About This Bulletin

The Undergraduate Bulletin is the catalog of undergraduate courses and degrees of Washington University in St. Louis. The catalog includes programs, degree requirements, course descriptions, pertinent university policies and faculty for students earning a degree through one of the four undergraduate schools: College of Arts & Sciences; Olin Business School; Sam Fox School of Design & Visual Arts (College of Architecture, College of Art); and McKelvey School of Engineering.

The University College Bulletin is the catalog of University College, the professional and continuing education division of Arts & Sciences at Washington University in St. Louis. The catalog includes programs, degree requirements, course descriptions and pertinent university policies for students earning a degree through University College.

The 2019-20 Bulletin is entirely online but may be downloaded in PDF format for printing. Individual pages may be downloaded in PDF format using the "Download This Page as a PDF" option on each page. To download the full PDF, please choose from the following:

The degree requirements and policies in the 2019-20 Bulletin apply to students entering Washington University during the 2019-20 academic year.

Every effort is made to ensure that the information, applicable policies and other materials presented in the Bulletin are accurate and correct as of the date of publication (October 25, 2019). Washington University reserves the right to make changes at any time without prior notice. Therefore, the electronic version of the Bulletin may change from time to time without notice. The governing document at any given time is the then-current version of the Bulletin, as published online, and then-currently applicable policies and information are those contained in that Bulletin.

For the most current information about available courses and class scheduling, visit WebSTAC (https://acadinfo.wustl.edu). Please email the Bulletin editor (bulletin_editor@wustl.edu) with any questions concerning the Bulletin.

More information may be found on the following websites:

- Sam Fox School of Design & Visual Arts (http://samfoxschool.wustl.edu) (Colleges of Architecture and Art)
About Washington University in St. Louis

Who We Are Today

Washington University in St. Louis — a medium-sized, independent university — is dedicated to challenging its faculty and students alike to seek new knowledge and greater understanding of an ever-changing, multicultural world. The university is counted among the world's leaders in teaching and research, and it draws students from all 50 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Students and faculty come from more than 100 countries around the world.

The university offers more than 90 programs and almost 1,500 courses leading to bachelor's, master's and doctoral degrees in a broad spectrum of traditional and interdisciplinary fields, with additional opportunities for minor concentrations and individualized programs. For more information about the university, please visit the University Facts page of our website.

Enrollment by School

For enrollment information, please visit the University Facts page of our website.

Committed to Our Students: Mission Statement

Washington University’s mission is to discover and disseminate knowledge and to protect the freedom of inquiry through research, teaching and learning.

Washington University creates an environment that encourages and supports an ethos of wide-ranging exploration. Washington University’s faculty and staff strive to enhance the lives and livelihoods of students, the people of the greater St. Louis community, the country and the world.

Our goals are as follows:

- To welcome students, faculty and staff from all backgrounds to create an inclusive community that is welcoming, nurturing and intellectually rigorous;
- To foster excellence in our teaching, research, scholarship and service;
- To prepare students with the attitudes, skills and habits of lifelong learning and leadership, thereby enabling them to be productive members of a global society; and
- To be an institution that excels by its accomplishments in our home community, St. Louis, as well as in the nation and the world.

To this end, we intend to do the following:

- To judge ourselves by the most exacting standards;
- To attract people of great ability from diverse backgrounds;
- To encourage faculty and students to be bold, independent and creative thinkers;
- To provide an exemplary, respectful and responsive environment for living, teaching, learning and working for present and future generations; and
- To focus on meaningful, measurable results for all of our endeavors.

Trustees & Administration

Board of Trustees

Please visit the Board of Trustees website for more information.

University Administration

In 1871, Washington University co-founder and then-Chancellor William Greenleaf Eliot sought a gift from Hudson E. Bridge, charter member of the university's Board of Directors, to endow the chancellorship. Soon it was renamed the "Hudson E. Bridge Chancellorship."

Led by the chancellor, the officers of the university administration are detailed on the university website.

Academic Calendar

The academic calendar of Washington University in St. Louis is designed to provide an optimal amount of classroom instruction and examination within a manageable time frame, facilitating our educational mission to promote learning among both students and faculty. Individual schools, particularly our graduate and professional schools, may have varying calendars due to the nature of particular fields of study. Please refer to each school's website for more information.

Washington University recognizes the individual student’s choice in observing religious holidays that occur during periods when classes are scheduled. Students are encouraged to arrange with their instructors to make up work missed as a result of religious observance, and instructors are asked to make every reasonable effort to accommodate such requests.

### Campus Resources

#### Student Support Services

The Learning Center is located on the ground floor of Gregg House on the South 40, and it is the hub of academic support at Washington University in St. Louis. We provide undergraduate students with assistance in a variety of forms. Most services are free, and each year more than 2,000 students participate in one or more of our programs. For more information, visit the Learning Center website (https://learningcenter.wustl.edu) or call 314-935-5970. There are three types of services housed within the Learning Center:

- **Academic Mentoring Programs** offer academic support in partnership with the academic departments in a variety of forms. Academic mentoring programs are designed to support students in their course work by helping them develop the lifelong skill of "learning how to learn" and by stimulating their independent thinking. Programs include course-specific weekly structured study groups facilitated by highly trained peer leaders as well as course-specific weekly walk-in sessions facilitated by academic mentors in locations, at times and in formats convenient for the students. The Learning Center also offers individual consulting/coaching for academic skills such as time management, study skills, note taking, accessing resources and so on. Other services include fee-based graduate and professional school entrance preparation courses.

- **Disability Resources** supports students with disabilities by fostering and facilitating an equal access environment for the Washington University community of learners. Disability Resources partners with faculty and staff to facilitate academic and housing accommodations for students with disabilities on the Danforth Campus. Students enrolled in the School of Medicine should contact their program’s director. Please visit the Disability Resources website (https://students.wustl.edu/disability-resources) or contact the Learning Center at 314-935-5970 for more information.

- **TRIO: Student Support Services** is a federally funded program that provides customized services for undergraduate students who are low income, who are the first in their family to go to college, and/or who have a documented disability. Services include academic coaching, academic peer mentoring, cultural and leadership programs, summer internship assistance and post-graduation advising. First-year and transfer students are considered for selection during the summer before they enter their first semester. Eligible students are encouraged to apply when they are notified, because space in this program is limited. For more information, visit the TRIO Program website (https://students.wustl.edu/trio-program).

#### Medical Student Support Services

For information about Medical Student Support Services, please visit the School of Medicine website (https://medicine.wustl.edu).

#### Office for International Students and Scholars

If a student is joining the university from a country other than the United States, this office can assist that individual through their orientation programs, issue certificates of eligibility (visa documents), and provide visa and immigration information. In addition, the office provides personal and cross-cultural counseling and arranges social, cultural and recreational activities that foster international understanding on campus.

The Office for International Students and Scholars is located on the Danforth Campus in the Danforth University Center at 6475 Forsyth Boulevard, Room 330. The office can be found on the Medical Campus in the Mid Campus Center (MCC Building) at 4590 Children’s Place, Room 2043. For more information, visit the Office for International Students and Scholars website (http://oiss.wustl.edu) or call 314-935-5910.

#### Office of Military and Veteran Services

Office of Military and Veteran Services is located in Umrath Hall on the Danforth Campus. This office serves as the university’s focal point for military and veteran matters, including transitioning military-connected students into higher education,
providing and connecting students with programs and services, and partnering across campus and in the community. Services include advising current and prospective students on how to navigate the university and maximize Department of Defense and Veterans Affairs (VA) educational benefits, transition support, Veteran Ally training for faculty and staff, veteran-unique programming, and connecting students to campus and community resources. Military-connected students include veterans, military service members, spouses, dependent children, caregivers, survivors and Reserve Officer Training Corp cadets. There are two university policies that apply to students who still serve in the Armed Forces and students who use VA educational benefits:

- The Policy on Military Absences, Refunds and Readmissions (https://veterans.wustl.edu/policies/policy-for-military-students) applies to students serving in the U.S. Armed Forces and their family members when military service forces them to be absent or withdraw from a course of study.
- The Policy on Protections for VA Educational Benefit Users (https://veterans.wustl.edu/policies/policy-for-va-students) applies to students using VA education benefits when payments to the institution and the individual are delayed through no fault of the student.

Please visit the Military and Veteran Services website (https://veterans.wustl.edu) or contact Military and Veteran Services at 314-935-2609 or veterans@wustl.edu for more information.

**Relationship and Sexual Violence Prevention (RSVP) Center.**

The RSVP Center offers free and confidential services including 24/7 crisis intervention, counseling services, resources, support and prevention education for all students on the Danforth Campus. The RSVP Center operates from a public health model and uses trauma-informed practices to address the prevalent issues of relationship and sexual violence. By providing support for affected students, it is our goal to foster post-traumatic growth and resilience and to help ensure academic retention and success. Our prevention efforts call for community engagement to engender an intolerance of violence and an active stance toward challenging cultural injustices that perpetuate such issues. Learn more at the RSVP Center website (https://rsvpcenter.wustl.edu).

**WashU Cares.**

WashU Cares assists the university with handling situations involving the safety and well-being of Danforth Campus students. WashU Cares is committed to fostering student success and campus safety through a proactive, collaborative and systematic approach to the identification of, intervention with and support of students of concern while empowering all university community members to create a culture of caring. If there is a concern about the physical or mental well-being of a student, please visit the WashU Cares website (https://washucares.wustl.edu) to file a report.

**The Writing Center.**

The Writing Center, a free service, offers writing advice to all Washington University undergraduate and graduate students. Tutors will read and discuss any kind of work in progress, including student papers, senior theses, application materials, dissertations and oral presentations. The Writing Center staff is trained to work with students at any stage of the writing process, including brainstorming, developing and clarifying an argument, organizing evidence, and improving style. Rather than editing or proofreading, tutors will emphasize the process of revision and teach students how to edit their own work.

The Writing Center is located in Olin Library on Level 1. Appointments (http://writingcenter.wustl.edu) are preferred and can be made online.

**Student Health Services, Danforth Campus**

Habif Health and Wellness Center, formerly known as Student Health Services, provides medical and mental health care for undergraduate and graduate students. Habif staff members include licensed professionals in Medical Services, Mental Health Services and Health Promotion Services. Please visit Dardick House on the South 40 or the Habif Health and Wellness Center website (http://shs.wustl.edu) for more information about Habif's services and staff members.

**Hours:**

- Monday, Tuesday and Thursday 8 a.m.-6 p.m.
- Wednesday 10 a.m.-6 p.m.
- Friday 8 a.m.-5 p.m.
- Saturday 9 a.m.-1 p.m.

A nurse answer line and after hours mental health crisis line are available to answer any medical or mental health questions a student may have when Habif is closed. For after-hours care, please call 314-935-6666.

**Medical Services**

Staff members provide care for the evaluation and treatment of an illness or injury, preventive health care and health education, immunizations, nutrition counseling, physical therapy, and travel medicine and sexual health services. Habif Health and Wellness Center providers are participating members of the Washington University in St. Louis Physician's Network. Any condition requiring specialized medical services will be referred to an appropriate specialist. Habif accepts most health insurance plans and will be able to bill the plan according to plan benefits. The student health insurance plan requires a referral for medical care any time care is not provided at Habif. For after-hours care, please call 314-935-6666 or visit the Habif website to schedule an appointment (http://shs.wustl.edu).

Appointments are also available for the assessment, treatment, and referral of students who are struggling with substance abuse.

The Habif Health and Wellness Center pharmacy is available to all Washington University students and their dependents who participate in the student health insurance plan. The pharmacy
accepts most prescription insurance plans; students should check with the pharmacist to see if their prescription plan is accepted at the pharmacy.

The Habif Health and Wellness Center lab provides full laboratory services. Approximately 20 tests can be performed in the lab. The remainder of all testing that is ordered by Habif is completed by LabCorp. LabCorp serves as Habif’s reference lab, and it is a preferred provider on the student health insurance plan. This lab can perform any test ordered by Habif providers or outside providers.

All incoming students must provide proof of immunization for measles, mumps, and rubella (i.e., two vaccinations after the age of one year old; a titer may be provided in lieu of the immunizations). Proof of receiving a meningococcal vaccine is required for all incoming undergraduate students. A PPD skin test in the past six months is required for students entering the university from certain countries; this list of countries may be found on the Habif website. It is also recommended that, during the five years before beginning their studies at Washington University, all students will have received the tetanus diphtheria immunization. The hepatitis A vaccine series, the hepatitis B vaccine series, and the varicella vaccine. Medical History Forms (http://shs.wustl.edu) are available online. Failure to complete the required forms will delay a student’s registration and prevent their entrance into housing assignments. Please visit the Habif website for complete information about requirements and deadlines (http://shs.wustl.edu).

Mental Health Services staff members work with students to resolve personal and interpersonal difficulties, including conflicts with or worry about friends or family, concerns about eating or drinking patterns, and feelings of anxiety and depression. Staff members help each person figure out their own situation. Services include individual, group and couples counseling; crisis counseling; psychiatric consultation; and referral for off-campus counseling. Call 314-935-6666 or visit the Habif website to schedule an appointment (http://shs.wustl.edu).

Health Promotion Services provides free programs and risk reduction information related to issues such as stress, sleep, sexual health and alcohol/other drugs. For more information, visit the Zenker Wellness Suite in Sumers Recreation Center to learn about the programs on campus led by student peer health educators. Call 314-935-7139 or send an email to wellness@wustl.edu for more information.

In 2018, this department launched the WashU Recover Group to provide an opportunity for students in recovery from substance use to connect with other students with similar experiences. The group provides local resources, support, meetings and activities. Members have 24/7 access to a private facility to study, meet and socialize. The group is not a recovery program; it is a confidential resource that students can add to their support system. For more information, send an email to recovery@wustl.edu.

Important Information About Health Insurance, Danforth Campus

Washington University has a student health fee that was designed to improve the health and wellness of the entire Washington University community. This fee supports health and wellness services and programs on campus. In addition, all full-time, degree-seeking Washington University students are automatically enrolled in the Student Health Insurance Plan upon completion of registration. Students may opt out of this coverage if they provide proof of existing comprehensive insurance coverage. Information concerning opting out of the student health insurance plan (http://shs.wustl.edu) can be found online after June 1 of each year. Habif provides billing services to many of the major insurance companies in the United States. Specific fees and co-pays apply to students using Medical Services and Mental Health Services; these fees may be billable to the students’ insurance plan. More information is available on the Habif Health and Wellness Center website (http://shs.wustl.edu).

Student Health Services, Medical Campus

For information about student health services on the Medical Campus, please visit the Student Health Services page (http://bulletin.wustl.edu/medicine/resources/student-health) of the medical school Bulletin.

Campus Security

The Washington University campus is among the most attractive in the nation, and it enjoys a safe and relaxed atmosphere. Your personal safety and the security of your property while on campus is a shared responsibility. Washington University has made safety and security a priority through our commitment to a full-time professional police department, the use of closed-circuit television, card access, good lighting, shuttle services, emergency telephones, and ongoing educational safety awareness programs. The vast majority of crimes that occur on college campuses are crimes of opportunity, which can be prevented.

The best protection against crime is an informed and alert campus community. Washington University has developed several programs to help make your experience here a safe and secure one. An extensive network of emergency telephones — including more than 200 “blue light” telephones — is connected directly to the University Police Department and can alert the police to your exact location. In addition to the regular shuttle service, an evening walking escort service and a mobile Campus Circulator shuttle is available on the Danforth Campus.

The Campus2Home shuttle will provide a safe ride home for those living in four designated areas off campus — Skinker-DeBaliviere, Loop South, north of The Loop and just south of the campus — from 6:00 p.m. to 4:00 a.m. seven days a week. The shuttle leaves from the Mallinckrodt Center every 30 minutes and
takes passengers directly to the front doors of their buildings. Shuttle drivers then will wait and watch to make sure passengers get into their buildings safely. Community members can track the shuttle in real time using the WUSTL Mobile App. The app can be downloaded free of charge from the Apple App Store or the Google Play Store.

The University Police Department is a full-service organization staffed by certified police officers who patrol the campus 24 hours a day throughout the entire year. The department offers a variety of crime prevention programs, including a high-security bicycle lock program, free personal-safety whistles, computer security tags, personal safety classes for women and men, and security surveys. Community members are encouraged to download and install the personal safety app Noonlight on their phones; this app allows users to call for help during emergencies. For more information about these programs, visit the Washington University Police Department website (https://police.wustl.edu/Pages/Home.aspx).

In compliance with the Campus Crime Awareness and Security Act of 1990, Washington University publishes an annual report (http://police.wustl.edu/clerylogsandreports/Pages/default.aspx) entitled Safety & Security: Guide for Students, Faculty, and Staff — Annual Campus Security and Fire Safety Reports and Drug & Alcohol Abuse Prevention Program. This report is available to all current and prospective students on the Danforth Campus and university employees on the Danforth, North and West campuses. To request a hard copy, contact the Washington University Police Department, CB 1038, One Brookings Drive, St. Louis, MO 63130-4899, 314-935-9011.

For information regarding protective services at the School of Medicine, please visit the Security page (https://facilities.med.wustl.edu/security) of the Washington University Operations & Facilities Management Department.

University Policies

Washington University has various policies and procedures that govern our faculty, staff and students. Highlighted below are several key policies of the university. Web links to key policies and procedures are available on the Office of the University Registrar website (http://registrar.wustl.edu) and on the university’s Compliance and Policies page (http://wustl.edu/policies). Please note that the policies identified on these websites and in this Bulletin do not represent an entire repository of university policies, as schools, offices and departments may implement policies that are not listed. In addition, policies may be amended throughout the year.

Nondiscrimination Statement

Washington University encourages and gives full consideration to all applicants for admission, financial aid and employment. The university does not discriminate in access to or treatment or employment in its programs and activities on the basis of race, color, age, religion, sex, sexual orientation, gender identity or expression, national origin, veteran status, disability or genetic information.

Policy on Discrimination and Harassment

Washington University is committed to having a positive learning and working environment for its students, faculty and staff. University policy prohibits discrimination on the basis of race, color, age, religion, sex, sexual orientation, gender identity or expression, national origin, veteran status, disability or genetic information. Harassment based on any of these classifications is a form of discrimination; it violates university policy and will not be tolerated. In some circumstances, such discriminatory harassment may also violate federal, state or local law. A copy of the Policy on Discrimination and Harassment (http://hr.wustl.edu/policies/Pages/DiscriminationAndHarassment.aspx) is available on the Human Resources website.

Sexual Harassment

Sexual harassment is a form of discrimination that violates university policy and will not be tolerated. It is also illegal under state and federal law. Title IX of the Education Amendments of 1972 prohibits discrimination based on sex (including sexual harassment and sexual violence) in the university’s educational programs and activities. Title IX also prohibits retaliation for asserting claims of sex discrimination. The university has designated the Title IX Coordinator identified below to coordinate its compliance with and response to inquiries concerning Title IX.

For more information or to report a violation under the Policy on Discrimination and Harassment, please contact the following individuals:

Discrimination and Harassment Response Coordinator

Apryle Cotton, Assistant Vice Chancellor for Human Resources
Section 504 Coordinator
Phone: 314-362-6774
apryle.cotton@wustl.edu

Title IX Coordinator

Jessica Kennedy, Director of Title IX Office
Title IX Coordinator
Phone: 314-935-3118
jw kennedy@wustl.edu

You may also submit inquiries or a complaint regarding civil rights to the United States Department of Education’s Office of Civil Rights at 400 Maryland Avenue, SW, Washington, DC 20202-1100; by visiting the U.S. Department of Education website (https://www.ed.gov); or by calling 800-421-3481.
Student Health

Drug and Alcohol Policy

Washington University is committed to maintaining a safe and healthy environment for members of the university community by promoting a drug-free environment as well as one free of the abuse of alcohol. Violations of the Washington University Drug and Alcohol Policy (http://hr.wustl.edu/policies/Pages/DrugandAlcoholPolicy.aspx) or Alcohol Service Policy (http://pages.wustl.edu/prograds/alcohol-service-policy) will be handled according to existing policies and procedures concerning the conduct of faculty, staff and students. This policy is adopted in accordance with the Drug-Free Workplace Act and the Drug-Free Schools and Communities Act.

Tobacco-Free Policy

Washington University is committed to providing a healthy, comfortable and productive work and learning environment for all students, faculty and staff. Research shows that tobacco use in general, including smoking and breathing secondhand smoke, constitutes a significant health hazard. The university strictly prohibits all smoking and other uses of tobacco products within all university buildings and on university property, at all times. A copy of our complete tobacco-free policy (http://hr.wustl.edu/policies/Pages/tobaccofreepolicy.aspx) is available on the Human Resources website.

Medical Examinations

Entering students must provide medical information to the Habif Health and Wellness Center. This will include rgw completion of a health history and a record of all current immunizations. The university strongly recommends appropriate vaccination for meningococcal disease.

If students fail to comply with these requirements prior to registration, they will be required to obtain vaccinations for measles, mumps and rubella at the Habif Health and Wellness Center, if there is no evidence of immunity. They will be assessed the cost of the vaccinations. Students will be unable to complete registration for classes until all health requirements have been satisfied.

If students are unimmunized, they may be barred from classes and from all university facilities, including housing units, if in the judgment of the university their continued presence would pose a health risk to themselves or to the university community.

Medical and immunization information is to be given via the Habif Health and Wellness Center (http://shs.wustl.edu) website. All students who have completed the registration process should access the website and create a student profile by using their WUSTL Key. Creating a student profile enables a student to securely access the medical history form. Students should fill out the form and follow the instructions for transmitting it to the Habif Health and Wellness Center. Student information is treated securely and confidentially.

Student Conduct

The Student Conduct Code sets forth community standards and expectations for Washington University students. These community standards and expectations are intended to foster an environment conducive to learning and inquiry. Freedom of thought and expression is essential to the university’s academic mission.

Disciplinary proceedings are meant to be informal, fair and expeditious. Charges of non-serious misconduct are generally heard by the student conduct officer. With limited exceptions, serious or repeated allegations are heard by the campuswide Student Conduct Board or the University Sexual Assault Investigation Board where applicable.

Complaints against students that include allegations of sexual assault or certain complaints that include allegations of sexual harassment in violation of the Student Conduct Code are governed by the procedures found in the University Sexual Assault Investigation Board Policy (https://wustl.edu/about/compliance-policies/governance/usaib-procedures-complaints-sexual-assault-filed-students), which is available online or in hard copy from the Title IX coordinator or the director of Student Conduct and Community Standards.

Students may be accountable to both governmental authorities and to the university for acts that constitute violations of law and the Student Conduct Code.

For a complete copy of the Student Conduct Code (https://wustl.edu/about/compliance-policies/academic-policies/university-student-judicial-code), visit the university website.

Undergraduate Student Academic Integrity Policy

Effective learning, teaching and research all depend upon the ability of members of the academic community to trust one another and to trust the integrity of work that is submitted for academic credit or conducted in the wider arena of scholarly research. Such an atmosphere of mutual trust fosters the free exchange of ideas and enables all members of the community to achieve their highest potential.

In all academic work, the ideas and contributions of others must be appropriately acknowledged, and work that is presented as original must be, in fact, original. Faculty, students and administrative staff all share the responsibility of ensuring the honesty and fairness of the intellectual environment at Washington University.

Scope and Purpose

This statement on academic integrity applies to all undergraduate students at Washington University. Graduate
students are governed by policies in each graduate school or division. All students are expected to adhere to the highest standards of behavior. The purpose of the statement is twofold:

1. To clarify the university’s expectations with regard to undergraduate students’ academic behavior; and
2. To provide specific examples of dishonest conduct. The examples are only illustrative, not exhaustive.

**Violations of This Policy Include but Are Not Limited to the Following:**

1. **Plagiarism**
   Plagiarism consists of taking someone else’s ideas, words or other types of work product and presenting them as one's own. To avoid plagiarism, students are expected to be attentive to proper methods of documentation and acknowledgment. To avoid even the suspicion of plagiarism, a student must always do the following:
   - Enclose every quotation in quotation marks and acknowledge its source.
   - Cite the source of every summary, paraphrase, abstraction or adaptation of material originally prepared by another person and any factual data that is not considered common knowledge. Include the name of the author, title of work, publication information and page reference.
   - Acknowledge material obtained from lectures, interviews or other oral communication by citing the source (i.e., the name of the speaker, the occasion, the place and the date).
   - Cite material from the internet as if it were from a traditionally published source. Follow the citation style or requirements of the instructor for whom the work is produced.

2. **Cheating on an Examination**
   A student must not receive or provide any unauthorized assistance on an examination. During an examination, a student may use only materials authorized by the faculty.

3. **Copying or Collaborating on Assignments Without Permission**
   When a student submits work with their name on it, this is a written statement that credit for the work belongs to that student alone. If the work was a product of collaboration, each student is expected to clearly acknowledge in writing all persons who contributed to its completion.
   Unless the instructor explicitly states otherwise, it is dishonest to collaborate with others when completing any assignment or test, performing laboratory experiments, writing and/or documenting computer programs, writing papers or reports, or completing problem sets.

If the instructor allows group work in some circumstances but not others, it is the student's responsibility to understand the degree of acceptable collaboration for each assignment and to ask for clarification, if necessary.

To avoid cheating or unauthorized collaboration, a student should never do any of the following:

- Use, copy or paraphrase the results of another person's work and represent that work as one's own, regardless of the circumstances.
- Refer to, study from or copy archival files (e.g., old tests, homework, solutions manuals, backfiles) that were not approved by the instructor.
- Copy another's work or permit another student to copy one's work.
- Submit work as a collaborative effort if they did not contribute a fair share of the effort.

4. **Fabrication or Falsification of Data or Records**
   It is dishonest to fabricate or falsify data in laboratory experiments, research papers or reports or in any other circumstances; to fabricate source material in a bibliography or "works cited" list; or to provide false information on a résumé or other document in connection with academic efforts. It is also dishonest to take data developed by someone else and present them as one's own.

   Examples of falsification include the following:
   - Altering information on any exam, problem set or class assignment being submitted for a re-grade.
   - Altering, omitting or inventing laboratory data to submit as one's own findings. This includes copying laboratory data from another student to present as one's own; modifying data in a write-up; and providing data to another student to submit as one's own.

5. **Other Forms of Deceit, Dishonesty or Inappropriate Conduct**
   Under no circumstances is it acceptable for a student to do any of the following:
   - Submit the same work, or essentially the same work, for more than one course without explicitly obtaining permission from all instructors. A student must disclose when a paper or project builds on work completed earlier in their academic career.
   - Request an academic benefit based on false information or deception. This includes requesting an extension of time, a better grade or a recommendation from an instructor.
   - Make any changes (including adding material or erasing material) on any test paper, problem set or class assignment being submitted for a re-grade.
   - Willfully damage the efforts or work of other students.
   - Steal, deface or damage academic facilities or materials.
• Collaborate with other students planning or engaging in any form of academic misconduct.
• Submit any academic work under someone else's name other than one's own. This includes but is not limited to sitting for another person's exam; both parties will be held responsible.
• Engage in any other form of academic misconduct not covered here.

This list is not intended to be exhaustive. To seek clarification, students should ask the professor or the assistant in instruction for guidance.

Reporting Misconduct

Faculty Responsibility
Faculty and instructors are strongly encouraged to report incidents of student academic misconduct to the academic integrity officer in their school or college in a timely manner so that the incident may be handled fairly and consistently across schools and departments. Assistants in instruction are expected to report instances of student misconduct to their supervising instructors. Faculty members are expected to respond to student concerns about academic dishonesty in their courses.

Student Responsibility
If a student observes others violating this policy, the student is strongly encouraged to report the misconduct to the instructor, to seek advice from the academic integrity officer of the school or college that offers the course in question, or to address the student(s) directly.

Exam Proctor Responsibility
Exam proctors are expected to report incidents of suspected student misconduct to the course instructor and/or the Disability Resource Center, if applicable.

Procedure
Jurisdiction
This policy covers all undergraduate students, regardless of their college of enrollment. Cases will be heard by school-specific committees according to the school in which the class is listed rather than the school in which the student is enrolled. All violations and sanctions will be reported to the student's college of enrollment.

Administrative Procedures
Individual undergraduate colleges and schools may design specific procedures to resolve allegations of academic misconduct by students in courses offered by that school, so long as the procedures are consistent with this policy and with the Student Conduct Code.

Student Rights and Responsibilities in a Hearing
A student accused of an academic integrity violation — whether by a professor, an assistant in instruction, an academic integrity officer or another student — is entitled to do the following:
• Review the written evidence in support of the charge
• Ask any questions
• Offer an explanation as to what occurred
• Present any material that would cast doubt on the correctness of the charge
• Receive a determination of the validity of the charge without reference to any past record of misconduct

When responding to a charge of academic misconduct, a student may do the following:
• Deny the charges and request a hearing in front of the appropriate academic integrity officer or committee
• Admit the charges and request a hearing to determine sanction(s)
• Admit the charges and accept the imposition of sanctions without a hearing
• Request a leave of absence from the university (however, the academic integrity matter must be resolved prior to re-enrollment)
• Request to withdraw permanently from the university with a transcript notation that there is an unresolved academic integrity matter pending

A student has the following responsibilities with regard to resolving the charge of academic misconduct:
• Admit or deny the charge. This will determine the course of action to be pursued.
• Provide truthful information regarding the charges. It is a Student Conduct Code violation to provide false information to the university or anyone acting on its behalf.

Sanctions
If Found Not in Violation of the Academic Integrity Policy
If the charges of academic misconduct are not proven, no record of the allegation will appear on the student's transcript.

If Found in Violation of the Academic Integrity Policy
If, after a hearing, a student is found to have acted dishonestly or if a student has admitted to the charges prior to a hearing, the school's academic integrity officer or committee may impose sanctions, including but not limited to the following:
• Issue a formal written reprimand
• Impose educational sanctions, such as completing a workshop on plagiarism or academic ethics
• Recommend to the instructor that the student fail the assignment (a given grade is ultimately the prerogative of the instructor)
• Recommend to the instructor that the student fail the course
• Recommend to the instructor that the student receive a course grade penalty less severe than failure of the course
• Place the student on disciplinary probation for a specified period of time or until defined conditions are met. The probation will be noted on the student’s transcript and internal record while it is in force.
• In cases serious enough to warrant suspension or expulsion from the university, refer the matter to the Student Conduct Board for consideration.

Additional educational sanctions may be imposed. This list is not intended to be exhaustive.

Withdrawing from the course will not prevent the academic integrity officer or hearing panel from adjudicating the case, imposing sanctions or recommending grade penalties, including a failing grade in the course.

A copy of the sanction letter will be placed in the student’s academic file.

Appeals

If a student believes the academic integrity officer or the committee did not conduct a fair hearing or if a student believes the sanction imposed for misconduct is excessive, they may appeal to the Student Conduct Board within 14 days of the original decision. Appeals are governed by Section VII C of the Student Conduct Code.

Records

Administrative Record-Keeping Responsibilities

It is the responsibility of the academic integrity officer in each school to keep accurate, confidential records concerning academic integrity violations. When a student has been found to have acted dishonestly, a letter summarizing the allegation, the outcome and the sanction shall be placed in the student's official file in the office of the school or college in which the student is enrolled.

In addition, each school’s academic integrity officer shall make a report of the outcome of every formal accusation of student academic misconduct to the director of Student Conduct and Community Standards, who shall maintain a record of each incident.

Multiple Offenses

When a student is formally accused of academic misconduct and a hearing is to be held by an academic integrity officer, a committee, or the Office of Student Conduct and Community Standards, the person in charge of administering the hearing shall query the Office of Student Conduct and Community Standards about the student(s) accused of misconduct. The director shall provide any information in the records concerning that student to the integrity officer. Such information will be used in determining sanctions only if the student is found to have acted dishonestly in the present case. Evidence of past misconduct may not be used to resolve the issue of whether a student has acted dishonestly in a subsequent case.

Reports to Faculty and Student Body

School and college academic integrity officers are encouraged to make periodic (at least annual) reports to the students and faculty of their school concerning accusations of academic misconduct and the outcomes, without disclosing specific information that would allow identification of the student(s) involved.

Graduate Student Academic Integrity Policies

For graduate student academic integrity policies, please refer to each individual graduate school.

Statement of Intent to Graduate

Students are required to file an Intent to Graduate at WebSTAC (https://acadinfo.wustl.edu) prior to the semester in which they intend to graduate. Additional information is available in the dean's offices of each school and in the Office of the University Registrar (http://registrar.wustl.edu).

Student Academic Records and Transcripts

The Family Educational Rights and Privacy Act of 1974 (FERPA) — Title 20 of the United States Code, Section 1232g, as amended — provides current and former students of the university with specific rights of access to and control over their student record information. In compliance with the statute, appropriate federal regulations, and guidelines recommended by the American Association of Collegiate Registrars and Admissions Officers, the university has adopted procedures that implement these rights.

A copy of the university policies regarding educational records and the release of student record information is available from the Office of the University Registrar (http://registrar.wustl.edu) and the university website (https://wustl.edu).

Transcript requests for Danforth Campus students may be submitted to the Office of the University Registrar through WebSTAC. The School of Medicine registrar (http://
registrar.med.wustl.edu/services/transcripts-and-certification) accepts requests for transcripts and certification records for students and alumni of Audiology and Communication Sciences, Biomedical Informatics, Biostatistics, Clinical Investigation, Genetic Epidemiology, Health Administration, Health Behavior Research, Nurse Anesthesia, Occupational Therapy, Pediatric Nurse Practitioner, Physical Therapy, Population Health Sciences, Psychiatric Epidemiology, the School of Dentistry and the School of Medicine. Instructions and additional information are available on the University Registrar website (http://registrar.wustl.edu).

**University Affiliations**

Washington University is accredited by the Higher Learning Commission (https://www.hlcommission.org) (800-621-7440). Washington University is a member of the American Academy of Arts & Sciences, American Association of University Women (AAUW), American Council of Learned Societies (ACLS), American Council on Education (ACE), Association of American Colleges & Universities (AACU), Association of American Universities (AAU), College Board, Council for Higher Education Accreditation (CHEA), Hispanic Association of Colleges & Universities (HACU), Independent Colleges and Universities of Missouri (ICUM), National Association of Independent Colleges and Universities (NAICU), National Council for State Authorization Reciprocity Agreements (NC-SARA), Oak Ridge Associated Universities (ORAU), and the University Research Association (URA).

The College of Arts & Sciences is a member of the American Association of Collegiate Registrars and Admissions Officers (AACRAO), International Center for Academic Integrity (ICAI), National Association of Fellowship Advisors (NAFA), National Association of Advisors for Health Professions (NAAHP), and the Midwest Associate of Pre-Law Advisors (MAPLA).

The College of Architecture was one of the eight founding members of the Association of Collegiate Schools of Architecture (ACSA) in 1912.

The Graduate School is a founding member of both the Association of Graduate Schools and the Council of Graduate Schools.

The Graduate School of Architecture & Urban Design's Master of Architecture degree is accredited by the National Architectural Accreditation Board (NAAB), and its Master of Landscape Architecture degree is accredited by the Landscape Architecture Accrediting Board (LLAB).

The Sam Fox School of Design & Visual Arts is a founding member of and accredited by the National Association of Schools of Art and Design (NASAD).

The Olin Business School is a charter member (1921) of the Association to Advance Collegiate Schools of Business International (AACSB).

In McKelvey School of Engineering, many of the professional degrees are accredited by the Engineering Accreditation Commission of ABET (http://abet.org).

University College is a member of the University Professional and Continuing Education Association, the North American Association of Summer Sessions, the Association of University Summer Sessions, and the Center for Academic Integrity. Business-related programs in University College are not accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

The School of Law is accredited by the American Bar Association. The School of Law is a member of the Association of American Law Schools, the American Society of Comparative Law, the Clinical Legal Education Association, the Southeastern Association of Law Schools, the Central Law Schools Association, the Mid-America Law Library Consortium, the American Association of Law Libraries, and the American Society of International Law.

The School of Medicine is a member of the Liaison Committee on Medical Education.

The Brown School at Washington University is accredited by the Council on Social Work Education and the Council on Education for Public Health.

The University Libraries are a member of the Association of Research Libraries.

The Mildred Lane Kemper Art Museum is nationally accredited by the American Alliance of Museums.
Undergraduate Study

Class Size

Nearly three-fourths of Washington University’s undergraduate classes range from one to 24 students. We believe smaller classes help students learn more through stimulating group discussion. Many classes may be larger at first, but they generally become smaller as students progress in their chosen fields.

Depending on the department, classes may be smaller or larger.

Teaching and Learning at Washington University: A Statement of Best Practices and Expectations

Amended statements endorsed by the Undergraduate Council on February 2, 2010, and November 2, 2015.

All members of the Washington University community share responsibility for creating an atmosphere conducive to learning. A collaborative learning environment involves the active participation of both instructors and students in the classroom and in activities outside the classroom. This environment requires:

• best efforts on the part of both faculty and students to enhance the learning experience for the benefit of all persons involved;
• recognizing that everyone present plays an important role; all participants in the learning experience deserve respect for what they contribute; and both faculty and students be sensitive to the importance of the others in this process;
• an atmosphere that embraces multiple identities in the classroom by demonstrating mutual respect for all persons regardless of political, racial, ethnic, religious, gender, sexual orientation, age, disability, socioeconomic or veteran status.

In response to changing classroom dynamics, we, the Undergraduate Council, make the following recommendations:

Expectations and responsibilities of the faculty

The faculty member is involved in several major roles, including those of teacher, scholar-researcher, and citizen in the university. For the unimpeded performance of these functions, the faculty member is guaranteed academic freedom. At the same time, the faculty member has clear responsibilities to the students and to the institution, particularly in the faculty member’s role as teacher. Instructors should provide the basic outlines for the learning experience and provide guidance as appropriate, generally in the form of a handout or easily accessible electronic document. Such guidance should normally involve:

• presenting a syllabus that:
  • identifies the goals of the course and its prerequisites, a schedule of major assignments and examinations, explicit criteria for how student work will be evaluated;
  • articulates ground rules for classroom interaction and consequences for infringement (How much active participation is expected of the student? Is attendance required? Is it acceptable to eat during class? What are the guidelines for collaboration inside and outside of the classroom?);
  • establishes behavior expectations for the class, including respecting every member, listening and engaging;
  • makes clear expectations for technology use during class;
  • includes links to information about inclusion and diversity, bias reporting, accommodations based upon sexual assault and mental health;
  • reminding students of, and upholding, the university’s standards for academic integrity;
  • bringing new perspectives and insights to assigned readings and other text materials;
  • conducting classroom and one-on-one interactions in keeping with the university’s guidelines on diversity and inclusion;
  • regularly meeting and punctuality in starting and dismissing class;
  • prompt and responsible grading (including midterms), with evaluative comments and opportunities for students to discuss their grades with the faculty member;
• adherence to the announced office hour schedule and offering as many avenues as possible for contact, including by online venue, telephone or email;
• using appropriate, relevant technology both inside and outside of the classroom to enhance communication between faculty and students;
• uploading course materials and sending emails or other notifications in a timely manner;
• overseeing assistants in instruction (AIs), including the training of AIs, providing definitions of grading expectations as per the University Code of Conduct, providing detailed rubrics for grading evaluations, case studies and projects, and ensuring a faculty review in the event students contest their grade and petition for regrading, especially to ensure grading uniformity;
• regular communication between two professors or more when they share in the teaching process of a one-semester course, including agreement about responsibilities, assignments given to students, and due dates expected;
• facilitation of and reflection on student evaluations of the faculty member’s teaching methods and materials, including midsemester evaluations, as a means of creating an atmosphere of shared responsibility within the classroom;
• regular communication with students regarding progress in the course, ways to improve, grading structure;
• avoiding prohibitive costs when ordering textbooks and other course materials; making electronic text available;
• adhering to the published final examination schedule to avoid interfering with students’ preparation for other classes;
• showing up to all the classes and giving students the full number of contact hours they deserve each semester.

Expectations and responsibilities of the students

Students must take responsibility for their own learning. Students also share with the instructor the responsibility for providing an environment conducive to learning. Students should personally:

• actively engage in learning the material and with the process of education, including meeting with the instructor and/or AI when requested to or when necessary;
• use the course materials, faculty expertise, and expectations for learning to build their own knowledge and skills;
• attend all classes, both lecture and discussion sessions, and participate in class discussions; leave class only for emergencies; use online resources for augmentation and review, not as a substitute for class;
• be punctual in completing assignments;
• behave in the classroom in a manner that demonstrates respect for all students and faculty and follows university guidelines for diversity and inclusion;
• adhere to instructor’s expectation for the use of technology during class, including laptops, tablets and phones;
• share responsibility for the flow of information concerning a course by regularly checking the course webpage, online discussion groups and university email;
• be familiar with, and adhere to, matters of academic integrity as identified by their instructors and their school within the university;
• participate in objective and constructive evaluations of the instructor, course content according to the syllabus, and required textbooks/materials to clarify opportunities and strengths that will help the instructor to improve the course in subsequent semesters;
• conform to the ground rules of the course as defined in the syllabus.

Learning outside the classroom

Students and instructors should consult at the beginning of the semester about the content and expectations regarding independent study, supervised internships, supervised research, fieldwork, and international learning.

Students and instructors should familiarize themselves with division/department/program policies regarding independent studies and internship opportunities.

Special student concerns

Students should take the initiative to inform the faculty of anticipated absences prior to the scheduled event and discuss special arrangements to compensate for missed instruction. Should the absence be emergent or unanticipated, it is the student’s responsibility to inform the faculty in a timely manner to minimize disruption of class progression as a whole. Students should recognize that the collective needs of the faculty and other students in a course may outweigh individual priorities. Faculty should be sensitive to individual student needs for special arrangements:

• to accommodate disabilities, illnesses, family emergencies or academic or professional opportunities that interfere with usual class attendance or performance;
• to provide accommodations when students miss class because of religious holidays.

Responsibilities of the university administration

For its part, the university administration must:

• continue to provide facilities and ensure adequate classroom and laboratory space that is stocked with sufficient, appropriate equipment;
• give priority to supporting both faculty and students in teaching and learning;
• provide opportunities for professional, student, and leadership development in both teaching and learning;
• be responsive when normal communications between faculty and students break down by providing for a process for discussion and negotiations;
• facilitate communication among various constituents of the university;
• facilitate the flow of visitors to the classroom by providing faculty ample notice.

Where to get help

For instructors: The departmental chair or associate chair, the Teaching Center, colleagues, and the relevant dean's office offer very useful advice on teaching techniques, materials and methods.

For students: The instructor, the assistants in instruction (AIs), and the Learning Center (https://learningcenter.wustl.edu) can be counted on for guidance on best learning techniques and practices. The Writing Center (http://writingcenter.wustl.edu) can be a very helpful resource for all levels of written assignments from concept identification and document structuring through final paper editing.

Should a student concern occur, the general process of communication and request for assistance, guidance, and problem resolution is to:

1. Raise the concern with the faculty member;
2. If the resolution has not been achieved, raise the concern with the associate chair or department chair;
3. If resolution has not been achieved, raise the concern with the student’s adviser(s).

Concerns and/or disagreements that have not been resolved by this process can be addressed to the faculty-student mediator.

If the student has a concern related to discrimination or harassment, the University Policy on Discrimination and Harassment (http://hr.wustl.edu/policies/Pages/DiscriminationAndHarassment.aspx) provides additional information about resources and options.

10/30/2015*

*This document shall be reviewed every five years.
Admission Procedures

First-Year Admission

The admissions committee reviews and assesses each application personally. Admission to Washington University is both selective and competitive. Students who come to Washington University have challenged themselves academically and personally during their high school years and are required to have earned a high school diploma or equivalent. A student's senior-year transcript should show that they continue to take demanding courses. Most applicants take advantage of honors, Advanced Placement and International Baccalaureate courses, if offered by their high schools. The admissions review takes high school offerings into account, and students are not penalized if they do not have access to advanced courses.

Most candidates' transcripts include the following:

- Four years of English
- Four years of mathematics, especially for Architecture, Business, and Engineering majors; calculus is strongly recommended for science majors in Arts & Sciences
- Three to four years of history or social science
- Three to four years of laboratory science; chemistry and physics are strongly recommended for Engineering majors
- At least two years of a foreign language
- Chemistry, physics, and the most challenging math programs available for students who plan to do course work in the sciences and/or pre-medicine

Other important parts of a student's application are as follows:

- Grades and class rank, if the student's high school ranks its students
- Counselor and teacher recommendations, which include information about the applicant's character and personal qualities
- Essays
- Extracurricular and community involvement, including positive impacts on home and community
- Standardized test scores (Either SAT or ACT scores are acceptable, and writing is not required. SAT Subject Tests are not required. Test results from any of the student's high school years are acceptable, although we encourage senior-year testing. We consider only the highest individual scores, whenever they occurred.)

Applying for Admission

For a student's application file to be complete, we must receive the following materials by the deadline for the decision plan selected:

- Common Application or Coalition Application
- Nonrefundable $75 fee or a fee-waiver request
- All supporting materials, including the Common or Coalition Application personal essay, the Washington University supplemental essay, a teacher recommendation, a school report for first-year admission or a dean's report for transfer admission, and the official transcript

Decision Plans

Washington University offers two binding Early Decision options (ED I, with a deadline of November 1 and notification by December 15, and ED II, with a deadline of January 2 and notification by February 15) and Regular Decision, with a deadline of January 2 and notification by April 1 each year.

If Washington University is the student's first choice, we encourage the student to apply Early Decision. Applying Early Decision signifies a binding commitment that the student will attend Washington University if admitted. This option requires the applicant to submit a nonrefundable enrollment deposit within two weeks of receiving notification of admission. If admitted, the student must withdraw applications at other schools. A student may apply to only one school through a binding Early Decision plan.

Selecting a Division

We encourage students to think about where their interests may lie at the time they apply in terms of a major and a degree path to pursue. They may select one of the five divisions (architecture, art, arts & sciences, business, engineering) or the Beyond Boundaries program as the primary point of interest. This allows us to ensure proper preparation and to provide effective academic advising from the start to help students realize their goals. Once admitted to a division, a student must spend one full semester in that division before requesting a change to another undergraduate division at Washington University. Students wishing to switch undergraduate divisions after the first semester do so by meeting with their dean's office.

If English Is Not the Student's Primary Language

Scores from one of three exams — TOEFL (Test of English as a Foreign Language), IELTS (International English Language Testing System), or the Duolingo English Test — are required of all international students for whom English is a second language, and they are also recommended for U.S. citizens whose second language is English. The tests administered in December of each year will be the last ones accepted for the following admission year.
Portfolios
In addition to the standard application materials mentioned above, applicants to the College of Architecture are encouraged and applicants to the College of Art are required to submit a portfolio of their work. All College of Art students will be considered for the Conway or Proetz Scholarship in art. Portfolios are to be submitted through SlideRoom and should include 12 to 15 pieces of recent work, which may include drawings, two- and three-dimensional pieces, and photographs. (If an applicant is submitting an architecture portfolio, they should not include CAD drawings or examples of their drafting skills.) The applicant may include additional information about each piece, such as the title, medium, dimensions and date completed.

Deferred Enrollment
Admitted students who have submitted their enrollment materials but wish to begin their studies at a later date may defer enrollment at Washington University for a period of one year, with an option to extend this period for one additional year. Deferred enrollment is designed for students who wish to travel or work between high school and college. Courses taken during the deferred period normally will not be accepted for credit; the final decision about the transferability of credit lies with the dean's office. Deferral should be requested in writing from the Office of Undergraduate Admissions. The Committee on Admissions will review the applicant's case and notify the applicant of its decision. The applicant must reapply for financial assistance during the application cycle immediately preceding the date of desired entry.

Please visit the Admissions website (http://admissions.wustl.edu) for more information.

Transfer Admission
Transfer admission to Washington University is selective and competitive. The student should apply as a transfer student if they meet all of the following requirements:

1. The applicant has finished secondary school and completed some college study.
2. The applicant would like to be considered for admission with advanced standing at Washington University.
3. The applicant is interested in enrolling full-time in an undergraduate degree program with a specific academic focus.
4. The applicant has never attended any of Washington University's full-time, degree-granting schools.

Washington University accepts applications for transfer admission during the fall semester. For current application deadlines (https://admissions.wustl.edu/how-to-apply/application-deadlines), please visit the Admissions website. In any given year, any academic division may have from zero to a small handful of slots available. With this small number of transfer spots open, we recommend that the strongest candidates for admission present proof of a high school diploma or equivalent and proof of a high level of academic success at their current institution. Successful applicants present at least a B+ average from a two- or four-year college in courses across a broad academic curriculum. Some of our academic divisions require specific grades in specific courses. For example, students with interests in engineering, business, or the physical or biological sciences must present a strong background in science and mathematics, including calculus. In addition, applicants must have left their current institution and all previous institutions in good standing and be eligible to return.

If an applicant has been away from a formal academic setting for more than two years, we require the applicant to complete at least one year (30 hours) of work at another college or university before submitting an application for transfer admission.

Applicants must submit their high school transcripts, their application, official transcripts of all previous college work, standardized test scores (SAT or ACT taken during high school), a Transfer Academic Evaluation, a Transfer Registrar Report, and the nonrefundable $75 application fee to the Office of Undergraduate Admissions. For additional admissions information, please visit the Admissions website (http://admissions.wustl.edu).

Applicants who wish to be considered for financial assistance must file the Financial Aid Profile or Washington University's Family Financial Profile (FFP) on the Student Financial Services website (https://sfs.wustl.edu/pages/family-financial-profile.aspx). Detailed information about financial support (p. 32) can be found in this Bulletin.

Transfer admission information for individual schools is listed as follows.

Transferring into Arts & Sciences
Each year, a number of students from other colleges and universities transfer into the College of Arts & Sciences. Upon their admission, the transfer student adviser reviews and evaluates their previous academic work. Full credit is normally granted for courses taken at accredited institutions, provided that the university offers comparable courses and that the student has completed the courses with a grade of C or better (please note: online course work does not transfer). In addition, transfer credit may be counted where applicable and upon approval toward major or minor requirements. Transfer students must be enrolled for at least four consecutive full-time semesters to satisfy the residency requirement. They must complete a minimum number of units at Washington University and a minimum number of units in the College of Arts & Sciences, in accordance with the table found under the heading “Transfer Students” on the Arts & Sciences Degree Requirements (p. 907) page of this Bulletin.
All transfer students are assigned an academic adviser. When they declare a major, they also meet with an adviser in the major department. The full range of curricular opportunities offered through the college is open to transfer students when prerequisites are satisfied. An applicant should direct specific questions about transfer credit and course sequences at Washington University to the College of Arts & Sciences.

Transferring into Architecture

Places for transfer students are extremely limited and require strong performance in an arts and sciences curriculum, preferably with preparation in the visual arts. Placement into the design studio sequence is determined by a portfolio review and an evaluation of prior course work. To assist with appropriate placement, an interview with the associate dean of students, while not required, is strongly recommended. The applicant should bring a transcript to the meeting. The applicant's previous work should parallel as closely as possible the course work outlined on the Architecture Degree Requirements (p. 69) page.

Transfer applicants to the College of Architecture are required to submit a portfolio consisting of 12 to 15 pieces of recent work for review by the faculty through the SlideRoom function of the Common Application. This should include examples of work that indicate the applicant’s technical and conceptual level of accomplishment. Some drawing should be from direct observation. If possible, applicants should submit examples of work in different media to demonstrate a range of art and design experiences.

Transferring into Art

The number of studio art credits that a transfer applicant has already earned, in combination with an evaluation of the applicant's portfolio, determines the level at which the student is admitted. As much as possible, the studio art courses taken at other institutions should correspond with the program at Washington University as outlined on the Art Degree Requirements (p. 129) page. To assist with appropriate placement, an interview with the associate dean of students, while not required, is strongly recommended. The applicant should bring a transcript to the meeting.

Transfer applicants to the College of Art are required to submit a portfolio through the SlideRoom function of the Common Application for faculty review. The portfolio should consist of 12 to 15 pieces of recent work and show a variety of art experiences, including drawings, work utilizing design principles, and some work in color. Applicants should include examples of work from basic drawing and design classes that indicate their technical and conceptual level of accomplishment, and some drawing should be from direct observation. If possible, applicants should submit examples of work in different media to demonstrate a range of art and design experiences. If applying to the second- or third-year level, some of the work should be in the area of the applicant's intended major.

Transferring into Business

The Olin Business School offers transfer enrollment during the fall semester. The strongest candidates for admission are able to demonstrate solid academic performance at a two- or four-year college that mirrors most of the academic requirements that our students complete during their first or second year of study. For a sophomore-level transfer candidate, this would include Calculus II at the college level. For a junior-level transfer candidate, this would include financial accounting, microeconomics, and perhaps macroeconomics and managerial accounting. All transfers to the Olin School must have completed an equivalent to Calculus II at the college level. Students who are admitted to the Olin Business School should expect a written course evaluation from the transfer student adviser within two weeks of receiving their acceptance letter; this letter will indicate the courses that will be accepted by the business school. A maximum of 60 credits will be accepted toward our undergraduate degree. Students must earn at least a C grade in the course for the units to transfer to Washington University. Courses taken online are not accepted as transfer credit. Grades will not transfer to Washington University.

All transfer students are assigned an academic adviser. Transfer students must be enrolled for at least four consecutive full-time semesters to satisfy the residency requirement.

Please refer to the Degree Requirements (p. 959) for the Bachelor of Science in Business Administration degree.

Transferring into Engineering

Applicants may apply for admission if they have completed a minimum of one year of college work elsewhere; however, the McKelvey School of Engineering does not accept transfer students who have already completed a bachelor's degree. The transfer applicant must demonstrate academic achievement (i.e., a grade average of B+ or better), with strength in mathematics (calculus) and science (chemistry/physics). Transfer applicants to the McKelvey School of Engineering should have completed one semester of an English composition course, two semesters of calculus-based physics, and sufficient calculus (typically three semesters) to be prepared for differential equations. Applicants interested in biomedical engineering should also have completed at least one semester of chemistry with lab and an introductory biology sequence that includes cellular, molecular and developmental biology as well as genetics. Applicants interested in chemical engineering should have completed at least one biology course and sufficient chemistry to be ready to take organic chemistry. After completing the application process, an evaluation of the applicant's record will be made to determine the transfer of college credit. Grades earned do not transfer, but the applicant must earn a letter grade of C- or better for the
course credit to transfer. Courses taken on a pass/fail basis do not transfer.

To be recommended for any bachelor's degree, a transfer applicant must satisfy applicable requirements of the McKelvey School of Engineering as shown in the Degree Requirements (p. 1064) section of this Bulletin. Please note that all students earning an undergraduate engineering degree are required to complete a minimum of 60 course units at Washington University.

Pre-Matriculation Units

Pre-matriculation units of credit are earned before an applicant's enrollment at Washington University as a first-year student and can be applied toward a Washington University degree. A maximum of 15 units of pre-matriculation credit may be counted toward any undergraduate degree. These units will count toward graduation but will not meet general education requirements. Sources for pre-matriculation units of credit include Advanced Placement (AP) examinations, International Baccalaureate (IB) courses, British Advanced (A) Levels, course credit earned by proficiency (e.g., back credit), and college credit earned after the student's junior year in high school. Credits earned via the High School Summer Scholars or High School College Access programs through University College are considered to be pre-matriculation units and are subject to the same regulations.

A student in the College of Arts & Sciences may be awarded up to 15 units of credit from all sources (i.e., standardized placement tests and college course work) that were completed prior to enrollment as a first-year student at Washington University. The units of credit awarded from these sources do not apply toward the distribution requirements.

A student earning the Bachelor of Science in Business Administration may apply a maximum of 15 pre-matriculation units toward the degree. The units of credit awarded from these sources do not apply toward the distribution requirements. A transcript notation is made of all pre-matriculation units earned before enrollment in Washington University.

A student in the College of Art may apply a maximum of 15 pre-matriculation units to the Bachelor of Fine Arts degree. The units of credit awarded from these sources do not apply toward graduation requirements. A transcript notation is made of all pre-matriculation units earned before enrollment in Washington University.

A student should submit official score reports from AP examinations, College Board Achievement and Aptitude Tests, International Baccalaureate courses (higher-level scores), and British A-Level examinations. All appropriate test scores will have course equivalents assigned to them and noted on the transcript. However, a maximum of 15 units of credit will be awarded, provided credit has not been already designated as the result of college course work having been transferred as well.

Grades for courses taken at another college or university do not transfer. A maximum of 15 units of credit may be awarded for college course work done prior to matriculation, provided no other pre-matriculation credits have been awarded. In the College of Arts & Sciences, Olin Business School, and McKelvey School of Engineering, course work completed at another college or university prior to matriculation must meet the following standards:

1. Enrolled in primarily by matriculated college students
2. Taught by college faculty
3. Taught on a college campus
4. Taken after the junior year in high school
5. Not on the high school transcript and did not count toward the high school diploma
6. Taken at a fully accredited college or university

Secondary School Course Work

Washington University does not recognize credit for courses taken in high schools and taught by secondary instructors, even when offered under the aegis of a university. The university accepts credit for courses taken at and taught by faculty of a college or university, provided the course has not been credited toward the high school diploma.

The College of Arts & Sciences accepts credit only for college course work taken after the junior year of high school. To request to receive credit for college courses completed prior to Washington University, visit the College of Arts & Sciences website (https://artsci.wustl.edu/resources/policies-procedures).

Proficiency and Placement Examinations

Superior results on proficiency and placement examinations allow students to enter advanced courses at the beginning of their college career, to fulfill some requirements for a major or a minor by examination rather than by course work, and to earn credit toward their degree. Students will have all accepted pre-matriculation work noted on their transcript so they may go directly into advanced courses.

Four types of examinations are recognized:

1. Washington University Placement Examinations. These placement examinations are administered by various departments and have different requirements for advanced placement.
2. International Baccalaureate. Students who have earned the International Baccalaureate diploma or who have successfully passed examinations in the program should consult a dean in their undergraduate division of the university about advanced placement and credit. Scores may be used for placement or granting of degree.
credit, according to the recommendations of the various departments. Subsidiary-level scores are not recognized.

3. **British Advanced (A) Levels.** These grades may be used for placement or granting of degree credit, according to the recommendations of the various departments.

4. **Advanced Placement (AP) Examinations.** These are used for placement, partial fulfillment of major or minor requirements, and the granting of degree credit, according to the recommendations of the various departments. Examinations are given by the College Board in May of each year for secondary school students who have been enrolled in college-level courses in the same subject or subjects of the exam. For the most current policy information, visit the College of Arts & Sciences Advanced Placement webpage (http://college.artsci.wustl.edu/policies/placement_credit/ap). Information about these exams may be obtained from the College Board Advanced Placement Examinations, Box 592, Princeton, NJ 08540 or by calling 888-225-5427.

**SAT Subject Tests:** These examinations in modern languages are administered by the College Board. They are required for study in certain languages.

**College Level Examination Program (CLEP):** These scores are not accepted for credit or placement.

### Washington University Placement Examinations (Back Credit)

#### East Asian Languages

Credit is typically awarded for completing the following courses with a grade of B- or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required.

- **Chinese**
  - Chinese 211 = 3 units for Chinese 102D
  - Chinese 360 = 3 units for Chinese 102D and 3 units for Chinese 212

- **Japanese**
  - Japan 213 = 3 units for Japan 104D
  - Japan 412 = 3 units for Japan 104D and 3 units for Japan 214

- **Korean**
  - Korean 217 = 3 units for Korean 118D
  - Korean 417 = 3 units for Korean 118D and 3 units for Korean 218

- **French (L34)**
  - French 201D = 3 units for French 102D
  - French 307D = 3 units for French 201D and 3 units for French 102D
  - French 308D = 3 units for French 307D and 3 units for French 201D (credit awarded for placement; completion of the course is not required)

#### Germanic Languages and Literatures (L21)

- **German**
  - German 210D = 3 units for German 102D
  - German 301D = 3 units for German 102D and 3 units for German 210D
  - German 302D = 3 units for German 102D and 3 units for German 210D

#### Greek (L09)

- Students may be awarded 3 units of credit for Greek 101D upon completion of Greek 210. Students may be awarded 3 units of credit for Greek 101D and 3 units of credit for Greek 102D upon completion of Greek 317C or Greek 318C with a grade of B or better. Placement at the appropriate level is determined by departmental examination.

#### Italian (L36)

- **Italian**
  - Ital 201D = 3 units for Ital 102D
  - Ital 307D = 3 units for Ital 201D and 3 units for Ital 102D
  - Ital 308D = 3 units for Ital 307D and 3 units for Ital 201D (credit awarded for placement; completion of the course is not required)

#### Jewish, Islamic, and Middle Eastern Languages

Credit is typically awarded for completing the following courses with a grade of B- or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required.

- **Arabic**
  - Arab 207D = 3 units for Arab 108D
  - Arab 307D = 3 units for Arab 108D and 3 units for Arab 208D

- **Hebrew**
  - HBRW 213D or HBRW 214D = 3 units for HBRW 106D
  - HBRW 320D or 322 = 3 units for HBRW 106D and 3 units for HBRW 214D
  - HBRW 384 or 385 = 3 units for HBRW 106D and 3 for HBRW 214D
  - HBRW 401D or HBRW 402 = 3 units for HBRW 214D and 3 units for HBRW 322D
Bulletin 2019-20
Admission Procedures (10/29/19)

Hindi

Hindi 201 = 3 units for Hindi 111D
Hindi 301 = 3 units for Hindi 111D and 3 units for Hindi 201

Latin (L10)

Students may be awarded 3 units of credit for Latin 101D and 3 units of credit for Latin 102D upon completion of Latin 301, Latin 3161, Latin 3171 or Latin 3181 (with a grade of B or better). Placement in the appropriate course is determined by examination.

Mathematics (L24)

If students complete one of the following courses with a grade of C+ or better at Washington University, then they are eligible for back credit. Credit is not awarded twice for transfer or AP scores.

Math 132 = 3 units for Math 131
Math 233 = 3 units for Math 131 and 3 units for Math 132
All other courses = no credit

Russian (L39)

Students can receive back credit for up to 6 credits contingent upon successful completion (B or higher) of the next level.

Russ 404, Russ 405 or Russ 431, Russ 432 = 3 units for Russ 322 and 3 units for Russ 324
Russ 322, 324 = 3 units for Russ 211 and 3 units for Russ 212
Russ 211, 212 = 3 credits for Russ 102

Spanish (L38)

Credit is awarded for the following courses with a grade of B or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required. No back credit is awarded for Span 101 or Span 223.

Span 201E = 3 units for Span 102D
Span 202 = 3 units for Span 201E and 3 units for Span 102D
Span 307D* = 3 units for Span 202 and 3 units for Span 201E
Span 308E = 3 units for Span 307D* and 3 units for Span 202 (credit awarded for placement; completion of the course is not required)

*Back credit for Span 307D can only be used for elective credit; it cannot be used toward a Spanish major or minor.

Chemistry (L07)

Those students who receive a 6 or 7 on the IB test in Chemistry will receive 3 units each of Chem 103 and 104. Receipt of these credits has no bearing on the fulfillment of chemistry requirements for pre-medicine or any science major and cannot be used to satisfy prerequisites for Organic Chemistry. All students who wish to pursue a major or a pre-professional preparatory curriculum requiring general chemistry must take Chem 111A and Chem 112A and the associated labs, Chem 151 and Chem 152. Students who wish to exempt either the first or second semester of general chemistry, including the labs, must pass a placement exam administered by the Department of Chemistry during the first week of classes in the fall.

Grade 7, 6: 6 units of credit: 3 units each of Chem 103 and 104. These units do not replace Chem 111A or Chem 112A. Chem 112A must be completed prior to registration in Chem 261 or Chem 401 or any advanced courses in Chemistry.

Grade 5, 4, 3, 2, 1: No credit given.

Classical Greek (L09)

No credit awarded. Placement determined by departmental examination. Students who place into Greek 317C may be awarded 6 back credits upon completion of Greek 317C with a grade of B or better. Placement at the appropriate level is determined by departmental examination.

Computer Science (E81)

No credit given but a student can take the CSE 131 placement exam. Contact the CSE office at 314-935-6160 for more information.

Economics (L11)

Grade 7: 3 units of undergraduate general degree credit, contingent upon completion of Econ 4011 with a grade of B or better. The credit will not count toward the economics major/minor. Placement into any economics course is permitted (assuming other prerequisites are met); however, bypassing introductory courses may be disadvantageous, and students are strongly encouraged to consult with the department’s academic coordinator. Bypassing Econ 1011 and/or Econ 1021 requires the completion of additional economics elective credit for the major/minor.

Grade 6, 5, 4, 3, 2, 1: No credit given. Not recommended to bypass Econ 1011 or Econ 1021.

International Baccalaureate

Biology (L41)

Grade 7, 6: 6 units of credit for Biol 100A (elective credit). Students who plan to major in Biology or who are pre-med normally will enroll in Biol 2960 during the spring of freshman year and Biol 2970 during the fall of sophomore year.

Grade 5, 4, 3, 2, 1: No credit given.

Business/Organization

No credit given.
Grade 6, 5, 4, 3, 2, 1: No credit given.

French (L34)
No credit awarded. Students will need to take the departmental placement exam. Students who place into and complete higher-level courses can earn up to 6 units of back credit for preceding courses.

Geography
No credit awarded.

German A1, German B (Modern Foreign Languages) (L21)
Students should take the departmental placement exam. Students who place into and complete these courses with a B- or better will receive the following credit:
- German 210D = 3 units for German 102D
- German 301D = 3 units for German 102D and 3 units for German 210D
- German 302D = 3 units for German 102D and 3 units for German 210D

Greek (L09)
Students may be awarded 6 units of back credit upon completion of a Greek L09 course at the 300 level or above with a grade of a B or better. Placement at the appropriate level is determined by departmental examination.

History (L22)
- American History: No credit awarded.
- European History: No credit awarded.
- African History: No credit awarded.
- Islamic World History: No credit awarded.
- South and Southeast Asia History: No credit awarded.
- South Asia and Middle East History: No credit awarded.

Italian (L36)
No credit awarded. Students will need to take the departmental placement exam. Students who place into and complete higher-level courses can earn up to 6 units of back credit for preceding courses.

Latin (L10)
Students who place into Latin 301 or above may be awarded 6 units of back credit upon completion of the course with a grade of B or better. Placement at the appropriate level is determined by departmental examination.

Mathematics (L24)
Grade 7, 6: 3 units of credit for Math 131.
Grade 5, 4, 3, 2, 1: No credit awarded.

Music (L27)
Grade 7, 6: 3 units of elective credit for students who do not major or minor in music.
Grade 5, 4, 3, 2, 1: No credit awarded.

Norwegian
No credit awarded.

Philosophy (L30)
Grade 7, 6: 3 units of credit for Phil 125C.
Grade 5, 4, 3, 2, 1: No credit awarded.

Physics (L31)
Physics HL: Grade 7: 6 units of credit for Physics 113A and 114A.
Grade 6, 5: 3 units of credit for Physics 113A.
Grade 4, 3, 2, 1: No credit awarded.

Psychological & Brain Sciences (L33)
Grade 7, 6: Waives the Psych 100B Introduction to Psychology requirement, but no college credit given.

Social Anthropology (L48)
Credit is evaluated on an individual basis by the anthropology department.

Spanish (L38)
No credit awarded. Students will need to take the departmental placement exam. Students who place into and complete higher-level courses can earn up to 6 units of back credit for preceding courses.

Visual/Studio Arts (F20)
Grade 7: 3 units of elective credit.
Grade 6, 5, 4, 3, 2, 1: No credit given.

British A-Level

Accounting (B50)
Advanced Level grades of A, B, C & D to be awarded 3 units of credit for ACCT 2610.

Arabic (L49)
Please refer to departmental advanced placement policy (Jewish, Islamic, and Middle Eastern Studies (p. 239)) for more information.

Biology (L41)
Grades of A or B to be awarded 3 units of credit equivalent to Biol 100A.

Business Studies (B53)
Advanced Level grades of A, B, C & D to be awarded 3 units of management elective credit (BS3 0001).

Chemistry (L07)
A grade of A to be awarded 3 units each for the following courses: Chem 103 and Chem 104. A grade of B to be awarded 3 units for the following course: Chem 103.

Computer Science (E81)
No credit given but a student can take the CSE 131 placement exam. Contact the CSE office at 314-935-6160 for more information.

Economics (L11)
3 units of undergraduate general degree credit for students with a grade (on the A-level exam) of A, contingent upon completion of Econ 4011 with a grade of B or better. The credit will not count toward the economics major/minor. Placement into any economics course is permitted (assuming other prerequisites are met); however, bypassing introductory courses may be disadvantageous, and students are strongly encouraged to consult with the department's academic coordinator. Bypassing Econ 1011 and/or Econ 1021 requires the completion of additional economics elective credit for the major/minor.

French (L34)
A grade of A to be awarded 3 units for French 102D and 3 units of French 201D, with 3 additional units to be awarded contingent upon successful completion of a 300-level course (other than conversation). A grade of B to be awarded 3 units upon successful completion of a 300-level course.

German (L21)
Student should take the departmental placement exam. Students who place into and complete these courses with a B- or better will receive the following credit:
- German 210D = 3 units for German 102D
- German 301D = 3 units for German 102D and 3 units for German 210D
- German 302D = 3 units for German 102D and 3 units for German 210D

Greek (L09)
Students may be awarded 6 units of back credit upon completion of a Greek (L09) course at the 300 level or above with the grade of a B or better. Placement at the appropriate level is determined by departmental examination.

History (L22)
Grades of A or B to be awarded 3 units of elective credit.

Latin (L10)
Students who place into Latin 301 or above may be awarded 6 units of back credit upon completion of the course with the grade of a B or better. Placement at the appropriate level is determined by departmental examination.

Mathematics (L24)
Advanced Level grades of A and B will be awarded 3 units of credit for Math 131 automatically. An Advanced Level grade of C will only receive credit for Math 131 upon successful completion of Math 132 with a grade of C+ or better at Washington University.

Mathematics (Further) (L24)
Advanced Level grades of A and B will be awarded 6 units of credit for Math 131 and Math 132 automatically. An Advanced Level grade of C will only receive credit for Math 131–132 upon successful completion of Math 233, with a grade of C+ or better at Washington University (or credit for Math 131 will be given for completion of Math 132). This course essentially covers all the material in Math 131–132 together with some extra physics and probability statistics.

Music (L27)
A grade of A to be awarded 3 units each for the following courses: Music 121C, Music 122C.

Physics (L31)
A grade of A on the physics A-level exam will earn 3 units of credit for Physics 113A and 3 units of credit for Physics 114A. A grade of B on the physics A-level exam will earn 3 units of credit for Physics 113A.

Psychological & Brain Sciences (L33)
A grade of A waives the Psych 100B Introduction to Psychology requirement, but no college credit given.

Spanish (L38)
Credit is awarded for the following courses with a grade of a B or better. Native speakers are not eligible for back credit, or secondary or post-secondary study of the language is required. No back credit is awarded for Spanish 101 or Span 223.
- Span 201E = 3 units for Span 102D
- Span 202 = 3 units for Span 201E and 3 units for Span 102D
- Span 307D = 3 units for Span 202 and 3 units for Span 201E
- Span 308E = 3 units for Span 307D* and 3 units for Span 202 (credit awarded for placement, completion of the course is not required)

* Back credit for Spanish 307D can only be used for elective credit; it cannot be used toward a Spanish major or minor.

Writing (L13)
No credit or placement given.
Advanced Placement

Art History (L01) — Test: AHS

Grade 5, 4: 3 units of elective credit (Art-Arch 0001) contingent upon the completion of a 300- or 400-level Art History course with a grade of B or better. Students in the Sam Fox School must complete Art-Arch 113.

Grade 3, 2, 1: No credit given.

Biology (L41) — Test: BIO

Grade 5, 4: 6 units of credit for Biol 100A (elective credit). Students who plan to major in Biology or who are pre-medicine normally will enroll in Biol 2960 in the spring of freshman year and Biol 2970 in the fall of sophomore year.

Grade 3, 2, 1: No credit given.

Chemistry (L07) — Test: CHE

Those students who receive a 5 on the AP test in Chemistry will receive 3 units each of Chem 103 and Chem 104. Those students who receive a 4 receive 3 units of Chem 103. Receipt of these credits has no bearing on the fulfillment of chemistry requirements for pre-medicine or any science major and cannot be used to satisfy prerequisites for Organic Chemistry. All students who wish to pursue a Chemistry major must take Chem 111A and Chem 112A and the associated labs, Chem 151 and Chem 152. Students who wish to pursue another major or a pre-professional preparatory curriculum requiring general chemistry must take either Chem 105 and Chem 106 or Chem 111A and 112A (specific requirements defined by the major program) and the associated labs, Chem 151 and Chem 152. Students who wish to exempt either the first or second semester of general chemistry, including the labs, must pass a placement exam administered by the Department of Chemistry during the first week of classes in the fall.

Grade 5: 6 units of credit: 3 units each of Chem 103 and Chem 104. These units do not replace Chem 105/106 or Chem 111A/112A. Chem 106 or Chem 112A must be completed prior to registration in Chem 261 or Chem 401 or any advanced courses in Chemistry.

Grade 4: 3 units of Chem 103. These units do not replace Chem 105/106 or Chem 111A/112A.

Grade 3, 2, 1: No credit given.

Computer Science (E81) — A Test

Grade 5, 4: 3 units of general elective credit for CSE 131.

Grade 3, 2, 1: No credit or placement given, but a student can take the CSE 131 placement exam and receive "proficiency" credit if a passing score is achieved.

Computer Science (E81) — AP Computer Science Principles/Test CSP

Grade 5, 4: 3 units of general elective credit for E81 013.

Grade 3, 2, 1: No credit given. Students who want to confirm their skills can take the placement exam during Orientation.

Economics-Micro (L11) — Test: EMI

For students entering Summer 2012 or later:

Grade 5: 3 units of undergraduate general degree credit, contingent upon completion of Econ 4011 with a grade of B or better. The credit will not count toward the economics major/minor. Placement into any economics course having an Econ 1011 prerequisite is permitted; however, bypassing introductory courses may be disadvantageous, and students are encouraged to consult with the department's academic coordinator. Bypassing Econ 1011 requires the completion of additional economics elective credit for the major/minor.

Grade 4, 3, 2, 1: No credit given. Not recommended to bypass Econ 1011.

Economics-Macro (L11) — Test: EMA

Grade 5: 3 units of undergraduate general degree credit, contingent upon completion of Econ 4021 with a grade of B or better. The credit will not count toward the economics major/minor. Placement into any economics course having an Econ 1021 prerequisite is permitted (assuming other prerequisites are met); however, bypassing introductory courses may be disadvantageous, and students are encouraged to consult with the department's academic coordinator. Bypassing Econ 1021 requires the completion of additional economics elective credit for the major/minor.

Grade 4, 3, 2, 1: No credit given. Not recommended to bypass Econ 1021.

English: Language and Composition (L13) or Literature and Composition (L14) — Test: ENG

Grade 5: 3 credits of elective credit (L13 0001) contingent upon completing L59 111-119, L59 100 or L13 Writing 103 with a grade of B or better.

Grade 4, 3, 2, 1: No credit given.

French Language (L34) — Test: LNF

To receive Advanced Placement credit in French for a score of 3 or 4, the student must complete a 300-level course with a grade of B or better.
Grade 5: 3 units of credit for French 102D and 3 units of credit for French 201D. Students may enroll in a 300-level course conducted in the language.

Grade 4: Automatically grants 3 credits for French 102D, and gives another 3 extra credits for French 201D contingent upon satisfactory completion of a 300-level course with a B or better — other than conversation — conducted in the language.

Grade 3: 3 units of credit for French 102D and 3 units of credit for French 201D, contingent upon completion of a 300-level course with a grade of B or better — other than conversation — conducted in the language.

Grade 2, 1: No credit given.

French Literature (L34) — Test: LNF
To receive Advanced Placement credit in French for a score of 3 or 4, students must complete a 300-level course with a grade of B or better.

Grade 5: 3 units of credit for French 102D awarded automatically; students may enroll in any 300-level course conducted in the language.

Grade 4: Automatically grants 3 credits for French 102D, and gives another 3 extra credits for French 201D contingent upon satisfactory completion of a 300-level course with a B or better — other than conversation — conducted in the language.

Grade 3: 6 units of credit equivalent to French 102D and French 201D, contingent upon completion of a 300-level course with a grade of B or better — other than conversation — conducted in the language.

Grade 2, 1: No credit given.

German (L21) — Test: LNG
Grade 5: 3 units of credit for German 102D and 3 units for German 210D awarded automatically; students may enroll in any 300-level German course.

Grade 4: 3 units of credit for German 102D awarded automatically; an additional 3 units of credit* for German 210D awarded upon satisfactory completion of German 301D (B- or better). *Please note: Students may receive this credit only if they start their language study at the 300 level.

Grade 3: 3 units of credit for German 102D* and 3 units for German 210D, awarded upon satisfactory completion of German 301D (B- or better). *Please note: Students may receive this credit only if they start their language study at the 300 level.

Grade 2, 1: No credit given. Should take departmental placement exam.

History (L22)
American History — Test: HSA
(A grade of 5 on the AP exam can fulfill Introductory course requirements for the history major and minor.) (L22)

Grade 5: 3 units of credit for History 103.

Grade 4: 3 units of elective credit for History 0001.

Grade 3, 2, 1: No credit given.

European History — Test: HSE (A grade of 5 on the AP exam can fulfill Introductory course requirements for the history major and minor.) (L22)

Grade 5: 3 units of credit for History 102.

Grade 4: 3 units of elective credit for History 0001.

Grade 3, 2, 1: No credit given.

World History — Test: HSW (A grade of 5 on the AP exam can fulfill Introductory course requirements for the history major and minor.) (L22)

Grade 5: 3 units of credit for History 104.

Grade 4: 3 units of elective credit for History 0001.

Grade 3, 2, 1: No credit given.

Latin (L10) — Test: LNL
Grade 5, 4: 3 units of credit for Latin 102D and 3 units of credit for Latin 102D upon completion of Latin 301 or higher with a grade of B or better. Placement at the appropriate level is determined by departmental examination.

Grade 3, 2, 1: No credit or placement given. Placement at the appropriate level is determined by departmental examination.

Mathematics (L24) — Test: MAB
The mathematics and statistics department gives a placement exam, available online and also during the fall orientation period. We ask that all entering students planning to enroll in a calculus course (except those with an AP score of 4 or 5) take the placement exam. Only an AP score of 5 receives automatic credit.

Grade 5: 3 units of credit for Math 131. The student will be placed into Math 132.

Grade 4: The student will probably be placed into Math 132.

Grade 3: Students with scores of less than 4 should consult with their advisers about placement based on the Mathematics and Statistics Department Placement Test, SAT scores and high school record. It will be helpful to the adviser if the student brings the title and the author's name of the calculus book used in high school and a photocopy of its table of contents, indicating which chapters were covered.

Grade 2, 1: Students will be placed into Math 131.

Mathematics (L24) — Test: MBC
The mathematics and statistics department gives a placement exam, available online and also during the fall orientation period. We ask that all entering students planning to enroll in a calculus course (except those with an AP score of 4 or 5) take the placement exam. Only an AP score of 5 receives automatic credit.

Grade 5: 3 units of credit for Math 131 and 3 units of credit for Math 132. The student will be placed into Math 233. *An AB Subscore of 5 will earn 3 units of credit for Math 131.

Grade 4: The student probably will be placed into Math 233.

Grade 3: Students with scores of less than 4 should consult with their advisers about placement based on the Mathematics and Statistics Department Placement Test, SAT scores and high school record. It will be helpful to the adviser if the student brings the title and the author's name of the calculus book used in high school and a photocopy of its table of contents, indicating which chapters were covered.

Grade 2, 1: Students will be placed into Math 132.

** Any student entering the Calculus 131–132–233 sequence can receive AP credit for earlier courses in this sequence by successful completion, with a grade of C+ or better at Washington University, of the next course in the sequence. In all cases, this assumes that the student does not already have credit for the preceding courses (for example, by transfer from another college or university).

**Music Literature/Listening (L27) — Test: MUL**

Grade 5: 3 units of elective credit for Music 0001.

Grade 4: 3 units of elective credit for Music 0001.

Grade 3, 2, 1: No credit given.

**Music Theory (L27) — Test: MUT**

Grade 5: 3 units of elective credit for Music 0001.

Grade 4: 3 units of elective credit for Music 0001.

Grade 3, 2, 1: No credit given.

**Physics (L31)**

Physic 1 Test — Test: P1

Grade 5: 3 units of elective credit for Physics 113A. This corresponds to the first semester in a two-semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 191 and Physics 191L in the fall semester.

Grade 4, 3, 2, 1: No credit or placement given.

Physic 2 Test — Test: P2

Grade 5: 3 units of elective credit for Physics 114A. This corresponds to the second semester in a two-semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 192 and Physics 192L without first taking Physics 191.

Grade 4, 3, 2, 1: No credit or placement given.

**C Test (Mechanics) — Test: PCM**

Grade 5: 4 total units of credit for Physics 113A and Physics 114A (3 credits). This corresponds to the first semester in a two-semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 191 and Physics 191L in the fall semester, followed by Physics 192 and Physics 192L in the spring semester. Students may not enroll in Physics 192 without first taking Physics 191.

Grade 4: 3 units of elective credit for Physics 113A. This corresponds to the first semester in a two-semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 191 and Physics 191L in the fall semester.

Grade 3, 2, 1: No credit given.

**C Test (Electricity and Magnetism) — Test: PCE**

Grade 5: 4 total units of credit for Physics 192 (3 credits) and Physics 192L (1 credit). This corresponds to the second semester in a two-semester, calculus-based introductory physics sequence. Physics majors and students interested in an advanced treatment of introductory physics should enroll in Physics 191 and Physics 191L in the fall semester, followed by Physics 192 and Physics 192L in the spring semester. Students may not enroll in Physics 192 without first taking Physics 191.

Grade 4: 3 units of elective credit for Physics 114A. This corresponds to the second semester in a two-semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 191 and Physics 191L in the fall semester.

Grade 3, 2, 1: No credit given.

**Political Science (L32)**

American Politics — Test: POA

Grade 5, 4: 3 units of undergraduate credit L32 0001, contingent upon completion of an advanced course (300-/400-level) in American Politics with a grade of C or better. The credit will not count toward the political science major/minor, but waives the Pol Sci 101B requirement.
Grade 3, 2, 1: No credit given.

**Comparative Politics — Test: POC**

Grade 5, 4: 3 units of undergraduate credit L32 0002, contingent upon completion of an advanced course (300-/400-level) in Comparative Politics with a grade of C or better. The credit will not count toward the political science major/minor, but waives the Pol Sci 102B requirement.

Grade 3, 2, 1: No credit given.

**Psychological & Brain Sciences (L33)**

Grade 5: Waives the Psych 100B Introduction to Psychology requirement, but no college credit given.

Grade 4, 3, 2, 1: No credit or placement given.

**Spanish Language (L38) — Test: LNS**

All students wishing to enroll in Spanish must take the online placement exam. Class placement is decided solely on the basis of this exam and not by AP scores.

**Spanish Literature (L38) — Test: LNS**

All students wishing to enroll in Spanish must take the online placement exam. Class placement is decided solely on the basis of this exam and not by AP scores.

**Statistics (L24) — Test: STA**

Grade 5: Students with a 5 on the AP Statistics Exam will receive 3 units of credit for Math 2200.

Grade 4, 3, 2, 1: No credit given.

**Studio 2D Design (F20) — Test: A2D**

Grade 5: 3 units of elective credit for Fine Arts 0001.

Grade 4, 3, 2, 1: No credit given.

**Studio 3D Design (F20) — Test: A3D**

Grade 5: 3 units of elective credit for Fine Arts 0001.

Grade 4, 3, 2, 1: No credit given.

**Studio Drawing (F20) — Test: DRW**

Grade 5: 3 units of elective credit for Fine Arts 0001.

Grade 4, 3, 2, 1: No credit given.
Financial Support

Washington University bases most financial assistance on a careful assessment of financial need. The university also offers a limited number of academic scholarships and fellowships based solely on academic merit. Other financing options and innovative plans, such as the university's Partners in Education with Parents (https://sfs.wustl.edu/newlyadmitted/Pages/PEP.aspx) and the Installment Payment Plan (https://sfs.wustl.edu/newlyadmitted/Pages/TuitionPay.aspx) (the monthly payment plan administered by CASHNet), assist students and parents with financing the university's costs.

Eligible Washington University undergraduate students receive need-based financial assistance, which is offered in combinations of scholarships and grants, federal student loans, and part-time on-campus employment.

Applicants' financial circumstances are considered individually during the financial assistance process. When evaluating the extent of each applicant's need, the university considers many factors besides family income, such as the number of people in the family, the number of children in college at the same time, and special financial circumstances. When students apply for need-based financial assistance, they are considered for all types of assistance: scholarships, grants, federal student loans and part-time employment.

The university strives to make attendance a financial reality for qualified students, even when financial need is great. Information about application procedures may be obtained from Student Financial Services (https://sfs.wustl.edu).

Veterans. If applicants are seeking benefits from the Veterans Administration, they should contact the Office of the University Registrar (http://registrar.wustl.edu).

Scholarship Funds

Many generous Washington University donors provide scholarship funds to assist financially needy and deserving students. These scholarships are included in financial assistance awards. In addition, merit scholarship funds are available to undergraduates in any school. For scholarship information (https://admissions.wustl.edu/financial-aid/#scholarships), please visit the Admissions website.

Army ROTC Scholarships

High school seniors can apply for four-year Army Reserve Officers' Training Corps (ROTC) scholarships. Current students can apply for three- and two-year scholarships. Students pursuing a graduate or advanced degree can compete for a two-year scholarship. Army ROTC scholarships are awarded based on merit, and they cover the full amount of tuition and mandatory fees. Army ROTC scholarships also include support for textbook purchases once per semester and a monthly subsistence allowance during the period that the student is in school on scholarship status. Some students who receive Army ROTC scholarships also receive stipends from the university toward room and board. The source of the student's stipend will be the university, the federal or state government, or other scholarships, depending on the student's eligibility for assistance. For more information, contact the Military Science Department, Washington University in St. Louis, 700 Rosedale Ave., Suite 1120, St. Louis, MO 63112; call 314-935-5521; or visit the Washington University Army ROTC website (http://rotc.wustl.edu). The Four-Year Scholarship application may be submitted through the Army ROTC National Headquarters website (http://www.goarmy.com/rotc).

Air Force ROTC Scholarships

High school seniors and current students may compete for three- or four-year Air Force ROTC (AFROTC) scholarships, which cover up to full tuition at Washington University, plus a monthly stipend and allowance for books. The In-College Scholarship Program (ICSP) requirements vary from year to year and require at least one semester of AFROTC participation prior to application. Extensive information and the electronic application portal can be found on the AFROTC website (http://www.afrotc.com). Some students who receive AFROTC scholarships also receive stipends from the university for room and board. The source of the student's stipend will be the university, the federal or state government, or other scholarships, depending on the student's eligibility for assistance.

Different types of AFROTC merit-based scholarships are available to students studying at Washington University. However, a scholarship is not required to join AFROTC or to successfully earn a commission. For scholarship details, contact AFROTC Detachment 207 at 314-977-8230 or afrotc@slu.edu.

Corporation Awards to Children of Employees

A number of companies have scholarship programs open to the children of their employees. Inquiries about such plans should be made through the parents' employer(s).

Loans

Washington University participates in federal student and parent loan programs. These loans provide reasonable interest rates and long-term repayment schedules.

Partners in Education with Parents (PEP)

Partners in Education with Parents (PEP) (https://sfs.wustl.edu/newlyadmitted/Pages/PEP.aspx) is an innovative multiple-option program financed and operated by Washington University to help parents pay university charges for tuition, fees, room and board.
PEP continues Washington University’s commitment to a partnership with the families of our students. This partnership includes a variety of choices to make parents’ contributions as affordable as possible. Parents may choose the Multiyear Option, Prepayment Option, Combination Option or Annual Option.

The PEP Multiyear Option allows families to borrow one initial amount at the start of the entering year to cover all or part of four years of tuition, fees, room and board charges. This option freezes the charges covered by PEP at the entering-year rate based on the percentage of costs covered by the PEP (participation rate). Families can benefit from the competitive fixed interest rate and take up to 10 years to repay. There is no penalty for prepayment.

The PEP program also offers the choice to prepay, without borrowing from Washington University, all or part of the tuition, fees, room and board charges for all four undergraduate years at the entering-year rate. This option, the Prepayment Option, assures families that the prepaid portion of college expenses is covered and will not be subject to later increases in university costs.

Parents can also choose the Combination Option, which allows their family to prepay a portion of the charges and borrow the rest from Washington University. This combination works well for parents who may have saved for a portion or most of their student’s college expenses and who want to take advantage of the benefit of increasing their participation rate by using PEP to finance the remaining charges.

If the family prefers to borrow for college costs one year at a time, then the PEP Annual Option might be their best choice. Each year, the family can borrow an amount up to or equal to that year’s tuition, fees, room and board charges and take up to 10 years to repay. There is no penalty for prepayment, and they can benefit from the competitive fixed interest rate.

Financing under the Multiyear, Combination or Annual Options requires no security or collateral from participants. A prospective participant must have a good credit rating and provide evidence of being able to meet the required monthly payments to be approved for a loan.

More information about Partners in Education with Parents is available by contacting Student Financial Services, Washington University in St. Louis, CB 1041, One Brookings Drive, St. Louis, MO 63130-4899; calling 314-935-4139 or 800-468-0569; faxing 314-935-4037; emailing Student Financial Services (financial@wustl.edu); or visiting the Partners in Education with Parents website (https://sfs.wustl.edu/newlyadmitted/Pages/PEP.aspx).

Installment Payment Plan (Monthly Payment Plan)

The monthly payment plan (https://sfs.wustl.edu/newlyadmitted/Pages/TuitionPay.aspx), which is administered by CASHNet, provides for the payment of the total annual university charges — tuition, fees, room and board — in monthly installments. Information about this plan is provided to all admitted students or may be obtained directly from Student Financial Services. For details, visit the Student Financial Services website (https://sfs.wustl.edu/pages/default.aspx).

Federal Work-Study

If students apply for financial assistance, they are considered for the Federal Work-Study program (FWS). FWS employees work an average of 10 to 12 hours a week on campus and typically earn up to $2,500 over the course of the academic year.
Tuition & Fees

Tuition

Tuition is the major source of income to support the cost of undergraduate education. Most of the remaining cost is generously funded by gifts from the university’s alumni and friends and from income from the university’s endowment.

In setting the tuition rate, our emphasis is on being able to hire a high-caliber faculty and to offer extensive extracurricular opportunities.

Tuition for the 2019-20 academic year is $27,125 per semester for full-time study. Full-time study is considered to be 12 to 18 units. If students enroll in more than 21 units per semester, they will pay additional tuition of $2,260 for each credit unit beyond the 21.

First-year, first-semester students may register over the summer or after arriving on campus in August. For all subsequent semesters, continuing students have the chance to register in April for the fall semester and in November for the spring semester. Students will be billed for tuition in July for the fall semester and in December for the spring semester. Students must pay tuition by the date specified on the bill or they will incur a late fee.

If a student cannot afford to pay the full tuition bill, they should explore the university’s extensive financial assistance opportunities, which are described in the Financial Support (p. 32) section of this Bulletin.

Many families prefer to pay educational expenses on a monthly basis. The Installment Payment Plan (https://sfs.wustl.edu/newlyadmitted/Pages/TuitionPay.aspx) allows students and families to spread all or part of the academic year’s expenses over equal monthly payments. The Washington University Partners in Education with Parents (PEP) (https://sfs.wustl.edu/newlyadmitted/Pages/PEP.aspx) plan may provide tax savings for some families and offers monthly payment options over a period as long as 10 years at a competitive, fixed interest rate. The PEP plan is described in the Financial Support (p. 32) section of this Bulletin.

A student’s family should begin planning for educational costs as soon as possible following the decision to enroll. It is important to allow sufficient time to complete financial arrangements prior to registration.

Fees

Student Activities: The mandatory student activities fee is 1 percent of tuition; for the 2019-20 academic year, it is $271 per semester. This special fee may vary from year to year. Information about the fee may be obtained from the Department of Campus Life (https://campuslife.wustl.edu).

Student Health and Wellness: Washington University has a student health and wellness fee designed to improve the health and wellness of the entire Washington University community. The fee of $250 is billed to the student tuition statement each semester. In addition, to protect the health of our entire community, the university requires all full-time degree-seeking students to have health insurance. Students either must purchase the Washington University Student Health Insurance Plan or prove that they have adequate coverage through another plan. The cost of the Washington University Student Health Insurance Plan, as well as instructions for obtaining a waiver through proof of adequate coverage, will be provided to enrolled students.

Late Registration: Students may register for classes through the end of the second week of the semester. If students register after the second week, they must do so in person in the dean’s office, and they may be assessed a late registration fee of $100 per week. A late payment fee and/or a monthly finance charge may also be assessed by the dean’s office if payment in full is not made with late registration.

The late registration fee is not applicable to graduate resident and nonresident candidates. Students in University College programs will incur a flat late fee of $50.

Returned Checks: The university assesses a service charge for handling and processing returned checks.

Enrollment Deposit

First-year, transfer and exchange students are required to pay a deposit upon admission to Washington University. The enrollment deposit is nonrefundable and will not be credited toward tuition. The enrollment deposit will be used to cover costs associated with “Bear Beginnings,” the new student orientation program, and an additional orientation program for international students.

• $500 for domestic first-year students
• $750 for international first-year students
• $250 for domestic transfer students
• $500 for international transfer students
• $500 for exchange students

Leaves from the University and Refunds

The College of Arts & Sciences, the Olin Business School, the Sam Fox School of Design & Visual Arts, and the McKelvey School of Engineering have similar policies on leaves and refunds for their undergraduate programs. Please note that the policies for withdrawals from the university follow a similar process and refund schedule. To request a leave or withdrawal, you will need to notify your school in writing.
Tuition Refund Schedule (as of Fall 2010)

<table>
<thead>
<tr>
<th>Withdrawal Date</th>
<th>Refund</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st or 2nd week of classes</td>
<td>100%</td>
</tr>
<tr>
<td>3rd or 4th week of classes</td>
<td>80%</td>
</tr>
<tr>
<td>5th or 6th week of classes</td>
<td>60%</td>
</tr>
<tr>
<td>7th or 8th week of classes</td>
<td>50%</td>
</tr>
<tr>
<td>9th or 10th week of classes</td>
<td>40%</td>
</tr>
<tr>
<td>After 10th week of classes</td>
<td>0%</td>
</tr>
</tbody>
</table>

Refunds are calculated based on the date the student notifies the university of withdrawal.

Students who wish to take a medical leave of absence should start that process with the Habif Health and Wellness Center (https://students.wustl.edu/medical-leave-absence). Schools will refund tuition according to the tuition refund schedule. They may take into account the date at which the student was no longer able to participate in course activities; for instance, the schools will routinely base a refund on the date of a hospitalization if that is the point from which the student was no longer able to attend class.

If a Federal Title IV aid recipient takes a leave or withdraws from school before the end of the academic semester, Washington University must refund (send loan funds back to the lender) the unearned (amount of time in the academic semester that the student did not attend) amount of Title IV funds. Unearned Title IV funds will be returned to the Title IV program. Students will be responsible for any disbursed but unearned portion of their Title IV funds.

**Changes in Fees**

The university reserves the right to change the fees stated or to establish additional fees at any time without prior written notice. When fee changes or additions are made, they become effective with the next payment due.

**Nonpayment of Fees**

Nonpayment of tuition or other charges due the university or otherwise affecting the university will prohibit the student from receiving certain services. Students with outstanding financial obligations to the university will not be allowed to register or to obtain transcripts or official verification of enrollment.
Majors (all schools)

The following is an alphabetical list of all majors from all undergraduate schools.

**A**
- Accounting (p. 930)
- African and African-American Studies (p. 144)
- American Culture Studies (p. 164)
- Ancient Studies (p. 316)
- Anthropology (p. 210)
- Anthropology: Global Health and Environment (p. 210)
- Applied Linguistics (p. 393)
- Applied Science (Chemical Engineering) (p. 1043)
- Applied Science (Electrical Engineering) (p. 1026)
- Applied Science (Mechanical Engineering) (p. 1060)
- Applied Science (Systems Science & Engineering) (p. 1026)
- Arabic (p. 240)
- Archaeology (p. 245)
- Architecture (p. 43)
- Art (p. 80)
- Art (Painting) (p. 80)
- Art (Photography) (p. 80)
- Art (Printmaking) (p. 80)
- Art (Sculpture) (p. 80)
- Art History and Archaeology (p. 253)
- Astrophysics (p. 755)

**B**
- Biology (p. 275)
- Biology: Ecology and Evolution (p. 275)
- Biology: Genomics and Computational Biology (p. 275)
- Biology: Microbiology (p. 275)
- Biology: Molecular Biology and Biochemistry (p. 275)
- Biology: Neuroscience (p. 275)
- Biomedical Engineering (p. 972)
- Business and Computer Science (p. 1002)

**C**
- Chemical Engineering (p. 1039)
- Chemistry (p. 294)
- Chemistry: Biochemistry (p. 294)
- Chinese Language and Culture (p. 307)
- Classics (p. 316)
- Communication Design (p. 80)
- Comparative Arts (p. 327)
- Comparative Literature (p. 327)
- Computer Engineering (p. 999)
- Computer Science (p. 1000)
- Computer Science + Economics (p. 1001)
- Computer Science + Math (p. 1002)

**D**
- Dance (p. 339)
- Design (p. 80)
- Design (Communication) (p. 80)
- Design (Fashion) (p. 80)
- Development/International Area Studies (p. 598)
- Double Majors and the Pre-Medical Program (EECE) (p. 1043)
- Drama (p. 347)

**E**
- Earth and Planetary Sciences: Geochemistry (p. 362)
- Earth and Planetary Sciences: Geology (p. 362)
- East Asian Studies (p. 374)
- Economics (p. 385)
- Economics and Computer Science (p. 385)
- Economics and Strategy (p. 930)
- Educational Studies (p. 393)
- Electrical Engineering (p. 1010)
- Elementary Teacher Education (p. 393)
- English Literature (p. 409)
- English Literature: Creative Writing (p. 409)
- Entrepreneurship (p. 930)
- Environmental Biology (p. 275)
- Environmental Earth Sciences (p. 362)
- Environmental Engineering (p. 1041)
- Environmental Policy (p. 765)
Environmental Studies (p. 430)  
Eurasian Studies/International and Area Studies (p. 602)  
European Studies/International and Area Studies (p. 439)  

**F**  
Fashion Design (p. 80)  
Film and Media Studies (p. 455)  
Finance (p. 930)  
French (p. 468)  

**G**  
Germanic Languages and Literatures (p. 484)  
Global Cultural Studies/International and Area Studies (p. 605)  

**H**  
Health Care Management (p. 930)  
Hebrew (p. 492)  
History (p. 503)  

**I**  
Individually Designed Major (BS in Engineering) (p. 965)  
Interdisciplinary Project in the Humanities (p. 541)  
International Affairs/International and Area Studies (p. 608)  
International and Area Studies (p. 549)  
Italian (p. 612)  

**J**  
Japanese Language and Culture (p. 618)  
Jewish, Islamic, and Middle Eastern Studies: Comparative Jewish & Islamic Studies (p. 625)  
Jewish, Islamic, and Middle Eastern Studies: Modern Middle Eastern Studies (p. 625)  

**K**  
K-12 Teacher Education (p. 393)  
Korean Language and Culture (p. 653)  

**L**  
Latin American Studies (p. 660)  
Linguistics (p. 679)  

**M**  
Marketing (p. 930)  
Mathematics and Statistics (p. 686)  
Mathematics and Computer Science (p. 686)  
Mechanical Engineering (p. 1049)  
Middle School Teacher Education (p. 393)  
Music (p. 705)  

**O**  
Operations and Supply Chain Management (p. 930)  
Organization and Strategic Management (p. 930)  

**P**  
Philosophy (p. 726)  
Philosophy: Law and Policy (p. 726)  
Philosophy: Philosophy of Science (p. 726)  
Philosophy: Research (p. 726)  
Philosophy-Neuroscience-Psychology: Cognitive Neuroscience (p. 740)  
Philosophy-Neuroscience-Psychology: Language, Cognition and Culture (p. 740)  
Physics (p. 755)  
Political Science (p. 765)  
Psychological & Brain Sciences (p. 787)  
Psychological & Brain Sciences: Cognitive Neuroscience (p. 787)  

**R**  
Religious Studies (p. 811)  
Romance Languages and Literatures (p. 830)  

**S**  
Second Major in Computer Science (p. 1004)  
Second Major in Computer Science + Mathematics (p. 1004)  
Second Major in Electrical Engineering (p. 1027)  
Second Major in Financial Engineering (Business (p. 930) or Engineering (p. 1028))  
Second Major in Systems Science and Engineering (p. 1027)  
Secondary Teacher Education (p. 393)  
Sociology (p. 835)  
Spanish (p. 841)  
Systems Science & Engineering (p. 1026)  

**U**  
Urban Studies (p. 866)  

**W**  
Women, Gender, and Sexuality Studies (p. 880)
The following is an alphabetical list of all minors from all undergraduate schools.

### A
- Accounting (p. 937)
- Aerospace Engineering (p. 1060)
- African and African-American Studies (p. 145)
- American Culture Studies (p. 165)
- Ancient Studies (p. 316)
- Anthropology (p. 211)
- Anthropology: Global Health and Environment (p. 211)
- Applied Linguistics (p. 397)
- Applied Microeconomics (p. 386)
- Applied Physics & Electrical Engineering (p. 1028)
- Arabic (p. 241)
- Archaeology (p. 245)
- Architectural History and Theory (p. 43)
- Architecture (p. 43)
- Art History and Archaeology (p. 254)
- Art (p. 82)
- Asian-American Studies (p. 271)
- Astrophysics and Astroparticle Physics (p. 757)

### B
- Bioinformatics (p. 1005)
- Biology (p. 278)
- Biomedical Physics (p. 757)
- Business of Analytics (p. 937)
- Business of the Arts (p. 937)
- Business Economics (p. 937)
- Business of Entertainment (p. 937)
- Business of Social Impact (p. 937)
- Business of Sports (p. 937)

### C
- Chemistry (p. 296)
- Children's Studies (p. 301)
- Chinese Language and Culture (p. 308)
- Classics (p. 316)
- Comparative Arts (p. 327)
- Comparative Literature (p. 327)
- Computer Science (p. 1005)
- Creative Practice for Social Change (p. 82)

### D
- Dance (p. 340)
- Data Science in the Humanities (p. 542)
- Design (p. 82)
- Drama (p. 348)
- Earth and Planetary Sciences (p. 365)
- East Asian Studies (p. 374)
- Educational Studies (p. 397)
- Electrical Engineering (p. 1029)
- Energy Engineering (p. 1044)
- English (p. 410)
- Entrepreneurship (p. 937)
- Environmental Earth Sciences (p. 365)
- Environmental Engineering Science (p. 1043)
- Environmental Studies (p. 430)
- Film and Media Studies (p. 456)
- Finance (p. 937)
- French (p. 469)
- General Business (p. 937)
- General Economics (p. 386)
- Germanic Languages and Literatures (p. 485)
- Global Film and Media Studies (p. 456)
- Health Care Management (p. 937)
- Hebrew (p. 493)
- Hindi (p. 498)
- History (p. 504)
- Human-Computer Interaction (p. 1006)
I
Interdisciplinary Environmental Analysis (p. 430)
International Business (p. 937)
Italian (p. 613)

J
Japanese Language and Culture (p. 619)
Jazz Studies (p. 707)
Jewish, Islamic, and Middle Eastern Studies (p. 625)

K
Korean Language and Culture (p. 653)

L
Landscape Architecture (p. 43)
Latin American Studies (p. 662)
Legal Studies (p. 672)
Linguistics (p. 680)

M
Marketing (p. 937)
Materials Science & Engineering (p. 1061)
Mathematics and Statistics (p. 688)
Mechanical Engineering (p. 1062)
Mechatronics (p. 1063)
Medical Humanities (p. 696)
Medieval and Renaissance Studies (p. 703)
Music — General Studies (p. 707)

N
Nanoscale Science & Engineering (p. 1045)

O
Operations and Supply Chain Management (p. 937)
Organization and Strategic Management (p. 937)

P
Philosophy (p. 729)
Philosophy of Science (p. 729)
Philosophy—Neuroscience—Psychology (p. 744)
Physics (p. 757)
Political Science (p. 766)
Psychological & Brain Sciences (p. 792)

R
Religion and Politics (p. 802)
Religious Studies (p. 811)
Robotics (p. 1063)
Russian Language and Literature (p. 832)

S
Sociology (p. 837)
South Asian Languages and Cultures (Hindi) (p. 498)
Spanish (p. 843)
Speech and Hearing (p. 859)
Strategy (p. 937)
Systems Science & Engineering (p. 1030)

T
Text and Tradition (p. 542)

U
Urban Design (p. 43)
Urban Studies (p. 867)

W
Women, Gender, and Sexuality Studies (p. 881)
World Music, Dance and Theater (p. 724)
Writing (p. 901)
Architecture

Sam Fox School of Design & Visual Arts

The Sam Fox School of Design & Visual Arts (http://samfoxschool.wustl.edu) is a unique collaboration in architecture, art and design education, linking professional studio programs with one of the country's finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art, and the Mildred Lane Kemper Art Museum (http://www.kemperartmuseum.wustl.edu).

Architecture

Throughout history, architects have played a leading role in forming the environment and in interpreting the aspirations of societies in all parts of the world. As a practical and useful art, architecture embraces aesthetic, ethical, social and technical responsibilities. Architecture responds to the way people live and, in turn, influences their lives.

Students considering an architectural education and architecture as a potential career express an excitement about design and building as well as a commitment to the environment. If students plan to study architecture, they should have artistic ability and a good academic base. Personal interests in such areas as drawing, painting, photography, sculpture, building and the environment suggest a possible aptitude for architecture. Architecture reflects culture; architects must know their culture deeply. To gain an understanding of all aspects of architecture and to develop the attitudes and skills necessary to deal with them, students must have a broad liberal arts education. This base of cultural understanding and critical thinking is combined with a curriculum that focuses intensely on the study of architecture.

Architecture is an absorbing, fascinating profession. Choosing architecture as a professional career requires a major educational commitment at the undergraduate level as well as further study in a professional degree program. With a professional degree in architecture, a graduate may choose to work in small or large architectural firms, in academia, in community or governmental organizations, with development teams, and in a variety of related fields.

Architecture at Washington University

Washington University established the Department of Architecture as part of the School of Engineering and Architecture in 1902. The School of Architecture became an independent division of the university in 1910. In 2005, as part of the formation of the Sam Fox School of Design & Visual Arts, the School of Architecture was reorganized as the College of Architecture and the Graduate School of Architecture & Urban Design.

In 1932, Givens Hall was constructed to house the school as a result of a generous gift in memory of Joseph W. and Kate Abbey Givens.

In 1967, the School of Architecture became one of the first schools in the United States to offer a pioneering six-year joint-degree (Bachelor of Arts and Master of Architecture) program.

Our four-year undergraduate degree programs emphasize the development of both making and digital skills, which help students to become more creative thinkers and designers. All architecture students take similar courses during their first three years; courses taken during the fourth year will differ depending on each student’s choice of program.

The Bachelor of Science in Architecture entails a more intensive study of architecture during the senior year. Students will take a senior-level design studio focused on advanced building design along with structures courses, architectural history/theory courses that emphasize urban design issues, and technology courses in environmental systems or landscape architecture.

The Bachelor of Arts in Architecture offers greater flexibility. Its strong, adaptable undergraduate curriculum prepares students for graduate study in architecture, usually for three years. During their senior year, students may choose to take additional architecture design studios, or they may pursue courses in other areas of interest.

These undergraduate degree programs offer students the opportunity to gradually focus their undergraduate studies within the college and allow them to make an incremental commitment to a career in architecture. Both programs prepare students to move on to a master's degree, putting them on track for teaching and leadership positions in architecture and other related fields.

The College of Architecture faculty are nationally and internationally renowned practitioners and researchers who are committed to students’ undergraduate experience. As academic advisers, they work with the director and the undergraduate chair to help students build an individualized curriculum, select specific courses, and chart plans for their future careers.

Majors
The Major in Architecture
Bachelor of Arts Degree
The major requirements for the Bachelor of Arts degree, with a major in architecture, are as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCH 111</td>
<td>Introduction to Design Processes I</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 112</td>
<td>Introduction to Design Processes II</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 211B</td>
<td>Introduction to Design Processes III</td>
<td>4.5</td>
</tr>
<tr>
<td>ARCH 212B</td>
<td>Introduction to Design Processes IV</td>
<td>4.5</td>
</tr>
<tr>
<td>ARCH 311</td>
<td>Architectural Design I</td>
<td>6</td>
</tr>
<tr>
<td>ARCH 312</td>
<td>Architectural Design II</td>
<td>6</td>
</tr>
<tr>
<td>ARCH 3280</td>
<td>Architectural History I: Antiquity to Baroque</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 3284</td>
<td>Architectural History II: Architecture Since 1880</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 445</td>
<td>Building Systems</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 499</td>
<td>Senior Capstone in Architecture</td>
<td>3</td>
</tr>
</tbody>
</table>

Minors
The Minor in Architectural History and Theory
Minor Adviser: Eric Mumford (epm@wustl.edu)
The minor in architectural history and theory is open to all students at Washington University in St. Louis, regardless of major. Students interested in the minor should contact the designated minor adviser.

Units required: 18,* including the following:

Required courses:
9 units of architectural history survey:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCH 3280</td>
<td>Architectural History I: Antiquity to Baroque</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 3284</td>
<td>Architectural History II: Architecture Since 1880</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 4288</td>
<td>Architectural History III: Advanced Theory</td>
<td>3</td>
</tr>
</tbody>
</table>

3 units of methodology course work:

<table>

Other methodology-based courses approved by the minor adviser | 3

Elective courses: 6 units of architectural history and theory electives (300-level or above) as approved by the minor adviser.

*12 units must be in the minor only and cannot be double-counted toward another major or minor.

The Minor in Architecture
Minor Adviser: Derek Hoeferlin (hoeferlin@wustl.edu)
The minor in architecture is open to all students at Washington University in St. Louis who are not majoring in architecture. Students interested in the minor should contact the minor adviser.

Units required: 18,* including the following:

Required courses:
6 units minimum of introductory design chosen from the following:
The Minor in Landscape Architecture

Minor Adviser: Jacqueline Margetts  
(jacqueline.margetts@wustl.edu)

The minor in landscape architecture is for students who will be receiving either a Bachelor of Science or Bachelor of Arts with a major in architecture. Interested students should contact the minor adviser.

Units required: 18,* including the following:

Required courses:
6 units of design course work:

**Additional Information**

In the event that a required course is not offered in a given semester or if a student has irreconcilable scheduling conflicts with their required major courses or other minor courses, an appropriate alternate course may be substituted with approval from the minor adviser.

Students declare an architecture minor by using the university's online registration system (WebSTAC (https://acadinfo.wustl.edu/WSHome/Default.aspx))

Students must receive a grade of C- or better in all courses to earn minor credit.

Students should check the current course listings (https://courses.wustl.edu/Semester/Listing.aspx) carefully to verify their eligibility to enroll in courses that have specific prerequisites.

**Courses**

A46 ARCH (p. 45): Architecture

A48 LAND (p. 65): Landscape Architecture

**Architecture**

Visit online course listings to view semester offerings for A46 ARCH (https://courses.wustl.edu/CourseInfo.aspx?sch=A&dept=A46&crsId=1.4).

**A46 ARCH 111 Introduction to Design Processes I**

This introductory architectural design studio engages the basic principles of architectural context, composition and experience. Through various fieldwork strategies, students explore architectural context through observation, analysis and invention. The site-specific design processes bridge two-dimensional and three-dimensional work, including drawing, drafting and making. The experiential qualities of architecture are introduced through basic considerations of scale and human interaction. The course work includes studio work, lectures, presentations by students, readings, writing assignments and field trips.

Credit 3 units.

**A46 ARCH 112 Introduction to Design Processes II**

This core design studio engages the basic principles of architectural design through iterative processes of drawing and making, using a variety of tools, media and processes. The course work includes studio work, lectures, student presentations and local field trips. Prerequisite: A grade of C- or better in Arch 111 or co-registration in Arch 111.

Credit 3 units.

**A46 ARCH 175 Designing Creativity: Innovation Across Disciplines**

Via a series of lectures from prominent thinkers and practitioners in the areas of medicine, neuroscience, law, engineering, architecture, human-centered design, business, stage design, and the performing arts, Designing Creativity is a course that covers the study and practice of the creative process across many disciplines. From "Ah-ha" epiphanies to slow-developing discoveries, the creative process is employed by innovators and artists in virtually every corner of the globe. In this course, we explore the study of those processes by hearing from creatives in many fields with practice of those techniques via a LAB component that allows students to explore the development of innovative ideas in collaborative teams followed by project presentations to core faculty and classmates.

Same as ISO INTER D 175

**A46 ARCH 183A Practices in Architecture + Art + Design**

This course offers first-year students in the College of Architecture an introduction to the subjects, theories, and methodologies of the disciplines of art, design, architecture, landscape architecture, and urban studies. Examples drawn from a range of historical periods as well as contemporary practice highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap.

Credit 1 unit.

**A46 ARCH 209 Design Process**

Open to Engineering, Arts & Sciences, Business and Art students at all levels. This studio course engages students in the process of design with an emphasis on creative thinking. Course content relates directly to the interests of engineers as well as arts and science, business and art students who wish to problem solve about positively shaping the texture and quality of the built world. A series of 2D and 3D hands-on problem-solving projects introduce students to design concepts as they apply to site (ecosystems and outdoor places), to humanistic place making (personal and small public spaces), to structure and materials (intuitive exploration of structural principles through model building), to environmental issues (effects of climate, light, topography, context and sensible use of natural resources). No technical knowledge or special drawing/model-making skills are required. There are informal group and individual discussions of each person's stages in inquiry. The investigations take the form of study models made of recycled materials. Guest lecturers participate throughout the semester. The concluding project for the semester allows each student to work with their unique academic and personal interests, utilizing the process of lateral thinking. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course.

Credit 3 units. Art: CPSC EN: H

**A46 ARCH 211B Introduction to Design Processes III**

Introduction to Design Processes III engages design through the lens of perception investigating the relationship between materiality and inhabitable space situated in a natural context. Prerequisites: successful completion of Arch 111 and 112, with a
grade of C- or better; or successful completion of Arch 210, with a grade of C- or better. Credit 4.5 units.

A46 ARCH 212B Introduction to Design Processes IV
Studio which initiates architectural and building issues such as: building analysis, structure, organizational systems and programming. Prerequisites: successful completion of Arch 211B with a grade of C- or better. Credit 4.5 units.

A46 ARCH 241 Community Dynamics
This course builds on the investigations of A46 307X Community Building and concentrates on the economic, political and social dynamics shaping neighborhoods. In order to ground discussions in reality, the class immerses itself in the urban laboratory of St. Louis while relating local issues to broader trends. A survey of the paradigms of American urban design and planning will provide an overview of the creative strategies (and ongoing contradictions) of redevelopment in the 21st century. Students will be exposed to a range of research methods for understanding deep, relational, political and legalistic dynamics shaping communities. Credit 3 units. Art: CPSC

A46 ARCH 243 Design as Export
This course introduces students to the contemporary global characteristics of design in the late 20th and 21st century. The marketing, fabrication, distribution and consumption of design is global, yet the cultural and formal identity of most design products are national and regional. How do traditions of design and quality based on centuries of a national and regional design culture react and adapt to a global market? What is the culture of design? What is design identity? Italian design is the primary focus of this course, followed by Japanese and Asian design and manufacturing. Case studies include examples of industrial design, fashion design, communication design and automobile design. The course also includes presentations by design curators and representatives of various international design companies. Credit 3 units.

A46 ARCH 2647 Italian Language (Florence)
This course covers Italian grammar and conversation for study abroad students in Florence. Taught entirely in Italian. There is an emphasis on class participation accompanied by readings and writings. The student develops facility speaking the language on an everyday basis. Same as F20 ART 2647 Credit 3 units.

A46 ARCH 2661 Semester Abroad Program Seminar
This course will prepare students participating in the Sam Fox School's Semester Abroad Programs. The seminar will meet eight times over the course of the semester. Attendance is mandatory for students going abroad. Prerequisite: College of Art and College of Architecture students selected for the Sam Fox School Abroad Programs. Same as F20 ART 2661 Credit 1 unit. EN: H

A46 ARCH 275 Service Learning Course: Environmental Issues
This service learning experience allows Washington University students to bring their knowledge and creativity about the many subjects they are studying to students at the Compton-Drew Middle School, adjacent to the Science Center, in the City of St. Louis. This course is for arts and sciences students of differing majors & minors, business, architecture & art students, and engineering students from all engineering departments. The first third of the semester students will: 1) begin learning the creative process of lateral thinking (synthesizing many variables, working in cycles); 2) work with a teammate to experiment with the design of 2D & 3D hands-on problem-solving workshops about exciting environmental issues, for small groups of students at Compton-Drew Middle School; 3) devise investigations for the workshops about environmental issues embracing the sciences, the humanities, and the community; 4) each student will work with the professor individually and in their team, as well as seek advice of faculty from a specific discipline, through the semester in the preparation of their evolving curricular plan. During the last two thirds of the semester Washington University students will be on-site during the Compton-Drew school day, once a week on each Monday from 11:00 a.m. to 12:30 p.m., to teach small group workshops for some of the sixth and seventh grade students. This course is open to freshmen, sophomores and juniors. Credit 2 units.

A46 ARCH 306M Visualizing Segregation: A History of St. Louis, Chicago and New Orleans
This interdisciplinary course is designed to introduce students to the history of three of America's major cities. We will explore the political, social, and cultural histories of each of these cities while tracing changes in architecture and the built environment. We chose these three cities for their diverse and intersecting histories. In many ways, St. Louis, Chicago and New Orleans represent the major social and political forces that forged the modern American city. From westward expansion and the growth of the slave system, through mass European immigration and industrialization, the rise of Jim Crow and the decline of American industry, suburbanization, mass incarceration, and gentrification: All are visible in the landscapes of these American cities. Segregation of social groups, so often seen as natural or inevitable, is the result of historical processes, political decisions, public policies and individual actions. The course, in addition, will provide students with the opportunity to use some of the research techniques employed by urban scholars. We will engage in a major research project, tracing the history of St. Louis through a variety of primary sources. Our aim will be to trace the historical processes that generated urban landscapes divided along lines of race, class, ethnicity or religion. Same as I50 INTER D 306M Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM BU: BA, HUM EN: H

A46 ARCH 307X Community Building
This course looks at the intersection of the built fabric and the social fabric. Using St. Louis as the starting point, this course takes students out of the classroom and into a variety of neighborhoods — old, new, affluent, poor — to look at the built environment in a variety of contexts and through a variety of lenses. Almost every week for the first half of the semester, students visit a different area (or areas), each trip highlighting some theme or issue related to the built environment
A46 ARCH 308X Community Building North

This course addresses the complex economic, political, and racial landscape of north St. Louis County focused on Ferguson, Missouri, as the embodiment of problems and conflicts endemic to urban communities across the country. The events following Michael Brown’s shooting death on August 9, 2014, have revealed deep divisions in the St. Louis metropolitan area. Our multidisciplinary approach will be evident as we investigate the intersecting, compounding roles of social and economic inequities, racial disparities, white flight, public safety, housing, and economic development as we grapple with legitimate, thoughtful ways of making positive change. We’ll learn how to listen to, understand, and address a variety of stories, discovering their complexity, contradictions and paradoxes. They also come to consider the complex ways in which architecture and the built environment can affect or be affected by a host of other disciplines. College of Architecture and College of Art sophomores, juniors, and seniors have priority. Fullfills Sam Fox Commons requirement, CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course. Credit 3 units. Art: CPSC EN: H

A46 ARCH 312A Architectural Design II (Study Abroad)

Prerequisite: satisfactory completion of Arch 311. Credit 6 units.

A46 ARCH 316F Re-Discover the Child

It is said that, at this time in history, the entire country must make a commitment to improve the positive possibilities of education. We must work to lift people who are underserved; we must expand the range of abilities for those who are caught in only one kind of training; and we must each learn to be creative thinkers contributing our abilities to many sectors of our society. In this course, we will expand our views about learning by experimenting with the creative process of lateral thinking. We will learn about learning by meeting with some brilliant people at the university and in the St. Louis community who are exceptional in the scholarly, professional, and civic engagement work they are accomplishing. We will learn about learning by working in teams to develop exciting curriculum (based upon the knowledge and passion that students bring from their academic studies and range of interests) for middle-school students from economically disadvantaged urban families. Each week of the semester, we will learn about learning by providing one-hour 2D and 3D hands-on problem-solving workshops for middle-school students at the Compton-Drew Middle School, which is adjacent to the Science Center in the city of St. Louis. Students and their Washington University teammates will implement the workshops they create throughout the semester for a group of six to eight Compton-Drew Middle School students. In this course, we celebrate the choices of the studies we each pursue, and we expand our experience in learning from each other’s knowledge bases and from each person’s particular creativity in the area of problem solving. This course seeks students from all disciplines and schools, from first-year students through seniors. Credit 3 units. Art: CPSC

A46 ARCH 317 Architectural Design I (MArch 3)

The first of a three-semester sequence that introduces students to architectural design, focusing on conceptual, theoretical and tectonic principles. First-semester MArch 3 students only. Credit 6 units.

A46 ARCH 317M Architecture Through the Photographic Lens

Same as F20 117M, 217M, 417M - Juniors (only) register for F20 317M. Photography offers ways of seeing and representing the world around us. This course provides technical and conceptual frameworks for understanding architectural space as seen through the camera. Topics include building as site, landscape as context, and the architectural model as a representation tool. Students are introduced to a wide range of artists and architects, helping build a unique camera language to support their individual projects. Students will learn DSLR camera basics, fundamentals of Photoshop, digital printing techniques and studio lighting for documenting architectural models. The course assumes no prior experience with digital imaging technologies or materials. Digital camera required. Same as F20 ART 317M Credit 3 units. Art: FAAM

A46 ARCH 318 Architectural Design II (MArch 3)

The second of a three-semester sequence of design studios. Continues examination of issues raised in ARCH 317. Second-semester MArch 3 students only.
This course examines the history/theory and practice of representation, specifically the systems of drawing used in architecture. The objective is to develop the requisite discipline, accuracy, and visual intelligence to conceptualize and generate a relationship between space and form. The course focuses on two concurrent tasks: first, to outline and analyze the historical development of representational logics and their impact on architectural ideation, and second, to explain the codification and usage of specific geometries, including orthographic and isometric projection, central and parallel perspective, and architectural axonometric. We will see that, rather than a translation of reality, representation operates between perception and cognition as a transcription of reality and is thus a powerful instrument in the design and making of architecture. The relationship between the drawing forms and the tools used to produce them are brought into focus as manual, digital, photographic and physical applications driven by drawing intentions. The course is organized as a lecture/lab with emphasis on practice of manual and photographic applications.

Credit 3 units.

A46 ARCH 323B Architectural Representation II (MArch 3)

The course examines the history/theory and practice of representation, specifically the systems of drawing used in architecture. The objective is to develop the requisite discipline, accuracy and visual intelligence to conceptualize and generate a relationship between space and form. The course focuses on two concurrent tasks: first, to outline and analyze the historical development of representational logics and their impact on architectural ideation, and second, to explain the codification and usage of specific geometries, including orthographic and isometric projection, central and parallel perspective, and architectural axonometric. We see that, rather than a translation of reality, representation operates between perception and cognition as a transcription of reality and is a powerful instrument in the design and making of architecture. The relationship between the drawing forms and the tools used to produce them are brought into focus as manual, digital, photographic and physical applications driven by drawing intentions. This course is organized as a lecture/lab with emphasis on the practice of digital media and physical modeling. Emphasis is on participation and excessive absences are noted. Please note: The second half of the semester focuses on computing, for which each student is required to have a laptop computer.

Credit 3 units.

A46 ARCH 326G Digital Fabrications

This course will focus on fabrications both real and virtual. The ubiquity of computers in design, studio art, communications, construction and fabrication demand that professionals become comfortable with their use. It is also important in a group of ever-specializing fields that one knows how to translate between different software and output platforms. This comfort and the ability to translate between platforms allow contemporary artists and designers to fabricate with ever-increasing freedom and precision. This course will introduce students to 3D software with a focus on 2D, 3D, and physical output. Through a series of projects, students will learn to generate work directly from the computer and translate it into different types of output.

Starting from first principles, this course will cover the basics from interface to output for each platform used. This course will also familiarize students with a range of CNC technology and other digital output for both small- and large-scale fabrication. The course will be broken into three projects. In the first project, students will focus on computer-generated geometry and control systems. In the second part, students will generate physical output and line drawings. The final project will focus on rendering, context and cinematic effects. The software covered in this course includes, but is not limited to: Rhinoceros 3D, Maya, Illustrator, Photoshop. Additionally, students will use the 3D printer, laser cutter, and/or other digital output tools.

Credit 3 units.

A46 ARCH 326J Digital Representations

Digital Representations introduces students to digital modeling and fabrication, parametric workflow, and various 2D and physical output techniques. Starting from first principles, this course begins with the basics from interface to output for each platform used, developing skills in digital modeling and physical output and serving as a prerequisite for more advanced courses in design scripting and digital fabrication. Students complete a semester-long project divided into three assignments, beginning with developing a detailed digital model of a formal precedent, which introduces students to basic skills in modeling with nurbs, subdivision surfaces, and meshes. Continuing to develop a clear diagrammatic organization and hierarchy, students expand the characteristics of their original formal precedent using Grasshopper to create a set of dynamic, flexible behaviors. Drawing upon their initial understanding and analysis of organizational systems within their formal object, students transfer their observations into the construction of a spatial parametric model that has potential to serve structure, fabrication methods, and material assembly. Finally, students develop their digital model into a geometrically rationalized material system that draws upon their initial precedent, producing a physical model, renderings, and 2D drawings presented in the format of a final review.

Credit 3 units.

A46 ARCH 326K Digital Evolutions: Parametric Design for a Fabricated Species

Digital Evolutions will introduce digital modeling, parametric workflow, and fabrication techniques in a variety of two and three-dimensional media to document the imagined development of a hypothetical animal species. As a prerequisite for more advanced courses in design scripting and digital fabrication, this course will introduce each technique at a foundational level giving every student a new arsenal of digital tools with which they can act as evolution's (intelligent) designer. Students will begin with an analysis of drawings by Ernst Haeckel (1843-1919), a German biologist, naturalist, philosopher, and artist who promoted and popularized Charles Darwin's work in Germany, but whose own alternative theories of evolution have subsequently been discredited. Students will use Grasshopper and associated plug-ins to exploit the powerful flexibility of parametric design to iteratively adapt these studies to various imagined environmental conditions. Working in pairs, students will crossbreed their species, synthesizing ideas concerning skin, support systems, pattern, and kinetics, finally modeling this fictitious entity with a geometrically rationalized material system-a fabricated fabrication.

Credit 3 units. Arch: HUM Art: FADM

A46 ARCH 327X Color Systems

This course is a sustained investigation of color. Students study how color is affected by light, by space, by arrangement, by...
A46 ARCH 3280 Architectural History I: Antiquity to Baroque
This lecture course will introduce major historical narratives, themes, sites, and architects from ancient Greece to the end of the Baroque period. We will take an extended look at the dawn of the modern period in the 15th and 16th centuries through a global perspective, turning eastward from Renaissance Europe to the Ottoman, Mughal, Chinese, and Japanese empires. The great chronological and geographic span of this course will be pulled together around the following themes: (1) classicism and its subsequent reinterpretations; and (2) the pursuit of the tectonic ideal. Our aim is to recognize how these ideological pursuits of modern architecture evolved out of longer historical processes. We will also pay close attention to major sites of landscape and urban-scale work. Requirements will include a midterm exam, a final exam, and a series of short papers. Credit 3 units.

A46 ARCH 3284 Architectural History II: Architecture Since 1880
An introductory survey of the history and theory of architecture and urbanism in the context of the rapidly changing technological and social circumstances of the past 120 years. In addition to tracing the usual history of modern architecture, this course also emphasizes understanding of the formal, philosophical, social, technical and economic background of other important architectural directions in a global context. Topics range from architects’ responses to new conditions in the rapidly developing cities of the later 19th century, through early 20th-century theories of perception and social engagement, to recent efforts to find new bases for architectural interventions in the contemporary metropolis. Credit 3 units. Arch: HT EN: H

A46 ARCH 333 Case Studies in 20th-Century Architecture
Through a series of analytical, critical and interpretative studies of singular works of architecture in the 20th century, this course focuses on the manifold processes and contexts of their production. Each work is examined as a physical and cultural artifact with precise formal, intellectual and ideological intentions and meanings. The architectural object, understood as a synthesis of multiple criteria and frameworks, is explored from its conception through its realization based on certain principles (fundamental precepts of the discipline of architecture) and a broad range of concepts (abstract ideas understood as the products of speculative and reflective thought). Credit 3 units. Arch: GARW

A46 ARCH 336D Biomimicry: A Biokinetic Approach to Sustain(Able) Design
This weekly seminar course addresses issues of Western architectural thought through a focused series of readings and discussions. The necessity and role of architectural theory in general is examined. Issues of tectonics, historicism, typology, regionalism, modernism, postmodernism and other critical frameworks for the consideration of architecture are thematic subjects of discussion. Selected readings include Vitruvius, Alberti, Laugier, Semper, Ruskin, Le Corbusier, Gropius, Kahn, Rossi, Venturi, Eisenman, Libeskind and Koolhaas. Weekly reading assignments, attendance, participation, one summary and discussion introduction based on a reading topic, final paper.
Required for first-semester MArc 3 students. Fullfills history/ theory elective for MArc 2 students. 

Credit 3 units. Arch: CAST, GACS

**A46 ARCH 343X Digital Filmmaking: City Stories**

Digital Filmmaking: City Stories is a cross-university video art course for students interested in making short films through a transdisciplinary and time-based storytelling in both narrative and non-narrative formats. Whether documentary or abstract, individually produced or collaborative, all projects in this course have a required social and urban engagement component. In this course, the City becomes a laboratory for experimentation and contribution. Students meaningfully engage St. Louis, and their projects address sites of concern to explore the complex fabric of the city by way of framing and poetic juxtaposition.

City Stories merges several arts and humanities disciplines, including experimental cinema and documentary journalism, and creates an opportunity for empathic listening and inquiry as students discover stories built from collective as well as individual memories.

Same as X10 XCORE 343X

Credit 3 units.

**A46 ARCH 344X Digital Filmmaking: City Stories**

Digital Filmmaking: City Stories is a cross-university video art course for students interested in making short films through a transdisciplinary and time-based storytelling in both narrative and non-narrative formats. Whether documentary or abstract, individually produced or collaborative, all projects in this course have a required social and urban engagement component. In this course, the City becomes a laboratory for experimentation and contribution. Students meaningfully engage St. Louis, and their projects address sites of concern to explore the complex fabric of the city by way of framing and poetic juxtaposition.

City Stories merges several arts and humanities disciplines, including experimental cinema and documentary journalism, and creates an opportunity for empathic listening and inquiry as students discover stories built from collective as well as individual memories. College of Architecture and College of Art sophomores, juniors and seniors have priority. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course.

Same as X10 XCORE 344X

Credit 3 units. Arch: NSM Art: CPSC, NSM

**A46 ARCH 346X Shopping**

This seminar examines shopping as a social and cultural construct that operates at several levels in relation to art, architecture, and urban planning. Shopping is the fundamental activity of the capitalist marketplace. It is also inextricably linked with major aspects of public and foreign policy, where national consumerism is closely linked to global tourism and it is at the core of economic development. Shopping is as well a common denominator of popular culture, frequently satirized in contemporary art, film, and literature. Participants in the seminar will read selections from various writings about shopping and the marketplace. We will also view several films examining the shopping environment in narratives of power and desire. Prerequisite is completion of Sam Fox foundations year. Open to sophomores and above.

Same as X10 XCORE 346X

Credit 3 units. Art: CPSC

**A46 ARCH 350 Service Learning Course: Environmental Issues**

This service learning experience allows Washington University students to bring their knowledge and creativity about the many subjects they are studying to students at the Compton-Drew Middle School, adjacent to the Science Center, in the City of St. Louis. This course is for arts and sciences students of differing majors and minors, business, architecture and art students, and engineering students from all engineering departments. In the first third of the semester, students will: 1) begin learning the creative process of lateral thinking (synthesizing many variables, working in cycles); 2) work with a teammate to experiment with the design of 2D and 3D hands-on problem-solving workshops about exciting environmental issues, for small groups of students at Compton-Drew Middle School; 3) devise investigations for the workshops about environmental issues embracing the sciences, the humanities and the community; 4) work with the professor individually and in their team, as well as seek advice of faculty from a specific discipline throughout the semester in the preparation of their evolving curricular plan. During the last two-thirds of the semester, Washington University students will be on-site during the Compton-Drew school days once a week on each Monday from 12:00 to 1:30 p.m. to teach small group workshops for some of the sixth- and seventh-grade students. There will also be a one-hour class meeting on Wednesday at a time to be finalized later. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course.

Credit 1 unit. Art: CPSC

**A46 ARCH 355 Interdisciplinary Ecosystems Principles Integration**

The mission of this interdisciplinary seminar class is to "advance interrelationships of ecological and human systems toward creating healthy, resilient, and biodiverse urban environments" and will bring together experts and students in ecology, urban design, architecture/landscape architecture, economics, social work, and engineering, drawing from inside and outside the Washington University community.

Credit 1 unit. Art: CPSC

**A46 ARCH 376 Design Thinking for Science, Engineering, Business and the Liberal Arts**

This introductory course outlines strategies and methodologies drawn from a wide range of creative design practices, including architecture, landscape architecture, urban design, industrial...
design and others. The course explores how these ideas and techniques are similar to practices in science, engineering, business and the liberal arts and how they might be applicable to multidisciplinary problem solving. Topics include perception, representation, technology, group intelligence, bio-mimicry and context-based learning, among others. Emphasis is given to the intersection of design thinking with environmental problems and the relationship between design thinking and innovation. The course includes lectures, guest lectures with case studies, and design projects. Open to all undergraduate students.
Credit 1 unit. EN: H

A46 ARCH 3824 The Italian Renaissance in the City of Florence
This course encompasses the Renaissance from Giotto through the High Renaissance. Students examine first-hand the works they are studying. Included are field trips to Rome and Venice.

Credit 3 units. Art: AH EN: H

A46 ARCH 3825 Florence as a Cultural Artifact: The History of Architecture as the History of the City
This course combines seminar and workshop activities aiming at the understanding of the rich urban and architectural history of Florence, the place of students’ work and temporary living during the study abroad program. These activities will be in dialogue with the design studio and art history courses. The intellectual framework of the course is informed by Giulio Carlo Argan’s seminal work “La storia dell’arte come storia della città” (“The history of art as the history of the city,” Einaudi, 1983), presenting the city as a complex time-space phenomenology of cultural artifacts. While Florence is well known for its cultural contribution to Western cultural history during the 1400s and 1500s, little is known about the full span of its millennial history, including its contemporary developments. The seminar activities will cover such aspects through readings and lecture-cum-sketching urban and architectural documentation tours in the first part of the semester, leading to the development of individual artists’ book projects to be completed in the second part of the semester for the program’s semester exhibition.
Credit 3 units.

A46 ARCH 3826X Public Practice
With architecture, art and design students in mind, Public Practice is a design-build course focused on the development, presentation, and actualization of commissioned works within the public realm. Through an iterative process of concept development, material exploration, and panel reviews, students will learn how to develop, propose and execute a viable public piece. Individual and/or group proposals will be presented before a selection committee in consideration toward a public art/design commission. Selected projects will be realized within specified sites in the community of University City, MO. Students will have hands-on experiences with construction processes, meeting structural requirements and codes, site development, and project installation, which will prepare them for a creative life situated firmly within a discourse of Public Space. Open to MFA, graduate architecture students, BFA and undergraduate architecture students with junior-level standing. Minors and others eligible with consent of instructor.
Same as X10 XCORE 386X
Credit 3 units.

A46 ARCH 401B Color in Architecture, Design and Art
This seminar introduces students to aspects of color in architecture, design and art and deals primarily with 19th-, 20th- and 21st-century theories and projects. Student work includes readings and discussions, case studies and experiments in color application. Research includes case study architectural examples by Rietveld, Herzog & De Meuron, Luis Barragan, SANAA and others; readings on color theory by architects Alberti, Ferrand Leger, Koolhaas, Le Corbusier; artists Mondrian, Josef Albers, Richard Paul Lohse, Ad Reinhardt, Barnett Newman, Donald Judd; philosophers Goethe, Wittgenstein, Barthes; psychologists Carl Jung; and designers Imma Boom, Ettore Sottsass, Bruno Munari and Konstantin Grcic. Resources will include the collections of the Mildred Lane Kemper Art Museum and the Saint Louis Art Museum.
Credit 3 units.
A46 ARCH 402A Measured Representation

This course proposes to investigate and create a series of measured drawings. The drawings, as architectural objects, configure architectural knowledge, perception and vision. We will begin by studying precedent drawings in relation to each architect’s theoretical framework, project description and technique. The range of works will relate different types of construction (perspectives, axonometrics, diagrams, ideograms, assemblages, montages, descriptive geometry, and mapping) with integral and symbiotic theoretical agendas. Each student will learn the techniques of presentation in their case study and from this example construct an interpretation of a specified site in this language. With a collection of theoretical frameworks and workshops on various techniques, the class will qualify a series of sites through drawing/interpreting the shadows present. Shadows may be thought of as reductions of the real object—in this sense, the drawings will act as abstractions or reductions that promote vision. Instead of simply discussing qualities of space, narratives of metaphor, intangible phenomena, implications of constructed geometry, this architectural research project attempts to propose methods of seeing such that the representation may play a more active role in the shaping of design. This course centers on the creation of imaginative processes of representation.
Credit 3 units.

A46 ARCH 404 Advancing Integrated Sustainability

Do you want to work differently? Toward more effective outcomes? This course is a call to students from all disciplines with the conviction that it is necessary for us to work together while contributing from our specific fields of study to find solutions to challenges in our built environment. Students apply the knowledge base they acquire in this course to formulating ideas for actual community projects in St. Louis. Students learn to integrate and apply a holistic range of social, economic and technical systems inspired and optimized by models in the natural world. A foundation in natural and biomimetic systems is overlaid with analysis of corporate mission, principles and triple bottom-line thinking in order to learn how to build defensible, value-based arguments for implementation of sustainable systems. With the expressed intent of achieving net positive outcomes in the built environment, the following topics are addressed: brownfield property reuse; storm/wastewater management; urban heat island management; air quality; potable water issues and opportunities; material cycles and flows including embedded energy, emissions, toxicity, virgin vs. recycled content and waste diversion; energy efficiency and renewable energy opportunities; transportation, accessibility and mobility choices; vernacular and cultural expression; local and healthy food availability; fitness advocacy and other health issues; education; public outreach and transparency; governance; and the economics of these systems. Lectures, case studies, readings and class discussions support application exercises and experimental projects to propose ideas for improving the built environment at multiple scales. Assignments are reviewed often to assist each student’s learning and questions. Complementing leading-edge theory with practical outcomes are provided with the intention that students develop valuable skills to be incorporated in their other academic projects. Please visit http://samfoxschool.wustl.edu for work samples and student manifestos from previous classes.
Credit 3 units.

A46 ARCH 404C Topics in Architectural Entrepreneurship

Entrepreneurship has become a very important issue for businesses small and large. What can the profession of architecture learn from these ideas? This course, offered in partnership with the Skandalakis Center for Entrepreneurial Studies, offers students a chance to gain exposure to the entrepreneurial ideas that are innovating the architectural community, and begin to foster a mindset of architectural entrepreneurship that has the potential to be widely beneficial to the profession. Each week the course welcomes a guest speaker who, as the owner of a firm or innovator of a new business proposal in the design field, provides case studies to show students what type of entrepreneurial ideas are shifting the architectural discipline. From sustainability, to urbanization and localism, to emerging global growth engines, and the future structure of the architectural network, each lecturer brings new insight to what it is to be an architectural entrepreneur.
Credit 3 units.

A46 ARCH 404D For Purpose: Art & Design as an Ethics-Based Model of Entrepreneurship

Working from the premise that art and design have the ability to enrich and transform lives and communities in a tangible way, students redefine social, environmental and cultural problems as opportunities. Students are encouraged to bring ideas that have the potential to address these problems through the creative processes of art and design. Students work in teams to develop a proposal for a project, product, or service-based organization with the potential to address a specific issue. Students draw lessons from researching established individuals, companies and not-for-profit organizations that are involved in the production of culturally significant, creative work that also supports a larger social mission, and students apply this research to their own proposal. Each proposal is developed into a business/ sustainability plan that demonstrates the value of the proposal and explains the resources required to meet specific goals. This course introduces students to the uncertainty that is inherent in the entrepreneurial process. Students work to develop skills to evaluate ideas in relation to their personal values, the idea’s ability to address a specific problem, and the resources required to implement a sustainable solution. The process helps students to navigate the uncertainty and assess the risk associated with implementing their proposal through morphing the idea concept, seeking advice, and building a coalition of stakeholders. This course is open to disciplines outside of architecture. Students in Art, Social Work and Engineering are encouraged to register.
Credit 3 units.

A46 ARCH 404E Design: Urban Ecosystem Principles

Integration

In today’s world, our discipline has grand challenges whose solutions often lay in other realms. How will students train themselves to leverage the interdisciplinary partnerships required to innovatively solve and evolve in a rapidly changing world? The mission of this interdisciplinary course is to “advance the interrelationships of ecological and human systems toward creating a healthy, resilient, and biodiverse urban environment” and brings together experts and students in ecology, urban design, architecture/landscape architecture, economics, social work and engineering, drawing from inside and outside the Washington University community. Building from our knowledge of ecosystem principles and function, a diverse group of leaders in their fields provides lectures, readings, and student project leadership to understand and test Healthy Urban Ecosystems Principles among human and ecological (nonhuman) systems.
and the range of sociopolitical processes entailed with their implementation. Class content is developed by Washington University leaders in their disciplines as well as external organizations such as the Missouri Botanical Garden, the Field Museum in Chicago, and others. This course builds upon a 1-unit fall seminar (not a prerequisite) that introduces challenges and solutions to achieving healthy urban ecosystems, and provides students an opportunity to more deeply engage and manipulate the interrelationships of symbiotic urban systems and apply those concepts in multidisciplinary project applications. Projects leverage student-defined challenges in the evolving laboratory of urban St. Louis using Healthy Urban Ecosystems Principles to develop multidisciplinary integrated solutions to challenges encountered in urban areas such as climate change and resilience, security of ecosystem services, social inequity, economic strife, and community vitality. Students present their work in a public forum at semester’s end. CET (https://gephardtinsitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course.

Credit 3 units. A&S IQ: SSC Arch: SPP EN: S

A46 ARCH 405D Furniture Design
The course focuses on the design of tables using wood as the primary material in response to “rational and irrational strategies” (systematic and emotional). Each student designs, develops and builds prototypes of two tables using the same material. One table is the product of a systematic analysis of material qualities, production procedures and other constructivist principles. The other table is the product of more explicitly intuitive, emotional and interpretative responses to the nature of the material and its production. Course limited to 10 students. Credit 3 units.

A46 ARCH 405H Sustainability Exchange: Community and University Practicums
The Sustainability Exchange will bring together students working in transdisciplinary teams to tackle real-world energy, environmental, and sustainability problems through an experiential form of education. Students will participate in projects with clients and partners both on and off campus; these projects will be developed with and guided by faculty advisors drawn from across the university, with the intention of delivering an applicable end-product that explores “wicked” problems requiring innovative methods and solutions. These projects matter to the client or partner. The team-based project will be complemented by a seminar that will explore the field of design and design thinking through problem-solving strategies and methodologies drawn from a wide range of creative practices, including design, engineering, and science, and it will also address contemporary topics in energy, the environment, and sustainability. Students will draw on these topics to influence their projects. This course is open to all undergraduate juniors and seniors. An application (https://docs.google.com/forms/d/e/1FAIpQLSgenyXZt0nNHtYSMIDBedPccZ268pXGWVdA92-guaM4ph_g/viewform) is required at the time of registration; students will be accepted from the waitlist after the application process.

Same as I50 INTER D 405
Credit 3 units. A&S IQ: SSC Arch: SSC Art: CPSC, SSC EN: S

A46 ARCH 407A Digital and Analog Fabrication
Digital and Analog Fabrication (Aperture Systems) explores contemporary fabrication methods for architectural design.

We will develop and employ digital and manual fabrication techniques, including casting, thermoforming, 3D printing, laser-cutting, and CNC milling, for a semester-long design project. Students will have opportunities to work with a variety of tools in the shops and digital laboratories to develop a full-scale kinetic prototype of/for a door/window/portal/aperture system. No previous fabrication experience or expertise is required. Credit 3 units.

A46 ARCH 407B Dynamic Materialism and Urbanism
Dynamic Materialism and Urbanism is a course developed for students who are interested in emerging technologies and digital production. The course develops and tests experimental design processes in architecture and digital media by enhancing 3D technologies, and it allows each student to adopt abstract thinking and making processes. This course develops digital design skills with the conceptual understanding of transformative awareness of artistic production of computational processes that can inspire new forms of architectural conditions. The current developments in digital technology allow mathematical expressions to transform complex generative systems, which have shifted the formal discourse of architecture. The new digitally based techniques are being invented to inform creative processes in architecture through manipulations of complex geometrical and topological forms. This course will focus on developing new techniques that translate these mathematical developments into diagrammatic design strategies. The generative modeling techniques will be deployed by the students for this investigation. Students will develop a complex set of massing strategies with conceptual development for defining and inventing dynamic-based architectural proposals within an urban context. Through digital modeling and mutating architectural strategies, each student will develop a transformational condition of a new emerging design. The new architectural forms are to be modeled through CAD/CAM (laser cutting) and rapid prototyping (3D printing) for physical outputs.

Credit 3 units.

A46 ARCH 408A Digital Visualization Workshop: 2D Representation
This workshop is an introduction to basic AutoCAD drawing layout and organization with printing process. The workshop introduces students to importing and exporting into other graphic software (Photoshop and Illustrator) allowing a basic understanding of resolution and line types with articulated graphic awareness to develop complex 2D drawing capabilities. Required for all 317-level MArch 3 students, who are given priority in enrolling. Open to all other architecture students as space allows.

Credit 1 unit.

A46 ARCH 408B Digital Visualization Workshop: Advanced 3D Modeling
This course develops digital design skills using the t-spline plug-in for Rhinoceros. As the field of architecture begins to incorporate evermore complex forms and formal strategies, it is necessary for designers to have the ability to work efficiently with advanced modeling software. This allows the development of clean, fluid forms that can be manipulated and transformed as part of the design process, not merely as an output. The course breaks down into four three-hour sessions in which students will have three assignments designed to give a basic understanding of the t-spline plug-in, as well as to show how this type of form manipulation applies to the field of architecture. This course is
required for all students in the core graduate program during 318 studio semester.
Credit 1 unit.

A46 ARCH 408C Digital Visualization Workshop: Advanced Rendering
This workshop is an introduction to complex digital rendering in Rhino 4.0 with plug-ins Flamingo, VRay, Maxwell and Fry Rendering Engines. These skills are needed for sophisticated rendering outputs for more hyper-real visualization. The workshop introduces students to material, lighting, camera and global illumination processes. This workshop is required for all MArch students at the 419 level, who are given priority for registration in this course. Open to other upper-level undergraduate and graduate architecture students as space allows.
Credit 1 unit.

A46 ARCH 408D BIM 101 Workshop
The future of the design and construction industry is going to be driven by the use of technology. The best example emerging today is the use of three-dimensional, intelligent design information, commonly referred to as Building Information Modeling (BIM). BIM is expected to drive the AEC industry toward a "model-based" process and gradually move the industry away from a "2D-based" process. The BIM 101 workshop is for future designers who recognize that this future is coming and who are looking for a way to begin preparing themselves in order to be ready when it arrives. We will explore how BIM is being used today and learn the basics of one of the leading BIM tools, Autodesk Revit Architecture 2009. This workshop is intended for senior undergraduate students and graduate students at the 500 level and above.
Credit 1 unit.

A46 ARCH 408J Performance Enhancing
The term "performance" has many meanings that are either quantitative, qualitative, or both simultaneously through a range of design professions. The suggested goal of performance is an optimistic enhancement to a designed entity or idea and holds the potential to be highly provocative relative to the method it is deployed when arguing for a particular design procedure or effect. The double entendre suggested by the term performance relates to both how the system technologically improves a functional aspect along with a more theatrical act of performing. Design in both architecture and fashion relies on both interpretations to create a multidimensional discourse necessary to advance conceptual design investigation. The seminar class explores issues of performance of complex surfaces at the scale of the human body. The class consists of lectures, discussions, readings, physical material manipulation, and 3D digital modeling and digital fabrication. The use of Rhino (with T-splines and/or Grasshopper) or Maya is deployed for the digital design of the skin systems. Material systems are explored initially through manual experimentation and then combined with the digital investigation for the final digital fabrication using tools such as 3D printing, lasercutting, CNC milling, and thermoforming, resulting in a final garment for the human body. The class is offered to both fashion and architecture students and the investigations occur in teams of two where ideally one from each discipline is represented.
Credit 3 units.

A46 ARCH 408M Atmospheric Animations
This course explores the capacity of modifying perception, as a way of thinking and making in design process. We recognize the ambient complex environment base on the concept of each element in space as a figure of motion, being sensitive to a specific period of time. Each student begins with selecting a certain way of observing, and developing a method to document and analyze a piece of dynamic perception which is then re-constructed through drawings or models, primarily focusing on one aspect of the experience, such as material performance, light reflections, air flow, etc. Final part of the project is representing the synthetic perception, by creating the atmospheric imagery in motion. Students are introduced to various techniques of recording ocular perceptions with the aid of digital tools, 2D representation, 3D modeling and animation rendering throughout the course, both as general workshops and individual project basis.
Credit 3 units.

A46 ARCH 408N Mapping Complex Spatial Sequences
New methods of spatial practice have changed the way architects and designers work. As designers, we are no longer tied to static, projection-based drawings as a means to develop and represent our ideas. Time-based digital imaging allows us to simultaneously examine the narrative, formal, experiential and spatial aspects of a particular place. Students will map a site through digital photography focusing on a specific spatial sequence much like how a director would set up a scene, moving fluidly from one space to another. During the first half of the semester, this spatial sequence will be used to create a drawing of the entire site as one multilayered composite image with particular attention paid to the intersection of time, space and movement. The site will then be reconstructed digitally through models or drawings, using the composite drawing as base. Finally, relationships between the drawing and model will be outlined resulting in a more complete experiential spatial sequence.
Credit 3 units.

A46 ARCH 408P Building Performance for a Solar Powered House
We will study the state of the art of building integrated solar systems, and design such a system for a house and assess its performance using computational tools. Topics include the fundamentals of solar energy systems, energy management, and its implications to design, either passive or active approach. The course involves building performance simulations using Ecotect, Energy+, HERS and other tools. Students will use simulation data to study the relation between design and its performance. The course will consist of lectures, review, and student projects. The course will be parallel with several Engineering courses, including ESE 437: Sustainable Energy Systems, and EECE 428: Sustainability Exchange. Projects will involve teamwork with Engineering students of different backgrounds. The course will contribute to Team WUSTL solar decathlon with the following features: energy efficiency; passive design; high performance enclosure; net-zero energy; renewable energy; heat recovery; sustainability: water recycle; carbon neutral; lean construction; resilience: prefabricated house to mitigate natural disasters; Smartness: advanced sensors network; energy management; data visualization; human-centered living adaptability; flexible space; human comfort and perception controls to operate the house to improve productivity and health; an interdisciplinary effort for renewable energy and sustainable buildings.
Credit 3 units.
A46 ARCH 4080 Fabricated Drawings
The course will focus on digital fabrication tools, techniques and image theory to uncover new methods of producing physical images. Images are built in a myriad of methods including physical media or from data. Physical images, as defined in the context of this seminar, will transcend a 2D limitation to develop thickness. The increase to 2.5D or 3D opens opportunities to investigate the use of digital fabrication tools to construct images. In particular, the class will focus on the way information technology continues to have a profound effect on the way we perceive our built environment and the way we represent it. The images that surround us are becoming increasingly easy to generate through information technology. Access to technology both in terms of digital design and output affords the opportunity to reconceive the nature of images. Images are developed through analog, digital or hybrid processes. Their generation is a collaborative interaction between intuition and information processes through clearly defined rules. The scientific theoretician, Peter Galison, discusses the tension between intuition and information on the nature of images in the arts and sciences. Images reveal the intricacy of relations and knowledge, but they are simultaneous deceptive because they bypass the mathematics of pure science. The tension in the arts tends to be between the intuitive, interpretive ability of images as representation versus the image as evidence of a computation-based process. Architectural theoretician Mark Linder talks about how images in architecture are moving away from representations of something else toward a more literal and non-idealized result of a procedure. The image is literally the process of making visible the end result of an operation. Therefore, images are the evidence of the process by which they were generated. As such, the class will develop innovative processes for our digital fabrication equipment to construct images. The projects will develop new methods to use the CNC mill, laser cutters, knife plotter and 3D printer. New tools may need to be developed and built to enable the image fabrication process. In parallel with technological development is material experimentation. Students will be highly encouraged to test new materials to program their behavior and interaction with technology. Credit 3 units.

A46 ARCH 409C Watercolor Painting for Architects, Urban Designers and Landscape Architects
This class will introduce students to different techniques of watercolor painting. The class will focus on teaching students the basics of material selection (paint colors, brushes, various papers), proper paint blending/mixing techniques, creation of unique color palettes, and both smooth wash techniques and painterly brush effects. Students will learn to render site plans of their own project work. There will also be an optional afternoon of pure sketching with paint. One objective is to teach students the methods to create beautiful renderings so that they may choose to apply the techniques to their final studio illustrative work (at the discretion of the student). Grades will be based upon class participation, effort, and final watercolors. Fulfills Analog elective requirement. Credit 3 units.

