, or about general topics dealing with volcanism, earthquakes, plate tectonics, geological hazards, fossil life or earth history. Prerequisite: freshman standing or sophomore standing with permission of instructor. Credit/no credit only. Students attend all lectures and write a short summary of each.

Credit 1 unit. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM
L19 EPSc 108A Oceans and the Atmosphere
Basic concepts of the evolution and physical structures of the Earth's oceans and the atmosphere. Dynamic aspects of the oceans (waves, tides, tsunamis) and atmospheric circulation (weather). Role of biological processes (including anthropogenic) in defining the present oceans and atmosphere. Global climate issues discussed in EPSc 111.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 109A Quantitative Reasoning in Environmental Science
Introduction to practical mathematical methods for understanding environmental aspects of our planet, particularly how the environment changes with time through human interactions. Emphasis on intuitive approaches in devising simple relationships for understanding quantitative outcomes of natural processes. Introduction to basic statistical methods, including hypothesis testing, and how statistics can be applied to environmental problems.
Credit 3 units. A&S: NS, QA A&S: IQ, NSM, AN BU: SCI FA: NSM

L19 EPSc 111 Introduction to Global Climate Change in the 21st Century
Global climate and global climate change and their impacts on life and civilization. Integrated view of global climate and the diverse forces that can alter global climate. Historical and potential future consequences of global climate change on human life, our industrial civilization, and its sustainability.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L19 EPSc 112 Freshman Seminar: Engineering the Climate
Geengineering, the deliberate manipulation of the Earth's climate, may be part of a solution to the predicted future global warming. Is this advisable, or even possible? Discussions, lectures and readings used to learn how earth's climate works. Examination of some proposals for altering the climate. Past attempts for deliberate human alteration of natural systems discussed and evaluated. Consideration of geengineering as an ethical issue. Prerequisite: first-year undergraduate status.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L19 EPSc 116A Resources of the Earth
Introduction to major resources of the Earth: rocks, minerals, water, soil, air. Basics of geology presented so that origin, supply and uses of resources can be better understood. Environmental awareness stressed. Field trip required.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 118A Geology of National Parks
Survey of geologic processes occurring at the Earth's surface and its interior using national parks and monuments as the prime venue for presentation. Volcanism and mountain-building; the work of streams, glaciers and wind; lake and coastline development; stratigraphy and sedimentation; and Earth history. Material presented in a geographic context, with emphasis on landforms and landscape evolution, relating geology to the development and settlement of the United States.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 131 Natural Disasters
Examination of the effects of natural hazards on landscapes of the Earth in general, as well as on populated areas specifically, through numerous case studies. Social, economic and political consequences of natural disasters. Locations, particularly in the United States, where disasters are likely to occur in the future. Nature of the hazards and what preparations are possible to minimize damage and the number of casualties.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 171A The Solar System
Survey of the planets and satellites of our solar system. Includes results from Apollo manned missions to the Moon and spacecraft missions to the planets and their major satellites. Present ideas about the age, formation and early history of the sun, Earth and meteorites.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 201 Earth and the Environment
Introduction to the study of the Earth as a dynamic, evolving planet. Emphasis on how internal and surface processes combine to shape the environment. Themes: Earth's interior as revealed by seismic waves; Earth history and global tectonics shown by changes to ocean floors, mountain-building, formation of continents, earthquakes and volcanism; climate history and global biogeochemical cycles, influenced by circulation of atmosphere and oceans, ice ages and human activity. Composition and structure of rocks and minerals. Three class hours and one two-hour lab a week.
Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 203S Critical Earth Issues
The course is a presentation of the critical issues currently facing humanity and its sustainability on Earth. Humans have always had a dualistic relationship with Earth, both relying upon it for its many natural resources and fearing it for its natural hazards. In addition, humans are now in the position of being the largest agent of geologic change on the planet's surface. This course focuses on current and relevant topics that are of significant societal importance: energy resources, such as coal and natural gas; water and mineral availability; natural hazards, such as hurricanes and earthquakes; human impacts to different Earth systems; and changing climates. The course takes an Earth Systems Science approach to the content, emphasizing
the interconnections and feedbacks between the geosphere, hydrosphere, atmosphere, biosphere and anthroposphere. Credit 3 units. A&S: NS A&S: IQ, NSM

L19 EPSc 219 Energy and the Environment
Examination of the topic of energy from many human-relevant perspectives. Humans use an enormous amount of energy, at the rate of 18 terawatts. Where does this energy come from? How long will it last? What are the consequences? Examination of energy resources and consumption from scientific, social, economic and political viewpoints. Relationship of energy to concepts such as heat, work and power. Energy use by society. Energy sources, pros and cons of use, availability now and in the future. Types, abundance, advantages, challenges of renewable energy sources. Prerequisite: one year of high-school physics or chemistry. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L19 EPSc 221A Human Use of the Earth
Examination of the impacts of a growing population on the Earth, including habitat destruction, resource depletion, and air and water pollution. Population growth, landscape change, and the distribution and uses of the water, mineral and energy-producing resources of the Earth. Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 319 Physical Oceanography

L19 EPSc 323 Biogeochemistry
Survey of biogeochemical interactions among Earth’s crust, oceans and atmosphere, including perturbations due to human activities. Carbon, nitrogen, phosphorus and sulfur biogeochemical cycles. Greenhouse warming of atmosphere from carbon dioxide and chlorofluorocarbons; effects of inorganic and organic wastes in groundwater systems. Introductory course for students of environmental science and nonscience majors. Prerequisite: permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 326 Minerals and Rocks in the Environment
Combined rock and mineral course with focus on environmental issues and applications. Introduction to mineralogic and petrologic concepts relevant to environmental geoscience pursuits. Foundations of mineralogy and crystallography, key mineral groups, foundations of igneous, sedimentary, and metamorphic rock systems. Mineralogy of environmental systems such as soils, marine environments, aerosols, mines and radioactive wastes. Overview of analysis methods used for environmental geoscience applications. One full-day field trip required. Prerequisites: EPSc 201, Chem 111A or AP Chem score of 4; or permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM

L19 EPSc 352 Earth Materials
Fundamental principles of crystal chemistry; symmetry and structure of crystals (minerals); X-ray analysis of crystalline materials; information on the important mineral groups (definition of the groups; composition, structure, physical properties, occurrence and usage of major mineral species); optical mineralogy. Geological and environmental aspects of earth materials. Prerequisite: EPSc 201 (may be taken concurrently) and Chem 112A (or AP Chem score of 4); or permission of instructor. Three class hours, one two-hour laboratory, and one two-hour discussion period a week. Credit 5 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 353 Earth Forces
Basic concepts regarding the forces that act upon the Earth, how geological materials react to these forces, and the time scale over which they respond. Emphasis on physical concepts needed to understand the geodynamical behavior of the Earth over a broad range of length and time scales. Application and interpretation of geophysical methods to probe the interior of the Earth. Prerequisites: EPSc 201 (may be taken concurrently), Physics 117A (or Physics 197) and Math 131, or permission of instructor. Three class hours and one two-hour laboratory a week. Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L19 EPSc 355 Earth History
Introduction to the concept of “deep time” and the parallel biological evolutionary and environmental changes that have occurred throughout Earth history. Topics include early evolution of life, rise of atmospheric oxygen, global glaciation, mass extinctions. Prerequisite: EPSc 201 or permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L19 EPSc 390 Independent Study
Independent study for undergraduates, to be supervised by a faculty member. Prerequisite: permission of instructor. Credit to be determined. Credit variable, maximum 3 units. FA: NSM

L19 EPSc 400 Topics in the Geosciences
The content of this course varies each time it is offered, as announced by the department. With permission of the adviser, this course may be repeated for credit. Prerequisite: permission of instructor.
Credit variable, maximum 3 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 401 Earth Systems Science**
Quantitative introduction to physical and chemical interactions among the atmosphere, oceans and solid earth. Use of the geologic record to infer how such interactions varied over geologic time. Prerequisite: EPSc 352 or permission of instructor or the graduate adviser.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 404 Ideas and Controversies In the Geosciences**
Great ideas and controversies in the geological sciences and how ideas change and become accepted in science. The format is part lecture, part discussion. Writing and oral presentation are emphasized. Students read primary sources, as well as books, journals and Web-based historical accounts and interpretations. Among the topics addressed are: continental drift and plate tectonics, development of the geological time scale, age of the earth, mass extinctions and the Snowball Earth hypothesis. Prerequisites: EPSc 352 and EPSc 353 (may be taken concurrently) or permission of instructor.
Credit 3 units. A&S: NS, WI A&S: IQ, NSM, WI FA: NSM

**L19 EPSc 407 Remote Sensing**
Use of different parts of the electromagnetic spectrum (visible, ultraviolet, infrared and radio wavelengths) for interpretation of physical and chemical characteristics of the surfaces of Earth and other planets. Digital image systems and data processing. Prerequisite: Physics 117A and Physics 118A (or Physics 197 and Physics 198), or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 408 Earth’s Atmosphere and Global Climate**
Structure and dynamics of Earth’s atmosphere. Basic factors controlling global climate of Earth. Quantitative aspects of remote sensing of atmosphere. Remote sensing instrumentation. Prerequisites: Math 233 and Physics 117A (or Physics 197), or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 409 Surface Processes**
How do landscapes evolve? Examination of chemical and physical processes that modify earth’s surface. Introduction to soil formation. Focus on modern systems, particularly fluvial, karst and desert terrains. Brief discussion of coastal and glacial systems. Human agency in geomorphic change. Lab covers survey techniques for acquisition of topographic data and use of geographic information systems for geomorphic and hydrologic analysis. Field trips required. Prerequisites: EPSc 352 or permission of instructor. Three class hours and one three-hour lab a week.

Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

**L19 EPSc 410 Earth Remote Sensing Methods and Instrumentation**
Detection of electromagnetic radiation reflected, scattered or emitted by components of the Earth system. Spectroscopy of remote sensing. Interpretation of received radiation via radioactive transfer within a context of real measurements. Theory of instruments and detectors. Comparison of realized equipment to theoretical models. Prerequisite: Physics 118A, Chem 112A (or AP Chem score of 4), Math 233, or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

**L19 EPSc 413 Introduction to Soil Science**
Physical, chemical and biological processes that occur within soil systems. Types of soils and how these relate to soil formation. Major components of soil, including soil water, minerals, organic matter and microorganisms. Soils in wetlands and arid regions. Cycling of nutrients and contaminants in soils. Soil quality, conservation and sustainability. Two one-day field trips required. Prerequisite: EPSc 323 or Chem 112A (or AP Chem score of 4), or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 422 Sedimentary Geology**
Survey introduction to sedimentary processes and materials, including description, formation and interpretation. Sedimentary materials account for most of the Earth’s crust, and much of our understanding of Earth history comes from their examination. Many of our economic resources, such as coal, oil and natural gas, and many environmental problems, are related to or derive from sediments. Goals: understanding and identifying sediments and processes and using them to interpret stratigraphic, paleoenvironmental and tectonic information; obtaining the understanding of sedimentology that is relevant to environmental issues; increasing scientific literacy and critical thinking. Prerequisites: EPSc 201 or permission of instructor. Three class hours and one two-hour lab a week. Mandatory field trips.
Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 428 Hydrology**
Survey of principles that govern the flow of water in river and groundwater systems in deep geologic environments. Basic equations of fluid flow, dynamics and the characteristics of drainage basins, rivers, floods and important aquifers. Exploitation of groundwater systems. Prerequisites: EPSc 353, Physics 117A (or Physics 197) and Math 233, or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM
**L19 EPSc 429 Environmental Hydrogeology**
Introduction to principles that govern the flow and geochemistry of water in river and shallow groundwater systems. Characteristics of drainage basins, rivers, floods, and important aquifers. Anthropogenic impact on fresh water systems and efforts to remediate damaged systems. Prerequisite: EPSc 201 or permission of instructor. Fulfills the Natural Systems elective requirement for Master of Landscape Architecture students. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 430 Environmental Mineralogy**
Topics connected with environmental mineralogy, some selected by students. Topics may include: mineral dust such as asbestos; containment materials for nuclear waste disposal; environmental ramifications of the processing and use of phosphate fertilizers; lead in the environment; acid mine drainage; microbial mediation of sulfide oxidation; minerals in the human body; weathering of building materials; materials engineering; and engineering of materials for more effective recycling. Three class hours and one two-hour laboratory a week. Participation in discussions, term paper, two field trips required. Most readings from primary sources. Prerequisite: EPSc 352 or permission of instructor. Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 437 Introduction to Petrology**
Classification, origin, mineralogy and geological occurrence of major igneous and metamorphic rocks. Laboratory emphasis on identification of rocks and minerals in hand specimens and in thin sections. Prerequisite: EPSc 352 or permission of instructor. Three class hours and one two-hour laboratory a week. Credit 4 units. A&S: NS A&S: IQ, NSM

**L19 EPSc 441 Introduction to Geochemistry**
Application of the principles of nuclear and physical chemistry to problems of the composition and differentiation of the Earth. Introduction to nucleosynthesis of the elements, stellar evolution, the periodic properties of the elements, chemical bonding and ionic substitution, geochronology and stable isotope geochemistry, and the age and composition of the Earth, moon and meteorites. Prerequisites: EPSc 201 and Chem 112A (or AP Chem score of 4), or permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 443 Methods in Biogeochemistry**
Lab-based course to provide theoretical understanding of, and practical experience in, biogeochemistry tools and techniques. Topics introduced through lecture and discussion of classic scientific papers. Hands-on experience applying techniques in the laboratory. Research project, based on data collected using these techniques, required. Students develop understanding of tools used for modern and ancient biogeochemistry research. Hands-on experience with sample preparation, operation of gas source mass spectrometers, and data analysis. Prerequisite: EPSc 323 or permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM

**L19 EPSc 444 Environmental Geochemistry**
Introduction to the geochemistry of natural waters and the processes that alter their composition. Key principles of aqueous geochemistry and their application to describe the main controls on the chemistry of pristine and polluted soil, surface and groundwater environments. Acids and bases; mineral solubility; carbonate chemistry; chemical speciation; redox reactions; adsorption and ion exchange; and the speciation, mobility and toxicity of metals. Prerequisite: EPSc 201 and Chem 112A (or AP Chem score of 4), or permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

**L19 EPSc 445 Organic Geochemistry**
Introduction to the composition and analysis of organic material in the environment and geological record. Molecular to global-level perspective of organic matter cycling, reactivity and fluxes; formation and classification of organic matter, its preservation potential, diagenesis, catagenesis, and kerogen formation; coal, petroleum, and gas formation and accumulation; biomarkers in Earth history; genetics and phylogeny of biomarker compounds; overview of analytical techniques including both structural and isotopic aspects; oceanographic and paleoenvironmental applications of organic biomarkers; contaminants and residue analysis. Prerequisites: EPSc 201 and Chem 112A; or permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM

**L19 EPSc 446 Stable Isotope Geochemistry**
Applications of equilibrium and kinetic isotope fractionation and material balance principles to the distribution of oxygen and hydrogen isotopes in natural systems. Geothermometry and paleotemperatures, mass spectrometry, isotope hydrology and ice cores, fluid-rock interaction, igneous rocks and meteorites. Prerequisites: EPSc 441 and Math 233, or permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 452 Introduction to Seismology**
Introduction to earthquake and exploration seismology. Seismic wave propagation, data analysis and processing, earthquake mechanisms, seismic constraints on the structure of the Earth, relationship of seismicity to plate tectonics. Prerequisites: EPSc 353 and Math 217, or permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

**L19 EPSc 453 Interior of the Earth**
Composition and temperature of Earth’s mantle and core, determined by geophysical methods. Inferences about
mantle and core dynamics, especially interactions. Current understanding and history of interior in fields of seismology, geomagnetism, mineral physics, geodynamics. Prerequisite: EPSc 353 or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L19 EPSc 454 Exploration and Environmental Geophysics
Basic geophysical techniques used in exploration and environmental geophysics, emphasizing seismic and electromagnetic methods. Basic theory, field procedures and interpretation of data. Use of geophysical instruments on field trips, followed by reduction and analysis of acquired data. Prerequisites: EPSc 353, Physics 117A (or Physics 197), Math 131 and Math 132, or permission of instructor. Two class hours and one two-hour laboratory a week and approximately four one-day field trips during the semester.
Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L19 EPSc 459 Geodynamics
Fundamental physical processes necessary to understand plate tectonics and a variety of geological phenomena. Heat flow, gravity, elasticity and flexure, rheology of Earth materials. Prerequisites: EPSc 353 or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM

L19 EPSc 460 Introduction to Structural Geology
Stress, strain, rheology, ductile and brittle deformation processes and structures from microscale to macroscale. Applications to tectonics and whole Earth structure. Labs cover stress/strain analysis, experimental rock deformation, field techniques, interpretation of geologic maps and cross sections. Prerequisites: EPSc 352 and EPSc 353 or permission of instructor. Three hours of lecture and one two-hour laboratory a week.
Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

L19 EPSc 473 Planetary Geology
Discussion of the evolution of the terrestrial planets and the outer-planet satellites as evidenced by the geologic records left on the surfaces of these bodies. Focus on major processes affecting planetary surfaces: impact cratering, volcanism, tectonism, and erosion and sedimentation by wind and water. Prerequisites: EPSc 352 and EPSc 353, or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L19 EPSc 474 Planetary Geochemistry
A survey of the geochemistry of the planets and their satellites using data from Earth-based, Earth-orbital and spacecraft observations. Prerequisite: EPSc 352 or permission of instructor.
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L19 EPSc 490 Independent Study
Independent study for advanced undergraduates or for graduate students, supervised by a faculty member. Prerequisite: permission of instructor.
Credit variable, maximum 12 units.

L19 EPSc 492 Field Camp
Practical methods of data collection and interpretation in Earth and Planetary Sciences. Content may include field-based geologic mapping or laboratory-based studies emphasizing particular analytical tools. Prerequisite: permission of major adviser.
Credit variable, maximum 6 units. A&S: NS A&S: IQ, NSM

L19 EPSc 493 Internship
Internship experience in Earth and Planetary Sciences, providing learning opportunities with future careers and employers. Direct supervision by approved partner, with oversight by Earth and Planetary Sciences faculty. Prerequisite: permission of major adviser.
Credit variable, maximum 6 units.

L19 EPSc 494 Study Abroad
Studies related to Earth and Planetary Sciences conducted with external institutions. Prerequisite: permission of Department Study Abroad Coordinator.
Credit variable, maximum 6 units.

L19 EPSc 496 Undergraduate Field Experience
Capstone experience that allows students to synthesize classroom knowledge in a field setting. Hands-on experience in the application of geoscience knowledge and techniques to modern and ancient environments, including to a range of igneous, sedimentary and metamorphic strata. Development of student ability to deconstruct and analyze complex geologic and environmental settings. Attendance at extended field trip at an international site during spring break required. Prerequisite: EPS or EES major with junior or senior standing and permission of instructor.
Credit 3 units.

L19 EPSc 498 Undergraduate Research Seminar
Provides an opportunity for advanced undergraduates to synthesize many of the diverse subdisciplines of Earth and Planetary Sciences while focusing on a research topic. Subject changes each offering. Each subject is unique and timely, but broad enough to encompass wide-ranging interests among students. Students conduct original research, make written reports of the results, and make oral presentations of their projects in class. Prerequisite: senior standing or permission of instructor.
Credit 3 units. A&S: NS, WI A&S: IQ, NSM, WI FA: NSM
Endowed Professor
Robert Hegel
Liselotte Dieckmann Professor of Comparative Literature
PhD, Columbia University

Professors

East Asian Languages and Cultures

The Department of East Asian Languages and Cultures offers programs in the study of East Asian languages, literatures and cultures, including both the traditional and modern periods of their development. Our majors in Chinese, Japanese and East Asian Studies offer a solid preparation for graduate study in these areas. They also open up career opportunities in diplomacy, business, law, journalism and higher education.

The majors in Chinese and Japanese require completion of a minimum of 27 upper-level units. Specific requirements include one 200-level foundational course, four years of modern language study, one course in the classical language, and two or more courses in the relevant literary tradition. The major in East Asian Studies requires completion of a minimum of 24 upper-level units. Specific requirements include two 200-level foundational courses, 24 upper-level units, three years of modern language study, and courses in three different cultural and disciplinary areas. In addition, all primary majors are required to fulfill the EALC capstone requirement as well as participate in the EALC Senior Symposium. Students who are double majoring must keep in mind that the Chinese and Japanese majors require 27 units of advanced course work unique to the major and that they will be required to participate in the EALC Senior Symposium.

The minors in Chinese, Japanese, Korean and East Asian Studies require the completion of 18 units, 9 of which must be at the 300-level or above. Specific requirements normally include the equivalent of two years of modern language study and one or more courses in the relevant literary tradition.

All 18 units must be unique to the minor.

Betty Pei-shan Yue  
MA, Washington University

With a major in one of the East Asian languages and cultures (Chinese or Japanese) or in East Asian Studies, a student can expect to gain proficiency in one or more of these languages, study the area's literary and cultural landmarks, and gain familiarity with Asian history and civilizations.

**The Majors**

For information on the major in East Asian Studies, see the East Asian Studies (p. 362) page of this *Bulletin.*

For information on the major in Chinese Language and Culture, see the Chinese (p. 297) page of this *Bulletin.*

For information on the major in Japanese Language and Culture, see the Japanese (p. 609) page of this *Bulletin.*

There is no major in Korean at this time.

For information on the minor in East Asian Studies, see the East Asian Studies (p. 362) page of this *Bulletin.*

For information on the minor in Chinese Language and Culture, see the Chinese (p. 298) page of this *Bulletin.*

For information on the minor in Japanese Language and Culture, see the Japanese (p. 610) page of this *Bulletin.*

For information on the minor in Korean Language and Culture, see the Korean (p. 639) page of this *Bulletin.*

For East Asian Studies courses, see the East Asian Studies (p. 363) page of this *Bulletin.*

For Chinese courses, see the Chinese (p. 298) page of this *Bulletin.*

For Japanese courses, see the Japanese (p. 610) page of this *Bulletin.*

For Korean courses, see the Korean (p. 639) page of this *Bulletin.*

**East Asian Studies**

The Department of East Asian Languages and Cultures offers a major and minor in East Asian Studies. The major in East Asian Studies entails the comprehensive study of the cultures and societies of East Asia in an interdisciplinary program that encompasses language, literature, history, anthropology, art history, film, philosophy and religious studies. All majors and minors are expected to maintain at least a B– average in all departmental courses.

Washington University is one of this nation's oldest centers for the study of China and Japan. The department offers an impressive range of courses in modern Chinese and Japanese languages through the advanced level in addition to classical language study. A more modest but growing program of Korean language study also is available. Our dedicated teacher-scholars are interested in mentoring undergraduates with an interest in East Asia.

Our humanities-based course of study is broad and flexible, and students can easily arrange for a double major within the College of Arts & Sciences or a dual major with another school in the university.

Given the increasingly Asian-oriented global economy, career possibilities are expanding dramatically. Our broad-based curriculum prepares students for East Asia-focused careers in academia, diplomacy, business, education and law, among others.

The Major in East Asian Studies

Units required: 24 upper-level units (300-level or above), no more than 9 of which may be in language.

Prerequisites: Two of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>East Asia 223C Korean Civilization</td>
<td>3</td>
</tr>
<tr>
<td>East Asia 226C Japanese Civilization</td>
<td>3</td>
</tr>
<tr>
<td>East Asia 227C Chinese Civilization</td>
<td>3</td>
</tr>
</tbody>
</table>

Requirements:

1. At least two semesters of Chinese, Japanese or Korean beyond the second-year level. (Up to 9 units of advanced language, including classical language, may be used to fulfill the upper-level requirements for the major.) Native speakers who place out of all available courses in their native language may fulfill this requirement either with a second East Asian language or, with the approval of the major advisor, by completing 9 additional units (any level) in nonlanguage EAS courses.

2. Up to 24 upper-level units selected from at least three different disciplines (anthropology, art history, film history, literature, philosophy, religious studies or, when available, economics, political science, sociology, etc.), and at least two different areas of East Asia (e.g., Korea and Japan, China and Korea, China and Japan). Please note that at least one of these courses must focus on the premodern period.

3. Senior Capstone Experience. All students for whom EAS is a primary major may satisfy their capstone requirement in one of two ways, both of which require participation in the EALC Senior Symposium in the spring:
   a) Successful completion of a senior honors thesis. This option, which also entitles the student to Latin Honors, requires a minimum of 3.65 GPA. The thesis is researched and written over two semesters, for a total of 6 units, which are in addition to the 24 required for the major.
   b) Successful completion of an approved 400-level course, to be taken in the senior year. (This course may be included as one of the required upper-level courses for the major.)

Additional Information

- Students must maintain a B– average or higher in all courses taken to fulfill the requirements of the major. Students who do not meet this requirement may either repeat the course(s) in question or earn at least a B– in an approved equivalent course or courses (either during the summer or in a study abroad program).

- If a student has a major and a minor (e.g., a Chinese major and an East Asian Studies minor), the major must have 18 upper-level units independent of the minor, and the minor must have 12 units independent of the major.

- Courses for the major may not be taken Credit/No Credit.

- Normally, no more than 6 units of transfer or study abroad nonlanguage courses may be applied to the major.

- Normally, no more than 3 units of Independent Study may be counted toward the required upper-level 24 units for the major.

The Minor in East Asian Studies

Units required: a minimum of 12 upper-level (300-level or above) units, no more than 3 of which may be in language.

Requirements:

1. One of the following courses:
   - East Asia 227C Chinese Civilization 3
   - East Asia 226C Japanese Civilization 3
   - East Asia 223C Korean Civilization 3

2. At least two semesters of Chinese, Japanese or Korean language beyond the first-year level. Native speakers who place out of all available courses in their native language may fulfill this requirement by taking the courses in a second East Asian language or, with the approval of their minor adviser, completing 6 additional units (any level) in nonlanguage EAS courses.

3. At least 12 upper-level units selected from at least two different disciplines (e.g., anthropology and literature, art history and political science) and two different areas (e.g., China and Japan, Korea and China).

Additional Information

- Students must maintain a B– average or higher in all courses taken to fulfill the requirements of the minor. Students who do not meet this requirement may either repeat the course(s) in question or earn at least a B– in an approved equivalent course or courses (either during the summer or in a study abroad program).

- If a student has a major and a minor (e.g., a Chinese major and an East Asian Studies minor), the major must have 18 upper-level units independent of the minor, and the minor...
must have 12 units independent of the major. If a student has two minors, each must have 12 units independent of one another.

• Courses for the minor may not be taken Credit/No Credit.
• Normally, no more than 3 units of transfer or study abroad nonlanguage courses may be applied to the minor.
• Normally, Independent Study units may not be used to fulfill the requirement for the minor.

L03 East Asia 111 Introduction to Asian Art
Selected topics in the arts of South and East Asia from earliest times to the present day. Emphasis on the cultural setting and roles of the arts in Asian societies. Attention to cross-cultural comparisons and to media and technique. Classroom lectures; smaller, bi-weekly discussion sections. No prerequisite.
Same as Art-Arch 111
Credit 3 units.