A46 ARCH 409E Architectural Sketching
An introduction to architectural sketching — a graphic communication skill that architects and designers use to analyze and document their environments, and to visualize design thinking and creative process. Many class sessions will meet on site, drawing directly from observation. The first part of the semester will focus on fundamentals of sketching through the study of existing buildings, their contexts, and interiors. Students will expand and refine their observation skills as they use the architectural sketch as a mode of research — exploring elements of architecture: form, material, light; and the relationships between building and context, and building and interior. The second part of the semester will expand to include the architectural sketch as language. Students will learn to use the architectural sketch to explore, confront, develop, and translate abstract ideas into visual narrative, creating a record of design thinking and creative process. Students will be registered for the course from the waitlist by the Registrar’s Office. Priority will be given to undergraduate students. Prerequisite: Drawing I or graduate architecture standing. Credit 3 units.

A46 ARCH 4102 Lively City: Behavioral Studies & Public Space Design
During this three-day masterclass in Berlin, Germany, 20 students have the opportunity to learn about behavioral studies and the design of public spaces. Working alone and in small groups, students acquire new perspectives and skills that put people and their needs at the heart of the creative process of re-imagining and transforming cities. Livability, lively cities, public life and other concepts describing inviting, vibrant and stimulating urban environments are frequently communicated in new visions for the future of cities today. This focus on “urban life” is a direct reaction to the urban realities created in the 20th century, where increases in our standards of living and the associated city building processes have created areas in which large and increasing numbers of people have become isolated from each other, socially and geographically. Despite our new awareness for the need to plan for a shared and intensified urban life in sustainable cities, we continue to have difficulties in understanding exactly what this “urban life” is, how much of it we truly want and need, and how we can reconcile the often conflicting and simultaneous needs of people for privacy and social stimulation. Employing the examples of University City and the Gateway Arch/Archgrounds the class studies behavior in accessing and using defined sections of both urban areas as a way of dealing with complex urban design challenges in St. Louis. Through field studies and observations, each student explores cost-effective and culturally sensitive solutions that can improve the integration of these important urban assets in the City of St. Louis. Open to all graduate students, with priority given to MUD studio and seminar students. Visas are required to travel to England, depending on the passport country of the student. Preparation for visa applications begins on the first day of classes during the spring semester. There is a minimum enrollment of eight by February 1.

A46 ARCH 411 Architectural Design III
Prerequisite: satisfactory completion of Arch 312. Credit 6 units.

A46 ARCH 411A Architectural Design III (Study Abroad)
Prerequisite: satisfactory completion of Arch 311 for Bachelor of Design students. Satisfactory completion of Arch 312 for Bachelor of Science students. Twelve hours of studio work a week. Credit 6 units.
A46 ARCH 412 Architectural Design IV
Prerequisite: satisfactory completion of Arch 411.
Credit 6 units.

A46 ARCH 419 Architectural Design III (MArch 3)
The third of a three-semester sequence of design studios.
Continues examination of issues raised in ARCH 317 and ARCH 318.
Credit 6 units.

A46 ARCH 421U Urbanism: Chicago
This design research seminar focuses on the urban infrastructure and associated buildings of central Chicago, in and around the areas near the Loop. The Chicago metropolitan area is the third largest in the United States, and from 1870 until the 1950s, Chicago was America’s “second city,” surpassed in size only by New York City. It remains the densest and most “urban” of the cities of the Midwest, with many examples of complex interconnections between rail lines, highways, and various kinds of pedestrian-oriented urban environments. This seminar combines historical and field research on some of the many architectural urban design interventions in Chicago. Students choose among several topic areas to produce detailed drawings and digital models of specific urban interventions. There will likely be a publication of the work. Topic areas for digital documentation include the pedestrian relationships between transit lines and various buildings and urban complexes, including the large Millennium Park interventions by SOM and others over the Illinois Central railway lines adjacent to Lake Michigan, and Wacker Drive, a 1920s underground limited access highway along the Chicago River, and other projects. Fulfills History/Theory and Urban Issues elective requirement.
Credit 3 units.

A46 ARCH 421V Unbuilt Sert
This design research seminar will focus on the digital simulation of the unbuilt architectural design projects of Josep Lluís Sert (1901-83). This spring we will document and analyze Sert’s drawings for St. Botolph’s Chapel (1963) designed for the Boston Government Center complex with the goal of virtually “building” it. Sert practiced in Barcelona in the 1930s during the era of the Spanish Republic and later in the U.S. as both architect and planner. He was the President of CIAM (International Congresses of Modern Architecture) from 1947-56, and Dean of the Harvard Graduate School of Design from 1953-69 where he developed urban design as a discipline and academic program. The chapel was an effort to combine elements of Catalan modern architecture with his concept of a modern “New Monumentality” suitable to the postwar world. The seminar will also visit several of Sert’s major built projects in the Boston area, and will include presentations by Dean Emeritus Edward Baum, who was job captain on the St. Botolph’s chapel project with the Sert, Jackson firm. Students will work in teams to produce detailed digital models of the project to simulate the “built” chapel inside and out. Publication of the work is anticipated.
Credit 3 units. Arch: GACS

A46 ARCH 422H Urban Topographies
This digital seminar introduces students to the basics of geospatial modeling at both regional and local scales, with an emphasis on the creative application of GIS data toward design thinking, site analysis, and speculative urban design. The course explores the potential for GIS data as more than just for inventory and mapmaking, but also as an invaluable creative design tool. A series of digital workshops will touch on a range of cross-platform workflows, from digital cartography to parametric modeling to 3D animation. Tying this together will be a speculative urban landscape project that the students will model and visualize utilizing the software introduced. This year’s iteration will lean more toward an experimental and explorative use of GIS for design, art, and visualization. This course is intended to give students the flexibility to approach the syllabus as an independent study or as a supplement to their studio work. Software that will be covered includes ArcGIS, Autodesk Infraworks, 3DSMax and Grasshopper.
Credit 3 units. Arch: ECOL

A46 ARCH 423 History of Landscape Architecture
This seminar reviews the history of gardening in the Western tradition from the Renaissance to the present and in the Chinese and Japanese traditions. Park-making, neighborhood design, and the rise of landscape architecture as a profession receive attention, including several classes held at notable St. Louis examples. Course requirements include readings, a design or research project, and a final exam. Fulfills History/Theory elective.
Credit 3 units.

A46 ARCH 423D Videography for Designers
This seminar course examines the practice of capturing, producing and analyzing moving images as a method of inquiry for design. We focus on the analytical and communicative qualities of time-based media (recorded sequences, video, slideshows, animation, simulation, remote sensing, etc.) as a human-landscape intermediary that has the ability to alter understanding and evaluation of the environment. We explore techniques from a range of disciplines — art, design, sociology, anthropology, etc. The course meets weekly for brief lectures/presentations to direct our inquiries, discussion of foundational readings and ideas, media workshops, screenings, local field trips, and/or student presentations of work. Throughout the semester, students generate brief, exploratory work that focuses on methods and techniques, and a larger, final project that engages the themes of the course. Open to all graduate and upper-level undergraduate students, a goal of the course is to blur boundaries between art and design, and to capitalize on their various approaches. No experience with video, animation, or other software is required — only the desire to explore and incorporate time-based methods into individual processes.
Same as A48 LAND 423D
Credit 3 units.

A46 ARCH 424L The Chinese City in Historical Perspective
This seminar examines the development of urban centers in China through history. The city is approached from formal, territorial, political, and socio-economic perspectives, situated in the broader landscape of cultural and environmental changes. Key themes are continuity and change, citizenship and public life, urban form and structural transformations, and infrastructure and the hinterland. The course begins with archaeological and textual origins of the earliest cities and ends with the staggering growth and globalization of Chinese cities today.
Credit 3 units.

A46 ARCH 4280 Architectural History I: Antiquity to Baroque
This lecture course introduces major historical narratives, themes, sites and architects from ancient Greece to the end
A46 ARCH 4284 Architectural History III: Advanced Theory
The third survey class focuses on architectural history and theory after modernism. It examines the rise of architectural theory as a field of inquiry and its links to both critical social theory — including the Frankfurt School — and to contemporary traits of architectural directions in a global context. Topics range from architects’ responses to new conditions in the rapidly developing cities of the later 19th century, through early 20th-century theories of perception and social engagement, to recent efforts to find new bases for architectural interventions in the contemporary metropolis. This course is required for all MArch 3 students.
Credit 3 units.

A46 ARCH 430A Special Topics: Territories, Watersheds, Infrastructures
This course will be a multiscalar, transdisciplinary group project to position the Mississippi River, its tributaries, and the St. Louis region within the broader geographic, political, ecological, industrial, agricultural, and economic landscapes. The fieldwork-based seminar will deploy radical methods of site-specific documentation, such as flying balloons for context-specific forms of aerial photography and/or conducting video surveys via canoe and/or kayak trips along the Mississippi and its backwaters, among others. These documentations will then be translated into a group-produced project that may include large-format photographs, mappings, videos, and/or animations contributing to a field-station exhibition, potentially on or within a barge. The project will collaborate closely with Jesse Vogler’s and Mathew Fluharty’s “Anthropocene Vernacular” project and the Berlin-based Haus der Kulturen der Welt’s “Mississippi: An Anthropocene River” project. Through the end of 2019, Haus der Kulturen der Welt is convening several interdisciplinary groups to “investigate the river basin to develop local approaches to issues of global change and together will forge new methods of transdisciplinary research and education.” Additional project partners will include diverse interest groups such as the U.S. Army Corps of Engineers, Big Muddy Adventures, the barge industry, and farmers, among others. The exhibited work will be used to represent ideas and to display objects of action for a set of public discussions about responsibility, agency, and possible futures for the Mississippi River Basin.
Credit 3 units.

A46 ARCH 430B Special Topics: 1000 Sections
Representation structures awareness. Sections are an instrumental mode of representation, allowing a viewer/designer to understand spatial attributes such as proportion, position, and performance. Section drawing is both basic and fundamental: it is among the suite of techniques designers rely on to convey information at all phases of a project and at multiple scales. In this course, we will use section drawing as a method of analyzing lived experience, canonical architecture, and building typology. This course will be drawing intensive, with a positive attitude toward excess and joy. Our work will progress through the reading of critical theoretical texts to the analysis of pertinent projects to direct experience in the world. Collectively, we will assemble a tome of sections that explore a range of spatial types, build performance, and build typologies. We will engage in a dialogue around measurement, scale, datum, and theories of space. This will lead to an individually driven series of drawings exploring the imaginative potential of section drawing.
Credit 3 units.

A46 ARCH 430C Special Topics: Learning From Pruitt-Igoe
This seminar examines the design and adaptation of ordinary inhabitant, taking as its starting point the Pruitt-Igoe housing project in St. Louis. Did this housing project succeed or fail as architecture? The question maybe has been asked for the wrong reasons. We will examine whether Pruitt-Igoe fulfilled the United States’ government’s goal of creating modern, effective mass housing for working-class Americans. The path to an answer will examine the tangle of architectural modernism (and its critics), vernacular architecture, US housing policies and ideological shifts within architecture itself. The seminar will investigate the career of architect Minoru Yamasaki, precedent tenement housing forms and other social mass housing projects in the United States and Europe. Ultimately, students will complete research on whether or not it is possible to re/claim Pruitt-Igoe as a successful architectural endeavor by understanding what housing forms it was intended to replace and what has come after.
Credit 3 units.

A46 ARCH 430D Special Topics: The Thin Side of Concrete
Building enclosures constitute the physical barrier between interior and exterior environments. They protect interior spaces against water, wind, sunlight, temperature, sound, and other forces of nature. Today, building enclosures are sophisticated assemblies conceived through complex processes that merge design, science, and craft. The outermost layer of the exterior wall is the most exposed to natural forces, so it needs careful attention; its performative aspects must work effectively over the lifetime of the building. The design of building enclosures must be evaluated in terms of function, aesthetics, feasibility,
architecture? This question may have been asked for the wrong reasons. We will examine whether Pruitt-Igoe fulfilled the United States government’s goal of creating modern, effective mass housing for working-class Americans. The path to an answer will examine the tangle of architectural modernism (and its critics), vernacular architecture, U.S. housing policies, and ideological shifts within architecture itself. The seminar will investigate the career of architect Minoru Yamasaki, precedent tenement housing forms, and other social movements. The case studies in the United States and Europe. Ultimately, students will complete research on whether or not it is possible to (re)claim Pruitt-Igoe as a successful architectural endeavor by understanding what housing forms it was intended to replace and what has come after.

Credit 3 units. Arch: GARW, RW

A46 ARCH 435E Furnish It, With Pieces
Public space is a key constituent that determines the character of a neighborhood and a city. It is embedded in the urban fabric and can mediate the relationship between people and their particular surrounding landscape. Urban furniture and hardscape can play an important role in offering a wide range of uses for public spaces. The design of such pieces affects the way people live and experience a particular environment. The ultimate goal of this course is to design, fabricate, and install a set of repeatable units to equip a vacant urban lot in order to offer opportunities for social interaction. The seminar focuses on the in-depth understanding and development of ideas based on the technical, experiential and aesthetic exploration of one material: concrete, into one specific application: urban furniture. This seminar builds up on the scope of the Creative Activity Research Grant awarded by the Sam Fox School of Design & Visual Arts where five porous concrete pavers were designed for a vacant lot in North St. Louis. The challenges are to adapt the given pavers to a new site condition and to propose new urban furniture made out of concrete. It involves the construction of pieces able to equip a gathering space as well as sidewalks that can offer local residents the opportunity to interact with others. This provides not only aesthetic appeal to the residents and visitors, but also allows the possibility of implementing an actual project in an abandon lot in Old North. We will enrich the community with a wide range of training opportunities as each step in the process of making the plaza is used for teaching purposes, from making pavers and other pieces, to salvaging, reusing or repurposing recycled material. Students are asked to design and build concrete urban furniture necessary for the gathering area. The pieces can encompass a wide range of uses: chairs and benches, tables, raised beds, planters, litter bins, modular fencing and mobility-related pieces such as bike racks, bollards and car stoppers. This is an opportunity for hands-on experience. These pieces have to consider the limitations of the material in terms of strength, weight, size, etc.; learning about the material itself as well as the act of construction, assemblage and mass production, which includes methods and technology, ranging from tools to molds. The formwork for the concrete pieces will be built through a process of CNC milling and rubber molds or vacuum formed plastic. The challenges are to define environmentally sensitive strategies for problem solving, conceptual development and poetic expression at both levels of the design process, conceptual and real. Sustainable principles such as the use of recycled materials as an aggregate in the concrete mix are an important consideration. Construction is the ultimate goal of this class. We work in collaboration with Anova, a local manufacturing company dedicated to the design and production of site furnishings. Anova provides some materials and brings their expertise to the project.
A46 ARCH 4362 Advanced Grasshopper

With a base knowledge of the Rhino+Grasshopper interface, this class will focus on developing an entirely scripted building system. Each student will be given a set of initial parameters (building volume, square footage, percent of transparent/opaque facade, required programmatic elements/size, etc.). They will begin by selecting a formal precedent that will help them determine a structural system. Within this framework, students will develop an algorithmic logic to organize program and then articulate a responsive skin. The goal of this exercise will be to develop understanding of the potential use of scripting in design. Scripting allows the designer to transform their design dynamically as the parameters change or update. The final output of this class will be detailed, annotated drawings of each student’s structural system as well as a 1/4” scale model of a small portion of their design utilizing available tools in the FabLab such as 3D printing and CNC routing. Students taking this course must have working knowledge of Grasshopper. This class is an advanced class exploring design through generative modeling.

Credit 3 units.

A46 ARCH 436A Information Modeling and Technology

This foundation-level course will introduce students to the digital tools of Geographic Information System (GIS), Building Information Modeling (BIM), and Building Performance Analysis (BPA). Its goal is to equip the student with the ability to gather information, analyze it, and make decisions within the information-rich environment of architectural design and construction. Students will develop an understanding of these three seemingly distinct approaches and their role in preserving the quality and quantity of accumulated information for “upstream” use. The topics addressed in the course will be further developed in more advanced courses during subsequent semesters. The introduction of information-gathering principles within GIS will expose students to the wealth of information, such as maps and census data, that is already available, as well as methods of turning raw data into analytical material for use in their design work. This segment of the course not only provides a foundation to ArcGIS, but also leads toward use of this information within applications like Revit Architecture. Creating and managing an information pool of digital GIS and design and construction data and making it available throughout the lifecycle of a project is commonly referred to as BIM. In the second part of this course, we will explore how BIM is being utilized today and learn the basics of one of the leading BIM-compliant applications, Autodesk Revit Architecture 2010. During the third part of this course, students will be introduced to BPA, a process that embodies a holistic approach toward the integration of sustainability and design. By understanding when and how to apply sets of analytical exercises via applications like Ecotact Analysis within the context of Information Modeling, students will develop an understanding of how design decisions have a profound and lasting impact on the overall building sustainability and performance.

Credit 3 units.

A46 ARCH 436B BIM in Practice

Building Information Modeling (BIM) is a developing method of creating, sharing and managing project data through a visualized 3D or 4D model. While it continues to deliver on an initial promise to increase design consistency and efficiency while minimizing errors, the focus of attention is shifting to the use of BIM to facilitate integrated methods of project delivery. The course explores the use of the BIM platform and the development of data exchange methods in architectural design through a case study and subsequent design project. Students are provided instruction in Revit covering the creation, management and extraction of data from a model, but also look at the technology more broadly, discussing the changes advanced by the deployment of BIM processes in practice.

Credit 3 units.

A46 ARCH 436D Advanced BIM in Practice

While the adoption of BIM continues to grow across the industry, criticism of its effectiveness as a design tool remains. The foundation of BIM, the creation and management of geometric objects with associated non-geometric data, is often at odds with established methodologies of design. Current practice typically manages this schism by separating design from the use of BIM for documentation and construction. The class will seek to develop methods of design within a BIM environment, not through the translation or reshaping of traditional techniques, but through the design of a methodology that seeks to capitalize on what BIM enables: direct, digital collaboration and the facile management of large data sets. This is not an introductory class. Basic knowledge in Revit (or an alternative BIM software) is required. Skill in other parametric and 3D modeling software as well as a basic knowledge of Grasshopper or other algorithmic processes is strongly preferred. Students will investigate and design digital processes using a short design brief to enable the investigation.

Credit 3 units.

A46 ARCH 436E Technology + Tectonic

Beginning with a rigorous study of three-dimensional grid systems, students will work in pairs to develop conceptual proposals for site-specific hanging installation. Students will examine materiality, grid distortions, and spatial qualities, as well as interactions with natural light and human input. The ideas generated in this course have the potential to directly affect an architectural installation the following semester. Students enrolling in the course should have completed at least one digital seminar as a prerequisite.

Credit 3 units.

A46 ARCH 438 Environmental Systems I

Environmental Systems I is the foundation course in the architectural technology sequence. This course addresses the relationship between buildings and an expanded idea of context, including ideas of environment, landform, energy, material and space. The class places an emphasis on each student developing their own attitude toward architectural sustainability, its role within the design process, and its relationship to architectural form. The class is organized around the themes of climate, site and energy. The theme of climate addresses macro- and micro-climates, and the roles they have in developing architectural form through “passive” strategies. The theme of site expands the idea of the architectural project to examine landform, position, access and region. The theme of energy looks at architecture as both embodied energy and a consumer of energy, to understand how the architect helps to control and direct these flows at macro and micro levels. Two goals for the class are to provide students with ways of thinking about and of working with issues of sustainability, which can inform their design practice, and to equip them with the basic knowledge needed to continue within the technology sequence.
A46 ARCH 4381 Environmental Systems I: Site Planning
Environmental Systems I, site planning module, addresses the relationship between buildings and an expanded idea of context, including environmental, material and spatial realms. The class places an emphasis on each student developing their own attitude toward architectural sustainability, its role within the design process, and its relationship to architectural form. The theme of site expands the idea of the architectural project to examine landform, position, foundation, access and region. Two goals for the class are, first, to provide students with ways of thinking about and of working with issues of sustainability, which can inform their design practice, and second to equip students with the basic knowledge needed to continue within the technology sequence. Only students who have received a partial waiver for A46 438 Environmental Systems I may register for this course.
Credit 3 units.

A46 ARCH 438C Expanding Skin
In the 1957 text “The Pliable Plane: Textiles in Architecture,” Anni Albers wrote the following: “...if we think of clothing as a secondary skin we might enlarge on this thought and realize that the enclosure of walls in a way is a third covering, that our habitation is another "habit."” In this text, Albers proposed the concept of skin as an inhabitable layer, first as a covering for the body and then as an expanded layer of enclosure. This seminar will explore Albers’ concept of the second skin by developing new strategies for constructing complex surfaces at the scale of the human body, particularly in the context of digital fabrication and computational design. Emphasis will be placed on assemblies that yield innovative visual or tactile effects while also engaging specific material performance. How can we design with a focus on performative pattern that can enclose the body and its structural and geometric complexities? How can we conceive of patterns that are not disrupted by these complexities but rather enhanced by them? The course will consist of lectures, readings and seminar discussions, tutorials, iterative material investigations, 3D digital modeling, and digital fabrication. Student projects will focus on the design of inhabitable, layered constructions while engaging constructive techniques from both the fashion and architectural disciplines. Rhino (with Grasshopper), Maya or Z Brush will be utilized for the initial digital investigations. Students will experiment with materials and develop innovative construction methods that engage digital fabrication tools such as the 3D printer, the laser cutter, and CNC mill for the production of a second skin in the form of a garment for the human body.
Credit 3 units.

A46 ARCH 439 Environmental Systems II
We as architects have to analyze and address complex issues and relationships, synthesize them, and then make them manifest through clear design strategies. Building systems must reconcile solar heat gain, glare control, daylight levels, thermal insulation, ventilation, acoustics, air quality, structure and fabrication — all in relation to the scale and comfort of the human body. The development of environmental systems into a clear, comprehensive, and elegant design solution cannot be an afterthought; it must be a synthesized and integral part of the design process, with a clear strategy that operates at multiple scales. Building upon the passive strategies explored in Environmental Systems I, this course will lay the foundation for the integration of active environmental systems with enclosure, space, and the requirements for human occupation. This will be done through the study of climate, air, temperature, water, light, sound and energy. Each topic will be assessed against problems, principles, possibilities and potential. This course focuses on how important it is to consider active systems as part of an integrated design strategy addressing both form and performance throughout the design process. Prerequisites: Environmental Systems I & Building Systems I.
Credit 3 units.

A46 ARCH 4391 Environmental Systems II: Acoustics
The Acoustics Workshop is designed for students that have been partially waivered from Environmental Systems II with the exception of the acoustics portion. The workshop joins the Environmental Systems II class for only the lectures on the topic of acoustics. The class will cover the design of acoustic environments starting from the physics of sound, the design room acoustics, identifying noises sources, and investigating methods for noise mitigation.
Credit 1 unit.

A46 ARCH 439H Environmental Systems II (Mumbai)
We as architects have to analyze and address complex issues and relationships, synthesize them, and then make them manifest through clear design strategies. Building systems must reconcile solar heat gain, glare control, daylight levels, thermal insulation, ventilation, acoustics, air quality, structure and fabrication — all in relation to the scale and comfort of the human body. The development of environmental systems into a clear, comprehensive, and elegant design solution cannot be an afterthought; it must be a synthesized and integral part of the design process, with a clear strategy that operates at multiple scales. Building upon the passive strategies explored in Environmental Systems I, this course will lay the foundation for the integration of active environmental systems with enclosure, space, and the requirements for human occupation. This will be done through the study of climate, air, temperature, water, light, sound and energy. Each topic will be assessed against problems, principles, possibilities and potential. This course focuses on how important it is to consider active systems as part of an integrated design strategy addressing both form and performance throughout the design process. Prerequisites: Environmental Systems I & Building Systems I.
Credit 3 units.

A46 ARCH 445 Building Systems
Building Systems will examine the performance and properties of building materials, both traditional and new, through an analysis of assemblies and related systems. Investigations of wood, masonry, steel and concrete and the integration of relevant building systems will provide the fundamental structure for the course. All systems will be investigated relative to their architectural purpose, impact on the environment, relationship to culture/context, technical principles and will also consider manufacturing, construction, our profession and the society in which we practice. Moreover, the course will also examine the performance characteristics of contemporary enclosure technology and explore the impact these technologies are having on design thinking. Although we will focus primarily on the aforementioned topics, we will also identify and consider the impact of other parameters on design and performance such as building codes, role of the profession, health and life safety, systems integration, sustainability and industry standards. The course strives to provide students with a sound familiarity and understanding of traditional building systems in wood, steel
and concrete; as well as the skills necessary to represent these systems. The course also seeks to expose students to the material and poetic potential of these technologies related to the making of architectural environments.
Credit 3 units.

A46 ARCH 447A Structures I
Statics and strength of materials through beam and column theory. Loads are defined and states of stress are identified and analyzed. The context of structural behavior is identified and optimal structural behavior and material efficiency structural design is reviewed. Form-active, bulk-active and vector-active structural options are explored relative to the transference of load along the length of structural members. The course applies structural theory to the analysis and design of structural members — beams, trusses, arches and columns.
Credit 3 units.

A46 ARCH 448A Structures II
Continuation of Arch 447A with consideration of the effects of forces on structural members of various materials. Introduction to the design of structural members in steel, reinforced concrete and wood. Prerequisite: Arch 447A.
Credit 3 units.

A46 ARCH 452K The Ambiguity of Scale: Japan’s Landscape Tradition
Modernist architects in Japan, particularly those associated with the Metabolist Movement, often used the term "niwa," literally gardens, to describe their urban design projects. The city, land, and sea were both the setting and the object of design interventions. This course will examine the Japanese landscape tradition from antiquity to the 21st century. The approach will be interdisciplinary, using literature, art, religion, economics, and technology to inform us of how earth, water, air, winds, plantings, views, and architecture were seen and imagined in Japan during successive historical periods. We will look at the cyclical reconstruction of Ise Shrine that took place in 2013, canonical Zen gardens from Japan's early modern period, the advent of modernist landscape principles and techniques in the 20th century, as well as the influence of garden aesthetics on the development of architecture and urban design over time.
This course is open to qualified undergraduates. It is also offered as a Methods seminar for undergraduates in the Architectural History minor and fulfills the History and Theory requirement for Master of Architecture students. The maximum enrollment for this course will be 12.
Credit 3 units.

A46 ARCH 452L The Japanese House
This seminar examines the Japanese house as a modernist idea as it evolved over the course of the 20th century, both within Japan and internationally. The single-family, "tou-cut" house came to define Japan's suburban, industrialized landscape in the postwar era, but the type historically emerged out of a certain modernist imagination of Japan's premodern architecture, as architects and critics such as Bruno Taut and Arthur Drexler projected their specific readings of shoin and minka architecture onto a mandate for contemporary practice. The seminar will investigate major strains of domestic architectural design in postwar Japan, paying particular attention to the formalist exercises of Shinhoara Kazuo and technology-driven designs of Ikebe Kiyoshi. More contemporary pursuits by SANAA and Atelier Bow-Wow in materiality, transparency, smallness and urban complexities will also be covered. This course satisfies the History/Theory elective requirement.
Credit 3 units.

A46 ARCH 453A Aviation & Architecture: Air Terminal Design and Emergence of Airport Cities
As seaports and train stations were once hubs of commerce and trade, airports serve as vital engines to today's economy, linking cities and regions to the globalized economic landscape. Surrounding airports, entire cities are emerging both organically and in planned developments, building upon the business related to air travel with office parks, conference centers, hotels, entertainment districts and retail. This seminar will be structured in three parts. In the first part, we will examine the fundamentals of transportation architecture and the way air terminal design has developed. Starting as simple structures on an airfield in the 1920s, airports were designed as heroic modern structures from the 1940s to 1980s, ubiquitous terminals in the 1980s thru early 2000s, and most recently as regionally expressive terminals in the 21st century. Students will research, analyze and present case studies, mapping an understanding of the basic architectural components of air terminal design. In the second part, we will explore the rise of airport cities. Students will work in teams of two to research and analyze the planning, governance, impact and growth of airport cities. Sites we will study include developments around Singapore's Changi, Amsterdam's Schipol, London's Heathrow, Paris' Charles de Gaulle, and Chicago's O'Hare. The third part of the seminar will allow students to select a topic of special interest that spans the scale of terminal design and airport cities. Students will initiate independent research to deliver a final paper and presentation on the topic of their choice related to aviation, transportation architecture and planning. Seminars will be supplemented with guest lectures and will be highly conversational. We will explore opportunities for site visits to both airports and airport cities.
Credit 3 units. Arch: GACS, HT

A46 ARCH 455A Urban Books
Since the beginning of the 20th century, art, architecture, and urbanism together have investigated the production of images that shape the symbolic dimension of our experience of large cities. The main goal of this course is to critically embrace this tradition through the format of the artist's book. St. Louis is the focus for our observations because it is familiar to our everyday lives and also because it provides key situations for understanding contemporary forms of urbanity and how urban space is produced and imagined. The course bridges the curricular structures of art and architecture by enhancing the collaboration between the practical and scholarly work developed in both schools, with additional support from Special Collections at Olin Library. It combines the reading, lecture, and discussion format of a seminar with the skill building and creative exploration of a studio. This course is divided into three progressive phases of development: The first consists of weekly readings, discussion, and responses in the form of artist's books. The second phase focuses on the Derive with physical activities and assignments based on interacting directly with the urban environment. The third phase focuses on individual research, documentation, and final book design and production. Same as X10 XCORE 336
Credit 3 units. Arch: GAUI, UI Art: CPSC, FADM EN: H
A46 ARCH 456B Way Beyond Bigness...or Toward a Watershed Architecture

2015 marked the 10- and 20-year anniversaries of two seminal events that have challenged architects' relationships to large scale, complex societal issues: 1) the publishing of S.M.L.XL in October 1995 that featured Rem Koolhaas' manifesto of “Bigness” and 2) the landfall of Hurricane Katrina just outside of New Orleans in August 2005 that catapulted fields of design into an unprecedented post-disaster context. Students will reconcile these two disciplinary jolts by understanding these seemingly incongruous snapshots of history as jumping off points for new modes for architectural activism and opportunism. Students will design a manifesto, in newspaper format, for a future-based discipline of architecture that sails uncharted realms that are "Way Beyond Bigness." This will require the simultaneous submersion and assertion of architecture within other disciplines; the formulation of alternate modes of representations for emerging practice-based models; the blurring of academic and professional agendas in the urgency of activism; and the integration of multiple scales, interest groups and agendas in ridiculously complex and antagonistic situations. Underpinning Bigness and Hurricane Katrina will be additional case studies, guest lectures and field trips that cover: CIAM and the emergence of urban design; Koolhaas' thesis and OMA's early practice; mega-scale urban renewal projects in St. Louis; contemporary investigations into territorial scales of design; and multiple scales of contemporary, integrated water-based designs, post-Katrina efforts and beyond. This course fulfills the History/Theory Case Studies elective requirement.
Credit 3 units. Arch: GACS, GARW, HT

A46 ARCH 457B Segregation by Design: A Historical Analysis of the Impact of Planning and Policy in St. Louis

This transdisciplinary seminar, bridging humanities and architecture, introduces students to research, theories and debates currently being conducted on issues of segregation, urban policy and sustainability. By placing these debates in a historical and local context students will discover how policy and decisions are entrenched with racial, cultural, physical and socioeconomic segregation, and create the spatial transformation of America’s divided cities. Students will learn to evaluate and analyze policy and planning through the framework of Triple Bottom Line Sustainability to understand the physical manifestation of segregation during growth and decline. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course.
Credit 3 units. Arch: CAST, GACS Art: CPSC EN: S

A46 ARCH 462M Pattern Recognition

Interrogates a recent history of architecture replete with pattern. Case studies of patterning in contemporary projects are undertaken through the production of analytical, computational models to reveal an understanding of performance and construction. In parallel, the course presents a theoretical survey of related issues in art, psychology, computation and ecology. In this context, pattern is understood as a performative expression of an ecological system, distinct from historical issues of ornament and representations. Informed by the analysis, students then digitally produce an original pattern, both graphically operative and spatially materialized. Credit 3 units.

A46 ARCH 462N Constructing Ideas

Constructing Ideas is about creating design concepts and transforming these into built architecture. We will learn how conscious imagination and coherent interventions lead us to ideal realities. This class examines the design and construction process as academic research. We consider the practice of making architecture as a synthesis of analysis, interpretation and transformation. Studies will teach us how a building idea influences its construction and how the knowledge about construction can become the starting-point of an idea. Interrogating design problems and investigating existing typologies as a methodology will lead us to specific answers. We will explore conceptual-artist practices and examine their strategies, learning to lead with intent, play with parameters and question the givens. From there, we will look at examples of Swiss architecture whose early integration of construction in the design process has a long tradition. One could say that the bearing itself gets designed in Switzerland. We will consider invisible structures and material specificity. Learning this language gives us the ability to transform our ideas into specific architectural expressions and precisely tailored solutions. The form of the seminar is experimental. We consider our meetings to be spatial and contextual interventions, precisely designed like architecture. Sessions will vary, from a lecture to an exhibition, talks, a dinner — the goal is to be very conscious about what we are doing. This process is going to be documented through the whole semester. Each student will create his own design thesis and realize an installation that reflects it. The results will be exhibited and presented to the public.
Credit 3 units.

A46 ARCH 463B Emergent Urbanisms

This course surveys emergent models of urbanization in globalizing cities that thus far defy categorization or exist peripherally in studies of urban form. The goal of the course is to equip students with the theoretical and historical background, the analytical tactics, and the critical awareness necessary to reposition themselves as designers in these increasingly
A46 ARCH 463C Invisible Cities
This graduate and advanced undergraduate seminar takes as a point of departure the famous 1972 Italo Calvino text that reframes a single city (Venice) as multiple cities, told through a sequence of discrete narratives and descriptions. Each of Calvino’s invisible “cities” reflect different emotional and physical environments or impossibilities — for their inhabitants, yet are all still connected through an overarching narrative. Invisible Cities, the course, builds on this premise that a city is not a one-size-fits-all experience (nor a monolithic construct with a uniform constituency), but instead is composed of radically different environments all selectively accessed, depending on one’s positionality or relationship to urban redevelopment processes. In places like St. Louis — but in fact in all American cities — residents live out different urban realities or imaginaries, with unequal access to the same services, provisions and processes. A highly visible instance of this occurs along Delmar Blvd in St. Louis where two contrasting lived experiences play out in neighborhoods across from each other on the north-south divide. However, this class posits that much less visible instances of the dupliculous city also exist, in spaces not geographically divided, but (more insidiously) overlaid. The course will focus on this conceptualization of inequity where both privileged and underserved populations co-exist in much more intertwined ways. Within any given block, neighbors live according to different opportunities, for education, health access, police services, or routes to property acquisition and financing. These are the invisible, spatially simultaneous cities; the urban realities that are much harder to see — at least to those who do not live those realities on a day-to-day basis. Like in Calvino’s world, urban and lived space is endlessly continuous and accessible for some; for others it is fragmented, even disorienting or opaque. This course will examine, frame, collect and document the various manifestations of invisibility together with the political instruments and policies that produce — and reproduce — it. We will use the St. Louis region as our primary focus, with comparisons to other sites. Our studies will involve a close re/reading of many of the mechanisms of daily governance and urban design such as policies, planning tools, legal, financial and real estate protocols and of course design decisions and processes; i.e., the apparatuses of urban redevelopment that exist right before our eyes. The seminar welcomes both graduate students and advanced undergraduate students from across disciplines. Support for Invisible Cities is provided by the Washington University in St. Louis Ferguson Academic Seed Grant Program granted through the Offices of the Chancellor and Provost and the Olin Business School. Fulfills Urban Issues and MUD Track elective requirement. Credit 3 units. Arch: GAMUD, GAUI, UI

A46 ARCH 464A Architecture and Photography
Seminar deals with issues raised by use of photography by architects, historians and critics. Seminar confronts the assumption that our knowledge of notable buildings and architectural space is based primarily on the photographic image. Photographs are tacitly accepted as objective facts, and the pervasiveness of photography in magazines, books and exhibits as substitute for direct experiences is rarely questioned. Goal of seminar: to foster a healthy skepticism of photographs, and to investigate the role of photography as a means of record and convey complex spatial conditions by the ordering conventions of the frame. While not technical, the course introduces students to technical aspects of photography that are particularly relevant to architectural photography: parallax, lighting, lens distortion, depth of field, format and grain, cropping, photomontage and point of view. Fulfills history/theory requirement. Credit 3 units.

A46 ARCH 465C Art, Design and Entrepreneurship: Creative Placemaking Beyond The City
This course invites students from diverse areas of interest to engage with the cultural landscape of Marion County and Hannibal, Missouri — a region that, through the work of Mark Twain, popularly epitomizes both rural life and the allure of the Mississippi River. While a quarter of a million tourists visit this area each year to follow in Tom Sawyer’s footsteps, the work of local artists, designers and entrepreneurs is innovating the narrative of this place and opening up room for consideration of African-American experience, local food systems, and the complex series of social and economic connections within life along the Mississippi. This course puts that spirit of collaboration and imagination in the hands of students, challenging them to think beyond the borders of their disciplines to create projects that present new connections between place, community and culture to both rural and urban audiences. The National Endowment for the Arts defines creative placemaking as an opportunity when “public, private, not-for-profit, and community sectors partner to strategically shape the physical and social character of a neighborhood, town, tribe, city, or region around arts and cultural activities.” Through fieldwork, research and idea-creation, students collaborate with mentors on the ground to create locally appropriate projects that address questions of culture and design in the region. Occasional off-campus visits are joined in the classroom to a wide range of readings, case studies, and webstreamed conversations with national leaders across fields. The course concludes with small teams designing a specific plan, event, or project that could later be implemented in the community. Credit 3 units.

A46 ARCH 471A Continuity and Transformation
Throughout history and across cultures, certain ideas, concepts and organizational strategies have persisted in architecture, despite advances in social ideals and technological capabilities. The seminar explores the phenomenon of this continuity
with the goal of uncovering the manner in which these ideas and strategies are transformed. Whether classified by use, characteristic form or compositional device, the continuity of these notions is clearly traceable as a body of knowledge waiting to be revealed, understood, assessed and, when valid, built upon. The transformation of ideas and strategies is one of the most fundamental activities of the designer, but relies on careful study. We discover evidence of this phenomenon in vernacular architecture, patterns of settlement and habitation, and in the work on many of our most influential practitioners, such as Le Corbusier, Kahn, Moneo and Zumthor, as well as in the realm of painting and sculpture including Cubism, Suprematism and Expressionism.

Credit 3 units.

A46 ARCH 472 Sustainable Development
This seminar is an introduction to the basics of small- to medium-scale development. It will begin with a series of introductory lectures covering the principles and tools of development, such as creating a project performa, basic tax credits, TIFs, and financial structuring of a project; exploring methods of implementing sustainable practices and designs into development-driven projects through marketability, cost-savings, tax credits and other incentives; and investigating the process of real estate development through the use of sustainable ideas and practices in buildings. It will continue with a series of case studies in which the class will examine models of existing developers in terms of these base elements. Finally, students will be asked to develop a project in order to understand the architect-client relationship and how to stimulate recognition of the value and importance of sustainable design in real estate development.

Credit 3 units.

A46 ARCH 475D Landscapes Through Time: The History of St. Louis’ Built Environment
From the Mississippian mound builders to the urban conditions of the present day, this course will investigate the different approaches of various cultures to creating built environments that meet the needs of their time in terms of landscapes and structures. Using the City of St. Louis as an example, the course will examine the layout and infrastructure of the city at various periods, discussing the effects of technological changes in the creation of structures, improvements to transportation, facilitation of trade and the effects of these forces on the cultural and built landscape of the city. Each class session will discuss the structures and landscapes that defined individual eras in the history of the city, and the ways in which these were successful or unsuccessful. This course fulfills the History/Theory elective requirement.

Credit 3 units. Arch: CAST, GACS

A46 ARCH 475E History of the Modern Art Museum
This seminar explores the development of the modern art museum as an architectural type, measured against evolving nature of display objects, curatorial practices, and demands of the viewing public. Since the consolidation of the type in the early 19th century, the art museum has been the primary site where the symbiotic trajectories between artistic and architectural development have played out. Also to be examined is the importation of this program into non-Western countries, which responded with their own canons and classifications of fine art. The course ends with recent case studies where architecture has made new, often aggressive, commentaries on objects it is designed to display. The course is open to graduate students and advanced undergraduate architectural history minors. Fulfills History/Theory elective requirement.

Credit 3 units. Arch: GARW, HT

A46 ARCH 484B Notations on Florentine Architecture
This seminar proposes a historical survey of significant buildings and urban spaces in Florence through the graphic documentation and spatial analysis of selected sites and buildings from antiquity to the Renaissance and to modernism. The general framework of our analysis is to understand the relationship between the historic development of the city and its most symbolic architecture. This approach is based on the work of Italian scholars, such as Giulio Carlo Argan, who define the history of architecture as the history of the city. The course is methodically divided into two blocks of exercises. In the first part of the semester, we focus on readings, site visits, sketches, analytical drawings and photos, as well as the mapping of the urban development of Florence. In the second part of the semester, students focus on the tectonic study of specific buildings through the construction of representational and experimental models. Each student's individual work contributes to a collective 2D and 3D final project to be presented as an exhibition in the Florence Studio during the spring and to be shown at the College of Architecture in the fall.

Credit 3 units.

A46 ARCH 486A NOMA National Design Competition
This course allows students to work collaboratively to develop a comprehensive body of work (including presentation boards, physical models, and animated digital graphics) in response to the National Organization of Minority Architects’ (NOMA) Barbara G. Laurie Annual Student Design Competition. Students work in pairs to develop thorough schematic-level solutions. After the midterm review, the class selects the strongest overall team project and uses that as a basis to develop highly detailed plans, elevations, sections, details, 3D views (animation optional), cultural, sustainable, and accessibility design concepts. Not only does this activity culminate into a final review, but students submit and formally present their design solution at the annual NOMA (http://www.noma.net) Conference. CET (https://gephardt.institute.wustl.edu/or-faculty-and-staff/community-engaged-teaching) course.

Credit 3 units. Art: CPSC

A46 ARCH 488 Architecture Service Learning Practicum
The Sam Fox School of Design & Visual Arts, the College of Architecture, and the Graduate School of Architecture & Urban Design are giving a problem-solving studio workshop about architecture, community, and the environment. Fourth-through 10th-grade students from schools in the St. Louis Public School District will do 2D and 3D hands-on problem-solving projects, use the libraries and computer labs on campus, and be introduced to the field of architecture through lectures and discussions about design projects they will undertake. Washington University graduate and undergraduate students in architecture will participate in the important responsibility of being teaching assistants.

Credit variable, maximum 1 units.

A46 ARCH 490 Architecture Service Learning Practicum
The Sam Fox School of Design and Visual Arts, College of Architecture and Graduate School of Architecture & Landscape Architecture & Urban Design, give a problem-solving studio
workshop about architecture, community and the environment. Fourth through 10th grade students from schools in the St. Louis Public School District do 2D and 3D hands-on problem solving projects, use the libraries and computer labs on campus, and are introduced to the field of architecture through lectures and discussions about design projects they undertake. Architecture faculty member Gay Lorberbaum leads the curriculum. Washington University graduate and undergraduate students in architecture participate in the important responsibility of being teaching assistants. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course. Credit 3 units. Art: CPSC

A46 ARCH 490A Explore & Contribute: Collaboration Between Washington University & Henry Elementary School Principal Esperansa Veal of Henry Elementary School is creating a remarkable place for her students who live in the neighborhood of the Cochran Gardens Federal Housing Project in downtown St. Louis. Principal Veal is clear in her conviction to provide each of her students with both literal and academic nourishment, and is working unceasingly to make the Henry School a safe and creative oasis for children ages pre-school through grade six. Her goal is to have the Henry Elementary School students explore sustainable ways to live during the 21st century. To this end, we will emphasize ecological sustainability, environmental health, personal responsibility, leadership and a comprehensive, high quality academic program. With an emphasis on the environmental sciences, energy alternatives and conservation, recycling, organic gardening and the food sciences, and the emerging “green” economy, students will focus on developing the math, science, writing, and hands-on skills that will make them successful leaders to make a difference in improving the environment for humanity. This course invites undergraduate and graduate students from different fields of study to apply their discipline to the goal of designing and teaching hands-on problem-solving projects for students at the Henry Elementary St. Louis Public School, located across the street from Cochran Gardens Housing, at 1220 N. 10th Street. Gay Lorberbaum, with advising from Principal Veal, will work individually with each Washington University student to develop the right fit between the creative contribution each Washington University student wants to offer and the vision Principal Veal has for each age group of students at Henry Elementary School. Students enrolled in this course will work on-site at Henry Elementary School during the scheduled meeting times. The will be an additional meeting on campus for one hour on Wednesdays at a time to be determined later by the enrolled students. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course. Credit 3 units. Art: CPSC

A46 ARCH 499 Senior Capstone in Architecture The Senior Capstone in Architecture allows undergraduate students in their final semester of study to pursue individual research projects. All students will participate in shared discussions and presentations, as well as pursue a highly individualized line of research inquiry that potentially starts where a former project left off, supplementing current or previous course work, or investigating a previously unexplored route. The course will culminate in a presentation and defense of a well-articulated and developed research project. Credit 3 units.

Landscape Architecture

A48 LAND 401 Landscape Architecture Design Studio I This core studio explores design principles common to architecture and landscape architecture as well as their own specificity. A series of problems focuses on the relation of component to space through conceptual, analytical, formal and perceptual investigations. Credit 6 units.

A48 LAND 402 Landscape Architecture Design Studio II In this core studio course, students develop a spatial understanding of landscape architecture through a series of exercises of varying scale and complexity. Building design skills incrementally, students acquire facility with the manipulation of ground plane and the elaboration of vegetation and material strategies at both site and urban scales. The studio fosters an appreciation of landscape architecture as a systemic construct with formal, ecological and social implications. Credit 6 units.

A48 LAND 421 Landscape Representation I: Hand Drafting, Drawing and Sketching The beginning course in the representation sequence introduces students to freehand and mechanical representation as a means for developing and communicating design ideas. Students build a basic understanding of orthographic drawing typologies and traditional drawing materials. Emphasis is placed on development of observational skills, building a design vocabulary, basic drawing skills, and the techniques of landscape architecture and architectural representation. Credit 3 units.

A48 LAND 423D Videography for Designers This seminar course examines the practice of capturing, producing and analyzing moving images as a method of inquiry for design. We focus on the analytical and communicative qualities of time-based media (recorded sequences, video, slideshows, animation, simulation, remote sensing, etc.) as a human-landscape intermediary that has the ability to alter understanding and evaluation of the environment. We explore techniques from a range of disciplines — art, design, sociology, anthropology, etc. The course meets weekly for brief lectures/presentations to direct our inquiries, discussion of foundational readings and ideas, media workshops, screenings, local field trips, and/or student presentations of work. Throughout the semester, students generate brief, exploratory work that focuses on methods and techniques, and a larger, final project that engages the themes of the course. Open to all graduate and upper-level undergraduate students, a goal of the course is to blur boundaries between art and design, and to capitalize on their various approaches. No experience with video, animation or other software is required — only the desire to explore and incorporate time-based methods into individual processes. Credit 3 units.
A48 LAND 452K The Ambiguity of Scale: Japan’s Landscape Tradition
Modernist architects in Japan, particularly those associated with the Metabolist Movement, often used the term “niwa,” literally gardens, to describe their urban design projects. The city, land, and sea were both the setting and the object of design interventions. This course will examine the Japanese landscape tradition from antiquity to the 21st century. The approach will be interdisciplinary, using literature, art, religion, economics, and technology to inform us of how earth, water, air, winds, plantings, views, and architecture were seen and imagined in Japan during successive historical periods. We will look at the cyclical reconstruction of Ise Shrine that took place in 2013, canonical Zen gardens from Japan’s early modern period, the advent of modernist landscape principles and techniques in the 20th century, as well as the influence of garden aesthetics on the development of architecture and urban design over time.
This course is open to qualified undergraduates. It is also offered as a Methods seminar for undergraduates in the Architectural History minor and fulfills the History and Theory requirement for Master of Architecture students. The maximum enrollment for this course will be 12.
Same as A46 ARCH 452k
Credit 3 units.

A48 LAND 453 Advanced Planting Design
This course focuses on both the cultural, environmental, scientific and the technical aspects of planting design. The course is taught in three modular sessions: horticulture and the science of plants; typologies and design such as bosque, grove, glade, allee, meadow, wetlands, hedgerow, etc., and their origins in productive landscapes, application to contemporary landscape architecture; and the practical hands-on experience in the field with both design documentation to installation techniques. The course offers several field trips to experience urban revitalization, various design typologies, sustainable land use, reclamation and restoration.
Credit 3 units.

A48 LAND 480B Mapping the Metropolitan Mississippi
This seminar explores the relationship of city to river through reading, recording and mapping. Students document their research, create proposals and develop simulations and prototypes for a site on the St. Louis riverfront. Methods of inquiry combine hand-recording, photography, GIS techniques and DIY devices. The course alternates discussion sessions, field research and lab. Open to all graduate students; undergraduates require the instructor's approval.
Credit 3 units.

A48 LAND 483A Emergence in Landscape Architecture
This course investigates the roles of emergence theory in landscape architectural discourse. For the purposes of the course, emergence is considered as the development of new and/or different conditions as a result of disturbance. Disturbance can take many forms, and the phenomena that are subject to disturbance are many and varied. Landscapes are continually disturbed by social, economic and physical irruptions, but cognitive structures, perceptual frameworks and cultural values are also subject to turbulence that, as with landscape disturbance, often leads to innovation, novelty and resilience. The course explains what emergence theory is, where it comes from, how it relates to environmental design in general, and how it has — or could — change the way we design human and nonhuman inhabitations. Through readings, presentations and discussions, students are able to connect the rise of emergence theory in cultures of contemporary thought to its application in practice. The main theme of the course is the potential for emergence theory to enable us to relate qualitatively different modes of existence (human; nonhuman) to each other and through the connections thus established improve the lifeworlds of all. The structure of the course is based around ten key concepts of emergence, as follows: open systems; situation, initial conditions, assemblage, nature cultures, difference, field theories, disturbance, morphogenesis, formless. Each student investigates one of these concepts and presents their findings to the class.

About Us

The Sam Fox School of Design & Visual Arts (http://www.samfoxschool.wustl.edu) is a unique collaboration in architecture, art and design education that links professional studio programs with one of the country’s finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art and the Mildred Lane Kemper Art Museum (http://www.kemperartmuseum.wustl.edu).

The College of Art, founded in 1879, was the first professional, university-affiliated art school in the United States. In the 1940s, its broad-based core program helped set the standards for the bachelor of fine arts degree. Faculty over the years have included Max Beckmann, Philip Guston and other internationally known artists.

The College of Architecture, established in 1910, was one of eight founding members of the Association of Collegiate Schools of Architecture (ACSA). In 1962, Architecture launched one of the nation’s first Master of Urban Design programs. Four winners of the Pritzker Prize, considered architecture’s highest honor, have taught at the school.

The Mildred Lane Kemper Art Museum dates back to 1881, making it the first art museum west of the Mississippi River. The collection has historically focused on contemporary work. Today, the Kemper Art Museum holds roughly 3,500 important paintings, sculptures, photographs and installations by 19th-, 20th- and 21st-century American and European artists, along with significant antiquities and a large number of prints and drawings.

Additional collaborative opportunities are provided by the Department of Art History and Archaeology (http://arthistory.artsci.wustl.edu) in Arts & Sciences, the Kenneth and Nancy Kranzberg Art & Architecture Library (https://library.wustl.edu/units/artarch), and the D.B. Dowd Modern Graphic History Library (https://library.wustl.edu/spec/mghl).

Inquiry, Creativity and Synthesis

The Sam Fox School offers rigorous art and architecture education at both the undergraduate and graduate levels, within the unique context of an independent, nationally prominent research university.

The student body is composed of approximately 300 undergraduate and 40 graduate students in Art as well as 200 undergraduate and 280 graduate students in Architecture. In all, they represent 17 countries, 47 states and the District of Columbia. Roughly 30 percent of undergraduates pursue combined studies with another university area.

Both core and advanced studios integrate contemporary theory and practice. Among the innovative programs offered are the following:

- Multidisciplinary courses are co-taught by Art, Architecture, and Art History and Archaeology faculty. Recent seminars have explored the history of illustrated entertainment, combined urban theory with book design and production, and crafted a variety of online publications. Courses in exhibition studies are being offered, and a new program of exhibition studies is under development.
- International studios in Barcelona, Berlin, Buenos Aires and Florence are taught by Washington University faculty and offer a range of distinctive programs in art and architecture.
- Community projects include the University City Sculpture Series, which funds student-designed public artworks; WashUCity, a mentoring program for local high school artists; and Architecture’s Building Community/Community Building, which explores relationships between St. Louis’ inner city, nearby municipalities and outlying suburbs.

Uniting Creativity and Scholarship

The Sam Fox School boasts a unique combination of academic and intellectual resources.

The Architecture faculty includes practicing architects, urban designers and landscape architects as well as eminent architectural theorists and historians and a select number of international visitors. The resident, full-time faculty members have won national and regional awards for design excellence and planning, including more than two dozen from the American Institute of Architects alone.

Art’s full-time faculty members include prominent painters, sculptors, printmakers and mixed-media artists as well as leading illustrators, graphic designers, fashion designers and photographers. Design faculty have won numerous professional honors, and fine art faculty have been featured in more than 100 solo exhibitions and 300 group shows on five continents.
The nationally recognized Kemper Art Museum maintains a vital program of exhibitions, publications and educational events. Major thematic shows are drawn from institutions and private collections around the world, highlighting nationally and internationally emerging artists. The acclaimed permanent collection includes key works by modern and contemporary artists, from Henri Matisse, Pablo Picasso and Jackson Pollock to Christian Boltanski, Candida Hofer and Olafur Eliasson.

Public events include concerts, film screenings, lectures and discussions with distinguished visitors, and museum tours led by student docents. The museum also provides workspace for faculty- and student-curated exhibitions (usually relating to Sam Fox School curriculum). Courses in Art History and Archaeology further complement the critical and practical study of exhibitions while facilitating student involvement in professional curatorial projects.

A Comprehensive Campus

The Sam Fox School is housed in a comprehensive, six-building campus for design and the visual arts located on the eastern portion of the Danforth Campus. Conceived around a central courtyard, it both reflects and updates Washington University’s original campus plan, which was developed in 1895 by Frederick Law Olmsted, the founder of American landscape architecture.

Designed by the internationally acclaimed architecture firm KieranTimberlake, Anabeth and John Weil Hall (http://samfoxschool.wustl.edu/buildingthefuture/#Weil) houses state-of-the-art graduate studios, classrooms and digital fabrication spaces. With its abundant natural light and flexible, loft-style studios and workspaces, Weil Hall is a new locus for teaching, study, creation and critique. The William A. Bernoudy Architecture Studio — along with studios for graduate architecture, landscape architecture, urban design, illustration & visual culture, and visual art — houses programs for the Graduate School of Architecture & Urban Design and the Graduate School of Art. Over the last decade, both graduate schools, which include the nationally ranked Master of Architecture and Master of Fine Arts in Visual Art programs, have doubled in size. The Roxanne H. Frank Design Studio houses the Graduate School of Art’s new Master of Fine Arts in Illustration & Visual Culture program, which welcomes its first class in fall 2019.

Another component of Weil Hall — the luminous, two-story Kuehner Family Court — features a living green wall, skylights, and glass walls that allow for visual connectivity between studio spaces, providing students with a feeling of simultaneity and participation in a larger community. As the conceptual heart of the building, the Caleres Digital Fabrication Studio allows students and faculty across programs to execute complex projects using state-of-the-art tools. Other notable spaces include the Ralph J. Nagel Dean’s Suite and Weil Hall Commons, which includes a commissioned mural wall that features new works by alumni each year.

Earl E. and Myrtle E. Walker Hall brings together the undergraduate sculpture and painting areas. The sculpture area includes undergraduate studios, a wood shop, a metal shop, an installation room, and a faculty office, all on the ground level and first floor. The undergraduate painting studios are on the second floor.

William K. Bixby Hall, completed in 1926, has grown and changed to meet the needs of the students, faculty and administration of the College & Graduate School of Art. The building currently houses teaching and studio spaces for first-year art and design students, the undergraduate fashion design and printmaking majors, and the Nancy Spiritas Kranzberg Studio for the Illustrated Book (http://samfoxschool.wustl.edu/node/3649). The Dubinsky Printmaking Studio, a state-of-the-art facility, is located on the first floor. On the ground floor, an administrative suite is home to student services and the finance office.

Joseph B. Givens Hall has been architecture’s home since 1932. It features a variety of studio spaces, including large drafting rooms with 15-foot ceilings, large windows, and skylit ateliers. The building’s compact and elegant Beaux-Arts design has at its heart a grand central stair often used for socializing and informal meetings. Givens Hall also houses a main lecture room, review spaces, classrooms, digital fabrication labs (http://samfoxschool.wustl.edu/node/3432), and administrative offices for the deans and directors of the Sam Fox School.

Mark C. Steinberg Hall, completed in 1960, was the first commission by Fumihiko Maki, then an architecture professor at Washington University. Formerly home to the Gallery of Art, the Department of Art History & Archaeology in Arts & Sciences, and the Art & Architecture Library, Steinberg Hall now houses Career Services and the undergraduate communication design and art and design students, the undergraduate fashion design administrative suite is home to student services and the finance office.

The nationally recognized Kemper Art Museum (http://www.kemperartmuseum.wustl.edu), completed in 2006, is another commission by Maki. The elegant, 65,000-square-foot limestone-clad structure — a gathering point for scholars and the general public — includes more than 10,000 square feet of exhibition space, art storage facilities, and the Florence Steinberg Weil Sculpture Garden. The museum also houses the Kenneth and Nancy Kranzberg Art & Architecture Library and the Department of Art History & Archaeology.

Visiting Artists and Architects

The Sam Fox School invites distinguished academics and professionals to lecture (http://www.samfoxschool.wustl.edu/calendar/events/lectures), attend critiques and visit major studios. Recent visitors include the following:

2018-19
• Diana Al-Hadid
• Enrique Martinez Celaya
• Tod Williams and Billie Tsien Architects | Partners
• Winka Dubbeldam
• Richard Sennett
• Leah Dickerman
• Alfredo Payá
• Morehshin Allahyari
• Iñigo Manglano-Ovalle

Degree Requirements

Undergraduate Degree Programs

The College of Architecture offers course work leading to two undergraduate degrees: the Bachelor of Science in Architecture and the Bachelor of Arts in Architecture. The requirements for both degrees are the same through the junior year. Students choose which degree program they wish to pursue. Further information about the particular requirements and curricular structures of the undergraduate degree programs is listed below.

Students in the College of Architecture select, in consultation with their advisers, a course of study that satisfies the formal degree requirements, addresses their interests, and best meets their overall goals.

Students begin with two design courses particular to architecture. They take a drawing course and required courses in the College of Arts & Sciences in addition to electives across the university.

For the Bachelor of Science degree, students continue to study architecture in depth through the senior year. For those in the Bachelor of Arts program, the fourth year offers the flexibility of studying outside of architecture or pursuing other electives.

Continuing for Graduate Study Years

Students receiving the Bachelor of Science in Architecture degree can apply to two-year Master of Architecture programs. Students receiving the Bachelor of Arts degree with a major in architecture usually apply to three-year Master of Architecture programs. Please visit the Graduate School of Architecture & Urban Design (http://bulletin.wustl.edu/grad/architecture)Bulletin for more information.

College of Architecture

Requirements

Students must fulfill the following degree requirements:

Academic Requirements

1. Writing: Every student must demonstrate proficiency in reading and writing the English language and must begin to develop mature skills in framing and revising arguments by completing course work as determined by the Department of English, with a grade of C- or better. Transfer students must fulfill the writing requirement by taking an approved writing course or by review of a writing portfolio. For more information, visit the College Writing Program website (https://collegewriting.wustl.edu).

2. Math 131 Calculus I (Natural Sciences/Math) with a C- or better

3. Physics 191U Physics I — Sophomores, Juniors, and Seniors Only (Natural Sciences/Math) with a C- or better

4. Humanities (3 units): Humanities courses examine the human condition as it has been documented and expressed in both past and contemporary times. This area includes courses from literature (both in English and other languages), Classics, History, Philosophy and Religious Studies, as well as some courses in the creative arts such as Dance, Drama, Music and Writing. Courses designated “Arch HUM” fulfill the humanities requirement.

5. Social and Behavioral Sciences (3 units): These courses use qualitative and quantitative observation to explore the social environment, relationships with society and forms of human behavior. This area includes courses from Anthropology, Economics, Education, International and Area Studies, Political Science and Psychological & Brain Sciences as well as courses from other areas, including interdisciplinary studies. Courses designated “Arch SSC” fulfill the social and behavioral sciences requirement.

6. Art History (Art-Arch 113 History of Western Art, Architecture and Design) with a C- or better; may be taken pass/fail

7. Art History (Art-Arch 215 Introduction to Modern Art, Architecture and Design) with a C- or better; may not be taken pass/fail
# Architecture Degree Requirements: Students in the Classes of 2020, 2021, and 2022

* A maximum of 15 non-Washington University units (including Advanced Placement, International Baccalaureate, and transfer credit) is permitted. A maximum of 9 units may be applied to physical education, lessons and/or independent studies. No units in University College are accepted.

**Additional Requirements**

If a student plans to enter the architectural design sequence ARCH 311–ARCH 312 in the fall of the junior year, the student must complete 60 units of academic work by the end of the sophomore year.

Each undergraduate student must successfully complete 122 units and at least 30 units in advanced courses (numbered 300, 400 or 500). The 30 units in advanced courses may include the minimum number of advanced units required by the major areas of concentration. Courses required for the major (refer to the College of Architecture Requirements) must be passed with a grade of C- or better.

Each student must spend at least three semesters in full-time residence (at least 12 units per semester) at Washington University. Unless excused by the director of the College of Architecture, the student must earn the last 30 units at Washington University. The director of the College of Architecture may waive the full-time residence requirement for students who are employed full-time and who have completed at least two years of college.

**Regulations**

A. Students may take one non-required course on a pass/fail basis each semester.

B. Students may enroll for credit in only one supervised performance course during any semester. Students may earn a maximum of 9 units toward the degree in supervised performance and/or in group or individual performance courses, internships, and independent studies combined.

**Combined Studies**

Washington University offers students the option to study across disciplines and to take advantage of the wide range of courses available. Students may choose to major in architecture and minor in another subject in architecture or to major in architecture and choose a minor or second major in an area from a different undergraduate school.

**Academic Honors & Awards**

**Dean’s List:** In recognition of exceptional scholarship, the Office of the Dean compiles, at the end of each academic year, a list of those students whose work has been particularly worthy of commendation. Students will be eligible for the Dean’s List if they:

1. Have earned at least 14 credit hours per semester under the “credit” grade option; this excludes the grade options of “pass/fail” and “audit” and courses in University College; and
2. Have achieved a semester grade-point average of 3.5 or higher.

**Latin Honors:** Graduating students may be considered for Latin Honors (cum laude, magna cum laude or summa cum laude) as determined by academic performance.

**Special Awards, Medals and Prizes**

**Undergraduate**

**Betty Lou Custer Award.** The St. Louis Chapter of the American Institute of Architects presents a book award in memory of Betty Lou Custer, longstanding executive director of the chapter, to an outstanding graduate receiving either undergraduate degree. In recognition of Custer’s service to the profession of architecture, the prize is awarded to a student who has contributed willing service to the College of Architecture.

**Faculty Award.** The faculty of the College of Architecture offers a book award to an outstanding BDes or BS undergraduate in the college.
**Sophomore Book Prize.** This award is presented to an outstanding sophomore who has completed the basic design sequence within the college. It is given in honor of Leslie J. Laskey, professor emeritus, whose inspired teaching formed the basis of the basic design program and whose influence is carried on in the lives and work of the students who studied with him.

**Graduate**

**Alpha Rho Chi Medal.** Alpha Rho Chi, a national social fraternity in architecture, awards a medal to the graduating sixth-year student who has shown an ability for leadership, performed willing service for the Graduate School of Architecture & Urban Design, and demonstrated promise of real professional merit.

**American Institute of Architects Medal.** Each year, the AIA medal is awarded to a member of the graduating class in recognition of scholastic achievement, character and promise of professional ability. The student so honored receives the engraved medal. The runner-up also may be awarded a certificate, depending on the decision of the faculty. The awards are made in the name of the Henry Adams Fund by the AIA.

**All School**

**James Walter Fitzgibbon Prize.** Mrs. James Fitzgibbon and friends of the family established a fund to honor Professor Fitzgibbon's memory and to recall his long and distinguished service on the faculty of Architecture. The annual income from this fund provides for the Fitzgibbon Prize, given to a 300- to 600-level student who has the winning solution to a one-day sketch problem.

**William Tao Prize.** Established by William K.Y. Tao, PE, alumnus, emeritus trustee and affiliate professor at Washington University, the William Tao Prize provides an annual cash award to students who have demonstrated excellence in the understanding and application of building systems in architecture, including illumination, electrical and mechanical engineering, and energy-efficient design.

**Frederick Widmann Prize in Architecture.** Through a bequest from the late Frederick Widmann, an annual prize of at least $1,500 is offered to the best architectural student in the university. The selection is made by the faculty of the architecture college.

**Scholarship Funds**

**Scholarships with Applications**

**St. Louis Chapter American Institute of Architects Scholarship Fund.** This scholarship is awarded to students from the St. Louis metropolitan area who have completed the first two years of their architectural studies. Inquiries should be addressed to the St. Louis Chapter AIA, 911 Washington Ave., #225, St. Louis, MO 63101. Separate application is required.

**The James W. Fitzgibbon Scholarship in Architecture.** This scholarship is awarded to support four years of study leading to either undergraduate architecture degree. The Fitzgibbon Scholar is selected in recognition of outstanding academic performance and promise in the field of architecture. The scholarship is in the amount of full tuition, and it is renewable for a total of four years of undergraduate study.

Competition is national in scope, with finalists invited each year to visit the College of Architecture at the college's expense. At this time, one student is chosen to receive the full-tuition scholarship, and the other finalists are awarded partial scholarships. These are renewable for each year of undergraduate study, assuming continued academic and design excellence.

To be eligible, an applicant must be a high school senior who meets the following criteria:

1. Ranks high in the senior class; and
2. Has SAT or ACT scores in the upper range.

To enter the competition, the applicant must follow the usual admission application procedures by completing a Washington University first-year application and sending a digital portfolio of artwork. Portfolios should be submitted through SlideRoom.

**Scholars in Architecture**

The Scholars in Architecture program provides named scholarship funds that have been donated to the university by individuals or companies specifically for this purpose. Selection is based on financial need and academic achievement. There is no application process. The total amount of the student’s financial assistance package does not change.

**Policies**

**Sam Fox School of Design & Visual Arts Grievance Procedures**

The dynamic and creative studio culture at the heart of the Sam Fox School strives to be safe and inclusive for all members of our community. Our faculty, staff, and students join together in their commitment to creating learning environments of mutuality and respect. When concerns or disagreements arise about conduct, grading, or other matters in the Colleges of Art and Architecture, policies exist for pursuing proper resolution.

**Grade Dispute Policy**

The Sam Fox School aims to provide each student with a fair assessment of their academic work and studio. Students have the right to dispute their overall course grade (not individual assignments) if they believe that grade does not accurately reflect the quality of their work. A grade dispute must be submitted to the faculty member who assigned the grade within 30 days of receipt of the grade. The Sam Fox School stresses that every effort to resolve such a dispute be made by the faculty and student involved. A student’s eligibility for advancement in sequential course work requires timely resolution of the grade.
dispute. If the student is a graduation candidate, the dispute process must comply with the Intent to Graduate submission deadlines set forth by the Office of the University Registrar or else the degree conferral will be delayed by one semester or until resolved.

In general, the dispute process will occur and be resolved as follows:

1. The student presents their question about the grade in writing to the faculty member and clearly states the reasons for questioning the grade.
2. The faculty member and the student review the grading procedures as stated in syllabus and discuss the determining factors of the student’s grade.
3. If the case is not resolved between the student and the faculty member, the student may put forth their complaint in writing with supporting evidence to the chair* of the academic program, with a copy given to the faculty member involved with the dispute. The student should provide all of the course syllabus and materials relevant to the assigned grade within two weeks of the complaint. If a conflict of interest exists between the student and the chair (e.g., the chair is teaching the course), the case will be referred to another chair in the Sam Fox School or to the director of the college.
4. The chair* of the academic program will review the materials. The chair will resolve the dispute by working with the faculty member and the student to arrive at a determination.

* In the case of the MFA program, the role of chair is fulfilled by the director of the Graduate School of Art.

Integrity and Ethical Conduct

Washington University and Sam Fox School of Design and Visual Arts are committed to the highest ethical and professional standards of conduct and consider these to be integral to their mission of the promotion of learning. To maintain these standards, the university relies on each community member’s ethical behavior, honesty, integrity, and good judgment. Each community member should demonstrate respect for the rights of others, and each community member is accountable for their own actions. Washington University policies state that members of the university community can expect to be free from discrimination and harassment. Students, faculty, staff, and outside organizations working on campus are required to abide by specific policies prohibiting harassment, which are posted on the Compliance and Policies (https://wustl.edu/about/compliance-policies) page of the university’s website. Should a situation arise in which a member of our community believes they have cause to file a grievance, there are two categories of grievance to consider: academic and non-academic. Academic grievances can either be when a student challenges a course grade or when a fellow student or faculty member feels a matter of academic integrity is at issue. Student grievances filed to challenge a grade that the student feels has been given incorrectly must follow the procedures outlined in the Grade Dispute Policy above. Academic integrity grievances are made when a faculty member or fellow student feels a student has compromised the environment of honesty and ethics in the school. Academic integrity infractions follow the procedures laid out in the Sam Fox School and University policies (https://samfoxschool.wustl.edu/node/5766) and are managed in the Sam Fox School by the Academic Integrity Officer, Assistant Dean Cris Baldwin. Please refer to Washington University’s Academic Integrity Statement (https://studentconduct.wustl.edu/academic-integrity) for additional information.

Non-Academic Concerns

If a member of our academic community feels that the ethical and safe environment of the classroom has been compromised, for whatever reason, they may seek guidance through the school’s Faculty-Student Mediator, Professor Jeff Pike. Students may also consult Washington University’s Grievance Policy and Procedures for Allegations by Undergraduate Students Against Faculty (https://wustl.edu/about/compliance-policies/governance/grievance-policy-allegations-undergraduate-students-against-faculty). In addition, University Resources available for support include the following:

- Title IX (https://titleix.wustl.edu) (for issues related to discrimination, sexual harassment, and sexual violence)
- Mental health concerns (https://shs.wustl.edu/MentalHealth/Pages/default.aspx) (Habif Health and Wellness Center)
- Drug and alcohol concerns (https://shs.wustl.edu/HealthAndWellness/HealthTopics/Pages/Substance-Abuse.aspx) (Habif Health and Wellness Center)
- Immediate physical/mental health concerns (https://police.wustl.edu/Pages/Home.aspx) (Washington University Police Department)
- Center for Diversity & Inclusion (https://diversityinclusion.wustl.edu/brss) (for issues related to bias, prejudice, or discrimination)

Academic Integrity

Students and members of the faculty of the university have an obligation to uphold the highest standards of scholarship. Plagiarism and other forms of cheating will not be tolerated. When a student has violated the integrity of the academic community, an instructor may recommend that the student be brought before the Committee on Academic Integrity. A list of university policies can be found on the website of the University Registrar (http://registrar.wustl.edu/university-policy-information).

Attendance

Regular attendance at all classes and studio meetings is expected of each student. If, in the opinion of the instructor, any student has accumulated absences to such an extent as to preclude the possibility of satisfying the course requirements, the
student's registration in that course will be canceled, subject to
the approval of the director.

Units and Grades
A unit is the amount of credit given for one hour of lecture or
up to three hours of studio work per week for one semester. All
students in the College of Architecture may take one nonrequired
course on a pass/fail basis each semester. All students in the
Graduate School of Architecture & Urban Design may select one
of the following two grading options as they register for each
semester: (1) the grade option or (2) the pass/fail option. Under
the grade option, a student may take one nonrequired course
on a pass/fail basis. If the pass/fail option is chosen, all courses
must be taken pass/fail.

Symbols used for both options have the following meanings:

<table>
<thead>

</tr>
</tbody>
</table>

* This grade signifies that the student has not completed part
of the work for a semester (exclusive of examinations) but has
satisfactorily completed the rest of the work. A student must
remove a grade of I as discussed in "Incomplete Grades" below.

Pluses and minuses are used. Each grade earned for a course
taken for credit receives a specified number of grade points, and
these points are affected by plus and minus grades as well.

Undergraduate students in architecture must complete all
required courses with a grade of C- or better.

In addition to grading under either the regular grade option or the
pass/fail option, instructors teaching architectural design courses

complete an evaluation form for each student; a copy is made
available to the student, and the original is filed in the student's
folder in the Office of the Director.

Auditing a Course
With prior approval from their academic adviser, students may
audit an elective course.

Pass/Fail Option
Students may take one nonrequired course on a pass/fail basis
each semester.

Incomplete Grades
Incomplete marks in all architectural design courses from the
100 through the 600 level must be removed by the first day
of classes of the following semester. Failure to remove the
incomplete will prevent the student from continuing in another
architectural design course.

In all other courses, the grade of I must be removed no later
than the last day of classes of the next full semester. Upon
failure to make up an I within the next semester, the student
will automatically receive an F in the course unless explicitly
excused by the director. An F grade that is so received may not
be changed. Students will not be allowed to continue in courses
that require prerequisites if the prerequisite has an incomplete
grade. A student who carries more than 9 units of incomplete
work may be declared ineligible to re-enroll.

F grades for a semester may be changed only through the
last day of classes of the following semester and then only
in extraordinary circumstances. The director will approve no
changes of F grades after this interval.

Repeating a Course
When a student retakes a course in which a passing grade has
been received, both enrollments will show on the transcript. If
the second grade is equivalent to or better than the first grade,
the first grade may be changed to R, indicating the re-enrollment
upon request of the student and with department approval. If
the second grade is lower, both grades will stand. Credit toward
the degree will be allowed for only one of the enrollments. When
a student retakes a course in which an F has been received,
both enrollments for the course will appear on the transcript. If
a passing grade is received in the second enrollment, the first
enrollment may be changed to R, indicating the re-enrollment
upon request of the student and with the approval of the director.

Independent Study
Opportunities for independent study are available to all graduate
and undergraduate students. Registration in an independent
study course requires sponsorship by an instructor and
permission of the director. A maximum of 5 units (graduate
students), 3 units (juniors and seniors), and 1 unit (first-year
students and sophomores) may be taken per semester. Independent study courses cannot replace architectural design studios or other required courses. An independent study proposal sheet approved by a faculty sponsor must be submitted to the Office of the Director at registration time.

Study Abroad
Students have an opportunity to study in Florence, Italy, for a semester or over the summer term. These programs are based on a directed curriculum of urban and building analysis and appreciation. For more information, visit the Study Abroad Programs (PDF) (http://samfoxschool.wustl.edu/files/Study %20Abroad%20Policy-SFS%20Programs-9-11-15_fin.pdf) on our website.

Architecture students are eligible to participate in the university’s study abroad programs.

Summer School
The College of Architecture offers a limited number of courses during the summer, primarily ARCH 447A Structures I and ARCH 448A Structures II.

Minimum and Maximum Loads
First-year and sophomore undergraduates will normally enroll in either 15 or 16 units each semester, although enrollment in up to 18 units is possible. Juniors and seniors in the architecture degree programs are strongly recommended to enroll in no more than 16.5 units each semester in order to maintain focus on the design studio and major requirements. This guideline can only be waived by the director or undergraduate program chair. The normal load for graduate students is a maximum of 16 units each semester.

An enrollment above 21 units will be charged at the established university rate per hour of the additional credits and must be approved by the director or undergraduate program chair of the College of Architecture.

Refer to the section of this Bulletin that covers tuition and fees (p. 34) for both the annual tuition rate and the per credit hour breakdown applicable to the College of Architecture.

Partial load enrollment is possible when circumstances warrant it and requires the permission of the director.

Students are expected to proceed at a pace that enables them to finish their degree within the appropriate time limit. For undergraduates, this is usually eight semesters. Exceptions to these minimum standards may be granted only with the written consent of an academic adviser, the associate dean of students, or the director.

Academic Warning, Probation, and Suspension
A student whose semester grade-point average is below 2.0 (a grade of C) or who falls below a “pace” of 66 2/3 percent (for the number of credits earned divided by the number of credits attempted) will be placed on academic probation. If, after the following semester, the semester GPA is still below 2.0 or the if pace is below 66 2/3 percent, the student may be ineligible for normal advancement or may be suspended. Although the College of Architecture desires to give all students the opportunity to prove themselves, it is not in the best interest of either the student or the college to permit students to continue indefinitely in educational programs in which they are not producing satisfactory results.

The probation status serves as a warning that, unless the quality of work improves, the student may be subject to dismissal because of academic deficiency. A student dismissed for academic deficiency will not be eligible for readmission until they have demonstrated, under the conditions set for each individual case, their ability to do satisfactory work.

A student will be removed from academic probation when their cumulative GPA is above 2.0 and they are meeting the pace of 66 2/3 percent for satisfactory academic progress.

In support of the student, the Sam Fox School Registrar’s Office will work with the student to develop a plan for success. In order to succeed, the student must understand the causes of their current situation, identify what needs to change, and implement and review the plan.

A student who receives two or more grades of F in a semester will be placed on academic warning for the following semester. The warning serves as a notice that, unless the student passes all courses in the following semester, they will be placed on academic probation.

No transfer credit will be accepted for courses taken while a student is suspended from Washington University for violations of the University Student Judicial Code or Academic Integrity policy.

Leave of Absence
A student may request a voluntary leave of absence for one or two semesters when individual professional, medical, or personal circumstances warrant it. Petitions are reviewed and approved by the Sam Fox School Registrar’s Office. Any requests extending beyond one year will be reviewed on a case-by-case basis. In addition to a written petition, the student requesting a medical leave of absence must submit a letter of verification from Habif Health and Wellness Center.

A student returning from a leave of absence must submit a written letter stating their intention to re-enroll by July 1 (if returning in the fall semester) or December 1 (if returning in the
In the case of a medical leave of absence, a letter of clearance is required from Habif Health and Wellness Center before the student will be permitted to re-enroll.

International students requesting a leave of absence must contact their adviser at the Office of International Students and Scholars (OISS) to discuss how the leave might affect their visa status.

A leave of absence assumes that the student will not be taking any academic work at another institution.

**Financial Obligations**

Students are responsible for fulfilling their financial obligations to the university. If a student account becomes overdue, a late payment fee will be assessed and a hold will be placed on the account. Students with a poor payment history may be restricted from utilizing certain payment options or receiving tuition remission until course credit has been earned. Non-payment of tuition and other expenses due to the university will be cause for exclusion from class or refusal of graduation, further registration, or transfer credit. In addition, students are liable for any costs associated with the collection of their unpaid bills, including but not limited to collection agency costs, court costs, and legal fees. Past due amounts can also be reported to a credit bureau.

**Withdrawals and Refunds**

A written request for a refund must be submitted to the Sam Fox School Registrar's Office for consideration. Approval is required to officially withdraw from the university. Tuition adjustments will be processed based on information received, and refund checks will be issued only after the fourth week of classes. Material fees for architecture courses will not be refunded after the course drop period for the semester. For any student whose medical condition makes attendance for the balance of the semester impossible or medically inadvisable, the university will make a pro rata refund of tuition as of the date of withdrawal when that date occurs prior to the twelfth week of classes, provided that the condition is verified by the Habif Health and Wellness Center or a private physician. The date of withdrawal may correspond to the date of hospitalization or the date on which the medical condition was determined.

**Transfer Credit**

Architecture students must complete the required Calculus I and Physics courses at Washington University with a grade of C- or better unless the student has received Advanced Placement (AP) or International Baccalaureate (IB) credit for these courses. Students wishing to transfer credit for other courses completed at another institution must bring a full catalog description of the course(s) to the Sam Fox School Registrar's Office for preapproval. Upon receipt of an official transcript indicating a grade of C or better, courses will be considered for transfer. Grades for transfer courses will not appear on the student's Washington University record and will not figure into the student's GPA. College courses taken to earn credit for high school graduation will not be considered for transfer. Washington University does not transfer credits for courses taken online. No transfer credit will be accepted for courses taken while a student is suspended from Washington University for violations of the University Student Judicial Code or Academic Integrity policy.

**Intent to Graduate**

Every candidate for a degree is required to file an Intent to Graduate in WebSTAC in order to participate in Commencement exercises. The deadlines for filing can be found on the University Registrar website [http://registrar.wustl.edu/student-records/graduation/intent-to-graduate](http://registrar.wustl.edu/student-records/graduation/intent-to-graduate). A student must have a minimum cumulative GPA of 2.0 to graduate.

**Retention of Student Work**

The College of Architecture and the Graduate School of Architecture & Urban Design reserve the right to retain any student work submitted for course credit. Normally this work will be returned to the student at the end of the semester, except that which has been retained for publications, exhibitions, or accreditation reviews. It is highly recommended that students photographically reproduce or electronically store their work in order to keep a record of their work.

**Administration**

Sam Fox School of Design & Visual Arts

The Sam Fox School of Design & Visual Arts (http://samfoxschool.wustl.edu) is a unique collaboration in architecture, art and design education, linking professional studio programs with one of the country's finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art, and the Mildred Lane Kemper Art Museum (http://www.kemperartmuseum.wustl.edu).

A Professional Art College Within a University

The College of Art offers students the opportunity to study art or design while taking both required and elective courses through other schools and divisions of the university. The College of Art, which has its own faculty and facilities, has been a degree-conferring division of Washington University since 1879.

Undergraduate students at the College of Art have a wide variety of options from which to choose to meet their individual needs and satisfy their interests. The curriculum has been designed around the philosophy that the study of art has no natural boundaries; all human experience — intellectual, technological and social — can at some point become part of the purposes of an artist or designer. College of Art courses provide a structural base upon which students are able to build.

Students in the College of Art at Washington University may choose to pursue a Bachelor of Fine Arts (BFA) degree or a Bachelor of Arts (BA) degree. BFA students can major in communication design, fashion design or art. BFA Art has optional concentrations in painting, photography, printmaking and sculpture. BA students can major in art or design. BA Design has optional concentrations in fashion and communication.

Undergraduates in Architecture, Arts & Sciences, Business and Engineering can add a second major or minor in art or design to their existing degree path. These opportunities help students foster creativity, expand horizons and explore opportunities for careers in art and design.

Our diverse student body is composed of young people who have records of high achievement in both art and academic subjects. Because the College of Art provides such a comprehensive learning environment, it is an excellent place for a student to mature as an artist or designer.

Facilities

The Sam Fox School is comprised of six buildings (https://samfoxschool.wustl.edu/node/13289) located on the east end of the Danforth Campus. Studios, classrooms and maker spaces are located in William K. Bixby Hall, Joseph B. Givens Hall, Mark C. Steinberg Hall, Earl E. and Myrtle E Walker Hall, and Anabeth and John Weil Hall. In addition, the Mildred Lane Kemper Art Museum (http://www.kemperartmuseum.wustl.edu) includes more than 10,000 square feet of exhibition space, the Florence Steinberg Weil Sculpture Garden, the Kenneth and Nancy Kranzberg Art & Architecture Library, and the Department of Art History & Archaeology in the College of Arts & Sciences.

Faculty

Endowed Professors

Michael Byron (http://samfoxschool.wustl.edu/portfolios/faculty/michael_byron)
Kenneth E. Hudson Professor of Art
MFA, Nova Scotia College of Art and Design

Carmon Colangelo (http://samfoxschool.wustl.edu/portfolios/faculty/carmon_colangelo)
E. Desmond Lee Professor for Collaboration in the Arts
MFA, Louisiana State University

Heather Corcoran (http://samfoxschool.wustl.edu/portfolios/faculty/heather_corcoran)
Halsey C. Ives Professor
MFA, Yale University School of Art

Amy Hauft (https://samfoxschool.wustl.edu/portfolios/amy-hauft)
Jane Reuter Hitzeman and Herbert F. Hitzeman Jr. Professor of Art
MFA, School of the Art Institute of Chicago

Patricia Olynyk (http://samfoxschool.wustl.edu/portfolios/faculty/patricia_olynyk)
Florence and Frank Bush Professor of Art
MFA, California College of the Arts

Professors

Lisa Bulawsky (http://samfoxschool.wustl.edu/portfolios/faculty/lisa_bulawsky)
MFA, University of Kansas

D.B. Dowd (http://samfoxschool.wustl.edu/portfolios/faculty/db_dowd)
MFA, University of Nebraska–Lincoln
Ron Fondaw (http://samfoxschool.wustl.edu/portfolios/faculty/ron_fondaw)
MFA, University of Illinois at Urbana

Jeff Pike (http://samfoxschool.wustl.edu/portfolios/faculty/jeff_pike)
MFA, Syracuse University

Jack Risley (https://samfoxschool.wustl.edu/portfolios/jack_risley)
MFA, Yale University School of Art

Denise D. Ward-Brown (http://samfoxschool.wustl.edu/portfolios/faculty/denise_ward_brown)
MFA, Howard University

**Associate Professors**

Jamie Adams (http://www.samfoxschool.wustl.edu/portfolios/faculty/jamie_adams)
MFA, Pennsylvania Academy of Fine Arts

John Hendrix (http://samfoxschool.wustl.edu/portfolios/faculty/john_hendrix)
MFA, School of Visual Art

Richard Krueger (http://samfoxschool.wustl.edu/portfolios/faculty/richard_krueger)
MFA, University of Notre Dame

Arny Nadler (http://samfoxschool.wustl.edu/portfolios/faculty/arny_nadler)
MFA, Cranbrook Academy of Art

Franklin Oros (http://samfoxschool.wustl.edu/portfolios/faculty/franklin_oros)
BS, Western Michigan University

Tim Portlock (http://samfoxschool.wustl.edu/portfolios/tim_portlock)
MFA, University of Illinois

Mary Ruppert-Stroescu (http://samfoxschool.wustl.edu/portfolios/mary_ruppert-stroescu)
PhD, University of Missouri-Columbia

Cheryl Wassenaar (http://samfoxschool.wustl.edu/portfolios/faculty/cheryl_wassenaar)
MFA, University of Cincinnati

Monika Weiss (http://samfoxschool.wustl.edu/portfolios/faculty/monika_weiss)
MFA, Academy of Fine Arts, Warsaw

**Assistant Professors**

Penina Acayo Laker (http://samfoxschool.wustl.edu/portfolios/penina_acayo)
MFA, Kent State University

Chrissi Cowhey (http://samfoxschool.wustl.edu/portfolios/chrissi_cowhey)
MFA, Rhode Island School of Design

Jonathan Hanahan (http://samfoxschool.wustl.edu/portfolios/jonathan_hanahan)
MFA, Rhode Island School of Design

Meghan Kirkwood (http://samfoxschool.wustl.edu/portfolios/meghan_kirkwood)
MFA, Tulane University

Heidi Kolk
PhD, Washington University

**Visiting Assistant Professors**

Becca Leffell Koren
MFA, Rhode Island School of Design

Shreyas R. Krishnan (https://samfoxschool.wustl.edu/portfolios/12823)
Wallace Herndon Smith Distinguished Visiting Assistant Professor
MFA, Maryland Institute College of Art

**Senior Lecturers**

Mary Borgman (http://samfoxschool.wustl.edu/portfolios/faculty/mary_borgman)
MFA, Fontbonne University

Jennifer Colten (http://samfoxschool.wustl.edu/portfolios/faculty/jennifer_colten_schmidt)
MFA, Massachusetts College of Art

John Early (https://samfoxschool.wustl.edu/portfolios/13102)
MFA, Washington University

Audra Hubbell
MFA, University of Illinois at Chicago

Jennifer Ingram
MS, Iowa State University-Des Moines

Noah Kirby (http://samfoxschool.wustl.edu/directory/517)
MFA, Washington University

Jon Navy (http://samfoxschool.wustl.edu/directory/527)

Tom Reed (http://samfoxschool.wustl.edu/portfolios/tom_reed)
MFA, University of Iowa

Linda Solovic (http://samfoxschool.wustl.edu/portfolios/faculty/linda_solovic)
BFA, Washington University

Lindsey Stouffer (http://samfoxschool.wustl.edu/portfolios/faculty/lindsey_stouffer)
MFA, Washington University
Claire Thomas-Morgan (http://samfoxschool.wustl.edu/portfolios/12511)
MFA, Academy of Art University

Enrique von Rohr (http://samfoxschool.wustl.edu/portfolios/faculty/enrique_von_rohr)
MA, Savannah College of Art and Design

**Artist in Residence**
Jude Agboada
Louis D. Beaumont Artist in Residence
MFA, School of the Art Institute of Chicago

**Professors Emeriti**
Ken Botnick
William Fett
Joan Hall
Gene R. Hoefel
Ronald A. Leax
Peter Marcus
James McGarrell
Hylarie M. McMahon
William Quinn
W. Patrick Schuchard
Buzz Spector
Stan Strembicki
Stanley Tasker

**Majors**

**Bachelor of Fine Arts**

Second-year studio courses introduce students to the different areas of focus.

A student’s last two years include intense study in their chosen focus area and a capstone experience. The capstone studio brings together all seniors in the studio areas and separately in the communication design and fashion areas for critical dialogue beyond disciplinary boundaries to guide preparation for a culminating BFA exhibition.

Throughout the studio courses and the final capstone, the BFA degree places an emphasis on developing a portfolio that displays the student’s mastery of art and design skills. Graduates are prepared to pursue careers as artists, illustrators and designers.

For specific degree requirements, visit the Degree Requirements (p. 129) page for the College of Art.

**Bachelor of Arts**
First-year students take Digital Studio and two additional foundation courses that may include Drawing, 2D Design, 3D Design, and so on. Upper-level studio courses and Sam Fox electives introduce students to different areas of focus.

With fewer required courses and no capstone studio, this degree provides an opportunity for students to explore art and design in the context of a rigorous liberal arts education. The BA program is ideal for students who are interested in studying art and design as a cultural phenomena, a practice for strategic thinking, or as preparation for a career alongside artists and designers. Working within and between traditional disciplines, students will explore how ideas can shape materials and how materiality can shape ideas.

For specific degree requirements, visit the Degree Requirements (p. 129) page for the College of Art.

**The Major in Art**

BFA majors are offered in the following areas:

- **Art** — with these optional concentrations:
  - Painting (http://samfoxschool.wustl.edu/node/4155)
  - Photography (http://samfoxschool.wustl.edu/node/4153)
  - Printmaking (http://samfoxschool.wustl.edu/node/4156)
  - Sculpture (http://samfoxschool.wustl.edu/node/4157)
  - Communication Design (http://samfoxschool.wustl.edu/node/9366)
  - Fashion Design (http://samfoxschool.wustl.edu/node/9367)

BA majors are offered in the following areas:

- **Art**
- **Design** — with these optional concentrations:
  - Fashion
  - Communication

**Second Majors in Art & Design**
A student pursuing a bachelor’s degree in Architecture, Arts & Sciences, Business or Engineering may also pursue a second major in the College of Art. Second majors are offered in Art and Design. The design program has optional concentrations in Fashion and Communication. Any student in good academic standing may declare a second major using WebSTAC. Upon completion of the requirements, the student’s transcript will show the second major along with their earned degree. Only one diploma is granted; no reference to the second major is noted on the diploma.

Second Majors and Minors Outside the College of Art

Students may earn a second major or minor in the College of Arts & Sciences, the Olin Business School, or the McKelvey School of Engineering, or they may earn a minor in the College of Architecture while completing the requirements for the BFA or BA degree. Students who choose this path will graduate with their chosen art or design degree and major (BA or BFA) alongside the additional major or minor.

Students must successfully complete all of the degree requirements for the College of Art and all of the requirements for the second major or minor.

The second major and minor option can be completed within four years if careful planning begins during the first year. If a student is interested in these options, they should consult with the associate dean of students in the College of Art.

Art Education

Students who wish to teach art at the elementary and secondary levels may obtain Missouri state certification by taking additional credit units of required education courses offered by the university's Department of Education in the College of Arts & Sciences. These courses may be taken as academic electives within the program.

In addition to course work in education, prospective art teachers must complete specific courses in general education (i.e., communications, humanities, mathematics, natural sciences and social sciences). For information about general education requirements, students should consult with the associate dean of students (Bixby Hall, Room 1) or the Department of Education (Seigle Hall, Room 107). Missouri state certification normally takes an additional semester of study. Application to enroll in the teacher education program is made through the Department of Education and should be done no later than the beginning of the sophomore year. Part of the application process involves successfully passing College Base, an achievement test focused on general education content. (This test is periodically given on the Washington University campus.) Acceptable scores on the SAT or the ACT must also be submitted. In addition, interested students may apply for admission to the Master of Education degree program offered by the education department.

Minors

A minor requires a total of 15 credits from F10 or F20 courses with a grade of C- or better. Visit the Sam Fox School website (http://samfoxschool.wustl.edu/node/10123) for specific requirements.

Minors are offered in the following areas:
- Art
- Design
- Creative Practice for Social Change
- Human-Computer Interaction

The Minor in Art (15 units) allows students to select courses from across the Art curriculum that appear on an approved list. Each student may choose to select a narrow or wide-ranging set of courses based on their interests and goals. For students earning degrees in the College of Art, the minor is available to non-art majors only.

The Minor in Design (15 units) allows students to select from an approved list of courses from across Communication Design and Fashion Design on the basis of their interests and goals. For students earning degrees in the College of Art, the minor is available to non-design majors only.

The Minor in Creative Practice for Social Change (15 units) allows students to apply creative practices from art, design and architecture to address systemic economic, environmental and social challenges. The course Design in Social Systems (3 credits) is required; students must take four additional 3-credit courses from a pre-selected menu of course work (12 credits).

The Minor in Human-Computer Interaction (18 units) is a collaboration between the College of Art and the McKelvey School of Engineering, with a mix of required and optional courses in each school. Students are able to gain a multidisciplinary understanding of the principles and applications of human-computer interaction, and they are introduced to the techniques and processes necessary to create effective user interfaces.

Courses

F10 Art (p. 83): Art foundation and major studio courses
F20 Art (p. 101): Art elective courses

College of Art majors have enrollment priority in F10 and F20 courses. Elective (F20) courses may be offered at the 100 to 400 levels; students must enroll as applicable: 100-level courses are for first-year students, 200-level courses are for sophomores, 300-level courses are for juniors and 400-level courses are for seniors.

F10 Art

F10 ART 101A Drawing
An introductory course that teaches the student to recognize and manipulate fundamental elements of composition, line, form, space, modeling and color. Students will explore drawing as a diverse and multi-faceted activity. Working from both observation and imagination, emphasis will be placed on making work through a range of drawing methodologies. Students work in a variety of media. Demonstrations and illustrated lectures supplement studio sessions and outside projects.
Credit 3 units. Art: FAAM, FADM

F10 ART 105 2D Design
An introduction to basic design principles and their application on a two-dimensional surface. Investigation of the functions and properties of the formal elements and their organization through the use of relational schemes. Includes an introduction to color and basic color theory. Problems stress systematic approach to visual communication.
Credit 3 units. Art: FAAM, FADM EN: H

F10 ART 106 2D Design
An introduction to basic design principles and their application on a two-dimensional surface. Investigation of the functions and properties of the formal elements and their organization through the use of relational schemes. Includes an introduction to color and basic color theory. Problems stress systematic approach to visual communication.
Credit 3 units. Art: FAAM, FADM EN: H

F10 ART 107 3D Design
An introduction to basic design principles and their application to three-dimensional form and real space and time. The design vocabulary is broadened through exercises that deal with mass, volume, weight, gravity and movement. Students learn to use hand and power tools.
Credit 3 units. Art: FAAM EN: H

F10 ART 108 3D Design
An introduction to basic design principles and their application to three-dimensional form and real space and time. The design vocabulary is broadened through exercises that deal with mass, volume, weight, gravity and movement. Students learn to use hand and power tools.
Credit 3 units. Art: FAAM EN: H

F10 ART 143 Digital Studio
This course provides a robust introduction to creating in a digital landscape. Students learn how to solve visual problems using a range of digital tools. Projects explore ideas of visual narrative, two-dimensional relationships, and motion using relevant digital imaging and graphics software. The course contextualizes these tools and associated techniques within a historical frame and considers the broader social impact. Students pursuing the BFA, BA in Art or Design, or second-major in Art or Design must complete either Digital Studio (F10 143, 241 or 242) or Digital Design (F10 243).
Credit 3 units. Art: FAAM, FADM

F10 ART 183A Practices in Architecture + Art + Design
This course offers first-year students in the College of Art an introduction to the subjects, theories, and methodologies of the disciplines of art and design. Examples drawn from a range of historical periods as well as contemporary practice highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap.
Credit 1 unit.

F10 ART 213A Sculpture Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in sculpture and is open to those pursuing a BA in Art, second major in art, and others as space permits. It introduces students to the materials, processes, and concepts specific to sculpture. Students develop an understanding of, and dexterity with, multiple materials and modes of production ranging from additive, assembled, molded, modeled, to subtractive or carved. This course promotes independent working and problem solving in regard to content and intention. Students engage in discourse about their work through critical analysis and explorations of historical and cultural precedent. This course involves lectures, material and process demonstrations, and assigned readings along with creative and technical explorations. Students pursuing the sculpture concentration must complete either F10 213A (fall) or 214A (spring).
Credit 3 units. Art: FAAM EN: H

F10 ART 214A Sculpture Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in sculpture and is open to those pursuing a BA in Art, second major in art, and others as space permits. It introduces students to the materials, processes, and concepts specific to sculpture. Students develop an understanding of, and dexterity with, multiple materials and modes of production ranging from additive, assembled, molded, modeled, to subtractive or carved. This course promotes independent working and problem solving in regard to content and intention. Students engage in discourse about their work through critical analysis and explorations of historical and cultural precedent. This course involves lectures, material and process demonstrations, and assigned readings along with creative and technical explorations. Students pursuing the sculpture concentration must complete either F10 213A (fall) or 214A (spring).
Credit 3 units. Art: FAAM EN: H

F10 ART 215A Printmaking Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in printmaking and is open to those pursuing a BA in Art, second major in art, and others as space permits. It introduces students to the materials, processes, and concepts specific to printmaking. Students develop an understanding of, and dexterity with, multiple materials and modes of production ranging from additive, assembled, molded, modeled, to subtractive or carved. This course promotes independent working and problem solving in regard to content and intention. Students engage in discourse about their work through critical analysis and explorations of historical and cultural precedent. This course involves lectures, material and process demonstrations, and assigned readings along with creative and technical explorations. Students pursuing the printmaking concentration must complete either F10 215A (fall) or 215A (spring).
Credit 3 units. Art: FAAM EN: H

F10 ART 215A Printmaking Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in printmaking and is open to those pursuing a BA in Art, second major in art, and others as space permits. It introduces students to the materials, processes, and concepts specific to printmaking. Students develop an understanding of, and dexterity with, multiple materials and modes of production ranging from additive, assembled, molded, modeled, to subtractive or carved. This course promotes independent working and problem solving in regard to content and intention. Students engage in discourse about their work through critical analysis and explorations of historical and cultural precedent. This course involves lectures, material and process demonstrations, and assigned readings along with creative and technical explorations. Students pursuing the printmaking concentration must complete either F10 215A (fall) or 215A (spring).
Credit 3 units. Art: FAAM EN: H
as space permits. It introduces printmaking as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Relief, intaglio, digital, and planographic processes are introduced alongside theoretical frameworks that help guide students through directed and self-determined projects. The resulting work will generate critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students pursuing the printmaking concentration must complete either F10 215A (fall) or 216A (spring). Credit 3 units. Art: FAAM EN: H

F10 ART 216A Printmaking Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in printmaking and is open to those pursuing a BA in Art, second major in art, and others as space permits. It introduces printmaking as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Relief, intaglio, digital, and planographic processes are introduced alongside theoretical frameworks that help guide students through directed and self-determined projects. The resulting work will generate critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students pursuing the printmaking concentration must complete either F10 215A (fall) or 216A (spring). Credit 3 units. Art: FAAM EN: H

F10 ART 217B Photography Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in photography and is open to those pursuing a BA in Art, second major in art, and others as space permits. It introduces photography as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Students gain full manual control of the digital camera apparatus, learn how to import and edit raw images, and print according to fine art professional standards. The resulting work will foster critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Student must provide a fully manual digital camera capable of capturing RAW images. Students pursuing the photography concentration must complete either F10 217B (fall) or 218B (spring). Credit 3 units. Art: FAAM EN: H

F10 ART 221A Painting Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in painting and is open to those pursuing a BA in Art, second major in art, and others as space permits. It introduces painting as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Students employ a variety of oil and water-based media in this concept-driven approach to new and established methodologies. The resulting work will generate critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students pursuing the painting concentration must complete either F10 221A (fall) or 222A (spring). Credit 3 units. Art: FAAM EN: H

F10 ART 222A Painting Studio: Material and Culture
This is the first course in the sequence for those pursuing a BFA in Art with a concentration in painting and is open to those pursuing a BA in Art, second major in art, and others as space permits. It introduces painting as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Students employ a variety of oil and water-based media in this concept-driven approach to new and established methodologies. The resulting work will generate critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students pursuing the painting concentration must complete either F10 221A (fall) or 222A (spring). Credit 3 units. Art: FAAM EN: H

F10 ART 231 Introduction to Fashion Design: Materials, Volume & the Body
A structured discourse on fashion designers of the 20th and 21st centuries for study of the body as site and inspiration for apparel design. Class discussions and projects will engage concept, materials and process. Through exploration of shapes, forms and their role in the development of three-dimensional ideas, the student learns the fundamentals of fashion design. Required for students pursuing the BFA major in fashion design, BA major in design: fashion concentration, and second-major in design: fashion concentration. This course is open to non-majors and minors as space permits. Credit 3 units. Art: FADM EN: H

F10 ART 234 Fashion Illustration: Visualizing Apparel
A foundation experience in basic strategies for communication garment design ideas and information. Recognition and practice of conventions for presenting the figure in design will be the focus of the course. Additionally, simple garment silhouettes and textile types will be explored for illustration practice. Digital media as it is used in style presentation and technical communication of design will be introduced and implemented through a variety of exercises. Final presentation will be a design presentation that is supported by spectrum of material covered in course. Laptop computer with Adobe Illustrator and Photoshop required. Required in the sophomore year for students pursuing the BFA major in fashion design. The course is a major option for students pursuing the BA major in design, the BA major in design: fashion concentration, the second-major in design, and the second-major in design: fashion concentration. Credit 3 units. Art: FADM EN: H
F10 ART 236 Textile Design
A survey of all types of materials used as 21st-century textiles, Textile Design introduces the student to the ways that textiles function as a basic building material. Students will study, test, and manipulate textiles to gain understanding of appropriate and viable choices for end use. Class activities include field trips, application of a variety of textile techniques for surface design, manipulation and finishing of various fabrics. Students may draw upon design problems from their specific area of study to realize a final project. Required in the sophomore year for students pursuing the BFA major in fashion design. The course is a major option for students pursuing the BA major in design, the BA major in design: fashion concentration, the second-major in design, and the second-major in design: fashion concentration. Credit 3 units. Art: FADM EN: H

F10 ART 238B Word and Image I
This course centers on the creation of word-image relationships. It focuses on intensive visual methodology and clear communication. Students make illustrations, explore typography, and bring visual elements together into a unified whole. Projects take the form of posters, image sets, books, icons, maps, labels, infographics, etc. As the course progresses, students work to narrow their focus within the field of visual communications by selecting particular projects from a suite of offerings. Required in the sophomore year for students pursuing the BFA major in communication design. This course is required for students pursuing the BA major in design: communication concentration or the second-major in design: communication concentration. This course is a major option for the second-major in design. Credit 3 units. Art: FADM EN: H

F10 ART 238C Typography I
This course introduces the language and standards of typography. Through a series of exercises and projects, students explore type as a vehicle for conveying information and as an expressive and interpretive tool. Required in the sophomore year for students pursuing the BFA major in communication design. This course is required for students pursuing the BA major in design: communication concentration or the second-major in design: communication concentration. This course is a major option for the second-major in design. Credit 3 units. Art: FADM EN: H

F10 ART 241 Digital Studio
This course introduces students to basic digital tools to aid in conceptual and technical development of artwork. Students become familiar with pixel, vector, and moving-image software within a context of visual thinking and artmaking. Students pursing the BFA, BA in Art or Design, or second-major in art or design must complete either Digital Studio (F10 143, 241 or 242) or Digital Design (F10 243). Credit 3 units. Art: FAAM, FADM EN: H

F10 ART 242 Digital Studio
This course introduces students to basic digital tools to aid in conceptual and technical development of artwork. Students become familiar with pixel, vector, and moving-image software within a context of visual thinking and art-making. Students pursing the BFA, BA in Art or Design, or 2nd-major in Art or Design must complete either Digital Studio (F10 143, 241 or 242) or Digital Design (F10 243). Credit 3 units. Art: FAAM, FADM EN: H

F10 ART 243 Digital Design
Students are introduced to digital tools in the context of applied design thinking for graphic design, surface design, and image-making. Students pursue projects using Adobe Photoshop, Adobe Illustrator, and Adobe InDesign. This course engages software learning in the service of design thinking. Students pursing the BFA, BA in Art or Design, or 2nd-major in Art or Design must complete either Digital Studio (F10 143, 241 or 242) or Digital Design (F10 243). Credit 3 units. Art: FAAM, FADM EN: H

F10 ART 283 Typography and Letterform: The Design of Language
As an investigation of the formal qualities of familiar objects, letters, this is an introductory level course in design thinking using families of letterforms as our focus. Students explore design strategies required to make individual forms into a family of types through exercises in tracing, drawing, letterpress printing, and collage. Particular emphasis will be devoted to the concept of modularity, including an assignment to design and print a modular typeface. This course counts as a sophomore-level major elective for students pursuing the BFA major in communication design. Credit 3 units. Art: FADM EN: H

F10 ART 295 Pictures for Communication
Students investigate the realm of functional pictures through pictograms, comic strips, diagrammatic maps, visual metaphors, and narratives. Each project focuses on a particular aspect of conceptual and formal clarity. Significant attention is paid to aesthetics. Students use a variety of media and are introduced to Adobe Illustrator. This course counts as a sophomore-level major elective for students pursuing the BFA major in communication design. Credit 3 units. Art: FADM EN: H

F10 ART 301A Drawing: Art Practice (Conceptual Methods in Drawing)
Drawing is a communicative device; it is a primary means of conceptual strategy leading to effective visual exploration and expression, from thought to form. This studio course looks at the practice of drawing in the context of language, scientific paradigms, complementary and alternative art forms, socio-political theory and history as they relate to visual culture and invention. Lectures, critical readings, and analysis of historical and contemporary modes of drawing support students in their course work. Projects in this course may consider mapping, language systems, formulaic constructions, material essentialism, physiologic/kinesthetic approaches, and performative aspects of drawing. Credit 3 units. Art: FAAM EN: H

F10 ART 302B Drawing: Art Practice (Conceptual Methods in Drawing)
Drawing is a communicative device; it is a primary means of conceptual strategy leading to effective visual exploration and expression, from thought to form. This studio course looks at the practice of drawing in the context of language, scientific paradigms, complementary and alternative art forms, socio-political theory and history as they relate to visual culture and invention. Lectures, critical readings, and analysis of historical and contemporary modes of drawing support
students in their course work. Projects in this course may consider mapping, language systems, formalic constructions, material essentialism, physiologic/kinesthetic approaches, and performative aspects of drawing.

Credit 3 units. Art: CDES, FAAM, FADM

F10 ART 302D Drawing: Art Practice (Collage: History and Practice in Contemporary Art)
This course will examine the role of collage in contemporary studio practice. Students will be required to assemble an archive of images from various sources, found and self-generated, to produce a body of work based on a specific theme. Readings and discussion related to the course will examine the evolution of collage and its present status and application within contemporary studio practice.

Credit 3 units. Art: CDES, FAAM EN: H

This studio course focuses on various narrative strategies in relation to painting’s mythology and its function in contemporary culture. Topics to include narrativity, the politics of lens and screen, invented fictions, social vs. virtual spaces, and site specificity. Instruction will encompass technical, conceptual and creative skills for taking an individually conceived project from idea to fruition. Students will be encouraged to consider traditional and alternative forms of painting as well as digital imaging, installation, net art, etc. Lectures, critical essays, and analysis of historical precedents and contemporary practitioners will support students in their course work.

Credit 3 units. Art: FAAM EN: H

F10 ART 311F Painting: Art Practice (Language of Abstraction)
This course examines strategies of abstraction and nonobjective image-making that originate in the painting studio, including those that are driven by concept, material, space, and/or process. Readings and discussions will examine the evolution and history of abstraction and its present applications within a contemporary studio practice. The course will engage students in both assigned and self-directed work that will enable them to experiment with a broad visual vocabulary while understanding the relationship between form and content.

Credit 3 units. Art: FAAM

F10 ART 312E Painting: Art Practice (Place and Space)
This course examines ideas of place and space — both observed and invented — established through the surface and materiality of paintings. Students develop a unique body of work through shared exploration of painting processes and materials, along with independent research. Critical assessment of work is complemented by faculty and peer discussions, readings, written critical analysis and field study.

Credit 3 units. Art: CDES, FAAM

F10 ART 312F Painting: Art Practice (Language of Abstraction)
This course examines strategies of abstraction and nonobjective image-making that originate in the painting studio, including those that are driven by concept, material, space and/or process. Readings and discussion will examine the evolution and history of abstraction and its present applications within a contemporary studio practice. The course will engage students in both assigned and self-directed work that will enable them to experiment with a broad visual vocabulary while understanding the relationship between form and content.

Credit 3 units. Art: FAAM

F10 ART 312G Painting: Art Practice (Body Image)
This is a rigorous painting/drawing studio course investigating various methods of pictorial construction (historical, contemporary) and the role of figuration in contemporary art practice. Students will be required to produce an independent body of work based on a theme and generated from a variety of references (imagination, life, photography, painting, film, etc.). Discussions to include contemporary notions of identity structures, social and gender politics. Lectures, critical readings and the analysis of historical and contemporary modes of figurative representation will support students in their investigations.

Credit 3 units. Art: CDES, FAAM

F10 ART 313M Sculpture: Art Practice (Sculptural Bodies)
This course investigates the socio-political issues of the body, the figure and their potential in contemporary art practice. The term “body” is used as an organism, in an expansive way, to investigate the metaphorical, physical, emotional, cultural, and spiritual bodies. A variety of media and methods are explored with an emphasis on three-dimensional work and object-based performance. Lectures, demonstrations and readings contextualize the potential of sculptural systems to constitute the meaning of a contemporary body.

Credit 3 units. Art: CDES, FAAM

F10 ART 314J Sculpture: Art Practice (Material as Metaphor)
All materials carry meaning. This course familiarizes students with histories and fabrication processes intrinsic to sculpture. This course uses demonstrations and hands on experiences, primarily but not exclusively with metal and wood working processes to show how such materials inform a studio practice. Lectures and techniques contextualize an understanding of pre-formed and found material as a formal and conceptual component resulting in the final work of art. In a critical environment, students formulate their own material language and defend their art practice and creative decisions.

Credit 3 units. Art: CDES, FAAM EN: H

F10 ART 314K Sculpture: Art Practice (Symbiosis)
This course explores numerous scenarios that create different levels of sculptural interactivity from low to high tech. Students construct devices ranging from simple mechanisms to large-scale installations fostering physical, analogue or digital interaction between the viewer and the sculptural environment. Viewer-activated systems create multiple interactive platforms, initiating a responsive relationship between the sculpture and the viewer. Lectures, demonstrations and readings devise a
broad understanding of the histories and potentials of symbiotic relationships between a work of art and its audience. Credit 3 units. Art: CDES, FAAM  EN: H

F10 ART 315B Printmaking: Art Practice (Propaganda to Decoration)
This course uses the print multiple as a starting point to explore a continuum that runs from propaganda to decoration. The fundamental attributes of the multiple, including its accessibility and repeatability, arc from public to aesthetic. Reproduction, distribution, urban communication, social space, intervention and site specificity are explored through course lectures, readings and discussions. Collaboration, exchange, and relational practices provide frameworks for self-directed projects using traditional and alternative techniques in print media including lithography, screen-printing, stencils and photocopy. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course. Credit 3 units. Art: FAAM EN: H

F10 ART 315H Printmaking: Art Practice (Feedback Loop: Process and Print)
This course focuses on variability, mutability, repeatability and play within the process of printmaking, using etching, collagraph, monotype and digital methods. The course explores practices and contexts in printmaking as a contemporary art form and promotes advanced conceptual and technical development through creative practice, readings, discussions and critiques. Projects are self-directed and based on course topics that engage different approaches to process-based work, ranging from the improvisational to the systematic. Emphasis is placed on the shift from object to process, from the single manifestation to the series, from fixed to flux and back again. Credit 3 units. Art: CDES, FAAM

F10 ART 316F Printmaking: Art Practice (The Printed Image)
This course explores the printed image as storyteller, educator, political tool, and narrative. Historical precedents and contemporary examples of political prints, graphic novels, posters, and narrative suites are examined as possible models for self-directed projects. Readings and discussions include strategies for drawing and appropriating imagery. Students will have the opportunity to produce a thematically unified body of work while gaining technical expertise in woodcut, etching and lithography. Credit 3 units. Art: CDES, FAAM

F10 ART 316G Printmaking: Art Practice (Extra-Dimensional Printmaking)
Pushing the boundaries of printmaking, prints move beyond the wall and into sculpture, installation, and time-based work. Relief, silkscreen, and intaglio processes are explored with an emphasis on print as theatre, object, and immersive environment. Through readings and discussions, students will engage with historical precedents and contemporary principles that support the creation of self-directed work that is extra-dimensional in physical and conceptual scope. Credit 3 units. Art: FAAM

F10 ART 317H Photography: Art Practice (Methods of Distribution)
One of the most effective aspects of the photographic image today is its speed. The way that physical and virtual images are presented and distributed has changed significantly since the initial branding of photography as the medium of reproducibility. This class focuses on photography-based uses of the image through various distribution formats like the book, the poster, the newspaper, television, web, design, film, apparel, architecture, music, etc. The students make, read, look, listen, and experience 20th- and 21st-century photography practitioners who engage a range of disciplines and methods of distribution as they try to synthesize methods/models of their own. Rigorous student project critiques are complemented with discussions, writing assignments, and readings on media theory and contemporary uses of photography outside of the traditional exhibition-based contexts. Credit 3 units. Art: CDES, FAAM

F10 ART 317L Photography: Art Practice (Constellations, Sequences, Series)
Series are the prevalent method for exhibiting photographic images. Through assignment-based and self-generated projects, students discover how photographic series are conceptualized, structured and sequenced. Special attention is given to the material meaning embedded in print size, order and spatial placement. The course provides in-depth coverage of image capture through medium-format analog and full-frame digital systems as well as intermediate digital editing and printing techniques. Students also explore various documentary and set-up strategies through narrative and non-narrative photographic approaches. Through a rigorous critique structure, course readings and critical writing, students engage the historical discourse surrounding the series as a tool for artistic expression. Credit 3 units. Art: CDES, FAAM

F10 ART 317O Photography: Art Practice (Studio Location and Lighting)
Same as F10 417O. Juniors (only) register for F10 317O. This studio course introduces techniques and strategies for using artificial light sources to interpret subject matter, build narratives, and develop creative environments. Studio sessions will cover the use of continuous lighting systems, strobes, and hot shoe flashes. Course lectures will address principles of light, expanded applications of studio lighting, and editing strategies. Class projects will challenge students to apply lighting techniques in studio and on-location settings. Field trips will provide opportunities to work in a variety of built and natural environments and in conjunction with partner organizations. Credit 3 units.

F10 ART 318J Photography: Art Practice (Slow Image: Large Format Photography)
This course provides an in-depth study of the large format analog camera and its unique formal position. Using the 4”x5” format, students examine the slow, high fidelity photographic medium both technically and conceptually. Students employ a comprehensive photographic process, including loading sheet film, applying the zone system, scanning large format film, editing digital images, and creating large format digital inkjet prints. Class activities include rigorous student project critiques, as well as reading and discussion elements focusing on the history of large format and its contemporary descendants in the Düsseldorf School, abstract photography and installation art.
contexts. Class participants investigate the role of high fidelity images. Assignments may address portraiture, still life, interior and exterior architecture, landscape, and abstract photography. Large format 4"x5" cameras will be available for use.
Credit 3 units. Art: CDES, FAAM EN: H

F10 ART 318K Photography: Art Practice (Documentary Photography & Social Practice)
This course focuses on the various philosophical, aesthetic and technical approaches to photographing the contemporary, human-altered landscape and the communities we live in. Through slide lectures, field trips, in-depth critique and supervised lab work, students are expected to increase their awareness of how their own personal responses relate to those of other photographers with the same contemporary issues of documentary photography. A project-based seminar focusing on objectivity of the photographic document. Material and camera format open.
Credit 3 units. Art: CDES, CPSC, FAAM EN: H

F10 ART 323D Sustainable Textile and Fashion Design
Typically textile design and garment production occur in a collaborative setting and often across a global span of locales. In this course students learn essential information about sustainable textiles and fashion, engage in research, and collaborate to design and promote sustainable products or services. Required for junior fashion majors, open to sophomore-senior nonmajors.
Credit 3 units. Art: FADM

F10 ART 323H Fibers in Art (Florence)
This course is designed to guide the students through a range of approaches to textile and fiber-based practices. The course embraces technological and antiquated techniques both within and beyond the field of art and engages artisan-inspired practices as content that fosters the questioning of socially assigned gender roles, craft and art distinctions and the exploration of functionality. Basic weaving, knitting, braiding and sewing are explored against the backdrop of fiber's history as art. Prerequisite: none.
Credit 3 units.

F10 ART 323I Patternmaking (Florence)
In this patternmaking course, students will start with basic patterns, including darts and princess line variations, and learn how to manipulate them in relation to the fundamental rules of patternmaking. Patternmaking allows the designer to manipulate already existing patterns efficiently and create new configurations with custom measurements. There will be two basic projects during the semester: the skirt, with variations such as A-shape, gathered, with yoke, and the bodice, working with darts and princess line variations, and in the last half of the course students will learn about collars, sleeves and pants. By understanding pattern construction students will be able to gain a wider understanding of the possibilities and limits of a fashion designer.
Credit 3 units.

F10 ART 323J Special Topics in Fashion Design: Fiber Manipulation
Exploration of fiber techniques and their application in design and art. Students will study a spectrum of fiber and textile treatments such as surface design, shibori, wax resist, digital design, needle applications, heat applications and a variety of three-dimensional structuring strategies. Projects will integrate techniques into appropriate design strategy for the fine arts or design. This class is part of the BFA in Fashion, and is open to non-BFA students across the university. No prerequisites. Counts toward design minor.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 324A Patternmaking and Production
An introduction to flat pattern drafting. Principles will be applied to various components of garment creation. Construction techniques and industrial methods explored within specific structural design problems. Students will undertake realization of garment from sketch to pattern draft and finally construction of muslin (toile). This course is to be taught using the Imperial measurement system. Open to sophomore through graduate-level students across the university. Required for sophomore and junior majors in fashion.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 324E Fashion History and Research
This seminar studies the cultural and social influences to comprehend how these impact the evolution of fashion and are expressed in clothing at various junctures in history. Review of general academic research methods will be covered as well as research methods and strategies of particular significance to fashion design. Course work will focus on using research as an avenue to original and effective design concepts. Required for students pursuing the BFA major in Fashion Design or the BA major in Design: Fashion Concentration, or the second-major in Design: Fashion Concentration. The course is a major option for students pursuing the BA major in Design.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 324J Two-Dimensional Fashion Design-Foundation
Review and practice of applicable material from Visualizing Apparel course for presenting the figure in garment design. Students will explore a variety of media for expressive fashion communication and learn to combine page elements with compelling design strategies. Research and study of landmark and innovative illustrators will be conducted as well as application of their ideas in practice. Additionally, the course will cover incorporation of technical drawings, text, and textile swatches with illustration style to convey design vision for fashion presentation. Prerequisites: Introduction to Fashion: Materials, Volume and the Body, Fashion Illustration: Visualizing Apparel, Fashion History and Research, Textile Design, Patternmaking and Production. Required of junior majors in fashion. Required equipment: Mac computer, CS5 or newer, Wacom tablet and pen.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 324K Three-Dimensional Fashion Design-Foundation
Study of fundamental apparel design issues. Students will begin with basic draping methods and explore evolution and craft, decoration, and adornment for apparel. Research for class exercises will be based upon the most elementary forms of historical and contemporary dress. Prerequisites: Introduction to Fashion: Materials, Volume and the Body; Fashion Illustration: Visualizing Apparel; Fashion History and Research; Textile Design; Patternmaking and Production. Required of junior majors in fashion.
Credit 3 units. Art: CDES, FADM EN: H
F10 ART 324L Digital Fashion and Textile Design
Review and practice of material from Visualizing Apparel. In-depth exploration of vector based illustration for garment and textile schematics. Establishment of strategies for designing apparel, wovens, knits, prints and patterns using universal and industry software. Prerequisites: Introduction to Fashion: Materials, Volume and the Body; Fashion Illustration: Visualizing Apparel; Fashion History and Research; Textile Design; Patternmaking and Production. Required of junior majors in fashion. Required equipment: Mac computer, CSS or newer, Wacom tablet and pen.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 326D Special Topics: Relational, Conditional, and Process-Oriented Design
This course encourages students to explore the spatial and experiential potential of designing frameworks to navigate complex archives of online content. In addition to expanding their code-based skills, students will push the boundary of traditional online activity to create immersive and experimental experiences in the browser. Through a series of informational and spatial challenges, students will conduct research into contemporary theory and practice of designing interactive platforms and develop dynamic solutions for online frameworks, which exploit and challenge traditional user expectations. Projects, experiments and research will be supplemented by group readings, class discussions, and individual artist/designer case studies. This course is open to junior and senior communication design majors. Juniors register for F10 Art 326D; seniors for F10 Art 426D. Counts toward design minor if space is available. Prerequisite: Interaction Foundations (F10 337) or demonstrably comparable HTML/CSS skills.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 326H Special Topics: Interaction Design: Layout Systems
Learn and apply techniques and tools for creating advanced HTML/CSS layouts. Explore responsive design (layouts that adapt to available screen width), grid systems, layout frameworks, and templating systems. Refine HTML and CSS skills, and learn best practices for common layout challenges. Become familiar with potential pitfalls designers face when planning for screens and variable content. Develop strategies for communicating design decisions for dynamic layouts. Expect to create mockups, wireframes, and finished HTML layouts that are portfolio-ready. This course is open to junior and senior communication design majors. Juniors register for F10 Art 326H; seniors for F10 Art 426H. Counts toward design minor if space is available. Prerequisite: Interaction Foundations (F10 337) or demonstrably comparable HTML/CSS skills.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 328D Illustrating for Licensed Products
In this studio course, students will research, concept and create images that are appropriate for application to products in the licensing field. Students will work toward developing icons/motifs, a mainstay in licensing, through deepening their skill sets in shape based illustration, design elements of composition and hierarchy and thoughtfully considered color. Class content will include the development of collections and images, patterns, and exploration of the visual content, artists, audiences, and trends in a fluid marketplace. Projects for this course will be drawn from the gift and home decor markets, fabric design and stationery products. This course is appropriate for juniors and seniors in the communication design major.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 328E Illustration Concepts & Media
Advanced projects in applied illustration and the first step in development of a professional portfolio. The class will explore creating images with smart and concise ideas across a spectrum of media. Students will be instructed on a range of illustration media to create visual solutions under rigorous deadlines. The projects will cover the range of editorial and conceptual image-making in the professional world today including portraiture, multiple images, responding to text and specific time and media restrictions. Prerequisite: Word and Image II. This course is open to juniors and seniors in the communication design major.
Credit 3 units.

F10 ART 328F Storytelling Across Multiple Media
This interdisciplinary course addresses how the elements of a single visual and textual narrative are distributed across multiple traditional and digital media platforms to form a unified and cohesive entertainment or branding experience. Assignments will challenge students to examine the specific attributes of each medium to determine its role in the greater experience. Students will work in small teams to coordinate and execute media integration per their individual disciplines, skill sets and areas of interest. Students will learn how storytelling across multiple media can expand the market for an intellectual property, provide various points of entry for different audience segments, and heighten audience participation, interaction, understanding and engagement in the content. Prerequisites: Word + Image II or Type II.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 328G Branding & Identity
Students will learn about brands: 1) as identity; a shorthand for a company or product, 2) as an image; where an individual perceives a brand as representing a particular reality, and 3) as a relationship; where an individual reflects an experience through a product or service. To learn from their research, students will concept, design and implement a brand, challenging them to realize the full breadth of a brand’s reach. Prerequisites: Word + Image II or Type II.
Credit 3 units. Art: CDES, FADM

F10 ART 329C Time-Based Media: Art Practice (Mediated Performance)
This course explores the body as a time-based medium and a vehicle of expression that interacts with cinematic and sound technologies, undergoing gradual semantic, virtual and visceral transformations. Students create performance-based video and sound works that are mediated with electronic/digital technology and performed or screened in public. Collaborative, individual political and poetic actions and happenings are encouraged. Students focus on the production of conceptually rigorous and technically convincing work that embodies their performative, experimental and individually designed ideas. Projects are informed by readings in media theory, writing assignments, and active participation in critiques of works by contemporary media artists.
Credit 3 units. Art: FAAM EN: H
F10 ART 329L Time-Based Media: Art Practice (Special Topics: The Language of Moving Images)
This course will examine the language of filmic images as they relate to various visual art forms, which includes, among other elements, shot construction, sequencing, pace, duration, sound integration, scale, and situational contexts. Through screenings, readings, lectures, discussions and critiques, students will develop the analytical skills required to interpret moving images and to think deeply about their productions, which may utilize forms other than video or film and include installation components. Not focused heavily on technical approaches, creative work will be driven predominantly by individual concerns and may be accompanied by written analysis. Credit 3 units. Art: CDES, FAAM, FADM

F10 ART 330I Time-Based Media: Art Practice (New Media in Art)
Exploring the intersection of art and technology, the course focuses on the phenomenon of time as an artistic medium and as the subject of work. Through the production of time-based works in a virtual realm, students learn about compositional choices, narrative and non-narrative strategies, and ethical and political responsibilities that artists and artist collectives face in the 21st century. Students gain exposure to selected software as it pertains to their individually designed projects. Readings, writing assignments and an active participation in critiques of works by contemporary new media artists will be part of this seminar. Credit 3 units. Art: CDES, FAAM

F10 ART 332A Interaction Design: User-Centered Applications
This course is a hands-on application of interaction design for digital media (primarily browser-based). We will explore how user-interaction adds bi-directionality to communication, examine the intricacies of seemingly simple digital interactions, and familiarize ourselves with the attributes of digital device as “canvas.” We will work both independently and collaboratively to design interactive solutions for a selection of communication challenges. Our focus will be to learn by doing; first-hand experience gained while undertaking real-world projects will provide the context and framework for discussion and instruction. Project work will likely be (but not required to be) accomplished with tools available in the Adobe Creative Suite: Adobe Dreamweaver, Adobe Illustrator, and Adobe Photoshop. Web browsers on both desktop computers and mobile devices will also be used extensively. No prerequisites. This course is appropriate for seniors in the communication design major. Credit 3 units. Art: CDES, FADM

F10 ART 332E Panel By Panel: Narrative Comics
Comics are a medium with a long history. The desire to tell a story through a sequence of images has existed since humans began drawing and documenting. This course teaches students to create comics, with both fiction and nonfiction narratives. Students will be introduced to historic and contemporary examples of comics over the course of the semester. Through assignments and in-class workshops, students will learn the basics of making comics, including panel transitions, the relationship between words and pictures, pitching a concept, breaking a plot down into a script, production. Assignments will span a range of narrative lengths; exploration of digital and print formats is encouraged. Credit 3 units. Art: CDES, FADM

F10 ART 332F Design as a Catalyst for Change
With a whirlwind of social and cultural transitions emerging across the world, design is being used to address and disrupt, and prevent social challenges that arise — including topics like natural disasters and global water crises to political corruption, increased social injustices, gender inequality, and racial inequity. Designers can serve numerous roles in driving impactful engagement of these issues; their skills are often required to expand beyond artifact-based studio practices to instill greater benefit to their end users, communities, and society at-large. In this course, students will learn and practice skills of community-based social impact design. The focus of this course will emphasize “the work behind the work,” as students learn how matters of empathy, equity, privilege, relationship building, and justice integrate into the communications design process when working with(in) communities. As students identify and select a social cause on which to focus, they will develop a series of print and digital works that communicate their chosen issue, pitch proposed design interventions, and visualize collaborative implementation processes. Learning modules will feature weekly readings, direct engagement with social design practitioners, design charrettes, and on-site learning, allowing students to gain greater depth and perspectives for harnessing design as a catalyst for change. Credit 3 units. Art: CDES, CPSC, FADM

F10 ART 332G Design & Research
"Design research" can have many meanings: learning about user needs in order to improve the design of our tools and services; designing things that enable us to learn about people and our relationship with the world around us; or even researching the process and meaning of design as a practice. This course will combine studio- and seminar-style learning to broadly explore three modes of design research: exploratory, learning about people's needs in order to frame a design brief; evaluative, using sketches and prototypes to learn about and improve an idea; and speculative, creating artifacts from fictional societies in order to question our basic structures and systems. Each component will involve readings, lectures, case studies, written reflections and exercises to be applied to an ongoing team project, enabling students to think critically about each practice while experimenting with its methods. Throughout, students will present their findings, translating research into design briefs and calls for action. Credit 3 units. Art: CDES, CPSC, FADM

F10 ART 332H Alternative Displays
This course explores display-based interactions that are functionally unique in order to create more relevant information and experiences. Emerging technologies such as e-paper and fabrics are colliding with the internet of things and flexible screen interfaces where smart displays go beyond phones and computers. Students will consider display applications in multiple settings, functions, and scales from small devices to larger environments. Projects will be entrepreneurial and experimental with an applied perspective to explore real world challenges and opportunities. Final projects may include the intersection of 3D objects with 2D screens that interact with other devices, systems and users. All project will be presented as refined prototypes with functional coding optional. Credit 3 units. Art: CDES, FADM
F10 ART 332I Interaction: Non-Linear Narrative
This is an advanced interaction major elective exploring the experiential and occupiable nature of the internet. Through studio projects, readings, discussions, workshops, and exercises, students will explore the theoretical premise that defines the physical reality of internet, the structural hierarchy of how it works, and the ways of developing working with databases and navigating through complex content. Work in this course could be browser-based but may also have physical components including artifacts, books, and exhibitions. Credit 3 units. Art: CDES, FADM

F10 ART 336A Visual Journalism and Reportage Drawing
This course combines studio practice, work in the field, subject reporting and nonfiction writing to explore rich tradition that dates to the mid-19th century. The “special artists” who reported on the American Civil War, the urban observers of the Ashcan School and the “New Journalism” illustrators of the 1950s, 60s and 70s brought vision and force to their work as reporters. Today, the reportage tradition is being reinvigorated in online outlets and periodicals. Students will produce a series of works documenting observations of contemporary people, sites and events, culminating in a zine designed for print and/or a digital slideshow with supporting text. This course will provide plentiful drawing experience. Supplemented by historical material in the collections of the Modern Graphic History Library. This course is appropriate for juniors in the communication design major. (Students with an interest in visual journalism grounded in street photography and visually engaged writers may be admitted to the course by permission of instructor.) Credit 3 units. Art: CDES, FADM

F10 ART 336M Special Topics in Communication Design: Illustration for Creative Practice
This course is about transforming creative impulses into a controlled professional practice. In the first half of the course, students will investigate current illustration trends and their applications in the marketplace. We will apply these findings to assignments while considering experimentation, relevance and form. The second half of the course will consist of iterative drawing assignments. Students will focus on cohesion within large bodies of work as well as the ability to bring images to finish with varying time constraints. Credit 3 units. EN: H

F10 ART 336N Environmental Design
This course offers an introduction to the process and problem-solving methods required to conceptualize and develop an environmental graphics project. Students will gain an understanding of the relationship between a concept on screen and that idea realized at full scale and its impact in the built environment. Scale drawing, architectural documents, fabrication methods and materials will all be explored. Projects will include wayfinding and ADA signage, exhibit design and architectural graphics. Students will communicate their concepts through sketches, computer drawings, models and mock-ups. Credit 3 units. Art: CDES, FADM

F10 ART 337E Communication Design: Word & Image II
This course continues Word & Image I (F10 238B), presenting design and illustration projects simultaneously. It focuses on methodologies for a range of problems. It emphasizes the development of content, illustration, typography, sequential narrative and information design. Students are expected to become self-directed about their synthesis of word and image and to select an area of emphasis within design and illustration for deeper study. Credit 3 units. Art: FADM EN: H

F10 ART 337F Communication Design: Typographic Systems
This course builds on the typographic principles introduced in Typography I (F10 238B). Students generate typographic systems and expressions relevant to professional practice. Credit 3 units. Art: FADM EN: H

F10 ART 337I Communication Design: Interaction Foundations
This course is a hands-on application of interaction design for digital media (primarily browser-based). Participants will learn and apply the fundamentals of HTML and CSS, explore how user-interaction adds bidirectionality to communication, examine the intricacies of seemingly-simple digital interactions, and become familiar with the attributes of digital device as "canvas." Students will work both independently and collaboratively to design interactive solutions for a selection of communication challenges. Credit 3 units. Art: FADM EN: H

F10 ART 337M Communication Design: Visual Voice
Design is a powerful tool that creates meaningful dialogue between the work and its intended audience. This exchange can profoundly impact our culture and society. This course explores the methods used by designers to create visual messages that inspire ideas, elicit emotions and encourage actions. Through class discussion and course readings we will examine the role and responsibility of the designer within our society. Students will create work that integrates their individual perspective and personal experiences supported by research, writing and design applications. Credit 3 units. EN: H

F10 ART 338I Communication Design: Interaction Design II
The class will explore designing usable, useful, and desirable relationships and interactions between people and the digital products and services they use. Students are introduced to human-centered research methods in the context of designing screen-based experiences. Small ethnographic field projects build to inform the basis for idea generation and prototyping concepts. Students then synthesize insights to design a digital solution. The class has a series of smaller exercises that build to two larger design projects with an overarching theme of public health or sustainability. Graphic design and typographic fundamentals will be addressed throughout in the context of interaction. Class time will be mixture of lectures, in class exercises, and studio based work. Students will need a laptop with Adobe Illustrator, InDesign and Photoshop and moderate experience with these programs. Credit 3 units. EN: H

F10 ART 338M Communication Design: Typography II
This course is a hands-on application of interaction design for digital media (primarily browser-based). Participants will learn and apply the fundamentals of HTML and CSS, explore how user-interaction adds bidirectionality to communication, examine the intricacies of seemingly-simple digital interactions, and become familiar with the attributes of digital device as "canvas."
Students will work both independently and collaboratively to design interactive solutions for a selection of communication challenges. Credit 3 units. Art: FADM EN: H

F10 ART 338J Communication Design: Illustration Projects
In Illustration Projects, students will confront three substantial projects of complex visual research and problem-solving, and communicate their results through beautifully made images. Each project will begin with provided story data, ranging from business-oriented to literary to mechanical, then move through rigorous stages of editing, storytelling, style development, execution and refinement. Early projects will emphasize traditional techniques of image-making; later projects will involve more digital manipulation. Students will need a laptop with Adobe Creative Suite installed as well as traditional art-making supplies along the way.
Credit 3 units. EN: H

F10 ART 338L Communication Design: Experimental Typography
In this studio course, students will learn to challenge typography's role as a tool for communication through alternative methods in mark-making and redefining what or how it is communicated. The course will introduce material exploration, emerging software/technology, and sensory/spatial considerations while challenging the purpose of type. It will be organized into multiple units, each with a different opportunity for the student to explore new methods. Students will apply their own areas of disciplinary expertise to the final project. Students will need a laptop and may need to acquire inexpensive or free software. This course is appropriate for juniors through graduate students with or without visual training who are interested in typography, communication, visual expression, and computer programming.
Credit 3 units. EN: H

F10 ART 371C Printing Propaganda: The Letterpress Poster
This course takes as its focus the poster and its powerful call to action. Students will research the history of propaganda posters made by both governments and their critics, including first-hand use of the World War I poster collection in Olin Library, and will develop understanding of the rich ground created by the mix of text and image. With this historical and theoretical perspective, students will embark on printing a series of posters in the Book Studio utilizing the larger letterpresses and the unique collection of wood types. A variety of printing strategies will be explored including monoprint, photopolymer plate, pronto plate, stencil, and alternative letterpress print techniques. Skills will be developed in the fundamentals of large format typography, copywriting, photography, illustration, and printing.
Credit 3 units. Art: CDES, FADM

F10 ART 372B Content to Cover: the Design of Books
This studio course considers the design of books in their totality, from the smallest typographic details of text pages, to designing the page grid, and the selection of images, type, materials, and color of the binding and cover. Students will produce two books from texts assigned to them. The first will be a text-based book of prose; the second, larger project, will include body text, images, captions, footnotes. Beginning with a thorough discussion of the landscape of the two-page spread, students will complete a short research project based upon a complex illustrated book in the library. Discussion of print production and binding options in industry will be enhanced by a visit to a local offset printer and to Olin Library Special Collections. Students will deepen their skill base in typographic applications, the use of InDesign as a multipage document tool, a range of imaging techniques offered in the Book Studio, and bookbinding technique, as well as building their design criticism vocabulary.
Credit 3 units. EN: H

F10 ART 381B The Book as Lens: Photography and Books
This course will examine the function of the photograph in the sequential book format, with an emphasis on narrative development. The semester work will include researching historical photo books; experimentation with found photography; making an original photo series; alternative book structures; designing pages with photos and text; and alternative printmaking techniques on a wide variety of materials. This course is for designers, photographers, and anyone interested in the way photo books function.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 3822 Art Practices: Present/Past/Past/Present (Florence)
The city of Florence today serves as a living, breathing museum that offers a glimpse into the materials and methods of its past, while offering a fertile ground for contemporary art practices that focus on critical investigation. In this course, students will engage a diverse set of art practices that operate between past and present, between the technical and conceptual, exploring the relationship between the Renaissance’s reinterpretation of classicism and its revolutionary spirit that sparked innovation in the arts, sciences and society in general. Six hundred plus years later, students will examine artistic/visual conventions of the Renaissance and re-contextualize them to 21st-century ideas and issues. The course will make use of these myriad opportunities through field trips or site visits, lectures, technical demonstrations and readings that will supplement these investigations. This course may be applicable toward an area discipline art concentration with approval and final portfolio review by faculty in the discipline of concentration.
Credit 3 units. EN: H

F10 ART 3825 Art Studio (Florence)
Art Practice and Methods & Contexts are linked pedagogically and conceptually in the Sam Fox curriculum. In Florence, the two courses will be merged into a broader 6-credit art studio course. The city of Florence today serves as a living, breathing museum that offers a glimpse into the materials and methods of its past, while offering a fertile ground for contemporary art practices that focus on critical investigation. In this course, students will engage a diverse set of art practices that operate between past and present, between the technical and conceptual, exploring the relationship between the Renaissance’s reinterpretation of classicism and its revolutionary spirit that sparked innovation in the arts, sciences and society in general. Six hundred plus years later, students will examine artistic/visual conventions of the Renaissance and re-contextualize them to 21st-century ideas and issues. Students will also integrate and synthesize knowledge resulting from "Art Practice." Supported by lectures, discussions and critiques, the course will foster a creative environment and critical discourse surrounding artistic practices. Students are guided through the art-making process, from conceptualization to resolution, emphasizing experimentation.
with various methods of production and distribution. Students will be challenged to contextualize their own artistic interests within the contemporary art field by promoting critical analysis skills necessary for initiating, interpreting and evaluating artistic production. The course will make use of these myriad opportunities through field trips or site visits, lectures, technical demonstrations and readings that will supplement these investigations. Credit 6 units.

F10 ART 3830 Strategies: Working on Site (Florence)
Sketchbook in hand, how does one respond to the overwhelming complexity of a specific environment? There are multiple correct answers to this question. Many possible answers will be explored through specific exercises and open-ended assignments. Much of the studio’s class time will be spent on location, exploring interior and exterior environments, and the transitional spaces between them. A specific sketchbook, purchased in Florence, will be required. Students will be able to work in a wide variety of media, including photography and digital. Credit 3 units. Art: CDES

F10 ART 3832 Communication Design: Mapping the Unfamiliar (Florence)
This studio course with lectures will focus on creating both informational and narrative-driven explorations of place through the form of the map. The first half of the semester will introduce the map as an instrument for way finding and data visualization. Students will learn to negotiate various levels of information in two-dimensional design while crafting clear and compelling stories involving location, points-of-interest, and time. Students will also begin documenting their own experience navigating Italy as a means of incorporating personal perspective into more psychogeographic-based mapping studies that traverse the idea of familiarity. The second half of the semester will further develop students’ potential to interpret their surroundings through the exploration of nonlinear storytelling and pictorial representation of cartographic data-points. Credit 3 units.

F10 ART 3834 Making Meaning (Florence)
As students transition into a new culture and environment, there lies an opportunity to acutely examine shifts in behavior, emotion, expectation and perspective — both within themselves as well as amongst their classmates. This shared (yet diverse) experience makes for a great opportunity to flex their empathy muscles. To better understand this, each student will be “the designer” as well as “the audience,” investigating ways to help each other live in a new culture. Credit 3 units. Art: CDES

F10 ART 3836 Methods: Verbal to Visual (Florence)
Do different types of text and their meanings require different approaches for image making? Maybe. A variety of different texts will be assigned, each accompanied by a different image-making methodology. There will also be a variety of applications for the resulting images. Students will be able to explore a wide range of media and image making. The goal is to assist students in understanding and developing their own approaches to this complex process. Credit 3 units. Art: CDES EN: H

F10 ART 3838 Experimental Typography (Florence)
Spanning the spectrum between the informational and the poetic, type design and typography work is a medium unto itself, as one might view painting and sculpture. In this course, we will engage closely, experimentally, and rigorously with typography as medium. This course is a space for experimentation, research, and invention. Building on the fundamentals of typography, course work will set varied scenarios for the rigorous exploration of typography as form, emphasizing generative processes. Projects will engage with materiality, format, scale, motion, hybridity, legibility, and expression. Credit 3 units. Art: CDES EN: H

F10 ART 3840 Branding & Identity (Florence)
Students will learn about brands: 1) as identity; a shorthand for a company or product, 2) as an image; where an individual perceives a brand as representing a particular reality, and 3) as a relationship; where an individual reflects an experience through a product or service. To learn from their research, students will concept, design, and implement a brand, challenging them to realize the full breadth of a brand’s reach. Credit 3 units. Art: CDES EN: H

F10 ART 3842 Patternmaking and Production
An introduction to flat pattern drafting. Principles will be applied to various components of garment creation. Construction techniques and industrial methods explored within specific structural design problems. Students will undertake realization of garment from sketch to pattern draft and finally construction of muslin (toile). This course is to be taught using the Imperial measurement system. This course will be offered in Florence, Italy. Credit 3 units. EN: H

F10 ART 3844 Fashion History & Research
The study of cultural and social influences to comprehend how these influence the evolution of fashion and are expressed in clothing at various junctures in history. Review of general academic research methods will be covered as well as research methods and strategies of particular significance to fashion design. Course work will focus on using research as an avenue to original and effective design concepts. This course will be offered in Florence, Italy. Credit 3 units. EN: H

F10 ART 3845 Sustainable Fashion and Ethical Clothing
This course focuses on the study and understanding of sustainable clothing and its influence in today’s fashion industry and modern life. Ethical fashion refers to the use of fabrics derived from eco-friendly resources, and the study of how these fabrics are made. Being “green” in fashion today means reducing the amount of clothing discarded to landfills, and decreasing the environmental impact of agro-chemicals in producing conventional fiber. Special emphasis will be placed on the vintage phenomenon and on recycling as fundamental parts of this complex subject. The course will analyze the impact of the reduction of raw materials and virgin resources, as it relates to fitting in the context of a more powerful globalized fashion industry as these two worlds often collide. The course will also look at how sustainability in the clothing industry can provide a new market for additional job opportunities. This course will be taught in Florence, open to fashion majors. Credit 3 units.
F10 ART 391 Methods and Contexts I
Required for those pursuing the Bachelor of Fine Arts in Art, the Bachelor of Arts in Art, and the second-major in art. This team-taught course integrates and synthesizes knowledge resulting from “Theory and Practice” and related courses. Supported by lectures, class discussions and student critiques, this course fosters a creative environment and critical discourse surrounding artistic practices. Students are guided through the art-making process, from conceptualization to resolution, emphasizing experimentation with various methods of production and distribution. The goal of this course is to help students contextualize their own artistic interests within the contemporary art field by promoting critical analysis skills necessary for initiating, interpreting and evaluating artistic production. Credit 3 units. EN: H

F10 ART 392 Methods and Contexts II
Required for BFA in Art majors. This team-taught course expands on methodologies encountered in Methods and Contexts I and related courses. Students are encouraged to take charge of their artistic process through faculty-supported and self-directed creative investigation. Through lectures, class discussions and critiques, students critically engage the evolving manner in which visual culture is produced and distributed. Students learn how to best present their work and incorporate discourse inherent to and generated by their practice. The goal of this course is to ensure a strong Capstone experience by helping students develop their artistic position within the public realm and contemporary contexts. Credit 3 units. EN: H

F10 ART 402B Drawing: Art Practice (Conceptual Methods in Drawing)
Drawing is a communicative device; it is a primary means of conceptual strategy leading to effective visual exploration and expression, from thought to form. This studio course looks at the practice of drawing in the context of language, scientific paradigms, complementary and alternative art forms, socio-political theory and history as they relate to visual culture and invention. Lectures, critical readings, and analysis of historical and contemporary modes of drawing support students in their course work. Projects in this course may consider mapping, language systems, formulaic constructions, material essentialism, physiologic/kinesthetic approaches, and performative aspects of drawing. Credit 3 units.

F10 ART 402D Drawing: Art Practice (Collage: History and Practice in Contemporary Art)
This course will examine the role of collage in contemporary studio practice. Students will be required to assemble an archive of images from various sources, found and self-generated, to produce a body of work based on a specific theme. Readings and discussion related to the course will examine the evolution of collage and its present status and application within contemporary studio practice. Credit 3 units. Art: CDES, FAAM EN: H

This studio course focuses on various narrative strategies in relation to painting’s mythology and its function in contemporary culture. Topics to include narrativity, the politics of lens and screen, invented fictions, social vs. virtual spaces, and site specificity. Instruction will encompass technical, conceptual and creative skills for taking an individually conceived project from idea to fruition. Students will be encouraged to consider traditional and alternative forms of painting as well as digital imaging, installation, net art, etc… Lectures, critical essays, and analysis of historical precedents and contemporary practitioners will support students in their course work. Credit 3 units.

F10 ART 411F Painting: Art Practice (Language of Abstraction)
This course examines strategies of abstraction and nonobjective image-making that originate in the painting studio, including those that are driven by concept, material, space and/or process. Readings and discussions will examine the evolution and history of abstraction and its present applications within a contemporary studio practice. The course will engage students in both assigned and self-directed work that will enable them to experiment with a broad visual vocabulary while understanding the relationship between form and content. Credit 3 units.

F10 ART 411G Painting: Art Practice (Place and Space)
This course examines ideas of place and space — both observed and invented — established through the surface and materiality of paintings. Students develop a unique body of work through shared exploration of painting processes and materials, along with independent research. Critical assessment of work is complemented by faculty and peer discussions, readings, written critical analysis and field study. Required for a concentration in painting. Credit 3 units.

F10 ART 412E Painting: Art Practice (Place and Space)
This course examines ideas of place and space — both observed and invented — established through the surface and materiality of paintings. Students develop a unique body of work through shared exploration of painting processes and materials, along with independent research. Critical assessment of work is complemented by faculty and peer discussions, readings, written critical analysis and field study. Credit 3 units.

F10 ART 412F Painting: Art Practice (Language of Abstraction)
This course examines strategies of abstraction and non-objective image making that originate in the painting studio, including those that are driven by concept, material, space and/or process. Readings and discussion will examine the evolution and history of abstraction and its present applications within a contemporary studio practice. The course will engage students in both assigned and self-directed work that will enable them to experiment with a broad visual vocabulary while understanding the relationship between form and content. Credit 3 units. Art: FAAM

F10 ART 412G Painting: Art Practice (Body Image)
This is a rigorous painting/drawing studio course investigating various methods of pictorial construction (historical, contemporary) and the role of figuration in contemporary art practice. Students will be required to produce an independent
body of work based on a theme and generated from a variety of references (imagination, life, photography, painting, film, etc.) Discussions to include contemporary notions of identity structures, social and gender politics. Lectures, critical readings and the analysis of historical and contemporary modes of figural representation will support students in their investigations. Credit 3 units.

F10 ART 413M Sculpture: Art Practice (Sculptural Bodies)
This course investigates the socio-political issues of the body, the figure and their potential in contemporary art practice. The term “body” is used as an organism, in an expansive way, to investigate the metaphorical, physical, emotional, cultural, and spiritual bodies. A variety of media and methods are explored with an emphasis on three-dimensional work and object-based performance. Lectures, demonstrations and readings contextualize the potential of sculptural systems to constitute the meaning of a contemporary body. Credit 3 units.

F10 ART 414J Sculpture: Art Practice (Material as Metaphor)
All materials carry meaning. This course familiarizes students with histories and fabrication processes intrinsic to sculpture. This course uses demonstrations and hands-on experiences, primarily but not exclusively with metal and woodworking processes to show how such materials inform a studio practice. Lectures and techniques contextualize an understanding of pre-formed and found material as a formal and conceptual component resulting in the final work of art. In a critical environment, students formulate their own material language and defend their art practice and creative decisions. Credit 3 units.

F10 ART 414K Sculpture: Art Practice (Symbiosis)
This course explores numerous scenarios that create different levels of sculptural interactivity from low to high tech. Students construct devices ranging from simple mechanisms to large-scale installations fostering physical, analogue or digital interaction between the viewer and the sculptural environment. Viewer-activated systems create multiple interactive platforms, initiating a responsive relationship between the sculpture and the viewer. Lectures, demonstrations and readings devise a broad understanding of the histories and potentials of symbiotic relationships between a work of art and its audience. Credit 3 units. Art: CDES, FAAM EN: H

F10 ART 415B Printmaking: Art Practice (Propaganda to Decoration)
This course uses the print multiple as a starting point to explore a continuum that runs from propaganda to decoration. The fundamental attributes of the multiple, including its accessibility and repeatability, arc from private to public and from political to aesthetic. Reproduction, distribution, urban communication, social space, intervention and site specificity are explored through course lectures, readings and discussions. Collaboration, exchange, and relational practices provide frameworks for self-directed projects using traditional and alternative techniques in print media including lithography, screen-printing, stencils and photocopy. Credit 3 units.

F10 ART 415H Printmaking: Art Practice (Feedback Loop: Process and Print)
This course focuses on variability, mutability, repeatability and play within the process of printmaking, using etching, collagraph, monotype and digital methods. The course explores practices and contexts in printmaking as a contemporary art form and promotes advanced conceptual and technical development through creative practice, readings, discussions and critiques. Projects are self-directed and based on course topics that engage different approaches to process-based work, ranging from the improvisational to the systematic. Emphasis is placed on the shift from object to process, from the single manifestation to the series, from fixed to flux and back again. Credit 3 units.

F10 ART 416F Printmaking: Art Practice (The Printed Image)
This course explores the printed image as storyteller, educator, political tool, and narrative. Historical precedents and contemporary examples of political prints, graphic novels, posters, and narrative suites are examined as possible models for self-directed projects. Readings and discussions include strategies for drawing and appropriating imagery. Students will have the opportunity to produce a thematically unified body of work while gaining technical expertise in woodcut, etching, and lithography. Credit 3 units.

F10 ART 416G Printmaking: Art Practice (Extra-Dimensional Printmaking)
Pushing the boundaries of printmaking, prints move beyond the wall and into sculpture, installation, and time-based work. Relief, silkscreen, and intaglio processes are explored with an emphasis on print as theatre, object, and immersive environment. Through readings and discussions, students will engage with historical precedents and contemporary principles that support the creation of self-directed work that is extra-dimensional in physical and conceptual scope. Credit 3 units.

F10 ART 417H Photography: Art Practice (Methods of Distribution)
One of the most effective aspects of the photographic image today is its speed. The way that physical and virtual images are presented and distributed has changed significantly since the initial branding of photography as the medium of reproducibility. This class focuses on photography-based uses of the image through various distribution formats like the book, the poster, the newspaper, television, web, design, film, apparel, architecture, music, etc. The students make, read, look, listen, and experience 20th- and 21st-century photography practitioners who engage a range of disciplines and methods of distribution as they try to synthesize methods/models of their own. Rigorous student project critiques are complemented with discussions, writing assignments, and readings on media theory and contemporary uses of photography outside of the traditional exhibition-based contexts. Credit 3 units.

F10 ART 417L Photography: Art Practice (Constellations, Sequences, Series)
Series are the prevalent method for exhibiting photographic images. Through assignment-based and self-generated projects, students discover how photographic series are conceptualized,
structured and sequenced. Special attention is given to the material meaning embedded in print size, order and spatial placement. The course provides in-depth coverage of image capture through medium-format analog and full-frame digital systems as well as intermediate digital editing and printing techniques. Students also explore various documentary and set-up strategies through narrative and non-narrative photographic approaches. Through a rigorous critique structure, course readings and critical writing, students engage the historical discourse surrounding the series as a tool for artistic expression. Credit 3 units.

F10 ART 417O Photography: Art Practice (Studio Location and Lighting)
Same as F10 317O. Seniors (only) register for F10 417O. This studio course introduces techniques and strategies for using artificial light sources to interpret subject matter, build narratives, and develop creative environments. Studio sessions will cover the use of continuous lighting systems, strobes, and hot shoe flashes. Course lectures will address principles of light, expanded applications of studio lighting, and editing strategies. Class projects will challenge students to apply lighting techniques in studio and on-location settings. Field trips will provide opportunities to work in a variety of built and natural environments and in conjunction with partner organizations. Credit 3 units.

F10 ART 418J Photography: Art Practice (Slow Image: Large Format Photography)
This course provides an in-depth study of the large format analog camera and its unique formal position. Using the 4"x5" format, students examine this slow, high fidelity photographic medium both technically and conceptually. Students employ a comprehensive photographic process, including loading sheet film, applying the zone system, scanning large format film, editing digital images, and creating large format digital inkjet prints. Class activities include rigorous student project critiques, as well as reading and discussion elements focusing on the history of large format and its contemporary descendants in the Dusseldorf School, abstract photography and installation art contexts. Class participants investigate the role of high fidelity images. Assignments may address portraiture, still life, interior and exterior architecture, landscape, and abstract photography. Large format 4"x5" cameras will be available for use. Credit 3 units.

F10 ART 418K Photography: Art Practice (Documentary Photography & Social Practice)
This course focuses on the various philosophical, aesthetic and technical approaches to photographing the contemporary, human-altered landscape and the communities we live in. Through slide lectures, field trips, in-depth critique and supervised lab work, students are expected to increase their awareness of how their own personal responses relate to those of other photographers with the same contemporary issues of documentary photography. A project-based seminar focusing on objectivity of the photographic document. Material and camera format open. Credit 3 units. Art: CDES, CPSC, FAAM EN: H

F10 ART 423A Capstone 1: Fashion Design (Pre-Collection Studio)
Same as ART 123A, ART 223A, ART 323A. Seniors only register of ART 423A. Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing. Credit 3 units.

F10 ART 423B Apparel Strategy
The study and analysis of the apparel collection and its functional components in an effort to merchandise ideas for groups, seasonal deliveries, and lines. Thoughtful synthesis of the spectrum of knowledge and skills acquired through prior fashion design course work. Development of design and marketing strategies for specific customer profiles and specialty markets. Open to senior fashion design majors only. Credit 3 units.

F10 ART 423D Digital Lab
This lab, offered concurrent with preliminary study for creation of both 3D and 2D culminating work by senior majors. Resolution of technical drawing, and digital illustration problems addressed. Additionally patternmaking and digital skills enhanced as appropriate. Only seniors in Fashion Design may enroll. Credit 1.5 units.

F10 ART 423E Patternmaking Lab
This lab is offered concurrent with the preliminary study for the creation of both 3D and 2D culminating work by senior majors. Resolution of patternmaking problems are addressed, and patternmaking skills are enhanced as appropriate. Open to senior fashion design majors only. Credit 1.5 units.

F10 ART 423G Advanced Patternmaking
This lab is offered concurrent with the preliminary study for the creation of both 3D and 2D culminating work by senior majors. The resolution of patternmaking problems is addressed, and patternmaking skills are enhanced as appropriate. Open to senior Fashion Design majors only. Credit 3 units.

F10 ART 424A Capstone Studio 2 (Collection Studio)
In conjunction with Fashion Studio B, students create the culminating work of their study in fashion through realization of signature collection and portfolio documentation of collection. This studio will be undertaken with tutorials and guidance on tailoring, dressmaking, presentation and documentation. Enrollment required of and limited to senior fashion design majors. Credit 3 units. Art: FADM EN: H

F10 ART 424B Professional Practices: Portfolio Development
Students will work toward establishment of necessary construction, crafts skills, and signature illustration style required for completion of capstone project. Each student will draw together and organize evidence of vision and skill into a coherent presentation representative of their abilities as an emerging
design professional. Work from this course will be submitted for outside professional review. Enrollment required of and limited to senior fashion design majors.
Credit 3 units. Art: FADM EN: H

F10 ART 424E Patternmaking Lab
This lab is offered concurrent with the preliminary study for the creation of both 3D and 2D patternmaking work by senior majors.
Resolution of patternmaking problems are addressed, and patterning skills are enhanced as appropriate. Open to senior fashion design majors only.
Credit 1.5 units.

F10 ART 424M Digital Lab
This lab, offered concurrent with preliminary study for creation of both 3D and 2D patternmaking work by senior majors.
Resolution of technical drawing and digital illustration problems addressed. Additionally, patternmaking and digital skills enhanced as appropriate. Only seniors in the fashion major may enroll.
Credit 1.5 units. Art: FADM

F10 ART 426D Special Topics: Relation, Conditional, and Process-Oriented Design
This course encourages students to explore the spatial and experiential potential of designing frameworks to navigate complex archives of online content. In addition to expanding their code-based skills, students will push the boundary of traditional online activity to create immersive and experimental experiences in the browser. Through a series of informational and spatial challenges, students will conduct research into contemporary theory and practice of designing interactive platforms and develop dynamic solutions for online frameworks, which exploit and challenge traditional user expectations. Projects, experiments and research will be supplemented by group readings, class discussions, and individual artist/designer case studies. This course is open to junior and senior communication design majors. Juniors register for F10 Art 326D; seniors for F10 Art 426D. Counts toward design minor if space is available. Prerequisite: Interaction Foundations (F10 337) or demonstrably comparable HTML/CSS skills. Same as F10 ART 326D.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 426D Illustrating for Licensed Products
In this studio course, students will research, concept and create images that are appropriate for application to products in the licensing field. Students will work toward developing icons/motifs, a mainstay in licensing, through deepening their skill sets in shape based illustration, design elements of composition and hierarchy and thoughtfully considered color. Class content will include the development of collections and images, patterns, and exploration of the visual content, artists, audiences, and trends in a fluid marketplace. Projects for this course will be drawn from the gift and home decor markets, fabric design and stationery products. This course is appropriate for juniors and seniors in the communication design major.
Same as F10 ART 328D.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 426D Illustrating for Licensed Products
In this studio course, students will research, concept and create images that are appropriate for application to products in the licensing field. Students will work toward developing icons/motifs, a mainstay in licensing, through deepening their skill sets in shape based illustration, design elements of composition and hierarchy and thoughtfully considered color. Class content will include the development of collections and images, patterns, and exploration of the visual content, artists, audiences, and trends in a fluid marketplace. Projects for this course will be drawn from the gift and home decor markets, fabric design and stationery products. This course is appropriate for juniors and seniors in the communication design major.
Same as F10 ART 328D.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 426E Illustration Concepts & Media
Advanced projects in applied illustration and the first step in development of a professional portfolio. The class will explore creating images with smart and concise ideas across a spectrum of media. Students will be instructed on a range of illustration media to create visual solutions under rigorous deadlines. The projects will cover the range of editorial and conceptual image making in the professional world today including portraiture, multiple images, responding to text and specific time and media restrictions. Prerequisites: Word and Image II. This course is open to juniors and seniors in the communication design major.
Same as F10 ART 328B.
Credit 3 units.

F10 ART 426F Storytelling Across Multiple Media
This interdisciplinary course addresses how the elements of a single visual and textual narrative are distributed across multiple traditional and digital media platforms to form a unified and cohesive entertainment or branding experience. Assignments will challenge students to examine the specific attributes of each medium to determine its role in the greater experience. Students will work in small teams to coordinate and execute media integration per their individual disciplines, skill sets and areas of interest. Students will learn how storytelling across multiple media can expand the market for an intellectual property, provide various points of entry for different audience segments, and heighten audience participation, interaction, understanding and engagement in the content. Prerequisites: Word + Image II or Type II. Same as F10 ART 328F.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 426G Branding & Identity
Students will learn about brands: 1) as identity; a shorthand for a company or product, 2) as an image; where an individual perceives a brand as representing a particular reality, and 3) as a relationship; where an individual reflects an experience through a product or service. To learn from their research, students will concept, design, and implement a brand, challenging them to realize the full breadth of a brand’s reach. Prerequisites: Word + Image II or Type II. Same as F10 ART 328G.
Credit 3 units. Art: CDES, FADM

F10 ART 426H Special Topics: Interaction Design: Layout Systems
Learn and apply techniques and tools for creating advanced HTML/CSS layouts. Explore responsive design (layouts that adapt to available screen width), grid systems, layout frameworks and templating systems. Refine HTML and CSS skills, and learn best practices for common layout challenges. Become familiar with potential pitfalls designers face when planning for screens and variable content. Develop strategies for communicating design decisions for dynamic layouts. Expect to create mockups, wireframes, and finished HTML layouts that are portfolio-ready. This course is open to junior and senior communication design majors. Juniors register for F10 Art 326H; seniors for F10 Art 426H. Counts toward design minor if space is available. Prerequisite: Interaction Foundations (F10 337) or demonstrably comparable HTML/CSS skills. Same as F10 ART 326H.
Credit 3 units. Art: CDES, FADM EN: H

F10 ART 426L Time-Based Media: Art Practice (Special Topics: The Language of Moving Images)
This course will examine the language of filmic images as they relate to various visual art forms, which includes, among other
elements, shot construction, sequencing, pace, duration, sound integration, scale, and situational contexts. Through screenings, readings, lectures, discussions and critiques, students will develop the analytical skills required to interpret moving images and to think deeply about their productions, which may utilize forms other than video or film and include installation components. Not focused heavily on technical approaches, creative work will be driven predominantly by individual concerns and may be accompanied by written analysis.
Credit 3 units.

F10 ART 430I Time-Based Media: Art Practice (New Media in Art)
Exploring the intersection of art and technology, the course focuses on the phenomenon of time as an artistic medium and as the subject of work. Through the production of time-based works in a virtual realm, students learn about compositional choices, narrative and non-narrative strategies, and ethical and political responsibilities that artists and artist collectives face in the 21st century. Students gain exposure to selected software as it pertains to their individually designed projects. Readings, writing assignments and an active participation in critiques of works by contemporary new media artists will be part of this seminar. Prerequisite: Digital Design or Digital Studio. Open to BFA students who have taken the prerequisite, and others, including minors and MFA students, with consent of instructor.
Credit 3 units. Art: FAAM

F10 ART 432A Interaction Design: User-Centered Applications
This course is a hands-on application of interaction design for digital media (primarily browser-based). We will explore how user-interaction adds bidirectionality to communication, examine the intricacies of seemingly simple digital interactions, and familiarize ourselves with the attributes of digital device as “canvas.” We will work both independently and collaboratively to design interactive solutions for a selection of communication challenges. Our focus will be to learn by doing: first-hand experience gained while undertaking real-world projects will provide the context and framework for discussion and instruction. Project work will likely be (but not required to be) accomplished with tools available in the Adobe Creative Suite: Adobe Dreamweaver, Adobe Illustrator, and Adobe Photoshop. Web browsers on both desktop computers and mobile devices will also be used extensively. No prerequisites. This course is appropriate for seniors in the communication design major. Same as F10 ART 332A
Credit 3 units. Art: CDES, FADM

F10 ART 432B Advertising Processes
This studio course explores the strategic and conceptual processes that lead to execution of innovative advertising campaigns across mass and alternative media. A concise historical overview of advertising and its role in American society and culture creates a context for three applied assignments in key product, service and public service categories. Emphasis is placed on the processes of strategic development and documentation followed by an exploration of a range of solutions to marketing and branding problems and opportunities. Students develop skills in persuasive messaging that include art and creative direction, copywriting, creative team building, and visual and oral presentation of concepts. The course culminates with the execution of selected concepts in printed, electronic and/or audio formats.
Credit 3 units.

F10 ART 432E Panel By Panel: Narrative Comics
Comics are a medium with a long history. The desire to tell a story through a sequence of images has existed since humans began drawing and documenting. This course teaches students to create comics, with both fiction and nonfiction narratives. Students will be introduced to historic and contemporary examples of comics over the course of the semester. Through assignments and in-class workshops, students will learn the basics of making comics, including panel transitions, the relationship between words and pictures, pitching a concept, breaking a plot down into a script, production. Assignments will span a range of narrative lengths; exploration of digital and print formats is encouraged. Same as F10 ART 332E
Credit 3 units. Art: CDES, FADM

F10 ART 432F Design as a Catalyst for Change
With a whirlwind of social and cultural transitions emerging across the world, design is being used to address and disrupt, and prevent social challenges that arise-including topics like natural disasters and global water crises to political corruption, increased social injustices, gender inequality, and racial inequity. Designers can serve numerous roles in driving impactful engagement of these issues; their skills are often required to expand beyond artifact-based studio practices to instill greater benefit to their end users, communities, and society at-large. In this course, students will learn and practice skills of community-based social impact design. The focus of this course will emphasize “the work behind the work,” as students learn how matters of empathy, equity, privilege, relationship building, and justice integrate into the communications design process when working with/in communities. As students identify and select a social cause on which to focus, they will develop a series of print and digital works that communicate their chosen issue, pitch proposed design interventions, and visualize collaborative implementation processes. Learning modules will feature weekly readings, direct engagement with social design practitioners, design charrettes, and on-site learning, allowing students to gain greater depth and perspectives for harnessing design as a catalyst for change. Same as F10 ART 332F
Credit 3 units. Art: CDES, CPSC, FADM

F10 ART 432G Design & Research
“Design research” can have many meanings: learning about user needs in order to improve the design of our tools and services; designing things that enable us to learn about people and our relationship with the world around us; or even researching the process and meaning of design as a practice. This course will combine studio- and seminar-style learning to broadly explore three modes of design research: exploratory, learning about people’s needs in order to frame a design brief; evaluative, using sketches and prototypes to learn about and improve an idea; and speculative, creating artifacts from fictional societies in order to question our basic structures and systems. Each component will involve readings, lectures, case studies, written reflections and exercises to be applied to an ongoing team project, enabling students to think critically about each practice while experimenting with its methods. Throughout, students will present their findings, translating research into design briefs and calls for action. Same as F10 ART 332G
F10 ART 432H Alternative Displays
This course explores display-based interactions that are functionally unique in order to create more relevant information and experiences. Emerging technologies such as e-paper and fabrics are colliding with the internet of things and flexible screen interfaces where smart displays go beyond phones and computers. Students will consider display applications in multiple settings, functions, and scales from small devices to larger environments. Projects will be entrepreneurial and experimental with an applied perspective to explore real world challenges and opportunities. Final projects may include the intersection of 3D objects with 2D screens that interact with other devices, systems and users. All project will be presented as refined prototypes with functional coding optional.
Credit 3 units. Art: CDES, FADM

F10 ART 432I Interaction: Non-Linear Narrative
This is an advanced interaction major elective exploring the experiential and occupiable nature of the internet. Through studio projects, reading discussions, workshops, and exercises students will explore the theoretical premise that defines the physical reality of internet, investigate the structural hierarchy of how it works, and investigate new ways of developing/working with databases and navigating through complex content. Work in this course could be browser-based but may also have physical components including artifacts, books, and exhibitions.
Credit 3 units. Art: CDES, FADM

F10 ART 433C Capstone in Design 1: Research Methods (Form and Function)
This course explores the development of compelling and refined visual vocabularies to respond to a wide variety of narrative and interactive contexts. Students hone their methods for brainstorming and visual iteration with emphasis on composition, type, color, and word and image relationships. An expansive approach making to visual work is then linked to a set of ideas about design function and user response, ultimately providing students with tools to develop wide-ranging design artifacts that perform specific kinds of “work.” Some projects are done in collaborative groups; all projects have components that students create individually. Artifacts may include books, maps, apps and presentations. Senior BFA in Communication Design majors only.
Credit 3 units. Art: CDES

F10 ART 433D Capstone in Design 1: Research Methods (Form and Interaction)
This course helps students to develop and refine methodologies for making strong and varied visual work in the context of interactive products. Specific deliverables may include apps, websites, presentations, and user research studies. Senior BFA in Communication Design majors only.
Credit 3 units. Art: CDES

F10 ART 433E Capstone in Illustration 1: Research Methods Image and Story
Required for senior majors in communication design with an emphasis in illustration. An advanced course in image-making for functional contexts. Students develop projects, which isolate issues of approach, production, distribution and market in the landscape of illustration and cartooning today. Targeted research questions are posed in response to individual student work. Successful completion of the course requires the development of and commitment to an aesthetic and creative position within the fields of illustration and cartooning. Readings address the history and culture of illustration, comics and animation. The course anticipates the work of Capstone Studio 2. Senior BFA in Communication Design majors only.
Credit 3 units. Art: CDES
coherent organization, clear communication, typographic refinement and the successful execution of interactive and experiential storytelling. Semester culminates in formal presentation and professional project review. Senior BFA in Communication Design majors only.
Credit 3 units. Art: CDES EN: H

F10 ART 435M Special Topics in Communication Design: Design for Social Impact
Designers are capable of creating transformative social change by engaging in socially conscious design practices. Throughout this course, consequently, students will learn how to utilize appropriate design research methods and tools to prioritize the needs of the end users and their local contexts. Students will conduct design research, analyze data, and discover innovative solutions to issues in the community while also working collaboratively. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course. Credit 3 units. Art: CDES, CPSC

F10 ART 435N Big and Graphic: Making Posters with Type and Image
The poster is one of the most exciting and storied vehicles for message delivery. For hundreds of years, designers, illustrators, and artists have used the poster to awaken ideas, send messages, promote events, advertise products, and inspire action. In this course, students explore many different forms of large-format poster design, using both created images and expressive/experimental typography. Digital and non-digital techniques will be investigated. Each student will be able to frame course projects around their given areas of interest: design, typography, illustration, or a vibrant blend. Credit 3 units. Art: CDES

F10 ART 435P Design for Social Impact
Designers are capable of creating transformative social change by engaging in socially conscious design practices. Throughout this course, consequently, students will learn how to utilize appropriate design research methods and tools to prioritize the needs of the end users and their local contexts. Students will conduct design research, analyze data, and discover innovative solutions to issues in the community while also working collaboratively. College of Art majors with senior standing only. Credit 3 units.

F10 ART 435V Capstone in Design 1: Visual Voice
Design is a powerful tool that creates meaningful dialogue between the work and its intended audience. This exchange can profoundly affect our culture and society. This course explores the methods used by designers to create visual messages that inspire ideas, elicit emotions, and encourage actions. Through class discussion and course readings, we will examine the role and responsibility of the designer within our society. Students will create work that integrates their individual perspective and personal experiences supported by research, writing, and design applications. Senior BFA in Communication Design majors only. Credit 3 units. Art: CDES

F10 ART 436A Visual Journalism and Reportage Drawing
This course combines studio practice, work in the field, subject reporting and nonfiction writing to explore a rich tradition that dates to the mid-19th century. The "special artists" who reported on the American Civil War, the urban observers of the Ashcan School, and the "New Journalism" illustrators of the 1950s, '60s and '70s brought vision and force to their work as reporters. Today, the reportage tradition is being reinvigorated in online outlets and periodicals. Students produce a series of works documenting observations of contemporary people, sites and events, culminating in a zine designed for print and/or a digital slideshow with supporting text. This course provides plentiful drawing experience. Supplemented by historical material in the collections of the Modern Graphic History Library. This course is appropriate for juniors in the communication design major. (Students with an interest in visual journalism grounded in street photography and visually engaged writers may be admitted to the course by permission of instructor.) CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course. Same as F10 ART 336A Credit 3 units. Art: CDES, FADM

F10 ART 436N Environmental Design
This course offers an introduction to the process and problem-solving methods required to conceptualize and develop an environmental graphics project. Students will gain an understanding of the relationship between a concept on screen and that idea realized at full scale and its impact in the built environment. Scale drawing, architectural documents, fabrication methods and materials will all be explored. Projects will include wayfinding and ADA signage, exhibit design and architectural graphics. Students will communicate their concepts through sketches, computer drawings, models and mock-ups. Credit 3 units. Art: CDES

F10 ART 436M Communication Design: Visual Voice
Design is a powerful tool that creates meaningful dialogue between the work and its intended audience. This exchange can profoundly affect our culture and society. This course explores the strategies and tactics used by visual communicators to create work that convinces viewers to buy, believe, act, etc. These messages profoundly influence our culture and society. With this in mind, course reading and class discussion provide a platform for debate and discussion of the role the designer plays and the attendant responsibility. Students create work that integrates research, writing and design. All projects present a specific point of view on topics that are relevant to them. Prerequisite: Type 2. This course is appropriate for juniors in the communication design major. Credit 3 units.

F10 ART 4380 Voice
Propaganda and persuasion use different means to influence our perception of causes or positions. This course explores the strategies and tactics used by visual communicators to create work that convinces viewers to buy, believe, act, etc. These messages profoundly influence our culture and society. With this in mind, course reading and class discussion provide a platform for debate and discussion of the role the designer plays and the attendant responsibility. Students create work that integrates research, writing and design. All projects present a specific point of view on topics that are relevant to them. Prerequisite: Type 2. This course is appropriate for juniors in the communication design major. Credit 3 units.

F10 ART 461 Capstone Studio I
Required for majors in painting, photography, printmaking, and sculpture, beginning with the class of 2015. This is an advanced course in studio art conceptualization and production.
Students develop creative concepts, objects and gestures; successful completion of the course entails the development of, and commitment to, an artistic position, evidenced by studio production, presentation and writing. Responsibilities include preparation of drawings, models, maquettes, and other documentation. This course anticipates the work of Capstone Studio II, which culminates in a senior exhibition. This course includes practice, critique, and occasional museum/gallery visits. Senior BFA in Art majors only.
Credit 3 units.

F10 ART 462 Capstone Studio II
Continuation of Capstone Studio I. Required for majors in painting, photography, printmaking, and sculpture, beginning with the class of 2015. Course participants design, prepare, and complete a body of materially and conceptually resolved work for the spring Capstone exhibition. The course fosters an intellectual dialogue among seniors making the transition from studio to artist. Completion of a body of work is accompanied by intensive critical analysis of the ideas and methods from which it arises. Course includes practice, critique, and occasional museum/gallery visits. Senior BFA in Art majors only.
Credit 3 units. Art: FAAM EN: H

F10 ART 471C Printing Propaganda: The Letterpress Poster
This course takes as its focus the poster and its powerful call to action. Students will research the history of propaganda posters made by both, governments and their critics, including first-hand use of the World War I poster collection in Olin Library, and will develop understanding of the rich ground created by the mix of text and image. With this historical and theoretical perspective, students will embark on printing a series of posters in the Book Studio utilizing the larger letterpresses and the unique collection of wood type. A variety of printing strategies will be explored including monoprint, photopolymer plate, pronto plate, stencil, and alternative letterpress print techniques. Skills will be developed in the fundamentals of large format typography, copywriting, photography, illustration, and printing.
Credit 3 units. Art: CDES

F10 ART 472B Content to Cover: the Design of Books
This studio course considers the design of books in their totality, from the smallest typographic details of text pages, to designing the page grid, and the selection of images, type, materials, and color of the binding and cover. Students will produce two books from texts assigned to them. The first will be a text-based book of prose; the second, larger project, will include body text, images, captions, footnotes. Beginning with a thorough discussion of the landscape of the two-page spread, students will complete a short research project based upon a complex illustrated book in the library. Discussion of print production and binding options in industry will be enhanced by a visit to a local offset printer and to Olin Library Special Collections. Students will deepen their skill base in typographic applications, the use of InDesign as a multipage document tool, a range of imaging techniques offered in the Book Studio, and bookbinding technique, as well as building their design criticism vocabulary.
Credit 3 units. Art: CDES

F10 ART 481B The Book as Lens: Photography and Books
This course will examine the function of the photograph in the sequential book format, with an emphasis on narrative development. The semester work will include researching historical photo books; experimentation with found photography; making an original photo series; alternative book structures; designing pages with photos and text; and alternative printmaking techniques on a wide variety of materials. This course is for designers, photographers, and anyone interested in the way photo books function.
Credit 3 units. Art: CDES EN: H

F20 Art

F20 ART 111 Painting
Same as F20 211, 311, 411. First-year students (only) register for F20 111. Introduction to painting processes and materials. While there is emphasis on oil painting, students are also introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model. Technical skills and content are dealt with at the individual student’s level.
Credit 3 units. Art: FAAM EN: H

F20 ART 111T The Poetics of Image-Making: People, Place & Space
This painting elective course examines the poetics of imagemaking, with a focus on the representation of people, place, and space, both observed and invented. Students learn the practice of painting and develop works through fundamental exercises as well as through the shared exploration of painting processes. Work outside of class for the beginner is project-based; advanced students produce an independent body of work. Critical assessment of work is complemented by faculty and peer discussions, readings, and field study. Required text: “The Poetics of Space” by Gaston Bachelard.
Credit 3 units.

F20 ART 112 Painting
Same as F20 212, 312, 412. First-year students (only) register for F20 112. This course is an introduction to oil painting with an emphasis on the principles of color, construction and paint handling. Students will explore the possibilities of representational painting as applied to still-life, interiors, landscape and the human figure. The course is designed especially for beginning painters but can accommodate painters at all levels of proficiency.
Credit 3 units. Art: FAAM EN: H

F20 ART 113F Sculpture: Foundry
Same as F20 213F, 313F, 413F - First-year students (only) register for F20 113F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students will learn mold making, direct organic burnout, ceramic shell investment, metal chasing, and patination in order to create finished sculpture. In addition to metal casting, students will use other materials such as plaster, resin, steel, wood, rubber, plastic, and foam to create a mixed media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required.
Credit 3 units. Art: FAAM EN: H
F20 ART 113G Sculpture: Wood
Same as F20 213G, 313G, 413G - First-year students (only) register for F20 113G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making.
Credit 3 units. Art: FAAM EN: H

F20 ART 113I Sculpture: Metal Fabrication
Same as F20 213I, 313I, 413I - First-year students (only) register for F20 113I. Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be plastically deformed to create compound shapes or it can be connected to most any other material. Students will explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines as well as the safe operation of drilling, grinding and finishing tools.
Credit 3 units. Art: FAAM EN: H

F20 ART 114F Sculpture: Foundry
Same as F20 214F, 314F, 414F - First-year students (only) register for F20 114F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students will learn mold making, direct organic burnout, ceramic shell investment, metal chasing, and patination in order to create finished sculpture. In addition to metal casting, students will use other materials such as plaster, resin, steel, wood, rubber, plastic, and foam to create a mixed media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required.
Credit 3 units. Art: FAAM EN: H

F20 ART 114G Sculpture: Wood
Same as F20 214G, 314G, 414G - First-year students (only) register for F20 114G. This course is an introduction to the basic principles of wood sculpture with an emphasis on furniture making.
Credit 3 units. Art: FAAM EN: H

F20 ART 114H Sculpture: Blacksmithing
Same as F20 214H, 314H, 414H - First-year students (only) register for F20 114H. This course is an introduction to Blacksmithing materials, tools, and techniques. Students will explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for three-dimensional form. In this class, we will explore these possibilities and expand our sculptural vocabulary.
Credit 3 units. Art: FAAM EN: H

F20 ART 114I Sculpture: Metal Fabrication
Same as F20 214I, 314I, 414I - First-year students (only) register for F20 114I. Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be plastically deformed to create compound shapes or it can be connected to most any other material. Students will explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines as well as the safe operation of drilling, grinding and finishing tools.
Credit 3 units. Art: FAAM

F20 ART 115 Printmaking
Same as F20 215, 315, 415. First-year students (only) register for F20 115. Survey of printmaking covering basic processes in intaglio, lithography, relief, and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical, and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.
Credit 3 units. Art: FAAM EN: H

F20 ART 116 Printmaking
Same as F20 216, 316, 416. First-year students (only) register for F20 116. Survey of printmaking covering basic processes in intaglio, lithography, relief and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.
Credit 3 units. Art: FAAM EN: H

F20 ART 117M Architecture Through the Photographic Lens
Same as F20 217M, 317M, 417M - First-year students (only) register for F20 117M. Photography offers ways of seeing and representing the world around us. This course provides technical and conceptual frameworks for understanding architectural space as seen through the camera. Topics include building as site, landscape as context, and the architectural model as a representation tool. Students are introduced to a wide range of artists and architects, helping build a unique camera language to support their individual projects. Students will learn DSLR camera basics, fundamentals of Photoshop, digital printing techniques and studio lighting for documenting architectural models. The course assumes no prior experience with digital imaging technologies or materials. Digital camera required. No prerequisite
Credit 3 units. Art: FAAM

F20 ART 117N Contemporary Portraiture
Same as F20 217N, 317N, 417N - First-year students (only) register for F20 117N. Historically, portraits were painted of the royal or wealthy to document an accurate likeness and display status and power. However, with the advent of photography, artists were freed to develop interpretations in style, process and medium. With subjects such as family, friends, strangers, celebrities, or self, the portrait has been used to reflect culture, identity, and the relationship between the artist and sitter. Issues of race, sexuality, gender, vanity and status continue to be relevant to contemporary practice. Primarily a drawing class, students combine the study of contemporary portrait artists with a studio practice that encourages development of a unique voice. Students consider how pose, gesture, lighting and other factors work together to support their intentions. Initial assignment prompts progress to guided, independent pursuits. Students will be encouraged to experiment with image, materials, and processes. Live models will be used as well as other source material.
Credit 3 units. Art: FAAM

F20 ART 1183 Digital Photography
Only undergraduates register for F20 1183. Graduate students register for F20 4183. This introductory level course will explore digital technology for capturing, enhancing and producing still lens-based images. The course will address basic digital camera
operations, the visual language of camera-generated images, computer workflow and the connoisseurship of digital image output. The course assumes no prior knowledge or experience with digital imaging technologies or materials. Students must provide a digital camera.
Credit 3 units. Art: FAAM EN: H

**F20 ART 1184 Digital Photo II/Digital Imaging**
Only undergraduates register for F20 1184. Graduate students register for F20 4184. This course will address the use of technology and pixel-based software for generating, manipulating, and compositing still digital images. The course will examine the visual language and poetics of additive lens-based images while providing students with knowledge of software tools, input devices, production techniques, color management strategies, and output devices.
Credit 3 units. Art: FAAM EN: H

**F20 ART 1185 Kinetic Image/Digital Video**
Only undergraduates register for F20 1185. Graduate students register for F20 4185. This introductory level course will address the use of digital technology and software for capturing, editing, and producing moving images. The course will examine the visual language and poetics of moving images while providing students with foundation knowledge of camera operations, production storyboarding, software tools, and presentation strategies. The course assumes no prior knowledge or experience with kinetic imaging technologies or software.
Credit 3 units. Art: FAAM EN: H

**F20 ART 1186 Black-and-White Photography**
Only undergraduates register for F20 1186. Graduate students register for F20 4186. Introduction to the fundamentals of black and white photography. Emphasis on control of film, paper, and black and white photographic processes in the classical fine arts tradition. Topics may include portrait, landscape, street photography, the figure and contemporary issues in photography.
Credit 3 units. Art: FAAM EN: H

**F20 ART 1187 Black-and-White Photography II**
Only undergraduates register for F20 1187. Graduate students register for F20 4187. Course adds to the experience of F20 1186 Black-and-White Photography. Students investigate phenomena relative to the camera and photography. Students develop the vision necessary to take intelligent and articulate photographs, as well as establish the notion of high craft in terms of the negative and the print. Topics may include portrait, landscape, street photography, the figure, and the photo story.
Credit 3 units. Art: FAAM

**F20 ART 119 Ceramics**
Same as F20 219, 319, 419 - First-year students (only) register for F20 119. An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students will be introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual's level.
Credit 3 units. Art: FAAM EN: H

**F20 ART 120 Ceramics**
Same as F20 220, 320, 420. First-year students (only) register for F20 120. An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students will be introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual's level.
Credit 3 units. Art: FAAM EN: H

**F20 ART 125I Making Comics**
Same as F20 225I, 325I, 425I - First-year students (only) register for F20 125I. From hieroglyphics to newspapers, drawn pictures in sequence have told stories for thousands of years. This course is an introduction to writing and drawing short form comics. In readings and discussion, students will explore a wide variety of genres and visual approaches to comics. Through exercises and assignments students will learn how to make clear and evocative comics. All skill levels of drawing experience are acceptable.
Credit 3 units. Art: FADM

**F20 ART 127A History of Photography**
Same as F20 227A, 327A, 427A - First-year students (only) register for F20 127A. Survey of the history of photography and a look at the medium form the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.
Credit 3 units. Art: FAAM EN: H

**F20 ART 128A History of Photography**
Same as F20 228A, 328A, 428A - First-year students (only) register for F20 128A. survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.
Credit 3 units. Art: FAAM EN: H

**F20 ART 133 Basic Illustration**
Same as F20 233, 333, 433 - First-year students (only) register for F20 133. An introduction to concepts, media techniques, and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented. Students can work by hand or on the computer. Traditional drawing skills not required.
Credit 3 units. Art: FADM EN: H

**F20 ART 134 Basic Illustration**
Same as F20 234, 334, 434. First-year students (only) register for F20 134. An introduction to the concepts, media and problem-solving methods of contemporary illustration. Projects involve image development for applications such as book illustration, iconic/logo illustration, product development and information graphics. Students can work by hand or on the computer. Traditional drawing skills not required.
Credit 3 units. Art: FADM EN: H

**F20 ART 135G The Licensed Image: Development and Distribution**
Same as F20 235G, 335G, 435G - First-year students (only) register for F20 135G. An introduction to the concept and image
development, design, market distribution and methodology for creating licensed products. Projects will involve product idea development, market and the development of image driven products using images, design and writing. Traditional drawing skills not required. Students can work by hand or on the computer. Ideal course for students whose work focuses on images and those interested in developing visual products, including business students.
Credit 3 units. Art: FADM EN: H

F20 ART 135I Communication Design I
Same as F20 235I, 335I, 435I. First-year students (only) register for F20 135I. An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students will be exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas will be discussed. An excellent introduction to the subject as a tool for business and marketing.
Credit 3 units. Art: FADM EN: H

F20 ART 135J Introduction to Animating in Three Dimensions
Same as F20 235J, 335J, 435J. First-year students (only) register for F20 135J. This course explores 3D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag, and character-driven content. Cinematic shot design, timing, character design, and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisites: F10 101 (Drawing) or equivalent or permission of instructor.
Credit 3 units. Art: FADM EN: H

F20 ART 135O Drawing as Thinking
Same as F20 235O, 335O, 435O. First-year students (only) register for F20 135O. This studio course explores symbolic drawing as a practical tool for learning and communication, used as it has been for millennia for the acquisition and transmission of knowledge, for idea generation and formation, and for visual storytelling. Students will observe and describe phenomena, conceive systems, construct diagrams, design processes, and convey instructions, all using drawing as an aid to discovery, thought and communication. Tools and media may include pencils, brushes, wooden sticks, markers, painter’s tape, laser pointers, and amateur surveying software, etc. In some cases, digital tools will be used to produce and present student projects. The course will include relevant readings and discussions. Throughout we will distinguish between symbolic uses of drawing and illusionistic ones, focusing on the former.
Credit 3 units.

F20 ART 1361 Advertising I
Same as F20 2361, 3361, 4361. First-year students (only) register for F20 1361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary.
Credit 3 units. Art: FADM EN: H

F20 ART 1362 Advertising I
Same as F20 2362, 3362, 4362. First-year students (only) register for F20 1362. This studio course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting.
Credit 3 units. Art: FADM EN: H

F20 ART 1363 Advertising in the Digital Age
Same as F20 2363, 3363, 4363. First-year students (only) register for F20 1363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We will identify and study “game changing” developments in advertising communications; changing dynamics in audience behavior — including the ability to “opt out”; the advertising industry’s adaptation to digital technologies; and finally, we’ll speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one.
Credit 3 units. Art: FADM EN: H

F20 ART 1364 Advertising in the Digital Age
Same as F20 2364, 3364, 4364. First-year students (only) register for F20 1364. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We will identify and study “game changing” developments in advertising communications; changing dynamics in audience behavior — including the ability to “opt out”; the advertising industry’s adaptation to digital technologies; and finally we’ll speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one.
Credit 3 units. Art: FADM EN: H

F20 ART 1365 History of Advertising
Same as F20 2365, 3365, 4365. First-year students (only) register for F20 1365. The historical, cultural and technological development of advertising in America from the colonial period to the present. This course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects.
Credit 3 units. Art: FADM EN: H
F20 ART 1366 History of Advertising
Same as F20 236E, 336E, 436E - First-year students (only) register for F20 136E. The historical, cultural and technological development of advertising in America from the colonial period to the present. This lecture course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects. Grading is based on midterm and final exams as well as optional, extra-credit five page essays. No prerequisites. This course counts in the communication design minor. Credit 3 units. Art: FADM EN: H

F20 ART 136G The Licensed Image: Development and Distribution
Same as F20 236G, 336G, 436G. First-year students (only) register for F20 136G. An introduction to the concept and image development, design, market distribution and methodology for creating licensed products. Projects will involve product idea development, market and the development of image-driven products using images and design. Traditional drawing skills not required. Students can work by hand or on the computer. Ideal course for students whose work focuses on images and those interested in developing visual products, including business students. Credit 3 units. Art: FADM EN: H

F20 ART 136J Introduction to Animating in Three Dimensions
Same as F20 236J, 336J, 436J. First-year students (only) register for F20 136J. This course explores 3D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag, and character-driven content. Cinematic shot design, timing, character design, and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisites: Drawing or equivalent or permission of instructor. Credit 3 units. Art: FADM EN: H

F20 ART 136K Communication Design II
Same as F20 236K, 336K, 436K. First-year students (only) register for F20 136K. Building on the fundamentals of Communication Design I, this course will offer students the opportunity solve more complex visual communication problems. Information design (explanatory graphics and charts), multiple sequences (book/magazine design) and persuasion (advertising/propaganda) will be some of the topics covered. Various methodologies for defining problems, generating ideas, exploring possible visual solutions and evaluating work-in-progress and finished designs from the previous course, will be reinforced. This course will introduce students to a range of media, including digital and alternative forms. Emphasis will be placed on finding visually compelling solutions, no matter the media. The computer will be used as a tool to assemble and refine. Students will be encouraged to use online tutorials to augment in class instruction. Prerequisite: Communication Design I. Credit 3 units. Art: FADM EN: H

F20 ART 136J Advanced Animation
Same as F20 236J, 336J, 436J. First-year students (only) register for F20 136J. This course focuses on completing a short animated film as a group project utilizing a workflow similar to that used in the animated feature film industry. The class will first develop a story. Individuals will then be assigned tasks according to strong areas of interest to create a storyboard and animatic. Key moments will be identified to be animated first. Once agreed on, students will be able to choose to work in various parts of the pipeline including Character Design; Layout and Set Design; 3D modeling; Rigging; Animation; Textures; Special Effects; Sound; Rendering and Editing. Finally, it is all put together as a short. This is an advanced course that assumes some experience in Maya or similar 3D program, or for those who have already developed skills in any form of animation. Prerequisite: Introduction to Animating in Three Dimensions or permission of instructor. Credit 3 units. Art: FADM EN: H

F20 ART 143B Fiber Manipulation
Same as F20 243B, 343B and 443B - First-year students (only) register for F20 143B. Exploration of fiber techniques and their application in design and art. Students will study a spectrum of fiber and textile treatments such as surface design, shibori, wax resist, digital design, needle applications, heat applications and a variety of three-dimensional structuring strategies. Projects will integrate techniques into appropriate design strategy for the fine arts or design. Credit 3 units. Art: FADM

F20 ART 1713 Introduction to Book Binding
Same as F20 2713, 3713, 4713. First-year students (only) register for F20 1713. This class will serve as an introduction to the book as artifact of material culture. A variety of traditional and non-traditional book structures will be explored. Students will learn from historical approaches to constructing the codex form including the single signature pamphlet, the multi-signature case binding, the coptic, and the medieval long stitch. Students will learn Japanese binding and its many variations. Several contemporary variations will be introduced, including the tunnel, the flag book, the accordion and the carousel. Students will explore the visual book using found imagery and photocopy transfers, and will produce a variety of decorated papers to be used in their bindings. Credit 3 units. Art: FADM EN: H
F20 ART 1714 Introduction to Book Binding
Same as F20 2714, 3714, 4714. First-year students (only) register for F20 1714. This class will serve as an introduction to the book as artifact of material culture. A variety of traditional and non-traditional book structures will be explored. Students will learn from historical approaches to constructing the codex form including the single signature pamphlet, the multi-signature case binding, the coptic, and the medieval long stitch. Students will learn Japanese binding and its many variations. Several contemporary variations will be introduced, including the tunnel, the flag book, the accordion and the carousel. Students will explore the visual book using found imagery and photocopy transfers, and will produce a variety of decorated papers to be used in their bindings. Credit 3 units. Art: FAAM EN: H

F20 ART 211 Painting
Same as F20 111, 311, 411. Sophomores (only) register for F20 211. Introduction to painting processes and materials. While there is emphasis on oil painting, students are also introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model. Technical skills and content are dealt with at the individual student's level. Credit 3 units. Art: FAAM EN: H

F20 ART 211T The Poetics of Image-Making: People, Place & Space
This painting elective course examines the poetics of image-making, with a focus on the representation of people, place, and space, both observed and invented. Students learn the practice of painting and develop works through fundamental exercises as well as through the shared exploration of painting processes. Work outside of class for the beginner is project-based; advanced students produce an independent body of work. Critical assessment of work is complemented by faculty and peer discussions, readings, and field study. Required text: "The Poetics of Space" by Gaston Bachelard. Credit 3 units.

F20 ART 212 Painting
Same as F20 112, 312, 412. Sophomores (only) register for F20 212. This course is an introduction to oil painting with an emphasis on the principles of color, construction and paint handling. Students will explore the possibilities of representational painting as applied to still-life, interiors, landscape and the human figure. The course is designed especially for beginning painters but can accommodate painters at all levels of proficiency. Credit 3 units. Art: FAAM EN: H

F20 ART 213F Sculpture: Foundry
Same as F20 113F, 313F, 413F - Sophomores (only) register for F20 213F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students will learn mold making, direct organic burnout, ceramic shell investment, metal chasing, and patination in order to create finished sculpture. In addition to metal casting, students will use other materials such as plaster, resin, steel, wood, rubber, plastic, and foam to create a mixed media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. Credit 3 units. Art: FAAM EN: H

F20 ART 213G Sculpture: Wood
Same as F20 113G, 313G, 413G - Sophomores (only) register for F20 213G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. Credit 3 units. Art: FAAM EN: H

F20 ART 213H Sculpture: Blacksmithing
Same as F20 113H, 313H, 413H - Sophomores (only) register for F20 213H. This course is an introduction to blacksmithing materials, tools and techniques. Students will explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for three-dimensional form. In this class we will explore these possibilities and expand our sculptural vocabulary. Credit 3 units. Art: FAAM EN: H

F20 ART 213I Sculpture: Metal Fabrication
Same as F20 113I, 313I, 413I - Sophomores (only) register for F20 213I. Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be plastically deformed to create compound shapes or it can be connected to most any other material. Students will explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines as well as the safe operation of drilling, grinding and finishing tools. Credit 3 units. Art: FAAM EN: H

F20 ART 214F Sculpture: Foundry
Same as F20 114F, 314F, 414F - Sophomores (only) register for F20 214F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students will learn mold making, direct organic burnout, ceramic shell investment, metal chasing, and patination in order to create finished sculpture. In addition to metal casting, students will use other materials such as plaster, resin, steel, wood, rubber, plastic, and foam to create a mixed media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. Credit 3 units. Art: FAAM EN: H

F20 ART 214G Sculpture: Wood
Same as F20 114G, 314G, 414G - Sophomores (only) register for F20 214G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. Credit 3 units. EN: H

F20 ART 214H Sculpture: Blacksmithing
Same as F20 114H, 314H, 414H - Sophomores (only) register for F20 214H. This course is an introduction to Blacksmithing materials, tools, and techniques. Students will explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for three-dimensional form. In this class we will explore these possibilities and expand our sculptural vocabulary. Credit 3 units. EN: H
F20 ART 214I Sculpture: Metal Fabrication  
Same as F20 114I, 314I, 414I - Sophomores (only) register for F20 214I. Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be plastically deformed to create compound shapes or it can be connected to most any other material. Students will explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines as well as the safe operation of drilling, grinding and finishing tools.  
Credit 3 units. EN: H

F20 ART 215 Printmaking  
Same as F20 115, 315, 415. Sophomores (only) register for F20 215. Survey of printmaking covering basic processes in intaglio, lithography, relief, and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical, and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.  
Credit 3 units. Art: FAAM EN: H

F20 ART 215F Printmaking: Call and Response  
In music, a call and response is a succession of two distinct phrases usually written in different parts of the music, where the second phrase is heard as a direct commentary on or in response to the first. Printmaking: Call and Response is a survey of printmaking with a foundation in traditional, historical, and philosophical aspects of printmaking. It will cover basic processes in intaglio, lithography, relief, and monotype. Students are encouraged to work in response to the history of the print, with an emphasis on mixed media and experimentation. This class counts for the minor in art.  
Credit 3 units.

F20 ART 216 Printmaking  
Same as F20 116, 316, 416. Sophomores (only) register for F20 216. Survey of printmaking covering basic processes in intaglio, lithography, relief and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.  
Credit 3 units. Art: FAAM EN: H

F20 ART 217M Architecture Through the Photographic Lens  
Same as F20 117M, 317M, F20 417M - Sophomores (only) register for F20 217M. Photography offers ways of seeing and representing the world around us. This course provides technical and conceptual frameworks for understanding architectural space as seen through the camera. Topics include building as site, landscape as context, and the architectural model as a representation tool. Students are introduced to a wide range of artists and architects, helping build a unique camera language to support their individual projects. Students will learn DSLR camera basics, fundamentals of Photoshop, digital printing techniques and studio lighting for documenting architectural models. The course assumes no prior experience with digital imaging technologies or materials. Digital camera required.  
Credit 3 units. Art: FAAM

F20 ART 217N Contemporary Portraiture  
Same as F20 117N, 317N, and 417N. Sophomores (only) register for F20 217N. Historically, portraits were painted of the royal or wealthy to document an accurate likeness and to display status and power. However, with the advent of photography, artists were freed to develop interpretations in style, process, and medium. With subjects such as family, friends, strangers, celebrities, or self, the portrait has been used to reflect culture, identity, and the relationship between the artist and the sitter. Issues of race, sexuality, gender, vanity, and status continue to be relevant to contemporary practice. This is primarily a drawing class, and students combine the study of contemporary portrait artists with a studio practice that encourages the development of a unique voice. Students consider how pose, gesture, lighting, and other factors work together to support their intentions. Initial assignment prompts progress to guided, independent pursuits. Students will be encouraged to experiment with image, materials, and processes. Live models will be used as well as other source material.  
Credit 3 units. Art: FAAM

F20 ART 217Q Drone Photography  
This combination studio and discussion-based course examines the use of small unmanned aerial systems (sUAS) — otherwise known as drones — as a photographic medium. Studio sessions will introduce students to sUAS operation, various editing platforms, and output strategies. Lecture and discussion sessions will examine FAA regulations, the ethical implications of sUAS use by visual artists, and the rise of sUAS in the visual arts within the context of the history of aerial photography. All students will produce a body of work using drone capture as the primary medium. In order to ensure equal access to sUAS, students will be required to meet outside of class sessions.  
Credit 3 units.

F20 ART 217P Drone Photography  
This combination studio and discussion-based course examines the use of small unmanned aerial systems (sUAS) — otherwise known as drones — as a photographic medium. Studio sessions will introduce students to sUAS operation, various editing platforms, and output strategies. Lecture and discussion sessions will examine FAA regulations, the ethical implications of sUAS use by visual artists, and the rise of sUAS in the visual arts within the context of the history of aerial photography. All students will produce a body of work using drone capture as the primary medium. In order to ensure equal access to sUAS, students will be required to meet outside of class sessions.  
Credit 3 units. EN: H

F20 ART 217Q Context, Curation, Communication: Seriatity in the Photographic Image  
Series and sequences are the prevalent method for exhibiting photographic images. Through assignment-based and self-generated projects, students discover how photographic series are conceptualized, structured, and sequenced. Special attention is given to the material meaning embedded in print size, order, and spatial placement. The course provides in-depth coverage of image capture through medium-format analog and full-frame digital systems as well as intermediate digital editing and printing techniques. Students also explore various documentary and setup strategies through narrative and non-narrative photographic approaches. Through a rigorous critique structure, course readings, and critical writing, students engage
the historical discourse surrounding the series as a tool for artistic expression.
Credit 3 units.

F20 ART 219 Ceramics
Same as F20 119, 319, 419 - Sophomores (only) register for F20 219. An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students will be introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual's level.
Credit 3 units. Art: FAAM EN: H

F20 ART 220 Ceramics
Same as F20 120, 320, 420. Sophomores (only) register for F20 220. An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students will be introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual's level.
Credit 3 units. Art: FAAM EN: H

F20 ART 223F Special Topics in Fashion Design (Fashion Design: Collaboration Studio)
Same as F20 323F, F20 423F - Sophomores (only) register for F20 223F. University collaboration course with Fashion Design, Occupational Therapy, Mechanical Engineering and Business to develop design proposals and prototypes for specific customer profiles. Teams of students from different majors will design for various community and industry partners. They will work to solve an apparel or accessory design problem with innovative new concepts. The team will consider the person's lifestyle, occupation, and environmental factors that influence a design's functionality. A client-centered approach is used. Students will be evaluated on how well the design proposal meets the expressed aesthetic and functional needs of the client. Prerequisites: Introduction to Fashion Design.
Credit 3 units. Art: CPSC, FADM

F20 ART 223K Business of Fashion
This seminar course is an academic analysis of the business of fashion that focuses on the following: marketing fashion products, consumer behavior, brand development, markets, promotion/distribution, and attention to emerging technologies. Students will study fashion merchandising and product development, including seasonal deliveries, line development, basic costing practices, and retail math. Case studies will engage students in current fashion business practices. Open to all students.
Credit 3 units.

F20 ART 223L Special Topics in Fashion Design: Fashion and Race
Same as F20 323L, 423L - Sophomores (only) register for F20 223L. Is the fashion industry racist? This seminar course unpacks this contemporary inquiry by decentralizing fashion history to take a critical look at how racial identities are formed and performed, how historical stereotypes are perpetuated, and how theories of representation can be situated within the system of fashion. Students will use theoretical texts on race and representation to read contemporary media surrounding fashion and race (editorials, articles, social media), as well as gain an introduction to recently published research by scholars engaging fashion and race. Not only will students walk away with a richer understanding of how to critically think through race in fashion, but also how doing so gives us a new approach to think through race within a larger system.
Credit 3 units. Art: CPSC, FADM

F20 ART 225i Making Comics
Same as F20 125i, 325i, F20 425i - Sophomores (only) register for F20 225i. From hieroglyphics to newspapers, drawn pictures in sequence have told stories for thousands of years. This course is an introduction to writing and drawing short form comics. In readings and discussion, students will explore a wide variety of genres and visual approaches to comics. Through exercises and assignments students will learn how to make clear and evocative comics. All skill levels of drawing experience are acceptable.
Credit 3 units. Art: FADM

F20 ART 225J Sculpting Realities
This course investigates new digital technologies — particularly mixed, augmented, and virtual reality — through the consideration of one critical question: “What does it mean to be real?” Students will learn the basics for making works of art, design, and architecture in alternative realities through 3D scanning, 3D modeling, and immersive world building. In addition to tutorials and multidisciplinary collaborative studio projects, students will investigate issues of reality and the use of alternative reality tools through readings, discussions, presentations, and other dialogues. The semester will culminate in a final project that translates a physical experience or artifact into a digital one.
Credit 3 units.

F20 ART 227A History of Photography
Same as F20 127A, 327A, F20 427A - Sophomores (only) register for F20 227A. Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.
Credit 3 units. Art: CPSC, FADM

F20 ART 228A History of Photography
Same as F20 128A, 328A, F20 428A - Sophomores (only) register for F20 228A. Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.
Credit 3 units. Art: CPSC, FADM

F20 ART 229F Tale of Two Cities: Documenting Our Divides
The metropolitan St. Louis area has become the nation's symbol of modern segregation erupting into urban unrest and violence foiled against nonviolent direct-action interventions, youth-driven social protests and grassroots revitalization. With the assistance of a faculty seed grant from the Divided City Initiative, in partnership with the Center for the Humanities in Arts & Sciences and the Mellon Foundation, Tale of Two Cities: Documenting Our Divides will bring together students working in transdisciplinary teams to create documentary videos of street...
events, meetings and interviews that capture the immediacy of this historical moment. Students will partner and engage with a local nonprofit organization, grassroots movement or religious institution. Topics can include personal and/or institutional issues of a "divided city" that are exacerbated by race, gender, economic status, sexual orientation or geography. Successful completion of this course involves researching and creating a short video with a distinctive perspective and point of view that will draw upon the team's collaborative voices from history, performing arts, economics, law, social work, African-American studies, architecture and art. Skills will be developed in the fundamentals of story development, video and audio-capture in the field, editing with Adobe Premier and archival preservation. No prerequisites.

Same as IS2 INTER D 329F

F20 ART 233 Basic Illustration
Same as F20 133, 333, 433. Sophomores (only) register for F20 233. An introduction to concepts, media techniques, and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented. Students can work by hand or on the computer. Traditional drawing skills not required.
Credit 3 units. Art: FADM EN: H

F20 ART 234 Basic Illustration
Same as F20 134, 334, 434. Sophomores (only) register for F20 234. An introduction to the concepts, media and problem-solving methods of contemporary illustration. Projects involve image development for applications such as book illustration, iconic/logo illustration, product development and information graphics. Students can work by hand or on the computer. Traditional drawing skills not required.
Credit 3 units. Art: FADM EN: H

F20 ART 235A Interaction Design: Applications for Public Health
Same as F20 135A, 335A, 435A. Sophomores (only) register for F20 235A. Through a blend of presentations from practitioners, classroom lectures, readings, discussion and hands-on exercises, this class will engage principles and methods of interaction design within the context of health challenges. Broadly defined, interaction design is the practice of designing products, environments, systems, and services with a focus on behavior and user experience. We will take on an in-depth challenge in an area such as transportation or community health resources and work in cross-disciplinary design teams with an external partner organization. Students will gain experience in planning and executing a human-centered design process featuring research, ideation, synthesis, concept development, prototypes and a final presentation, which may include visual design, animation, and sound. Students will work in teams to develop several intermediate project deliverables, such as prototypes and sketches. No prior course work is necessary though experience with Adobe Photoshop, Illustrator and InDesign are helpful.
Credit 3 units. EN: H

F20 ART 235G The Licensed Image: Development and Distribution
Same as F20 135G, 335G, 435G. Sophomores (only) register for F20 235G. An introduction to the concept and image development, design, market distribution and methodology for creating licensed products. Projects will involve product idea development, market and the development of image-driven products using images and design. Traditional drawing skills not required. Students can work by hand or on the computer. Ideal course for students whose work focuses on images and those interested in developing visual products, including business students.
Credit 3 units. Art: FADM EN: H

F20 ART 235I Communication Design I
Same as F20 135I, 335I, 435I. Sophomores (only) register for F20 235I. An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students will be exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas will be discussed. An excellent introduction to the subject as a tool for business and marketing.
Credit 3 units. Art: FADM EN: H

F20 ART 235J Introduction to Animating in Three Dimensions
Same as F20 135J, 335J, 435J. Sophomores (only) register for F20 235J. This course explores 3D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag, and character-driven content. Cinematic shot design, timing, character design, and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisites: Drawing or equivalent or permission of instructor.
Credit 3 units. Art: FADM EN: H

F20 ART 235O Drawing as Thinking
Same as F20 125O, 325O, 425O - Sophomores (only) register for F20 225O. This studio course explores symbolic drawing as a practical tool for learning and communication, used as it has been for millennia for the acquisition and transmission of knowledge, for idea generation and formation, and for visual storytelling. Students will observe and describe phenomena, conceive systems, construct diagrams, design processes, and convey instructions, all using drawing as an aid to discovery, thought and communication. Tools and media may include pencils, brushes, wooden sticks, markers, painter's tape, laser pointers, and amateur surveying software, etc. In some cases, digital tools will be used to produce and present student projects. The course will include relevant readings and discussions. Throughout we will distinguish between symbolic uses of drawing and illusionistic ones, focusing on the former.
Credit 3 units.

F20 ART 2361 Advertising I
Same as F20 1361, 3361, 4361. Sophomores (only) register for F20 2361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns.
F20 ART 2362 Advertising I
Same as F20 1362, 3362, 4362. Sophomores (only) register for F20 2362. This studio course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary.
Credit 3 units. Art: FADM EN: H

F20 ART 2363 Advertising in the Digital Age
Same as F20 ART 1363, ART 3363, ART 4363. Sophomores (only) register for F20 2363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study "game changing" developments in advertising communications; changing dynamics in audience behavior — including the ability to "opt out"; the advertising industry's adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one.
Credit 3 units. Art: FADM EN: H

F20 ART 2364 Advertising in the Digital Age
Same as F20 1364, 3364, 4364. Sophomores (only) register for F20 2364. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We will identify and study "game changing" developments in advertising communications; changing dynamics in audience behavior — including the ability to "opt out"; the advertising industry's adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one.
Credit 3 units. Art: FADM EN: H

F20 ART 2365 History of Advertising
Same as F20 1365, F20 3365, F20 4365. Sophomores (only) register for F20 2365. The historical, cultural and technological development of advertising in America from the colonial period to the present. This lecture course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects. Grading is based on midterm and final exams as well as optional, extra-credit five page essays. No prerequisites. This course counts in the communication design minor.
Credit 3 units. Art: FADM

F20 ART 2366 History of Advertising
Same as F20 1366, 3366, 4366 - Sophomores (only) register for F20 2366. The historical, cultural and technological development of advertising in America from the colonial period to the present. This lecture course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects. Grading is based on midterm and final exams as well as optional, extra-credit five page essays. No prerequisites. This course counts in the communication design minor.
Credit 3 units. Art: FADM EN: H

F20 ART 236A Interaction Design: Understanding Health and Well-Being
Same as F20 336A, 436A - Sophomores (only) register for F20 236A. Through a blend of presentations from practitioners, classroom lectures, readings, discussion and hands-on exercises, this class will engage principles and methods of interaction design within the context of health challenges. Broadly defined, interaction design is the practice of designing products, environments, systems, and services with a focus on behavior and user experience. We will take on an in-depth challenge in the area of health and well-being and work in cross-disciplinary design teams with an external partner organization. Students will gain experience in planning and executing a human-centered design process featuring research, ideation, synthesis, concept development, prototypes and a final presentation, which may include visual design, animation, and sound. Students will work in teams to develop several intermediate project deliverables, such as prototypes and sketches. No prior course work is necessary though experience with Adobe Photoshop, Illustrator and InDesign are helpful.
Credit 3 units. Art: CPSC, FADM EN: H

F20 ART 236G The Licensed Image: Development and Distribution
Same as F20 136G, 336G, 436G. Sophomores (only) register for F20 236G. An introduction to the concept and image development, design, market distribution and methodology for creating licensed products. Projects will involve product idea development, market and the development of image-driven products using images and design. Traditional drawing skills not required. Students can work by hand or on the computer. Ideal course for students whose work focuses on images and those interested in developing visual products, including business students.
Credit 3 units. Art: FADM EN: H

F20 ART 236I Communication Design I
Same as F20 136I, 336I, 436I. Sophomores (only) register for F20 236I. Students are introduced to the fundamentals of communication design. Through studio exercises and lectures, students are exposed to a broad range of conceptual, aesthetic and strategic issues in the field. The course explores principles of two-dimensional design, typography, and the relationship of text and image in order to persuade and inform. It helps students to learn a design methodology for illuminating and solving problems and provides baseline training in the Adobe Suite. Upon completion of this course, students will be able to design basic projects and have criteria to provide an informed evaluation of the effectiveness of a given design. It provides an introduction to design as a tool for business and marketing.
Credit 3 units. Art: FADM EN: H
F20 ART 236J Introduction to Animating in Three Dimensions
Same as F20 136J, 336J, 436J. Sophomores (only) register for F20 236J. This course explores 3D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag, and character-driven content. Cinematic shot design, timing, character design, and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisites: Drawing or equivalent or permission of instructor. Credit 3 units. Art: FADM EN: H

F20 ART 236K Communication Design II
Same as F20 136K, 336K, 436K. Sophomores (only) register for F20 236K. Building on the fundamentals of Communication Design I, this course will offer students the opportunity to solve more complex visual communication problems. Information design (explanatory graphs and charts), multipage sequences (book/magazine design) and persuasion (advertising/propaganda) will be some of the topics covered. Various methodologies for defining problems, generating ideas, exploring possible visual solutions and evaluating work-in-progress and finished designs from the previous course, will be reinforced. This course will introduce students to a range of media, including digital and alternative forms. Emphasis will be placed on finding visually compelling solutions, no matter the media. The computer will be used as a tool to assemble and refine. Students will be encouraged to use online tutorials to augment in class instruction. Prerequisite: Communication Design I. Credit 3 units. Art: FADM EN: H

F20 ART 238J Advanced Animation
Same as F20 138J, 338J, 438J. Sophomores (only) register for F20 238J. This course focuses on completing a short animated film as a group project utilizing a workflow similar to that used in the animated feature film industry. The class will first develop a story. Individuals will then be assigned tasks according to strong areas of interest to create a storyboard and animate key moments will be identified to be animated first. Once agreed on, students will be able to choose to work in various parts of the pipeline including Character Design; Layout and Set Design; 3D modeling; Rigging; Animation; Textures; Special Effects; Sound; Rendering and Editing. Finally, it is all put together as a short. This is an advanced course that assumes some experience in Maya or similar 3D program, or for those who have already developed skills in any form of animation. Prerequisite: Introduction to Animating in Three Dimensions or permission of instructor. Credit 3 units. Art: FADM EN: H

F20 ART 239J Radical Design: Making Civic Experiences
Same as F20 339J and 439J. Sophomores (only) register for F20 239J. As we innovate rapidly in technology and communication, the economic and political structures that govern us have become largely assumed and unchallenged. This course explores the daily objects, interactions, and spaces that make up these large systems (like a police ticket or the layout of a courtroom), and it experiments with how redesigning these elements can help us question the status quo. Building on diverse political mindsets and current trends, we will imagine fictional worlds and craft the objects, procedures, and interactions that inhabit them. Along the way, we will discuss the value of designing for fundamental change alongside more incremental reform. Required class time will also include at least one additional in-class studio hour per week, to be determined based on students’ schedules. Credit 3 units. Art: CPSC, FADM EN: H

F20 ART 241E Digital Game Design
Designing a digital game that is both entertaining and usable requires understanding principles of user interface, game theory, and visual design. In this course, students will be introduced to basic game design strategy and practice in the development of their own game projects. Using both paper and the digital screen as canvases for design, students will explore gameplay iterations and create visual components. No prior experience in visual design, coding, or digital games is necessary. Credit 3 units.

F20 ART 251A Sound Environments
This course explores sound and musical composition in a digital format, functioning as a sculptural, spatial, psychological, and architectural intervention. The course offers an introduction to current sound art practices and examines how sound projects are capable of altering our sense of space and time. Sonic space necessarily touches upon experimental music and installation art as closely related to sound art. The course introduces students to basic methods of sound recording and editing software and hardware, with the goal of composing sound works for space and for headphones. Readings pertaining to current developments in contemporary experimental music and sound art as well as regular writing assignments accompany the course. Credit 3 units.

F20 ART 2647 Italian Language (Florence)
This course covers Italian grammar and conversation for study abroad students in Florence. Taught entirely in Italian. There is an emphasis on class participation accompanied by readings and writings. The student develops facility speaking the language on an everyday basis. Credit 3 units.

F20 ART 2648 Italian Language
This course covers Italian grammar and conversation for study abroad students in Florence. Taught entirely in Italian. There is an emphasis on class participation accompanied by readings and writings. The student develops facility speaking the language on an everyday basis. Credit 3 units. EN: H

F20 ART 2661 Semester Abroad Program Seminar
This course prepares students participating in the Sam Fox School’s Semester Abroad Programs. The seminar meets eight times over the course of the semester. Attendance is mandatory for students going abroad. Prerequisite: College of Art and College of Architecture students selected for the Sam Fox School Abroad Programs. Credit 1 unit. EN: H

F20 ART 2662 Semester Abroad Program Seminar
This course prepares students participating in the College of Art’s Semester Abroad Program in Florence, Italy. The seminar
meets eight times over the course of the semester. Attendance is required. Prerequisite: students selected for the Semester Abroad Program only.
Credit 1 unit. EN: H

F20 ART 2713 Introduction to Book Binding
Same as F20 1713, 3713, 4713. Sophomores (only) register for F20 2713. This class will serve as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures will be explored. Students will learn from historical approaches to constructing the codex form including the single signature pamphlet, the multi-signature case binding, the coptic, and the medieval long stitch. Students will learn Japanese binding and its many variations. Several contemporary variations will be introduced, including the tunnel, the flag book, the accordion and the carousel. Students will explore the visual book using found imagery and photocopy transfers, and will produce a variety of decorated papers to be used in their bindings. Credit 3 units. Art: FADM EN: H

F20 ART 2714 Introduction to Book Binding
Same as F20 1714, 3714, 4714. Sophomores (only) register for F20 2714. This class will serve as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures will be explored. Students will learn from historical approaches to constructing the codex form including the single signature pamphlet, the multi-signature case binding, the coptic, and the medieval long stitch. Students will learn Japanese binding and its many variations. Several contemporary variations will be introduced, including the tunnel, the flag book, the accordion and the carousel. Students will explore the visual book using found imagery and photocopy transfers, and will produce a variety of decorated papers to be used in their bindings. Credit 3 units. Art: FADM EN: H

F20 ART 2783 Special Topics in Visual Culture: Introduction to Illustration Studies
How have knowledge, opinion, and feeling been communicated visually from the advent of automated printing presses to the invention of the internet, and to what effect? Using concepts in visual studies and communication studies, this course explores the histories of primarily American visual-verbal texts to investigate how minds and hands conceived, produced, distributed, and consumed illustrated print media in the 19th and 20th centuries. Beginning with the neurological basis of vision, we will examine ways culture affects perception, how print technologies shape content, how word and image rhetorically shape beliefs, how power relations imbue images and publishing, and the ways counterculture forms such as caricature and posters can be used to intervene socially. Students will conduct original research using University Libraries Special Collections to hone their ability to write convincingly and professionally about imagery. Credit 3 units. Art: FADM, VC

F20 ART 302 Drawing
An advanced drawing course for third- and fourth-year students. Individualized instruction allows students to explore various media and stylistic approaches in both figurative and nonfigurative modes. Credit 3 units. EN: H

F20 ART 307X Community Building North
This course addresses the complex economic, political and racial landscape of north St. Louis County and Ferguson, Missouri, as the embodiment of problems and conflicts endemic to urban communities across the nation. The events following Michael Brown’s shooting death on August 9, 2014, have revealed deep divisions in the St. Louis metropolitan area. Our multidisciplinary approach will be evident as we investigate the intersecting, compounding roles of social and economic inequities, racial disparities, white flight, public safety, housing, and economic development as we grapple with legitimate, thoughtful ways of making positive change. We’ll learn how to listen to, understand, and address conflicting voices. Readings, speakers, site visits, films, and other materials will be combined with discussion, writing, and socially conscious engagement as we seek to understand the many faces of Ferguson while following contemporary developments as they occur. Professor Robert Hansman acts as adviser and guide. The interdisciplinary course he developed over many years, “Community Building/Building Community,” provides the intellectual, ethical, and spiritual bases for the course. This course offers fresh perspectives and provides unique opportunities for community engagement for students who have previously taken Community Building; however that course is not a prerequisite. Projects develop collaboratively and organically between students, faculty, and community partners working to find common values and beliefs upon which to build concrete, meaningful action. Same as X10 XCORE 308X Credit 3 units.

F20 ART 308X Community Building
This course looks at the intersection of the built fabric and the social fabric. Using St. Louis as the starting point, this course takes students out of the classroom and into a variety of neighborhoods — old, new, affluent, poor — to look at the built environment in a variety of contexts and through a variety of lenses. Almost every week for the first half of the semester, students visit a different area (or areas), each trip highlighting some theme or issue related to the built environment (architecture, planning, American history, investment and disinvestment, community character and values, race, transportation, immigrant communities, future visions, etc.). Running parallel to this, students are involved in an ongoing relationship with one particular struggling neighborhood, in which students attend community meetings and get to know and become involved with the people in the community in a variety of ways. Students learn to look beyond the surface, beyond the single obvious story, for multiple stories, discovering their complexity, contradictions and paradoxes. They also come to consider the complex ways in which architecture and the built environment can affect or be affected by a host of other disciplines. College of Architecture and College of Art sophomores, juniors, and seniors have priority. Fulfills Sam Fox Commons requirement. Same as X10 XCORE 307X Credit 3 units. Art: CPSC EN: H

F20 ART 311 Painting
Same as F20 111, 211, 411. Juniors (only) register for F20 311. Introduction to painting processes and materials. While there is emphasis on oil painting, students are also introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model.
Technical skills and content are dealt with at the individual student's level.
Credit 3 units. Art: FAAM EN: H

F20 ART 311T The Poetics of Image-Making: People, Place & Space
This painting elective course examines the poetics of image-making, with a focus on the representation of people, place, and space, both observed and invented. Students learn the practice of painting and develop works through fundamental exercises as well as through the shared exploration of painting processes. Work outside of class for the beginner is project-based; advanced students produce an independent body of work. Critical assessment of work is complemented by faculty and peer discussions, readings, and field study. Required text: “The Poetics of Space” by Gaston Bachelard.
Credit 3 units. Art: FAAM EN: H

F20 ART 312 Painting
Same as F20 112, 212, 412. Juniors (only) register for F20 312. This course is an introduction to oil painting with an emphasis on the principles of color, construction and paint handling. Students will explore the possibilities of representational painting as applied to still-life, interiors, landscape and the human figure. The course is designed especially for beginning painters but can accommodate painters at all levels of proficiency.
Credit 3 units. Art: FAAM EN: H

F20 ART 313F Sculpture: Foundry
Same as F20 113F, 213F, 413F - Juniors (only) register for F20 313F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students will learn mold making, direct organic burnout, ceramic shell investment, metal chasing, and patination in order to create finished sculpture. In addition to metal casting, students will use other materials such as plastic, resin, steel, wood, rubber, plastic, and foam to create a mixed media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required.
Credit 3 units. Art: FAAM EN: H

F20 ART 313G Sculpture: Wood
Same as F20 113G, 213G, 413G - Juniors (only) register for F20 313G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making.
Credit 3 units. Art: FAAM EN: H

F20 ART 313H Sculpture: Blacksmithing
Same as F20 113H, 213H, 413H - Juniors (only) register for F20 313H. This course is an introduction to Blacksmithing materials, tools, and techniques. Students will explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for three-dimensional form. In this class we will explore these possibilities and expand our sculptural vocabulary.
Credit 3 units. EN: H

F20 ART 314F Sculpture: Foundry
Same as F20 214F, 414F - Juniors (only) register for F20 314F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students will learn mold making, direct organic burnout, ceramic shell investment, metal chasing, and patination in order to create finished sculpture. In addition to metal casting, students will use other materials such as plastic, resin, steel, wood, rubber, plastic, and foam to create a mixed media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required.
Credit 3 units. Art: FAAM EN: H

F20 ART 314G Sculpture: Wood
Same as F20 114G, 214G, 413G - Juniors (only) register for F20 314G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making.
Credit 3 units. EN: H

F20 ART 314H Sculpture: Blacksmithing
Same as F20 114H, 214H, 413H - Juniors (only) register for F20 314H. This course is an introduction to Blacksmithing materials, tools, and techniques. Students will explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for three-dimensional form. In this class we will explore these possibilities and expand our sculptural vocabulary.
Credit 3 units. EN: H

F20 ART 314I Sculpture: Metal Fabrication
Same as F20 214I, 413I - Juniors (only) register for F20 314I. Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or surface, it can be plastically deformed to create compound shapes or it can be connected to most any other material. Students will explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines as well as the safe operation of drilling, grinding, and finishing tools.
Credit 3 units. Art: FAAM EN: H

F20 ART 315 Printmaking
Same as F20 115, 215, 415. Juniors (only) register for F20 315. Survey of printmaking covering basic processes in intaglio, lithography, relief, and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical, and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.
Credit 3 units. Art: FAAM EN: H

F20 ART 315F Printmaking: Call and Response
In music, a call and response is a succession of two distinct phrases usually written in different parts of the music, where...
the second phrase is heard as a direct commentary on or in response to the first. Printmaking: Call and Response is a survey of printmaking with a foundation in traditional, historical, and philosophical aspects of printmaking. It will cover basic processes in intaglio, lithography, relief, and monotype. Students are encouraged to work in response to the history of the print, with an emphasis on mixed media and experimentation. This class counts for the minor in art. Credit 3 units.

F20 ART 316 Printmaking
Same as F20 116, 216, 416. Juniors (only) register for F20 316. Survey of printmaking covering basic processes in intaglio, lithography, relief and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests. Credit 3 units. Art: FAAM

F20 ART 317M Architecture Through the Photographic Lens
Same as F20 117M, 217M, 417M - Juniors (only) register for F20 317M. Photography offers ways of seeing and representing the world around us. This course provides technical and conceptual frameworks for understanding architectural space as seen through the camera. Topics include building as site, landscape as context, and the architectural model as a representation tool. Students are introduced to a wide range of artists and architects, helping build a unique camera language to support their individual projects. Students will learn DSLR camera basics, fundamentals of Photoshop, digital printing techniques and studio lighting for documenting architectural models. The course assumes no prior experience with digital imaging technologies or materials. Digital camera required. Credit 3 units. Art: FAAM

F20 ART 317N Contemporary Portraiture
Same as F20 117N, 217N, 417N - Juniors (only) register for F20 317N. Historically, portraits were painted of the royal or wealthy to document an accurate likeness and display status and power. But with the advent of photography, artists were freed to develop interpretations in style, process and medium. With subjects such as family, friends, strangers, celebrities, or self, the portrait has been used to reflect culture, identity, and the relationship between the artist and sitter. Issues of race, sexuality, gender, vanity and status continue to be relevant to contemporary practice. Primarily a drawing class, students combine the study of contemporary portrait artists with a studio practice that encourages development of a unique voice. Students consider how pose, gesture, lighting and other factors work together to support their intentions. Initial assignment prompts progress to guided, independent pursuits. Students will be encouraged to experiment with image, materials, and processes. Live models will be used as well as other source material. Credit 3 units. Art: FAAM

F20 ART 317O Drone Photography
This combination studio and discussion-based course examines the use of small unmanned aerial systems (sUAS) — otherwise known as drones — as a photographic medium. Studio sessions will introduce students to sUAS operation, various editing platforms, and output strategies. Lecture and discussion sessions will examine FAA regulations, the ethical implications of sUAS use by visual artists, and the rise of sUAS in the visual arts within the context of the history of aerial photography. All students will produce a body of work using drone capture as the primary medium. In order to ensure equal access to sUAS, students will be required to meet outside of class sessions. Credit 3 units.

F20 ART 317Q Context, Curation, Communication: Seriality in the Photographic Image
Series and sequences are the prevalent method for exhibiting photographic images. Through assignment-based and self-generated projects, students discover how photographic series are conceptualized, structured, and sequenced. Special attention is given to the material meaning embedded in print size, order, and spatial placement. The course provides in-depth coverage of image capture through medium-format analog and full-frame digital systems as well as intermediate digital editing and printing techniques. Students also explore various documentary and setup strategies through narrative and non-narrative photographic approaches. Through a rigorous critique structure, course readings, and critical writing, students engage the historical discourse surrounding the series as a tool for artistic expression. Credit 3 units.

F20 ART 3183 Photography III
This class is designed for the student who is seeking to explore advanced issues in photography using a broad range of photographic practices and media. In addition to further mastering of technique and craft, students will, through readings and class discussion, place their work within a context of contemporary issues in photographic image making, theory and criticism. Credit 3 units. EN: H

F20 ART 3184 Photography III
This class is designed for the student who is seeking to explore advanced issues in photography using a broad range of photographic practices and media. In addition to further mastering of technique and craft, students, through readings and class discussion, place their work within a context of contemporary issues in photographic image making, theory and criticism. Credit 3 units. EN: H

F20 ART 319 Ceramics
Same as F20 119, 219, 419 - Juniors (only) register for F20 319. An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the
emphasizes high-fired stoneware, students will be introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual’s level.

Credit 3 units. Art: FAAM EN: H

F20 ART 320 Ceramics
Same as F20 120, 220, 420. Juniors (only) register for F20 320. An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil, and slab construction. While the emphasis is on high-fired stoneware, students will be introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual's level.

Credit 3 units. Art: FAAM EN: H

F20 ART 323F Special Topics in Fashion Design (Fashion Design: Collaboration Studio)
Same as F20 123F, 223F, 423F - Juniors (only) register for F20 323F, University collaboration course with Fashion Design, Occupational Therapy, Mechanical Engineering and Business to develop design proposals and prototypes for specific customer profiles. Teams of students from different majors will design for various community and industry partners. They will work to solve an apparel or accessory design problem with innovative new concepts. The team will consider the person's lifestyle, occupation, and environmental factors that influence a design's functionality. A client-centered approach is used. Students will be evaluated on how well the design proposal meets the expressed aesthetic and functional needs of the client. Prerequisite: Introduction to Fashion Design. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course.

Credit 3 units. Art: CPSC, FADM

F20 ART 320 Ceramics
Same as F20 120, 220, 420. Juniors (only) register for F20 320. An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil, and slab construction. While the emphasis is on high-fired stoneware, students will be introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual's level.

F20 ART 323L Special Topics in Fashion Design: Fashion and Race
Same as F20 123L, 223L, 423L - Juniors (only) register for F20 323L. Is the fashion industry racist? This seminar course unpacks this contemporary inquiry by decentralizing fashion history to take a critical look at how racial identities are formed and performed, how historical stereotypes are perpetuated, and how theories of representation can be situated within the system of fashion. Students will use theoretical texts on race and representation to read contemporary media surrounding fashion and race (editorials, articles, social media), as well as gain an introduction to recently published research by scholars engaging fashion and race. Not only will students walk away with a richer understanding of how to critically think through race in fashion, but also how doing so gives us a new approach to think through race within a larger system.

Credit 3 units. Art: CPSC, FADM

F20 ART 325J Sculpting Realities
This course investigates new digital technologies — particularly mixed, augmented, and virtual reality — through the consideration of one critical question: “What does it mean to be real?” Students will learn the basics for making works of art, design, and architecture in alternative realities through 3D scanning, 3D modeling, and immersive world building. In addition to tutorials and multidisciplinary collaborative studio projects, students will investigate issues of reality and the use of alternative reality tools through readings, discussions, presentations, and other dialogues. The semester will culminate in a final project that translates a physical experience or artifact into a digital one.

Credit 3 units.

F20 ART 327A History of Photography
Same as F20 127A, 227A, 427A - Juniors (only) register for F20 327A. Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.

Credit 3 units. Art: FAAM EN: H

F20 ART 327X Color Systems
This course is a sustained investigation of color. Students study how color is affected by light, by space, by arrangement, by culture, and by commerce. The course aims to deepen the understanding of color's complexity and pervasiveness as a fundamental element of shared visual culture. The course develops both technical and conceptual skills to aid in visual translation. In addition to color-specific inquiry, a goal is to expand ideas of research and enable students to integrate various methods of acquiring knowledge into their art and design practice. Throughout the course, students discuss various processes of making/constructing, the connection between color/form/concept, and strategies for idea generation and brainstorming. The course allows for much individual freedom and flexibility within varying project parameters. College of Architecture and College of Art sophomores, juniors and seniors have priority. Fulfills Sam Fox Commons requirement. Prerequisite: Drawing I, Communication Design I, or 2D Design, or permission of instructor.

Same as X10 XCORE 327X

Credit 3 units. Art: FADM EN: H

F20 ART 3285 The Italian Renaissance in the City of Florence
This course encompasses the Renaissance from Giotto through the High Renaissance. Students will be able to examine firsthand the works they are studying. Included are field trips to Rome and Venice. Prerequisite: College of Architecture and College of Art juniors in the study abroad program in Florence, Italy.

Credit 3 units.

F20 ART 328A History of Photography
Same as F20 128A, 228A, 428A - Juniors (only) register for F20 328A. Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.

Credit 3 units. Art: FAAM EN: H
F20 ART 329F Tale of Two Cities: Documenting Our Divides
The metropolitan St. Louis area has become the nation’s symbol of modern segregation erupting into urban unrest and violence foiled against nonviolent direct-action interventions, youth-driven social protests and grassroots revitalization. With the assistance of a faculty seed grant from the Divided City Initiative, in partnership with the Center for the Humanities in Arts & Sciences and the Mellon Foundation, Tale of Two Cities: Documenting Our Divides will bring together students working in transdisciplinary teams to create documentary videos of street events, meetings and interviews that capture the immediacy of this historical moment. Students will partner and engage with a local nonprofit organization, grassroots movement or religious institution. Topics can include personal and/or institutional issues of a “divided city” that are exacerbated by race, gender, economic status, sexual orientation or geography. Successful completion of this course involves researching and creating a short video with a distinctive perspective and point of view that will draw upon the team’s collaborative voices from history, performing arts, economics, law, social work, African-American studies, architecture and art. Skills will be developed in the fundamentals of story development, video and audio-capture in the field, editing with Adobe Premier and archival preservation.

F20 ART 333 Basic Illustration
Same as F20 133, 233, 433 - Juniors (only) register for F20 333. An introduction to concepts, media techniques, and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented. Students can work by hand or on the computer. Traditional drawing skills not required.
Credit 3 units. Art: FADM; EN: H

F20 ART 334 Basic Illustration
Same as F20 134, 234, 434. Juniors (only) register for F20 334. An introduction to the concepts, media and problem-solving methods of contemporary illustration. Projects involve image development for applications such as book illustration, iconic/logo illustration, product development and information graphics. Students can work by hand or on the computer. Traditional drawing skills not required.
Credit 3 units. Art: FADM; EN: H

F20 ART 335A Interaction Design: Applications for Public Health
Same as F20 435A - Juniors (only) register for F20 335A. Through a blend of presentations from practitioners, classroom lectures, readings, discussion and hands-on exercises, this class will engage principles and methods of interaction design within the context of health challenges. Broadly defined, interaction design is the practice of designing products, environments, systems, and services with a focus on behavior and user experience. We will take on an in-depth challenge in an area such as transportation or community health resources and work in cross-disciplinary design teams with an external partner organization. Students will gain experience in planning and executing a human-centered design process featuring research, ideation, synthesis, concept development, prototypes and a final presentation, which may include visual design, animation, and sound. Students will work in teams to develop several intermediate project deliverables, such as prototypes and sketches. No prior course work is necessary though experience with Adobe Photoshop, Illustrator and InDesign are helpful.
Credit 3 units. EN: H

F20 ART 335G The Licensed Image: Development and Distribution
Same as F20 135G, 235G, 435G - Juniors (only) register for F20 335G. An introduction to the concept and image development, design, market distribution and methodology for creating licensed products. Projects will involve product idea development, market and the development of image-driven products using images and design. Traditional drawing skills not required. Students can work by hand or on the computer. Ideal course for students whose work focuses on images and those interested in developing visual products, including business students.
Credit 3 units. Art: FADM; EN: H

F20 ART 335I Communication Design I
Same as F20 135I, 235I, 435I - Juniors (only) register for F20 335I. An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students will be exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas will be discussed. An excellent introduction to the subject as a tool for business and marketing.
Credit 3 units. Art: FADM; EN: H

F20 ART 335J Introduction to Animating in Three Dimensions
Same as F20 135J, 235J, 435J - Juniors (only) register for F20 335J. This course explores 3D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag, and character-driven content. Cinematic shot design, timing, character design, and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise.
Prerequisites: Drawing or equivalent or permission of instructor.
Credit 3 units. Art: FADM; EN: H

F20 ART 335O Drawing as Thinking
Same as F20 235O, 435O. Juniors (only) register for F20 335O. This studio course explores symbolic drawing as a practical tool for learning and communication, used as it has been for millennia for the acquisition and transmission of knowledge, for idea generation and formation, and for visual storytelling. Students will observe and describe phenomena, conceive systems, construct diagrams, design processes, and convey instructions, all using drawing as an aid to discovery, thought and communication. Tools and media may include pencils, brushes, wooden sticks, markers, painter’s tape, laser pointers, and amateur surveying software, etc. In some cases, digital tools will be used to produce and present student projects. The course will include relevant readings and discussions. Throughout we will distinguish between symbolic uses of drawing and illusionistic ones, focusing on the former.
Credit 3 units.
F20 ART 335P Special Topics: Structuring Data for Effective Visualization
A primer on techniques for acquiring and structuring data in preparation for visualization. We will discuss common data formats (CSV, XML, and JSON) and how to access and translate from one format to another. Students will gain familiarity with the R language via the RStudio environment, as well as d3.js for interactive web-based visualizations. Students will develop concrete skills in preparing data for exploratory data analysis, as well as documenting workflows for reproducibility. Credit 1 unit. Art: FADM

F20 ART 3361 Advertising 1
Same as F20 1361, 2361, 4361 - Juniors (only) register for F20 3361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary. Credit 3 units. Art: FADM EN: H

F20 ART 3362 Advertising 1
Same as F20 1362, 2362, 4362. Juniors (only) register for F20 3362. This studio course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Credit 3 units. Art: FADM EN: H

F20 ART 3363 Advertising in the Digital Age
Same as F20 ART 1363, ART 2363, ART 4363. Juniors (only) register for F20 ART 3363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study "game changing" developments in advertising communications; changing dynamics in audience behavior; including the ability to "opt out"; the advertising industry's adaptation to digital technologies; and finally we'll speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one. Credit 3 units. Art: FADM

F20 ART 3365 History of Advertising
Same as F20 1365, 2365, 4365 - Juniors (only) register for F20 3365. The historical, cultural and technological development of advertising in America from the colonial period to the present. This course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects. Credit 3 units. Art: FADM

F20 ART 3366 History of Advertising
Same as F20 1366, 2366, 4366 - Juniors (only) register for F20 3366. The historical, cultural and technological development of advertising in America from the colonial period to the present. This lecture course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects. Grading is based on midterm and final exams as well as optional, extra-credit five page essays. Credit 3 units. Art: FADM EN: H

F20 ART 336A Interaction Design: Understanding Health and Well-Being
Same as F20 236A, F20 436A - Juniors (only) register for F20 336A. Through a blend of presentations from practitioners, classroom lectures, readings, discussion and hands-on exercises, this class will engage principles and methods of interaction design within the context of health challenges. Broadly defined, interaction design is the practice of designing products, environments, systems, and services with a focus on behavior and user experience. We will take on in-depth challenges in the area of health and well-being and work in cross-disciplinary design teams with an external partner organization. Students will gain experience in planning and executing a human-centered design process featuring research, ideation, synthesis, concept development, prototypes and a final presentation, which may include visual design, animation, and sound. Students will work in teams to develop several intermediate project deliverables, such as prototypes and sketches. No prior course work is necessary though experience with Adobe Photoshop, Illustrator and InDesign are helpful. Credit 3 units. Art: CPSC, FADM EN: H

F20 ART 336G The Licensed Image: Development and Distribution
Same as F20 136G, 236G, 436G. Juniors (only) register for F20 336G. An introduction to the concept and image development, design, market distribution and methodology for creating licensed products. Projects will involve product idea development, market and the development of image-driven products using images and design. Traditional drawing skills not required. Students can work by hand or on the computer. Ideal course for students whose work focuses on images and those
interested in developing visual products, including business students. Credit 3 units. Art: FADM EN: H

F20 ART 336I Communication Design I
Same as F20 136I, 236I, 436I. Juniors (only) register for F20 336I. Students are introduced to the fundamentals of communication design. Through studio exercises and lectures, students are exposed to a broad range of conceptual, aesthetic and strategic issues in the field. The course explores principles of two-dimensional design, typography, and the relationship of text and image in order to persuade and inform. It helps students to learn a design methodology for illuminating and solving problems and provides baseline training in the Adobe Suite. Upon completion of this course, students will be able to design basic projects and have criteria to provide an informed evaluation of the effectiveness of a given design. It provides an introduction to design as a tool for business and marketing. Credit 3 units. Art: FADM EN: H

F20 ART 336J Introduction to Animating in Three Dimensions
Same as F20 136J, 236J, 436J. Juniors (only) register for F20 336J. This course explores 3D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag, and character-driven content. Cinematic shot design, timing, character design, and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisites: Drawing or equivalent or permission of instructor. Credit 3 units. Art: FADM EN: H

F20 ART 336K Communication Design II
Same as F20 136K, 236K, 436K. Juniors (only) register for F20 336K. Building on the fundamentals of Communication Design I, this course will offer students the opportunity solve more complex visual communication problems. Information design (explanatory graphs and charts), multipage sequences (book/ magazine design) and persuasion (advertising/propaganda) will be some of the topics covered. Various methodologies for defining problems, generating ideas, exploring possible visual solutions and evaluating work-in-progress and finished designs from the previous course, will be reinforced. This course will introduce students to a range of media, including digital and alternative forms. Emphasis will be placed on finding visually compelling solutions, no matter the media. The computer will be used as a tool to assemble and refine. Students will be encouraged to use online tutorials to augment in-class instruction. Prerequisites: Communication Design I. Credit 3 units. Art: FADM EN: H

F20 ART 338J Advanced Animation
Same as F20 138J, 238J, 438J. Juniors (only) register for F20 338J. This course focuses on completing a short animated film as a group project utilizing a workflow similar to that used in the animated feature film industry. The class will first develop a story. Individuals will then be assigned tasks according to strong areas of interest to create a storyboard and animation. Key moments will be identified to be animated first. Once agreed on, students will be able to choose to work in various parts of the pipeline including Character Design; Layout and Set Design; 3D modeling; Rigging; Animation; Textures; Special Effects; Sound; Rendering and Editing. Finally, it is all put together as a short. This is an advanced course that assumes some experience in Maya or similar 3D program, or for those who have already developed skills in any form of animation. Prerequisite: Introduction to Animating in Three Dimensions or permission of instructor. Credit 3 units. Art: FADM EN: H

F20 ART 339I Radical Design: Making Civic Experiences
Same as F20 239I and 439I. Juniors (only) register for F20 339I. As we innovate rapidly in technology and communication, the economic and political structures that govern us have become largely assumed and unchallenged. This course explores the daily objects, interactions, and spaces that make up these large systems (like a police ticket or the layout of a courtroom), and it experiments with how redesigning these elements can help us question the status quo. Building on diverse political mindsets and current trends, we will imagine fictional worlds and craft the objects, procedures, and interactions that inhabit them. Along the way, we will discuss the value of designing for fundamental change alongside more incremental reform. Required class time will also include at least one additional in-class studio hour per week, to be determined based on students’ schedules. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/ community-engaged-teaching) course. Credit 3 units. Art: CPSC, FADM EN: H

F20 ART 343X Digital Filmmaking: City Stories
Digital Filmmaking: City Stories is a cross-university video art course for students interested in making short films through a transdisciplinary and time-based storytelling in both narrative and non-narrative formats. Whether documentary or abstract, individually produced or collaborative, all projects in this course have a required social and urban engagement component. In this course, the City becomes a laboratory for experimentation and contribution. Students meaningfully engage St. Louis, and their projects address sites of concern to explore the complex fabric of the city by way of framing and poetic juxtaposition. City Stories merges several arts and humanities disciplines, including experimental cinema and documentary journalism, and create an opportunity for empathic listening and inquiry as students discover stories built from collective as well as individual memories. Same as X10 XCORE 343 Credit 3 units.

F20 ART 344X Digital Filmmaking: City Stories
Digital Filmmaking: City Stories is a cross-university video art course for students interested in making short films through a transdisciplinary and time-based storytelling in both narrative and non-narrative formats. Whether documentary or abstract, individually produced or collaborative, all projects in this course have a required social and urban engagement component. In this course, the City becomes a laboratory for experimentation and contribution. Students meaningfully engage St. Louis, and their projects address sites of concern to explore the complex fabric of the city by way of framing and poetic juxtaposition. City Stories merges several arts and humanities disciplines, including experimental cinema and documentary journalism, and creates an opportunity for empathic listening and inquiry as students discover stories built from collective as well as individual memories. College of Architecture and College of Art sophomores, juniors and seniors have priority.
F20 ART 346X Shopping
This seminar examines shopping as a social and cultural construct that operates at several levels in relation to art, architecture, and urban planning. Shopping is the fundamental activity of the capitalist marketplace. It is also inextricably linked with major aspects of public and foreign policy, where national consumerism is closely linked to global tourism and it is at the core of economic development. Shopping is as well a common denominator of popular culture, frequently satirized in contemporary art, film, and literature. Participants in the seminar will read selections from various writings about shopping and the marketplace. We will also view several films examining the shopping environment in narratives of power and desire. Prerequisite is completion of Sam Fox foundations year. Open to sophomores and above.
Same as X10 XCORE 346X
Credit 3 units. Art: Art: CPSC

F20 ART 351A Sound Environments
This course explores sound and musical composition in a digital format, functioning as a sculptural, spatial, psychological, and architectural intervention. The course offers an introduction to current sound art practices and examines how sound projects are capable of altering our sense of space and time. Sonic space necessarily touches upon experimental music and installation art as closely related to sound art. The course introduces students to basic methods of sound recording and editing software and hardware, with the goal of composing sound works for space and for headphones. Readings pertaining to current developments in contemporary experimental music and sound art as well as regular writing assignments accompany the course.
Credit 3 units.

F20 ART 354A Special Topics in Visual Culture: The Illustrated Periodical
This seminar will engage the tradition of illustrated magazines in the United States, beginning with a categorical survey of the first half of the 20th century: slicks, pulps and downmarket rags. We will analyze editorial and advertising content, and confront the periodical as highly visual social text, animated by an implicit contract between publisher and reader. Attention devoted to communities of production and reception, including editors, art directors, illustrators, cartoonists and readers. Students will develop research projects which focus on particular publications, features and people, drawing on the considerable resources of the Modern Graphic History Library. Outside readings and screenings will supplement class discussion. Open to students across the university with sophomore to senior standing. Note: counts toward degree as Art History/Visual Culture elective and design minor.
Credit 3 units. Art: Art: FADM  EN: H

F20 ART 354B Special Topics in Visual Culture: Studies in Modern Design from Print to Pixel
This course traces the history of graphic design during the Modern period as a reflection of, and lens onto, cultural shifts and technological innovation. Open to students across the university with sophomore to senior standing. Note: counts toward degree as Art History/Visual Culture elective and design minor.
Credit 3 units. Art: FADM, VC  EN: H

F20 ART 3713 Introduction to Book Binding
Same as F20 1713, 2713, 4713. Juniors (only) register for F20 3713. This class will serve as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures will be explored. Students will learn from historical approaches to constructing the codex form including the single signature pamphlet, the multi-signature case binding, the coptic, and the medieval long stitch. Students will learn Japanese binding and its many variations. Several contemporary variations will be introduced, including the tunnel, the flag book, the accordion and the carousel. Students will explore the visual book using found imagery and photocopy transfers, and will produce a variety of decorated papers to be used in their bindings.
Credit 3 units. Art: FADM EN: H

F20 ART 3714 Introduction to Book Binding
Same as F20 1714, 2714, 4714. Juniors (only) register for F20 3714. This class will serve as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures will be explored. Students will learn from historical approaches to constructing the codex form including the single signature pamphlet, the multi-signature case binding, the coptic, and the medieval long stitch. Students will learn Japanese binding and its many variations. Several contemporary variations will be introduced, including the tunnel, the flag book, the accordion and the carousel. Students will explore the visual book using found imagery and photocopy transfers, and will produce a variety of decorated papers to be used in their bindings.
Credit 3 units. Art: FADM EN: H

F20 ART 3783 Special Topics in Visual Culture: Introduction to Illustration Studies
How have knowledge, opinion, and feeling been communicated visually from the advent of automated printing presses to the invention of the internet, and to what extent? Using concepts in visual studies and communication studies, this course explores the histories of primarily American visual-verbal texts to investigate how minds and hands conceived, produced, distributed, and consumed illustrated print media in the 19th and 20th centuries. Beginning with the neurological basis of vision, we will examine ways culture affects perception, how print technologies shape content, how word and image rhetorically shape beliefs, how power relations imbue images and publishing, and the ways counterculture forms such as caricature and posters can be used to intervene socially. Students will conduct original research using University Libraries Special Collections to hone their ability to write convincingly and professionally about imagery.
Credit 3 units. Art: FADM, VC

F20 ART 3823 The Italian Renaissance in the City of Florence
The Early Renaissance — also known as the *quattrocento* — usually denotes the period from circa 1400 to circa 1500. During those 100 years, Italy — particularly Florence — witnessed an extraordinary coming together of artistic talent, a passionate interest in the art and culture of Greek and Roman antiquity, a fierce sense of civic pride, and an optimistic belief in the classical concept of “Man as the measure of all things.” This course examines the principal artists who contributed to this
F20 ART 3824 The Italian Renaissance in the City of Florence
This course encompasses the Renaissance from Giotto through the High Renaissance. Students will be able to examine first-hand the works they are studying. Included are field trips to Rome and Venice.
Credit 3 units. Art: AH EN: H

F20 ART 3827 Performance Art (Florence)
The course is open to all students, ready to get involved in shared creative experience, to discover new expression, which means — neither dance nor theatre talents nor athletic attitudes are required, but the availability to use body in warming up sessions will be necessary. This studio art course is dedicated to the aesthetics and the practice of performance. Although a studio course, there will be a strong theoretical aspect which aims to outline a historical and cultural framework that shows how performance art was born and traces how we comprehend the practice today. The aim of which is to better understand how this special, all-embracing art language will be understood in the future. Physical activities, along with actions involving individual exploration of public space, are fundamental to the creative process. Performance art needs bodies, it needs space, it needs action, it needs an audience. Students will come away from this course with a strong knowledge of these fundamental ideas.
Credit 3 units.

F20 ART 3843 Filming the Black Freedom Struggle in St. Louis
This inter-disciplinary course introduces students to the history of the Black freedom struggle in St. Louis and to the complex and multiple ways historic narratives are constructed. We will explore the political, economic and cultural history of St. Louisans who challenged racial segregation in housing and work, fought white mobs in city streets, and battled the destruction of Black communities by federal urban renewal and public housing policies. Students, working with a historian and a filmmaker, will research and make a documentary film on a piece of St. Louis' crucial contribution to the Black Freedom Struggle in America. We bring together documentary filmmaking and history research to draw attention to the multiple narratives (many long-neglected) of African American and urban history, and to the multiple approaches to presenting history. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course.
Same as X10 XCORE 386X
Credit 3 units. Arch: HT, RW Art: AH

F20 ART 386X Public Practice
With architecture, art and design students in mind, Public Practice is a design-build course focused on the development, presentation, and actualization of commissioned works within the public realm. Through an iterative process of concept development, material exploration, and panel reviews, students will learn how to develop, propose and execute a viable public piece. Individual and/or group proposals will be presented before a selection committee in consideration toward a public art/design commission. Selected projects will be realized within specified sites in the community of University City, MO. Students will have hands on experiences with construction processes, meeting structural requirements and codes, site development, and project installation, which will prepare them for a creative life situated firmly within a discourse of Public Space. Open to MFA, graduate architecture students, BFA and undergraduate architecture students with junior-level standing. Minors and others eligible with consent of instructor.
Same as X10 XCORE 386X
Credit 3 units.

F20 ART 402 Drawing
An advanced drawing course for third- and fourth-year students. Individualized instruction allows students to explore various media and stylistic approaches in both figurative and nonfigurative modes.
Credit 3 units. EN: H

F20 ART 411 Painting
Same as F20 111, 211, 311. Seniors (only) register for F20 411. Introduction to painting processes and materials. While there is emphasis on oil painting, students are also introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model. Technical skills and content are dealt with at the individual student's level.
Credit 3 units. Art: FAAM EN: H

F20 ART 411T The Poetics of Image-Making: People, Place & Space
This painting elective course examines the poetics of image-making, with a focus on the representation of people, place, and space, both observed and invented. Students learn the practice of painting and develop works through fundamental exercises as well as through the shared exploration of painting processes. Work outside of class for the beginner is project-based; advanced students produce an independent body of work. Critical assessment of work is complemented by faculty and peer discussions, readings, and field study. Required text: "The Poetics of Space" by Gaston Bachelard.
Credit 3 units.

F20 ART 412 Painting
Same as F20 112, 212, 312. Seniors (only) register for F20 412. This course is an introduction to oil painting with an emphasis on the principles of color, construction and paint handling. Students will explore the possibilities of representational painting as applied to still-life, interiors, landscape and the human figure. The course is designed especially for beginning painters but can accommodate painters at all levels of proficiency.
Credit 3 units. Art: FAAM EN: H

F20 ART 413F Sculpture: Foundry
Same as F20 113F, 213F, 313F - Seniors (only) register for F20 413F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students will learn mold making, direct
organic burnout, ceramic shell investment, metal chasing, and patination in order to create finished sculpture. In addition to metal casting, students will use other materials such as plaster, resin, steel, wood, rubber, plastic, and foam to create a mixed media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. School of Art major and non-art students pursuing an art minor will have priority.
Credit 3 units. Art: FAAM EN: H

F20 ART 413G Sculpture: Wood
Same as F20 113G, 213G, 313G - Seniors (only) register for F20 413G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. School of Art majors and non-art students pursuing an art minor will have priority.
Credit 3 units. Art: FAAM EN: H

F20 ART 413H Sculpture: Blacksmithing
Same as F20 113H, 213H, 313H - Seniors (only) register for F20 413H. This course is an introduction to blacksmithing materials, tools, and techniques. Students will explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for three-dimensional form. In this class we will explore these possibilities and expand our sculptural vocabulary.
Credit 3 units. Art: FAAM EN: H

F20 ART 413I Sculpture: Metal Fabrication
Same as F20 113I, 213I, 313I - Seniors (only) register for F20 413I. Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be plastically deformed to create compound shapes or it can be connected to most any other material. Students will explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines as well as the safe operation of drilling, grinding and finishing tools.
Credit 3 units. Art: FAAM EN: H

F20 ART 414I Sculpture: Metal Fabrication
Same as F20 114I, 214I, 314I - Seniors (only) register for F20 414I. Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be plastically deformed to create compound shapes or it can be connected to most any other material. Students will explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines as well as the safe operation of drilling, grinding and finishing tools.
Credit 3 units. Art: FAAM EN: H

F20 ART 414F Sculpture: Foundry
Same as F20 114F, 214F, 314F - Seniors (only) register for F20 414F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students will learn mold making, direct organic burnout, ceramic shell investment, metal chasing, and patination in order to create finished sculpture. In addition to metal casting, students will use other materials such as plaster, resin, steel, wood, rubber, plastic, and foam to create a mixed media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required.
Credit 3 units. Art: FAAM EN: H

F20 ART 414G Sculpture: Wood
Same as F20 114G, 214G, 314G - Seniors (only) register for F20 414G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making.
Credit 3 units. Art: FAAM EN: H

F20 ART 414H Sculpture: Blacksmithing
Same as F20 114H, 214H, 314H - Seniors (only) register for F20 414H. This course is an introduction to Blacksmithing materials, tools, and techniques. Students will explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for three-dimensional form. In this class we will explore these possibilities and expand our sculptural vocabulary.
Credit 3 units. Art: FAAM EN: H

F20 ART 415 Printmaking
Same as F20 115, 215, 315. Seniors (only) register for F20 415. Survey of printmaking covering basic processes in intaglio, lithography, relief, and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical, and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.
Credit 3 units. Art: FAAM EN: H

F20 ART 415F Printmaking: Call and Response
In music, a call and response is a succession of two distinct phrases usually written in different parts of the music, where the second phrase is heard as a direct commentary on or in response to the first. Printmaking: Call and Response is a survey of printmaking with a foundation in traditional, historical, and philosophical aspects of printmaking. It will cover basic processes in intaglio, lithography, relief, and monotype. Students are encouraged to work in response to the history of the print, with an emphasis on mixed media and experimentation. This class counts for the minor in art.
Credit 3 units.

F20 ART 416 Printmaking
Same as F20 116, 216, 316. Seniors (only) register for F20 416. Survey of printmaking covering basic processes in intaglio, lithography, relief and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.
Credit 3 units. Art: FAAM EN: H

F20 ART 417M Architecture Through the Photographic Lens
Photography offers ways of seeing and representing the world around us. This course provides technical and conceptual frameworks for understanding architectural space as seen through the camera. Topics include building as site, landscape as context, and the architectural model as a representation tool. Students are introduced to a wide range of artists and architects, helping build a unique camera language to support their individual projects. Students will learn DSLR camera basics, fundamentals of Photoshop, digital printing techniques and studio lighting for documenting architectural models. The course
assumes no prior experience with digital imaging technologies or materials. Digital camera required.
Credit 3 units. Art: FAAM

F20 ART 417N Contemporary Portraiture
Same as F20 117N, 217N, 317N - Seniors (only) register for F20 417N. Historically, portraits were painted of the royal or wealthy to document an accurate likeness and display status and power. But with the advent of photography, artists were freed to develop interpretations in style, process and medium. With subjects such as family, friends, strangers, celebrities, or self, the portrait has been used to reflect culture, identity, and the relationship between the artist and sitter. Issues of race, sexuality, gender, vanity and status continue to be relevant to contemporary practice. Primarily a drawing class, students combine the study of contemporary portrait artists with a studio practice that encourages development of a unique voice. Students consider how pose, gesture, lighting and other factors work together to support their intentions. Initial assignment prompts progress to size, order, and spatial placement. The course provides in-encourages development of a unique voice. Students consider series are conceptualized, structured, and sequenced. Special study of contemporary portrait artists with a studio practice that generates projects, students discover how photographic vanity and status continue to be relevant to contemporary art between the artist and sitter. Issues of race, sexuality, gender, and the use of small unmanned aerial systems (sUAS) — as a photographic medium. Studio sessions will examine FAA regulations, the ethical implications of sUAS use by visual artists, and the rise of sUAS in the visual arts within the context of the history of aerial photography. All students will produce a body of work using drone capture as the primary medium. In order to ensure equal access to sUAS, students will be required to meet outside of class sessions.
Credit 3 units. Art: FAAM

F20 ART 417O Drone Photography
This combination studio and discussion-based course examines the use of small unmanned aerial systems (sUAS) — otherwise known as drones — as a photographic medium. Studio sessions will introduce students to sUAS operation, various editing platforms, and output strategies. Lecture and discussion sessions will examine FAA regulations, the ethical implications of sUAS use by visual artists, and the rise of sUAS in the visual arts within the context of the history of aerial photography. All students will produce a body of work using drone capture as the primary medium. In order to ensure equal access to sUAS, students will be required to meet outside of class sessions.
Credit 3 units.

F20 ART 417P Drone Photography
This combination studio and discussion-based course examines the use of small unmanned aerial systems (sUAS) — otherwise known as drones — as a photographic medium. Studio sessions will introduce students to sUAS operation, various editing platforms, and output strategies. Lecture and discussion sessions will examine FAA regulations, the ethical implications of sUAS use by visual artists, and the rise of sUAS in the visual arts within the context of the history of aerial photography. All students will produce a body of work using drone capture as the primary medium. In order to ensure equal access to sUAS, students will be required to meet outside of class sessions.
Credit 3 units.

F20 ART 423F Special Topics in Fashion Design: (Fashion Design: Collaboration Studio)
Same as F20 123F, 223F, 323F - Seniors (only) register for F20 423F. University collaboration course with Fashion Design, Occupational Therapy, Mechanical Engineering and Business to develop design proposals and prototypes for specific customer profiles. Teams of students from different majors will design for various community and industry partners. They will work to solve an apparel or accessory design problem with innovative new concepts. The team will consider the person's lifestyle, occupation, and environmental factors that influence a design's functionality. A client-centered approach is used. Students will be evaluated on how well the design proposal meets the expressed aesthetic and functional needs of the client. Prerequisite: Introduction to Fashion Design
Credit 3 units. Art: CPSC, FADM EN: H

F20 ART 423L Special Topics in Fashion Design: Fashion and Race
Same as F20 123L, 223L, 323L - Seniors (only) register for F20 423L. Is the fashion industry racist? This seminar course unpacks this contemporary inquiry by decentralizing fashion history to take a critical look at how racial identities are formed and performed, how historical stereotypes are perpetuated, and how theories of representation can be situated within the system of fashion. Students will use theoretical texts on race and representation to read contemporary media surrounding fashion and race (editorials, articles, social media), as well as gain an introduction to recently published research by scholars engaging fashion and race. Not only will students walk away with a richer understanding of how to critically think through race in fashion,
but also how doing so gives us a new approach to think through race within a larger system.
Credit 3 units. Art: CPSC, FADM

F20 ART 425I Making Comics
Same as F20 125I, 225I, 325I - Seniors (only) register for F20 425I. From hieroglyphics to newspapers, drawn pictures in sequence have told stories for thousands of years. This course is an introduction to writing and drawing short form comics. In readings and discussion, students will explore a wide variety of genres and visual approaches to comics. Through exercises and assignments students will learn how to make clear and evocative comics. All skill levels of drawing experience are acceptable. Credit 3 units. Art: FADM EN: H

F20 ART 425J Sculpting Realities
This course investigates new digital technologies — particularly mixed, augmented, and virtual reality — through the consideration of one critical question: “What does it mean to be real?” Students will learn the basics for making works of art, design, and architecture in alternative realities through 3D scanning, 3D modeling, and immersive world building. In addition to tutorials and multidisciplinary collaborative studio projects, students will investigate issues of reality and the use of alternative reality tools through readings, discussions, presentations, and other dialogues. The semester will culminate in a final project that translates a physical experience or artifact into a digital one. Credit 3 units.

F20 ART 427A History of Photography
Same as F20 127A, 227A, 327A - Seniors (only) register for F20 427A. Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium. Credit 3 units. Art: FAAM EN: H

F20 ART 428A History of Photography
Same as F20 128A, 228A, 328A - Seniors (only) register for F20 428A. Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium. Credit 3 units. Art: FAAM EN: H

F20 ART 429F Tale of Two Cities: Documenting Our Divides
The metropolitan St. Louis area has become the nation’s symbol of modern segregation erupting into urban unrest and violence foiled against nonviolent direct-action interventions, youth-driven social protests and grassroots revitalization. With the assistance of a faculty seed grant from the Divided City Initiative, in partnership with the Center for the Humanities in Arts & Sciences and the Mellon Foundation, Tale of Two Cities: Documenting Our Divides will bring together students working in transdisciplinary teams to create documentary videos of street events, meetings and interviews that capture the immediacy of this historical moment. Students will partner and engage with a local nonprofit organization, grassroots movement or religious institution. Topics can include personal and/or institutional issues of a “divided city” that are exacerbated by race, gender, economic status, sexual orientation or geography. Successful completion of this course involves researching and creating a short video with a distinctive perspective and point of view that will draw upon the team’s collaborative voices from history, performing arts, economics, law, social work, African-American studies, architecture and art. Skills will be developed in the fundamentals of story development, video and audio-capture in the field, editing with Adobe Premier and archival preservation. No prerequisites. Same as I50 INTER D 329F Credit 3 units. A&S IQ: SC Arch: SSC Art: CPSC, SSC BU: BA

F20 ART 433 Basic Illustration
Same as F20 133, 233, 333. Seniors (only) register for F20 433. An introduction to the concepts, media and problem-solving methods of contemporary illustration. Projects involve image development for applications such as book illustration, iconic/logo illustration, product development and information graphics. Students can work by hand or on the computer. Traditional drawing skills not required. Credit 3 units. Art: FADM EN: H

F20 ART 434 Basic Illustration
Same as F20 134, 234, 334. Seniors (only) register for F20 434. An introduction to the concepts, media and problem-solving methods of contemporary illustration. Projects involve image development for applications such as book illustration, iconic/logo illustration, product development and information graphics. Students can work by hand or on the computer. Traditional drawing skills not required. Credit 3 units. Art: FADM EN: H

F20 ART 435A Interaction Design: Applications for Public Health
Same as F20 335A - Seniors (only) register for F20 435A. Through a blend of presentations from practitioners, classroom lectures, readings, discussion and hands-on exercises, this class will engage principles and methods of interaction design within the context of health challenges. Broadly defined, interaction design is the practice of designing products, environments, systems, and services with a focus on behavior and user experience. We will take on an in-depth challenge in an area such as transportation or community health resources and work in cross-disciplinary design teams with an external partner organization. Students will gain experience in planning and executing a human-centered design process featuring research, ideation, synthesis, concept development, prototypes and a final presentation, which may include visual design, animation and sound. Students will work in teams to develop several intermediate project deliverables, such as prototypes and sketches. No prior course work is necessary though experience with Adobe Photoshop, Illustrator and InDesign are helpful. Credit 3 units. Art: FADM EN: H

F20 ART 435G The Licensed Image: Development and Distribution
Same as F20 135G, 235G, 335G - Seniors (only) register for F20 435G. An introduction to the concept and image development, design, market distribution and methodology for creating licensed products. Projects will involve product idea development, market and the development of image-driven products using images and design. Traditional drawing skills not required. Students can work by hand or on the computer. Ideal course for students whose work focuses on images and those interested in developing visual products, including business students.
F20 ART 435I Communication Design I
An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students will be exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas will be discussed. An excellent introduction to the subject as a tool for business and marketing.
Credit 3 units. Art: FADM EN: H

F20 ART 435J Introduction to Animating in Three Dimensions
Same as F20 135J, 235J, 335J. Seniors (only) register for F20 435J. This course explores 3D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag, and character-driven content. Cinematic shot design, timing, character design, and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise.
Prerequisites: F10 101 (Drawing) or equivalent or permission of instructor.
Credit 3 units. Art: FADM EN: H

F20 ART 435O Drawing as Thinking
Same as F20 135O, F20 235O, F20 335O. Seniors (only) register for F20 435O. This studio course explores symbolic drawing as a practical tool for learning and communication, used as it has been for millennia for the acquisition and transmission of knowledge, for idea generation and formation, and for visual storytelling. Students will observe and describe phenomena, conceive systems, construct diagrams, design processes, and convey instructions, all using drawing as an aid to discovery, thought and communication. Tools and media may include pencils, brushes, wooden sticks, markers, painter’s tape, laser pointers, and amateur surveying software, etc. In some cases, digital tools will be used to produce and present student projects. The course will include relevant readings and discussions. Throughout we will distinguish between symbolic uses of drawing and illusionistic ones, focusing on the former.
Credit 3 units.

F20 ART 435P Structuring Data for Effective Visualization
A primer on techniques for acquiring and structuring data in preparation for visualization. We will discuss common data formats (CSV, XML, and JSON) and how to access and translate from one format to another. Students will gain familiarity with the R language via the RStudio environment, as well as d3.js for interactive web-based visualizations. Students will develop concrete skills in preparing data for exploratory data analysis, as well as documenting workflows for reproducibility.
Credit 1 unit. Art: FADM

F20 ART 4361 Advertising I
Same as F20 1361, F20 2361, F20 3361. Seniors (only) register for F20 4361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of the presentation and discussion of contemporary work, and it provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary.
Credit 3 units. Art: FADM EN: H

F20 ART 4362 Advertising I
Same as F20 1362, 2362, 3362. Seniors (only) register for F20 4362. This studio course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting.
Credit 3 units. Art: FADM EN: H

F20 ART 4363 Advertising in the Digital Age
Same as F20 1363, ART 2363, ART 3363. Seniors (only) register for F20 ART 4363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study “game changing” developments in advertising communications; changing dynamics in audience behavior — including the ability to “opt out”; the advertising industry’s adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one.
Credit 3 units. Art: FADM EN: H

F20 ART 4364 Advertising in the Digital Age
Same as F20 1364, 2364, 3364. Seniors (only) register for F20 4364. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study “game changing” developments in advertising communications; changing dynamics in audience behavior — including the ability to “opt out”; the advertising industry’s adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one.
Credit 3 units. Art: FADM EN: H

F20 ART 4365 History of Advertising
Same as F20 1365, 2365, 3365 - Seniors (only) register for F20 4365. The historical, cultural and technological development of advertising in America from the colonial period to the present. This course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects.
Credit 3 units. Art: FADM
F20 ART 4366 History of Advertising
Same as F20 1366, 2366, 3366 - Seniors (only) register for F20 4366. The historical, cultural and technological development of advertising in America from the colonial period to the present. This lecture course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects. Grading is based on mid-term and final exams as well as optional, extra-credit five-page essays.
Credit 3 units. Art: FADM EN: H

F20 ART 4364 Communication Design II
Same as F20 1364, 2364, 3364 - Seniors (only) register for F20 4364. Building on the fundamentals of Communication Design I, this course will offer students the opportunity to solve more complex visual communication problems. Information design (explanatory graphs and charts), multipage sequences (book/magazine design) and persuasion (advertising/propaganda) will be some of the topics covered. Various methodologies for defining problems, generating ideas, exploring possible visual solutions and evaluating work-in-progress and finished designs from the previous course, will be reinforced. This course will introduce students to a range of media, including digital and alternative forms. Emphasis will be placed on finding visually compelling solutions, no matter the media. The computer will be used as a tool to assemble and refine. Students will be encouraged to use online tutorials to augment in-class instruction. Prerequisite: Communication Design I.
Credit 3 units. Art: FADM EN: H

F20 ART 436J Introduction to Animating in Three Dimensions
Same as F20 136J, 236J, 336J. Seniors (only) register for F20 436J. This course explores 3D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag, and character-driven content. Cinematic shot design, timing, character design, and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisites: Drawing or equivalent or permission of instructor.
Credit 3 units. Art: FADM EN: H

F20 ART 436K Communication Design II
Same as F20 136K, 236K, 336K. Seniors (only) register for F20 436K. Building on the fundamentals of Communication Design I, this course will offer students the opportunity to solve more complex visual communication problems. Information design (explanatory graphs and charts), multipage sequences (book/magazine design) and persuasion (advertising/propaganda) will be some of the topics covered. Various methodologies for defining problems, generating ideas, exploring possible visual solutions and evaluating work-in-progress and finished designs from the previous course, will be reinforced. This course will introduce students to a range of media, including digital and alternative forms. Emphasis will be placed on finding visually compelling solutions, no matter the media. The computer will be used as a tool to assemble and refine. Students will be encouraged to use online tutorials to augment in-class instruction. Prerequisite: Communication Design I.
Credit 3 units. Art: FADM EN: H

F20 ART 436L Communication Design I
Same as F20 136L, 236L, 336L. This course focuses on completing a short animated film as a group project utilizing a workflow similar to that used in the animated feature film industry. The class will first develop a story. Individuals will then be assigned tasks according to strong areas of interest to create a storyboard and animate. Key moments will be identified to be animated first. Once agreed on, students will be able to choose to work in various parts of the pipeline including Character Design; Layout and Set Design; 3D modeling; Rigging; Animation; Textures; Special Effects; Sound; Rendering and Editing. Finally, it is all put together as a short. This is an advanced course that assumes some experience in Maya or similar 3D program, or for those who have already developed skills in any form of animation. Prerequisite: Introduction to Animating in Three Dimensions or permission of instructor.
Credit 3 units. Art: FADM EN: H

F20 ART 439I Radical Design: Making Civic Experiences
Same as F20 239I, 339I. Seniors (only) register for F20 439I. As we innovate rapidly in technology and communication, the economic and political structures that govern us have become largely assumed and unchallenged. This course explores the daily objects, interactions and spaces that make up these large
systems (like a police ticket, or the layout of a courtroom), and experiments with how re-designing these elements can help us question the status quo. Building on diverse political mindsets and current trends, we will imagine fictional worlds, and craft the objects, procedures and interactions that inhabit them. Along the way, we’ll discuss the value of designing for fundamental change alongside more incremental reform. Required class time will also include at least one additional in-class studio hour per week, to be determined based on students’ schedules.
Credit 3 units. Art: CPSC, FADM EN: H

F20 ART 440A History of Communication Design
Same as F20 340A. Seniors (only) register for F20 440A. Historical development of communication design based on a survey of significant artists and designers and the ideas, styles, movements, forces and individuals who influenced their work.
Credit 3 units. Art: FADM EN: H

F20 ART 4481 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, “virtual” media. Certain projects may require a second semester of study to complete.
Credit 3 units. EN: H

F20 ART 451A Sound Environments
This course explores sound and musical composition in a digital format, functioning as a sculptural, spatial, psychological, and architectural intervention. The course offers an introduction to current sound art practices and examines how sound projects are capable of altering our sense of space and time. Sonic space necessarily touches upon experimental music and installation art as closely related to sound art. The course introduces students to basic methods of sound recording and editing software and hardware, with the goal of composing sound works for space and for headphones. Readings pertaining to current developments in contemporary experimental music and sound art as well as regular writing assignments accompany the course.
Credit 3 units.

F20 ART 454A Special Topics in Visual Culture: The Illustrated Periodical
This seminar course will engage the tradition of illustrated magazines in the United States, beginning with a categorical survey of the first half of the 20th century: slicks, pulps and downmarket rags. We will analyze editorial and advertising content, and confront the periodical as highly visual social text, animated by an implicit contract between publisher and reader. Attention devoted to communities of production and reception, including editors, art directors, illustrators, cartoonists and readers. Students will develop research projects which focus on particular publications, features and people, drawing on the considerable resources of the Modern Graphic History Library. Outside readings and screenings will stimulate and supplement class discussion. Open to students across the university with sophomore to senior standing. Note: counts toward degree as Art History/Visual Culture elective and design minor.
Same as F20 ART 354A

Credit 3 units. Art: VC

F20 ART 454B Special Topics in Visual Culture: Studies in Modern Design from Print to Pixel
This course traces the history of graphic design during the Modern period as a reflection of, and lens onto, cultural shifts and technological innovation. Open to students across the university with sophomore to senior standing. Note: counts toward degree as Art History/Visual Culture elective and design minor.
Same as F20 ART 354B
Credit 3 units. Art: FADM, VC EN: H

F20 ART 4713 Introduction to Book Binding
Same as F20 1713, 2713, 3713. Seniors (only) register for F20 4713. This class will serve as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures will be explored. Students will learn from historical approaches to constructing the codex form including the single signature pamphlet, the multi-signature case binding, the coptic, and the medieval long stitch. Students will learn Japanese binding and its many variations. Several contemporary variations will be introduced, including the tunnel, the flag book, the accordion and the carousel. Students will explore the visual book using found imagery and photocopy transfers, and will produce a variety of decorated papers to be used in their bindings.
Credit 3 units. Art: FADM EN: H

F20 ART 4714 Introduction to Book Binding
Same as F20 1714, 2714, 3714. Seniors (only) register for F20 4714. This class will serve as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures will be explored. Students will learn from historical approaches to constructing the codex form including the single signature pamphlet, the multi-signature case binding, the coptic, and the medieval long stitch. Students will learn Japanese binding and its many variations. Several contemporary variations will be introduced, including the tunnel, the flag book, the accordion and the carousel. Students will explore the visual book using found imagery and photocopy transfers, and will produce a variety of decorated papers to be used in their bindings.

F20 ART 4783 Special Topics in Visual Culture: Introduction to Illustration Studies
How have knowledge, opinion and feeling been communicated visually from the advent of automated printing presses to the invention of the internet, and to what effect? Using concepts in visual studies and communication studies, this course explores the histories of primarily American visual-verbal texts to investigate how minds and hands conceived, produced, distributed and consumed illustrated print media in the 19th and 20th centuries. Beginning with the neurological basis of vision, we will examine ways culture affects perception, how print technologies shape content, how word and image rhetorically shape beliefs, how power relations imbue images and publishing, and the ways counterculture forms such as caricature and posters can be used to intervene socially. Students will conduct original research using University Libraries Special Collections to hone their ability to write convincingly and professionally about imagery. No prerequisites; 200 level open to students across the university. Counts toward design minor.
Credit 3 units. Art: FADM, VC

About Us

The Sam Fox School of Design & Visual Arts (http://www.samfoxschool.wustl.edu) is a unique collaboration in architecture, art and design education that links professional studio programs with one of the country’s finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art and the Mildred Lane Kemper Art Museum (http://www.kemperartmuseum.wustl.edu).

The College of Art, founded in 1879, was the first professional, university-affiliated art school in the United States. In the 1940s, its broad-based core program helped set the standards for the bachelor of fine arts degree. Faculty over the years have included Max Beckmann, Philip Guston and other internationally known artists.

The College of Architecture, established in 1910, was one of eight founding members of the Association of Collegiate Schools of Architecture (ACSA). In 1962, Architecture launched one of the nation’s first Master of Urban Design programs. Four winners of the Pritzker Prize, considered architecture’s highest honor, have taught at the school.

The Mildred Lane Kemper Art Museum dates back to 1881, making it the first art museum west of the Mississippi River. The collection has historically focused on contemporary work. Today, the Kemper Art Museum holds roughly 3,500 important paintings, sculptures, photographs and installations by 19th-, 20th- and 21st-century American and European artists, along with significant antiquities and a large number of prints and drawings.

Additional collaborative opportunities are provided by the Department of Art History and Archaeology (http://arthistory.artsci.wustl.edu) in Arts & Sciences, the Kenneth and Nancy Kranzberg Art & Architecture Library (https://library.wustl.edu/units/artarch), and the D.B. Dowd Modern Graphic History Library (https://library.wustl.edu/spec/mghl).

Inquiry, Creativity and Synthesis

The Sam Fox School offers rigorous art and architecture education at both the undergraduate and graduate levels, within the unique context of an independent, nationally prominent research university.

The student body is composed of approximately 300 undergraduate and 40 graduate students in Art as well as 200
undergraduate and 280 graduate students in Architecture. In all, they represent 17 countries, 47 states and the District of Columbia. Roughly 30 percent of undergraduates pursue combined studies with another university area.

Both core and advanced studios integrate contemporary theory and practice. Among the innovative programs offered are the following:

- Multidisciplinary courses are co-taught by Art, Architecture, and Art History and Archaeology faculty. Recent seminars have explored the history of illustrated entertainment, combined urban theory with book design and production, and crafted a variety of online publications. Courses in exhibition studies are being offered, and a new program of exhibition studies is under development.
- International studios in Barcelona, Berlin, Buenos Aires and Florence are taught by Washington University faculty and offer a range of distinctive programs in art and architecture.
- Community projects include the University City Sculpture Series, which funds student-designed public artworks; WashUCity, a mentoring program for local high school artists; and Architecture’s Building Community/Community Building, which explores relationships between St. Louis’ inner city, nearby municipalities and outlying suburbs.

Uniting Creativity and Scholarship

The Sam Fox School boasts a unique combination of academic and intellectual resources.

The Architecture faculty includes practicing architects, urban designers and landscape architects as well as eminent architectural theorists and historians and a select number of international visitors. The resident, full-time faculty members have won national and regional awards for design excellence and planning, including more than two dozen from the American Institute of Architects alone.

Art’s full-time faculty members include prominent painters, sculptors, printmakers and mixed-media artists as well as leading illustrators, graphic designers, fashion designers and photographers. Design faculty have won numerous professional honors, and fine art faculty have been featured in more than 100 solo exhibitions and 300 group shows on five continents.

The nationally recognized Kemper Art Museum maintains a vital program of exhibitions, publications and educational events. Major thematic shows are drawn from institutions and private collections around the world, highlighting nationally and internationally emerging artists. The acclaimed permanent collection includes key works by modern and contemporary artists, from Henri Matisse, Pablo Picasso and Jackson Pollock to Christian Boltanski, Candida Hooper and Olafur Eliasson.

Public events include concerts, film screenings, lectures and discussions with distinguished visitors, and museum tours led by student docents. The museum also provides workspace for faculty- and student-curated exhibitions (usually relating to Sam Fox School curriculum). Courses in Art History and Archaeology further complement the critical and practical study of exhibitions while facilitating student involvement in professional curatorial projects.

A Comprehensive Campus

The Sam Fox School is housed in a comprehensive, six-building campus for design and the visual arts located on the eastern portion of the Danforth Campus. Conceived around a central courtyard, it both reflects and updates Washington University’s original campus plan, which was developed in 1895 by Frederick Law Olmsted, the founder of American landscape architecture.

Designed by the internationally acclaimed architecture firm KieranTimberlake, Anabeth and John Well Hall (https://samfoxschool.wustl.edu/buildingthefuture/#Well) houses state-of-the-art graduate studios, classrooms and digital fabrication spaces. With its abundant natural light and flexible, loft-style studios and workspaces, Weil Hall is a new locus for teaching, study, creation and critique. The William A. Bernoudy Architecture Studio — along with studios for graduate architecture, landscape architecture, urban design, illustration & visual culture, and visual art — houses programs for the Graduate School of Architecture & Urban Design and the Graduate School of Art. Over the last decade, both graduate schools, which include the nationally ranked Master of Architecture and Master of Fine Arts in Visual Art programs, have doubled in size. The Roxanne H. Frank Design Studio houses the Graduate School of Art’s new Master of Fine Arts in Illustration & Visual Culture program, which welcomes its first class in fall 2019.

Another component of Weil Hall — the luminous, two-story Kuehner Family Court — features a living green wall, skylights, and glass walls that allow for visual connectivity between studio spaces, providing students with a feeling of simultaneity and participation in a larger community. As the conceptual heart of the building, the Caleres Digital Fabrication Studio allows students and faculty across programs to execute complex projects using state-of-the-art tools. Other notable spaces include the Ralph J. Nagel Dean’s Suite and Weil Hall Commons, which includes a commissioned mural wall that features new works by alumni each year.

Earl E. and Myrtle E. Walker Hall brings together the undergraduate sculpture and painting areas. The sculpture area includes undergraduate studios, a wood shop, a metal shop, an installation room, and a faculty office, all on the ground level and first floor. The undergraduate painting studios are on the second floor.

William K. Bixby Hall, completed in 1926, has grown and changed to meet the needs of the students, faculty and administration of the College & Graduate School of Art. The building currently houses teaching and studio spaces for first-year art and design students, the undergraduate fashion design
and printmaking majors, and the Nancy Spirtas Kranzberg Studio for the Illustrated Book (http://samfoxschool.wustl.edu/node/3649). The Dubinsky Printmaking Studio, a state-of-the-art facility, is located on the first floor. On the ground floor, an administrative suite is home to student services and the finance office.

**Joseph B. Givens Hall** has been architecture's home since 1932. It features a variety of studio spaces, including large drafting rooms with 15-foot ceilings, large windows, and skylit ateliers. The building's compact and elegant Beaux-Arts design has at its heart a grand central stair often used for socializing and informal meetings. Givens Hall also houses a main lecture room, review spaces, classrooms, digital fabrication labs (http://samfoxschool.wustl.edu/node/3432), and administrative offices for the deans and directors of the Sam Fox School.

**Mark C. Steinberg Hall**, completed in 1960, was the first commission by Fumihiko Maki, then an architecture professor at Washington University. Formerly home to the Gallery of Art, the Department of Art History & Archaeology in Arts & Sciences, and the Art & Architecture Library, Steinberg Hall now houses Career Services and the undergraduate communication design and photography majors on the lower level; public spaces such as Steinberg Hall Gallery and Etta Eiseman Steinberg Auditorium on the main level; and architecture and communication design studios on the upper level.

The **Mildred Lane Kemper Art Museum** (http://www.kemperartmuseum.wustl.edu), completed in 2006, is another commission by Maki. The elegant, 65,000-square-foot limestone-clad structure — a gathering point for scholars and the general public — includes more than 10,000 square feet of exhibition space, art storage facilities, and the Florence Steinberg Well Sculpture Garden. The museum also houses the Kenneth and Nancy Kranzberg Art & Architecture Library and the Department of Art History & Archaeology.

**Visiting Artists and Architects**

The Sam Fox School invites distinguished academics and professionals to lecture (http://www.samfoxschool.wustl.edu/calendar/events/lectures), attend critiques and visit major studios. Recent visitors include the following:

**2018-19**

- Diana Al-Hadid
- Enrique Martínez Celaya
- Tod Williams and Billie Tsien Architects | Partners
- Winka Dubbeldam
- Richard Sennett
- Leah Dickerman
- Alfredo Payá
- Morehshin Allahyari
- Iñigo Manglano-Ovalle
- Gabriel Asfour
- Sandra Barclay and Jean Pierre Crousse
- David Humphrey
- Georgina Huljich
- V. Mitch McEwen
- Douglas Farr
- Cristiano Ceccato

**Degree Requirements**

To receive a degree from the College of Art, a student must meet the listed requirements and take academic courses with other undergraduates. Work in art can be combined with studies in architecture, business, the humanities, the natural and social sciences, and the other arts. Students may take these courses for educational and intellectual enrichment or in direct correlation with their primary interests.

The specified number of credit units in courses (https://courses.wustl.edu/Semester/Listing.aspx) in the areas listed below are required for the BFA and BA degrees, in addition to major and additional elective requirements. (Specific courses that meet these requirements are listed in the College of Arts & Sciences section.)

**Writing:** (C- or better) is required during the first year. Transfer students must fulfill the writing requirement by taking an approved course or by review of a writing portfolio. For more information, visit the College Writing Program website (https://collegewriting.wustl.edu).

**Humanities:** Humanities courses examine the human condition as it has been documented and expressed in both past and contemporary times. This area includes courses from literature (both in English and other languages), Classics, History, Philosophy and Religious Studies, as well as some courses in the creative arts such as Dance, Drama, Music and Writing. Courses designated “Art HUM” fulfill this requirement.

**Natural Sciences or Mathematics:** These courses help the student to understand the natural and physical world using objective and empirical observation and controlled experimentation. This area includes courses from Biology, Chemistry, Environmental Biology or Policy, Earth and Planetary Sciences, Math and Physics as well as some courses from departments such as Anthropology and Psychological & Brain Sciences. Courses designated “Art NSM” fulfill this requirement.

**Social and Behavioral Sciences:** These courses use qualitative and quantitative observation to explore the social environment, relationships with society and forms of human
behavior. This area includes courses from Anthropology, Economics, Education, International and Area Studies, Political Science and Psychological & Brain Sciences as well as courses from other areas, including interdisciplinary studies. Courses designated "Art SSC" fulfill this requirement.

**Art History and Visual Culture:** These courses provide context for art and design studies by examining the cultural and historical impact of artworks and artifacts. The BFA degree requires two one-semester introductory courses (Art-Arch 113 and Art-Arch 215) and three additional courses. The BA degree requires two courses of the student's choice. Courses designated "Art AH" or "Art VC" fulfill this requirement.

Students must also fulfill the following degree requirements:

This curriculum includes the capstone studio for all seniors in the College of Art. The capstone studio brings together all seniors in the studio areas and separately in the Communication Design and Fashion areas for critical dialogue beyond disciplinary boundaries and to guide preparation for each area’s culminating BFA exhibition.

* A maximum of 15 non-Washington University credits (including Advanced Placement, International Baccalaureate, and transfer credit) is permitted. No more than 9 credits may be applied to physical education, lessons, independent study and internships. No credits from University College will be accepted.

### Academic Honors & Awards

**Dean's List:** In recognition of exceptional scholarship, first-year, sophomore, junior and senior art students who have completed at least 14 credit hours (excluding courses taken pass/fail or audited) with a semester grade-point average of 3.5 or higher during a semester will be cited on the Dean's List.

**Latin Honors:** A student may be considered for the Bachelor of Fine Arts or Bachelor of Arts degree cum laude, magna cum laude or summa cum laude.

### Prizes and Awards

The Scholars in Art Program provides named scholarship funds that have been donated to the university by individuals or companies specifically for this purpose. Selection is based on financial need and academic achievement. There is no application process.

### Academic Scholarships

The College of Art offers one full-tuition and up to five partial-tuition scholarships each year solely on the basis of merit. Applicants for this award may also qualify for scholarship aid based on need and will be considered for this as well. The full-tuition Conway or Proetz Scholarship is awarded to an entering first-year student whose artistic and academic potential is judged outstanding by a faculty selection committee. The scholarship is supported by two endowed funds. The Fred Conway Scholarship was established in memory of a distinguished professor of painting in the College of Art. The Arthur and Esther Proetz Scholarship was established to honor the commitment and dedication to the arts of these two individuals.

Competition is national in scope, with finalists invited each year to visit the College of Art at the college's expense. At this time, one student is chosen to receive the full-tuition scholarship, and the other finalists are awarded partial scholarships. These are renewable for each year of undergraduate study, assuming continued academic and artistic excellence.

To be eligible, an applicant must be a high school senior who meets the following criteria:

1. Ranks high in the senior class; and
2. Has SAT or ACT scores in the upper range.

To enter the competition, the applicant must follow the usual admission application procedures by completing a Washington University first-year application and sending a digital portfolio of artwork. Portfolios should be submitted through Slideroom.

### Awards and Prizes

Several awards are made each year to art students who are selected by the faculty. These awards and prizes include the following:

- The Paul Edward Birdsall Award in Visual Communications
- The Susan Sanders Block Silver Ripper Award in Fashion Design
- The Belle Cramer Award in Printmaking
• The Eda L. and Clarence C. Cushing Memorial Prize in Painting
• The Anne Fuller Dillon Prize in Graphic Communications
• The Mary Cowan Harford Award in Watercolor
• The Marsha Hertzman Blasingame Award in Printmaking
• The Morris M. Horwitz Award in Photography
• The Hazel H. Huntsinger Memorial Prize in Painting
• The Caroline Risque Janis Prize in Sculpture
• The Nancy Spirtas Kranzberg Illustrated Book Award
• The John J. and Marjory B. Lewin Photography Prize
• The Dominic Michael Silver Scissors Designer of the Year Award
• The John T. Milliken Foreign Travel Award
• The Al Parker Award for Excellence in Illustration
• The Jayne Ball Rousseau Memorial Prize in Graphic Communications
• The Margo Trump Memorial Prize in Graphic Communications
• The Jack Unruh Award in Illustration
• The Jeffrey Frank Wacks Scholarship Award
• The Lillie Willemsen Prize

Policies

To receive the Bachelor of Fine Arts or Bachelor of Arts degree, students must meet the requirements of the College of Art and take academic courses with other undergraduates. Work in art can be combined with studies in architecture, business, humanities, natural and social sciences, and the other arts. Students may take these courses for educational and intellectual enrichment or in direct correlation with their primary interests. Courses in University College do not count toward degree requirements.

No more than 15 units of pre-matriculation or transfer credit from all sources — Advanced Placement (AP) examinations, International Baccalaureate (IB), and British Advanced (A) Levels — will be awarded.

Students wishing to transfer credit for course work completed at another institution must bring a full catalog description of the course(s) to the Sam Fox School Registrar's Office for preapproval. Only with preapproval, and upon receipt of an official transcript indicating a grade of C or better, will courses be considered for transfer. Grades for transfer courses will not appear on the student’s Washington University record and will not figure into the student’s grade-point average. College courses taken to earn credit for high school graduation will not be considered for transfer. Washington University does not transfer credits for courses taken online. No transfer credit will be accepted for courses taken while a student is suspended from Washington University for violations of the University Student Judicial Code or the Academic Integrity Policy.

Sam Fox School of Design & Visual Arts Grievance Procedures

The dynamic and creative studio culture at the heart of the Sam Fox School strives to be safe and inclusive for all members of our community. Our faculty, staff, and students join together in their commitment to creating learning environments of mutuality and respect. When concerns or disagreements arise about conduct, grading, or other matters in the Colleges of Art and Architecture, policies exist for pursuing proper resolution.

Grade Dispute Policy

The Sam Fox School aims to provide each student with a fair assessment of their academic work and studio. Students have the right to dispute their overall course grade (not individual assignments) if they believe that grade does not accurately reflect the quality of their work. A grade dispute must be submitted to the faculty member who assigned the grade within 30 days of receipt of the grade. The Sam Fox School stresses that every effort to resolve such a dispute be made by the faculty and student involved. A student’s eligibility for advancement in sequential course work requires timely resolution of the grade dispute. If the student is a graduation candidate, the dispute process must comply with the Intent to Graduate submission deadlines set forth by the Office of the University Registrar or else the degree conferral will be delayed by one semester or until resolved.

In general, the dispute process will occur and be resolved as follows:

1. The student presents their question about the grade in writing to the faculty member and clearly states the reasons for questioning the grade.
2. The faculty member and the student review the grading procedures as stated in syllabus and discuss the determining factors of the student’s grade.
3. If the case is not resolved between the student and the faculty member, the student may put forth their complaint in writing with supporting evidence to the chair* of the academic program, with a copy given to the faculty member involved with the dispute. The student should provide all of the course syllabus and materials relevant to the assigned grade within two weeks of the complaint. If a conflict of interest exists between the student and the chair (e.g., the chair is teaching the course), the case will be referred to another chair in the Sam Fox School or to the director of the college.
4. The chair* of the academic program will review the materials. The chair will resolve the dispute by working with the faculty member and the student to arrive at a determination.

* In the case of the MFA program, the role of the chair is fulfilled by the director of the Graduate School of Art.
Integrity and Ethical Conduct

Washington University and Sam Fox School of Design and Visual Arts are committed to the highest ethical and professional standards of conduct and consider these to be integral to their mission of the promotion of learning. To maintain these standards, the university relies on each community member’s ethical behavior, honesty, integrity, and good judgment. Each community member should demonstrate respect for the rights of others, and each community member is accountable for their own actions. Washington University policies state that members of the university community can expect to be free from discrimination and harassment. Students, faculty, staff, and outside organizations working on campus are required to abide by specific policies prohibiting harassment, which are posted on the Compliance and Policies (https://wustl.edu/about/compliance-policies) page of the university’s website. Should a situation arise in which a member of our community believes they have cause to file a grievance, there are two categories of grievance to consider: academic and non-academic. Academic grievances can either be when a student challenges a course grade or when a fellow student or faculty member feels a matter of academic integrity is at issue. Student grievances filed to challenge a grade that the student feels has been given incorrectly must follow the procedures outlined in the Grade Dispute Policy above. Academic integrity grievances are made when a faculty member or fellow student feels a student has compromised the environment of honesty and ethics in the school. Academic integrity infractions follow the procedures laid out in the Sam Fox School and University policies (https://samfoxschool.wustl.edu/node/5766) and are managed in the Sam Fox School by the Academic Integrity Officer, Assistant Dean Cris Baldwin. Please refer to Washington University’s Academic Integrity Statement (https://studentconduct.wustl.edu/academic-integrity) for additional information.

Non-Academic Concerns

If a member of our academic community feels that the ethical and safe environment of the classroom has been compromised, for whatever reason, they may seek guidance through the school’s Faculty-Student Mediator, Professor Jeff Pike. Students may also consult Washington University’s Grievance Policy and Procedures for Allegations by Undergraduate Students Against Faculty (https://wustl.edu/about/compliance-policies/governance/grievance-policy-allegations-undergraduate-students-against-faculty). In addition, University Resources available for support include the following:

- Title IX (https://titleix.wustl.edu) (for issues related to discrimination, sexual harassment, and sexual violence)
- Mental health concerns (https://shs.wustl.edu/MentalHealth/Pages/default.aspx) (Habif Health and Wellness Center)
- Drug and alcohol concerns (https://shs.wustl.edu/HealthAndWellness/HealthTopics/Pages/Substance-Abuse.aspx) (Habif Health and Wellness Center)
- Immediate physical/mental health concerns (https://police.wustl.edu/Pages/Home.aspx) (Washington University Police Department)
- Center for Diversity & Inclusion (https://diversityinclusion.wustl.edu/brss) (for issues related to bias, prejudice, or discrimination)

Attendance

The College of Art allows the professor of each course to decide how many absences a student may have and still pass the course. Professors are expected to give reasonable consideration to unavoidable absences and to the feasibility of making up work that has been missed. Students are expected to explain to their professors the reasons for any absences and to discuss with them the possibility of making up missed assignments.

Units and Grades

In the College of Art, one semester unit of credit is assigned for every two hours of work completed in class and one hour of work completed outside of class per week for one semester. A student’s undergraduate grade-point average is determined by dividing the number of grade points earned by the number of semester units for which grades of A, B, C, D or F have been recorded. Grades of P# and F# received for courses taken on a pass/fail basis are not figured into the GPA. A grade of C- or better must be received in major classes during the second, third and fourth years to count toward degree requirements. Students must maintain a minimum 2.0 cumulative GPA in order to graduate.

A grade point is a measure of quality assigned to units according to the following system:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Meaning</th>
<th>Points per Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>

133
A student whose semester GPA is below 2.0 (a grade of C) or who falls below a “pace” of 66 2/3 percent (for the number of credits earned divided by the number of credits attempted) will be placed on academic probation. If, after the following semester, the semester GPA is still below 2.0 or if the pace is still below 66 2/3 percent, the student may be ineligible for normal advancement or may be suspended. Although the College of Art desires to give all students the opportunity to prove themselves, it is not in the best interest of either the students or the college to permit students to continue indefinitely in educational programs in which they are not producing satisfactory results.

**Leave of Absence**

A student may request a leave of absence for one semester at a time for up to one year. If this is granted, the student may re-enroll at the end of that time without going through further admission or readmission procedures. A Request for Leave of Absence form (available in Bixby Hall, Room 1) must be completed before a leave of absence will be granted. In the case of a medical leave of absence, a letter of clearance is required from Habif Health and Wellness Center before the student will be permitted to re-enroll.

**Financial Obligations**

Students are responsible for fulfilling their financial obligations to the university. If a student account becomes overdue, a late payment fee will be assessed and a hold will be placed on the account. Students with a poor payment history may be restricted from utilizing certain payment options or receiving tuition remission until course credit has been earned. Non-payment of tuition and other expenses due to the university will be cause for exclusion from class or refusal of graduation, further registration, or transfer credit. In addition, students are liable for any costs associated with the collection of their unpaid bills, including but not limited to collection agency costs, court costs, and legal fees. Past due amounts can also be reported to a credit bureau.

**Withdrawals and Refunds**

A written request for a refund must be submitted to the Sam Fox School Registrar’s Office for consideration. Approval is required to officially withdraw from the university. Tuition adjustments will be processed based on information received, and refund checks will be issued only after the fourth week of classes. Material fees for art courses will not be refunded after the course drop period for the semester. For any student whose medical condition makes attendance for the balance of the semester impossible or medically inadvisable, the university will make a pro rata refund of tuition as of the date of withdrawal when that date occurs prior to the twelfth week of classes, provided that the condition is verified by the Habif Health and Wellness Center or a private physician. The date of withdrawal may correspond to the date of

<table>

</tr>
<tr>
<td>Z</td>
<td>Unsuccessful audit</td>
</tr>
<tr>
<td>N</td>
<td>No grade submitted</td>
</tr>
<tr>
<td>X</td>
<td>Examination not taken</td>
</tr>
</tbody>
</table>

Grades of I, X and N will become grades of F if the deficiency is not made up within the next two semesters of residence. For a course that is repeated, students earn credit and grade points based on the second grade received.

### Incomplete Grades

If, following the last day for withdrawal from courses, a student experiences medical or personal problems that make the satisfactory completion of course work unlikely, they may request a grade of I (incomplete) from one or more instructors and should take the following steps:

1. Discuss the request with the instructor before the final critique or portfolio review.
2. With the instructor's consent, complete an Incomplete Grade Petition, which is then signed by both the instructor and the student.
3. Return the signed petition to the associate dean of students for final approval.

### Pass/Fail Option

A student may take one non-art course per semester on a pass/fail basis (exclusive of courses that must be taken pass/fail). Any additional courses taken pass/fail in a given semester will not be counted toward the degree. All courses with an F10 or F20 department number must be taken for credit, unless otherwise noted. Any course taken to fulfill the Writing requirement must be taken for credit.

### Repeating a Course

If a student retakes a course, both registrations will show on the transcript. The symbol “R” will appear next to the grade for the first enrollment; the grade and units in the second enrollment will be used to calculate the GPA. No student may use the retake option to replace a grade received as a sanction for the violation of the Academic Integrity Policy. A retaken course must be taken for the same grade option as the original course. Courses completed at institutions other than Washington University are not applicable under this policy.

### Academic Probation and Suspension

Students are expected to proceed at a pace that enables them to finish their degree within the appropriate time limit. For degrees in the College of Art, this is usually eight semesters.
hospitalization or the date on which the medical condition was determined.

**Major Declaration and Transfer**

A student declares a major simply by registering for one using the university’s online registration system (WebSTAC). A student must declare a major no later than the beginning of the spring semester of the sophomore year. Students requesting to change their major must be in good academic standing. Credit transfers between majors are at the discretion of the accepting major faculty.

**Study Abroad**

The Sam Fox School and Washington University offer many undergraduate study abroad programs. For more information, visit our International webpage (http://samfoxschool.wustl.edu/node/4133).

**Digital Technologies**

Technology plays a critical role in the educational experience. The College of Art is committed to the integration of relevant technology into the curriculum. Students are required to have a specified computer and software beginning in the first semester of study. Supplemental purchases (e.g., monitors, scanners, tablets) may be necessary as students advance and declare a major. Information is available on our Digital Technologies webpage (http://samfoxschool.wustl.edu/node/6747).

**Retention of Student Work**

The College of Art reserves the right to hold a student’s work(s) for exhibition purposes and holds reproduction rights of any work(s) executed in fulfillment of course requirements.

**Administration**

**College of Art**

Amy Hauft  
Director, College and Graduate School of Art  
Jane Reuter Hitzeman and Herbert F. Hitzeman Jr. Professor of Art  
MFA, School of the Art Institute of Chicago

**Majors (directory)**

Below is a list of majors offered by the College of Art. Visit the Majors section of the College of Art (p. 80) in this Bulletin to view more information about a specific major.

- Bachelor of Fine Arts (BFA) majors are offered in:
  - Art — with optional concentrations in:
    - Painting
    - Photography
    - Printmaking
    - Sculpture
  - Communication Design
  - Fashion Design

- Bachelor of Arts (BA) majors are offered in:
  - Art
  - Design — with optional concentrations in:
    - Communication
    - Fashion

**Minors (directory)**

Below is a list of minors offered by the College of Art. Visit the Minors section of the College of Art (p. 82) in this Bulletin to view more information about a specific minor.

- Art
- Design
- Creative Practice for Social Change
- Human-Computer Interaction

Visit the Sam Fox School (http://samfoxschool.wustl.edu/node/10123) website for specific requirements.

MFA, School of Visual Arts
Arts & Sciences

The College of Arts & Sciences is the largest undergraduate program at Washington University, offering students the most diverse range of courses in more than 50 different fields, ranging from anthropology and biochemistry to mathematics and performing arts.

The college draws on the rich and varied resources that this distinguished university has to offer: a creative and internationally recognized faculty, a diverse and able student body, a superior library, and excellent opportunities for advanced study. As the center of intellectual life on the campus, the College of Arts & Sciences benefits from and contributes to the studies of architecture, art, business, engineering, law, medicine and social work.

Of central importance to the life of the college is the quality of teaching. Undergraduate students have the opportunity to learn from and work beside stimulating teacher-scholars who are leaders in their fields. Our nationally recognized faculty, which numbers more than 600, is made up of artists, biologists, chemists, economists, historians, philosophers and poets, all of whom bring the excitement and diversity of new ideas into the classroom.

Governance

The College of Arts & Sciences is bound by the charter of the university and ultimately responsible to the University Board of Trustees, which delegates to the chancellor the administration of the university. In turn, the chancellor delegates to the deans and faculty of the College of Arts & Sciences the responsibility for the college's internal governance.

Because the college is continually reassessing its objectives and policies, faculty and students alike may take the initiative in proposing changes in curriculum and policies. New programs or proposed modifications are reviewed by committees with members who represent the diverse points of view of the academic community.

By action of the faculty of Arts & Sciences in January 1969 (revised in May 1971), the ArtSci Council shares joint responsibility with the faculty for collegewide degree requirements, the grading system, and those policies that directly affect the lives of students. The ArtSci Council appoints representatives to various standing and ad hoc college committees.

The Curriculum

The College of Arts & Sciences fosters in its students the quintessential qualities of a liberal arts education: a heightened spirit of inquiry, an ability to organize and synthesize information, skills in written and oral expression, and a familiarity with the ways in which thoughtful men and women discover those commitments and values that make life worthwhile. By incorporating the college’s manifold intellectual resources — people, libraries, laboratories and studios — Arts & Sciences students "learn how to learn," developing both the flexibility and the habits of thought necessary to the ever-evolving worlds of work and global citizenship.

The college’s academic program has two principal objectives. First, it provides students with an understanding of the range of human knowledge and attainment by developing an appreciation of the characteristic problems, achievements and limitations of the various fields of human endeavor. The curriculum works to ensure this understanding by requiring a minimum amount of study (9 units/three courses) in each of three broad areas of study — the Humanities; Natural Sciences & Mathematics; and Social & Behavioral Sciences — and three to four courses (9-12 units) in a fourth area, Language & Cultural Diversity. Collectively, these area requirements make up approximately one-third of the units needed to graduate.

Second, the college’s academic program gives students the opportunity to study a subject or area in a sustained, intensive way. After a period of initial investigation (typically two to three semesters) during which students explore the richness inherent in the various fields of study, a student declares an area of concentration; the major. The college offers more than 30 traditional subject majors — such as chemistry, English and music — and more than 20 interdisciplinary majors — such as American culture studies; international and area studies; and women, gender, and sexuality studies. Students also may develop an individualized special major.

In all departments, students are encouraged to proceed as their strengths and interests lead them. Placement examinations are used in many departments to enroll undergraduates in courses at the levels their previous training warrants; in other departments, proficiency examinations are available (visit the Proficiency and Placement Examinations (p. 20) section of this Bulletin or the college's placement webpages (http://college.artsci.wustl.edu/policies/placement_credit)).

The degree requirements and policies in the 2019-20 Bulletin apply to students entering Washington University during the 2019-20 academic year. To consult catalogs from prior years, refer to our Prior Bulletins (http://bulletin.wustl.edu/prior).

Academic Advising

To assist students with their undergraduate planning, the college provides a closely coordinated academic advising program. Matriculating students have a specially selected four-year academic adviser with whom they will meet regularly during the first year to help with the transition into the university and to help select courses for the fall and spring semesters. After the first year, students meet each semester with their four-year academic advisers prior to registration to discuss interests, goals and academic course work. Students are encouraged to consult with...
their four-year academic advisers any time they need assistance throughout the school year.

Upon declaring a major, students are also assigned a major adviser in the department of their principal area of study. The extent of the adviser’s assistance depends on a student’s individual needs and wishes. Consultation with a major adviser, in addition to the four-year academic adviser, is required each time a student prepares to register for courses.

Students with problems or questions related to academic issues are invited to visit the College Office at any time. One of the deans is available every day on a walk-in basis to answer questions or to provide references to an appropriate source of help. Important among these sources are individual faculty members with particular specialties who may be able to answer the student’s questions. In addition, the Writing Center, Career Center, Student Health Services, and the Learning Center provide a wide range of services, including individual and group instruction, interest tests and advice, individual sessions with trained counselors about educational and personal problems, and information about the improvement of learning skills.