L03 East Asia 119 Freshman Seminar: Anime as Popular Culture
In the contemporary media landscape, film, television, games, publishing and merchandizing are increasingly connected and help distribute cultural products across the globe. Japanese animation is one of the earliest and most successful examples of this powerful strategy. This course examines the global franchising industry of Japanese anime to explore basic questions about media and popular culture: How do we define a medium? How do consumer practices shape media and popular culture? What is the impact of globalization on media, and global media on national culture? Our investigations of Japan “cool” and its avid consumer cultures cover: animation aesthetics and technology; media convergence; anime fan cultures; science-fiction and remaking the body, history, and identity through global media. No prerequisites. Enrollment limited to 15 college freshmen. In addition to class meetings, there is a mandatory weekly scheduled screening.
Same as Film 119
Credit 3 units. A&S: LA, CD A&S: IQ, HUM, LCD BU: HUM, IS EN: H FA: AH

L03 East Asia 140 East Asia in the World
Designed for students interested in history and international relations, the freshman seminar East Asia in the World first covers the geopolitical history of 20th-century East Asia, from its colonial constellation through its transformation into cold war nation-states. We then use an interdisciplinary approach to investigate contemporary problems accompanying the emergence of regional economies and institutions. We grapple with the question of when people in East Asia — China, Taiwan, the Koreas and Japan — act as a members of a transnational region and when they act in ideological, national or local terms. We evaluate different disciplinary approaches in order to understand the combination of knowledge and skills necessary for drawing meaningful research conclusions. In reading articles produced by a range of scholars and institutions, the course is also an introduction to the politics of the production of knowledge about East Asia. Enrollment is restricted to first-year students. Same as IAS 140
Credit 3 units. A&S: TH, CD A&S: IQ, LCD EN: H

L03 East Asia 180 Freshman Seminar in Religious Studies
This course is for freshman only. Topics vary from semester to semester. Recent topics include Miracles; and The Self in Chinese Thought.
Same as Re St 180
Credit 3 units. A&S: TH A&S: IQ, HUM BU: ETH FA: SSP

L03 East Asia 2060 East Asia Since 1500
Same as History 2060

L03 East Asia 2210 Topics in Japanese Literature and Culture
Same as Japan 221
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H

L03 East Asia 223C Korean Civilization
A comprehensive introduction to the study of Korea. Following a historical survey, the course examines key cultural themes and social institutions and explores aspects of Korea’s relationship with its East Asian neighbors. Attention also is paid to contemporary issues, social problems and cultural trends. Same as Korean 223C
Credit 3 units. A&S: TH, CD, SD EN: H

L03 East Asia 226C Japanese Civilization
The development of Japanese culture from antiquity to the present: an overview of Japanese cultural history, focusing on the interplay of crucial aspects of contemporary Japanese society and Japanese social psychology. Same as Japan 226C
Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD EN: H

L03 East Asia 227C Chinese Civilization
An introduction to Chinese culture through selected topics that link various periods in China’s past with the present. Ongoing concerns are social stratification; political organization and the arts; gender relationships and the rationales for individual behavior; and the conceptions through which Chinese have identified their cultural heritage. Our readings include literary, philosophical and historical documents as well as cultural
histories. Regular short writing assignments: take-home final. No prerequisites.
Same as Chinese 227C
Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD, SD BU: BA, IS EN: H

L03 East Asia 234 Introduction To Asian Religions
A general introduction to the fundamental beliefs, values and practices of the major non-monotheistic religious traditions of Asia, with particular emphasis on Hinduism and Buddhism.
Same as Re St 234
Credit 3 units. A&S: TH A&S: IQ, HUM BU: ETH, IS EN: H

L03 East Asia 303 The Taoist Tradition
This course offers an introduction to the ethical aspects of the Taoist tradition through the study of a select number of literary and philosophical texts ranging from ca. 300 BCE through the present day. We explore questions regarding the relationship between nature and culture, conceptions of the self, and ideas about the good life.

L03 East Asia 3090 Chinese Thought
This course offers an introduction to Chinese thought through a study of thinkers from arguably one of the most vibrant periods of religious-philosophical discourse in China. We examine early classical texts from the Daoist, Confucian, Mohist, and Legalist traditions, and follow arguments where the thinkers expand upon, dispute, and respond to each other in regard to questions that are still important to us today. We explore issues such as notions of the self, conceptions of the greater cosmos, the role of rituals, ideas about human nature, and the subjects of freedom and duty. Motivating the course is the underlying question, “What is the good life?”
Same as Re St 3090

L03 East Asia 3092 Confucian Thought: The Sage and Society: Writing-Intensive Seminar
Same as Re St 3092
Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI EN: H

L03 East Asia 3112 Buddhist Traditions
This course examines the historical development of Buddhism from its origins in South Asia in the sixth to fifth century BCE, through the transmission of the teachings and practices to East Asia, Southeast Asia and Tibet, to contemporary transformations of the tradition in the modern West. In the first third of the course, we focus on the biographical and ritual expressions of the historical Buddha’s life story, the foundational teachings attributed to the Buddha, and the formation and development of the Buddhist community. In the second third, we examine the rise of the Mahayana, the development of the Mahayana pantheon and rituals, and the spread of Mahayana in East Asia. In the final third, we explore the Theravada tradition in Sri Lanka and Thailand, then Tantric Buddhism in India, Tibet and East Asia. We close the course with an overview of Buddhism in the modern West.
Same as Re St 311
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: ETH EN: H

L03 East Asia 3112C Japan Since 1868
For some, “Japan” evokes Hello Kitty, animated films, cartoons and sushi. For others, the Nanjing Atrocity, “Comfort Women,” the Bataan Death March, and problematic textbooks. For still others, woodblock prints, tea ceremony, and cherry blossoms, or Sony Walkmans and Toyotas. Still others may hold no image at all. Tracing the story of Japan’s transformations, from a pre-industrial peasant society managed by samurai-bureaucrats into an expansionist nation-state and then to its current paradoxical guise of a peaceful nation of culture led by conservative nationalists, provides the means for deepening our understandings of historical change in one region and grappling with the methods and aims of the discipline of history.

L03 East Asia 3160 Merchants, Monarchs, Monasteries and Mosques: China and Eurasia Since the Middle Ages
Same as History 3160
Credit 3 units.

L03 East Asia 3162 Early Modern China: 1350–1890
This course examines political, socioeconomic and intellectual-cultural developments in Chinese society from the middle of the 14th century to 1800. This chronological focus largely corresponds to the last two imperial dynasties, the Ming (1368–1644) and Qing (1644–1911). Thematically, the course emphasizes such early modern indigenous developments as increasing commercialization, social mobility and questioning of received cultural values.
Same as History 3162
Credit 3 units.

L03 East Asia 3163 Historical Landscape and National Identity in Modern China
This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campuses, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual, political and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory and changing over time is an important concern of this course.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: IS EN: H FA: SSP

L03 East Asia 3202 Japan from Earliest Times to 1868
A survey of the history of the Japanese archipelago from prehistory to the Meiji Restoration of 1868, this course is designed to acquaint students with pre-industrial Japanese society and the discipline of history. In addition to tracing political, social, and cultural narratives across time, we focus on three themes: the emergence of a centralized state and the subsequent transition from aristocratic to warrior to commoner rule; interactions with the world beyond Japan’s borders; and issues of gender and sexuality.
Same as History 3202
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: IS EN: H

L03 East Asia 324 A User’s Guide to Japanese Poetry
This course introduces the art and craft of Japanese poetry, one of the world’s great literary traditions. Exploring the many styles of traditional verse — the poetic diary, linked verse, haiku, and others — and their historical contexts, we gain insights into Japanese aesthetics and study the unique conventions of Japanese poetic production that have evolved over a span of some 1500 years. The course also incorporates a “haiku workshop,” where we engage in group-centered poetry writing and critiquing. No prior knowledge of Japanese is required.
Same as Japan 324
Credit 3 units. A&S: LA A&S: IQ, LCD BU: HUM EN: H

Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: IS

L03 East Asia 3310 19th-century China: Violence and Transformation
This course traces the history of China over the course of the 19th century, with an emphasis on social and cultural history. This was one of the most tumultuous centuries in Chinese history, during which China faced threats from abroad in the form of Western and Japanese imperialism, and from within, in the form of environmental degradation and rebellions resulting in an unprecedented loss of human life. The 19th century has thus often been portrayed as a period of sharp decline for China. At the same time, we explore the ways in which the origins of the
dynamic society and economy found in China today, as well as the worldwide influence of overseas Chinese, can be traced to this century of turmoil.
Same as History 331
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD

L03 East Asia 332C The Classical Voice In Japanese Literature
This survey of Japanese literature covers antiquity to the 17th century. Emphasis on the ideological and cultural contexts for the emergence of a variety of traditions, including poetry, diaries, narrative and theater. Required of all Japanese majors and recommended for all Chinese majors. No knowledge of Japanese language is required. Sophomore standing and above recommended.
Same as Japan 332C
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: Lit

L03 East Asia 333C The Modern Voice In Japanese Literature
This survey explores the emerging modern voice in Japanese literature, with emphasis on prose fiction. After a brief introduction to earlier centuries, we focus on the short stories and novels of the 20th century. Among the authors considered are Natsume Soseki, Nagai Kafu, Tanizaki Jun’ichiro, and Nobel laureates Kawabata Yasunari and Oe Kenzaburo. Discussions center on issues of modernity, gender, and literary self-representation. Required of all Japanese majors and recommended for all Chinese majors. No knowledge of Japanese language required. Sophomore standing and above recommended.
Same as Japan 333C
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: Lit

Same as Art-Arch 3415
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H FA: AH

L03 East Asia 3421 Literature of Modern and Contemporary China
An introduction to the major writers and works of Chinese literature from the turn of the 20th century to the present, including fiction, poetry and film. We look at these works in their relevant literary, sociopolitical and cultural contexts (including Western influences). Required for all Chinese majors and recommended for all Japanese and East Asian Studies majors. No prerequisites; all readings in English translation.
Same as Chinese 342
Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD BU: ETH FA: Lit

L03 East Asia 3425 Classical to Contemporary Chinese Art
Surveying Chinese art and architecture from the 10th century through today, this course examines classical and imperial works as the foundation for modern and contemporary art. Engaging with the theoretical issues in art history, we also pay particular attention to questions of gender, social identity, cultural politics and government control of art. No prerequisite.
Same as Art-Arch 3425
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: AH

L03 East Asia 3426 20th-century Chinese Art
This course explores the ways in which Chinese artists of the 20th century have defined modernity and tradition against the complex background of China’s history. Through examining art works in different media along with other documentary materials, we engage with the theoretical issues in art history, such as modernity, cultural politics, and government control of art. Same as Art-Arch 3426
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L03 East Asia 3466 Visualizing Buddhism: Art, Religion and Philosophy
One of the most powerful ways that a religion can realize its central beliefs and practices is through art and material culture. Rather than focusing on the historical development of Buddhist artwork itself, this course is organized around conceptual themes concerning the evolution of key philosophies and rituals. By the end of the course, students will have a good understanding of the basic religious ideas and history of Himalayan Buddhism, much as they might gain from a standard introductory course on religion. However, students in this class will also understand the inestimable role of art and material culture in Himalayan Buddhism, as well as the ways in which artworks can express philosophical ideas, epitomize esoteric practices, aid in the transmission/propagation of religion, and in short be one of the most meaningful ways to explore and understand another culture. The course involves works of art from the past 2,000 years of history in regions of South Asia including northern India, Nepal and Tibet.
Same as Art-Arch 3466
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LS EN: H

L03 East Asia 352 Literature of Modern and Contemporary Korea
This undergraduate course surveys the major writers and works of 20th-century Korean literature. During the 20th century, Korea went through a radical process of modernization. From its colonization by Japan, to its suffering of a civil war within the cold war order, to its growth into a cultural and economic powerhouse, Korea’s historical experience is at once unique and typical of that of a third-world nation. By immersing ourselves in the most distinctive literary voices from Korea, we examine how the Korean experience of modernization was filtered through its cultural production. In class discussion, we pay special attention to the writers’ construction of the self and the nation. How do social categories such as ethnicity, class, gender and race figure in the varying images of the self? And how do these images relate to the literary vision of the nation? Along the way, we observe the prominent ideas, themes and genres of Korean literature. This class combines discussion with lecture with students strongly encouraged to participate. All literary texts are in English translation, and no previous knowledge of Korean is required.
Same as Korean 352

L03 East Asia 382 Writing Women of Imperial China
Women writers can be found throughout most of China’s imperial history, and from the 16th century on, there were an extraordinary number of women writing and publishing their poetry collections. Despite this fact, only a very few writings by women were included in the traditional literary canon and, until recently, they were not considered worthy of scholarly attention. Fortunately, there is now a growing body of critical studies on, and translations of, these women writers. In this course, we explore the writings of Chinese women from the 1st through to the early 20th centuries, and discuss the changing historical and social contexts within which these women wrote, and the obstacles of both genre and gender that had to be overcome in order to ensure that their voices were heard. Prerequisite: at least one course in Chinese literature or culture, or instructor’s permission.
Same as Chinese 382

L03 East Asia 4011 Popular Culture and Consumption in Modern China
This writing-intensive seminar explores transformations in popular culture and everyday life in Chinese society since 1949 through an analytical focus on political economy and material culture. Drawing upon ethnographic texts, films and material artifacts, we investigate how the forces of state control and global capitalism converge to shape consumer desires and everyday habits in contemporary China. Case studies include eating habits, fashion standards, housing trends, entertainment, sports, and counterfeit goods. Prerequisite: previous course in China studies (anthropology, economics, history, literature, philosophy or political science) required. Enrollment by instructor approval only.

L03 East Asia 4033 Culture, Illness and Healing in Asia
This course examines the place of health, illness and healing in Asian societies. We explore how people experience, narrate and respond to illness and other forms of suffering — including political violence, extreme poverty and health inequalities. In lectures and discussions we discuss major changes that medicine and public health are undergoing and how those changes affect the training of practitioners, health care policy, clinical practice and ethics. The course familiarizes students with key concepts and approaches in medical anthropology by considering case studies from a number of social settings including China, India, Indonesia, Japan, Korea, Taiwan, Tibet, Thailand, Vietnam and Asian immigrants in the United States. We also investigate the sociocultural dimensions of illness and the medicalization of social problems in Asia, examining how gender, ethnicity, socioeconomic status, disability and other forms of social difference affect medical knowledge and disease outcomes. This course is intended for anthropology majors, students considering careers in medicine and public health, and others interested in learning how anthropology can help us understand human suffering and formulate more effective interventions.
Same as Anthro 4033

L03 East Asia 4034 Family Change in East Asia
This course explores the process of family transformations in contemporary East Asia, focusing on China, Japan, Korea, Hong Kong and Taiwan, from an anthropological perspective. Topics covered in this course include traditional mainstream East Asian family systems, childbearing, the experience of coming of age, romance and courtship, marriage and family relations, the experience of aging and old-age support, divorce, singlehood and same-sex partnership, family separation and reunion, cross-boarder marriages, and transnational adoption. Alternative family systems among ethnic minorities in East Asia also are addressed.
Same as Anthro 4034
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L03 East Asia 4062 The Art of Borrowing: The “West” in Japanese Life
This course aims to examine Western influences in Japan and Japan’s reconceptualizing the “West” in various aspects of popular culture, including cuisine, sports, music, language, advertising, entertainment and domesticity. It is primarily an anthropological survey with historical references on Japan’s turn to Western civilization in the modern era. The course explores Japanese perceptions of the “West,” and how Japanese consume the “West” by attaching meanings to “Western” symbols and practices, and making them part of Japanese culture and life. Rather than explicating Japan’s relationship with the West, the course scrutinizes the “West” constructed within Japanese discourse, as both a racial/ethnic other and a cultural fantasy. Course assignments include a round table discussion on specific topics relating to cultural integration and internationalization, and globalization and localization.
Same as IAS 4062

L03 East Asia 4141 Readings in Classical Chinese Philosophy
Same as Chinese 414
Credit 3 units. A&S: TH, CD

L03 East Asia 4180 Gender and Sexuality in East Asian Religions
In this course we explore some of the primary gender ideals and realities, images and self-representations in the religions of China, Japan and Korea. Primary emphasis on East Asian Buddhism (esp. Zen and Pure Land), Daoism, Shinto and popular religious traditions such as Shamanism, with a discussion of Confucianism. Selected reading and discussion materials include scriptural texts, poetry, fiction, drama (in English translation), painting and archaeological evidence, films and videos, and secondary scholarly and ethnographic studies. Prerequisite: At least one introductory course in East
Asian religions or civilizations (Chinese, Japanese or Korean) is recommended.  
Same as Re St 418  
Credit 3 units. A&S: TH, CD, SD A&S: IQ, HUM, LCD EN: H

L03 East Asia 425 Zen Buddhism
This course is designed as an exploration of the history, teachings, practices and literature of Zen Buddhism in China (Chan), Korea (Sŏn), Japan (Zen), and the United States. We discuss how Zen's conception of its history is related to its identity as a special tradition within Mahayana Buddhism, as well as its basic teachings on the primacy of enlightenment, the role of practice, the nature of the mind, and the limitations of language. We also look at Zen Buddhism and its relation to the arts, including poetry and painting, especially in East Asia. Finally, we briefly explore the response of Zen teachers and practitioners to questions of war, the environment and other contemporary issues. Open to seniors and graduate students. Prerequisites: Re St 311 Buddhist Traditions or instructor’s permission.  
Same as Re St 425

L03 East Asia 4492 Modern Japanese Women Writers: WI
Japanese women have been scripted by Western (male) imagination as gentle, self-effacing creatures. From their (re)emergence in the late 19th century to their dominance in the late 20th, Japanese women writers have presented an image of their countrywomen as anything but demure. Struggling to define their voices against ever-shifting expectations and social contexts, the women they create in their fiction are valiant, if not at times violent. This course examines the various manifestations of the female image in female-authored modern Japanese fiction. Writers considered are Higuchi Ichiyo, Hirabayashi Taiko, Uno Chiyô, Enchi Fumiko, Yamada Eimi, and others. A selection of novels and shorter fiction is available in English translation, and students need not be familiar with Japanese. Prerequisite: 6 units of literature/women's studies and junior standing, or permission of the instructor. Writing-intensive course.  
Same as Japan 449  
Credit 3 units. A&S: TH, CD, SD, WI A&S: IQ, HUM, LCD, SD, WI BU: HUM EN: H

L03 East Asia 4494 East, Meet West: Cross-Cultural Aesthetics in Chinese and Japanese Art

L03 East Asia 4501 Masterworks of Early Japanese Literature
An intensive study of one of the central texts of classical Japanese literature. Selection of texts rotate among works including: The Tale of Genji, court diaries, poetry anthologies, Noh drama, The Tale of the Heike, setsuwa collections, and medieval memoirs. In addition to exploring the historical, literary and cultural significance of the work from its genesis to the present age, students engage in a close reading of the text and an investigation of the primary theoretical issues and approaches associated with the work both in Japan and abroad. Prerequisite: junior standing. Prior knowledge of early Japanese literature or history is recommended. Texts are read in English translation. Same as Japan 450
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD

L03 East Asia 4550 Topics in Korean Literature and Culture
Varied topics in Korean Literature and Culture. Subject matter varies by semester, see current semester listings for topic. Same as Korean 455

**L03 East Asia 482 Reading Seminar in Gender and Chinese Literature**
Prerequisite: Chinese 341 or instructor's permission.
Same as Chinese 482
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H FA: Lit

**L03 East Asia 484 Core Seminar in East Asian Studies: East Asia in Scholarly Literature**
Introduction to problems and approaches in East Asian Studies.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD FA: SSP

**L03 East Asia 486 Independent Work For Senior Honors**
By the beginning of the senior year, the student is expected to have met with a primary adviser and agreed on a topic. Next, the student and the adviser choose two other faculty members to be on the committee and a one-page prospectus is sent to everyone on the committee for their approval. The primary adviser is responsible for reading the preliminary drafts and deciding any technical or format questions. In the first week of March, the student submits a copy of the thesis, which is defended the week after spring break. After a successful defense, the student revises the paper according to the committee's suggestions and submits it to the department before the notification date established by Arts & Sciences that year. Prerequisite: senior standing.

Credit 3 units.

**L03 East Asia 4891 Topics in Modern Chinese Literature**
Prerequisite: permission of instructor.
Same as Chinese 489

Prerequisite: permission of the Department.
Same as Chinese 490
Credit variable, maximum 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H FA: Lit, SSP

**L03 East Asia 4911 Modern Japan and the Invention of Tradition**
A discourse of “uniqueness” has been a prominent feature of Japanese culture in the 20th century, both before and after the Pacific War. This course explores the domain of nativist expression in modern Japan. While focusing on literary texts by writers such as Kawabata and Tanizaki, we also consider a range of artistic, cinematic and cultural production. Considerable attention is paid to “Nihonjinron,” an important — and bestselling — genre of “Japanese uniqueness” writing. Our goal is to make sense of the complex intersection of traditionalism and modernism in 20th-century Japan, and to consider the larger question of modern nationhood and the construction of national identity.
Credit 3 units.

**L03 East Asia 4912 Topics in Japanese Literature and History**
Prerequisite: permission of instructor.
Same as Japan 491
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H

**L03 East Asia 4914 Advanced Seminar in History: Japan in World War II: History and Memory**
Same as History 4914
Credit 4 units. A&S: TH A&S: IQ, HUM, LCD FA: SSP

**L03 East Asia 496 Readings in Asian Studies**
Prerequisite: permission of the chair of the department.

L03 East Asia 4967 Advanced Seminar: East Asian History
Same as History 4967
Credit 4 units. A&S: TH

L03 East Asia 4971 Guided Readings in Korean
This course normally is taken after successful completion of Korean 418, or by instructor’s permission. May be repeated once. Prerequisite: instructor’s permission. Same as Korean 497
Credit variable, maximum 3 units. A&S: LA EN: H

L03 East Asia 498 Guided Readings in Chinese
Prerequisite: graduate standing and permission of the instructor and the graduate adviser. Course normally taken after successful completion of Chinese 428. May be repeated once for credit.
Same as Chinese 498
Credit variable, maximum 3 units. A&S: LA

L03 East Asia 499 Guided Readings In Japanese
Prerequisites: senior standing and permission of the instructor and the department chair. Course usually taken after successful completion of Japan 459. May be repeated once.
Same as Japan 499
Credit variable, maximum 3 units. A&S: LA

Economics
The economics program explores the problems of a modern economy and introduces the methodological tools economists use. It emphasizes the development of analytical models and their application to important economic, social and political issues such as inflation, unemployment, taxation, poverty, pollution, government decision-making and regulation. Our faculty, which is made up of leading teacher-scholars, includes specialists in: economic history, game theory, microeconomics, industrial organization, macroeconomics, monetary economics, political economy and public finance.

The study of economics contributes to a broad liberal arts education and helps students develop superior problem-solving skills. It is an excellent course of study to pursue, whether students plan to enter the workforce after graduation or are considering graduate work in law, engineering or the social sciences. Economics also provides exceptional preparation for careers in business, either immediately following graduation or after completing master’s-level graduate work in business (e.g., MBA, MS/Finance). In addition to the introductory and intermediate economic theory courses, courses that have particular relevance for business include: Econ 335, Econ 413, Econ 4151, Econ 428, Econ 451, Econ 452 and Econ 456.

Economics students with business interests should strongly consider completing at least one internship (academic credit for unpaid internships is available via Econ 299) to obtain practical business experience, and they should discuss with their advisers the possibility of taking courses such as accounting in the Olin Business School.

The Major in Economics

Total units required: 37–39

Required courses:

- Econ 1011 Introduction to Microeconomics 3
- Econ 1021 Introduction to Macroeconomics 3
- Math 131 Calculus I 3
- Math 132 Calculus II 3
- Math 2200 Elementary Probability and Statistics (or an alternative statistics course, which must be approved by the department) 3
- Econ 493 Mathematical Economics 1
  or Math 233 Calculus III 3
- Econ 4011 Intermediate Microeconomic Theory 3
- Econ 4021 Intermediate Macroeconomic Theory 3
- Econ 413 Introduction to Econometrics 3

Elective courses:

Four (12 units) advanced economics electives, at least two of which must have an Econ 4011 (p. 372) or Econ 4021 (p. 372) prerequisite.

Additional Information

Senior Honors: Students are invited (in the second semester of the junior year) to participate in the honors program during their senior year if they meet certain academic requirements.

More information on the major, the minors, course offerings and the honors program are in the Economics Undergraduate Guide, available at economics.wustl.edu and from the department. Students also are encouraged to contact the Academic Coordinator (dottie@wustl.edu) with any questions.

The Minor in Applied Microeconomics

Economics units required: 15

Required courses:

- Econ 1011 Introduction to Microeconomics 3
- Econ 1021 Introduction to Macroeconomics 3
- Econ 4011 Intermediate Microeconomic Theory 3

Elective courses:

- One Economics elective having Econ 4011 as a prerequisite course.
- One Economics elective having at least Econ 1011 and/or Econ 1021 as a prerequisite course.

Prerequisites: The prerequisite course for Econ 4011 is Math 132. In addition, Econ 493 or Math 233 must be taken prior to, or concurrent with, enrollment in Econ 4011.

L11 Econ 1011 Introduction to Microeconomics
Determination of prices; distribution of national income; theory of production. For a thorough introduction to economics, Econ 1021 also should be taken.
Credit 3 units. A&S: SS, QA A&S: IQ, SSC, AN EN: S

L11 Econ 1021 Introduction to Macroeconomics
Business fluctuations: inflation and recession; monetary and fiscal policy; economic development. For a thorough introduction to economics, Econ 1011 also should be taken.
Credit 3 units. A&S: SS, QA A&S: IQ, SSC, AN EN: S

L11 Econ 124 Principles of Macroeconomics Seminar with Computing Applications
Introduction to macroeconomic principles including business fluctuations: inflation and recession; monetary and fiscal policy; economic development. Students use modern computing resources to complete various assignments such as retrieving price indices and constructing a web page. This course substitutes for Econ 1021 for all major and minor requirements. Enrollment limited to 25 students. (Offered infrequently.)
Credit 3 units. A&S: SS, QA A&S: IQ, SSC, AN FA: SSP

L11 Econ 202 The Great Economists
Examination of the great economic thinkers, the problems they sought to solve, the historically conditioned assumptions that they bring to their work, and the moral issues they raise. The class reads from the works of Adam Smith, Ricardo, Malthus, Marx, Veblen, Keynes, Schumpeter, Galbraith and others as well as commentary from Heilbroner. These readings are paired with selected texts on the social and moral issues of their times. Open only to participants in Text and Tradition.
Same as IPH 201B
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H FA: SSP

L11 Econ 205 Napster, AIDS and Intellectual Property
Controversy surrounds the downloading of music over the internet and the aggressive response of the RIAA to protect their copyrights. Included in this is the lawsuit against Grokster, and the bringing of lawsuits against individual music lovers. Also controversial is the patent protection afforded AIDS drugs, resulting in such high prices that they are unavailable in Africa, the area most devastated by AIDS. Copyrights and patents are justified in the U.S. Constitution by Article I Section 8: “The Congress shall have Power to ... promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries.” The goal of this seminar is to examine from an economic perspective to what extent modern intellectual property law does in fact “promote the Progress of Science and useful Arts.” Note: This course does not count toward the major or minor in Economics.
Credit 1 unit. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 2391 Economies as Cultural Systems
Many contemporary approaches to economics downplay or bracket the importance of culture in the workings of economic systems. In this class we focus on approaches to distribution and exchange in which culture and social institutions figure prominently, if not pre-eminently. We sample a diverse array of economies, from gift exchange to the ceremonial destruction of wealth, from Melanesia to Wall Street, in order to evaluate some of the assumptions that undergird market capitalism. These assumptions include the perception of market actors exclusively as calculative, maximizing individuals. Topics to be covered include the Industrial Revolution; utilitarianism; economic anthropology; the formal vs. substantivist debates; ethnography of finance, and Marxist sociology.
Same as Anthro 3391
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L11 Econ 299 Internship
Students may receive up to 3 units of credit for an unpaid internship. The internship must be approved by the Career Center and supervised by a faculty member. Note: See Career Center for further information. This course does not count toward the major or minor in Economics.
Credit variable, maximum 3 units. FA: SSP

L11 Econ 3001 American Democracy and the Policy-Making Process
This course is part of the Semester in DC Program
Same as Pol Sci 4001
Credit 3 units.

L11 Econ 309W Microeconomics of Public Policy
We explore the key public policy issues, with a focus on the prominent issues facing our country today. In particular, we have selected 10 topics that are investigated: poverty, crime, discrimination, “big business,” international trade, immigration, health care, education, energy and the environment. We identify and objectively analyze the problems surrounding each of the issues, including their causes, consequences and measurement.
Prerequisite: Econ 1021.
Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI EN: S

L11 Econ 3111 Global Health and Development: An Integrated Experimental-Theoretical Approach to Impact Evaluation
Our course aims at introducing students to state-of-the-art methods for the impact evaluation of global health and development policy interventions. Our course follows a transdisciplinary approach to public health that uses perspectives from demography, economics and social work (as well as other areas of social inquiry such as anthropology, epidemiology and sociology) to understand why some countries are healthier and more developed than others. To do so, we carefully distinguish the notion of correlation from causation; here, understanding the concept of identification of causal effects is an important methodological tool of the course. We introduce two currently dominant approaches that identify causal effects and that are useful for impact evaluations of public health policies: the experimental approach (field experimental design and evaluation of experimental results) and the quantitative theory approach (e.g., microfounded models of health behavior, risk and insurance, and schooling choices). Third, we explore and review the debate about the usefulness of qualitative and participatory approaches.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 326 American Economic History
Basic theoretical concepts applied to analyze the changing structure and performance of the American economy from colonial times to the present. Prerequisites: Econ 1011 and 1021.
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA EN: S FA: SSP

L11 Econ 335 Money and Banking
Money and the monetary system; money creation by the banking system; central bank functions; monetary theory and economic policy. Prerequisite: Econ 1011 (103B) and 1021 (104B).
Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L11 Econ 348 Economic Realities of the American Dream
Exploration of the realities of economic life in the United States and how they correspond to the American Dream. Interdisciplinary perspectives from economics, sociology and...
other areas of social inquiry. Emphasis on the consistency between empirical data and different concepts of the American Dream. Specific topics to include sources of economic growth and changing living standards, unemployment, impact of globalization on U.S. citizens, economic mobility, poverty and inequality, and social justice. Prerequisites: Econ 1011 and Econ 1021, or consent of the instructors.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 352 Health Economics
Analysis of consumer demand for health care, medical technology and the role of health insurance. Emphasis placed on behavior of the physician (whether he acts as an agent for the consumer or on his own behalf); on the use of paramedics, preventive care, outpatient care and the general market organization of the health industry. The major concern is the rising cost of health care and appropriate public policy responses. Prerequisite: Econ 1011.
Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L11 Econ 378 The Legacy of Douglass C. North: A Research Seminar in New Institutional Social Sciences
This course synthesizes the wide range of issues and methodological approaches used in the “New Institutional Social Sciences” (NISS). The principal focus is on the legacy of Nobel laureate and WU Professor Emeritus Douglass C. North, a leading scholar in the NISS. This legacy is explored through the wide-ranging research of his contemporaries, including in areas of economic growth and development, sustainability, political and institutional change, and experimental economics. This is a seminar-style course consisting of student presentations and critiques, along with lectures by WU faculty and guest speakers. The “writing intensive” aspect of the course is the iterative development of a semester-long research paper on a NISS topic of the student’s choice. Prerequisites: Econ 1011, Econ 1021 and junior or senior standing.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 380 Labor and the Economy
Economic analysis of labor markets. Theory and policy applications of labor supply and labor demand; explanations of wage and income differentials; migration and immigration; discrimination; labor unions; unemployment. Prerequisite: Econ 1011 (103B).
Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L11 Econ 4011 Intermediate Microeconomic Theory
Analytic theory of consumer and producer behavior under perfect and imperfect competition. Coverage of demand theory (indifference curves and utility functions) and preferences under uncertainty, including expected utility and risk aversion. Development of general equilibrium under pure exchange, including the concepts of competitive equilibrium and Pareto efficiency. Discussion of the role of time as it pertains to interest rates, discounting and net present value. Analysis of standard monopoly and simple oligopoly problems. Development of noncooperative game theory, including strategic and extensive-form equilibria and Nash and sub-game perfect equilibria. Thorough training in intermediate theory requires both Econ 4011 and Econ 4021. Prerequisites: Econ 1011, Math 132 and concurrent enrollment in, or prior completion of, either Math 233 or Econ 493 (Mathematical Economics). Students registering for Section 1 (Levine) also may register for Econ 4011A, a session meeting weekly, on Friday, to review homework problems.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 4021 Intermediate Macroeconomic Theory

L11 Econ 403 Economics of Law
The course provides an introduction to the economic analysis of law. Mastery of basic economic approaches to the study of legal institutions is a valuable skill that benefits a broad range of students. The course covers the fundamental contributions made by the economic approach in five core areas: property, contracts, torts, litigation and crime. Time permitting we cover other areas of the law such as family, privacy and discrimination law. About 50 percent of the course is devoted to formal economic modeling of legal issues. Approximately 30 percent of the course focuses on empirical tests of the insights from the early theoretical contributions in the field and the theoretical models developed in class. The remaining 20 percent of the course uses classic legal cases to illustrate the real-world applications of the theoretical models developed in class. Prerequisite: Econ 4011. Econ 413 is recommended.
Credit 3 units. A&S: SS A&S: IQ, SSC

L11 Econ 404 Behavioral Economics and Experimental Economics
Behavioral economics is an effort to incorporate ideas from psychology into economic models of behavior. We focus on popular experimental anomalies, including the Allais and Rabin paradoxes, ultimatum bargaining, the centipede and public goods contribution games. We examine the extent to which these are consistent with standard economic theory and how they may contradict it. The primary focus is a critical examination of psychological theories of nonstandard preferences including
loss aversion, probability weighting, reciprocity, fairness and present bias. Theories of incorrect beliefs and systematic biases such as money illusion and procrastination are covered. Applications to the current economic crisis are also discussed. The class includes an introduction to experimental methods in economics, including hands-on experience in the MISSEL laboratory. A sound grounding in economic theory is essential to the course. Prerequisites: you must have successfully completed Econ 4011, and should be acquainted with basic optimization theory, expected utility theory, risk aversion, discounting and subgame perfection.

Credit 2 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 406 Current Topics in Health Economics
In this advanced undergraduate course we mix textbook surveys of major topics in health economics, with student-led critiques of current and classic journal articles and presentations of own projects. The course is designed to prepare you to be informed participants in the current debate about health care policy. Core topics include the social and economic determinants of health, psychological factors influencing health behavior and health care choices, and development of a critical perspective about the data sources and methodologies in health care research. This course is more advanced than Econ 352, but welcomes an interdisciplinary mix of undergraduates interested in economics, public health and health care. Prerequisite: Econ 4011 or permission of the instructor.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 4111 Optimization and Economic Theory
An introduction to mathematical optimization and its applications within economics. The course is designed for, and should be taken by, all undergraduates considering graduate study in economics, but all interested students are welcome. Prerequisites: Econ 4011 (401), Math 233 and Math 309, or permission of the instructor.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 413 Introduction to Econometrics
Course provides a basic working knowledge of econometrics. Topics include: translation of economic theory into statistical models; statistical foundations of econometrics; preregression analysis; bivariate and multiple regression techniques; hypothesis testing; multicollinearity; specification error; auto correlation; errors in variables; identification; and simultaneous estimation. Prerequisites: Econ 1011 (103B), Econ 1021 (104B), and Math 2200 or equivalent.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L11 Econ 4131 Applied Econometrics
Introduction to econometrics as it is applied in microeconomics and macroeconomics (modular). Emphasis is on hands-on implementation of the models covered in the course. Topics related to the analysis of microeconomic data include cross-section and panel data linear models and robust inference; instrumental variables estimation; simultaneous equation models; models for discrete choice; and truncation, censoring and sample selection models. Topics related to the analysis of macroeconomic data include linear time series models; practical issues with likelihood-based inference; forecasting; structural identification based on timing restrictions; and computational methods for hypothesis testing. Prerequisites: Econ 4011 (401) and Econ 413.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 428 Capital Market Imperfections and Entrepreneurial Finance
Analysis of problems in capital markets for firm financing and institutional structures that address these problems. Investigation of asymmetric information between firms and potential investors and associated moral hazard and adverse selection problems that raise the cost of funds and constrain firm growth. Empirical tests for the presence of financing constraints on firms. A substantial portion of the course explores the role of venture capital, especially in the high-tech sector of the United States economy where venture capital is important for commercializing cutting-edge science. Prerequisite: Econ 4011. Econ 413 is recommended.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L11 Econ 429 Decision Under Risk and Time
This course covers topics on individual decision making, subject to risk and to inter-temporal considerations. The emphasis is on economic modeling, which combines both theory and reality. The course begins by establishing a framework for analyzing preferences about risky outcomes. This framework is applied to practical problems such as portfolio choice, asset pricing and insurance. The remainder of the course considers decision-making in the long run, with focuses on the lifecycle consumption-versus-saving decision, the problem of time inconsistency and other real-world implications. Prerequisites: Econ 4011, Math 2200.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 4301 Understanding the Financial Crisis
The global financial crisis of 2007-2009 was the most severe since the Great Depression. The goal of the course is to provide tools to analyze key elements of this crisis. We move from a corporate finance perspective — to understand the behavior of firms and financial institutions — to a macroeconomic perspective — to make this behavior in aggregate outcomes and policy responses. Topics covered include: The U.S. crisis in historical and international perspective; corporate finance of firms and banks in closed and open economy; monetary and
fiscal policy intervention; the open economy dimension of the financial crisis; the European Sovereign Debt crisis.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 435 Open Economy Macroeconomics
This course begins with a review of international trade theory, of the balance of payment accounts, and their relationship to international borrowing and lending. We then study the asset approach to exchange rates determination, exchange rate behavior in the short and in the long run, and the relationship of exchange rates with prices and output. The course also explores monetary and fiscal policy under both fixed and floating exchange rates, macroeconomic policy coordination and optimum currency areas, international debt problems of developing countries, and their relation to stabilization program. Prerequisite: Econ 4021.
Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L11 Econ 437 The Economics of Financial Intermediation
The structure and the role of banks have changed tremendously. The historically-traditional activity of granting loans and collecting deposits has evolved into a much richer and more complex set of financial contracts. The separation between financial asset trading activity and traditional commercial bank activity that was typical of the financial system in the period after the World War II also disappeared. Coincident with the evolution of financial institutions was the development of the asymmetric information model. The role of banks in the economy can be explained with the tools developed in these models of the economics of information, as a microeconomic theory of banking does not exist when information is symmetric and markets are complete. The economics of information literature is also used to explain the evolution of financial institutions and markets, and to understand the consequences of that evolution for economic outcomes (such as economic development and financial crises) and for monetary policy choices (such as central bank interventions, regulations and changes in the payment system). Prerequisite: Econ 4011; Econ 4021 recommended, but not required.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 444 Innovation and Intellectual Property: Theory and Practice
Innovation — figuring out better and cheaper ways of satisfying human desires — is the key to improving our well-being. It is not patient saving and accumulation that makes us so much better off than we used to be: capital accumulation is only the conduit through which the innovation juices flow. The question is: What drives it? How come some societies are apparently much more innovative than others? How come we have the impression that most useful inventions took place in the past three centuries? Are there policies that help fostering innovation and others that hurt? The course tries to address these questions. Economists have many theories of innovation, some better than others. We look at the theories, we examine the facts (past and present), then we go back to the theories and reconsider their explanatory power. With this background, we approach the debate about intellectual property, what it is and what it is not good for, whose interests it serves, and whose well-being it thwarts. Prerequisite: Econ 4011.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 445 Public Finance
The study of fundamental forms of market failure that provide the economic rationale for government action. The first third of the class examines market failure when an economy contains externalities and public goods and the general nature of public policies that address these issues. The second third addresses particular public policies, with a focus on their intended and unintended consequences and their costs. The final third addresses taxation. Topics include the measurement and evaluation of tax burdens, the federal personal income tax, tax evasion and proposals for fundamental tax reform. Prerequisite: Econ 4011.
Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L11 Econ 448W Current Macroeconomic Issues
Review and extension of macroeconomic models from Econ 4021 from a comparative perspective and use of these models to analyze current macroeconomic and policy issues. Topics include recession and recovery; long-term growth; saving and social security; investment; and monetary policy. Multiple writing assignments that emphasize critical analysis of theoretical perspectives and readings applied to current macroeconomic topics. Assignments are revised to improve logical structure, clarity and style. Enrollment limited to 15 students with priority given to senior economics majors. Prerequisite: Econ 4021. Please note: Requests for online registration are wait-listed. Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI FA: SSP

L11 Econ 451 Environmental Policy
Course examines the relationship between environmental economics and environmental policy. The course focuses on air pollution, water pollution and hazardous wastes, with some attention given to biodiversity and global climate change. The course examines critically two prescriptions that economics usually endorses: (1) “balancing” of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; and (2) use of market incentives (e.g., prices, taxes or charges) or “property rights” instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011 (103B).
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA, ETH FA: SSP

L11 Econ 452 Industrial Organization
Theoretical and empirical analysis of the presence and value of competitive forces in the United States economy. Theories
of industrial organization and development of criteria for performance of noncompetitive industries. Prerequisite: Econ 4011.
Credit 3 units. A&S: SS A&S: IQ, SSC: FA: SSP

L11 Econ 456 Business, Government and the Public
The increasingly complex interrelationships among business, government, and the public, focused on a set of major problems currently involving these relationships. Prerequisites: Econ 1011, 1021 and junior standing.
Credit 3 units. A&S: SS, QA A&S: IQ, SSC, AN FA: SSP

L11 Econ 460 Urban Economics
Economic function of the city and the role of the city in a national economy. Local decision-making; financing of local government expenditures. An analysis of selected urban problems, such as causes and effects of housing market segregation; decay and abandonment; landlord-tenant relations; crime; and urban transport systems. Prerequisite: Econ 4011.
Credit 3 units. A&S: SS A&S: IQ, SSC: EN: S FA: SSP

L11 Econ 467 Game Theory
Introduction to the mathematical theory of games as applied to the study of economics. Topics include games of complete and incomplete information, noncooperative games with and without time dependency, and cooperative games with and without transferable utilities. Emphasis placed on game theoretic models of industrial organization and political economy. Prerequisites: Econ 4011, Math 233 and Math 2200.
Credit 3 units. A&S: SS A&S: IQ, SSC: EN: S FA: SSP

L11 Econ 469 Great Transformation
The contemporary “market society” is the result of the simultaneous emergence, over a very long span of time, of the liberal-democratic nation states, of a number of highly productive technologies, and of a distribution of property rights that, for a lack of better term, we label “capitalistic.” There is a widespread view that, historically, the Industrial Revolution constitutes the point of demarcation that ushered in (among other) all these changes, leading to what some have labeled the “Great Transformation.” According to this view, the changes that “capitalism” induced were so deep that they modified even human nature, altering forever our culture, our value systems, the way social interactions are conceived and organized, what we seek in life and what we do not. A new “man” appeared, that was and is radically different from those of the past, from those of “pre-capitalist” societies. There is also a minority view according to which, where most see a historical discontinuity, we should actually see a series of continuous processes evolving over time, leading to a sequence of progressive small changes that only when observed from afar and after the fact may appear as the discontinuity we now believe to have taken place. There was no Great Transformation, in other words: humans have the same, basic set of “deep values and goals” today that they had a few thousand years ago, their fundamental preferences have not changed and the analytical categories that allow us to understand human actions and social interactions today are also applicable to the many cultures and societies that came before us. There is more continuity in human history than popular theories would like us to believe. A different, more brutal way of posing the same problem is: what brought about the Industrial Revolution and the thing we call capitalism? When did they start, if they ever started? Why did the Industrial Revolution take place in the 18th-century Britain and not elsewhere in Europe or in Asia? Was it inevitable or was it a sheer chance? Was there a kind of “historical miracle” behind it or was it the likely and almost natural outcome, at that point in time? What evidence do we have pointing in one direction or in the other? What was lost in the transformation and what was gained? Is the current market society sustainable or should we expect another “Great Transformation”? The course focuses on these questions and related ones. We try addressing them by using a minimum of social-sciences theory (drawing from the best lessons of psychology, economics, anthropology and history) and with a particular attention to facts, data, statistics and empirical findings in general. We read or consult quite a substantial amount of research from all the social sciences; there is also quite a bit of informed class discussion and of writing, alone or in groups, to summarize and articulate our findings. Prerequisites: Econ 4011 and 4021 or permission of instructor.
Credit 3 units. A&S: SS A&S: IQ, SSC: EN: S

L11 Econ 471 Development Economics
Investigation of issues related to the development of the economies of third-world countries. Topics include economic growth, poverty and the distribution of income with an emphasis on labor markets and education. Consideration of the effectiveness of various institutional policies designed to encourage development including decentralization and privatization. Empirical examples drawn from international experience, especially Latin America. Prerequisites: Econ 4011 and Econ 413.
Credit 3 units. A&S: SS A&S: IQ, SSC: EN: S

L11 Econ 472 Topics in Growth and Development
This course highlights important empirical facts concerning growth and development in various countries at different development stages. Fundamental growth theory is then provided for explaining these facts systematically and for evaluating the consequences of commonly adopted development policies. Topics vary, but may include population; human capital and labor market development; R&D and innovation; finance and growth; modernization and industrial transformation; world income disparities and poverty problems; institutions and political economy issues; environmental and social factors; and international trade and economic integration. Prerequisites: Econ 4011 and 4021.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 4721 Advanced Topics in Modern Economic Growth
This course studies economic theories that explain the observed patterns of economic development across time and space. What explains the growth of the world economy since the Industrial Revolution? Why are the level and the growth rate of per-capita income so different across countries? What are the determinants of inequality and risk faced by individuals in different countries? Theories featuring the role of investment, human capital, technology, coordination, financial markets and environmental variables are presented. Theories are evaluated using historical data and detailed case studies. This course is designed to complement Econ 472. Prerequisite: Econ 4011. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 474 The Poverty of Nations
This course focuses on the failures of economic development and the extreme and persistent poverty we find in South Asia, sub-Saharan Africa and other parts of the developing world, including major urban centers. What exactly is poverty? Who are the poor? How many of them are there? Why are they poor? What individual or collective actions can they (or we) take to improve their lot? Prerequisites: Econ 4011 and 4021 or permission of instructor. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 475 International Trade
Analysis of international trade from different perspectives: Ricardian, Heckscher-Ohlin and new trade theories. Topics include patterns of trade, gains from trade, protectionism, international factor movements, political economy of trade policy, balance of payments, exchange-rate determination and international investment. Rigorous application of microeconomic theory to trade issues and in-depth discussion of current international policy questions. Prerequisite: Econ 4011. Econ 413 is recommended. Credit 3 units. A&S: SS A&S: IQ, SSC BU: IS EN: S FA: SSP

L11 Econ 483 Economics of Education
The course involves analysis of the economic and social determinants and consequences of education. Because each person’s education is an investment in human capital that allows the individual to contribute to society in a productive way, education becomes a crucial determinant of an economy’s ability to achieve high growth with high wages, low unemployment and strong social cohesion. This course addresses three essential topics from the wide-ranging field of the economics of education. The first is demand-side oriented and includes: (1) the measurement of the returns to education in the labor market (human capital theory; the central idea of education as human capital investment); and (2) a characterization of the education production function, which relates the various inputs affecting a student’s learning (schools, families, peers, neighborhoods, etc.) to measure outputs including labor market success, graduation rates and standardized test scores. The second important topic involves political economy and the supply side: the financing and provision of education. The third part of the course is devoted to the links between education and economic development, including cross-country differences in schooling, returns to schooling and per-capita income. Prerequisites: Econ 4011, Econ 4021 and Econ 413. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 4861 Seminar in Macro and Monetary Economics
Topics chosen by instructor from modern empirical and theoretical research papers in macroeconomics. Student participation in class discussions of research papers is essential. Topics vary, but may include the link between capital markets, consumption and investment; imperfect competition and macroeconomic fluctuations; real business cycles models; and post-Keynesian macroeconomics. Prerequisites: Econ 4011, 4021 and 413. Please note: requests for online registration are wait-listed. Undergraduates must receive instructor permission to be enrolled. Graduate students should register for Econ 586B. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 490 Independent Work
Prerequisites: senior standing and permission of the supervising faculty member. See Academic Coordinator for further details. Note: This course does not count toward the major or minor in Economics. Credit variable, maximum 6 units. FA: SSP

L11 Econ 493 Mathematical Economics
The objective of this course is to develop the mathematical tools necessary for the study of intermediate micro- and macro-economics theory and the advanced electives in economics. The principal focus is the calculus of multivariate functions, including total and partial differentiation, unconstrained and constrained optimization of multivariate functions, and implicit and inverse function rules. Time permitting, the application of prior to utility theory and production and cost are developed. Additional topics include difference equations and an introduction to matrices. Economics majors and minors must take either this course or Math 233. Either this course or Math 233 must be taken prior, or concurrently with, to Econ 4011. Students who have taken, or are taking, Math 233 are encouraged to take this course as well. Prerequisites: Econ 1011 and 1021, and Math 132. Credit 1 unit. A&S: SS A&S: IQ, SSC

L11 Econ 496 Teaching Practicum in Economics
Opportunity for undergraduates to assist in course instruction, tutoring and preparation of problems, readings and exam
materials under supervision of faculty. Note: This course does not count toward the major or minor in Economics. Credit variable, maximum 3 units. A&S: SS EN: S FA: SSP

L11 Econ 497 Research in Economics
Opportunity to work as part of a research project under faculty supervision. Note: This course does not count toward the major or minor in Economics. May be repeated for credit. Credit variable, maximum 3 units. A&S: SS A&S: IQ, SSC FA: SSP

L11 Econ 4971 Research in Economics: Special Topics
This is a fall-semester course taught by the Sam B. Cook Visiting Professor in Economics and Arts & Sciences. Focus and prerequisites vary with each offering; but prerequisites always include Econ 4011. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L11 Econ 499 Study for Honors
Independent reading and research under faculty direction leading to a senior honors thesis. Prerequisites: invitation into the departmental Honors Program and permission of the director of Undergraduate Studies. Credit 3 units. A&S: SS FA: SSP

Education
The Department of Education offers students a choice between three basic types of major: the teacher education majors, which allow students to prepare for careers as teachers; the educational studies major, which allows students to study educational institutions and their sociocultural contexts and processes; and the applied linguistics major, which emphasizes the theoretical and empirical foundations of second language studies.

Our teacher education programs prepare students to teach in their choice of elementary, middle or high school settings. While this major is preparation for a teaching career, students also will be prepared to seek positions in cultural institutions or educational agencies. Our teacher education majors provide course work in the psychological bases of learning and teaching; the social and historical background of school systems; and teaching methodology, which includes student teaching. Student teaching is done during the senior year as part of an integrated professional semester of interrelated courses and teaching experiences in a local school. Students also will have other opportunities to participate in field experiences because school visits and observations are included in many additional teacher education courses.

Our major in educational studies examines the historical, social, cultural, psychological and public policy aspects of education. As educational studies majors, students may choose to observe in schools, to engage in internships or to work with faculty members on their research. Many educational studies majors pursue graduate or professional study; however, this major also prepares students to work in educational, nonprofit or government agencies.

Our major in applied linguistics is concerned with increasing the understanding of the role of language in human affairs and therefore with providing the knowledge necessary for those who are responsible for making language-related decisions, whether the need arises in the classroom, the workplace, the law court, or the laboratory. Students evaluate theory and research in different dimensions of the field, such as educational linguistics, second language studies, sociolinguistics and language policy. The major in applied linguistics meets the increasing domestic and international demand for second and foreign language researchers and specialists and helps students qualify for positions that may involve linguistically and culturally diverse learners in the United States and around the world.

PhD, Vanderbilt

The Major in Education

Our major in educational studies examines the historical, social, cultural, psychological and public policy aspects of education. Educational studies majors may choose to observe in schools, to engage in internships or to work with faculty members on their research. Many educational studies majors pursue graduate or professional study; however, this major also prepares students to work in educational, nonprofit or government agencies.

Teacher education majors should seek admission to a teacher preparation program early in their sophomore year. To be eligible, students must pass an entrance examination mandated by Missouri and have at least a 3.0 grade point average. In addition, students should consult with an Education Department adviser as early as possible to ensure that they fulfill College of Arts & Sciences, departmental and professional requirements for certification. Upon completion of the program, a satisfactory records check and the recommendation of the Washington University Department of Education, the Missouri Department of Elementary and Secondary Education issues a teaching certificate if the student has passed the relevant parts of the Praxis teaching exit test and has an overall grade point average of at least 3.0 and no grade lower than B in required field or education course work. The following teacher education majors are available:

The Major in Elementary Teacher Education

Total units required: 48

This major prepares students to teach grades one through six and may be completed within a four-year undergraduate degree. Students are required to complete a second major other than education and complete the following education courses:

- 3 credits in educational foundations (Educ 301, Educ 453B, Educ 459F or Educ 481)
- Educ 313B, Educ 4052, Educ 408, Educ 4681, Educ 470, Educ 4831 and Educ 4911
- Math 266 Math for Elementary School Teachers
- The methods block — Educ 4731, Educ 4741, Educ 4751, Educ 4771, Educ 4841 and Educ 525. During the spring of the junior year, students must enroll in the methods block.
- Elementary student teaching (Educ 4911) occurs during the fall of the senior year, during which students concurrently enroll in Educ 470 and Educ 4831.

The Major in Middle School Teacher Education

Total units required: 44

This option prepares students to teach in middle school grades five through nine. Students must major in a subject field taught at the middle school level (English, science, mathematics or social studies) and maintain a 3.0 grade point average in that content field. In addition, students are required to take the following education courses:

- 3 credits in educational foundations (Educ 301, Educ 453B, Educ 459F or Educ 481)
- Educ 325, Educ 4052, Educ 408, Educ 4451, Educ 4681, Educ 4771, Educ 4841 and Educ 525. During the spring of the junior year, students must enroll in the methods block.
- The student’s content area’s curriculum and instruction course Educ 4922 and 5681. This course work includes a semester of student teaching during the senior year.

The middle school teacher education option may be done in conjunction with the secondary major (all requirements for both must be met, including student teaching at both levels). Students who choose middle school will student teach in the spring of their senior year. Some education course work will be taken...
concurrently with student teaching, but that course work will vary depending upon the option selected.

The Major in Secondary Teacher Education

Total units required: 30–33

This major prepares students to teach in a senior high school, grades nine through 12. Students are required to complete a major in a teaching field, such as English, mathematics, sciences or social studies and to maintain a 3.0 grade point average in that content major. In addition, students are required to take the following education courses:

- 3 credits of educational foundations (Educ 301, Educ 453B, Educ 459F or Educ 481)
- Educ 4052, Educ 408, Educ 4821, Educ 4843
- The student’s content area’s curriculum and instruction course (plus Educ 4451 for English majors)
- Educ 492 and Educ 5681. This course work includes a semester of student teaching (Educ 492) during the spring of the senior year during which students concurrently enroll in Educ 4821.

K–12 Teacher Education Major: This major prepares students to teach K–12 in the areas of art, foreign languages and Latin. Students are required to complete a major in their teaching field and to maintain a 3.0 grade point average in that content major. In addition, students are required to take the following education courses: 3 credits of educational foundations (Educ 301, Educ 453B, Educ 459F or Educ 481); Educ 4052, Educ 408, Educ 4821, Educ 4843; the student’s content area’s curriculum and instruction course; Educ 494 and Educ 5681. This course work includes a semester of student teaching (Educ 494) during the spring of the senior year during which students concurrently enroll in Educ 4821.

The Major in Educational Studies

Total units required: 24

This major applies the perspectives and methods of various disciplines to questions about educational institutions and processes and the social and cultural factors that affect them. Students are required to complete 24 units of advanced study as follows:

- three courses in discipline-based studies selected from Educ 304, Educ 4621, Educ 453B, Educ 459F, Educ 462, Educ 4621 and Educ 481
- one or two courses in individual processes of education selected from Educ 315, Educ 337, Educ 4052, Educ 408, 461BP and 5122
- one elective
- in the senior year, either Educ 404 (Honors) or Educ 4999 (Capstone Seminar)

Educational studies majors are strongly urged to choose a second major.