Pre-Matriculation Credit

Students may earn pre-matriculation credit for college-level courses completed before enrollment at Washington University as a first-year student. Sources for pre-matriculation credit include Advanced Placement (AP) examinations, International Baccalaureate (IB), British Advanced (A) Levels, course credit earned by proficiency (e.g., back credit), and college credit earned after the sophomore year of high school that was not applied to high school graduation. Although all accepted pre-matriculation work is noted on the transcript so that the student may go directly into advanced courses, the maximum number of pre-matriculation units of credit awarded is 15. Pre-matriculation course work does not fulfill distribution requirements, but it may fulfill requirements for majors and minors. If a student enrolls in and completes a course equivalent to that for which pre-matriculation credit has been granted, the pre-matriculation units for the course in question will be removed from the student’s record. For more information, please refer to the Pre-Matriculation Units (p. 23) section on the Admissions Procedures page of this Bulletin.

First-Year Academic Programs

First-year students may choose one of the following programs that provides a basic structure for their course selection. Each option provides an effective means of discovering personal and intellectual interests.

Ampersand Programs

Ampersand Programs (p. 204) are multisemester programs of linked seminars designed to bring students with similar intellectual interests into a close mentoring relationship with members of the faculty. Ampersand Programs provide a coherent, group-oriented learning experience, while still allowing time for other electives. Although Ampersand Programs are encouraged, they are not required.

Standard Programs

Students who have already made a firm commitment to a particular discipline in the humanities, natural sciences and social sciences or who are uncertain about what they would like to pursue also have a rich array of academic choices to be made throughout their college careers. The course schedule can be either widely exploratory or oriented toward a particular objective, such as pre-health studies. Students who are still exploring their options are strongly encouraged to consider enrolling in a First-Year Seminar or another first-year opportunity when selecting courses in consultation with their four-year academic advisers. First-Year Seminars are single-semester, small-group courses that enable entering students to work closely with peers and faculty around an exciting topic of inquiry; First-Year Opportunities are single-semester, 1- or 2-unit courses designed to highlight interesting research while complementing other elective course work.

Major Fields of Study

At a minimum, a major consists of 18 advanced (300-level and above) units, all letter-graded and completed with at least a C-. Individual departments may specify additional units or stricter minimum-grade requirements. Students should refer to the department program pages in this Bulletin for program-specific requirements.

A student graduating with a Bachelor of Arts may receive no more than a total of two majors and a minor or one major and two minors.

Major declaration is initiated online through WebSTAC (https://acadinfo.wustl.edu/WebSTAC.asp). The relevant department or interdisciplinary committee will receive notification of the student’s request to declare the major. The declaration of major will not be processed until the student completes any action required by the department as indicated in the WebSTAC application. When the declaration of major is complete, the new major will appear in the Current Programs section of the student’s Major Programs page in WebSTAC, and an adviser for the new major will be assigned by the department.

Second Majors

Students may complete more than one major, including a second major in the Olin Business School or in the McKelvey School of Engineering. A second major is not required to earn the degree. For students matriculating pre-2015: If a student has two majors, each major must have 18 upper-level units of credit independent of the other. Individual academic departments may enforce a stricter rule regarding the double-counting of courses between majors, second majors and minors.
For students matriculating in 2015 and beyond: If a student has two majors, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both majors. All advanced (300- and 400-level) courses must be unique to each major; in other words, no advanced course may “double-count” for the course work needed to fulfill the minimal requirements for either major. Should both major programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.

Students in business, engineering, architecture or art may choose to pursue a second major in the College of Arts & Sciences. These students will receive one degree, a BS or BFA, with two majors: one in the professional school and one in the College of Arts & Sciences.

Minor Fields of Study

Students who develop a significant interest in one or more fields of study beyond the major may choose to pursue a minor in those fields. A minor is not required to earn the degree. Minors may be fulfilled in an area closely related to the major or, to add more breadth to the student's educational program, in a very different area of study. A minor typically comprises 15 to 21 units of credit, all letter-graded and completed with a grade of C- or better. At least 9 of these units of credit must be at the 300 level or above, and at least half of the courses must be completed in residence at Washington University. Specific course requirements for a minor are determined by each department or program and are detailed in the department program pages in this Bulletin.

For students matriculating pre-2015: If a student has a major and a minor, the major must have 18 upper-level units independent of the minor. The minor must have 12 units independent of the major. If a student has two minors, each minor must have 12 units independent of the other.

For students matriculating in 2015 and beyond: If a student has a major and a minor or has two minors, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both programs. All advanced (300- and 400-level) courses must be unique to each program; in other words, no advanced course may “double-count” for the course work needed to fulfill either program’s minimal requirements. Should a student’s major and minor programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.

In addition to pursuing the broad array of minor programs offered through the college, students may undertake minors in architectural studies or art and business as well as in computer science, electrical engineering and systems engineering in the McKelvey School of Engineering.

Minor declaration is initiated online through WebSTAC (https://acadinfo.wustl.edu/WebSTAC.asp). The relevant department or interdisciplinary committee will receive notification of the student’s request to declare the minor. The declaration of minor will not be processed until the student completes any action required by the department as indicated in the WebSTAC application. When the declaration of minor is complete, the new minor will appear in the Current Programs section of the student’s Major Programs page in WebSTAC.

The Special Major and Special Minor

On some occasions, a student’s interests may fall in the intersection of two or more formally organized major programs, in which case a student may propose a special major that brings the related course work together. Students who propose a special major should be prepared to undertake honors-level work, as all special majors must complete a capstone project of 3 to 6 units during the senior year.

Students interested in creating a special major or minor must confer with the dean charged with coordinating this program. After consultation, students must submit to the coordinator a formal proposal that consists of the following: (1) a description of the program of study, including an explanation of the program’s integrating idea; (2) a list of courses to be taken; (3) a letter of support from the proposed academic adviser; and (4) a letter of support from a faculty member in a second, related department who has approved the proposal.

A proposal for a special major or minor must be submitted no later than the fifth semester of undergraduate enrollment. The Committee on the Special Major and Minor is responsible for final action on these proposals.

Special Academic Options

Overseas Study Programs

The guiding principle of international study through the College of Arts & Sciences is to encourage students to acquire the broad cultural knowledge, languages and practical skills to enable them to participate fully in a global society.

For information about the 100-plus study abroad programs offered in more than 50 countries, visit the Overseas Programs website (http://overseas.wustl.edu) or the webpages of specific departments and programs.

Individual and Group Performance

Opportunities for individual and group performance include participation in various musical organizations sponsored by the Department of Music (e.g., symphony orchestra, wind ensemble, mixed choir) and in courses offered in physical education. To encourage students to pursue such physical, social and creative activities, the college allows up to 12 units of credit toward the bachelor’s degree for the successful completion of enrollment in individual and group performance. Exceptions to the minimums can be made for students majoring in departments that require...
a large number of performance courses, such as dance, drama and music.

**Internships**

Students participating in internships that contribute to their academic or professional development may earn credit for those internships. Registration in an internship for credit is conditional upon the satisfactory completion of the Internship Learning Agreement form provided by the College Office and the approval of this completed form by the College Office, the faculty sponsor and the internship sponsor.

Credit awarded for an internship corresponds to the time spent in work activities. The student is expected to work 45 hours of internship experience over a period of six to eight weeks for each unit of credit. Registration for 1 to 3 units of credit is possible.

Students may complete the work for an internship over the summer and receive credit during the subsequent semester. Any internship completed this way, however, must satisfy all requirements stated here. The learning agreement must be submitted and approved prior to the student beginning work at the internship site; therefore, credit cannot be awarded retroactively.

Internship courses are offered for credit/no credit grades only and therefore count toward the maximum of 24 credit/no credit units that may be applied toward graduation requirements. Internships do not count toward the advanced units requirement and may count toward the major only with departmental approval. Students may not receive more than 3 units of internship credit in any semester and may earn no more than 6 units of internship credit toward the 120 units required for graduation. (These regulations, along with all others governing the AB degree, are detailed on the Arts & Sciences Academic Regulations page (p. 911).)

**Part-Time Study: Nontraditional Students**

The university recognizes that, for certain students with high educational goals, full-time study may not be feasible or appropriate. Employment in demanding positions, extensive family responsibilities or other obligations may prevent an otherwise serious and competent student from completing the bachelor's degree at a rate of 15 units a semester. With their varied experiences outside the university, such students make valuable contributions to the classroom environment as they pursue programs of study suitable to their special circumstances. Please contact University College (http://bulletin.wustl.edu/undergrad/ucollege) at 314-935-6700 for more information about part-time study.

**Tuition Reduction**

Students who have completed eight full-time semesters in the College of Arts & Sciences and paid full tuition for eight semesters may seek reduced tuition for a ninth or subsequent semester, provided that they have fewer than 12 units to complete. Students must petition the Dean's Office (http://college.artsci.wustl.edu/contact), College of Arts & Sciences, Cupples II Hall, Room 104. Students who successfully petition for tuition adjustment for the ninth or subsequent semester will pay only for the units of credit that they attempt (proportionate to the full-time standard for tuition).

**Army ROTC and Air Force ROTC**

Students have the opportunity to participate in either the Air Force ROTC Military Science (p. 1079) program or the Army ROTC Military Science (p. 1079) program. Scholarship information for both programs can be found in the Scholarship Funds (p. 32) section of this *Bulletin*. For information about counting ROTC course work toward the degree, refer to the Academic Regulations (p. 911) page of this *Bulletin*.

**Combined Undergraduate Degree Opportunities**

Students may work toward the Bachelor of Arts degree in the College of Arts & Sciences while simultaneously earning another undergraduate degree in business, engineering, architecture or art. Students undertaking such a "dual-degree" program must earn 150 units, 90 of which must be in the College of Arts & Sciences; they must also fulfill the requirements for a major in each of the two schools and complete the distribution requirements for both schools. Interested students should contact both a dean in the college and the designated dean in the appropriate professional school as early as possible during their undergraduate careers.

**Majors Across Schools**

Students may earn an AB degree with a first major in the College of Arts & Sciences and a second major in business or engineering by fulfilling all the distribution requirements for the AB degree and completing the requirements both for the first major in Arts & Sciences and for the second major in business or engineering. With careful planning, this can be accomplished within the 120 units required for the AB degree, although students should keep careful count to ensure that they complete at least 90 units of credit in the College of Arts & Sciences. For further information about second majors in business, visit the Olin Business School website (http://olin.wustl.edu/); for further information about second majors in engineering, visit the McKelvey School of Engineering website (http://engineering.wustl.edu).

**The Accelerated AB/AM Program**

Exceptional students who bring to the university a definite commitment to a field of study in the College of Arts & Sciences and a demonstrated capacity for intensive work may be able to complete a Master of Arts (AM) degree in a one-year accelerated program after completing the AB degree. This accelerated program, which begins each year in the fall semester, is open
exclusively to students who graduated during the immediately preceding December, May or August. Applications may be submitted anytime during the senior year through August 1, and Graduate Record Examination (GRE) scores are not required. The application for admission must be made to the department, which forwards the application and recommendation for admission to the Graduate School. Application forms are available on the Graduate School's website (https://graduateschool.wustl.edu/accelerated-abam-program).

Some departments may not participate in this program, and some departments that do not otherwise offer a master’s degree may provide this opportunity to Washington University undergraduates. Contact the relevant department for more specific information about its admission policies and requirements. Students admitted to the program will be regular, full-time graduate students enrolled in the Graduate School at Washington University.

Most AM degrees in Arts & Sciences require 36 credits. The accelerated program allows Washington University undergraduates to complete a master’s degree in one academic year by applying up to five 3-credit courses or four 4-credit courses (a maximum of 16 units), taken as an undergraduate at the 400 level or above, toward the master’s degree requirements. For master’s programs requiring fewer than 36 units, three courses at the 400 level or above (9-12 units) may be applied toward the AM degree. These undergraduate courses must be in an appropriate discipline, approved by the department, and completed with a grade of B or higher.

The AB and Master’s Degrees in the Professional Schools

The College of Arts & Sciences — in conjunction with the Olin Business School, the McKelvey School of Engineering and the Brown School — offers joint (3-2) degree programs. If accepted into a 3-2 degree program, a student may work toward the AB degree during the initial three years at Washington University and toward the professional degree during the fourth and fifth years. A student electing to do a 3-2 program must complete a combined 150 academic units to earn both the AB degree and the professional degree.

Prior to entry into a 3-2 program, a student in the College of Arts & Sciences must complete the following:

1. At least 90 academic units of course work offered in the College of Arts & Sciences;
2. All distribution requirements;
3. All requirements for an Arts & Sciences major; and
4. At least 18 of the 30 required units in upper-level course work.

A transfer student who seeks the AB degree under this plan must also complete at least four semesters in full-time residence in the College of Arts & Sciences at Washington University.

Thirty units of graduate academic credit taken during the fourth year will complete the 120 academic units required for the AB degree. The professional degree is earned when 150 combined academic units and all degree requirements for the professional school are completed. A student must be recommended by the faculty of the professional school to the dean of the College of Arts & Sciences in order to receive the combined degree.

Students interested in a joint 3-2 degree program should do the following: (1) discuss degree options with a dean in the College of Arts & Sciences and with a dean in the professional school; (2) request the Eligibility Certification Form in the College of Arts & Sciences; and (3) submit the completed Eligibility Certification Form with the application for the 3-2 program to the professional school early in the spring semester of the junior year.

AB joint master's degree students are formally admitted into the graduate program of the professional school for a joint program for the fourth year. Students accepted into 3-2 joint programs will be prime in their undergraduate division for the fourth year; the professional school program will not become prime until after the eighth semester of study as an undergraduate (or after early graduation with a bachelor's degree). In the fifth year, the professional program will become prime.

Students in 3-2 programs will pay the standard full-time undergraduate tuition rate for the fourth year, except for those enrolled in the MBA program, which charges a premium above the undergraduate tuition rate. Students will receive financial aid for the fourth year based upon their eligibility for undergraduate financial aid awards, including Pell Grants.

There is no commitment for undergraduate financial aid beyond the fourth year of study; students in 3-2 programs may apply to the professional programs (Social Work, MBA) for graduate student financial aid for study in the professional program beyond the fourth year.

This policy applies to all undergraduates enrolled in Washington University day school bachelor's programs who have completed less than the equivalent of eight semesters of academic work toward their bachelor's degree. If these students enroll in any Washington University graduate or post-baccalaureate degree program to begin course work toward a graduate degree during their fourth year before they have been awarded a Washington University bachelor's degree or completed the equivalent of eight semesters of undergraduate enrollment, they are covered by this policy.

This policy applies to current 3-2 programs involving Washington University bachelor’s and master's programs and to any future 3-2 programs.

Olin Business School

A five-year program combining an undergraduate degree and a master's degree is available to a select number of students.
McKelvey School of Engineering

The combined AB/Master's Program is designed to enable students in the College of Arts & Sciences to pursue a coordinated five-year program of study leading to an AB degree in the College of Arts & Sciences and a master's degree in the McKelvey School of Engineering.

Social Work

The Social Work 3-2 program (http://msw.wustl.edu/3-2) leads to an AB degree from the College of Arts & Sciences and an MSW degree from the Brown School. Interested students should apply to the Brown School during the first semester of their junior year. Students from all academic disciplines with an interest in social work are encouraged to apply. For further information, visit our website.

Public Health

The Public Health 3-2 program (http://mph.wustl.edu/3-2) leads to an AB degree from the College of Arts & Sciences and an MPH degree from the Brown School. Interested students should apply to the Brown School during the first semester of their junior year. Students from all academic disciplines with an interest in public health are encouraged to apply. For further information, visit our website.

Undergraduate Pre-Professional Preparation

Students planning to pursue pre-professional studies should refer to the general recommendations given below. For more specific recommendations, visit the appropriate webpages.

Architecture

Please refer to the College of Architecture (p. 40) section in this Bulletin.

Business Administration

Students in the College of Arts & Sciences are welcome to consult with the associate dean for the undergraduate program in the Olin Business School concerning any aspect of preparation for careers in business. For more information, visit the Olin Business School website (http://olin.wustl.edu).

Law

The two most significant factors law schools use in determining whom to admit for legal study are the undergraduate GPA (taking into consideration the difficulty of courses attempted and the breadth of study) and the score on the Law School Admission Test (LSAT). Admission to law school requires a bachelor's degree.

There is no required set of courses for pre-law study at the undergraduate level. Many law school applicants have majors in economics, English, history, philosophy and political science, but law schools also seek students with undergraduate majors in science, business, engineering and other disciplines. Whatever areas pre-law students choose to emphasize in their undergraduate studies, they should take courses that require significant amounts of writing, that develop analytic thinking skills, that encourage the application of principles or theories to new situations, and that require the original writing and revision of written work in response to comment and critique. It is also important to learn to read and analyze complex written material and to develop sound research skills.

Economics, history, philosophy and political science courses can help students to develop an understanding of the traditions behind and the development of the U.S. legal system. Logic, statistics and accounting courses also provide valuable background for legal study and the practice of law.

The pre-law advisers in the College of Arts & Sciences are available to help students plan a course of study and prepare a strategy for applying for admission to law school. For more information, visit the pre-law website (https://artsci.wustl.edu/resources/prelaw-advising).

Medicine

Pre-medical students in the College of Arts & Sciences of Washington University complete the bachelor's degree before admission to a medical school. In addition to fulfilling the requirements for the AB, pre-medical students must fulfill the entrance requirements of the medical schools to which they plan to apply. Specific requirements, which may vary, are summarized in the Medical College Admission Requirements handbook, published annually online by the Association of American Medical Colleges.

Pre-medical students must demonstrate high academic achievement, and they must possess the character, responsibility and level of commitment suitable for a career in medicine. Although requirements for specific medical schools are increasingly varied, most schools have traditionally required at least one year each of English, general biology, inorganic chemistry, organic chemistry and physics, with laboratory components traditionally required for all of the core science courses. In addition, students preparing to take the Medical College Admissions Test (MCAT) should take one semester each of biochemistry, psychology and sociology. Medical schools also encourage applicants to develop a broad intellectual background that includes the humanities, the social and behavioral sciences, and a demonstrated understanding of and appreciation for social and cultural diversity.

Students interested in the health professions may choose a major in any field — the humanities, the social sciences or the natural sciences — as long as they complete the pre-medical requirements. Any student planning to apply to MD/
PhD programs is strongly advised to major in one of the natural sciences and to begin gaining bench research experience no later than the beginning of their sophomore year. Research opportunities are available on the Danforth Campus and at the School of Medicine, and they are open to both science and nonscience majors. Health-related volunteer opportunities are also widely available. 

Students who enter the university planning to apply to medical school should, with the aid of their advisers, structure their course of study to include the medical school requirements. There is no one right or best sequence of courses; there are numerous pathways to medical school. Because each student's pathway is different, students interested in a career in the health professions are encouraged to consult the pre-health deans in the college in addition to their academic advisers. Additional information can be found on the pre-health website (https://prehealth.wustl.edu).

**Other Health Professions**

Students interested in pursuing other careers in the health professions — including dentistry, nursing, occupational therapy, physical therapy, optometry and veterinary medicine — are invited to visit with a specialist adviser from the pre-health advising team. Interested students will find additional information on the pre-health advising (https://prehealth.wustl.edu/people) website.

African and African-American Studies

The program in African and African-American Studies offers opportunities for students to explore the social, political and intellectual history as well as the literature, culture and artistic life of various peoples in the world who are African or of African descent.

The program examines a wide spectrum of experiences and issues and is both multidisciplinary and interdisciplinary in its approach. Courses are offered in the humanities, the social sciences and the performing arts. Main areas of concentration are East, West and Central Africa; the United States; and the Caribbean.

Students who major in the program are encouraged to design a course of study that focuses on either a particular area of interest or a more comprehensive examination of Black culture and life. Students also have opportunities to do research with faculty or to take internships with organizations such as the Missouri Historical Society. Our summer programs in Kenya and Senegal, as well as study abroad options in other African countries, can further enrich the student experience.

Courses in the program are numbered to assist students with progressing from introductory courses (100 and 200 level) to intermediate courses (300 level or higher) to advanced courses (400 level). The program also regularly sponsors lectures on topics of interest in all areas of the Black experience. In many cases, lecturers participate in classes by giving special lectures within the classroom setting.

Departmental Prizes: The program also sponsors writing competitions that include monetary awards. These competitions include the following:

- The Undergraduate Essay Prize for the best essay on any subject related to the culture and life of Africans or African-descended people anywhere in the diaspora written by an undergraduate student;
- The Graduate Essay Prize for the best essay on any subject related to the culture and life of Africans or African-descended people anywhere in the diaspora written by a graduate student; and
- The prize for the best Student Essay in a Foreign Language, which honors the best essay on any subject related to the culture and life of Africans or African-descended people anywhere in the diaspora written by a student in a language other than English.

**Elective courses:** 24 units at the 300 level or above, at least 6 units of which must be at the 400 level

These elective units must include at least one course from each of four focus areas around which the major is organized: Creativity, Aesthetics, and the Imagination; Social and Historical Configurations (Social and Structural Analysis); Black Gender and Sexuality Studies; and Global Africa and Diaspora Currents. In addition, students should take at least three courses in one of the focus areas.

Students will also take one semester of a foreign language. Wolof and Swahili are strongly encouraged, but other languages will be considered if taken in consultation with the director of undergraduate studies.

**Additional Information**

**Co-Curricular Opportunities for Majors:** The program regularly sponsors lectures and events such as plays, film festivals, exhibits, field trips, panels and speakers that focus on contemporary or perennial topics of interest in all areas of the Black experience. In many cases, guest lecturers and artists visit classes and interact directly with students. These program-sponsored events are designed to foster a vibrant social and intellectual community within the program and to give our students a sense of identity and of what it means to be part of the African and African-American Studies community. We encourage our minors to participate in these activities to complement the classroom experiences.

**Courses**

**L90 AFAS 1002 Foundations in African and African-American Studies**

Designed to introduce the student to issues in African and African-American Studies and how students with AFAS degrees utilize their knowledge in graduate and professional programs or the working world. Particular attention is paid to the discipline of African and African-American studies, which engages with the artistic, cultural, historical, literary and theoretical expressions of the peoples and cultures of Africa and the African diaspora. Faculty members as well as St. Louis professionals give one-hour lectures on their particular disciplinary approach, their research or their professional lives. Students are required to attend three outside lectures or performances. May be taken before declaring major, and may be taken by non-majors. Credit 1 unit. A&S IQ: HUM Arch: HUM Art: HUM EN: H

**L90 AFAS 103D Beginning Swahili I**

A beginning language course emphasizing acquisition of reading, writing and conversational skills in Swahili language. Through video and other multimedia presentations, students also are introduced to the culture of Swahili-speaking communities living in more than a dozen African countries. Five hours a week including culture and language laboratory hours. This course is strongly recommended for students participating in the Summer in Kenya Program. CET (https://gephardtinstitute.wustl.edu/faculty-and-staff/community-engaged-teaching) course. Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

**L90 AFAS 1045 Wolof Language and Culture**

This course introduces students to Wolof language and culture. Wolof is a West African language spoken in Senegal and the
Gambia. It is also spoken on a smaller scale in Mauritania, Mali, French Guinea and in the migrant communities in the United States and France. This is the first course of a beginning-level of a Wolof program. In order to acquire a basic proficiency, students practice speaking, reading, writing and listening. Each module begins with a thematic and practical dialogue from which we can study vocabulary, aspects of grammar as well as a cultural lesson. Interactive material, including texts, images, videos, films and audio, are provided. Its aim is to provide students with knowledge of the basic structures of the language and the ability to communicate. Students also learn important aspects of life and culture of the Wolof.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H UColl: LA

L90 AFAS 1046 Wolof Language and Culture II
This course continues the introductory study of Wolof language and culture. Wolof is a West African language spoken in Senegal and the Gambia. It is also spoken on a smaller scale in Mauritania, Mali, French Guinea and in the migrant communities in the United States and France. In this second course of a beginning level of a Wolof program, students practice speaking, reading, writing and listening. Each module begins with a thematic and practical dialogue from which we can study vocabulary, aspects of grammar as well as a cultural lesson. Interactive material, including texts, images, videos, films and audio, are provided. The course’s aim is to provide students with knowledge of the more advanced structures of the language and the ability to communicate. Students learn important aspects of life and culture of the Wolof.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L90 AFAS 104D Beginning Swahili II
Second-semester Swahili language course emphasizing conversational competence and knowledge of Swahili-speaking cultures of East Africa. In addition to learning grammar and vocabulary sufficient to allow a student to perform basic survival tasks (asking for directions, buying a ticket for travel, checking into a hostel, ordering food) in Swahili, students also are introduced to authentic Swahili texts including plays, short stories and newspapers. Students have an opportunity to practice their acquired language skills by interacting with Swahili-speakers in the St. Louis region. Prerequisite: AFAS 103D. CET [https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching] course.

Credit 5 units. A&S IQ: LCD LS BU: HUM EN: H

L90 AFAS 1096 Ragtime
A history of ragtime music: survey of composers and performers. Emphasis on St. Louis and the music of Scott Joplin. University College students should register for U24 109 Section 02. Same as L27 Music 109

Credit 2 units. A&S IQ: HUM BU: HUM

L90 AFAS 111 First-Year Seminar: Race and Ethnicity on American Television
This course presents a historical overview of the forms that racial and ethnic representations have taken in American television. The course charts changes in public perception of racial and ethnic difference in the context of sweeping cultural and social transformations. The course examines notions of medium and ponders the implications for these identities of the contemporary practice of "narrowcasting." Required screening.

Same as L53 Film 110

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Art: HUM BU: BA EN: H

L90 AFAS 1181 First-Year Seminar: Beats & Rhymes — Hip-Hop in American Culture
On its surface, hip-hop is fundamentally about making music: a creative combination of beats, flow, samples and rhymes. And yet, beneath the surface lies so much more. Although hip-hop culture writ large (lyrics, fashion, dance and lifestyle) influences many on a global level, this class will explore the meaning of hip-hop primarily from African-American informed social and political perspectives. In what ways does hip-hop intersect with American culture, specifically on the fields of race, ethnicity, class, gender and sexuality? Without a doubt, it does so in intriguing, contested, and often problematic ways.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 1201 First-Year Seminar: Race and Performance
What does it mean to "act black"? What about "acting Jewish"?
This course looks at performances of racial and ethnic identity, mostly in the United States, mostly in the 20th century. We examine novels (such as Nella Larsen's Passing), plays (such as Anna Deavere Smith's Fires in the Mirror), and performances of everyday life (such as "Cowboys and Indians") to investigate the performance of race in public. Once we begin to explore the social and cultural performance of race, will it all turn out to be "only" an act?

Same as L15 Drama 120

Credit 3 units. A&S: FYS A&S IQ: HUM, SD BU: BA EN: H

L90 AFAS 136 First-Year Seminar: The Concept of Race in Black Thought
Although many people now believe that the idea of biologically distinct human races is a socially constructed fiction, the color of one’s skin can play a major role in determining such aspects of life as where one lives, the quality of one's education, and one's access to health care. Clearly, perceptions of race still hold a great deal of power, whether or not they are based upon scientifically sound reasoning. Therefore, we must attempt to understand how notions of race emerged and where they seem to be headed. In this course, we examine the role of race in American life, past and present.

Credit 3 units. A&S: FYS A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 160 Black is Beautiful: Race and Representation in American Fashion
This course will introduce students to using fashion as a lens to unpack race and representation in popular culture. Each week’s theme - Fashioning the Black Body, Slavery and Clothing, Clothing and Black Freedom Struggles, Fashion and Jazz and Hip Hop, Black Grooming and Beauty for the Masses and more - intersects with discourses surrounding gender and sexuality, performance, sociology, musicology and more challenging students to rethink how we see and discuss the black body in the mainstream. What does it mean for race to be used a trend in American fashion? How did African Americans use clothing and grooming to proclaim in their communities and in the mainstream that they were beautiful? How was clothing used during American slavery to denote racial and class lines? How did African Americans use clothing in freedom struggles from the Civil Rights Movement to Black Lives Matter as a mode of communication? What role did hip hop play in shaping both the
American fashion industry and mainstream perceptions of black life? How have mainstream fashion publications, clothing brands and more perpetuated and appropriated stereotypes of black life? How did black fashion publications introduce new images of black femininity into the mainstream? Using primary sources and texts on fashion theory, representation and African-American history, this course explores these inquiries into how fashion shapes race and how African Americans have used fashion as a site for reclamation in an effort to subvert tropes and establish agency.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM EN: H

L90 AFAS 162 First-Year Seminar: Contextualizing Problems in Contemporary Africa

Africa is typically presented in the United States and international media as a continent in constant turmoil. This freshman seminar challenges this simplistic and common myth by exploring the historical and global roots of key issues facing contemporary Africa. Case studies include the 1994 genocide in Rwanda; post-Apartheid violence in South Africa; HIV/AIDS in Africa; oil and corruption in Nigeria; the legacy of colonialism; the quest for modernity; refugees and forced migration; and commercial sex work. In each of these cases students explore how the issue emerged within a specific historical, social and global context. We investigate the implications of various forms of inequalities (e.g., between the global north and global south, within Africa, and among generations and genders) in shaping each topic and how differently situated people within Africa understand, respond to and cope with everyday realities. Readings include anthropological and historical analysis, African literature, journalist’s accounts and popular articles. By the end of the course, students should be able to critically assess the value of using a contextual analysis in understanding problems in contemporary Africa. This class is a discussion-based seminar and students are expected to actively participate. Students are graded on a series of analytical essays, a final project and in-class participation.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

L90 AFAS 178 First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change

The goal of this course is to provide a glimpse into how youth reshape African society. Whether in North Africa with the Arab Spring, in West Africa with university strikes, or in East Africa through a linguistic full bloom, youth have been shaping social responses to societies for a long period. In this course, we will study social structures, including churches, NGOs, and developmental agencies, and we will learn about examples of Muslim youth movements and the global civil society. The course will also explore how youth impact cultural movements in Africa and how they influence the world. In particular, we will examine hip-hop movements, sports, and global youth culture developments that center on fashion, dress, dance, and new technologies. By the end of the course, students will have enriched ideas about youth in Africa and ways to provide more realistic comparisons to their counterparts in the United States. Course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: LCD Arch: HUM Art: HUM BU: IS EN: H

L90 AFAS 188 First-Year Seminar: Self and Identity in African-American Literature

For whom should the black author write? In this seminar we consider how African-American literature examines the meaning of African-American identity, the individual’s relationship with the community, and the often vexed relationship of the black author to the American mainstream. We read classic authors as well as some less familiar ones. W.E.B. Du Bois, Nella Larsen, James Baldwin and Octavia Butler are just some of the possibilities. Class participation and regular reading logs are required. Freshmen only.

Credit 3 units. A&S: FYS A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA, ETH EN: H

L90 AFAS 195C Introduction to African-American Images in Film: A First-Year Seminar

This seminar for freshmen introduces students to an array of films depicting African Americans at different points in the history of filmmaking, as well as the relevance of these films to the advancement of civil rights in America and, by extension, the world. Students are introduced to elementary documentary film production in collaboration with Washington University library staff and hands-on utilization of the Henry Hampton Archive. The course provides a balanced introduction to various civil rights topics that are relevant to African Americans, their depiction in film, and knowledge of how documentary film production can be used to overcome past discrimination.

L90 AFAS 196C Images of Africa in Literature and Art, ca. 1800 to Present Day

This course examines representations of Africa, African peoples and African cultures from the early 19th century to the present day. Drawing on a wide variety of African and colonial source materials — including novels, photographs, art, advertising, and movies — we critically explore the ways in which historical developments and cultural products helped to shape conceptions of African identities and ethnicities. Among other issues, we address the legacy of the slave trade; gender and the construction of cultural "traditions"; colonial society, nationalist resistance and the rise of pan-Africanism; and South African Apartheid. Emphasis is placed on critical engagement with the source materials through written assignments and participation in class discussion. Freshmen only.

L90 AFAS 203D Intermediate Swahili III

Enhanced acquisition of language fundamentals acquired in first-year Swahili through performance, reading and writing. Students gain skills performing role-plays such as asking for directions, booking a bus ticket, ordering food in a restaurant, etc. Students read more authentic Swahili texts including plays, short stories, newspapers and poems. Prerequisite: AFAS 103D(Q) – 104D(Q) or the equivalent. CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L90 AFAS 204D Intermediate Swahili IV

Fourth-semester Swahili language course emphasizes the development of the ability to discuss a wide range of cultural
and literary topics with native speakers of the language. These topics are introduced by reading authentic Swahili texts such as plays, novels, poems and newspapers. Students enhance their writing skills and creativity in the language through group-writing projects. Prerequisite: AFAS 103D(Q), 104D(Q) and 203 D(Q). CET (https://gephardtinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course. Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L90 AFAS 208B African-American Studies: An Introduction
Lectures, readings, films and discussions reflect a range of academic approaches to the study of African-American people. Course materials drawn from literature, history, archeology, sociology and the arts to illustrate the development of an African-American cultural tradition that is rooted in Africa, but created in the Americas. Required for the major. Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

L90 AFAS 209B African Studies: An Introduction
This course introduces students to a variety of approaches to the study of Africa by considering the ways that scholars have understood the African experience. It exposes students to the history, politics, literary and artistic creativity of the continent. Emphasis is placed on the diversity of African societies, both historically and in the present, and explore Africa's place in the wider world. Required for the major. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L90 AFAS 210 The Linguistic Legacy of the African Slave Trade in Interdisciplinary Perspective
This course explores the linguistic consequences of the African slave trade, and in so doing introduces students to basic concepts in linguistic science that are relevant to human language development and controversial educational theories that are based on race. Anthropological, linguistic and psychological dimensions of African-American culture are embedded within complementary evaluations of educational controversies surrounding the teaching of (standard) English to American slave descendants, including the Ebonics controversy and its relevance to larger questions of social efficacy, and the affirmative action debate that has consumed the nation. Students work individually or in groups to produce a major intellectual artifact (e.g., a term paper, a scholarly webpage or a project) pertaining to the linguistic plight of citizens within this African diaspora. Students are introduced to foundational African-American studies in anthropology, education, English, linguistics and psychology. Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC BU: BA EN: S

L90 AFAS 215C Topics in African American Studies: Black Home Spaces in the United States
What does it mean to be at home? How do home and nation intersect? What are some of the ways African Americans have cultivated home spaces, and within what societal conditions? Using these questions and drawing from literature, geography, black feminism, and film, we will explore home space as a force and factor in shaping black identities in the United States. As microcosms of cities and the nation, home spaces are structured by the social, economic, political, and historical landscape of a society. As places of individual and communal living and dwelling, home spaces shape and are shaped by people. To study home is necessarily to study nation, family and affective ties, gender, and built space. In the United States, slavery, Jim Crow, redlining, restrictive covenants, and gentrification have targeted and disproportionately affected black lives, communities, and home spaces. In the face of this dehumanization, devaluation, and discrimination, black people have found ways to claim, make, and obtain spaces and senses of home, whether fleeting or permanent, conceptual or concrete. Modes of homemaking serve as a lens through which to ascertain the challenges, triumphs, and banalities of black life in the United States throughout history. Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 220 Topics in AMCS: Whose St. Louis? Religion, Race, and Power in the Gateway City
This course introduces students to the different approaches and methodologies within the American Culture Studies field, including those represented by literature, history, sociology and political science; at the same time, we will learn key concepts within the field that will inform their future work. These are presented in a semester-specific topic of focus; consult course listings for a description of the current offering. The course is ideal for AMCS majors and minors, but others are welcome. This course fulfills the "Introductory Course" requirement for AMCS majors and minors. Same as L98 AMCS 220 Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L90 AFAS 2230 The African Diaspora: Black Internationalism Across Time and Space
This course is an introduction to the history of the African diaspora. It engages the following questions: What constitutes a diaspora and what is the African diaspora in particular? Where is it? What were the conditions that led to the dispersal of Africans throughout the world? How have Africans in the diaspora constructed cultural and political identities across time and space? What were the circumstances that led to the dispersal of Africans? When the dispersal resulted from conditions of inequality, as was the case when the transatlantic slave trade led to the forced migration of Africans to the "new world," what were the legacies of that inequality? How has the African presence transformed the societies in question? Though the course focuses on readings from the United States, the Caribbean and South America, students also are exposed to the African diaspora as a series of dispersals, with a view to placing the African diaspora in the "new world" within the historic context of a longer history of African dispersal. Credit 3 units. A&S IQ: HUM BU: IS EN: H

Black women, much like their male counterparts, have shaped the contours of African-American history and culture. Still, close study of African-American women's history has burgeoned only within the past few decades as scholars continue to uncover the multifaceted lives of Black women. This course will explore the lived experiences of Black women in North America through a significant focus on the critical themes of violence and sexuality. We will examine African-American women as the perpetrators
and the victims of violence, as the objects of sexual surveillance, as well as explore a range of contemporary debates concerning the intersections of race, class and gender, particularly within the evolving hip-hop movement. We will take an interdisciplinary approach through historical narratives, literature, biographies, films and documentaries.

L90 AFAS 2255 First-Year Seminar: The Caribbean and the World

For many, the Caribbean evokes images of an exotic place with beautiful beaches, friendly and happy “natives,” and unbridled hedonism. However, the Caribbean is much more than a distant vacation destination for “first-world” consumption, and it has long been closely intertwined with major world events. This course explores the ways in which the Caribbean has been a part of the making of world history, beginning in the 14th century and ending in the contemporary period. Themes covered will include capitalism and slavery; the Haitian Revolution and its global reverberations; U.S. imperialism in the Caribbean; the impact of Caribbean migration on British culture; Caribbean sports, music, and food in a global context; and the contributions of Caribbean thinkers to anti-colonial and anti-imperialist thought and action.

L90 AFAS 230A Black-Jewish Relations in the United States

The relationship of blacks and Jews in the United States is at once intimate and strained, mutually beneficial and antagonistic. This course examines this uneasy alliance from a number of perspectives including anthropology, politics and identity politics, history, religion and class. Beginning with American anthropology’s Jewish founding father, Franz Boas, challenging the concept of race, the course traces the relations of blacks and Jews throughout the 20th century and in our contemporary moment. We will pay particular attention to the civil rights era, which is commonly upheld as the golden age of black-Jewish relations, as well as to this alliance’s unraveling in the post-civil rights era. The course then moves to a unit focused on more recent ruptures and collaborations including the 1991 Crown Heights race riots, during which Orthodox Jews clashed with their black neighbors, and Jewish involvement in the Black Lives Matter movement. The course concludes with a unit on identity and identity politics focused on the complexity and fluidity of the categories “white,” “black,” and “Jewish.”

L90 AFAS 237 Don’t Believe the Hype: Race, Media, and Social Movements in America

“Don’t Believe the Hype” will provide students with the tools to critique popular media and its association to social movements in America. This course will explore and analyze how media, broadly defined, including (but not limited to) music, art, film, literature, television and social media, has influenced social movements in very profound ways over the last century. The course will centralize the African-American experience and the Black Freedom Movement in particular and will teach students how to contextualize media and critically engage with its impact and examine the various ways media has played pivotal roles in social movement. Using these skills we will answer the following questions: What is the audience for a particular form of media? When does a social movement become part of popular culture? What is the purpose of media in these situations? How effective has media been for organizing? An integral part to this course will be the use of the Henry Hampton Archive in the Washington University Film & Media Archive. The archive is a repository of primary materials that will be utilized throughout the semester. By using the Hampton Collection students will also learn to analyze and interpret primary documents while also having a more nuanced understanding of history and how media is constructed and informs the way we process socio-political currents that evolve into social movements. Attendance mandatory during first two weeks.

L90 AFAS 251 Juvenile Justice in the Black Experience

This course examines the sociological past, present, and future of American juvenile justice, with a focus on the black American experience. The course is organized into three parts. Part I surveys the late-19th- and early-20th-century development of the “parental state,” including its institutional centerpiece (the juvenile court), its principle legal subjects (“dependents” and “delinquents”), and how these took shape alongside the contemporaneous rise of American Apartheid. Part II examines several key changes and challenges in contemporary juvenile justice, including the transformation of this institution in the wake of the Civil Rights Movement and the endurance of racialized juvenile social control during the post-Civil Rights period. Part III considers the possible futures of youth justice in the United States and beyond as well as practical strategies for achieving equal protection within and beyond the law.

L90 AFAS 255 Introduction to Africana Studies

The course provides an overview of the field Africana Studies and provides analysis of the lives and thoughts of people of African ancestry on the African continent and throughout the world. In this course we will also examine the contributions of Africana Studies to other disciplines. The course takes an interdisciplinary approach drawing from history, philosophy, sociology, political studies, literature, and performance studies and will draw examples from Africa, the United States, the Caribbean, Europe and South America. When possible, we will explore diaspora relationships and explore how the African presence has transformed societies throughout the world. This class will focus on both classic texts and modern works that provide an introduction to the dynamics of African-American and African diaspora thought and practice.

L90 AFAS 2674 Sophomore Seminar: Slavery and Memory in American Popular Culture

Sophomores receive priority registration. The history of slavery has long created a sense of unease within the consciousness of many Americans. Recognizing this continued reality, this seminar examines how slavery is both remembered and silenced within contemporary popular culture. Although slavery scholarship continues to expand, how do everyday Americans gain access to the history of bondage? Taking an interdisciplinary approach to these intriguing queries, we will examine a range of sources: literature, public history, art/poetry, visual culture, movies and documentaries, as well
as contemporary music including reggae and hip-hop. The centerpiece of this course covers North American society, however, in order to offer a critical point of contrast, students will be challenged to explore the varied ways slavery is commemorated in others parts of the African diaspora. Same as L22 History 2674

L90 AFAS 280 Imaging Blackness: Race and Visual Culture in the African Diaspora

In 1903 W.E.B. Du Bois wrote that the “biggest problem of the 20th Century is the problem of the color line.” By this stage, cinema and photography were already well established technologies that were being used to produce and justify differences between black and white subjects. Collectively through historical and theoretical readings, film screenings, and by engaging with a variety of visual arts practices, in this seminar we will first examine the relationship between early visual technologies and modern understandings of race. Since the development of photography and cinema, scientists, anthropologists, and the state have mobilized such visual technologies to inscribe racialized difference onto black/African/native bodies. Central to our analysis is the manner in which visual technologies have produced the black/African body as not just racially different but also deviant in terms of gender and sexuality. After establishing the historical context, we will shift our focus to consider how contemporary artists from the Africa diaspora use visual culture and aesthetics to actively challenge and critique overdetermined stereotypes of blackness. Throughout the semester we will study the manner in which class, gender, and sexuality are central to the production of the black body, and we will engage with various representations of blackness that consider these intersecting social formations.

Credit 3 units.

L90 AFAS 3002 Feminist Fire!: Radical Black Women in the 20th Century

Black women have been at the forefront of the black radical tradition since its inception. Often marginalized in both the scholarship and popular memory, there exists a long unbroken chain of women who have organized around the principles of anti-sexism, anti-racism, and anti-capitalism. Frequently critical of heterosexist projects as well, these women have been the primary force driving the segment of the black radical tradition that is commonly referred to as Black Feminism. Remaining cognizant of the fact that Black Feminist thought has also flourished as an academic enterprise — complete with its own theoretical interventions (i.e., standpoint theory, intersectionality, dissemblance, etc.) and competing scholarly agendas — this course thinks through the project of Black Feminism as a social movement driven by activism and vigorous political action for social change. Focusing on grassroots efforts at organizing, movement building, consciousness raising, policy reform, and political mobilization, Feminist Fire centers Black Feminists who explicitly embraced a critical posture toward capitalism as an untenable social order. We prioritize the life and thought of 20th-century women like Claudia Jones, Queen Mother Audley Moore, Frances Beal, Barbara Smith, Audre Lorde, Angela Davis, and organizations like the Combahee River Collective, Chicago’s Black Women’s Committee, and the Third World Women’s Alliance. At its core, the course aims to bring the social movement history back into the discourse around Black Feminism.

L90 AFAS 301 A History of African-American Theater
A survey of African-American theater from post-Civil War “coon” shows and reviews to movements for a national black theater, such as Krigwa, Lafayette and Lincoln, and the Black Arts Movement. Early black theater and minstrels; black theater movement and other ethnic theater movements in America. Critical readings of such plays as Amiri Baraka’s Dutchman, Lorraine Hansberry’s A Raisin in the Sun, and Langston Hughes and Zora Neale Hurston’s Mule Bone. Also works by August Wilson, Ed Bullins, Charles Fuller, Georgia Douglas Johnson.
Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA: HUM EN: H

L90 AFAS 3010 The Politics of Kanye West: Black Genius and Sonic Aesthetics
As a hip-hop artist Kanye West has had unprecedented impact on the sonic force of music, fashion, politics and videography. Coupling his controversial moments with his corpus of musical texts with special focus on sonic production, this course illuminates “Mr. West” as a case study for interrogating the interplay between fame, gender, sexuality and race. Mostly, we explore how racialized ways of doing iconography, complex ways of seeing, create a distorted or reductive frame through which we see the black and famous. Nonetheless, the course oscillates with entertaining these nuances, while being entertained by the decade-long catalogue of music and visual imagery. Together, we extract the “Politics of Mr. West” in his music and life, while also illuminating the importance of a politics of genius-making in the larger arc of black pop culture tradition.
Credit 3 units. A&S IQ: HUM, SC, SD BU: BA: HUM EN: H

L90 AFAS 3015 Speaking Truth to Power: The Black Prophetic Voice in America
To comprehend the origins and development of the black prophetic voice, one must first understand the religious history of African Americans. As such, this course investigates how African Americans have historically employed Christianity as a vessel of protest and empowerment. To illustrate how African Americans’ practiced faith has ultimately become a platform for speaking out against their oppression, students engage some of the following questions: What makes Black Christianity so distinct, if at all? What is the so-called “prophetic voice”? And how have African Americans used this prophetic voice to bring attention to various issues of social, political and economic concern? Ultimately students decide for themselves what black prophetic voice is and if it is still a viable part of the American fabric.
Credit 3 units. Art: HUM

L90 AFAS 3030 Coming of Age: Coming to Consciousness in Black American Literature and Film
In this course, we will study the phenomenon of growing up while black. To ground this semester-long study, we will explore such questions as the following: To what extent is childhood and adolescence shaped by race? How has the movement from childhood to adulthood been similar and different for black Americans across moments in history? What are the rites of passage in coming of age, and how do the particularities of
race, gender, sexuality, and region, among other factors, impact these touchstones of life? Utilizing literature and film as primary texts, we will analyze how the format and methods of our texts construct or disrupt ideas of childhood, adulthood, maturity, consciousness, failure, and success.

L90 AFAS 3031 Music of the African Diaspora
This course explores musical cross-fertilization between the African continent and South America, the Caribbean, and Europe. Beginning with traditional musics from selected regions of the African continent, the course examines the cultural and musical implications of transnational musical flows on peoples of the African diaspora and their multicultural audiences.
Same as L27 Music 3021
Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L90 AFAS 3035 The Sociology of African-American Politics
While this course includes the insights of political science, history, anthropology, law and cultural studies, it is based in sociology. If political science can be said to focus on theories of governance and the mechanics of governmental administration, political sociology can be said to focus on the underlying social forces making civic and political thought and action possible, the consequences of political thought and action, the impact of informal civic and political worlds on the state, and power dynamics between and within groups. In this course, we will consider each of these topics across seven sections.
Credit 3 units. A&S IQ: SSC, SC, SD BU: BA EN: S

L90 AFAS 305C Topics on Africa: African Urban Futures
Nearly 50 percent of Africa’s population now lives in urban areas. By 2050 this number is expected to triple to 1.23 billion or what will then be 60 percent of the continent’s total population. This urban growth is happening alongside rapid economic expansion, technological innovations, and — in some cities — political insurrection. Many of these developments are taking place in peripheral urban areas that lack formal planning, basic infrastructure, and security. Yet, as many theorists point out, the very lack of cohesive planning and stable infrastructure in urban Africa has produced flexible spaces where novel forms of dwelling, work, and leisure are possible. Many residents, often by necessity, rearrange their built environments to make the city function beyond the limits of its original design. In the process, urban dwellers produce new built spaces, aesthetics, and economic practices, calling into question assumptions about what a city is and how it works. What are the implications of Africa’s urban revolution for both the people who inhabit these cities and the world at large? How will Africa’s urban future shape what some theorists are calling “the African century”? What can contemporary cities across the continent tell us about the future of urban life everywhere? In this seminar, we will explore these questions by surveying a variety of case studies and topics from across the African continent. The purpose in focusing on Africa in general is not to homogenize an incredibly diverse continent, but to make connections across a variety of different contexts in order to explore conceptual debates and assemble a theoretical tool-kit that is useful for grappling with themes that are simultaneously abstract and concrete.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS EN: S

L90 AFAS 3061 Literacy Education in the Contexts of Human Rights and Social Justice
Literacy is a fundamental human right. In this course, we will explore the current and historical relationships between literacy and human rights. This will include an analysis of the ways in which literacy education is fundamentally linked to issues of global justice including political engagement and voting rights, environmental sustainability, gender and racial equality, and participation in the globalized economy. We will investigate how literacy education has played a role in social struggles at local, national, and international levels such as the creation of the Freedom Schools in St. Louis, the Native American boarding school movement, the Civil Rights movement in the United States including the creation of the Citizenship schools, the Ebonics debate in Oakland, California, the Nicaraguan Literacy Campaign, and the current No Child Left Behind federal educational policy. Students will explore how literacy education has been used, in each of these cases, as a tool of empowerment and a tool of oppression.

L90 AFAS 3062 Islam, Culture and Society in West Africa
This course explores the introduction of Islam into West Africa beginning in the 10th century and explores its expansion and development in the region, placing emphasis on the 19th century to present day. It focuses on the development of West African Muslim cultural, social, religious and political life, to understand not only how the religion affected societies, but also how West African local societies shaped Islam. The course also aims to introduce students to a critical understanding of Islamic writing in West Africa. It also examines the organization of Muslim Sufi orders in West Africa through time and space. The course is organized around a series of lectures and readings, as well as print and visual media.

L90 AFAS 3071 Caribbean Literature in English
Rum! Fun! Beaches! Sun! This is the image of the Caribbean in America today. This course surveys literature and culture from these islands, looking both at and beyond this tourists’ paradise. It aims to introduce students to the region’s unmistakably vibrant tradition of multicultural mixture, while keeping an eye on the long history of slavery and rebellion out of which the islands’ contemporary situation formed. Along the way we encounter a wide variety of texts, from the earliest writing focused on life in urban slums, to the first novel ever to have a Rastafarian as its hero, to more contemporary considerations of the region’s uncertain place in a U.S.-dominated world. Toward the end of the course, we also look at important films like The Harder They Come as well as discussing the most globally famous cultural product of the contemporary Caribbean: reggae music.
The course involves readings from multiple genres and covers
authors such as C.L.R. James, Derek Walcott, Jean Rhys, V.S. Naipaul, Jamaica Kincaid, and Caryl Phillips.

L90 AFAS 3080 Imaging Blackness: Race and Visual Culture in Africa and the African Diasporas
This course examines the relationship between race, nation, and visual culture by interrogating the ways in which citizenship in Western nations is racially defined. Through the semester, we focus specifically on South Africa and African diaspora communities in the U.S., Britain, Canada, Germany, and the Caribbean. People from Africa and the African diaspora have historically been excluded from the national imaginary and have sought other forms of belonging that challenge the limitations of the nation-state. First, this course examines the role of visual culture in reifying the relationship between race and nation. Collectively through readings, film screenings, and by engaging with other visual arts practices (photography and fine art), we interrogate the following questions: What is the relationship between early cinema and photography and how have these visual technologies contributed to contemporary understandings of race, particularly blackness and Africanness? What is the relationship between early cinema, race, and nation? How has cinema been used by black communities to signal the emergence of modern black life? How does Africa figure in the African diasporic imaginative through visual art? After establishing the long history of the intimate relationship between race, nation, and visual culture we then interrogate the manner in which artists of the African diaspora and South Africa have employed the visual technologies of cinema and photography to contest dominant representations (stereotypes) of blackness. We engage with the manner in which these artists have and continue to challenge, critique, and offer new ways to think through the relationship between race, nation, and visual culture. Throughout the course we examine how other vectors of power like class, gender, and sexuality are central to formations of race and nation. By engaging with contemporary visual artists of South Africa and the African diaspora we examine how cultural production, for example, can and does serve as one means through which people imagine their lives, often resisting and revising forms of oppression to create alternative community and cultural formations.

L90 AFAS 3101 "Give Up the Mic": Black Feminism in the United States
It is a mistaken, but widely held, assumption that black feminism in the United States emerged from the second-wave women's movement of the 1960s. This course offers a different view: the black feminist movement has a long history with roots in the slavery era. This course charts the historical evolution of black feminist theory and praxis from the 19th century to the present through reading texts from a variety of black feminists including abolitionists, anti-lynching advocates, clubwomen, blues artists, unionists, communists, civil rights and black power movement activists, poets, leaders of formal feminist organizations, and hip-hop feminists. We examine essays and books that articulate the complexity of black American women's demand for social, economic and political equality as well as the desire for a vision of liberation based on historical and ongoing struggles against race and gender oppression. We identify the central concerns of black feminist thought, salient theoretical models such as the intersection of race, gender, sexuality and class, and how the movement changed over time.
Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: HUM EN: H

L90 AFAS 311 Modern Dance and the African-American Legacy
This course examines the works of several African-American choreographers and their contributions to the field of modern dance in America. These works, considered modern day classics, depict important historical events and reveal cultural influences that people of African descent have impressed upon our society. Through the medium of dance aided by discussions, video and class reading assignments, the choreographers' works are analyzed for form, content and social relevance. Studio work includes technique to support learning the repertory. Prerequisite: one to two years training in modern, jazz or ballet.
Same as L29 Dance 311
Credit 2 units. A&S IQ: HUM, SC, SD Art: CPSC, HUM BU: HUM EN: H

L90 AFAS 3113 Culture, Politics, and Society in Francophone Africa
France and Africa have a long historical relationship, dating back to the early Euro-Mediterranean empires, the first explorers, long-distance traders, Christian missionaries, colonialists, and today's French West and North African communities. In this course, we delve into this long process of interaction between France and its colonies of Africa. During the first half of the semester, we explore these historical relationships and examine the scientific constructs of race in the 19th and early 20th century. We touch on themes that defined the colonial encounter, including the development of the Four Communes in Senegal, the Negritude movement, and French Islamic policies in Africa. The curriculum for this course includes articles, films, and monographs, to explore these themes and includes writers and social activists living in France and the African diaspora. The second half of the course examines Francophone Africa after independence. Here the course explores the political and cultural (inter)dependence between France and its Francophone African partners. In addition, we examine the challenges of many African states to respond to their citizen's needs, as well as France's changing immigration policies in the 1980s, followed by the devaluation of the West and Central African Franc (CFA).
Credit 3 units. A&S IQ: LCD, SSC, SC, SD Arch: SSC Art: SSC BU: IS EN: S
L90 AFAS 3140 Urban Inequality: Racism, Segregation, & Ghettoization in the American City
The academic study of urban inequality proceeds from the understanding that: 1) cities are deeply unequal, especially when considered in terms of race and class; 2) rather than being random or natural, urban inequality is the product of human ideas, policies and practices; and 3) urban inequality has substantial and enduring impacts on city life and life chances, especially for racial minorities and the poor. Echoing these general themes, this course closely examines the causes, development, and consequences of urban inequality in the U.S. context. In order to explore U.S. urban inequality most clearly, the course focuses on the African-American urban experience and what has variously been called the "black belt," the inner city, and, most importantly, the ghetto. The scope is still national, though, with analyses of New York, Philadelphia, Baltimore, D.C., Detroit, Chicago, New Orleans, Oakland and St. Louis, among other cities. The course primarily draws from sociology and history but also includes insights from anthropology, political science, criminology and law, among other disciplines. Credit 3 units. A&S IQ: SSC, SD Art: CPSC EN: S

L90 AFAS 3161 African-American Politics
This course examines the historical and contemporary efforts by African Americans to gain full inclusion as citizens in the U.S. political system. The course focuses on topics such as the politics of the civil rights movement; African-American political participation; and the tension between racial group politics and class politics. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L90 AFAS 3190 Engaging the City: The Material World of Modern Segregation: St. Louis in the Long Era of Ferguson

L90 AFAS 321C African Civilization to 1800
Beginning with an introduction to the methodological and theoretical approaches to African history, this course surveys African civilization and culture from the Neolithic age until 1800 AD. Topics include African geography and environmental history; migration and cross-cultural exchange; the development of Swahili culture; the Western Sudanese states; the trans-Atlantic slave trade; and the historical roots of Apartheid. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L90 AFAS 322C African Civilization: 1800 to the Present
Beginning with social and economic changes in 19th-century Africa, this course is an in-depth investigation of the intellectual and material culture of colonialism. It is also concerned with the survival of precolonial values and institutions, and examines the process of African resistance and accommodation to social change. The survey concludes with the consequences of decolonization and an exploration of the roots of the major problems facing modern Africa. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H UColl: HAF, HSM

L90 AFAS 3231 Black Power Across Africa and the Diaspora: International Dimensions of the Black Power Movement
This seminar explores the Black Power Movement as an international phenomenon. By situating Black Power within an African World context, this course examines the advent and intersections of Black Power politics in the United States, parts of Africa (including Ghana, Algeria, Nigeria and Tanzania), the Caribbean (Jamaica, Bermuda, the Bahamas and Cuba), South America (Brazil) and Canada. Particular emphasis is placed upon unique and contested definitions of "Black Power" as it was articulated, constructed and enacted in each region. Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 3242 Introduction to African-American Psychology
This course provides an introduction to the experiences of African Americans from a psychological perspective. Throughout the course, we will consider a range of theoretical and methodological approaches that scholars have developed to conceptualize the thoughts, styles and behaviors of African Americans. The course begins with an overview of these theories, methodologies and frameworks. The second part of the course is devoted to exploring psychological research around pertinent topics in the field such as racism and discrimination, gender, achievement and schooling, kinship and family, racial identity, religion and spirituality, and mental health. Finally, we conclude the course with discussions of current topics, controversies, and recent advances in African-American psychology. Prerequisite: Intro to Africana Studies. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L90 AFAS 3254 African Americans and Children’s Literature
This course explores two distinct themes: how African-descended people have been depicted in American and British children’s literature and how African Americans have established a tradition in writing for children and young adults. It also examines two related questions: How has African-American childhood been constructed in children’s literature and how have African-American writers constructed childhood in children’s literature? We look at such classic white writers for children like Helen Bannerman, Annie Fellows Johnston, and Mark Twain as well as efforts by blacks like the Brownies Book, published by the NAACP, and children’s works by black writers including Langston Hughes, Ann Petry, Shirley Graham Du Bois, Arna Bontemps, Virginia Hamilton, Walter Dean Myers, Mildred Taylor, Floyd Cooper and Patricia C. McKissack, Julius Lester, Rosa Guy, Sharon Bell Mathis, bell hooks, and others. Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

L90 AFAS 326 Literature of the Color Line
In 1903’s The Souls of Black Folk, W.E.B. DuBois wrote “for the problem of the 20th century is the problem of the color-line.” This literature course includes texts written by African-American authors to examine the ways African Americans came to be portrayed in American literature and culture by writers of color, paying special attention to the changing concept of race and African-American citizenship as influenced by American political thought at a time when many of the gains made by African Americans during the period of Reconstruction were repealed. We read fiction, poetry, essays and pamphlets by
African-American writers writing through the late 19th and early 20th century, including but not limited to Charles Chesnutt, W.E.B DuBois, Booker T. Washington, Ida B. Wells-Barnett, Pauline Hopkins, Frances E.W. Harper, Paul Laurence Dunbar. In addition to the texts, students are asked to briefly examine portrayals of African Americans in other forms of media, such as visual culture and film.

Credit 3 units. A&S IQ: HUM Arch; HUM Art: HUM EN: H

L90 AFAS 327B African Politics
A survey of politics in the states of sub-Saharan Africa. Major themes include the givens of African politics; the colonial inheritance; ethnicity, race and politics; religion and politics; forms and styles of rule and governance; pathologies and the international relation of African states. Requirements include two short papers and a written briefing on an assigned country.

L90 AFAS 3282 Sexuality in Africa
An examination of various themes of African sexuality, including courtship, marriage, circumcision, STDs and AIDS, polygamy, homosexuality, child marriages, and the status of women. Course materials include ethnographic and historical material, African novels and films, and U.S. mass media productions. Using sexuality as a window of analysis, students are exposed to a broad range of social science perspectives such as functionalist, historical, feminist, social constructionist, Marxist and postmodern.

L90 AFAS 330 Topics in Linguistics: The American Languages
Our perceptions about language are shaped by our linguistic backgrounds and practices as well as our social and political ideologies. This course examines the history of American languages in the U.S. and explores the social, educational, and political issues that surround them. Four types of languages are studied: Native American, colonial, immigrant, and new languages (e.g., Hawaiian Pidgin and American Sign Language). We also take a special look at the history and structure of African-American Language which challenges linguistic categorizations as well as language policy and education.
Among the major questions discussed in this course are: what makes American languages distinct in terms of their history and social status; what do they all have in common beyond the simple geographic classification of being "American."
In addressing these questions we also study the politics of language, the history of language policy and education in the U.S., as well as issues of current debate, such as indigenous language reclamation, the "Ebonics controversy," bilingual education, and the official English movement.

L90 AFAS 3405 For Freedom's Sake: The Civil Rights Movement in America
This course provides an introduction to the period of struggle in American history known as the Civil Rights Movement. Our primary task is to survey the major historical figures, organizations, locations, strategies and ideas that coalesce to make the history of the movement. The course broadly covers the years of the Black Freedom Struggle between 1945 and 1971, with a sharper focus on the pivotal years of 1954-1965.
By placing the movement within a broader context, the course seeks to identify the historical developments and social realities that made the movement necessary and possible. The class also looks at the years following the movement, and the general transition from Civil Rights to Black Power.
Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 3420 Masculinity and 20th-Century African-American Literature
This seminar considers how literature, from the Great Migration through the contemporary moment, represents and complicates myths of blackness as reservoir of masculine virility and patriarchal incapacity. Through close readings of canonical African American literature by the likes of Richard Wright, James Baldwin, Amiri Baraka, and John Edgar Wideman, this course will critically (re)define the keywords blackness and masculinity and consider the terms and implications of their interrelatedness. Students will work from the foundational claim that masculinity is never an established fact but rather socially constructed upon a fickle node of ceaseless anxiety and brash assertion, and literature will serve as a critical site for pursuing the following inquiries: How does blackness impact broader meanings of American masculinity? How does blackness both threaten and fortify masculinity? How does centering the relationship between blackness and masculinity assist with the thinking through of themes of gender, race, and sexuality more broadly?
Credit 3 units. A&S IQ: SSC, SC BU: BA

L90 AFAS 343 Capitalism, Exchange and Inequality in Africa
This course explores issues of power and inequality related to exchange and the emergence of market economies in Africa. Case studies include examinations of cattle and bride wealth among pastoralists in Sudan, welfare policies in contemporary South Africa, and sex work in West Africa. In each of these cases there is a complex balance between the value placed on maintaining social relationships and accumulating private property. We investigate the implications of this balance for the production of local and international forms of inequality.
The course also introduces students to key ideas in economic anthropology such as the formalist-substantivist debate, rational choice theory and neo-Marxist approaches to power and stratification. By the end of the course, students should be able to critically assess the value of these theories in
understanding day-to-day economic activities in Africa. This class is a discussion-based seminar and in-class participation is highly encouraged. Students are graded on a series of analytical essays, a final paper and in-class participation. Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA

L90 AFAS 3447 Visualizing Blackness: Histories of the African Diaspora Through Film
The African diaspora and, more importantly, variations of blackness, black bodies, and black culture have long captured the imagination of audiences across the globe. Taking a cue from exciting trends in popular culture, this course bridges the world of history, film and culture to explore where and how historical themes specific to African-descended peoples are generated on screen (film and television). Fusing the film world with digital media (i.e., online series and "webisodes") this class allows students to critically engage diasporic narratives of blackness that emerge in popular and independent films not only from the United States but other important locales including Australia, Brazil, Britain and Canada. Moving across time and space, class discussions center on an array of fascinating yet critical themes including racial/ethnic stereotyping, gender, violence, sexuality, spirituality/conjuring and education. Students should be either of junior- or senior-level and have taken at least one AFAS course. Permission of the instructor is required for enrollment.
Credit 3 units. A&S IQ: HUM, SC, SD Art: HUM BU: BA, IS EN: H

L90 AFAS 346 Race, Literature, and Environmental Justice
The course will permit an introduction to the field of Environmental Humanities through an exploration of environmental writings, practices, and artistic expressions. We will draw primarily from literature, as well as legal proceedings, history, culture, art, and digital media in order to understand the relationship between human beings and natural and built environments. We will also examine the interaction of health and well-being to the physical environment, with attention to women, people of color, and the poor as a way of thinking expansively about environmental justice issues. While social inequality shapes how environmental problems are created, recognized, and dealt with, we will explore how differences of culture and power complicate the meaning of concepts like "environment" and "justice" within and between groups. To do so, we will examine the specific roles the humanities have played in facilitating an environmental consciousness and activism amongst various groups of people. We will begin by posing questions regarding what is nature in order to think more expansively about what the term "environment" can denote.

L90 AFAS 352A The Black Athlete in American Literature
The black athlete is a central figure in American entertainment, and has been since Frederick Douglass decried Christmastime slave games in his Narrative. This course will examine literary depictions of black athletes — in novels, memoirs, essays and poems — in order to better understand the cultural significance of sportsmen and women in the African-American struggle for equality, from abolitionism to the "Black Lives Matter" movement. We will read works by Douglass, Ralph Ellison, Maya Angelou, and John Edgar Wideman, among others, and examine the lives and athletic pursuits of prominent athletes such as Jackie Robinson, Muhammad Ali, Wilma Rudolph, Michael Jordan, and LeBron James. Popular perceptions of gender and sexuality, in addition to race and racism, will factor into our readings, especially as students incorporate secondary sources into their own research.

L90 AFAS 3542 The Quest for Racial Reconciliation
This course is based within African and African-American studies, and it explores the quest for racial reconciliation, with emphasis equally divided between the United States and racial strife in other parts of the world. Although racial considerations are inherent to central themes within this course, we explore various sources of linguistic, cultural, social, political, racial and ethnic foundations of strife at different points in history, and in different regions of the world. Particular attention is devoted to nonpartisan strategies to advance racial harmony within the United States, and other regions of the world that are of personal interest to students.

L90 AFAS 359 (Re)Writing Slavery
This special topics course considers black-authored texts ranging from the 18th to the 21st century to examine the ways slavery has been discussed in American literature and culture. We pay attention to the role of slavery in creating the African diaspora, the contribution of slave narratives to the Abolitionist movement, and how the structures of American slavery did not disappear after the Civil War. We look at the ways Civil Rights-era and contemporary African-American writers such as Margaret Walker, Toni Morrison, and Charles Johnson have appropriated the slave narrative to engage and critique present day concerns. Their works are read against 19th-century slave narratives by ex-slaves such as Frederick Douglass and Harriet Jacobs. In addition to the texts, students are asked to consider how slavery and its aftereffects have been portrayed in film and other forms of media.

L90 AFAS 35SM Hands on the Past: History, Murder and the Archive
The future depends on the past. This course taps into that understanding by offering an alternative hands-on methods class to encourage undergraduate student engagement with history and archives, both on- and offline. In this particular class, students will be nurtured to more deeply interact with the historical past by exploring gender, race, violence and sexuality through three central questions explored throughout the course: What and how is African-American history conducted? How do we best document the past with students fully at the intellectual table of production and preservation? How do we make history with history? These exciting and diverse interests will be pursued through in-class discussions and course assigned readings, but especially by taking a spring break research project trip across Missouri to various local repositories and the state archives, to activate and fuel the idea of putting hands on the past.
Same as L22 History 35SM

L90 AFAS 3600 Beyond Sea, Sunshine and Soca: A History of the Caribbean
This course examines major themes in the history of the Caribbean from the 15th to the 20th century. The first half of the course will focus on the 15th to the 19th century, exploring issues such as indigenous societies, European encounter and conquest, plantation slavery, the resistance of enslaved Africans and emancipation. The remainder of the course focuses on aspects of the cultural, economic, political and social experiences of Caribbean peoples during the 20th century. Major areas of inquiry include the labor rebellions of the 1930s, decolonization, diasporic alliances, Black Power, identity construction and the politics of tourism. While the English-speaking Caribbean constitutes the main focus, references will be made to other areas such as Cuba and Haiti.

L90 AFAS 360A Religion and the Modern Civil Rights Movement, 1954-1968
The modern Civil Rights Movement is a landmark event in the nation’s political, civic, cultural and social history. In many contexts, this movement for and against civil and legal equality took on a religious ethos, with activists, opponents and observers believing that the net result of the marches, demonstrations and legislative rulings would redeem and/or destroy “The Soul of the Nation.” This seminar examines the modern Civil Rights Movement and its strategies and goals, with an emphasis on the prominent religious ideologies and activities that were visible and utilized in the modern movement. The course pays particular attention to the Protestant, Catholic, Jewish, and Islamic traditions, figures and communities that were indifferent, combative, instrumental and/or supportive of Civil Rights legislation throughout the mid-20th century. Same as L57 RelPol 360
Credit 3 units. A&S IQ: HUM, SC, SD BU: BA EN: H

L90 AFAS 362 Mapping the World of “Black Criminality”
Ideas concerning the evolution of violence, crime and criminal behavior have been framed around many different groups. Yet, what does a typical criminal look like? How does race — more specifically blackness — alter these conversations, inscribing greater fears about criminal behaviors? This course taps into this reality, examining the varied ways people of African descent have been and continue to be particularly imagined as a distinctly criminal population. Taking a dual approach, students consider the historical roots of the policing of black bodies alongside the social history of black crime while also foregrounding where and how black females fit into these critical conversations of crime and vice. Employing a panoramic approach, students examine historical narratives, movies and documentaries, literature, popular culture through poetry and contemporary music, as well as the prison industrial complex system. Prerequisite: AFAS 3880 (Terror and Violence in the Black Atlantic) and/or permission from the instructor, which is determined based on a student’s past experience in courses that explore factors of race and identity. Enrollment limit: 20.
Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM BU: BA EN: H

L90 AFAS 363 Bad and Boujee: Blackness, Deviance, and Homemaking in the U.S.
This course will examine the social construction of deviance as it relates to blackness in the U.S. context, with specific emphasis on the impact it has had on how black people make, claim, and belong to home. Here, we are referring to home not only in terms of the built environment (house) but also in terms of legal citizenship and cultural inclusion. There has been, and continues to be, a long history of racial minorities searching for and being denied home in geopolitical spaces that often articulate them as outside of home — as, in fact, homeless — literally and figuratively. This is evidenced by the constant displacement of black people through processes of gentrification; the overrepresentation of black people in carceral institutions; the racialized nature of the housing mortgage crisis; the alarming numbers of little black girls across the country who have gone missing without much public outcry or media coverage; and in the murdering of black trans women. And yet, racial minorities and black people in particular have simultaneously insisted on building and claiming home in the U.S., despite attempts to keep them out. This course will help frame these historical tensions and the subsequent processes contributing to these
tensions as they relate to gender, sexuality, class and the nation. Particularly, we will be engaging popular representation and media, the law, and social and public policy to better understand who gets understood as deviant or normal, why, and what (im)material implications such cultural designations have on people’s lives. In doing so, we will also examine how black people in the U.S. have mobilized the discourse of deviance as well as acts of deviance themselves, as modes of resistance, to both respond to and sometimes perpetuate systems of oppression organized around the banner of normativity. As such, student will develop a richer understanding of how the bad (re: deviant) and boujee (re: bourgeoisie) life, while seemingly at odds, are generative sites of social, political, and economic possibility. Key topics we will cover: black feminist thought and queer of color critique; blackness, respectability and the rise of capitalism; biopower, surveillance, and carcerality; and urban renewal and scenes/modes of resistance.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: HUM Art: SSC EN: S

L90 AFAS 3651 Black Women Writers
When someone says “black woman writer,” you may well think of Nobel prize winner Toni Morrison. But not long ago, to be a black woman writer meant to be considered an aberration. When Thomas Jefferson wrote that Phillis Wheatley’s poems were “beneath the dignity of criticism,” he could hardly have imagined entire Modern Language Association sessions built around her verse, but such is now the case. In this class we survey the range of Angophone African-American women authors. Writers likely to be covered include Phillis Wheatley, Harriet Wilson, Nella Larsen, Lorraine Hansberry, Octavia Butler and Rita Dove, among others. By exploring nation building, economic planning, and public administration from the perspective of political elites, foreign experts, and ordinary people, the class takes an intimate look at how colonies became nation-states. These new perspectives offer students a historical grounding in international public administration and development policy in both Africa and the wider world. In doing so, we will also examine how black people in the U.S. have mobilized the discourse of deviance as well as acts of deviance themselves, as modes of resistance, to both respond to and sometimes perpetuate systems of oppression organized around the banner of normativity. As such, student will develop a richer understanding of how the bad (re: deviant) and boujee (re: bourgeoisie) life, while seemingly at odds, are generative sites of social, political, and economic possibility. Key topics we will cover: black feminist thought and queer of color critique; blackness, respectability and the rise of capitalism; biopower, surveillance, and carcerality; and urban renewal and scenes/modes of resistance.

L90 AFAS 3652 Experts, Administrators and Soldiers: Governance and Development in Post-Colonial Africa
Between 1957 and 1975, one African territory after another made the transition from European colony to independent nation-state. Widespread optimism that these “transfers of power” would bring a new era of prosperity and dignity dissipated quickly as the new nations struggled with political instability, military coups, social unrest, and persistent poverty. Consequently many western observers and development specialists are certain that they have become “failed states” requiring foreign assistance to develop properly. This course challenges these assumptions by tracing the origins of African governance and economic development from their imperial origins into the independence era. By exploring nation building, economic planning, and public administration from the perspective of political elites, foreign experts, and ordinary people, the class takes an intimate look at how colonies became nation-states. These new perspectives offer students a historical grounding in international public administration and development by exploring how imperial ideas and concepts continue to influence contemporary social planning and development policy in both Africa and the wider world. In doing so, we will also examine how black people in the U.S. have mobilized the discourse of deviance as well as acts of deviance themselves, as modes of resistance, to both respond to and sometimes perpetuate systems of oppression organized around the banner of normativity. As such, student will develop a richer understanding of how the bad (re: deviant) and boujee (re: bourgeoisie) life, while seemingly at odds, are generative sites of social, political, and economic possibility. Key topics we will cover: black feminist thought and queer of color critique; blackness, respectability and the rise of capitalism; biopower, surveillance, and carcerality; and urban renewal and scenes/modes of resistance.

L90 AFAS 3670 The Civil Rights Movement
The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically, and thematically. It pays special attention to struggles fought in the North, West and Southwest; it seeks to question binaries constructed around “confrontational” and “accommodationist” leaders; it reveals how Latinos, Native Americans, and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics.

Same as L22 History 3670
Credit 3 units. A&S IQ: HUM, SC, SD BU: BA, HUM EN: H

L90 AFAS 3672 Medicine, Healing and Experimentation in the Contours of Black History
Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, we examine the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus extends toward the underpinnings of race and gender in the medical treatment allocated across time and space — the U.S., Caribbean and Latin America — to give further insight into the roots of contemporary practice of medicine.

L90 AFAS 368 Emerging Africa: Language, Identity, and Social Change
Beginning with a review of key issues that shape Africa’s linguistic history, the course explores linguistic situations in several African countries, including examining the role language plays in constructing identities, maintaining social cohesion, and empowering marginalized communities. An integral part of the course will be a critical look at the growth and influence of urban slang and pidgins in Kenya, South Africa, Senegal, Zamb, Congo, and Cameroon.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA, HUM EN: S

L90 AFAS 370 Youth, Generation and Age in Africa
It is estimated that children and youth constitute more than 60 percent of the population in Africa. In a context of economic decline associated with neoliberal policies of structural adjustment, many of these young people will face extreme difficulty in finding work, supporting families, and taking on the social responsibilities of adults. In recent years, disaffected African youth have been increasingly blamed for political and social instability. This course examines the condition of youth in contemporary Africa. The course begins with classic anthropological texts on generation, youth, and the life cycle in Africa. Readings address the implications of colonialism, education, wage labor, and urbanization for relations between generations. The second half of the course examines recent
research concerning the position of African youth in a context of economic and cultural globalization.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L90 AFAS 3766 Women, Men, and Gender in African Societies Since 1800
This seminar explores the ways in which gender relations have been produced, reproduced and transformed through the everyday actions of women and men in Africa. The focus is both on agency and on structures of power, as we move from a consideration of gender relations during the 19th-century jihads in West Africa to problems of love, sexuality and marriage in contemporary South Africa. Same as L22 History 386A

L90 AFAS 3800 Black Cinema: An Introduction
This course introduces students to the films and filmmaking practices from West Africa, South Africa, and Black Britain. Central to the pedagogical goals of this class is to introduce students to the diverse societies, cultures, and perspective of people from Africa and the diaspora through cinema. Students will immerse themselves in the types of social critiques the films engage in as they tackle topics such as gender politics, race, polygamy, migration, corruption, human rights, homosexuality, economic crisis, apartheid, and Westernization. Through critical analysis of films, academic readings, and participating in the annual African Film Festival hosted at Washington University this course will fulfill the requirements set out above. Even though four weeks of the course focuses on Black British Cinema and the social, political, and economic condition of black British citizens, students will engage with the complexities of the African diaspora experience, particularly in relationship to migration, diaspora, race relations, and gender and sexuality. Given that the course as a whole focuses on filmmaking practices, aesthetics and the politics of African and African diasporic cinemas, students will definitely be exposed to a totally different world experience and the diversity of people, cultures, and aesthetics in Africa and the diaspora. Students in this class will also be required to actively participate in the annual African Film Festival hosted by Washington University and will have the unique opportunity to interact with visiting filmmakers. Required screenings.

L90 AFAS 3880 Terror and Violence in the Black Atlantic
From the period of bondage through the 21st century, terror and racialized violence have consistently been used as a form of social control. This course is constructed to explore the historical foundations of extreme threats of violence inflicted among populations of African descent. The fabric of American culture has given birth to its own unique brand of terrorism, of which this class spends considerable time interrogating. Yet, in recognizing that these practices are commonly found in other parts of the Black Atlantic, students are encouraged to take a comparative view to better tease out the wider strands of violence operative in places like England, the Caribbean and Latin America. Within this course, we explore the varied ways in which music, films, newspapers and historical narratives shed light on these often life-altering stories of the past. Some of the themes touched upon include: the use of punishment/exploitation during the era of slavery, lynching, sexual violence, race riots, police brutality, motherhood, black power and community activism.
Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 388C African-American Literature: African-American Writers Since the Harlem Renaissance
African-American literature in the 20th century moves from a renaissance into an institution. Guggenheim, Pulitzer and Nobel prize winners; Communist and Conservative Party sympathizers; Black Power advocates, inaugural poets, Broadway playwrights, Book-of-the-Month Club novelists, along with writers whose allusive and elliptical pages may never win them legions of fans, are among the many whose works we discover together. Written assignments may include two papers and two exams. Prerequisites: none, but related classes such as E Lit 215 and/or AFAS 208 are suggested. Satisfies the American literature requirement in English, and/or one 300-level elective requirement in AFAS.
Credit 3 units. Arch: HUM Art: HUM EN: H

L90 AFAS 397 W.E.B. Du Bois and the Origins of Modern Black Studies
In particular, we will use the biographies about and the autobiographies by Du Bois to trace and learn about his life and the times in which he lived. Next, we will read most or all of The Philadelphia Negro (1899), Black Reconstruction in America (1935), The Souls of Black Folk (1903), John Brown (1909), and Black Princess (1928), each an example, respectively, of his sociology, history, essays, biography, and literature. Next, we will reassess his legacy within and without scholarship, especially focusing on his impact on sociology, history, political science, and anthropology. Lastly, we will take a closer look at several of his most influential views and concepts, including the talented tenth, double consciousness, the veil, and the psychological wages of race. In this, we will also consider his disagreement
and rivalry with Booker T. Washington (and others) as well as his views on and relationship to race, gender, sexuality and art. The overall goal of the course is to provide a comprehensive introduction to the life, thought, and legacy of W.E.B. Du Bois. Through class activities and course assignments, students should also improve their critical analysis, reading, and writing skills. While a previous course in African and African-American Studies, History, or Sociology may be helpful, there are no prerequisites to the course.

Credit variable, maximum 6 units.

L90 AFAS 4001 Interrogating Health, Race and Inequalities: Public Health, Medical Anthropology and History

Interrogating Health, Race and Inequalities is intended for graduate students in the School of Social Work and in Arts & Sciences as well as advanced undergraduates in Arts & Sciences who have previous course work in medical anthropology, public health or urban policy. The fundamental goal of the course is to demonstrate that health is not merely a medical or biological phenomenon but more importantly the product of social, economic, political and environmental factors. To meet this goal the course is designed to examine the intersection of race/ethnicity and health from multiple analytic approaches and methodologies. Course readings draw from the fields of public health, anthropology, history and policy analysis. Teaching activities include lectures, group projects and presentations, videos, and discussions led by the course instructors. These in-class activities are supplemented with field trips and field-based projects. By the end of the course, students are expected to have a strong understanding of race as a historically produced social construct as well as how race interacts with other axes of diversity and social determinants to produce particular health outcomes. Students gain an understanding of the health disparity literature and a solid understanding of multiple and intersecting causes of these disparities.

Same as I50 INTER D 4002

Credit 3 units.

L90 AFAS 4005 Video Microanalysis: Methods and Tools

The purpose of this course is to explore video microanalysis as a methodological tool for studying and valuing unconscious aspects of culturally diverse settings. Utilizing social cultural theoretical lens, this type of analysis reveals fleeting actions, subtle movements, peripheral events, and nonverbal communication that are not easily identified in real time viewing. Specifically we may look at facial expressions, direction of gaze, hand movements, body position, and use of material resources as micro techniques to expand our capacity to explore minute aspects and alternative interpretations of social interactions.

Same as L12 Educ 4033

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC EN: S

L90 AFAS 4006 Internship in Interrogating Health, Race and Inequalities

Internship in Interrogating Health, Race and Inequalities is intended for advanced undergraduates who are enrolled in the course Anthro 4003 and who have previous course work in (medical) anthropology, public health, urban policy, or African and African-American Studies. The internship experience is designed to facilitate students’ familiarity with research and evaluation strategies that both address structural factors shaping health outcomes and are sensitive to community needs and sociocultural contexts. The internship experience contributes to students’ in-class understanding of the ways that race as a historically produced social interacts with other axes of diversity and social determinants to produce particular health outcomes. Prerequisite: permission from the instructor. Corequisite: Anthro 4003.

Same as I50 INTER D 4002

Credit 1 unit.

What is research? How does one go about conducting research? How have scholars conducted research on the experiences of people of Africa and the African Diaspora? As a field/discipline that has been interdisciplinary from its inception, African and African-American Studies has always utilized a variety of research methods to study and understand the experiences of people of Africa and the African Diaspora. This course is designed to introduce students to the various methods of conducting research in the field/discipline. It also explores the ways that power, race, and ethnicity have shaped the construction of knowledge as it relates to African descendants. Organized specifically for AFAS majors, the course is designed to provide students with the basic tools to conduct independent research, while reflecting on African and African-American Studies as a unique area of inquiry. Students enrolled in this course are required to have already completed AFAS 255 (Introduction to Africana Studies) as a prerequisite.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM  EN: H

L90 AFAS 401 Senior Seminar

This capstone seminar is required for students who are majoring in African and African-American Studies.

Credit 3 units. A&S IQ: HUM EN: H

L90 AFAS 403 Advanced Swahili

This course aims to help students gain skills in reading and appreciating selected readings in Swahili literature. Although the course primarily focuses on plays, novels and poetry, students also are introduced to Swahili songs, comic books and other forms of popular literature in an attempt to understand the growth and development of contemporary Swahili literature. Prerequisites: permission of instructor and successful completion of AFAS 103D, 104D, 203D and 204D or equivalent experience.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

L90 AFAS 4031 Advanced Readings in Swahili Literature

Course designed with instructor. Permission of instructor required.

Credit 3 units. A&S IQ: LCD, LS Arch: HUM Art: HUM
L90 AFAS 4041 Beginning Graduate-Level Swahili
A beginning language course for graduate students emphasizing acquisition of reading, writing and conversational skills in Swahili language. Through video and other multimedia presentations, students also are introduced to the culture of Swahili-speaking communities living in more than a dozen African countries. Credit 3 units. A&S IQ: LCD, LS EN: H

L90 AFAS 4042 Beginning Graduate-Level Swahili II
Second-semester graduate-level Swahili language course emphasizing conversational competence and knowledge of Swahili-speaking cultures of East Africa. Introduction to elementary-level Kenyan and Tanzanian Swahili texts, grade school readers, newspapers and government educational material. Prerequisite: AFAS 4041. Credit 3 units. A&S IQ: LCD, LS EN: H

L90 AFAS 4043 Intermediate Graduate-Level Swahili III
Enhanced acquisition of language fundamentals acquired in first-year graduate-level Swahili through performance, reading and writing. Students gain skills performing role-plays such as asking for directions, booking a bus ticket, ordering food in a restaurant, etc. Students read more authentic Swahili texts including plays, short stories, newspapers and poems. Prerequisite: AFAS 4041, 4042 or permission of instructor. Credit 3 units. A&S IQ: LCD, LS EN: H

L90 AFAS 4046 Sexual Health and the City: A Community-Based Learning Course
In this community-based learning course, students partner with a St. Louis AIDS service organization (ASO) or sexual health agency to explore how the interrelationships among gender, class, race/ethnicity and sexual identity shape sexual health decisions, outcomes and access to services. Students also examine the complex relationship between men’s and women’s life goals and constraints, on the one hand, and the public health management of sexual health, on the other. In collaboration with their community partner and its clients, students develop a project that addresses an identified need of the organization and the community it serves. Course readings draw from the fields of anthropology, public health, feminist studies and policy making. Prerequisite: PH Health 4134 The AIDS Epidemic: Inequalities, Ethnography and Ethics or permission from the instructor, which is determined based on past student’s experience in the fields of medical anthropology or sexual/reproductive health. Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: CPSC, SSC EN: S

L90 AFAS 4049 Gender, Sexuality and Change in Africa
This course considers histories and social constructions of gender and sexuality in sub-Saharan Africa during the colonial and contemporary periods. We examine gender and sexuality both as sets of identities and practices and as part of wider questions of work, domesticity, social control, resistance and meaning. Course materials include ethnographic and historical materials and African novels and films. Prerequisite: graduate students or undergraduates with previous AFAS or upper-level anthropology course. Credit 3 units. A&S IQ: SSC, SC, SD, WI Arch: SSC Art: SSC EN: S

L90 AFAS 4102 Rastafari, Reggae, and Resistance
Credit 3 units. A&S IQ: HUM: EN: H

L90 AFAS 4121 Rainbow Radicalisms!: Ethnic Nationalism(s), the 1960s and the Politics of the New Left
The Black Panther Party remains one of the most iconic groups of the 1960s and 1970s. Perhaps one of the most understudied aspects of the Panthers’ legacy is their radical influence upon other American racial and ethnic groups, including Asian Americans, Mexican Americans, Puerto Ricans and American Indians, among others. This seminar considers the emergence of ethnic and racial nationalism among these various groups, as a result of their contact and relationship(s) with the Black Panther Party. Considering the politics of groups like the Red Guard, the Brown Berets, the Young Lords and the American Indian Movement, this course charts the rise and fall of rainbow radicalism as a general offspring of the Black Power Movement and part and parcel of what is commonly referred to as “the New Left.” It also considers these groups in relation to the state by probing the dynamic push and pull between repression and democracy. Ultimately, this course grants insight into the contemporary racial domain and current political landscape of America as we discuss how these groups helped to shape modern identity formations, discourses on multiculturalism and definitions of “minority,” “diversity” and “equality.” Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L90 AFAS 417 Topics in African History: Middle Passages: African Americans and South Africa
This upper-division seminar explores the fascinating transnational relationship between African Americans and black South Africans during the 20th century. These two populations became intimately familiar with each other as African-American missionaries, sailors, musicians, educators and adventurers regularly entered South Africa while black South African students, religious personnel, political figures, writers and entertainers found their way to America. This course details why these two populations gravitated toward each other, how they assisted each other in their respective struggles against racial segregation and apartheid, and how these shared histories influence their relationship today. Readings for this course draw from key books, articles and primary documents within this exciting new field of intellectual inquiry. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM BU: BA

L90 AFAS 4213 Sufism and Islamic Brotherhoods in Africa
Muslim societies are prevalent in Africa — from the Horn, the North, the East to the West, with smaller conclaves in Central and South Africa. Islam has played an influential role in these diverse societies, particularly through its Sufi form. Even though Sufism originated in the Arabian Peninsula, it has fit well with African beliefs and cultures. This course aims to explore Sufi beliefs, values and practices in Africa. It reconsiders the academic constructions of “African Islam” by exploring education, intellectual life, economics, gender roles, social inequalities and politics. The goal is to show that Africa is a dynamic part of the Muslim world and not a peripheral one, as it is most often portrayed by the international media or historically, through travelers and colonial accounts. African Muslim brotherhoods have served as political mediators between countries and people (i.e., the role of the Tijaniyya in the diplomatic rivalry between Morocco and Algeria, or its role in reconciliation of clans in Sudan). In addition, the course pays attention to hierarchy in particular tariqa. Finally, the course
examines how African Sufi orders have shaped their teachings to fit transnational demands over the 20th and 21st century. We explore these issues through readings, current media, lectures and special guest speakers. Credit 3 units. A&S IQ: HUM, LCD: EN: H

L90 AFAS 421A From Mammy to the Welfare Queen: African-American Women Theorize Identity
How do representations of identity affect how we see ourselves and the world sees us? African-American women have been particularly concerned with this question, as the stories and pictures circulated about black female identity have had a profound impact on their understandings of themselves and political discourse. In this course we look at how black feminist theorists from a variety of intellectual traditions have explored the impact of theories of identity on our world. We look at their discussions of slavery, colonialism, sexuality, motherhood, citizenship, and what it means to be human. Same as L77 WGSS 421
Credit 3 units. A&S IQ: HUM, SC, SD: EN: H

L90 AFAS 4262 Politics of the Civil Rights Movement
This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests. Prerequisite: L32 101B American Politics. Same as L32 Pol Sci 426

L90 AFAS 435 Slavery and American Literary Imagination
Same as L14 E Lit 4232
Credit 3 units. A&S IQ: HUM: Art: HUM

L90 AFAS 4377 Performing Ghosts: Blackness, Performance, and Archival Erasure
Taking ghost as apparition, metaphor, an imaginary, and type of possession, this course focuses on the intersections between performance, affect theory, and archival practice to investigate how scholars and artists contend with the psychic and affective terrors against blackness. Part of these terrors, the course asserts, happened and is happening in the realm of the affective, ephemeral, and archival. Moving across theoretical works, literature, and theater, our readings differently query: how can performance enable us to recuperate the lives of those violently erased from the archive? How to imagine embodiment for subjects "tracked" by history, such as black folks whose bodies suggest other forms of pathology, like sexual deviancy, mentally "insanity," and other forms of criminalization? How have attachments to ghosts been used as a methodology to stage and reperform blackness in the past and in the present? And lastly, how can we capture embodiment (or enshlement) without live bodies? By rethinking "liveness," "absence," "loss," and "remains," the readings and discussions will offer performance as a methodological and analytical infrastructure to conduct historical and/or archival research. Same as L15 Drama 437
Credit 3 units. A&S IQ: HUM, SD: Art: CPSC: EN: H

L90 AFAS 443 Islam, Transnationalism and the African Diaspora
This course is designed for students who are interested in relating among African immigrants and African diaspora communities living mostly, but not exclusively, in Europe and North America, especially during waves of migration to the Americas. We begin in the days of the transatlantic slave trade, where we examine how interactions, bricolage, and influences of Christianity, Judaism, African indigenous religions, and Islam have impacted the African diaspora living in the Americas. We equally examine how Islam served as a means of resistance to slavery and provided a spiritual connection with the motherland. Credit 3 units. A&S IQ: HUM, LCD: EN: H

L90 AFAS 441 Black Sexual Politics
Borrowing from Patricia Hill Collins’ perspective in Black Sexual Politics, this seminar examines the historic and popular understandings of black sexuality and how they maintain color line, as well as threaten to spread what Hill Collins refers to as a “new brand of racism.” Particularly, this course engages questions about sexuality that have only begun to be discussed with African-American Studies and the larger public sphere. Taking the intersections of identities very seriously, this course interrogates the ways in which these constructions have affected black women, while also being attentive to how “others” are implicated within discourses of black sexuality. Similarly, we will also engage the various distortions of black men — depictions of the black and masculine as almost always violent, sexually and socially irresponsible, brash, questionable and unfaithful. Together we will use various critical texts and media to better understand the impact and the importance of visual and material images in the interplay of race, sex and politics in contemporary America. Same as L77 WGSS 436
Credit 3 units. A&S IQ: SSC, SC, SD: EN: S

L90 AFAS 4433 Who’s Afraid of Post-Blackness?: The Spectrum and Specter of Blackness in Post-Racial America
In 2001, Thelma Golden, the director and chief curator of the Studio Museum in Harlem, boldly claimed that a new generation of African Diasporic artists had officially heralded a new day in “post-Black art.” Six years later a young presidential candidate, born of a white mother from Kansas and a Kenyan father, motivated a black writer for Time magazine to ask, “Is Obama Black enough?” Since 2001, and in the wake of America’s first black president, both public and scholarly discourse on Blackness has virtually exploded. New terms and ideas about the “end of Blackness” — as conservative Debra Dickerson put
it — seem to enter the popular and scholarly lexicon every day. It is now quite common to hear the phrases “disintegration,” “post-racial,” “biracial,” “post-Blackness,” and even “the end of Black politics.” This course explores this expanding discourse and attempt to pinpoint what scholars, pundits and cultural critics mean when they employ these terms. It also unpacks the socio-historical context that has given birth to these terms, asking “Why now?” Has the social and political landscape of America changed so much that we are indeed living in a “post-racial society”? Or does the specter of “Blackness” still loom large, haunting American politics, popular culture, sexuality, media discourse, punitive measures, political economy and our understanding of “Africa” in “African-American” and “African diaspora”? Through the use of fictional texts, history, cultural essays and films this course explores the intraracial spectrum that characterizes Black America, while paying particular attention to issues of class, sexuality, ethnicity, ancestry, diaspora formation and global migration.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L90 AFAS 4483 Race and Politics
From the moment enslaved Africans were brought to American shores, race and racism has been central to the American political project. In this class we will examine how notions of race and racism inform conceptions of citizenship, the allocation of state resources, the development of political parties, and political participation. We will also examine the way that race and racism influence public opinion.

Same as L32 Pol Sci 4241
Credit 3 units.

L90 AFAS 4511 Race, Ethnicity and Culture: Qualitative Inquiries into Urban Education I
Drawing on traditional and recent advances in the field of qualitative studies, this course is the first in a series to examine ethnographic research at the interlocking domains of race, ethnicity, class, gender and culture. The emphasis in this course is on how these concepts are constructed in urban educational institutions. The course includes a field component that involves local elementary and/or middle schools.

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC BU: BA EN: S

L90 AFAS 4512 Race, Ethnicity and Culture: Qualitative Inquiries into Urban Education II
This course is the second of two to examine ethnographic research at the intersecting and overlapping points of race, ethnicity, class, gender and culture. The emphasis in this course is on developing methodology that is consistent with critically grounded, socially responsible, culturally responsive and humane research projects and programs. Secondary English education majors are required to take fall semester during the year in which student teaching is done. Prerequisites: AFAS/ Edu 4511 and/or permission of the instructor.

Same as L12 Edu 4512
Credit 3 units. A&S IQ: SSC, WI Art: SSC EN: S

L90 AFAS 4601 Topics in African American Studies: Historical Racial Violence: Legacies & Reckonings
There is growing awareness of the legacies of historical racial violence in the United States and a related increase in reckoning efforts. Area histories of enslavement, lynching, and other racial terror and dispossession relate to inequality, conflict, and violence in the same places today. These “haunting legacies” include heart disease and other health disparities, homicide rates, white supremacist mobilization, and corporal punishment in schools. Meanwhile, many communities and institutions are moving to acknowledge and address legacies of historical racial violence in various ways. This course combines seminar-style readings and writing on legacies of racial violence with a practicum component, where individual students or groups of students will conceptualize and develop interventions intended to clarify and disrupt legacies of racial violence, facilitating contemporary reckoning. The practicum will explore and support a broad range of interventive efforts, including public policy measures, original research projects, archival development, commemorative efforts, and a related array of mediums, including visual art, design, film, digital projects, and other creative approaches.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: SSC BA: BA EN: S

L90 AFAS 4608 Education of Black Children and Youth in the United States
This course provides an overview of the education of black children and youth in the United States. Covering both pre- and post-Brown eras, this course applies a deep reading to the classic works of DuBois and Anderson as well as the more recent works of Kozol, Delpit and Foster. The social, political and historical contexts of education, as essential aspects of American and African-American culture and life, are placed in the foreground of course inquiries.

Same as L12 Edu 4608
Credit 3 units. A&S IQ: HUM, SD, WI Art: HUM EN: H

L90 AFAS 461B Construction and Experience of Black Adolescence
This course examines the construct of black adolescence from the general perspectives of anthropology, sociology and psychology. It begins by studying the construct of black adolescence as an “invention” of the social and behavioral sciences. The course then draws upon narrative data, autobiography, literature and multimedia sources authored by black youth to recast black adolescence as a complex social, psychological, cultural and political phenomenon. This course focuses on the meaning-making experiences of urban-dwelling black adolescents and highlights these relations within the contexts of class, gender, sexuality and education.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: SSC BA: BA EN: S UColl: ACS, SSC

L90 AFAS 4755 Queering Sexual Cultures in Africa and the Diaspora
This course examines gender and sexuality in contemporary Africa and the diaspora. We will focus specifically on queerness as a category of analysis and will examine queer identities, practices, communities and cultures in Africa and the African diaspora. In recent years, many African countries have adopted harsh anti-homosexuality laws and much of the political and popular discourse frames expressions of same-sex desire as “un-African.” However, there is a long history of non-normative sexualities in Africa, challenging the manner in which the continent is constructed as heterosexual by both local and global forces. Similarly, black communities across the African diaspora have relied on the regulation of gender and sexuality to demarcate the boundaries of blackness, and have traditionally sought belongingness to the nation through...
compulsory heterosexuality. Many scholars, artists and activists in the African diaspora continue to critique parochial definitions of Africanness and Blackness that rely on the exclusion of queer subjects. By drawing on historical, theoretical and visual texts, we will examine the debates concerning sexuality, citizenship and human rights on the African continent and the diaspora as well as their relationship to global issues around sexual citizenship and human rights. By focusing on the lived experiences of LGBTQ subjects in the African diaspora, we will interrogate the contested relationship between sexuality and politics. This reading-intensive, interdisciplinary course will familiarize students with the debates and issues of Queer African Studies, Black Queer Studies, and Black and African Feminist Thought.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD EN: H

L90 AFAS 4881 Advanced Seminar: Mad: Mental Illness, Power and Resistance in Africa and the Caribbean

This seminar explores the history of mental illness in Africa and the Caribbean during the colonial and postcolonial periods. We will be guided by the following questions: What is mental illness? How do social, cultural and political realities affect how mental illness is defined? Should mental illness always be analyzed within a specific cultural context? How did psychiatry factor into the efforts of European colonizers to maintain social order in their colonies? How have colonized people resisted colonial notions of madness? What is the place of religion in these histories? How did mental institutions change after the end of colonial rule and how was postcolonial Caribbean and African psychiatry harnessed in service of decolonization? The course will pay special attention to how European colonial powers employed similar understandings of blackness across regions as they formulated ideas concerning the black populations they deemed "mad" across Africa and the Caribbean.

Same as L22 History 4881
Credit 3 units. A&S IQ: HUM, LCD EN: H

L90 AFAS 4930 Advanced Seminar: Slavery in America: The Politics of Knowledge Production

This course focuses on the long history of black chattel slavery in America, from origins to emancipation. The course foregrounds the strategies used to control, life and death, that were at the heart of slavery's traumatic and grotesquely violent 250-year career in North America, with attention to hemispheric context. At the same time, it highlights the fiercely contested historical battleground where scholars have argued about how to define American slavery — as a system or site of labor, reproduction, law, property and dispossession, racial and gender domination, sexual abuse and usurpation, psychological terror and interdependency, containment and marooning, selfhood and nationality, agency, revolutionary liberation and millennial redemption.

Same as L22 History 493A
Credit 3 units. A&S IQ: HUM, SD EN: H

L90 AFAS 4977 Advanced Seminar: A Long Road to Uhuru and Nation: The Social History of Modern Kenya

This seminar challenges the popular western view that the African continent is a single place and that Africans are homogenous or inherently tribal. Focusing on the lived experiences of imperial rule, the struggle for independence, and the process of nation building, it explores the development of an African country. The seminar focuses on how common men, women and adolescents wrestled with the problem of turning a colony into the modern Kenyan nation. Admission to the seminar requires permission of the instructor and at least one previous upper-level course in African history.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM EN: H

L90 AFAS 4984 The Problem of Freedom: The Age of Democratic Revolutions in the Americas, 1760-1888

Ever since the improbable alliance of the English pirate and slave trader Sir Francis Drake and the fugitive slave Cimarrons on the Atlantic coast of Panama many centuries ago, the history of freedom in the New World has unfolded in unlikely fits and starts. The course will explore two related conjectures: first, that maroon politics (the often short-lived alliances between slaves, quasi-free blacks and white allies), slave rebellion, provincial secession and civil war were the widespread and normative conditions of post-colonial regimes throughout the New World; and second, that the problem of freedom was especially challenging in a New World environment in which freedom was fleeting and tended to decompose. Special attention will be given to antislavery insurgencies, interracial politics and alliances in the United States and the perspectives on freedom they produced, but the readings will also include materials on debates over freedom in the Caribbean and South America over the course of the long age of democratic revolution, 1760-1888. Same as L22 History 4984

L90 AFAS 499 Independent Work for Senior Honors: Research

Prerequisite: permission of director and appropriate grade point average. Application forms available in program office.
Credit 3 units.

L90 AFAS 4991 Independent Work for Senior Honors: Thesis

Prerequisite: satisfactory standing as a candidate for senior honors and permission of the director of the African and African-American Studies program.
Credit 3 units.

L90 AFAS 49TP Advanced Seminar: Whose Nairobi?: Opportunity and Inequality in a 20th-Century African City

Visitors to East Africa often hear the cautionary refrain, "Nairobi is not Kenya." However, over the past century, Kenya’s largest city has meant distinctly different things to distinctly different people. Starting as a simple railway camp in the late 19th century and shaped by decades of colonial racial and ethnic segregation, it has grown into a global "mega-city," where Kenyans from every background and every corner of the country interact with an equally diverse cast of foreigners. Focusing on the realities of the day-to-day, this research seminar deploys a wide variety of historical evidence to better understand how ordinary people experienced and were shaped by Nairobi during the long and turbulent 20th century. This seminar’s centerpiece is an extensive and original research paper that offers students the opportunity to work with a wide variety of primary sources.
including archives, city planning reports, maps, images of
the built environment, music, material culture, memoirs, and
narrative fiction.
Same as L22 History 49TP
Credit 3 units. A&S IQ: HUM, LCD EN: H

American Culture Studies

American Culture Studies (AMCS) is a multidisciplinary program
that provides both a broader context for study in different fields
and a deeper understanding of American culture in all of its
complexities. AMCS students explore culture-related topics and
issues that demand multiple perspectives and methodologies.
They also consider the mutual relevance of various disciplines
to any single object of study in American culture — a place,
an event, a work of art, a political institution and so on — while
developing the knowledge and skills necessary to study a wide
array of cultural objects.

The program offers a major and a minor, coordinating offerings
across the disciplines so that students from any field or school
can explore an array of ideas and approaches as they complete
their course work. Pairing the major with a second major in a
complementary discipline is an enriching model of cultural study,
and AMCS will work closely with students to ensure that double-
majoring works well.

The program offers especially attentive advising, helping
students to have a cohesive experience and to pursue their
specific interests within a diverse curriculum.

Contact: Karen Skinner, Academic Coordinator
Phone: 314-935-6991
Email: k.skinner@wustl.edu
Website: http://amcs.wustl.edu

Faculty

The American Culture Studies program is enriched by its diverse
community of faculty, lecturers, students and staff. Please visit
our AMCS Directory page (https://amcs.wustl.edu/people/88) for
a description and list of our teaching and affiliated faculty and
other important members of our community.

Majors

The Major in American Culture Studies

Total units required: 32 credits, 24 of which must be 300-
level or above. In addition to completing the required units,
students are expected to take three courses (9 credits) with
heavy methodological content (refer to "Disciplinary Foundations
Course Work" below).

Visit our Course Listings (http://amcs.wustl.edu/listing.php)
webpage for a complete list of courses, by semester, that count
toward the AMCS major. For more information about the major,
including past examples of projects, leadership opportunities
and an FAQ, please visit our AMCS undergraduate (https://
amcs.wustl.edu/undergraduate) webpage.

Requirements:

• Introductory Course (3 credits) as designated by American
Culture Studies, which recently have included AMCS 220
Topics in American Culture Studies: "What's Opera Doc?"
Music, Taste, and American Identity. AMCS 206 "Reading"
Culture: How to Read Images: Visual Culture and Visual
Literacy, and AMCS 202 The Immigrant Experience. Visit our
Course Listings (http://amcs.wustl.edu/listing.php) webpage
for additional offerings by semester.

• AMCS 375A American Culture: Methods & Visions: Hot
Takes: Cultural Criticism in the Digital Age (3 credits)

• Fieldwork Experience (3 credits): Enrollment in an
approved fieldwork course such as AMCS 479: On Location:
Exploring America (https://amcs.wustl.edu/on-location) or
completion of a field-based independent project under the
guidance of AMCS faculty (in most cases under the course
number L98 AMCS 298 Directed Fieldwork in American
Culture Studies).

• General Americanist Course Work (18 credits): Six
courses taken in the following groupings:
  • Prime Concentration Area Course Work (9 credits):
    Three courses in a single concentration. At least two of
    these courses must be at the 300-level or higher. Refer
to the list below of established Concentration Areas.

  • Distribution Course Work or a Second Concentration
    Area (9 credits): Courses taken in three different
disciplines or fields ("Distribution") or three courses in a
    second concentration area. At least two of these courses
    must be at the 300-level or higher.

• Senior Capstone Project (3 credits): This is a
multidisciplinary project that serves as the culmination of the
program’s course work and past fieldwork study. Proposed
during the spring of the junior year, this 3-credit project is
granted academic credit in the fall through AMCS 400A
AMCS Capstone Workshop I. Students pursuing the Senior
Honors Thesis will earn an additional 3 credits in the spring
through AMCS 400B AMCS Capstone Workshop II. In
some cases, the capstone project may be fulfilled within
the context of an approved upper-level seminar course. For
more information about the capstone project and proposal
process, including important dates, please visit our AMCS
website (https://amcs.wustl.edu/capstone).

• Two 1-credit workshops, AMCS 490A AMCS Portfolio
Workshop: Academic Citizenship and L98 AMCS 490B:
AMCS Senior Workshop: Connections and Explorations,
taken in the senior fall and spring, respectively.

• At least two multidisciplinary courses, taken as part of
the above major requirements and designated by AMCS
Disciplinary Foundations Course Work: In addition to completing the above requirements, students are expected to take three courses (9 credits) with heavy methodological content and approved by the student's adviser/the program, at least two of which must be in a single discipline and two of which must be at the 300 level or higher. A suitable second program of study may be used to fulfill this expectation.

Additional Information

Established Concentration Areas

The following list reflects areas of longstanding student interest. Majors are welcome to propose new concentrations or to tailor an established one to suit their interests. AMCS currently has nine established concentration areas:

- 20th-Century America
- Early America
- The Construction of Race and Ethnicity in American Life
- Policy-Making in American Society
- Popular Culture
- A Sense of Place: Community, Region and Landscape
- Social Thought and Social Problems
- Visual, Material and Digital Cultures in the United States
- War and Peace

AMCS gives majors considerable freedom in defining their course of study, allowing them to learn how cultural study is done in multiple fields and periods even as they define concentration areas in ways that suit their specific interests. Pairing the AMCS major with a second major in a complementary discipline is an especially enriching model of cultural study, and AMCS will work closely with students to ensure that double-majoring works well.

Study Abroad: Majors intending to study abroad should consult with the AMCS study abroad adviser well in advance to plan a course of study and discuss its impact on their work in the major (including their fieldwork and capstone projects). For further information, please visit the Frequently Asked Questions (https://amcs.wustl.edu/amcs-undergraduate-faq) on our undergraduate page or review the AMCS approved programs on the Study Abroad (https://overseas.wustl.edu/study-abroad) webpage, searching for "American Culture Studies" as the approved department under the "Selecting a Program" option (in the left navigation bar under the category “Plan”).

Special Opportunity: Lynne Cooper Harvey Undergraduate Scholars: The Harvey Undergraduate Scholars are vital members of the American Culture Studies community, serving as intellectual leaders and modeling innovative multidisciplinary research. They are asked to share their knowledge with the community in a variety of ways during their time as scholars, including through involvement in a project or initiative that brings them into collaboration with others in the AMCS community. These projects should contribute substantially to the scholars' learning and allow them to actively engage with and bolster all members of the AMCS community. Please visit the Harvey Undergraduate Scholars page (https://amcs.wustl.edu/lynne-cooper-harvey-undergraduate-scholars) for more information.

Senior Honors: Writing an AMCS honors thesis is one way to fulfill the capstone project requirement. It allows students to complete an extended study of a cultural topic with the input of faculty from more than one discipline, and it provides both a support system and an audience of peers for that study. For more information about the honors thesis and capstone project process, including important dates and criteria, please visit our Senior Honors Thesis page (https://amcs.wustl.edu/major-requirements/#secondary).

Minors

The Minor in American Culture Studies

Units required: 15 credits, at least 9 of which must be at the 300 level or above.

Requirements:

- Distribution Course Work (9 credits): At least three courses on American subjects (two of which must be upper-level) either in a single established Concentration Area (https://amcs.wustl.edu/major-requirements/#primary) (refer to the list of established concentrations below, or students may propose their own) or in three distinct disciplines outside the student's major.
- One additional AMCS course (3 credits)
- At least two multidisciplinary courses, taken as part of the above minor courses and designated by AMCS. Minors who opt to do a concentration are encouraged to take at least one multidisciplinary course that connects to the subjects or issues in the chosen concentration area. AMCS 375A American Culture: Methods & Visions: Hot Takes: Cultural Criticism in the Digital Age (a junior-level methods seminar) also is encouraged and may count as a multidisciplinary
course. Visit our Course Listings (http://amcs.wustl.edu/listing.php) webpage for a complete list of general and multidisciplinary courses that count toward the AMCS major.

- Only one of the courses taken to complete the minor requirements may be home-based in the same discipline as the student’s major(s).

**Additional Information**

**Established Concentration Areas**

The following list reflects areas of longstanding student interest. Minors are welcome to propose new concentrations or to tailor an established one to suit their interests. AMCS currently has nine established concentration areas:

- 20th-Century America
- Early America
- The Construction of Race and Ethnicity in American Life
- Policy-Making in American Society
- Popular Culture
- A Sense of Place: Community, Region and Landscape
- Social Thought and Social Problems
- Visual, Material and Digital Cultures in the United States
- War and Peace

Visit our undergraduate AMCS webpage (https://amcs.wustl.edu/undergraduate) for more information about the minor requirements and concentration areas as well as other resources and announcements for AMCS students.

**Courses**

**L98 AMCS 101 Lewis and Clark and the American Challenge**

This central multidisciplinary course in the American Culture Studies program is taught by faculty members from the humanities and social sciences, with guest lecturers from the natural sciences. Its focus is the 1804 to 1806 "Voyage of Discovery" led by Meriwether Lewis and William Clark, which will serve as a basis for examining American cultures, past and present. This expedition of more than 7,000 miles dramatically altered the nation's identity by expanding its perception of America's enormous human and physical diversity and forcing Americans to confront the issue of how much difference the United States could contain. By starting with selections from the expedition's journals, the course will introduce the varied and often contradictory ways (both then and now) that different disciplines examine a problem, through the lenses of history, literature, art, anthropology, economics, political science, and biology as well as through race and gender perspectives.

In this way, the course seeks to investigate how peoples of different perspectives and cultures interact: how they explore the unknown and try to explain it; how they gather and develop "knowledge"; and how they accept or reject information. To draw together these varied strands of inquiry and to expose students to the research process, the lectures will be complemented by weekly small group discussions, with field trips to sites along the expeditionary route, including those of the upper Missouri River in North Dakota. Students will choose specific questions they wish to investigate and, organized into research groups of four or five, will create websites to discuss their findings. In addition to this core seminar, students will enroll in a special section of English composition.

Credit 3 units. A&S: FYS BU: HUM

**L98 AMCS 1012 Introduction to Urban Studies**

This course provides a survey of the field of urban studies, utilizing the city of St. Louis as a field site. The major purpose of the course is to gradually reveal how a city operates internally, and how it operates externally with its sister cities, surrounding metropolitan areas and neighboring states, amidst competing and often contradictory interests. Utilizing historical analysis as a guide, the course will briefly revisit the experiences of previous waves of ethnic groups to the St. Louis metropolitan area, as a lens for understanding the current social, political and economic dilemmas which many urban dwellers in St. Louis now face. The course will reveal to students the intricacies of social welfare issues and policies among high density populations, in St. Louis, that are homogeneous and heterogeneous, at the same time. Visits and discussions with various governmental and nongovernmental agencies, and how such agencies function or dysfunction for various constituencies allow students to ask crucial questions regarding equality of opportunity in a democratic society. Students will also encounter diverse communities and neighborhoods and the intended and unintended consequences of social welfare policies designed to ameliorate urban dilemmas such as poverty and inequality, homelessness, educational underachievement, gentrification, migration and immigration, development, health care, fiscal issues, the informal economy, and issues concerned with crime and social justice, among others. Readings are reinforced and challenged through visits, interactions and observations with broad constituencies and institutions, ranging from city officials to community residents. As such, this course offers a survey discussion of the rich interdisciplinary field of urban studies for those who may be interested in pursuing a standalone major in the field of urban studies.

**L98 AMCS 101B American Politics**

This course provides an overview of the politics of the American system of government. Among the topics to be covered are the historical developments of American politics, federalism, political participation (voting, interest groups, parties), institutions (congress, the courts, the president), and public opinion. A theme underlying our examination of these and other topics is the fact that political actors are purposive in their strategic pursuit of various objectives. We explore the many ways in which this aspect of political behavior impacts institutions and the interactions between political actors throughout the American political system.

L98 AMCS 102 First-Year Seminar: Visualizing and Documenting Race, Class and Gender

How do you know someone is a woman or a man, upper or lower class, Hispanic or white? What signals these identities and what do we associate with them? In this course we will use photography and narrative accounts to explore intersections of race, class, and gender. Our investigation will cover three broad topics: systems of power, structures of institutions, and performances or displays of identities. You will be challenged to use your "sociological imagination" and connect personal problems to public issues, moving beyond commonly held views and using our own lives to advance knowledge. Through photography and weekly reflection pieces you will learn how to situate your writings within the academic literature developing skills in articulating arguments, analyzing theory, conducting visual methods, and directing a critical eye upon even the most taken for granted social positions: our own, as we discover our place within the Washington University community.

L98 AMCS 103 Seeking Freedom: Using the Courtroom to Escape Slavery in Antebellum St. Louis

The struggle against slavery took many forms in America before the Civil War ended it by military victory and constitutional amendment. Anti-slavery political leaders tried to undermine it in Congress; newspapers assailed it in print as immoral, hoping to arouse popular indignation; enslaved persons ran away or rose in armed rebellion. However, the struggle also took place in the courtroom, where enslaved Americans sought to gain their freedom through the mechanisms of the law. Although slavery was "legal" in Missouri, nearly 300 people of color sued on various grounds to demand the status of freedom. Using the tools of the law, they and their attorneys brought suit in the Circuit Court, whose original manuscript records will be the basis of this inquiry into the lives and struggles of those who sought freedom in St. Louis. On what grounds could someone claim freedom? How could a person of color with no money hope to win a personal victory against an entrenched and powerful system defended by determined slaveholders? Why did a pro-slavery state provide legal remedies for an institution it desperately wanted to preserve against an onslaught of opposition? Before these questions ended abruptly with the Civil War, they were asked and answered hundreds of times. Limited to 20 students, this first-year course is a multidisciplinary seminar that emphasizes discussion and research. To examine the broader questions raised in such an inquiry, it will approach the subject from the various disciplines of the liberal arts. How did literature portray this struggle and the human dilemmas it posed? How did religion guide people to attack — and defend — slavery? Did economic considerations lead people to support or abandon slavery? How did the political system accommodate the rivalry over slavery? What moral or philosophical factors dictated the way people argued their cases in court? And, finally, how did these questions figure in the legal arguments revealed by these records?

L98 AMCS 110A Ampersand: Examining America: American Dreams: Art, Culture, Performance and Politics

Rooted in the Jeffersonian ideals of "life, liberty and the pursuit of happiness," the notion of the "American Dream" actually has a complicated history, and its meanings are diverse and contested. This Ampersand course investigates how perceptions, representations, and meanings of the American Dream have swept through history and how they live on in the contemporary United States. Rather than seeking definitive definitions or answers, we carefully and thoughtfully examine case studies of American culture and the arts — literature, theatre, film, and painting — as the lens for understanding images of nation and identity. Utilizing an intimate seminar format to facilitate the close reading and discussion of works in various media, this Ampersand course emphasizes both critical thinking and writing, and it also requires students to execute a creative project of their own making as well. Students in this course visit a variety of exciting performances and exhibits, both on and off campus. Our primary goal is to present a compelling, interdisciplinary perspective on the American Dream that synthesizes the arts, performance, and politics. This course is intended for first-year students; any seats remaining after first-year students enroll are open to other classes.

L98 AMCS 112 First-Year Seminar: Race and Ethnicity in American Cinema

From the early documentary roots of cinema through the Civil Rights movement and to the recent democratization of the means of media production, questions of race and ethnicity have proved crucial both to the content of American films and also to the perspective from which they are made. This class looks at the representation of historical moments from the Civil War to Hurricane Katrina, the production of cinematic stereotypes as well as their appropriation for subversive purposes, and the gradual evolution of multiculturalism as a central factor in the stories told and the telling of stories on the American screen. Students use film texts to develop a critical understanding of one of the most important issues in American history. Required screenings.

Same as L53 Film 112
L98 AMCS 118A Geology of National Parks
Survey of geologic processes occurring at the Earth's surface and its interior using national parks and monuments as the prime venue for presentation. Volcanism and mountain-building; the work of streams, glaciers and wind; lake and coastline development; stratigraphy and sedimentation; and Earth history. Material presented in a geographic context, with emphasis on landforms and landscape evolution, relating geology to the development and settlement of the U.S.

L98 AMCS 1201 First-Year Seminar: Race and Performance
What does it mean to "act black"? What about "acting Jewish"? This course looks at performances of racial and ethnic identity, mostly in the United States, mostly in the 20th century. We examine novels (such as Nella Larsen's *Passing*), plays (such as Anna Deavere Smith's *Fires in the Mirror*), and performances of everyday life (such as "Cowboys and Indians") to investigate the performance of race in public. Once we begin to explore the social and cultural performance of race, will it all turn out to be "only" an act?

L98 AMCS 122 Ampersand: Pathfinder — A Sense of Place: Discovering the Environment of St. Louis
The second course in the Pathfinder program, this course turns your attention to the environment of the greater St. Louis area as you explore in and around St Louis. You'll learn about the St. Louis backyard, and your "home" for the next four years. Through field trips, readings, and discussion, you'll see firsthand what challenges face the environment and the people who live here. You will learn how to examine multiple perspectives, how to think critically and how to approach problems from an interdisciplinary and holistic approach. You'll also learn why it is important to know a community at the local level if you're going to affect change on any level-state, national, or international. In addition to weekly readings and discussion, this class includes several field trips.
Same as L61 FYP 122

L98 AMCS 130 First-Year Seminar: The Ritual Landscape of Cahokia: Perspectives on the Politics of Religion & Chiefly Power
The purpose of this class is to engage and challenge freshman students in an open discussion about the prehistoric Mississippian community of Cahokia. The focus of this course is two-fold. The first is to study the way in which the archaeological evidence has been interpreted. The second is to examine other perspectives on Cahokia, especially from the Native American descendants who consecrated this landscape nearly a millennium ago. An underlying tenet of this seminar in understanding Cahokia can also be achieved through the traditions and literature of Native Americans. In the end we want to understand the basis for Cahokia's organization as a prehistoric Native American community, and the role that ritual and religion played in the rather dramatic and dynamic history of this community and the surrounding region.

L98 AMCS 135 First-Year Seminar: Chinatown: Migration, Identity, and Space
"Chinatown," as a cultural symbol and a spatial entity, links various topics and studies in this course. Our survey starts with a historical and geographical glimpse of five Chinatowns in the United States through the real-life stories of their residents. This is followed by an in-depth study of Chinese restaurants and food all over the world using texts, images, and films that reveal how Chinese cuisine is inherited in and adapted to each local culture and society. The seminar culminates in a discussion of Chinese migration and settlement, the representations of identity, and the cultural and spatial constructions in particular historical and social contexts. The assignments include field trips to Chinese businesses and a debate about whether or not Olive Boulevard constitutes a Chinatown in St. Louis.

L98 AMCS 160 First-Year Seminar: Easy Riders, Migrant Laborers: Mobility in Literature and Film
The open road is a quintessential American image. This seminar explores the stories of open space, social mobility, and renewed possibilities that pervade American literature, film, and culture. What accounts for the pull of the open road? What roles have these stories played in American identity? We will pursue and complicate ideas of mobility, examining how differences of class, race, gender, and national origin shape them. Within national narratives of movement, how might we reconcile the coexistence of easy riders and migrant laborers, overseas adventurers and displaced refugees? Our journey will begin with the westward expansion of the 19th century and take us through the rise of the highway, mass immigration, and American global power that reshaped ideas of mobility in the 20th and 21st centuries. Our routes will range widely, following the American "frontier" as it expands beyond the continental United States into the Pacific and the world. Authors/directors may include Walt Whitman, Bharati Mukherjee, Jack Kerouac, Tomás Rivera, Dennis Hopper, Cormac McCarthy, and Myung Mi Kim. Course is for first-year, non-transfer students only.

L98 AMCS 200A Doctors and Terrorists: The Fictions of South Asian Americans
South Asians have always played an integral role in the culture and politics of the United States. However, for complex reasons, their presence has either been concealed, dismissed through dangerous stereotypes, or, just as inaccurately, overly celebrate for proving the generosity of American liberalism and multiculturalism. Racially misrecognized, this large and heterogeneous group has nonetheless shaped American categories of race, sexuality, and citizenship in intriguing and powerful ways. South Asian Americans have turned to fiction, music, and popular culture to craft deeply intimate and original assessments of mainstream desires. In doing so, they have sought to resist the dictates of whiteness, to question U.S. imperialism, to garner acceptance and mobility, and to build solidarity with other U.S. minorities. In this course, we learn about the complex history and cultural productions of South Asians in America. How did "South Asia" become a category of identification, and who benefited from that designation? What role have South Asians played in the economic, cultural, and global ascendancy of the United States? How do South Asians connect with and control their countries of origin? What is the significance of storytelling in building the archive and questioning the fiction of South Asian America?

L98 AMCS 2055 Forever War: American Literature and Culture from Vietnam to Afghanistan
You have now lived more of your life since 9/11 than before it. How does your personal and generational experience help us to define and interact with such an impenetrable concept as war, let alone the "forever" war of contemporary memory? The term itself is relatively recent. Indeed, if you search "forever war" in the library catalog, you will get two hits: a 1974 sci-fi novel The Forever War written by veteran Joe Haldeman that fictionalizes his experiences with the endless futility of the Vietnam War (but in outer space); and a 2008 nonfiction book The Forever War by Pulitzer Prize-winning journalist Dexter Filkins that chronicles Iraq, Afghanistan, and the long history of the War on Terror. In line with Haldeman's and Filkins' fatigue over modern war's
serve as a lens through which to ascertain the challenges, permanent, conceptual or concrete. Modes of homemaking and obtain spaces and senses of home, whether fleeting or discrimination, black people have found ways to claim, make, disproportionately affected black lives, communities, and home restrictive covenants, and gentrification have targeted and built space. In the United States, slavery, Jim Crow, redlining, necessarily to study nation, family and affective ties, gender, and spaces shape and are shaped by people. To study home is As places of individual and communal living and dwelling, home social, economic, political, and historical landscape of a society.

L98 AMCS 212 The American Dream: Work, Class, and Culture
Race and gender are widely discussed and their ramifications well studied, but a great silence still surrounds the issue of class in America, which is often called a classless society where those who work hard enough can attain the American dream. With the 20th-century worker and workplace as the focus, students study texts (among them Rivethead, China Men, Mules and Men), films (Modern Times, Salt of the Earth, and Saturday Night Fever), and music (blues, folk, rock) as a way to consider the changing concepts and valuations of class, the history and culture of working-class America, its portrayal in popular media, and where class-related matters stand today. Multicultural perspective. Guest speakers and a tour of a factory.
Credit variable, maximum 3 units. BU: BA, HUM

L98 AMCS 2156 The Thrilling Story: Constructing the Civil Rights Movement
What does it mean to be at home? How do home and nation intersect? What are some of the ways African Americans have cultivated home spaces, and within what societal conditions? Using these questions and drawing from literature, geography, black feminism, and film, we will explore home space as a force and factor in shaping black identities in the U.S. As microcosms of cities and the nation, home spaces are structured by the social, economic, political, and historical landscape of a society. As places of individual and communal living and dwelling, home spaces shape and are shaped by people. To study home is necessarily to study nation, family and affective ties, gender, and built space. In the United States, slavery, Jim Crow, redlining, restrictive covenants, and gentrification have targeted and disproportionately affected black lives, communities, and home spaces. In the face of this dehumanization, devaluation, and discrimination, black people have found ways to claim, make, and obtain spaces and senses of home, whether fleeting or permanent, conceptual or concrete. Modes of homemaking serve as a lens through which to ascertain the challenges, triumphs, and banalities of black life in the U.S. throughout history

L98 AMCS 220 Topics in American Culture Studies: "What's Opera Doc?" Music, Taste, and American Identity
This course introduces students to the different approaches and methodologies within the American Culture Studies field, including those represented by literature, history, sociology and political science; at the same time, they learn key concepts within the field that inform their future work. These are presented in a semester-specific topic of focus; please refer to course listings for a description of the current offering. The course is ideal for AMCS majors and minors, but others are welcome. This course fulfills the introductory course requirement for AMCS majors and minors.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

Black women, much like their male counterparts, have shaped the contours of African-American history and culture. Still, close study of African-American women's history has burgeoned only within the past few decades as scholars continue to uncover the multifaceted lives of Black women. This course will explore the lived experiences of Black women in North America through a significant focus on the critical themes of violence and sexuality. We will examine African-American women as the perpetrators and victims of violence, as the objects of sexual surveillance, as well as explore a range of contemporary debates concerning the intersections of race, class and gender, particularly within the evolving hip-hop movement. We will take an interdisciplinary approach through historical narratives, literature, biographies, films and documentaries.

L98 AMCS 225A Religion and Politics in American Society
The United States has often been imagined as both a deeply Christian nation and a thoroughly secular republic. These competing visions of the nation have created conflict throughout American history and have made the relationship between religion and politics quite contentious. This course surveys the complex entanglements of religion and public life from the colonial era through the contemporary landscape. Topics covered include: religious liberty and toleration, secularization, the rise of African-American churches, the Civil War, national identity and the Protestant establishment, the religious politics of women's rights, religion and the presidency, the Cold War, the religious left and right, and debates over church-state separation. Same as L57 RelPol 225

L98 AMCS 230 Topics in Urban America: The Sensory Landscape of the American City
This course foregrounds the interpretive and analytical approaches used in the study of American cities. The city is a crucial frame for understanding the nation’s cultural, economic, social, political and ecological concerns and evolution. Employing multiple perspectives, we interpret urban space as a product of culture, explore the city’s importance in shaping American society, and investigate the ongoing evolution of the built environment. This course lays the basis for interdisciplinary thinking and research in American culture studies. The topic varies by semester. Please refer to course listings for a description of the current offering. The course is ideal for AMCS majors and minors, but others are welcome. This course fulfills the introductory course requirement for AMCS students.
Credit 3 units. BU: BA, HUM

L98 AMCS 232 Workshop in Media Culture: Narrative and Historical Storytelling
Whether Hollywood representations of Civil War politics in “Lincoln,” documentary reconstruction of the civil rights movement in “Eyes on the Prize,” or modern day news coverage of the Ferguson protests through the internet and social media, our understanding of history and culture is always mediated by the presence of storytelling techniques. This exploration-based workshop considers how media makers reconstruct historical people, places, and events using different media-based storytelling techniques. Through the criticism and analysis of various media artifacts (e.g., documentary and narrative films, podcasts, online/gallery exhibits), we seek to understand issues like the effects of manipulating historical facts to enhance a story, the ethics of portraying a person’s life on screen, and the challenges of representing contesting voices within a narrative framework. We consider the broader political, social, and cultural ramifications wrought when media makers, intentionally or not, misrepresent people, movements, issues, ideas, and events. Students visit local historical archives such as the Washington University Film & Media Archive to examine primary source materials and to learn how they are utilized in the narrative construction of media projects. In addition, they are trained in basic archival research, interview, and oral history techniques. Throughout the semester, students actively create media projects that synthesize their class learning into a final short film, documentary, podcast, exhibit, or other form that engages in or actively critiques historical narrative construction. Final projects will be created with regular consultation of the instructor. Note: Technology and equipment needed for a particular final project may not be available through the course. It is best for students to be able to provide their own equipment for their project of choice, such as basic editing software (Moviemaker or iMovie), a camera (consumer grade or even cell phone cameras will suffice), or whatever else a project may require. Media production knowledge is not a prerequisite for this course.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

L98 AMCS 236 Cultural History of the American Teenager
This course explores the recent history of the teenager in the United States, from the rise of teen culture in the 1950s to the current state of adolescence in the new century. Why have so many novels and films memorialized adolescence? How has the period of development been portrayed in books and film? How have depictions and attitudes toward teen culture changed over the past 60 years? In our consideration of teen culture, we take a multidisciplinary approach when tackling a variety of materials — including historical readings, literary fiction, Young Adult fiction, comic books, popular films, and popular music — in an attempt to come to a better understanding of how the notion of the American teenager has evolved over the past 60 years. We begin with J.D. Salinger’s classic novel of adolescence, The Catcher in the Rye, a book that in many ways helped initiate the rise of the youth movement in the 1950s and ‘60s. Our readings focus on the middle decades of the 20th century, when teen culture moved to the forefront of American life, but we end the semester by considering how teen life has recently been imagined in such novels as The Hunger Games. Our class also discusses a few films, such as Rebel Without a Cause and American Graffiti, which have helped shape our conception of the American teenager. Ultimately, we question what these depictions of teen culture can tell us about larger trends and concerns in American life. As this course serves as an introduction to American Culture Studies, we focus on the different methods that we can employ when attempting to interpret and analyze American culture.

L98 AMCS 237 Don’t Believe the Hype: Race, Media, and Social Movements in America
"Don’t Believe the Hype" will provide students with the tools to critique popular media and its association to social movements in America. This course will explore and analyze how media, broadly defined, including (but not limited to) music, art, film, literature, television and social media, has influenced social movements in very profound ways over the last century. The course will centralize the African-American experience and the Black Freedom Movement in particular and will teach students how to contextualize media and critically assess its impact, and examine the various ways media has played pivotal roles in social movement. Using these skills we will answer the following questions: What is the audience for particular forms of media? What does a social movement become part of popular culture? What is the purpose of media in these situations? How effective has media been for organizing? An integral part to this course will be the use of the Henry Hampton Archive in the Washington University Film & Media Archive. The archive is a repository of primary materials such as films that were filmed throughout the semester. By using the Hampton Collection students will also learn to analyze and interpret primary documents while also having a more nuanced understanding of history and how media is constructed and informs the way we process socio-political currents that evolve into social movements. Attendance mandatory during first two weeks.

<tr>
<td>L98 AMCS 244 War, Rebellion and the Formation of American Identity, 1754-1865</td>
<td>This course surveys the United States' experiences with rebellion and organized armed conflict from the origins of the American Revolution until the Civil War. Though the class deals with war, its focus is not on military tactics or the outcome of battles - indeed several of the conflicts it considers were entirely bloodless. Rather, the course utilizes war and rebellion as a prism through which to view the ways in which Americans conceived of themselves. Students address a number of questions: How and why did people in North America conceive of themselves as distinct from Europeans? Did war lead to more inclusive or exclusive views of who was considered “American?” How did people of different backgrounds view violent conflict? Why did some wars become central to American myth and others largely forgotten? Did war and rebellion promote a newly formed nationalism or did they help lead to sectionalism and the Civil War? Readings consist of secondary materials from a range of disciplines and primary documents that include novels, speeches, newspaper articles, letters, memoirs, editorial cartoons, and paintings. Credit 3 units. A&amp;S IQ: HUM EN: H</td>
</tr>
<tr>
<td>L98 AMCS 246 Introduction to Film Studies</td>
<td>How do film images create meaning? What are the tools the film artist uses to create images? This course introduces students to basic techniques of film production and formal methodologies for analyzing film art. Students learn the essential components of film language — staging, camera placement, camera movement, editing, lighting, special effects, film stock, lenses — to heighten perceptual skills in viewing films and increase critical understanding of the ways films function as visual discourse. The course is foundational for the major in Film and Media Studies. Required screenings. Same as L53 Film 220 Credit 3 units. A&amp;S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H</td>
</tr>
<tr>
<td>L98 AMCS 248 Latino/a Experiences in the United States</td>
<td>Identity is a term that begins to give humans a sense of understanding who we are. In terms of the Latino/a diaspora in the United States, issues of ethnicity, gender, nation, class, sexuality and race are key theoretical categories that aid us in theoretical and practical understandings of identity. In this course we analyze and discuss the concept of order to understand the constructions and varied meanings of the term. There is a special emphasis placed on anthropological, historical and social science literatures of the Caribbean, Latin America and the United States as they pertain to deeper understandings of identity. Prerequisite: membership in the Annika Rodriguez Program. Credit 3 units. A&amp;S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA, HUM EN: S</td>

</tr>
<tr>
<td>L98 AMCS 256 Imagining Interdisciplinary: The Interdisciplinary Workshop in American Culture Studies</td>
<td>Why study American culture? In this workshop we explore some of the many answers to this provocative question, as well as some of the objects of study available to us as students of American culture. Intended as a foundation for the American Culture Studies (AMCS) major and minor, the course is practical, exploratory and discussion-oriented. It helps students to get acquainted with AMCS as a community while imagining the types of projects that get done there. Sessions feature guest speakers, field trips to sites of cultural interest, and short readings that introduce different approaches to American culture studies. Students also examine the methods and questions that define their other field(s), and identify topics and fieldwork projects that especially engage them. Along the way, they are mentored by one of the program's Undergraduate Scholars, and helped to locate themselves in an inter-departmental program that supports a wide range of intellectual pursuits. The final assignment is a contribution to the &quot;anthology project,&quot; a student-generated compilation of resources and readings that will be shared with future AMCS students. Credit variable, maximum 1 units.</td>
</tr>
<tr>
<td>L98 AMCS 257 From Champagne to Champlain: French Culture in North America</td>
<td>Taught in English. Following Champlain's founding in 1604 of the first French settlement in Nova Scotia (formerly Acadia), the French began to build what they hoped would be a vast empire, from Quebec to the Gulf of Mexico. Over the next 200 years, French culture and language spread throughout North America and could well have been the dominant one in this country had history moved in different directions. This course examines the history, literature, religion, architecture, music, and cuisine of the vast territory known as &quot;New France.&quot; Through use of conventional textual documents, as well as films, slides, CDs, and field trips to Missouri historical sites, it will expose the student to the continuing richness of French culture all around us. Drawing on local resources (e.g., Fort de Chartres, Cahokia Courthouse, and Sainte Genevieve), students will learn about many fundamental connections between America and France. Topics include early explorations, Jesuit missions, literary representations of the New World, colonial architecture, the French and Indian War, the Louisiana Purchase, Cajun and Mississippian culture. Same as L34 French 257 Credit 3 units. BU: ETH</td>

| L98 AMCS 258 Law, Politics and Society | This course is an introduction to the functions of law and the legal system in American society. The course material stresses the realities of the operation of the legal system (in contrast
to legal mythology), as well as the continuous interaction and feedback between the legal and political systems. There are four specific objectives to the course: (1) to introduce legal concepts and legal theories; (2) to analyze the operation of the appellate courts, with particular emphasis on the U.S. Supreme Court; (3) to analyze the operation of American trial courts, especially juries and the criminal courts; and (4) to examine the linkages between culture and law. Not open to students who have previously taken Pol Sci 358.

L98 AMCS 261 The Cultural Lives of Things: An Introduction to American Material Culture
American culture is so often defined by its obsessive attachment to material things — the iPhones, coffee cups, favorite t-shirts and Harley-Davidson motorcycles that fill our everyday lives. This course will explore our contradictory relationship to such objects — the possessions that serve practical functions and give us a sense of identity, meaning and power, but just as often come to possess or control us. How do things take hold of us? What gives them potency, value, and cultural significance? What psychological, social, economic and political purposes do they serve? Do Americans have a distinct relationship (or a dysfunctional attachment) to their possessions? In answering such questions, we will consider objects of all kinds, from the mundane and utilitarian to the strange, rare and often-fetishized. We will explore their histories, their participation in regimes of commodification and power, their everyday and symbolic functions — in short, the twists and turns of their rich cultural lives. The course will introduce different strategies for interpreting objects as cultural evidence, drawing upon work in anthropology, art history, sociology, literature and museum studies, as well as theorists (Marx, Freud, Baudrillard and others) who have influenced modern conceptions of material life. Students should also look forward to some in-the-field analysis of different historic, museum, and personal objects around St. Louis (field trips!).

L98 AMCS 2651 Urban America
The city is a crucial frame for understanding the nation's cultural, economic, social, political and ecological concerns. This course discusses its importance in shaping American society and considers urban environments as living, breathing, contracting and expanding regions in the landscape. Questions of race, class and gender will be explored in an attempt to understand the current configuration of American cities, and to allow students to engage meaningfully with the continual transformation of urban space. Attention will be paid to the role played by popular imagination in the formation of public policy, civic spatial arrangement, suburban development and urban historical geography.

L98 AMCS 2674 Sophomore Seminar: Slavery and Memory in American Popular Culture
Sophomores receive priority registration. The history of slavery has long created a sense of unease within the consciousness of many Americans. Recognizing this continued reality, this seminar examines how slavery is both remembered and silenced within contemporary popular culture. Although slavery scholarship continues to expand, how do everyday Americans gain access to the history of bondage? Taking an interdisciplinary approach to these intriguing queries, we will examine a range of sources: literature, public history, art/ poetry, visual culture, movies and documentaries, as well as contemporary music including reggae and hip-hop. The centerpiece of this course covers North American society; however, in order to offer a critical point of contrast, students will be challenged to explore the varied ways slavery is commemorated in others parts of the African diaspora.
Same as L22 History 2674
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, HUM EN: H

L98 AMCS 280A African-American Religions
This course is an introduction to African-American religions that attends to the changes wrought in indigenous African religions by enslavement, the adoption of Christianity (and severe critiques of it) by slaves themselves, the building of African-American denominations, the rise of black religious movements, and the role of religion in contemporary African-American life. At every stage of the course, religion is discussed with reference to key political developments in broader African-American history. The course proceeds in three parts. The course begins with a brief introduction to key themes and problems in the study of African-American religions. For example, is there such thing as a ”black church”? How does the study of African-American religion differ from the study of other religious groups or traditions? The second part, which is the bulk of the course, moves chronologically and situates African and African-American religions in their shifting cultural and political contexts from the beginning of the European slave trade to the present. We will discuss African-Americans’ practice of several religious traditions: indigenous African religions, Islam, Protestant and Catholic Christianity, and new religious movements. The final part of the course focuses on several key issues and debates that are informed by the study of African-American religions and that have important connections with contemporary American life.

L98 AMCS 2910 Alternative Facts: An Introduction to the Social Construction of Reality
Introduction to the concept of social construction—the idea that our “objective” reality is shaped by our social positions and through social interactions. Recent political events and social conflicts highlight deep divisions in American society, raising critical questions about the media and objectivity (e.g., alternative facts and “fake” news), networks and segregation (e.g., who talks to whom), who gets to decide what is viewed as “truth,” and the role of researchers and academia in combating (or contributing to) misinformation. This course explores these questions with a sociological lens. We will use foundational sociological theories to learn how to recognize the existence of multiple realities, and consider the implications of social constructionism for key domains of everyday life. American politics, and the production of knowledge. We will also discuss the ways that cutting-edge technological innovations and academic research can — or cannot — help us distinguish facts from “alternative” facts. Introductory level, no prerequisites.
Same as L40 SOC 2910
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S
L98 AMCS 297 Undergraduate Internship in American Culture Studies
Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities, e.g., 8-10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours. Students may not receive credit for work done for pay but are encouraged to obtain written evaluations about such work for the student’s academic adviser and career placement file. Permission of department required before enrollment. Only AMCS majors and minors may enroll for L98 297.
Credit variable, maximum 3 units.

L98 AMCS 298 Directed Fieldwork in American Culture Studies
Fieldwork under the direction of an AMCS-affiliated faculty. All proposals for study must be submitted for review and approved by the AMCS adviser. Visit the AMCS website for the appropriate form. By permission of instructor.
Credit variable, maximum 3 units.

L98 AMCS 299 The Study of Cities and Metropolitan America
This course serves as the introductory course analyzing the forces shaping America’s cities and surrounding metropolitan areas. It examines, as well, strategies for dealing with many of the profound social issues affecting urban/metropolitan America. Emanating from an historical perspective, it examines the ways in which industrialization and urbanization shaped Northern American cities and the consequences of deindustrialization on urban citizenry. It further surveys the demographic and spatial transformation of American cities, examining the consequences of urban transformation on federal, state and local politics, on society and on her institutions. Similarly, the course focuses on the origin and societal changes and emerging goals of urban development, gentrification and evolving patterns of metropolitanism and the necessity for central city as well as neighborhood reconstruction. The dynamics of racial residential segregation, crime and punishment, issues of academic achievement and under-achievement, the social cleavages of urban marginalized communities, family structure, urban homelessness, urban sprawl, and health care, among others, are viewed from the perspective of social justice by exploring social, political, economic, racial and ethnic factors that impact on access, equity and care. Various theoretical perspectives and philosophies are introduced that have dominated the discourse on race and urban poverty. A field-based component complements the course work, and is designed to build interest, awareness and skills in preparation for outreach to urban communities. Prerequisite: sophomore standing.

L98 AMCS 3014 American Popular Music and Media
This course considers the history of American popular music as delivered by successive mass media platforms in the industrial and post-industrial eras: from mass-produced sheet music in the mid-19th century to digital music and video on the internet. Historical contextualization and in depth analysis of musical sources and various kinds of audio recordings and audiovisual texts will be at the center of the course. Topics to be considered include: the history of sound recording technologies and formats; the role of electronic mass media structures (radio, film, television, the internet); urbanization, national commercial music centers (New York, Hollywood, Nashville), and the importance of regional sounds in a national context; the formation and transformation of select genres (rock, country, various black musics); legal frameworks relating to music as a commodity (copyright, sampling); the impact of visual media on music dissemination, performance, and meanings; and how recorded media of all kinds have transformed the act of listening. Issues of race, gender, sexuality, personal, and national identity will be considered across the course. Prerequisites: Music 121C (Theory I) or Music 121J (Jazz Theory I) or permission of instructor.

L98 AMCS 3015 Topics in Popular Culture: End of the Century: American Culture During the 1990s
Starting with Allan Bloom’s The Closing of the American Mind, a book that helped re-ignite the Culture Wars, this course considers the debates and problems that pervaded American culture during the 1990s. From the end of the Cold War to the sexual scandals that rocked Bill Clinton’s presidency, from the emergence of the internet to the rise of grunge and rap, the 1990s were a time of vast change in American culture. It was a period when we, as a nation, reconsidered the legacy of the 1960s, the Reagan revolution, and the end of the Cold War, a time of economic expansion and cultural tension. In our consideration of the 1990s, we consider a variety of materials — ranging from news reports and political essays, literary fiction (Philip Roth's The Human Stain and Jonathan Franzen's The Corrections) and popular films (Spike Lee's Do the Right Thing and The Cohen brothers’ The Big Lebowski), to the music of Nirvana and Public Enemy — in an attempt to come to a better understanding of our recent history. By examining a wide variety of texts, we not only explore the cultural and political questions that Americans faced in the years between the fall of the Berlin Wall and the terrorist attacks of September 11, 2001, but also come to a better understanding of how cultural studies can be performed.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L98 AMCS 3016 The Politics of Kanye West: Sonic Genius and Monster Aesthetics
As a hip-hop artist Kanye West has had unprecedented impact on the sonic force of music, fashion, politics and videography.
Coupling his controversial moments with his corpus of musical texts with special focus on sonic production, this course illuminates "Mr. West" as a case study for interrogating the interplay between fame, gender, sexuality and race. Mostly, we explore how racialized ways of doing iconography, complex ways of seeing, create a distorted or reductive frame through which we see the black and famous. Nonetheless, the course oscillates with entertaining these nuances, while being entertained by the decade-long catalogue of music and visual imagery. Together, we extract the "Politics of Mr. West" in his music and life, while also illuminating the importance of a politics of genius-making in the larger arc of black pop culture tradition. L98 AMCS 301T The Automobile is the Devils Wagon: The Appeal, Controversy, and Impact of the Early Automobile
This topics course prepares students to critically engage the complex relationship between technology and American culture, and to read technology as expressive of broader cultural tensions and social, political, and social problems. Such inquiry requires historical and theoretical frameworks for conceptualizing what, exactly, comprises the "technologic" American imagination, from the early era of the colonies through to the contemporary moment. Building on these frameworks, students will study various forms and incarnations of technology at different moments throughout the history of the U.S., drawing upon multiple disciplinary practices in order to do so. They will also learn how the material characteristics of technology (whether hardware or software, industrial manufacture or DIY) give expression to ideas of national identity and issues of power, politics, race, class and gender that have emerged in different historical moments. This work will serve as an introduction to the research and study of technology and material culture in America. Topics vary by semester. Please refer to course listings for the current offering.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

L98 AMCS 301U Historical Methods — United States History
This is a small-group reading course in which students are introduced to the skills essential to the historian’s craft. Emphasis will be on acquiring research skills, learning to read historical works critically, and learning to use primary and secondary sources to make a persuasive and original argument. Required for history majors. Preference given to history majors; other interested students welcome.

L98 AMCS 3026 Home, Bittersweet Home: Histories of Housing and Homeownership in America Since 1850
The idea of owning one’s own home has been central to realizations of the American dream or the “good life.” By 1931, Herbert Hoover called the idea “a sentiment deep in the heart of our race and of American life.” While the dream continues, the reality of homeownership has been elusive or fraught with struggle and sacrifice for many Americans. If home ownership is such a central part of American identity, why have so many generations of Americans struggled to achieve it? In this course, we explore the histories of different versions of home and homeownership by touching down in different locations at pivotal moments in order to investigate the varied meanings of housing and homeownership in the context of a particular place and time in American history. Using a case-study approach, the course travels across time and space to explore diverse forms
of housing, including the following: the big house and slave house in the south under slavery, the immigrant tenement in New York City, the company town in south Chicago, the Midwest homestead, the planned postwar suburban neighborhood, high rise public housing and gated communities. This format exposes students to the important role of federal and local policies as well as themes of housing including: homes as private and domestic realms; housing as a commodity and the largest form of American debt; housing as an icon and encoder of social status; housing as exclusionary and inclusionary; housing as racial or socio-economic discrimination; the suburbs and their discontents; and the recent housing crisis.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA, HUM EN: H

L98 AMCS 3028 Music of the 1960s
The music of the 1960s played a significant and widely noted role in an era of global political and social upheaval. This course surveys a broad range of music produced during the decade, spanning the world but with emphasis on Anglo-American popular music. While a music course traditionally deals with a single genre such as "world music," classical or jazz, this course analyzes several genres together to show how each influenced the others and how all were informed by broader social and cultural concerns. The course thus both familiarizes students with diverse musical traditions and introduces them to a new way of thinking about music and culture. Topics discussed include the transnational music industry; the contested concept of "folk" and "traditional" music; music and political protest; music and migration; and music's relation to ethnic and class identity.

L98 AMCS 3029 And Justice for All? American Inequalities
In recent decades social inequalities have deepened and calcified in the United States. But just what does that mean? How should we conceptualize the particular modes and forms of inequality in the contemporary United States? What is the empirical reality? How did we get here? Why do inequalities persist? How are they reproduced? What are the consequences of such drastic disparities? In this course we examine the empirical reality of social inequality in the United States. At the same time, we raise questions about how social position shapes identity and lived experience in America. Because the focus is on the contemporary U.S., much of the course will be devoted to the examination and analysis of patterns and trends in class, race, and gender inequality in this country. Course readings are drawn from sociology, urban history, economics, social epidemiology, and education. Throughout the course we focus on the development of inequality, what it looks like today, the mechanisms of its reproduction, the culturally diverse ways it is experienced, and possible strategies to ameliorate the stark social disparities characteristic of contemporary America. We also keep in mind the interdisciplinary debate among scholars about how best to measure social disparities.

We begin the course with an examination of the historical and structural roots of American inequality. Next, we look at some conceptual and methodological tools social scientists use to examine social disparities. We will then turn to the central institutions and mechanisms that sociologists argue are responsible for creating, reproducing, reducing and changing the structure of inequalities in the U.S. today, including education, labor markets, families and social policies, neighborhoods and segregation and the criminal justice system. Within each topic area, we will pay special attention to the significance of race and ethnicity, social class, and gender as well as their intersections and cleavages. We will focus on the present period but place each topic in a broader historical context. In the final part of the course, we turn our attention to social change via social policy and social movement.

Credit 3 units. A&S IQ: SSC, SD BU: BA, HUM EN: S

L98 AMCS 3031 Gender and Education
An examination, through the lens of gender, of educational practices at the preprimary, primary, secondary, and higher education levels. A sociological and historical approach links gender discrimination in education to other forms of discrimination as well as social forces. Students' own gender-related educational experiences are analyzed in the context of the literature used in the course. Prerequisite: sophomore standing, or permission of instructor.

L98 AMCS 305A Between Malcolm X and Martin Luther King, Jr.: Race, Religion, and the Politics of Freedom

This course focuses on the political and spiritual lives of Martin and Malcolm. We will examine their personal biographies, speeches, writings, representations, FBI Files, and legacies as a way to better understand how the intersections of religion, race, and politics came to bear upon the freedom struggles of people of color in the U.S. and abroad. The course also takes seriously the evolutions in both Martin and Malcolm’s political approaches and intellectual development, focusing especially on the last years of their respective lives. We will also examine the critical literature that takes on the leadership styles and political philosophies of these communal leaders, as well as the very real opposition and surveillance they faced from state forces like the police and FBI. Students will gain an understanding of what social conditions, religious structures and institutions, and personal experiences led to the emergence and then the assassinations of these two figures. We will discuss the subtleties of their political analyses, pinpointing the key differences and similarities of their philosophies, approaches, and legacies, and we will apply these debates of the mid-20th century to contemporary events and social movements in terms of how their legacies are articulated and what we can learn from them in struggles for justice and recognition in 21st-century America and beyond.

L98 AMCS 306M Visualizing Segregation: A History of St. Louis, Chicago and New Orleans

This interdisciplinary course is designed to introduce students to the history of three of America's major cities. We will explore the political, social, and cultural histories of each of these cities while tracing changes in architecture and the built environment. We chose these three cities for their diverse and intersecting histories. In many ways, St. Louis, Chicago and New Orleans represent the major social and political forces that forged the modern American city. From westward expansion and the growth of the slave system, through mass European immigration and industrialization, the rise of Jim Crow and the decline of American industry, suburbanization, mass incarceration, and gentrification: All are visible in the landscapes of these American cities. Segregation of social groups, so often seen as natural or inevitable, is the result of historical processes, political decisions, public policies and individual actions. The course, in addition, will provide students with the opportunity to use some of the research techniques employed by urban scholars. We will engage in a major research project, tracing the history of St. Louis through a variety of primary sources. Our aim will be to trace the historical processes that generated urban landscapes divided along lines of race, class, ethnicity or religion.

L98 AMCS 3070 Politics and Policymaking in the American States

The American federal system is often overlooked in discussions about politics in the United States; however, state governments unquestionably touch the lives of Americans everyday. As such, an education in American politics is not complete without serious examination of state governments and their political institutions. This course illuminates the importance of the American states in U.S. politics and policy making by critically examining topics such as: intergovernmental relations; the historical evolution of American federalism; the organization and processes associated with state legislative, executive and judicial branches; state elections; political parties; interest groups; and specific state policy areas including budgeting, welfare, education and the environment. Prerequisite: Pol Sci 101B.

L98 AMCS 3073 The Global War on Terrorism

This course presents an historical assessment of the Global War on Terrorism (GWOT) from the perspective of its major participants: militant Sunni Islamist jihadists, especially the Al-Qaeda network, and the nation states that oppose them, particularly the United States and its allies. The course then concludes by analyzing the current state and future of Islamist jihad and the GWOT.

L98 AMCS 3075 The American Radical Novel: Literature Versus Inequality

Intended to help students reckon knowingly, imaginatively and articulately with our era of escalating social inequality, this class is a writing-intensive study of representative American radical novels stretching from the 19th-century abolitionism of Harriet Beecher Stowe’s Uncle Tom’s Cabin to the 21st-century dystopianism of Gary Shteyngart’s Super Sad True Love Story. Its main goals are two: (1) to introduce students to the long history and current significance of efforts to pit American literature against American inequality; and (2) to improve the quality of advanced student writing in the related fields of American Culture Studies and English literature. The first goal is pursued through close analysis of both radical novels and the contemporary political documents that inform them. The second goal is pursued through hands-on analysis of successful rhetorical strategies sampled from The Hodges Harbrace Handbook and, more importantly, from the scholarly writing of students themselves.