The Major in Applied Linguistics

The major in Applied Linguistics is concerned with increasing the understanding of the role of language in human affairs and therefore with providing the knowledge necessary for those who are responsible for making language-related decisions, whether the need arises in the classroom, the workplace, the law court, or the laboratory. With the major in Applied Linguistics, students learn to evaluate theory and research in different dimensions of the field, such as educational linguistics, second language studies, sociolinguistics and language policy. Required introductory courses provide the necessary foundation of advanced classes. Courses at all levels include critical analysis of different theories, conceptual models and research methodologies. Students in Applied Linguistics may engage in international or domestic internships or work with faculty members on their research.

Specifically, the Major in Applied Linguistics at Washington University meets the increasing domestic and international demand for second and foreign language specialists. This major, combined with a major or minor in Educational Studies, any language (Spanish, French, Italian, Chinese, Swahili, German, Japanese, etc.), Anthropology, Philosophy–Neuroscience–Psychology (PNP), or Psychology, helps students qualify for positions that may involve linguistically and culturally diverse learners in the United States and around the world. The major is also suitable for students who wish to pursue graduate studies in Applied Linguistics, Education, Psychology, and other related fields.

This major is composed of 30 credits that focus on the theoretical, empirical and practical foundations of teaching and learning languages.

One course from following list

Anthro 3386  Language, Culture and Society  3  
Ling 311  Introduction to Semantics  3  
Ling 312  Phonetics  3  
Ling 339  Introduction to Sociolinguistics  3  

Other courses from following list

AFAS 210  The Linguistic Legacy of the African Slave Trade in Interdisciplinary Perspective  3  
AFAS 368  Language and Society in Africa  3  
Comp Lit 394  Worldwide Translation: Language, Culture, Technology  3  
Educ 4014  Urban Education in Multiracial Societies  3  
Educ 4315  Culture, Language and the Education of Black Students  3  
Educ 453B  Sociology of Education  3  
E Lit 407  Old English, Introductory  3  
E Lit 472  History of the English Language  3  
Ling 341  Linguistic Diversity in the United States  3  
Psych 433  Psychology of Language  3  
Span 417  Spanish Phonetics, Phonology and Dialectology  3  

Additional Information

Senior Honors: Students who wish to pursue honors study need to contact the departmental Honors Coordinator about eligibility. Qualifications for eligibility include a minimum 3.65 grade point average and completion of some education course work. Honors study involves both demonstration of acquired knowledge and a thesis based on an original research project. Students may contact a faculty honors adviser as early as the sophomore year, but ideally this is done during the junior year.

Title II: Section 207 of Title II of the Higher Education Act mandates that Washington University’s teacher education programs (or Department of Education) make public specific teacher education performance data. That information can be found on the Department of Education website at http://education.wustl.edu/undergraduate/certification.

The Minor in Educational Studies

Units required: 18

Required courses:

Discipline-based study (two courses required):

Educ 304  Educational Psychology  3  
Educ 453B  Sociology of Education  3  
Educ 459F  Philosophies of Education  3  
Educ 462  Politics of Education  3  
Educ 4621  The Political Economy of Urban Education  3  
Educ 481  History of Education in the United States  3  

Individual Processes of Education (one course required):

Educ 315  Cognitive Bases of Peak Performance I  3  
Educ 337  Play and Development  3  
Educ 4052  Educational Psychology: A Focus on Teaching and Learning  4  
Educ 408  Education and Psychology of Exceptional Children  3  
Educ 461B  The Construction and Experience of Black Adolescence  3  

Social Context of Education (one course required):

Educ 301C  The American School  3  
Educ 303R  Gender and Education  3  
Educ 313B  Education, Childhood and Society  3  
Educ 314  Sociolinguistics, Literacies and Communities  3  
Educ 4280  History of Urban Schooling in the United States  3  
Educ 4288  Higher Education in American Culture  3  
Educ 4289  Neighborhoods, Schools and Social Inequality  3  

Educ 4315  Culture, Language and the Education of Black Students  3  
Educ 4511  Race, Ethnicity and Culture: Qualitative Inquiry in Urban Education  3  
Educ 4608  The Education of Black Children and Youth in the United States  3  
Educ 489  Education and Public Policy in the United States  3  
Educ 4891  The Science and Politics of Testing in the United States  3  

Elective courses:

The remaining 6 units are electives that can be satisfied with any courses from the above lists.

The Minor in Applied Linguistics

Units required: 18

The Minor in Applied Linguistics meets the increasing domestic and international demand for second and foreign language teachers. This minor, combined with a major in Educational Studies, language (Spanish, French, Italian, Chinese, Swahili, German, Japanese, etc.), Anthropology, Philosophy–Neuroscience–Psychology (PNP), or Psychology, helps students
qualify for teaching positions in a variety of language programs for linguistically and culturally diverse learners in the United States and around the world. The minor is also suitable for students who wish to pursue graduate studies in Applied Linguistics, Education, Literature, Psychology, and other related fields. The minor enhances students’ job prospects, applications to graduate programs, and chances of obtaining teaching assistantships in graduate school.

This minor is composed of 18 credits that focus on the theoretical, empirical and practical foundations of teaching and learning languages. All participating students must have a declared primary major.

Required courses: (courses taught in English unless otherwise indicated)

L12 Educ 102 Freshman Seminar: Successes, Challenges and Debates in Education

The purpose of this seminar is for students to gain a greater understanding of some of the most critical issues in education today. In addition to course readings and discussions, the class travels to various sites in the community in order to see some of the effects of these issues on students, parents, schools, teachers and their communities. The seminar consists of several segments. In each one, students read literature addressing a particular issue surrounding education, schooling and learning. Students then participate in a site visit to observe and/or experience the issue we are examining. Class sessions alternate between weekly meetings and site visits.

Credit 3 units. A&S: SS A&S: IQ, SSC BU: HUM EN: S FA: SSP

L12 Educ 203A Introduction to Education

This course is a broad look at the diverse issues surrounding education not only in the United States but around the world. Students examine schooling in areas such as the Pacific Rim, Middle East, Europe and America. We also take a look at educating when working with children with special needs. In addition, students explore some of the ideas and issues unique to the experience of teaching and learning in the U.S. Students work in small groups throughout the semester in projects designed to deepen their understanding of Education in the 21st Century. Throughout the semester, students participate in the Each One Teach One program as tutors. (This course is recommended for freshmen and sophomores only.)

Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L12 Educ 204 Introduction to the Learning Sciences

This course is an introduction to the science of how people learn. Research in the learning sciences explores learning across diverse educational contexts, including formal settings such as classrooms and informal settings such as after-school programs, families and social science disciplines. Many learning scientists are using advanced information technology to develop multimedia and Internet-based learning environments. Students learn about foundational theoretical approaches, empirical research and new learning environments that are based on this research.

Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA EN: S

L12 Educ 234 Introduction to Speech and Hearing Disorders

Introduction to the fields of speech-language pathology, audiology, education of hearing-impaired children, and speech and hearing sciences. Normal speech and hearing processes are discussed, as well as communication disorders. Selected research topics in speech and hearing sciences are presented.

Credit 3 units.

L12 Educ 300 Topics in Education

An examination and appraisal of major educational issues, drawing on normative frameworks, empirical research and analytical literature. Seminar format. Topics vary by semester. Prerequisite: sophomore standing.

Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA FA: SSP

L12 Educ 301C The American School

An analysis of the development of American schooling within the context of American social history. Focus on three general themes: differing conceptions of schooling held by leading American educational thinkers, changing relationships among schools and such other educational institutions as the church.
and the family, policy issues that have shaped the development of schooling in America. Prerequisite: sophomore standing. Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD BU: BA, ETH, HUM EN: H FA: SSP

L12 Educ 303 Gender and Education
An examination, through the lens of gender, of educational practices at the preprimary, primary, secondary and higher education levels. A sociological and historical approach links gender discrimination in education to other forms of discrimination as well as social forces. Students’ own gender-related educational experiences are analyzed in the context of the literature used in the course. Prerequisite: sophomore standing or permission of instructor. Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD BU: BA EN: S FA: SSP

L12 Educ 304 Educational Psychology
A course in psychological concepts relevant to education. Organized around four basic issues: how humans think and learn; how children, adolescents and adults differ in their cognitive and moral development; the sense in which motivation and intention explain why people act as they do; how such key human characteristics as intelligence, motivation and academic achievement can be measured. Prerequisite: sophomore standing. Offered fall and spring semester. Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA FA: SSP

L12 Educ 306 Literacy Education in the Context of Human Rights and Global Justice
Literacy is a fundamental human right. In this course, we explore the current and historical relationships between literacy and human rights. This includes an analysis of the ways in which literacy education is fundamentally linked to issues of global justice, including political engagement and voting rights, environmental sustainability, gender and racial equality, and participation in the globalized economy. We investigate how literacy education has played a role in social struggles at local, national and international levels such as the creation of the Freedom Schools in St. Louis; the Native American boarding school movement; the Civil Rights movement in the United States including the creation of the Citizenship schools; the Ebonics debate in Oakland, California; the Nicaraguan Literacy Campaign; and the current No Child Left Behind federal educational policy. Students explore how literacy education has been used, in each of these cases, as a tool of empowerment and a tool of oppression. Credit 3 units. A&S: SS BU: BA

L12 Educ 313B Education, Childhood and Society
An examination of childhood, child development and education from different perspectives. Observation of children in a variety of settings, including classrooms. Through historical, sociological, psychological and political readings, students clarify current ideas about children, investigate the nature of childhood, and begin to understand how and why childhood is constructed as it is. Prerequisite: sophomore standing. Limited to 45 students. Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA FA: SSP

L12 Educ 314 Sociolinguistics, Literacies and Communities
The well-known “literacy crisis” has forced scholars from many nations to turn their attention to learning about linguistic, cultural and class diversity of students and what this means for learning in schools. In this course we engage with the perceived disjuncture between homes, communities and schools in an era of higher literacy standards, local literacies and community knowledge. We examine the contribution of sociolinguistics to what we know about language and literacy education, achievement and how this relates to social transformation within and across communities. Students can expect theoretical and methodological conversations as we use critical discourse theories, systemic linguistic approaches and empowerment theories as lenses to formulate, challenge and critique the existing status of language and literacy education. CBTL course. Credit 3 units. A&S: LA A&S: IQ, HUM BU: BA EN: H

L12 Educ 315 Cognitive Bases of Peak Performance I
An examination and appraisal of major educational issues, drawing on normative frameworks, empirical research and analytical literature. Seminar format. Topics vary by semester. Prerequisite: sophomore standing. Seminar format. Topics vary by semester. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L12 Educ 325 Psychology of Adolescence
A broad introduction to adolescence as a developmental period of transition and change. The major topics include the fundamental changes of adolescence, the context of adolescence, and processes of psychological development. Prerequisite: Psych 100B. Same as Psych 325 Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA FA: SSP

L12 Educ 337 Play and Development
An examination of current research and theory in play, in development and education, from infancy through the early school years. Topics include play and the development of language, social skills, creativity and cognitive abilities. We also examine the uses of play in educational contexts, focusing on preschool and the early primary grades. Prerequisite: Psych 321 Developmental Psychology or Educ 304 Educational Psychology. Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA EN: S
L12 Educ 338 Computer Technology in Education
Technology has become increasingly important in education in the past 10 years. Many exciting new software applications have been developed by scholars in the learning sciences, an interdisciplinary field based in cognitive psychology. Many of these systems draw on the power of the Internet to support online student collaboration in inquiry-based and project-based learning. This course introduces students to computer technology in education. No prior knowledge of computer programming or software design is required. A major goal of the course is to teach students the basic concepts behind computer programming and design. Toward this end, a significant portion of the course involves laboratory work where students solve programming assignments. This basic knowledge allows students to acquire a deeper understanding of the different possible approaches to developing computer applications that are based on learning sciences research. This course requires a special classroom in which each student has his or her own computer during the class. Enrollment is limited to the number of students that can be supported by this classroom.
Credit 3 units. A&S: SS

L12 Educ 343 Text, Memory and Identity
This course explores issues of collective memory and identity through the study of texts such as national myths and official histories taught in schools. The focus is on texts themselves and how they are produced (e.g., by the state, popular culture) and consumed. The course has two components, methodological and analytical. In the first, we read a number of theoretical works devoted to definitions of the text from a historical and structural point of view. In the second, we analyze various key works that have played a crucial role in the formation of communities of memory and identity and the borders that separate them. The course is comparative, multidisciplinary and international in its scope.
Same as IAS 343
Credit 3 units. A&S: TH

L12 Educ 346 Psychology of Creativity
This course is an introduction to the psychological study of art and creativity. Our topics include the artist; the audience; the artistic product; the creative process; and social, cultural and institutional influences on the creative process. We explore these issues by considering a range of creative fields, including painting, literature, music and theater performance. Throughout the semester, we take a developmental perspective on psychology and art. How do children learn to create, perceive and understand different art forms? What role can the arts play in education? To ground our study of the psychology of art, we explore what “art” is, which members of society are labeled “artists,” and how these categories are socially and culturally defined. Prerequisite: Educ 304 Educational Psychology or Psych 325 Adolescent Psychology or Psych 321 Developmental Psychology.
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA FA: SSP

L12 Educ 400 Topics in Education
An analysis of major educational issues, drawing on empirical research and literature. Seminar format. Topics vary by semester.
Credit 3 units. A&S: SS FA: SSP

L12 Educ 4014 Urban Education in Multiracial Societies
Same as URST 400
Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI EN: S

L12 Educ 4015 American Democracy and the Policy-Making Process
This course is part of the Semester in D.C. Program
Same as Pol Sci 4001
Credit 3 units.

L12 Educ 4023 Second Language Acquisition and Technology
This seminar, for undergraduate and graduate students, transforms research and theory about second language acquisition into practice while focusing on technology-driven applications. The course fosters professional development as participants formulate critical skills for evaluating, creating and integrating technology into the language classroom. Course formats include readings, discussions and demonstrations with technologies. The course is now open to undergraduates. Graduate students can enroll whenever it suits their course planning. The course counts for the Graduate Certificate in Language Instruction and for the Undergraduate Minor in Applied Linguistics. This course carries the Social and Behavioral Sciences attribute and can be taken as an elective in several different programs.
Credit 3 units. A&S: SS A&S: IQ, SSC, EN: S

L12 Educ 4033 Video Microanalysis: Methods and Tools
The purpose of this course is to explore video microanalysis as a methodological tool for studying and valuing unconscious aspects of culturally diverse settings. Utilizing social cultural theoretical lens, this type of analysis reveals fleeting actions, subtle movements, peripheral events and nonverbal communication that are not easily identified in real-time viewing. Specifically we may look at facial expressions, direction of gaze, hand movements, body position and use of material resources as micro techniques to expand our capacity to explore minute aspects and alternative interpretations of social interactions.
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD EN: S
L12 Educ 404 Study for Honors
A research program arranged by the student and a faculty member. Prerequisite: recommendation for Honors study. Credit 3 units. A&S: SS EN: S FA: SSP

L12 Educ 4052 Educational Psychology: A Focus on Teaching and Learning
The classroom as a physical, social and intellectual environment. Selected psychological concepts and theories are applied to processes and practices of teaching and learning through readings, discussions and participation/observation in preschools and elementary and secondary schools. A systematic, firsthand look at schooling in America both for prospective teachers and those interested in furthering their understanding of fundamental principles of teaching and learning. Prerequisite: sophomore standing. Must enroll in fieldwork laboratory (5 hours per week). Credit 4 units. A&S: SS A&S: IQ, SSC FA: SSP

L12 Educ 4055 Central Topics in Learning Sciences Research
The learning sciences are a group of disciplinary approaches to the study of learning, including cognitive science, education, psychology, anthropology and sociology. The core of the approach is based in the study of cognition and its relationship to the disciplines of science, mathematics and literacy. Technology has become increasing important in the past 10 years, as computer-supported collaborative learning (CSCL) software has grown in sophistication and effectiveness. The learning sciences have contributed interesting new methodologies for studying and documenting how learning occurs in real-world settings. In this course, we review the broad range of research currently taking place in the learning sciences, including methodologies for studying learning, computer software that supports both solitary and collaborative learning, the impact of new technologies on educational practice, and the impact of learning sciences research on teacher professional development and schoolwide reform. Students acquire the ability to think creatively and critically about the learning sciences, and to evaluate critically the strengths and weaknesses of specific classroom approaches and software applications. Credit 3 units. A&S: SS

L12 Educ 407 Curriculum and Instruction in Modern Foreign Languages
Modern foreign language curriculum in the secondary schools, with emphasis on the selection, organization and appraisal of materials. Analysis of methods of instruction and evaluation in teaching modern foreign languages. Prerequisite: admission to teacher education program. Secondary teacher education majors are required to take 3 credit hours during the fall semester in which student teaching is done. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: SSP

L12 Educ 408 Education and Psychology of Exceptional Children
Major handicaps of children that require educational modifications. The nature of the handicaps, their known causes and educational provisions for exceptional children, ranging from special schools to “mainstreaming” children into regular classrooms. The nature of giftedness, together with current practices of educating gifted children and youth. Required in teacher certification program. Prerequisite: sophomore standing. Offered fall and spring semesters. Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA, HUM FA: SSP

L12 Educ 411 Linguistics and Language Learning
The course, taught in English, provides a critical survey of various components involved in the relationship between linguistics and language learning. The course emphasizes the language learner and explores dimensions of second language acquisition. The course begins with an examination of linguistic theories and then highlights the influence of linguistic theories on L2 acquisition research. The course then moves to an exploration of research on language and the brain. With this foundation, the course covers both internal and external factors related to language acquisition, such as language aptitude, age, gender, memory, prior knowledge, etc. In summary, theoretical and research dimensions of both linguistics and language learning are treated. This course counts as a requirement for the Graduate Certificate in Language Instruction and for the Undergraduate Minor in Applied Linguistics. Prerequisite: Ling 170 is recommended but not required. Credit 3 units. A&S: LA A&S: IQ, SSC EN: H, S

L12 Educ 413 Curriculum and Instruction in Art K-12
Art curriculum in the public schools, with emphasis on examination of methods and materials for teaching art. Prerequisite: admission to teacher education program. Secondary teacher education majors are required to take 3 credit hours during the year in which student teaching is done. Offered fall semester. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: SSP

L12 Educ 414 Curriculum and Instruction in English
English curriculum in the secondary school; emphasis on the selection and organization of materials. Analysis of methods of instruction and evaluation in teaching literature and language. Prerequisite: admission to teacher education program. Secondary teacher education majors are required to take 3 credit hours during the year in which student teaching is done. Offered fall semester. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: SSP

L12 Educ 415 Curriculum and Instruction in Science
Secondary school science curriculum and instructional methods, including evaluation of curricular materials and student
L12 Educ 417 Curriculum and Instruction in Mathematics
Mathematics curriculum in the secondary school, with emphasis on modern developments in organization of mathematics. Analysis of methods of instruction and evaluation in teaching mathematics. Prerequisite: admission to teacher education program. Secondary teacher education majors are required to take 3 credit hours during the fall semester during the year in which student teaching is done. Credit 3 units. A&S: NS A&S: IQ, NSM FA: SSP

L12 Educ 418 Curriculum and Instruction in Social Studies
Goals of general education in social studies and their relationship to the nature of knowledge in the social sciences. Introduction to the nature of thinking and its relationship to pedagogy and teaching materials. Prerequisite: admission to teacher education program. Secondary teacher education majors are required to take 3 credit hours during the year in which student teaching is done. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L12 Educ 4211 New Media Literacy and Popular Culture in Education
At the closing of the 20th century, the “digital turn” began to shape how individuals learn, communicate and interact with one another. Current and emerging media technologies have continued to change how individuals (youth and adults alike) gather information; consume, produce and disseminate texts; and participate in both local and global communities through print- and screen-based platforms such as email, blog, podcast and mash-ups, among others. In this course, we explore what we mean by technology, the various types and uses of technology and the relationship of technology to literacy and education. We begin with characteristics of “new media” and consequences of the digital revolution. Then, we examine conceptualizations of literacy in a historical context-from literacy as reading and writing to literacy as multimodality, convergence and participation. Finally, we shift our inquiry to investigate how new media literacies and technologies are shaping (and are shaped by) different forms of popular culture in United States and international contexts, including parts of Asia, Australia, Europe, Africa and North and South America. We make explicit the connections to education and explore possible directions for research and practice, including copyright and fair use issues present in educational settings. Readings, discussions and activities online and in actual communities culminate in individual- and class-based new media productions. Prerequisite: at least junior standing or permission of the instructor. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L12 Educ 4271 Health of the Child
A study of the health and nutrition of children. Prerequisites: admission to the teacher education program or permission of director of Teacher Education. Credit 1 unit. A&S: SS FA: SSP

L12 Educ 428 History of Education in the United States
Credit 3 units. A&S: SS

L12 Educ 4280 History of Urban Schooling in the United States
This reading colloquium examines the history of urban schooling and school policy in the United States. Readings focus on the growing literature in the history of urban schooling and on primary source material. We explore urban schooling in general and we examine particular primary source material as well as particular cities and their school districts. Such districts may include New York, Boston, Chicago, Detroit, St. Louis, Los Angeles, San Francisco, Atlanta and others. The course has two goals: to develop a strong contextual understanding of the conditions of urban schooling, the history of urban school reform, and the debates over the purposes of urban schools; and to examine the ways historians have explored urban schooling in the U.S. Students should expect to read a book a week as well as primary source materials and occasional articles. Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L12 Educ 4288 Higher Education in American Culture
Colleges and universities in the United States have been the sites of both cultural conservation and political and cultural subversion from their founding in the 17th and 18th centuries. They have been integral to national and regional cultural and economic development. In addition, they have functioned as one component of an increasingly diversified and complex system of education. This course, a reading colloquium, surveys higher education in American history, including the ideas that have contributed to shaping that history, beginning with its origins in European institutional models. We use primary and secondary readings to examine critically its conflict-ridden institutional transformation from exclusively serving the elite to increasingly serving the masses. We explore the cultural sources of ideas as well as the growth and diversification of institutions, generations of students and faculty as they changed over time, and curricular evolutions and revolutions in relation to the larger social and cultural contexts of institutional expansion. Credit 3 units. A&S: TH BU: HUM FA: SSP
L12 Educ 4289 Neighborhoods, Schools and Social Inequality
A major purpose of the course is to study the research and policy literature related to neighborhoods, schools, and the corresponding opportunity structure in urban America. The course is informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis is placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups complement the course foci.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L12 Educ 4301 Historical Social Content of the American School
An analysis of the development of American schooling within the context of American social history. Focus on three general themes: differing conceptions of schooling held by leading American educational thinkers, changing relationships among schools and such other educational institutions as the church and the family, policy issues that have shaped the development of schooling in America. Prerequisite: sophomore standing.
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD BU: BA, ETH, HUM EN: H FA: SSP

L12 Educ 4312 Tools of Inquiry
This course offers an introduction to teacher inquiry and provides a foundation of skills, knowledge and performances that effective teachers use to monitor and improve practice. In this course teachers are actively involved in their own teaching and learning with an emphasis on the following: (1) Reflective practice: reflective practitioners continually evaluate the effects of their choices and actions on others (e.g., students, parents and other professionals in the learning community) and actively seek out opportunities to improve practice and grow professionally. (2) Use of technology: teacher leaders model the use of media and technology as tools of inquiry. This course supports teachers to do the following: use multiple sources of data to assess the growth of individual learners; use assessment data to adjust curriculum and instruction to student needs; investigate their own biases, assumptions and ideologies and monitor the effects on student learning; conduct research in the classroom to assist them in improving their practice; and use portfolios and other reflective practices to document and monitor their professional development. Offered spring semester.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L12 Educ 4315 Culture, Language and the Education of Black Students
This course examines the communicative patterns of what is called variously African-American language, Pan-African linguistic systems and Ebonics within the context of public school policy and practice. In addition to a review of the structural and pragmatic aspects of Black speech, the course highlights relationships between controversies within the linguistic community, contrasting views of speech within Black lay communities, public discourse, and educational policy. Students also conduct a field-based research project in accord with their particular interests.
Credit 3 units. A&S: SS A&S: IQ, SSC, LCD EN: S FA: SSP

L12 Educ 434B Seminar in Black Social Sciences
This seminar applies a deep reading to social science texts that examine the construction and experiences of black people in the United States from the point of view of black scholars. Readings include theoretical and empirical work. The seminar focuses on the influence of the disciplines of psychology, sociology and anthropology on the policy and social practices that characterize dominant North American institutions. Advanced class level strongly advised. Same as AFAS 434B
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD AR: SSP BU: BA FA: SSP

L12 Educ 4351 Reading and Reading Development
The purpose of this course is to provide students with an up-to-date understanding of the scientific research on skilled reading and its development. The readings for the course include some very recent materials as well as some of the important older work. The course focuses on the cognitive and linguistic bases of reading and spelling and the implications of this research for such issues as developmental dyslexia and reading instruction. Most of the research covered examines reading processes in English, but we also discuss other languages and writing systems.
Same as Psych 4351
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L12 Educ 440 Women in the History of Higher Education and the Professions
An advanced seminar with readings exploring education, historical studies and feminist theory. Each student writes a paper, based on research in local archives and in other primary sources, on a topic related to women in higher education and/or professions. Prerequisites: junior standing or above; some background in American history.
Credit 3 units. A&S: TH, SD FA: SSP
L12 Educ 4413 Project Design for Math and Science Education
A course for those students who have an interest in teaching or educational design: This graduate/advanced undergraduate course focuses on the design and construction of educational projects for schoolchildren in the middle- and high school levels of mathematics and science. Students in the course, in small group collaborations, conduct an entire cycle of design, implementation and evaluation of a small math or science project (or both) for local middle or high school students. Projects are aligned with state and national standards, so they could be used in Missouri public schools. Creativity is encouraged. The class includes four phases of work throughout the semester: (1) Ongoing reading and discussion of the national and state standards for math and science instruction, and of research literature on inquiry in science and math education; (2) design of project activities, materials and assessments, including specification of content, pedagogical and technology goals, and alignment with standards; (3) conduct of the teaching projects at selected sites with middle-school or high school students; (4) evaluation of projects in a final presentation and report. Students in science, mathematics, psychology and education, with interests in teaching, educational research or educational outreach, are encouraged to attend.
Credit 3 units. A&S: SS

L12 Educ 4414 Learning Technologies for Math and Science
What does the integration of electronic technology into classrooms, projects and informal settings mean for the development of our students' understanding of mathematics and science? What implications does it have for our own content understanding and for how we lead our students in the classroom? Can we really integrate information technology into the classroom in ways that truly enhance student inquiry and reasoning? This course focuses on the function, design, use and effectiveness of electronic technology in mathematics and science education, and, in particular, how it interacts with content and classroom practice. A primary perspective in the course is the ways in which electronic tools can be used to promote understanding and interpretation of data and quantitative thinking as springboards to inquiry, modeling, and the doing of "authentic science." Participants learn several software applications and computer-based curricula and read current research on the implications for the learning sciences of technology and modeling in science and math. Content emphasis is from middle- and high school science and mathematics and is accessible to all teachers of science and math. In-service teachers, graduate students and advanced undergraduates in education, mathematics, science and psychology are invited.
Credit 3 units. A&S: SS

L12 Educ 4415 Learning Sciences in Math and Science
This course introduces the concepts of the learning sciences as related to mathematics, science and technology education.

The focus of the course is on how students learn fundamental concepts selected each semester from topics such as number, space, shape, data, operations, functions, rate, balance, density, etc. and how their ideas evolve and develop over time. The inventiveness of children’s thinking and the sophistication of their interactions are shown as rich resources, often underutilized in typical classroom instruction. The developmental and epistemological theories of scholars such as Jean Piaget and the von Hieles are contrasted with sociocultural and linguistic approaches such as of Lev Vygotsky, Sylvia Scribner and Michael Cole, and the pragmatic theories of John Dewey. Topics include studies of error patterns, misconceptions, alternative conceptions in mathematics and science and how these relate to outside experience, student interactions and discourse patterns using excerpts from real classrooms. Students are expected to read original works, learn to analyze video interviews from each perspective, and to read and summarize existing literature on children’s reasoning for specific topics. The course is targeted toward upper-division undergraduates, master’s and doctoral students in education, psychology and/or mathematics and science, and adjusted to meet these various levels of preparation.
Credit 3 units. A&S: SS

L12 Educ 4451 Teaching Writing in School Settings
Writing teachers often know how to write well but less about the teaching of writing. To provide effective instruction in writing, teachers need, first of all, experiences with writing instruction and theoretical knowledge to guide classroom practices. The goals of this course are as follows: to provide opportunities for all teachers of English and language arts, to develop theoretical knowledge and skill as teachers of writing, to connect the practices of research and teaching, to encourage teachers to give their students multiple and varied experiences with writing, to assist teachers in learning to respond to students' writing and assess their progress as writers.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L12 Educ 4511 Race, Ethnicity and Culture: Qualitative Inquiry in Urban Education
Drawing on traditional and recent advances in the field of qualitative studies, this course is the first in a series to examine ethnographic research at the interlocking domains of race, ethnicity, class, gender and culture. The emphasis is on how these concepts are constructed in urban educational institutions. The course includes a field component that involves local elementary and/or middle schools.
Same as AFAS 4511
Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD AR: SSP BU: BA EN: S FA: SSP

L12 Educ 4413 Project Design for Math and Science
L12 Educ 4414 Learning Technologies for Math and Science
L12 Educ 4415 Learning Sciences in Math and Science
L12 Educ 4451 Teaching Writing in School Settings
L12 Educ 4511 Race, Ethnicity and Culture: Qualitative Inquiry in Urban Education
L12 Educ 4512 Race, Ethnicity and Culture: Qualitative Inquiries into Urban Education II
This course is the second of two to examine ethnographic research at the intersecting and overlapping points of race, ethnicity, class, gender and culture. The emphasis in this course is on developing methodology that is consistent with critically grounded, socially responsible, culturally responsive and humane research projects and programs. Secondary English education majors are required to take fall semester during the year in which student teaching is done. Prerequisites: AFAS/ Educ 4511 and/or permission of the instructor. Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI EN: S FA: SSP

L12 Educ 4521 Teaching Adults in Community Settings
Communities possess a vast and varied choice of learning opportunities for the citizens, whose participation as volunteers, communicators, facilitators, mentors, leaders and instructors can enhance their own lives as well as the life of the community. This course helps students acquire the knowledge, skill sets, habits of mind, and learning strategies necessary for understanding the adult learner and the effective design of learning for personal and professional growth by adults in a variety of community settings. We inventory the class members’ interests in specific community contexts so that we can work with those settings in mind throughout the semester. Discussion of learners’ needs and peer practice of appropriate, effective instructional and learning strategies provide experience, new perspectives and opportunities for reflection. Course work serves as preparation for the final project, which is to create an instructional plan for adult learners that addresses a specific community learning need or situation. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L12 Educ 453B Sociology of Education
How does society shape schools and schools shape society? An examination of cultural, political and economic factors and their relationship to the structure of our educational institutions; how control is exercised in classrooms; how knowledge and learning are defined, and basic values about equality, gender and social justice are shaped by teachers’ educational decisions. Students analyze their own schooling experience, visit at least two schools, interview teachers and students, and consider what changes are needed to make schools more responsive to students and communities. Prerequisite: sophomore standing. Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD BU: BA, ETH, HUM, IS FA: SSP

L12 Educ 459F Philosophies of Education
An examination of distinct educational philosophies (traditional, progressive and radical) and an analysis of perennial topics in the philosophy of education (educational goals, the teacher’s and student’s roles, and curricular content). Discussion of such recent themes as gender relations and education; democracy and education; and moral values and education. Seminar format. Credit 3 units. A&S: TH A&S: IQ, HUM BU: ETH EN: H FA: SSP

L12 Educ 4608 The Education of Black Children and Youth in the United States
This course provides an overview of the education of Black children and youth in the United States. Covering both pre- and post-Brown eras, this course applies a deep reading to the classic works of DuBois and Anderson as well as the more recent works of Kozol, Delpit and Foster. The social, political and historical contexts of education as essential aspects of American and African-American culture and life, are placed in the foreground of course inquiries. Credit 3 units. A&S: TH, SD, WI A&S: IQ, HUM, SD, WI EN: H FA: SSP

L12 Educ 461 Introduction to Educational Tests and Measurements
Basic concepts of tests and measurements for teachers (and other school personnel). Topics: test reliability and validity; fundamentals of test construction and standardization; analysis of major types of group tests used in schools, including achievement and aptitude tests; meaning and interpretation of test scores; development of school testing programs. Teacher-made tests a central concern. Prerequisite: Educ 4052 or the equivalent. Credit 3 units. A&S: SS A&S: IQ, SSC EN: S

L12 Educ 461B The Construction and Experience of Black Adolescence
This course examines the construct of Black adolescence from the general perspectives of anthropology, psychology and sociocultural analysis. It begins by studying the construct of Black adolescence as an “invention” of the social and behavioral sciences. The course then draws upon alternative theoretical sources, such as humanities, critical pedagogy, grounded theory and mediated action theory to recast Black adolescence as a complex social, psychological, cultural and political phenomenon. While this course focuses on the meaning-making experiences of urban-dwelling Black adolescents, it highlights these relations within the context of class, gender and education. Same as AFAS 461B
Credit 3 units. A&S: SS A&S: IQ, SSC AR: SSP BU: BA FA: SSP

L12 Educ 462 Politics of Education
Politics is interpreted broadly to include not just government, but any situation in which people have to solve a problem or come to a decision. This course focuses on schools and the processes through which certain stories, identities and practices are promoted, and others, not. Credit 3 units. A&S: SS A&S: IQ, SSC FA: SSP
L12 Educ 4621 The Political Economy of Urban Education
Defining a political economy of urban education involves the examination of power and wealth and the manner in which they operate in urban settings. It requires analysis of the larger urban social and economic context and consideration of historical forces that have brought the schools to their present state. In this course, we consider various political and economic factors that have influenced and shaped urban education in the United States, drawing upon the extant literature on urban education and related social science disciplines to characterize and discuss them. A particular focus of this course is on the dynamic interrelationships among the political economy, urban education and social stratification. Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD EN: S

L12 Educ 463 Economics of Education
How does society shape schools and how do schools shape society? An examination of cultural, political and economic factors and their relationship to the structure of our educational institutions; how control is exercised in classrooms; how knowledge and learning are defined; and how basic values about equality, gender and social justice are shaped by teachers’ educational decisions. Students analyze their own schooling experience, visit at least two schools, interview teachers and students, and consider what changes are needed to make schools more responsive to students and communities. Prerequisite: minimum sophomore standing. Credit 3 units. A&S: SS

L12 Educ 4681 Teaching Reading in the Elementary School
This course, emphasizing emergent literacy and children’s literature, is the first in a sequence of three courses on teaching reading and writing. The purposes of this course are to survey children’s acquisition of oral and written language from an emergent literacy perspective, to focus on methods of teaching beginning reading, to develop uses of children’s literature in a reading program. Offered fall semester. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: SSP

L12 Educ 470 Language, Learning and Instruction
This course, which emphasizes children’s writing and literacy issues, is the third of three courses in a sequence on teaching reading and writing. The course reviews and elaborates on work from previous courses on children’s acquisition of written language, examines approaches to teaching writing, and focuses on work from sociological, feminist and philosophical perspectives to affirm and criticize aspects of these approaches. Prerequisites: Educ 4681 and 525. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: SSP

L12 Educ 4731 Elementary School Mathematics
Fundamental concepts, properties, operations and application of mathematics related to the systems of whole numbers, integers, rational numbers and real numbers. Also included are measurement, simple geometry, probability and logical reasoning. Examination and implementation of varied curricula and teaching strategies. Prerequisite: admission to Elementary Education program or permission of director of Teacher Education. Offered spring semester. Credit 3 units. A&S: NS A&S: IQ, NSM FA: SSP

L12 Educ 4741 Elementary Science: Content, Curriculum and Instruction
Focus on key concepts appropriate for elementary school science and health instruction. Repertoire of effective teaching strategies and approaches to curriculum development. Prerequisite: admission to teacher education program. Offered spring semester. Credit 2 units. A&S: NS A&S: IQ, NSM FA: SSP

L12 Educ 4751 Elementary School Mathematics
This course, which emphasizes children’s writing and literacy issues, is the third of three courses in a sequence on teaching reading and writing. The course reviews and elaborates on work from previous courses on children’s acquisition of written language, examines approaches to teaching writing, and focuses on work from sociological, feminist and philosophical perspectives to affirm and criticize aspects of these approaches. Prerequisites: Educ 4681 and 525. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: SSP

L12 Educ 4771 Arts and Aesthetics: A Means of Communication
Methods and materials for integrating the arts and aesthetics into the elementary classroom. Emphasis on art, music and oral communication as well as curricula in movement. Prerequisite: admission to teacher education program or permission of instructor. Credit 3 units. A&S: LA A&S: IQ, HUM EN: H FA: SSP

L12 Educ 481 History of Education in the United States
Examines education within the context of American social and intellectual history. Using a broad conception of education in
the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas and practices that have shaped American educational policy in different periods of our history. Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H FA: SSP

L12 Educ 4821 The Teaching-Learning Process in the Secondary School
Secondary teacher education majors are required to take this teacher-learning course during the spring semester in which student teaching is done. The course focuses on the study, practice and analysis of generic teaching strategies and skills needed to meet the needs of all students. Topics include classroom management, lesson planning, instructional and ethical decision making and strategies for presenting clear explanations, asking effective questions, conducting productive discussions, reaching students with different learning styles/abilities/cultural backgrounds, and using cooperative learning groups. Secondary teacher education majors are required to take 3 credit hours during the year when student teaching is done. CBTL course. Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI EN: S FA: SSP

L12 Educ 4831 The Teaching-Learning Process in the Elementary School
Focus on four broad areas: self-awareness and human relations; generic teaching and behavioral management strategies; analysis of instruction; and social and political issues affecting the classroom. Topics include teacher-pupil relationships, evaluation of pupil progress, curriculum development, instructional technology and school organization. Prerequisite: admission to Elementary Teacher Education program required. Elementary teacher education majors are required to take this course in the fall semester during which student teaching is done. Credit 3 units. A&S: SS, WI A&S: IQ, SSC, WI EN: S FA: SSP

L12 Educ 4841 Elementary Methods Field Experience
Application and analysis of specific content area methods strategies in an elementary school classroom. Prerequisite: admission to teacher education program. Elementary teacher education majors are required to take this course during the spring semester before the year in which student teaching is done. Offered spring semester. CBTL course. Credit 2 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L12 Educ 4843 Field Experience Seminar
This course guides students through a field experience in middle or secondary public school. Students observe and document classroom environment characteristics, professional teacher behaviors and student behaviors; work with students individually and/or in small groups; prepare and teach a lesson. Credit variable, maximum 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L12 Educ 4891 The Science and Politics of Testing in the United States
Why do tests permeate American Society? Tests have been integral to the decision-making process in many venues of American culture — immigration opportunities, voting rights, college admissions, workforce considerations, special education placement, educational reform and graduation requirements. The credibility of these decisions depends upon the claim that a particular test is a scientific instrument and relevant to the decision-making process. This claim is worthy of study. The purpose of this course is twofold. The first purpose is to examine how the nexus of science and politics influence testing practices in American society. The second purpose is to explore how testing practices influence the culture of schools, civil liberties, the work place and public discourse about merit. Credit 3 units. A&S: SS, SD A&S: IQ, SSC, SD EN: S

L12 Educ 4911 Student Teaching in the Elementary School
Supervised teaching experience. Group meetings and individual conferences. Emphasis on integration of theory/practice and reflection on teaching through videotape analysis. Prerequisites: admission to elementary teacher education program and permission of director of teacher education. Credit/no credit only. Elementary teacher education students enroll for 8 credits during the fall semester. Credit variable, maximum 8 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L12 Educ 492 Student Teaching in the Secondary School
Supervised teaching experience. Group meetings and individual conferences. Emphasis on integration of theory/practice and reflection on teaching through videotape analysis. Prerequisite: admission to teacher education program. Credit/no credit only. Secondary teacher education students enroll for 8 credits during the spring semester.
Credit variable, maximum 8 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L12 Educ 4922 Student Teaching in Middle Schools
Supervised teaching experience. Group meetings and individual conferences. Prerequisite: admission to teacher education program. Credit/no credit only. Middle-school teacher education students enroll for 8 credits. Offered spring semester.
Credit variable, maximum 8 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L12 Educ 494 Student Teaching in Grades K-12
Supervised teaching experience. Group meetings and individual conferences. Prerequisite: admission to teacher education program. Credit/no credit only. K-12 teacher education students enroll for 8 credits. Offered spring semester.
Credit variable, maximum 8 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L12 Educ 4951 Middle School Philosophy and Organization
This course examines the history, goals, organization and philosophy of middle schools as institutions. Students explore how the characteristics and needs of early adolescents guide the mission, structure and operation of middle schools. Prerequisite: admission to teacher education program.
Credit 2 units. A&S: SS EN: S FA: SSP

L12 Educ 4952 Middle School Curriculum and Instruction
Building on knowledge of the middle-level child and the ways in which middle schools are organized to meet the needs of middle-level children (covered in Educ 4951), this course explores the learning styles and attributes of middle school students and examines instructional theory, methods and materials appropriate to grades five through nine. In addition, portions of this course are devoted to specific content field methodology subdivided into English/language arts and social studies or science and math. The English/social studies and science/math sessions are held concurrently and students attend the session appropriate to their content major or minors. Interdisciplinary team teaching is modeled and featured in these sessions. Features a required practicum experience. Prerequisites: admission to Teacher Education program and Educ 4951.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L12 Educ 4999 Capstone Seminar in Educational Studies
All majors not writing an Education senior honors thesis are required to enroll in the senior seminar, a reading colloquium. Students read with faculty and write papers based on the readings and the courses taken to complete the major requirements in the program. All honors students are required to attend at least one session of the seminar to present their work, and all graduating Educational Studies majors, including those completing honors work in Educational Studies, are required to attend the final session of the seminar.
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

English
Undergraduates who major or minor in English explore literature as readers and writers in small classes that focus on the individual student. With exposure to our wide array of course topics and intellectual approaches, alumni of the English department have succeeded in top-notch graduate programs in English and creative writing, as well as in law, business and medicine. Preparation for the English major begins at the freshman level. In both the fall and spring semesters, freshman seminars of 15 students or fewer are led by distinguished faculty on subjects such as detective fiction, literature and justice, the invention of romantic love, and the cultural history of the American university. Other freshman seminars train skills in creative writing through close reading of celebrated literary texts. Our department’s commitment to cross-fertilizing creative and critical literacy is genuine and longstanding. Home to one of the leading MFA programs in the United States, the department offers an undergraduate minor in writing as well as a major with a concentration in creative writing. English students frequently enroll in creative writing workshops or classes in advanced rhetoric, and three such courses may count toward the regular English major.

The Major in English Literature

Units required: 30

Prerequisites:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>E Lit 2151</td>
<td>Literature in English: Early Texts and Contexts</td>
<td>3</td>
</tr>
<tr>
<td>E Lit 2152</td>
<td>Literature in English: Modern Texts and Contexts</td>
<td>3</td>
</tr>
</tbody>
</table>

Required credits: 24 units of upper-division (300- and 400-level) work (at least 6 units must be 400-level). Must include, at a minimum:

Four required courses:

- Three Historical (3 out of 5 historical periods, any of which may be filled by American, British or Anglophone, with at least one course from each of these two Groups):
  - Group 1
    - Medieval
    - Early Modern
  - Group 2
    - The 18th Century
    - The 19th Century
    - The 20th Century and later

- One Literary Theory

Four electives

Eight courses in all (including two 400-level courses)

- All courses must be taken for letter grades.
- Must receive a grade of C or better.
- Only one cross-listed course not home-based in English may be counted toward the 24 units required. The two required 400-level courses must be home-based in English.
- Maximum of 6 units from University College and/or Summer School courses may count toward the major. These selections need English department approval.
- Study Abroad students must complete the 200-level prerequisite courses and at least two upper-level courses in English literature before going abroad.
- 3 units of 300- or 400-level courses in the literature of a language other than English may be counted toward the English major.
- Before the end of junior year, majors are encouraged to consult with advisers regarding the fulfillment of major requirements.

Portfolio Capstone

All majors are required to complete a portfolio capstone project, for which the student provides a 200-level paper, a 400-level paper, and a brief (3-4 pages) essay that reflects on the student’s overall learning experience in the major. It is due on the Friday before spring break in the student’s senior year (or, for those graduating in December, the Friday before Thanksgiving week).

Concentration in Creative Writing

There is the option of completing an English major with a creative writing concentration. To do this, students must take five creative writing courses, including at least three upper-division courses. Students will specialize in one particular genre — poetry, fiction, or creative nonfiction — ultimately taking a 3-course sequence in that genre (200-, 300-, and 400-level) while taking at least one course outside this genre. The concentration will not change the current requirement structure in the English major and thus requires 6 additional credit hours to complete compared to a regular English major.

Additional Information

Senior Honors: Students must have achieved a 3.6 grade point average in English and a 3.65 grade point average overall in order to apply for honors in English in spring of junior year. Students must successfully complete the required courses for the English major. Students must take E Lit 5001 Honors Thesis Tutorial in both fall and spring of senior year and E Lit 3991 Senior Research Seminar I and E Lit 3992 Senior Research Seminar II in fall and spring, respectively, of senior year.

Study Abroad: Four affiliate programs in England are open for well-prepared students: University College, London (UCL); University of Sussex; Oxford Program for Undergraduate Studies (OPUS); and Keble College at Oxford. Students interested in Study Abroad must apply and participate before senior year.

Transfer Units: Students must provide transcript(s) of previous work to receive approval from the director of Undergraduate Studies.

The Minor in English

Units required: 15

Required courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>E Lit 2151</td>
<td>Literature in English: Early Texts and Contexts</td>
<td>3</td>
</tr>
<tr>
<td>E Lit 2152</td>
<td>Literature in English: Modern Texts and Contexts</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective courses: Three upper-division (300- or 400-level) electives. These courses should be home-based in the Department of English.

Additional Information

Students are expected to take courses for letter grades and to receive a grade of C or better in each.
The Minor in Writing

Students who wish to take a writing minor in addition to an English major are advised to take English and American literature courses (designated E Lit) exclusively for the major, and Writing courses exclusively for the minor.

The writing minor consists of 15 units composed of any of the following courses but no more than 6 units at the 200-level:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Writing 220</td>
<td>Creative Nonfiction Writing 1</td>
<td>3</td>
</tr>
<tr>

<td>Advanced Poetry Writing</td>
<td>3</td>
</tr>
<tr>
<td>Writing 4731</td>
<td>Advanced Playwriting</td>
<td>3</td>
</tr>
<tr>
<td>Writing 4801</td>
<td>Screenwriting</td>
<td>3</td>
</tr>
<tr>
<td>Writing 500</td>
<td>Independent Study (limit 3 units)</td>
<td></td>
</tr>
</tbody>
</table>

At least one of the five courses elected must be Writing 311 Exposition or Writing 312 Argumentation. With department approval, up to 6 units of journalism courses in writing or editing offered in University College or an off-campus internship (Writing 298 Journalism: Communications Internship) oriented toward writing may be counted toward the minor. These two options may not be combined; i.e. regardless of level, at least three courses (9 units) must be chosen from the English department offerings listed above.

English Composition

For courses in English Composition, please visit the Writing (p. 870) page.

English Language and Literature

L14 E Lit 150 Literature Seminar for Freshmen: How to Read a University

More than 70 percent of American adults now study at college for some time. But almost none study college as a formative individual experience and critical public institution while there. This course aims to fill this gap, encouraging students to reflect on the ground under their feet, the contemporary American university, and the myths, debates and histories that shape it. What is the purpose of higher education: to protect and defend islands of humanistic contemplation and disinterested scientific inquiry; to equip young citizens for informed democratic action; to train meritocratic elites for high office and high salaries?

And how has this purpose shifted with the growth of leading American universities from clerical enclaves to worldly research corporations? This course addresses such questions with help from three bodies of texts: canonical modern fictions of campus life by such authors as F. Scott Fitzgerald and Willa Cather, Mary McCarthy and Ralph Ellison, Philip Roth and Don DeLillo; some influential theories of the university and its intellectuals from Thomas Jefferson to Michel Foucault; and a trio of iconic college films: the Marx Brothers’ Horsefeathers, National Lampoon’s Animal House and Spike Lee’s School Daze.

Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H

L14 E Lit 201C Text and Tradition
As we study some of the most influential of ancient works we address the basic questions of liberal education. Why ought the classics be read in the first place? How is it that Western culture has come to value certain fundamental questions, even to the point of encouraging opposition? Texts include selections from the Old Testament, Homer, Aeschylus, Sophocles, Virgil, Ovid, Petrarch, Montaigne and Shakespeare. Preference given to Text and Tradition and IPH students. Same as IPH 201C
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L14 E Lit 205C Literary Modernities: Text and Tradition
Through a wide sampling of Western literary works, the course explores themes and tones characteristic of the rise of modern consciousness from the Renaissance forward: we trace debates on aesthetics, the transformation of autobiography, writers’ persistent distrust of books, and their relentless assaults on perversions of cultural idealism. Books by such authors as Cervantes, Diderot, Rousseau, Goethe, Balzac, Dostoevsky, Twain, Freud, Kafka and Beckett. Preference given to Text and Tradition and IPH students. Same as IPH 205C
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L14 E Lit 209 World Literature
This course teaches ways of reading literature across eastern and western cultures, introducing students to works of great imaginative power from many different regions of the world. The course focuses on a given historical period, such as the modern period or antiquity (the latter including Near Eastern as well as European texts). Organizing themes may include cultural translation, cross-cultural encounter (e.g., orientalism), hybridity, and displacement. Same as Comp Lit 211
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H FA: Lit

L14 E Lit 214C Introduction to Women’s Texts
Discussion of canonical and non-traditional texts, most by women. Emphasis on how these texts represent gender, how literature contributes to identity formation, and how women have used the written word to change their social and imaginative conditions. Same as WGSS 214C
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD BU: HUM FA: Lit

L14 E Lit 2151 Literature in English: Early Texts and Contexts
This course provides beginning students of English with a chronological outline of early literature in English from the middle ages to the late 18th century. It introduces them to the central themes, genres and forces that have shaped the early history of literature as well as the tools, vocabularies and critical practices of literary studies. We organize our semester around four themes: inventing a nation; the sacred and the secular; centers and margins; private and public. We study, among others, four of the following key texts and authors: Sir Gawain and the Green Knight, Chaucer, Shakespeare, Milton and one of Defoe’s novels.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L14 E Lit 2152 Literature in English: Modern Texts and Contexts
This course provides beginning students of English with a chronological outline of modern literature in English from Romanticism to the present. It introduces them to the central themes, genres and forces that have shaped the modern history of literature as well as the tools, vocabularies and critical practices of literary studies. We organize our semester around five themes: literary revolutions; questions of genre; subjectivity and authorship; gender, sexuality and identity; modernism. We study texts from Britain/Ireland, the United States and at least one example of global literature in English.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L14 E Lit 228 Theater Culture Studies I
Required of the drama major. An examination of ancient, medieval, and Renaissance theater and performance. Close reading of dramatic texts written by such authors as Aeschylus, Sophocles, Euripides, Aristophanes, Plautus, Marlowe, Shakespeare and Jonson, with attention also given to the collaborative theaters of the medieval period (the Corpus Christi
play) and the Italian Renaissance. In tandem with the close study of dramatic literature, we study theater history (playing spaces, costumes, actors, etc.) and performance (ritual, performances of everyday life, etc.) from antiquity to the Renaissance.

Same as Drama 228C
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM

L14 E Lit 229C Theater Culture Studies II
The second course in an interdisciplinary, three-semester sequence that examines Western and non-Western dramatic literature and theater history from its known origins to the present. This course proceeds historically, from the Baroque period to the 19th century, but is also organized according to four themes: (1) “Theater of the World” (the idea that human existence is intrinsically theatrical). In this section we read Shakespeare’s *The Tempest*, Calderón’s *Life is a Dream*, Corneille’s *The Comic Illusion* and an extract of one Chinese play from the Ming period. (2) Comedy. In this part of the course, we study the European comic tradition from the commedia dell’arte to Molière to Beaumarchais. (3) Tragedy. Here, we contrast Racine’s neo-classical tragedy to the new bourgeois tragedy emerging in the 18th century, and then examine German Romantic tragedy (Schiller, Hegel). (4) The Public Sphere. This section includes play texts such as John Gay’s *The Beggar’s Opera* but concentrates somewhat more on the establishment of theater in the 18th century as a central institution in the European “public sphere.” The fourth unit (and the course) ends with a delightful and probing Russian comedy: Gogol’s *The Inspector General*, studied in the context of the emerging Russian stage and its relationship to public life. In addition to reading, discussion and writing, the course includes some simple theater exercises and staging, drawing from the practical interests of those taking the course (acting, directing, design-tech, research).

Same as Drama 229C

L14 E Lit 257 The Art of Poetry
An introduction to the critical vocabulary necessary for the study and evaluation of poetry; provides a basic understanding of prosody, poetic forms and figurative language, and the historical periods in which poetry has been written.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H

L14 E Lit 258 Art of the Novel
In this course we read novels drawn from several literary traditions and a number of distinctive narrative modes. Among the questions we consider are those addressing the nature of narrative form, and the literary and stylistic choices made in order to express such things as character and consciousness, society and history, and the relation between the fictive and the real. There are two papers and several short writing assignments.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L14 E Lit 302W Writing Modern War
The 20th century, as Graham Greene observed, was a century “in which there would never be a peace.” This writing-intensive course examines the ways in which modern writers have tried to describe warfare and its impact on both combatants and those on the homefront.
Credit 3 units. A&S: TH, WI

L14 E Lit 303W Strangers and Savages, Aliens and Outcasts
This writing-intensive course focuses on a literary tradition united by its representation of passionate hatred and intolerance.
Credit 3 units. A&S: TH, WI

L14 E Lit 304W Craft of Fiction: Historical Fiction
This writing-intensive course is a literature/creative writing hybrid course in which a number of contemporary historical fictions (meaning, fictions set in periods prior to the authors’ births, and sometimes incorporating real historical events or figures) are covered.
Credit 3 units. A&S: TH, WI

L14 E Lit 3050 Literary Modernities: Text and Tradition
Same as IPH 3050
Credit 3 units.

L14 E Lit 305W Fabricating Lives
The premise of this writing-intensive course is that autobiography is not a straightforward narrative of the past but a conscious shaping of life into a meaningful design.
Credit 3 units. A&S: TH, WI
L14 E Lit 306 Old English Literature: Beowulf
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H

L14 E Lit 307 The Writing of the Indian Subcontinent
The Indian subcontinent has in recent years yielded a number of writers, expatriate or otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed as an introductory survey of such writing, drawing on select subcontinental writers. Covering both fiction and nonfiction by several authors, including R.K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatjie and Romesh Gunesekera, we discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: HUM FA: Lit

L14 E Lit 3071 Caribbean Literature in English
Rum! Fun! Beaches! Sun! This is the image of the Caribbean in America today. This course surveys literature and culture from these islands, looking both at and beyond this tourists’ paradise. It aims to introduce students to the region’s unmistakably vibrant tradition of multicultural mixture, while keeping an eye on the long history of slavery and rebellion out of which the islands’ contemporary situation formed. Along the way we encounter a wide variety of texts, from the earliest writing focused on life in urban slums, to the first novel ever to have a Rastafarian as its hero, to more contemporary considerations of the islanders’ site of entertainment, moral guidance, self-fashioning and representations of consolation and the act of reading, and think about literature itself (along with other art forms) as a contested product of the contemporary Caribbean: reggae music. The course involves readings from multiple genres and covers authors such as C.L.R. James, Derek Walcott, Jean Rhys, V.S. Naipaul, Jamaica Kincaid and Caryl Phillips.
Credit 3 units. A&S: TH, CD A&S: IQ, HUM, LCD EN: H

L14 E Lit 308 Topics in Asian-American Literature: Identity and Self-image
Topics in Asian-American literature that vary from semester to semester.