L98 AMCS 3081 City on a Hill: The Concept and Culture of American Exceptionalism

This course examines the concept, history, and culture of American exceptionalism — the idea that America has been specially chosen, or has a special mission to the world. First, we examine the Puritan sermon that politicians quote when they describe America as a “city on a hill.” This sermon has been called the “ur-text” of American literature, the foundational document of American culture; learning and drawing from multiple literary methodologies, we will re-investigate what that
This course explores the history of dominant ideas about the causes of and solutions to poverty in American society from the early republic to the end of the 20th century. We will investigate changing economic, cultural, and political conditions that gave rise to new populations of impoverished Americans, and to the expansion or contraction of poverty rates at various times in American history. We will, however, focus primarily on how various social commentators, political activists and reformers defined poverty, explained its causes, and struggled to ameliorate its effects. The course aims to highlight changes in theories and ideas about the relationship between dependence and independence, personal responsibility and social obligation, and the state and the citizen.

L98 AMCS 3105 American Holidays, Rituals, and Celebrations
This seminar examines a variety of holidays, festivals and rituals in American history and culture. Topics include: conflicts over Christmas, the sentiments of greeting cards, African-American emancipation celebrations, Roman Catholic festivals dedicated to the Virgin Mary, modern renderings of Jewish ritual (including Hanukkah), the masculinity embodied in fraternal lodge ceremonies, Neopagan festivals, and Halloween Hell Houses. Various interpretive approaches are explored, and the intent is to broach a wide range of questions about history and tradition, gender and race, public memory and civic ceremony, moral order and carnival, through this topical focus on ritual and performance. A major emphasis is also placed on original research and writing, evident in the weight given the concluding seminar report and the final paper.

L98 AMCS 312A Introduction to Digital Humanities
It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork will be supplemented by class presentations and a small assigned group project.

L98 AMCS 312W Topics in English and American Literature: End of the Century: American Culture During the 1990s
By starting with Allan Bloom’s “The Closing of the American Mind,” a book that helped to reignite the Culture Wars, this course will consider the debates and problems that pervaded American culture during the 1990s. From the end of the Cold War to the sexual scandals that rocked Bill Clinton’s presidency, from the emergence of the internet to the rise of grunge and rap, the 1990s were a time of vast change in American culture.

It was period when we, as a nation, reconsidered the legacy of the 1960s, the Reagan revolution, and the end of the Cold War; it was a time of economic expansion and cultural tension. In our consideration of this period, we will take a multidisciplinary approach when tackling a variety of materials — ranging from literary fiction (Philip Roth’s “The Human Stain,” Jonathan Franzen’s “The Corrections”) and popular films (Spike Lee’s "Do the Right Thing," the Cohen brothers’ “The Big Lebowski”) to personal memoir and the music of Nirvana and Public Enemy — in an attempt to come to a better understanding of our recent history. Throughout the semester, we will pursue the vexed cultural, political, and historical questions that Americans faced during the years between the fall of the Berlin Wall and the terrorist attacks of September 11, 2001, and we will consider how literary texts imagined this period of American history.

L98 AMCS 3142 Native Americans at Westward Expansion
Issues precipitated by Euro-American contact, colonization and expansion between 1492 and 1810 across Eastern North America, the Plains and the Rocky Mountains. Impacts of exploration and settlement and responses by native peoples: epidemics, population loss, breakdown of Southeastern chiefdoms, resistance, relocation and shifts in economic strategies. Perspectives and policies of Native Americans as well
L98 AMCS 314A Urban Inequality: Racism, Segregation, & Ghettoization in the American City

The academic study of urban inequality proceeds from the understanding that: 1) cities are deeply unequal, especially when considered in terms of race and class; 2) rather than being random or natural, urban inequality is the product of human ideas, policies, and practices; and 3) urban inequality has substantial and enduring impacts on city life and life chances, especially for racial minorities and the poor. Echoing these general themes, this course closely examines the causes, development, and consequences of urban inequality in the U.S. context. In order to explore U.S. urban inequality most clearly, the course focuses on the African-American urban experience and what has variously been called the "black belt," the inner city, and, most importantly, the ghetto. The scope is still national, though, with analyses of New York, Philadelphia, Baltimore, D.C., Detroit, Chicago, New Orleans, Oakland, and St. Louis, among other cities. The course primarily draws from sociology and history but also includes insights from anthropology, political science, criminology, and law, among other disciplines.

L98 AMCS 315B Virtues, Vices, Values: Regulating Morality in Modern America

This course takes morality and the question of "what's right" seriously as a lens through which to understand and assess modern American history. "Morality" is, of course, a devilishly flexible rhetoric, a language invoked to tell people how to act and how to be good, or, conversely, to criticize and to shame. When the state or a community wants its citizens or members to be "good," it crafts laws and creates customs to encourage or inhibit behaviors. This class examines how state and non-state actors have attempted to regulate the lived experiences of Americans and the conflicts that emerge over what, exactly, is correct, or right, or good for individuals, society, and the state. It interrogates what values the state impresses upon its citizens and what values citizens want the state to uphold.

L98 AMCS 3173B Service Learning: Documenting the Queer Past in St. Louis

Around the U.S. and the world, grassroots LGBTQ history projects investigate the queer past as a means of honoring the courage of those who have come before, creating a sense of community today, and understanding the exclusions and divisions that shaped their communities and continue to limit them. In this course, we participate in this national project of history-making by helping to excavate the queer past in the greater St. Louis region. Course readings will focus on the ways that sexual identities and communities in the United States have been shaped by urban settings since the late 19th century, with particular attention to the ways that race, class and gender have structured queer spaces and communities. In their community service project, students will work with local LGBTQ groups, including the St. Louis LGBT History Project, to research St. Louis’s queer past. Each student will also conduct an oral history interview with an LGBTQ community member.

Important Note: This is a service-learning class, which means it combines classroom learning with outside work at a community organization. In addition to regular class time, there is a service requirement, which necessitates an additional 3-5 hours a week.

Before beginning community service students must complete required training. Prerequisite: Introduction to Women, Gender, and Sexuality Studies or Introduction to Queer Studies, or permission of instructor.

L98 AMCS 321B American Religion and the Politics of Gender and Sexuality

Religious beliefs about gender and sexuality have long played a vital role in American politics, vividly evident in debates over...
such issues as birth control, censorship, pornography, funding for AIDS research, abortion, contraceptive access, abstinence-only sex education, sexual harassment, same-sex marriage, and more. Educated citizens need to understand the impact of these religiously inflected debates on our political culture. This course explores the centrality of sex to religion and politics in the U.S., emphasizing Christianity (both Protestant and Catholic forms) and its weighty social and political role regulating the behavior of women and men, children and teens, as well as its uses in legal and judicial decisions. Alongside scholarly readings in gender and sexuality, we will discuss popular devotional texts — on chastity, marriage, and homosexuality — with a political bent. Students will leave the course able to analyze how religious beliefs about sex shape specific gender norms central to U.S. politics.

L98 AMCS 3237 The Art of Popular Song: From Folk and Musical Theatre to Rock and Contemporary A Capella
This course explores the art of songwriting through the lens of American popular music. Students examine landmark songs from multiple eras and create their own original songs in a variety of styles, from classical music, folk music and Broadway to rock, pop and a capella. Through composing and arranging, listening and analysis, students gain insight into the sonic structure and cultural significance of popular music. The course also responds to students' individual interests and performance backgrounds, offering opportunities to write music for vocal ensembles, small groups, singer-songwriter formats, and electronic media.

L98 AMCS 3262 Literature of the Color Line
In 1903's The Souls of Black Folk, W.E.B. Dubois wrote "for the problem of the 20th century is the problem of the color line." This literature course includes texts written by African-American authors to examine the ways African Americans came to be portrayed in American literature and culture by writers of color, paying special attention to the changing concept of race and African-American citizenship as influenced by American political thought at a time when many of the gains made by African Americans during the period of Reconstruction were repealed. We read fiction, poetry, essays and pamphlets by African-American writers writing through the late 19th and early 20th century, including but not limited to Charles Chesnutt, W.E.B Dubois, Booker T. Washington, Ida B. Wells-Barnett, Pauline Hopkins, Frances E.W. Harper, Paul Laurence Dunbar. In addition to the texts, students are asked to briefly examine portrayals of African Americans in other forms of media, such as visual culture and film.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L98 AMCS 327 Public Opinion and American Democracy
This course is about the salience of public opinion and its influence on American Politics. Topics covered include many of the theories developed to explain how public opinion is formed, if and why it changes, and the relationship between public opinion and the political behavior of citizens and elites. Therefore, the course describes and analyzes many of the factors that influence the formation, structure and variation in public opinion: information processing, education, core values, racial attitudes, political orientation (ideology and party identification), political elites, social groups, the media and religion. Additional topics include presidential approval, congressional approval, and the relationship between public opinion and public policy. The course also trains students in several concepts of statistical analysis (assuming no prior knowledge) so that students can use these tools as part of their own research projects. Prerequisites: previous course work in American politics or communications.
Same as L32 Pol Sci 3211
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L98 AMCS 3270 Comics, Graphic Novels and Sequential Art
This course traces the evolution of comics in the America from the "comic cuts" of the newspapers, through the development of the daily and Sunday strips, into the comic book format, and the emergence of literary graphic novels. While not a uniquely American medium, comics have a specifically American context that intersects with issues of race, class, gender, nationalism, popular culture, consumerism and American identity. Comics have repeatedly been a site of struggle in American culture; examining these struggles illuminates the way Americans have constructed and expressed their view of themselves. The way comics have developed as a medium and art form in this country has specific characteristics that can be studied profitably through the lens of American Culture Studies.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L98 AMCS 3272 The Superhero in American Culture
The superhero is an American cultural figure that enjoys great metaphoric resonance in contemporary America and about contemporary America, much as the Western did during the Cold War. But this metaphoric resonance has existed since the genre
came into being with Superman in 1938 as part of the nation’s response to modernity, and predated the creation of the genre through the hero figures that contributed tropes to the superhero genre. Through a cultural historical and transmedia approach, this course examines the superhero and the superhero genre as a myth medium and contested site for portraying and shaping ideas about American identity, masculinity, modernism, race, class, gender and humanity. The prehistory of the superhero is examined in 19th- and early 20th-century frontier stories, science fiction and pulp fiction. The definition of the superhero and the genre’s evolution in comics, film, television, and fan-produced works are examined, with a focus on how the genre has served and mediated the conflicting needs of creators and audiences. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L98 AMCS 3273 American Graphic Storytelling and Identity
From editorial cartoons presenting African Americans in racist caricature during the Civil War and Reconstruction, to the appearance of the "Yellow Kid" in the comic strip "Hogan's Alley," to graphic narratives that reinforce (or challenge) racial and gender stereotypes in the late 20th century, comics in the United States have long been preoccupied with identity. In this course we trace the development of identity as a major preoccupation in the comics medium. Credit 3 units. A&S IQ: HUM, SD BU: HUM EN: H

L98 AMCS 3283 Introduction to Global Health
This course provides a general introduction to the field of public health. It examines the philosophy, history, organization, functions, activities, and results of public health research and practice. Case studies include infectious and chronic diseases, mental health, maternal and reproductive health, food safety and nutrition, environmental health, and global public health. Students are encouraged to look at health issues from a systemic and population level perspective, and to think critically about health systems and problems, especially health disparities and health care delivery to diverse populations. No background in anthropology or public health is required. Same as L48 Anthro 3283

L98 AMCS 3295 Beautiful Losers: The French in North America, 1500-1850
Adventurous fur-traders, fun-loving carnival-goers, magnanimous noblemen, simple but goodhearted Catholic peasants: the portrait of the French in the Americas rarely goes beyond these time-honored stereotypes. The French have usually been treated as quaint remnants of a bygone age, vanquished first by the British army, and then by the march of modernity. This class seeks to rescue these historical actors from the typecasting to which we often condemn them. Through this examination of the French presence in the Americas, we will rethink and revisit the familiar stories of British North America, stories of slavery, commerce, property, piety and migration. The contrasted differences will also allow us to reflect on the nature of colonialism and question some ready-made understandings about colonial British America and the Early Republic. Same as L22 History 3293
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L98 AMCS 3296 Race & Ethnic Relations in the United States
This course is designed to explore relations within and between the racial and ethnic groups of the United States. We examine the social, economic and political similarities and differences of African Americans, Asian Americans, Latinos, and New Immigrants that distinguish their American experience. Of particular interest are their respective experiences in relation to one another and the majority population for understanding the origins of conflict and unanimity within and between the different groups. We pay specific attention to events in Ferguson, Missouri, and the tensions between political leaders, policing and minorities more generally, the disproportionate levels of poverty experienced by African Americans and Mexican Americans, and the vilifying of certain minorities by the majority population. Credit 3 units. A&S IQ: HUM, SD BU: BA, HUM EN: H

L98 AMCS 329F Tale of Two Cities: Documenting Our Divides
The metropolitan St. Louis area has become the nation’s symbol of modern segregation erupting into urban unrest and violence foiled against nonviolent direct-action interventions, youth-driven social protests and grassroots revitalization. With the assistance of a faculty seed grant from the Divided City Initiative, in partnership with the Center for the Humanities in Arts & Sciences and the Mellon Foundation, Tale of Two Cities: Documenting Our Divides will bring together students working in transdisciplinary teams to create documentary videos of street events, meetings and interviews that capture the immediacy of this historical moment. Students will partner and engage with a local nonprofit organization, grassroots movement or religious institution. Topics can include personal and/or institutional issues of a “divided city” that are exacerbated by race, gender, economic status, sexual orientation or geography. Successful completion of this course involves researching and creating a short video with a distinctive perspective and point of view that will draw upon the team’s collaborative voices from history, performing arts, economics, law, social work, African-American studies, architecture and art. Skills will be developed in the fundamentals of story development, video and audio-capture in the field, editing with Adobe Premier and archival preservation. No prerequisites. L98 AMCS 3303 Politics and Policies of Immigration in the United States
This class examines the history and politics of American immigration from colonial times to the present. It begins with an overview of the colonial period, then discusses the immigration waves of the 19th and early 20th centuries, and concludes with an examination of current topics and debates about immigration. Issues include racial, ethnic and class relations among groups; changes in immigration policies over time; comparative group experiences; transnational issues in immigration; and the impact of immigration on other American social and political processes and events. This class is a writing-intensive and modified version of Pol Sci 226/AMCS 202. Students who have taken that course should not take this course. Because this is a writing-intensive class, we also spend time studying research paper design and writing.
Same as L32 Pol Sci 3302
Credit 3 units. A&S IQ: SSC, WI; EN: S

L98 AMCS 330A Native American/Euro-American Encounters: Confrontation of Bodies and Beliefs
This course surveys the history and historiography of how Native Americans, Europeans and Euro-Americans reacted and adapted to one another's presence in North America from the 1600s to the mid-1800s, focusing on themes of religion and gender. We will examine the cultural and social implications of encounters between Native peoples, missionaries and other European and Euro-American Protestants and Catholics. We will pay particular attention to how bodies were a venue for encounter — through sexual contact, through the policing of gendered social and economic behaviors, and through religiously-based understandings of women's and men's duties and functions. We will also study how historians know what they know about these encounters, and what materials enable them to answer their historical questions.

L98 AMCS 3312 Gender and American Politics
This course examines the ways in which issues pertaining to gender are salient in U.S. politics. The course is divided into four parts. First, we will examine theoretical approaches to the study of gender and politics, including the use of gender as an analytical category, and the relationship between gender, race, ethnicity and power. Second, we will study gender-based social movements, including the suffrage and women's rights movements, women's participation in the civil rights movement, the contemporary feminist and anti-feminist movements, the gay rights/queer movement and the women's peace movement. Third, we will examine the role of gender in the electoral arena, in terms of how it affects voting, running for office and being in office. Finally, we will examine contemporary debates about public policy issues, including the integration of women and gays in the military, sexual harassment, pornography and equal rights.
Same as L32 Pol Sci 331B
Credit 3 units. BU: BA, ETH

L98 AMCS 3325 Topics in Politics: Constitutional Politics in the United States
The principal purpose of this course is to introduce students to the politics of constitutional interpretation. We first discuss the origins of the constitution, the structure operation and work of courts, and judicial decision-making. Afterward, we examine various areas of the law relating to institutional powers and constraints (e.g., federalism, presidential powers, Congressional authority). In so doing, we develop an understanding for the legal doctrine in each area of the law and also examine explanations for the legal change we observe.

L98 AMCS 3350 Poverty and the New American City
This course presents an exploration of the structural changes that are transforming the American urban landscape, especially for low-income populations. We begin with a review of classic theories of urban poverty and consider their relevance in the modern context. We then analyze key political, economic, demographic, and geographic shifts in how urban poverty is organized and reproduced, including gentrification, immigration, social policy reform, and the credit crisis. Special attention will be devoted to exploring the social and political implications of changing urban policy approaches as well as the "suburbanization" of poverty. We will conclude by discussing how urban poverty interfaces with broader social structures, including law, markets, and the state. Prerequisite: an introductory course in sociology or consent of the instructor.

L98 AMCS 336C The Cultural History of the American Teenager
This course explores the recent history of the teenager in the United States, from the rise of teen culture in the 1950s to the current state of adolescence in the new century. Why have so many novels and films memorialized adolescence? How has the period of development been portrayed in books and film? How have depictions and attitudes toward teen culture changed over the past 50 years? We begin with J.D. Salinger's classic novel of adolescence alienation, The Catcher in the Rye, a
book that in many ways helped initiate the rise of the youth movement in the 1950s and '60s. From there, we read a series of novels and historical studies that trace the changes in teen culture that have occurred over the past half century. Our class also considers a few films, such as Rebel Without a Cause and Dazed and Confused, which have helped shape our conception of the American teenager. Ultimately, we question what these depictions of teen culture can tell us about larger trends and concerns in American life. Readings include: Judy Blume’s Forever, Stephanie Meyer’s Twilight, and Colson Whitehead’s Sag Harbor.

L98 AMCS 3400 Topics in 20th-Century American Writing: American Literature 1914-1945
An introduction to major American works and writers from the later 19th century through the mid-20th century. Writers studied include Twain, James, Crane, Fitzgerald, Hemingway, Faulkner, Frost, Eliot and Stevens. The course assumes no previous acquaintance with the material and is directed toward a broad range of majors and non-majors with a serious but not scholarly interest in the subject. Students with little or no background in literature might be advised to take E Lit 213C Chief American Writers, while English majors looking to do advanced work should consider the 400-level American literature sequence. Students who have taken E Lit 213C should not enroll in this course.

L98 AMCS 3405 For Freedom’s Sake: The Civil Rights Movement in America
This course provides an introduction to the period of struggle in American history known as the Civil Rights Movement. Our primary task is to survey the major historical figures, organizations, locations, strategies and ideas that coalesce to make the history of the movement. The course broadly covers the years of the Black Freedom Struggle between 1945 and 1971, with a sharper focus on the pivotal years of 1954-1965. By placing the movement within a broader context, the course seeks to identify the historical developments and social realities that made the movement necessary and possible. The class also looks at the years following the movement, and the general transition from Civil Rights to Black Power.

L98 AMCS 341 Understanding the Evidence: Provocative Topics of Contemporary Women’s Health and Reproduction
Contemporary topics of women’s health and reproduction are used as vehicles to introduce the student to the world of evidence-based data acquisition. Selected topics span and cross a multitude of contemporary boundaries. Issues evoke moral, ethical, religious, cultural, political and medical foundations of thought. The student is provided introductory detail to each topic and subsequently embarks on an independent critical review of current data and opinion to formulate their own said notions. Examples of targeted topics for the upcoming semester include, but are not limited to: Abortion, Human Cloning, Genetics, Elective Cesarean Section, Fetal Surgery, Hormone Replacement, Refusal of Medical Care, Medical Reimbursement, Liability Crisis and Gender Bias of Medical Care.

L98 AMCS 341A Gender in Society
Introduction to the sociological study of gender. The primary focus is U.S. society, but we will also discuss gender in an international context. From the moment of birth, boys and girls are treated differently. Gender structures the experiences of people in all major social institutions, including the family, workplace and schools. We will explore how gender impacts lives and life chances. The central themes of the course are historical changes in gender beliefs and practices; socialization practices that reproduce gender identities; how race/ethnicity, class and sexuality shape the experience of gender; and the relationship between gender, power and social inequality.

Prerequisite: introductory course in sociology or consent of the instructor.

L98 AMCS 3422 Americans and Their Presidents
How have Americans understood what it means to be President of the United States? This seminar uses that question as a point of departure for a multidisciplinary cultural approach to the presidency in the United States, examining the shifting roles of the chief executive from George Washington through Barack Obama. In addition to a consideration of the president's political and policymaking roles, this course examines how the lived experiences of presidents have informed the ways Americans have conceived of public and private life within a broader political culture. In the process, this course uses the presidency as a means to explore topics ranging from electioneering to gender, foreign policy to popular media. Readings are drawn from a broad range of fields.

Credit 3 units. A&S IQ: HUM BU: BA, HUM EN: H

L98 AMCS 344 Courts and Civil Liberties
This course focuses on constitutional law principles in the Bill of Rights, and examines how Supreme Court decisions influence these principles in everyday life. We explore how the courts, and particularly the Supreme Court, have interpreted these rights in light of changing times and emerging issues. Topics include the First Amendment; free exercise of religion and the establishment clause; freedom of speech, assembly and association; freedom of the press; the Fourth Amendment and the rights of those accused and convicted of crimes; the right
to privacy, including reproductive freedom and the right to die; equal protection and civil rights, including race, gender, sexual orientation; immigrants’ rights and voting rights; and civil liberties after September 11. Recommended for the Liberal Arts and Business (LAB) Certificate.

L98 AMCS 3450 Sexual Politics in Film Noir and Hardboiled Literature
Emerging in American films most forcefully during the 1940s, film noir is a cycle of films associated with a distinctive visual style and a cynical worldview. In this course, we explore the sexual politics of film noir as a distinctive vision of American sexual relations every bit as identifiable as the form’s stylized lighting and circuitous storytelling. We explore how and why sexual paranoia and perversion seem to animate this genre and why these movies continue to influence “neo-noir” filmmaking into the 21st century, even as film noir’s representation of gender and sexuality is inseparable from its literary antecedents, most notably, the so-called “hard-boiled” school of writing. We read examples from this literature by Dashiell Hammett, James Cain, Raymond Chandler and Cornell Woolrich, and discuss these novels and short stories in the context of other artistic and cultural influences on gendered power relations and film noir. We also explore the relationship of these films to censorship and to changing post-War II cultural values. Films to be screened in complete prints or in excerpts include many of the following: The Maltese Falcon, Double Indemnity, Murder My Sweet, Phantom Lady, Strangers on a Train, The Big Sleep, The Killers, Mildred Pierce, The High Wall, Sudden Fear, The Big Combo, Laura, The Glass Key, The Big Heat, Kiss Me Deadly, The Crimson Kimono, Touch of Evil, Alphaville, Chinatown, Taxi Driver, Devil in a Blue Dress, The Bad Lieutenant, and Memento. Required screenings.

L98 AMCS 3463 From Golden Age to Wasteland: U.S. Television in the 1950s and 1960s
How did television become the dominant news and entertainment medium of the second half of the 20th century? How did the medium come to define itself and American identities in the post-WWII era? In an era where various social movements began to lay claim to the cultural center, why did “mad men” eventually give way to magical women and fantastic families? This course examines the cultural, industrial, and aesthetic changes in U.S. television broadcasting during a time that was crucial to defining its relationship to the public as well as to Hollywood, the government, critics, and American commerce. The class explores the relationships and shifts that made television the U.S.’s most popular consensus medium but one that also would profit by the expression of alternative tastes, politics and identities. Required screenings.

L98 AMCS 3465 Race, Literature, and Environmental Justice
The course will permit an introduction to the field of Environmental Humanities through an exploration of environmental writings, practices, and artistic expressions. We will draw primarily from literature, as well as legal proceedings, history, culture, art, and digital media in order to understand the relationship between human beings and natural and built environments. We will also examine the interaction of health and well-being to the physical environment, with attention to women, people of color, and the poor as a way of thinking expansively about environmental justice issues. While social inequality shapes how environmental problems are created, recognized, and dealt with, we will explore how differences of culture and power complicate the meaning of concepts like "environment" and "justice" within and between groups. To do so, we will examine the specific roles the humanities have played in facilitating an environmental consciousness and activism amongst various groups of people. We will begin by posing questions regarding what is nature in order to think more expansively about what the term "environment" can denote.

L98 AMCS 347A Global Energy and the American Dream
This lecture course explores the historical, cultural and political relationship between America and global energy, focusing on oil, coal, natural gas, biofuels and alternatives. Through case studies at home and abroad, we examine how cultural, environmental, economic and geopolitical processes are entangled with changing patterns of energy-related resource extraction, production, distribution and use. America’s changing position as global consumer and dreamer is linked to increasingly violent contests over energy abroad while our fuel-dependent dreams of boundless (oil) power give way to uncertainties and new possibilities of nation, nature, and the future. Assuming that technology and markets alone will not save us, what might a culturally, politically and socially-minded inquiry contribute to understanding the past and future of global energy and the American dream?

L98 AMCS 3507 Legal Conflict in Modern American Society
Thousands of lawsuits are filed daily in the state and federal courts of the United States. The disputes underlying those lawsuits are as messy and complex as the human, commercial, cultural and political dynamics that trigger them, and the legal processes for resolving those disputes are expensive, time-consuming and, for most citizens, seemingly impenetrable. At the same time, law and legal conflict permeate public discourse in the United States to a degree that is unique in the world, even among the community of long-established democracies. The overarching objective of the course is to prepare our undergraduate students to participate constructively in that discourse by providing them with a conceptual framework for understanding both the conduct and resolution of legal conflict by American legal institutions, and the evolution of — and values underlying — the substantive law American courts apply to those conflicts. This is, at core, a course in the kind of legal or litigation "literacy" that should be expected of the graduates of first-tier American universities. Some of the legal controversies that are used to help develop that "literacy" include those surrounding the permissible use of lethal force in self-defense, the constitutionality of affirmative action in university admissions, contracts that are unconscionably one-sided, sexual harassment in the workplace, the duty of landlords to prevent criminal assaults on their tenants, groundwater pollution alleged to cause pediatric cancers, and warrantless searches of cellphone locator data by police.

L98 AMCS 351 History of Electronic Media
This course traces the history of electronic media as they have become the dominant source for entertainment and information in contemporary culture, starting with over-the-air broadcasting of radio and television through to cable and the "narrowcasting" achieved by digital technologies. While some attention is paid to other national industries, the chief focus of the course is on electronic media in the United States to determine, in part, the transformative role they have played in the cultural life of the nation. The course explores the relationship of the electronic media industries to the American film industry, determining how their interactions with the film industry helped mutually shape the productions of both film and electronic media. Required screenings.

L98 AMCS 3512 Model Minority: The Asian-American Experience
This course explores Asian-American experience revolving around the concept of "model minority." It investigates the historical origins of "model minority" and reconsiders this concept in socio-political discourses as well as in everyday Asian-American experience. This course employs multidisciplinary inquiries to examine the complexity and heterogeneity among Asian Americans. Through a wide range of topics, such as identity, race, and (pan-)ethnicity, culture and religion, gender and sexuality, masculinity and femininity, and notions of invisibility and marginalization, this course situates Asian-American experiences in the broader American (and at times transnational) ethno-racial and socio-political context.

L98 AMCS 352A The Black Athlete in American Literature: Frederick Douglass to LeBron James
The black athlete is a central figure in American entertainment, and has been since Frederick Douglass decried Christmastime slave games in his Narrative. This course will examine literary depictions of black athletes — in novels, memoirs, essays and poems — in order to better understand the cultural significance of sportsmen and women in the African-American struggle for equality, from abolitionism to the "Black Lives Matter" movement. We will read works by Douglass, Ralph Ellison, Maya Angelou, and John Edgar Wideman, among others, and examine the lives and athletic pursuits of prominent athletes such as Jackie Robinson, Muhammad Ali, Wilma Rudolph, Michael Jordan, and LeBron James. Popular perceptions of gender and sexuality, in addition to race and racism, will factor into our readings, especially as students incorporate secondary sources into their own research.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

L98 AMCS 353A Sports & Society: Contemporary Issues in American Sports
Athletes like Colin Kaepernick, Ally Raisman, LeBron James, and Megan Rapinoe leave us no doubt: sporting spaces are powerful platforms for political and social activism. In our era of division and social unrest, sports cannot be stuck to. However, what do we make of the various messages these athletes espouse, and how can we understand the intersectional influence of sporting cultures on American politics, economics, and culture? In this course, we will discuss major contemporary issues in American sports by examining scholarship, fan behavior, and narratives provided by athletes themselves. Among the topics we will consider are racism and sexism in coaching, LGBTQ and trans athlete identity, amateurism and athletic labor, mascots, traumatic brain injuries, and social media.

Credit 3 units. A&S IQ: HUM, SC BU: BA, HUM EN: H

L98 AMCS 3550 Sociology of Work
Sociological understanding of work, and in particular, how work reduces or replicates inequality. Classic and contemporary sociological theories of work; how work in the U.S. has changed over time; and how workers are matched to "good" and "bad" jobs. Threaded through the course is the exploration of barriers to racial, gender, and class inclusion and advancement at work.
We will explore how organizational structures, policies and practices can increase or decrease those barriers. Prerequisite: Introductory course in sociology or consent of the instructor.

L98 AMCS 3551 The Welfare State and Social Policy in America  
How can we understand the recent debate about fundamental health care reform? Should social security be partially or wholly privatized? Was the 1996 welfare reform a success? Contemporary political questions frequently focus on the American welfare state and the social policies that comprise it. The first half of this course describes the American welfare state broadly construed, places it in a comparative context, and elucidates major political science explanations for the size and scope of American social policy. We touch on several areas of social policy while constructing the generalized lenses through which particular political outcomes can be understood. The second part of the course then focuses on three major aspects of the American welfare state: health care, old age pensions, and policies related to work, poverty and inequality.  
Same as L32 Pol Sci 3551  
Credit 3 units. A&S IQ: SSC BU: BA EN: S  

L98 AMCS 3561 Law, Gender, & Justice  
This course (formerly called "Women and the Law") explores how social constructions of gender, race, class and sexuality have shaped traditional legal reasoning and American legal concepts, including women's legal rights. We will begin by placing our current legal framework, and its gender, race, sexuality, and other societal assumptions, in an historical and Constitutional context. We will then examine many of the questions raised by feminist theory, feminist jurisprudence, and other critical perspectives. For example, is the legal subject gendered male, and, if so, how can advocates (for women and men) use the law to gain greater equality? What paradoxes have emerged in areas such as employment discrimination, family law, or reproductive rights, as women and others have sought liberal equality? What is the equality/difference debate about and why is it important for feminists? How do intersectionality and various schools of feminist thought affect our concepts of discrimination, equality and justice? The course is thematic, but we will spend time on key cases that have influenced law and policy, examining how they affect the everyday lives of women. Over the years, this course has attracted WGSS students and pre-law students. This course is taught by law students under the supervision of a member of the School of Law faculty. Students who have taken L77 3561 Women and the Law cannot take this class.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S UColl: SSC  

L98 AMCS 3563 Television Culture and Cult TV: Critical Approaches to Fandom  
Why do television series inspire passionate involvement on the part of some viewers? What are the differences among being a viewer, an audience member, and a fan? How can we make scholarly sense of cultural practices such as learning to speak Klingon or building a "replicar" of the General Lee? Studies of fandom have attempted to answer such questions and continue to explore issues that are crucial to understanding contemporary television culture. The phenomenon of "Cult TV" offers fertile ground for examining the complex dynamics at play among fans, popular culture, the institutions of American media, and individual programs. In its exploration of cult television and fans, this course engages with key issues in contemporary media such as the proliferation of new media technologies and the repurposing of existing media forms, the permeable boundaries between high and low mass and oppositional culture, and the fragmentation and concentration of media markets. The class combines close textual analysis with studies of fan practices to examine a variety of television programs, from canonical cult texts such as Star Trek and Doctor Who to "quality" fan favorites such as Designing Women and Cagney & Lacey to contemporary cult/quality hybrids such as Lost and Heroes. In mapping out this cultural territory, we develop a set of critical perspectives on audience identities and activities and examine the continuing and conflicted imagination of fans by media producers, distributors, regulators and critics. Required screenings. Prerequisite: Film 220 or Film 350, or consent of instructor.  
Same as L53 Film 356  
Credit 3 units. A&S IQ: HUM BU: BA EN: H  

L98 AMCS 3570 Quality Television and the "Primetime Novel"  
Over the past four decades, the cultural status of television in the United States has been reconfigured and complicated with changes in industrial structures, audience formations, regulatory presumptions, and production techniques and strategies. This course examines these interrelated forces, particularly as they have fostered a set of programs and practices often hailed as Quality Television. The class surveys the institutional paradigms that gave rise to particular generations of programming celebrated as "quality" and analyze the systems of distinction and cultural value that make the label socially and industrially salient. We critically investigate the role of audiences and the conceptions of viewer choice at play in these developments. In addition, the course analyzes the textual features that have come to signify narrative complexity and aesthetic sophistication. We examine foundational historical examples of this phenomenon from The Mary Tyler Moore Show to Hill Street Blues, and Cagney & Lacey to Northern Exposure, as well as more contemporary broadcast and cable fiction such as LOST, The Wire, and Mad Men. In addition, students are expected to watch a complete series, chosen in consultation with the instructor, as part of their final research project. Required screenings. Prerequisite: Film Studies 220 or Film Studies 350 or consent of instructor.  
Same as L53 Film 357

L98 AMCS 3575 U.S. Foreign Policy: Theory and Practice  
In this class we focus on the procedures and institutions that shape U.S. foreign policy decisions. This is neither a course on international relations theory nor a history of U.S. foreign policy. Rather, this course examines the domestic politics surrounding U.S. foreign policy decisions. How do public opinion, electoral politics, and interest groups shape foreign policy? Which branch controls foreign policy — the president, Congress, the courts? Or is it ultimately the foreign affairs bureaucracy that pulls the strings? We examine these topics through reading and writing assignments, class discussion, and simulations to promote deeper understanding and build practical skills.  
Same as L97 IAS 3575  
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S
L98 AMCS 3580 Combat Movie Music and Sound After Vietnam
This course considers the Hollywood combat movie genre after the Vietnam War (post 1975) by listening closely to how these always noisy films use music and sound effects to tell stories of American manhood and militarism. Centering on an elite group of prestige films — action movies with a message for adult audiences — the course examines 35 years of Hollywood representations of World War II, the Vietnam War, the Gulf War and post-9/11 wars against terrorism. Close analysis of how combat film directors and composers have used music and sound in conjunction with the cinematic image are set within a larger context of ancillary texts (source materials, soundtrack recordings, published and unpublished scripts), media folios (press kits, reviews, editorials, newspaper and magazine stories and interviews), and scholarly writing from across the disciplines. Films screened include Apocalypse Now, Platoon, Hamburger Hill, Courage Under Fire, Saving Private Ryan, The Thin Red Line, We Were Soldiers, Flags of our Fathers, The Hurt Locker and Act of Valor, as well as pre-1975 combat films starring John Wayne. The ability to read music is not required. Required screenings. Prerequisite: none.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L98 AMCS 3581 Scribbling Women: 19th-Century American Women Writers
In 1855, Nathaniel Hawthorne wrote to his publisher, William Tichnor, that "America is now wholly given over to a damned mob of scribbling women and I should have no chance of success while the public taste is occupied with their trash." In this class, we examine works of those scribbling women of the 19th century. We read one of the best-selling novels of the century, one that created a scandal and ruined the author's literary reputation, along with others that have garnered more attention in our time than their own. In addition to focusing on these women writers, we also explore questions about the canon and American literature: What makes literature "good"? What constitutes American literature? How does an author get in the canon and stay there? Finally, in this writing intensive course, there are frequent writing assignments and a strong emphasis on the essential writing process of drafting and revising.

L98 AMCS 359A (Re)Writing Slavery
This special topics course considers black-authored texts ranging from the 18th to the 21st century to examine the ways slavery has been discussed in American literature and culture. We pay attention to the role of slavery in creating the African diaspora, the contribution of slave narratives to the Abolitionist movement, and how the structures of American slavery did not disappear after the Civil War. We look at the ways Civil Rights-era and contemporary African-American writers such as Margaret Walker, Toni Morrison, and Charles Johnson have appropriated the slave narrative to engage and critique present day concerns. Their works are read against 19th-century slave narratives by ex-slaves such as Frederick Douglass and Harriet Jacobs. In addition to the texts, students are asked to consider how slavery and its aftereffects have been portrayed in film and other forms of media.

L98 AMCS 3601 Trans* Studies
This is an interdisciplinary course that was previously named "Transgender Studies"; the new course title represents the development of the field and the identity in U.S. culture. In this course, students will engage with the following questions: When and why did the category of gender emerge? What is the relationship between sex, sexuality, and gender? How have the fields of medicine and psychology dealt with gender? How have approaches to "gender dysphoria" changed over time? Why is LGBT grouped together as a social movement, and what are the advantages and disadvantages of this grouping? What are the legal obstacles faced by people who resist normative gender categories? What legal obstacles are faced by people who transition from one sex to another? To what extent do U.S. citizens have autonomy over defining their gender or sex? How are trans people represented in fiction? What does it mean to apply transgender theory to interpret fictional accounts of trans individuals? Any of the following are suitable (but not required) courses to take before enrolling in this class: L77 100B, L77 105, L77 205 or L77 3091.

L98 AMCS 360A Religion and the Modern Civil Rights Movement, 1954-1968
The modern Civil Rights Movement is a landmark event in the nation's political, civic, cultural and social history. In many contexts, this movement for and against civil and legal equality took on a religious ethos, with activists, opponents and observers believing that the net result of the marches, demonstrations and legislative rulings would redeem and/or destroy "The Soul of the Nation." This seminar examines the modern Civil Rights Movement and its strategies and goals, with an emphasis on the prominent religious ideologies and activities that were visible and utilized in the modern movement. The course pays particular attention to the Protestant, Catholic, Jewish, and Islamic traditions, figures and communities that were indifferent, combative, instrumental and/or supportive of Civil Rights legislation throughout the mid-20th century.

L98 AMCS 361A Women and Social Movements: Gender and Sexuality in U.S. Social Movements
This course examines the history of grassroots activism and political engagement of women in the U.S. Looking at social movements organized by women or around issues of gender and sexuality, class texts interrogate women's participation in, and exclusion from, political life. Key movements organizing the course units include, among others: the Temperance Movement, Abolitionist Movements, the Women's Suffrage Movements, Women's Labor Movements, Women's Global Peace Movements, and Recent Immigration Movements. Readings and discussion pay particular attention to the movements of women of color, as well as the critiques of women of color of dominant women's movements. Course materials analyze how methods of organizing reflect traditional forms of "doing politics," but also strategies and tactics for defining problems and posing solutions particular to women. Prerequisites: any 100- or 200-level Women, Gender, and Sexuality Studies course or permission from the instructor. Same as L77 WGSS 361
Credit 3 units. A&S IQ: HUM, SC, SD BU: BA EN: H

L98 AMCS 363 The American Frontier: 1776-1848
This course will examine the nation's shifting frontier from independence through the Mexican-American War. It will consider people and places in flux as their nationality, demography and social order underwent dramatic changes. Students will make use of an extensive electronic archive of primary sources including period documents, historic maps and contemporary artwork, in order to consider how these sources confirm, reject or expand on the ideas they encounter in published scholarship.

L98 AMCS 3632 Mapping the World of "Black Criminality"
Ideas concerning the evolution of violence, crime and criminal behavior have been framed around many different groups. Yet, what does a typical criminal look like? How does race — more specifically blackness — alter these conversations, inscribing greater fears about criminal behaviors? This course taps into this reality examining the varied ways people of African descent have been and continue to be particularly imagined as a distinctively criminal population. Taking a dual approach, students consider the historical roots of the policing of black bodies alongside the social history of black crime while also foregrounding where and how black females fit into these critical conversations of crime and vice. Employing a panoramic approach, students examine historical narratives, movies and documentaries, literature, popular culture through poetry and contemporary music, as well as the prison industrial complex system. The prerequisite for the course is AFAS 3880 (Terror and Violence in the Black Atlantic) and/or permission from the instructor, which will be determined based on a student's past experience in courses that explore factors of race and identity. Enrollment limit: 20.

L98 AMCS 365 The New Republic: The United States, 1776-1850
"Go get yourself some democracy!" Americans have so often preached to other nations, but just how did Americans themselves go about creating the world's largest and most successful democratic republic? How democratic was this violent new nation, which reeled from one crisis to another and ultimately to the brink of collapse during its first 75 years? This survey of American history from the creation of the Republic to the eve of the Civil War explores the Revolution and its ambiguous legacies, the starkly paradoxical "marriage" of slavery and freedom, and the creation of much of the America that we know: mass political parties; a powerful Presidency; sustained capitalist growth; individualistic creeds; formalized and folkloric racism; heteronormative patriarchal family life; technological innovation; literary experimentation; distinctively American legal, scientific, and religious cultures; and the modern movements of labor, feminism, and African-American empowerment. Prerequisite: sophomore standing or permission of the instructor. Same as L22 History 365

L98 AMCS 3651 Black Women Writers
When someone says "black woman writer," you may well think of Nobel Prize winner Toni Morrison. But not long ago, to be a black woman writer meant to be considered an aberration. When Thomas Jefferson wrote that Phillis Wheatley's poems were "beneath the dignity of criticism," he could hardly have imagined entire Modern Language Association sessions built around her verse, but such is now the case. In this class we survey the range of Anglophone African-American women authors. Writers likely to be covered include Phillis Wheatley, Harriet Wilson, Nella Larsen, Lorraine Hansberry, Octavia Butler and Rita Dove, among others. Be prepared to read, explore, discuss and debate the specific impact of race and gender on American literature.

L98 AMCS 365A Slavery, Sovereignty, Security: American Religions and the Problem of Freedom
The goal of this course is to think critically about freedom as both an ideology and an institution. What does it mean to be free? What are the relationships among individual liberties, national sovereignty, and civil rights? In what ways has freedom been defined in relation to and materially depended on unfreedom? At the same time, this course will treat American "religions" in a similar critical fashion: as a historically contingent category that has been forged and inflicted within the same context of White Christian settler empire. Religion and freedom have intertwined throughout American history, including in the ideal of religious freedom. Our critical interrogation of freedom should help us think carefully about power by working with but also beyond tropes of domination and resistance.

L98 AMCS 3660 Women and Film
The aim of this course is primarily to familiarize students with the work of prominent women directors over the course of the 20th century, from commercial blockbusters to the radical avant-garde. Approaching the films in chronological order, we consider the specific historical and cultural context of each filmmaker's work. In addition we discuss the films in relation to specific gender and feminist issues such as the status of women's film
genres, representations of men and women on screen, and the gender politics of film production. Required screenings. Same as L53 Film 366
Credit 3 units. A&S IQ: HUM, SD BU: HUM EN: H

L98 AMCS 3671 The Long Civil Rights Movement
The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically, and thematically. It pays special attention to struggles fought in the North, West and Southwest; it seeks to question binaries constructed around "confrontational" and "accommodationist" leaders; it reveals how Latinos, Native Americans, and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics. Same as L22 History 3670
Credit 3 units. A&S IQ: HUM, SC, SD BU: BA, HUM EN: H

L98 AMCS 367H Medicine, Healing and Experimentation in the Contours of Black History
Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, this course examines the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus is extended toward the underpinnings of race and gender in the medical treatment allocated across time and space — the United States, Caribbean and Latin America — to give further insight into the roots of contemporary practice of medicine. Same as L22 History 3672

L98 AMCS 3682 The U.S. War in Iraq, 2003-2011
This course presents a historical assessment of the United States' eight year war in Iraq from its inception on March 20, 2003, to the withdrawal of all combat troops on December 15, 2011. Topics to be covered include: the Bush Administration's decision to make Iraq part of the "War on Terror" and the subsequent plan of attack; the combat operations; losing the victory; sectarian violence; torture; the insurgency; battling Al-Qaeda in Iraq; reassessment: the surge; the draw-down; and the end of the war. The course will conclude with an assessment of the war's effectiveness regarding the Global War on Terrorism and U.S. policy in the Middle East. Same as L22 History 3681
Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L98 AMCS 369 American Horrors
Horror movies. Fright films. Scream marathons. Blood and gore fest. Why should we want to look at movies that aim to frighten us? What is the attraction of repulsion? Is there an aesthetics of ugliness? Except for some early prestige literary adaptations like Dr. Jekyll and Mr. Hyde, the horror film began as a low class genre, a notch above exploitation movies. In the 1970s-1980s, it became the dominant commercial genre by offering increasingly graphic images of violence and mayhem. The horror film had arrived: lavish budgets, big stars, and dazzling special effects in mainstream major studio films competed with low-budget, no frills productions that helped establish artistically ambitious and quirky filmmakers like George Romero and David Cronenberg. By a chronological survey of the American horror film, this course explores how differing notions of what is terrifying reflect changing cultural values and norms. Throughout, we consider the difficult questions raised by horror’s simple aim of scarifying its audience. In addition to weekly screenings, work for the course includes analytical and theoretical essays on the horror film. Written analyses of films with a close attention to visual style are required. Prerequisite: Film 220. Required screenings. Same as L53 Film 370
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L98 AMCS 370 The American West: The Image in History
Examines representations of the American West and of the frontier encounter between Euro-American and Native American cultures, from the early 19th to the early 20th centuries. We consider travel accounts, fiction painting, ledger drawings, photography and film in order to analyze the ways in which historical circumstances have shaped artistic and literary representations. At the same time, we look at how images and texts have shaped formative myths about the West that in turn leave their impact on history. Same as L01 Art-Arch 370
Credit 3 units. A&S IQ: HUM, LCD Art: AH BU: HUM

L98 AMCS 3703 Religion and the Origins of Capitalism
This course explores the economic, cultural, and social history of the origins of Anglo-American capitalism from 1500 to 1800. Throughout we will discuss the worldview and day-to-day business decisions of the merchants who created England’s transatlantic market order and empire. Rather than treat early capitalism only in terms of material or purely economic dynamics, it probes the intellectual constructs that combined with commercial innovations to form capitalism into a social system. Same as L57 RelPol 370
Credit 3 units. A&S IQ: HUM BU: ETH EN: H

L98 AMCS 3711 The History of Popular Culture in the United States
This course surveys major developments in the history of popular culture in America, stretching from the mid-19th century to the present. It explores topics such as literature, drama/theater, dance halls, movies, radio, advertising, television, music
and the internet; it covers different types of popular culture such as printing, performance, image and audio; it looks at how popular culture has been depicted in terms of icons, myths, stereotypes, heroes, celebrities and rituals; it addresses the rise of mass production and consumption; it examines the ways in which race, class, gender, ethnicity and sexuality have been perceived and are portrayed in popular culture; and it illustrates how the content of popular culture shapes and reflects our personal, social, political and intellectual beliefs and values.

L98 AMCS 3711A Sociology of Immigration
A review of theoretical and empirical research on how and why people migrate across international borders, and the consequences of international migration for immigrants and natives in the United States. While immigration is one of the most controversial issues in the contemporary United States, these contentious debates are not new. Americans once voiced the same concerns about the economic and social impact of Southern and Eastern European immigrants that today are aimed at immigrants from Latin America, Asia, Africa and the Caribbean. In this course we will compare historical (1880-1920) and contemporary (1995-present) waves of immigration to the United States. We will explore why and how people migrate, immigrant integration, the impact of immigration on native-born Americans, and how government policies — at the national, state, and local level — shape immigrant assimilation and what it means to be considered truly “American” in a social as well as a legal sense. Prerequisite: completion of an introductory sociology course or consent of the instructor.

Same as L40 SOC 3710

L98 AMCS 3740 Contemporary American Foreign Policy
This course surveys post-War American foreign policy in historical perspective. It begins by evaluating the rise of the United States as a world power during the 20th century, its current position of primacy and its consequences in the post Cold War period, and the distinctive traditions and institutions shaping the making of American foreign policy. It then examines the origins of the strategy of containment in the early Cold War period before considering how these debates animated the changing course of American foreign policy through the various phases of the Cold War conflict. The course concludes by analyzing American foreign policy since the end of the Cold War, up to and including debates about the consequences of September 11, 2001, for the United States’ position of primacy, the Bush Doctrine and the American-led intervention in and subsequent occupation of Iraq.

L98 AMCS 3742 Social Landscapes in a Global View
From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as “landscapes.” This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We cover various urban landscapes, rural landscapes, nomadic landscapes (and others) and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 BCE to 2009 CE and we cover all the continents. This course also traces the intellectual history of the study of landscape as a social phenomenon and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world and trace the global currents of your social landscape!

L98 AMCS 375 Topics in Comparative Literature
This course examines the idea of connectivity in the arts. Via novels, paintings, photography, and film, we will explore questions of interpretation related to the themes of love and betrayal; bequests and legacy; and innocence and responsibility. A series of paintings by Vermeer and other Dutch masters depicting elegant women (and their dogs) in the company of their suitors will engage us in elaborate courtship rituals that were played out using letters, music, and wine. We will also consider how, during the reigns of Francis I and Louis XIV, the French monarchy integrated Dutch art into its collections in order to assert the king's influence and authority. Students will discuss the portraits that emerge from the complex tableau in Laclos's masterful novel of seduction, "Les Liaisons Dangereuses"; in 19th-century paintings; and in contemporary photographs. The class will read Dorer's “All the Light We Cannot See” and de Waal's "Hare With the Amber Eyes," which are stories that link history with art, the past with the present, and gifts with thefts and bereavements. We will study Daudet's "Moureaux Investigation" in relation to the work that inspired it: Camus's "The Stranger," or "L'Etranger." Adaptation will likewise inform our readings of Auguste's "Self and Sensibility," an original sense of an Ending," and the pair of films based on these novels. The course will assess aspects of the original story that are lost on screen as well as the added resonances that the novels acquire in the film versions.

L98 AMCS 3751 Topics in Women's History: U.S. Women Since 1945
We will explore the history of the United States since 1945 by focusing on the ways that gender and sexuality have shaped the lives of Americans, particularly the diverse group of women who make up more than half the nation's population. Topics will include: domesticity and the culture of the 1950s; gendering the cold war; the gender politics of racial liberation; the sexual revolution; second-wave feminism and the transformation of American culture; and the new right's gender politics; and the impact of new conceptions of sexual and gender identity at century's end. Course texts will include scholarly literature, memoirs, novels and film.

L98 AMCS 3755 Disability, Quality of Life & Community Responsibility
The increasing prevalence of disability presents major challenges for American society. Social participation can be a challenge for people with disabilities, while resources to address these needs tend to be limited. This course will begin by critically analyzing concepts of disability, quality of life, health and social participation. We will construct a framework for examining social participation and community resources across the lifespan. Public health, educational and environmental theories and methods will be applied to programs and services that aim to enhance quality of life with disabilities. We will analyze ecological approaches to enhancing social participation. Upon completion of this course, students will be equipped to analyze challenges and prioritize resources for individual and population health.

L98 AMCS 376 American Modernism, 1900-1940
American modernism: What is it? What is the nature of its encounter with mass culture? What happened to modernism as it migrated from its "high" European origins to its "middlebrow" version in America between the turn of the century and the eve of World War II? What was the rhetoric of modernism in everyday life — its impact on design, photography, advertising? In addition to the fine arts, we look at popular media, film and photography. Lecture/discussion. Prerequisite: Art-Arch 211 Introduction to Modern Art or permission of the instructor.
Same as L01 Art-Arch 376
Credit 3 units. A&S IQ: HUM, WI Art: AH, HUM BU: ETH, HUM

L98 AMCS 3785 Photography in America
This course considers the practice and use of photography in America from its invention up to the present, offering various ways of thinking about the medium and its relation to society and culture. Students come to understand the ways photographic practices shape public perceptions of national identity, ethnicity and gender, nature, democratic selves, and a host of other concerns. We discuss famous practitioners such as the Brady, Jacob Riis, Lewis Hine, Walker Evans, and Robert Frank. We consider not only the social and public uses of the medium through such episodes as the New Deal/FSA and photojournalism, but also the private explorations of "fine art" photographers, and the everyday practices of the snapshot. Prerequisites: Intro to Western (Art-Arch 112) or Intro to Modern (211), or one course in American History, American Cultural Studies, or permission of the instructor.
Same as L01 Art-Arch 3785
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN H

L98 AMCS 378B Contemporary American Theater
This course is a focused investigation of the aesthetic, political, and urban landscapes of the contemporary American theatre. We will read published and unpublished plays, familiarize ourselves with the country's most important companies, festivals, and institutions, and discuss issues facing the American theatre now. We will explore the role of the arts in urban planning and development, and address the relationship between higher education and arts institutions, paying particular attention to ideas of community engagement and social justice work undertaken by both. Artists to be studied may include Tony Kushner, Suzan-Lori Parks, Caryl Churchill, Branden Jacobs-Jenkins, Lynn Nottage, Young Jean Lee, and Lin-Manuel Miranda. This course will include a mandatory class trip to the end of March to the Humana Festival of New American Plays in Louisville, Kentucky. Students will prepare for this trip by reading the works of featured playwrights and establishing a research project that will be carried out on-site. Findings from the research project will be presented upon the return to St. Louis. Admission
to the course is by instructor permission only; an application form will be sent to all registered students at the conclusion of the registration period. In consultation with and with the permission of the instructor, this course may fulfill the Fieldwork requirement for American Culture Studies majors.

L98 AMCS 379 Banned Books
Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago a Russian student was exiled to Siberia for possessing a copy of Emerson's Essays; today, school boards in the United States regularly call for the removal of Huckleberry Finn and The Catcher in the Rye from classrooms and library shelves. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. The course explores these issues by looking closely at several American and translated European texts that have been challenged on moral, sociopolitical or religious grounds to determine what some readers have found so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments.

L98 AMCS 3840 Gender & Consumer Culture in U.S. Fiction of the Late 19th and Early 20th Century
The decades between the end of the Civil War and the 1930s saw the rise of a mass consumer culture that would dramatically reshape America. The fiction writers of this period, keen to capture the spirit of the age, helped to create the enduring idea that consumerism and an orientation toward material acquisition are at the heart of gendered concepts of American identity. Their stories documented, and sometimes celebrated, the emergence of recognizable “types” of American womanhood and manhood — such as self-made millionaires, ambitious “working girls,” bargain-hunting middle-class housewives, and the commercially minded women and men of the social and intellectual elite.

At the same time, their stories articulated anxieties about U.S. consumer culture and its impact on the world. Students in this course will read, discuss and write about novels and short stories by writers such as Henry James, Mary Wilkins Freeman, Kate Chopin, Theodore Dreiser, Edith Wharton, Nella Larsen, Langston Hughes and F. Scott Fitzgerald. Students in the course will also examine primary materials such as magazine advertisements, and will read and respond to relevant scholarship on the period. Writing Intensive course.

L98 AMCS 3876 Dada and Surrealism in Europe and the United States
In this multimedia, interdisciplinary course, we will consider the history, theory and practice of Dada and Surrealism, from its Symbolist and Expressionist roots at the end of the 19th and the beginning of the 20th centuries through its late expressions in Beat culture and Pop art of the 1950s and 1960s. Dada’s emergence in Zürich and New York in the midst of the First World War set the tone for its stress on irrationality as an oppositional strategy. Surrealist research into the domain of the unconscious continued this extreme challenge to dominant culture, but in a revolutionary spirit that proposed new possibilities for personal and collective liberation. The international character of the movements, with substantial cross-transmission between Europe and the United States, will be emphasized. Prerequisites: Intro to Western Art (L01 112) or Intro to Modern Art (L01 211) or permission of instructor.

L98 AMCS 3880 Terror and Violence in the Black Atlantic
From the period of bondage through the 21st century, terror and racialized violence have consistently been used as a form of social control. This course is constructed to explore the historical foundations of extreme threats of violence inflicted among populations of African descent. The fabric of American culture has given birth to its own unique brand of terrorism, of which this class spends considerable time interrogating. Yet, in recognizing that these practices are commonly found in other parts of the Black Atlantic, students are encouraged to take a comparative view to better tease out the wider strands of violence operative
in places like England, the Caribbean and Latin America. Within this course, we explore the varied ways in which music, films, newspapers and historical narratives shed light on these often life altering stories of the past. Some of the themes touched upon include: the use of punishment/exploitation during the era of slavery, lynching, sexual violence, race riots, police brutality, motherhood, black power and community activism.

Credit 3 units.

L98 AMCS 3891 Power, Justice, and the City
This course examines normative theoretical questions of power and justice through the lens of the contemporary city, with a particular focus on American urban life. It explores urban political economic problems, questions of racial hierarchy and racial injustice in the modern metropolis, and the normative and practical dilemmas posed by "privatism" in cities and their suburbs. In addition, the course devotes considerable attention to honing students' writing skills, through class assignments that stress rewriting and revising, and also through four in-class writing workshops devoted to formulating a thesis and making an argument, revising and rewriting, writing with style, and peer consultation.

L98 AMCS 3900 Mormonism and the American Experience
The focus of this seminar is Mormonism, meaning, primarily, the Church of Jesus Christ of Latter-day Saints (or LDS Church), which is the largest Mormon body. Mormons in the United States have gone from being one of the most intensely persecuted religious groups in the country's history to the fourth largest religious body in the U.S. (by one count), with a reputation for patriotism and conservative family values. In addition to introducing who the Mormons are, their beliefs and religious practices, this seminar will explore issues raised by Mormonism's move toward the religious mainstream alongside its continuing distinctiveness. These issues include: What is the religious "mainstream" in the U.S.? How did conflicts over Mormonism during the 19th century, especially the conflict over polygamy, help define the limits of religious tolerance in this country? How have LDS teachings about gender and race, or controversies about whether or not Mormons are Christian, positioned and repositioned Mormons within U.S. society?

L98 AMCS 391 Gender Violence
This course explores the issue of violence against women within families, by strangers in the workplace, and within the context of international and domestic political activity. In each area, issues of race, class, culture and sexuality are examined as well as legal, medical and sociological responses. Readings cover current statistical data, research and theory as well as information on the history of the battered women's movement, the rape crisis center movement, violent repression of women's political expressions internationally, and the effect of violence on immigrant and indigenous women in the United States and abroad. Not open to students who have taken U92 (UCollege) WGSS 363.

L98 AMCS 395 American Indians and American Empire
Through readings of historical and contemporary texts drawn from American Indian testimonial, scholarship and literature; anthropology; and history, we explore past struggles for cultural and political survival and contemporary politics of self-determination of indigenous peoples. We consider these issues alongside American "Empire": the past and present politics of nation-building, expansion and rule that characterize the United States. Topics include race, anthropology and 19th-century imperialism; education, the Indian and American democracy; sovereignty and tribal self-determination; Indian political movements; and the contemporary politics of energy, resources and Indian lands.

L98 AMCS 397 Gender and Sexuality in 1950s America: Writing-Intensive Seminar
Historians have recently begun to reconsider the dominant view of the 1950s as an era characterized by complacency and conformity. In this writing intensive seminar we will use the prism of gender history to gain a more complex understanding of the intimate relationship between conformity and crisis, domesticity and dissent that characterized the 1950s for both women and men.

This course is part of the Semester in DC Program.  
Same as L32 Pol Sci 4001  
Credit 3 units. EN: S

L98 AMCS 400A AMCS Capstone Workshop I  
This workshop is required for AMCS majors completing an independent capstone project, whether by means of a 3-credit capstone project, a Latin Honors (6-credit) thesis, or a two-semester (6-credit) non-honors project. In all three cases, the capstone project is intended to serve as the culmination of the major — an opportunity to build on previous work and to engage with the broader field of American Culture Studies while developing a multidisciplinary framework suited to the goals of the project. The workshop is intended to foster intellectual community and provide support during the research and writing process. Students share aspects of their work in large- and small-group settings; discuss methods, models, and challenges of cultural studies; participate in several peer-review workshops; and develop insights and skills directly relevant to their capstone work. Barring circumstances which prevent it, the 3-credit capstone should be completed by the end of the fall semester. Students pursuing a 6-credit project (either a Latin Honors thesis or non-honors project) will continue their work into the following semester by enrolling in L98 4XX. Enrollment by permission of Program pending approval of project proposal, which will be submitted in the spring of junior year. Students seeking to earn Latin Honors in AMCS must meet the university cumulative GPA minimum (3.65) and have permission of their thesis adviser.  
Credit 3 units.

L98 AMCS 400B AMCS Capstone Workshop II  
This course is required for students planning to complete the Latin Honors thesis or a 6-credit non-honors project through American Culture Studies. It builds on work done in L98 400A: AMCS Capstone Workshop I, and involves periodic workshops and conferences with the instructor and project adviser(s) during the final stages of thesis preparation. Alternatively, students seeking to earn an additional 1-2 credits for their one-semester capstone will enroll in this course after their petition to expand their capstone has been approved and expectations have been defined in consultation with the capstone adviser and workshop instructor. Prerequisites: satisfactory standing as a candidate for a two-semester capstone, including successful completion of L98 400A Capstone Workshop I and permission of project adviser. Latin Honors eligible students must meet the university GPA minimum. Course will meet every other week, time/place to be determined based on participants’ schedules.  
Credit variable, maximum 3 units.

L98 AMCS 401 Race, Sex and Sexuality: Concepts of Identity  
This course examines changes in the meanings of three concepts of identity — race, sex and sexuality — from the early
modern period to the present. The course begins by looking at early modern constructions of these concepts in Western Europe. We then focus on changes occurring during the course of the 18th and 19th centuries in Europe and the United States and at how such changes were similar and different among these three concepts. We then examine 20th-century challenges to 19th-century constructions. The course concludes by studying the relationship between these challenges and 20th-century identity political movements organized around these concepts. Prerequisite: completion of at least one WGSS course or permission of the instructor.

Credit 3 units. A&S IQ: SSC, SD Art: SSC BU: BA

L98 AMCS 4010 Pluralism, Liberalism and Education
How should liberal democratic states respond to religious and cultural pluralism? In what ways is pluralism different from mere disagreement, and what normative implications does pluralism have for public policy? How can liberal states justify using their coercive power against a background of pluralism and in ways that systematically disadvantage certain religious and cultural groups in society? In particular, what is to be done when religious parents and the liberal state make conflicting judgments about the proper education of children? When should the state defer to parental judgments and what are the grounds for legitimately refusing to do so? Readings are taken from contemporary political philosophy. Prerequisites: Pol Sci 106, Pol Sci 107, Phil 340 or permission of instructor.

Same as L32 Pol Sci 4010
Credit 3 units. A&S IQ: SSC BU: ETH EN: H

L98 AMCS 403 Culture and History of the Southwestern United States
This course integrates archaeological, historical, and early ethnographic dimensions of American Indian societies in the southwestern United States and northwest Mexico, a region famous for its challenging environment, cultural diversity, and the contributions made by its Native inhabitants. Emphasis is placed on the development of sophisticated desert agriculture and on the rise of regionally integrated cultures including Chaco Canyon and Mesa Verde. The impact of Spanish, Mexican, and American colonization are explored. Ethnographies of Tohono O’odham (Papago), Hopi, Zuni, Rio Grande Pueblo, and Navajo societies are discussed.

L98 AMCS 4036 Children of Immigrants: Identity and Acculturation
This seminar takes an interdisciplinary approach to children of immigrants as an analytical subject. Our investigation looks into the 1.5- and second-generation youth of different cultural and ethnic backgrounds in the United States (with many case studies focusing on Asian Americans and Latinx). Discussion topics include migration and identity, ethnicity and race, bilingualism and biculturalism, family and school, youth culture, and other pressing issues such as mental health. The seminar offers a theoretical lens into children of immigrants by introducing different research methodologies in social sciences. The students are required to conduct an individual research project among a selected group of children of immigrants.

L98 AMCS 4060 Sexual Health and the City: A Community-Based Learning Course
In this community-based learning course, students partner with a St. Louis AIDS service organization (ASO) or sexual health agency to explore how the interrelationships among gender, class, race/ethnicity and sexual identity shape sexual health decisions, outcomes and access to services. Students also examine the complex relationship between men’s and women’s life goals and constraints, on the one hand, and the public health management of sexual health, on the other. In collaboration with their community partner and its clients, students develop a project that addresses an identified need of the organization and the community it serves. Course readings draw from the fields of anthropology, public health, feminist studies and policy making. Prerequisite: PH4134 The AIDS Epidemic: Inequalities, Ethnography and Ethics or permission from the instructor, which is determined based on past student’s experience in the fields of medical anthropology or sexual/reproductive health.

L98 AMCS 4090 The Modernist Revolution in the Arts
What is/ was Modernism? How did this worldwide phenomenon impact the arts in every genre and medium from the turn of the 20th century to the present? Do we still live in the age of Modernism, or should we consider ours a new, Postmodern age? This course examines these and other questions as they relate to the theater, prose, poetry and the visual arts. Our investigation focuses on most of the major literary and artistic movements, including Naturalism, Impressionism, Symbolism, Surrealism and Expressionism. We examine literary manifestoes that help to illuminate the periods under discussion, as well as look at individual works themselves. Central to our approach in the course is an interdisciplinary perspective. Among the luminaries whose work is considered are Ibsen, Strindberg, Chekhov, Hemingway, Dalí, Picasso, Stravinsky, Artaud, Kafka and Beckett.

195
L98 AMCS 4120 Rainbow Radicals!: Ethnic Nationalism(s), the 1960s and the Politics of the New Left
The Black Panther Party remains one of the most iconic groups of the 1960s and 1970s. Perhaps one of the most understudied aspects of the Panther’s legacy is their radical influence upon other American racial and ethnic groups, including Asian Americans, Mexican Americans, Puerto Ricans and American Indians, among others. This seminar considers the emergence of ethnic and racial nationalism among these various groups, as a result of their contact and relationship(s) with the Black Panther Party. Considering the politics of groups such as the Red Guard, the Brown Berets, the Young Lords and the American Indian Movement, this course charts the rise and fall of rainbow radicalism as a general offshoot of the Black Power Movement and part and parcel of what is commonly referred to as “the New Left.” It also considers these groups in relation to the State by probing the dynamics of repression and resistance, and democracy. Ultimately, this course grants insight into the contemporary racial domain and current political landscape of America as we discuss how these groups helped to shape modern identity formations, discourses on multiculturalism and definitions of “minority,” “diversity” and “equality.”

L98 AMCS 4135 Tobacco: History, Culture, Science, and Policy
Tobacco is the most important public health and medical problem of our time, the leading cause of cancer and other chronic diseases. This course examines tobacco’s important role in shaping the modern world and global health over the course of the last five centuries, from indigenous uses of tobacco to plantation slavery to the cigarette boom to the politics of health and smoking in the 21st century. Through in-depth historical and anthropological case studies, tobacco provides a window into trends in government and law, medicine and public health, business and economics, society and culture, including changing social meanings of gender, race, class, sexuality, advertising, consumerism, risk, responsibility and health in the United States and worldwide. This course also introduces students to public health approaches to noncommunicable disease prevention, environmental health, and healthy lifestyle promotion. No background in anthropology or public health is required.

L98 AMCS 4209 New Media Literacy and Popular Culture in Education
At the closing of the 20th century, the “digital turn” began to shape how individuals learn, communicate and interact with one another. Current and emerging media technologies have continued to change how individuals (youth and adults alike) gather information, consume, produce and disseminate texts; and participate in both local and global communities through print- and screen-based platforms such as email, blog, podcast and mash-ups, among others. In this course, we explore what we mean by technology, the various types and uses of technology and the relationship of technology to literacy and education. We begin with characteristics of “new media” and consequences of the digital revolution. Then, we examine conceptualizations of literacy in a historical context — from literacy as reading and writing to literacy as multimodality, convergence and participation. Finally, we shift our inquiry to investigate how new media literacies and technologies are shaping (and are shaped by) different forms of popular culture in U.S. and international contexts, including parts of Asia, Australia, Europe, Africa, and North and South American. We make explicit the connections to education and explore possible directions for research and practice, including copyright and fair use issues present in educational settings. Readings, discussions and activities online and in actual communities culminate in individual- and class-based new media productions. Prerequisite: at least junior standing or permission of the instructor.

L98 AMCS 4214 From Mammy to the Welfare Queen: African-American Women Theorize Identity
How do representations of identity affect how we see ourselves and the world sees us? African-American women have been particularly concerned with this question, as the stories and pictures circulated about black female identity have had a profound impact on their understandings of themselves and political discourse. In this course we look at how black feminist theorists from a variety of intellectual traditions have explored the impact of theories of identity on our world. We look at their discussions of slavery, colonialism, sexuality, motherhood, citizenship, and what it means to be human.

L98 AMCS 4224 The 1904 St. Louis World’s Fair: German and Austrian Art Exhibited
The St. Louis World’s Fair of 1904 (The Louisiana Purchase Exposition) was one of the greatest events of its time. At the beginning we will deal with the historical development that lead to the purchase of the Louisiana Territory in 1803, will review the developments of World’s Fairs since 1851 and will have a look at the grand dimension of the 1904 World’s Fair (connected with the Olympic Games). Of central importance are the Art Exhibits from Germany and Austria with their cultural-political implications. The German Emperor had a hand in selecting the German paintings to be sent to St. Louis, and his opposition against modern movements like Impressionism caused opposition in Germany. Austria was different: In their Art Nouveau Pavilion they included secessionists (Hagenbund). The Wiener Werkstaetten (Vienna’s Workshops) attracted a lot of attention. Different from the paintings, German Arts and Crafts represented avant-garde movements. We will visit libraries, archives, and museums in St. Louis that have World’s Fair holdings. The seminar is for advanced undergraduate students but beginning graduate students can take it with permission of the instructor. Course conducted in English. May not be taken for German major or minor credit.

L98 AMCS 4225 European Utopian Settlements in the American Midwest (1814-1864): Diversity and AntiSlavery
During the first part of the 19th century, a number of utopian visionaries from Europe (Germany, France and England) tried to establish communities in the American Midwest. These colonies were based either on religious or philosophical/social ideals which could be traced back to interpretations of the Old and the New Testament or to Enlightenment principles of freedom and equality that had been propagated during the revolutions in Europe of 1789, 1830 and 1848 which in turn had been
influenced by the American war of independence. These groups showed strong antislavery convictions. The Midwest was chosen since the areas in the vicinity of the confluence of the Mississippi and the Missouri were seen as open to new social experiments. Part of the seminar are field trips to the St. Louis-based Missouri History Library as well as to the St. Louis Public Library and one-day excursions to New Harmony in Indiana, Nauvoo in Illinois, and to small towns in Warren County, Missouri. L98 AMCS 422A Film Stardom, Performance, and Fan Culture
This course focuses on the Hollywood star system. We will explore stars in relation to celebrity and consumerism, especially how "stardom" is created by a system that seeks to create effects in film viewers whether conceived as audiences, fans or spectators. We will examine the performance element of stardom and its relationship to genre, style, and changing film technology. Also of concern will be how stardom and the discursive construction of stardom intersect with gender representation, race, ideology, sexuality, age, disability, nationality, and other points of theoretical interest to and historical inquiry in contemporary film studies. While emphasis will be placed on mainstream commercial U.S. cinema, students are encouraged to pursue questions beyond this framework within their own research. Required screenings.

L98 AMCS 4243 The Plundered Past: Archaeology's Challenges in the Modern World
The public imagination thrills at the fantastic adventures of Indiana Jones and Laura Croft, Tomb Raider; but the reality of modern archaeology is more complex, ethically challenging and interesting than a simple treasure hunt. In the U.S. and Canada, our science museums and museums of anthropology still display artifacts that are regarded as sacred and culturally definitive by Indian nations, although such holdings are now subject to negotiation and repatriation. Art museums in Europe and the U.S. are still stocked with looted ancient masterpieces that are revered as vital heritage by the nations from which they were stolen. We display looted art alongside a much smaller number of legitimately excavated artifacts of masterpiece quality, so it is no surprise that our popular images of archaeologists as avid and undiscerning collectors raise little concern. But modern archaeologists are not extractors of art or even of scientific information, from places as passive and inert as the museums’ objects ultimately occupy. Archaeologists work with living people inhabiting societies and states that care deeply about their pasts and the relics of it. They are active agents engaged with many other people in the production of knowledge about the past. In our rapidly shrinking world, educated sensitivity to the many ancient cultural legacies that shape the values of modern global society is more than a moral imperative; it is a basic form of collaboration in the common project of survival. Archaeologists are ethically charged to advance that project through education about the complex contemporary arena of artifacts, sites, and information they occupy.

L98 AMCS 424A Broadcasting Equality: Radio, Television and Social Change in Postwar America
The period between World War II and the 1970s was one of profound cultural, political, and demographic shifts that brought the problems of ethno-religious and racial prejudice to the forefront of U.S. national consciousness. Religious leaders, secular social activists, media industry professionals, and African-American civil rights leaders often worked together to combat intolerance, bigotry and inequality. What did these activists achieve in their attempts to deploy U.S. broadcast media in what they sometimes referred to as "propaganda against prejudice"? How did this activism relate to the institutions of broadcast media, including governmental agencies, national networks and local broadcasters? What was television and radio's impact on the Civil Rights Movement of the 1950s and 1960s? In addressing these questions, we will consider a wide range of media: public service programming as well as commercially produced series, specials, network news and documentaries produced between the 1940s and the 1970s. Programs considered will include New World A-Coming, Amos 'n' Andy, American Bandstand, NBC White Papers: Sit In, Sanford and Son, Eyes on the Prize, and Soul Train, among many others. Required screenings.

L98 AMCS 4280 History of Urban Schooling in the United States
This reading colloquium examines the history of urban schooling and school policy in the United States. Readings focus on the growing literature in the history of urban schooling and on primary source material. We explore urban schooling in general and we examine particular primary source material as well as particular cities and their school districts. Such districts may include New York, Boston, Chicago, Detroit, St. Louis, Los Angeles, San Francisco, Atlanta and others. The course has
two goals: to develop a strong contextual understanding of the conditions of urban schooling, the history of urban school reform, and the debates over the purposes of urban schools; and to examine the ways historians have explored urban schooling in the U.S. Students should expect to read a book a week as well as primary source materials and occasional articles. 

**L98 AMCS 4289 Neighborhoods, Schools and Social Inequality**

A major purpose of the course is to study the research and policy literature related to neighborhoods, schools and the corresponding opportunity structure in urban America. The course is informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis is placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups complement the course foci.

**L98 AMCS 4292 Polarization in American Politics**

This course examines the political polarization of the American political parties and explores its effects on the mass public and American democracy more generally. We examine what exactly is polarization, how it is measured, historical changes, potential causes, and its potential effects on the mass public and governance. Prerequisites: Pol Sci 101B Intro to American Politics, Pol Sci 363 Quantitative Political Methodology or equivalent.

Same as L32 Pol Sci 4291
Credit 3 units.

**L98 AMCS 4303 Clown Princes**

"Dying is easy, comedy is hard," runs an old theatrical adage. Nevertheless, some of the most popular actors in American film have chosen the hard path by typecasting themselves in comedy, playing repeated variations on the same character. "Comedian comedy," representing films that showcase the distinctive skills of great clown-actors, is the central concern of this course. We will analyze how individual comedians rework performance traditions through the distinctive concerns of their time and culture to create idiosyncratic comic personae. We will look at films starring Charles Chaplin, Buster Keaton, Harold Lloyd, Laurel and Hardy, the Marx Brothers, Jack Benny, Peter Sellers, Jim Carey and Eddie Murphy. Work for the course will require reading in comic theory and analytical essays. Required screenings.

**L98 AMCS 436 Seminar in Black Social Science**

Credit 3 units.

**L98 AMCS 436A Black Sexual Politics**

Borrowing from Patricia Hill Collins' perspective in *Black Sexual Politics*, this seminar examines the historic and popular understandings of black sexuality and how they maintain color line, as well as threaten to spread what Hill Collins refers to as a "new brand of racism." Particularly, this course engages questions about sexuality that have only begun to be discussed with African-American Studies and the larger public sphere. Taking the intersections of identities very seriously, this course interrogates the ways in which these constructions have affected black women, while also being attentive to how "others" are implicated within discourses of black sexuality. Similarly, we will also engage the various distortions of black men — depictions of the black and masculine as almost always violent, sexually and socially irresponsible, brutish, questionable and unfaithful. Together we will use various critical texts and media to better understand the impact and the importance of visual and material images in the interplay of race, sex and politics in contemporary America.

**L98 AMCS 4370 Music and Performance**

In his 1998 book, *Musicking*, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography, and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater, and rock. We examine artists whose work blurs the line between "music" and "theater," including George Clinton, Taylor Mac, and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome.

Credit 3 units. A&S IQ: HUM EN: H

**L98 AMCS 4373 Immigration, Identity, and the Internet**

This class examines a critical issue in contemporary societies: How do changes in technology affect the process of immigration and how immigrant identity is shaped?

Same as L32 Pol Sci 4373

**L98 AMCS 4510 American Television Genres**

Questions of genre are central to any exploration of television's texts, whether they are being analyzed as craft, commerce, or cultural phenomenon. Genre has been used by critics and historians to ascribe "social functions" to groups of programs and to diagnose cultural preoccupations, while genre has been used industrially to manage expectations among audiences, advertisers, programmers, producers, and creative professionals. Investigating genres ranging from the soap opera to the western, workplace situation comedies to sports, and game shows to cop shows, this course explores the role of genre in the production, distribution and reception of American television. Students gain a critical understanding of genre theory and key arguments about the form and function of television texts and develop a set of tools for analysis of televisual narrative and style, the social uses and meanings of genre, the institutional practices and presumptions of the American television industry, and the persistence of textual forms and audience formations in the face of structural changes such as deregulation, media convergence, and globalization. Required screenings.

**L98 AMCS 4520 Industrial Organization**

Theoretical and empirical analysis of the presence and value of competitive forces in the United States economy. Theories of industrial organization and development of criteria for performance of noncompetitive industries. Prerequisite: Econ 4011.

Same as L11 Econ 452

Credit 3 units. A&S IQ: SSC EN: S

**L98 AMCS 4522 Topics in American Politics: The Voting, Campaigns and Elections**

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Same as L32 Pol Sci 4522

Credit 3 units.

**L98 AMCS 454 Environmental Policy**

This course examines the relationship between environmental economics and environmental policy. The course focuses on
air pollution, water pollution, and hazardous wastes, with some attention given to biodiversity and global climate change. The course examines critically two prescriptions that economics usually endorses: (1) “balancing” of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; (2) use of market incentives (e.g., prices, taxes or charges) or “property rights” instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011.
Same as L11 Econ 451
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA, ETH EN: S

L98 AMCS 4564 American Pragmatism
This course examines the history of American pragmatism through three of its primary founders, the philosophers Charles Peirce, William James and John Dewey. It considers pragmatism as a response to the experience of uncertainty brought on by modernity and contextualizes it amid late 19th- and early 20th-century thought and politics, namely, scientific methodology, evolutionary theory, the probabilistic revolution, Transcendentalism, the rise of secularism, slavery, Abolitionism and the Civil War. Major essays by each thinker are read as well as three intellectual biographies and one critical survey.
Same as L22 History 4564
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L98 AMCS 457 American Film Genres
By close examination of three or four specific types of film narratives, this course will explore how genre has functioned in the Hollywood mode of production. Students will gain an understanding of genre both as a critical construct as well as a form created by practical economic concerns, a means of creating extratextual communication between film artist/ producers and audience/consumers. Genres for study will be chosen from the western, the gangster film, the horror movie, the musical, screwball comedy, science fiction, the family melodrama, the woman’s film, and others. In addition to film showings, there will be readings in genre theory as well as genre analyses of individual films. Required screenings Tuesdays at 4 p.m.
Same as L53 Film 450
Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L98 AMCS 457A From Vitaphone to YouTube: Popular Music and the Moving Image
This course considers American popular music as represented in audiovisual media from 1926 to the present. The relationship between the popular music industry (a commercial sphere oriented primarily toward the selling of sheet music and audio recordings) and audiovisual technologies (various screens and formats encountered in changing social and commercial contexts) will be explored along two complementary tracks: popular music performers as presented in performance-centered media and popular music as a narrative topic or resource in feature films. Three related analytical frames will shape our discussions: industrial and technological history (the material conditions for the making and distribution of popular music and moving images); the question of “liveness” in recorded audiovisual media; aesthetics of various popular music styles as translated into audiovisual forms and contexts. The course is in seminar format. The ability to read music is not required but students with music reading or transcription skills will be encouraged to draw upon these tools. Prerequisites: graduate status or completion of a 300-level FMS or Music course and permission of the instructor.
Same as L93 Film 457
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L98 AMCS 4581 Major Film Directors
What does the film director do? In the earliest movies, film directors modeled themselves on their theatrical counterparts: They chiefly focused on how to stage an action in a confined space for a stationary camera that represented an ideal member of the audience. As the camera began to be used to direct audience attention, first through cutting, then through actual movement, the film director evolved from a stage of events to a narrator. By analyzing the work of one or more major film directors, this course will explore the art of film direction. We will learn how film directors may use the camera to narrate a scene, to provide their own distinctive view of the actions playing out on the movie screen. May be repeated for credit with permission of the instructor. Required screenings.

L98 AMCS 460 Urban Economics
Economic function of the city and the role of the city in a national economy. Local decisionmaking; financing of local government expenditures. An analysis of selected urban problems, such as causes and effects of housing market segregation; decay and abandonment, landlord-tenant relations, crime, and urban transport systems. Prerequisite: Econ 4011.
Same as L11 Econ 460
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L98 AMCS 4607 Topics in African-American Studies: Health in the Black Community: A Social Science Perspective
There is growing awareness of the legacies of historical racial violence in the United States and a related increase in reckoning efforts. Area histories of enslavement, lynching, and other racial terror and dispossession relate to inequality, conflict, and violence in the same places today. These “haunting legacies” include heart disease and other health disparities, homicide rates, white supremacist mobilization, and corporal punishment in schools. Meanwhile, many communities and institutions are moving to acknowledge and address legacies of historical racial violence in various ways. This course combines seminar-style readings and writing on legacies of racial violence with a practicum component, where individual students or groups of students will conceptualize and develop interventions intended to clarify and disrupt legacies of racial violence, facilitating contemporary reckoning. The practicum will explore and support a broad range of interventive efforts, including public policy measures, original research projects, archival development, commemorative efforts, and a related array of mediums, including visual art, design, film, digital projects, and other creative approaches.
Same as L90 AFAS 4601

L98 AMCS 461B Construction and Experience of Black Adolescence
This course examines the construct of black adolescence from the general perspectives of anthropology, sociology and psychology. It begins by studying the construct of black adolescence as an "invention" of the social and behavioral sciences. The course then draws upon narrative data, autobiography, literature and multimedia sources authored by black youth to recast black adolescence as a complex social, psychological, cultural and political phenomenon. This course focuses on the meaning-making experiences of urban-dwelling black adolescents and highlights these relations within the contexts of class, gender, sexuality and education.

L98 AMCS 462 Politics of Education
Politics is interpreted broadly to include not just government, but any situation in which people have to solve a problem or come to a decision. This course focuses on schools and the processes through which certain stories, identities, and practices are promoted, and others, not.
Same as L12 Educ 462
Credit 3 units. A&S IQ: SSC, SC, SD Art: SSC EN: S

L98 AMCS 4621 The Political Economy of Urban Education
Defining a political economy of urban education involves the examination of power and wealth and the manner in which they operate in urban settings. It requires analysis of the larger urban social and economic context and consideration of historical forces that have brought the schools to their present state. In this course, we consider various political and economic factors that have influenced and shaped urban education in the United States, drawing upon the extant literature on urban education and related social science disciplines to characterize and discuss them. A particular focus of this course will be on the dynamic interrelationships among the political economy, urban education, and social stratification.

L98 AMCS 4669 American Intellectual History to 1865
This course presents an overview of American intellectual history from the early 17th century and the founding of the first English settlements in North America to the mid-19th century and the American Civil War. We investigate how different thinkers responded to and helped shape key events and processes in colonial and early American history, concentrating in particular on developments in religious, political, social, scientific and educational thought. We cover major topics such as: Puritanism, the Enlightenment, Evangelicalism, Romanticism and the inner Civil War. We address concepts central to the formation of the nation's identity including those of the covenant, republicanism, citizenship, equality, freedom, liberty, natural law, transcendentalism, order, reason, progress and democracy.
Same as L22 History 4689
Credit 3 units. A&S IQ: HUM EN: H

L98 AMCS 470 American Intellectual History Since 1865
This course concentrates on social, cultural, philosophical and political thought since the end of the Civil War, and investigates how American thinkers have responded to the challenge of modernity. After an examination of the end of the old religious order and the revolt against Victorianism, it analyzes the subsequent rise of pragmatism, progressivism, literary modernism, radical liberalism, political realism, protest movements and the New Left, neo-conservatism and the New Right, and the current state of intellectuals in post-911 America.
Same as L22 History 469

L98 AMCS 472 American Art and Culture, 1945-1960
The rise and "triumph" of Abstract Expressionism has long dominated the story of American art following World War II. This seminar puts Abstract Expressionism into context with parallel developments in the arts, photography and film. Among the topics we consider: the conversation between émigré artists and American culture during and after the war; the emergence of a "noir" aesthetic in film and literature; the early work of Jasper Johns and Robert Rauschenberg and the so-called "aesthetic of indifference" in relation to Abstract Expressionism; artistic collaborations at Black Mountain College; New York school photography and photojournalism; and the cultural impact of the A-bomb. Prerequisites: a 300-level course on 20th-century art, photography or history, or permission of the instructor.
Same as L01 Art-Arch 4721
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM EN: H

L98 AMCS 4744 TransAmerica: The U.S. and Mexico Between the Wars
Many areas of 20th-century U.S. culture between World Wars I and II were inspired by post-revolutionary Mexico. The Mexican Revolution (1910-1917) profoundly reoriented modern Mexico, introducing new cultural and aesthetic forms and historical themes over subsequent decades. Mexican artists contributed to a new national consciousness, drawing on indigenous Mexico
and on the new politics of workers and peasants, which are
given monumental expression in mural painting. The bidirectional
exchange between U.S. and Mexican artists was of great
importance for the cultural revitalization of the New Deal and
after in the United States. Among artists, writers, anthropologists,
and tourists, the vogue for things Mexican was fed by many
sources, including increasing travel, diplomatic exchange, and
a yearning for alternatives to U.S. modernity. The seminar will
support travel to Mexico City, funded by the Art History and
Archaeology Department. Prerequisite: must be a graduate
student or an undergraduate major or minor in Art History and
Archaeology or Latin American Studies. Recommended courses:
one 300- or 400-level course in 20th-century U.S. art or history
or one relevant course in the Latin American Studies program.
Same as L01 Art-Arch 4744
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: IS EN: H

L98 AMCS 476 The City in American Arts and Popular
Culture, 1900-1940
From the mid-19th century forward, artists, writers, sociologists,
and cultural critics have identified the city as the primary site of a
vast array of historical changes associated with modernization.
This course will explore the range of cultural responses to the
new 20th-century city up to World War II. The American city was
seen as both an incubator of difference, and of mass conformity
and manipulation; a dynamic space in which to form fluid
networks that catalyzed new forms of creativity, and a place of
strangers and social alienation. We will trace the history of these
polarized responses in the 20th-century arts and literature of the
city, looking at the vibrant popular culture of film, vaudeville,
and cross-dressing; new aesthetic forms such as collage and
expressionism; and new urban subjects. Prerequisites: 300-level
course in American 20th-century cultural history, American art,
literature, or permission of instructor.
Same as L01 Art-Arch 475
Credit 3 units. A&S IQ: HUM Art: AH, CPSC, GFAH, HUM BU:
HUM EN: H

L98 AMCS 4774 Art and Culture in '20s and '30s America
Mass consumption and the expansion of mass culture;
mechanization; and the birth of a new visual culture that turned
on animation, advertising, photography, and film. Taking our
cues from the cultural contradictions and historical tensions
embedded in F. Scott Fitzgerald's great novel of 1925, and the
2013 film inspired by it, this seminar will trace what many at the
time called the "Rediscovery of America" and its tribulations.
American artists, writers, and cultural theorists embraced the
possibilities and pitfalls of American modernity, the nation's
mythic promise and its historical dilemmas in the face of growing
commercialization and standardization. This seminar is an
interdisciplinary look at the art, visual culture, music, literature,
and cultural essays of the 1920s through the lens of nation, race,
region, and cultural ident(ies). Prerequisite: 300-level 20th-
century American art, history, or literature course, or permission
of instructor.
Same as L01 Art-Arch 4774
Credit 3 units. Art: AH

L98 AMCS 4785 Art and Culture in 1920s America
This interdisciplinary seminar examines the relationship between
art and 1920s culture in the United States: how artists and
critics thought about the nature of our cultural heritage — its rich
possibilities and its limitations; the potential of technology and
urbanization as well as the threats they pose to older cultural
values; the nature of a multicultural society and the contributions
of minority traditions to the evolution of American culture; the
 lure of the Southwest; early criticism of popular media; and the
corruption between popular culture and high art. Prerequisite:
Art-Arch 112 or permission of instructor.
Same as L01 Art-Arch 4785
Credit 3 units. Art: AH

L98 AMCS 480 Education and Public Policy in the United
States
This course takes a triangulated approach to the field of public
policy as it relates to education and social problems. First,
the course emphasizes theories of public policy that frame
the field of policy studies. Major questions extending from this
course feature include: What is public policy, policy behavior,
its defining processes/features and what social function does
it serve? Second, the course emphasizes the skills related to the
exercise of policy analysis. These skills include the crafting
of technical documents within the field of public policy (e.g.
a policy brief) and the analytical framework that accompanies the
exploration of social problems/governmental actions. Likely
issues related to this course feature include the use of scientific
knowledge in political arenas, engagement with stakeholders
and the intended/unintended consequences of policy science
to political decision-making. Third, this course simulates the
decision-making context through students' participation in mock
congressional testimonies. These focal areas will become
central to an understanding of four social concerns: school
desegregation following the Brown decisions; affirmative action
in higher education; Head Start programs and/or the ESEA
Act of 1965, also known as No Child Left Behind. Educational
opportunity, achievement inequality and social change will be the
primary interests that link these course features.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S UColl: ACS

L98 AMCS 481B Advanced Seminar: New York, New York:
The Empire City from Stuyvesant to Trump
This research seminar engages the long history of greater New
York City: from the place Native Americans called Manna-hatta
to the largest city in the United States and the world political,
financial, and cultural capital that it is today. The course explores
New York City's ambivalent relationship with America, with
the world, and with itself. It focuses on matters of power —
how, in different moments of the city's history, it was defined,
who held it, and how various groups managed to contest for
it; matters of exchange and extraction — political, cultural,
and economic; and matters of belonging — whether a city of
immigrants, exiles and refugees succeeded in becoming a
home for the homeless. It pays close attention to both the micro
— the street corner and the political ward; the bridge and the
tunnel; the gentrifying neighborhood; the mosaic of the city's
foodways; the theater, financial, slaughterhouse, brothel, and
other districts — and the macro — the banks and the stock
exchange; the port and transit authorities; the instrumentalities
of knowledge and cultural production in the city; universities,
print media, clubs, and salons; the sports empires; and the
political machines, organized crime, grassroots labor and
political movements, insurgencies, and undergrounds. Above
all, the course will foreground the city's massive and unbearable
contradictions, as a city of skyscrapers and of basement dives,
luxes, and snares; as a symbol of the future and freedom bound
to traumatic, slave, and unfree pasts; as a symbol of modern
independence bound to modern interdependence; and as a
place of renaissances and ruinations, where the world either
comes together or spectacularly falls apart. Sites of potential investigation, in a list that is suggestive rather than exhaustive, range from the African Burial Ground to the 9/11 Memorial and Museum, from Hamilton to Hamilton, from Boss Tweed to Robert Moses, from the Five Points to Chinatown, from Delmonico’s to Sylvia’s, from Blackwell’s Island Lunatic Asylum to Hart Island Potter’s Field, from the African Free School to Ocean Hill-Brownsville, from Marcus Garvey to Amadou Diallo, from Billie Holiday to Andy Warhol, from James Baldwin’s Harlem to Stonewall, from George Steinbrenner to Jerry Seinfeld, from the Gowanus Canal to Estée Lauder, and, in the spirit of the course title, from Stuyvesant to Trump. Students will engage with the history of New York City via two three-page book reviews, a three-page site analysis, and two five-minute oral reports on assigned readings before conducting their own original research in consultation with the instructor that will culminate in a 15-page final essay. Attendance at all classes and participation in class discussions required.

L98 AMCS 481W History of Education in United States
Examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy in different periods of our history.

Credit 3 units. A&S IQ: HUM, SC, SD, WI EN: H

L98 AMCS 487 Topics in American History
This course explores the racial construction of the use of legal and illegal substances in American history from the mid-19th century to the present. We will spend time engaging in a historical analysis of the social, economic, and racial dynamics that defined drug addiction in popular imagination, and examine how these factors contributed to discussions about legality, access to substances, one’s ability to be rehabilitated, and criminal status. Regarding criminality we will particularly explore sociological and theoretical perspectives of labeling, habitual and occasional offenders, and moral panic in order to understand how racial minority groups were targeted for different rhetorical, legislative, and economic purposes. One major goal of the course will be to outline the early 20th century beginnings of the war on drugs and connect it to the century long growth of a militarized police system and prison industrial complex. We will secondly work to understand the role of local and national political actors, law enforcement, and the media in manufacturing and maintaining connections between race, crime and drugs. Ultimately, we will use our study of drugs to contextualize 21st-century issues of police violence, increases in homicide in minority communities, mass incarceration, poverty, segregation, and mass movements of protest.

Same as L22 History 487
Credit 3 units. A&S IQ: HUM EN: H

L98 AMCS 4908 Advanced Seminar: Women in the History of Higher Education and Professions
An advanced seminar with readings exploring education, historical studies, and feminist theory. Each student writes a paper, based on research in local archives and in other primary sources, on a topic related to women in higher education and/or professions. Prerequisite: junior standing or above; some background in American history.

Same as L12 Edu 440
Credit 3 units.

L98 AMCS 4909A AMCS Portfolio Workshop: Academic Citizenship
How can I develop a stronger sense of academic identity and purpose? How can my research translate into opportunities beyond the classroom, from service to politics? In this workshop AMCS majors explore these questions while receiving support at a crucial milestone, the Senior Capstone. Through reflection and writing students develop a stronger intellectual identity, and consider how their research prepares them to participate in conversations and activities that transcend scholarship. We think about this participation as a kind of "academic citizenship": students leveraging their learning to engage intellectual, social, and political life in and beyond campus. Students do this primarily through consideration of their capstone research, happening concurrently in the AMCS Capstone Workshop or in an approved seminar. While encouraging majors to consider the intersection of their academic and personal goals, the workshop supports research (e.g., guest faculty discusses methodology), gives structure to activities already required for the major (e.g., the capstone abstract), and builds community (e.g., peer-led discussions). The workshop also provides time and space for students to curate their AMCS portfolio. The Fall Workshop is part of a new 1-credit workshop series designed to help AMCS majors develop their portfolio and provide additional training and support at particular milestones in the major. The portfolio and accompanying workshops are a response to students’ feedback. Graduating seniors tell us they would have liked more structured time to reflect on their work in the major; they would have liked to document their progress in the program more fully; and they wanted more opportunities to strengthen their class cohort. The Fall Workshop will provide all of those things, while centering students’ attention on their growth as scholars and engaged citizens.

Credit 1 unit.

L98 AMCS 495A Religion and the State: Global Mission, Global Empire
This course explores the complex intersections among U.S. political power on a global stage, and religious institutions and identities. Readings and discussions are organized around two very broad questions. First: How has this nation's history been shaped by religious "others" both inside and outside its borders? Second: How have perceptions of those others in turn affected U.S. responses to circumstances of global consequence — including, for example, foreign policy and diplomacy, missionary activity, and economic practices?

Same as L57 RelPol 495
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L98 AMCS 4982 Public Art: History, Practice, Theory
The course will consider the history and functions of public art, with special attention to public art in St. Louis. We survey not only the obvious forms of public art in urban sculpture and mural...
painting, but also less traditional intersections of art and public in such sites as the internet. We will also examine the operations of institutions — national and local arts agencies, international exhibitions, nonprofit centers and the like — that foster a public engagement with contemporary art. Finally, we will consider new priorities and projects in public art, especially socially oriented and environmentally sustainable initiatives. Prerequisites: L01 Art-Arch 112 Introduction to Western Art or L01 Art-Arch 211 Introduction to Modern Art: one 300-level course in art history preferred, or permission of instructor.

Credit 3 units. A&S IQ: LCD, SC EN: H

L98 AMCS 4984 The Problem of New World Freedom: The Age of Democratic Revolution in the United States and the Americas

Ever since the improbable alliance of the English pirate and slave trader Sir Francis Drake and the fugitive slave Cimarrons on the Atlantic coast of Panama many centuries ago, the history of freedom in the New World has unfolded in unlikely fits and starts. The course will explore two related conjectures: first, that maroon politics (the often short-lived alliances between slaves, quasi-free blacks and white allies), slave rebellion, provincial secession and civil war were the widespread and normative conditions of post-colonial regimes throughout the New World; and second, that the problem of freedom was especially challenging in a New World environment in which freedom was fleeting and tended to decompose. Special attention will be given to antislavery insurgencies, interracial politics and alliances in the Unites States and the perspectives on freedom they produced, but the readings will also include materials on debates over freedom in the Caribbean and South America over the course of the long age of democratic revolution, 1760-1888.
Same as L22 History 4984
Credit 3 units. A&S IQ: HUM, SD EN: H

L98 AMCS 4992 The Business of Us All: In/equality in Theory and Practice

This course uses a transdisciplinary approach to discuss in/ equality and its interrelated topics of inequality, inequity and social justice. While the focus is on the U.S. predominantly, lessons learned from our global partners are important components of our discussions. The course will emphasize the implications of our findings for other ethnic/racial minorities around the world. Equality speaks to issues of priority, fairness and impartiality. On the other hand, inequality is defined as marked difference among individuals or groups of individuals in the distribution of social goods. Inequity, which considers bias, discrimination and injustice in distributive systems, pushes the discussion further. As the various forms of social, political and economic inequalities are mutually reinforced, we examine economic inequality, residential segregation and housing quality; dis/investment in neighborhoods and communities; resource allocation to low income, city and predominantly ethnic minority schools; academic underachievement of minority youth; access to and provision of appropriate health care; curtailment of social welfare programs; the presentation of stereotypical images of persons of color in the media and school curricula; morbidity, mortality, and longevity rates for persons of color; environmental hazards; the surge in incarceration related to substance abuse and escalating criminal prosecution, as well as discriminatory behavior of police and judges. All of the foregoing is made worse by race and gender status variables. Such factors cannot be considered inconsequential to social im/mobility and equality in the larger society. The collateral damage borne by the intergenerational transfer of social im/mobility and in/equality to future generations are integral to course discussions.

L98 AMCS 49PK The Founding Fathers’ Government in an Electronic Age

This is a research seminar that examines how Americans sought to translate their notions of government into a realistic set of priorities and a functioning set of public institutions. Extending from 1789 through the 1820s, this course investigates how the federal government came into being, what it did, and who populated the civilian and military rank of American officialdom. This is also a course in digital history. Students create new knowledge through their own contributions to an ongoing digital project that seeks to reconstitute the early federal workforce. In the process, students learn a variety of digital techniques, ranging from encoding languages to electronic systems to software packages.
Same as L22 History 49PK
Credit 3 units. A&S IQ: HUM EN: H

L98 AMCS 49SA Advanced Seminar: Slavery in America: The Politics of Knowledge Production

This course focuses on the long history of black chattel slavery in America, from origins to emancipation. The course foregrounds the struggles over power, life and death, that were at the heart of slavery's traumatic and grotesquely violent 250-year career in North America, with attention to hemispheric context. At the same time, it highlights the fiercely contested historical battleground where scholars have argued about how to define American slavery — as a system or site of labor, reproduction, law, property and dispossession, racial and gender domination, sexual abuse and usurpation, psychological terror and interdependency, containment and marooning, selfhood and nationality, agency, revolutionary liberation and millennial redemption.

Credit 3 units. A&S IQ: HUM, SD EN: H

L98 AMCS 479 On Location: Exploring America

Every other summer, AMCS travels to a new location to explore fundamental questions of national identity and meaning through the study of the interdependent relationship between culture and place. By visiting landmarks, historic sites, museums, memorials, etc. — sites best understood through direct engagement with consideration of their rich material, historical, political, and social meanings — students become in-the-field observers and learn from local experts and faculty. Past On Location destinations have included: California, Hawaii, New York City, Washington D.C., the "Industrial Southwest," and American Indian landmarks. For more information and a description of past travel sites, please visit our "On Location" webpage (https://amcs.wustl.edu/on-location).

Ampersand Programs

Ampersand Programs are special, multi-semester seminar programs open only to matriculating first-year students. An Ampersand Program combines a coherent, group-oriented
learning experience with out-of-classroom activities while still allowing time for electives.

Ampersand Programs change each year and have included such topics as Missouri’s Natural Heritage; The Theater as a Living Art; Women in Science; Phage Hunters; The Age of Pericles; The History, Memory, and Representation of the Holocaust; Writers as Readers; The Literary Culture of Modern Ireland; Medicine and Society (p. 701); Global Citizenship Program; Mind, Brain and Behavior; Text and Tradition; and Biotech Explorers Pathway. Enrollment in each Ampersand Program has limited seating to ensure closely mentored personalized instruction. All Ampersand Programs constitute integrations and therefore fulfill one of the requirements for the Bachelor of Arts degree. Ampersand Programs are open to all Arts & Sciences students, regardless of their intended majors, and they complement any major or pre-professional curriculum.

Associate Professor
PhD, University of Virginia
(German and Jewish Studies)
Minors
Amersand Programs are special, multi-semester seminar programs open to first-year students. There is no minor available in this area.

Courses

L61 FYP 116 Amersand: Geographies of Globalization and Development
This course provides an overview to the geographies of globalization and development in the world today. We begin by engaging with a variety of theoretical perspectives, definitions, and debates in order to establish the foundations upon which students can conceptualize and understand existing patterns of inequality, social injustice, and environmental conflicts. In order to further highlight the different ways in which development and globalization interventions are experienced and contested, in the second half of the course, we will focus our considerations toward specific contemporary issues at the forefront of globalization and development debates, including migration and refugees, urbanization, sustainable development, tourism, and alter-globalization social movements. This course is restricted to first-year students in the Global Citizenship Program.
Credit 3 units.
A&S: AMP  A&S IQ: SSC, SC, SD  BU: HUM, IS  EN: S

L61 FYP 120A Amersand: Introduction to Study of the Mind-Brain: Psychological, Biological, & Philosophical Perspectives
A consideration of three primary areas of research in cognitive science: attention, memory, and language. These topics are used to illustrate the techniques by which mental abilities are investigated and explained in psychology and neuroscience: the focus, in particular, is on the use of reaction time studies, brain imaging, and cell recordings to isolate the basic components that make up complex functions. In addition to the central concepts and theories in each area, the course will address philosophical implications of this research concerning how the mind and brain are related, how the mind-brain encodes or represents information, and the nature of consciousness. And there will be an emphasis on applying these findings to important problems, such as Alzheimer's disease and deficits due to brain damage. The class is taught by three members of the faculty from different disciplines and combines a whole-group lecture with small discussion classes. The goal is to give students a good understanding of the interdisciplinary nature of cognitive science and to help them develop the ability to think and write critically about scientific research into the mind-brain.
Prerequisite: admission to the Hewlett Program in the Study of the Mind-Brain.
Credit 3 units.
A&S: AMP A&S IQ: NSM BU: BA

L61 FYP 121 Amersand: Pathfinder — A Sense of Place: Discovering Missouri’s Natural Heritage
Discovering Missouri’s Natural Heritage is the first course in the Pathfinder program, and it will introduce students to their new home for the next four years. This interdisciplinary course will cover Missouri geology, climate, archaeology, and native megafauna. We will explore many of the habitats found in Missouri (e.g., prairie, forest, glade, stream) as well as the biology of the state’s diverse plant and animal wildlife

Majors
Amersand Programs are special, multi-semester seminar programs open to first-year students. There is no major available in this area.
(e.g., arthropods, mollusks, fish, salamanders, lizards, birds, mammals). This will provide a foundation that will inform each student’s study of ecology, policy, and management in other courses. In addition to weekly lectures and discussions, students in this class will visit sites across the state during three weekend camping trips and two one-day trips. Attendance on field trips is an essential component of the course. Course enrollment is open only to students admitted into the Pathfinder Fellowship program.

Credit 3 units. A&S: AMP BU: SCI

L61 FYP 141 Ampersand: Medicine and Society
This course provides the basic foundation in medical anthropology and cultural anthropology for students enrolled in the Medicine and Society Program. The purpose of the course is to introduce students to the central themes and theoretical approaches employed by medical anthropologists to study health and illness in cross-cultural perspective. Topical areas include analyses of disease, illness and sickness at micro and macro levels; impact of personal and interpersonal factors on health; health effects of social, political, and economic factors; relationship of anthropology to biological and social science approaches; ecology of health and development; and cross-cultural health studies of language, gender, and race/ethnicity. Note: Content for this course overlaps with and replaces Anth 160 for students enrolled in the Medicine and Society Program. Open only to students enrolled in the Medicine and Society Program. Same as L48 Anthro 141
Credit 3 units. A&S: AMP A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L61 FYP 1503 Ampersand: Workshop for the Global Citizenship Program
This workshop, which is restricted to and required of participants in the Global Citizenship Program (GCP), is a companion to the core GCP fall course. The workshop will foster critical thinking and push students to explore the significance of cultural and social identities in a globalized society. In addition to the assigned course content, students will also examine their own mutual interests, build relationships and develop valuable skill sets as they collaborate together to plan an event of global concern for the campus community.
Credit 1 unit. A&S: AMP

L61 FYP 1504 Ampersand: Workshop for the Global Citizenship Program
This workshop, which is restricted to and required of participants in the Global Citizenship Program, is a continuation of the Fall L61 1503 workshop. Course content will foster critical thinking and push students to explore the significance of cultural and social identities in a globalized society. Students plan a second campus event, and an optional off-campus trip provides further opportunities to engage with experts at large and gain new perspectives on the topics discussed in class.
Credit 1 unit. A&S: AMP

L61 FYP 181P Ampersand: Pathfinder: Environmental Seminar
A survey of pressing environmental issues, both local and global, as well as an introduction to the breadth of environmental work occurring on campus. Credit/no credit only.
Credit 1 unit. A&S: AMP

L61 FYP 1910 Ampersand: Phage Hunters
A research-based laboratory class for first-year students. Students join a national experiment organized by HHMI, with the goal of isolating and characterizing bacteriophage viruses found in the soil in the St. Louis area. Laboratory work includes the isolation and purification of a phage, DNA isolation and restriction mapping, and EM characterization of the phage. Several Washington University phages are selected for genome sequencing over winter break and then annotated in the spring in Biol 192 Phage Bioinformatics. Students who successfully isolate and annotate a phage may become co-authors on a scientific paper. Prerequisites: High school courses in biology and chemistry, at least one of which is at the AP or International Baccalaureate level; permission of the instructor. Limited to 40 students. One hour lecture, one hour discussion, and three hours lab per week. Course is for first-year students in the Phage Hunters Program only.
Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L61 FYP 1920 Ampersand: Phage Bioinformatics
A research-based laboratory class for first-year students. Students join a national experiment organized by HHMI, with the goal of genomic characterization of a local phage. Laboratory work focuses on learning computer-based tools for genome analysis followed by annotation and comparative analysis of the genome of a phage (bacterial virus) that was isolated fall semester at WU and sequenced over winter break. Prerequisites: high school courses in biology, chemistry, and physics, at least one at the AP or International Baccalaureate level; permission of the instructor. Limited to 40 students; preference given to those completing Biol 191, Phage Hunters. One hour lecture, one hour discussion, and three hours lab per week.
Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L61 FYP 215 Ampersand: The Theatre as a Living Art
Moving in and out of practice and theory, this plan interweaves a traditional introductory acting course with discussions of dramatic theory and visits to rehearsals where directors and actors work to shape the play. Must be taken concurrently with Drama 228C. Course is for first-year students in the Theatre as a Living Art Program only.

L61 FYP 216 Ampersand: The Theatre as a Living Art
Continuation of the Theatre as a Living Art. Topic varies by year, please consult course listings for a description of current offering. Prerequisite: admission to the Theatre as a Living Art Ampersand program.

L61 FYP 2171 Ampersand: Women in Science
Throughout the centuries, women were interested and involved in the sciences. Their scientific contributions, however, have often been overlooked and their abilities questioned. In this year-long course, we will read biographies of famous women scientists and mathematicians, in addition to scholarly articles, to examine women’s involvement in science and mathematics.
from the 19th century to the present. We will explore the ways in which women have pursued scientific knowledge, look at the cultural factors that affected them, and investigate the impact of scientific theory and social conditions on their opportunities and identities. In addition to reading about women in science, we will hear a variety of women talk about their careers. Faculty from chemistry, biology, engineering, earth and planetary sciences, medicine, physics, medical administration may visit, as well as female scientists who work in industry. This course is restricted to Women in Science participants who must have concurrent enrollment in Introduction to Women, Gender, and Sexuality Studies.

Credit 1.5 units. A&S: AMP A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L61 FYP 2172 Ampersand: Women in Science: Contemporary Issues
Following the history of women in science that we explored in the fall semester, this class will begin a discussion and analysis of current issues in gender and science. We will look at the feminist critique of science and scientific objectivity before turning to women's careers in science. Several questions will be central to our inquiry: Do women "do" science differently? Could alternative science and mathematics education help increase women's representation in fields that continue to be male dominated like physics, engineering, and computer science? How do social expectations of men and women effect career choices and retention? In addition to exploring these issues, we will hear from a number of women scientists. Drawing from both the Hilltop and Medical School Campuses, our visitors will include faculty members from chemistry, biology, engineering, earth and planetary sciences, medicine, physics, medical administration, among others, who will share their reflections about women and science. This course is restricted to Women in Science Ampersand program participants.

Credit 1.5 units. A&S: AMP A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

Anthropology

Anthropology offers the opportunity to study human existence in the present and the past and to explore how and why humans vary in their behaviors, cultures and biology. Students choose to study anthropology because they want to understand some of the most intriguing and troubling issues faced by modern society: the origin and meaning of ethnic and gender differences; the role of institutions in social, political and economic life; learned vs. innate behavior; the similarities and differences among human societies; and the meaning of religion, community and family.

The Department of Anthropology offers courses in the four subfields of anthropology: archaeology, biological anthropology, sociocultural anthropology and linguistics.

The faculty in the anthropology department are active in research around the world and bring a diversity of experiences to their teaching.

- Faculty research expertise in archaeology includes the origins of food production; the cultures of prehistoric North, Central and South America; African and Central Asian prehistory; environmental archaeology; and geographic information systems (GIS).
- Biological anthropology faculty focus on the evolution of humans; on the normal biological variation in living human populations; and on the ecology, behavior and evolution of nonhuman primates.
- Sociocultural faculty conduct research on a wide range of topics, including states, societies and beliefs; political ecology, demography, fertility and population; sociolinguistics; medical anthropology and public health; bodies, gender and sexuality; science and technology, mind and cognition; and religion and politics.

• Elective courses: 24 advanced units (300 level or higher), of which 9 units must be at the 400 level.

Optional Anthropology Major Track: Global Health and Environment

Anthropology majors may choose an optional track within the major called Global Health and Environment (GHE) if the students' interests lie primarily within this area of anthropology. Students enrolled in the GHE track must complete the anthropology major required courses and the GHE required and elective courses as outlined below.

Total units required: 34 units

• Required courses: 16 units

<table>
<thead>

</tbody>
</table>

• Elective courses: 18 advanced units (300 level or higher), of which 9 units must be at the 400 level, chosen from the approved list of GHE electives (https://anthropology.wustl.edu/global-health-and-environment-track-electives) available on the Anthropology website. GHE electives consist of approved courses listed under the Global Health heading and courses listed under the Environment heading. Students may take no fewer than 6 units from either list, with the remaining 12 units to come from the other list.

Additional Information

• Students should register under the L48 department code for any courses that will count toward the anthropology major.

• Courses taken pass/fail and courses in which a student earns less than a C- do not fulfill the major requirements.

• A maximum of 6 units of course work taken in University College (U69) may be counted toward the major.

• A maximum of 12 units of non-traditional day courses — including University College, study abroad, honors and directed-research courses — may be counted toward the advanced electives in the major. For details, please see below.

Research: Many anthropology courses include research components and final projects. Majors also can take part...
in research at the beginning, intermediate or advanced level in any subdiscipline and gain credit through approved directed research with faculty who have ongoing research projects. Research opportunities in anthropology labs include projects in archaeology, paleoethnobotany, geoarchaeology, zooarchaeology, genetic studies, GIS, human osteology, human ecology and primat studies. Students may count a maximum of 3 units of directed research credit with any individual faculty member toward the major.

Senior Honors: Anthropology majors in the College of Arts & Sciences who wish to conduct a research project for Latin Honors, who have a minimum grade-point average of 3.65, and who have received the approval of a faculty adviser and the department honors coordinator may be enrolled in the honors program. Latin Honors involves both the demonstration of acquired knowledge (based in part on GPA) and a report on an original research project. Two courses, Anthro 4951 and Anthro 4961, are available to allow students to receive credit for the extra research involved in the honors thesis. Students may count one of these courses toward their 400-level course requirement for the major.

Study Abroad: The department recognizes and accepts courses from a number of semester or year abroad programs. Specific information about study abroad policies (https://anthropology.wustl.edu/study-abroad-policy) is available on the anthropology department website or by consultation with the study abroad coordinator. Students may petition to count up to 9 units of study abroad elective credit toward the general anthropology major or up to 6 units of study abroad elective credit toward the GHE track of the major. Students should contact the anthropology study abroad coordinator to discuss the requirements for study abroad credit and to gain approval for the transfer of credit.

Transfer Credit: Students who wish to transfer credits from other institutions, including those abroad, must have approval from the director of undergraduate studies.

Internships: Anthropology majors can gain pre-professional experience by taking part in supervised internships in businesses, cultural institutions and community agencies. Students must have department approval for an internship and must work with an anthropology faculty sponsor during the fall or spring semesters. Internships may only be taken for pass/fail credit and do not count toward the major requirements.

Minors

The Minor in Anthropology

Total units required: 18 units

• Required courses: 6 units

  Two of the following three courses must be taken, and it is recommended that all three be taken:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anthro 150A</td>
<td>Introduction to Human Evolution</td>
<td>3</td>
</tr>
<tr>
<td>Anthro 160B</td>
<td>Introduction to Cultural Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>Anthro 190B</td>
<td>Introduction to Archaeology</td>
<td>3</td>
</tr>
</tbody>
</table>

• Elective courses: 12 additional units, at least 9 of which must be at the 300 level or higher.

Optional Anthropology Minor Track: Global Health and Environment

Anthropology minors may choose an optional track called Global Health and Environment (GHE) if the student’s interests lie primarily within this area of anthropology. Students in the GHE track of the anthropology minor must take the departmental, track and elective requirements as outlined below.

Total units required: 18 units, 9 of which are required introductory level courses. There are 9 additional elective units as outlined below.

• Required courses: 9 units

  Departmental requirement: 3 units

  Any 100-level introductory anthropology course from the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anthro 150A</td>
<td>Introduction to Human Evolution</td>
<td>3</td>
</tr>
<tr>
<td>Anthro 160B</td>
<td>Introduction to Cultural Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>Anthro 190B</td>
<td>Introduction to Archaeology</td>
<td>3</td>
</tr>
</tbody>
</table>

  Global Health and Environment Track requirement: 6 units

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anthro 3283</td>
<td>Introduction to Global Health</td>
<td>3</td>
</tr>
<tr>
<td>Anthro 361</td>
<td>Culture and Environment</td>
<td>3</td>
</tr>
</tbody>
</table>

• Elective courses: 9 units taken from the approved list of GHE electives (https://anthropology.wustl.edu/global-health-and-environment-track-electives) available on the Anthropology website. GHE electives consist of approved courses listed under the Global Health heading and courses listed under the Environment heading. Students may take no fewer than 3 units from either list, with the remaining 6 units to come from the other list.

Additional Information

• Students should register under the L48 department code for any courses that will count toward the minor.

• Courses taken pass/fail and courses in which a student earns less than a C- do not fulfill the minor requirements.

• A maximum of 3 units of course work taken in University College (U69) may be counted toward the minor. Online
courses taken through University College do not count toward the minor.

- A maximum of 6 units of non-traditional day courses — including University College, study abroad, honors and directed-research courses — may be counted toward the advanced electives in the minor. For details, please see below.

**Research:** Many anthropology courses include research components and final projects. Minors also can take part in research at the beginning, intermediate or advanced level in any subdiscipline and gain credit through approved directed research with faculty who have ongoing research projects. Research opportunities in anthropology labs include projects in archaeology, paleoethnobotany, geoarchaeology, zooarchaeology, genetic studies, GIS, human osteology, human ecology and primate studies. Students may earn a maximum of 3 units of credit from directed research under a specific faculty member.

**Study Abroad:** The department recognizes and accepts courses from a number of semester or year abroad programs. Specific information about study abroad policies ([https://anthropology.wustl.edu/study-abroad-policy](https://anthropology.wustl.edu/study-abroad-policy)) is available on the anthropology department website or by consultation with the study abroad coordinator. Students may petition to count up to 6 units of study abroad elective credit toward the general anthropology minor or up to 3 units of study abroad elective credit toward the GHE track of the minor. Students should contact the anthropology study abroad coordinator to discuss the requirements for study abroad credit and to gain approval for the transfer of credit.

**Transfer Credit:** Students who wish to transfer credits from other institutions, including those abroad, must have approval from the director of undergraduate studies.

**Internships:** Anthropology minors can gain pre-professional experience by taking part in supervised internships in businesses, cultural institutions and community agencies. Students must have department approval for an internship and must work with an anthropology faculty sponsor during the fall or spring semesters. Internships may only be taken for pass/fail credit and do not count toward the minor requirements.

**L48 Anthro 100 Earth’s Future: Causes and Consequences of Global Climate Change**

*Earth’s Future: Causes and Consequences of Global Climate Change* examines 1) the physical basis for climate change; 2) how climates are changing and how we know and assess that climates are changing; and 3) the effects of climate change on natural and human systems. The course is team-taught and will involve participation by scholars across the university with expertise in specific subjects. This is a broad, introductory course for first-year students and presumes no special subject matter knowledge on the part of the student.

Same as I50 INTER D 101

Credit 3 units. A&S: FYB A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

**L48 Anthro 130 First-Year Seminar: The Ritual Landscape of Cahokia: Perspectives on the Politics of Religion & Chiefly Power**

The purpose of this class is to engage and challenge first-year students in an open discussion about the prehistoric Mississippian community of Cahokia. The focus of this course is two-fold. The first is to study the way in which the archaeological evidence has been interpreted. The second is to examine other perspectives on Cahokia, especially from the Native American descendants who consecrated this landscape nearly a millennium ago. An underlying tenet of this seminar in understanding Cahokia can also be achieved through the traditions and literature of Native Americans. In the end, we want to understand the basis for Cahokia’s organization as a prehistoric Native American community and the role that ritual and religion played in the rather dramatic and dynamic history of this community and the surrounding region.

**L48 Anthro 132 First-Year Seminar: Past Tense, Future Imperfect: The Rise and Fall of Societies & Global Civilization**

The past history of humanity is littered with the stories of societies whose peoples experienced prosperity and fluorescence followed by decline and catastrophe. In the present, an age of information and rapid change, public intellectuals offer broad and detailed visions of what took place in the past, what is happening now, and what the trends suggest for the future. This course looks at the efforts of two prominent public intellectuals, economist Lester Brown and geographer Jared Diamond. In this course we look at Brown’s work in its latest incarnation, Plan B 4.0. We discuss this in light of current events. We then look at Jared Diamond’s book *Collapse, How Societies Choose to Fail or Succeed* and critical response to that book by experts. The professor includes a personal perspective as an archaeologist working with the ancient Maya civilization. The Maya are famous for the ninth-century AD collapse of their Classic civilization. The readings provide the basis for discussion of the challenges we face in understanding the life histories of societies and discerning what we can conclude about the future from their experiences.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: S

**L48 Anthro 141 Ampersand: Medicine and Society**

This course provides the basic foundation in medical anthropology and cultural anthropology for students enrolled in the Medicine and Society Program. The purpose of the course is to introduce students to the central themes and theoretical approaches employed by medical anthropologists to study health and illness in cross-cultural perspective. Topical areas include analyses of disease, illness and sickness at micro and macro levels; impact of personal and interpersonal factors on health; health effects of social, political and economic factors;
relationship of anthropology to biological and social science approaches; ecology of health and development; and cross-cultural health studies of language, gender and race/ethnicity. Note: Content for this course overlaps with and replaces Anthro 160 for students enrolled in the Medicine and Society Program. Open only to students enrolled in the Medicine and Society Program. CET (https://gephardinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course. Credit 3 units. A&S: AMP A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 142 Ampersand: Medicine and Society
This course is the required second-semester sequence of the introduction to medical anthropology and cultural anthropology for students enrolled in the Medicine and Society Program. The course builds upon material introduced in Anthro 141 and provides greater ethnographic context for the cross-cultural study of health and illness. Topical areas include analysis of disease, illness and sickness at micro and macro levels; impact of personal and interpersonal factors on health; health effects of social, political and economic factors; relationship of anthropology to biological and social sciences approaches; ecology of health and development; and cross-cultural health studies of language, gender and race/ethnicity. CET (https://gephardinstitute.wustl.edu/for-faculty-and-staff/community-engaged-teaching) course. Credit 3 units. A&S: AMP A&S IQ: LCD, SSC, SD Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 150A Introduction to Human Evolution
A survey of the fossil evidence for human evolution. The course includes discussion of the genetics of human variation and evolution, the study of living non-human primates, and the fossil record and its interpretation. An evolutionary perspective is used in an attempt to understand modern humans from the naturalistic point of view. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L48 Anthro 160B Introduction to Cultural Anthropology
The course introduces the basic concepts, theories, and methods of cultural anthropology — an academic discipline that studies the diversity of human cultures and societies. The purpose is to provide a broad perspective on the types of research that anthropologists undertake, and to engage in a critical dialogue on how the work of anthropologists contributes to understanding the human condition. Introduction to Cultural Anthropology is a portal into more advanced anthropology courses, and is a requirement for all anthropology majors. Credit 3 units. A&S IQ: LCD, SSC, SD Arch: SSC Art: SSC BU: BA, HUM EN: S UColl: CD

L48 Anthro 161 Gender, Youth, and Global Health
Through in-depth case studies, this course provides an introduction to gender-specific issues in the context of childhood and adolescence, poverty, and global health. Students will learn to identify how gender and gender differences affect conditions of life in the areas of reproductive health, nutrition, conflict, access to health care, and the social determinants of health, especially for young people. Students will learn to analyze health conditions and disparities in relation to both the micro dynamics of local worlds and the macro dynamics of large-scale social forces in the postcolonial global field. Additionally, they will come to understand the current challenges that global health practitioners and institutions confront in achieving gender equity and the current efforts toward closing the gap. These learning objectives will be achieved using lectures, but also discussions-based sessions and Skype-based interactions with NGOs and experts who are currently working in the field. Same as IS0 INTER D 160 Credit 3 units. A&S: FYBB, FYS A&S IQ: SSC, SD Arch: SSC Art: SSC BU: BA, IS EN: S

L48 Anthro 170D Introduction to Linguistics
Language is one of the fundamental capacities of the human species, and there are many interesting and meaningful ways in which it can be studied. This course explores the core components of linguistic theory: speech sounds (phonetics and phonology), word formation (morphology), sentence structure (syntax), and meaning (semantics). It also provides an overview of interdisciplinary ideas and research on how language is acquired and processed, its relation to the mind-brain and to society, and the question of whether the essential properties of language can be replicated outside the human mind (specifically, in chimpanzees or computer programs). Same as L44 Ling 170D Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, HUM EN: S

L48 Anthro 174 Medicine East and West: Comparing Health Care in the U.S. and China
This course provides a foundational introduction to comparative health studies by examining the health care systems of the United States and China. Using the tools and interpretive frameworks of the field of medical anthropology, students in this course are exposed to a broad range of topics dealing with health and health care in Eastern and Western contexts. These include the study of medical pluralism, meaning of illness, health care financing, preventive care, political-economic perspectives, and sociobehavioral perspectives on health and wellness. Students taking this class are prepared to understand and address ongoing health care concerns affecting U.S. and Chinese society. Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA, IS EN: S

L48 Anthro 190B Introduction to Archaeology
Archaeology plays a critical and unique role in understanding the human past. Through study of the methods and theories of archaeology, and a survey of important firsts in the human past, this course introduces students to the way archaeologists use material culture to reconstruct and understand human behavior. Chronologically ordered case studies from around the globe are used to look at social, ecological and cultural issues facing humans from the earliest times to the present. Students gain practice reconstructing the past through hands-on participation in two one-hour labs focusing on lithics and animal bones. By the end of the course, students are expected to be able to think critically about how the past is presented and why, and the importance of the past as it relates to the present and future. Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA, HUM EN: S

L48 Anthro 209C World Archaeology: Global Perspectives on the Past
If we carefully peer beneath the earth’s surface, we will discover a hidden world that is being rediscovered by archaeologists. A
considerable amount of excitement is generated by the discovery of lost civilizations and societies. Archaeologists from every corner of the earth come to Washington University to share their experiences as they use the most sophisticated technology to rediscover those forgotten and sometimes embarrassing aspects of our human past.

Same as L52 ARC 200C.
Credit 3 units. A&S IQ: HUM, LCD Art: FAAM BU: IS EN: H

L48 Anthro 212 Archaeological Fantasies and Hoaxes
American popular culture is saturated with pseudoscientific and fictionalized accounts of archaeological discoveries and interpretations. How can students of the past distinguish between fraud, fantasy, hype and valid archaeological research? What potential merit do films, TV-oriented documentaries and historical fiction offer? What role has racism played in attempts to deny indigenous peoples credit for their past achievements? This course looks at the popular culture of archaeology, providing tools for critical evaluation as well as lifestyle enjoyment of the field as it is frequently sold to both the informed and the unwary public. Anthropology majors and nonmajors are all welcome, as are sophomores and motivated first-year students who have not yet declared majors.
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 2151 Language, Culture and Society
This course explores the relationships between linguistic practice and other social and cultural processes. Among the topics discussed are language and social identity, language and thought, language and gender, multilingualism and language shift as well as the connections between language and the identity of ethnically or nationally defined communities. The course format alternates between "classic" theoretical readings and ethnographic case studies on the interplay between linguistic practice and ideology as well as cultural and social processes.
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 260 Topics in Health and Community
A survey of current topics in community health and medicine, with an emphasis upon social science approaches to issues affecting medicine and medical care in contemporary U.S. society. Issues include ethical debates in health care delivery, social stratification and health, access to health services, and factors affecting community wellness at local, national, and global levels. Presented as a weekly series of topical presentations by community health experts from the St. Louis area. Required for students enrolled in the Medicine and Society Program, and also open to other interested students.
Credit 1 unit. EN: S

L48 Anthro 2653 Health Care Challenges in Modern China
As the most populous country in the world, China has many challenges regarding medicine, health and health care delivery. In this course several major health care challenges facing China are explored. Students have the opportunity to learn not just from published research and class discussion but also from the perspectives of those who spend their lives studying the social, political, and cultural dynamics of these issues as well as those who devote their careers to the practice of health care in China. Must be enrolled in the study abroad program at Fudan University in Shanghai, China.
Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

L48 Anthro 290 Independent Study
Designed to give undergraduates research experience in the various subdisciplines of anthropology. May be taken more than once for credit. Prerequisite: consent of the faculty member under whom the research will be done.
Credit variable, maximum 3 units. Art: SSC

L48 Anthro 300 Internships in Anthropology
Anthropology majors may acquire professional experience outside the classroom by participating in a faculty-sponsored internship. Before work begins, the student and faculty sponsor must agree on a final written project, which is then approved by the Anthropology Academic Coordinator. Students are evaluated by the faculty sponsor on the basis of the written project and input from the internship supervisor. Course may be taken only one time. Prerequisites: 9 hours of anthropology and permission of department. Credit 3 units.

L48 Anthro 302B Peoples and Cultures of the Middle East
This course introduces the cultural diversity and unity of the peoples of the Middle East. The emphasis is on historical and ethnological relationships, social and political structure, religious pluralism and contemporary youth issues. We explore the lived experiences of the peoples in the modern nation-states of Egypt, Lebanon, Syria, Jordan, Israel, the Palestinian Territories, Turkey, Saudi Arabia and the countries of the Arabian Peninsula, Iraq and Iran. We access this material through short stories, poetry, biographies, essays, videos, blogs and political and anthropological reports.
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS EN: S

L48 Anthro 305 Anthropology of India
An introduction to the societies and cultures of India through its social margins. Our approach will leverage scholarship from many fields, highlighting the strengths and limitations of singular-discipline analyses and universalized histories. Ethnographic narratives will be woven into historical accounts of major cultural shifts. Students will learn to evaluate and apply multivocal perspectives on larger global issues that have transformed India since the end of colonization, including demographic, economic, social, cultural, political, and religious change. Topics will include population and life expectancy, civil society, social-moral relationships, caste and communalism, youth and consumerism, the new urban middle class, environment and health, tourism, public and religious cultures, social activism, politics and law.
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS EN: S

L48 Anthro 3051 Anthropology of Tibet and the Himalayas
This course is an anthropological and historical examination of Tibetan societies inhabiting the Tibetan Plateau and the highlands of Nepal. In addition to providing basic ethnographic descriptions of Tibetan societies, the course explores the changing nature of relations between Tibet and China, and between Tibet and the West. Guiding concepts include adaptation (both social and ecological), the politics of ethnicity and identity, and processes of culture change.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S
L48 Anthro 3055 Contemporary Chinese Culture and Society
This course provides an introduction to emerging trends in Chinese culture and society. We explore processes of change and continuity in the People's Republic, examining the complexity of social issues and the dynamics of cultural unity and diversity. While we focus on the post-Mao reform era (1978 to the present), we consider how contemporary developments draw upon the legacies of the Maoist revolution as well as the post-socialist past. The course provides an overview of anthropological approaches to the study of contemporary China, introducing students to key concepts, theories and frameworks integral to the analysis of Chinese culture and society. Readings, lectures and discussions highlight not only macro-level processes of social change and continuity but also the everyday experiences of individuals involved in these processes. We pay particular attention to issues of family life, institutional culture, migration, religion, ethnicity, gender, consumption and globalization.
Credit 3 units. A&S IQ: LCD; SSC; IS; Art: SSC; BU: IS

L48 Anthro 3056 Material Culture in Modern China
In this course, we will explore change and continuity from late imperial to postsocialist China through an analysis of everyday material culture. Drawing upon material objects, historical texts, ethnographic studies and films, we will investigate values, beliefs and attitudes toward the material world in modern Chinese life. Readings, lectures and discussions will focus on how political, ethnic, regional, religious, and gender identities have been constructed and shaped by the use and production of material artifacts ranging from household goods and tomb objects to built forms and bodily dispositions. Case studies include foot-binding, opium use, fashion, tea culture, fast food consumption, sports and nation building, contemporary art markets, the privatization of housing, and worker discipline in transnational factories.
Credit 3 units. A&S IQ: LCD; SSC Arch: SSC; Art: SSC; BU: IS

L48 Anthro 3059 New Departures in the Study of Culture, Health, and Medical Practices in Contemporary China
Drawing upon an interdisciplinary approach, this course addresses several major themes with a focus on the dynamics of China's unprecedented health care transformations. Topical issues covered will include: Biocultural Contexts of Disease; the Challenge of Aging in a Gray China; Health Inequalities and Social Stratification; and Values and the Medical Humanities in Public Health.**Students are encouraged to conduct ethnographic field research in a variety of settings including: community health centers, drug stores, city and district hospitals, clinics, public parks, clubs, temples and shrines, tea houses, cafes, restaurants, and school playgrounds and other places of nation building, contemporary art markets, the privatization of housing, and worker discipline in transnational factories.
Credit 3 units. A&S IQ: LCD; SSC Arch: SSC; Art: SSC; BU: IS

L48 Anthro 306B Africa: Peoples and Cultures
An anthropological survey of Africa from the classic ethnographies to contemporary studies of development. Emphasis on the numerous social and economic changes African peoples have experienced from precolonial times to the present.
Credit 3 units. A&S IQ: LCD; SSC Arch: SSC; Art: SSC; BU: HUM, IS

L48 Anthro 307A Human Variation
A survey of human biological diversity, considering its adaptive and taxonomic significance from the perspective of origins and distribution of traits and adaptation. Prerequisite: Anthro 150A or introductory biology.
Credit 3 units. A&S IQ: NSM, AN, IS; Arch: NSM; Art: NSM; BU: SCI

L48 Anthro 307B The Incas and Their Ancestors: The Archaeology of the Ancient Andes
From the hyper-arid desert of the Pacific Coast to the high-mountain plateaus of the Andes more than 12,000 feet above sea level to the lush forested Amazonian lowlands, Western South America presents one of the most diverse natural and cultural environments in the world and one of the few places where social complexity first developed. Beginning with the earliest human occupations in the region more than 12,000 years ago, this course examines how domestication, urbanization, the rise of early states, and major technological inventions changed life in the Andes from small village societies to the largest territorial polity of the Americas: the Inca Empire. Students will become familiar with the major debates in the field of Andean archaeology. Together, we will examine archaeological evidence (e.g., architecture, art, ceramics, metals, textiles, plant and animal remains), from the context of everyday life (e.g., households, food production, craft production) to the rituals and ceremonies (e.g., offerings, tombs) that took place in domestic and public spaces. We will also touch on the role of Andean archaeology in the context of national politics and heritage sustainability.
Credit 3 units. A&S IQ: LCD; SSC BU: IS
L48 Anthro 3100 Defense Against the Dark Arts: an Anthropological Approach to the Study of Religion and Health
This class is a comparative survey of religion, magic, and witchcraft as they are related to concepts of the body, health, healing and death across cultures. As such, students in this class will be expected to simultaneously learn details from particular magical and healing traditions studied in class, as well as to relate these details to theories about within the discipline of Anthropology (medical, cultural, psychological) and the field of Religious Studies. Special themes addressed in the class are the reasonableness of belief in magic, religion and religious practice as “magical,” the body and definitions of health, healing, and illness and disease as symbolically, culturally, even magically constructed and experienced.
Credit 3 units. A&S IQ: LCD, SSC BU: BA, ETH EN: S

L48 Anthro 3102 Topics in Anthropology: Bioprospecting
What do the opium poppy, the white willow tree, spoiled sweet clover, Madagascar periwinkle, and the fungus Penicillium have in common? Each of these species contains biochemicals that have been tapped to "advance" medicine. Biodiversity prospecting or "bioprospecting" can be defined as the systematic search for biochemical and genetic information in nature in order to develop commercially valuable products for pharmaceutical, agricultural, cosmetic, and other applications. Contemporary medical innovation depends on bioprospecting to remain "cutting edge," but what are the human and ecological costs of this emerging industry? This course explores the environmental impacts and ethical implications of the global search for new biological resources. We will study the role of indigenous knowledge, the problem of biopiracy, the politics of intellectual rights, and patenting culture in our quest to understand what is at stake in the regulation, reform, and growth of this problematic yet promising practice.
Credit 3 units. A&S IQ: SSC BU: HUM EN: S

L48 Anthro 3103 Topics in Anthropology: Politics of Medicine and Science in Africa
As a contemporary space, Africa presents as a seeming paradox: it is at once portrayed as a space of disorder, conflict, and lack and simultaneously as a site of innovation, development, and potential, particularly in the domains of medicine, science, and technology. This course refuses both of these straightforward narratives of lack and potential, considering Africa as a problem space in which and about which knowledge is produced. The course begins with the colonial politics of knowledge production, surveying imperial narratives of experimentation, development, and progress. The second part of the course explores contemporary conundrums in medicine and science on the continent, delving into the politics of global health interventions and various scientific practices. We will cover such topics as humanitarian aid, pharmaceuticals, biometrics, genetics and genomics, HIV, ebola, climate and environment, and psychiatry and global mental health, among other topics. It will be our task to understand how medicine and science — as value-neutral domains of "progress" and "development" — legitimate forms of intervention, care, and violence in the pursuit of a particular notion of the "common good."
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS EN: S

L48 Anthro 3101 Topics in Anthropology: Sense of Place: St. Louis
Where is home? How do you know where you’re from? Our points of origin (cultural, linguistic, geographic) often shape our life trajectories by telling us who we are and where we belong. The embodied ways we move through the world, and our experiential relationships to particular places (in both the built and natural environment) also influence our sense of shared history and community. At the same time, the asymmetrical acceleration of travel and communication technologies has produced a globalized world that invites us to redefine the scale and scope of our neighborhoods. With the potential to be everywhere and nowhere at the same time, how do we maintain a sense of place? Anthropologists ask how and why certain places come to hold strong and lasting meaning to people. Together, we will study localization and placemaking practices through close ethnographic readings and with site visits to marked places, non-places, and contested spaces throughout the St. Louis area. This course explores the creativity and politics of place to ask, anew, what it means to be human in the early 21st century.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

L48 Anthro 3104 First Americans: Prehistory of North America
The predecessors of the Eskimo, Northwest Coast Indians, Pueblo mound builders and other North American Indians. Concentrates on deductions from archaeological data for cultural development.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: BA EN: S

L48 Anthro 3105 Evolution of the Human Diet
Many researchers and health enthusiasts believe that the abandonment of our "Paleolithic" diet and lifestyle with the onset of agriculture some 10,000 years ago has lead to a rapid decline in health and perpetuated countless "diseases of civilization." While diet fads come and go, it seems this
new enthusiasm for "Paleo diets" is here to stay. But what is a "Paleo diet" anyway? Through a comparative evolutionary and anthropological approach we will examine the diets of extinct hominins, our extant primate relatives, ethnohistoric and contemporary foraging peoples, and even our own dietary habits. We will strive to answer key questions about diets in prehistory and their implications for living people today: How do we know what our ancestors ate? How have dietary hypotheses been used to explain processes in human evolution? How bad is agriculture for global health? What role did certain foods play in shaping our modern physiology? Are we maladapted to our contemporary diets? What does it mean to eat "Paleo"? A mix of discussion and lecture will encourage students to develop their own interests in human evolutionary nutrition.

Credit 3 units. A&S IQ: SSC Art: SSC BU: SCI EN: S

L48 Anthro 3152 Archaeology of Ancient Egypt
This course will cover major topics in the archaeology of ancient Egypt, incorporating the latest debates and archaeological discoveries. The course will emphasize Egyptian material culture, including settlements, landscapes, cities, tombs, pyramids and temples, in order to model the wider cultural and social development over the past five millennia as well as the place of Egypt, globally. Students will learn to critically approach and assess Egyptian material culture in order to understand the social, historical, and geographical context of ancient Egypt — one of the most intriguing cultures in human history.

Credit 3 units. A&S IQ: SSC BU: ETH, IS EN: S

L48 Anthro 3156 Topics in Chinese Social Development at Fudan
Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 3158 South Asian Religious Traditions
The Indian subcontinent is home to Hindu, Islamic, Buddhist, Jain, and Sikh traditions, among others. In this course we explore several traditions that are vital to life in India, Pakistan and beyond. We first encounter each tradition through narrative, with the support of visual media. We then explore how contemporary adherents make these traditions meaningful for themselves — in their everyday lives, in their struggles for social change, and in their political statements and contestations. Students will have the opportunity for creative projects or individual research.

Same as L23 Re St 312

L48 Anthro 3163 Archaeology of China: Food and People
China is a country with a large population, diverse landscapes, and unique food. This course will explore the origins of Chinese food in the context of the formation of Chinese societies. During the last two decades, the archaeology of China has become a fast moving subject with advances in methods, theories and changes of key perceptions. In this context, the beginning and spread of food production in China has become one of the key questions in current archaeology. We will focus on the process of domestication of plants and animals in various regions of China during the Holocene. We will explore how those processes relate to other sectors of the Old World, such as those of South and Southwest Asia. This course will pursue answers to the following questions: Why the Chinese ways of living and eating are different from those in the West? How production and consumption in China were shaped by food globalization in prehistory?

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS EN: S

L48 Anthro 3181 Humans and Animals
This course uses anthropological and evolutionary data to tell the story of how changing human-animal relations influenced humans over the long term. In this course we explore the history of western conceptual divisions between humans and animals, which contrast with more fluid boundaries in other regions. Subsequent lectures focus on hunting and symbolic relations with wild animals through time, relying on ancient animal bones, ancient art and texts. Current and future human-animal relationships will also be discussed. The goal of this course is to provide an overview of ways that animals have influenced human life in the 21st century. Changing environments and animal behavior form the backdrop to cultural discussions.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 3182 Ancient Africa: Social Mosaics and Environmental Challenges
This class introduces students to the basics of the archaeological record of humans in Africa from 3.6 million years ago to 1000 years ago. The first third of the course focuses on early humans, the origins of meat eating, expansion of diet and cuisine, technical and cultural responses to changing environments. The second section of the course emphasizes African rock art, socioeconomic variability among hunter-gatherers, the origins of African pastoralism, mobile responses to climate change and African contributions to world food supply including domestication of sorghum, also coffee. The last third of the course is devoted to the complex urban societies of ancient Africa, Egypt, Axum, Great Zimbabwe and Jenne Jeno. Course format is lecture and discussion. There are two mid-terms and students are expected to participate in interactive stone tool use, rock art creation and discussion of ethnographic and archaeological data on pastoral decision-making in times of drought and war and of issues surrounding the purchase of African antiquities and conservation of cultural heritage.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS EN: S

L48 Anthro 3202 Anthropological Perspectives on Women's Health
The principle goal of this course is to explore the health issues/risks women face around the world. In order to achieve this goal, we will take a life cycle approach beginning with the birth of female babies through adolescence, adulthood, and finally through the aging process. Our perspective will be biocultural, defined as the synergistic interaction between biology and culture. By comparing a diversity of health experiences across cultures, we can carefully examine the ways in which culture constrains perceptions of health and effective delivery of health care. Students will finish the term with a clearer understanding of the biology of life cycle changes, how health inequalities are generated and perpetuated, and how to make more informed decisions about their own health choices. Prerequisite: Anthro 160 or permission of instructor.

Credit 3 units. A&S IQ: LCD, SSC, SD Art: SSC BU: BA EN: S
L48 Anthro 3206 Global Gender Issues
This course compares the life experiences of women and men in societies throughout the world. We discuss the evidence regarding the universal subordination of women, and examine explanations that propose to situate women's and men's personality attributes, roles and responsibilities in the biological or cultural domains. In general, through readings, films and lectures, the class provides a cross-cultural perspective on ideas regarding gender and how gendered meanings, practices and performances serve as structuring principles in society.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: BA EN: S

L48 Anthro 3215 Food, Culture, and Power
What should I eat today? This seemingly simple question transects the fields of health, environmental studies, economics, history, anthropology, religion, and many others. The foods we eat, the way we get them, the way we produce them, and the way in which we eat them speak volumes about our beliefs, our technology, our understanding of how the world works, and our ability to function within it. That is, food is an excellent way to explore culture. No actions are more deserving of critical attention than those that we do regularly, without much critical thought, and most of us eat at least two or three times a day. In this class we explore how this food came to be here, why we like it, and what that says about us. This class is reading and discussion heavy, with a midterm paper based on the readings and a final paper based on a topic of the students' choosing.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 3255 Urban Anthropology
This course examines the many ways that people around the world make urban life meaningful. We will focus on the intersections among anthropology, urban studies, social theory and human geography to explore the theoretical, social, and methodological approaches to understanding the culture(s) created in cities. Drawing on ethnographic case studies from cities around the world, we will explore issues pertaining to race and ethnicity, gender, youth, poverty, diversity and "super-diversity," gentrification, urbanization, and illusions and realities of modernity.
Credit 3 units. A&S IQ: SSC, SC, SD BU: BA EN: S

L48 Anthro 3261 Inequality, Hierarchy and Difference
This course examines systems of inequality in a variety of world regions and includes analysis of their causes and effects. Economic class, gender, ethnicity and race are among the types of social stratification discussed. Topics might include environmental racism, occupational segregation, political movements, and debates over the differential impact of new technologies such as biotechnology and reproductive technologies on minority populations.
Credit 3 units. A&S IQ: LCD, SSC, SC, SD Art: SSC BU: ETH, IS EN: S

L48 Anthro 3261 Becoming Human: Archaeology of Human Origins
Humanity, before the advent of agriculture and cities, evolved a series of behaviors that enabled them to survive as hunter-gatherers in diverse environments with complex cultural systems. These behaviors included hunting, control of fire, shelters and clothing, elaborate tools of diverse materials, burials, jewelry and representational art. These characteristics emerged over more than 2 million years of the Pleistocene across several species of humans, to coalesce into what we would recognize as modern human foragers 30,000 years ago. This course traces that emergence of what it means to be human, through the Paleolithic archaeological record in its context of past environments and past human forms.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 3283 Introduction to Global Health
This course provides a general introduction to the field of public health. It examines the philosophy, history, organization, functions, activities and results of public health research and practice. Case studies include infectious and chronic diseases, mental health, maternal and reproductive health, food safety and nutrition, environmental health, and global public health. Students are encouraged to look at health issues from a systemic and population level perspective, and to think critically about health systems and problems, especially health disparities and health care delivery to diverse populations. No background in anthropology or public health is required.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS EN: S

L48 Anthro 3284 Public Health Research and Practice
In-depth exploration of current theory and methods involved in public health research and practical applications. Emphasis on fundamentals of epidemiology, which forms the scientific rationale for public health assessment, assurance and policy development. Survey of current public health practice and research areas including biological foundations of public health, social and behavioral interventions, maternal-child health and environmental health. Relationships among public health, medicine, nursing, social work and related disciplines.
Credit 3 units. A&S IQ: SSC Art: SSC BU: IS EN: S

L48 Anthro 3293 Religion and Society
We take a broad and practice-oriented view of "religion," including uttering spells, sacrificing to a god, healing through spirit possession, as well as praying and reciting scripture. We consider religious practices in small-scale societies as well as those characteristic of forms of Judaism, Islam, Christianity and other broadly based religions. We give special attention to the ways religions shape politics, law, war, as well as everyday life in modern societies.
Credit 3 units. A&S IQ: SSC Art: SSC BU: IS EN: S

L48 Anthro 3295 Secular and Religious: A Global History
Recent years have seen a dramatic rethinking of the past in nearly every corner of the world as scholars revisit fundamental questions about the importance of religion for individuals, societies and politics. Is religion as a personal orientation in decline? Is Europe becoming more secular? Is secularism a European invention? Many scholars now argue that "religion" is a European term that doesn't apply in Asian societies. This course brings together cutting-edge historical scholarship on Europe and Asia in pursuit of a truly global understanding. Countries covered vary but may include Britain, France, Turkey, China, Japan, India and Pakistan.
Same as L22 History 3921
Credit 3 units. A&S IQ: HUM, LCD, SD BU: HUM, IS EN: H

L48 Anthro 330 Experimental Archaeology
Experiments are an extremely important part of the scientific process. Although archaeology is often treated as an historical science, the nature of the material record does provide an
opportunity to use experimentation as an important way of interpreting what we excavate. The class will be working with the most tangible materials recovered from archaeological contexts, that is stone and pottery. After reviewing the history of experimentation in archaeological investigations we will turn to the material record. This will be followed in our initial weeks of setting up the experiments and how they will be used to compare with available data sets derived from archaeological contexts. As part of the class we will take several field trips to areas where materials exist in a natural setting. Each class member will select a specific material for the focus of their experiments. In the end students will produce several experiments using different materials, document their experiments in written reports, and finally present their results to the class for discussion and evaluation.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L48 Anthro 3304 Bones to Behavior: Undergraduate Research in the Lab and at the Zoo
We undertake zooarchaeological study of equid skeletons in the zooarchaeology laboratory at Washington University, and in collaboration with the Saint Louis Zoo, participate in a behavioral study of the courtship and breeding behavior of the ancestor of the domestic donkey — the African wild ass. The research questions that we focus on are how the biology and behavior of the African wild ass influenced the domestication of the donkey by prehistoric African herders or ancient Egyptians and how the behavior of the African wild ass continues to affect prospects for conservation of this highly endangered animal. During the first half of the semester, we meet once a week for 2.5 hours in the zooarchaeology laboratory. In the second half of the semester, we no longer meet in the lab, and each student spends two mornings of their choice per week at the Saint Louis Zoo conducting observations of the wild ass. Students may choose two days that fit their schedule. Saturdays and Sundays are included as choices of days. Permission of instructor is required.

Credit 3 units. A&S IQ: NSM Art: NSM BU: BA

L48 Anthro 3305 Bones to Behavior II
In this class, students undertake zooarchaeological research on skeletal material in the zooarchaeology laboratory at Washington University and/or preparation of animal skeletons for comparative study and, in collaboration with the Saint Louis Zoo, participate in behavioral studies of the ancestor of the donkey — the African wild ass. Collections housed in the zooarchaeological laboratory for study include ancient food-remains from African sites. These collections bear on questions regarding cultural and climate change in the Horn of Africa 2,000 to 12,000 years ago and include animals ranging from African antelopes to domestic camels. During the first half of the semester, students meet once a week for 2.5 hours in the zooarchaeological laboratory. In the second half of the semester, we meet twice a week in the laboratory or at the zoo. Location depends on projects selected for study. Permission of instructor is required. May be repeated for credit.

Credit 3 units. A&S IQ: SSC Arch: SSC EN: S

L48 Anthro 3309 Anthropological Perspectives on Care
This course aims to provide an introductory survey of topics and approaches to the anthropology of care. It does so by drawing on a range of ethnographic, theoretical, and cross-disciplinary materials. This will allow us to think through and engage with care in its myriad forms, its presence and absence, its bureaucratization and management, its relation to kinship, relatedness, labor and government. In the first part of the course, we will explore theories of care as moral practice with a feminist lens. In the second part, we will engage this lens with ethnographic materials about care in diverse settings that also shed light on the political, economic, and lived realities of care. These ethnographic and sociological works include explorations of the circulation of care in moral economies and its monetization as paid labor, the politics and "antipolitics" of health care in institutional settings, and the role of care in kinship, household formations, and life course regimes across cultures.

Credit 3 units. A&S IQ: LCD, SSC EN: S

L48 Anthro 3310 Health, Healing and Ethics: Introduction to Medical Anthropology
A cross-cultural exploration of cultures and social organizations of medical systems, the global exportation of biomedicine, and ethical dilemmas associated with medical technologies and global disparities in health.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: ETH EN: S

L48 Anthro 3311 Topics in Islam: Islam in the Indian Ocean
Selected themes in the study of Islam and Islamic culture in social, historical, and political context. The specific area of emphasis will be determined by the instructor.

Same as L75 JIMES 3622

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: IS EN: H UColl: CD

L48 Anthro 3322 Brave New Crops
This course introduces students to the major issues surrounding the development and use in genetically modified (GM) crops. Its focus is international, but with particular focus on the developing world. A variety of experts, available locally or through the internet, will contribute perspectives. The course also includes field trips.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: ETH

L48 Anthro 333 Culture and Health
This course explores culture and health, with a focus on global health. Assigned readings explore cross-cultural perspectives on health, healing, and the body, as well as important concepts in medical anthropology. Through class discussions and close examination of ethnographies of health and illness, students develop an understanding of how cultural and political-economic forces articulate with the emerging field of global health.

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: BA

L48 Anthro 3331 Anthropology of Clothing and Fashion
This course takes clothing as a starting point for examining broad themes in anthropology, including gender and sexuality, race and the body, history and colonialism. We look at the ritual
significance of clothing and other practices of bodily adornment in traditional societies and the role of style in constituting contemporary social movements and identity categories. We investigate the globalization of the apparel industry, from production and circulation to marketing and branding, in order to understand the relationship between citizenship and consumption, labor and power in the global economy. The course encourages students to reflect on their relationship to the wider society and economy as producers and consumers of material culture through the lens of clothing and fashion.

Credit 3 units. A&S IQ: SSC Art: CPSC, SSC BU: BA EN: S

L48 Anthro 333B Anthropology of Design: Artifacts, Expertise, and Insurgency
In this course we will explore the deep-seated politics and cultures of design. We will examine a number of case studies from hydraulic engineering in South Africa, gambling programs in Las Vegas, to DIY punk style in Indonesia. In the process we will explore the ways that design offers insight into other domains of social life such as addiction, inequality, statecraft, and urban citizenship.

Credit 3 units. A&S IQ: SSC Arch: GAMUD, GAUI, SSC Art: CPSC, SSC BU: BA, IS EN: S

L48 Anthro 3351 The Ancient Maya: Archaeology and History
This course focuses on the ancient Maya civilization because there are many exciting new breakthroughs in the study of the Maya. The Olmec civilization and the civilization of Teotihuacan in the Valley of Mexico are considered as they related to the rise and development of the Maya civilization. The ancient Maya were the only Pre-Columbian civilization to leave us a written record that we can use to understand their politics, religion and history. This course is about Maya ancient history and Maya glyphic texts, combined with the images of Maya life from their many forms of art. The combination of glyphic texts, art and archaeology now can provide a uniquely detailed reconstruction of ancient history in a New World civilization.

Credit 3 units. A&S IQ: SSC Arch: GAMUD, GAUI, SSC Art: CPSC, SSC BU: BA, IS EN: S

L48 Anthro 3354 Ancient Mesoamerica
Mesoamerica encompasses the Pre-Columbian complex societies of Mexico and upper Central America, including Guatemala, Belize, and parts of Honduras and El Salvador. It was an agrarian world of great and enduring cities, far-flung trade networks, transcendent religions, kingdoms and empires. This survey lecture course begins with the pioneering communities and the first Olmec Formative states, the flowering of highland Mexican Classic Period Teotihuacan and other great cities like Tajin in Veracruz, the dynasties of the lowland Maya and summarizes with the Aztec Empire and the period of the Spanish Conquest. The course touches on the many and diverse cultures that contributed to this vibrant world.