L14 E Lit 311W Electronic Poetry
The primary focus in this writing-intensive course is to look at every possible kind of electronic poetry we can come up with in order to evaluate it as poetry.
Credit 3 units. A&S: LA

L14 E Lit 312 Topics in English and American Literature
The romance grows out of the epic: how we get from the fall of Troy to the fall of Troilus. Readings from Vergil’s Aeneid to Sir Gawain and the Green Knight.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L14 E Lit 3122 Topics in Literature: Heroes and Lovers
We read Beowulf, Sir Gawain and the Green Knight, Chaucer’s Troilus and Criseyde, The Mabinogion, The Tain, Margery Kempe and Malory’s Morte d’Arthur.
Credit 3 units. A&S: TH BU: HUM FA: Lit

L14 E Lit 312W Topics in English and American Literature:
Literature of Consolation
This course explores the theme of consolation in medieval poetry. We read narratives that represent the consolation of a variety of melancholy figures — philosophers in exile, lovers in mourning, citizens in plague-ridden cities, and women disturbed by misogynous writing. We examine the connection between representations of consolation and the act of reading, and think about literature itself (along with other art forms) as a contested site of entertainment, moral guidance, self-fashioning and redemption. Authors may include Boccaccio, Boethius, Chaucer, Christine de Pizan, Abelard and Heloise, and the Pearl-poet. As a writing-intensive class, we spend time writing and talking.
about writing in the classroom. We read our literary texts as “arguments” about literature in addition to other topics, and we read secondary articles as examples of scholarly writing that we may or may not want to adopt as models.

Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI EN: H

L14 E Lit 313 Topics in English and American Literature
Called the “Age of Revolution,” the Romantic Age of British literature, 1770–1830, witnessed the birth of new lyric forms, the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, oversimply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal *Jerusalem*. It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we consider the historical contexts, and the sometimes competing histories of ideas, that shaped the six major British Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron and John Keats. We follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts assigned also include Mary Shelley’s *Frankenstein* and Byron’s *Don Juan*.

L14 E Lit 3301 Rogues to Riches: Reading Vice and Virtue in American Life Writing
Since England used its Western colonies both as a means to wealth and a place to unload its convicts, stories of success in America have uncomfortably took up space beside tales of crime and roguery. This class examine texts that take up the roles of virtue and hard work, as well those of deceit and shiftlessness in the formation of a certain kind of American personality. Reading novels, autobiographies, slave narratives and rogue biographies in the context of sermons, advice manuals and financial advice books, we investigate how judgments of morality and immorality can quickly become messy. Beginning with Defoe’s *Moll Flanders*, the story of an irredeemable female convict who makes it big in America, the class proceeds to read works that ostensibly seek to extol either a life of wickedness or a life of virtue, while invariably presenting a hodgepodge of both. Other readings might include Equiano’s *Interesting Narrative*, Franklin’s *Autobiography*, *The Memoirs of Stephen Burroughs* (an account of 18th-century America’s most famous forger), *The Narrative of Frederick Douglass*, *The Life and Times of P.T. Barnum*, Twain’s *Huckleberry Finn*, Alger’s *Ragged Dick* and *A Cool Million*, Nathaniel West’s savage and obscure parody of the archetypal American success story.
Same as AMCS 330

L14 E Lit 3391 Topics in 19th- and 20th-Century American Writing: American Short Fiction
This course is directed toward a broad range of majors and nonmajors with a serious but not scholarly interest in American Short Fiction.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H

L14 E Lit 340 Topics in 20th-Century American Writing
An introduction to major American works and writers from the later 19th century through the mid-20th century. Writers studied include Twain, James, Crane, Fitzgerald, Hemingway, Faulkner, Frost, Eliot and Stevens. The course assumes no previous acquaintance with the material and is directed toward a broad range of majors and nonmajors with a serious but not scholarly interest in the subject. Students with little or no background in literature might be advised to take E Lit 213C Chief American Writers, while English majors looking to do advanced work should consider the 400-level American literature sequence. Students who have taken E Lit 213C should not enroll in this course.
Credit 3 units.

L14 E Lit 340C Introduction to Digital Humanities: Cultural Analysis in the Information Age
It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course enables students to consider how these technologies might transform the humanities. We explore the various ways in which ideas and data in the humanities can be represented, analyzed and communicated. We also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork are supplemented by small assigned digital projects culminating in a project chosen by the students themselves.
Same as IPH 340
Credit 3 units.

L14 E Lit 340W The American Novel: Split and Hybrid American Identities
Examination of the struggle to form an enabling identity for author, characters and text against the divisive pressures of family and society.
Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI BU: BA, HUM EN: H

L14 E Lit 342W The Romance: Medieval to Modern
Credit 3 units.

L14 E Lit 343 Two Cultures: Literature and Science

L14 E Lit 344W Writing About Performance
In this writing-intensive course, students develop critical strategies for writing about theater and other performance events, in the present and in a range of historical periods.
Credit 3 units. A&S: TH, WI BU: HUM

L14 E Lit 3451 Topics in American Literature: Sexual Politics in Film Noir and Hardboiled Literature
Emerging in American films most forcefully during the 1940s, film noir is a cycle of films associated with a distinctive visual style and a cynical worldview. In this course, we explore the sexual politics of film noir as a distinctive vision of American sexual relations every bit as identifiable as the form’s stylized lighting and circuitous storytelling. We explore how and why sexual paranoia and perversion seem to animate this genre and why
these movies continue to influence “neo-noir” filmmaking into the 21st century, even as film noir’s representation of gender and sexuality is inseparable from its literary antecedents, most notably, the so-called “hard-boiled” school of writing. We read examples from this literature by Dashiell Hammett, James Cain, Raymond Chandler and Cornell Woolrich, and discuss these novels and short stories in the context of other artistic and cultural influences on gendered power relations and film noir. We also explore the relationship of these films to censorship and to changing post-World War II cultural values. Films screened in complete prints or in excerpts include many of the following: The Maltese Falcon, Double Indemnity, Murder My Sweet, Phantom Lady, Strangers on a Train, The Big Sleep, The Killers, Mildred Pierce, The High Wall, Sudden Fear, The Big Combo, Laura, The Glass Key, The Big Heat, Kiss Me Deadly, The Crimson Kimono, Touch of Evil, Alphaville, Chinatown, Taxi Driver, Devil in a Blue Dress, The Bad Lieutenant and Memento. Required screenings.

L14 E Lit 3520 Introduction to Postcolonial Literature and Theory
At its zenith, the British Empire encompassed almost a quarter of the globe, allowing the diminutive island nation unprecedented economic, military and political influence upon the rest of the world. This course introduces some of the foundational responses to this dominance, both literary and theoretical, by the colonized and their descendants. We examine important critiques of colonialism by theorists such as Frantz Fanon, Aimé Césaire, Edward Said, Homi Bhabha and Gayatri Spivak, as well as literary works that reflect a postcolonial critique by authors such as V.S. Naipaul, George Lamming, Doris Lessing and N’gugi wa Thiong’o. The course interrogates how literature could be said to help consolidate Empire as well as ways in which it might function as rebellion against imperial power, with a view toward teasing out the problematics of race, gender, language, nationalism and identity that postcolonial texts so urgently confront.

Credit 3 units. A&S: LA

L14 E Lit 3552 Introduction to Literary Theory
This course introduces students to some of the most influential theoretical approaches to interpretation in Western culture, to the conceptual and historical debates about theory, and to the keywords used in these debates. Students learn how to write and speak about theoretical texts and how to recognize the theoretical assumptions that underlie acts of interpretation. Theoretical approaches featured may include: formalism; Marxism; psychoanalysis; gender and sexuality studies; structuralism and post-structuralism; postcolonial studies; critical race studies; new historicism and cultural materialism; cultural studies. This course fulfills the literary theory requirement for the major; no substitutions are permitted. In order to preserve necessary seats for English majors, the course is enrolled through the wait list.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L14 E Lit 356 The Art of the Novel
This course takes as its starting point traditional models of the novel and then examines a variety of novels from different
traditions — American, British, continental — which, in differing ways, play against this type, bending, challenging or ignoring “the rules.” We are interested in attempting to understand the logic of such idiosyncratic forms, both why each writer is attempting to defy or undo our understanding of a normative “reality” and of the usual novelistic proprieties and how each novel provides its own manner of coherence.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L14 E Lit 3571 20th-Century Poetry
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H

L14 E Lit 358 Studies in Short Fiction
Study of the work of four novelists who also were fascinated by shorter forms throughout their careers: D.H. Lawrence, Joseph Conrad, Henry James and William Faulkner. The course is concerned with the variety of forms their work takes as it is shaped by the very individual visions of each.
Credit 3 units. A&S: TH BU: HUM FA: Lit

L14 E Lit 3581 Historical and Comparative Linguistics
Historical linguistics focuses on how languages change over time. Comparative linguistics focuses on their similarities and differences. In this course we trace some of the differences and changes in sound (phonetics and phonology), word formation (morphology), sentence structure (syntax), and meaning (semantics). Topics include linguistic universals, the structural and genetic classification of languages, the techniques of reconstructing proto-languages, and the causes of language change. Examples from Indo-European languages (for example, Greek, English, and Spanish) and from Native American languages (for example, Quechua and Mayan) are emphasized.
Prerequisite: Ling 170D.

Credit 3 units. A&S: LA A&S: IQ, SSC EN: S FA: Lit

L14 E Lit 3582 Black Literature: Race, Class and Writing in the United States and the Caribbean, 1900–1950
Study of the differences in literary tradition arising from the divergent social, racial and educational milieux of the United States and the West Indies.
Credit 3 units. A&S: TH, SD BU: BA, HUM

L14 E Lit 359 19th-Century American Women Writers
In 1855, Nathaniel Hawthorne wrote to his publisher, William Tichnor, that “America is now wholly given over to a damned mob of scribbling women and I should have no chance of success while the public taste is occupied with their trash.” In this class, we examine works of those scribbling women of the 19th century. We read one of the best-selling novels of the century, one that created a scandal and ruined the author’s literary reputation, along with others that have garnerered more attention in our time than their own. In addition to focusing on these women writers, we also explore questions about the canon and American literature: What makes literature “good”? What constitutes American literature? How does an author get in the canon and stay there? Finally, in this writing intensive course, there are frequent writing assignments and a strong emphasis on the essential writing process of drafting and revising.

L14 E Lit 360 The Writings of Philip Roth
Fiction by Philip Roth in chronological order from his earliest to his last major effort.
Credit 3 units. A&S: TH

L14 E Lit 3601 The Traffic in Women and Contemporary European Cinema
What binds society together? One of the most influential answers to this question was offered by French anthropologist Claude Lévi-Strauss. He argued that the fabric of a society is formed by a network of exchanges among kinship groups, which circulate three kinds of objects: economic goods, linguistic signs and women. In this course, we inquire into the place of women in this argument. We trace rudiments of the traditional marriage system (a father figure still “gives away” the bride in the marriage ceremony), its range of displacements in a global economy (transnational wives, nannies and domestic servants), the role of new media in the formation of new systems of trafficking (internet brides), and the place of the debate on gay marriage within the larger conversation. We read texts by Friedrich Engels, Sigmund Freud, Marcel Mauss, Claude Lévi-Strauss, Gayle Rubin, Luce Irigaray, Judith Butler, Barbara Ehrenreich and Arlie Russell Hochschild; and we watch a number of films that dramatize the traffic in women in the context of contemporary Europe: Coline Serreau’s Chaos, Lukas Moodysson’s Lilja 4-ever, Cristian Mungiu’s Occident, Nilita Vachani’s When Mother Comes Home for Christmas, Fatih Akin’s Head-on, Jean-Pierre and Luc Dardenne’s The Silence of Lorna.

L14 E Lit 362 The 18th Century: A Study of Major Texts
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM EN: H

L14 E Lit 363C Theater Culture Studies III
The third of three historical survey courses in theater and performance studies, this course traces the origins of the modern theater. Beginning with Romanticism’s self-conscious break with the past, we study the rise of bourgeois melodrama with its intensely emotional rendering of character and spectacular visual
effects. We consider how those effects were made possible by advances in industrial stage technology which reproduced the everyday world with unprecedented realism, and how playwrights responded to those technologies by calling for the theater to become either a “total work of art” that plunged its spectators into a mythical realm, or a petri dish that analytically presented the struggles of the modern individual within his or her modern milieu. Exploring a range of aesthetic modes (including melodrama, Realism, Naturalism, Aestheticism, Symbolism, Expressionism, the Epic theater, and the Theater of the Absurd), we read classic plays by modern playwrights such as Ibsen, Chekhov, Shaw, Pirandello, Brecht and Beckett to consider how the modern theater helped its audiences understand as well as adapt to the rapidly changing conditions of modernity.

L14 E Lit 367 Religious Themes in Contemporary Literature
The use by selected 20th-century writers of religious themes and symbols. Close analysis of the literary techniques by which religious concepts and images are developed and differing insights of writers representing a broad spectrum of contemporary attitudes toward religious issues.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: ETH FA: Lit

L14 E Lit 3676 Rhetoric: Ancient and Modern
Rhetoric, or the art of persuasion, has played a prominent and controversial role in political and educational theory and practice. We survey rhetorical texts, ranging from Plato and Aristotle through Augustine and Edmund Burke, to Kenneth Burke and Jürgen Habermas. Same as Classics 3676
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L14 E Lit 368 The Development of American Romantic Thought: Enlightenment Confidence to Postmodern Questioning
We examine the revolutionary shift in human sensibility commonly known as “Romanticism” by tracing its development in America from the “ Fireside Poets” (Bryant, Longfellow) and Transcendentalism (Emerson, Whitman) to anticipations of Modernism and Postmodernism (Henry Adams, Louis Sullivan, Charles Ives). Fulfills the 19th century and American literature requirements for the English major.
Credit 3 units.

L14 E Lit 369 Reading Sex in Premodern England
This course introduces students to the literary representation of gender and sexuality in England from the medieval period to the 18th century. To understand a tradition that addressed the intractable problem of human sexuality in terms very different from ours, we ask: how does premodern culture imagine gendered identities, sexual difference, and erotic desire? How do various contexts — medical, religious, social, private, public — inform the literary representation of gender and sexuality? What are the central figures and themes of the body, the circuits of physical pleasure, and the disciplines of control that characterize human sexuality? Students have the opportunity to study romances, saints’ lives, mystical writings, diaries, plays, sex guides, novels and scientific treatises. By learning how to “read sex” in premodern literature, students acquire a broad cultural and historical understanding of English sexualities before the descent of modern sensibilities.
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD EN: H

L14 E Lit 370 The Age of Victoria
Works of fiction, poetry, journalism, children’s literature, political cartoons, book illustrations, genre paintings and photographs. The course aims to give a sense of the age in all its diversity and peculiarity, as well as to concentrate on a few central issues and developments in 19th-century British society: e.g., industrialism, materialism, feminism, liberalism, the rise of the social sciences. Readings include works by Tennyson, Matthew Arnold, Lewis Carroll, Dickens, George Eliot, John Stuart Mill, Trollope, Oscar Wilde and Edmund Gosse.
Credit 3 units. A&S: TH BU: HUM FA: Lit

L14 E Lit 371 The Age of Chaucer
Study of the ways in which literature and history interplay between 1340 and 1400. Literary texts include writings by Chaucer, Langland, the Pearl Poet and anonymous composers of songs, dream visions, romances, satires, debates and low stories; attempts to move from these to theoretical and over into historical texts, alienating where necessary and translating where possible.
Credit 3 units. A&S: TH BU: HUM FA: Lit

L14 E Lit 372 The Renaissance
Major texts of the European Renaissance examined to set English literary achievement in a continental context. Among authors studied: Petrarch, Castiglione, Erasmus, More, Luther, Wyatt, Rabelais, Montaigne, Shakespeare, Spenser, Jonson, Milton. Prerequisite: 6 units of literature, junior standing or permission of instructor.
L14 E Lit 3725 Topics in Renaissance Literature
Topics course in Renaissance Literature.
Credit 3 units. A&S: TH A&S: IQ, HUM BU: HUM FA: Lit

L14 E Lit 3731 Writing and the Representation of Pain
Writing-intensive course on the representation of pain at every level, from private suffering to public policy. Course reader consists of examples of or extracts from a diversity of materials: the Bible and Ovid, medieval religious lyric, saints’ lives, visions of hell and damnation, descriptions of visionary illness; Freud’s Anna O, Kafka’s In the Penal Colony, Wilde’s The Nightingale and the Rose, Woolf’s On Being Ill, Artaud and the Theater of Cruelty; autobiographical and other writings by Susan Sontag and Inga Clendinnen; theory by Bataille, Deleuze, Dollimore and Elizabeth Grosz; work on pain by Leder, Morris, Rey and others; poetry by Anne Sexton, Sylvia Plath, Gwen Harwood, Alan Jenkins and others. We also read Elaine Scarry’s The Body in Pain and two recent novels: Andrew Miller’s Ingenious Pain and Manil Suri’s The Death of Vishnu.
Credit 3 units. A&S: TH, WI A&S: IQ, HUM, WI EN: H

L14 E Lit 374W Epistolary Literature in the 18th Century: Other Peoples’ Letters
In this writing-intensive course, we examine the attraction the letter held for authors and readers alike, taking into consideration the advantages and the disadvantages of the form, its role in the development of the early novel, and current theories of epistolary writing.

L14 E Lit 3752 Modern British Novel
Credit variable, maximum 6 units.

L14 E Lit 375A American Culture Studies: Methods and Visions
What does it mean to study American culture? How should we go about doing this work? In this methods seminar, students explore different approaches to American culture, focusing on a specific topic and a corresponding set of cultural objects especially suited to multidisciplinary investigation. (The particular topic, and associated cultural objects, may vary from semester to semester, and are specified by the instructor in advance; see Course Listings for further details.) Drawing upon their training in different fields, students engage with the many questions, materials and strategies of cultural study, and find new perspectives on work in their “home” discipline. Much of this work focuses on primary sources and ways of interpreting them. The course is shaped by discussions about research methodologies and preparatory work for a final project (which, if appropriate, may become part of an AMCS web-project).
As a Writing Intensive course, AMCS 375A also serves as an occasion for students to think about matters of argument and presentation, and to develop ideas and models for future research. This course is intended for students at the junior-level or higher. Preference given to AMCS majors and minors. Same as AMCS 375A

L14 E Lit 381 Banned Books
Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago a Russian student was exiled to Siberia for possessing a copy of Emerson’s Essays; today, school boards in the United States regularly call for the removal of Huckleberry Finn and The Catcher in the Rye from classrooms and library shelves. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. The course explores these issues by looking closely at several American and translated European texts that have been challenged on moral, sociopolitical, or religious grounds to determine what some readers have found so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments.

L14 E Lit 3841 Gender and Consumer Culture in U.S. Fiction of the Late 19th and Early 20th Century
The decades between the end of the Civil War and the 1930s saw the rise of a mass consumer culture that would dramatically reshape America. The fiction writers of this period, keen to capture the spirit of the age, helped to create the enduring idea that consumerism and an orientation toward material acquisition are at the heart of gendered concepts of American identity. Their stories documented, and sometimes celebrated, the emergence of recognizable “types” of American womanhood and manhood — such as self-made millionaires, ambitious “working girls,” bargain-hunting middle-class housewives, and the commercially minded women and men of the social and intellectual elite. At the same time, their stories articulated anxieties about U.S. consumer culture and its impact on the world. Students in this course read, discuss and write about novels and short stories by writers such as Henry James, Mary Wilkins Freeman, Kate Chopin, Theodore Dreiser, Edith Wharton, Nella Larsen, Langston Hughes, and F. Scott Fitzgerald. Students in the course also examine primary materials such as magazine advertisements, and read and respond to relevant scholarship on the period. Writing Intensive course.

L14 E Lit 387 African-American Literature: Early Writers to the Harlem Renaissance
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD

L14 E Lit 388 African-American Literature: African-American Writers Since the Harlem Renaissance
African-American literature in the 20th and 21st centuries grows from a Harlem Renaissance into a world-shaping institution. Guggenheim, Pulitzer and Nobel prize winners; card-carrying Communists; rock-ribbed Republicans and Black Power nationalists; Broadway playwrights; Book-of-the-Month Club novelists; and even a U.S. president are among the many whose fictions and memoirs we study with special attention to the intimate links between black writing and black music. The syllabus thus features authors ranging from poet Alice Dunbar Nelson (born 1875) to satirist Colson Whitehead (born 1969), with more than a dozen stops in between. Written assignments may include two papers and two exams. Prerequisite: none, but related classes such as E Lit 215 and/or AFAS 208 are suggested. Satisfies the American literature requirement in English, and/or one 300-level elective requirement in AFAS.
Credit 3 units. A&S: TH, SD A&S: IQ, HUM, SD

L14 E Lit 3881 Black Women Writers
In this class we explore the range of writing by African-American women over an approximately 200-year span. Many of the texts we explore are novels, although we read autobiographies, poetry and essays, too. Authors studied might include Phillis Wheatley, Pauline Hopkins, Marita Bonner, Gayl Jones, Lynn Nottage and others.

L14 E Lit 399 Senior Research Seminar
This course is tailored to the needs of students who are pursuing honors in English in their senior year. It develops students’ ability to gauge how different approaches affect the research and the outcome of a project in literary studies. It guides them in their research by analyzing and discussing research design, the construction of an archive, and the assessment and use of sources. Assignments include annotated bibliographies, summaries of the critical debate on student topics, abstract writing, research presentations, as well as drafts and final versions of chapters or essays. We workshop many of these assignments in the classroom and practice peer review. The seminar stretches over two semesters, ending before spring break, when Honors work is due in the college. It is required for students who pursue honors by course work and by thesis. Credit 3 units.

L14 E Lit 3991 Senior Research Seminar I

L14 E Lit 4003 Blacks in Fiction
Credit 3 units. A&S: TH FA: Lit

L14 E Lit 402 Introduction to Graduate Studies I: Research
Introduction to academic scholarship and related professional activities. A workshop in developing topics, conducting research, preparing and presenting conference papers, articles and grant proposals. Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L14 E Lit 403 Black and White in American Drama
This course addresses the complex issue of race in America through the 19th and 20th centuries as dramatized by American playwrights, black and white. Authors include Countee Cullen, Lillian Hellman, Eugene O’Neill, Jean Toomer, Langston Hughes and Arthur Miller. Prerequisites: junior standing, two 300-level courses or better. Credit 3 units. A&S: TH FA: Lit

L14 E Lit 404 Topics for Writers: Beckett
Waiting for Godot, Happy Days, Krapp’s Last Tape: these are but three of Samuel Beckett’s revolutionary texts for theater. The complete canon of plays is examined for structure and compositional elements. Students undertake exercises in dramatic composition and perform a chamber presentation of Endgame. Course is intended for writers with some experience of the dramatic form. Intending students must interview with instructor in November. Credit 3 units. A&S: LA FA: Lit

L14 E Lit 405 Living Influences: Poets and the Poets Who’ve Shaped Them
This course examines a number of very contemporary collections of poetry (e.g., from first-book writers such as Karen Volkman and Greg Williamson, to more established writers such as Carl Phillips and Frank Bidart) to discover how generations of writers speak to and through one another. The course considers the nature and possible anxieties of writerly influence and how traditional and/or canonical writers’ voices, verse, and vision have shaped a number of poets writing today. This class requires at least a basic knowledge of poetry in English up to the 1950s as we move freely among writers such as Ben Jonson, George Herbert, Gerard Manly Hopkins and Emily Dickinson, as well as Pound, Eliot, Lowell and Plath. Credit 3 units. A&S: TH FA: Lit

L14 E Lit 407 Old English, Introductory
Study of the Anglo-Saxon language and introduction to major prose and short poetry of the period. Prerequisites: junior standing and 6 units of literature. Credit 3 units. A&S: LA FA: Lit

<td>L14 E Lit 4204</td>
<td>Film Theory</td>
<td>This course is an introduction to both classical and contemporary film theory. Beginning with the earliest attempts to treat cinema as a new and unique art form, the course initially reviews the various ways in which film theory attempted to define cinema in terms of its most essential properties. The course then examines more contemporary developments within film theory, more specifically its attempt to incorporate the insights of other critical and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory and postmodernism. Throughout the course, we consider questions regarding the ontology of cinema, its relation to spectators, and the various ways in which its formal properties create meaning. Readings for the course include the major works of Sergei Eisenstein, Andre Bazin, Christian Metz, Laura Mulvey and Fredric Jameson. Required screenings. Same as Film 420</td>

<td>Topics in American Literature II: Modernisms in America</td>
<td>This course offers an advanced introduction to both the literature and the concept of modernism, the “ism” used to mark the experimental verve of early 20th-century writing and to grasp its ties to modernity or the modern social world. As the course title suggests, we devote most of our time to the career of modernism in the United States, a place imagined as both the modernist nation par excellence and the desert modernism escaped to be born. Three groups of primary texts — early modernist experiments, 1920s modernist landmarks and Great Depression revisions — illuminate the grand ambitions of eccentric literary forms and sequestered avant-garde</td>

**L14 E Lit 4245 Early American Literature: American Modernisms**
This seminar offers an advanced introduction to both the literature and the concept of modernism, the “ism” used to mark the experimental verve of early 20th-century writing and to grasp its ties to modernity, or the modern social world. As the course title suggests, we devote most of our time to the career of modernism in the United States, a place imagined as both the modernist nation par excellence and the desert modernism escaped to be born. Three groups of primary texts — early modernist experiments, 1920s modernist landmarks, and Great Depression revisions — illuminate the grand ambitions of eccentric literary forms and self-sequestered avant-garde movements; the public disputes and buried alliances between “high” expatriate and Harlem Renaissance modernisms; and the influential Depression-era reinterpretation of modernism as reactionary self-indulgence. The syllabus features fiction, poetry and drama by old and new literary celebrities: Djuna Barnes, John Dos Passos, T.S. Eliot, F. Scott Fitzgerald, Mike Gold, Ernest Hemingway, Ella Larsen, Meridel LeSueur, Claude McKay, Clifford Odets, Tillie Olsen, Ezra Pound, Jean Toomer and Richard Wright. A shorter list of critical essays highlights modernism’s tendency to theorize itself while introducing 21st-century perspectives from the “New Modernist Studies.” Satisfies the American literature requirement. For undergraduates, junior or senior standing is required.

To what extent can computational techniques that draw on statistical patterns and quantification assist us in literary analysis? Over the semester, we juxtapose the close reading of historical documents or literary works with the “distant reading” of a large corpus of historical data or literary texts. We ask how the typically “human” scale of reading that lets us respond to literary texts can be captured on the “inhuman” and massive scales at which computers can count, quantify and categorize texts. While this class introduces students to basic statistical and computational techniques, no prior experience with technology is required. Prerequisites: two 200-level or one 300-level course in literature or history. This is a topics-type course and the specific documents and works examined vary from semester to semester. Please see semester course listings for current offerings.

L14 E Lit 426C Imagining the City: Crime and Commerce in Early Modern London

The astonishing demographic and economic growth of early modern London, and the rapid increase in spatial and social mobility that accompanied this growth, seemed to harbinger, in the eyes of many contemporaries, a society in crisis and perhaps on the brink of collapse. As increasing numbers of vagrants or masterless men flocked to the metropolis and a growing number of people — apprentices, domestic labor, street vendors, etc. — lived on the fringes of legitimacy and at risk of lapsing into vagrancy, policing early modern London provided unique challenges for authorities. At the same time, the very notion of the social — a shared space of kinship and community — could often seem to be under threat as an emerging market and a burgeoning commodity culture reshaped the traditional underpinnings of social and economic transactions. Yet, late Tudor and early Stuart London remained by far England’s most prosperous metropolis — its primary market, home to a burgeoning print culture and nourishing theater — and emerged, eventually, as the epicenter of a global economy.

This course considers the topographic, social and institutional configuration of early modern London and the ways in which these were reimagined and negotiated in the literature of the period. Drawing on the drama of the period and a wide array of pamphlet literature, we discuss how civic institutions handled the growing influx of the poor and adapted to the increasing power of an emerging bourgeoisie who asserted themselves in unprecedented ways. In addition, we consider secondary sources ranging from maps, theories of urban space and social and economic historiography as well as digital archives and computational techniques that allow us to “scale up” our thinking about early modern London to a vast corpus of texts and documents.

Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L14 E Lit 427 American Literature: The Rise of Realism to World War I

The maturing of American literature from the regional origins of realistic fiction just prior to the Civil War through the early naturalist novel and the beginnings of modern American poetry. Credit 3 units. A&S: TH FA: Lit

L14 E Lit 428 Modernism and Postmodernism

Readings in early sources of 20th-century developments, followed by a selective survey of literary discourse from the 1920s through the 1990s in the United States. Prerequisites: junior standing and 6 units of literature or graduate standing. Credit 3 units. A&S: TH FA: Lit

L14 E Lit 4282 English Modernist Fiction

The first half of the 20th century produced some of English fiction’s greatest individual achievements, linked by writers’ attempts to represent, through narrative experiments, a world in which many certainties about self and society were dissolving. Attentive reading of 10 novels or short story collections; study of the historical and cultural contexts to which these writers were responding. Among writers considered: E.M. Forster, Virginia Woolf, D.H. Lawrence, Rebecca West, Joseph Conrad, Katherine Mansfield and Ford Madox Ford.

L14 E Lit 431 English Drama, Exclusive of Shakespeare, to 1642

Studies of selected major plays against a background of change and tradition in English drama from its beginnings to the closing of the theaters.

Credit 3 units. A&S: TH FA: Lit

L14 E Lit 4312 Early Drama

This unit is concerned with English and European drama and spectacle from late Roman theater onward: primarily in England, but with comparative material from France and Italy. The chronological span of the course ends at about 1600; the working assumption is that there is no clean break between “medieval” and “Renaissance” drama, but that the theaters and scripts of the late 16th century should be understood as developing out of, as well as departing from, earlier theatrical traditions and practices.

Credit 3 units. A&S: TH FA: Lit

L14 E Lit 432 Topics in Renaissance Drama

A study of Elizabethan and Jacobean theatrical culture — the plays, players, playwrights and audiences of public theaters, private theaters and banqueting halls. Study includes the plays of Lyly, Kyd, Marlowe, Jonson, Chapman, Ford, Beaumont, Fletcher, Marston, Middleton, Webster and Shakespeare.

Credit 3 units. A&S: TH FA: Lit

L14 E Lit 4323 Reading in the Renaissance: Texts and Practices

Examination of reading practices among original audiences for Wyatt, Sidney, Shakespeare, Donne, Jonson, Herrick, Marvell, Rochester and Dryden and application to our understanding and experience of early modern texts.

Credit 3 units.

<td>Craft of Fiction: Dialogue</td>
<td>3 units</td>
<td></td>
</tr>
<tr>
<td></td>
<td>A literature/creative writing hybrid course, we concentrate on the element of dialogue in fiction. We focus on 20th-century novels and stories that use dialogue in radical ways or place conversational dynamics at the center of their projects, probably including works by Don DeLillo, Henry Green, Grace Paley and Philip Roth. We consider the architecture of conversations — the evasions and hidden agendas; the art of the well-made monologue; how speech is shaped by varieties of linguistic capital; and secrets as a narrative device, extending into issues of conspiracy and paranoia. Because this is a craft rather than a traditional literature course, we approach the texts as creative writers (although experience as such is not required), considering what they have to say through a primary emphasis on the means they develop to say it, and we put the craft into practice: assignments include both a critical paper and a short story using radical elements of dialogue. We also make room for some consideration of the dynamics of actual conversations, outside of fiction, through a reading of some conversational analysts and speech-act theorists, and through some real-world experiments. <td>This course examines interactions between texts from the domains of literature and psychoanalysis. We read theory and literature side by side, in order to ask the following questions: Does the relationship between literary text and theory necessarily entail the subjection of literature to analysis, or can one, as Pierre Bayard asks, apply literature to psychoanalysis? What can psychoanalytic readings tell us more broadly about the act of reading? How can psychoanalysis enrich our sense of the ethical import of reading and writing, and how can literature challenge psychoanalytic goals and values? In terms of psychoanalytic authors, we focus on Freud, Lacan, Klein, Winnicott and Bayard. In terms of literature, we range widely from Sophocles to Henry James. Same as IPH 444</td>

Credit 3 units. A&S: TH: FA: Lit

L14 E Lit 4492 The Irish Literary Revival
The class studies major writings by Oscar Wilde, W. B. Yeats, J. M. Synge, James Joyce and Flann O'Brien within the contexts of the language movement, colonialism, cultural nationalism, the socialist movement and the 1913 Lockout, the Easter Rising and the War for Independence, the Civil War, the founding of the Irish Free State, the Partition and the Irish Theocracy. Wilde's notions of the primacy of art with regard to politics and their elaboration by W. I. Thompson and Declan Kiberd are an organizing principle in the course. The class sees two films, offers oral reports and writes papers. Credit 3 units. A&S: TH

L14 E Lit 4495 Interdisciplinary Topics in the Humanities
This course examines the genre of historical fiction in both its "classic" phase and in its recent resurgence in contemporary literature. "Historical fiction" is, on the face of it, a paradox. The study of history requires evidence from primary sources, the evaluation of facts and testimony, and reference to actual persons and events. Fiction, on the other hand, is neither tied to the disciplinary restrictions and subjects of historical research nor to a particular time period. So what does history offer to fiction, and fiction to history? Why do writers and readers keep returning to a form which for most of the 20th century, at least, fell out of favor with the advent of postmodern skepticism about the "real"? The course considers the importance of historical fiction in the development of the genre of the novel and its relation to the modern discovery of history itself. Among the works we read are Penelope Fitzgerald's *The Blue Flower*, Edward P. Jones's *The Known World*, Walter Scott's *Waverley*, and Dickens's *A Tale of Two Cities*. We always bear in mind a practitioner's perspective, and students have the option to respond to the literature in part through researching and writing their own historical fiction. Same as IPH 450 Credit 3 units.

L14 E Lit 450 American Film Genres
By close examination of three or four specific types of film narratives, this course explores how genre has functioned in the Hollywood mode of production. Students gain an understanding of genre both as a critical construct as well as a form created by practical economic concerns, a means of creating extratextual communication between film artist/producers and audience/consumers. Genres for study are chosen from the western, the gangster film, the horror movie, the musical, screwball comedy, science fiction, the family melodrama, the woman's film, and others. In addition to film showings, there are readings in genre theory as well as genre analyses of individual films. Required screenings. Same as Film 450 Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L14 E Lit 4505 Interdisciplinary Topics in the Humanities
This course examines the genre of historical fiction in both its "classic" phase and in its recent resurgence in contemporary literature. “Historical fiction” is, on the face of it, a paradox. The study of history requires evidence from primary sources, the evaluation of facts and testimony, and reference to actual persons and events. Fiction, on the other hand, is neither tied to the disciplinary restrictions and subjects of historical research nor to a particular time period. So what does history offer to fiction, and fiction to history? Why do writers and readers keep returning to a form which for most of the 20th century, at least, fell out of favor with the advent of postmodern skepticism about the “real”? L14 E Lit 483 Selected American Writers I
Concentrated study of one or two major American writers, e.g., Gertrude Stein and Richard Wright; Emily Dickinson. Consult Course Listings each semester for specific authors. Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L14 E Lit 484 Selected American Writers II
Credit 3 units. A&S: TH FA: Lit

L14 E Lit 491 Chaucer
Readings in the Canterbury Tales. Lectures on background; critical analysis.

Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L14 E Lit 493 Spenser
Readings in the Faerie Queene and Shepheardes Calender, with attention to Spenser’s deliberate fashioning of a literary career.

Credit 3 units. A&S: TH FA: Lit

L14 E Lit 494 Milton
Major poems and prose works in relation to literary and intellectual currents of the 17th century.

Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L14 E Lit 495 Seminar: The 19th-Century European Novel
Same as Comp Lit 495

Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L14 E Lit 496 Shakespeare Advanced Course
A study of Shakespeare’s career as a dramatist, with intensive work on particular plays in the light of critical traditions. Prerequisite: E Lit 395C or permission of instructor.

Credit 3 units. A&S: TH A&S: IQ, HUM FA: Lit

L14 E Lit 4968 Digital Methods in Literary Analysis: Shakespeare by the Numbers
This course explores how emerging digital techniques can help us read literary texts in new ways. We read a set of Shakespeare plays closely but also work with a large corpus of plays by Shakespeare and his contemporaries as we cover basic text-mining and visualization techniques and use simple statistical and quantitative approaches to think about questions of genre and style. We ask how the typically “human” scale of reading that lets us respond to these texts can be captures on they massive scales at which computers can count, quantify and categorize. What nuance is lost in this translation between “close” and “distant” readings and what insights are gained?

Credit 3 units. A&S: TH A&S: IQ, HUM EN: H
L14 E Lit 4969 Shakespeare in Production
This course examines Shakespeare’s comedies in performance. Combining scene work and production history, students gain access to the world of the comedies from both a hands-on, theoretical and historical perspective. Prerequisites: Drama 395C or permission of instructor.
Same as Drama 469
Credit 3 units. A&S: LA A&S: IQ, HUM EN: H

L14 E Lit 4976 Advanced Seminar in Literature
Same as History 4976
Credit 4 units. A&S: TH A&S: IQ, HUM EN: H

L14 E Lit 498 The Spenser Lab
This course involves graduate and undergraduate students in the ongoing work of the Spenser Project, an interinstitutional effort to produce a traditional print edition of the Complete Works of Edmund Spenser.
Credit 3 units. A&S: TH A&S: IQ, HUM EN: H

L14 E Lit 498W The Spenser Lab
In this writing-intensive course, the students are given a variety of writing tasks: writing commentaries, introductions, software manuals, grant proposals, software requirements and design documents (SRDDs).
Credit 4 units. A&S: TH, WI A&S: IQ, HUM, WI EN: H

Environmental Studies
Students interested in studying the environment can choose among three majors in the following academic departments: Biology, Earth and Planetary Sciences, and Political Science. The curriculum for these majors is integrated and interdisciplinary and draws from many disciplines across Arts & Sciences and the university as a whole. In this way the majors capture the strengths of both the traditional academic departments and the interdisciplinary innovation necessary to explore fully the multiple issues and questions posed in the study of the environment.

Please visit the following pages for more information on these majors:
- Environmental Biology (p. 271)
- Environmental Earth Sciences (p. 349)
- Environmental Policy (p. 743)

Phone: 314/935-7047

The Major in Environmental Studies

Students interested in studying the environment can choose among three majors in the following academic departments: Biology, Earth and Planetary Sciences, and Political Science.

Please visit the following pages for more information on these majors:
- Environmental Biology (p. 271)
- Environmental Earth Sciences (p. 349)
- Environmental Policy (p. 743)

The Minor in Environmental Studies

Required Units: 19

Required Courses:
- EPSc 201 Earth and the Environment 4
- Biol 2950 Introduction to Environmental Biology 3
- Pol Sci 2010 Introduction to Environmental Policy 3

Elective Courses: 9 units — one course from each of the three categories below

One advanced science course:
- EPSc 323 Biogeochemistry 3
- Biol 372 Behavioral Ecology 4
- EnSt 375 Urban Ecology 3
- Biol 381 Introduction to Ecology 3
- EPSc 401 Earth Systems Science 3
- EPSc 413 Introduction to Soil Science 3

One advanced political science or law course:
- Pol Sci 3240 The Political Economy of Public Goods 3
- Pol Sci 331 Topics in Politics 3
- Pol Sci 332B Environmental and Energy Issues 3
- Pol Sci 3752 Topics in American Politics: Globalization, Urbanization and Environment 3
- Pol Sci 4043 Public Policy Analysis, Assessment and Practical Wisdom 3
- EnSt 539 Interdisciplinary Environmental Clinic 3

One advanced anthropology or ethics course:
- Anthro 3053 Nomadic Strategies and Extreme Ecologies 3
- Anthro 3379 Meltdown: The Archaeology of Climate Change 3
- Anthro 4215 Anthropology of Food 3

Courses that are offered less frequently or have more prerequisites but that are preapproved substitutions for these requirement categories include:

Advanced science:
- Biol 4170 Population Ecology 3
- EPSc 408 Earth's Atmosphere and Global Climate 3
- EPSc 429 Environmental Hydrogeology 3
- EPSc 444 Environmental Geochemistry 3
- EPSc 484 Paleoenvironmental Reconstruction 3

Advanced political science or law:
- Econ 451 Environmental Policy 3

Advanced anthropology or ethics:
- Anthro 3612 Population and Society 3
- Anthro 379 Meltdown: The Archaeology of Climate Change 3
- Anthro 4215 Anthropology of Food 3

L82 EnSt 109A Quantitative Reasoning in Environmental Science

Introduction to practical mathematical methods for understanding environmental aspects of our planet, particularly how the environment changes with time through human interactions. Emphasis on intuitive approaches in devising simple relationships for understanding quantitative outcomes of natural processes. Introduction to basic statistical methods, including hypothesis testing, and how statistics can be applied to environmental problems.

Same as EPSc 109A

Credit 3 units. A&S: NS, QA A&S: IQ, NSM, AN BU: SCI FA: NSM

L82 EnSt 122 Freshman Seminar — A Sense of Place: Discovering the Environment of St. Louis

This seminar is designed to serve as an introductory science seminar course for freshman. The goals of the course include: Providing students with an introduction to the environmental setting of St. Louis; introducing students to topics of interest in the local environment; providing students with opportunities to identify and critically analyze environmental issues from a local perspective; and aiding students in their major selection by introducing them to a wide degree of scientific and environmental disciplines and perspectives.

Credit 3 units. A&S: NS A&S: IQ, NSM
L82 EnSt 124 Hokule’a: National Environmental Issues
This course guides students through the preparation of a poster, presentation and research paper after their four-week summer research internship. The goal of the class, which is the third part in a three-part program, is to introduce students to research, writing, presentation and publication of work, under the auspices and guidelines of the Office of Undergraduate Research. Credit 1 unit. A&S: TH A&S: IQ, HUM EN: H

L82 EnSt 201 Earth and the Environment
Introduction to the study of the Earth as a dynamic, evolving planet. Emphasis on how internal and surface processes combine to shape the environment. Themes: Earth’s interior as revealed by seismic waves; Earth history and global tectonics shown by changes to ocean floors, mountain-building, formation of continents, earthquakes and volcanism; climate history and global biogeochemical cycles, influenced by circulation of atmosphere and oceans, ice ages and human activity. Composition and structure of rocks and minerals. Three class hours and one two-hour lab a week. Same as EPSc 201
Credit 4 units. A&S: NS A&S: IQ, NSM BU : SCI FA : NSM

L82 EnSt 210 Undergraduate Teaching Assistant
Credit 3 units.

L82 EnSt 221A Human Use of the Earth
Same as EPSc 221A
Credit 3 units. A&S: NS A&S: IQ, NSM BU : SCI FA : NSM

L82 EnSt 222 Topics in Japanese Literature and Culture: Environmental Consciousness in Modern Japanese Literature
Same as Japan 221
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD EN: H

L82 EnSt 2431 Missouri’s Natural Heritage
Missouri’s Natural Heritage is a multidisciplinary two-semester Freshman Focus course. The first semester of the sequence focuses on Missouri geology, climate, archaeology and native megafauna. This provides a foundation on which to examine the ecology, restoration and management of our diverse habitats (prairie, forest, glade and stream) and the biology of our diverse plant and animal wildlife (arthropods, mollusks, fish, salamanders, lizards, birds and mammals) in the second semester. We also introduce basic concepts in biodiversity and resource management with attention to resolution of conflicts of interest. In addition to weekly lecture and discussion, students in this class visit sites across the state during three weekend camping trips and a longer camping trip during winter break. Attendance on field trips is an essential component of the course and grade. Lab fee of $480 covers transportation and meals for all field trips. Same as Focus 2431
Credit 3 units. A&S: IQ, NSM

L82 EnSt 272A Physics and Society
Introduction to physics: its goals, methods, and relevance for society. Topics include energy as a unifying principle of physics and society’s use of energy: resources and costs. Nuclear energy: history, technology, radiation, waste, weapons. Global climate change: the greenhouse effect, the hole in the ozone layer. Science and government. Bad science, pseudoscience, antiscience. Intended for science and nonscience majors. Must be taken for a letter grade. Same as Physics 171A
Credit 3 units. A&S: NS, QA A&S: IQ, NSM, AN BU : SCI FA : NSM

L82 EnSt 299 Directed Internship
Internship with an environmental organization (commercial, not-for-profit, governmental, etc.) where the primary objective is to obtain professional experience outside of the classroom. Student must have a faculty sponsor and must file a Learning Agreement with the Career Center, the faculty sponsor and the site supervisor. A final written project is agreed upon between the student and faculty sponsor before work begins, and is evaluated by the faculty sponsor at the end of the internship. Detailed supervision of the intern is the responsibility of the site supervisor. Credit variable, maximum 3 units.

L82 EnSt 3053 Nomadic Strategies and Extreme Ecologies
This course explores the archaeology and anthropology of nomadic pastoral societies in light of their ecological, political and cultural strategies and adaptation to extreme environments (deserts, mountains, the arctic). The aim of the course is to understand both the early development of pastoral ways of life, and how nomads have had an essential role in the formation and transfer of culture, language and power from prehistoric time to the current era. Same as Anthro 3053
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA, IS EN: S FA: SSP

L82 EnSt 306B Africa: Peoples and Cultures
An anthropological survey of Africa from the classic ethnographies to contemporary studies of development. Emphasis on the numerous social and economic changes African peoples have experienced from precolonial times to the present. Same as Anthro 306B
Credit 3 units. A&S: SS, CD A&S: IQ, SSC, LCD BU: HUM, IS FA: SSP

**L82 EnSt 323 Biogeochemistry**
Survey of biogeochemical interactions among Earth’s crust, oceans and atmosphere, including perturbations due to human activities. Carbon, nitrogen, phosphorus and sulfur biogeochemical cycles. Greenhouse warming of atmosphere from carbon dioxide and chlorofluorocarbons: effects of inorganic and organic wastes in groundwater systems. Introductory course for students of environmental science and non-science majors. Prerequisite: permission of instructor. Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

**L82 EnSt 332 Environmental and Energy Issues**
This course considers the major issues in these increasingly important areas of public policy. We discuss the importance of political processes and actors on such phenomenon as pollution, global warming and wilderness protection. This course emphasizes the American experience but also considers international implications. Two lectures and one section meeting each week. Same as Pol Sci 332B Credit 3 units. A&S: SS A&S: IQ, SSC BU: ETH EN: S FA: SSP

**L82 EnSt 3322 Brave New Crops**
This course introduces students to the major issues surrounding the development and use in genetically modified (GM) crops. Its focus is international, but with particular focus on the developing world. A variety of experts, available locally or through the internet, contribute perspectives. The course also includes field trips. For further information, see artsci.wustl.edu/~anthro/courses/3322. Same as Anthro 3322 Credit 3 units. A&S: SS A&S: IQ, SSC BU: IS FA: NSM

**L82 EnSt 335F Introduction to Environmental Ethics**
A general survey of current issues in environmental ethics, focusing on problems such as the obligation to future generations, protection of endangered species, animal rights, problems of energy and pollution, wilderness, global justice, and business obligations. Students also learn some ethical and political theory. Same as Phil 235F Credit 3 units. A&S: TH A&S: IQ, HUM BU: ETH FA: SSP

**L82 EnSt 350W Environmental Issues: Writing**
For students interested in environmental issues — natural science, social science and policy. This course aims to provide students with the writing skills they need to be successful in the environmental field once they graduate. In doing so, students examine environmental issues and decision-making processes by examining data and facts underlying positions and decisions. They explore the role of audience, purpose and author angle of vision as they examine the role of multiple stakeholders in environmental issues and processes. Students also are exposed to different types of writing used in environmental studies professions. When the course includes a service learning component, students are exposed to the types of writing that are necessary in environmental careers and in environmental non-profits and governmental agencies in particular. Credit 3 units. A&S: NS, WI A&S: IQ, NSM, WI

**L82 EnSt 361 Culture and Environment**
An introduction to the ecology of human culture, especially how “traditional” cultural ecosystems are organized and how they change with population density. Topics include foragers, extensive and intensive farming, industrial agriculture, the ecology of conflict, and problems in sustainability. Same as Anthro 361 Credit 3 units. A&S: SS A&S: IQ, SSC BU: ETH FA: SSP

**L82 EnSt 372 Behavioral Ecology**
This course examines animal behavior from an evolutionary perspective and explores the relationships between animal behavior, ecology and evolution. Topics include foraging behavior, mating systems, sexual selection, predator-prey relationships, cooperation and altruism, competition and parental care. Prerequisite: Biol 2970 or permission of instructor. Same as Biol 372 Credit 4 units. A&S: NS A&S: IQ, NSM FA: NSM

**L82 EnSt 374 Social Landscapes in Global View**
From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as “landscapes.” This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We cover various urban landscapes, rural landscapes, nomadic landscapes (and others) and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 BCE to 2009 CE and we cover all the continents. This course also traces the intellectual history of the study of landscape as a
social phenomenon and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world and trace the global currents of your social landscape!
Same as Anthro 374
Credit 3 units. A&S: S A&S: IQ, SSC EN: S FA: SSP

L82 EnSt 375 Urban Ecology
Urban Ecology: a field of study within ecology that focuses on the urban environment as an ecosystem and attempts to understand how humans and nature can better coexist in these highly modified environments. The ultimate goal is to aid efforts for more sustainable cities through better urban planning and practices. The class format includes both lectures and discussions.
Credit 3 units. A&S: NS A&S: IQ, NSM

L82 EnSt 379 Feast or Famine: Archaeology and Climate Change
This course examines the temporal, geographical and environmental aspects of past climate changes, and by using specific examples, explores how climate changes may have affected the evolution of human culture and the course of human history. Archaeological and documentary examples from the Americas, Africa, Asia, Europe and the Near East are used to explore if or how significant events in human history have been influenced by changes in climate.
Same as Anthro 379
Credit 3 units. A&S: SS A&S: IQ, SSC EN: S FA: SSP

L82 EnSt 380 Applications in GIS
This introductory course in Geographic Information Systems (GIS) is designed to provide basic knowledge of GIS theory and applications using the existing state-of-the-art GIS software. The course is taught using a combination of lectures, demonstrations and hands-on, interactive tutorials in the classroom. The first week of the course provides a broad view of how students can display and query spatial data and produce map products. The remainder of the course focuses on applying spatial analytical tools to address questions and solve problems. As the semester develops, more tools are added to students' GIS toolbox so that they can complete a final independent project that integrates material learned during the course. Students are encouraged to design individualized final projects using their own or other available data; however, some already-prepared final projects also are available.
Credit 3 units. A&S: NS A&S: IQ, NSM

L82 EnSt 381 Introduction to Ecology
This course explores the science of ecology, including factors that control the distribution and population dynamics of organisms, the structure and function of biological communities, how energy and nutrients flow across ecosystems, and what principles govern ecological responses to global climatic and other environmental changes. The class format includes lectures, discussions and small group exercises. Assignments include quantitative data analysis, ecological modeling and scientific writing.
Same as Biol 381
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L82 EnSt 390 Independent Study
Independent study for undergraduates, supervised by a faculty member. Prerequisite: permission of instructor.
Credit variable, maximum 6 units.

L82 EnSt 391 Directed Research in Environmental Studies
Research activities or project in environmental studies done under the direction of an instructor in the program. Permission of an instructor and the chair of the program is required.
Credit variable, maximum 6 units.

L82 EnSt 392 Directed Fieldwork in Environmental Studies
Fieldwork carried out under the direction or supervision of an instructor in the Program. Permission of an instructor and of the chair of the program is required.
Credit variable, maximum 6 units.

L82 EnSt 393 Practical Skills in Environmental Biology Research
This course provides students with an interest in research in environmental biology and a broad overview of the skills and tools needed for a successful career. Topics covered include: (1) developing ideas/approaches for research projects, (2) experimental design and analyses, (3) using the primary literature effectively, (4) writing successful small grant and fellowship proposals, and (5) writing/reporting results. In addition, students learn other important field biology skills, including controlling global climate of Earth. Quantitative aspects of environmental biology and a broad overview of the skills and tools needed for a successful career. Topics covered include: (1) developing ideas/approaches for research projects, (2) experimental design and analyses, (3) using the primary literature effectively, (4) writing successful small grant and fellowship proposals, and (5) writing/reporting results. Some Saturday and nighttime field trips required. Grading is based primarily on class participation and take-home assignments. Prerequisites/corequisites: permission of Professor Knight and at least one of the following courses: EnSt 370, EnSt 373, Biol 2950, Biol 3501, Biol 372, Biol/EnSt 381, Biol/EnSt 4170, Biol/EnSt 419, Biol 4191, Biol/EnSt 4193.
Credit 2 units. A&S: NS A&S: IQ, NSM

L82 EnSt 408 Earth’s Atmosphere and Global Climate
Structure and dynamics of Earth’s atmosphere. Basic factors controlling global climate of Earth. Quantitative aspects of remote sensing of atmosphere. Remote sensing instrumentation. Prerequisites: Math 233 and Phys 117A (or Phys 197); or permission of instructor.
Same as EPSc 408
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L82 EnSt 413 Introduction to Soil Science
Physical, chemical and biological processes that occur within soil systems. Types of soils and how these relate to soil formation. Major components of soil, including soil water, minerals, organic matter and microorganisms. Soils in wetlands and arid regions. Cycling of nutrients and contaminants in soils. Soil quality, conservation and sustainability. Two one-day field trips required. Prerequisites: EPSc 323 or Chem 112A (or AP Chem score of 4) or permission of instructor.
Same as EPSc 413
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L82 EnSt 419 Community Ecology
Basic principles of community ecology, including species interactions, spatial and temporal patterns of biodiversity, and ecosystem functioning. Analytical theory, statistical patterns, and experimental approaches are emphasized. Intended for students wanting a rigorous overview of ecological principles. Prerequisite: at least one of the following courses: Biol 3501, 372, 381, 4170, 4193, EnSt 370 or permission of instructor. Same as Biol 419
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L82 EnSt 4193 Experimental Ecology Laboratory
Design and interpretation of ecological experiments, with an emphasis on hypothesis testing, sampling methodology, and data analyses. Sessions address fundamental ecological questions and include field, greenhouse, and laboratory (microcosm) studies on a variety of taxa and ecosystems. Generally work is done before dark (5-6 p.m.), although occasionally goes later (7 p.m.). Includes occasional required Saturday field trips to local sites (e.g., forests, wetlands, prairies, streams) for in-depth study. Assignments are primarily written assignments, including final projects and in-class participation. Fulfills the upper-level laboratory requirement for the Biology major. One hour of lecture and 4 hours of laboratory per week. Prerequisites: permission of instructor and at least one of the following: Introduction to Ecology (Biol 381), Behavioral Ecology (Biol 372), Biological Conservation (EnSt 370), Population Ecology (Biol 4170), Community Ecology (Biol 419), or Evolution (Biol 3501). Credit will not be awarded for both 4191 and 4193. Enrollment is limited to 15 students. Same as Biol 4193
Credit 4 units. A&S: SS A&S: IQ, SSC BU: BA, ETH FA: SSP

L82 EnSt 428 Hydrology
Survey of principles that govern the flow of water in river and groundwater systems in deep geologic environments. Basic equations of fluid flow, dynamics and the characteristics of drainage basins, rivers, floods and important aquifers. Exploitation of ground water systems. Prerequisites: EPSc 353, Physics 117A (or Physics 197), Math 233, or permission of instructor.
Same as EPSc 428
Credit 3 units. A&S: NS A&S: IQ, NSM FA: NSM

L82 EnSt 432 Environmental Mineralogy
Same as EPSc 430
Credit 4 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L82 EnSt 444 Environmental Geochemistry
Interaction of water with minerals and organic compounds at the low temperatures of many environmental settings. Emphasis on understanding groundwater compositions and capacity for transporting metals and organic solutes in the subsurface. Speciation, mass transport, surface reactions, contaminant sources and remediation methods. Prerequisite: EPSc 333 or permission of the instructor.
Same as EPSc 444
Credit 3 units. A&S: NS A&S: IQ, NSM BU: SCI FA: NSM

L82 EnSt 451 Environmental Policy
This course examines the relationship between environmental economics and environmental policy. The course focuses on air pollution, water pollution, and hazardous wastes, with some attention given to biodiversity and global climate change. The course examines critically two prescriptions that economics usually endorses: (1) “balancing” of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; (2) use of market incentives (e.g., prices, taxes or charges) or “property rights” instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011.
Same as Econ 451
Credit 3 units. A&S: SS A&S: IQ, SSC BU: BA, ETH FA: SSP

L82 EnSt 4980 Undergraduate Research Seminar
Provides an opportunity for advanced undergraduates to synthesize many of the diverse subdisciplines of Earth and Planetary Sciences while focusing on a research topic. Subject changes each offering. Each subject is unique and timely, but broad enough to encompass wide-ranging interests among students. Students conduct original research, make written reports of the results, and make oral presentations of their projects in class. Prerequisite: senior standing or permission of instructor.
Same as EPSc 498
Credit 3 units. A&S: NS, WI A&S: IQ, NSM, WI FA: NSM
L82 EnSt 499 Senior Honors
Independent work for undergraduate Honors, supervised by a faculty member. Prerequisites: senior standing, eligibility for Honors and permission of instructor. Credit 3 units.