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS EN: S

L48 Anthro 336B Culture and Identity
Culture and diversity; cultural relativism and its contradictions; custom and habits; the construction and maintenance of norms; communication, symbol, sign and intersubjectivity; symbolic interaction; rhetoric and the definition of social situations; societal means of fabricating distinctions (e.g., race, tribe, ethnic group, nationality, sect group).

Credit 3 units. A&S IQ: LCD, SSC, SC, SD Art: SSC BU: BA, ETH EN: S

L48 Anthro 3373 Law and Culture
We live in an age when social policy is increasingly displaced into the realm of law, when justice and equality are matters of courtroom debate rather than public discussion. Legal language has become a key resource in all kinds of struggles over livelihood and ways of life. In this course, we study the cultural dimensions of law and law's changing relationship to state power, the global economy, social movements and everyday life. We approach law as a system of rules, obligations and procedures, but also a cultural practice, moral regime and disciplinary technique. How are relationships between legal, political and economic realms structured and with what consequences? How does law provide tools for both social struggle and social control? What does anthropology contribute to research on these issues? In exploring these questions, we combine readings from classical legal anthropology with recent ethnographic work from around the globe.

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: ETH EN: S

L48 Anthro 3386 Language, Culture and Society
Although this is an introductory course, students who have taken Linguistics 170D Introduction to Linguistics benefit from knowledge of phonology, morphology, syntax and semantics. The primary content of this course explores the relationship between linguistic practice and other social and cultural processes. Anthropological linguistics, including alternative approaches to fieldwork and data collection are introduced, along with various studies of language usage in social and cultural contexts that consider language and thought, language and identity, language and gender, as well as multilingualism and other forms of language contact. The ethnography of speaking and communication are central to this course, as is conversation analyses, which introduces a combination of qualitative and quantitative linguistic research methods.

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: BA EN: S

L48 Anthro 3384 Cognition and Culture
This course examines the influence of evolved cognitive dispositions (the way natural selection engineered the human mind) on the transmission of cultural knowledge. Dispositions present from early childhood make certain kinds of cultural knowledge particularly easy to acquire and, therefore, culturally stable. We also consider the evidence for differences in cognitive processes triggered by different social environments. Emphasis is on empirical studies and experimental methods in the study of cultural similarity and differences. Prerequisites: Psych 100B, Anthro 160B or permission of instructor.

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: BA EN: S

L48 Anthro 3391 Economies as Cultural Systems
Many contemporary approaches to economics downplay or bracket the importance of culture in the workings of economic systems. In this class we focus on approaches to distribution and exchange in which culture and social institutions figure prominently, if not pre-eminently. We sample a diverse array of economies, from gift exchange to the ceremonial destruction of wealth, from Melanesia to Wall Street, in order to evaluate some of the assumptions that undergird market capitalism. These assumptions include the perception of market actors exclusively
as calculative, maximizing individuals. Topics covered include the Industrial Revolution; utilitarianism; economic anthropology; the formal vs. substantivist debates; ethnography of finance; and Marxist sociology.

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: ETH EN: S

**L48 Anthro 341 Health and Wellness in the Community: A Service Learning Seminar**

This 4-credit course is designed to be an interactive course whereby students will volunteer with a local/community-based health or health-affiliated organization under the supervision of an anthropology faculty member and explore the anthropological theories and methods of analyzing applied service and research. Students will be expected be in class with the instructor twice a week for 1.5 hours each time and volunteer a minimum of 4-5 hours each week at an approved social service organization, which must be confirmed during first two weeks of the semester. In-class readings and assignments will be topical and relevant to current events, local issues, and the relationships among community and health. Students must have taken L48 141 and L48 142.

Credit 4 units. A&S IQ: SSC BU: HUM EN: S

**L48 Anthro 3414 Topics in Social Research at Fudan**

Credit 3 units. A&S IQ: SSC EN: S

**L48 Anthro 342 Advanced Seminar in Medicine and Society: Patients, Politics and Policy**

This course is designed to build on the foundations provided in the First-Year Medicine and Society Seminar. It will interrogate current health-related issues, including gender, sexuality, politics, policy, and economics, and it will also explore how these and many other issues, demographics, and so on impact current health- and healing-related decisions and policies. We will read about and unpack contemporary issues in health care (e.g., insurance, big pharma, gender and sexuality, race) and have local experts visit to talk about their practical experience with and in health care. Students will be expected to engage with ethnographic, medical, economic, political, and sociological material as well as with current journalism to interrogate the topic. This course will meet twice per week for 1.5 hours.

Prerequisites: Anthro 141 and Anthro 142.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

**L48 Anthro 3432 Topics in Africa: Capitalism, Exchange and Inequality in Africa**

This course explores issues of power and inequality related to exchange and the emergence of market economies in Africa. Case studies include examinations of cattle and bride wealth among pastoralists in Sudan, welfare policies in contemporary South Africa, and sex work in West Africa. In each of these cases there is a complex balance between the value placed on maintaining social relationships and accumulating private property. We investigate the implications of this balance for the production of local and international forms of inequality. The course also introduces students to key ideas in economic anthropology such as the formalist-substantivist debate, rational choice theory and neo-Marxist approaches to power and stratification. By the end of the course, students should be able to critically assess the value of these theories in understanding day-to-day economic activities in Africa. This class is a discussion-based seminar and in-class participation is highly encouraged. Students are graded on a series of analytical essays, a final paper and in-class participation.

Same as L90 AFAS 343

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

**L48 Anthro 3416 Native Americans at Westward Expansion**

Issues precipitated by Euro-American contact, colonization and expansion between 1492 and 1810 across Eastern North America, the Plains and the Rocky Mountains. Impacts of exploration and settlement and responses by native peoples: epidemics; population loss; breakdown of Southeastern chieftdoms; resistance; relocation; and shifts in economic strategies. Perspectives and policies of Native Americans as well as Europeans and non-Indian Americans, including Lewis and Clark.

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: BA EN: S

**L48 Anthro 3461 Global Energy and the American Dream**

This lecture course explores the historical, cultural and political relationship between America and global energy, focusing on oil, coal, natural gas, biofuels and alternatives. Through case studies at home and abroad, we examine how cultural, environmental, economic and geopolitical processes are entangled with changing patterns of energy-related resource extraction, production, distribution and use. America's changing position as global consumer and dreamer is linked to increasingly violent contests over energy abroad while our fuel-dependent dreams of boundless (oil) power give way to uncertainties and new possibilities of nation, nature and the future. Assuming that technology and markets alone will not save us, what might a culturally, politically and socially minded inquiry contribute to understanding the past and future of global energy and the American dream?

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: CPSC, SSC BU: ETH, IS EN: S

**L48 Anthro 3472 Archaeologies of Graffiti from Antiquity to the Present**

The modern story of graffiti — revolving around social, economic, and political contexts such as bathroom stalls, subways and alleys steeped with urine and trash, decrepit buildings and train cars situated in less reputable areas of cities and towns — lead people to associate it with antisocial behaviors, dissent, and the vandalism of public and private property. However, some people consider graffiti as a legitimate form of art, communication, and a somewhat anonymous expression of current social climates. The disparity between these two perspectives has provided a great deal to study for social scientists. However, a consideration of graffiti's simple definition — words or drawings etched or painted on some surface in a public place — lead us to recognize that feats of graffiti originate way before the inner-city movements of the 1970s. In this class we will draw upon a range of studies from archaeology, anthropology, sociology, art, and history to broadly explore the creation and meaning of graffiti from antiquity to the present. Our goal is to learn how to examine the form, function, and context of graffiti across cultures and through time, with regard to the circumstances of its creation. In doing so, we aspire to better understand what lies behind the human urge to leave a mark.

Prerequisite: Introduction to Archaeology.

Credit 3 units. A&S IQ: SSC BU: BA EN: S
L48 Anthro 347B Ancient Mound Builders of the Mississippi Valley
Study of the peoples in North America who built mounds and other earthen structures beginning more than 4000 years ago; why they erected earthworks; what the structures were used for; how they varied through time and across space; and what significance they had to members of society.
Credit 3 units. Art: SSC BU: BA

L48 Anthro 3521 Anthropology of Human Rights
This course draws on anthropological scholarship to examine doctrines, practices, and institutions associated with international human rights law. Topics to be covered include: (1) colonialism and the history of international human rights law; (2) the complex theoretical issues raised by attempts to define and apply human rights concepts in different cultural contexts; (3) the role of governments, NGOs, and other international institutions in promoting human rights and humanitarianism; (4) key human rights issues such as freedom of religion, cultural rights, women's rights, and economic rights in different cultural contexts.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 3541 Anthropological and Sociological Study of Muslim Societies
This course introduces students to anthropological and sociological scholarship on Muslim societies. Attention will be given to the broad theoretical and methodological issues which orient such scholarship. These issues include the nature of Muslim religious and cultural traditions, the nature of modernization and rationalization in Muslim societies, and the nature of sociopolitical relations between "Islam" and the "West." The course explores the preceding issues through a series of ethnographic and historical case studies, with a special focus on Muslim communities in the Middle East, Southeast Asia, and Europe. Case studies address a range of specific topics, including religious knowledge and authority, capitalism and economic modernization, religion and politics, gender and sexuality, as well as migration and globalization.
Same as L75 JIMES 354
Credit 3 units. A&S IQ: LCD, SSC, SC, SD BU: IS EN: S

L48 Anthro 3542 Anthropology of Change: Practicing Applied and Public Anthropology
In this course, students will learn how to use anthropology and ethnographic methods as tools for provoking change. The legitimacy of this "fifth-field" of anthropology has been in contention amongst anthropologists throughout generations. But in the contemporary era of neoliberalism and big-data, social scientists are increasingly examining their ethical duty to their informants — specifically, concerns about maintaining neutrality versus leveraging ethnographic data to improve lives or to make a profit. We will begin with the history of this ethical debate and move into contemporary issues in anthropology for social change and in business anthropology. Topics will include multidisciplinary teamwork, practitioner capacity building, community action programming, policy development and ethical design. This course is designed for upper-level anthropology students but will be particularly useful for those considering combining anthropology as a double-major or minor in a range of applied fields (business, engineering, social work, law, health and medicine). It will prepare students for the practical use of anthropology in consulting firms, research institutes, corporations, NGOs, and federal, state, and local government agencies.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: CPSC, SSC BU: ETH EN: S

L48 Anthro 3582 Anthropology of the Human Face
A survey of the human face, including both an evolutionary perspective on why our faces changed to look the way they do today and a theoretical perspective on how we create and maintain self-image through body modification. Comparative and cross-cultural approaches are used to understand modern human craniofacial and cultural diversity. The course includes discussions of how perceptions of biological variation inform social interactions and of how sociocultural norms pattern body modification, both presently and historically. Most importantly, students learn how information obtained with archaeological, sociocultural, and biological methods is integrated to address anthropological questions.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 3612 Population and Society
This review of population processes and their social ramifications begins with an introduction to the basic terminology, concepts and methods of population studies, followed by a survey of human population trends through history. The course then investigates biological and social dimensions of marriage and childbearing, critically examines family planning policies, deals with the social impacts of epidemics and population aging, and looks at connections between population movements and sociocultural changes. The overall objective of the course is to understand how population processes are not just biological in nature, but are closely related to social, cultural, political and economic factors.
Credit 3 units. A&S IQ: SSC Art: SSC BU: ETH EN: S

L48 Anthro 3613 Follow the Thing: Global Commodities & Environment
Who picked your strawberries? Is your produce still "local" if the hands that harvested it traveled thousands of miles to do the job? This course re-examines the root causes of the global and local environmental problems we read about every day, with an emphasis on historical and contemporary drivers of human migration. Topics include the production and consumption of "natural" resources, the politics of migration and agriculture, and the cross-border commodification of human labor and the environment. Anthropology is historically associated with the study of "remote" societies and "exotic" places often imagined as having little everyday connection with the rest of the world. This course will challenge you to reconsider the meanings of "global" and "local" by introducing new social scientific approaches to studying the key problems that have connected (and disconnected) diverse human populations throughout the late 20th and early 21st centuries: growing disparities in material wealth, natural resource depletion, energy overconsumption, inequitable access to care, and beyond.
L48 Anthro 3615 Environmental Anthropology
This course will provide students with a working knowledge of how the study of humans across space and time has fundamentally impacted the way we understand the idea of nature, the environment and what it means to be human. The course will ground students in both historical and cutting-edge anthropological theories with units on subsistence, transformative nature, imagining wilds in the Anthropocene and pluralizing environmentalisms.
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: CPSC, SSC BU: BA EN: S

L48 Anthro 3616 Ecofeminism: Environmental Social Movements and Anthropology
This course provides a survey of environmental social movements around the world and over time, in the process challenging commonly held perceptions about environmentalism and environmental movements. Specifically, it demonstrates that environmental social movements are often as much or more about people, identity and human rights than they are about protecting the environment. In addition to juxtaposing dominant traditions of American environmentalism with environmental movements in other parts of the world, the course focuses in on new and emerging social movements that are often transnational in scope but local in scale. These new movements offer holistic reintermediations of human-environment relationships, identities and political and economic organization in their attempts to transcend socio-environmental inequalities. Throughout, the course draws on social scientists’ (especially anthropologists’) descriptive interpretations and critical theoretical analyses of various environmental social movements and the differences that constitute them.
Credit 3 units. A&S IQ: SSC, SC, SD Art: CPSC, SSC BU: BA EN: S

L48 Anthro 3617 Past and Present Cultural Environments
Human societies are situated within and interact with their ecological and environmental systems. Even social relationships within and between groups imply spatial relationships and geographic orientation, advantages, influence, and limitations. Beyond subsistence, environment and the “natural world” play an integral role in how humans pattern the landscape, structure society, develop their world view, and, in turn, alter and adapt the world in which they live. This course introduces students to anthropological conceptions of human-environmental relationships, past and present. Topics include environmental and landscape archaeology; historical, political, and human behavioral ecology; world view and conceptualizations of nature; human adaptation, resilience theory, and niche construction; anthropological case studies; the intersections of humans, animals, and the environment; and environmental politics.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 3618 Urban Ecological Anthropology
Anthropology’s long history of studying human-environment interactions makes it well-suited to examine the complexities of urban environmental issues. Through ethnographies and other readings, this class introduces students to the ways social structures, power and knowledge contour people’s experiences and understandings of nature in an urban environment. Of particular interest are environmental justice issues involving pollution and disasters; the creation of community gardens and other public space; cars and bicycles; and conservation or commercial uses of natural resources nestled in or on the edge of cities. Class discussion includes environmental issues in the St. Louis metropolitan area. No background in anthropology or environmental studies is required.
Credit 3 units. A&S IQ: LCD, SSC Art: CPSC BU: BA EN: S

L48 Anthro 3619 Dimensions of Waste
Waste is not apolitical. Its conception, creation and management are deeply cultural practices. Students will learn how local stories integrate to larger, cutting-edge research on waste, gleaned from direct, in-person contact with leading waste scholars. Students will have direct contact with renowned experts visiting for the 2017-2018 Mellon Foundation Sawyer Seminar on Wastelands. Course content will draw from core texts in environmental anthropology and ecocritical theory. We will learn to analyze contemporary perspectives on waste by reading scholarly and activist “texts” (publications, author visits, blog posts, etc.) as not only disseminators of facts, but also as cultural artifacts of specific epistemologies of waste. Students’ final project will be to produce a mini-documentary or podcast using their own original fieldwork interviews to demonstrate the flows of waste in the local St. Louis community.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: CPSC, SSC BU: BA EN: S

L48 Anthro 362 The Biological Basis of Human Behavior
Infidelity, marriage customs, inner-city violence, infanticide, intelligence. Are the behavioral patterns we see genetically fixed and racially variable? What is the evolutionary and biological basis of human behavior? This course offers a critical evaluation of these from an anthropological perspective.
Credit 3 units. A&S IQ: LCD, NSM, SD Arch: NSM Art: NSM BU: BA

L48 Anthro 3620 Anthropological Perspectives on the Fetus
Where do we come from? How do we get here? When does “life” begin? Is the fetus a “person” or something else? How could we decide? This course integrates biological, medical, philosophical and cross-cultural perspectives to examine how various societies (including our own) understand the nature of the human fetus. The course examines basic human embryology, beliefs about conception and fetal development, ideas about the moral status of the fetus, controversies surrounding prenatal care and antenatal diagnostic testing (including sex selection and genetic screening tests), current controversies about fetal medicine and surgery, and the problem of abortion in cross-cultural perspective.
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 3621 Anthropology of Human Birth
This course examines the interaction between human biology and culture in relation to childbirth. Emphasis is placed on understanding the cultural challenges posed by the physiology of human reproduction, the ways various cultures have attempted to meet those challenges, and the resultant consequences that this has had for women’s lives. The course draws on material from human anatomy and embryology, paleoanthropology, clinical obstetrics, public health, social anthropology, the history of medicine and contemporary bioethics.
L48 Anthro 3625 The Female Life Cycle in Cross-Cultural Perspective
This course will examine the biology of the female reproductive cycle — menarche, menstruation, and menopause — and its cultural interpretation around the world. Topics covered will include the embryology of human sexual differentiation, the biology of the menstrual cycle and how it influences or is influenced by various disease states, contraception, infertility, cultural taboos and beliefs about menstruation and menopause, etc. The course will utilize materials drawn from human biology, clinical gynecology, ethnography, social anthropology, and the history of medicine and will examine the interplay between female reproductive biology and culture around the world. Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: ETH

L48 Anthro 3626 Adventures in Nosology: The Nature and Meaning of Disease
What is a "disease" and how do you diagnose one? What are "medicines" and how and when, and for what purpose should they be used? These questions reflect universal human concerns, but the answers given to these questions have varied enormously in different times and places. The course considers the nature of health, illness, disease and its treatment, beginning with a detailed examination of the traditional ethnomedical system of the Hausa people of northern Nigeria. Using this West African medical system as a baseline for comparison, the course then explores the nature of "nosology" (the classification of diseases) and the underlying logic of different therapeutic systems in different times and cultures, including our own. The course draws on ethnography, the history of medicine, bioethics and human biology to understand how these questions are asked and answered in different societies, times and places. Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: SCI

L48 Anthro 3628 The Anthropology of Health Disparities
This course approaches the subjects of race, ethnicity, gender, sexuality and class-related health disparity epidemiologically and anthropologically. Students in this course explore these cultural categories both as factors that contribute to systematic differences in health status and outcomes and as dynamic frameworks through which those systematic differences can be examined and understood. The grounding assumptions of this course are 1) that race, ethnicity, gender, sexuality and class are cultural constructs employed by humans in an effort to account for observed physical, dispositional and behavioral group-level diversity; 2) that disparity, and particularly health disparity, is meaningfully associated with diversity but is not caused by it; and 3) that because humans are the product of two dynamic, complex systems (biology and culture), health disparities are most usefully engaged as conditions of process and interconnectedness. Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 365 Human Growth and Development
This course focuses on the life-history of humans from birth to death. Through a series of lectures we consider how humans grow and change both biologically and psychologically over the course of our lives. Topics include: human growth curves, sex-differences, adolescence and puberty, nutrition, environment, growth disorders, death, and the evolution of human growth. Credit 3 units. A&S IQ: SSC Art: SSC BU: ETH EN: S

L48 Anthro 3655 Behavioral Ecology of the Great Apes
This course introduces undergraduate students to the behavioral ecology of great apes. Lectures and readings provide an overview of the distribution, feeding ecology, social system and behavior of African and Asian apes. The main objective of this class is to examine variation in behavioral ecology with and between ape species. The comparative content within each lecture gradually increases throughout the course, and students are asked to synthesize this material in their final exam. Readings mainly consist of book chapter assignments from three recent texts on the ecology, behavior and geographic variation observed in great apes. Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 3661 Primate Biology
This course takes a multifaceted introductory approach to the primates, the closest relatives of human beings, by investigating anatomy, growth and development, reproduction, behavioral adaptations, ecology, geographic distribution, taxonomy and evolution. Emphasis is placed not only on the apes and monkeys, but also on the lesser-known lemurs, lorises, bushbabies, tarsiers and many others. The importance of primate biology to the discipline of anthropology is discussed. Intended for students who have already taken Anthro 150A and recommended for students who wish to take the more advanced 400-level courses on primates. Prerequisite: Anthro 150A or permission of instructor. Credit 3 units. A&S IQ: SSC Art: SSC BU: SCI

L48 Anthro 3662 Primate Conservation Biology
This course focuses on the ecological diversity of primates and how these and other traits are related to their present day abundance and distribution. In addition, the biological, abiotic and anthropogenic factors related to extinction risk are examined. It also reviews the endangered species of primates; case histories of conservation programs; and management practices in Asia, Africa, South America and Madagascar. Prerequisite: Anthro 150 or Biol 2970, or permission of instructor. Credit 3 units. A&S IQ: SSC Art: SSC BU: SCI

L48 Anthro 3665 Observing Animal Behavior at the Saint Louis Zoo
This course is an introduction to methods for the collection of behavioral data in studies of animal behavior. Students are trained in the design of research projects and the analysis and interpretation of behavioral data. Students learn how different methods are used to answer specific questions in animal behavior research. Research is conducted at the Saint Louis Zoo. Credit 3 units. Art: NSM

L48 Anthro 3666 Comparative Primate Socioecology
This course focuses on the interface between the behavior and ecology of nonhuman primates and its applications to primate conservation. We examine how the basic principles of animal ecology can help us understand primate behavior. We look at a wide range of primates from a comparative perspective as we explore primate habitats, diets, life histories and communities, social relationships, and much more. Because most primate...
species are threatened, endangered or even facing extinction, we also focus on how various aspects of ecology are used in the conservation of primates. We draw heavily on field studies and particular research projects of primates and emphasize their behavior in natural environmental and social settings. The objectives of the course are: 1) to gain an understanding of principles of animal behavior by using primates as a model, 2) to understand variation in behavior and how ecology influences this variation in living primates, 3) to use the comparative approach to better understand why primate societies differ, and 4) to understand how we address and answer questions about primate behavior through field research
Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 367 Paleoanthropology
The prehistoric Pliocene and Pleistocene evidence for human emergence and evolution. The emphasis is on the human fossil record and its interpretation in functional and behavioral terms. This is placed in the context of the Paleolithic archaeological record and issues regarding the biological relationships between various human groups. Prerequisite: Anthro 150 or equivalent.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L48 Anthro 3693 Anthropology of Death, Mourning and Burial
This course offers anthropological analysis of death, mourning and burial. It draws on data and theoretical explanations from different sub-disciplines of anthropology (archaeology, cultural anthropology and physical anthropology). In addition to theoretical and case study practices, specific case studies are used to address a wide range of topics. The course covers cross-cultural comparison of burial among hunter-gatherers, pastoralists and complex societies. Mortuary practices also is conceptualized based on religion and secularity, social organization and biological approaches (e.g. paleo diet, paleodemography, disease). Ethical and legal issues of using human remains worldwide also are addressed. This course helps train and stimulate academic enquiry into ancient and modern societal treatment of death around the globe. The time covered in this course ranges from the Lower Paleolithic to the contemporary world.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L48 Anthro 373 Introduction to GIS for Anthropologists
The use of GIS is rapidly becoming standard practice in anthropological research. This course will introduce students to the basic theories and techniques of GIS. Topics will include the application of GIS in archaeological surveys and ethnographic research as well as marketing, transportation, demographics, and urban and regional planning. This course will enable students to become familiar not only with GIS software such as ArcGIS but also with the methodologies and tools used to collect and analyze spatial data. Students will gain expertise engaging with data situated across a number of spatial scales, from households, communities, and cities to landscapes, nation-states, and global phenomena.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 374 Social Landscapes in Global View
From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as “landscapes.” This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We cover various urban landscapes, rural landscapes, nomadic landscapes (and others), and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 BCE to 2009 CE and we cover all the continents. This course also traces the intellectual history of the study of landscape as a social phenomenon, and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world, and trace the global currents of your social landscape.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: BA EN: S UColl: CD

L48 Anthro 376 Warriors, Merchants, Monks and Courtesans: Ancient Narratives of Globalization in Google Earth
This introductory seminar-style course examines the history of globalization through the narrative accounts of those who lived along some of the great trade routes of the Old World. Through a combination of in-class discussion and hands-on tutorials and projects in Google Earth, we examine how day-to-day local interactions and the experiences of individuals contributed to broader cultural exchanges and the shaping of ancient cosmopolitan centers. We use a bottom-up approach to understand the process of globalization, and why it is not only a phenomenon of the modern world. This course covers a large geographic and temporal span, but it is not about memorizing lists of dates and places or putting dots on a map — it is about learning how to interpret multiple strands of knowledge and put them together into a cohesive narrative of history. The course covers four broad anthropological themes related to Old World history and globalization in conjunction with weekly lessons in Google Earth; there are no prerequisites for either. The knowledge and skills gained in the course lead to a final independent research project consisting of a short paper and an interactive digital map that can be shared online through the Google Earth community.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L48 Anthro 3773 Culture and Society in East Asia
This course presents an overview of cultures and contemporary social/political changes in East Asia. In Western society, East Asia often has been viewed as a place of enduring cultural identities, but it also has been a region of one of the world’s most dynamic and rapid transformations. In this course, we examine both the continuity and change of cultural and social patterns in this region. Students compare anthropological and ethnographic studies of the Peoples’ Republic of China, Taiwan, South Korea and Japan, supplemented by selected research from sociology, history and political science. The course focuses on specific areas of cultural and social change in each society, including kinship and family; gender; ethnicity; economic and political development; and health and social policy.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
L48 Anthro 3775 Ancient Eurasia and the New Silk Roads
This course explores the rise of civilization in the broad region of Eurasia, spanning from the eastern edges of Europe to the western edges of China. The focus of the course is the unique trajectory of civilization that is made evident in the region of Central Eurasia from roughly 6000 BC to the historical era (ca. AD 250). In addition to this ancient focus, the course aims to relate many of the most historically durable characteristics of the region to contemporary developments of the past two or three centuries. Fundamentally, this course asks us to reconceptualize the notion of “civilization” from the perspective of societies whose dominant forms of organization defied typical classifications such as “states” and “empires” and, instead, shaped a wholly different social order over the past 5,000 years or more. This class provides a well-rounded experience of the geography, social organization and social interconnections of one of the most essential and pivotal regions in world history and contemporary political discourse.
Credit 3 units. A&S IQ: LCD, SSC, SD Arch: SSC Art: SSC BU: IS EN: S

L48 Anthro 380 Applications in GIS
This introductory course in Geographic Information Systems (GIS) is designed to provide basic knowledge of GIS theory and applications using the existing state-of-the-art GIS software. The course is taught using a combination of lectures, demonstrations and hands-on, interactive tutorials in the classroom. The first weeks of the course provide a broad view of how you can display and query spatial data and produce map products. The remainder of the course focus on applying spatial analytical tools to address questions and solve problems. As the semester develops, more tools are added to your GIS toolbox so that you can complete a final independent project that integrates material learned during the course. Students are encouraged to design individualized final projects using their own or other available data; however, some already prepared final projects also are available.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L48 Anthro 3832 Music and Healing
In this course, we broadly consider issues of music and healing, drawing from the fields of medical ethnomusicology, medical anthropology, music therapy, and psychology. Our case studies are multi-sited, as we interrogate musical healings and healing music from diverse global and historical perspectives. We approach our study of musical practices with the understanding that the social, cultural and political contexts where “music” and “healing” are themselves created inform the sounds of the music and its various — and often conflicting — interpretations and meanings. We read a variety of academic literature and use media texts and listening examples to develop interdisciplinary and cross-cultural analyses of music and healing. Issues of national consciousness, post-colonialism, gender, sexuality, race, ethnicity, class, religion, dis/ability and the role of history/memory remain central to our explorations of music and healing.
Same as L27 Music 3031
Credit 3 units. A&S IQ: LCD Arch: HUM Art: HUM BU: BA EN: H

L48 Anthro 3833 Performance and Healing: The Politics of Health Representation
The purpose of this course is to bridge the disciplines of medical anthropology, global public health, and medical humanities through deep consideration of how variegated knowledge about health, healing and illness is produced and performed in a variety of public forums. Students explore the ways in which knowledge is produced about particular global health topics through representation in text, image, sound, film/television, and live performance art. Using interdisciplinary theory and methods, this course answers the following questions: Why are these representation modalities important, and how do we analyze them in practice? Drawing on the fields of medical anthropology, media studies, global public health, and the various strands of philosophy and social thought running back centuries, this course elucidates the relationships between knowledge production, representation, discourse, health and power through three case studies. Case study topics include: HIV/AIDS, Heroin Injection Use, and Domestic and Sexual Violence. Although the course provides an interdisciplinary perspective for understanding and analyzing different ways of representing illness and healing, it is also deeply grounded within the political-economy of health framework of critical medical anthropology. The following topics are central to our analyses in this class: gender, sexuality, the body, class, ethnicity and language.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 3851 History and Theory of Anthropology
This course explores the history of anthropology and the major theoretical frameworks of the field to the present. Key theorists discussed in this class include Geertz, Foucault, Marx, Mead and Weber, as well as the deep roots of anthropology in strands of philosophy and social thought running back centuries. Ethnographic case studies from around the world are read in order to keep the theories palpable and grounded. Key themes discussed in the class include the concept of culture, how and why societies change, the ways that meanings and identities are made, the role of history in the present, diverse forms of power and experience, and issues of diversity amid contemporary global life.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 387 Medical Anthropology
The comparative study of non-Western medical systems. The definitions of health and disease, the kinds of treatment and varieties of practitioners in other cultures, e.g., Navaho, India, China.
Credit 3 units. Art: SSC BU: IS

L48 Anthro 3874 International Public Health
This course explores current topics in international public health using a case-study–based approach, emphasizing public health issues affecting low- and middle-income countries; introduction to the tools and methods of international public health research and programs; in-depth examination and critique of the roles of local and national governments, international agencies and third-party donors in international public health work; and the contributions of anthropology to the international public health agenda.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: BA EN: S

L48 Anthro 3875 Pharmaceutical Personhood
This course examines sociocultural dimensions of pharmaceutical production and consumption in the contemporary world. Pharmaceuticals have brought remarkable promises. Their consumption also reflects various social inequalities and substantial transformations in human experience that demand critical attention. We examine the history and global reach of the pharmaceutical industry, the content of pharmaceutical advertising, and pharmaceutical use in the
treatment of various kinds of illness, including common mental disorders, post-traumatic experience, chronic illness, eating disorders and lifestyle disorders. Case studies are drawn from diverse societies. We also explore various angles of public criticism about the pharmaceutical industry. No background in anthropology is required.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: ETH EN: S

L48 Anthro 3876 Darwin and Doctors: Evolutionary Medicine and Health
Back pain, diabetes, obesity, colds, even morning sickness. These are all common human health problems. But have you ever wondered why we have these and other health conditions? In this class, we will investigate this question - and others - specifically using evolutionary theory to inform current understandings of contemporary health problems.

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L48 Anthro 3882 Psychological Anthropology
The objective of this course is to introduce students to the central topics and methods of psychological anthropology. Psychological anthropology is concerned with the interplay of psychology and culture on both the individual and group levels. We look cross-culturally at such topics as child and adolescent development; religious experience; illness and healing; self and identity, gender and sexuality; reasoning and symbolism; and psychopathology. This class draws upon a range of sources, including ethnographies, psychoanalytic theory, contemporary critical theory and cross-cultural materials.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 3884 Regulating Reproduction: Morality, Politics and (In)justice
This course centers on the burgeoning corpus of anthropological scholarship on reproduction, with special attention to the regulation of reproductive behaviors and population management in cross-cultural perspective. Anthropologists and feminist scholars have shown how reproduction — which links individual bodies to the body politic — is a privileged site for processes of governance. Scholars have also shown how seemingly personal reproductive choices made in the micro units of families are always bound up with broader, if obscured, economic, national and political projects. In this course, we will cover how diverse entities, including the state, the Church, NGOs and feminist groups, seek to manage reproductive behaviors and politics across the world. We will discuss population control campaigns (such as China's notorious one-child policy) and pronatalist population policies (like those seen in Israel) in order to underscore how the management of fertility becomes a crucial site for nationalist and state-building projects. In this course we examine processes of "reproductive governance" around topics including pregnancy and birth, family planning, abortion and adoption. We also examine how the global proliferation of Assisted Reproductive Technologies (such as in vitro, sonogram, abortifacient pills, amniocentesis) intersects with efforts to govern reproduction. Crucially, we take class and race as key axes through which reproduction is experienced and stratified in diverse contexts. At the end of this course students should have a solid grasp of key topics and themes in the anthropology of reproductive governance, as well as more in-depth knowledge of a particular controversial reproductive issue that they choose to focus on for their final research paper.

Credit 3 units. A&S IQ: SSC, SC, SD EN: S

L48 Anthro 3900 Intermediate Directed Research
This course level is typically taken by juniors or seniors during their first semester in the lab, or by advanced freshmen and sophomores. The expectations of a 300-level directed research project will be greater than those of a 200-level directed research. Student participation in research activities should include higher-level participation, including completing literature reviews, running complex assays, or similar work. The student is expected to be proficient in the appropriate research techniques of a lab, familiar with relevant literatures surrounding the project, and capable of working with minimal supervision. There should be some form of final evaluation or project, but an independent research project is not necessary. May be taken for 1-3 credit hours, 1-2 recommended. Students must enroll in a specific section with a faculty member and receive approval from the department.

Credit variable, maximum 3 units.

L48 Anthro 397 Proseminar: Issues and Research in Anthropology
Designed to introduce the student to current issues in Anthropology and to research being carried out by faculty. Topics vary each year. Each departmental member addresses issues in their particular specialty. Required of all majors; may be taken before declaring major, and may be taken by nonmajors.

Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC BU: SCI

L48 Anthro 399 Undergraduate Teaching Assistant
Open to advanced undergraduates only. Usual duties of teaching assistant in laboratory or other selected courses. Prerequisite: permission of instructor.

Credit 3 units.

L48 Anthro 3999 Class Mentor
Classroom instructional assistance through mentoring activities assigned by instructor. Limited to advanced undergraduates only. Permission of instructor required.

Credit variable, maximum 3 units.

L48 Anthro 4002 Internship in Interrogating Health, Race and Inequalities
Internship in Interrogating Health, Race and Inequalities is intended for advanced undergraduates who are enrolled in the course Anthro 4003 (Interrogating Health, Race and Inequalities) and who have previous course work in (medical) anthropology, public health, urban policy, or African and African-American Studies. The internship experience is designed to facilitate students' familiarity with research and evaluation strategies that both address structural factors shaping health outcomes and are sensitive to community needs and sociocultural contexts. The internship experience contributes to students' in-class understanding of the ways that race as a historically produced social construct interacts with other axes of diversity and social determinants to produce particular health outcomes. Prerequisite: permission of the instructor. Corequisite: Anthro 4003.

Same as I50 INTER D 4002

Credit 1 unit.
L48 Anthro 4003 Interrogating Health, Race and Inequalities: Public Health, Medical Anthropology and History
Interrogating Health, Race and Inequalities is intended for graduate students in the School of Social Work and in Arts & Sciences as well as advanced undergraduates in Arts & Sciences who have previous course work in medical anthropology, public health or urban policy. The fundamental goal of the course is to demonstrate that health is not merely a medical or biological phenomenon but more importantly the product of social, economic, political and environmental factors. To meet this goal the course is designed to examine the intersection of race/ethnicity and health from multiple analytic approaches and methodologies. Course readings draw from the fields of public health, anthropology, history and policy analysis. Teaching activities include lectures, group projects and presentations, videos, and discussions led by the course instructors. These in-class activities are supplemented with field trips and field-based projects. By the end of the course students are expected to have a strong understanding of race as a historically produced social construct as well as how race interacts with other axes of diversity and social determinants to produce particular health outcomes. Students gain an understanding of the health disparity literature and a solid understanding of multiple and intersecting causes of these disparities.
Same as I50 INTER D 4001
Credit 3 units.

L48 Anthro 401 Evolution of Nonhuman Primates
Discussion and analysis of primate evolution with emphasis on comparative and functional anatomy and primate paleontology. Prerequisite: permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM

L48 Anthro 4011 Popular Culture and Consumption in Modern China
This writing-intensive seminar explores transformations in popular culture and everyday life in Chinese society since 1949 through an analytical focus on political economy and material culture. Drawing upon ethnographic texts, films and material artifacts, we investigate how the forces of state control and global capitalism converge to shape consumer desires and everyday habits in contemporary China. Case studies include eating habits, fashion standards, housing trends, entertainment, sports and counterfeit goods. Prerequisite: previous course in China studies (anthropology, economics, history, literature, philosophy or political science) required. Enrollment by instructor approval only.
Credit 3 units. A&S IQ: LCD, SSC, WI Arch: SSC Art: SSC EN: S

L48 Anthro 4022 Transnational Reproductive Health Issues: Meanings, Technologies, Practices
This course covers recent scholarship on gender and reproductive health, including such issues as reproduction and the disciplinary power of the state, contested reproductive relations within families and communities, and the implications of global flows of biotechnology, population and information for reproductive strategies at the local level. We also explore how transnational migration and globalization have shaped reproductive health, the diverse meanings associated with reproductive processes, and decisions concerning reproduction. Reproduction serves as a focus to illuminate the cultural politics of gender, power and sexuality.
L48 Anthro 406 Primate Ecology and Social Structure
Survey of the ecology and individual and social behavior, adaptations and interactions of the major groups of primates. Emphasis on studies designed to examine the relationships among ecology, morphophysiology and behavior. Methods used in collecting data on primates in the field. Prerequisite: Anthro 150A or one 100-level biology course.
Credit 3 units. A&S IQ: NSM Art: NSM

L48 Anthro 4062 The Art of Borrowing: The "West" in Japanese Life
This course aims to examine Western influences in Japan and Japan's reconceptualizing the "West" in various aspects of popular culture, including cuisine, sports, music, language, advertising, entertainment and domesticity. It is primarily an anthropological survey with historical references on Japan's turn to Western civilization in the modern era. The course explores Japanese perceptions of the "West," and how Japanese consume the "West" by attaching meanings to "Western" symbols and practices, and making them part of Japanese culture and life. Rather than explicating Japan's relationship with the West, the course scrutinizes the "West" constructed within Japanese discourse, as both a racial/ethnic other and a cultural fantasy. Course assignments include a round table discussion on specific topics relating to cultural integration and internationalization, and globalization and localization. Same as L97 IAS 4062
Credit 3 units. A&S IQ: HUM, LCD EN: H

L48 Anthro 4082 Origin of Evolutionary Thought
This course provides an in-depth introduction to classic works in evolutionary biology and evolutionary anthropology. Students will read primary as well as secondary sources and be expected to discuss those materials each week in class. Students should expect a very heavy reading load, and should plan on reading the assignments throughout the week.
Credit 3 units. A&S IQ: NSM

L48 Anthro 4091 Sexuality, Gender and Change in Africa
This course considers histories and social constructions of gender and sexuality in sub-Saharan Africa during the colonial and contemporary periods. We will examine gender and sexuality both as sets of identities and practices and as part of wider questions of work, domesticity, social control, resistance, and meaning. Course materials include ethnographic and historical materials and African novels and films. Prerequisite: graduate students or undergraduates with previous AFAS or upper-level anthropology course.
Same as L90 AFAS 409
Credit 3 units. A&S IQ: SSC, SC, SD, WI Arch: SSC Art: SSC EN: S

L48 Anthro 4100 Topics in Anthropology: Debating Anthropology: Controversies and Consensus in Biological Anthropology
There are many topics in biological anthropology at the cutting edge of our knowledge that remain contentious. Such controversies often offer some of the most exciting avenues of current research and thought in biological anthropology. This class aims to address such controversies by debating opposing views and attempting to find a consensus. Topics will be introduced in lecture form by the professor giving a background to the controversy and presenting foundational data. Students will then engage in the subject by reading primary literature, debating the merits of opposing views, and attempting to reach a consensus. Topics will encompass multiple areas of biological anthropology, including paleoanthropology, primatology, human biology, and behavioral ecology.
Credit 3 units. A&S IQ: LCD SSC EN: S

L48 Anthro 4102 Latin America and the Rise of the Global South
The rise of the global south — and the reordering of global geopolitics, economics and cultural imaginaries — is characterized by progressive change and intense conflict. Economic growth coincides with the impacts of global warming, the assault on natural resources, the rise of new consumers and the entrenchment of deep inequalities. We also see the emergence of cultural and political formations that range from the horrific to the inspiring. Latin America is a central node of the new global south. Here history takes unpredictable turns in the face of declining U.S. hegemony, the economic growth of Brazil, legacies of militarism and political violence, a feverish attack on nature, resurgent economic nationalism, and defiant "anti-globalization" movements. Through close reading of contemporary ethnographies of Latin America we explore emergent cultural and political-economic processes in the region; we consider south-south articulations (theoretical, cultural, political-economic) between Latin America, China, Africa and India; and we reflect on the changing role, meaning and relationships of the United States in the region.
Credit 3 units. A&S IQ: LCD SSC Art: SSC EN: S

L48 Anthro 4104 Topics in Anthropology: Archaeology of Sex and Gender
Archaeology is uniquely situated for providing a broad, holistic perspective on issues of sex, gender, orientation, identity, and representation. Consistent with the multivocal orientation of modern anthropological and archaeological practice, gender studies in archaeology originate from a variety of theoretical perspectives and research goals. This course will introduce students to this broad literature and situate the development of an "archaeology of gender" both theoretically and historically. This course is about drawing on traditionally underrepresented perspectives in the interpretation of the archaeological record and investigating the lives and histories of groups and individuals not often considered to be central to our understanding of the past.
Credit 3 units. A&S IQ: SSC BU: BA EN: S

L48 Anthro 4112 Body and Flesh: Theorizing Embodiment
This seminar explores a wide range of readings on "the body" as a site of theoretical analysis in social scientific and humanistic inquiry. Issues include: How do we think about the body as simultaneously material (flesh and bone) and constructed in and through social and political discourse? How do we think about the relationship between these contingent bodies and subjective experiences of "self" in various contexts? The course focuses upon the different ways in which these questions have been posed and engaged, and the implications of these formulations for the theorizing of human experience. Prerequisite: Anthro 3201 or permission of instructor.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4113 Advanced Psychological Anthropology
This seminar examines the intersection of psychological and anthropological theories and methods and their utility in the study
of culture and human experience. This course is an in-depth exploration of some of the key theorists and theoretical domains that have defined the field of psychological anthropology and beyond, including Bakhtin, Bateson, Chodorow, D’Andrade, Ewing, Freud, Goffman, Hallowell, Holland, Irigaray, Kleinman, Kohut, Lacan, Lutz, Rosaldo, Strauss, Sapir, Schepker-Hughes and Vygotsky, among others. By the end of the course, students have a solid grounding in linguistic, psychoanalytic, cognitive, symbolic, developmental, interactionist and critical approaches within psychological anthropology. Prerequisites: at least one of the following: Anthro 3201, Anthro 3882, graduate standing or permission of instructor. Credit 3 units. A&S IQ: SSC Art; SSC EN: S

L48 Anthro 4114 Anthropology and Existentialism
This course examines what it means to be human. Drawing on existentialist philosophy and ethnography, this course is about appreciating the richness, the deep emotional tone, and also the dangers of human experience. Case studies look at profound aspects of existence, such as suffering, healing, mercy and hope, across diverse cultures. Specific themes covered include the ordinary life, how we perceive the world around us, the feeling of being at home and senses of place, how we experience pain, what makes our bodies powerful or vulnerable, why things really matter, and how communities cope with trauma and violence. This course is especially relevant for students interested in medical anthropology and social dimensions of health and illness. No background in anthropology or philosophy is required. Credit 3 units. A&S IQ: LCD; SSC Art: SSC BU; ETH EN: S

L48 Anthro 4115 Anthropology of Deviance
This course provides an anthropological perspective on notions of "deviance" as social, psychological, moral and medical mechanisms of control and regulation. Students learn to critically engage and evaluate dominant etiological theories of deviance, local and global contexts of deviance, and social responses to deviance as cultural processes through which communities make (and unmake) meaningful human relationships. Through academic texts, ethnographic accounts, clinical case materials and firsthand accounts, students explore multiple dimensions of what it means to be "deviant" or "normal" in a given social or cultural context. Sample topics include: historical trajectories of deviance, deviance and criminology, social class and inequality, prison cultures, deviance and resistance, deviant personalities, forensic psychiatry, deviant vs. socially sanctioned violence, and stigma. Credit 3 units. A&S IQ: SSC, SC, SD Arch; SSC Art; SSC EN: S

L48 Anthro 4116 Anthropology and Experiment
In recent years, many cultural anthropologists have described their work as "experimental." On the surface, the notion of experimentation leads something of a double life. On the one hand, in its ideal form, it stands for rigidly held methodological tenets aimed at answering questions in rigorous ways. This kind of experiments is the hallmark of "scientific" inquiry. On the other hand, experimentation implies something of open-endedness, of tentative and flexible exploration. Through an examination of works on experiments, as well as purportedly experimental ethnographies, we pursue the question: What is an experimental mode of inquiry in cultural anthropology, and how does it square with the two idealized meanings of experimentation? We examine the links and resonances between different notions of what experiments do, what they describe in terms of both form and method, how they begin and end, how they are assessed as successes or failures, and what sort of knowledge they produce. This course involves reading across cultural anthropology, science studies and the philosophy of science to better understand different approaches to experiments across domains of research and writing. Can we learn something about what anthropologists do in experimental works from the wealth of thoughtful scholarship on experiments in other fields? Is there something common to experimentation in cultural anthropology and experimentation elsewhere in the social sciences and beyond? Credit 3 units. A&S IQ: SSC Art; SSC EN: S

L48 Anthro 4117 Nature/Culture
What do we mean by "nature" or by designating something as "natural"? How do we distinguish nature from culture and where does such a distinction break down, become political or controversial? Is the distinction between nature and culture itself universal, or does it emerge from a particular history and reflect particular preconceptions and understandings? And how do new technologies reconfigure this distinction? In this course, we explore such questions, paying special attention to the ways anthropology, as a discipline, has relied on, reinforced, and legitimated this great divide. Credit 3 units. A&S IQ: SSC Arch; SSC Art; SSC EN: S

L48 Anthro 4118 The Good Cause: Psychological Anthropology of Moral Crusades
Why do people join moral crusades? These are social movements based on powerful moral institutions, ranging from the abolitionist and suffragette movements to witch hunts, insurgency and ethnic riots. Such movements are extremely diverse, yet their unfolding and the dynamics of recruitment show remarkably common properties. We will examine a series of empirical cases, including recent events, and assess the relevance of models based on individual psychological dynamics, intuitive moral capacities, and human motivation for participation in collective action. Credit 3 units. A&S IQ: LCD; SSC Arch; SSC Art; SSC EN: S

L48 Anthro 411W Anthropology and Existentialism — Writing-Intensive Seminar
This course examines what it means to be human. Drawing on existentialist philosophy and ethnography, this course is about appreciating the richness, the deep emotional tone, and also the dangers of human experience. Case studies look at profound aspects of existence, such as suffering, healing, mercy and hope, across diverse cultures. Specific themes covered include the ordinary life, how we perceive the world around us, the feeling of being at home and senses of place, how we experience pain, what makes our bodies powerful or vulnerable, why things really matter, and how communities cope with trauma and violence. This course is especially relevant for students interested in medical anthropology and social dimensions of health and illness. No background in anthropology or philosophy is required. This is the writing-intensive version of Anthro 4114. Credit 3 units. Art: SSC EN: S

L48 Anthro 4123 Argumentation Through Ethnography
Ethnography is the traditional mainstay of anthropological academic writing. Through ethnography, anthropologists do more than simply describe a culture or a group of people; rather, they organize and present their field materials in particular ways in order to make intellectual, theoretical, and sometimes even
political arguments. This seminar will explore the different ways anthropologists have used ethnography to make intellectual claims and frame theoretical or practical arguments. The aim of the course is to help students develop critical reading skills for engaging ethnographic materials as well as to explore the ways in which ethnography, when done well, can be a persuasive and engaging means of academic argumentation. This course is intended as a sequel to Anthro 472. Prerequisite: Anthro 472 or permission of instructor.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4124 Language and Politics
Language is a constitutive part of political processes. While many agree that language is used to symbolize or express political action, the main focus of this course is on how linguistic practice and ideology contribute to the creation of political stances, events and spheres. Topics addressed include political rhetoric and ritual, the emergence of public spheres, discrimination, as well as ethnic conflict, nationalism and colonialism.

Credit 3 units. A&S IQ: SSC, SD Art: SSC EN: S

L48 Anthro 4134 The AIDS Epidemic: Inequalities, Ethnography, and Ethics
In the year 2000, HIV became the world's leading infectious cause of adult death, and in the next ten years, AIDS will kill more people than all wars of the 20th century combined. As the global epidemic rages on, our greatest enemy in combating HIV/AIDS is not knowledge or resources, but global inequalities and the conceptual frameworks with which we understand health, human interaction, and sexuality. This course emphasizes the ethnographic approach for cultural analysis of responses to HIV/AIDS. Students will explore the relationship between local communities and wider historical and economic processes, and theoretical approaches to disease, the body, ethnicity/race, gender, sexuality, risk, addiction, power, and culture. Other topics covered include the cultural construction of AIDS and risk, government responses to HIV/AIDS, origin and transmission debates, ethics and responsibilities, drug testing and marketing, the making of the AIDS industry and "risk" categories, prevention and education strategies, interaction between biomedicine and alternative healing systems, and medical advances and hopes.

Credit 3 units. A&S IQ: LCD, SSC, SC, SD Art: SSC BU: IS EN: S

L48 Anthro 4135 Tobacco: History, Culture, Science, and Policy
Tobacco is the most important public health and medical problem of our time, the leading cause of cancer and other chronic diseases. This course examines tobacco's important role in shaping the modern world and global health over the course of the last five centuries, from indigenous uses of tobacco to plantation slavery to the cigarette boom to the politics of health and smoking in the 21st century. Through in-depth historical and anthropological case studies, tobacco provides a window into trends in government and law, medicine and public health, business and economics, society and culture, including changing social meanings of gender, race, class, sexuality, advertising, consumerism, risk, responsibility and health in the United States and worldwide. This course also introduces students to public health approaches to noncommunicable disease prevention, environmental health, and healthy lifestyle promotion. No background in anthropology or public health is required.

Credit 3 units. A&S IQ: SSC Art: SSC BU: ETH EN: S

L48 Anthro 4136 Sexual Health and the City: A Community-Based Learning Course
In this community-based learning course, students partner with a St. Louis AIDS service organization (ASO) or sexual health agency to explore how the interrelationships among gender, class, race/ethnicity and sexual identity shape sexual health decisions, outcomes and access to services. Students also examine the complex relationship between men's and women's life goals and constraints, on the one hand, and the public health management of sexual health, on the other. In collaboration with their community partner and its clients, students develop a project that addresses an identified need of the organization and the community it serves. Course readings draw from the fields of anthropology, public health, feminist studies and policy making. Prerequisite: PHealth 4134 The AIDS Epidemic: Inequalities, Ethnography and Ethics or permission from the instructor, which is determined based on past student's experience in the fields of medical anthropology or sexual/reproductive health.

Same as L90 AFAS 406

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: CPSC, SSC EN: S

L48 Anthro 41491 Primate Cognition
This course investigates historical and current views regarding the cognitive capacities of nonhuman primates, and the extent to which these abilities are shared with humans. Topics for this class include: social cognition, problem-solving, tool use, culture, communication, theory of mind, deception, self-recognition, imitation and numerical cognition. The classes involve discussion and critical evaluation of theory and methods in this challenging and exciting area of primate cognitive research.

Credit 3 units. A&S IQ: NSM Art: NSM BU: BA

L48 Anthro 4194 Primate Ecoimmunology
The ability of an organism to defend itself against infection by viruses, bacteria, and parasites is critical to organismal survival and fitness. The response of the host immune system is vital in this defense, and like any phenotype, we observe variation in immune function between individuals, populations and species. The field of ecoimmunology seeks to characterize and explain how the environment of the organism contributes to this observed variability in the host immune response. In this class, we will examine the evolution and function of the primate immune system, primarily in non-human primates, within the context of the extensive social and ecological variability in the primate order. We will take a broad and integrative approach, synthesizing material from diverse fields including immunology, ecology, physiology, behavior and genetics. Prerequisites: Anthro 150A or Biol 112.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L48 Anthro 4202 Anthropological Genetics
This course examines the principles of evolutionary genetics as applied to complex characters such as morphology, behavior, life history and disease. Mathematical models of quantitative
inheritance and evolution are discussed. Special topics include
In a selection, sexual dimorphism and conservation genetics.
Prerequisite: Anthro 150A or introductory biology.

L48 Anthro 4211 Paleoenthobotany and Ethnobotany
Interrelationships between plants and people, especially in
past societies. Recovery and analysis of plant remains from
archaeological sites; interpreting subsistence and vegetation
changes; medicinal, ritual, and technological uses of plants; plant
domestication and agricultural intensification. Modern efforts to
understand and preserve threatened traditional ethnobotanical
practices. Prerequisite: Anthro 190BP or an introductory botany
course, or permission of instructor.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L48 Anthro 4212 Advanced Methods in Paleoenthobotany
Advanced analytical techniques for the study of archaeological
plant remains. Tools and methods for micromorphological
recognition, including electron microscopy. Photomicroscopy at
low magnification, management, tabulation and reporting of data.
Prerequisite: Anthro 4211 or permission of instructor.
Credit 3 units. A&S IQ: SSC Art: SSC

L48 Anthro 4214 The Archaeology of Food and Drink
Studies of past human diets have moved beyond analyses
of animal bones and seeds to encompass new theoretical
goals and innovative analytical techniques. In this seminar-
tyle course, students explore methods of understanding food-
related social interactions such as evidence including residues,
ancient DNA, isotopes and trace elements, along with more
traditional artifacts and archaeobotanical and zooarchaeological
remains. By examining case studies from around the world, we
evaluate the current state of research attempting to integrate the
biological and cultural aspects of eating and drinking.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L48 Anthro 4215 Anthropology of Food
The rising interest in food research crosses various academic
disciplines. This seminar focuses on aspects of food of particular
interest in anthropology. The first two-thirds of the course is
reading-intensive and discussion-intensive. Each student writes
short review/response papers for major readings. For the final
third, we still are reading and discussing, but the reading load is
lighter (and we have a field trip) as students devote more time to
their research papers. The research paper is a major effort on a
topic discussed with and approved by the professor. In most
cases it has to deal with cultural and historical aspects of a food,
set of foods, form of consumption or aspect of food production.
Papers are critiqued, assigned a provisional grade, revised and
resubmitted.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L48 Anthro 4240 The Plundered Past: Archaeology’s
Challenges in the Modern World
The public imagination thrills at the fantastic adventures of
Indiana Jones and Laura Croft, Tomb Raider, but the reality of
modern archaeology is more complex, ethically challenging and
interesting than a simple treasure hunt. In the United States and
Canada, our science museums and museums of anthropology
still display artifacts that are regarded as sacred and culturally
definitive by Indian nations, although such holdings are now
subject to negotiation and repatriation. Art museums in Europe
and the U.S. still are stocked with looted ancient masterpieces
that are revered as vital heritage by the nations from which they
were stolen. We display looted art alongside a much smaller
number of legitimately excavated artifacts of masterpiece quality,
so it is no surprise that our popular images of archaeologists as
avid and undiscerning collectors raise little concern. But modern
archaeologists are not extractors of art or even of scientific
information, from places as passive and inert as the museums’
objects ultimately occupy. Archaeologists work with living people
inhaling societies and states that care deeply about their pasts
and the relics of it. They are active agents engaged with many
other people in the production of knowledge about the past. In
our rapidly shrinking world, educated sensitivity to the many
ancient cultural legacies that shape the values of modern global
society is more than a moral imperative; it is a basic form of
collaboration in the common project of survival. Archaeologists
are ethically charged to advance that project through education
about the complex contemporary arena of artifacts, sites and
information they occupy.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L48 Anthro 4253 Researching Fertility, Mortality and
Migration
Students undertake research projects centering on the most
fundamental demographic processes — fertility, mortality
and migration. The first section covers basic demographic
methodology so that students understand how population data
is generated and demographic statistics analyzed. Then, course
readings include seminal theoretical insights by anthropologists
on demographic processes. Meanwhile, students work toward
the completion of a term paper in which they are expected to
undertake some original research on a topic of their choice (e.g.,
new reproductive technologies; cross-cultural adoption: ethnicity
and migration). Each assignment in this course is a component
of the final term paper. Prerequisite: Anthro 3612 Population
and Society or permission of instructor.
Credit 3 units. A&S IQ: LCD, SSC WI Art: SSC EN: S

L48 Anthro 4254 The Anthropology of Maternal Death
No other commonly recorded health indicator shows such great
disparities between rich and poor nations as does maternal
mortality. More than 500,000 women die each year around
the world from complications of pregnancy and childbirth,
but 99 percent of these deaths occur in impoverished,
non-industrialized countries. This course examines the reasons
for this stunning discrepancy, looking at the biological, social,
political and economic factors involved in maternal death. The
course is conducted as a seminar based on detailed readings
of relevant journal articles, group discussion, class studies
and class presentations. Prerequisite: Anthro 3621.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4264 The Myth of Race
This course describes the history of the myth of race and racism
from the Spanish Inquisition to modern times. Since race is not
a biological term but a cultural term, it is important for students
to understand the origins and connections of ideas of race and
racism from its beginnings in western thought to its current
usage. The historical and literature connections can be seen
throughout the writings and behavior of the Spanish Inquisition,
to the Renaissance, though colonization and slavery, to the
reconstruction, to the late 19th century, to the early 20th century,
to modern times. In fact, the early history of anthropology can be
traced through racist history.
Credit 3 units. A&S IQ: SSC, SD EN: S

L48 Anthro 427 Social and Cultural Change
Analysis of political, economic, and social transformations among societies in the developing and developed world. Examples are drawn from many societies throughout the globe. Credit 3 units. A&S IQ: LCD, SSC, SC, SD BU: IS EN: S

Credit 3 units.

L48 Anthro 4280 Tourism & Sustainability
This course offers an introduction to the political, cultural, and environmental effects of global tourism with an emphasis on problematic travel trends (e.g., ecotourism) and sustainable development discourse. Topics include the history of tourism, tourism studies, critiques of authenticity and aesthetics, virtualism, political economy, island studies, political ecology, and critical social theory. Each student prepares a research paper or podcast on a tourism case study. Readings offer anthropological perspectives on the history of tourism; cultures of consumption; problems of authenticity and aesthetics; political economy and ecology; and the challenge of achieving "sustainable" tourism development across diverse natural environments. We will explore tourism as both a cause and effect of globalization (and "localization" movements) by tracking the consumer habits of emerging tourist markets, and we will cover ethnographic readings on "ecotourism" and the role that nostalgia plays in influencing domestic and international travel patterns. We will further consider tourism with regard to the production and consumption of "tradition," and we will tackle ethically problematic tourist sites. Credit 3 units. BU: BA, ETH, IS

Credit 3 units.

L48 Anthro 4282 Political Ecology
An exploration of how the interactions between culture and environment are mediated by local, national and global politics. Topics include "overpopulation," agricultural intensification, Green Revolution, biotechnology, corporate agriculture, green movements and organic farming. Each student prepares an in-depth research paper that may be presented to the class. Prerequisites: graduate standing, Anthro 361 or permission of instructor. Credit 3 units. A&S IQ: SSC Art: SSC EN: S

Credit 3 units.

L48 Anthro 4286 Original Research in Environmental Anthropology
In this course, we will focus our ethnographic lens on environmental issues in St. Louis. Through readings and original research, this advanced course in anthropology closely engages discussion and debates about methods, ethics and representation in qualitative environmental studies. Students will identify and undertake qualitative, ethnographic research regarding a local environmental issue. The central goal of this class is to provide a forum for students to grapple with the practical and ethical considerations of anthropological research. The class will be segmented into the following three units: ethics in research, data gathering and analysis, and continuing conversations. Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: CPSC, SSC EN: S

Credit 3 units.

L48 Anthro 4287 Anthropology of Water
This course examines one of the world's largest risks and grandest challenges: water security. By exploring water flows between cultures and landscapes, students will think critically about the challenges faced in different regions and societies of the world which can exacerbate or ameliorate issues of social justice and equity. Topics include cultural notions and values of water, technologies of water purification and conservation, big dam controversies, water as a "right" or water as a "commodity," and how epistemologies of water can drastically impact people and ecosystems. Texts will mainly be anthropological but will also draw from history, political ecology, geography and development economics. These will underscore the importance of multiple contexts (social, religious, economic, political, cultural) to the understanding of the scale and scope of this major problem. Credit 3 units. A&S IQ: SSC Arch: SSC Art: HUM, SSC EN: S

Credit 3 units.

L48 Anthro 4288 Being Human: The Food-Energy-Ecosystem-Water Nexus
This course examines a trilogy of resources that are essential to producing human life: food, water and energy. These resources are inextricably linked not only to the most common and necessary of our day-to-day activities, but impact each other in profound ways. Until recently, the study of these resources was fragmented in separate sectors, ultimately leading to lack of institutional coordination, infrastructural lock-in and incomplete modeling systems. These incomplete systems overlook the complex overlaps of natural systems and render sustainability planning more tenuous than it could be. In response, these core resources are being studied together as a "nexus" to enhance synergies and prevent trade-offs across sectors. However, this nexus further requires astute attention to the all too "human" questions of resource use, waste and justice. If water, energy and food security are to be simultaneously achieved, social scientists must be at the forefront, contributing holistic research that brings the human back into socio-natural systems. Credit 3 units. A&S IQ: SSC Arch: SSP Art: SSP EN: S

Credit 3 units.

L48 Anthro 4311 Biocultural Perspectives on Obesity and Nutrition
From pink slime to red wine, causes and treatments for obesity are constantly in the headlines. With more than 35 percent of Americans currently obese, this is a tremendous biological and social issue in the United States. Obesity rates also are increasing globally despite billions of dollars spent on diets and public health interventions. Why is this happening and what can be done to change this? Why are humans fat and prone to obesity? How do we interpret appropriate body size? These are some of the questions we investigate in this class, specifically looking at the important physiological functions of adipose...
tissue and how both biological and cultural factors shape our perceptions of body image, health and the obesity epidemic. Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4321 History of Biological Anthropology
The history of biological anthropology is traced from Darwin's time to the present. Factors that influenced major theories and subfields of biological anthropology are discussed, along with current directions. Topics will include race, primate and fossil hominin tool use, adaptationism, evolution of the brain, and the human-chimp split, among other issues. Prerequisites: 6 units of coursework in Biological Anthropology or permission of instructor. Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 434 Behavioral Research at the Saint Louis Zoo
Students conduct research at the Saint Louis Zoo. Training in designing of projects and analysis and interpretation of data. May be repeated for credit. Prerequisite: permission of instructor. Credit variable, maximum 6 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: BA

L48 Anthro 4361 Culture, Power and the State
This seminar surveys anthropological theory and ethnography of the nation-state. We will discuss how culture and power are interrelated in the formation of state institutions and ideologies, governance and violence, social and spatial inequalities, and citizen identities, daily lives, and movements for change. We'll read key theoretical works (Weber, Marx, Foucault, Gramsci, liberal political theory, feminism, and post-structuralism, among others) and contemporary ethnographies of the state. Anthropology's place in public debates on "culture" and violent crises of the state — from Iraq to the U.S. homeland — will be addressed at the end of the semester. Credit 3 units. A&S IQ: SSC EN: S

L48 Anthro 4367 Culture, Power, Knowledge
We often think of knowledge as universal and objective. But anthropologists have long studied ways in which knowledge varies in different cultural settings. In this course, we ask: What is knowledge, how does it arise, and what does it do? Is there such a thing as universal validity or is knowledge always tied to specific cultural practices? What happens when knowledge travels and how does knowledge figure in relations of power? We approach these questions through works in anthropology, philosophy and science studies. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: ETH EN: S

L48 Anthro 4392 Capitalism and Culture
Capitalism is perhaps the most important historical and social phenomenon in the modern world. In tribal settings and major cities alike, its complex impacts are evident. Through rich case studies of how capitalism touches down in diverse cultures, this course provides an introduction to anthropological perspectives on the economy and economic development. Themes covered include the history of capitalism and globalization, the cultural meanings of class and taste, the relationship between capitalism and popular culture, major artistic responses to capitalism, social movements such as environmentalism, and the field of international development. No background in anthropology or economics is required. Credit 3 units. A&S IQ: LCD, SSC, SD Art: SSC EN: S

L48 Anthro 4393 The Archaeology of Trade and Exchange
Studies of trade and exchange are fundamental to our past, as cultures in contact result in new imaginings of self, communities, and place in the world. This course engages in archaeological and anthropological discussions about the interconnectedness that results from trade. This seminar concentrates on the discourse of material trade and the mechanisms for exchange, redistribution, dependency and resistance. It also examines the immaterial exchange of ideas, perceptions and values that alter concepts of identity, space and time. Globalization, political economies, and power are also addressed, along with ideas about territory, value, and social and political consequences of trade. Credit 3 units. A&S IQ: LCD, SSC BU: BA, IS EN: S

L48 Anthro 4453 Studying the City: Approaches to Social Research
In this course we will explore social science/social scientific research methods. The course is designed primarily for students majoring in urban studies. However, the research skills that students will acquire can be applied to any substantive topic in the social sciences. The main goal of this course is that students develop the skills to independently design and execute high quality social research, regardless of their substantive interests. To develop these skills we will read about methods, assess published research from a methodological perspective, and complete original research projects. Same as L18 URST 418 Credit 3 units. A&S IQ: SSC EN: S

L48 Anthro 4454 Cultures of Science and Technology
This seminar explores questions of theory, method and ethics in the anthropology of science and technology. How is biomedicine changing what it is to be human? How can technologies and scientific practices be studied ethnographically? How are the politics of difference linked to the production of scientific knowledge? Through close reading of ethnographic texts and fieldwork experience both on- and offline, we investigate how scientific practice and technological innovation reorganize various aspects of human life on both global and local scales. Topics include the social construction of knowledge, the reproduction of racial categories in genomics, the cultures of cyberspace, the commodification of bodies in medical science, and the ways in which various technoscientific projects reshape natural and political orders in diverse locales. Credit 3 units. A&S IQ: SSC, WI Art: SSC EN: S

L48 Anthro 4455 Ethnographic Fieldwork: The Politics of Schooling
This is a practice-based course in ethnographic fieldwork. Using a local case study (the cultural politics of schooling), we examine ethnographic fieldwork as an academic instrument and public social action. The course prepares students for independent research in academic or professional fields developing skills in critical thought, thesis and question development, background and internet research, perspective and empathy, social and political-economic analysis, observation, interviewing, oral histories, note-taking, data analysis, cultural interpretation, and writing. Student work contributes to the ongoing “St. Louis Schools’ Ethnographic Documentation Project.” Credit 3 units. A&S IQ: SSC Art: CPSC, SSC EN: S
L48 Anthro 4456 Ethnographic Fieldwork: Energy Politics
This is a practice-based course in ethnographic fieldwork that will focus on the politics of fossil fuels and the renewable energy transition in St. Louis and Missouri. We will situate ourselves as anthropologists with an interest in understanding relationships between global warming, the socio-technical arrangements of energy production, circulation, and use in the city and region, public knowledge, health, and social and cultural practices, and the roles and activities of businesses, political institutions, and elected officials. Through case studies we will work to produce critical knowledge aimed at pushing institutions, the city, and the region toward the transition to renewable energy. Our efforts will produce empirical documentation, case studies, and proposals and may include field trips to resource extraction sites and government offices.
Credit 3 units. A&S IQ: SSC Arch: SSP Art: SSP EN: S

L48 Anthro 4460 Anthropology and Creative Writing
Creative writing has much to offer anthropology. This course explores how methods of artistic writing and expression can shape stories and studies of cultural life in the global world. We consider the uses of journalism, fiction, memoir, poetry, and cinema in anthropology's understanding of the richness, the deep emotional tone, and also the dangers of human experience. We look at such issues and themes as the ordinary life and everydayness, coming of age and fitting in, the feeling of being at home and senses of place, narratives of illness and affliction, how people cope with trauma and violence, what makes our bodies powerful or vulnerable, and why things really matter. Although students are actively involved in writing stories, this is not a writing intensive course.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L48 Anthro 4481 Writing Culture
Different ways of writing about people, culture and society in past and present times. Readings include anthropological works as well as works of fiction that represent people and the times, places and circumstances in which they live. Students conduct and write about their own ethnographical observations.
Credit 3 units. A&S IQ: LCD, SSC, WI Arch: SSC Art: SSC EN: S

L48 Anthro 4517 Anthropology and Development
What is "development"? Economic progress for all? A slow and gradual "improvement" in the human condition? Helping people with "projects"? Westernization? Modernization? The sorting out of bodies that are useful and can be put to work from those less useful bodies that must be contained, imprisoned or killed? The militarized accumulation of capital? The commodification of labor? The exhaustion of nature? In this advanced seminar we will consider how anthropologists — as writers, analysts, and theorists — have engaged the theories, meanings, practices, and consequences of (sometimes externally directed) economic and political change. We focus on issues of the contemporary moment: oil, urban poverty and inequality (sex work, migration, water, debt, and cash transfer programs); and cultures of militarism. The course is designed to provide a graduate-level introduction to theory and ethnography based on intensive reading, discussion, critique and writing, with revision. It is open to advanced undergraduates and fulfills writing-intensive (WI) requirements, as well as capstone requirements for some majors.
Credit 3 units. A&S IQ: LCD, SSC, SC, SD, WI Arch: SSC Art: SSC BU: ETH EN: S

L48 Anthro 4555 Digital Digging: An Introduction to Archaeological Geophysics
In this class we will be exploring the history, technology, and application of geophysics in archaeology. In doing so, students will be provided with the opportunity to gain hands-on experience collecting, processing, visualizing and interpreting data from a variety of instruments that include ground-penetrating radar (GPR), magnetometry, electromagnetic induction (conductivity), and magnetic susceptibility. Prerequisites: Anthropology 190B
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L48 Anthro 4560 Ceramic Analysis
Method, techniques and models for analyzing prehistoric ceramics. Students conduct hands-on analyses of collections from Cahokia Mounds and the St. Louis region. Prerequisite: Anthro 314, graduate standing or permission of instructor.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L48 Anthro 4562 Artifact Analysis: Mississippian Cultures
The purpose of this course is to provide students with an introductory, hands-on experience of the methods employed in the analysis of archaeological materials common to the Mississippian culture. Students conduct class projects based on collections from Cahokia Mounds and the St. Louis region. Prerequisite: Anthro 314 or equivalent, or graduate standing, or permission of instructor.
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L48 Anthro 4564 Archaeobotanical Analysis
Advanced laboratory and analytical techniques. Prerequisite: Anthro 4211 or permission of instructor.
Credit 3 units. EN: S

L48 Anthro 4565 Biomolecular Archaeology: Are You What You Eat?
A revolution is underway in archaeology. Working at the cutting edge of isotopic and genetic technologies, researchers have been probing the building blocks of ancient proteins, life-DNA, fats and microfossils to rewrite our understanding of the past. Their discoveries and analyses have helped revise the human genealogical tree and answer such questions as: Are you what you eat? How different are we from the Neanderthals? Who first domesticated plants and animals? What was life like for our ancestors? In this class, we address those fundamental issues to understanding human nature. Here is science at its most engaging.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L48 Anthro 4581 Principles of Human Anatomy and Development
This course will discuss the anatomy of most of the functional systems of the human body. Topics covered will include the peripheral nervous system, respiration, circulation, the skeletal system, the gastro-intestinal tract, the urogenital system, the male and female reproductive systems, locomotion, manipulation, orientation, vocalization, the visual system, the auditory system and the olfactory system. Selected topics in human embryology will also be introduced. The course provides valuable preparation for any student interested in human biology, anthropology, medicine or the health sciences.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
L48 Anthro 4582 Human Life History Theory
Life history theory postulates that organisms must allocate finite time and finite resources between growth, maintenance and reproductive effort. This balance necessitates trade-offs in specific traits related to body size and energy allocation between competing functions across the life of the organism. In this class, we start from this broad theory and look at the specific application of life history theory within anthropology. Humans, in particular, present unique and unusual life history characteristics, which we discuss in depth.
Credit 3 units. A&S IQ: NSM Art: NSM

L48 Anthro 459 Human Osteology
Analysis of skeletal material recovered in human paleontological and archaeological excavations. The development of bone and major diseases that affect skeletal structure. Prerequisite: permission of instructor.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L48 Anthro 4591 Human Functional Morphology
A detailed consideration of the functional correlates of muscle-skeletal form in recent and ancient humans and our close primate relatives as a means for understanding the behaviors responsible for driving the evolution of human anatomy. Emphasis is placed on the structure and development of the bones, joints, and teeth; the soft tissues that impinge upon individual bones; and the biomechanical demands that affect bone and joint structures.
Credit 3 units. A&S IQ: NSM Art: NSM

L48 Anthro 4595 Developmental Plasticity and Human Health
A look at how early life — gestation plus infancy and childhood — contributes to the establishment of long-term physiology, variation and individual health from an anthropological perspective. The course includes current disease models of developmental origins, combined with evolutionary and adaptive perspectives on developmental plasticity and the construction of human health.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L48 Anthro 4597 The Archaeology of Life and Death
The study of human remains in archaeological contexts offers us a rich perspective on human life and society in the past. Our bodies are shaped by genetics, environmental factors, subsistence, disease, and physical activities over the life course. At the same time, social organization, inequality and ideologies also shape the human experience; they often become reflected in the built environments of tombs and cemeteries, the grave offerings, and interment styles that surround human remains in archaeological contexts. This course offers an introduction to bioarchaeology and mortuary archaeology as complementary approaches to the study of life in the past. The goal of the course is to understand how activities, norms and beliefs, and environments shaped bodies in life and death, and the different ways in which archaeologists can gain insight into the past through the study of human remains and burials. Course lectures and discussions focus on recent advances in research and ongoing debates in the two fields with examples from prehistory and history around the world, from North and South America, to Europe, Asia and Africa. Although this course will provide a basic overview of human skeletal anatomy, it is strongly recommended that students have taken an introductory course on the subject prior to enrolling in the class.
Credit 3 units. A&S IQ: LCD, SSC EN: S

L48 Anthro 4601 Topics in African American Studies
There is growing awareness of the legacies of historical racial violence in the United States and a related increase in reckoning efforts. Area histories of enslavement, lynching, and other racial terror and dispossession relate to inequality, conflict, and violence in the same places today. These “haunting legacies” include heart disease and other health disparities, homicide rates, white supremacist mobilization, and corporal punishment in schools. Meanwhile, many communities and institutions are moving to acknowledge and address legacies of historical racial violence in various ways. This course combines seminar-style readings and writing on legacies of racial violence with a practicum component, during which individual students or groups of students will conceptualize and develop interventions intended to clarify and disrupt legacies of racial violence to facilitate contemporary reckoning. The practicum will explore and support a broad range of interventive efforts, including public policy measures, original research projects, archival development, commemorative efforts, and a related array of mediums, including visual art, design, film, digital projects, and other creative approaches.
Same as L90 AFAS 4601
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 4611 Seminar in Selected Topics in Learning & Memory: Collective Memory
This course provides an overview and analysis of phenomena of people remembering as part of a group — one’s country, one’s state, one’s university, one’s family. Collective memories are critical for one’s identity, for knowing who we are and how to interpret the world around us. We will consider narcissistic tendencies of group memories in specific contexts (e.g., the Russian vs. American interpretation of world events; views of Trump supporters vs. Clinton supporters on events in the U.S.). The course will range from humanistic, anthropological, psychological, and sociological perspectives on memory.
Prerequisites: Psych 100B and a course on human memory or permission of the instructor.
Same as L33 Psych 461
Credit 3 units.

L48 Anthro 4623 Art and Science of Inferential Statistics
This course examines the historical roots, the scholarly development and the current applications of inferential statistics in a research context. The emphasis is on how social and natural variables are distributed, framing testable research questions, and choosing appropriate statistical tests. This course covers the testing of univariate, bivariate and multivariate hypotheses using parametric, non-parametric and re-sampling methods. Requires students to undertake statistical analyses of their own on real data sets. Familiarity with descriptive statistics is assumed. Designed for graduate students and advanced undergraduates. Permission of instructor is required for undergraduate enrollment.
Credit 3 units. A&S IQ: SSC, AN Art: NSM EN: S

L48 Anthro 4655 New Advances in Archaeology
Archaeological research is moving at an increasingly rapid pace, with advances in archaeological methods and theory propelling
new interpretations and understandings of archaeological findings. In this course we focus on contemporary developments in archaeology, with an emphasis on current trends in theory, method and discovery. The objectives of the course are to place emerging trends in archaeological research in a historical context, to understand new methods and to explore how various theoretical approaches influence the conduct of archaeological research around the globe.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4661 Historical Archaeology
This course focuses upon the methods and techniques employed in historical archaeology. We include methods of integration of written records through contextual studies, discussion of specific artifact type identification techniques, and seminar-type treatments of other aspects of the field. The class includes some hands-on lab work, working primarily with materials from the first American fort west of the Mississippi (Fort Belle Fontaine) and two Civil War period mansions. Prerequisite: 3 credits of archaeology or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD, WI Art: HUM

L48 Anthro 4682 Ethnoarchaeology
Theories, methods and techniques applied by archaeologists to contemporary societies and materials to aid their understanding of extinct societies. Analysis of ethnographic research in both the Old and New Worlds. Participation with Professors Watson, Browman and Fritz is included in relevant topics. Prerequisites: Anthro 160B or 190BP, and permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L48 Anthro 472 Social Theory and Anthropology
A seminar on social theory and its ethnographic implications. Course combines major works of modern social theory, including Marx, Weber and Durkheim, with current work by contemporary anthropologists, such as Clifford Geertz, Eric Wolf, Marshall Sahlins and Fredrik Barth, and ethnographers from related disciplines, such as Pierre Bourdieu and Paul Willis. Prerequisite: previous anthropology course work or permission of instructor.

Credit 3 units. A&S IQ: SSC, SC, SD Art: SSC EN: S

L48 Anthro 474 National Narratives and Collective Memory
This course examines how national narratives shape the ideas of nation-states about themselves and others. It considers cultural, psychological and political aspects of narratives used to interpret the past and understand the present. In addition to reviewing conceptual foundations from the humanities and social sciences, particular national narratives are considered as case studies. Same as L97 IAS 474

Credit 3 units. A&S IQ: SSC EN: S

L48 Anthro 4761 The Pleistocene Peopling of Eurasia
The paleolithic archaeology, human paleobiology and paleoecology of the geographical expansions and adaptations of Eurasian humans through the Pleistocene. Prerequisite: Anthro 150A or 190B.

Credit 3 units. A&S IQ: LCD, SSC Art: SSC

L48 Anthro 4771 Out of the Wild: Domestication and Socioeconomic Diversity in Africa
The reason for the beginnings and spread of food production during the early Holocene in so many parts of the world is one of the most interesting questions in archaeology. It now seems likely that there are many different pathways to domestication. In Africa, there is a record of up to several million years of human existence as hunter-gatherers before some human populations adopted food production. Domestication of plants and animals about 10,000 years ago resulted in fundamental changes in human societies. It provided the basis for the increase in settlement densities, specialization and social stratification, and general decrease in mobility and dietary diversity characteristic of non-hunter-gatherer societies in the modern world. In this seminar, the class explores the phenomenon of domestication and the spread of food production, surveying the evidence for manipulation and domestication of plant and animal species by prehistoric peoples in Africa. We focus on how and why domestication occurred and factors that influenced its spread; interactions between late hunter-gatherers and early pastoralists; and intersections with complex societies of the Nile. We also look at the contributions of Africa to understanding pathways to food production world wide.

Credit 3 units. A&S IQ: LCD, SSC, WI Art: SSC EN: S

L48 Anthro 4792 The Many Paths Leading Toward the Creation of the Ancient City
The purpose of this class is to examine the emergence of the Ancient City across the globe. We want to begin with the concepts of urbanism, city and metropolis. These are words whose derivation are to be found in the classical languages of the Mediterranean. Is there any means to reach an understanding of how other civilizations and societies characterized these special places on the landscape? In the past, many scholars have argued that market economies and state-level societies are essential to their existence. Such arguments reflect issues of sustainability in terms of the economy and the effective control of large populations through state-level institutions. While we want to understand the role of the economy and the level(s) of political integration involved in the process of urbanism, are there other cultural institutions such as religion that play a much larger and more significant role? Do these places reflect the "citizens" perception of the cosmos?

Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L48 Anthro 4803 Advanced GIS Modeling and Landscape Analysis
The aim of this course is to learn to analyze archaeological data in terms of its spatial layout, geography, ecology, and temporal dynamics, using Geographic Information Systems and associated computer modeling techniques. A focus is placed on the relationship between natural environments, cultural geography, and the mapping of archaeological landscapes, and on the archaeologist's ability to accurately recover, reconstruct and analyze this relationship in a virtual environment.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4811 Zooarchaeology
Methods and techniques of analysis of faunal remains recovered in archaeological context, including aging, sexing, and the study of cultural modification of archaeological faunas.

Credit 3 units. A&S IQ: NSM Art: NSM
settled and mobile farming systems in diverse regions of the world. We discuss old and new theoretical approaches and apply increasingly sophisticated methods for recovering and interpreting the evidence. Recent research puts us in a better position than ever before to understand the preconditions, processes, and possibly the causes of domestication and the spread of food production. This course is the WI version of Anthro 489 Seminar: Pathways to Domestication.
Credit 3 units. A&S IQ: SSC, WI EN: S

L48 Anthro 491 Advanced Anthropological Research
Limited to those students who have successfully completed L48-490 and have a qualifying continuing research project. Prerequisite: Anthro 490 and permission of the faculty member who will supervise the continuing research project.
Credit variable, maximum 3 units. A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4911 Methods in Molecular Anthropology
We learn techniques used in molecular genetics and their application to studying the evolution and adaptation of human and nonhuman primates. This course covers DNA extraction from biological materials (e.g., buccal cells from cheek swabs, potentially also fecal samples from the primates at the zoo), primer design and polymerase chain reaction (PCR) to amplify a region of interest (student lead, with guidance) from isolated DNA. Use of gel electrophoresis to visualize and purify PCR products and sequencing reactions to view nucleic acid structure also are conducted. We also have a lecture on introductory bioinformatics. Throughout the course, we discuss the mechanisms underlying these techniques, why they work and how to troubleshoot problems. Students are expected to submit lab reports and to engage in peer review of others’ lab reports. Finally, we discuss how molecular methods inform anthropological research. Students are also expected to take online safety training modules through EH&S.
Credit 3 units. A&S IQ: NSM

L48 Anthro 4951 Senior Honors Research
Limited to students who have qualified for the Anthropology honors program and who are conducting research for an honors thesis. Prerequisites: permission of the Anthropology faculty member supervising the honors research, and concurrent filing of notification with the Anthropology senior honors coordinator.
Credit variable, maximum 3 units.

L48 Anthro 4961 Senior Honors Thesis
Limited to students who have qualified for the Anthropology honors program and who are actively engaged in writing a senior honors thesis. Prerequisite: permission of the Anthropology senior honors coordinator.
Credit variable, maximum 3 units.
L48 Anthro 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories
This seminar examines the theory and the cultural history of the collecting of art objects and artifacts from a range of cultures and periods, considering how and why both individuals and institutions create collections. What social and psychological factors drive this passion? What are the various cultural, political and aesthetic priorities that have driven this practice historically? How is cultural patrimony defined, and how do law, the art market and cross-cultural ethics impact the placement, study and display of a culture's material heritage? We build the seminar around the history of collecting in America, with a focus on Midwestern examples, and particularly, important case studies in St. Louis. We, for example, consider the significant local collections built by Joseph and Emily Rauh Pulitzer (modern art), and Morton May (modern and oceanic art), as well as the histories of both modern and non-Western collections now owned by the St. Louis area museums. This course is complemented by various local field trips (SLAM, Pulitzer, Kemper and Cahokia). Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Same as L01 Art-Arch 4975 Credit 3 units. A&S IQ: HUM Art: AH EN: H

L48 Anthro 4999 Capstone Experience
The Department of Anthropology offers several options for completing a capstone experience, which is recommended by the College of Arts & Sciences. One option is for students in any 400-level course in the department to secure permission of the instructor to simultaneously enroll in Anthro 4999. The instructor and student develop an individualized plan for expanding the normal content of the selected 400-level course into a capstone experience. Prerequisite: junior or senior standing. Enrollment requires permission of the department and the instructor. Credit 1 unit.

Arabic
The Department of Jewish, Islamic, and Middle Eastern Studies offers a major and a minor in Arabic. As majors in Arabic, students can expect to gain proficiency in the language, study the area's literary and cultural landmarks, and gain familiarity with Middle Eastern history and civilizations.
Language Placement: Placement tests are required for all students entering our language programs. Students may be eligible for up to 6 units of back credit based on advanced placement and successful completion of the recommended course. Native speakers are not eligible for back credit; evidence of secondary or postsecondary study of the language is required. Any units received from back credit cannot be counted toward the major or minor.

Majors

The Major in Arabic

Units required: 24 advanced, in addition to prerequisites

Prerequisites:

- 100- and 200-level Arabic, by course work or by placement. (A student who skips the first four semesters of language courses by placement must successfully complete the fifth semester.)
- JIMES 210C Introduction to Islamic Civilization and JIMES 208F Introduction to Jewish Civilization: History and Identity (Students with substantial prior course work may substitute an additional upper-level course with permission of their advisor and the director of undergraduate studies.)

Requirements:

- 12 credits in 300- and 400-level language courses
- 6 credits in 300- and 400-level other JIMES courses, distributed as the student wishes
- At least 3 credits in 300- and 400-level courses in a JIMES culture other than that of the selected language tradition
- 3 credits in a departmental capstone course to be taken during the senior year. (Students may take this course during their junior year with permission of their adviser and the director of undergraduate studies.)

Additional Information

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester can earn a maximum of 9 credits subject to review by their adviser and the director of undergraduate studies. Summer programs and transfer courses can be granted as many as 6 credits subject to review by the student's adviser and the director of undergraduate studies. A limit of 9 credits in total can be applied to the major, whether the credits are earned in study abroad or summer programs or via transfer credit. For more information about preapproved study abroad programs, please visit the Jewish, Islamic, and Middle Eastern Studies Study Abroad Program website (https://jimes.wustl.edu/studyabroad).

Students must maintain an average of B in all courses for the major. A grade of B- or higher must be earned in each language course in order to advance to the next level.

No course taken pass/fail can count toward the prerequisites or the major.

A student may request credit for courses taken outside of the department (other than those that are cross-listed) by seeking
To be eligible to write a senior thesis, a student must maintain a grade-point average of 3.65 through the sixth semester. Senior thesis writers should sign up for an appropriate 3-credit course during both the fall and spring semesters. (The 6 credits from these courses can be applied to the primary area of study.)

**Minors**

**The Minor in Arabic**

**Units required:** 18, in addition to prerequisites

**Prerequisites:**
- Both semesters of 100-level Arabic, by course work or by placement

**Requirements:**
- JIMES 210C Introduction to Islamic Civilization or JIMES 208F Introduction to Jewish Civilization: History and Identity
- 9 credits in 300- or 400-level JIMES courses in Arabic language
- 6 credits in 300- or 400-level other JIMES courses, distributed as the student wishes

**Additional Information**

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their adviser and the director of undergraduate study.

Students must maintain an average of B in all courses for the minor. A grade of B- or higher must be earned in each language course in order to advance to the next level.

No course taken pass/fail can count toward the prerequisites or the minor.

A student may request credit for courses taken outside of the department (other than those that are cross-listed) by seeking the permission of the director of undergraduate studies and the department chair.

**Courses**

**L49 Arab 107D Beginning Arabic I**

Introduction to modern Arabic; concentrates on rapidly developing basic skills in reading, writing, speaking and understanding. Five class hours, including one culture hour and additional drill or laboratory hours. Students with previous Arabic language background must take a placement examination. Credit 5 units. A&S IQ: LCD; BU: HUM EN: H

**L49 Arab 108D Beginning Arabic II**

Continuation of Arab 107D. Emphasis on enhancing skills in reading, writing, speaking and aural comprehension of modern Arabic. Prerequisite: grade of B- or better in Arab 107DQ or placement by examination. Five class hours a week with additional drill or laboratory hours arranged by instructor. Credit 5 units. A&S IQ: LCD; BU: HUM EN: H

**L49 Arab 207D Intermediate Arabic I**

Study of grammar of literary Arabic and reading of annotated classical and modern prose texts; elementary composition; practice in speaking and comprehending modern Arabic. Prerequisite: grade of B- or better in Arab 207DQ or placement by examination. Five class hours a week with additional drill or laboratory hours set by instructor. Credit 5 units. A&S IQ: LCD; BU: HUM EN: H

**L49 Arab 208D Intermediate Arabic II**

Continuation of Arab 207D. Study of grammar of literary Arabic and reading of annotated classical and modern prose texts; elementary composition; practice in speaking and comprehending modern Arabic. Prerequisite: grade of B- or better in Arab 207DQ or placement by examination. Five class hours a week with additional drill or laboratory hours arranged by instructor. Credit 5 units. A&S IQ: LCD; BU: HUM EN: H

**L49 Arab 210F Introduction to Islamic Civilization**

A historical survey of Islamic civilization in global perspective. Chronological coverage of social, political, economic and cultural history are balanced with focused attention to special topics, which include: aspects of Islam as religion; science, medicine and technology in Islamic societies; art and architecture; philosophy and theology; interaction between Islam and Christendom; Islamic history in the Middle East, South Asia, Southeast Asia, and Central Asia as well as Africa; European colonialism; globalization of Islam and contemporary Islam.

Same as L75 JIMES 210C

Credit 3 units. A&S IQ: HUM, LCD Art; BU: ETH, IS EN: S; UColl: CD

**L49 Arab 3062 Islam, Culture and Society in West Africa**

This course explores the introduction of Islam into West Africa beginning in the 10th Century and explores its expansion and development in the region, placing emphasis on the 19th century to present day. It focuses on the development of West African Muslim cultural, social, religious and political life, to understand not only how the religion affected societies, but also how West African local societies shaped Islam. The course also aims to introduce students to a critical understanding of Islamic writing in West Africa. It also examines the organization of Muslim Sufi orders in West Africa through time and space. The course is organized around a series of lectures, readings, as well as print and visual media.

Same as L90 AFAS 3062

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art; SSC BU: IS EN: S; UColl: CD
L49 Arab 307D Advanced Arabic I
Continuation of Arab 208D. Competence in reading, writing, speaking, and cultural and social contexts is developed through intensive exposure to classical and modern standard Arabic in its written and audiovisual forms. Prerequisite: grade of B- or better in Arab 208D or placement by examination. Three class hours a week with one additional laboratory hour as assigned by instructor. Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L49 Arab 308D Advanced Arabic II
A continuation of Arab 307D. Continued integration of language development through reading, writing, speaking and listening activities centered on advanced authentic material. This semester proves critical for making the transition from Modern Arabic to Classical Arabic, including Qur'anic Arabic. Continued development of colloquial Arabic. Prerequisite: Arab 307D or equivalent. Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L49 Arab 313C Islamic History: 600-1200
The cultural, intellectual, and political history of the Islamic Middle East, beginning with the prophetic mission of Muhammad and concluding with the Mongol conquests. Topics covered include: the life of Muhammad; the early Muslim conquests; the institution of the caliphate; the translation movement from Greek into Arabic and the emergence of Arabic as a language of learning and artistic expression; the development of new educational, legal and pietistic institutions; changes in agriculture, crafts, commerce and the growth of urban culture; multiculturalism and inter-confessional interaction; and large-scale movements of nomadic peoples. Same as L22 History 313C. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L49 Arab 3149 The Late Ottoman Middle East
This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to the First World War). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students focus on how everyday people's lived experiences were affected by the increased monetarization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity. Same as L22 History 3149. Credit 3 units. A&S IQ: HUM, LCD, SD BU: HUM, IS EN: H

L49 Arab 325 Introduction to Arabic Literature
A survey of the major genres and themes in Arabic literature from the pre-Islamic era to the modern period. Texts include pre-Islamic, classical and Sufi poetry, as well as popular tales and critical prose from the Umayyad and Abbasid empires and Andalusia. The modern sections of the course interrogate political commitment in Arabic literature and introduce students to feminist and magical realist novels from North Africa and the Levant. All readings are in English translation. Credit 3 units. A&S IQ: HUM, LCD EN: H

L49 Arab 329C Middle Eastern Islamic Literatures in Translation
This course studies, in English translation, several great works of Islamic literature that still influence or reflect the ways in which we perceive Islamic culture today. We critically consider great and disparate literary works, originally written in a variety of languages including Arabic, Turkish and Persian and stretched from Spain to India, that share the common backdrop of an urban and educated milieu in which they were produced, widely read and circulated. The course aims at exploring the literary cultures in their historical and social context. Possible themes include court literature, politics, Sufi literature, history, theology and literature of romance. All readings are in English. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L49 Arab 352 Iraqi Literature
This course introduces students to major works in Iraqi literature in the 20th and 21st centuries, with a focus on the post-World War Two period up to the present day. Credit 3 units. A&S IQ: HUM BU: IS EN: H

L49 Arab 355C The Flowering of Islamic Literature, 500-1200
Exploration of the multilingual (Arabic, Persian, Turkish) literary cultures of a civilization that stretched from Spain to India. Themes and genres include early court patronage, bedouin odes, wine poetry, social satire, mystical poetry, national epic, and the literature of love and romance. Comparisons to contemporaneous Hebrew and ancient and medieval Western literatures. Readings in English. Same as L16 Comp Lit 355C. Credit 3 units. Art: HUM BU: HUM

L49 Arab 361 City of Peace: Baghdad in Medieval Times (ca. 762-1250)
The subject of this course is an exploration of the city of Baghdad in medieval times from its foundation in the eighth century to its sack by the Mongols in the 13th. Starting from the background history of its location in Mesopotamia, we study the reasons of its foundation in that location and examine its topography, city planning and layout, institutions, citizens, neighborhoods, markets, libraries and workshops to discuss life in the city. Because Baghdad was the seat of the Abbasid caliphate at the time, we examine its role as the hub of the empire (in politics, administration, economy and literature), and its links to and rivalries with other provincial cities. Same as L75 JIMES 361. Credit 3 units. A&S IQ: HUM EN: H

L49 Arab 396 Islamic Philosophy, Mysticism, and Theology
How does an individual achieve access to knowledge and access to God? To what extent is such access dependent upon scripture? To what extent is such access dependent upon reason? Are there forms of truth and experience that only reveal themselves through mysticism? Questions of this sort are central to the interrelated disciplines of Islamic philosophy, Islamic theology, and Islamic mysticism (i.e., Sufism). This course examines how these three disciplines have shaped various aspects of social life within premodern Muslim communities. Same as L23 Re St 396. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H
L49 Arab 4001 Capstone Seminar
The capstone course for Jewish, Islamic, and Middle Eastern Studies majors, Arabic majors, and Hebrew majors. The course content is subject to change.
Same as L75 JIMES 4001
Credit 3 units. A&S IQ: HUM EN: H

L49 Arab 4041 Islam and Politics
Blending history and ethnography, this course covers politics in the Islamic world in historical and contemporary times. Topics include history of Islam, uniformity and diversity in belief and practice (global patterns, local realities), revolution and social change, women and veiling, and the international dimensions of resurgent Islam. Geographical focus extends from Morocco to Indonesia; discussion of other Muslim communities is included (Bosnia, Chechnya, sub-Saharan Africa, U.S.).
Same as L48 Anthro 4041
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS

L49 Arab 405 Colloquial Arabic
The aim of this course is to introduce the students to colloquial Arabic through their knowledge of Modern Standard Arabic (MSA). We focus on the main differences between colloquial and MSA so that the students can use the colloquial form for practical purposes in everyday life. Prerequisite: Arab 208D or instructor's permission.
Credit 3 units. A&S IQ: LCD BU: IS EN: H

L49 Arab 407 Fourth-Level Arabic I
A continuation of the Arabic sequence for students who have attained the requisite proficiency in reading, writing, speaking, and listening to Modern Standard Arabic (MSA). We focus on the main differences between colloquial and MSA so that the students can use the colloquial form for practical purposes in everyday life. Prerequisite: Arab 208D or instructor's permission.
Credit 3 units. A&S IQ: LCD BU: IS EN: H

L49 Arab 408 Fourth-Level Arabic II
Focused reading and discussion of texts written by modern Arab intellectuals. These texts will center on the interrelated topics of modernity, politics, and religion. The course will emphasize the following: (1) increasing reading speed; (2) increasing depth of reading comprehension; (3) strengthening grammar; and (4) building Arabic-to-English translation skills. Prerequisite: grade of B- or better in Arabic 407 or placement by examination, and/or permission of the instructor. This course is not repeatable. Students who wish to study Arabic beyond this level should contact Prof. McManus.
Credit 3 units. A&S IQ: LCD, LS Art: HUM BU: IS EN: H

L49 Arab 450 Topics in Classical Arabic Literature and Culture
Exploration of medieval Arabic Belles-Lettres (Adab). All texts read in Arabic. Prerequisite: senior standing.
Credit 3 units. Arch: HUM Art: HUM BU: H

L49 Arab 451 Topics in Modern Arabic Literature and Culture
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L49 Arab 464 Arabic Textual Analysis
This course introduces the advanced student of Arabic to a variety of prose narratives in the modern language. Readings, which include literary texts and topical essays on aspects of Arabic society and culture, reflect the needs and interests of the enrolled students.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM EN: H

L49 Arab 465 Topics in Arabic
This course is an in-depth study of a particular segment of Arabic literature and/or culture.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L49 Arab 4675 Beyond the Harem: Women, Gender, and Revolution
This course examines the history and current situations of women in Middle Eastern societies. The first half of the course is devoted to studying historical changes in factors structuring women's status and their sociopolitical roles. The second half of the course will focus on several case studies of women's participation in broad anticolonial social revolutions and how these revolutions affected the position of women in those societies.
Same as L22 History 4675
Credit 3 units. A&S IQ: HUM, LCD BU: BA, HUM EN: H

L49 Arab 470 Topics in Classical Arabic Literature in Translation
Various themes in Arabic religious literature and Belles-Lettres (Adab), e.g., the intertwining of religion and politics, court culture and fashions, social critiques, gender roles, etc., are read in English.
Credit 3 units. Arch: HUM Art: HUM BU: ETH

L49 Arab 471 Topics in Modern Arabic Literature in Translation
Modern Arabic narratives read in English translation foregrounding themes such as the conflict between tradition and modernity, civil war, poverty, alienation, religion and politics, and changing gender roles.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L49 Arab 488 Independent Work for Senior Honors
This course to be taken in the fall semester. Prerequisites: senior standing, eligibility for honors, and permission of the department.
Credit 3 units.

L49 Arab 489 Independent Work for Senior Honors
This course to be taken in the spring semester. Prerequisite: senior standing, eligibility for honors, and permission of the department.
Credit 3 units.
L49 Arab 497 Guided Readings in Arabic
Prerequisites: senior standing and permission of instructor and department chair.
Credit variable, maximum 5 units.

L49 Arab 498 Guided Readings In Arabic
Prerequisites: senior standing and permission of the instructor and the department chair.
Credit 3 units.

Archaeology
Archaeology provides the opportunity to investigate the material remains of past societies and cultures and the methods by which they are recovered, analyzed, interpreted and reconstructed.

Archaeologists investigate the entire human past, from the first evidence of tool use 3 million years ago to historical studies as recent as the 20th century. To provide a comprehensive understanding of archaeology, the program emphasizes two approaches: the humanistic, which is represented by classical archaeology, and the social scientific, which is represented by anthropological archaeology.

Archaeology students will encounter a range of specialties within the field, from topical studies in areas such as prehistoric pastoralism, hunter-and-gatherer societies, Mayan archaeology, and Greek and Roman archaeology to methodological approaches involving historical archaeology, ethnoarchaeology, zooarchaeology, paleoethnobotany, geoarchaeology, geographic information systems (GIS) and trace element analysis. A strength of this institution in anthropological archaeology is the focus on biologically based studies (paleoethnobotany, zooarchaeology and GIS) to investigate such questions as the origins of food production or complex societies. The strength of the classical archaeological program capitalizes on the use of ancient documents to investigate the more recent Eurasian human past.

While acquiring basic training in archaeology, students may choose to concentrate on a specific region, such as the Eastern Woodlands of the United States, the Andes, Mesoamerica, Africa, Central Asia, China or the Mediterranean world. Ancient and modern languages as well as history and art are essential for some areas of study. Students, in conjunction with their advisers, can identify a specialized set of courses that meet their goals.

Washington University archaeology faculty members are involved in research projects in many regions, such as Central Asia, Northern Africa, China, Greece, the Andes, the Mayan area, New Mexico and the Mississippi River valley. With a degree in archaeology, a graduate can work in academia, private consulting firms, government conservation and compliance agencies, and museums. Academic and museum positions generally require graduate-level training.

**Majors**

**The Major in Archaeology**

Total units required: 27

Required courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARC 190B</td>
<td>Introduction to Archaeology</td>
<td>3</td>
</tr>
<tr>
<td>ARC 200C</td>
<td>World Archaeology: Global Perspectives on the Past</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective courses:

The major requires 21 advanced (300-/3000- or 400-/4000-level) units in addition to the two introductory courses. These 21 advanced units should be distributed among the offerings in anthropological archaeology and classical archaeology. Eligible courses for the major and minor can be found in the course listings under the ARC L52 Archeology listings. All majors must also complete a supervised archaeological field school of six weeks or the equivalent, approved by the departmental director.

**Additional Information**

Internships/Research: The hands-on experience of archaeological fieldwork is particularly attractive to many students. Undergraduate majors in archaeology will complete at least one supervised field project, which is selected to best meet the student’s long-term goals. Most field research projects are small, which allows students to work closely with faculty and staff. Recently, students have worked at excavations in such diverse areas as Ireland, France, Kazakhstan, Greece, Israel, China, Japan, Guatemala, Bolivia, the U.S. Southwest, and Cahokia, Illinois. Students focusing on North American archaeology often take an internship at one of the local private firms to gain experience in contract archaeology. Undergraduate participation in research is encouraged, particularly for students working on Senior Honors theses.

Senior Honors: Archaeology majors are encouraged to work for Senior Honors, for which students may apply during the junior or senior year. Acceptance into the program is based on previous academic performance, a proposal accepted by an archaeology faculty member who agrees to supervise the honors research, and approval of the Archaeology program director. The Honors thesis will be evaluated by a three-member faculty committee.

Study Abroad: In addition to field schools in the summer, many students — particularly those focusing in classical archaeology — also opt to take a semester abroad.

**Minors**

**The Minor in Archaeology**

Units required: 15

Required courses: The minor in the interdisciplinary program in Archaeology requires the completion of 15 course credits. The minor should include one of the two introductory courses (ARC 190B Introduction to Archaeology or ARC 200C World Archaeology: Global Perspectives on the Past) and at least 12 advanced units from 300- and 400-level courses. Eligible courses for the major and minor can be found in the course listings under the ARC L52 Archeology listings.

**Additional Information**

The archaeology minor is usually fulfilled by a concentration in either humanistic or social science course work. Thus, the minor will satisfy the Humanities or the Social and Behavioral Sciences distribution area, depending on which courses the minor includes.

**Courses**

**L52 ARC 130 First-Year Seminar: The Ritual Landscape of Cahokia: Perspectives on the Politics of Religion & Chiefly Power**

The purpose of this class is to engage and challenge freshman students in an open discussion about the prehistoric Mississippian community of Cahokia. The focus of this course is two-fold. The first is to study the way in which the archaeological...
evidence has been interpreted. The second is to examine other perspectives on Cahokia, especially from the Native American descendants who consecrated this landscape nearly a millennium ago. An underlying tenet of this seminar in understanding Cahokia can also be achieved through the traditions and literature of Native Americans. In the end we want to understand the basis for Cahokia’s organization as a prehistoric Native American community, and the role that ritual and religion played in the rather dramatic and dynamic history of this community and the surrounding region.

Same as L48 Anthro 130
Credit 3 units. A&S: FYS A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: HUM EN: S

L52 ARC 190B Introduction to Archaeology
Archaeology plays a critical and unique role in understanding the human past. Through study of the methods and theories of archaeology, and a survey of important firsts in the human past, this course introduces students to the way archaeologists use material culture to reconstruct and understand human behavior. Chronologically ordered case studies from around the globe are used to look at social, ecological and cultural issues facing humans from the earliest times to the present. Students gain practice reconstructing the past through hands-on participation in two one-hour labs focusing on lithics and animal bones. By the end of the course, students are expected to be able to think critically about how the past is presented, and why, and the importance of the past as it relates to the present and future.

Same as L48 Anthro 190B
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L52 ARC 200C World Archaeology: Global Perspectives on the Past
If we carefully peer beneath the earth’s surface, we will discover a hidden world that is being rediscovered by archaeologists. A considerable amount of excitement is generated by the discovery of lost civilizations and societies. Archaeologists from every corner of the earth come to Washington University to share their experiences as they use the most sophisticated technology to rediscover those forgotten and sometimes embarrassing aspects of our human past.

Credit 3 units. A&S IQ: HUM, LCD Art: FAAM BU: IS EN: H

L52 ARC 300 Internship in Archaeology
Internship with an archaeological project or organization where the primary objective is to obtain professional experience outside of the classroom. Student must have a faculty sponsor and a site or project supervisor. Prerequisites: open only to Archaeology majors with junior standing and permission of department.

Credit variable, maximum 3 units. Art: HUM

L52 ARC 310C Ancient Civilizations of the New World
An examination of the Inca empire in Peru, and the Maya and Aztec empires in Mexico, through the inquiry into the roots, development, form, and evolutionary history of pre-Colombian civilization in each region from its earliest times to the rise of the classic kingdoms. Examples of respective artistic accomplishments are presented and discussed.

Same as L48 Anthro 310C
Credit 3 units. A&S IQ: HUM, LCD Arch: SSC BU: HUM

L52 ARC 3122 From Country to Heavy Metal: Ancient Civilizations of the Old World
This course will explore the archaeology of Europe, the Near East and Central Asia from approximately 10,000 years ago to classical times (ending before Ancient Greece). This prehistoric epoch saw major developments among various civilizations of the Old World, such as the introduction of agriculture, animal domestication, the growth of cities, and technological developments such as pottery, metallurgy and horse-riding. A major focus will be the trajectory of cultural innovations of regional populations through time, and the complexity of their social, political and ritual practices. We will also investigate the variation in human adaptive strategies to various environmental and social contexts, from hunter/gatherers to early Neolithic farmers, to the interactions between nomadic populations and larger scale, urban societies in the Bronze and Iron Ages.

Same as L48 Anthro 3122
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS EN: S

L52 ARC 314B Prehistory of North America
The predecessors of the Eskimo, Northwest Coast Indians, Pueblo mound builders, and other North American Indians. Concentrates on deductions from archaeological data for cultural development.

Same as L48 Anthro 314B
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L52 ARC 3163 Archaeology of China: Food and People
China is a country with a large population, diverse landscapes, and unique food. This course will explore the origins of Chinese food in the context of the fast-moving subject, with advances in methods and theories as well as changes in key perceptions. In this context, the beginning and spread of food production in China has become one of the key questions in current archaeology. We will focus on the process of the domestication of plants and animals in various regions of China during the Holocene period. We will explore how those processes relate to other sectors of the Old World, such as those of South and Southwest Asia. This course will pursue answers to the following questions: Why are the Chinese ways of living and eating different from those of the West? How were production and consumption in China shaped by food globalization in prehistory?

Same as L48 Anthro 3163
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS EN: S

L52 ARC 3182 Ancient Africa: Social Mosaics and Environmental Challenges
This class introduces students to the basics of the archaeological record of humans in Africa from 3.6 M.Y. to 1000 years ago. The first third of the course focuses on early humans, the origins of meat eating, expansion of diet and cuisine, technical and cultural responses to changing environments. The second section of the course emphasizes African rock art, socioeconomic variability among hunter-gatherers, the origins of African pastoralism, and human responses to climate change and African contributions to world food supply including domestication of sorghum, also coffee. The last third of the course is devoted to the complex urban societies of ancient Africa, Egypt, Axum, Great Zimbabwe, and Jenne Jeno. Course format is lecture and discussion. There are two midterms and students are expected to participate in
L52 ARC 330 Experimental Archaeology
Experiments are an extremely important part of the scientific process. Although archaeology is often treated as an historical science, the nature of the material record does provide an opportunity to use experimentation as an important way of interpreting what we excavate. The class will be working with the most tangible materials recovered from archaeological contexts, that is stone and pottery. After reviewing the history of experimentation in archaeological investigations we will turn to the material record. This will be followed in our initial weeks of setting up the experiments and how they will be used to compare with available data sets derived from archaeological contexts. As part of the class we will take several field trips to areas where materials exist in a natural setting. Each class member will select a specific material for the focus of their experiments. In the end students will produce several experiments using different materials, document their experiments in written reports, and finally present their results to the class for discussion and evaluation.

L52 ARC 3304 Bones to Behavior: Undergraduate Research in the Lab and at the Zoo
We undertake zooarchaeological study of equid skeletons in the zooarchaeology laboratory at Washington University, and in collaboration with the Saint Louis Zoo, participate in a behavioral study of the courtship and breeding behavior of the ancestor of the domestic donkey — the African wild ass. The research questions that we focus on are how the biology and behavior of the African wild ass influenced the domestication of the donkey by prehistoric African herders or ancient Egyptians and how the behavior of the African wild ass continues to affect prospects for conservation of this highly endangered animal. During the first half of the semester, we meet once a week for 2.5 hours in the zooarchaeology laboratory. In the second half of the semester, we no longer meet in the lab and each student spends two mornings of their choice per week at the Saint Louis Zoo conducting observations of the wild ass. Students may choose two days that fit their schedule. Saturdays and Sundays are included as choices of days. Permission of instructor is required.
Same as L48 Anthro 3304
Credit 3 units. A&S IQ: NSM Art: NSM BU: BA

L52 ARC 3305 Bones to Behavior II
In this class, students undertake zooarchaeological research on skeletal material in the zooarchaeology laboratory at Washington University and/or preparation of animal skeletons for comparative study and, in collaboration with the Saint Louis Zoo, participate in behavioral studies of the ancestor of the donkey — the African wild ass. Collections housed in the zooarchaeological laboratory for study include ancient food-remains from African sites. These collections bear on questions regarding cultural and climate change in the Horn of Africa 2,000 to 12,000 years ago and include animals ranging from African antelopes to domestic camels. During the first half of the semester, students meet once a week for 2.5 hours in the zooarchaeological laboratory. In the second half of the semester, we meet twice a week in the laboratory or at the zoo. Location depends on projects selected for study. Permission of instructor is required. May be repeated for credit.

L52 ARC 334 Roman Art and Archaeology
The art and archaeology of the Romans, with emphasis on the late Republic and the Imperial period. Major monuments of sculpture and architecture, as well as town planning, domestic architecture, and the minor arts are used as evidence for reconstructing ancient life.
Same as L01 Art-Arch 334
Credit 3 units. A&S IQ: HUM: AH, GFAH, HUM BU: HUM, IS: H

L52 ARC 3351 The Ancient Maya: Archaeology and History
This course focuses on the ancient Maya civilization because there are many exciting new breakthroughs in the study of the Maya. The Olmec civilization and the civilization of Teotihuacan in the Valley of Mexico are considered as they related to the rise and development of the Maya civilization. The ancient Maya were the only Pre-Columbian civilization to leave us a written record that we can use to understand their politics, religion and history. This course is about Maya ancient history and Maya glyphic texts, combined with the images of Maya life from their many forms of art. The combination of glyphic texts, art and archaeology now can provide a uniquely detailed reconstruction of ancient history in a New World civilization.
Same as L48 Anthro 3351
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS EN: S

L52 ARC 3369 Underwater Archaeology
Survey of the history, techniques and results of underwater excavation worldwide, with emphasis on the ancient Mediterranean. Prerequisite: ARC 190 or ARC 200, or permission of instructor.
Credit 3 units. BU: HUM

L52 ARC 345E The Art and Archaeology of Ancient China
Same as Art-Arch 345E(Q)

L52 ARC 3461 Native Americans at Westward Expansion
Issues precipitated by Euro-American contact, colonization and expansion between 1492 and 1810 across Eastern North America, the Plains and the Rocky Mountains. Impacts of exploration and settlement and responses by native peoples:
epidemics; population loss; breakdown of Southeastern chiefdoms; resistance; relocation; and shifts in economic strategies. Perspectives and policies of Native Americans as well as Europeans and non-Indian Americans, including Lewis and Clark.

Same as L48 Anthro 3461
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: HUM

L52 ARC 347B Ancient Mound Builders of the Mississippi Valley
Study of the peoples in North America who built mounds and other earthen structures beginning more than 4000 years ago; why they erected earthworks; what the structures were used for; how they varied through time and across space; and what significance they had to members of society.

Same as L48 Anthro 347B
Credit 3 units. Art: SSC BU: BA

L52 ARC 3617 Past and Present Cultural Environments
Human societies are situated within and interact with their ecological and environmental systems. Even social relationships within and between groups imply spatial relationships and geographic orientation, advantages, influence, and limitations. Beyond subsistence, environment and the "natural world" play an integral role in how humans pattern the landscape, structure society, develop their world view, and, in turn, alter and adapt the world in which they live. This course introduces students to anthropological conceptions of human-environmental relationships, past and present. Topics include environmental and landscape archaeology; historical, political, and human behavioral ecology; world view and conceptualizations of nature; human adaptation, resilience theory, and niche construction; anthropological case studies; the intersections of humans, animals, and the environment; and environmental politics.

Same as L48 Anthro 3617
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L52 ARC 3693 Anthropology of Death, Mourning and Burial
This course offers anthropological analysis of death, mourning and burial. It draws on data and theoretical explanations from different sub-disciplines of anthropology (archaeology, cultural anthropology, and physical anthropology). In addition to theoretical conceptualization of mortuary practices, specific case studies are used to address a wide range of topics. The course covers cross-cultural comparison of burial among hunter-gatherers, pastoralists and complex societies. Mortuary practices also are conceptualized based on religion and secularity, social organization and biological approaches (e.g., paleo diet, paleodemography, disease). Ethical and legal issues of using human remains worldwide also are addressed. This course helps train and stimulate academic enquiry into ancient and modern societal treatment of death around the globe. The time covered in this course ranges from the Lower Palaeolithic to the contemporary world.

Same as L48 Anthro 3693
Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L52 ARC 373 Introduction to GIS for Anthropologists
Use of GIS is rapidly becoming standard practice in anthropological research. This course will introduce students to the basic theories and techniques of GIS. Topics will include the application of GIS in archaeological survey and ethnographic research, as well as marketing, transportation, demographics, and urban and regional planning. This course will enable students to become familiar not only with GIS software such as ArcGIS, but also the methodologies and tools used to collect and analyze spatial data. Students will gain expertise engaging with data situated across a number of spatial scales, from households, communities and cities to landscapes, nation-states, and global phenomena.

Same as L48 Anthro 373
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L52 ARC 374 Social Landscapes in Global View
From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as "landscapes." This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We cover various urban landscapes, rural landscapes, nomadic landscapes (and others) and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 BCE to 2009 CE and we cover all the continents. This course also traces the intellectual history of the study of landscape as a social phenomenon, and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world and trace the global currents of your social landscape!

L52 ARC 376 Warriors, Merchants, Monks and Courtesans: Ancient Narratives of Globalization in Google Earth
This introductory seminar-style course examines the history of globalization through the narrative accounts of those who lived along some of the great trade routes of the Old World. Through a combination of in-class discussion and hands-on tutorials and projects in Google Earth, we examine how day-to-day local interactions and the experiences of individuals contributed to broader cultural exchanges and the shaping of ancient cosmopolitan centers. We use a bottom-up approach to understand the process of globalization, and why it is not only a phenomenon of the modern world. This course covers a large geographic and temporal span, but it is not about memorizing lists of dates and places or putting dots on a map — it is about learning how to interpret multiple strands of knowledge and put them together into a cohesive narrative of history. The course covers four broad anthropological themes related to Old World history and globalization in conjunction with weekly lessons in Google Earth; there are no prerequisites for either. The knowledge and skills gained in the course lead to a final independent research project consisting of a short paper and an interactive digital map that can be shared online through the Google Earth community.

Same as L48 Anthro 376
Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S
L52 ARC 3775 Ancient Eurasia and the New Silk Roads
This course explores the rise of civilization in the broad region of Eurasia, spanning from the eastern edges of Europe to the western edges of China. The focus of the course is the unique trajectory of civilization that is made evident in the region of Central Eurasia from roughly 6000 BC to the historical era (ca. AD 250). In addition to this ancient focus, the course aims to relate many of the most historically durable characteristics of the region to contemporary developments of the past two or three centuries. F–Judaism, Christianity and Islam — through a study of archaeology, history, literature, politics and theology from antiquity to contemporary times. A senior seminar in Jewish, Islamic, and Middle Eastern Studies. During winter break, the class goes to Jerusalem as part of the course. Student portion of travel costs TBA. Students unable to make the trip receive a reduction to 4 units of course credit. Preference given to seniors majoring in Jewish, Islamic, and Middle Eastern Studies. Others may enroll with instructor's permission.
Same as L48 Anthro 3775

Credit 5 units. EN: H

L52 ARC 403 Culture and History of the Southwestern United States
This course integrates archaeological, historical, and early ethnographic dimensions of American Indian societies in the southwestern United States and northwest Mexico, a region famous for its challenging environment, cultural diversity, and the contributions made by its Native inhabitants. Emphasis is placed on the development of sophisticated desert agriculture and on the rise of regionally integrated cultures including Chaco Canyon and Mesa Verde. The impact of Spanish, Mexican, and American colonization are explored. Ethnographies of Tohono O'odham (Papago), Hopi, Zuni, Rio Grande Pueblo, and Navajo societies are discussed.
Same as L48 Anthro 403
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS EN: S

L52 ARC 420 Plundered Past: Archaeology’s Challenges in the Modern World
The public imagination thrills at the fantastic adventures of Indiana Jones and Laura Croft, Tomb Raider; but the reality of modern archaeology is more complex, ethically challenging and interesting than a simple treasure hunt. In the U.S. and Canada, our science museums and museums of anthropology still display artifacts that are regarded as sacred and culturally definitive by Indian nations, although such holdings are now subject to negotiation and repatriation. Art museums in Europe and the U.S. are still stocked with looted ancient masterpieces that are revered as vital heritage by the nations from which they were stolen. We display looted art alongside a much smaller number of legitimately excavated artifacts of masterpiece quality, so it is no surprise that our popular images of archaeologists as avid and undiscerning collectors raise little concern. But modern archaeologists are not extractors of art or even of scientific information, from places as passive and inert as the museums’ objects ultimately occupy. Archaeologists work with living people inhabiting societies and states that care deeply about their pasts and the relics of it. They are active agents engaged with many other people in the production of knowledge about the past. In our rapidly shrinking world, educated sensitivity to the many ancient cultural legacies that shape the values of modern global society is more than a moral imperative; it is a basic form of collaboration in the common project of survival. Archaeologists are ethically charged to advance that project through education about the complex contemporary arena of artifacts, sites, and information they occupy.

L52 ARC 421 Minoan and Mycenaean Archaeology
Same as Art-Arch 421
Credit 3 units.

L52 ARC 4212 Advanced Methods in Paleoethnobotany
Advanced analytical techniques for the study of archaeological plant remains. Tools and methods for micromorphological recognition, including electron microscopy. Photomicroscopy at low magnification, management, tabulation and reporting of data. Prerequisite: Anthro 4211 or permission of instructor.
Same as L48 Anthro 4212
Credit 3 units. A&S IQ: SSC Art: SSC

L52 ARC 4214 The Archaeology of Food and Drink
Studies of past human diets have moved beyond analyses of animal bones and seeds to encompass new theoretical goals and innovative analytical techniques. In this seminar-style course, students will explore methods of understanding food-related social interactions such as evidence including residues, ancient DNA, isotopes and trace elements, along with more traditional artifacts and archaeobotanical and zooarchaeological remains. By examining case studies from around the world, we evaluate the current state of research attempting to integrate the biological and cultural aspects of eating and drinking.
Same as L48 Anthro 4214
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L52 ARC 4226 Ancient Athens
Athens was one of the great cities of antiquity. From lavishly decorated marble temples on the Acropolis, to public office buildings and inscriptions in the Agora (civic center), to the houses of the living and the monuments for the dead, the city has left a rich record of its material culture. These behavioral and objects, together with an exceptionally large number of literary and historical texts, make it possible to paint a vivid picture of the ancient city. The course concentrates on the physical setting and monuments of Athens, as revealed by both archaeology and
texts, and how they functioned within the context of Athenian civic and religious life. Prerequisite: Classics 345C, Classics 350 or permissions of instructor.

Same as L08 Classics 426
Credit 3 units. A&S IQ: HUM, LCD BU: HUM

L52 ARC 4375 Ancient Greek Sculpture in Context
Sculpture counts among one of the greatest artistic achievements of ancient Greece, and one that has had the greatest impact on the art of later periods. This course focuses on original works of art of the Archaic and Classical periods (600–300 BCE), placing emphasis on how study of their contexts — the places in which they were produced, displayed and found — contributes to our understanding of their place in the ancient world. Background material, which is covered at the beginning of the semester, includes the origins of monumental Greek sculpture at the beginning of the Archaic period (late 7th to early 6th century BCE), and the stylistic development of the Archaic and Classical periods. We then proceed to discussion of various types of sculpture (architectural, cult statue, votive, commemorative, funerary) and how these works functioned within the context of the Panhellenic sanctuary, the city sanctuary, the secular center of the city, and the necropolis. In a different view of context, we also consider sculpture recovered from ancient shipwrecks, looted art on its way to the ancient Roman art market. Prerequisite: Art-Arch 331 or permission of the instructor.

Same as L01 Art-Arch 4375
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L52 ARC 4393 The Archaeology of Trade and Exchange
Studies of trade and exchange are fundamental to our past, as cultures in contact result in new imaginations of self, communities, and place in the world. This course engages in archaeological and anthropological discussions about the interconnectedness that results from trade. This seminar concentrates on the discourse of material trade and the mechanisms for exchange, redistribution, dependency and resistance. It also examines the immaterial exchange of ideas, perceptions and values that alter concepts of identity, space and time. Globalization, political economies, and power are also addressed, along with ideas about territory, value, and social and political consequences of trade.

Same as L48 Anthro 4393
Credit 3 units. A&S IQ: LCD, SSC BU: BA, IS EN: S

L52 ARC 4561 Ceramic Analysis
Methods, techniques, and models for analyzing prehistoric ceramics. Students will conduct hands-on analyses of collections from Cahokia Mounds and the St. Louis region. Prerequisite: Anthro 314, graduate standing, or permission of instructor.
Credit 3 units. A&S IQ: SSC Art: SSC

L52 ARC 4562 Artifact Analysis: Mississippian Cultures
The purpose of this course is to provide students with an introductory, hands-on experience of the methods employed in the analysis of archaeological materials common to the Mississippian culture. Students conduct class projects based on collections from Cahokia Mounds and the St. Louis region. Prerequisite: Anthro 314 or equivalent, or graduate standing, or permission of instructor.

Same as L48 Anthro 4562
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L52 ARC 4565 New Advances in Archaeology
Archaeological research is moving at an increasingly rapid pace, with advances in archaeological methods and theory propelling new interpretations and understandings of archaeological findings. This course we focus on contemporary developments in archaeology, with an emphasis on current trends in theory, method and discovery. The objectives of the course are to place emerging trends in archaeological research in a historical context, to understand new methods, and to explore how various theoretical approaches influence the conduct of archaeological research around the globe.

Same as L48 Anthro 4655
Credit 3 units. A&S IQ: SSC Arch: SSC EN: S

L52 ARC 4661 Historical Archaeology
This course focuses upon the methods and techniques employed in historical archaeology. We will include method of integration of written records through contextual studies, discussion of specific artifact type identification techniques, and seminar type treatments of other aspects of the field. The class will include some hands-on lab work, working primarily with materials from the first American fort west of the Mississippi (Fort Belle Fontaine) and two Civil War period mansions. Prerequisite: 3 credits of archaeology or permission of instructor.

Same as L48 Anthro 4661
Credit 3 units. A&S IQ: HUM, LCD, WI Art: HUM

L52 ARC 4662 Ethnoarchaeology
Theories, methods and techniques applied by archaeologists to contemporary societies and materials to aid their understanding of extinct societies. Analysis of ethnographic research in both the Old and New Worlds. Participation with Profs. Watson, Browman, and Fritz are included in relevant topics. Prerequisites: Anthro 160B or 190BP, and permission of instructor.

Same as L48 Anthro 4682
Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L52 ARC 4752 Practicing Archaeology
Credit 3 units. EN: S

L52 ARC 4761 Pleistocene Peopling of Eurasia
The paleolithic archaeology, human paleobiology, and paleoecology of the geographical expansions and adaptations of Eurasian humans through the Pleistocene. Prerequisite: Anthro 150A or 190B.

Same as L48 Anthro 4761
Credit 3 units. A&S IQ: LCD, SSC Art: SSC

L52 ARC 4771 Out of the Wild: Domestication and Socioeconomic Diversity in Africa
The reason for the beginnings and spread of food production during the early Holocene in so many parts of the world is one of the most interesting questions in archaeology. It now seems likely that there are many different pathways to domestication. In Africa, there is a record of up to several million years of human existence as hunter-gatherers before some human populations adopted food production. Domestication of plants and animals about 10,000 years ago resulted in fundamental changes in human societies. It provided the basis for the increase in settlement densities, specialization and social stratification, and general decrease in mobility and dietary diversity, characteristic of non-hunter-gatherer societies in the modern world. In this
L52 ARC 4792 The Many Paths Leading Toward the Creation of the Ancient City

The purpose of this class is to examine the emergence of the Ancient City across the globe. We want to begin with the concepts of urbanism, city and metropolis. These are words whose derivation are to be found in the classical languages of the Mediterranean. Is there any means to reach an understanding of how other civilizations and societies characterized these special places on the landscape? In the past, many scholars have argued that market economies and state-level societies are essential to their existence. Such arguments reflect issues of sustainability in terms of the economy and the effective control of large populations through state-level institutions. While we want to understand the role of the economy and the level(s) of political integration involved in the process of urbanism, are there other cultural institutions such as religion that play a much larger and more significant role? Do these places reflect the "citizens" perception of the cosmos? Same as L48 Anthro 4792

Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L52 ARC 4803 Advanced GIS Modeling and Landscape Analysis

The aim of this course is to learn to analyze archaeological data in terms of its spatial layout, geography, ecology, and temporal dynamics, using Geographic Information Systems and associated computer modeling techniques. A focus is placed on the relationship between natural environments, cultural geography, and the mapping of archaeological landscapes, and on the archaeologist's ability to accurately recover, reconstruct and analyze this relationship in a virtual environment. Same as L48 Anthro 4803

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L52 ARC 481 Zooarchaeology

Methods and techniques of analysis of faunal remains recovered in archaeological context, including aging, sexing, and the study of cultural modification of archaeological faunas. Same as L48 Anthro 481

Credit 3 units. A&S IQ: NSM Art: NSM

L52 ARC 482 Experimental Zooarchaeology

Same as Anthro 482

Credit 3 units.

L52 ARC 489 Pathways to Domestication

Survey of the evidence of the domestication of plants and animals, focusing on processes leading to domestication, and on the recognition of pristine features of domestication in the archaeological record. Prerequisite: one 300- or 400-level course in archaeology.

Credit 3 units.
Credit variable, maximum 3 units. EN: S

L52 ARC 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories
This seminar examines the theory and the cultural history of the collecting of art objects and artifacts from a range of cultures and periods, considering how and why both individuals and institutions create collections. What social and psychological factors drive this passion? What are the various cultural, political and aesthetic priorities that have driven this practice historically? How is cultural patrimony defined, and how do law, the art market and cross-cultural ethics impact the placement, study and display of a culture’s material heritage? We build the seminar around the history of collecting in America, with a focus on Midwestern examples, and particularly, important case studies in St. Louis. We, for example, consider the significant local collections built by Joseph and Emily Rauh Pulitzer (modern art), and Morton May (modern and oceanic art), as well as the histories of both modern and non-Western collections now owned by the St. Louis area museums. This course is complemented by various local field trips (SLAM, Pulitzer, Kemper and Cahokia). Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.
Same as L01 Art-Arch 4975
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L52 ARC 488 Intensive Writing Course: Archaeology
Designed for majors who have not satisfied their college writing requirement in another fashion. This course ordinarily is taken in tandem with another 300- or 400-level course in Archaeology, with the required permission to enroll granted by the instructor in that course. The student prepares a portfolio of papers, which undergo revision and rewriting, as assigned by that course instructor. In some cases, this writing-intensive course may be taken as an independent study course with one of the Archaeology professors. This latter option requires permission of both the department and the instructor. When the course is integrated with another 300- or 400-level course, credit is limited to 1 unit. If taken as an independent study course, credit is no more than 3 units. Permission of instructor required; limited to juniors and seniors.
Credit variable, maximum 3 units. A&S IQ: SSC, WI Art: SSC EN: S

Art History and Archaeology
Art history provides the opportunity to explore the fine arts, architecture and visual culture as well as the social, aesthetic and personal values that helped to shape these disciplines.

Students are introduced to the study of art history and archaeology through general introductory courses that focus on European, Asian and American art as well as world archaeology. In more advanced courses, students enjoy studying original works of art owned by the Washington University Mildred Lane Kemper Art Museum, the Saint Louis Art Museum, the Pulitzer Arts Foundation, and local private collectors. Students are also invited on annual field trips organized by the faculty to visit cities with major museum collections.

A variety of career paths are available to majors in art history and archaeology. Many graduates earn advanced degrees in both related and unrelated fields and work in museums or academia or for art publishers, commercial art galleries, auction houses, nonprofit organizations and other arts-related organizations.

<td></td>
<td><strong>6</strong></td>
</tr>
</tbody>
</table>

*A A score of 4 or 5 on the AP Art History exam may be substituted for Art-Arch 113. To substitute a 4 or 5 on the AP Art History exam, a student must earn at least a B in a related upper-division departmental course.

**Elective credits:**

24 upper-level (300-level or above) art history credits. (Students may substitute one 200-level course for one upper-level course). One course at the 300-level or above is required in *three of the five distribution areas:* Ancient/Medieval, Renaissance/Baroque, European and American Modern, non-Western, and Architecture. Majors are required to take two 400-level seminars in any field, as long as they are home-based in the department and have different instructors; this is considered the Art History "Capstone Experience." Students may substitute one studio course of 3 or more credits taken at any level in the Sam Fox School (or at another institution, with prior permission) for a 300-level course. Students undertaking honors complete 3 additional credits of independent study during the second semester of their senior year. All courses for the major must be taken for a letter grade.

Majors are encouraged to acquire a good reading knowledge of French, Italian or German. For a concentration in ancient Mediterranean art and archaeology or Medieval art, either Greek, Latin or both will be useful. Similarly, Chinese, Japanese, Hindi or Arabic, for example, will be useful for a concentration in non-Western art. Majors are also encouraged to take studio courses in art and/or architecture in the Sam Fox School of Design & Visual Arts.

**Prerequisites:** Students should have the proper prerequisites before enrolling in 300- or 400-level courses. Courses taken in other departments (including courses in the Sam Fox School of Design & Visual Arts) do not count for the major unless they are cross-listed as Art History and Archaeology courses.

**Additional Information**

**Internships:** Internships in the curatorial and education departments of local museums, arts organizations or commercial galleries are available to undergraduate art history and archaeology majors. Students may enroll in up to 6 credit hours of a voluntary or paid internship. Such internships provide invaluable experience and may help lead to employment opportunities after graduation. Internship credit may not be applied to the major, but it does count toward graduation. Students seeking academic credit should make arrangements with the department before the internship begins.

**Study Abroad:** Students are encouraged to participate in a variety of international programs, which are available in a number of overseas locations. Although students are strongly encouraged to acquire and use foreign languages, programs based in English are also available in most countries. Students may work with the department's study abroad adviser to find the program that best meets the student's particular interests and needs.

**Senior Honors:** Exceptional students who hold a 3.65 grade-point average or better in advanced (300-level or higher) courses and an overall GPA of 3.65 may apply to work toward honors in the department. Honors are awarded to students for maintaining their GPA during their senior year and writing an honors thesis (enrolling in Art-Arch 499 each semester of the senior year); this thesis is then defended before at least two full-time faculty members, who are usually both from the department. Students completing the thesis accrue 33 course credits (rather than the usual 30) in the major.

**Minors**

**The Minor in Art History and Archaeology**

**Units required:** 18

*A A score of 4 or 5 on the AP Art History exam may be substituted for Art-Arch 113. To substitute a 4 or 5 on the AP Art History exam, a student must earn at least a B in a related upper-division departmental course.

**Elective courses:**

Four courses at the 300 level or above must be chosen from at least two of the following areas:

1. AM: Ancient Mediterranean and Medieval Art and Archaeology
2. RB: European Renaissance and Baroque Art
3. MEA: Modern European and American Art
4. NW: Non-Western Art and Archaeology (e.g., Asian, Islamic, Oceanic or African)
5. A: Architecture

Each of these upper-level courses must be taken for a letter grade.
Additional Information

One L01 (Art History and Archaeology) course at the 200 level counts toward the minor. Alternatively, students in Arts & Sciences, the Olin School of Business, and the McKelvey School of Engineering may substitute one studio course of 3 or more credits taken at any level in the Sam Fox School (or at another institution, with prior permission) for a 300-level course. Courses in the colleges of architecture or art do not count for the minor. Students should have the proper prerequisites before enrolling in 300- or 400-level courses. Courses in other Arts & Sciences departments do not count toward the minor unless they are cross-listed as L01 (Art History and Archaeology) courses at the 300 level or above. At least two of the 300-level courses must be completed in residence at Washington University. Space in 400-level seminars is limited, and majors will be given priority over minors, even from wait lists. Internship credit may not be applied to the minor, but it does count toward graduation.

Courses

Visit online course listings to view semester offerings for L01 Art-Arch ([https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L01&crsvl=1:4](https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L01&crsvl=1:4)).

L01 Art-Arch 106 First-Year Seminar: Van Gogh and the Avant-Garde

This first-year seminar focuses on the art and career of Vincent Van Gogh, and his relationship to artists of the 1880s in France. We explore his art in connection to the movements of Impressionism, Japonism and Symbolism. We examine the avant-garde world of Paris, and Van Gogh's relationship to such figures as Gauguin, Bernard and Toulouse-Lautrec. The larger current of fin-de-siècle nostalgia for the countryside informs our study of his work in the south of France. Van Gogh's life and the critical reception of his art offer an excellent opportunity to study how the legends of modern art are formed. Visits to the Saint Louis Art Museum complement our study. Readings include the artist's letters, critical studies and biographies of Van Gogh and key figures in his circle. No prerequisite, but either Art-Arch 112 or co-enrollment with Art-Arch 211 is recommended. Credit 3 units. A&S: FYS Art: AH BU: HUM

L01 Art-Arch 107 First-Year Seminar: Public Art/Art and Its Publics in St. Louis

The course considers the history and functions of public art, with special attention to public art in St. Louis. Part of our investigation is to inquire into the conditions that seem to be necessary for visual art to be considered public. So we consider not only the obvious forms of public art in urban sculpture and murals, but also less traditional intersections of art and public in such sites as video and the internet. We also examine the operations of institutions — national and local arts agencies, international exhibitions, nonprofit centers and the like — that foster a public engagement with contemporary art. After studying aspects of the history of public art, we proceed to selected case studies today, many of them in St. Louis, including projects for Arts in Transit (the MetroLink), the Regional Arts Commission, Grand Center, and Missouri SOS (Save Outdoor Sculpture). This leads us, finally, to theorize the function of public art in a variety of contemporary forms. Local field trips to study important public art; visiting speakers from arts agencies; student projects proposing a work of public art in St. Louis, which acquaint students with procedures in arts administration. Credit 3 units. A&S: FYS Art: AH BU: HUM EN: H

L01 Art-Arch 1075 First-Year Seminar: What's New? Contemporary Art in St. Louis and Beyond

Freshman Seminar. This course introduces a broad range of practices within the field of contemporary art (art of the last two to three decades), paying particular attention to museum collections and exhibitions in St. Louis (Kemper Art Museum, Saint Louis Art Museum, Contemporary Art Museum, the Pulitzer Foundation for the Arts, and the Museum of Contemporary Religious Art). Works in both new and traditional media are discussed (ranging from photography and sculpture to installation, performance, film and mixed media). Readings include artists' statements, theoretical texts, art criticism, and art historical essays. Students with little or no background in art history are encouraged to register. Class meetings are complemented by local field trips and some visits to artists' studios. No prerequisite. Credit 3 units. A&S: FYS A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 1076 A Big Beautiful Wall: Contemporary Art of the U.S.-Mexico Border and Beyond

Over the course of the last U.S. election cycle, the nation’s border with Mexico proved to be a galvanizing issue. The exhortation to build a "big, beautiful wall," however, is nothing new in the history of U.S.-Mexican international relations. Since its establishment by the 1853 Gadsden Purchase, the border has loomed large in both the U.S. and Mexican cultural imaginaries, and in the post-Chicano period, spurring the production of politically engaged art. This course considers the U.S.-Mexico border and its artistic production in-depth, as well as the art of other border regions around the world. Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HT Art: AH BU: HUM, IS EN: H

L01 Art-Arch 1095 First-Year Seminar: Art in the Golden Age of Venice

The art and architecture of Venice are inextricably linked to the city's distinct sociopolitical structure, cultural past, and geography. This freshman seminar will consider the arts in Renaissance Venice within the city's unique context. Exploring the influence of the "Myth of Venice," we will examine the styles of painting, sculpture, and architecture that were specific to Venice — and very different from contemporaneous developments in Rome or Florence. We will also study the unique physical characteristics of Venice, its economy and society, its political and religious life, and its cultural culture. We will also learn about its food and music while we study the magnificent works of its most celebrated artists, including Titian, Tintoretto and Veronese, to name a few. The course will address issues such as the family workshop, the introduction of oil paint, the role of antiquity in a city without ancient ruins, domesticity, and the ceiling painting. From the private patronage of its confraternities, or scuole, to public programs sponsored by the Great Council, the course will examine the reflections of the "ideal state" in the art and architecture of the Serenissima, the most serene Republic. Course is for first-year, non-transfer students only. Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Art: AH BU: HUM IS EN: H
L01 Art-Arch 111 Introduction to Asian Art
Beginning with the birth of the Buddha and continuing through the present, this course introduces the most influential art and architecture from all across Asia. Each class covers both historic and modern works to emphasize the continuing dialogue between past and present in Asian art today. Classroom lectures; smaller, bi-weekly discussion sections. No prerequisite. Credit 3 units. A&S IQ: HUM, LCD Art: AH, HUM BU: HUM, IS EN: H UColl: CD

L01 Art-Arch 113 History of Western Art, Architecture and Design
A history of the visual arts, including architecture, sculpture, painting and design, from the ancient world to the present with emphasis on the relationship of art to society and to political and cultural events. Credit 3 units. A&S IQ: HUM, Arch: HT Art: AH BU: HUM, IS EN: H

L01 Art-Arch 1135 First-Year Seminar: The World of Cleopatra
Cleopatra — the last queen of ancient Egypt — captivated her contemporaries and has fascinated the Western world ever since her famous suicide by asp in 31 BCE. She was a woman of contrasts: Pharaoh of Egypt and Greco-Macedonian queen; seductive woman and shrewd political strategist; a ruthless monarch using every means available to consolidate her position in the face of the encroaching power of the Roman Empire. Through texts and material culture, the seminar seeks to understand Cleopatra in the context both of her native Egypt and of the wider Mediterranean world. We thus examine the traditions of Pharaonic Egypt; the historical events that brought Egypt under the control of the Macedonian Ptolemies (Cleopatra’s dynasty); the wider stage of East-West tension and conquest in which Cleopatra struggled to maintain her power; her relationships (political and personal) with famous men of her day (Caesar, Herod, Mark Antony); her capital city of Alexandria, the largest metropolis of its day; Cleopatra’s brilliant court and its luxury arts; and finally the many Cleopatras that have populated history and literature of later times. We emerge with a sense of Cleopatra, both as a unique individual and as a product of her time. Same as L08 Classics 1135 Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: BA

L01 Art-Arch 116 Pompeii: Uncovering the Past
This course examines the Roman city of Pompeii from archaeological, art historical and literary perspectives. Topics include the city’s public spaces and religious sanctuaries, its grand mansions and common houses, its political systems and leisure activities. Class discussions probe the problems inherent in the interpretation of a city captured in a moment of crisis, and how ancient literary tropes have affected our understanding of the archaeological remains. Students also investigate modern interpretations of the site in the form of novels, exhibitions and documentaries. Freshmen and sophomores only. No prerequisites. Credit 3 units. A&S IQ: HUM Art: AH BU: HUM, IS EN: H

L01 Art-Arch 146 First-Year Seminar: Beijing and the Forbidden City
The Forbidden City has been the heart of Beijing for nearly six hundred years, and continues to influence both China and its capital today. Through art, architecture and urban design, this seminar examines the intertwined relationship of the palace and its surrounding city: their origins and constructions, the coded symbolism of their plans, their most influential characters, their modern identities as the backdrops to major political events, and their roles in contemporary art and the Olympics. This discussion-based seminar also aims to help students develop their skills in writing and critical analysis as a foundation for future classes. No previous experience with art history or Asian studies required. Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Art: AH BU: HUM, IS EN: H

L01 Art-Arch 175 Mythologies of Modern Art: Face, Fiction and Film
The history of art—and its translation into other media—has celebrated the cutting-edge, the experimental, and the controversial, especially in its examination of modern artists and their work. This course introduces students to life and work of modern artists Paul Gauguin, Vincent van Gogh, Paul Cézanne, Henri Matisse, and Pablo Picasso. From this introduction, students will then interrogate the representation of these artists’ lives and works in multiple media including fiction literature and film. This course includes visits to the Saint Louis Art Museum and required film screenings. Students will work to collaboratively transform their research into a dramatization of two artists’ lives and works as part of their final project. Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM EN: H

L01 Art-Arch 190B Introduction to Archaeology
Archaeology plays a critical and unique role in understanding the human past. Through study of the methods and theories of archaeology, and a survey of important firsts in the human past, this course introduces students to the way archaeologists use material culture to reconstruct and understand human behavior. Chronologically ordered case studies from around the globe are used to look at social, ecological and cultural issues facing humans from the earliest times to the present. Students gain practice reconstructing the past through hands-on participation in two one-hour labs focusing on lithics and animal bones. By the end of the course, students are expected to be able to think critically about how the past is presented, and why, and the importance of the past as it relates to the present and future. Same as L48 Anthro 190B Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA

L01 Art-Arch 215 Introduction to Modern Art, Architecture and Design
An introduction to major developments in modern art, architecture and design in Europe, the Americas and across the globe from the mid-19th century to the present. Focus is on the history and theories of modernism and its international legacies, and the relationship of the visual arts, architecture and visual culture more generally to the social, cultural and political contexts of the modern era. While the precise topics covered may vary from one instructor to another, foundational movements and trends discussed typically include Beaux-Arts
style, the Arts and Crafts Movement, Impressionism, Symbolism, Art Nouveau, Cubism, Dada, Surrealism, Purism, Art Deco, the Bauhaus, the International Style, Abstract Expressionism, Pop Art, Minimalism and Postmodernism. Cross-currents in various media are emphasized as we seek to understand the origins and complexity of modern visual forms in relation to political and cultural history and to critical theory. Students engage a wide range of readings in historical sources, theories composed by artists, architects and designers, critical responses to the arts, and secondary critical literature.
Credit 3 units. A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 225 Matisse and Picasso
These artists are considered individually, and in relation to such artistic movements as Cubism, Fauvism and Surrealism. Examines work in all media (painting, sculpture, decorative arts, theater and printmaking). Explores response to the political environment of modern France, including the two World Wars. Weekly class meetings, plus several required visits to the exhibit and to special lectures at the Saint Louis Art Museum. Class limited to 10. Prerequisite: Art-Arch 112 or 211, or permission of instructor.
Credit 3 units. Art: AH BU: HUM

L01 Art-Arch 232 Myths and Monuments of Antiquity
An introduction to the ancient world (circa 3500 BC to AD 400) based on masterpieces of art and architecture from Mesopotamia, Egypt, Greece, and the Roman Empire. The monuments are accompanied by a selection of myths and documents representing the cultural life of these ancient societies and constituting their legacy to our modern world.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, HUM BU: HUM EN: H

L01 Art-Arch 299 Internship in the Art Community
Prerequisite: a major or minor in art history; permission of the undergraduate adviser requested in advance; and a letter from the sponsoring institution stating the nature of the internship.
Credit variable, maximum 3 units.

L01 Art-Arch 3001 Writing Intensive Topics
TBD
Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 3037 Northern Renaissance Art
A survey of the major artistic developments in Northern Europe, ca. 1400–1575. The course looks at the production of painting, sculpture, printmaking, drawing, manuscript illumination and architecture in social, political and religious contexts. The major artists covered include Jan van Eyck, Rogier van der Weyden, Albrecht Durer, Hans Holbein, Hieronymus Bosch and Pieter Bruegel the Elder.
Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM, IS EN: H

L01 Art-Arch 3090 African Art in Context: Patronage, Globalisms, and Inventiveness
This course offers an introduction to principal visual arts from Africa, prehistoric to contemporary. It explores traditions-based and contemporary arts made by African artists from across the continent in conjunction with their various contexts of creation, use, understanding and social history. Theoretical perspectives on the collection, appropriation and exhibition of African arts in Europe and North America will be examined. Course work will be complemented by visits as a group or independent assignments at the Saint Louis Museum, the Pulitzer Arts Foundation, and possibly a local private collection.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H UColl: CD

L01 Art-Arch 311C Ancient Civilizations of the New World
An examination of the Inca empire in Peru, and the Maya and Aztec empires in Mexico, through the inquiry into the roots, development, form, and evolutionary history of pre-Colombian civilization in each region from its earliest times to the rise of the classic kingdoms. Examples of respective artistic accomplishments are presented and discussed.
Same as L48 Anthro 310C
Credit 3 units. A&S IQ: HUM, LCD Arch: SSC BU: HUM

L01 Art-Arch 3111 Art in the Egypt of the Pharaohs
A penetrating study of the artistic achievements in ancient Egypt during the Old, Middle and New Kingdom (c. 3000-1100 BC). The great monuments of Egypt will be considered both for their aesthetic importance and as expressions of the superior culture developing, flourishing and declining in the pristine valley of the Nile. Prerequisite: sophomore standing or permission of the department.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 3112 Art & Archaeology of Cleopatra’s Egypt
This course is an introduction to the art and archaeology of Egypt from its conquest by Alexander the Great (332 BCE) to the early fourth century CE. It will examine the rich and multifaceted history and artistic legacy of Egypt under the Ptolemies and their last queen Cleopatra, followed by the Roman conquest under Emperor Augustus up to the flourishing of Egyptian Christianity. Students will become familiar with a wide range of ancient sources, including documentary and literary texts, coins, architecture, paintings and sculpture. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215), or permission of instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: IS EN: H

L01 Art-Arch 3212 Art & Archaeology of Cleopatra’s Egypt
A survey of the artistic achievements and material culture of the Greeks in the first millennium BCE (Iron Age through the Hellenistic period). Development of architecture, sculpture and painting, as well as minor arts and utilitarian objects, with emphasis on the insights they offer into Greek society and interactions with the wider Mediterranean world.
Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM, IS EN: H

L01 Art-Arch 3330 Greek Art and Roman Painting
This course provides a survey of the major achievements of ancient Greek and Roman painting, broadly understood and encompassing wall painting, panel painting, painted pottery, and mosaic. We will study monuments ranging over a millennium in time and located throughout the ancient Mediterranean. Particular attention will be paid to the social, political, and religious aspects of ancient Greco-Roman painting, and to questions of innovation in artistic practice. Special emphasis will be placed on students’ cultivation of the tools of art-historical
L01 Art-Arch 334 Roman Art and Archaeology
The art and archaeology of the Romans, with emphasis on the late Republic and the Imperial period. Major monuments of sculpture and architecture, as well as town planning, domestic architecture and the minor arts are used as evidence for reconstructing ancient life.
Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 3412 Japanese Art
Surveying the arts of Japan from prehistory to present, this course focuses especially on early modern, modern, and contemporary art. Emphasizing painting, sculpture, architecture and print culture, the course also explores the tea ceremony, fashion, calligraphy, garden design and ceramics. Major course themes include collectors and collecting, relationships between artists and patrons, the role of political and military culture or art, contact with China, artistic responses to the West, and the effects of gender and social status on art.
Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM, IS EN: H

L01 Art-Arch 3415 Early Chinese Art: From Human Sacrifice to the Silk Road
This course examines Chinese art and material culture from the prehistoric period through the end of the medieval Tang dynasty, when the Chinese capital boasted a cosmopolitan population of more than 1 million people. Topics covered include Neolithic ceramics and jades, the bronzecasting tradition, funerary art and architecture, the Terracotta Army, the origins of Chinese brush arts, Buddhist painting and sculpture, and the varied exotica of the Silk Road. Each class teaches recent works together with the ancient to demonstrate how the origins of Chinese art and architecture continue to influence contemporary works.
Prerequisite: Art-Arch 111 Introduction to Asian Art or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM, IS EN: H

L01 Art-Arch 3422 Art of the Islamic World
This course surveys the art and architecture of societies in which Muslims were dominant or in which they formed significant minorities from the seventh through the 20th centuries. It examines the form and function of architecture and works of art as well as the social, historical, and cultural contexts; the patterns of use; and the evolving meanings attributed to art by the users. The course follows a chronological order, and selected visual materials are treated along chosen themes. Themes include the creation of a distinctive visual culture in the emerging Islamic polity; the development of urban institutions; key architectural types such as the mosque, madrasa, caravanserai, palace, and mausoleum; art objects and the art of the illustrated book; cultural interconnections along trade and pilgrimage routes; and westernization and modernization in art and architecture.
Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM, IS EN: H

L01 Art-Arch 3425 Classical to Contemporary Chinese Art
Surveying Chinese art and architecture from the 10th century through today, this course examines classical and imperial works as the foundation for modern and contemporary art. Engaging with the theoretical issues in art history, we also pay particular attention to questions of gender, social identity, cultural politics and government control of art. No prerequisites.
Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM, IS EN: H

L01 Art-Arch 3426 Modern & Contemporary Chinese Art
This course will explore the ways in which Chinese artists of the 19th, 20th, and 21st centuries have defined modernity and tradition against the complex background of China’s history. By examining art works in different media along with other documentary materials, we will also engage with theoretical issues in art history, such as modernity, cultural politics, and government control of art.
Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM, IS EN: H

L01 Art-Arch 3442 Chinese Painting, Then and Now
Tracing the unbroken history of Chinese painting from the first through 21st centuries, we explore the full evolution of its traditions and innovations through representative works, artists, genres and critical issues. From its ancient origins to its current practice, we will cover topics such as classical landscapes by scholar painters, the effects of Western contact on modern painting, the contemporary iconography of power and dissent, and theoretical issues such as authenticity, gender, and global art history.
Prerequisites: Intro to Asian Art (L01 111) or one course in East Asian Studies recommended.
Credit 3 units. A&S IQ: HUM, LCD Arch: AH, GFAH BU: HUM, IS EN: H

L01 Art-Arch 3482 The Floating World of Japanese Prints
The relationship between Japanese printmaking and popular culture from 1600 to 1900. Woodblock and copperplate printmaking techniques, key masters, kabuki drama, pleasure quarters, fiction, travel, modernization will be explored.
Prerequisite: Art-Arch 111EQ, or background in printmaking or Japanese culture.
Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM, IS EN: H

L01 Art-Arch 3545 The Art and Architecture of Ancient Mesoamerica: Objects of Ritual, Places of Power
This course examines the artistic and architectural achievements of the civilizations of ancient Mesoamerica, a cultural region covering most of modern-day Mexico, Guatemala, Belize and Honduras. From the emergence of complex societies in the second millennium BC through the rise of the spectacular cities of the Maya and ending with the violent fall of the Aztec Empire in the 16th century AD, rulers of ancient Mesoamerica relied on a consistent set of themes, images and media to proclaim their religious and political authority. This class explores how artists, farmers, priests, elites, kings and other community members created a vast array of images and objects that expressed cultural ideals, political and religious narratives, and distinct
ethic and civic identities. Prerequisites: Art-Arch 112, ARCH 200, Anthro 335 or permission of the instructor. Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

L01 Art-Arch 360 Renaissance Architecture
The modern concept of the architect as creator and genius began with Filippo Brunelleschi, the great innovator of 15th-century Florentine art. The course explores the spread of architecture and architectural theory as it begins in the hands of the innovator and is expressed and changed by other men of genius such as Leon Battista Alberti, Donato Bramante, Michelangelo Buonarroti and Andrea Palladio. Credit 3 units. Art: AH, GFAH BU: HUM

L01 Art-Arch 362 Italian Renaissance and Baroque Architecture
This course will survey the development of architecture in Italy from 1400 to 1700. From long-established medieval models we will explore the reintroduction and reinterpretation of Antiquity from the late 14th-century onward. The course will then explore how these foundational Renaissance ideals evolved to become Mannerism and found their ultimate expression in Bernini's Baroque. Following a chronological progression, the course will address the structures and theories of the period through its leading architects, Brunelleschi, Alberti, Michelangelo, Palladio and Bernini, among others. The course will explore a wide range of architectural types, from the centralized church to private palaces and villas. Further themes to be considered will include: the development of the architect as a professional, regional styles and their relationship with antiquity, patterns of patronage, and the interior. Prerequisites: L01 113 Intro to Western Art, Architecture and Design. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L01 Art-Arch 361 Art of Early Italian Renaissance
A survey of Italian Renaissance art from its origins to the end of the 15th century, examining artists such as Giotto, Masaccio, Donatello, Botticelli, and Leonardo da Vinci. Prerequisite: Art-Arch 1113. Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

L01 Art-Arch 362 Rome in the Renaissance
Renaissance Rome, called by many the Caput Mundi or capital of the world, was the cultural capital of Europe. It was a tumultuous, vibrant city characterized by ancient structures, medieval foundations and new artistic and architectural projects that were bigger and more luxurious than anywhere else in Europe. These new structures and masterpieces were incorporated into, and built on top of, the extant classical and medieval city. We will take a journey through the Renaissance city, using Andrea Palladio's two guidebooks of Rome, written in the 1550s. Maps, guides and artists' renderings of the city will contribute to the journey. We will discuss chapels, churches, palaces, monuments and piazzas as we encounter them. In addition to works of art and architecture, we will encounter legends (ranging from feasible to preposterous) and popular traditions associated with specific sites. Prerequisites: L01 113, L01 215, or permission of instructor. Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM, IS EN: H

L01 Art-Arch 363S 19th-Century Art and Visual Culture
This course introduces students to 19th-century art and visual culture. The story of the long-19th century (1789-1914) has tended to be taught as a series of -isms: Neoclassicism, Romanticism, Realism and Naturalism, Impressionism, and Symbolism, ending in fauvism. This course studies canonical artists and artworks in tandem with counter- or alter-histories of art in order to paint a more nuanced picture of the approximately 100 years (1814-1914) under exploration. This course questions how current stories of 19th-century art have been produced and codified. This course lastly highlights the continued relevance of 19th-century art and visual culture to contemporary artists working today. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215), or permission of instructor. Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 365 Baroque Art

L01 Art-Arch 3671 Michelangelo: Painter, Sculptor, Architect
An examination of his life, his work and his time. A consideration of the artist's painting, sculpture and architecture in relation to his contemporaries and to the broad historical, political and artistic currents of his day. Prerequisite: Art-Arch 112. Credit 3 units. Art: AH BU: HUM

L01 Art-Arch 370 The American West: The Image In History
Examines representations of the American West and of the frontier encounter between Euro-American and Native American cultures, from the early 19th to the early 20th centuries. We consider travel accounts, fiction painting, ledger drawings, photography and film in order to analyze the ways in which historical circumstances have shaped artistic and literary representations. At the same time, we look at how images and texts have shaped formative myths about the West that in turn leave their impact on history. Credit 3 units. A&S IQ: HUM, LCD Art: AH BU: HUM

L01 Art-Arch 371 American Art to 1900
A survey of broad social, cultural and nationalist themes in the visual arts from European contact with the New World to 1900. Topics include the encounter of New World cultures with European colonizers and the ongoing relationship between America and Europe; the changing image of the artist; the role of art in the formation of national identity. Prerequisite: Art-Arch 113 or permission of instructor. Credit 3 units. A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 372 Art and Culture in America's Gilded Age
Developments in American culture from the end of the Civil War to the turn of the century: novels, buildings, images, public and private spaces of this transitional period — a time of new class formation, of unparalleled social diversity, and of new urban forms. The connections between art, literature and social experience. Representative figures include: Henry James, Henry Adams, Louis Sullivan, Stanford White, Thomas Eakins, Louis Tiffany. Credit 3 units. A&S IQ: HUM Art: AH BU: BA, HUM
L01 Art-Arch 372 American Art to 1970
From the beginnings of modernism in the visual arts of the United States, around 1900, to Abstract Expressionism and the Beat aesthetic. Focus on the cultural reception and spread of modernism, native currents of modernist expression, from organicism to machine imagery, the mural movement and the art of the WPA, the creation of a usable past, abstraction and figuration, regionalism and internationalism, photography and advertising. Credit 3 units. A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 376 American Modernism, 1900–1940
American modernism: What is it? What is the nature of its encounter with mass culture? What happened to modernism as it migrated from its “high” European origins to its “middlebrow” version in America between the turn of the century and the eve of World War II? What was the rhetoric of modernism in everyday life — its impact on design, photography, advertising? In addition to the fine arts, we look at popular media, film and photography. Lecture/discussion. Prerequisite: Art-Arch 211 Introduction to Modern Art or permission of the instructor. Credit 3 units. A&S IQ: HUM, WI Art: AH, HUM BU: ETH, HUM

L01 Art-Arch 3782 Modern Art 1905–1960
This course investigates topics in European painting, sculpture, architecture, photography and film. Lectures and readings address major artistic developments, including Cubism, De Stijl, Futurism, Expressionism, Dadaism, Constructivism, Surrealism, the Bauhaus and Art Brut. Prerequisite: Art-Arch 211 or permission of instructor. Credit 3 units. A&S IQ: HUM: Art AH BU: HUM

The course surveys major tendencies in painting and sculpture from Fauvism in France and Expressionism in German to the beginnings of Postmodernism in photo-based work in the U.S. About two-thirds of the course treats European art, about one-third treats American art. Photography, architecture and work in other forms are considered selectively when pertinent to the individual class topics. Within the lecture topics, emphasis is on avant-garde innovation; the tension in modernist art between idealism and critique; reaction by artists to current events; relationship between art and linguistics, philosophy, literature, economics and science; the role of geopolitics in art production; intersections of art and society; the role of mass culture; issues of race and gender in the production and reception of art; the challenge to the concept of authorship and creativity posed by Postmodernism at the end of this period. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

L01 Art-Arch 3785 Photography in America
This course considers the practice and use of photography in America from its invention up to the present, offering various ways of thinking about the medium and its relation to society and culture. Students come to understand the ways photographic practices shape public perceptions of national identity, ethnicity and gender, nature, democratic selves, and a host of other concerns. We discuss famous practitioners such as Matthew Brady, Jacob Riis, Lewis Hine, Walker Evans, and Robert Frank. We consider not only the social and public uses of the medium through such episodes as the New Deal/FSA and photojournalism, but also the private explorations of “fine art” photographers, and the everyday practices of the snapshot. Prerequisites: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art or one course in American History, American Cultural Studies, or permission of the instructor. Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 3795 Global Contemporary Photography
This course explores contemporary photographic traditions from around the world. We begin by grappling with a few of the theoretical issues that lie at the heart of the medium’s power, such as the aura of a photograph and its potential evidentiary value. We examine how photography emerged as distinct from other artistic forms such as painting and was deployed in unique ways across the globe to assert power, counter claims of hegemony, and express identity. The scope of the class is not limited to high-art photography, but also explores the family photography and vernacular traditions, focusing on a range of genres including portraiture, narrative, and performance. Finally, we end by exploring how contemporary photographers have stretched the potential of the medium by experimenting with digital technology and non-traditional modes of display. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215), or permission of instructor. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 3815 Rococo to Revolution: Art in 18th-Century Europe
The Long 18th Century serves as a bridge between two fundamentally different times. The Europe of 1700 was dominated by absolutism and the ancien régime. The Europe of 1800 was in an age of revolution. This course will explore the dramatic shift in artistic representation and individual self-conception that occurred throughout the century to usher in our modern age. Important topics to be considered include: the rise of the Academy; the Enlightenment and the Encyclopédie; the Grand Tour; Art and Science; and the French Revolution. Focusing on the development of artistic trends, the course will address transformations in painting, sculpture and architecture throughout Europe. Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 3831 Art in the Age of Revolution: 1789–1848
European painting, sculpture and printmaking from the French Revolution to the mid-19th century; French, English, German and Spanish artists discussed in social and aesthetic context, with a focus on links between art and ideology in times of political turmoil. The styles of classicism and romanticism, the rise of history painting, and the development of realism in both landscape and genre painting. Prerequisite: Art-Arch 112 or permission of the instructor. Credit 3 units. Art: AH BU: HUM

L01 Art-Arch 3833 Realism and Impressionism
An examination of the development of European art from approximately 1848 to the mid-1880s, with a focus on the development of Realism and Impressionism in England and
France. Issues explored include the breakdown of academic art, the rise of landscape and naturalist themes, the emergence of alternative exhibition spaces and new dealer systems, and the relationship between gender and avant-garde practice. Prerequisite: Art-Arch 112 or Art-Arch 211 or permission of instructor.
Credit 3 units. Art: AH BU: HUM

L01 Art-Arch 3835 The Art Museum: History, Theory, and Design
The course will study the conceptual basis of the institution of the art museum in the United States and Europe, including its history, theoretical foundations, design, and cultural function. We will begin with the origins of the modern museum in the 18th century and earlier; trace the development in the 19th century of the earliest national art museums in the U.S. and Europe; consider the opportunities and problems of museums of modern and contemporary art in the 20th century; address the question of appropriate architectural strategies for art museums of the past and the present; and consider a variety of developments in the art museum today. Prerequisite: Introduction to Modern Art (L01 211) or Architectural History II (A46 2284/4284), or permission of instructor. Students in the College of Architecture may register for this course under the assigned College of Architecture course number.
Credit 3 units. A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 3836 The Art Museum from the Louvre (Paris) to the Louvre Abu Dhabi
This course explores the cultural politics of modern and contemporary art museums in the nexus of London-Paris-New York from the late-18th century to today. It analyzes important works of art collected, displayed and studied in the museum context, as well as the politics, philosophies, and people who shaped the history of modern and contemporary art via museums and exhibitions. Students will interrogate institutions and spaces that condition the experience and reception of reception of modern and contemporary art. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215), or permission of instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 3838 Modern Art in Fin-de-Siècle Europe, 1880–1907
This course examines artistic production at the turn of the century in France, Belgium, England and Scandinavia. Beginning with the re-evaluation of impressionism and naturalism in France, we examine Neo-Impressionism (Seurat and Signac) and Symbolism (Moreau, Van Gogh, Gauguin, the Nabi, Rodin, Munch), as well as later careers of Impressionists (Cassatt, Monet, Degas, Renoir). Considers cross-national currents of Symbolism in Belgium and Scandinavia; the Aesthetic Movement in Britain; the rise of expressionist painting in French art (particularly with the Fauvism of Matisse and Derain), and the juncture of modernist primitivism and abstraction in early Cubism (Picasso). Prerequisite: Art-Arch 112 or permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 3862 The Mediterranean and French Modernism
This course surveys the development of the Mediterranean region as an important site of modernist artistic practice. Among the artists considered are Pierre-Auguste Renoir, Henri Matisse, Pablo Picasso, Marc Chagall and Yves Klein. Excursions to museums and other artistic sites.
Credit 1 unit. A&S IQ: HUM Art: AH BU: HUM, IS EN: H

L01 Art-Arch 3875 Rejecting Reason: Dada and Surrealism in Europe and the United States
In this multimedia, interdisciplinary course, we consider the history, theory and practice of Dada and Surrealism, from its Symbolist and Expressionist roots at the end of the 19th and the beginning of the 20th centuries through its late expressions in Beat culture and Pop art of the 1950s and 1960s. Dada's emergence in Zurich and New York in the midst of the First World War set the tone for its stress on irrationality as an oppositional strategy. Surrealist research into the domain of the unconscious continued this extreme challenge to dominant culture, but in a revolutionary spirit that proposed new possibilities for personal and collective liberation. The international character of the movements, with substantial cross-transmission between Europe and the United States, are emphasized. Prerequisite: Art-Arch 112 Intro to Western Art or Art-Arch 211 Intro to Modern Art or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 3877 Cubism and Its Global Legacies
During the early 20th century, Cubism marked a radical break in the European representation of three-dimensional space in painting through a bold reconsideration of atmospheric and linear perspective. Early Cubists such Pablo Picasso achieved this formal breakthrough in part through studying African and Oceanic art. Between the summer of 1908, when Braque and Picasso developed the style collaboratively in France, and the advent of WWI in summer 1914, Cubism became the most influential style in the international art world. This course examines the development of Cubism in France, and analyzes how artists throughout Europe and the world adapted Cubism for their own purposes. Of particular interest is how artists from outside Europe and the U.S. have responded to Cubism's appropriation of non-Western art. Class format is lecture and discussion. Prerequisites: L01 Art-Arch 113 Introduction to Western Art or L01 Art-Arch 215 Introduction to Modern Art, or permission of instructor.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L01 Art-Arch 3884 Modern Design and Modern Culture
This course explores key issues of modernity (industrialization, consumerism, mass culture, nationalism, etc.) through the study of material culture. Focusing primarily on modern design in Europe and North America from William Morris to Charles Eames and Aleksandr Rodchenko to Bruce Mau, we examine major developments in design thinking and practice as both...
reactive to and generative of broader political, economic, and social concerns. The course is organized around important and influential exhibitions, from World’s Fairs to storefront shows, where design professionals, institutions, and publics came together to reflect on topics of urgency, identify alternatives, and imagine the implications of design on everyday life. Wherever possible, class discussions/lectures and assignments make use of objects and archives in area collections. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215) or permission of instructor.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L01 Art-Arch 3888 Museum Theory and Practice
This course explores the history of fine art museums and related debates on the nature of collecting and modes of display. Using historical and theoretical texts as well as select case studies, we focus on how the evolving structure and mission of the museum impact our understanding of art. Topics include the Renaissance "cabinet of curiosities," the Salon controlled by the French Academy, the rise of the modern art museum, and the proliferation of contemporary curatorial strategies in today’s global art world. In addition to the study of the history of exhibitions and the role of the museum, the course also investigates the various jobs and responsibilities that people hold within museums. Guest speakers will include members of the curatorial, publications, registration, education and installation staff at the Mildred Lane Kemper Art Museum. We also take advantage of the distinct art institutions in St. Louis, exploring exhibitions and permanent collection displays at the Kemper Art Museum, Saint Louis Art Museum, the Pulitzer Foundation for the Arts, and the St. Louis Museum of Art.
Prerequisite: Intro to Modern Art (L01 Art-Arch 215), or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

L01 Art-Arch 3892 Modern Sculpture: Canova to Koons
This course surveys sculpture in Europe and the United States from about 1800 to the present, with an emphasis on the period 1890–1980. A rapid traverse of Neoclassicism, Realism and the rage for statuary in the later 19th century take us to the work of Rodin and a more systematic exploration of developments in sculpture of the 20th century. Particular emphasis is given to the work of Brancusi, Picasso, Matisse, Duchamp, Giacometti, Oppenheim, David Smith, Serra, Morris, Judd, Hesse and Bourgeois. An important theme running through the course as a whole, from an age of nationalism and manufacturing to our own time of networks and information, is the changing definition of sculpture itself within its social and political context. We also explore various new artistic practices — video, performance, installations and body art, for instance — and interrogate their relationship to sculptural tradition and innovation. Prerequisite: Art-Arch 112 or Art-Arch 211 or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 3972 Alterna-Art
Can contemporary art be truly alternative? What does the term even mean, when the channels for distributing art are available to all? This course presents a survey of art created outside of institutions and official channels. Students are exposed to a variety of different media, from graffiti and muralism to performance and internet art. The course also deals with questions of agency, “authenticity,” and co-optation of street art by commercial means. Classes consist of a hybrid lecture/discussion format with weekly readings. Prerequisites: Intro to Western, Intro to Modern or permission of the instructor.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L01 Art-Arch 3973 New Media, New Technologies
In summer of 2013, Random International’s Rain Room was installed at the Museum of Modern Art in New York. Lines to experience the sensation of being rained on without getting wet ranged up to seven hours at times. This merging of new technology with the gallery space proved irresistible, but also raises questions as to the uses of technology in contemporary art, and whether or not this could be much more than a gimmick. As one Yelp reviewer put it, “The Rain Room is definitely an experience. Let’s be honest… I’m mostly upset that I didn’t get a cool, new Facebook profile pic out of it.” This course considers technological developments in modern and contemporary art, from photography, video and new media, digital and internet art, as well as forays into new technology that blur the lines between art and science. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; or permission of the instructor.
Credit 3 units. BU: HUM

L01 Art-Arch 3975 Art and Activism
This course will examine political and social activism in art and visual culture, focusing on the role that visual representation has played in social movements and how artists/activists have employed visual media to challenge and resist dominant visual representations and political formations. We explore key theoretical developments in activist discourse as well as the role of art practices and aesthetic commitments in these developments. This course seeks to represent the development of the relation of art and activism in its broadest intellectual and cultural context within 20th century and to encourage an appreciation of the complex array of disciplinary perspectives that are implicated in this development. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215, or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH, CPSC BU: HUM EN: H

L01 Art-Arch 4000 Topics in Art History and Archaeology
Prerequisites: L01 113, L01 215; one 300-level course in Art History preferred; or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4002 The Decorative Aesthetic in Modernism, 1860–1960
In the criticism of modern art, decoration and decorative have often been used as pejorative terms, designating art that has no intellectual basis but is merely pleasing, intended to fill space and delight the eye. But in the late 19th century, these terms carried important cultural value, and opened the door to significant experiments in abstraction. Moreover, the decoration of a public space or surface may have political implications. This course investigates decoration and theories of “the decorative” in modern art in Europe and the United States, with special attention to the evolution of ideas of modernism in both 2-dimensional and 3-dimensional environments. We also consider some of the political meanings that may be borne by both public mural painting and domestic decoration, as well as easel painting that aspires to conditions of the decorative. Key figures include Puvis de Chavannes, Morris, the Nabis, Van de Velde, Monet, Matisse, the Mexican muralists, Pollock and Shapiro.
Prerequisite: Art-Arch 211 Introduction to Modern Art, or any 300-level course in art history, or permission of instructor.
Credit 3 units. A&S IQ: HUM Arch; HUM Art: AH, HUM BU; HUM EN: H

L01 Art-Arch 4005 Time, Work, Play: Art, Design, Urban Practice
This seminar, co-taught by faculty in two different schools (Arts & Sciences and Sam Fox School/College of Architecture), investigates the interrelations of three of the key categories of experience — time, work and play — in the 20th century and into the 21st. It does so through the lens of historians, artists, theorists and philosophers, and urbanists. Using a variety of visual forms — from painting to film, animation, found objects, performance, and conceptual art — and spatial and design practices, we will test, analyze, and possibly reconfigure specific propositions and practices over the past century concerning the relationship of time, work and play. The seminar begins with a historical prelude on pre-industrial time forms and on the impact of mechanization and industry on older habits and experiential forms shaped around pre-modern conceptions of time, and proceeds through a series of case studies, organized topically. Bringing together students from design, urban planning, art history, and other fields, we seek to pry apart fixed ideas about time, labor, productivity, leisure and play, and to see aesthetic and spatial practices as fields of radical experimentation in new social forms. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.
Credit 3 units. A&S IQ: HUM Arch; HUM Art: AH, GFAH; HUM BU; HUM EN: H

L01 Art-Arch 4015 Theories of Modern Art and Architecture
The course presents theories of art and architecture from the 19th to the 21st century in their historical contexts through a set of in-depth investigations of selected topics. Some knowledge of history and theory is integral to contemporary understandings of the disciplines of art, art history and architecture. To foster a historical understanding of theories of modern art and architecture, we discuss a selection of key texts, divided into three sections: theoretical sources of modern art and architectural history in the 19th century; theories of modernism, from the formalist to the Marxist; postmodern critiques of modernism, in such areas as feminist theory and poststructuralism. Class visits to Sullivan and Adler's Wainwright Building (1890–91), Saarinen's Arch at the Jefferson National Expansion Memorial (completed 1964), Anda’s Pulitzer Foundation for the Arts (2001), and Maki’s Kemper Museum of Art (2006) are integral to the work of the course. Prerequisite: Either Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art and any 300-level course in art history; or permission of instructors.
Credit 3 units. A&S IQ: HUM Arch; HUM Art: AH EN: H

L01 Art-Arch 4045 Beyond Painting: Innovation in Prints and Sculpture in Early Modern Europe
Prints and sculpture are frequently overlooked in the study of early modern European art, yet the issues they raise are critical to our understanding of the period. Both categories, too often seen as secondary to painting, entail frequently complex technical and intellectual innovations that were fundamental to their time. This course will focus on these two important media in order to offer a fuller and richer picture of how artists of the Renaissance and baroque periods reinterpreted and expanded their visual vocabularies in response to, and in participation with, changing technologies and ideologies. Beyond Painting is based on direct interaction with works of art with the aim of facilitating enhanced looking and evaluation skills essential to the study of art history. Held at the Saint Louis Art Museum, each session will focus on the Museum's collection as well as the objects in the exhibition "Learning to See: Renaissance and Baroque Masterworks from the Phoebe Dent Weil and Mark S. Weil Collection." Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD Arch; HUM Art: AH, GFAH, HUM BU; HUM EN: H

L01 Art-Arch 4240 The Plundered Past
The public imagination thrills at the fantastic adventures of Indiana Jones and Laura Croft, Tomb Raider; but the reality of modern archaeology is more complex, ethically challenging and interesting than a simple treasure hunt. In the U.S. and Canada, our science museums and museums of anthropology still display artifacts that are regarded as culturally defined and are ethically charged to advance that project through education about the complex contemporary arena of artifacts, sites, and information they occupy. Archaeologists work with living people inhabiting societies and states that care deeply about their pasts and the relics of it. They are active agents engaged with many other people in the production of knowledge about the past. In our rapidly shrinking world, educated sensitivity to the many ancient cultural legacies that shape the values of modern global society is more than a moral imperative; it is a basic form of collaboration in the common project of survival. Archaeologists are ethically charged to advance that project through education about the complex contemporary arena of artifacts, sites, and information they occupy. Same as L48 Anthro 4240
Credit 3 units. A&S IQ: HUM, LCD Arch; HUM Art: AH, GFAH, HUM BU; HUM EN: H

L01 Art-Arch 428 The Invention of the Image: From Classical Art History to Modern Visual Studies
The scholarly field of Image or Visual Studies has developed in response to the widespread proliferation of images, both still and moving, in contemporary life. It distinguishes itself from traditional art history by examining visual representations of all types, not only works of high art, and by concentrating on the role those representations play in the formation of culture. Though most of the scholarship produced in this field focuses on the modern world, it depends upon ideas first developed in Mediterranean antiquity. This course has two primary goals. We conduct an historical examination of practices and theories of image making from Near Eastern antiquity to modernity. In so doing, we also carry out an historiographical survey of our science museums and museums of anthropology still display artifacts that are regarded as culturally defined and are ethically charged to advance that project through education about the complex contemporary arena of artifacts, sites, and information they occupy. Same as L48 Anthro 4240
Credit 3 units. A&S IQ: HUM, LCD Arch; HUM Art: AH, GFAH, HUM BU; HUM EN: H

L01 Art-Arch 428 The Invention of the Image: From Classical Art History to Modern Visual Studies
The scholarly field of Image or Visual Studies has developed in response to the widespread proliferation of images, both still and moving, in contemporary life. It distinguishes itself from traditional art history by examining visual representations of all types, not only works of high art, and by concentrating on the role those representations play in the formation of culture. Though most of the scholarship produced in this field focuses on the modern world, it depends upon ideas first developed in Mediterranean antiquity. This course has two primary goals. We conduct an historical examination of practices and theories of image making from Near Eastern antiquity to modernity. In so doing, we also carry out an historiographical survey of the major works in Image/Visual Studies, thereby gaining an appreciation for the wide range of methods of inquiry employed in this important field of research. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215); one 300-level course in art history preferred; or permission of instructor.
Historical questions in the development of ancient painting, the significance of those practices. In addition to examining specific Antique Rome and to seek to understand the cultural and social ancient Mediterranean world from Classical Greece to Late History preferred; or permission of instructor.

Roman art market. Prerequisite: Art-Arch 331 or permission of philosophy of death. Prerequisites: Intro to Western Art (L01 215); one 300-level course in Art History preferred; or permission of instructor. Credit 3 units. A&S IQ: HUM Art: HUM EN: H

Perhaps more than any other phenomenon, death spurred the creation of art in the ancient Roman world. The practice of materially commemorating the deceased, or perpetuating the memory of the dead through the creation of funerary monuments designed to appeal to both intimate familial relations and the public at large, stretched across Roman social boundaries and endured for many centuries. But death also frequently provided the subject matter of art even outside the confines of the funerary realm. The goal of this course will be to explore the complex relationship between art and death in the Roman world. It will range from early Rome to the end of the empire and the changes brought about by widespread conversion to Christianity. In conjunction with historical readings, the course will also engage with theoretical texts in the anthropology and philosophy of death. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor. Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L01 Art-Arch 430 Topics in Northern Renaissance Art
Credit 3 units. Art: AH

L01 Art-Arch 4375 Ancient Greek Sculpture in Context
Sculpture counts among one of the greatest artistic achievements of ancient Greece, and one that has had the greatest impact on the art of later periods. This course focuses on original works of art of the Archaic and Classical periods (800–300 BCE), placing emphasis on how study of their contexts — the places in which they were produced, displayed and found — contributes to our understanding of their place in the ancient world. Background material, which is covered at the beginning of the semester, includes the origins of monumental Greek sculpture at the beginning of the Archaic period (late 7th to early 6th century BCE), and the stylistic development of the Archaic and Classical periods. We then proceed to discussion of various types of sculpture (architectural, cult statue, votive, commemorative, funerary) and how these works functioned within the context of the Panhellenic sanctuary, the city sanctuary, the secular center of the city, and the necropolis. In a different view of context, we also consider sculpture recovered from ancient shipwrecks, looted art on its way to the ancient Roman art market. Prerequisite: Art-Arch 331 or permission of the instructor. Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4376 Pictorial Illusion in the Ancient Mediterranean
Among the many accomplishments in the history of Greco-Roman art, ancient writers especially valued the development of pictorial illusion. Pictorial illusion refers to the techniques of reproducing or approximating aspects of the visual perception of the material world on a two-dimensional surface. These include foreshortening, the application of highlights, and the indication of multiple points of depth in space relative to the picture plane. The purpose of the course is to explore the material, stylistic and technical history of illusionistic painting practices in the ancient Mediterranean world from Classical Greece to Late Antique Rome and to seek to understand the cultural and social significance of those practices. In addition to examining specific historical questions in the development of ancient painting, the course investigates trans-historical connections between vision, visuality and methods of representation. Prerequisites: one of Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L01 Art-Arch 4376 Pictorial Illusion in the Ancient Mediterranean
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM, HUM EN: H

L01 Art-Arch 439 Greek Art in Rome: Discourse, Dedication and Reflection
Throughout the modern period, Ancient Greek art has been perceived of as a genuinely original and creative tradition, in which both individual artists and regional schools made some of the most significant advances in the long development of European art. Roman art, by contrast, has been seen as derivative and secondary; Johann Joachim Wincklemann, the founder of modern art history, classified it among the "style of the imitators." But this traditional dichotomy rests in large part on the Romans’ own reactions to their encounters with the arts of Greece. Through the analysis of textual sources, architecture, statuary and painting, this course investigates the status and influence of Greek art in the city of Rome from the third-century BCE until the late Imperial period, and seeks to understand how Roman responses to and uses of Greek art have come to shape the modern perception of both traditions. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S IQ: HUM Art: GFAH, HUM BU: HUM EN: H

L01 Art-Arch 444 The Forbidden City
Home to 24 emperors of the Ming and Qing dynasties (1368–1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace, its construction in early Ming, the coded symbolism of its plan and decoration, the rituals of court, and the lives of its denizens, from emperors (including Pu Yi, the ”last emperor”) to concubines, from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and the backdrop to major political events, as well as its role in the urban design and contemporary art of 21st century Beijing. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 4482 Japanese Prints: Courtesans, Actors and Travelers
Woodblock prints of the 18th and 19th centuries and their relationship to literature and popular culture. Topics include the life of the pleasure quarters, sexuality and the "erotic," parody, kabuki theater and the representation of women. Prerequisite: 3 units in Japanese painting, or permission of instructor. Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4489 The Three Emperors: Redefining Chinese Art in the Golden Age
Ruling imperial China during its last Golden Age, the Qing emperors Kangxi, Yongzheng and Qianlong patronized the arts during an unprecedented period of prosperity and international exchange. Many of the works they commissioned are now icons of Chinese culture, but in their time these three Manchus redefined Chinese art with ideas and styles from Baroque
Europe, Tibet, Mongolia and even Islamic Central Asia. This seminar focuses on the ethnically and culturally diverse art, architecture and material culture patronized by these three emperors to examine how they and their multi-ethnic empire changed the definition of Chinese art during the long 18th century. Prerequisites: Art-Arch 111 Introduction to Asian Art; or one 300-level course in Asian art history, history or literature; or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HT Art: AH

L01 Art-Arch 4490 Art, Vision, and Science in China

After China and Europe began sustained contact, the introduction of Western science, math and technology often affected Chinese art more than anything else. New optical devices and ways of visually understanding the world produced a range of positive and negative responses. Often expressed in art, these works demonstrate how new ideas affected Chinese conceptions of vision, looking, cognition and visuality. Covering the 17th through mid-20th centuries, this course discovers how Chinese art became entwined with vision and modern science, covering prints, paintings, objects and photographs across medicine, astronomy, cartography, optics and mathematics. Prerequisite: L01-111, one course in Art History or Asian Studies, or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HT Art: AH

L01 Art-Arch 4494 East, Meet West: Asia Encounters Europe

This seminar grounded in cross-cultural aesthetics examines East Asian visual responses to European art and science from the 16th through 19th centuries. First introduced by Jesuit missionaries, continued by merchants, and culminating with colonial enterprises, the same Western ideas and works left very different impressions on China and Japan. An introduction to cross-cultural aesthetics from both Western and East Asian perspectives lays the theoretical foundation to engage these works of art, before proceeding thematically through time to cover painting, cartography, woodblock prints, ceramics and photography within transregional and transcultural contexts. Prerequisites: at least one course in Asian art or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

L01 Art-Arch 4494 East, Meet West: Asia Encounters Europe

This seminar grounded in cross-cultural aesthetics examines East Asian visual responses to European art and science from the 16th through 19th centuries. First introduced by Jesuit missionaries, continued by merchants, and culminating with colonial enterprises, the same Western ideas and works left very different impressions on China and Japan. An introduction to cross-cultural aesthetics from both Western and East Asian perspectives lays the theoretical foundation to engage these works of art, before proceeding thematically through time to cover painting, cartography, woodblock prints, ceramics and photography within transregional and transcultural contexts. Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

L01 Art-Arch 4495 Caricature: The Culture and Politics of Satire

This course examines the golden age of caricature. Beginning with the prints of William Hogarth, we look at the caricatural traditions in France and England from the late 18th-century through the early 20th century. Special emphasis is placed on visual satire as a vehicle for social and political critique, on theories of humor (particularly Baudelaire and Bakhtin), and the development of a mass market for this imagery. Other figures discussed include Rowlandson, Cruikshank, Daumier, Gavarni, Phillipon, and Gil. We take advantage of a major collection of French caricature in the Mildred Lane Kemper Art Museum at Washington University, as well as collections available for study in Olin Library and at the St. Louis Art Museum. Prerequisites: Art-Arch 112 or Art-Arch 211, or a 300-level course in modern European history or literature, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4621 Leonardo da Vinci

Leonardo da Vinci is universally recognized to be one of the greatest artists of all time. But who was Leonardo? Artist or scientist? Master, magus or myth? This seminar explores the reality and fiction of a fascinating, yet enigmatic genius, as well as placing this unique individual in the contexts of Renaissance Italy and the modern imagination.

Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

L01 Art-Arch 4624 Michelangelo

An examination of the life and works of Michelangelo. The most important developments in his architecture, painting and sculpture; with special attention to his assistants, friends, family and contemporaries. Prerequisite: permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4625 Venice

A seminar focusing on the art of Venice, in particular on Bellini, Giorgione and Titian. Special attention to the international reputations of these three artists and to problems of patronage, connoisseurship and interpretation. Prerequisite: Art-Arch 361 or 362, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

L01 Art-Arch 4627 Caravaggio: Master and Murderer

Michelangelo Merisi (Michael Angelo Merigi or Amerighi) da Caravaggio (29 September 1571 - 18 July 1610) was one of the most important and influential painters of the 17th century, in Italy and throughout Europe. He was active in Rome, Naples, Malta and Sicily between ~1592 and 1610. But who was Caravaggio? What do we really know about his tempestuous life and how it factors in the art he created? Caravaggio was a powerful, brilliant, brutish, and hugely influential artist; a belligerent personality, brawler and murderer. He was a man of contradictions: a devout Christian and bisexual sodomite; a Knight of Malta and a fugitive from the law. This seminar explores the reality and fiction of this fascinating and influential genius, and places him in his historical, social and artistic contexts — from Baroque Italy to the modern imagination. Prerequisites: L01 113; one 300-level course in Art History; and permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HT Art: AH, GFAH EN: H

L01 Art-Arch 4672 Michelangelo the Architect

When, why and how did the great Renaissance sculptor, painter and poet Michelangelo Buonarroti become an architect? This seminar surveys Michelangelo’s built and unbuilt architecture, his methods and extant drawings, and the process and influence of his creations.

Credit 3 units. Art: AH

L01 Art-Arch 4675 Topics in Baroque Art

Credit 3 units. Art: AH BU: HUM

L01 Art-Arch 4678 Bosch and Bruegel

Humor, monstrosity, violence, and vernacular culture pervade the oeuvres of Hieronymus Bosch and Pieter Bruegel the Elder, two of the most seminal artists of the Northern Renaissance. This course addresses the complexity of their oeuvres and the methodological problems raised in the interpretation of their enigmatic imagery, with a particular focus on the dissemination of their artistic personas in print. Prerequisites: L01 113 or L01 215; one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H
L01 Art-Arch 4721 Hydrogen Jukebox: American Art and Culture, 1945-1960
The rise and “triumph” of Abstract Expressionism has long dominated the story of American art following World War II. This new seminar puts Abstract Expressionism into context with parallel developments in the arts, photography and film. Among the topics we consider: the conversation between émigré artists and American culture during and after the war; the emergence of a “noir” aesthetic in film and literature; the early work of Jasper Johns and Robert Rauschenberg and the so-called “aesthetic of indifference” in relation to Abstract Expressionism; artistic collaborations at Black Mountain College; New York school photography and photojournalism; and the cultural impact of the A bomb. Prerequisite: a 300-level course on 20th-century art, photography or history; or permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM EN: H

L01 Art-Arch 473 Art and Culture in Fin-de-Siècle America
The particular climate of the fin-de-siècle and its expression in art, architecture and letters. Concurrent development in Vienna, Paris and London as basis for comparison. Themes include new theories of mind and perception, the fate of rationalism, the “crisis in bourgeois values,” and redefinitions of gender. Prerequisite: permission of instructor.
Credit 3 units. Art: AH

L01 Art-Arch 4744 TransAmerica: The U.S. and Mexico Between the Wars
Many areas of 20th-century U.S. culture between World Wars I and II were inspired by post-revolutionary Mexico. The Mexican Revolution (1910-1917) profoundly reoriented modern Mexico, introducing new social and artistic forms and historical themes over subsequent decades. Mexican artists contributed to a new national consciousness drawing on indigenous Mexico and on the new politics of workers and peasants, which were given monumental expression in mural painting. The bidirectional exchange between U.S. and Mexican artists was of great importance for the cultural revitalization of the New Deal and after in the United States. Among artists, writers, anthropologists, and tourists, the vogue for things Mexican was fed by many sources, including increasing travel, diplomatic exchange, and a yearning for alternatives to U.S. modernity. The seminar will support travel to Mexico City, funded by the Art History and Archaeology Department. This course is open to graduate student and undergraduate majors and minors in Art History, Archaeology, and Latin American Studies. Recommended courses: one 300- or 400-level course in 20th-century U.S. art or history or one relevant course in the Latin American Studies program.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: IS EN: H

L01 Art-Arch 475 The City in American Arts and Popular Culture, 1900-1940
From the mid-19th century forward, artists, writers, sociologists, and cultural critics have identified the city as the primary site of a vast array of historical changes associated with modernization. This course will explore the range of cultural responses to the new 20th-century city up to World War II. The American city was seen as both an incubator of difference, and of mass conformity and manipulation; a dynamic space in which to form fluid networks that catalyzed new forms of creativity, and a place of strangers and social alienation. We will trace the history of these polarized responses in the 20th-century arts and literature of the city, looking at the vibrant popular culture of film, vaudeville, and cross-dressing; new aesthetic forms such as collage and expressionism; and new urban subjects. Prerequisites: 300-level course in American 20th-century cultural history, American art, literature, or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH, CPSC, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 4770 Cosmopolitan and Native Modernisms: The U.S. and Europe Between the Wars
This seminar focuses on two contrasting currents within American and European modernism between the two world wars: native and cosmopolitan. Alternating between the United States and France, it begins in the years before World War I and concludes with the rise of virulent forms of cultural nationalism in the late 1930s. We consider the subjects, personalities, aesthetic strategies, and political and social investments associated with these alternative modernisms, linked to a search for roots, on the one hand, and on the other, to a desire for forms of spatial and social mobility. Comparing “homegrown” and expatriate experience, we consider divergent attitudes toward identity, gender, nation, time and nature, analyzing these two fundamental responses to modernity in relation to one another. Prerequisites: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art; one 300-level course in art history preferred; or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4774 The Age of Gatsby: American Art and Culture from World War I to the Great Crash
Mass consumption and the expansion of mass culture; mechanization; and the birth of a new visual culture that turned on animation, advertising, photography and film. Taking our cues from the cultural contradictions and historical tensions embodied in F. Scott Fitzgerald’s great novel of 1925, and the 2013 film inspired by it, this seminar will trace what many at the time called the “Rediscovery of America” and its tribulations. American artists, writers, and cultural theorists embraced the possibilities and pitfalls of American modernity, the nation’s mythic promise and its historical dilemmas in the face of growing commercialization and standardization. This seminar is an interdisciplinary look at the art, visual culture, music, literature, and cultural essays of the 1920s through the lens of nation, race, region, and cultural ident(-ies). Prerequisite: 300-level 20th-century American art, history, or literature course, or permission of instructor.
Credit 3 units. Art: AH

L01 Art-Arch 4776 The Arts of Cultural Democracy: America in the 1930s
What does democratic access to the arts look like? Over the past decade the question of distributive justice has taken on new urgency in our nation. This seminar will look at an earlier period in the nation’s history — the 1930s, from the stock market crash of 1929 to the beginning of World War II — when the ideal of cultural democracy was put into practice on a variety of fronts, from dance to the fine arts to public murals and the collecting and inventorying of the nation’s material and cultural legacies. We will also consider the possibilities and limits of political art, the impact of John Dewey on future generations of artists and culture-makers; the relationship between leftist politics and modernism; regionalism and internationalism; debates over the nature of documentary photography, and efforts to create a “useable past.” Prerequisite: 300-level course in European or
American 20th-century art or cultural history, or permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4782 Modern Architecture in St. Louis
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4785 Art and Culture in 1920s America
This interdisciplinary seminar examines the relationship between art and 1920s culture in the United States: how artists and critics thought about the nature of our cultural heritage — its rich possibilities and its limitations; the potential of technology and urbanization as well as the threats they pose to older cultural values; the nature of a multicultural society and the contributions of minority traditions to the evolution of American culture; the lure of the Southwest; early criticism of popular media; and the conversation between popular culture and high art. Prerequisite: Art-Arch 112 or permission of instructor.
Credit 3 units. Art: AH

L01 Art-Arch 481 Topics in Modern Art
The sources, styles, influences and content of the art of such artists as Gauguin and Cézanne examined in the context of contemporary movements in art and literature. Prerequisite: art history major or permission of instructor.
Credit 3 units. Art: AH

L01 Art-Arch 4816 Art and Culture in Fin-de-Siècle Europe
An examination of painting, photography and the decorative arts in France during the period between the two World’s Fairs of 1889 and 1900. Artistic movements include Symbolism (Van Gogh, Gauguin, Redon), later Impressionism (Monet and Morisot), Neo-Impressionism (Seurat and Signac) and Art Nouveau. Thematics include urban leisure and café culture; the agrarian ideal; the promises and threats of science and technology; the lure of the primitive; and the impact of nationalism and feminism on the arts. Prerequisites: Art-Arch 211; any 300-level course in 19th-century art, literature or history; or permission of instructor.
Credit 3 units. Art: AH

L01 Art-Arch 4817 Paris ca. 1900: Art, Leisure and Spectacle
Paris at the turn of the 20th century was a vibrant international center for the development of the visual arts, including painting, photography, film, and the graphic arts, particularly in the exploding domains of posters and illustrated journals. In this seminar, we study the period from 1880 to 1910, and we examine how diverse modes of urban visuality were at the heart of the development of French modern art. The place of graphic arts in promoting popular entertainments such as ballet, opera, and café concerts is considered. Another focus is the powerful role of Parisian satirical journals and caricature in debating matters of class, race, and national identity. We examine diverse modes of displaying and selling the visual arts, particularly in the spheres of World’s Fairs, annual salons, and in the avant-garde spaces of gallery and café exhibitions. Artists of central concern include Lautrec, Cheret, Mucha, Degas, Pissarro, the Nabis, Vallotton, and early filmmakers such as the Lumière brothers and Méliès. Prerequisites: Art-Arch 215 or permission of instructor; one 300-level course in modern art history or a course in modern French history or literature preferred. French language reading skills not required.
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4818 Matisse and Modernisms
Certain artists generate enormous interest during their lifetimes and long after. Over time the work of such artists is subjected to a variety of interpretive approaches in light of changing trends in art criticism and art history; the influence of contemporary art; the ebb and flow of interest in different aspects of the artist’s production; changes in the political landscape; and the changing sense of how the artist’s work intersects with contemporary cultural developments. This set of intersecting concerns is especially fluid in the modern period, when there is no single dominant idea of the role of art in society. The variety of interpretive strategies developed from and applied to the work of Henri Matisse demands a critical reading of the extensive literature on the artist, as well as an understanding of the variety of modernisms through which to assess his artistic project. Students gain a thorough familiarity with the work of the most influential artists of the 20th century; engage aspects of the historiography of 20th-century art through a survey of developments in the Matisse literature; and develop a specific topic in Matisse’s art, or the writing about his art, into a class presentation and research paper. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4819 The Century of Picasso
The art of Pablo Picasso (1881-1973) spanned three-quarters of the 20th century, and posthumous critical response to his work shows no sign of abating. Picasso was a leading figure in the European primitivist trends at the beginning of the last century, and with Georges Braque, he developed the aesthetic system of Cubism, which rewrote the rules of artistic representation. Although he was not an activist, his art routinely engaged momentous political events. Toward the end of his career, he strove to shape his legacy through artistic dialogues with artists of the past by appropriating their styles or subjects, and making them his own. Such eclectic activity, coupled with his creativity and prolific output, has ensured his place among the most influential artists of his century. Prerequisites: one 300-level course in modern art or permission of instructor; junior, senior or graduate standing.
Credit 3 units. A&S IQ: HUM EN: H

L01 Art-Arch 4850 Romanticism to Realism: French Art 1830-1871
This course traces the flourishing of romanticism and the emergence of various forms of Realism in 19th-century French modernism, opening with the Revolution of 1830. Artistic tendencies ranging from the official and the academic to emergent romantic and avant-garde alternatives are addressed, as well as the unresolved social and aesthetic tensions that support the demand for an art that addresses modern times. The political idealism and the rhetoric of Republicanism in the Second Republic (1848 to 1852) intertwine with the emergence of a critical modernism that seeks truth in form, in materiality, and in political philosophy. Under the authoritarian regime of the Second Empire (1852-1870), the mandates of realism and idealism continue to vie in a period that sees both the flourishing of the academic system and the art dealer system, and the emergence of a critical avant-garde. The course closes with the emergence of Impressionism and the crisis of the Franco-Prussian war. Artists to be discussed include Delacroix, Ingres, Millet, Daumier, Courbet, Corot, Manet, Bonheur, Bayre, Clesinger, and the early careers of Bazille, Degas, Monet,
such as Delacroix, Ingres, Gérôme, Beardsley, and Matisse.

Credit 3 units. A&S IQ: HUM EN: H

L01 Art-Arch 4854 Gauguin in Polynesia: The Late Career
This seminar focuses on the late career of Paul Gauguin, in Tahiti and the Marquesas. This course examines closely the colonial context of fin-de-siècle French Polynesia, Gauguin’s response to indigenous culture, his ongoing interests in European currents of theosophy and anarchism, the development of his primitivist style in response to the French avant-garde, and Gauguin’s legacy to modern art and culture in the early 20th century. Readings range from primary texts (literature and journals read by the artist, his letters, his satirical articles and caricatures produced for a Tahitian newspaper, his treatises on religion), to postcolonial theory and recent critiques of primitivism. French reading skills are useful, but not required for the course. We visit the Saint Louis Art Museum to view both the Oceanic collection, and prints and paintings by Gauguin. Prerequisite: at least one upper-level course in modern art history, or permission of the instructor. Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4856 French Art and Politics in the Belle Epoque
This interdisciplinary seminar addresses the rich intersection of politics, fine arts and visual culture in modern France from the Franco-Prussian War (1870) to the First World War (1914). We will study the political trends, historical events, and cultural conditions of the era, and their direct influence on the production and reception of a wide range of visual arts, ranging from official paintings and monuments to popular culture such as tourist and ethnographic photography; the Symbolist ambivalence toward technology; and the development of Pictorialism at the turn of the century. Artists studied include Nadar, Moreau, Degas, Rodin, Steichen, Gauguin, Munch, the Nabis, Brancusi and Picasso. Prerequisite: graduate standing. Credit 3 units. A&S IQ: HUM Art: AH

L01 Art-Arch 4859 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000
This seminar examines film and modern art within the framework of “Orientalism.” Reading foundational texts by Said, and incorporating theory and historical discourse concerned with race, nationalism and colonialism, we explore artistic practice in European photography, painting and decorative arts from 1850 to recent times, and European and Hollywood film. We study how power and desire have been inscribed in western visual culture across the bodies of nations and peoples through conventions such as the harem, the odalisque, the desert, and the mysteries of ancient Egypt. To that end, we look at artists such as Delacroix, Ingres, Gérôme, Beardsley, and Matisse and screen films such as The Sheik, The Mummy, Salome, Cleopatra, Pepe le Moko, Naked Lunch, Shanghai Gesture, Thief of Bagdad, Princess Tam Tam and The Sheltering Sky. Subjects include the representation of gender, sexuality, desire, race and identity as well as the cultural impact of stereotype and “exotic” spectacle. Students study methods of visual analysis in film studies and art history. All students must attend film screenings. Same as L53 Film 485

Credit 3 units. A&S IQ: HUM, LCD, SD EN: H

L01 Art-Arch 4861 Paul Gauguin in Context
An examination of the art and career of Paul Gauguin (1848-1903) and the artistic, social, and political milieu in which he worked in France and Polynesia. Readings will include the artist’s writings, studies of avant-garde culture and primitivism in fin-de-siècle France, and postcolonial theory. Special emphasis will be given to the relationship of the artist and his work to indigenous Polynesian and French colonial cultures of the 1890s. Prerequisite: Art-Arch 211, or any 300-level course in art history, or permission of instructor. Reading knowledge of French useful, but not required. Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4863 The Photographic Muse: The Modern Artist and the Camera
An examination of the interplay of photography with painting and sculpture in European art from 1850 to World War I, with an emphasis on the fin-de-siècle. Readings address the history of the medium; the critical debates (starting with Baudelaire) over photography as a tool of science or of art; the rise of ethnographic photography; the Symbolist ambivalence toward technology; and the development of Pictorialism at the turn of the century. Artists studied include Nadar, Moreau, Degas, Rodin, Steichen, Gauguin, Munch, the Nabis, Brancusi and Picasso. Prerequisite: graduate standing. Credit 3 units. A&S IQ: HUM Art: AH

L01 Art-Arch 4864 Exoticism and Primitivism in Modern Art
An interdisciplinary investigation of the development of exoticism and primitivism in European and American art from the Enlightenment to World War II. Topics include exoticist representations of non-Western cultures; the links between colonialism and orientalism; the intersection of discourses on race and gender with exoticism; and the anti-modernist impulse of fin-de-siècle primitivism. Sample artists and authors include Delacroix, Flaubert, Gauguin, LaFarge, Picasso and Matisse. Prerequisites: any 300-level course in art history and permission of the instructor. Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4867 The Impressionist Landscape: Style, Place and Global Legacies 1870–1920
We will consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism, but soon expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. We will examine the place of individual perception, the physiology of sight, and theories of the natural in the development of the Impressionist landscape, through the consideration of style, genre, artistic theory, and these artists’ investment in particular sites. Furthermore, the social, commercial and critical networks that supported the movement will be analyzed. Particular attention will be given to Monet, and a special exhibition of his water lily paintings on view at the Saint Louis Art Museum. Other key artists include Degas, Morisot, Renoir and Cassatt. We will also discuss the relationship of the Impressionist landscape to the development of modernist abstraction, and the aesthetic and nationalist motivations for its appropriation across the globe. Prerequisite: Introduction to Western Art; Introduction to Modern Art, or permission of instructor.
L01 Art-Arch 4868 Impressionism and the Nation in France and Beyond: Painting and Photography 1860-1920

We will consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism but expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. Our central question will be the relationship of individual perception, the physiology of sight, and theories of the natural in relation to the importance of place — both region and nation — in the political imagination of the era. We also address the relationship of the Impressionist landscape to the development of modernist abstraction as well as the aesthetic and nationalist motivations of its adaptation as a modernist style around the globe. Prerequisite: senior major in art history, or graduate student standing and permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L01 Art-Arch 4869 Global Impressionism

How and why Impressionism has achieved this global reputation (positive, negative, and nuanced positions between those poles) has not been thoroughly or systematically interrogated. But this is precisely what this seminar proposes to do. This course maps the global dissemination, exhibition, reception, and publication of French Impressionism, in tandem with the rise of local Impressionisms worldwide. Globalization must be understood as concomitant with localization. This course attends to especially critical exhibitions, publications, and places which must be understood to underscore that there always remains more work to be accomplished in the production of a truly global art history. It scrutinizes how the physical translation of French Impressionist artworks foreshadowed, coincided, and fostered its stylistic translation into local Impressionisms and literary translation into histories of Impressionism. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: IS EN: H

L01 Art-Arch 4877 Critical Studies in Portraiture, Ancient to Contemporary

To study portraiture is to confront the complexity of human identity. The central theoretical question of this course is how identity can be expressed in a portrait. Following consideration of theories of portraiture, identity and artistic representation, we treat specific historical and cultural instances of portraiture-making, from ancient Greece to the present. Non-Western cultural examples broaden the scope beyond the conventional conceptions of portraiture. We conclude by trying to understand the continuing allure of the portrait today as digital media challenge our conventional ideas of visuality, and perhaps even the urgency of portraiture in the post-human age.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4879 Marking History: Painting and Sculpture After World War II in the U.S., France, and Germany

This seminar focuses on the aesthetic, cultural and philosophical reactions to the devastating events surrounding World War II and its later reception. We consider artistic developments within a network of international exchange — biennials, gallery and museum exhibitions — in which France, Germany, and the U.S. participated equally within a field of visually similar aesthetic responses to a seismic shift in historical consciousness. What distinctive artistic languages emerged after the war to express transformations in historical consciousness, and in older ideas about an unfettered subjectivity? In what ways did concepts of trauma with which we live today reshape collective memory and leave their trace on painting and sculpture? Looking at abstraction and semi-abstract works in painting and sculpture, we analyze the works of Jackson Pollock, Willem de Kooning, Alberto Giacometti and Jean Dubuffet, Wols, K.O. Gütz, Emil Schuhmacher and Hans Hartung. Student research for this seminar will contribute to an exhibition being organized by the Kemper Museum of Art. Students with reading skills in German or French are encouraged. Prerequisites: L01 215 Intro to Modern Art, Architecture and Design or permission of the instructor.

Credit 3 units. A&S IQ: HUM EN: H

L01 Art-Arch 4900 Independent Study and Research

Credit variable, maximum 3 units.

L01 Art-Arch 4905 Greenberg Curatorial Study

The Arthur Greenberg program offers students the experience of curating an exhibition. A small team (of two or three) are selected through a competitive application process the year before they enroll in the course. Students sign up for 3 credits in the fall semester, and 1 credit in the spring. Under the supervision of a faculty mentor in the Department of Art History & Archæology and a curator in the Mildred Lane Kemper Art Museum, students plan and curate an exhibition for the museum’s Teaching Gallery. They also research and write a short brochure, prepare educational materials, and offer related programs for the exhibition which usually opens in April. Fall 3-unit course fulfills a departmental capstone requirement for the major.

Credit variable, maximum 4 units. A&S IQ: HUM EN: H

L01 Art-Arch 4918 Modern War in Art

Art and war have always been intertwined, whether in glory or revulsion. But modern art and modern war are qualitatively different from their counterparts in the past in ways that ensured that their relationship would become more problematic and oppositional. The challenge of finding new artistic languages to express the new conditions of mechanized combat led many artists to explore abstraction, fragmentation, absurdity or arbitrariness to convey the energy, impersonality and nihilism of modern war. When the British soldier and poet Wilfred Owen (1893-1918) wrote of the human devastation of World War I as “obscene as cancer, bitter as the cud,” he strained for metaphorical language appropriate to its magnitude. We will consider the same challenge to visual artists throughout the modern period. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: IS EN: H

L01 Art-Arch 4921 Theory for Art History: Modernism/Modernity/Postmodernism

This course introduces key modern theories. Considering diverse thinkers, this seminar focuses on concepts that have framed and re-framed the study and interpretation of aesthetic modernism and postmodernism over the past century. We read and discuss primary theories and probe their application through close visual readings of individual works of art. Discussions seek a
better understanding of the role and meaning of the aesthetic object within a variety of theoretical contexts, extending from an investment in the universalist modern artistic subject, to the shifting role of the contingent viewer within modernity to an expansion of the traditional boundaries of the discipline of art history into visual studies. Prerequisites: advanced undergraduate standing, permission of the Instructor.
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4922 From the Death of the Author to the Birth of YouTube: Identity in Contemporary Art
What constitutes an artist today, when anyone can upload his or her musings to the entire world? Is the question even relevant? This course introduces students to the construction of artistic identity in contemporary art. Students consider major themes governing the production of contemporary art. We cover such topics as the death of the author and the end of art, identity politics and “authenticity,” and the effects of new media on the construction of artistic persona. This course assumes a basic familiarity with the methods of art history, as well as general knowledge of art history before 1960. Prerequisites: Introduction to Western Art or Introduction to Modern Art and one 300-level course in art history, or permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L01 Art-Arch 4923 Globalization and Contemporary Art
What does globalization mean for contemporary art? And what do we even mean when we use the term? This upper-level seminar course considers recent art (1985–present) in the context of theories of development, postcolonialism and globalization. We focus on the tensions between the global and the local, as well what it means for an artist to be national or international. We also consider the impact of neoliberal economic policies on art production and the art market, as well as the role museums play in this international context. Finally, we consider the internet and social networks as globalizing influences that affect the production and distribution of contemporary art. Prerequisites: Introduction to Western Art or Introduction to Modern Art and one 300-level course in art history, or permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

L01 Art-Arch 4924 1968 and its Legacy
The events of 1968, including the May riots in Paris, the Tucumán Arde exhibition in Argentina, the Tlatelolco Massacre in Mexico City, and the Prague Spring (and Russian winter) in the Czech Republic, just to name a few, ushered in a new political and social imperative for artists. This class starts with 1968 and traces its legacy to the social and cultural movements of the 1980s, 1990s and early 2000s. We seek to understand the historical underpinnings of contemporary activist art and determine the roles of socially-motivated art in the current political and intellectual climate. Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH, CPSC, HUM EN: H

L01 Art-Arch 4925 The Persona of the Artist: Contemporary Visual Artists and their Writings
An art movement is located as much in the writing that “surrounds” it as in the body of objects that apparently “comprise” it. In the art world today, it is generally accepted that artists are also artist-writers. This course explores this phenomenon by examining the writings of late 20th- and early 21st-century visual artists. In addition to studying social and political contexts, we analyze the various modes of writing that artists employ, look for specific points of intersection between their art and writing, consider the circumstances and venues of the writings’ publication, study how the writings figure into the contemporary reception of the artists’ visual practices, and evaluate art historians’ uses of artists’ writings. In exploring a range of case studies, we contemplate the motivations and critical function of writing versus or in combination with artmaking as well as the role that the practice of writing plays in forming the identity of the contemporary artist-subject.
Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215); one 300-level course in art history preferred; or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L01 Art-Arch 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories
This seminar examines the theory and cultural history of the collecting of art objects and artifacts from a range of cultures and periods, considering how and why both individuals and institutions create collections. What social and psychological factors drive this passion? What are the various cultural, political and aesthetic priorities that have driven this practice historically? How is cultural patrimony defined, and how do law, the art market and cross-cultural ethics impact the placement, study and display of a culture's material heritage? We build the seminar around the history of collecting in America, with a focus on Midwestern examples, and particularly, important case studies in St. Louis. We, for example, consider the significant local collections built by Joseph and Emily Rauh Pulitzer (modern art), and Morton May (modern and oceanic art), as well as the histories of both modern and non-Western collections now owned by the St. Louis area museums. This course is complemented by various local field trips (SLAM, Pulitzer, Kemper and Cahokia). Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4982 Public Art: History, Practice, Theory
The course will consider the history and functions of public art, with special attention to public art in St. Louis. We survey not only the obvious forms of public art in urban sculpture and mural painting, but also less traditional intersections of art and public in such sites as the internet. We will also examine the operations of institutions — national and local arts agencies, international exhibitions, nonprofit centers and the like — that foster a public engagement with contemporary art. Finally, we will consider new priorities and projects in public art, especially socially oriented and environmentally sustainable initiatives. Prerequisites: L01 Art-Arch 112 Introduction to Western Art or L01 Art-Arch 211 Introduction to Modern Art; one 300-level course in art history preferred, or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4992 Honors Art History and Archaeology
A major research paper acceptable to the department. Prerequisite: permission of the department. Max. 6 units.
Credit 3 units. EN: H
Asian-American Studies

The minor in Asian-American Studies is designed to enrich critical understanding of both the individual experiences and collective histories of Asian Americans in regional, national and transnational contexts. As an interdisciplinary and multidisciplinary program, it underlines transnational contexts and comparative perspectives for the study of Asian-American experiences. By promoting knowledge and understanding of a wide range of Asian-American individuals and groups through teaching and research, the minor aims to provide new classroom opportunities for undergraduate students to explore Asian-American experiences. It intends to enhance communication and collaboration among various cultural, ethnic and racial groups; to facilitate intellectual exchanges; and to broaden academic inquiries on the subjects of migration, ethnicity and race across different disciplines and programs at Washington University. Involved departments include American Culture Studies; East Asian Studies and South Asian Studies; African and African-American Studies; Women, Gender, and Sexuality Studies; and American Indian Studies.

The minor in Asian-American Studies can nicely complement a major in American Culture Studies, East Asian Studies, East Asian Languages and Cultures, English, History, International and Area Studies, Sociology and other fields. Because the questions that animate Asian-American Studies span disciplinary boundaries, the minor will inspire students to draw on the methods and insights of multiple disciplines to engage with complex real-world problems that necessitate interdisciplinary thinking. The minor in Asian-American Studies is situated within the larger context of the university’s commitment to diversity and inclusion, so it is an integral part of the diversity and inclusion initiatives at Washington University that nurture a culturally and academically stimulating environment.

The Asian-American Studies minor is an independent minor administered by International and Area Studies.

Majors
There is no major in Asian-American Studies.

Minors

The Minor in Asian-American Studies

Total units required: 18 (at least 12 units must be at the 300 level or above)

Requirements:

• 3 credits of Introductory course work
• 3 credits of Asian-American Focus course work
• 6 credits of Multiethnic and Transnational course work
• 6 credits of Context course work

Regulations:

• In general, students should complete one introductory course prior to pursuing Asian-American Focus courses and Multiethnic and Transnational courses.
• All advanced units must be unique to the Asian-American Studies minor (i.e., not counted toward any other major or minor).
• All courses counting toward the Asian-American Studies minor must be taken for a letter grade, and students must receive a grade of C+ or higher.
• Students may use a study abroad course on any subject in Asian Studies to fulfill the “Asian Studies” category requirement. Such courses must be approved by the study abroad adviser for the Asian-American Studies minor.

Introductory Courses
Choose one from this list; 3 credits, any level:
• First-Year Seminar: Easy Riders, Migrant Laborers: American Mobility in Literature and Film (E Lit 160) (unpredictable)
• Ocean, Island, Ghetto, Globe: An Introduction to Asian American Literature and Its Spatial Politics (E Lit 313) (annually)
• Freedom, Citizenship and the Making of American Life (History 163) (annually)
• First-Year Seminar: The Meaning of Pakistan: History, Culture, Art (History 2157) (every 1 or 2 years)
• First-Year Seminar: Chinatown: Migration, Identity, and Space (IAS 135) (annually)
• First-Year Seminar: Beyond the Melting Pot: Life in Immigrant America (SOC 2710) (unpredictable)

Asian-American Focus Courses
Choose one from this list; 3 credits, any level:
• Doctors and Terrorists: The Fictions of South Asian Americans (AAS 200) (every 2 years)
• Asian and Pacific Island America: Identity, Diversity, and Social Change (AMCS 250) (annually)
• Ocean, Island, Ghetto, Globe: An Introduction to Asian American Literature and Its Spatial Politics (E Lit 313) (annually)
• Topics in American Literature: Imagining Multi-Racial Coalitions (E Lit 423) (every 1 or 2 years)
• "Model Minority": The Asian-American Experience (IAS 3512) (annually)

Multiethnic and Transnational Courses
Choose any two from these two lists; 6 credits, any level:
(1) Asian Americans in a Multiethnic/Multiracial Perspective
• Topics in English Literature: Growing Up “Different”: The Bildungsroman in a Diversifying America (E Lit 317) (annually)

(2) Global Asia and Asian Diasporas in a Transnational Perspective
• Finding China: From Sojourners to Settlers in the Chinese Diaspora and Chinese American Literature (Comp Lit 375) (unpredictable)
• Topics in Comparative Literature I: The Trope of “China” in the Imagination of the Chinese Diaspora (Comp Lit 375) (unpredictable)
• Writing from the Periphery: The Question of Chineseness (Comp Lit 449) (unpredictable)
• Chinese Diasporas: A Social History of Global Migration (History 3165) (every 2 years)
• Imperialism and Sexuality: India, South Asia and the World (History 395C) (every 1 or 2 years)

Context Courses
Choose one from each category; 6 credits total, any level:
(1) Immigration, Race and Ethnicity
• Rainbow Radicalisms!: Ethnic Nationalism(s), the 1960s and the Politics of the New Left (AFAS 4121) (unpredictable)
• The Immigrant Experience (AMCS 202) (every 1 to 2 years)
• Race & Ethnic Relations in the United States (AMCS 3296) (annually)
• Neighborhoods, Schools and Social Inequality (Educ 4289) (unpredictable)
• Visualizing Segregation: A History of St. Louis, Chicago and New Orleans (INTER D 306M) (unpredictable)
• Immigration Law (Law 630) (every 1 to 2 years)
• Race and Ethnicity in American Politics (Pol Sci 3031) (unpredictable)
• The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S. (SOC 2010) (every 1 to 2 years)
• Social Inequality in America (SOC 2110) (unpredictable)
• The Social Construction of Race (SOC 3212) (unpredictable)
• Sociology of Immigration (SOC 3710) (unpredictable)

(2) Asian Studies
• Contemporary Chinese Culture and Society (Anthro 3055) (unpredictable)
• Introduction to Asian Art (Art-Arch 111) (annually)
• Modern and Contemporary Chinese Art (Art-Arch 3426) (unpredictable)
• The Three Emperors: Redefining Chinese Art in the Golden Age (Art-Arch 4489) (unpredictable)
• Modern and Contemporary Chinese Literature (Chinese 342) (annually)
• Topics in East Asian Studies: Sino-American Relations since 1949 (East Asia 3263) (every 2 years)
• First-Year Seminar: The Meaning of Pakistan: History, Culture, Art (History 2157) (every 1 or 2 years)
• Globalization and Its Discontents (History 270) (unpredictable)
• Early Modern China (History 3162) (every 1 or 2 years)
• Modern China: 1890s to the Present (History 316C) (annually)
• Japan Since 1868 (History 320C) (every 1 or 2 years)
• 19th-Century China: Violence and Transformation (History 331) (every 2 years)
• Advanced Seminar: Incredible India! (History 49SC) (unpredictable)
• First-Year Seminar: The Vietnam Wars (IAS 111) (unpredictable)
• From McDonald's to K-Pop: New Movements in East Asia (IAS 3822) (annually)
• The Modern Voice in Japanese Literature (Japan 333C) (annually)
• Topics in Politics: Modern South Asian Politics (Pol Sci 3292) (unpredictable)

Courses

Please refer to the Minors (p. 271) section of this page.

Biology

Biology is an exciting, diverse field that ranges from the molecular biology of individual cells to interactions among entire populations of organisms. Members of the biology faculty are recognized internationally for their research, and they bring a variety of strengths and teaching styles into the classroom. The major program in biology provides a thorough education in the history of scientific discovery in biology, the logical and statistical procedures used to formulate and test biological hypotheses, and the technical skills needed to conduct contemporary biological research.

The biology major program emphasizes the hierarchical nature of biological complexity and the major structures and functions that emerge at the molecular, cellular, organismal, populational and ecosystem levels. Each student masters at least one dimension of contemporary research in sufficient detail to describe the major hypotheses currently being tested and to demonstrate techniques used to test those hypotheses. Mastery of this material is evident in a student's ability to critique published data, to identify ambiguities and uncertainties in the conclusions drawn from those data, and to evaluate the societal importance of the research. Biology majors are prepared to make creative contributions to biology.

The biology major program provides a wide range of research opportunities. Because more than 400 faculty members conduct research in biology and biomedical sciences at Washington University, it is easy to find a project that suits a student's main interests. Many students complete their research projects at the Washington University School of Medicine, one of the top-ranked medical schools in the country. Summer research fellowship programs are available, funded by sources including the Howard Hughes Medical Institute, the Children's Discovery Institute, the National Science Foundation, and the Washington University Office of Undergraduate Research. Detailed information about finding a research mentor (https://pages.wustl.edu/Bio_200-500_independent_research/bio-200500-course-information-page) is available online.

Majors

The Major in Biology

Total units required: 58-67

Required courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biol 2960</td>
<td>Principles of Biology I</td>
<td>4</td>
</tr>
<tr>
<td>Biol 2970</td>
<td>Principles of Biology II</td>
<td>4</td>
</tr>
<tr>
<td>Chem 111A</td>
<td>General Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>or Chem 105</td>
<td>Introductory General Chemistry I</td>
<td></td>
</tr>
<tr>
<td>Chem 112A</td>
<td>General Chemistry II (or Chem 106)</td>
<td>3</td>
</tr>
<tr>
<td>or Introductory General Chemistry II</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Chem 151</td>

<tr>
<td>Chem 262</td>
<td>Organic Chemistry II with Lab</td>
<td>4</td>
</tr>
<tr>
<td>Math 132</td>
<td>Calculus II</td>
<td>3</td>
</tr>
<tr>
<td>or Math 2200</td>
<td>Elementary Probability and Statistics</td>
<td>3</td>
</tr>
<tr>
<td>or Math 233</td>
<td>Calculus III</td>
<td></td>
</tr>
</tbody>
</table>

Students may substitute Chem 401 Physical Chemistry I for Chem 262 Organic Chemistry II with Lab. Students who plan to take physical chemistry must take Math 233 Calculus III. Math 2200 Elementary Probability and Statistics (required for the tracks in ecology and evolution and in genomics and computational biology) and Math 322 Biostatistics are valuable, particularly for students interested in research. Students who have taken Math 233 may take Math 3200 Elementary to Intermediate Statistics and Data Analysis rather than Math 2200 Elementary Probability and Statistics for a more advanced treatment of statistics.

At least 18 units in advanced biology courses (numbered 300 or above) are required. These 18 units may not include Biol 303A, Biol 307A, Biol 374, Biol 387, Biol 388, Biol 4202, Biol 429, Biol 487 or Biol 488; cross-listed courses originating in other departments (except Biol 360, Biol 4580, Biol 4810, Biol 4820 and Biol 4833, which count as biology major credit despite external origins); courses in University College; or more than 3 units of history-of-science courses.

Majors are required to take at least one course from each of the following three areas:

**Area A: Cellular and Molecular Biology**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biol 3041</td>
<td>Plant Biology and Genetic Engineering</td>
<td>4</td>
</tr>
<tr>
<td>Biol 324</td>
<td>Human Genetics</td>
<td>3</td>
</tr>
<tr>
<td>Biol 334</td>
<td>Cell Biology</td>

<td>4</td>
</tr>
<tr>
<td>Biol 4525</td>
<td>Structural Bioinformatics of Proteins (Writing Intensive)</td>
<td>4</td>
</tr>
</tbody>
</table>

All courses to be counted toward a major in biology must be taken for a letter grade if a letter grade is offered. A grade of C- or better must be earned in all of these courses.

In special cases, students may earn credit for graduate courses offered by the Division of Biology and Biomedical Sciences.

Optional Biology Major Tracks

A student majoring in biology may choose one of five optional tracks within the major if the student's interests lie primarily within one of these subfields of biology. A track provides strong training for graduate study in its subfield. All tracks require completion of the biology major requirements as stated above but provide concentrated study in one of the five subfields.

The Major in Biology: Ecology and Evolution Track

Additional requirements include Math 2200 or Math 3200. Students whose main interest is ecology must take at least two ecology electives and one evolution elective; students whose main interest is evolution must take at least two evolution electives and one ecology elective (evolution electives: Biol 3501, Biol 4181, Biol 4182 and Biol 4183; ecology electives: Biol 370, Biol 381, Biol 419, Biol 4195 and Biol 472). Also required are one elective in analytical methodology (CSE 131 or Math 322) and one elective in earth and planetary sciences (EPSc 201 or EPSc 323). The course used to fulfill the advanced laboratory requirement for the major must be Biol 373W, Biol 4193, Biol 437, Biol 4342 or Biol 434W.

The Major in Biology: Genomics and Computational Biology Track

Additional requirements include Biol 3371 (or Biol 324 or Biol 4183 or Biol 548), Math 2200 or Math 3200, and two outside electives (CSE 131 and CSE 247). CSE 240 is strongly recommended. The course used to fulfill the advanced laboratory requirement for the major must be Biol 3492, Biol 4324, Biol 434W, Biol 437 or Biol 4525. Biology courses recommended for students in this track include Biol 334, Biol 3422, Biol 349, Biol 4030, Biol 4181, Biol 4183 and Biol 4810. Recommended electives outside biology include Math 217 and Math 309.

The Major in Biology: Microbiology Track

Additional requirements include Biol 349, which should be taken during the spring of the sophomore year, and either Biol 451 or the pair of courses Biol 4810 and Biol 4820. The advanced laboratory course used to fulfill major requirements must be one of the following: Biol 3491, Biol 3492, Biol 3493, Biol 437 or Biol 4520. At least one of the following must be taken as an advanced microbiology elective: Biol 4492, Biol 4832 or Biol 5426. At least one of the following must be taken as an allied elective: the pair of courses Biol 191 and Biol 192, Biol 424,
Chem 453 or EPSc 323. Biol 3501 is highly recommended as the course used to fulfill biology major area C. The total number of upper-level credits earned in major-track biology courses and allied electives must be at least 24.

**The Major in Biology: Molecular Biology and Biochemistry Track**

Additional requirements include both Biol 4810 and Biol 4820 as well as one of the following: Biol 334, Biol 3371 or Biol 349. The advanced laboratory course used to fulfill major requirements must be one of the following: Biol 3491, Biol 3492, Biol 3493, Biol 4241, Biol 4342/Biol 434W, Biol 437, Biol 4520, Biol 4522, Biol 4523 or Biol 4525. Additional biology courses recommended for students in this track include Biol 3041, Biol 4023, Biol 4071, Biol 4183, Biol 4832, Biol 4833 and Biol 5312.

**The Major in Biology: Neuroscience Track**

Biology major requirements must be met with the following courses: Biol 3058, area A (Biol 334, Biol 451, Biol 4810 or Biol 4820), area B (Biol 3411), and any course in area C. Students must then choose one of the following laboratory pathways: (1) Laboratory Pathway 1: one of the following courses: Biol 360, Biol 373W or Biol 404; or (2) Laboratory Pathway 2: any other upper-level biology laboratory course on the list of approved laboratory courses for the biology major plus 6 credits of Biol 500N and/or Biol 500U (Independent Research in Neuroscience). Students must select at least one biology elective (Biol 3110, Biol 3151, Biol 328, Biol 3371, Biol 3421, Biol 3422, Biol 4030, Biol 437 or Biol 4580) and one outside elective either in physics (Physics 350, Physics 355 or Physics 360) or psychology (Psych 330, Psych 360 or Psych 3604). Math 2200 or Math 3200 is recommended. Optional seminar courses in neuroscience include Biol 171 and Biol 4934. Physics 360 may count either as the advanced laboratory requirement or the outside elective course but not for both requirements.

Related majors can be found in the biomedical engineering (p. 972), philosophy-neuroscience-psychology (PNP) (p. 740) and philosophy of science (p. 726) pages of this Bulletin.

**The Major in Environmental Biology**

Students interested in environmental biology typically take Biol 2950 Introduction to Environmental Biology during fall of the first year of study, although it may be taken later. A 400-level course to be required for Latin honors in environmental biology will be introduced. All other courses required for the environmental biology major are currently listed.

**Required courses:**

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>Biol 3041</td>
<td>Plant Biology and Genetic Engineering</td>
<td>4</td>
</tr>
</tbody>
</table>
### Additional Information

**Research:** Research opportunities are available during the student’s first and second years through Biol 200; such opportunities are available during the third and fourth years through Biol 500. A research emphasis in the major requires at least 6 credits (two semesters) of Biol 500 research and an approved senior thesis on this research. The research emphasis is acknowledged on the degree as a research milestone.

**Senior Honors:** Biology majors are encouraged to work for senior honors, which require a 3.30 grade-point average in biology, a 3.30 GPA in nonbiological sciences (mathematics, chemistry and physics courses), and a 3.65 overall GPA at the time of graduation. Also required are 6 units of Biol 500 research and an approved thesis from this work. Students interested in senior honors should begin Biol 500 no later than the spring of the junior year.

The Biology department awards the Marian Smith Spector Prize to an undergraduate who has an excellent academic record and who submits an outstanding honors thesis as well as the Ralph S. Quatrano Prize to the student whose thesis shows the greatest evidence of creativity in design, research methodology and/or broader scientific implications. It also awards the Harrison D. Stalker Prize to a graduating senior whose college career is distinguished by scholarship, service and breadth of interest.

### Minors

#### The Minor in Biology

**Units required:** 18 units of biology and 14 units of chemistry

**Required courses:**

<table>

**Additional Information**

All courses used for the biology minor must be taken for a letter grade. A grade of C- or better must be earned in all of these courses.

**The Minor in Bioinformatics**

Mindful of the emerging opportunities at the interface of biology and computer science, the Department of Biology and the Department of Computer Science & Engineering have fashioned the minor in bioinformatics. This program serves students from both departments as well as other students from the natural sciences and engineering with an interest in this field.

**Units required:** 23-24 units, as described below

**Core courses:**

Additional Information

It is anticipated that, for those students majoring in biology or computer science & engineering (CSE), some portion of the introductory sequence will overlap with the courses required for the major and that these courses will be applicable to both the major and the minor. Upper-level courses in biology and CSE used to fulfill the minor requirements may not be used to fulfill the requirements of another major or minor in Arts & Sciences. A minimum grade of C- is required for all courses to count toward the minor.

Courses

L41 Biol 144 First-Year Seminar: The Biology of Cancer

Cancer is the second-leading cause of death worldwide. Despite focused research efforts, cancer still poses a unique biomedical puzzle: it is now recognized that cancer is not a single disease but rather a collection of many disorders with underlying mechanistic complexities that can affect most tissues in the human body. This interactive first-year course provides an introductory overview of the biology, diagnosis, and treatment of human cancers. We touch upon background topics in DNA structure and replication, gene regulation and expression, transcription, and mutations and DNA repair, but the primary focus is on the genetic and molecular changes that normal cells undergo during transformation into malignant cancer cells, emphasizing the dysfunction of essential biological processes like programmed cell death, cell proliferation, differentiation, and immune surveillance. Classical diagnosis and treatment methods are compared with newer strategies, such as targeted therapies. Finally, the growing role of “omics” technologies in tumor classification, patient prognosis, and therapy are discussed. The course is a mix of lectures, student-led discussions/presentations, guest seminars, and activities (e.g., on-site visits to Siteman Cancer Center, a medical pathology lab, and the McDonnell Genome Institute). Lectures provide an overview of each topic, while activities and discussions of cutting-edge oncology topics in the news and primary literature familiarize students with current trends in cancer research/treatment and enhance students' reading and critical analytical skills. Students choose a specific type of cancer for further study, and, near the end of the semester, they prepare a presentation to the class on that type's molecular and cellular etiology, epidemiology, pathology, diagnosis, and current/future treatment options.
**L41 Biol 171 First-Year Opportunity: Neuroscience Futures I: How Do We Learn About the Brain?**

In this seminar course for first-year students, students learn about how neurobiologists conduct and communicate research. We focus our discussion on primary research papers written by Washington University neurobiologists, who visit the class to present their work. Discussion then focuses on the formulation of scientific questions, evaluation of evidence and interpreting data within the context of a broader field. Students meet neuroscience colleagues in two joint class periods with participants in a neurobiology seminar for second-, third- and fourth-year students. Course is for first-year, non-transfer students only. Credit 1 unit. A&S: FYO Arch: NSM Art: NSM

**L41 Biol 1771 Special Topics in Biology: Plant-Associated Microbes — Friends or Foes?**

This is a new research-based laboratory course offered by Dr. Barbara Kunkel in the Department of Biology. The small class size and the laboratory setting of the course are intended to foster the development of student-professor mentoring relationships. The main focus of this course will be the very important roles that microbial communities play in the lives of plants and animals. For example, in nature as well as in agricultural settings, the communities of microorganisms that grow on or near a plant influence the growth and overall health of that plant. These plant-associated microbial communities are highly complex, and they are comprised of thousands of different species, including bacteria and fungi. However, neither the role of individual microbial species within the larger microbial community nor how such a community is beneficial to plants is well understood. Natural microbial communities contain many potential pathogenic organisms that can potentially infect and cause disease on their hosts. This fact leads to the following question: How can these organisms grow in proximity to or even on their hosts without causing disease? One hypothesis is that these organisms may have additional roles in the context of a larger microbial community that can ultimately be of benefit to their host. We will investigate these questions by characterizing a collection of natural isolates of potential plant pathogenic bacterial strains from the genus *Pseudomonas*. Students will spend two hours per week in the lab characterizing the new *Pseudomonas* isolates. Over the course of the semester, students will be exposed to a variety of fundamental topics in biology, including microbiomes, beneficial and pathogenic plant-microbe interactions, bacterial cell biology and genetics, and key concepts in molecular biology and biochemistry. The students will also meet with Dr. Kunkel for one hour per week to discuss a variety of topics in the following areas: (1) basic concepts in chemistry, biochemistry and molecular biology; (2) learning and study strategies; and (3) other topics related to thriving at Washington University.

Credit 1 unit.

**L41 Biol 181 First-Year Opportunity: Introduction to Cutting-Edge Research in Biology**

A lecture course intended for first-year students that focuses on the practice and culture of biological research. Active researchers describe the biological context of their research, the specific questions they have formulated, the means by which they pursue their answers, and their data and conclusions. The focus is on process: how biologists pursue their profession, what goes on in a research setting. Additional topics of clinical and contemporary interest are often included. Students are expected to attend all lectures. Must be taken Credit/No Credit. Course is for first-year, non-transfer students only.

Credit 1 unit. A&S: FYO A&S IQ: NSM Art: NSM

**L41 Biol 1811 First-Year Opportunity: Research and Conservation in Zoos and Botanical Gardens**

An introduction to the world of zoos and botanical gardens. Students will learn of the diverse and cutting-edge ways in which scientists and conservationists study the world’s biological diversity and work to conserve it. Taking advantage of two world-class institutions a short distance from the Danforth Campus, the class will meet every week at an off-campus site (primarily the Saint Louis Zoo and Missouri Botanical Garden, but also several other institutions) to hear lectures from participating institutions and to tour facilities to see firsthand how research is conducted and how these institutions work to preserve endangered species. Students will write three short papers; each paper will be based on a class lecture and its associated readings. Must be taken credit/no credit. Course is for first-year, non-transfer students only.

Credit 2 units. A&S: FYO A&S IQ: NSM

**L41 Biol 191 Ampersand: Phage Hunters**

A research-based laboratory class for freshmen. Students join a national experiment organized by HHMI, with the goal of isolating and characterizing bacteriophage viruses found in the soil in the St. Louis area. Laboratory work includes the isolation and purification of their own phage, DNA isolation and restriction mapping, and EM characterization of the phage. Several Washington University phages are selected for genome sequencing over winter break, and they are annotated during the spring in Biol 192. Students who successfully isolate and annotate a phage may become co-authors on a scientific paper.

Prerequisites: high school courses in biology and chemistry, at least one of which is at the AP or International Baccalaureate level; permission of the instructor. Limited to 40 students. One hour lecture, one hour discussion, and three hours lab per week. Course is for first-year students in the Phage Hunters Program only.

Same as L61 FYP 1910

Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI
L41 Biol 192 Ampersand: Phage Bioinformatics
This is a research-based laboratory class for freshmen. Students join a national experiment organized by HHMI, with the goal of genomic characterization of a local phage. Laboratory work focuses on learning computer-based tools for genome analysis followed by annotation and comparative analysis of the genome of a phage (bacterial virus) that was isolated during the fall semester at Washington University and sequenced over winter break. Prerequisites: high school courses in biology, chemistry, and physics (at least one at the AP or International Baccalaureate level); permission of the instructor. Limited to 40 students; preference given to those completing Biol 191 Phage Hunters. One hour lecture, one hour discussion, and three hours lab per week. Same as L61 FYP 1920 Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 200 Introduction to Research
This is an introduction to laboratory and field research in biology for first- and second-year students. Students work under the supervision of a mentor in a setting of established, ongoing research. Prerequisites: less than 60 units completed; permission of mentor and the department. For online enrollment instructions, visit the Bio 200/500 webpage (https://pages.wustl.edu/Bio_200-500_independent_research/register). Students are registered by the department after approval is granted. Registration may not appear in WebSTAC until mid-semester. Credit/no credit only. Credit variable, maximum 3 units. A&S IQ: NSM Art: NSM

L41 Biol 200S Summer Introduction to Research
Summer research under the supervision of a faculty mentor. Prerequisites: first-year or sophomore standing and permission of mentor and the department. Credit to be determined in each case, usually 3 units/summer; may be repeated for credit during different summers. Credits are received during the fall semester after the summer research. The application deadline and registration information can be found on the Bio 200/500 course website (https://pages.wustl.edu/Bio_200-500_independent_research). Credit/no credit only. Credit variable, maximum 3 units. A&S IQ: NSM

L41 Biol 2010 Ampersand: The Science of Biotechnology
Biotechnology is truly interdisciplinary, with a myriad of pieces from biology, chemistry, engineering, physics, computer sciences, management, public policy, and law that apply the scientific process to societal challenges. This course introduces topics for science and engineering majors with an interest in biotech, and it teaches scientific concepts to business students considering careers in biotech management and entrepreneurship. Students who complete this course understand key science concepts. They also know how discoveries lead to applications that address global challenges, how to effectively use a variety of resources to explore connections between science and biotech business, how to synthesize information from different fields, how to exhibit strong teamwork skills, and how to communicate information in written and oral forms. In addition, this course serves as a gateway for students in the two-year Biotech Explorers Program (BEP). The first two weeks of the course introduce students to the history of biotechnology, the BEP, and the use of case studies. The remainder of the course uses a series of four three-week units that combine lecture material, in-class group assignments, and readings to introduce the science and scope of biotechnology. For each unit, student teams also develop short case studies of St. Louis biotech companies and present their findings to the class. A series of site visits introduces students to the vibrant St. Louis biotech community. Course is for students in the BEP only. Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 2020 Ampersand: Biotechnology Entrepreneurs Seminar
Although the biotech industry is science-based, the risks of product and technology development, legal issues, and market pressures make the landscape full of uncertainty. Lectures and textbooks fall short of delivering true insight about the processes and challenges of bringing ideas to real-world products. This second semester freshman seminar course is designed to develop an appreciation of how biotech companies achieve their goals by engaging students through interactions with experienced executives and entrepreneurs, whose shared knowledge and stories add depth and context to the learning process. This 1-credit seminar course introduces students to the basics of innovation and entrepreneurship as a framework for marketable discoveries, builds an appreciation of how biotech companies start, obtain funding, and navigate intellectual property, provides an overview of career options in biotech, and insight on the hiring process. Prerequisites: Students need to have completed Biol 2010: The Science of Biotechnology for enrollment in this course and be currently enrolled in Biol 2960: Principles of Biology I. Limited to 20 students. Credit 1 unit. A&S: FYS A&S IQ: REQ

L41 Biol 2342 Wilderness First Aid
The National Outdoor Leadership School (NOLS) has developed a comprehensive curriculum to instruct individuals in backcountry first aid. This curriculum is the main content taught in the course. After successfully completing this demanding 18 hour NOLS Wilderness First Aid course, students are required to write-up a full assessment and treatment plan (5-7 page minimum) for one of the wilderness casualties described in Peter Stark’s Last Breath. Students meet for a half-day seminar during which each presents their case, assessment, underlying physiology, and treatment plan to the group. They receive feedback from one another, and from the instructor, about their assessment, explanation of the relevant physiology, and action of their proposed intervention. Credit 1 unit. A&S IQ: NSM

L41 Biol 2500 Introduction to Biological Reasoning
Students will work to develop a fluency in biological language, methods, and reasoning as applied to human health. We will study the molecular, cellular, and physiological perspectives for each health-related topic. We will zoom in to study processes at the molecular level, swing back out again to examine processes at the cell or physiological level, and examine data and methods that support this knowledge. We will emphasize problem-solving and reasoning as it applies to understanding biological processes. This course is for first-year students only. It does not count for credit toward the biology major. Prerequisite: permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 265 Experience in the Life Sciences
Earn credit for non-classroom learning in the life sciences in a variety of activities arranged by the student: for example,
students may accompany a Washington University faculty
physician on rounds and prepare a paper on an organ system
or disease, participate in a clinical or applied ecological study
and report on it, or participate in science outreach teaching.
Participants must meet regularly with a supervisor and commit
at least 140 hours over two semesters. A work plan is approved
prior to registration. A progress report is due after one semester,
and a final paper is due after two semesters. This course does
not count toward the major. Students are registered by the
department after approval is granted. Credit/no credit only.
Credit 1.5 units.

L41 Biol 2651 MedPrep I: The Lecture Series
MedPrep I is a unique lecture series taught by a physician,
a former medical school course master, and a member of
the Committee on Admissions for the School of Medicine.
Through a weekly two-hour lecture, this course gives students
accurate, honest, and detailed information about every aspect
of the application and admissions process for medical school,
the entire educational process (including medical school and
residency training), and the pros and cons of life as a physician.
MedPrep I is particularly useful for first-year students and
sophomores in that it reviews the common pitfalls encountered
by unsuccessful applicants to medical school and outlines the
steps to take during each year of college to be a successful
applicant when the time comes. There is no outside course
work and no exams. Attendance at all classes is required. A
$10 course fee applies. For more information, please visit the
Credit 1 unit.

L41 Biol 2652 Pediatric Emergency Medicine Research
Associates Program: Experiences in Life Sciences
The Pediatric Emergency Medicine Research Associates
Program (PEMRAP) offers undergraduate pre-medical students
an opportunity to participate in clinical, patient-oriented research
projects in a hospital setting. Students have the opportunity to
work in the St. Louis Children's Hospital Emergency Department,
a nationally recognized pediatric emergency medicine and
trauma care facility. A number of research projects are currently
underway in various areas of pediatric emergency medicine.
Research Associates (RAs) are expected to work two four-
hour shifts per week in the St. Louis Children's Hospital
Emergency Department and to attend a weekly two-hour lecture
on Tuesdays from 1:30-3:30 p.m. in conference room 10A of
the Northwest Tower Building (across from Children's Hospital).
Lectures are given by Emergency Department faculty members.
This program offers students the unique opportunity to be a vital
part of the Emergency Department research team. In addition,
the RA's experience in the Emergency Department may help
them determine if medicine is truly the career path they wish to
choose. Prerequisite: sophomore level or higher and approval
of instructor. Registration is done through the PEMRAP website
(https://pages.wustl.edu/pe Mrap). May not be taken concurrently
with Biol 2654 MedPrep II.
Credit 3 units.

L41 Biol 2654 MedPrep II: The Shadowing Experience:
Emergency Medicine
MedPrep II offers students the real-world, behind-the-scenes
experience of a life in medicine. For three hours every other
week, students shadow physicians in the Charles F. Knight
Emergency and Trauma Center of Barnes-Jewish Hospital, the
main teaching hospital of the Washington University School
of Medicine. In addition to the shadowing, there is a required
class session every other week. Because of the orientation
material presented, excused absences will not be granted for
the first two sessions for any reason whatsoever, including
illness or emergency. There is no outside course work and no
exams. A $25 course fee as well as HIPAA training and PPD
testing are required. For more information and to register for
this course, please visit the MedPrep Program website (http://
pages.wustl.edu/medprep). Registration is done through the
website, not through WebSTAG. Prerequisites: successful
completion of Biol 2651 and sophomore standing or above.
During the summer semester, students may take Biol 2651 and
Biol 2654 concurrently.
Credit 1 unit.

L41 Biol 2656 Introduction to Health Professions:
Occupational Therapy, Physical Therapy and Audiology
This course provides students interested in health professions
with an overview of occupational therapy, physical therapy and
audiology. Students gain a better understanding of the scope
of practice, markets and skills required to succeed in these
professions. Students learn about graduate and professional
education options and how to build a competitive application
for these programs. Finally, students are introduced to field
experiences in each area and culminate their study with an inter-
professional education session illustrating the role of each of the
professions in a single case. Students finish the course with a
better understanding of whether a career in health professions is
right for them.
Credit 1 unit.

L41 Biol 2658 Pediatric Emergency Medicine Research
Associates Program: Experiences in Life Sciences
(PEMRAP II)
PEMRAP II is a continuation of Biol 2652 Pediatric Emergency
Medicine Research Associates Program: Experiences in Life
Sciences. Returning PEMRAP Research Associates (RAs)
actively participate in new and ongoing research projects in
various areas of pediatric emergency medicine. RAs assist
during the active period of patient enrollment through screening
of Emergency Department (ED) patients for study eligibility,
reading information about the studies to the patients, collecting
data regarding patient history and certain physical examination
findings, and generally facilitating the study enrollment
process. PEMRAP Returning RAs are vital members of the ED
research team in the St. Louis Children's Hospital Emergency
Department. Returning RAs assist in training and mentoring
incoming PEMRAP students (Biol 2652) in ED protocol, work
approximately one four-hour shift per week in the ED, record
shift activities and hours worked on a daily Shift Log form, and
participate in the physician shadowing program (as offered).
Returning RAs are responsible for meeting hospital non-
appointee requirements and staying current with new study
protocols by attending or viewing new study presentations
for PEMRAP students. These lectures are given by Pediatric
Department faculty members to introduce the basics of the
clinical research process, specific studies, and pediatric illness.
The RA position carries with it important responsibility requiring
maturity, initiative, diligence, and excellent interpersonal skills.
There is no outside course work and no exams. Full participation
is required. 45 shift hours = 1 credit. Students may repeat this
course for a maximum of 6 credits. Course may not be taken
ccontemporaneously with Biol 2651, Biol 2655, or Biol 2654.
Enrollment with permission of instructor. Prerequisite: Biol 2652 (PEMRAP
I). Pass/fail, 1 to 2 units per semester.
L41 Biol 2659 MedPrep III: The Shadowing Experience: Inpatient Medicine

This is a new shadowing course that will take place on the inpatient wards of Barnes-Jewish Hospital, the main teaching hospital of the Washington University School of Medicine. For four hours every other week, students shadow physicians on a specialty service and remain with that service for the duration of the semester. Students will have the opportunity to rank order their preference of specialty but will be assigned based on availability. No guarantees can be made to place a student in their most preferred specialty. In order to participate, students must have one morning a week that they are completely free between 6 a.m. and 12 p.m. In addition to shadowing, there is a required class session every Wednesday from 6:30 to 7:30 p.m. Because of the orientation material presented, excused absences will not be granted for the first two sessions for any reason whatsoever, including illness or emergency. There is no outside course work and no exams. A $25 course fee as well as HIPAA training and tuberculosis testing are required. For more information and to register for this course, please visit the MedPrep website (http://pages.wustl.edu/medprep). Registration is done through the MedPrep website, not through WebSTAC. Prerequisite: successful completion of MedPrep I (Bio 2651) and sophomore standing or above. Credit 1 unit.

L41 Biol 2950 Introduction to Environmental Biology

Introduction to Environmental Biology is designed to teach important principles of environmental biology and general science literacy skills. We cover the foundational biological principles and contemporary issues within four main topics: human population growth, transfer of energy and carbon in the ecosystem, biodiversity, and food production. We focus on the biological principles involved as we examine these topics in the context of some contentious and confusing issues related to environmental biology in everyday life. The science literacy skills that you master in this course will help you address the issues you face in your everyday life regarding scientific and pseudoscientific claims about the environment and society and will form the foundation for your development as a critical consumer of science information in the media. This course is required for all environmental biology majors and environmental studies minors. We recommend you take this course in your sophomore year if possible. If your interests align with your schedule allows, we recommend co-enrolling in EnSt 215: Introduction to Environmental Humanities. Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 2960 Principles of Biology I

This course provides an introduction to biochemistry, cell biology, and molecular biology. An understanding of cellular architecture and mechanisms and of the properties of biological macromolecules are integrated with a discussion of the flow of genetic information within cells. The course ends with the application of this understanding to selected areas in modern biology. Weekly labs reinforce concepts from the lectures and explore common laboratory techniques and computer-based resources. The completion of Chem 111A and concurrent enrollment in Chem 112A are strongly recommended but not required. Three hours of lecture and two hours of lab per week. Large class and small lab sections. Credit 4 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 2961 Collaborative Phage Bioinformatics

A research-based laboratory for those enrolled in Biol 2960, this class provides an opportunity to join a research team with the goal of genomic characterization of a locally isolated phage (a virus that infects a bacterial host). Similar to Biol 192, but using a condensed format and a larger team to tackle each phage. Lab work focuses on learning computer-based tools for genome analysis, followed by careful annotation of several genes from your phage, and in-depth investigation of one gene. Requires concurrent enrollment in Biol 2960 Principles of Biology I; not open to students enrolled in Biol 192. One 2-hour pre-class online review/preparation session, nine 2-hour laboratory sessions, and a final poster presentation. (Lab does not meet in weeks with a scheduled Biol 2960 midterm.) May be taken for a letter grade or Credit/No Credit. Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 2962 Biomolecules in the Third Dimension

A computer-based laboratory for students enrolled in Biol 2960. This class gives students the opportunity to learn biology in a new way. Students are exposed to experimental data and software visualization tools currently in use in cutting-edge research. Each week, biomolecules presented in Biol 2960 lecture will be downloaded, viewed and manipulated in 3D using the molecular viewer PyMOL. Students will be able to study molecular interactions in greater depth than is possible in lecture. Ultimately, the laboratory is designed to help students develop their visual spatial thinking skills and to gain a deeper understanding of the macromolecules discussed in lecture. The class is highly recommended to students who identify themselves as visual/interactive learners. Topics include: protein and nucleic acid structure, signal transduction, energy transfer, replication, transcription and translation. Requires concurrent enrollment in Biol 2960 Principles of Biology I. Lab does not meet in weeks with a biology exam. Class taken for Credit/No Credit. Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 2970 Principles of Biology II

A broad overview of genetics, including Mendelian assortment, linkage, chromosomal aberrations, variations in chromosome number, mutation, developmental genetics, quantitative genetics, population genetics, mechanisms of evolution, and phylogenetics. Three lectures and one laboratory period each week. Does not fulfill the laboratory requirement of the biology major. Students must sign up for a lab during preregistration. Prerequisite: Biol 2960 or permission of instructor. Credit 4 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3010 Biotechnology Project

This second-year Biotech Explorers Pathway (BEP) course introduces students to the process used to generate project ideas, write proposals, and evaluate concepts, with peer evaluation applied at all steps of the process. Students completing Biol 3010 will gain experience in science proposal writing with peer review, public speaking, team building, and leadership training. The first four weeks of the course will focus on individual pre-proposal brainstorming, writing, and pitching, while the remainder of the course will be dedicated to the development of full proposals by teams of students. This 3-credit project development course complements introductory courses by making connections between fields and building teams of students with experience in the process that nurtures

L41 Biol 303A Human Biology
How did Elvis, Socrates and Babe Ruth die? How did David Letterman and Dick Cheney survive? In this course we work toward understanding the biology behind human health and disease. We examine cases from the news, literature and history. We work like detectives to understand how and why the characters were affected and healed or died. This course is designed for students who do not plan to major in science, and no prior science background is expected. Prerequisite: sophomore standing or permission of instructor. A student may not receive credit for both Biol 303A and Biol 100A, 2960, 2970, or UCollege B320, B3201, B321, B3211. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3041 Plant Biology and Genetic Engineering
A 4-credit lecture course that provides an introduction to plant development, genetics, physiology and biochemistry with emphasis on processes that can be manipulated or better understood through genetic engineering. The course is divided into three sections. The first section of the course discusses basic plant biology, development and genetics. The second part emphasizes gene structure, expression and cloning as well as methods for introducing foreign DNA into plant cells and regenerating fertile plants in tissue culture. During the third part of the course we discuss a variety of examples of genetically engineered traits, including: herbicide resistance; fruit ripening; pathogen and/or insect resistance; and the use of plants for production of industrial and pharmaceutical compounds. Friday discussion sections focus on critical reading of the primary literature related to the material covered in lecture. Prerequisites: Biol 2960 and Biol 2970. Credit 4 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3058 Physiological Control Systems
Systems physiology with emphasis on human physiology. Prerequisites: Biol 2960 and Chem 112A. Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 307A Human Variation
A survey of human biological diversity, considering its adaptive and taxonomic significance from the perspective of origins and distribution of traits and adaptation. Prerequisite: Anthro 150A or introductory biology. Same as L48 Anthro 307A. Credit 3 units. A&S IQ: NSM, AN, SD Arch: NSM Art: NSM BU: SCI

L41 Biol 3100 R Workshop in Biology
Biologists in all areas increasingly find that they have the need and opportunity to work with large data sets. The goal of this 1-credit course is to provide students with an opportunity to gain skills in data analysis and presentation using R, a free software environment for statistical computing and graphics (https://www.r-project.org). Topics include an introduction to basic programming in R, data types and manipulation, graphics, hypothesis testing and statistics, and applications to various fields of biology ranging from ecology to genomics. The course consists of 10 two-hour workshops that include a brief introduction to key concepts in R and applications in biology, followed by interactive, hands-on tutorials. Prerequisite: concurrent or prior course in statistics (Math 2200 or Math 3200) or permission of instructor. Credit 1 unit.

L41 Biol 3110 Vertebrate Structure Laboratory
A lecture/laboratory course designed to provide an integrative framework for how vertebrate form and function evolved. Weekly lectures emphasize development and the relationship between the structural and functional design of organ systems, the importance of these relationships in maintaining homeostasis while providing opportunity for adaptation, and examples of how vertebrate organ systems communicate to accomplish functional and physiological integration. 1.5 hour lecture and 5 hours lab each week. Prerequisite: Biol 2970. Credit 4 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3151 Endocrinology
An overview of mammalian endocrine systems with an emphasis on human physiology and development. The interplay between systemic, local cell and tissue interactions as well as the cell and molecular events associated with hormone action are discussed. Examples of endocrine evolution and pathological conditions related to endocrine imbalances also are included. Prerequisite: Biol 2970. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 324 Human Genetics
This course offers broad coverage of the role of genetics in medicine, with a focus on the application of genomic technologies to the understanding of human disease. Areas covered include the identification of human disease genes, modern cytogenetics, risk assessment in pedigrees, biochemical genetics, imprinting, mitochondrial genetics, gene therapy, complex inheritance, assisted reproduction, prenatal diagnosis, immunity, cancer, and pharmacogenetics. The profound ethical and legal considerations raised by modern genetic technologies are also discussed. Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 328 Principles in Human Physiology
This course is designed to provide students with an understanding of the function, regulation and integration of the major organ systems of the body. Course content includes neural and hormonal homeostatic mechanisms, and study of the circulatory, respiratory, digestive, urinary, musculoskeletal, nervous, endocrine, immune and reproductive organ systems. Mechanisms of exercise physiology are integrated throughout the course. Prerequisite: Biol 3058 or equivalent. Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 334 Cell Biology
Eukaryotic cell structure and function viewed from the perspective of modern cell biology. Lectures cover such topics as membrane transport; endocytosis and secretion; intracellular trafficking; hormones and signal transduction; extracellular matrix and tissue formation; cytoskeleton and motility; and cell cycle, apoptosis and the cellular basis of disease. Prerequisite: Biol 2970. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI
L41 Biol 3371 Eukaryotic Genomes
An advanced exploration of the structure and function of DNA within the eukaryotic nucleus. Lecture and discussion cover topics of chromatin and chromosome structure, control of gene transcription, RNA processing, and DNA replication and repair. The relevance of these topics to the genetic basis of human disease is discussed. Throughout, the experimental data that shape our current understanding are emphasized. Course grades based on exams, problem sets and short papers. Lecture 3 hours per week plus required discussion section meeting every other week. Prerequisites: Biol 2970, Chem 261 (may be taken concurrently). Offered every other fall in even-numbered years. Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3411 Principles of the Nervous System
This course will provide a broad introduction to neuroscience, starting at the level of cellular and molecular neuroscience and ultimately ending at systems and theoretical neuroscience, with emphasis on the organization of the mammalian central nervous system. Topics will include neuronal structure, the action potential, information transmission between neurons, sensory/motor systems; emotion, memory, disease, drugs, behavior, and network dynamics. A fundamental goal of this course is to provide students with the ability to approach complex problems using the scientific method and to understand the limits of knowledge. This course will also expose students to some of the neuroscience community at Washington University. Prerequisites: Biol 2970, Biol 2960 (recommended), Biol 3058 (recommended) or Psych 3401 and permission of instructor. Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3421 Introduction to Neuroethology
The neural mechanisms of animal behavior from an evolutionary and ecological perspective. Topics include: contributions of model systems to understanding fundamental properties of nervous system structure and function; electrical signals of sensory cells, neurons and muscle; neural processing of sensory input; neural control of behavioral output; anatomy and physiology of sensory and motor systems; learning and memory; evolution of neural circuits. Prerequisite: one of the following courses: Biol 3058, Biol 3411 or Psych 3401. Credit 3 units. A&S IQ: NSM Arch: NSM BU: SCI

L41 Biol 3422 Genes, Brains and Behavior
Genetic studies of physiological systems underlying animal behavior, including the genetic basis for normal and abnormal behaviors in animals and humans. Topics include: history of behavioral genetics; the ongoing debate about "nature vs. nurture"; contributions of genetic model systems including the nematode Caenorhabditis elegans; the fruit fly Drosophila melanogaster, zebrafish, the mouse Mus musculus and other animal models; molecular mechanisms underlying the evolution of behavioral phenotypes; the emerging role of epigenetics in regulating nervous-system functions and behavior; the use of genetic and genomic analyses in studies of human behavior and psychiatric disorders. Prerequisite: Biol 2970. Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 347 Darwin and Evolutionary Controversies
This course’s focus is on controversies in evolutionary biology from Darwin’s day to the present. Most of the controversies concern scientific issues such as Kelvin’s estimate of the age of the earth, Jenkin’s argument against blending inheritance, neutral variations, effects of isolation on the role of selection, and mass extinction and "nemesis," but some address social issues such as evolutionary ethics and "scientific creationism." Emphasis in the readings is on primary sources, including Darwin’s "Origin of Species." Writing intensive. Credit 3 units. A&S IQ: NSM, WI Art: NSM BU: SCI

L41 Biol 349 Microbiology
This 4-credit lecture course focuses on the molecular biology of bacteria, archaea and viruses. Topics include: the bacterial cell cycle, gene regulation, stress response, cell-cell communication, viral and bacterial pathogenesis, microbial ecology, and metabolic diversity. Friday tutorials stress analysis of the primary literature with an emphasis on current research related to material covered in lecture. Prerequisites: Biol 2960 and 2970, or permission of instructor. Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3491 Microbiology Laboratory
After introducing students to the basics of bacterial growth and maintenance, this laboratory class employs microscopy, genetics, cell biology, and genomics to explore various aspects of bacterial physiology, structure, and identification. Students will present findings throughout the semester in both written and oral format. Roughly one hour lecture and five hours of laboratory per week. Fulfills the upper-level laboratory requirement for the biology major. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3492 Laboratory Experiments with Eukaryotic Microbes
This research-intensive course provides an introduction to diverse molecular and cell biology techniques used in model experimental organisms to explore fundamental biological questions. Experiments are performed using selected fungi and protozoans commonly used in major research efforts. Emphasis is placed on choosing the appropriate organism for the question posed using the most current technologies. Each semester, one cellular process is studied in detail and original research is carried out. Prerequisites: Biol 2960 and 2970 and permission of instructor — contact early to ensure enrollment. One hour of lecture and six hours of laboratory a week. Fulfills the upper-level laboratory requirement for the biology major. Enrollment limited to 12. Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3493 Bacterial Bioprospecting and Biotechnology
Many bacteria are essential in food industry (fermentation of meats, cheeses and beverages), agriculture (crop protection against weeds, pathogenic bacteria, and fungi), biotechnology (producing fine chemicals, cofactors, amino acids, and industrial enzymes) and the pharmaceutical industry (producing clinical antibiotics, anticancer, antiviral, veterinary, and immunomodulatory drugs). This laboratory course examines how basic biological understanding can lead to discovery of bacterial products, enzymes and activities useful to humankind. We combine core concepts from biochemistry, bacterial genetics, bioinformatics, chemistry and enzymology to study bacteria from the genus Streptomyces and close relatives. Lines of inquiry include environmental isolations, molecular toolbox and host development, plus bioinformatic and laboratory-based analyses of secreted proteins and antibiotics. Prerequisites: Biol 2960 and 2970. One hour of lecture and six hours of laboratory per week. This course fulfills the laboratory requirement for the biology major. Enrollment limited to 16.
L41 Biol 3501 Evolution
A general survey of evolutionary biology covering both microevolution and macroevolution. Topics include natural selection, genetic drift, gene flow, sexual selection, kin selection, pathogen evolution, speciation, phylogenetics, molecular evolution, and evolutionary-developmental biology. Weekly discussion sections focus on the analysis of recent studies related to lecture topics. Prerequisite: Biol 2970.
Credit 4 units. A&S IQ: NSM; Art: NSM; BU: SCI

L41 Biol 360 Biophysics Laboratory
This laboratory course consists of “table-top” experiments in biological physics that are designed to introduce the student to concepts, methods and biological model systems in biophysics. Most experiments combine experimentation with computer simulations. The list of available experiments includes electrophysiology, human bioelectricity, optical tweezers, ultrasonic imaging, mass spectrometer, and viscosity measurements. Prerequisites: prior completion of Physics 117A-118A, Physics 197-198 or permission of instructor.
Same as L31 Physics 360
Credit 3 units. A&S IQ: NSM, AN Art: NSM

L41 Biol 370 Animal Behavior
This course examines animal behavior from an evolutionary perspective and explores the relationships between animal behavior, ecology, and evolution. Topics include foraging behavior, mating systems, sexual selection, predator-prey relationships, cooperation and altruism, competition, and parental care. A student may not receive credit for more than one of the courses Biol 370, Biol 372, and Biol 472. Prerequisite: Biol 2970 or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM

L41 Biol 373W Laboratory on the Evolution of Animal Behavior (Writing Intensive)
This course explores the costs, benefits, and constraints that drive the evolution of animal behavior. It is divided into four modules that cover a range of common empirical and numerical tools in modern evolutionary biology. (Note: No prior experience in any of the following topics is necessary.) The modules discussed are as follows: (1) a brief overview of basic statistics and a tutorial in R; (2) an experimental lab on agonistic behavior in crickets; (3) a computer simulation lab on the evolution of animal communication; and (4) a phylogenetic comparative analysis lab exploring the topic of sexual selection. Laboratory modules are hands-on and student driven. They begin with an overview of relevant literature and a discussion of key questions that have been addressed experimentally in that field. Students are then encouraged and guided to apply these concepts to the design, execution, and analysis of individual and/or collaborative research projects. In the process, they learn how to apply some of the latest numerical and/or empirical research tools in evolutionary biology. A majority of class time is devoted to active learning through the collection and analysis of data (each lab module lasts four weeks). The course also includes weekly presentations by the instructor and class discussions on topics that help place the students’ work into the broader context of evolutionary theory. Prerequisites: Biol 2970 and Psych 100B or permission of instructor. This course is writing intensive.
Credit 3 units. A&S IQ: NSM, WI

L41 Biol 374 Drugs, Brain and Behavior
This course reviews information pertaining to medications used to treat psychiatric disorders and to psychoactive drugs of abuse. By learning principles of pharmacology and mechanisms of action of these agents, students develop an enhanced knowledge of the brain mechanisms underlying abnormal human behavior. Prerequisites: Psych 100B and one of the following: Psych 354 or 3401 or 344.
Same as L33 Psych 374
Credit 3 units. A&S IQ: NSM; Art: NSM; BU: SCI

L41 Biol 374W Laboratory on the Evolution of Animal Behavior (Writing Intensive)
This course explores the science of ecology, including factors that control the distribution and population dynamics of organisms and the structure and function of biological communities. It regularly touches on the applications of these principles, such as ecological responses to global climate change, consequences of habitat fragmentation, and disease ecology/conservation medicine. Principles of experimental design, quantitative data analysis and interpretation, and mathematical models are critical to the field of ecology and are emphasized throughout the course. The class meetings have an active learning format that includes lectures, regular student interaction during small-group activities, discussions, and computer simulation labs. Assignments include regular homework reading, occasional problem sets, and computer pre- and post-lab activities. Prerequisite: Biol 2970 or Biol 2950 or permission of instructor. Same as L82 EnSt 381.
Credit 3 units. A&S IQ: NSM; Art: NSM; BU: SCI

L41 Biol 387 Undergraduate Teaching
Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/No Credit only.
Credit variable, maximum 3 units. A&S IQ: NSM Art: NSM

L41 Biol 388 Undergraduate Teaching
Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/No Credit only.
Credit variable, maximum 3 units. A&S IQ: NSM Art: NSM

L41 Biol 4023 How Plants Work: Physiology, Growth and Metabolism
This course introduces students to the fundamentals of how plants grow, metabolize and respond to their environment. Topics covered include the conversion of light energy into chemical energy through photosynthesis and carbon fixation, nitrogen assimilation, water and mineral uptake and transport, source-sink relationships and long-distance transport of carbon and nitrogen, cell growth and expansion, hormone physiology and physiological responses to a changing environment. Prerequisite: Biol 2970 or permission of instructor.
Credit 3 units. A&S IQ: NSM; Art: NSM; BU: SCI
L41 Biol 4030 Biological Clocks
Biological clocks are the endogenous oscillators that coordinate physiological and behavioral rhythms in nearly all organisms. This course examines how these rhythms are generated and regulated. The material includes molecular, cellular and systems physiology and the relevance of biological timing to ecology and health in everything from protozoans to plants to people. Credit 3 units. A&S IQ: NSM Art: NSM

L41 Biol 404 Laboratory of Neurophysiology
Neurophysiology is the study of living neurons. Students record electrical activity of cells to learn principles of the nervous system including sensory transduction and coding, intercellular communication and motor control. The course meets for 9 hours each week. Students may leave the lab for up to 2 hours. Prerequisites: Biol 3411 or Psych 4411 and permission of Student Coordinator, Erin Gerrity. Biol 3411 may be taken concurrently. Credit 4 units. A&S IQ: NSM, WI Art: NSM

L41 Biol 4071 Developmental Biology
An introduction to the molecular and cell biology of animal development. The course is divided into three broad sections: (1) an introduction to the major cell-cell signaling systems used during development and their study in model organisms; (2) molecular studies of early vertebrate development; and (3) the biology of stem cells. The focus is on molecular approaches applied to important model systems but framed in classical concepts. Prerequisites: Biol 2970 and Biol 334; a course in biological genetics recommended, small class. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4106 Topics in Anthropology: Biomechanics
Humans, like all organisms, live and evolved in a world that is governed by the rules of physics. Such an engineered world has undoubtedly had a profound impact on the human evolutionary trajectory. Biomechanics is the science of understanding the natural world around us in a mechanistic fashion, and it has become a major pillar in the investigation of the human form and its function. Understanding how humans and our closest relatives behave in and interact with a physical world can lead to novel insights into the evolution of complex traits, whether through investigating the mechanics of the tissues and structures of the human body or understanding the principles of movement and locomotion. Through lecture, discussion, and hands-on experience, this course will introduce the biomechanical terms and principles that demonstrate how this discipline has contributed to biological anthropology. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 4181 Population Genetics
An introduction to the basic principles of population and ecological genetics. Mechanisms of microevolutionary processes; integrated ecological and genetic approach to study the adaptive nature of the evolutionary process. Prerequisite: Biol 2970. Credit 3 units. A&S IQ: NSM Art: NSM

L41 Biol 4182 Macreolution
An advanced introduction to the study of macroevolutionary patterns and processes with emphasis on the systematic methodology employed. Topics: theories of classification, phylogenetic reconstruction, testing of historical hypotheses, hierarchy theory, adaptation, extinction, speciation, developmental mechanisms of organismal evolution, biogeography. Prerequisite: permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4183 Molecular Evolution
A rigorous introduction to the study of evolution at the molecular level. Topics include the origin, amount, distribution and significance of molecular genetic variation within species, and use of molecular data in systematics and in testing macroevolutionary hypotheses. Prerequisite: Biol 2970 or permission of instructor. Credit 3 units. A&S IQ: NSM Art: NSM

L41 Biol 419 Community Ecology
Community ecology is an interdisciplinary field that bridges concepts in biodiversity science, biogeography, evolution, and conservation. This course provides an introduction to the study of pattern and process in ecological communities, with an emphasis on theoretical, statistical, and experimental approaches. Topics include ecological and evolutionary processes that create and maintain patterns of biodiversity; biodiversity and ecosystem function; island biogeography, metacommunity dynamics, niche, and neutral theory; species interactions (competition, predation, food webs); species coexistence; and environmental change. The class format includes lectures, discussions, and computer labs focused on analysis, modeling, and presentation of ecological data using the statistical program R. Prerequisite: Biol 2970 (required), Biol 381 (recommended), or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4193 Experimental Ecology Laboratory
The goal of this course is to provide skills in the design, interpretation, and written presentation of results of ecological experiments, with emphasis on hypothesis testing, sampling methodology, and data analysis. Students have opportunities to address a variety of ecological questions using field, greenhouse, or laboratory (microcosm) studies. The course is divided into a five-hour lab period (generally held at the Tyson Research Center) and a 1.5-hour lecture/discussion period held on campus. Occasional Saturday field trips to local sites (e.g., forests, wetlands, prairies, streams) for in-depth study might be scheduled. This is a writing-intensive course, and grades are based on written assignments, including final projects, and in-class participation. This course fulfills the upper-level laboratory requirement for the Biology major. Prerequisites: permission of instructor and at least one of the following: Biol 3501, Biol 372, Biol 381, Biol 419, or Biol 472. Enrollment is limited to 15 students. Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L41 Biol 4195 Disease Ecology
Disease ecology is an interdisciplinary field that bridges concepts from fields including population ecology, community ecology, landscape ecology, and evolutionary biology. This course provides an introduction to the study of infectious diseases, with an emphasis on theoretical, experimental, and quantitative approaches. The course will integrate studies of infectious diseases from across disciplines including human epidemiology, veterinary medicine, wildlife epidemiology, plant pathology, parasitology, and ecology. Prerequisites: Biol 2970 required, Biol 381 recommended, or permission of instructor.
L41 Biol 4202 Anthropological Genetics
This course examines the principles of evolutionary genetics as applied to complex characters such as morphology, behavior, life history and disease. Mathematical models of quantitative inheritance and evolution are discussed. Special topics include kin selection, sexual dimorphism and conservation genetics. Prerequisite: Anthro 150A or introductory biology. Same as L48 Anthro 4202
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 424 Immunology
Basic molecular and cellular aspects of the vertebrate immune system with emphasis upon the interrelationships of nonspecific and specific host defense against disease, the nature of immunological specificity and its underlying molecular biology. Includes complement systems, immunochimistry and immunoassay, systems, the nature of cellular activation and effector generation, immunodeficiency, tolerance, tissue transplantation, hypersensitivity, immune regulation and specific diseases illustrative of the successes and failures of the immune system. Prerequisites: Biol 2970 and Chem 252
Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4241 Immunology Laboratory
The Immunology Laboratory introduces students to a variety of common, broadly useful immunological techniques and then allow each student to employ most of the learned techniques in addressing a current research question. Experiments employ mouse cells in vitro and emphasize quantitative analysis of the data. Prerequisites: Biol 424 and permission of instructor.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4270 Problem Based Learning in Biomedical Sciences
Groups of 5-8 students are presented with medical case studies that are then researched and discussed under faculty guidance. Students take major responsibility for their own learning within their team. Prerequisite: Biol 2970; some experience in molecular biology. A biology or science background is required. Same content as discontinued course Biol 427, but not Writing Intensive. Not available to students who have credit for Biol 427.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 429 Cellular Transformations
Cellular Transformations is a course developed for students interested in using emerging technologies and cross-disciplinary approaches in design production and implementation. This course allows each student to develop abstract thinking and learn modern design and fabrication processes including digital media and 3D technologies. In this course, students learn the basic principles underlying biological architecture, with a particular emphasis on structures and processes responsible for complex architectures within cells. Students then use biological design principles as inspiration for their individual projects. Through digital modeling and scanning of biological structures, each student develops a transformation process that analyzes the performative aspects of a new emerging design. These designs are modeled through CADCAM (laser cutting) and Rapid Prototyping (3D Printing) for physical outputs. Prerequisites: Biol 2970 or Biol 334.
Credit 3 units. A&S IQ: NSM Arch: NSM BU: SCI

L41 Biol 4342 Research Explorations in Genomics
A collaborative laboratory investigation of a problem in comparative genomics utilizing a variety of bioinformatics tools to manage and investigate large data sets (currently including genomic sequences, gene predictions, sequence conservation, and gene expression). In spring 2018, the research problem involved improving the sequence of a region of the Drosophila eugracilis genome and working with one of these sequences to examine patterns of genome organization, gene structure, and gene regulation. Prerequisites: Biol 297A, Chem 111/112, Chem 151/152. Although Biol 3371 or Biol 437 and some familiarity with computers would be advantageous, this is not required. Fulfills the upper-level laboratory requirement for the biology major.
Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 434W Research Explorations in Genomics (Writing Intensive)
Content equivalent to Biol 4342. Students electing the writing option are required to revise each of three papers (on finishing of their fosmid; gene finding in a human/chip comparison; and annotating their fosmid) at least once.
Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L41 Biol 437 Laboratory on DNA Manipulation
This course provides investigation-driven research on the experimental manipulation of DNA and RNA molecules. This includes the construction, isolation, and analysis of plasmids, RNA, PCR products, and DNA sequencing. Molecular cloning (genetic engineering), gene knockouts (mutants), RNA isolation, RT-PCR, and microarray projects are performed. Prerequisites: Biol 2960 and Biol 2970. One hour of lecture and six hours of laboratory each week. This course fulfills the upper-level laboratory requirement for the biology major. Enrollment is limited to 12. A laboratory fee is required for students who are not full-time Washington University undergraduates.
Credit 4 units. A&S IQ: NSM Art: NSM

L41 Biol 4492 Infectious Diseases: History, Pathology, and Prevention
This course leverages the primary research literature to examine the history and pathology of infectious disease, the development of antibiotics and vaccines, the rise of antibiotic resistance, and the emergence and reemergence of diseases including Zika virus, malaria, and tuberculosis. In addition to gaining insights into the underlying causes and treatment of infectious disease, students will hone their ability to identify important biological questions, develop testable hypotheses, design experiments tailored to particular questions, and evaluate results. Through a series of written and oral assignments, students develop the skills to communicate about science effectively to both the research community and the general public. Prerequisites: Biol 500 (one semester) and permission of instructor. Preference will be given to students who have completed Biol 349. Area A. Writing Intensive.
Credit 3 units. A&S IQ: NSM, WI BU: SCI

L41 Biol 451 General Biochemistry
A study of structure-function relationships as applied to carbohydrates, proteins, and lipids; intermediary metabolism of principal cellular components; and general aspects of regulation. Prerequisites: Biol 2970, Chem 262, and permission
of department. Recommended for students who have achieved grades of B or better in the prerequisites. Students may not receive credit for both Biol 4801 and Biol 451.

Credit 4 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 4520 Protein Function in Model Cellular Systems
The goal of this 3-credit laboratory course is to train students in the scientific method. Throughout this course, they study a protein involved in a cellular process. Students, working in small groups, use bioinformatics to identify this protein in a number of species, then use this information to hypothesize which residues of the protein are important for its function. Over the course of the semester, students test their hypotheses in two model systems for studying cellular function — the unicellular eukaryote Saccharomyces cerevisiae and the multicellular eukaryote Physcomitrella patens. The weekly lecture gives students the background necessary to understand and perform their experiments, including information on a variety of bioinformatics tools, phylogeny, protein structure, molecular techniques, cell biology, and microscopy. In addition, students use primary literature to understand the role their assigned protein plays in their cellular process. Prerequisites: Biol 2960 and Biol 2970. Credit 3 units. A&S IQ: NSM Art: NSM

L41 Biol 4522 Laboratory in Protein Analysis, Proteomics and Protein Structure
In this laboratory course, students learn principles and methods of protein quantitation, protein purification, assessment of purity using SDS-polyacrylamide gel electrophoresis, separation of complex protein mixtures by 2-dimensional gel electrophoresis, definition of units of enzymatic activity, and identification of proteins using antibodies and/or mass spectrometry. The final part of the course introduces students to concepts of structural biology including protein crystallization, X-ray crystallography and computer modeling of protein structures. Fulfills the upper-level laboratory requirement for the biology major. Prerequisites: Chem 252 and either Biol 451 or Biol 4501/Chem 456. Permission of instructor required. Limit: eight students. Eight hours of laboratory/lecture per week. Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 4523 Molecular Methods in Enzyme Analysis
Understanding enzyme structure and function is essential in many important drug design projects. This course focuses on common methods used to investigate enzyme active sites to elucidate binding interactions between small molecules and enzymes. Students use 3D protein-viewing software to design and model modifications to an enzyme active site, then perform those modifications using recombinant DNA technology and site-directed mutagenesis. This course also introduces other commonly used methods to assay active-site metals, characterize inhibitors, overexpress and purify proteins, and use UV spectroscopy to analyze enzyme activity. This is an investigative course in which students perform collaborative research projects in small groups. Fulfills the upper-level laboratory requirement for the generic biology major and the biochemistry track; intended for students who have no other courses that fulfill these requirements. Prerequisite: Biol 2970. Limit 12. Credit 4 units. A&S IQ: NSM Arch: NSM BU: SCI

L41 Biol 4525 Structural Bioinformatics of Proteins (Writing Intensive)
In this investigative laboratory course, students will be given high-quality, experimentally determined, three-dimensional structural coordinates, and they will use cutting-edge bioinformatics tools and methods to evaluate and analyze these datasets. Some topics to be covered include structural validation, protein-structure prediction, domain and motif recognition, secondary structure prediction, protein-protein and protein-ligand interactions, protein and structure-based sequence alignments, inferring protein function from structure, electrostatic interactions, and threading and homology modeling. Upon completing their analyses, students will be responsible for writing a manuscript that will be submitted to a scientific journal for publication. Prerequisites: Biol 2960 and Chem 262. This course fulfills the upper-level laboratory requirement for the biology major. Credit 4 units. A&S IQ: NSM, WI BU: SCI

L41 Biol 4580 Principles of Human Anatomy and Development
This course will discuss the anatomy of most of the functional systems of the human body. Topics covered will include the peripheral nervous system, respiration, circulation, the skeletal system, the gastro-intestinal tract, the urogenital system, the male and female reproductive systems, locomotion, manipulation, mastication, vocalization, the visual system, the auditory system and the olfactory system. Selected topics in human embryology will also be introduced. The course provides valuable preparation for any student interested in human biology, anthropology, medicine or the health sciences. Same as L48 Anthro 4581 Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 4582 The Physiology and Biophysics of Consciousness
This course will explore the questions surrounding the search to understand the biophysical substrate of consciousness. Some areas to be explored include the following: (1) Can consciousness be addressed like any other biological property in the sense that it has evolved by natural selection and that some elements of it are present in simple model systems, such as the fruit fly? Can insight be gained studying simple model systems? (2) Where in the brain is consciousness? What is the pattern of neurological events that occurs during consciousness? Is the brain activity that generates consciousness localized or distributed? Does it involve interacting brain regions? Does the brain activity that generates consciousness migrate to different brain regions? (3) How does the dynamic core hypothesis of Edelman relate to these questions? What can functional brain imaging add to these questions? Are gamma waves involved in higher mental activity, and do they promote synchronized firing of neurons from different brain areas? How does this relate to the binding problem? (4) How does the brain's ability to function as a computer relate to consciousness? In many respects, the brain functions like a computer using electrical signals called action potentials. Action potentials in neuronal networks function in a way that is analogous to how DC electrical impulses function in computer circuits. What is the output of computation in an electrical device? What are the theoretical limitations regarding what computation can achieve? Does electrical activity in the brain have a fundamentally different purpose in addition to computation? (5) Is our knowledge of the physical world too primitive and incomplete for us to understand consciousness? The brain is an electronic device, and consciousness clearly
depends on its electrical activity. However, electrical forces are poorly understood, both in the context of classical physics and quantum physics. Will understanding consciousness have to wait for a unified theory that more accurately describes electrical forces? Prerequisites: Biol 3411 or equivalent; college-level physics, some knowledge of computers. Credit 2 units. A&S IQ: NSM BU: SCI

L41 Biol 472 Behavioral Ecology
This course examines animal behavior from an evolutionary perspective and explores the relationships between animal behavior, ecology and evolution. Topics include mating systems, sexual selection, parental care, kin selection, and cooperation. There is a strong active learning component. Prerequisite: Biol 2970 or permission of instructor. Credit 4 units. A&S IQ: NSM

L41 Biol 4810 General Biochemistry I
The first part of a two-semester survey of biochemistry. This course covers biological structures, enzymes, membranes, energy production and an introduction to metabolism. Prerequisites: Biol 2960 and Chem 262. Large class. Same as L07 Chem 481 Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4820 General Biochemistry II
Topics include carbohydrate, lipid and amino acid metabolism, signal transduction, transport across membranes, DNA replication and repair, transcription and translation, molecular motors, mechanisms of drug action, and the biosynthesis of natural products, biofuels, and biomaterials. Prerequisites: Biol 2960 and Chem 262. Large class. Same as L07 Chem 482 Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4830 Bioenergy
This course presents a broad overview of the flow of energy, captured from sunlight during photosynthesis, in biological systems, and it discusses the current approaches to utilize the metabolic potentials of microbes and plants to produce biofuels and other valuable chemical products. An overall emphasis is placed on the use of large-scale genomic, transcriptomic, and metabolomic datasets in biochemistry. The topics covered include photosynthesis; central metabolism; the structure and degradation of plant lignocellulose; and the microbial production of liquid alcohol, biodiesel, hydrogen, and other advanced fuels. Course meets during the second half of the spring semester. Prerequisite: Biol 4810 or permission of instructor. Credit 2 units. A&S IQ: NSM Art: NSM

L41 Biol 4832 Molecular Mechanisms of Photosynthesis and Respiration
Photosynthesis is a biological process whereby the Sun’s energy is captured and stored by a series of events that convert the pure energy of light into the free energy needed to power life. Respiration is a biological process that extracts energy in a usable form from high-energy compounds produced by photosynthesis. This course examines these essential biological processes at the molecular level in both bacterial and eukaryotic organisms. Emphasis is on chemiosmotic principles as well as the structure and mechanism of action of the protein complexes that carry out photosynthesis and respiration. Additional topics include the assembly and regulation of these protein complexes and the origin and evolution of these processes. Prerequisite: Chem 482, Biol 4820 or Biol 451 or permission of instructor. Credit 3 units. A&S IQ: NSM BU: SCI

L41 Biol 4833 Protein Biochemistry
The focus of this course is protein biochemistry, and is intended to build upon General Biochemistry (Chem 481). In this course we will focus on protein structure, folding, and techniques to purify and characterize protein activity. We will progress from initial studies to first understand protein fold and function to current efforts to better characterize protein structure-function relationships. We will also highlight human diseases that are underpinned by protein misfolding. This course will focus on reading and understanding primary literature, including landmark papers along with more recent work. During the second half of the semester, each student will select a paper and prepare a written analysis of that paper. The student will then present the paper and lead a journal style discussion of the paper. Prerequisites: Chem 481 or instructor’s permission. Same as L07 Chem 483 Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 487 Undergraduate Teaching
Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/no credit only. Credit variable, maximum 3 units. Art: NSM

L41 Biol 488 Undergraduate Teaching
Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/no credit only. Credit variable, maximum 3 units.

L41 Biol 493 Seminar in Advanced Biology
In special cases, credit may be given for individual study. Topics of study and credit must be arranged with a faculty sponsor and approved by the department. Credit variable, maximum 4 units. A&S IQ: NSM Art: NSM

L41 Biol 4933 Molecular Biology on the Cutting Edge
Recent biomedical discoveries have been greatly advanced through the development of innovative, state-of-the-art techniques. For example, Nuclear Magnetic Resonance (NMR) has proved to be an invaluable tool in both efforts to determine the atomic structure of proteins and small molecules, as well as in clinical settings, as MRI to identify tumors that would otherwise go unnoticed. This course introduces students to a variety of cutting-edge laboratory techniques, and discusses the impact of these techniques on biology and medicine. Students have the unique opportunity to learn from graduate students employing these approaches in their doctoral studies. Topics to be covered include: high-throughput sequencing of genetic disorders, x-ray crystallography, and single molecule force spectroscopy by AFM. Weekly classes consist of a 30-45 minute presentation
L41 Biol 4934 Neuroscience Futures II
Students in this course engage with the neuroscience community both at Washington University and beyond by attending, summarizing and discussing neuroscience seminars on campus throughout the semester. Specifically, students are expected to attend three neuroscience seminars over the course of the semester and submit summaries of each seminar. Students meet twice during the semester, in week 5 and week 11, for guided discussion of the science in the seminars they attended. Additionally, students in this seminar attend two combined classes with Neuroscience Futures 1 during the first and last weeks of the semester. In both meetings, students have an opportunity to give brief presentations on their own research. The last class combines short student presentations with a keynote address from an invited speaker from within or outside the Washington University neuroscience community.
Credit 1 unit. A&S IQ: NSM Arch: NSM ART: NSM

L41 Biol 4935 Undergraduate Research Perspectives
The purpose of this course is for undergraduates to acquire a broad perspective on their hands-on research. What are your big questions? How will you communicate your discoveries? How do your results fit with what has gone before? Each semester will have a focus, which might be science communication, statistics or critical reading, for example. Required activities may include weekly writing, participation in the undergraduate poster session, research, presentations and attendance. Enrollment is by permission only from Joan Strassmann. This course is required for undergraduates conducting research in the Queller/Strassmann laboratories and is open to other students involved in research. Joan Strassmann, David Queller, and selected postdoctoral fellows.
Credit variable, maximum 3 units. A&S IQ: NSM BU: SCI

L41 Biol 4936 Seminars in Ecology and Evolution
What: At least once a week there are seminars from researchers in ecology or evolution. These seminars are given by local people and by visitors. This semester there are also a number of presentations by job candidates. The point of these seminars is to learn about exciting research. What questions are they asking? What are they discovering? What new scientific stories can we hear about ecology or evolution? What makes up these fields anyway? The seminars are often followed by receptions which are a chance to get to know each other better and to ask questions. This course invites undergraduates to listen to these presentations and write about them. After all, this is a major part of the ideas climate at WashU. It would be a great idea to get in the habit of going to seminars, with this course, or without. In addition to attending seminars, we will meet three times during the semester, early on and a couple of times later. When: Most seminars are at 4:00 on Thursdays, though some are on other days. The three meetings will be arranged at a time that works for the students in the course. Small class. No final.
Credit 1 unit.

L41 Biol 500 Independent Research
Research under the supervision of a faculty mentor.
Prerequisites: junior or senior standing and permission of mentor and the department. Credit/No Credit or Audit grade options; credit to be determined in each case, usually 3 units/semester and not to exceed 3 units/semester; may be repeated for credit. Because this course has a large number of sections, some sections are listed and enrolled as Bio 500A. If work is to be submitted for Latin honors, see page 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program. The handbook can be found online at: https://wustl.app.box.com/s/6q5y8j8q654965y5v31gy1a. Arrangements for registration should be completed during the preregistration period through the Bio 500 course website https://pages.wustl.edu/Bio_200-500_independent_research.
Credit 3 units.

L41 Biol 500N Independent Research in Neuroscience
Research in neuroscience under the supervision of a faculty mentor. Prerequisites: junior or senior standing and permission of mentor and the department. Credit/no credit or audit grade options; credit to be determined in each case, usually 3 units/semester and not to exceed 3 units/semester; may be repeated for credit. If work is to be submitted for Latin honors, see page 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program (PDF) (https://wustl.app.box.com/s/2n0g010poxwox6h5s2y1fow099g). Arrangements for registration should be completed during the preregistration period through the Bio 500 course website (https://pages.wustl.edu/Bio_200-500_independent_research). Credit variable, maximum 3 units.

L41 Biol 500S Summer Independent Research
Summer research under the supervision of a faculty mentor. Prerequisites: junior or senior standing and permission of mentor and the department. Credit to be determined in each case, usually 3 units/summer; may be repeated for credit in different summers. Because this course has a large number of sections, some sections are listed and enrolled as Bio 500T. Credits are received in the fall semester following the summer research. If work is to be submitted for Latin honors, see page 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program. The handbook can be found online at: https://wustl.app.box.com/s/d63x500vyqt5v899eyha5v31gy1a. Arrangements for registration should be completed no later than the end of Summer Session I through the Bio 500 course website: https://pages.wustl.edu/Bio_200-500_independent_research. Credit/No Credit or Audit grade options. Course may not be taken for a letter grade. 1-3 units Credit 3 units.

L41 Biol 500U Summer Independent Research in Neuroscience
Summer research in neuroscience under the supervision of a faculty mentor. Prerequisites: junior or senior standing and permission of mentor and the department. Credit to be determined in each case, usually 3 units/summer; may be repeated for credit in different summers. Credits are received in the fall semester following the summer research. If work is to be submitted for Latin honors, see page 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program (PDF) (https://wustl.app.box.com/
s/2n0gj01opcowv6hs26yj1jfovw0tg). Arrangements for registration should be completed no later than the end of Summer Session I through the Biol 500 course website (https://pages.wustl.edu/Bio_200-500_independent_research). Credit/no credit or audit grade options. Course may not be taken for a letter grade. Credit variable, maximum 3 units.

Chemistry

For students interested in discovering insights into nature and exploring new ways to meet the needs of our technological society and new methods for creating novel compounds and useful materials, chemistry is an excellent major to pursue.

Chemistry is a multifaceted science that extends into biology, medicine, physics, mathematics, business and commerce. Studying chemistry provides the opportunity to explore the structure and constitution of the microworlds of atoms and molecules, the chemical and physical transformations that occur, and the principles that govern these changes.

Our program provides a strong foundation in the core areas of chemistry: organic, physical, inorganic, nuclear and theoretical. Special emphases in the department include such emerging interdisciplinary fields as organometallic, bioorganic, biophysical, macromolecular, polymer, environmental and materials chemistry. The department has close research ties with the departments of Physics; Earth and Planetary Sciences; Biology; Biomedical Engineering; Energy, Environmental & Chemical Engineering; and Mechanical Engineering & Materials Science. It also works closely with various departments at the Washington University School of Medicine.

Undergraduate majors in chemistry study chemistry with renowned scientists who are teacher-scholars dedicated to the students' learning experience. The department is small, and it has world-class instruments and facilities, which allows students to receive individualized instruction and to participate in cutting-edge science. Each student works closely with a faculty member to design and carry out an original research project. Students may participate in interdisciplinary research at the School of Medicine or the McKelvey School of Engineering. Research internships at local companies can also be arranged.

A variety of creative and productive careers are available to graduates with a degree in chemistry. Graduates may pursue a career in chemistry or in such related professions as biochemistry, medicine and chemical engineering. Most students continue on to graduate or medical school, and some go on to business or law school. Positions in government, industry and education are also available.

Majors

The Major in Chemistry

Total units required: 53-62

Required courses: To prepare for a major in chemistry, students will take the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 111A</td>
<td>General Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>Chem 112A</td>
<td>General Chemistry II</td>
<td>3</td>
</tr>
<tr>
<td>Chem 151</td>
<td>General Chemistry Laboratory I</td>
<td>2</td>
</tr>
<tr>
<td>Chem 152</td>
<td>General Chemistry Laboratory II</td>
<td>2</td>
</tr>
<tr>
<td>Chem 261</td>
<td>Organic Chemistry I with Lab</td>
<td>4</td>
</tr>
<tr>
<td>Chem 262</td>
<td>Organic Chemistry II with Lab</td>
<td>4</td>
</tr>
<tr>
<td>Math 131</td>
<td>Calculus I</td>
<td>3</td>
</tr>
<tr>
<td>Physics 191</td>
<td>Physics I</td>
<td>3</td>
</tr>
<tr>
<td>Physics 191L</td>
<td>Physics I Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>Physics 192</td>
<td>Physics II</td>
<td>3</td>
</tr>
<tr>
<td>Physics 192L</td>
<td>Physics II Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>Math 132</td>
<td>Calculus II</td>
<td>3</td>
</tr>
<tr>
<td>Math 233</td>
<td>Calculus III</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Units 35

Note: In certain instances, students may substitute Chem 105 and Chem 106 for Chem 111A and Chem 112A. Please consult the department's director of undergraduate studies for details.

Majors in chemistry must take a minimum of 18 units of advanced courses in chemistry or biochemistry, among which the following must be included:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 401</td>
<td>Physical Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>Chem 402</td>
<td>Physical Chemistry II</td>
<td>3</td>
</tr>
<tr>
<td>Chem 461</td>
<td>Inorganic Chemistry</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Units 9

In addition, 9 units in chemistry at the 300 level or above must be taken (not including Chem 490 Introduction to Research or Chem 495 Advanced Undergraduate Research in Chemistry). Biol 451 General Biochemistry may be used to complete 3 of the required 9 units.

At least 3 of these 9 advanced units must be in a laboratory course chosen from the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 358</td>
<td>Organic Chemistry Laboratory II</td>
<td>4</td>
</tr>
<tr>
<td>Chem 435</td>
<td>Nuclear and Radiochemistry Lab</td>
<td>3</td>
</tr>
<tr>
<td>Chem 445</td>
<td>Instrumental Methods: Physical Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>Chem 470</td>
<td>Inorganic Chemistry Laboratory</td>
<td>3</td>
</tr>
</tbody>
</table>

Physics 217 Introduction to Quantum Physics and additional mathematics courses are also recommended. Chem 181 First-Year Opportunity: Applications in Chemistry, a seminar to introduce first-year students to research activities in the department, is optional. A working knowledge of computer programming and a foreign language, such as German or Russian, is encouraged but not required.
Students have the advantage of planning their course program with their adviser in accordance with personal interests. Some graduate courses are also available to seniors.

All chemistry course work must be taken in residence at Washington University to be applied toward the chemistry major. A minimum grade of C- must be earned in each course to count toward the chemistry major.

Note: Per the College of Arts & Sciences guidelines, for students who also pursue a minor or more than one major or minor program, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both programs. All advanced (300- and 400-level) courses must be unique to each program; in other words, no advanced course may be “double-counted” for the course work needed to fulfill either program’s minimal requirements. Should a student’s major and minor programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.

The Major with a Concentration in Biochemistry

Chemistry majors with a concentration in biochemistry should add Biol 2960 Principles of Biology I and Biol 2970 Principles of Biology II as prerequisites to the major and specify a minimum of 18 units in advanced courses in biology and chemistry, among which the following must be included:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 481</td>
<td>General Biochemistry I</td>
<td>3</td>
</tr>
<tr>
<td>Chem 482</td>
<td>General Biochemistry II</td>
<td>3</td>
</tr>
<tr>
<td>Chem 401</td>
<td>Physical Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>Chem 402</td>
<td>Physical Chemistry II</td>
<td>3</td>
</tr>
<tr>
<td>Chem 461</td>
<td>Inorganic Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>Total Units</td>
<td></td>
<td>15</td>
</tr>
</tbody>
</table>

In addition, at least one advanced lab must be chosen from the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 358</td>
<td>Organic Chemistry Laboratory II</td>
<td>4</td>
</tr>
<tr>
<td>Chem 435</td>
<td>Nuclear and Radiochemistry Lab</td>
<td>3</td>
</tr>
<tr>
<td>Chem 445</td>
<td>Instrumental Methods: Physical Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>Chem 470</td>
<td>Inorganic Chemistry Laboratory</td>
<td>3</td>
</tr>
<tr>
<td>Biol 437</td>
<td>Laboratory on DNA Manipulation</td>
<td>4</td>
</tr>
<tr>
<td>Biol 4522</td>
<td>Laboratory in Protein Analysis, Proteomics and Protein Structure</td>
<td>3</td>
</tr>
</tbody>
</table>

All chemistry course work must be taken in residence at Washington University to be applied toward the chemistry major. A minimum grade of C- must be earned in each course to count toward the chemistry major.

Note: Per the College of Arts & Sciences guidelines, for students who also pursue a minor or more than one major or minor program, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both programs. All advanced (300- and 400-level) courses must be unique to each program; in other words, no advanced course may be “double-counted” for the course work needed to fulfill either program’s minimal requirements. Should a student’s major and minor programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.

Additional Information

Latin Honors for the Major in Chemistry: To qualify for Latin Honors, students must complete a minimum of 21 units in advanced courses in chemistry or biochemistry, among which the following must be included:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 401</td>
<td>Physical Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>Chem 402</td>
<td>Physical Chemistry II</td>
<td>3</td>
</tr>
<tr>
<td>Chem 461</td>
<td>Inorganic Chemistry</td>
<td>3</td>
</tr>
</tbody>
</table>

The student must also take two additional advanced courses in chemistry.

Students must also complete two additional laboratories. Students must choose one synthetic laboratory:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 358</td>
<td>Organic Chemistry Laboratory II</td>
<td>4</td>
</tr>
<tr>
<td>Chem 470</td>
<td>Inorganic Chemistry Laboratory</td>
<td>3</td>
</tr>
</tbody>
</table>

and one physical laboratory:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chem 435</td>
<td>Nuclear and Radiochemistry Lab</td>
<td>3</td>
</tr>
<tr>
<td>Chem 445</td>
<td>Instrumental Methods: Physical Chemistry</td>
<td>3</td>
</tr>
</tbody>
</table>

Neither Chem 490 Introduction to Research nor Chem 495 Advanced Undergraduate Research in Chemistry can be used to satisfy the advanced laboratory requirements, but Chem 495 can be used to satisfy an elective.

Latin Honors for the Major in Chemistry with Concentration in Biochemistry: To qualify for Latin Honors, students must complete a minimum of 21 units in advanced courses, including either one of the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biol 334</td>
<td>Cell Biology</td>
<td>3</td>
</tr>
<tr>
<td>Biol 349</td>
<td>Microbiology</td>
<td>4</td>
</tr>
<tr>
<td>Chem 453</td>
<td>Bioorganic Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>Chem 464</td>
<td>Inorganic Biochemistry</td>
<td>3</td>
</tr>
<tr>
<td>Chem 485</td>
<td>Nucleic Acids</td>
<td>3</td>
</tr>
</tbody>
</table>
Departmental Honors for the Majors in Chemistry and Chemistry with a Concentration in Biochemistry: To graduate "with distinction," a student must maintain a Chemistry grade-point average of 3.5 and complete at least one semester of Chem 490 research. To graduate "with high distinction," a student must maintain a Chemistry GPA of 3.65 and complete at least two semesters of chemistry research, one of which must be Chem 495. To graduate "with highest distinction," a student must maintain a Chemistry GPA of 3.8 and complete at least two semesters of chemistry research, one of which must be Chem 495. Chemistry research is defined as a research project performed under the direction of a Chemistry faculty member or a research project approved by the Chemistry Department Undergraduate Work Committee. A Chemistry GPA is calculated from the grades received in chemistry courses and chemistry prerequisites. The level of Departmental Honors that a student achieves will appear on the student's final transcript.

**Minors**

**The Minor in Chemistry**

Units required: 27 in chemistry; 17 in math and physics

Required courses:

**Elective courses:**

Student must complete 9 units of chemistry encompassing three courses in at least two subdisciplines. Biol 451 General Biochemistry may be used to satisfy one course of the three required. Courses must be at the 300 level or above, but Chem 490 Introduction to Research is specifically excluded.

All chemistry course work must be taken in residence at Washington University to be applied toward the chemistry minor. A minimum grade of C- must be earned in each course to count toward the chemistry minor.

**Courses**

**L07 Chem 105 Introductory General Chemistry I**

This course traces the development of chemistry from early atomic theory to modern descriptions of structure, bonding, and intermolecular interactions. Over the course of the semester, the students learn how macroscopic observations of stoichiometry, chemical reactions, the properties of elements and compounds, and chemical periodicity developed into the microscopic understanding of molecular structure and bonding. The semester begins with fundamentals related to stoichiometry, chemical reactions, solution chemistry, and gas properties, with an emphasis on quantitative problem solving. The octet rule, Lewis structures, and valence-shell electron-pair repulsion (VSEPR) theory are then introduced as early efforts to describe the stability and structures of molecules. The localized electron model (LEM) and molecular-orbital theory (MOT) are then described as modern descriptions of chemical bonding. The course concludes with intermolecular forces such as hydrogen bonding and van der Waals interactions. This course will be a serious introductory series that requires and develops algebraic computation and problem-solving skills. Prerequisites: two years of high school math, one year of high school chemistry or physics, or permission of the instructor.