European Studies
The major and minor in European Studies are part of the Program in International and Area Studies.

The European Studies concentration focuses on the New Europe and its historical and cultural contexts, attempting to understand the European contribution to world politics and cultural exchange. It involves study of both traditional and new European cultural products (literature, film, visual art and electronic media) and also of European institutions and contexts. This concentration will educate students interested in understanding Europe for its own sake, but also as the continent connects with other parts of the world. It is committed to interdisciplinary approaches, and students may take courses in the traditional language-and-literature disciplines, as well as in anthropology, art history, economics, history, philosophy and political science. The concentration defines the geography of modern Europe to include the Atlantic world, as well as its Eurasian and Mediterranean neighbors. We offer advanced course work in most major European languages (including French, German, Italian, Russian and Spanish) as well as study abroad opportunities in all these languages.

The Major in European Studies/International and Area Studies

Total units required: 36 graded credits plus four semesters of a European language.

Required courses:

- 3 units of introductory course work  
- 3 units of European history course work (300-level or above from History Department offerings on Europe)  
- 3 units of non-European world area course work (any level)  
- 27 units of advanced course work from a minimum of three academic disciplines (at least one course must focus on gender, race or class, and at least two must be at the 400-level)

A single course may satisfy more than one of these distribution requirements. Some of these requirements may be completed while abroad.

Regulations/requirements:

- Completion of all IAS course work with a grade of C+ or higher; all courses for the major must be taken for a letter grade.  
- Majors must choose their upper-level course work from a minimum of three academic disciplines (for example: Anthropology, Art History, Economics, Film, History, Literature, Music, Philosophy and Political Science).  
- No more than 6 credits may be from a semester of study abroad (9 credits from a year of study abroad, or a semester plus a summer of study abroad) (400-level credits must be earned on campus or in Washington University courses taught abroad).  
- For those who do not study abroad, an additional 3 credits at the 300- or 400-level are required.  
- Students must fulfill the standard IAS language requirement with a European language consistent with their study abroad location.  
- No more than 3 credits may be from directed readings, research or internships excluding the honors thesis.

- The advanced credits must be unique to the IAS major.  
- Students whose prime major is IAS must participate in a capstone experience. The options are an International and Area Studies Portfolio, a Senior Honors Thesis, or the Research and Editorial Methods practicum. For more details, please see the IAS Capstone section on capstone experiences.

Advanced course work (choose nine courses from current European focused course offerings in the following departments. All courses must be approved by the student's IAS adviser in order to count for the major):

- African and African-American Studies
- Anthropology
- Art History
- Economics
- Film and Media Studies
- History
- Interdisciplinary Project in the Humanities

• International and Area Studies
• Languages and Literatures
• Music
• Political Science
• Russian Studies
• Urban Studies
• Women, Gender and Sexuality Studies

Additional Information

Language Requirement for the Major in European Studies/International and Area Studies: All IAS majors and minors must satisfy a foreign language requirement, which entails the successful completion of four semesters of a language appropriate to their concentration while at Washington University. For some students, this may mean the first four semesters of a language; for others who place into advanced language classes this may include literature, culture, oral communications and linguistics courses in the target language, once they complete the basic language sequence. Advanced courses in literature, social sciences and culture used to satisfy this requirement may be counted as advanced credit for IAS majors and minors as long as they are cross-listed with IAS or approved for IAS study-abroad credit and are not applied toward a language major or minor. A maximum of two of these classes may be completed while abroad on a Washington University-approved program in the target language (may be within the same semester abroad). Native speakers of a foreign language must satisfy the four-semester requirement in another language appropriate to their concentration. Heritage speakers must seek appropriate placement by the coordinator of the language program and complete the four-semester requirement.

Study Abroad: Majors are strongly encouraged to study abroad in one of Washington University’s Overseas Programs during junior year or the summer. Some credit for courses taken abroad may be applied to the major. For those who do not study abroad, an additional 3-credit course at the 300- or 400-level is required.

Senior Honors: Students must confidently expect to graduate with an overall GPA of 3.65 or higher. Students must have maintained a 3.65 grade point average through the sixth semester in order to qualify for Senior Honors. Students should enroll in IAS 485 Preparation for IAS Honors Thesis in the fall of senior year (under the corresponding section number of the faculty member overseeing the student’s thesis), and in IAS 486 IAS Senior Honors Thesis in the spring of senior year in order to be properly tracked by the IAS capstone coordinator.

The Minor in European Studies/International and Area Studies

The minor in European Studies is part of the Program in International and Area Studies.

Total units required: 18 graded credits plus four semesters of a European language.

Requirements:
• European History course (3 credits)
• Non-European cultural area (or civilization) course (3 credits)
• At least 12 credits of advanced (300-plus) course work drawn from at least two different disciplines, all focused on Europe since 1750, as determined in consultation with the student’s adviser.

Regulations:
• Completion of all course work with a grade of C+ or higher; all courses for the minor must be taken for a letter grade.
• No more than 3 credits may be from independent study or research.
• No more than 3 credits may be from a semester or summer of study abroad (6 credits from a year of study abroad, or a semester plus a summer).
• All advanced credits must be unique to the European Studies minor (i.e. not counted toward any other major or minor).

Additional Information

Language Requirement for the Minor in European Studies/International and Area Studies: All IAS minors must satisfy a foreign language requirement, which entails the successful completion of four semesters of a language appropriate to their concentration while at Washington University. For some students, this may mean the first four semesters of a language; for others who place into advanced language classes this may include literature, culture, oral communications and linguistics courses in the target language, once they complete the basic language sequence. Advanced courses in literature, social sciences and culture used to satisfy this requirement may be counted as advanced credit for IAS majors and minors as long as they are cross-listed with IAS or approved for IAS study-abroad credit and are not applied toward a language major or minor. Native speakers of a foreign language must satisfy the four-semester requirement in another language appropriate to their concentration. Heritage speakers must seek appropriate placement by the coordinator of the language program and complete the four-semester requirement.

Study Abroad: Majors are strongly encouraged to study abroad in one of Washington University’s Overseas Programs during junior year or the summer. Some credit for courses taken abroad may be applied to the minor.

L79 EuSt 244 Introduction to European Studies
This course provides an introduction to the study of contemporary Europe through an historical examination of the moments of crisis, and their political and cultural aftermath,
that shaped modern Europe and continue to define it today. These crises include: the revolutions of 1848, the advent of 19th-century nationalisms, the Great War, the Spanish Civil War, the rise and defeat of state fascism, the Cold War, the formation of the EEC and Union, May 1968, and the return of right-wing politics. After the study of these traditions, the final portion of the semester considers contemporary Europe since 1991, considering such subjects as Green politics, internal migration and immigration, and the culture of the European Union. **L79 EuSt 3093 Politics of the European Union**

This class is designed to introduce undergraduates at the junior- and senior-level to the history and politics of the European Union (EU) and European integration. In the first part of the class, students learn about the interplay of theory and practice in the history of European integration. In the second part, we study the institutions and decision-making processes with reference to the theoretical concepts developed earlier in the course. From there we examine some of the key EU policies and their implementation in the third part of the course. In the final two sections of the course, we look at constitutional politics, and some of the more recent policies and developments.

**L79 EuSt 313 Topics in English and American Literature**

Called the “Age of Revolution,” the Romantic Age of British literature, 1770-1830, witnessed the birth of new lyric forms, the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, oversimply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal “Jerusalem.” It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we consider the historical contexts, and the sometimes competing histories of ideas, that shaped the major British Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron, and John Keats. We follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts also assigned include Mary Shelley’s *Frankenstein* and Byron’s *Don Juan*.

**L79 EuSt 320 British Cinema: A History**

In cinema, as in politics, Britain is caught awkwardly between America and Europe, never quite knowing how to position itself. Should it try to compete seriously with Hollywood, or develop a smaller-scale and more distinctive national cinema on the French or Swedish model? This uncertainty has commonly been seen as a weakness but it can be seen, conversely, as a strength, fostering a rich diversity and complexity both in the output overall and in the work of key British filmmakers like Michael Powell, David Lean, and, in the first half of his career, Alfred Hitchcock. This course traces the fortunes of British cinema from its lively beginnings through a switchback history of slump and recovery, giving equal attention to the work of high-profile directors like Hitchcock and to important genres like 1930s documentary, Ealing comedy, and Hammer horror. A continuing theme is the complex economic relationship between British cinema and Hollywood: co-productions, trade barriers, the drain of talent to Hollywood, and the intermittent success of British films like *The King’s Speech* in the American market. Required screenings.

**L79 EuSt 3221 The Jewish Experience in Italy, 1850–1945**

This course examines the social and political history of the Jews of Italy from the period of Italian unification through the end of the Second World War. We look through two different prisms: first, the constant of Jews’ minority status in a Catholic country at a time when Church doctrine was hostile to them and second, their changing status during significant moments in the brief history of the Italian monarchy. Under the latter rubric we study the rehabilitation of the Jews under liberal political philosophies, their problematic relationship with Fascism, and finally the arrival of the Holocaust in Italy and efforts to defend Jews against Nazi genocide. We approach these topics wherever possible through primary texts, including essays, memoirs and novels. Reading knowledge of Italian is not required. Readings in English; some readings in Italian for Italian majors. Discussion in English.
L79 EuSt 3224 Topics in Italian: Basilisks to Botticelli: the Birth, Development and Politics of Museums in Italy
This course investigates the rise and cultural authority of museums in Italy from the Renaissance to the twentieth century. The course unfolds chronologically, beginning with the distant precursors and etymological roots of the museum in ancient Alexandria and Rome. We trace the origins of the museum in the art collection and patronage that surged during the Renaissance, including the 16th- and 17th-century Curiosity Cabinet with its fossils, mythical basilisks, gems and weapons and church displays of religious and classical art. We study the establishment during the Enlightenment in Italy of the first public art museums epitomized by the Vatican Museums, the Uffizi Gallery and the Capitoline Museums. We conclude by examining the impact on national and cultural identity of Fascist propaganda museums instituted under Mussolini’s regime. No prerequisites.

L79 EuSt 323 The Cinema of Eastern Europe in the Cold War Era
This course has two objectives. On the one hand, we watch masterpieces of European cinema, awarded at international festivals and directed by legendary names such as Milos Forman, Emir Kusturica and Andrzej Wajda, and focus on their artistic genius. On the other hand, we study the way in which the confrontational politics of the Cold War inform these films, with a special focus on the perplexing predicament of a divided and antagonized Europe. The readings for this class emphasize our dual exploration. We work with texts dealing with both film history and its aesthetics and with broader analyses of the intellectual and political landscape of the Cold War context. Required screenings.

L79 EuSt 3240 Italian Literature II (WI)
Founded by the age old questions of Italian national identity and language, this introductory literature course undertakes a chronological survey of the history of Italian literature from the 1600s to the present day. We study select works by major authors, including Galileo Galilei’s “heretical” dialogues, the realistic comedies of Carlo Goldoni, poems and essays by the Romantic poet Giacomo Leopardi, the revolutionary dramas of Luigi Pirandello, the Futurist’s celebration of speed, war and technology in the visual and literary arts, and the postmodern fiction of Italo Calvino. This is a writing-intensive version of the previously offered course Ital 324C. Prerequisite: Ital 201D. Previous or concurrent enrollment in Ital 307D or 308D recommended.

L79 EuSt 3250 French Film Culture
Called “the seventh art,” film has a long tradition of serious popular appreciation and academic study in France. This course offers an overview of French cinema, including the origins of film (Lumiére brothers, Méliés), the inventive silent period (which created such avant-garde classics as Un Chien Andalou), the poetic realism of the ’30s, the difficulties of the war years, the post-war emphasis on historical/nationalist themes in the “tradition of quality” films, the French New Wave’s attempt to create a more “cinematic” style, the effects of the political turmoil of May ’68 on film culture, the “art house” reception of French films in the United States, and the broader appeal of recent hyper-visual (“cinéma du look”) films, such as La Femme Nikita and Amélie. While the primary focus of the course is on French cinema, we also discuss the reciprocal influences between American and French film culture, both in terms of formal influences on filmmaking and theoretical approaches to film studies. French film terms are introduced but no prior knowledge of the language is expected. Required screenings.

L79 EuSt 3256 French Literature I: Dramatic Voices: Poets and Playwrights
An interpretation of cultural, philosophical and aesthetic issues as presented in influential works of French poetry and drama from the Middle Ages to the present. May be taken before or after French 326. Prerequisite: French 308D or French 318D. Same as French 325
Credit 3 units. A&S: TH A&S: IQ, HUM, LCD, LS BU: HUM EN: H

L79 EuSt 3262 French Literature II: Narrative Voices: Fiction and Nonfiction
An investigation of cultural, philosophical and aesthetic issues as presented in influential works of French prose from the Middle Ages to the present. May be taken before or after French 325. Prerequisite: French 308D or French 318D. Section 09. Prosaic Greatness: The title of this course emphasizes both the artistic value of certain major prose texts in French and the everyday facets of knowledge about French culture they convey. From the Middle Ages to the present, influential writers such as Montaigne, Pascal, Sand, Flaubert and Gide have demonstrated how important political, philosophic, literary and artistic concepts
have been skillfully passed down from one generation to another through a masterful usage of French prose. By looking closely at the aesthetic and social questions raised by works such as theirs, so characteristic of their times, students come to appreciate better the evolution of French prose and its true place within the general history of France.

L79 EuSt 328 History of German Cinema
This course explores the major developments of German cinema throughout the 20th century. More specifically, this course engages with issues related to German film culture’s negotiation of popular filmmaking and art cinema, of Hollywood conventions and European avant-garde sensibilities. Topics include the political functions of German film during the Weimar, the Nazi, the postwar and the postwall eras; the influence of American mass culture on German film; the role of German émigrés in the classical Hollywood studio system; and the place of German cinema in present-day Europe and in our contemporary age of globalization. Special attention is given to the role of German cinema in building and questioning national identity, to the ways in which German feature films over the past 100 years have used or challenged mainstream conventions to recall the national past and envision alternative futures. Films by directors such as Murnau, Lang, Fassbinder, Herzog, Tykwer and many others. All readings and discussions in English. May not be taken for German major or minor credit. Required screenings.

Same as Film 328
Credit 3 units. A&S: TH BU: IS EN: H

L79 EuSt 3290 Italian Neorealism
This course explores the visual language of one of the most influential film movements of the 20th century. We concentrate on the origins of neorealism in Italian post-war cinema and history, and focus on the works of filmmakers such as Roberto Rossellini, Vittorio De Sica and Luchino Visconti. We also consider the longer-term influence of the movement both in Italy and elsewhere. Throughout this course, we reflect on the possibilities of mimesis in cinema, on the social and political engagement of neorealist film, and on the factors that caused its decline.

L79 EuSt 332 Topics in Film Studies: Italian Cinema
Among the great European-and world-cinematic traditions, Italian cinema ranks near the top. Making its breakthrough around 1945, it has continued to surprise and challenge audiences in the decades that followed. After a brief review of the early decades of Italian film, we focus on the first two decades of post-war cinema, beginning with neo-realism, continuing through the boom years of the 1950s, and ending with the new introspection of the 1960s. Looking at the movies of five great directors, Rossellini, De Sica, Fellini, Antonioni, and Visconti, we consider their evolving aesthetic and their engagement with both history writ large and the social and political issues that inform Italian life as the nation struggles to reconstruct an identity shattered by fascism and war. Course conducted in English. Italian majors must read in Italian, others in English translation. Three class hours per week plus a three-hour film viewing.

L79 EuSt 3350 Becoming "Modern": Emancipation, Anti-Semitism and Nationalism in Modern Jewish History
This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be — or to become — modern. We begin with the Enlightenment and the formation of the modern state and end with American and Israeli settings at the close of the 20th century. The cultural, social and political lives of Jews have undergone tremendous transformations and dislocations over this time — a period marked by innovation, tragedy and success. Among the themes that we explore in depth are: the campaigns for and against...
L79 EuSt 336 Cinema and Ireland
Like many other anglophone and francophone countries, Ireland only even started to develop a robust national cinema in the 1970s. As in, for instance, Australia and New Zealand, growth had previously been blocked by the dominance of local screens by films from, on the one hand, the overbearing “imperial” power, Britain, and, on the other, Hollywood, center of an even stronger cultural imperialism. Increased national self-assertion coincided with the weakening of the grip of those two cinemas in the post-classical period. A major focus of the class is on some of the key works of the filmmakers who established themselves in the 1980s, notably Neil Jordan and Jim Sheridan. But, as the title indicates — not simply Irish Cinema — it deals with more than this. Like Ireland itself, Irish cinema is deeply marked by, and preoccupied with, the political and cultural struggles of the past, and recent cinema is illuminated by seeing it in the context of earlier films: Hollywood and British versions of Ireland, whether shot on location or in the studio, as well as the isolated earlier landmarks of an indigenous Irish cinema. We also look at the rich topic of the representation of Irish immigrants in Hollywood films. Required screenings.

L79 EuSt 341 German Thought and the Modern Era
In this introduction to the intellectual history of the German-speaking world from roughly 1750 to the present, we read English translations of works by some of the most influential figures in the German tradition, including Kant, Hegel, Marx, Nietzsche, Freud, Adorno, Heidegger, Arendt, Habermas and others. Our discussions focuses on topics such as secularization, what it means to be modern, the possibility of progress, the role of art and culture in social life, the critique of mass society and the interpretation of the Nazi past. We consider the arguments of these thinkers both on their own terms and against the backdrop of the historical contexts in which they were written. Open to first-year students, nonmajors, and majors.
Admission to 400-level courses (except 404 and 408D) is contingent on completion of this course or 340C. Qualifies for major or minor credit when taken in conjunction with a one-hour discussion section in German. The discussion section provides an introduction to critical German vocabulary and is open to students with prior knowledge of German (German 210D or equivalent, or placement by examination).
Same as German 340C
Credit variable, maximum 4 units. A&S: TH, CD A&S: IQ, HUM, LCD BU: ETH, IS FA: AH

L79 EuSt 340 German Literature and the Modern Era
Introduction in English to German writers from 1750 to the present. Discussion focuses on questions like the role of outsiders in society, the human psyche, technology, war, gender, the individual and mass culture, modern and postmodern sensibilities as they are posed in predominantly literary texts and in relation to the changing political and cultural faces of Germany over the past 250 years. Readings include works in translation by some of the most influential figures of the German tradition, such as Goethe, Nietzsche, Freud, Kafka, Thomas Mann, Brecht, and Christa Wolf. Open to first-year students, nonmajors, and majors. Required for admission to 400-level courses (except 404 and 408D). Qualifies for major or minor credit when taken in conjunction with a one-hour discussion section in German. The discussion section provides an introduction to critical German vocabulary and is open to students with prior knowledge of German (German 210D or equivalent, or placement by examination).

L79 EuSt 3500 The 19th-Century Russian Novel (WI)
The 19th-century “realistic” novel elevated Russian literature to world literary significance. In this course we do close readings of three major Russian novels: Alexander Pushkin’s Eugene Onegin, Fyodor Dostoevsky’s Crime and Punishment, and Lev Tolstoy’s Anna Karenina. While we consider a variety of formal and thematic concerns, special emphasis is placed on the social context and on questions of Russian cultural identity. Readings and discussions are supplemented by critical articles and film. This is a Writing Intensive course: workshops are required. All readings are in English translation. No prerequisites.

L79 EuSt 3554 Revolution with an Accent: The Haitian and French Revolution, 1770-1805?
How can politics enact fundamental changes? What make those changes a “revolution”? How do we judge the legitimacy of such changes? When these questions arise over the course of ordinary political arguments, the example of the French Revolution often looms large, casting a shadow tinted with blood and terror. Much less present in the collective political imagination is the Haitian Revolution. These two events are complex and complicated, and are filled with fascinating, chilling, inspired characters, enflamed rhetoric and challenging questions. This course examines both the unfolding of events and the rise and fall of protagonists within these two revolutions and explores the ways that issues such as religion, state finance, loyalty, race and slavery became politicized.
Same as History 3554
Credit 3 units.

L79 EuSt 3559 Socialist and Secular? A Social History of the Soviet Union
This class explores daily life and cultural developments in the Soviet Union, 1917 to 1999. Focusing on the everyday experience of Soviet citizens during these years, students learn about the effects of large-scale social and political transformation on the private lives of people. To explore daily life in the Soviet Union, this class uses a variety of sources and media, including scholarly analysis, contemporaneous portrayals, literary representations, and films. Students receive a foundation in Soviet political, social and cultural history with deeper insights into select aspects of life in Soviet society.

L79 EuSt 3598 The First World War and the Making of Modern Europe
The First World War ushered our age into existence. Its memories still haunt us, and its aftershocks shaped the course of the 20th century. The Russian Revolution, the emergence of new national states, Fascism, Nazism, the Second World War, and the Cold War are all its products. Today, many of the ethnic and national conflicts that triggered war in 1914 have resurfaced. Understanding the First World War, in short, is crucial to understanding our own era.

L79 EuSt 3601 The Traffic in Women and Contemporary European Cinema
What binds society together? One of the most influential answers to this question was offered by French anthropologist Claude Lévi-Strauss. He argued that the fabric of a society is formed by a network of exchanges among kinship groups, which circulate three kinds of objects: economic goods, linguistic signs and women. In this course, we inquire into the place of women in this argument. We trace rudiments of the traditional marriage system (a father figure still “gives away” the bride in the marriage ceremony), its range of displacements in a global economy (transnational wives, nannies and domestic servants), the role of new media in the formation of new systems of trafficking (internet brides), and the place of the debate on gay marriage within the larger conversation. We read texts by Friedrich Engels, Sigmund Freud, Marcel Mauss, Claude Lévi-Strauss, Gayle Rubin, Luce Irigaray, Judith Butler, Barbara Ehrenreich and Arlie Russell Hochschild; and we watch a number of films that dramatize the traffic in women in the context of contemporary Europe: Coline Serreau’s Chaos, Lukas Moodysson’s Lilja 4-ever, Cristian Mungiu’s Occident, Nilita Vachani’s When Mother Comes Home for Christmas, Fatih Akin’s Head-on, Jean-Pierre and Luc Dardenne’s The Silence of Lorna.

L79 EuSt 364 Anarchism: History, Theory and Praxis
This course analyzes the origins, historical trajectories, and influence of anarchism from its classical period (1860s-1930s) until the present. It examines the major personalities, complex ideas, vexing controversies, and diverse movements associated with anarcho-collectivism, anarcho-communism, individualist anarchism, anarcho-syndicalism, anarchist feminism, green anarchism, lifestyle anarchism, and poststructuralist anarchism. In doing so, it explores traditional anarchist concerns with state power, authority, social inequality, capitalism, nationalism, imperialism, and militarism. It also analyzes anarchism’s conception of individual and collective liberation, mutual aid, workers’ organization, internationalism, direct democracy, education, women’s emancipation, sexual freedom, and social ecology. Special attention is given to past and contemporary globalizing processes and their relation to the dissemination and reception of anarchism in the global South.

L79 EuSt 374 Russian Literature and Empire
In this course we explore Russian literary works (from the 19th century to the present day) that address issues of empire. We consider the building of the Russian empire during tsarist times with the conquest of Siberia, Ukraine, the Crimea, the Caucasus, Central Asia, and the Far East; then we look at the remaking of the Russian empire as the Soviet Union under the “anti-imperialist” communist regime; we conclude with a glance at the legacy of empire in contemporary Russia, with a focus on the Chechen Wars. Some of the topics we discuss include the poetics of space, orientalism, authority and rebellion, imperial bureaucracy, religious identities, migration and deportation, and multiculturalism. We do close readings of works by Pushkin,
Lermontov, Gogol, Tolstoy, Chekhov, Babel, Platonov, Iskander, Almatov, Petrushhevskaya, and others. Primary readings are supplemented with critical articles and several films. All readings are in English translation. No prerequisites.

L79 EuSt 375 Screening the Holocaust  
The course surveys ways in which the story of the Holocaust is conveyed through film. Focusing on the individual and aesthetic pleasure, modern Western film seem to be an inappropriate genre to depict the German mass murdering of six million Jews. But since the broadcasting of the NBC series Holocaust in 1975, feature films have replaced documentaries and historiographies in educating the public about the traumas of the unprecedented genocide. With the continuing impact of the Holocaust on Jewish, American, and German identity and politics, Holocaust films are more scrutinized than any other genre. We examine these aesthetic and philosophical controversies as well as the narrative and editing strategies filmmakers use to relate collective history and individual trauma. Special attention is given to the complex cinematographic perspectives on human agency in a world of bureaucratically administered killing. In the course, we try to close the gap between reading film theory and watching a Holocaust movie: we analyze the properties of cinematic language, reconstruct the sociohistorical and psychological formation of memory and imagination, and even question our own evaluation of a film. Screenings include Shoah; The Wannsee Conference; Europa, Europa; Enemies, a Love Story; Jakob the Liar; Schindler’s List; and Life is Beautiful. Required screenings.

L79 EuSt 3760 Cinema and Society  
This survey of French and Francophone cinema examines the history of the medium from its origins through some of its more recent trends, focusing on its socially activist tendencies. Films viewed have explicit social and political messages, often highly critical of established ideological currents. Among the film auteurs studied are Gance, Clair, Renoir, Truffaut, Godard, Varda, Sembene and Jaoui. There is an optional extra session for group film viewing. Films are on reserve in Olin Library. Grading consists of presentations of the films and directors; a mid-term exam, and a final paper. Prerequisite: French 307D. Taught in French.

L79 EuSt 3783 Modern Art, Theory and Criticism, 1905–1960  
The course surveys major tendencies in painting and sculpture from Fauvism in France and Expressionism in German to the beginnings of Postmodernism in photo-based work in the U.S. About two-thirds of the course treats European art, about one-third treats American art. Photography, architecture and work in other forms are considered selectively when pertinent to the individual class topics. Within the lecture topics, emphasis is on avant-garde innovation; the tension in modernist art between idealism and critique; reaction by artists to current events; relationship between art and linguistics, philosophy, literature, economics and science; the role of geopolitics in art production; intersections of art and society; the role of mass culture; issues of race and gender in the production and reception of art; the challenge to the concept of authorship and creativity posed by Postmodernism at the end of this period. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in Art History preferred; or permission of instructor. Same as Art-Arch 3783