Credit 3 units. A&S IQ: NSM, AN BU: SCI
L07 Chem 106 Introductory General Chemistry II
This course covers chemical equilibrium, thermodynamics, and kinetics at a fundamental level, with an emphasis on in-class problem solving. Gas-phase reactions, heterogeneous (multi-phase) reactions, acid-base reactions, and solubility equilibria are introduced first. Chemical thermodynamics is then taught in its relation to chemical equilibrium. The course finishes with chemical kinetics and rate laws. The content is similar to that of Chem 112A, but advanced applications are omitted to allow for more in-class guided active learning. Prerequisites: two years of high-school math, one year of high-school chemistry or physics, and Chemistry 105 or 111A, or by permission of the instructors. Credit 3 units. A&S IQ: NSM, AN

L07 Chem 111A General Chemistry I
Systematic treatment of fundamental chemical principles and their applications. Particular reference to the concept of energy and its uses, gas laws, kinetic molecular theory, atomic and molecular structure, chemical bonding, and the periodic classification of the elements. Prerequisites: two years of high school algebra and one of high school chemistry, or permission of instructor. Credit 3 units. A&S IQ: NSM, AN Art: NSM BU: SCI

L07 Chem 112A General Chemistry II
Introduction to the principles of chemical equilibrium and to ionic solutions. Topics: ionic equilibria, galvanic cells, elementary chemical thermodynamics and kinetics, and molecular structure of coordination compounds. Three lecture hours and a problem-solving subsection hour. Sign-up for subsections is conducted during the first two weeks of the semester. Prerequisite: Chem 111A or permission of instructor. Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L07 Chem 115 General Chemistry Laboratory I
This course provides an introduction into basic laboratory techniques, the experimental method, and the presentation of scientific data, as well as direct experience with chemical principles and the properties and reactions of substances. The course is designed to be taken concurrently with the first semester of the general chemistry lecture series (Chem 111A). Students attend a lab lecture every Monday and perform experiments during their scheduled lab section every week. Consult course listings for more information. Prerequisite: concurrent enrollment in Chem 111A or permission of the instructor. Credit 2 units. A&S IQ: NSM Art: NSM

L07 Chem 116 General Chemistry Laboratory II
This course provides an introduction to basic laboratory techniques, the experimental method, and the presentation of scientific data as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in the Chem 112A lecture course. Students attend one four-hour laboratory session and one one-hour laboratory lecture every other week. Prerequisite: concurrent enrollment in Chem 112A or permission of the instructor. Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 152 General Chemistry Laboratory II
This course provides an introduction into basic laboratory techniques, the experimental method, and the presentation of scientific data, as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in the Chem 112A lecture course. Students attend one four-hour laboratory session and one one-hour laboratory lecture every other week. Prerequisite: concurrent enrollment in Chem 112A or permission of the instructor. Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 181 First-Year Opportunity: Applications in Chemistry
This course involves a weekly lecture by a chemistry faculty member or by another scientist from academia or industry about their current research activities. The goal is to provide students with a sampling of current research activities dealing with fundamental and applied problems in science and society that are being approached from a chemical point of view. Students will see how fundamental chemical principles can be obtained from experiment and theory and used to both better understand and make better the world we live in. Each week, a different scientist presents a lecture or offers an additional activity. The course is intended primarily for freshmen who anticipate majoring in science, but interested upperclass students should also find the lectures interesting and stimulating. Students are expected to attend all lectures and associated activities during the semester. Credit/no credit only. Course is for first-year, non-transfer students only. Credit 1 unit. A&S: FYO A&S IQ: NSM Art: NSM

L07 Chem 182 Chemistry for Concerned Citizens: Topics in Energy, the Environment, and More
This course is designed to provide an overview of chemistry as it relates to problems in environmental science, energy and related topics. It is constructed such that all students, irrespective of their major area of study, can learn about chemistry in these contexts. The course is intended to be highly interdisciplinary; therefore, it covers subjects including chemistry, physics, engineering, geology, biology, environmental policy and others. Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L07 Chem 261 Organic Chemistry I with Lab
The first part of a two-semester survey of organic chemistry. The course includes an introduction to organic structures, reactions and reaction mechanisms. The laboratory meets on alternate weeks and includes an introduction to laboratory methods in organic chemistry, including separation and methods of purification of organic compounds. Prerequisites: Chem 112A, Chem 152. Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 262 Organic Chemistry II with Lab
A course covering certain areas of organic chemistry in more detail than the prerequisite course, with special emphasis on the mechanisms and the synthetic applications of organic reactions and on the organic chemistry of biological compounds. The laboratory meets eight times and includes organic synthesis and spectroscopic techniques. Required course for chemistry majors. Prerequisite: Chem 261. Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 290 First-Year and Sophomore Research
Introduction to laboratory research for first- and second-year students. Students work under supervision of a faculty sponsor. Prerequisite: permission of the sponsor and the Department of Chemistry. Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 299 Chemical Laboratory Safety
An overview of current laboratory safety, regulatory and compliance practices. Safety and compliance issues that impact
chemical, biological and materials research is covered through a series of lectures, demonstrations, activities and laboratory exercises. Credit 0.5 units. A&S IQ: NSM Art: NSM BU: SCI

L07 Chem 358 Organic Chemistry Laboratory II
Initially, problem solving in organic chemistry is emphasized through an introduction to the methods of qualitative organic analysis, including the use of chromatographic and spectroscopic techniques. Each student then selects an independent synthetic project to perform. Prerequisite: Chem 262. Six laboratory hours per week. Lectures held three hours a week for the first half of the semester. Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L07 Chem 400 Physical Science in 12 Problems
Exercises related to general chemistry, classical mechanics, quantum mechanics, statistical mechanics, thermodynamics and kinetics, are solved with numerical software. Each exercise is accompanied by a lecture, a software template solving a problem and a related take-home problem. The software allows us to focus on, and treat in a transparent fashion, physical problems without the unworlly idealizations and contrivances found in textbooks. Prerequisites: Chem 111A Chemistry I, concurrent enrollment with Chem 401 and prior or concurrent enrollment in Physics 117A Physics I. Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 401 Physical Chemistry I
Introduction to quantum chemistry (with applications to elementary spectroscopy) and kinetics. Prerequisites: Chem 111A-Chem 112A, Math 233; prior completion of Physics 117A and Physics 118A is strongly encouraged (but concurrent enrollment in Physics 117A is accepted); or permission of instructor. Required course for all Chemistry majors. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 402 Physical Chemistry II
Introduction to chemical thermodynamics, statistical mechanics and transport phenomena. Required course for all Chemistry majors. Prerequisites: Chem 111A–Chem 112A, Chem 401, Math 233, prior completion of Physics 117 and 118 is strongly encouraged (but prior completion of Physics 117 and concurrent enrollment in Physics 118 are accepted); or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 403 Chemical Kinetics
This lecture course provide an introduction to the kinetics of chemical reactions for graduate and upper-level undergraduate science and engineering students. Bulk and molecular level considerations are discussed and provide a foundation for the understanding of chemical reaction mechanisms and the techniques used for their study. Students gain an understanding of the importance and significance of the rate laws of reactions and in particular the reaction rate constant. Details of how the environment in which reactions occur (e.g., gas phase, solution phase and surface reactions) and molecular structure are reflected in the rate constant are discussed. Examples such as catalytic loss cycles in the atmosphere, enzyme catalysis, combustion systems, chain reactions and explosions are presented in detail to illustrate how the fundamental principles of chemical kinetics can be applied to predict reaction rates, chemical reactivity and the outcomes of particular processes. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 426 Inorganic Electrochemistry and Photochemistry
An understanding of electrochemical processes is critical in describing the behavior of batteries, photovoltaics, solar fuel systems, and other important devices used in energy conversion and environmental remediation. This course will cover modern inorganic electrochemistry, photochemistry, and photoelectrochemistry from a microscopic perspective of solid-electrolyte interfaces. The course material will start with the thermodynamics of solid-electrolyte interfaces and the kinetics of electron transfer across these interfaces. Electroanalytical techniques, such as cyclic voltammetry and potential step methods, will be described to understand the mechanism of various electrochemical and photochemical reactions. The second half of the course will cover several applications of electrochemical cells, including batteries, fuel cells, and photoelectrochemical cells. Prerequisites: Chem 461 or Chem 465 or consent of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 430 Simulation in Chemistry and Biochemistry
This course explores a wide range molecular modeling techniques and applications of computational chemistry to problems in chemistry and biochemistry. Topics include ab initio quantum mechanics, semi-empirical MO theory, molecular mechanics, molecular dynamics simulation, coarse-grained models, electrostatic methods and biomolecular structure prediction. A major component of the course is weekly laboratory sessions using common software programs in the field, including Spartan, Q-Chem, Gaussian, VMD, TINKER, APBS, AutoDock, SDA7 and others. Many of the lab exercises target proteins, nucleic acids and other biologically important structures. As a final lab experience, students complete an independent project using tools covered in the course. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 435 Nuclear and Radiochemistry Lab
Application of radiochemical techniques to problems in chemistry, physics and nuclear medicine. Prerequisites: 3 units of physical chemistry and permission of instructor. One lecture hour and five hours of laboratory a week. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 436 Radioactivity and Its Applications
Introduction to the production and decay of radioactive nuclides, the structure and properties of nuclei, and the applications of nuclear and radiochemical techniques to current scientific problems. Prerequisites: one year each of chemistry, mathematics and physics. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 437 Radioactivity and Radiation Safety
The following topics are discussed: (a) general properties of nuclei; (b) laws of radioactive decay; (c) interaction of radiation with matter; (d) radiation detectors; (e) radiation dosimetry; (f) biological effects of radiation exposure; (g) radiation safety, safety test, regulations; (h) basics of radioisotope production. Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM
L07 Chem 445 Instrumental Methods: Physical Chemistry
A course providing direct hands-on experience with the principles of physical chemistry (thermodynamics, quantum, kinetics) and associated experimental methods and instrumentation, including optical, infrared, and nuclear and electron spin resonance, electrochemistry, calorimetry, laser kinetics, and basic electronics. Prerequisite: Chem 401 or concurrent enrollment in Chem 402.
Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L07 Chem 450 Mechanistic Organic Chemistry
The first half of a sequence of two semesters, followed by Chem 554 in the spring, encompassing important topics in physical organic chemistry. The first semester is devoted to the fundamental concepts of mechanistic organic chemistry. The major classes of organic reactions are surveyed from a mechanistic perspective. Prerequisite: Chem 262 or permission of the instructor.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 451 Organic Chemistry III
A lecture course that builds on the material in Chem 261 and Chem 262, covering in more detail certain topics in those courses while also introducing new topics. A transition to graduate-level study in organic chemistry; recommended for chemistry, biochemistry and biology majors. Prerequisite: Chem 262.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 453 Bioorganic Chemistry
The focus of this course in an overview of modern medicinal chemistry from the selection of a therapeutic target through the FDA-approval process. Each aspect is exemplified by examples of drugs currently in clinical use or in late-stage development. One aspect of particular interest to synthetic chemists is the underlying development chemistry that often determines the competitive success of a product. Topics covered include peptidomimetic HIV protease inhibitors, topoisomerase inhibitors, HMGCoA-reductase inhibitors (Lipitor, etc.), receptor tyrosine-kinase inhibitors (Gleevac, etc.), a synthetic mimetic of superoxide dismutase, and several others depending on the interests of the participants. Students are responsible for presenting to the class the synthetic routes developed for the discovery and commercialization of these drugs focusing on development chemistry. Prerequisite: Chem 262.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 458 Chemical Reaction Mechanism Journal Club
This seminar meets for one hour each week. During the meetings, student participants are responsible for presenting topics from the current literature. The format of the presentation varies from informal talks to student-authored problem sets. Attendance at meetings is strongly recommended for all students who are currently taking the organic cumulative examinations. Prerequisite: Chem 262.
Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 459 Organometallic Chemistry
Survey of organometallic compounds with discussion of their synthesis, structure, spectroscopy and reactivity. Prerequisite: Chem 252.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 461 Inorganic Chemistry
Introduction to modern inorganic chemistry; emphasis on relation of structure and bonding to the chemical and physical properties of compounds. Prerequisite: Chem 401 or permission of instructor.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 464 Inorganic Biochemistry
A class in biological chemistry that emphasizes the role of metals in electron transfer and enzymatic catalysis. After a brief survey of essential concepts from biology, coordination chemistry and spectroscopy, topics include: electron transfer systems; oxygen transport and activation; metal ion acquisition, transport and homeostasis; enzymes catalyzing atom transfer reactions and radical-mediated processes. Prerequisites: Chem 252; Chem 461 recommended but not required.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 465 Solid-State and Materials Chemistry
The course begins with basic crystallography and common inorganic structure types. With the aid of computer modeling, students learn to analyze, index and refine X-ray powder-diffraction data. Students are then taught to use phase diagrams to assess the compositions and microstructures of materials produced by various synthetic or processing methods. Crystal nucleation and growth, defects, and ion-conduction mechanisms also are introduced. The course concludes with an analysis of the mechanical properties of materials from a chemistry perspective. What makes some materials strong, stiff and resistant to fracture? Prerequisites: Chem 111A-Chem 112A.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 470 Inorganic Chemistry Laboratory
A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises will introduce novel synthetic techniques such as high-temperature synthesis and vacuum line manipulations. Compounds will be spectroscopically characterized by UV-visible, gas-phase infrared, and multinuclear and dynamic NMR spectroscopy. Measurements of electrochemical behavior, magnetic susceptibility, and electrical conductivity will be performed. Prerequisite: Chem 461 or consent of the instructor.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 470W Inorganic Chemistry Laboratory — Writing Intensive
A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises introduce novel synthetic techniques such as high-temperature synthesis and vacuum line manipulations. Compounds are spectroscopically characterized by UV-visible, gas-phase infrared, and multinuclear and dynamic NMR spectroscopy. Measurements of electrochemical behavior, magnetic susceptibility and electrical conductivity are performed. Prerequisite: Chem 461 or consent of the instructor. This course satisfies the writing-intensive requirement.
Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L07 Chem 475 Chemical Biology
This course is a survey of modern chemical biology focusing on the application of a broad array of chemical tools to biological
problems. The course is roughly divided into four sections; biopolymers; computational methods and bioinformatics; tools for chemical biology; and applications of chemical biology. A mandatory discussion section accompanies the course and is used to review current and classical literature in the field. Prerequisites: Chem 262 and Biol 2970, or permission of the instructor.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 479 Computational Chemistry and Molecular Modeling
Lectures cover the background, practice and applications of computational chemistry to the modeling of the structures and chemical reactions of organic molecules. Different levels of calculation are presented, from molecular mechanics calculations and Hückel molecular orbital theory, through semi-empirical and ab initio self-consistent field calculations with correlation energy corrections, and density functional theory. Hands-on experience performing calculations is an important element in this course.
Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L07 Chem 481 General Biochemistry I
Topics include the properties and structures of biomolecules, including amino acids, nucleotides, lipids, carbohydrates, proteins and nucleic acids. Additional topics include enzyme kinetics and mechanisms, membrane structure and properties, protein folding, an introduction to metabolism, oxidative phosphorylation, and photosynthesis. This course is the first semester of an integrated two-semester sequence. The second course is Chem 482. Prerequisites: Biol 2970, Chem 262.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 482 General Biochemistry II
Continuation of General Biochemistry I. Topics include carbohydrate, lipid and amino acid metabolism, signal transduction, transport across membranes, DNA replication and repair, transcription and translation, molecular motors, mechanisms of drug action and natural products biosynthesis. Prerequisite: Chem 481 or Biol 481.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 483 Protein Biochemistry
The focus of this course is protein biochemistry, and is intended to build upon General Biochemistry (Chem 481). In this course we will focus on protein structure, folding, and techniques to purify and characterize protein activity. We will progress from initial studies to first understand protein fold and function to current efforts to better characterize protein structure-function relationships. We will also highlight human diseases that are underpinned by protein misfolding. This course will focus on reading and understanding primary literature, including landmark papers along with more recent work. During the second half of the semester, each student will select a paper and prepare a written analysis of that paper. The student will then present the paper and lead a journal club style discussion of the paper. Prerequisites: Chem 481 or instructor's permission.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 485 Nucleic Acids
Structure, synthesis, properties, and interactions of nucleic acids, and the design and synthesis of nucleic acid-based and/or targeted drugs, probes and tools. Topics: primary, secondary and tertiary structure; topological and thermodynamic properties; biological and chemical synthesis; DNA chips; PCR; site-directed natural and unnatural mutagenesis; chemical evolution (SELEX); ribozymes; phage display; carcinogen, drug and protein interactions; affinity cleaving; ultraviolet light and ionizing radiation damage, DNA repair of mutagenesis; design and synthesis of anti-sense and anti-gene probes and drugs. Extensive use is also made of molecular modeling and the protein databank of nucleic acid structures. Prerequisites: Chem 251 and Chem 252 or equivalent.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 488 Modern Spectroscopy
This course focuses on the fundamental principles and methodologies associated with numerous optical spectroscopy techniques that are commonly utilized in physical and life sciences research laboratories. In order to develop a solid understanding of the material as well as best practices, and the strengths and limitations of the techniques, this course combines lectures with laboratory experiments. Students also learn how to analyze and interpret data and succinctly describe their results. During one lecture each week the underlying principles of a specific type of spectroscopy are presented. The second lecture each week is spent covering the general details of the instrumentation and methods for acquiring spectra on different types of samples. The students then acquire spectra using the spectroscopic methods presented during the laboratory session. The students independently analyze the data and write brief reports of their findings. During the last two weeks of class, pairs of students are given an unknown, and they need to identify and characterize the sample. Students then write and submit a final report describing this independent research and their findings.
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 490 Introduction to Research
Advanced laboratory work on a selected topic in chemistry. Prerequisite: permission of the department. Credit/no credit only. If this course is to be submitted for Honors, the student must file the Honors form available at the chemistry department office before the end of junior year. Arrangements for registration should be completed during the preregistration period.
Credit variable, maximum 6 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 495 Advanced Undergraduate Research in Chemistry
The student conducts research supervised by a chemistry department faculty member. At the end of the semester, the chemistry supervisor chairs a faculty committee to evaluate an oral public presentation and/or a concise written report, and a letter grade is assigned. The committee members and completion requirements must be approved by the supervisor prior to registration. This course may provide a Capstone Experience but does not fulfill the Writing-Intensive requirement. The units earned may be applied as elective advanced credits toward a chemistry major with Latin honors eligibility. Course may be taken only once for credit. Prerequisite: Chem 490 and/or other advanced electives or research experience specified by the supervisor.
Credit 3 units. A&S IQ: NSM Art: NSM
Children's Studies

In the children's studies minor, students learn about children and childhood while drawing on the expertise of departments and programs from across Arts & Sciences, especially the departments of Education, English, and Psychological & Brain Sciences. Children's studies minors will develop a sophisticated interdisciplinary understanding of childhood and the issues surrounding the treatment and status of children throughout history. The minor combines social science courses that measure and analyze how children mature and how institutions have affected children with courses in the humanities that examine how children are portrayed and constructed in art, literature and film. Thus, a minor in children's studies will supplement students' majors while exposing them to an interconnected set of ideas about children as objects and subjects in a variety of essential disciplines. The minor in children's studies is housed in the Washington University Center for the Humanities.

Majors

Children's studies is an interdepartmental minor; Washington University does not offer a separate major in children's studies.

Minor in Children's Studies

Minor requirements for students entering Washington University in fall 2014 and after:

- Units required: 16

  - Required courses (4 units):
    - Code: ChSt 300
      - Title: Interdisciplinary Introduction to Children's Studies
      - Units: 3
    - Code: ChSt 499
      - Title: Senior Seminar in Children's Studies
      - Units: 1

  - Core courses (6 units from the following):
    - Code: ChSt 313B
      - Title: Education, Childhood, Adolescence and Society
      - Units: 3
    - Code: ChSt 318
      - Title: The Cultural History of the American Teenager
      - Units: 3
    - Code: ChSt 321
      - Title: Developmental Psychology
      - Units: 3
    - Code: ChSt 334
      - Title: A History of the Golden Age of Children's Literature
      - Units: 3

  - 6 additional units from either the core list or from elective courses, including but not limited to the following:

  - Code: ChSt 301
    - Title: [Course Title]
    - Units: [Course Units]

  - Code: ChSt 310
    - Title: [Course Title]
    - Units: [Course Units]
### ChSt 178 First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change

The goal of this course is to provide a glimpse into how youth reshape African society. Whether in North Africa with the Arab Spring, in West Africa with university strikes, or in East Africa through a linguistic full bloom, youth have been shaping social responses to societies for a long period. In this course, we will study social structures, including churches, NGOs, and developmental agencies, and we will learn about examples of Muslim youth movements and the global civil society. The course will also explore how youth impact cultural movements in Africa and how they influence the world. In particular, we will examine hip-hop movements, sports, and global youth culture developments that center on fashion, dress, dance, and new technologies. By the end of the course, students will have enriched ideas about youth in Africa and ways to provide more realistic comparisons to their counterparts in the United States.

Course is for first-year, non-transfer students only.

Same as L90 AFAS 178

Credit 3 units.

### Additional Information

The most up-to-date list of approved electives is located on the Children’s Studies Minor website (https://humanities.wustl.edu/childrens-studies-minor). Courses not on that list may be used to fulfill the requirements of the minor only if they have been approved by the student’s minor adviser and/or by the academic coordinator.

A maximum of 3 units of course work completed at another university, whether in the United States or abroad, may be applied toward the children’s studies minor. Credit will be awarded only for those courses that have been approved by the student’s minor adviser or by the academic coordinator.

### L66 ChSt 251 Juvenile Justice in the Black Experience

This course examines the sociolegal past, present, and future of American juvenile justice, with a focus on the black American experience. The course is organized in three parts. Part I surveys the late 19th-century and early 20th-century development of the “parental state,” including its institutional centerpiece (the juvenile court) and its principle legal subjects (“dependents” and “delinquents”), and how these took shape alongside the contemporaneous rise of American Apartheid. Part II examines several key changes and challenges in contemporary juvenile justice, including the transformation of this institution in the wake of the Civil Rights Movement and the endurance of racialized juvenile social control in the post-Civil Rights period. Finally, Part III considers possible futures of youth justice in the United States and beyond as well as practical
strategies for achieving equal protection within and beyond the law.
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 299 Internship in Children's Studies
This course offers up to three hours of academic credit (on a pass/fail basis) for an unpaid internship with an outside organization in some area of Children's Studies. Enrollment is restricted to children's studies minors and will require completion of a final written project as well as coordination with a site supervisor. For more information, please contact Dr. Wendy Anderson by email (andersonwl@wustl.edu) or phone: 314-935-9523.
Credit variable, maximum 3 units.

L66 ChSt 300 Interdisciplinary Introduction to Children's Studies
What is childhood? Is it supposed to be happy? And what can children's books, toys, and memoirs tell us about the experience of childhood in a certain time and place? This course is designed to introduce students to the field of children's studies, including readings in the history and literature of global childhood, excerpts from children's films and TV, visits from Washington University faculty studying children across various disciplines, and field trips to a children's museum and a juvenile detention facility. The course is intended to give students a richly detailed picture of how children and childhood are dealt with as subjects throughout the curriculum and the impact these approaches have had on how the greater society thinks about children. Freshmen are welcome to enroll. This course fulfills the Social Differentiation requirement in Arts & Sciences.
Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

L66 ChSt 301C The American School
This course offers an analysis of the development of American schooling within the context of American social history. The focus on three general themes: differing conceptions of schooling held by leading American educational thinkers, changing relationships among schools and such other educational institutions as the church and the family, and policy issues that have shaped the development of schooling in America.
Same as L12 Educ 301C
Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

L66 ChSt 304 Educational Psychology
A course in psychological concepts relevant to education that is organized around four basic issues: how humans think and learn; how children, adolescents, and adults differ in their cognitive and moral development; the sense in which motivation and intention explain why people act as they do; and how such key human characteristics as intelligence, motivation, and academic achievement can be measured. Offered fall and spring semesters.
Same as L12 Educ 304
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 3132 Service Learning: Girls' Studies
2012 marked the 100th anniversary of Girl Scouts of America, an organization that has played a significant role in defining what it means to be a girl in American culture. This class will look back at girlhood over the last hundred years to today by exploring topics that include literature for girls, the education of girls, sports and girlhood, marketing to girls, girls' health and sexuality, and, of course, the history of organizations for girls in the U.S. and abroad. This course introduces students to the emerging field of Girl Studies within the field of Feminist/Gender Studies research. Because the course builds upon basic knowledge of women's movements in the United of States and builds upon an understanding of core women and gender studies readings, students must take Introduction to Women and Gender Studies or Introduction to Sexuality Studies before enrolling in this course. This course includes a fieldwork component in addition to regular course meetings. Prerequisite: any 100-level Women, Gender, and Sexuality Studies course.
Same as L77 WGSS 3132
Credit 4 units. A&S IQ: HUM, SC, SD BU: BA EN: H

L66 ChSt 3133 Service Learning: Feminist and Queer Youth Studies
The categorization of life experience into childhood and adolescence is a relatively new construct. The first part of the course will examine how the categories of early childhood and adolescence developed in social and medical discourses. The remainder of the course encourages students to draw connections between feminist and queer theoretical scholarship on children and the practice of designing and implementing programming for children. Students will examine the relationship between the course readings and their experience working with various agencies in St. Louis. Note: This is a service-learning class, which means that it combines classroom learning with outside work at a community organization. In addition to regular class time, there is a service requirement, which will necessitate an additional four to five hours of time per week. Before beginning community service, students must complete required training and submit material for a background check. Prerequisite: L77 100B.
Same as L77 WGSS 3133
Credit 4 units. A&S IQ: SSC, SC, SD BU: BA EN: S

L66 ChSt 313B Education, Childhood, Adolescence and Society
An examination of childhood, child development, and education from different perspectives involving the observation of children in a variety of settings, including classrooms. Through historical, sociological, psychological, and political readings, students will clarify current ideas about children, investigate the nature of childhood, and begin to understand how and why childhood is constructed as it is.
Same as L12 Educ 313B
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 316W Topics in American Literature: Girls' Fiction
Topic varies. Writing intensive.
Same as L14 E Lit 316W
Credit 3 units. A&S IQ: HUM, WI BU: HUM EN: H

L66 ChSt 318 The Cultural History of the American Teenager
Same as L14 E Lit 318
L66 ChSt 3195 Abnormal Child Psychology
This course will familiarize students with current perspectives on the nature, causes, assessment, treatment and prevention of child psychiatric disorders and related family dysfunction. Theoretical perspectives and research findings will be discussed pertaining to anxiety, depression, conduct disorder, attention-deficit/hyperactivity disorder, autism, learning impairments, and parent-child conflict. Prerequisite: Psych 100B.
Same as L33 Psych 3195
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H, H

L66 ChSt 321 Developmental Psychology
This course concentrates on the cognitive and social development of the person from conception to adolescence. Topics covered include: infant perception, attachment, cognitive development from Piagetian and information processing perspectives, aggression and biological bases of behavior. Prerequisite: Psych 100B.
Same as L33 Psych 321
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 325 Psychology of Adolescence
A broad introduction to adolescence as a developmental period of transition and change. The major topics include the fundamental changes of adolescence; the context of adolescence; and processes of psychological development. Prerequisite: Psych 100B.
Same as L33 Psych 325
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 3254 African Americans and Children's Literature
This course explores two distinct themes: how African-descended people have been depicted in American and British children's literature, and how African Americans have established a tradition in writing for children and young adults. It will also examine two related questions: How has African-American childhood been constructed in children's literature, and how have African-American writers constructed childhood in children's literature? We will look at such classic white writers for children like Helen Bannerman, Annie Fellows Johnston, and Mark Twain as well as efforts by blacks like The Brownies' Book, published by the NAACP, and children's works by black writers including Langston Hughes, Ann Petry, Shirley Graham Du Bois, Arna Bontemps, Virginia Hamilton, Walter Dean Myers, Mildred Taylor, Floyd and Patrick McKissack, Julius Lester, Rosa Guy, Sharor Bell Mathis, bell hooks, and others. Prerequisite: Psych 100B.
Same as L33 Psych 3254
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 3270 Comics, Graphic Novels, and Sequential Art
This course traces the evolution of comics in America from the "comic cuts" of the newspapers, through the development of the daily and Sunday strips, into the comic book format, and the emergence of literary graphic novels. While not a uniquely American medium, comics have a specifically American context that intersects with issues of race, class, gender, nationalism, popular culture, consumerism, and American identity. Comics have repeatedly been a site of struggle in American culture; examining these struggles illuminates the way Americans have constructed and expressed their view of themselves. The way comics have developed as a medium and art form in this country has specific characteristics that can be studied profitably through the lens of American Culture Studies.
Same as L98 AMCS 3270
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L66 ChSt 331 Topics in Holocaust Studies: Children in the Shadow of the Swastika
This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period — the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children — both those they considered “Aryan” and those they designated “enemies” of the German people, such as Jewish children — an important focus of their politics. We will then examine literary texts and films, that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. 
Open to freshmen. Students must enroll in both main section and a discussion section.
Same as L21 German 331
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L66 ChSt 334 A History of the Golden Age of Children's Literature
A comprehensive survey of the major works for children written during this period.
Same as L14 E Lit 334
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L66 ChSt 336 The Cultural History of the American Teenager
This course will explore the recent history of the teenager in the United States, from the rise of teen culture in the 1950s to the current state of adolescence in the new century. Why have so many novels and films memorialized adolescence? How has the period of development been portrayed in books and film? How have depictions and attitudes toward teen culture changed over the past 50 years? We will begin with J.D. Salinger's classic novel of adolescence alienation, The Catcher in the Rye, a book that in many ways helped initiate the rise of the youth movement in the 1950s and 60s. From there, we will read a series of novels and historical studies that will trace the changes in teen culture that have occurred over the past half century. Our class will also consider a few films, such as Rebel Without a Cause and Dazed and Confused, which have helped shape our conception of the American teenager. Ultimately, we will question what these depictions of teen culture can tell us about larger trends and concerns in American life. Readings will include Judy Blume's Forever, Stephanie Meyer's Twilight, and Colson Whitehead's Sag Harbor.
L66 ChSt 341 Children and Childhood in World Religions
This course will investigate the roles children play in some of the world's major religious traditions and how those traditions construct their concepts of childhood. From child disciples to child martyrs, from the miraculous childhoods of religious founders to the rites marking childhood's end, and from divine commandments involving fertility to those mandating celibacy, we will explore a wide range of different religions' teachings about children and childhood. We will combine primary and secondary sources including written texts, movies/video, and web-based content in order to learn more about the complex relationships between children and the religious traditions of Judaism, Christianity, Islam, Hinduism, Buddhism, and Confucianism. Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L66 ChSt 342 Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World
From child saints to child scholars and from child crusaders to child casualties, the experience of childhood varied widely throughout the European Middle Ages. This course will explore how medieval Jews, Christians, and Muslims developed some parallel and some very much divergent concepts of childhood, childrearing, and the proper cultural roles for children in their respective societies. Our readings will combine primary and secondary sources from multiple perspectives and multiple regions of Europe and the Mediterranean World, including a few weeks on the history and cultural legacy of the so-called Children's Crusade of 1312. We will conclude with a brief survey of medieval childhood and its stereotypes as seen through contemporary children's books and TV shows. This course fulfills the Language & Cultural Diversity requirement for Arts & Sciences. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L66 ChSt 344 Children's Television
How does contemporary television imagine children? How does the industry speak to them, with what aims, and using what types of representational strategies and modes of address? In turn, how do young people respond, both as viewers and, with the advent and increasing accessibility of new technologies, as media producers? This seminar will address these and other related questions while introducing students to the study of children's television in cultural and critical media studies. Throughout, we will address the theoretical question suggested by the course's title, a reference to the work of literary scholar Jacqueline Rose: is children's television possible? Same as L53 Film 344 Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L66 ChSt 3620 Anthropological Perspectives on the Fetus
Where do we come from? How do we get here? When does "life" begin? Is the fetus a "person" or something else? How could we decide? This course will integrate biological, medical, philosophical, and cross-cultural perspectives to examine how various societies (including our own) understand the nature of the human fetus. The course will examine basic human embryology, beliefs about conception and fetal development, ideas about the moral status of the fetus, controversies surrounding prenatal care and antenatal diagnostic testing (including sex-selection and genetic screening tests), current controversies about fetal medicine and surgery, and the problem of abortion in cross-cultural perspective. Same as L48 Anthro 3620 Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 381 Banned Books
Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago a Russian student was exiled to Siberia for possessing a copy of Emerson's Essays, today, school boards in the United States regularly call for the removal of Huckleberry Finn and The Catcher in the Rye from classrooms and library shelves. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. The course explores these issues by looking closely at several American and translated European texts that have been challenged on moral, sociopolitical or religious grounds to determine what some readers have found so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments. Same as L14 E Lit 381 Credit 3 units. A&S IQ: HUM Art: HUM BU: ETH

L66 ChSt 389 Narratives of Childhood
This course explores how the force of narrative arises from the play between the adult's perspective and the child's. Topics considered include orphanhood, social change, creative forces, and institutions of power. We pay particular attention to the child's voice as a narrative strategy used to confront unfathomable horrors, to reconstruct history, and to offer order to personal upheavals. We will discuss these narrators and reveal about the societies they purport to reflect as well as the nature of narrative itself to convey history, values, and emotion. Texts include readings such as Nurrudin Farah's "Maps"; Stella Gibbons' "Cold Comfort Farm"; Craig Thompson's "Blankets"; Philippe Grimbert's "Memory"; Dorothy Allison's "Bastard Out of Carolina"; Amos Oz's " Tale of Love and Darkness"; and Hanan al-Shaykh's "Story of Zahra." Prerequisite: Writing 1, sophomore standing, or permission of the instructor. Same as L16 Comp Lit 389 Credit 3 units. Art: HUM BU: HUM

L66 ChSt 400 Independent Work in Children's Studies
This course provides credit for children's studies minors who undertake a program of independent reading and/or research under the supervision of a faculty mentor on some subtopic within Children's Studies for which there is no regular course available. Please contact the Academic Coordinator for more information. Credit variable, maximum 3 units.

L66 ChSt 401 Writing for Children and Young Adults
In this course we will examine various genres of writing for young people: poetry, fiction and nonfiction. Same as L13 Writing 401 Credit 3 units.
L66 ChSt 4036 Children of Immigrants: Identity and Acculturation

This seminar takes an interdisciplinary approach to the children of immigrants as an analytical subject. Our investigation looks into the 1.5- and second-generation youth of different cultural and ethnic backgrounds in the United States, with many case studies focusing on Asian American and Latinx individuals. Discussion topics include migration and identity, ethnicity and race, bilingualism and biculturalism, family and school, youth culture, and other pressing issues, such as mental health. The seminar offers a theoretical look into the lives of children of immigrants by introducing different research methodologies from the social sciences. The students are required to conduct an individual research project among a selected group of children of immigrants.

Same as L97 IAS 4036
Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

L66 ChSt 4046 Developmental Neuropsychology

Discussion will focus on early development and the disorders that affect the brain, such as cerebral palsy, sickle cell disease, and autism. Writing Intensive. Open only to advanced undergraduates, and declared Psychology majors will be given preference. Limited to 15 students. Prerequisites: Psych 100B and one of the following: Psych 321, Psych 360, Psych 3604, Psych 4604, or Psych 3401.

Same as L33 Psych 4046
Credit 3 units. A&S IQ: NSM, WI Art: NSM

L66 ChSt 4280 History of Urban Schooling in the United States

This reading colloquium examines the history of urban schooling and school policy in the United States. Readings focus on the growing literature in the history of urban schooling and on primary source material. We explore urban schooling in general, and we examine particular primary source material as well as particular cities and their school districts. Such districts may include New York, Boston, Chicago, Detroit, St. Louis, Los Angeles, San Francisco, Atlanta and others. The course has two goals: to develop a strong contextual understanding of the conditions of urban schooling, the history of urban school reform, and the debates over the purposes of urban schools; and to examine the ways historians have explored urban schooling in the U.S. Students should expect to read a book a week as well as primary source materials and occasional articles.

Same as L12 Educ 4280
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L66 ChSt 4289 Neighborhoods, Schools, and Social Inequality

A major purpose of the course is to study the research and policy literature related to neighborhoods, schools and the corresponding opportunity structure in urban America. The course will be informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis will be placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups will complement the course focus.

Same as L12 Educ 4289
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 453B Sociology of Education

This course provides an overview of sociological theory and research on education in contemporary U.S. society. Drawing from sociological perspectives, it covers the implications of schools and schooling for social inequality, mobility, and group relations. It examines major theoretical perspectives on the purpose and social organization of mass education in the United States, and topics related to the organization and function of schools, access to educational resources, and group disparities in school experiences and outcomes.

Same as L12 Educ 453B
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA, ETH EN: S

L66 ChSt 4591 The Development of Social Cognition

This course will explore what is known about the development of social cognition. Our starting point will be infants’ capacity to navigate the social world, for instance, detecting agents, identifying social partners, and learning from those around us. We will consider what happens when the human ability to reason about others breaks down (as with autism), and what this can teach us about typical development. Each week we will cover one topic and a related set of readings. Class meetings will be devoted to active discussion and debate about the content of the readings. Students are required to write a weekly reaction paper to the readings to promote class discussion, and will give an in-class presentation on a novel research topic at the end of the semester. Graduate students may have additional course requirements. Prerequisites: Psych 100B and one of the following: Psych 315 or 321 or 360.

Same as L33 Psych 4591
Credit 3 units. A&S IQ: SSC BU: BA EN: S

L66 ChSt 4608 The Education of Black Children and Youth in the United States

This course provides an overview of the education of black children and youth in the United States. Covering both pre- and post-Brown eras, this course applies a deep reading to the classic works of DuBois and Anderson as well as the more recent works of Kozol, Delpit, and Foster. The social, political, and historical contexts of education, as essential aspects of American and African-American culture and life, will be placed in the foreground of course inquiries.

Same as L12 Educ 4608
Credit 3 units. A&S IQ: SSC BU: BA EN: S

L66 ChSt 461B Construction and Experience of Black Adolescence

This course examines the construct of black adolescence from the general perspectives of anthropology, sociology and psychology. It begins by studying the construct of black adolescence as an “invention” of the social and behavioral sciences. The course then draws upon narrative data, autobiography, literature and multimedia sources authored by black youth to recast black adolescence as a complex social, psychological, cultural and political phenomenon. This course focuses on the meaning-making experiences of urban-dwelling black adolescents and highlights these relations within the contexts of class, gender, sexuality and education.

Same as L90 AFAS 461B
L66 ChSt 471 Topics in Japanese Culture: Reminiscences of Childhood and Youth
A topics course on Japanese culture; topics vary by semester.
Same as L03 East Asia 471
Credit 3 units. A&S IQ: HUM, LCD Art; HUM EN: H

L66 ChSt 481W History of Education in the United States
This course examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, workplace, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy during different periods of our history.
Same as L12 Educ 481W
Credit 3 units. A&S IQ: HUM, SC, SD, WI EN: H

L66 ChSt 499 Senior Seminar in Children's Studies
The children's studies minor brings together a range of disciplinary and methodological approaches to the study of children and childhood. In this 1-credit seminar, meeting for five three-hour evening sessions, junior and senior children's studies minors will discuss a series of interdisciplinary readings about the past and future of children's studies as a field, reflect on their own pasts and futures in the children's studies minor, and create and present portfolios of their minor experience. This course is a capstone experience for the minor in children's studies.
Prerequisite: junior or senior standing and a minor in children's studies.
Credit 1 unit. A&S IQ: HUM Arch: HUM Art; HUM EN: H

Chinese
The Department of East Asian Languages and Cultures (EALC) offers a major and a minor in Chinese language and culture. As a major in Chinese, a student can expect to gain some proficiency in the language and acquire a foundation in Chinese literature, history and culture from earliest times to the present. All students majoring in Chinese must complete first- and second-level Chinese or their equivalent. They also must complete a prerequisite 200-level civilization course and the two-semester literature survey as well as additional advanced-level (300- and 400-level) courses. In addition, all prime majors must complete the required EALC capstone experience.

The department strongly encourages overseas study of Chinese language and culture. All majors and minors are expected to maintain at least a B- average in all departmental courses.

Language Placement: Placement tests are required for all students entering our language programs, with the exception of those students who have had previous exposure to the language and wish to enroll in the first semester of the first year of instruction. Students who test into second-year Chinese and satisfactorily complete (with a grade of B- or better) at least one semester of language study may petition for 3 units of retroactive credit; students who test into third year or above and satisfactorily complete (with a grade of B- or better) at least one semester of language study may petition for 6 units of retroactive credit. Credit is limited to 3 units for testing into second year and 6 units for testing into third year or above. Please note that students with native language proficiency as determined by the Chinese language section as well as students who enroll in courses below their placement level are ineligible for retroactive credit units. Students who misrepresent their language proficiency so as to gain entrance into a course at the elementary or intermediate level will be dropped from that course.

Phone: 314-935-4448

Majors
The Major in Chinese Language and Culture
Units required: Eight courses for a minimum of 24 advanced (300 level or above) units
Prerequisites:
1. First- and second-level Modern Chinese or the equivalent
2. Chinese 227C Chinese Civilization

Requirements:
Eight courses for a minimum of 24 advanced (300 level or above) units, including the following:
1. Chinese 341 Early and Imperial Chinese Literature
2. Chinese 342 Modern and Contemporary Chinese Literature
3. 400-level capstone course (prime majors): Chinese prime majors may satisfy their capstone requirement in one of two ways, both of which require a presentation at the EALC Senior Symposium in the spring:
   a. Successful completion of a senior honors thesis. This option, which also entitles the student to Latin Honors, requires a minimum grade-point average of 3.65. The thesis is researched and written over two semesters for a total of 6 units, which are in addition to the 24 upper-level units required for the major.
   b. Successful completion of an approved 400-level seminar course, to be taken during the senior year. (This course
may be included among the 24 advanced units required for the major.)

**Additional Information**

1. With adviser approval, students may include one course in a related area offered outside the department among the 24 advanced units. (For example, a student with focus on China/Chinese may take one course in Film and Media Studies or Art History that focuses on China.) With adviser approval, students may count one course from another area within the department among the 24 advanced units. (For example, a student with focus on China/Chinese may take one course in either Korean or Japanese.)

2. Students must earn at least a B- in language courses in order to continue to the next level. They must also maintain at least a B- average in all required courses for the major. Students who do not meet this requirement may either repeat the course(s) in question or earn at least a B- in an approved equivalent course or courses (either during the summer or in a study abroad program).

3. Courses for the major may not be taken credit/no credit.

4. Core courses (i.e., Chinese 227C, 341, and 342) should be taken in residence.

5. Up to 6 units of credit may be applied toward the major from one semester abroad, and up to 12 units of credit may be applied from two semesters abroad. Note that EALC no longer distinguishes study abroad credits earned in advanced language courses from those credits earned in other content (non-language) courses.

6. No more than 3 units of independent study may be counted toward the required upper-level 24 units.

7. EALC awards Departmental Honors to majors as an acknowledgment of exemplary work in the major.

**Minors**

**The Minor in Chinese Language and Culture**

**Units required:** 18 units

**Requirements:**

- Two semesters of Chinese language
- At least 9 units of 300-level courses or above
- The following three courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chinese 227C</td>
<td>Chinese Civilization</td>
<td>3</td>
</tr>
<tr>
<td>Chinese 341</td>
<td>Early and Imperial Chinese Literature</td>
<td>3</td>
</tr>
<tr>
<td>Chinese 342</td>
<td>Modern and Contemporary Chinese Literature</td>
<td>3</td>
</tr>
</tbody>
</table>

**Additional Information**

- Students must earn at least a B- in their language courses in order to continue to the next level. They must also maintain at least a B- average in all courses taken to fulfill the minor requirements. Students who do not meet this requirement may either repeat the course(s) in question or successfully complete an approved equivalent course or courses (either during the summer or in a study abroad program).

- Courses for the minor may not be taken credit/no credit.

- Core courses (i.e., Chinese 227C, 341, and 342) should be taken in residence.

- No more than 3 units of transfer or study abroad non-language courses may be applied toward the minor.

**Courses**

**L04 Chinese 101D First-Level Modern Chinese I**

Introduction to the modern spoken and written national language of China. Five regular hours and additional drill or laboratory sessions as assigned by instructor. Students with some previous Chinese language background must take placement examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

**L04 Chinese 102D First-Level Modern Chinese II**

Continuation of 101D. Prerequisite: grade of B- or better in 101D, or placement by examination. Five regular hours and additional drill or laboratory sessions as assigned by instructor.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

**L04 Chinese 106 Beginning Chinese for Heritage Speakers I**

This course is designed for students who have basic speaking and listening skills and some background in writing or reading. Three class hours plus one additional hour are required. Prerequisite: placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

**L04 Chinese 107 Beginning Chinese for Heritage Speakers II**

Continuation of 106. Emphasis on improving basic reading and writing skills. Three class hours plus one additional hour are required. Prerequisite: grade of B- or better in Chinese 106 or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

**L04 Chinese 126 Chinese for Medical Purposes**

This course is the continuation of Beginning Chinese taught in the fall at the Shanghai Fudan program. The spring course is targeted specifically to pre-medicine and/or health care students who have studied at the Shanghai Fudan program in the fall. Students without the Fudan experience can also enroll after language evaluation. Prerequisites: L04 101D, L04 117F or the equivalent.

Credit 3 units. A&S IQ: LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
L04 Chinese 130 Basic Chinese I
Basic Chinese I is the first half of the beginning-level Chinese and is designed to meet the practical needs of students who are interested in learning Chinese but do not have time for a full-load study. This course is scheduled to move at half the pace of regular Chinese 101. Students will learn slowly but surely the same basic knowledge of Mandarin phonetics, standard grammar, and 300 to 350 vocabulary items. This basic course emphasizes listening comprehension and conversational skills through aural-oral practices. The reading and writing of basic Chinese are strongly encouraged as secondary skills. After completing the spring course I, followed by the fall course II, interested students can then go on to regular Chinese 102.
Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L04 Chinese 131 Basic Chinese II
This is the continuation of Basic Chinese I (L04 130). It is designed to meet the practical needs of students who are interested in learning Chinese but do not have time for a full-load study. This course will move at half the pace of Chinese 101D and will present the second half of the 101D curriculum. Students will learn basic knowledge of Mandarin phonetics, standard grammar, and approximately 350 new lexical items. This course emphasizes listening comprehension and conversational skills through aural-oral practice, with reading and writing Chinese as complementary skills. After completing this course, students can continue with Chinese 102D. Prerequisite: Grade of B- or better in 130, or placement by examination.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L04 Chinese 206 Intermediate Chinese for Heritage Speakers I
Designed for students who have either completed Chinese 107 or who have basic speaking and listening skills and mastery of at least 800 written characters. Three class hours plus one additional drill hour. Prerequisite: grade of B- or better in Chinese 107, or placement by examination.
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 207 Intermediate Chinese for Heritage Speakers II
Designed for students who have either completed Chinese 206 or who have basic speaking and listening skills and mastery of at least 800 written characters. Four class hours a week. Prerequisite: grade of B- or better in Chinese 206, or placement by examination.
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 211 Second-Level Modern Chinese I
The standard second-year level of instruction in modern Chinese. Students learn both long and short forms of characters. Prerequisite: grade of B- or better in Chinese 202D or placement by examination. Five hours a week, plus drill and laboratory sessions as required by instructor.
Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 212 Second-Level Modern Chinese II
The standard second-year level of instruction in modern Chinese. Students learn both long and short forms of characters. Prerequisite: grade of B- or better in Chinese 211 or placement by examination. Five hours a week, plus drill and laboratory sessions as required by instructor.
Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 227C Chinese Civilization
An introduction to Chinese culture through selected topics that link various periods in China's past with the present. Ongoing concerns are social stratification, political organization, the arts, gender relationships and the rationales for individual behavior, and the conceptions through which Chinese have identified their cultural heritage. Our readings include literary, philosophical and historical documents as well as cultural histories. Regular short writing assignments; take-home final. No prerequisites.
Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: BA, IS EN: H

L04 Chinese 303 Daoist Traditions
This course offers an introduction to the history, practices and worldviews that define the Daoist traditions. Through both secondary scholarship and primary texts, we consider the history of Daoism in reference to the continuities and discontinuities of formative concepts, social norms, and religious practices. Our inquiry into this history centers on consideration of the social forces that have driven the development of Daoism from the second century to the modern day. Special consideration is given to specific Daoist groups and their textual and practical traditions: the Celestial Masters (Tianshi), Great Clarity (Taiqing), Upper Clarity (Shangqing), Numinous Treasure (Lingbao), and Complete Perfection (Quanzhen). Throughout the semester we also reflect on certain topics and themes concerning Daoist traditions. These include constructions of identity and community, material culture, the construction of sacred space, and cultivation techniques.

Credit 3 units. A&S IQ: HUM, LCD BU: ETH EN: H

L04 Chinese 3055 Contemporary Chinese Culture and Society
This course provides an introduction to emerging trends in Chinese culture and society. We will explore processes of change and continuity in the People's Republic, examining the complexity of social issues and the dynamics of cultural unity and diversity. While we will focus on the post-Mao reform era (1978 to the present), we will consider how contemporary developments draw upon the legacies of the Maoist revolution as well as the pre-socialist past. The course provides an overview of anthropological approaches to the study of contemporary China, introducing students to key concepts, theories, and frameworks integral to the analysis of Chinese culture and society. Readings, lectures, and discussions will highlight not only macro-level processes of social change and continuity but also the everyday experiences of individuals involved in these processes. We will pay particular attention to issues of family life, institutional culture, migration, religion, ethnicity, gender, consumption, and globalization.

L04 Chinese 306 Advanced Chinese for Heritage Speakers I
This course is designed for heritage students who have studied at least two years of Chinese (or equivalent) with grade B- or
better to achieve greater proficiency in the oral and written use of the language through reading, listening, speaking and writing. Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 3091 Confucian Thought This course is designed to introduce students to the history and teachings of one of the world’s major religious traditions: Confucianism. We will examine how Confucianism developed in ancient China and afterwards spread throughout East Asia and beyond. In particular, we will pay attention to the issue of ritual and how Confucians attempted to ritualize social interactions and the world at large. In order to do so, we will engage in the writings of Confucius, Mengzi, and Xunzi, three early Chinese writers whose basic ideas about ritual heavily informed myriad cultural practices that are formative for large portions of East Asia today. Hence, this course on ancient thinkers not only introduces thoughts and practices prevalent throughout premodern China, Japan and Korea. It also functions as a catalyst that helps us understand some of the reasons and motivations behind these communities’ recent efforts to renegotiate and question “the colonialist flavor” of human rights and democracy. Same as L23 Re St 3091 Credit 3 units. A&S IQ: HUM, LCD BU: ETH EN: H

L04 Chinese 3103 Historical Landscape and National Identity in Modern China This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campus, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual, political and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory, and changing over time are an important concern of this course. Same as L03 East Asia 3103 Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L04 Chinese 316C Modern China: 1890s to the Present A survey of China’s history from the clash with Western powers in the 1800s to the present day economic revolution. This course examines the background to the 1911 revolution that destroyed the old political order. Then it follows the great cultural and political movements that lead to the Communist victory in 1949. The development of the People’s Republic will be examined in detail, from Mao to the global economy. Same as L22 History 316C Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L04 Chinese 3211 Contemporary Chinese Popular Culture With the rise of Chinese economy and global capitalism, popular culture proliferates in mainland China in recent years. This course traces the development of Chinese popular and youth culture and society from the 1990s to the present. It also refers back to modern times and ancient Chinese Confucian philosophy for historical background information. The course covers various forms of Chinese popular culture, such as movie, music, television program, internet literature, religion, sport and food. Students observe primary resources and reading academic articles to engage in a multiperspective and multimedia view of the present-day China in the age of globalization and East Asian regionalization. No prerequisites. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L04 Chinese 3263 Topics in East Asian Studies: U.S.-China Relations, from 1800 to the Present A topics course on a variety of East Asian subjects. Same as L03 East Asia 3263 Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L04 Chinese 330 Topics in Chinese Literature & Culture: Chinese Cities in the Global Context A topics course on Chinese literature and culture; topics vary by semester. Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L04 Chinese 3310 19th-Century China: Violence and Transformation This course traces the history of China over the course of the 19th century, with an emphasis on social and cultural history. This was one of the most tumultuous centuries in Chinese history, during which China faced threats from abroad in the form of Western and Japanese imperialism, and from within, in the form of environmental degradation and rebellions resulting in an unprecedented loss of human life. The 19th century has thus often been portrayed as a period of sharp decline for China. At the same time, we will explore the ways in which the origins of the dynamic society and economy found in China today, as well as the worldwide influence of overseas Chinese, can be traced to this century of turmoil. Same as L22 History 3310 Credit 3 units. A&S IQ: HUM, LCD Arch: HUM, HUM Art: HUM BU: HUM, IS EN: H

L04 Chinese 3352 China’s Urban Experience: Shanghai and Beyond The course studies the history of Chinese cities from the mid-19th century to the late 20th century. It situates the investigation of urban transformation in two contexts: the domestic context of modern China’s reform and revolution; and the global context of the international flow of people, products, capitals and ideas. It chooses a local narrative approach and situates the investigation in one of China’s largest, complex, and most dynamic and globalized cities — Shanghai. The experience of the city and its people reveals the creative and controversial ways people redefined, reconfigured and reshaped forces such as imperialism, nationalism, consumerism, authoritarianism, liberalism, communism and capitalism. The course also seeks to go beyond the “Shanghai model” by comparing Shanghai with
other Chinese cities. It presents a range of the urban experience in modern China.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

**L04 Chinese 341 Early and Imperial Chinese Literature**

An introduction to important genres and themes of Chinese literature through the study of major writers. Brief lectures on the writers’ personal, social, intellectual and historical contexts; most class time is devoted to student discussions of masterworks as an avenue for understanding Chinese culture during selected historical periods. Required for all Chinese majors, and recommended for all Japanese and East Asian Studies majors. No prerequisites; all readings available in English translation.

Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM BU: HUM, IS EN: H

**L04 Chinese 3415 Early Chinese Art: From Human Sacrifice to the Silk Road**

This course examines Chinese art and material culture from the prehistoric period through the end of the medieval Tang dynasty, when the Chinese capital boasted a cosmopolitan population of more than one million people. Topics covered include Neolithic ceramics and jades, the bronze casting tradition, funerary art and architecture, the Terracotta Army, the origins of Chinese brush arts, Buddhist painting and sculpture, and the varied exotica of the Silk Road. Each class teaches recent works together with the ancient to demonstrate how the origins of Chinese art and architecture continue to influence contemporary works.

Prerequisites: Intro to Asian Art (L01 111) or permission of instructor.

Same as L01 Art-Arch 3415
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

**L04 Chinese 342 Modern and Contemporary Chinese Literature**

An introduction to the major writers and works of Chinese literature from the turn of the 20th century to the present, including fiction, poetry and film. We look at these works in relation to the work that inspired it: Les Liaisons dangereuses; in 19th-century paintings; and in contemporary photographs. The class will read Doerr’s All the Light We Cannot See and de Waal’s Hare with the Amber Eyes, stories that link history with art, the past with the present, and gifts with thefts and bereavements. We will study Daoud’s Memsahib in relation to the work that inspired it: Camus’s Outsider [L’Etranger]. Adaptation will likewise inform our readings of Austen’s Sense and Sensibility, Barnes’s Sense of an Ending, and the pair of films based on these novels. The class will assess aspects of the original story that are lost on screen as well as the added resonances that the novels acquire in the film versions.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

**L04 Chinese 3442 History of Chinese Painting**

Tracing the unbroken history of Chinese painting from the first through 21st centuries, we explore the full evolution of its traditions and innovations through representative works, artists, genres and critical issues. From its ancient origins to its current practice, we will cover topics such as classical landscapes by scholar painters, the effects of Western contact on modern painting, the contemporary iconography of power and dissent, and theoretical issues such as authenticity, gender, and global art history. Prerequisites: Intro to Asian Art (L01 111) or one course in East Asian Studies recommended.

**L04 Chinese 346 Third-Level Modern Chinese I**

Emphasis on improving speaking, listening, reading and writing skills. Texts include Chinese newspapers and modern literary texts. Open to undergraduates only. Prerequisite: grade of B- or better in Chinese 212 or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

**L04 Chinese 361 Third-Level Modern Chinese II**

Continuation of advanced work in reading Chinese newspapers and modern literary texts. Open to undergraduates only. Prerequisite: grade of B- or better in Chinese 360 or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

**L04 Chinese 376 Topics in Comparative Literature**

This course examines the idea of connectivity in the arts. Via novels, paintings, photography, and film, we will explore questions of interpretation related to the themes of love and betrayal; bequests and legacy; and innocence and responsibility. A series of paintings by Vermeer and other Dutch masters depicting elegant women (and their dogs) in the company of their suitors will engage us in elaborate courtship rituals played out using letters, music and wine. We will also consider how, during the reigns of Francis I and Louis XIV, the French monarchy integrated Dutch art into its collections in order to assert the king’s influence and authority. Students will discuss portraits that emerge from complex tableaux in Laclos’s masterful novel of seduction, Les Liaisons dangereuses; in 19th-century paintings; and in contemporary photographs. The class will read Dercourt’s All the Light We Cannot See and de Waal’s Hare with the Amber Eyes, stories that link history with art, the past with the present, and gifts with thefts and bereavements. We will study Daoud’s Memsahib in relation to the work that inspired it: Camus’s Outsider [L’Etranger]. Adaptation will likewise inform our readings of Austen’s Sense and Sensibility, Barnes’s Sense of an Ending, and the pair of films based on these novels. The class will assess aspects of the original story that are lost on screen as well as the added resonances that the novels acquire in the film versions.

**L04 Chinese 399 Undergraduate Independent Study**

Prerequisite: permission of instructor and section head.

Credit variable, maximum 6 units.
L04 Chinese 4011 Popular Culture and Consumption in Modern China
This writing-intensive seminar explores transformations in popular culture and everyday life in Chinese society since 1949 through an analytical focus on political economy and material culture. Drawing upon ethnographic texts, films and material artifacts, we investigate how the forces of state control and global capitalism converge to shape consumer desires and everyday habits in contemporary China. Case studies include eating habits, fashion standards, housing trends, entertainment, sports and counterfeit goods. Prerequisite: previous course in China studies (anthropology, economics, history, literature, philosophy or political science) required. Enrollment by instructor approval only.
Same as L48 Anthro 4011
Credit 3 units. A&S IQ: LCD, SSC, WI Arch: SSC Art; SSC EN: S

L04 Chinese 410 Introduction to Traditional Literary Chinese I
Selected readings in premodern Chinese texts. Required of all majors in Chinese and students in fields of specialization where knowledge of literary Chinese is normally expected. Prerequisite: grade of B- or better in Chinese 427 or instructor's permission.
Credit 3 units. A&S IQ: LCD, LS Art: HUM BU: HUM, IS EN: H

L04 Chinese 411 Introduction to Literary Chinese II

Credit 3 units. A&S IQ: LCD, LS EN: H

L04 Chinese 418 Sexuality and Gender in East Asian Religions
In this course we will explore the role of women in the religious traditions of China, Japan and Korea, with a focus on Buddhism, Daoism, Shamanism, Shinto and the so-called "New Religions.
We will begin by considering the images of women (whether mythical or historical) in traditional religious scriptures and historical or literary texts. We will then focus on what we know of the actual experience and practice of various types of religious women — nuns and abbesses, shamans and mediums, hermits and recluses, and ordinary laywomen — both historically and in more recent times. Class materials will include literary and religious texts, historical and ethnological studies, biographies and memoirs, and occasional videos and films. Prerequisites: This class will be conducted as a seminar, with minimal lectures, substantial reading and writing, and lots of class discussion.
For this reason, students who are not either upper-level undergraduates or graduate students, or who have little or no background in East Asian religion or culture, will need to obtain the instructor's permission before enrolling.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art; HUM EN: H

L04 Chinese 419 Of Zombies, Ghosts, and Ancestors: Interactions of the Living and the Dead in Chinese Religions
This course introduces a basic aspect of the multifaceted history of Chinese religions, culture and civilization by centering on the practice of taking care of the dead. In particular, we will observe how various religious texts, short stories, and plays from China's earliest times until the 16th century depicted the interactions of the living and the dead. Despite the distinct genres, time periods and topics, one important aspect will regularly appear: Apparently people perceived the boundaries between the living and the dead to be quite porous in premodern China. In other words, the dead seemed to have played as much of a role in society and everyday life as living family members, friends and government officials.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art; HUM EN: H

L04 Chinese 4242 Culture and Politics in the People's Republic of China: New Approaches
This course inquires into the political, ideological and social frameworks that shaped the cultural production and consumption in the People's Republic of China (PRC). In the realm of literature, film, architecture, and material culture and everyday life, this course pays a close attention to the contestation and negotiation between policy makers, cultural producers, censors and consumers. Understanding the specific contour of how this process unfolded in China allows us to trace the interplay between culture and politics in the formative years of revolutionary China (1949-1966), high socialism (1966-1978), the reform era (1978-1992), and post-socialist China (1992 to present). The course examines new scholarship in fields of social and cultural history, literary studies, and gender studies; and it explores the ways in which new empirical sources, theoretical frameworks, and research methods reinvestigate and challenge conventional knowledge of the PRC that have been shaped by the rise and fall of Cold War politics, the development of area studies in the U.S., and the evolving U.S.-China relations. Prerequisites: Advanced undergraduate students must have taken no fewer than two China-related courses at the 300 level or higher. Graduate students should be proficient in scholarly Chinese, as they are expected to read scholarly publications and primary materials in Chinese.

L04 Chinese 4441 The Forbidden City
Home to 24 emperors of the Ming and Qing dynasties (1368-1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of pre-modern architecture in China. This seminar examines the origins of the palace, its construction in early Ming, the coded symbolism of its plan and decoration, the rituals of court, and the lives of its denizens, from emperors (including Pu Yi, the "last emperor") to concubines, from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and the backdrop to major political events, as well as its role in the urban design and contemporary art of 21st-century...
L04 Chinese 4489 The Three Emperors: Redefining Chinese Art in the Golden Age
Ruling imperial China during its last Golden Age, the Qing emperors Kangxi, Yongzheng and Qianlong patronized the arts during an unprecedented period of prosperity and international exchange. Many of the works they commissioned are now icons of Chinese culture, but in their time these three Manchus redefined Chinese art with ideas and styles from Baroque Europe, Tibet, Mongolia, and even Islamic Central Asia. This seminar focuses on the ethnically and culturally diverse art, architecture, and material culture patronized by these three emperors to examine how they and their multi-ethnic empire changed the definition of Chinese art during the long 18th century. Prerequisites: Intro to Asian Art (L01 111); or one 300-level course in Asian Art History, History, or Literature; or permission of instructor.

L04 Chinese 4510 Urban Culture in Modern China
The narrative of rural crisis and peasant revolution has dominated China's modern history for decades. But there has been a growing interest in China's urban past and present with the increased prominence of cities in China's breathtaking economic development and the opening of municipal archives in post-Mao era. The course aims to introduce students to "conventional wisdoms," new directions, and major debates in the urban history field. Topics include: the urban political economy, the cultural dynamics of modernity, the reconstruction of traditions in the making of modernity, the cultural production and consumption, colonialism and imperialism in the urban setting, nationalism, and reform and revolution. Acknowledging and understanding the nuance and difference in views and interpretations in historical writings (historiography) are essential. The course seeks to develop students' research and analytical skills, such as locating secondary sources, incorporating scholarly interpretations, and developing and sustaining a thesis based on secondary and primary sources in student research. Prerequisites: This is an interdisciplinary seminar designed for advanced undergraduates and graduate students. Advanced undergraduate students must have taken at least one China-related course at the 300-level or higher.
Same as L03 East Asia 4510
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L04 Chinese 460 Fifth-Level Modern Chinese I
This course is designed for advanced students wishing to improve their skills in conversation, reading and writing of letters, essays, reports, and other types of compositions in Chinese. The reading material is composed of a variety of authentic texts, including newspapers, short stories and essays. This course is conducted entirely in Chinese. Required of all students desiring subsequent tutorial assistance from the department. Prerequisite: grade of B- or better in Chinese 428 or 411, by result of the placement examination, or by instructor's permission.
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 461 Fifth-Level Modern Chinese II
This course is designed for advanced students wishing to improve their skills in conversation, reading and writing of letters, essays, reports, and other types of compositions in Chinese. The reading material is composed of a variety of authentic texts, including newspapers, short stories and essays. This course is conducted entirely in Chinese. Prerequisite: grade of B- or better in Chinese 428 or 411, by result of the placement examination, or by instructor's permission.
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 4631 Business Chinese I
In the present globalization, China has been fertile ground for foreign joint business ventures, and this course focusing specifically on business Chinese attests to that fact. This course aims at teaching Chinese business communication using a series of case studies to involve and challenge the students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts, from resolving contract disputes, to developing a business strategy, to establishing a franchise overseas. The course is designed to simulate real business environments where students interact with Chinese businesspeople in business settings and are motivated to achieve business goals. Prerequisite: grade of B- or better in Chinese 428 or instructor's permission.
Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L04 Chinese 4632 Business Chinese II
Continuation of Business Chinese 4631. This course uses a series of case studies to involve and challenge students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts.
Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L04 Chinese 467 The Chinese Theater
Survey of the performance and literary traditions of the Chinese theater from their pre-Tang origins to the present day. The course focuses on three forms: 14th-century zaju plays, 16th- and 17th-century chuanqi plays, and recent films from China, Taiwan and Hong Kong. Background in either China studies or theater in other cultures recommended.
Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

L04 Chinese 4701 Advanced Chinese Readings: Early Modern Vernacular Chinese Short Stories
This hybrid Chinese language-literature course is designed to meet the needs of students who have taken at least five years of Chinese language courses (including classical Chinese) and are interested in exploring Chinese language and culture in more depth by studying early modern Chinese vernacular short stories. The stories are selected from the Three Words (Sanyan), the renown three story collections by Feng Menglong, one of the most accomplished authors of vernacular fiction in the 17th-century China. The vernacular language in these stories is grammatically similar to modern Chinese, but is
charged with the vocabulary of the time and interspersed with classical Chinese verses and expressions. Studying these stories will allow students to appreciate modern grammar while discerning the development of vernacular Chinese over the centuries. Prerequisite: Five years of modern Chinese language and at least one semester of classical Chinese are required; background in Chinese literature and civilization are welcome. Credit 3 units.

L04 Chinese 4711 Topics in Religious Studies: Gender and Religion in China
In this course, we explore the images, roles and experience of women in Chinese religions: Confucianism, Daoism, Buddhism, and so-called “popular” religion. Topics discussed include: gender concepts, norms and roles in each religious tradition; notions of femininity and attitudes toward the female body; biographies of women in Confucian, Daoist, and Buddhist literature; female goddesses and deities; and the place of the Buddhist and Daoist nun and laywoman in Chinese society. All readings are in English or in English translation. Prerequisite: senior/graduate standing. Students with no previous background in Chinese religion, literature or culture need to obtain instructor’s permission before enrolling. Same as L23 Re St 4711 Credit 3 units. A&S IQ: HUM, LCD

L04 Chinese 476 Reading Seminar in Chinese Traditional Fiction
Extensive readings in major critical works in Chinese and English concerning fiction of imperial China, with emphasis on vernacular fiction of the Ming and Qing periods. Weekly discussions and short reading reports. Knowledge of Chinese language and literature normally required, but arrangements can be made for graduate students in such programs as East Asian Studies and Comparative Literature. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L04 Chinese 479 Reading Seminar in Modern Chinese Literature: Envisioning a New China: The May Fourth Era (1919-1949)
A seminar on modern Chinese literature with varying topics. Prerequisite: instructor’s permission. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L04 Chinese 480 Reading Seminar in Chinese Popular Literature and Culture
A seminar on Chinese popular literature and culture with varying topics. Prerequisite: instructor’s permission. Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L04 Chinese 486 Independent Work for Senior Honors
This course is taken in the fall semester. Prerequisites: senior standing, eligibility for honors and permission of the department. Credit 3 units.

L04 Chinese 487 Independent Work for Senior Honors
This course is taken in the spring semester. Prerequisites: senior standing, eligibility for honors, and permission of the department. Credit 3 units.

L04 Chinese 489 Topics in Modern Chinese Literature
A topics course on modern Chinese literature; topics vary by semester. Prerequisite: permission of instructor. Credit 3 units. A&S IQ: HUM, LCD Art: HUM

L04 Chinese 4891 Topics in Chinese Lit & Culture: Commentary, Philology, & Theories of Reading in East Asian History
A topics course on Chinese literature and culture; topics vary by semester. Prerequisite: instructor’s permission. Credit 3 units. A&S IQ: LCD, SSC Art: HUM EN: S

L04 Chinese 498 Guided Readings in Chinese
Prerequisites: graduate standing and permission of the instructor and the graduate adviser. Course normally taken after successful completion of Chinese 428. May be repeated once for credit. Credit variable, maximum 3 units.

Classics
Classics is the study of all aspects of the cultures of the ancient Greeks and Romans, including their history, languages, literature, thought and material culture as well as their reception in later cultures. The Department of Classics offers two options for students interested in studying Greek and Roman antiquity: the Classics major and the Ancient Studies major. The major in Classics focuses on the study of the Latin and/or ancient Greek languages. The major in Ancient Studies is for students who want to explore the whole spectrum of the classical world with little or no work in the ancient languages. Resources on campus that support the study of classics include a substantial library collection of materials related to the ancient world, collections of Greek papyri and art, and the Wulfing Coin Collection, which is one of the largest collections of ancient coins owned by an American university.

Contact: Amelia Goldsby
Phone: 314-935-5123
Email: classics@wustl.edu
Website: http://classics.wustl.edu

Faculty
Endowed Professor
Timothy Moore
John and Penelope Biggs Distinguished Professor of Classics
Director of Undergraduate Studies
PhD, University of North Carolina

Professor Moore's work concentrates on several areas of classical antiquity, including the comic theater of Greece and Rome, Greek and Roman music, and Roman historiography. Current projects include a database and book on music in Greek and Roman theater and articles on music and poetic rhythm in ancient Rome. He also has interests in the history of theater,
especially American musical theater and Japanese Kyogen comedy.

Professor and Chair
Catherine Keane
Department Chair
PhD, University of Pennsylvania

Professor Keane's interests range broadly over Greek and Roman literature and culture, but her research centers on the comic genres and their engagement with moral, social, and literary problems, particularly the Roman verse satirists Lucilius, Horace, Persius, and Juvenal and the epigrammatist Martial.

Associate Professors
William Bubelis
Curator of the Wulfing Coin Collection
PhD, University of Chicago

Professor Bubelis' research in Greek history focuses on the intersection of economy, religion and public institutions. His work utilizes the evidence of inscriptions (epigraphy), coins (numismatics) and other material remains alongside the literary texts of ancient historians, poets, orators and the like. While most of his scholarship has engaged with classical Athens, Bubelis avidly explores the societies of the eastern Mediterranean across antiquity, including Iron Age Cyprus and the Achaemenid Persian Empire to Hellenistic Egypt.

Zoe Stamatopoulou
Director of Graduate Studies
PhD, University of Virginia

Professor Stamatopoulou's research and teaching encompass several aspects of ancient Greek literature and culture, but her work focuses primarily on archaic and classical poetry (Homer, Hesiod, lyric poetry, drama). She is also interested in the symposium, in ancient biographies of poets, and in the reception of archaic Greece in Imperial Greek literature (especially Plutarch).

Assistant Professors
Nicola Aravecchia
PhD, University of Minnesota

Professor Aravecchia's research interests encompass the art and archaeology of Greco-Roman and Late Antique Egypt. He has taught courses in classical languages, ancient history, art and archaeology in the United States, Egypt and Australia. His current work focuses on the origins and development of Early Christian architecture in rural Egypt. Since 2005, he has been involved in archaeological projects in the Dakhla Oasis, located in the Western Desert of Upper Egypt.

Thomas Keeline
PhD, Harvard University

Professor Keeline works primarily on Latin literature, the history of classical scholarship and education from antiquity to the present, rhetoric, textual criticism, lexicography and metrics.

Luis Alejandro Salas
PhD, University of Texas

Professor Salas specializes in Greek and Roman medicine, philosophy and intellectual history. He is also interested in Aristotelian psychology. His research focuses on medical and philosophical sectarianism, especially in the work of Galen of Pergamum.

Lecturers
Joan Carr
PhD, Saint Louis University

Lance Jenott
PhD, Princeton University

Professor Jenott has taught courses on the New Testament, studies in Christian origins, and Coptic language and literature. His other interests include Second Temple Judaism, Greco-Roman philosophy, classical civilizations, and theories and methods in the study of religion. Dr. Jenott is the author of The Gospel of Judas: Coptic Text, Translation, and Historical Interpretation of the 'Betrayer's Gospel', and he is the co-author of The Monastic Origins of the Nag Hammadi Codices. He is currently working on a commentary on the Gospel of Judas for the Hermeneia Series by Fortress Press.

Grizelda McClelland
Assistant Dean, College of Arts & Sciences
PhD, Washington University

Rebecca Sears
PhD, University of Michigan

Rebecca Sears' research interests include ancient music, papyrology, Latin poetry (particularly Ovid's Metamorphoses) and ancient magic. She is currently working on a textbook for the University of Michigan Press that will discuss important technical and cultural features of both Greek and Roman music as well as the reception and reconstruction of ancient music. In addition to her love of classical languages and cultures, she is a violinist who has performed in benefit concerts throughout New England.

Kathryn Wilson
PhD, University of Pennsylvania

Professor Wilson's research interests focus on the intersection of poetry and science. She is especially interested in Hellenistic literature and the relationship between different intellectual enterprises occurring during that time. She is also interested in the evolution of the genre of didactic poetry.

Majors  

The Major in Classics  

Total units required: 24  

Required courses:  
A minimum of 24 credits, with at least 18 credits in advanced courses, are required. The specific program will be determined by the student and the adviser, according to the student's interests. Courses may be chosen from among Greek, Latin and Classics offerings, but all majors must include in their programs a minimum of 12 advanced credits in Greek or Latin, at least 6 of which must be at the 400 level. Classics 225D may not be counted. Those who are able to enter the program at the advanced level because of previous language study will normally take 15 or more advanced credits in language. Competence in both ancient languages, although strongly encouraged and necessary for those planning to go on to graduate study in Classics, is not required. Majors, especially those planning graduate work, should enter the Honors Program if time permits.  

Please consult the sections below regarding the required capstone experience (p. 316) and additional information (p. 316).  

The Major in Ancient Studies  

Total units required: 24  

Required courses:  
Students will take 24 units drawn from courses in the Department of Classics and related departments. Of these, 18 units must be at the advanced level, at least 6 of which must be at the 400 level. Greek 102D and Latin 102D or a first-year seminar may be substituted for a 200-level course in translation. In this major, students are encouraged to develop a certain depth in one special field of interest (e.g., literature, art, history, philosophy). Therefore, at least 9 of the 18 advanced units of the major should be taken in one such specific area. Classics 225D may not be counted.  

Please consult the sections below regarding the required capstone experience (p. 316) and additional information (p. 316).  

Required Capstone Experience  
All Classics and Ancient Studies majors are required to have a capstone experience of some kind in which they can pull together everything that they have learned in their Classics courses. Except in unusual cases (e.g., a junior year abroad experience), the capstone experience should occur during the students' senior year. Among the most common capstone experiences are the following:  

- A senior honors thesis (two semesters of research and writing concluding in a long paper)  
- A one-semester research project  
- A Classics study abroad experience  
- Special work within a 400-level seminar  

Students should consult with their adviser to see what kind of capstone experience will work best for them.  

Additional Information  

Study Abroad: Study abroad for a semester in Rome or Athens is an option many Classics and Ancient Studies majors select. Washington University is a member of the Intercollegiate Center for Classical Studies (ICCS) consortium. Majors and minors regularly attend the one-semester ICCS program in Rome. Many classics students also study for one semester through the College Year in Athens (CYA) program. Students interested in these programs should consult Professor Cathy Keane (https://classics.wustl.edu/people/catherine-keane). Some other study abroad programs will also allow students to earn major credit in Classics or Ancient Studies.  

Senior Honors: Students who are planning to pursue graduate work should enter the honors program, and other students are encouraged to consider this program as well. To apply, a student must have junior standing, an average of A- or better in courses numbered 300 or above in Greek and/or Latin (for Classics majors) or in Classics (for Ancient Studies majors), an overall grade-point average of 3.65 or above, and permission of the chair. A formal application should be submitted in April of the junior year. A thesis of substantial nature and length is prepared and written under the direction of a member of the department, beginning during the fall semester of the senior year. A final draft is submitted to the director no later than February 1, and a final copy is submitted to the full thesis committee before the March break. Credit of 6 units is awarded upon presentation of an acceptable thesis. These credits will be in addition to the 24 credits of the major; those students who complete senior honors will therefore graduate with a total of 30 credits in the major.  

Minors  

The Minor in Classics  

Units required: 15
Required courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Greek 317C &amp; Greek 318C</td>
<td>Introduction to Greek Literature and Introduction to Greek Literature</td>
<td>6</td>
</tr>
</tbody>
</table>

Elective courses:

Three other adviser-approved courses (9 units) in Greek, Latin or Classics are required. These must include at least one Greek or Latin course at the 300 or 400 level. No more than one course may be at the 200 level, and Classics 225D may not be counted. A first-year seminar may substitute for the 200-level course.

The Minor in Ancient Studies

Units required: 15

Required courses:

At least two courses must be chosen from the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Classics 341C</td>
<td>Ancient History: The Roman Republic</td>

<td>Greek History: The Dawn of Democracy</td>
<td>3</td>
</tr>
<tr>
<td>Classics 346C</td>
<td>Greek History: The Age of Alexander</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective courses:

Students need to complete three other courses in the culture of Greece and Rome; the selection must be mutually agreed upon by the department adviser and the student. No more than two courses may be at the 200 level. Classics 225D may not be counted. A first-year seminar may count for one of the two 200-level courses.

Courses

Classics

L08 Classics 1135 First-Year Seminar: The World of Cleopatra

Cleopatra, the last queen of ancient Egypt, captivated her contemporaries and has fascinated the Western world ever since her famous suicide by asp in 31 BCE. She was a woman of contrasts: Pharaoh of Egypt and Greco-Macedonian queen; seductive woman and shrewd political strategist; a ruthless monarch using every means available to consolidate her position in the face of the encroaching power of the Roman Empire. Through texts and material culture, the seminar seeks to understand Cleopatra in the context both of her native Egypt and of the wider Mediterranean world. We thus examine the traditions of Pharaonic Egypt; the historical events that brought Egypt under the control of the Macedonian Ptolemies (Cleopatra's dynasty); the wider stage of East-West tension and conquest in which Cleopatra struggled to maintain her power; her relationships (political and personal) with famous men of her day (Caesar, Herod, Mark Antony); her capital city of Alexandria, the largest metropolis of its day; Cleopatra's brilliant court and its luxury arts; and finally the many Cleopatras that have populated art and literature of later times. We emerge with a sense of Cleopatra, both as a unique individual and as a product of her time.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: IS EN: H

L08 Classics 1137 First-Year Seminar: Wining and Dining in the Classical World

The focus of this course is food culture in Greek and Roman societies from the Archaic to the late Roman period. However, foodways from adjacent contemporary cultures also are briefly examined. Sources include textual evidence, as well as ethnographic studies of ancient people, iconographic and archaeological evidence, specifically osteological and botanical remains from archaeological sites. Experimental studies are conducted in class to augment the learning experience of students.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD EN: H

L08 Classics 114 First-Year Seminar: Eros through the Ages: Love and Lust in the Greco-Roman World

From a cosmic god of love to a complex emotion, eros is a seminal concept shaping a range of mythological, literary and artistic works of antiquity. Sappho described eros as “sweet-bitter,” neatly capturing its paradoxical position at the intersection of pleasure and pain, love and hate. In this seminar, we unpack the varied ways eros played out across poetry, philosophy, politics and art in the ancient Greek and Roman world and how these ancient definitions of love still inform our own modern understanding of the term.

L08 Classics 115 First-Year Seminar: Engaging the Classical Past in Modern Fiction

This course will explore the persistent — but often camouflaged — influence of classical antiquity on modern genre (popular) fiction. Students will read and discuss both texts from antiquity (e.g., Ovid’s “Metamorphoses,” Lucian’s “A True History”) and selections from the works of major 20th-century authors drawn from the canon of a specific genre. Although popular fiction embraces a wide range of authors and styles, genres that are particularly engaged with the classical past include science fiction (e.g., Jules Verne, Suzanne Collins), fantasy (e.g., J.R.R. Tolkien, Rick Riordan), horror (e.g., H.P. Lovecraft, Stephen King), mystery (e.g., Elizabeth Peters, Steven Saylor), and adventure (e.g., Clive Cussler, David Gibbins). Discussion of these texts will include theorization about the nature of the genre and its origins as well as specific examples of allusions and intertexts to ancient Greek and Roman authors, focusing on the characters, artifacts, monsters, themes, legends, and plot devices drawn from Greco-Roman mythology or modern mythology about Classical antiquity. Course is for first-year, non-transfer students only.
L08 Classics 116 First-Year Seminar: Magicians and Witches in Greco-Roman Literature
This course examines the representation of “magicians” and “witches” in ancient Greek and Roman literature. The starting point is Apuleius’ *Metamorphoses* (or *The Golden Ass* as St. Augustine dubbed it), written in the second century CE. This work of narrative prose collects several tales of witches, magical transformations and religious revelation. From there, we examine other tales of magicians and witches, paying particular attention to the role of gender in these representations and the conflict between magic and religion. The goal is to understand how these representations function within their particular society, what anxieties they reveal, and how they relate to the archaeological evidence we have for these practices.
Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L08 Classics 1165 First-Year Seminar: Pompeii: Uncovering the Past
This course examines the Roman city of Pompeii from archaeological, art historical and literary perspectives. Topics include the city’s public spaces and religious sanctuaries, its grand mansions and common houses, its political systems and leisure activities. Class discussions probe the problems inherent in the interpretation of a city captured in a moment of crisis, and how ancient literary tropes have affected our understanding of the archaeological remains. Students also investigate modern interpretations of the site in the form of novels, exhibitions and documentaries. Freshmen and sophomores only. No prerequisites.

Credit 3 units. A&S: FYS A&S IQ: HUM; LCD Art: AH BU: HUM, IS EN: H

L08 Classics 137 First-Year Seminar: The Emperor Nero: Prince, Monster, Artist
The destructive, scandal-ridden career of the Roman emperor Nero (mid-first century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the “Bad Emperors,” and seen as a symbol of the decline of Rome itself — especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the *Life of Nero* by Suetonius (second century CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills.
Credit 3 units. A&S: FYS A&S IQ: HUM; LCD Art: HUM BU: HUM EN: H

In ancient Athens, citizens had the power to prosecute others for wrongs committed not only against themselves but also against society as a whole. All citizens defended themselves without the aid of lawyers and judges. This system depended upon an intensely democratic structure of jury courts and laws and upon the development of rhetoric as an artful speech by which to persuade fellow citizens to find one way or the other. Nearly 100 speeches survive from the Athenian courts, and they provide a remarkable window into Athenian society, politics, and law. In addition to reading translations of many of these speeches, we will examine the physical setting of Athenian courts and explore the manner in which this legal system was integral to Athens’ democracy.
Credit 3 units. A&S: FYS A&S IQ: HUM; LCD Art: HUM BU: HUM EN: H

L08 Classics 180 First-Year Seminar: Sexuality in Early Christianity
This course is for freshmen only. The topic varies from semester to semester. Recent topics include Miracles; Sexuality in Early Christianity; and *The Self in Chinese Thought.*
Same as L23 Re St 180
Credit 3 units. A&S: FYS A&S IQ: HUM; LCD Art: HUM BU: ETH EN: H

L08 Classics 2011 Classical to Renaissance Literature: Text and Tradition
Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer’s *Iliad* is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Virgil, Ovid, Petrarch, and Shakespeare.
Same as L93 IPH 201C
Credit 3 units. A&S: AMP A&S IQ: HUM; LCD Art: HUM BU: HUM EN: H

L08 Classics 225D Latin and Greek in Current English
An astonishingly large number of English words, especially in areas such as medicine, science and law, are derived from Latin and Greek. This course will provide a study of the impact of Latin and Greek on the English language through study of the Latin and Greek roots, prefixes and suffixes that are most commonly found in English technical and nontechnical vocabulary and the linguistic principles through which these elements have entered the English language.
Credit 3 units. A&S IQ: HUM; LCD Art: HUM BU: HUM EN: H

L08 Classics 228 Theater Culture Studies I: Antiquity to Medieval
A survey of ancient, medieval and Renaissance theater and performance, both in the west and in the east, both as it reflects and shapes culture. Coverage will include the following areas: ancient Greece, ancient Rome, classical Sanskrit theater, Yuan China, medieval Japan, medieval Europe, Renaissance...
Italy, and Renaissance England. Both scripted theater and performance practices will be examined through the lenses of dramatic literature, theater history, performance studies, and dramatic theory. A continual emphasis will be on marginal and underrepresented figures, as we will attempt to excavate forgotten histories from the theatrical past.

Same as L15 Drama 228C
Credit 3 units. A&S: AMP A&S IQ: HUM BU: HUM EN: H

L08 Classics 232E Myths and Monuments of Antiquity
An introduction to the ancient world (circa 3500 B.C. to A.D. 400) based on masterpieces of art and architecture from Mesopotamia, Egypt, Greece, and the Roman Empire. The monuments are accompanied by a selection of myths and documents representing the cultural life of these ancient societies and constituting their legacy to our modern world.

Same as L01 Art-Arch 232
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, HUM BU: HUM EN: H

L08 Classics 234 The Greek World
This course offers an introduction to the society and culture of ancient Greece, the civilization that created Homer, Socrates, and Herodotus, among many others. Using a wide variety of literary, documentary, and material sources, we will focus on one central question: what does it mean to be Greek in antiquity? We will explore how the negotiation of 'Greekness' affects cultural values, how it influences the geopolitics of the ancient Mediterranean, how women, slaves, and immigrants fit (or do not fit) into this Greekness, how ancient Greek democracy arises, and how it dies.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, HUM BU: HUM EN: H

L08 Classics 235C The Greek Imagination
An introduction to Greek culture with emphasis on Archaic and Classical ideas about man, the gods and the cosmos. Considerable attention also is given to the Athenian democracy, its institutions, festivals and arts. The course is designed to offer a broad and interdisciplinary view of the most memorable Greek achievements in literature, the visual arts, and social thought and practice.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L08 Classics 236C The Roman World
An introduction to the society and culture of the ancient Roman Republic and Empire. The "Roman World" began as a small settlement by the Tiber River and became a huge and diverse empire extending into three continents, with a cultural legacy that has lasted to this day. The course will cover key events in 400 years of Roman political history, but much of our time will be given to study and analysis of Roman concepts of national identity, moral and political thought, social hierarchies and dynamics, family, religion and entertainment. To this end, we will examine a diverse combination of primary sources — literary, documentary and material.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L08 Classics 240 Not Members of This Club: Women and Slaves in the Greco-Roman World
Both the Athenian Democracy and the Roman Senatorial Oligarchy were societies in which political power was the exclusive property of free, citizen males. With very few exceptions, the astounding accomplishments of those societies were also the creations of free, citizen males. This course examines the lives of two disparate but comparable groups of outsiders within Greek and Roman society. The status, rights and accomplishments of Athenian and Roman women are explored and placed in the context of other premodern societies. Likewise, the institution of slavery in Greece and Rome is explored and compared with other slave-holding societies, ancient and modern.

Credit 3 units. A&S IQ: LCD, SSC, SD Art: SSC BU: BA EN: S

L08 Classics 251 Projecting the Past: Ancient Greece and Rome in Modern Film
Since the earliest days of film, screenwriters and directors have mined the rich history of Ancient Greece and Rome to captivate audiences with tales of heroes and slaves, soldiers and lovers. This course will examine such cinematic representations across a variety of American and European films from the 20th and 21st century. Drawing upon translated selections from ancient Greek and Roman authors, secondary readings and weekly screenings, students will reflect upon the ways in which film adaptations of antiquity both tell us much about Ancient Greece and Rome and reveal as much about our present as they do the past.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L08 Classics 300 Independent Study
Credit variable, maximum 3 units.

L08 Classics 3003 Writing Intensive in Ancient Studies: Golden Ages, Nostalgia, and the Idealized Past
Study of selected topics in Classics. This is a writing-intensive course.
Credit 3 units. A&S IQ: HUM, LCD, WI EN: H

L08 Classics 301C Greek Mythology
The myths of ancient Greece are not only inherently interesting, but they are an incomparable starting point for the study of the ancient world, and they have offered numerous images and paradigms to poets, artists and theorists. This course provides an introduction to the major Greek myths, their role in literature and art, their historical and social background, and ancient and modern approaches to their interpretation. Student work will include discussing course material in sections and online, taking two exams covering both the myths themselves and the ancient authors who represent our richest sources, and writing several essays interpreting or comparing ancient literary treatments.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L08 Classics 3152 Sex and Gender in Greco-Roman Antiquity
Ideas about sex and gender have not remained stable over time. The ancient Greeks and Romans had their own ideas — ideas that strike us today as both deeply alien and strikingly familiar. This course will consider questions such as: What constituted "normal" sex for the Greeks and for the Romans? What sex acts did they consider to be problematic or illicit, and why? What traits
did the Greeks and Romans associate with masculinity? With femininity? How did society treat those who did not quite fit into those categories? How did peoples of the ancient world respond to same-sex and other-sex relationships, and was there an ancient concept of “sexuality”? How did issues of class, ethnicity and age interact with and shape these concepts? How does an understanding of these issues change the way we think about sex and gender today? We will read an array of ancient texts in translation, consider various theoretical viewpoints, and move toward an understanding of what sex and gender meant in the ancient world.

Credit 3 units. A&S IQ: HUM, SC, SD BU: BA EN: H

L08 Classics 3231 Jews and Christians in the Premodern World
In modern times, it is common to think of Judaism and Christianity as two distinct, if historically connected, “religions.” Increasingly, however, historians of ancient religions have thought more deeply about the implications of taking Christianity and Judaism in antiquity as more fluid and porous than we tend to think of them. In this upper-division course, we will explore the ways in which the boundaries that early Christians attempted to draw between Christianity and Judaism remained unstable and incomplete. While the various efforts to establish early Christian identity led to the production of a variety of hermeneutical representations of the Judaic, these literary representations nevertheless often reflected, to various degrees, engagement with actual historical Jews/Judeans, who shared political, economic, and intellectual worlds with Christians. We will consider how early Christian discourse about Jews and Judaism informed and was informed by intra-Christian disputes and their relationships with the wider Greco-Roman culture. We will explore how Christian efforts to establish both continuity and difference between Judaism played a role in the construction of “orthodoxy” and “heresy,” as well as the way in which Christians re-appropriated Jewish texts, rituals and ideas in their efforts to construct a Christian identity. We will also explore how this continued dynamic of difference and continuity continued into the Middle Ages. Same as L23 Re St 323
Credit 3 units. A&S IQ: HUM, LCD BU: ETH EN: H

L08 Classics 3330 Greek and Roman Painting
This course provides a survey of the major achievements of ancient Greek and Roman painting, broadly understood and encompassing wall painting, panel painting, painted pottery, and mosaic. We will study monuments ranging over a millennium in time and located throughout the ancient Mediterranean. Particular attention will be paid to the social, political, and religious aspects of ancient Greco-Roman painting, and to questions of innovation in artistic practice. Special emphasis will be placed on students’ cultivation of the tools of art-historical analysis, and of the presentation of that analysis in written form. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215) or permission of instructor. Same as L01 Art-Arch 3330
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L08 Classics 3334 Roman Art and Archaeology
The art and archaeology of the Romans, with emphasis on the late Republic and the Imperial period. Major monuments of sculpture and architecture, as well as town planning, domestic architecture, and the minor arts are used as evidence for reconstructing ancient life.
Same as L01 Art-Arch 334
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L08 Classics 341C Ancient History: The Roman Republic
Rome from its legendary foundation until the assassination of Julius Caesar. Topics include: the establishment, development and collapse of Rome’s Republican government; imperial expansion; Roman culture in a Mediterranean context; and the dramatic political and military events associated with figures like the Carthaginian general Hannibal, the Thracian rebel Spartacus, and the Roman statesman Cicero.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L08 Classics 342C Ancient History: The Roman Empire
An introduction to the political, military, and social history of Rome from the first emperor Augustus to the time of Constantine. Topics include: Rome’s place as the center of a vast and diverse empire; religious movements, such as Jewish revolts and the rise of Christianity; and the stability of the state in the face of economic crises, military coups, and scandals and intrigues among Rome’s imperial elite.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L08 Classics 345C Greek History: The Dawn of Democracy
From the so-called Dark Ages to the death of Socrates, a survey of the political, social, economic and military development of early Greece, with emphasis upon citizenship and political structure, religion and culture, and the complex relationships between Greeks and neighboring peoples.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L08 Classics 346C Greek History: The Age of Alexander
From the death of Socrates until the foundation of the Roman Empire, Greece and the Ancient Near East underwent profound changes that still resonate today. This course surveys the political, social, economic and military developments of this period, especially Alexander the Great’s legacy.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L08 Classics 347C Ancient Philosophy
An examination of the high-water marks of philosophy in ancient Greece and Rome, focusing primarily on Plato and Aristotle. A wide range of philosophical problems are discussed, including the nature of the good life, the justification of knowledge, and the ultimate nature of mind and world. Attention is paid to how these problems unfolded in their historical context and to how the ancient treatments of them compare to contemporary efforts. Prerequisites: one course in Philosophy at the 100 or 200 level, or permission of the instructor.
Same as L30 Phil 347C
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: ETH EN: H

L08 Classics 350 Greek Art and Archaeology
A survey of the artistic achievements and material culture of the Greeks in the first millennium BCE (Iron Age through the Hellenistic period). Development of architecture, sculpture and painting, as well as minor arts and utilitarian objects, with
emphasized the insights they offer into Greek society and interactions with the wider Mediterranean world.

L08 Classics 3563 Ancient Sport and Spectacle
Ancient sport and spectacle seem both familiar and foreign to us today. We share the Greek obsession with athletic success, and we have revived their Olympic games — and yet the Greeks competed nude and covered in oil and included in their celebration a sacrifice of 100 oxen to Zeus. So too do we recognize the familiar form of the Roman arena, but recoil from the bloody spectacles that it housed. In this class we will examine the world of ancient Greco-Roman sport and spectacle, seeking to better understand both ancient culture and our own. We will consider Greek athletic competition, Roman gladiatorial combat, chariot racing, and other public performances. We will set these competitions in their social and historical context, considering both their evolution and their remarkable staying power.
Credit 3 units. A&S IQ: HUM: LCD Arch: HUM: HUM BU: HUM EN: H

L08 Classics 3582 Ancient Rome in Film and Fiction
Examines a group of novels starting with The Last Days of Pompeii (1834) and a group of films beginning with The Sign of the Cross (1936) to see how writers and filmmakers have conjured up an image of Roman excess and exoticism in line with their own artistic and cultural viewpoints. We read both popular successes such as Ben-Hur and "high art" such as Marius the Epicurean and see such commercial successes as The Robe and art house films such as Fellini's Satyricon.
Credit 3 units. Art: HUM BU: HUM

L08 Classics 3676 Rhetoric: Ancient and Modern
Rhetoric, or the art of persuasion, has played a prominent and controversial role in political and educational theory and practice. We survey rhetorical texts, ranging from Plato and Aristotle through Augustine and Edmund Burke, to Kenneth Burke and Jürgen Habermas.
Credit 3 units. A&S IQ: HUM EN: H

L08 Classics 371 The Ancient Family
Examination of the roles of the family in the ancient world through readings and discussions of primary sources (literature, legal texts, inscriptions, art) and recent scholarship. Topics include: demography; relationship between family and state; economic, social and religious roles of the family; roles of women, men, children and slaves; death and inheritance; marriage; children; family relationships; household space; comparisons with the modern family.
Credit 3 units. A&S IQ: HUM, SD, WI BU: BA EN: H

L08 Classics 375 Topics in Classics
Study of one or more themes recurring in the traditions of Greek, Roman and European literature.
Credit 3 units. Art: HUM BU: HUM

L08 Classics 3751 Topics in Classics: Pastoral Literature
This course examines the idea of connectivity in the arts. Via novels, paintings, photography, and film, we will explore questions of interpretation related to the themes of love and betrayal; bequests and legacy; and innocence and responsibility. A series of paintings by Vermeer and other Dutch masters depicting elegant women (and their dogs) in the company of their suitors will engage us in elaborate courtship rituals played out using letters, music, and wine. We will also consider how, during the reigns of Francis I and Louis XIV, the French monarchy integrated Dutch art into its collections in order to assert the king's influence and authority. Students will discuss portraits that emerge from complex tableaux in Laclos's masterful novel of seduction, "Les Liaisons Dangereuses"; in 19th-century paintings; and in contemporary photographs. The class will read Doeer's "All the Light We Cannot See" and de Waal's "Hare With the Amber Eyes," which are stories that link history with art, the past with the present, and gifts with thefts and bereavements. We will study Daoud's "Meursault Investigation" in relation to the work that inspired it: Camus's "Outsider [L'Etranger]."
Adaptation will likewise inform our readings of Austen's "Sense and Sensibility," Barnes's "Sense of an Ending," and the pair of films based on these novels. The class will assess aspects of the original story that are lost on screen as well as the added resonances that the novels acquire in the film versions.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L08 Classics 3801 Ancient Greek and Roman Medicine
This course introduces students to the practice and theory of medicine in the ancient Mediterranean, beginning in Egypt and continuing through Greece and Rome. It ends in the Middle Ages. Greco-Roman medicine will be our focus. How was disease understood by practitioners and, as far as can be reconstructed, by laypeople? What did surgery, medicinal, pharmacological, and dietetic treatment take? What were the intellectual origins of Greek medicine? The social status of medical practitioners? How was medicine written and in what terms did its practitioners conceive it?
Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM BU: HUM EN: H

L08 Classics 3821 Topics in Christian Thought
The topic covered in this course varies. The topic for Fall 2018 is The Apostle Paul: Communities and Controversies. The Fall 2017 topics was Orthodoxy and Heresy in Early Christianity. Same as L23 Re St 382
Credit 3 units. A&S IQ: HUM BU: ETH EN: H

L08 Classics 3831 Magicians, Healers, and Holy Men
Magic is perhaps not one of the first words one associates with Greco-Roman antiquity. Yet for most individuals living in the ancient Mediterranean, including philosophers, businessmen and politicians, magic was a part of everyday life. Casting spells, fashioning voodoo dolls, wearing amulets, ingesting potions, and reading the stars are just some of the activities performed by individuals at every level of society. This course examines Greco-Roman, early Christian and Judaic "magical" practices. Students read spell-books which teach how to read the stars, make people fall in love, bring harm to enemies, lock up success in business, and win fame and the respect of peers. Students also look at what is said, both in antiquity and in contemporary scholarship, about magic and the people who practiced it, which helps illuminate the fascinating relationship between magic, medicine and religion.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H
L08 Classics 385W Comedy, Ancient and Modern

In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy.

Credit 3 units. A&S IQ: HUM, LCD, WI BU: HUM EN: H

L08 Classics 386 Old Jokes: Laughter in the Greco-Roman World

An exploration of the theory and practice of comedy in the Greco-Roman world. Readings include examples of iambic (mocking) poetry, comic theater, satiric verse and prose fiction, as well as philosophical discussions of the relationship of humor and laughter to human behavior and values. As comedy in all contexts engages and shapes cultural values just as much as “serious” literature does, its history and reception raise major social and aesthetic issues. Critical topics include: how ancient thinkers imagined comedy's historical “birth,” how public comic performances may have encouraged either social cohesion or disruption, how communities defined “beneficial” and “offensive” humor, and how ancient elite writers and readers felt about the often lowbrow and obscene content of “classic” comic literature. Combination of lectures and discussions.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

L08 Classics 389C The Ancient Novel

Many modern readers are familiar with the mythological and dramatic literature of Greco-Roman antiquity, but fewer are aware that the same cultures developed a tradition of prose fiction concerned with romance, human psychology and sexuality, exotic travel and adventure, and religious experience. The European tradition of extended fictional narrative begins with the Greeks, and their novels, along with Apuleius’ Golden Ass and Petronius’ Satyricon, had a formative influence on later narrative traditions. Students read and analyze all the surviving examples of the Greco-Roman novel, including some fragmentary works, with the goal of throwing light on the history and conventions of the genre, its appeal and its influence.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM

L08 Classics 392E Greek and Roman Drama

Survey of the tragic and comic dramas produced in Ancient Greece and Rome. Study of the plays' religious and civic performance contexts, responses of the ancient audiences, and literary interpretations.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

L08 Classics 393 The Tragic Muse

Intensive study of the major tragic playwrights of Ancient Greece (Aeschylus, Sophocles and Euripides) and some of their imitators and critics in the western tradition. We consider tragedy's origins, its literary elements and theory, its performance and religious contexts, and its social functions. Lectures with discussions.

L08 Classics 4001 Independent Study

Credit 3 units.

L08 Classics 426 Ancient Athens

Athens was one of the great cities of antiquity. From lavishly decorated marble temples on the Acropolis, to public office buildings and inscriptions in the Agora (civic center), to the houses of the living and the monuments for the dead, the city has left a rich record of her material culture. These buildings and objects, together with an exceptionally large number of literary and historical texts, make it possible to paint a vivid picture of the ancient city. The course concentrates on the physical setting and monuments of Athens, as revealed by both archaeology and texts, and how they functioned within the context of Athenian civic and religious life. Prerequisite: Classics 345C, Classics 350 or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM

L08 Classics 428 The Invention of the Image: From Classical Art History to Modern Visual Studies

The scholarly field of Image or Visual Studies has developed in response to the widespread proliferation of images, both still and moving, in contemporary life. It distinguishes itself from traditional art history by examining visual representations of all types, not only works of high art, and by concentrating on the role those representations play in the formation of culture. Though most of the scholarship produced in this field focuses on the modern world, it depends upon ideas first developed in Mediterranean antiquity. This course has two primary goals. We conduct an historical examination of practices and theories of image making from Near Eastern antiquity to modernity. In so doing, we also carry out an historiographical survey of the major works in Image/Visual Studies, thereby generating an appreciation for the wide range of methods of inquiry employed in this important field of research. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215); one 300-level course in Art History preferred; or permission of instructor.

Same as L01 Art-Arch 428

L08 Classics 429 Art and Death in Ancient Rome

Perhaps more than any other phenomenon, death spurred the creation of art in the ancient Roman world. The practice of materially commemorating the deceased, of perpetuating the memory of the dead through the creation of funerary monuments designed to appeal to both intimate familial relations and the public at large, stretched across Roman social boundaries and endured for many centuries. But death also frequently provided the subject matter of art even outside the confines of the funerary realm. The goal of this course will be to explore the complex relationship between art and death in the Roman world. It will range from early Rome to the end of the empire and the changes brought about by widespread conversion to Christianity. In conjunction with historical readings, the course will also engage with theoretical texts in the anthropology and philosophy of death. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Same as L01 Art-Arch 429

Credit 3 units. A&S IQ: HUM EN: H
L08 Classics 4350 Hellenistic Philosophy
The Hellenistic Age, traditionally dated from the death of Alexander and his (Macedonian) Empire at 323 BCE to the birth of Augustus’ (Roman) Empire in 31 BCE, gave the West three of its most innovative and influential schools of philosophy: Epicureanism, Skepticism, and Stoicism. This course investigates the central features of their thought. Special attention is paid to the still-relevant debates between the Stoics and Skeptics about the possibility of knowledge, to the disagreements among all three schools about the issues of freedom, responsibility, and determinism, and to their ethical theories. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.
Same as L30 Phil 4530
Credit 3 units. A&S IQ: HUM, LCD Art: HUM

L08 Classics 4361 Topics in Ancient Studies
Study of one or more themes recurring in the traditions of Greek and Roman literature, history, and culture. Topic varies each semester.
Credit 3 units. A&S IQ: HUM, EN: H

L08 Classics 4375 Ancient Greek Sculpture in Context
Sculpture counts among one of the greatest artistic achievements of ancient Greece, and one that has had the greatest impact on the art of later periods. This course focuses on original works of art of the Archaic and Classical periods (600–300 BCE), placing emphasis on how study of their contexts — the places in which they were produced, displayed and found — contributes to our understanding of their place in the ancient world. Background material, which is covered at the beginning of the semester, includes the origins of monumental Greek sculpture at the beginning of the Archaic period (late 7th to early 6th century BCE), and the stylistic development of the Archaic and Classical periods. We then proceed to discussion of various types of sculpture (architectural, cult statue, votive, commemorative, funerary) and how these works functioned within the context of the Panhellenic sanctuary, the city sanctuary, the secular center of the city, and the necropolis. In a different view of context, we also consider sculpture recovered from ancient shipwrecks, looted art on its way to the ancient Roman art market. Prerequisite: Art-Arch 331 or permission of the instructor.
Same as L01 Art-Arch 4375
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L08 Classics 4376 Pictorial Illusion in the Ancient Mediterranean
Among the many accomplishments in the history of Greco-Roman art, ancient writers especially valued the development of pictorial illusion. Pictorial illusion refers to the techniques of reproducing or approximating aspects of the visual perception of the material world on a two-dimensional surface. These include foreshortening, the application of highlights, and the indication of multiple points of depth in space relative to the picture plane. The purpose of the course is to explore the material, stylistic and technical history of illusionistic painting practices in the ancient Mediterranean world from Classical Greece to Late Antique Rome and to seek to understand the cultural and social significance of those practices. In addition to examining specific historical questions in the development of ancient painting, the course investigates trans-historical connections between vision, visuality and methods of representation. Prerequisites: one of L01 Art-Arch 112, L01 Art-Arch 113, L01 Art-Arch 211, or L01 Art-Arch 215; one 300-level course in Art History preferred; or permission of instructor.
Same as L01 Art-Arch 4376
Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L08 Classics 442 The Later Roman Empire: From Constantine to Justinian
Covers the period from ca. 300 through the reign of Justinian. Focus on legal developments and codification of law, social changes, rise of Christianity and fall of the Roman Empire in the west. Prerequisite: Classics 342C or permission of instructor.
Credit 3 units. A&S IQ: HUM EN: H

L08 Classics 443 The Age of Nero: Writing, Performance and Politics at the End of a Dynasty
This course examines the reign of Nero (54–68 CE) as a distinct and remarkable period of literary and artistic production in ancient Rome and its empire. We study the career of the emperor himself, learning about imperial politics and policies during his reign, his own artistic career (his "fiddling while Rome burned," literary endeavors and notorious stage tour), and the violent end of his rule and dynasty. We examine the literature, philosophy, satire and other writings of the period, both those that take the emperor himself as their subject and those that treat other aspects of history, myth and culture from a "Neronian" perspective. We also examine art (both public and private), public entertainment (the amphitheater, the circus and the stage), and other cultural achievements and issues associated with the last Julio-Claudian emperor.
Credit 3 units. EN: H

L08 Classics 450 Topoi in Classics
The topic for this seminar differs every year. Previous topics have included Pilgrimage and Sacred Space in Antiquity, Religion in a Global Context, and Engendering Religion. The seminar is offered every spring semester and is required of all religious studies majors, with the exception of those writing an Honors thesis. The class is also open, with the permission of the instructor, to other advanced undergraduates with previous course work in Religious Studies.
Credit 3 units. EN: H

L08 Classics 450W Topics in Classics
Classics courses at the 400 level with enhanced requirements in writing may be taken under this designation as writing-intensive courses. Required; permission of instructor.
Credit 3 units. A&S IQ: HUM, WI: H

L08 Classics 451 Plato
An examination of some of Plato's most important dialogues, typically including the Gorgias, Phaedo, and Republic, with the aim of grasping the development of Plato's most influential thoughts in ethics and in metaphysics and epistemology. In order to provide both historical understanding and philosophical evaluation, attention is paid to the context and structure of the dialogues and to the best of recent secondary literature. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.
Same as L30 Phil 451
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
**L08 Classics 452 Aristotle**
This course offers a maximally full and detailed introduction to the works of Aristotle. His logic, natural philosophy, psychology, metaphysics, ethics, and political philosophy are discussed, and stress is laid on the interpretive problems facing contemporary philosophers seeking to understand Aristotle's achievement.
Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.
Same as L30 Phil 452.
Credit 3 units. A&S IQ: HUM, LCD  EN: H

**L08 Classics 453 The Greek Symposium**
This course explores the history, archaeology, material culture, and sociology of the symposion in ancient Greece. While we will focus mainly on the archaic and classical Greek symposium, we will also examine its reception in the Roman world. In this context, we will study art and literature produced for the symposium, as well as representations of the symposion in literature, especially in lyric poetry, drama, and philosophical prose.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

**L08 Classics 462 Ancient Greek and Roman Music**
Music played a vital role in Ancient Greece and Rome. New resources and perspectives now allow us to appreciate the ancients' music better than ever before. This course addresses the nature of ancient music (instruments, melody and rhythm, modes), ancient attitudes toward music, and its contribution to public and private life. The focus throughout is on our ancient sources, both literary and archaeological.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

**L08 Classics 4647 Ancient Madness**
In this course we will ask what madness meant in Greek and Roman culture. We will find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating and categorizing people treated as mad. While we will concentrate on literary (particularly tragic and epic), philosophical and medical texts, we will also look at visual representations and evidence from ritual and cult. An important part of our project will involve tracing the afterlife of classical ideas: The history of melancholia will ground this context, we will study art and literature produced for the symposium, as well as representations of the symposion in literature, especially in lyric poetry, drama, and philosophical prose.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

**L08 Classics 464 Topics in the History of Philosophy**
Study of individual philosophers or themes from the ancient, medieval, and/or modern periods. Examples: Spinoza, St. Thomas Aquinas, neo-Platonism, universalis in ancient and medieval thought, ancient and modern theories of space and time. Prerequisite: 6 units in philosophy or permission of instructor.
Same as L30 Phil 465.
Credit 3 units. A&S IQ: HUM EN: H

**L08 Classics 476 Money, Exchange, and Power: Economy and Society in the Ancient Mediterranean World**
From seaborne trade and banking to slavery and the impact of new technology, the economy of the ancient Mediterranean world constitutes a particularly dynamic field of study. To examine a society's underlying economics is to gain critical insight into those historical phenomena that are themselves the product of multiple, overlapping dimensions of human action and thought. This course engages directly with a fascinating array of primary evidence for economic behaviors, beliefs, structures and institutions among the Romans, Greeks, and their neighbors. We will also explore the methodological challenges and implications of that evidence as well as a variety of modern theoretical approaches. This year our focus is mainly upon developments among the Greeks, ranging from the transformative invention of coinage to the rise of commercial networks centered around religious sanctuaries like Delos. Prerequisites: Classics 341C or 342C or 345C or 346C or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

**L08 Classics 4763 Olympian Shadows: Macedon and its Neighbors in Antiquity**
The home of both Alexander the Great and Aristotle, Macedon was pivotal to the course of ancient Greek and Roman history and yet stood apart as a culturally and politically distinct region. Macedonian dynasts dominated the Hellenistic world and deeply shaped Roman reception of Greek culture, while others profoundly affected the intellectual life of antiquity. We will explore topics ranging from ethnicity, religion, and the nature of kingship to urbanization and Macedon's emergence as a great power until its subsequent transformation at the hands of the conquering Romans. We will pay special attention to Macedon's neighbors, especially Thrace and Illyria, as well as to Macedon's relationships with the Persian Empire and the Greek coastal colonies. Prerequisites: at least one semester of Classics 341C, 342C, 345C, or 346C, or instructor's permission.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

**L08 Classics 493 Senior Project**
For Classics or Ancient Studies majors who wish to fulfill their capstone requirement in Classics through a one-semester research project. A structured research assignment or independent project under the supervision of one of the department's faculty is required. Prerequisites: senior standing and permission of the chair of the department.
Credit 3 units.

**L08 Classics 495 Beginning Sanskrit**
Credit 1 unit.

**L08 Classics 497 Study for Honors**
Students interested in pursuing honors should consult the director of undergraduate studies in the Department of Classics. Prerequisite: overall GPA of 3.65.
Credit 3 units.

**L08 Classics 498 Study for Honors**
Students interested in pursuing honors should consult the director of undergraduate studies in the Department of Classics. Prerequisite: overall GPA of 3.65.
Credit 3 units.
**Greek**

For Greek courses, please refer to the Greek (p. 489) page of this Bulletin.

**Latin**

For Latin courses, please refer to the Latin (p. 656) page of this Bulletin.

**Comparative Literature**

Comparative Literature examines literature across national, cultural and linguistic boundaries. The broad perspective of Comparative Literature generates sustained critical thinking about what literature is and does; how literature relates to other fields, including other art forms and kinds of writing; how literary texts and their translations produce meaning; and the ethical valence of literature in a globalized world. Advanced knowledge of at least one foreign language is essential for understanding and appreciating a given literature and culture. Therefore, all comparative literature and comparative arts majors study a foreign language and literature at an advanced level, and they are strongly encouraged to pursue a study abroad experience. Moreover, the study of works in translation, especially those originally written in non-European languages, facilitates cross-cultural comparisons and helps prepare students for a multilingual, pluralistic and global world. Comparison of literature to other arts, media and modes of writing develops one’s understanding of literature and culture as well as of technologies and aesthetic forms of mediation and transmission of world views, values and critiques.

Comparative Literature and Comparative Arts offer the following to students:

- A high degree of flexibility and individualization in their chosen program
- A rich array of courses spanning national, temporal or medial boundaries organized by genre (e.g., postmodern narrative, comedy, the novel, lyric poetry); cultural issues (e.g., exile, diaspora, cross-cultural encounters); themes (e.g., memory, obsession in the novel, mysticism in poetry); period (Romanticism, the Renaissance); and transnational region (e.g., Middle Eastern literature, African literature)
- Courses that instruct the student in the central practices, approaches and theories of the discipline, including entry-level courses like World Literature and Introduction to Comparative Arts as well as courses on literature, literary theory and translation
- Preparation for life in a global, multicultural and plurilingual world, including critical and analytical thinking skills and cross-cultural understanding

With the help of our major and the semester or year of study abroad that we encourage, some graduates have pursued careers in international affairs, teaching English as a second language abroad, and international humanitarian programs such as the Peace Corps. Other recent graduates have found employment in such areas as the arts, business, media and technologies, and in writing, editing and publishing. Additionally, our graduates are well prepared for the rigors of graduate or professional education in a variety of fields.

**Comparative Literature and the Arts & Sciences Curriculum**

Comparative Literature offers first-year seminars, writing-intensive courses, community-based learning opportunities and various capstone experiences, including directed research, creative projects and internships appropriate to a student’s field.

Majors

The Major in Comparative Literature

Units required: 27

Required courses:

• 27 units of Comparative Literature courses, including the following:
  - Comp Lit 211 World Literature (3 units)
  - Comp Lit 3050 Literary Modernities in Europe and America: Text and Tradition (3 units)
  - Seven additional courses in Comparative Literature at both the 300 and 400 levels (21 units). With permission of the director of undergraduate studies, the student may substitute up to 6 units of appropriate foreign literature courses at the 300 or 400 level.
• The major also requires the completion of a capstone experience. Students who are double majoring may elect to complete their capstone in the other major.
• Students of Comparative Literature are also expected to have had substantial college-level experience of foreign language study as demonstrated by the completion of either one 400-level foreign language course or two 300-level courses. They are also expected to pursue work in an applied art form — music, fine arts, drama, dance or creative writing — for four semesters. This course work need not be conducted at the 300 or 400 level.

Note: Students should be aware that courses satisfying the major requirements in another department cannot also be counted in satisfaction of the major requirements of Comparative Literature or Comparative Arts.

The Major in Comparative Arts

Units required: 27

Required courses:

• 21 units of Comparative Literature courses, including the following:
  - Comp Lit 211 World Literature (3 units)
  - Comp Lit 313E Introduction to Comparative Arts (3 units)
  - Five additional courses in Comparative Arts at both the 300 and 400 levels (15 units), including one course on interrelations between literature and other art forms. With permission of the director of undergraduate studies, the student may substitute up to 6 units of appropriate foreign literature courses at the 300 or 400 level.
• 6 units of advanced study (300 level or above) in theoretical or historical courses in aesthetics, art history, dance, drama, film or music. (Students with minors or majors in one of these fields may elect to substitute 6 units of Comparative Literature.)
• The major also requires the completion of a capstone experience. Students who are double majoring may elect to complete their capstone in the other major.
• Students of Comparative Arts are also expected to have had substantial college-level experience of foreign language study as demonstrated by the completion of either one 400-level foreign language course or two 300-level courses. They are also expected to pursue work in an applied art form — music, fine arts, drama, dance or creative writing — for four semesters. This course work need not be conducted at the 300 or 400 level.

Minors

The Minor in Comparative Literature

Units required: 15

Required courses: 15 units of study, distributed as follows:

• Comp Lit 211 World Literature (3 units)
• Comp Lit 3050 Literary Modernities in Europe and America: Text and Tradition (3 units)
• Three additional Comparative Literature courses at the 300 or 400 level

Students who minor in comparative literature are also expected to have had substantial college-level experience of foreign language study as demonstrated by the completion of either one 400-level foreign language course or two 300-level courses.
The Minor in Comparative Arts

Units required: 15

Required courses: 15 units of study, distributed as follows:

- 6 units of Comparative Literature, including the following:
  - Comp Lit 211 World Literature (3 units)
  - Comp Lit 313E Introduction to Comparative Arts (3 units)
  - One More Comparative Literature course at the 300 or 400 level

- 6 units of advanced study (300 level or above) in theoretical or historical courses in music, art history, drama, dance, film or aesthetics. (Students with majors or minors in one of these fields may elect to substitute 6 units of Comparative Literature.)

- Students who minor in comparative arts are also expected to have had substantial college-level experience of foreign language study as demonstrated by the completion of either one 400-level foreign language course or two 300-level courses.

Courses

L16 Comp Lit 1024 Mozart: The Humor, Science, and Politics of Music

Wolfgang Amadeus Mozart is one of the most recognized composers of "classical" music. A child prodigy of astonishing precocity, he has come to symbolize genius for Western culture — a composer whose music embodies superhuman, even utopian beauty and perfection. In this course, we'll learn that there was more to Mozart. Mozart was a lover of codes and puzzles who delighted in the science of music, a sampler of non-Western music, and a musical humorist whose comedies make provocative statements — ranging from cynical to poignant — about politics, gender and morality. Our focus works will include Mozart's symphonies, piano music, string quartets, and such comedies as The Magic Flute and The Marriage of Figaro. We'll also explore Mozart's afterlife — how his music has figured in film, literature, and popular culture. This course is open to all undergraduates — no previous musical course work or experience is required.

L16 Comp Lit 137A First-Year Seminar

The destructive, scandal-ridden career of the Roman emperor Nero (mid-first century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the "Bad Emperors," and seen as a symbol of the decline of Rome itself — especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the Life of Nero by Suetonius (second century CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills.

L16 Comp Lit 201A Classical to Renaissance Literature: Text and Tradition

Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's Iliad is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin and Italian, to
poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare. Same as L93 IPH 201C

L16 Comp Lit 204 Crossing Borders: An Introduction to Comparative Literature
An introduction to some of the ideas and practices of literary studies at the beginning of the 21st century. This course is designed for majors and prospective majors in comparative literature and comparative arts — and other students interested in reading literature from many parts of the world and exploring issues in literary studies including questions of epistemology and representation, the cultural biases of readers, semiotics, translation theory and Orientalism. Plays, novels and poems by writers including Euripides, Vergil, Racine, Rilke, Henry James, Borges, Mellah and Murakami, and closely related short excerpts by theorists from Aristotle to Bhabha. Prerequisite: sophomore standing or permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

L16 Comp Lit 211 World Literature
This course teaches ways of reading literature across Eastern and Western cultures, introducing students to works of great imaginative power from many different regions of the world. The course focuses on a given historical period, such as the modern period or antiquity (the latter including Near Eastern as well as European texts). Organizing themes may include cultural translation, cross-cultural encounter (e.g., Orientalism), hybridity and displacement.

A variety of topics in comparative literature, designed for first-year students — no special background is required — to be conducive to the investigation and discussion format of a seminar.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

L16 Comp Lit 215C Introduction to Comparative Practice I
This course permits the close examination of a particular theme or question studied comparatively, that is, with a cross-cultural focus involving at least two national literatures. Topics are often interdisciplinary; they explore questions pertinent to literary study that also engage history, philosophy and/or the visual arts. Although the majority of works studied are texts, the course frequently pursues comparisons of texts and images (painting, photography, film). Requirements may include frequent short papers, response papers and/or exams.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L16 Comp Lit 219C Topics in Comparative Literature
An examination of how life, suffering and hope are reflected in stories by major Israeli and Arab writers of the 20th century. Themes examined: war, sacrifice, modernity, the erosion of religious faith. Short stories by Ben Ner, Yehoshua, Agnon, Mahfouz, Idris, Habibi and others are discussed. Analysis focuses on differences and similarities in society, culture and national concerns.

L16 Comp Lit 260 Cityscapes
Uses literature to explore past urban societies.

L16 Comp Lit 3040 Introduction to Digital Humanities
It is a truism that computers have changed our lives and the way we think and interact. But in fact, systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork will be supplemented by class presentations and a small assigned group project.

Credit 3 units. Arch: HUM Art: HUM BU: ETH EN: H

L16 Comp Lit 307C Voice, Language and Power: Late Medieval Religious Writing
In the later Middle Ages, there is a flowering throughout Christian Europe of religious writings that offer a new voice in which personal religious experience can be pursued and expressed. Their voices are mainly intended to be communal ones, to be contained within the Church and regulated by it. But in each case the fact that it is a voice may offer a mode of resistance, or of difference. Such writing is often aimed at lay people, sometimes exclusively at women; and sometimes the intended auditors become the authors, and propose a version of religious experience that claims a new and more intimate kind of power for its readers. This course looks at a wide range of such writing in vernacular languages read in translation (English, French and German), including the work of Meister Eckhart, Marguerite Porete, Julian of Norwich, Eleanor Hull, the anonymous writer of The Cloud of Unknowing and the perhaps pseudonymous William Langland, author of Piers Plowman. Whether such writing seeks to be orthodox or conducive to heresy, it presents a challenge to the power of clergy — a challenge that is written in the vernacular language of lay people, rather than clerical Latin, and in doing so offers distinctively new voices for religious experience. The course will also look at ways in which such work might have been influenced, if only oppositionally or at times indirectly, by contact with Muslim and Jewish writing (including Jewish exegesis of the Psalms).

L16 Comp Lit 307D Caribbean Literature in English
Rum! Fun! Beaches! Sun! This is the image of the Caribbean in America today. This course surveys literature and culture from these islands, looking both at and beyond this tourist’s paradise. It aims to introduce students to the region’s unmistakably vibrant tradition of multicultural mixture, while keeping an eye on the long history of slavery and rebellion out of which the islands’ contemporary situation formed. Along the way we encounter a wide variety of texts, from the earliest writing focused on life in urban slums, to the first novel ever to have a Rastafarian as its hero, to more contemporary considerations of the region’s uncertain place in a U.S.-dominated world. Toward the end of the course, we also look at important films like The Harder They Come as well as discussing the most globally famous cultural product of the contemporary Caribbean: reggae music. The course involves readings from multiple genres and covers authors such as C.L.R. James, Derek Walcott, Jean Rhys, V.S. Naipaul, Jamaica Kincaid, and Caryl Phillips.

during the years between the fall of the Berlin Wall and the terrorist attacks of September 11, 2001, and we will consider how literary texts imagined this period of American history. Same as L14 E Lit 312W Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

L16 Comp Lit 3132 Romantic Revolutions in European Music and Culture
The early 19th century in Europe witnessed sweeping changes in social, political, and cultural life, but some of the most fascinating happened in music. This course considers intersections between Romantic thinking about music — which inspired an idealistic vision of the art form as a source of quasi-spiritual experiences — and other contemporary “revolutions.” To what extent was Romantic music a “holy art” that offered a refuge from the world? In what ways was it a worldly participant in larger currents in society and culture? By exploring these questions and more, students develop the skills and framework needed to incorporate works of music into their investigation of enduring issues in history and the humanities. Although this course requires listening and viewing of musical works, it is designed for students with intellectual curiosity but without prior musical background. We also require weekly readings, occasional presentations, three short papers, and spirited class discussion. Same as L27 Music 3132 Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L16 Comp Lit 331A Topics in Holocaust Studies
This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period — the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children — both those they considered “Aryan” and those they designated "enemies" of the German people, such as Jewish children — an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. Open to freshmen. Students must enroll in both main section and a discussion section. Same as L21 German 331 Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L16 Comp Lit 332C Comedy
This comparative course examines and enjoys the substances and forms of humor and comedy in different times and places. Some attention to jokes, gags and comics precedes a wide-ranging examination of literary comedy. A study of various plays and comic texts illuminates different forms of comedy, such as farce, satire, romantic comedy, comedy of manners, absurdist comedy and contemporary political comedy. Authors include Aristophanes, Plautus, Rabelais, Shakespeare, Molière, Fielding, Gogol, Wilde, Stoppard and Dario Fo. Credit 3 units. Art: HUM BU: HUM

L16 Comp Lit 334 Love in the Novel/Love of the Novel
Our focus is our own pleasure in reading. How do we assure that this pleasure survives into the next century now that the visual, the sound bite, the video clip permeate our lives? We attempt to answer this question by rediscovering one of the great love stories of all times, Leo Tolstoy's Anna Karenina. Daniel Pennac's Reads Like A Novel, a recent work about the pleasures of reading for pleasure, guides us as we isolate elements of Tolstoy's story that compel us, that teach us about our own needs and desires as readers. The class considers novels whose love stories are molded by the characters' own reading: Austen's Northanger Abbey, Flaubert's Madame Bovary (1856), Proust's Swann In Love, Skarmet's Burning Patience, Bernhard Schlink's The Reader. Far from being immune to or eclipsed by history and politics, the pleasure of reading is shown to reflect the reader's appreciation of the larger fabric of society, where passion is set against war, prostitution, mental illness, adultery and prejudice. Credit 3 units. Art: HUM BU: HUM
L16 Comp Lit 338C Postmodern Fiction and Graphic Novels
Genre as a comparative laboratory. A close examination of the nature, function and pleasures of given literary genres, such as epic or postmodern narrative. Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

L16 Comp Lit 340A American Literature, 1914-1945
An introduction to major American works and writers from the later 19th century through the mid-20th century. Writers studied include Twain, James, Crane, Fitzgerald, Hemingway, Faulkner, Frost, Eliot and Stevens. The course assumes no previous acquaintance with the material and is directed toward a broad range of majors and non-majors with a serious but not scholarly interest in the subject. Students with little or no background in literature might be advised to take E Lit 213C (Chief American Writers), while English majors looking to do advanced work should consider the 400-level American literature sequence. Students who have taken E Lit 213C should not enroll in this course. 
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

The relation between biology and literature as it has been examined and expressed in poetry, fiction and nonfiction of the past two centuries. 
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L16 Comp Lit 349A Yidishkayt
This course traces the emergence, development, flourish and near-decline of Yiddish literature, beginning with some of the earliest writings to appear in Yiddish in the late middle ages and early modern period, continuing with 19th-century attempts to establish a modern Yiddish literature and the 20th-century emergence of both a classical canon and a literary avant-garde, and ending with post-Holocaust attempts to retain a Yiddish literary culture in the near absence of Yiddish-speaking communities. Focusing on the role of Yiddish as the "national" language of Ashkenaz, the course examines the ways in which Yiddish literature has responded to the social conditions of European Jewish life, exploring among others the relationship between Yiddish and the non-Jewish cultures in which it existed, the tensions between secular trends versus religious tradition, life in the shtetl and in the metropolis, immigration from the old-world to the new, and Yiddish literary responses to the Holocaust.

L16 Comp Lit 351 A World of Words
This seminar is designed for undergraduate students who are interested in literature, foreign languages, creative writing and translating. In this course, students will enrich their studies in foreign languages, cultures and literatures with creative work. Participants will read and discuss practical criticism, present their own creative projects, and hone their skills as writers, translators and readers. At the conclusion of the course, students will have the choice of presenting a polished work of translation or a piece of original writing. In addition to presenting myriad possibilities for translating into and from English, the course can accommodate creative writers in English, Spanish, French, German, Korean and Chinese. Students who wish to enroll in this course should contact the Program in Comparative Literature for further information. There is a limit of 14 participants for this class.
Credit 3 units. A&S IQ: HUM, WI Art: HUM BU: HUM EN: H

L16 Comp Lit 3520 Introduction to Postcolonial Literature and Theory
At its zenith, the British Empire encompassed almost a quarter of the globe, allowing the diminutive island nation unprecedented economic, military, and political influence upon the rest of the world. This course will introduce some of the foundational responses to this dominance, both literary and theoretical, by the colonized and their descendants. We will examine important critiques of colonialism by theorists such as Frantz Fanon, Aimé Césaire, Edward Said, Homi Bhabha, and Gayatri Spivak, as well as literary works that reflect a postcolonial critique by authors such as V.S. Naipaul, George Lamming, Doris Lessing, and Ngugi wa Thiong'o. The course will interrogate how literature could be said to help consolidate Empire as well as ways in which it might function as rebellion against imperial power, with a view toward teasing out the problems of race, gender, language, nationalism and identity that postcolonial texts so urgently confront.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L16 Comp Lit 3676 Rhetoric: Ancient and Modern
Rhetoric, or the art of persuasion, has played a prominent and controversial role in political and educational theory and practice. We survey rhetorical texts, ranging from Plato and Aristotle through Augusteine and Edmund Burke, to Kenneth Burke and Jürgen Habermas.
Same as L08 Classics 3676
Credit 3 units. A&S IQ: HUM EN: H

L16 Comp Lit 369A Reading Sex in Premodern England:
Medieval Sexualities
This course introduces students to the literary representation of gender and sexuality in England from the medieval period to the 18th century. To understand a tradition that addressed the intractable problem of human sexuality in terms very different from ours, we will ask certain questions: How does premodern culture imagine gendered identities, sexual difference, and erotic desire? How do various contexts — medical, religious, social, private, and public — inform the literary representation of gender and sexuality? What are the anatomies and economies of the body, the circuits of physical pleasure, and the disciplines of the self that characterize human sexuality? Students will have the opportunity to study romances, saints' lives, mystical writings, diaries, plays, sex guides, novels, and scientific treatises. By learning how to "read sex" in premodern literature, students will acquire a broad cultural and historical understanding of English sexualities before the descent of modern sensibilities.

L16 Comp Lit 375 Topics in Comparative Literature
This course examines the idea of connectivity in the arts. Via novels, paintings, photography, and film, we will explore questions of interpretation related to the themes of love and betrayal; bequests and legacy; and innocence and responsibility. A series of paintings by Vermeer and other Dutch masters depicting elegant women (and their dogs) in the company of their suitors will engage us in elaborate courtship rituals played out using letters, music and wine. We will also consider how, during the reigns of Francis I and Louis XIV, the French monarchy integrated Dutch art into its collections in order to assert the king's influence and authority. Students will discuss portraits that emerge from complex tableaux in Laclos's masterful novel of seduction, Les Liaisons dangereuses; in 19th-century paintings; and in contemporary photographs. The class will read Doerr's All the Light We Cannot See and de Waal's Have with the Amber Eyes, stories that link history with art, the past with the present, and gifts with thefts and bereavements. We will study Daoud's Meursault Investigation in relation to the work that inspired it: Camus's Outsider [L'Étranger]. Adaptation will likewise inform our readings of Austen's Sense and Sensibility, Barnes's Sense of an Ending, and the pair of films based on these novels. The class will assess aspects of the original story that are lost on screen as well as the added resonances that the novels acquire in the film versions.
Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM BU: IS EN: H

L16 Comp Lit 376 Refugees: Displacement and Asylum in World Literature
By 2017 at least 65.6 million people (or 1 in 113 individuals) have been forcibly displaced within their own countries or across borders. In this course we will study literary texts and other forms of cultural production that will provide a window into the complexity of refugee lives from World War II to the present. In addition to contextualizing the historical and legal significance of such terms as "refugee," "asylum," or "forced displacement," our discussions of novels, short stories, memoirs, plays, and films will also allow us to engage with the broader meanings of concepts that include hospitality, identity, belonging and citizenship. Readings may include works by Hannah Arendt, Reinaldo Arenas, Bertold Brecht, Edwidge Danticat, Aleksandar Hemon, Valeria Luiselli, Dinaw Mengestu, Viet Than Nguyen, Anna Seghers, and Warshan Shire. We will also discuss the films Casablanca (Michael Curtiz, 1943), Children of Men (Alfonso Cuarón, 2006), Beasts of the Southern Wild (Benn Zeitlin, 2012), and Fire at Sea (Gianfranco Rosi, 2014), and, finally, examine media depictions of refugees and multimedia platforms, such as Refugee Republic. Course conducted entirely in English. Open to freshmen. Students must enroll in both main section and one discussion section.

L16 Comp Lit 385A Comedy, Ancient and Modern
In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy.
examining various modes of transfer of information required for

to personal upheavals. We will discuss what these narratives
reveal about the societies they purport to reflect as well as the
nature of narrative itself to convey history, values, and emotion.
Books include readings such as Nurrudin Farah’s “Maps,” Stella
Gibbons’ “Cold Comfort Farm,” Craig Thompson’s “Blankets,”
Philippe Grimbert’s “Memory,” Dorothy Allison’s “Bastard Out
Carolina,” Amos Oz’s “Tale of Love and Darkness,” and
Hanan al-Shaykh’s “Story of Zahra.” Prerequisites: Writing 1,
sophomore standing, or permission of the instructor.
Credit 3 units. Art: HUM

L16 Comp Lit 389 Narratives of Childhood
This course explores how the force of narrative arises from the
play between the adult’s perspective and the child’s. Topics
considered include orphanhood, social change, creative
forces, and institutions of power. We pay particular attention
to the child’s voice as a narrative strategy used to confront
unfathomable horrors, to reconstruct history, and to offer order
to personal upheavals. We will discuss what these narratives
reveal about the societies they purport to reflect as well as the
nature of narrative itself to convey history, values, and emotion.
Texts include readings such as Nurrudin Farah’s “Maps,” Stella
Gibbons’ “Cold Comfort Farm,” Craig Thompson’s “Blankets,”
Philippe Grimbert’s “Memory,” Dorothy Allison’s “Bastard Out
Carolina,” Amos Oz’s “Tale of Love and Darkness,” and
Hanan al-Shaykh’s “Story of Zahra.” Prerequisites: Writing 1,
sophomore standing, or permission of the instructor.

L16 Comp Lit 392 Literary Movements
This course compares authors of different national literatures
by closely examining certain movements and periods, such as
Renaissance humanism, romanticism and naturalism.
Credit 3 units. Art: HUM

L16 Comp Lit 393 Literary Theory
Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L16 Comp Lit 394 Worldwide Translation: Language,
Culture, Technology
This course considers the crucial role played by translation
across the world today: from new technologies and digital media,
to the global demands of professionals working in fields as
diverse as literature, law, business, anthropology and health
care. We begin our exploration of the concept of translation as
a key mechanism of transmission between different languages
by looking at works of literature and film. Students then examine
how different cultures have historically required translation
in their encounters with each other, studying how translation
constitutes a necessary transcultural bridge both from a colonial
and postcolonial point of view. The course also analyzes from
practical and real-world perspectives whether concepts such
as war, human rights, democracy or various deadly illnesses
have the same meaning in different societies by considering
the diverse frames of reference used by linguists, lawyers,
anthropologists and medical doctors across the world. Finally,
we focus on translation from a technological perspective by
examining various modes of transfer of information required for
the functioning of digital media such as Google Translate, Twitter
or various iPhone applications. Readings include works by Jorge
Luis Borges, Talal Asad, Lawrence Venuti, Michael Cronin, Emily
Apter and Gayatri Spivak, among others. This course offers
students an optional Community-Engaged Teaching component
in collaboration with a St. Louis-based community partner.
Prerequisite: none. CET (https://gephardtinstitute.wustl.edu/or-
faculty-and-staff/community-engaged-teaching) course.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L16 Comp Lit 396 Lyric Poetry
A study of the sounds, forms, devices, voices and pleasures of
lyric poetry from international and comparative points of view.
Attention to theories of lyric, formal devices and problems of
translation. The study of various lyric forms such as the ode, the
elegy and the sonnet, generates comparisons across time and
space.
Credit 3 units. Art: HUM

L16 Comp Lit 405A Theory and Methods in the Humanities
Same as L93 IPH 405
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L16 Comp Lit 405B Translation
This course looks at the practice and theory of literary
translation. While the main focus is on the literary and linguistic
processes involved in translating a text from one language to
another, we spend much time exploring the cultural significance
of translation in an increasingly interconnected world. Translation
is one of the best ways to make the world accessible to us.
Successful translation requires in-depth knowledge of the social
and cultural conditions in which the original text is produced. It is
equally important to be aware of the expectations of the readers
who read the translated version. To balance these theoretical
discussions with practical matters, we invite translators to the
class to speak about their published works. The requirements
include translation projects to add experience to the analysis
carried out in class. Prerequisite: fluency in a language other
than/in addition to English.
Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L16 Comp Lit 409 Correlation Between East and West
Extensive comparative study of a period, topic, theme or genre
in Chinese or Japanese literature with a body of texts from
one or more European languages that serve to illuminate the
literary similarities and cultural differences between the two.
Texts vary, depending upon the interests of the instructor(s). All
texts available in English translations as well as in the original
languages.
Credit 3 units. Art: HUM

L16 Comp Lit 409C Beyond Geography: The Meaning of
Place in the Middle East
This course considers the importance of place in the Middle
East with particular reference to Jewish and Islamic traditions.
Topics covered include the creation of holy sites, the concept
of sacred space, the practice of pilgrimages, and the tropes of
exile and return. Texts range from analytical essays to novels,
memos and films by authors such as Edward Said, Naguib
Mahfouz, Taher Ben Jelloun, Elf Shafak, A.B. Yehoshua,
Shulamit Hareven, and Hanan Al-Shaykh. Requirements include
participation, short assignments, and a seminar paper. This
course fulfills the capstone requirement for students majoring
Laura Mulvey and Fredric Jameson. Required screenings.

Major works of Sergei Eisenstein, Andre Bazin, Christian Metz.

Credit 3 units.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L16 Comp Lit 4111 Pastoral Literature
This course will open with a survey of the classical tradition in pastoral/bucolic. We will consider questions of genre, intertextuality and ideology, and we will ask how "the lives and loves of herders" became favored ground for literary meditation on issues of surface and depth, reality and illusion, artifice and sincerity. This portion will involve intensive reading in translation of Theocritus, Vergil and Longus. In the second half of the semester, we will consider the survival, adaptation and deformation of ancient pastoral themes, forms and modes of thought in British and American writing from the 19th and 20th centuries. We will read works of Mark Twain, Kenneth Grahame, Thomas Hardy and Tom Stoppard.

Same as L93 IPH 4111
Credit 3 units. A&S IQ: HUM, LCD EN: H

L16 Comp Lit 418A Victorian Literature and Postcolonial Studies
Readings in such authors as Carlyle, Tennyson, Browning, Mill, Arnold and Pater.

Same as L14 E Lit 418
Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L16 Comp Lit 419 Feminist Literary and Cultural Theory
This course is intended to acquaint students with basic ideas and issues raised by a diversity of voices in contemporary feminist and cultural theory. Readings cover a wide range of approaches and tendencies within feminism, among them: French feminism, Foucauldian analyses of gender and sexuality, lesbian and queer theories, Third World/postcolonial feminism, and feminism by women of color. Given that feminist theories developed in response to and in dialogue with wider sociopolitical, cultural and philosophical currents, the course explores feminist literary and cultural theory in an interdisciplinary context. Note: This course is in the core curriculum for the Women, Gender and Sexuality Studies graduate certificate. Prerequisites: advanced course work in WGSS or in literary theory (300-level and above) or permission of the instructor required.

Same as L77 WGSS 419
Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM EN: H

L16 Comp Lit 4204 Film Theory
This course is an introduction to both classical and contemporary film theory. Beginning with the earliest attempts to treat cinema as a new and unique art form, the course initially reviews the various ways in which film theory attempted to define cinema in terms of its most essential properties. The course then examines more contemporary developments within film theory, more specifically its attempt to incorporate the insights of other critical and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory and postmodernism. Throughout the course, we consider questions regarding the ontology of cinema, its relation to spectators, and the various ways in which its formal properties create meaning. Readings for the course include the major works of Sergei Eisenstein, Andre Bazin, Christian Metz, Laura Mulvey and Fredric Jameson. Required screenings.

Same as L53 Film 420
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM EN: H

L16 Comp Lit 420A Topics in English and American Lit
Comparing the literatures — readings in the literature and theory of English and American Literature. Topics vary according to semester offerings.

Same as L14 E Lit 420
Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L16 Comp Lit 4224 The 1904 St. Louis World's Fair: German and Austrian Art Exhibited
The St. Louis World's Fair of 1904 (The Louisiana Purchase Exposition) was one of the greatest events of its time. At the beginning we will deal with the historical development that lead to the purchase of the Louisiana Territory in 1803, will review the developments of World's Fairs since 1851, and will have a look at the grand dimension of the 1904 World's Fair (connected with the Olympic Games). Of central importance are the Art Exhibits from Germany and Austria with their cultural-political implications. The German Emperor had a hand in selecting the German paintings to be sent to St. Louis, and his opposition against modern movements like Impressionism caused opposition in Germany. Austria was different: In their Art Nouveau Pavilion they included secessionists (Hagenbund). The Wiener Werkstaetten (Vienna's Workshops) attracted a lot of attention. Different from the paintings, German Arts and Crafts represented avant-garde movements. We will visit libraries, archives and museums in St. Louis that have World's Fair holdings. The seminar is for advanced undergraduate students but beginning graduate students can take it with permission of the instructor. Course conducted in English. May not be taken for German major or minor credit.

L16 Comp Lit 4225 European Utopian Settlements in the American Midwest (1814-1864): Diversity and Antislavery
During the first part of the 19th century a number of utopian visionaries from Europe (Germany, France and England) tried to establish communities in the American Midwest. These colonies were based either on religious or philosophical/social ideals which could be traced back to interpretations of the Old and the New Testament or to Enlightenment principles of freedom and equality that had been propagated during the revolutions in Europe of 1789, 1830 and 1848 which in turn had been influenced by the American war of independence. These groups showed strong anti-slavery convictions. The Midwest was chosen since the areas in the vicinity of the confluence of the Mississippi and the Missouri were seen as open to new social experiments. Part of the seminar are field trips to the St. Louis-based Missouri History Library as well as to the St. Louis Public Library and one-day excursions to New Harmony in Indiana, Nauvoo in Illinois, and to small towns in Warren County, Missouri.

Same as L97 IAS 4225

L16 Comp Lit 4224 Senior Seminar
Intensive study of a comparative topic in a seminar situation.
Credit 3 units. Art: HUM
L16 Comp Lit 4252 Seminar in Comparative Literature: Transatlantic Poetics
This seminar explores how the flow and circulation of artistic forms between Europe, North America, Latin America and the Caribbean during the 20th century results in the creation and dissemination of radically innovative modes of artistic expression.
Credit 3 units. A&S IQ: HUM Art: HUM

L16 Comp Lit 425A Humanities by the Numbers
To what extent can computational techniques that draw on statistical patterns and quantification assist us in literary analysis? Over the semester, we will juxtapose the close reading of historical documents or literary works with the "distant reading" of a large corpus of historical data or literary texts. We will ask how the typically "human" scale of reading that lets us respond to literary texts can be captured on the "inhuman" and massive scales at which computers can count, quantify and categorize texts. While this class will introduce you to basic statistical and computational techniques, no prior experience with technology is required. Prerequisite: two 200-level or one 300-level course in literature or history. This is a topics-type course and the specific documents and works examined will vary from semester to semester. Please refer to semester course listings for current offerings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L16 Comp Lit 430 Data Manipulation for the Humanities
The course will present basic data modeling concepts and will focus on their application to data clean-up and organization (text markup, Excel and SQL). Aiming to give humanities students the tools they will need to assemble and manage large data sets relevant to their research, the course will teach fundamental skills in programming relevant to data management (using Python); it will also teach database design and querying (SQL). The course will cover a number of "basics": the difference between word processing files, plain text files, and structured XML; best practices for version control and software "hygiene"; methods for cleaning up data; regular expressions (and similar tools built into most word processors). It will proceed to data modeling: lists (Excel, Python); identifiers/keys and values (Excel, Python, SQL); tables/relations (SQL and/or data frames); joins (problem in Excel, solution in SQL, or data frames); hierarchies (problem in SQL/databases, solution in XML); and network graph structures (nodes and edges in CSV). It will entail basic scripting in Python, concentrating on using scripts to get data from the web, and the mastery of string handling.

L16 Comp Lit 4310 Statistics for Humanities Scholars
A survey of statistical ideas and principles. The course will expose students to tools and techniques useful for quantitative research in the humanities, many of which will be addressed more extensively in other courses: tools for text-processing and information extraction, natural language processing techniques, clustering & classification, and graphics. The course will consider how to use qualitative data and media as input for modeling and will address the use of statistics and data visualization in academic and public discourse. By the end of the course students should be able to evaluate statistical arguments and visualizations in the humanities with appropriate appreciation and skepticism. Details: Core topics include: sampling, experimentation, chance phenomena, distributions, exploration of data, measures of central tendency and variability, and methods of statistical testing and inference. In the early weeks, students will develop some facility in the use of Excel; thereafter, students will learn how to use Python or R for statistical analyses.
Same as L93 IPH 431
Credit 3 units. A&S IQ: HUM, AN EN: H

L16 Comp Lit 432A Programming for Text Analysis
This course will introduce basic programming and text-analysis techniques to humanities students. Beginning with an introduction to programming using the Python programming language, it will cover the core concepts required for working with text corpora. We will cover the basics of acquiring data from the web, string manipulation, regular expressions, and the use of programming libraries for text analysis. Later in the course, students will be introduced to larger text corpora and learn to calculate simple corpus-statistics, techniques such as tokenization, chunking, extraction of thematically significant words, stylometrics and authorship attribution. We will end with a brief survey of more advanced text-classification terminology and topics from natural language processing such as stemming, lemmatization, named-entity recognition, and part-of-speech tagging.
Same as L93 IPH 432

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L16 Comp Lit 435A Expressionism in the Arts
A close study of expressionism as an international phenomenon in the arts, from the anti-naturalist movements of the 1890s to Hitler's condemnation of expressionism as decadent. The evolution of expressionist theatre from Wedekind to Toller and Kaiser; such composers as Schoenberg and Berg; in the visual arts, such groups as Der blaue Reiter and Die Brucke, such independents as Kokoschka; in cinema, such figures as Pabst, Murnau, Von Sternberg, Lang. Prerequisite: Drama 208E, Drama 336, or permission of instructor.
Same as L15 Drama 435
Credit 3 units. Art: HUM

L16 Comp Lit 436 Seminar in Dramatic Theory
The course begins with Plato's critique of mimesis and Aristotle's defense, as we read The Poetics as a response to Plato. We take some of Aristotle's basic concepts, such as mimesis, plot, character and thought, and attempt to apply them to drama up to the present day. We also consider fundamental elements of both the dramatic text and the dramatic production, such as space, time, dialogue, narrative devices and perspective. Brecht's theory of "epic drama" forms the other conceptual pole in the course, opposing Aristotle. Besides these two theorists, other figures include Ben Jonson, Corneille, Dryden, Diderot, Schiller, Hegel, Zola, Artaud and Grotowski. The course, then, has both chronological and thematic axes. Three papers and one oral presentation.
L16 Comp Lit 438 Aesthetics
Credit 3 units. Art: HUM

L16 Comp Lit 461A Ocean, Island, Ghetto, Globe: The Routes and Horizons of Asian-American Literature
Studies in special subjects, e.g., allegory and symbolism in the medieval period, the sonnet in English literature, English poetry and politics. Consult course listings.
Same as L14 E Lit 461
Credit 3 units. A&S IQ: HUM Art: HUM ETH: HEN: H

L16 Comp Lit 4647 Ancient Madness
In this course we will ask what madness meant in Greek and Roman culture. We will find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating, and categorizing people treated as mad. While we will concentrate on literary (particularly tragic and epic), philosophical, and medical texts, we will also look at visual representations and evidence from ritual and cult. An important part of our project will involve tracing the afterlife of classical ideas: The history of melancholia will ground this aspect of the course. Finally, we will consider how antiquity informs psychoanalysis (Oedipus, Antigone, Narcissus), and how ancient madness might partake in a critique of contemporary understandings of mental illness.
Same as L08 Classics 4647

L16 Comp Lit 471A Topics in Modern Arabic Literature
Modern Arabic narratives read in English translation foregrounding themes such as the conflict between tradition and modernity, civil war, poverty, alienation, religion and politics, and changing gender roles.
Same as L49 Arab 471

L16 Comp Lit 493 The Unmaking and Remaking of Europe: The Literature and History of the Great War of 1914-1918
Credit 3 units.

L16 Comp Lit 494 Seminar: Diverse Topics in Literature
This course may offer a variety of topics. Semester subtitle varies. It has been offered as an in-depth study of the individual through autobiographies; and as a course on visual poetics from antiquity to the present. Consult the department for further details.
Credit 3 units. A&S IQ: HUM Art: HUM BU: ETH: HEN: H

L16 Comp Lit 495 The 19th-Century Novel: Ambition and Desire
Seminar in Comparative Literature Studies. Topics vary. Consult course listings for current semester's offering.
Credit 3 units. A&S IQ: HUM Art: HUM

L16 Comp Lit 497 Independent Work for Senior Honors
One or more long papers on a topic chosen in conjunction with the adviser and an examination. A committee determines whether the student receives credit only or Honors.
Prerequisites: senior standing and permission of chair of the committee.
Credit 3 units. Art: HUM

L16 Comp Lit 498 Independent Work for Senior Honors
Advanced work as indicated in Comp Lit 497. Prerequisites: senior standing and permission of chair of the committee.
Credit 3 units. Art: HUM

L16 Comp Lit 4980 Spenser
This course involves graduate and undergraduate students in the ongoing work of the Spenser Project, an interinstitutional effort to produce a traditional print edition of the Complete Works of Edmund Spenser.
Same as L14 E Lit 498
Credit 3 units. A&S IQ: HUM EN: H

L16 Comp Lit 498A Spenser Lab
In this Writing Intensive course, the students will be given a variety of writing tasks: writing commentaries, introductions, software manuals, grant proposals, software requirements, and design documents (SRDDs).
Same as L14 E Lit 498W
Credit 4 units. A&S IQ: HUM WI: H

Dance
Students may select dance as a major through the Performing Arts Department (p. 722). This Bachelor of Arts course of study combines intensive studio work in technique and theory of modern dance, ballet and composition with seminars that examine dance both as a global phenomenon reflecting culturally historic and aesthetic features as well as an area of scientific
research with therapeutic applications. The major also includes a broad range of courses, such as stagecraft, music resources, improvisation, anatomy for dancers, pedagogy, dance therapy, musical theater dance, world dance forms, jazz and tap. Students may also choose to minor in dance or in world music, dance and theater. The interdisciplinary minor in world music, dance and theater encourages students already interested in the performing arts to explore those outside of Euro-American traditions. A certificate program in somatic studies is offered through the University College division of Arts & Sciences.

Students who study dance at Washington University learn from faculty members who have both professional experience and academic degrees. Students also have the opportunity to study with guest artists in residence who teach master classes and set choreography.

In addition, the department offers many opportunities for students to perform and present their work. Washington University Dance Theatre holds annual auditions, and selected students will appear in faculty- and guest artist-choreographed concerts in Edison Theatre. Students particularly interested in performing may audition for the student repertory company Washington University Dance Collective (WUDC). WUDC rehearses and performs throughout the year at area venues as well as on campus. Every spring, student choreographers can audition their work for Student Dance Showcase, which is directed and produced by Washington University dance students. Students also have the annual opportunity to attend the regional American College Dance Conference to perform and to take master classes. Students may also participate in departmental drama productions as well as student productions of choreography and theater.

**Elective courses (minimum of 9 units):** All courses must be at the 300 level or above. Students may also choose from dance and somatic practice courses in University College (U31).

**Additional Information**

**Study Abroad:** Washington University students can pursue dance studies abroad during the academic year at the University of Auckland, New Zealand; the University of Ghana, Legon; and Roehampton University, London. With approval from the Dance program, courses at these institutions may fulfill dance major and
minor requirements. Courses in other disciplines taught at these institutions may also be accepted by Washington University.

## Minors

### The Minor in Dance

Total units required: 17-18 units

#### Studio-based/technique courses (9 units):

At least 6 of these units must be at the 300 level or above. Students must select from the following list:

#### Elective courses (2-3 units): Any additional history/theory course or studio-based/technique course at the 300 level or above may be used to fulfill this requirement.

### The Minor in World Music, Dance and Theater

For the world music, dance and theater minor, visit the Performing Arts page (p. 724) of this Bulletin.

### Courses

#### L29 Dance 106E Introduction to Dance as a Contemporary Art Form

Introduction to dance as a creative art form. Through practical work in the studio, students gain an understanding of the human body as an instrument of expression and of motion as the medium of dance. Technique, analysis and creative work. Not open to majors. May be repeated once for credit. Credit 2 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

#### L29 Dance 200 Tutorial

Supplementary work at the low intermediate level in ballet and modern dance at times to be determined. Prerequisites: sophomore standing and permission of the Director of Undergraduate Dance Studies. Credit to be determined in each case.
**L29 Dance 201E Theory and Technique of Modern Dance I**
Fundamental theory and techniques of American modern dance. Studio work investigating the expressive potential of human movement and developing individual rhythmic and kinesthetic awareness, coordination, and breadth of movement vocabulary. Related reading and video expand on theory embodied in the class work and give an historical overview of modern dance in the U.S. Attendance at two to three performances required. Prerequisite: some previous dance training or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 202 Theory and Technique of Modern Dance II**
A course for students familiar with the basic concepts and technique of modern dance. Emphasis on expanding individual movement versatility with increasing difficulty of choreographic phrase materials. Related readings and videos, some focused on American postmodern dance. Attendance at two to three performances required. Prerequisite: Dance 201 or permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 203 Composition I**
Finding personal movement and transforming it into dance. Through a series of class projects the formal elements of composition are introduced. Prerequisite: Dance 201 or permission of the instructor; concurrent registration in a technique class required.
Credit variable, maximum 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 208 Composition and Technique**
Introduction to dance composition supported by two modern or ballet technique classes each week at the level appropriate to the individual student. Work on composition assignments outside of class is expected. Prerequisite: Dance 201E or permission of instructor.
Credit 4 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 212E Introduction to Theater Production**
An introductory study of the major elements involved with mounting a theatrical production. Utilizing guest speakers in both theater arts and theater studies, the course addresses such topics as scenic, costume, lighting and sound design; production management and procedures; and the history and culture of theatrical space and design. Students are required to serve as a crew member on one departmental production and attend productions of the Edison Theatre Ovations series and the Performing Arts Department. Same as L15 Drama 212E
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 213 Improvisation I**
This course explores the process and art form of creative, expressive, spontaneous dance making. Students learn to move and respond simultaneously in the moment, developing skills of communication, observation, performance and composition in the language of movement. Open to dancers of all levels. Light reading; in class and out-of-class projects.

**L29 Dance 214 Improvisation II**
Continuation of L29 Dance 213 Improvisation I. This course deepens the improvisational process and expands the individual dancer's skills. Students are encouraged to create their own expressive imagery and to enhance their capacity as communicators in the dance medium. Light reading; in class and out-of-class projects.
Credit 2 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 215 Fundamentals of Classical Ballet**
Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on American Ballet Theatre as a repository for classical and modern ballet repertoire of both American and European choreographers. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary. Prerequisite: none.
Credit 2 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 216 Fundamentals of Classical Ballet**
Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on New York City Ballet as a repository for the choreography of George Balanchine. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary.
Credit 2 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 217 Afro-Modern Dance (Dunham Technique)**
This course introduces students to Katherine Dunham's dance technique, which combines ballet, modern, and Afro-Caribbean dance. Dunham Technique is one of the most important foundations for jazz dance and also shares characteristics with West African Dance and several modern dance techniques. Some lectures and occasional short readings will supplement this studio-based course so that students can learn more about Katherine Dunham (1909-2006), one of the great pioneers of dance in America. The class is open to all levels, although at least one semester of previous dance experience is required. Repeatable one time for credit in subsequent semester.
Credit 2 units.

**L29 Dance 218 Afro-Modern Dance (Dunham Technique)**
This course introduces students to Katherine Dunham's dance technique, which combines ballet, modern, and Afro-Caribbean dance. Dunham Technique is one of the most important foundations for jazz dance and also shares characteristics with West African Dance and several modern dance techniques. Some lectures and occasional short readings will supplement this studio-based course so that students can learn more about Katherine Dunham (1909-2006), one of the great pioneers of dance in America. The class is open to all levels, although at least one semester of previous dance experience is required. Repeatable one time for credit in subsequent semester.
Credit 2 units.

**L29 Dance 219 Afro-Modern Dance (Dunham Technique)**
This course introduces students to Katherine Dunham's dance technique, which combines ballet, modern, and Afro-Caribbean dance. Dunham Technique is one of the most important foundations for jazz dance and also shares characteristics with West African Dance and several modern dance techniques. Some lectures and occasional short readings will supplement this studio-based course so that students can learn more about Katherine Dunham (1909-2006), one of the great pioneers of dance in America. The class is open to all levels, although at least one semester of previous dance experience is required. Repeatable one time for credit in subsequent semester.
Credit 2 units.

**L29 Dance 220 Afro-Modern Dance (Dunham Technique)**
This course introduces students to Katherine Dunham's dance technique, which combines ballet, modern, and Afro-Caribbean dance. Dunham Technique is one of the most important foundations for jazz dance and also shares characteristics with West African Dance and several modern dance techniques. Some lectures and occasional short readings will supplement this studio-based course so that students can learn more about Katherine Dunham (1909-2006), one of the great pioneers of dance in America. The class is open to all levels, although at least one semester of previous dance experience is required. Repeatable one time for credit in subsequent semester.
Credit 2 units.

**L29 Dance 221 Fundamentals of Classical Ballet**
Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on American Ballet Theatre as a repository for classical and modern ballet repertoire of both American and European choreographers. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary. Prerequisite: none.
Credit 2 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 222 Fundamentals of Classical Ballet**
Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on New York City Ballet as a repository for the choreography of George Balanchine. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary.
Credit 2 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 240 Afro-Modern Dance (Dunham Technique)**
This course introduces students to Katherine Dunham's dance technique, which combines ballet, modern, and Afro-Caribbean dance. Dunham Technique is one of the most important foundations for jazz dance and also shares characteristics with West African Dance and several modern dance techniques. Some lectures and occasional short readings will supplement this studio-based course so that students can learn more about Katherine Dunham (1909-2006), one of the great pioneers of dance in America. The class is open to all levels, although at least one semester of previous dance experience is required. Repeatable one time for credit in subsequent semester.
Credit 2 units.

**L29 Dance 245 Afro-Modern Dance (Dunham Technique)**
This course introduces students to Katherine Dunham's dance technique, which combines ballet, modern, and Afro-Caribbean dance. Dunham Technique is one of the most important foundations for jazz dance and also shares characteristics with West African Dance and several modern dance techniques. Some lectures and occasional short readings will supplement this studio-based course so that students can learn more about Katherine Dunham (1909-2006), one of the great pioneers of dance in America. The class is open to all levels, although at least one semester of previous dance experience is required. Repeatable one time for credit in subsequent semester.
Credit 2 units.

**L29 Dance 250 Afro-Modern Dance (Dunham Technique)**
This course introduces students to Katherine Dunham's dance technique, which combines ballet, modern, and Afro-Caribbean dance. Dunham Technique is one of the most important foundations for jazz dance and also shares characteristics with West African Dance and several modern dance techniques. Some lectures and occasional short readings will supplement this studio-based course so that students can learn more about Katherine Dunham (1909-2006), one of the great pioneers of dance in America. The class is open to all levels, although at least one semester of previous dance experience is required. Repeatable one time for credit in subsequent semester.
Credit 2 units.

**L29 Dance 257 Dance Theater Production**
Experience in technical production. Required stage work includes two studio dance productions supervised by faculty. Prerequisite: Dance 212E.
Credit 1 unit. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 296 Internship**
Students may receive up to 3 units of credit for an approved internship with an organization where the primary objective is to obtain professional experience outside the classroom. Students must file a Learning Agreement with the Career Center, a faculty sponsor and the site supervisor. This must be approved by all three constituencies before proceeding. A final written project is agreed upon between the student and faculty sponsor before work begins, and is evaluated by the faculty sponsor at the end of the internship.
Credit variable, maximum 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

**L29 Dance 297 Fundamentals of Jazz Dance**
This course introduces the basic principles and vocabulary of traditional jazz dance as influenced by American social dances and its relationship to the rise in popularity of jazz music. Both are unique to America and are rooted in African-American and
L29 Dance 202 Dance Improvisation I
A workshop for students with experience in choreography. Study of approaches to dance composition with related improvisation problems. Work outside of studio hours expected. Prerequisites: Dance 201, Dance 203 or permission of the instructor. Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

L29 Dance 213 Dance Improvisation II
A workshop designed to provide students with the skills necessary for creating their own dances. Emphasis is placed on the ability to improvisationally compose and perform and to interactively respond to the environment. Prerequisites: Dance 202 or permission of the instructor. Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

L29 Dance 300 Jazz Dance II
Intermediate to high intermediate work in jazz dance technique, including choreographic phrases emphasizing stylistic clarity and more complex rhythmic structure. Variable content; may be repeated once for credit in a subsequent semester. Preference given to students registering for the first time. Prerequisite: Dance 297 or permission of instructor. Credit 2 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 301 Theory and Technique of Modern Dance III
Technique and related concepts for the intermediate-level student. Greater emphasis on the ability to accurately replicate or individually interpret choreographic material. Related reading and video assignments on contemporary dance developments and attendance at two to three performances required. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: Dance 202 and recommendation of the student’s previous WU instructor and permission of the course instructor. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 302 Theory and Technique of Modern Dance IV
Continuation of Dance 301. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: Dance 301 and recommendation of the student’s previous WU instructor and permission of the course instructor. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 303 Composition II
A workshop for students with experience in choreography. Study of approaches to dance composition with related improvisation problems. Work outside of studio hours expected. Prerequisites: Dance 203 or 208 and permission of the instructor; concurrent registration in a technique course required. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 305Z Music Resources for Dance
Analysis of Western (Europe, America), world (Africa, India, Indonesia) and global popular musics. Emphasis on rhythm/form, style/genre, instrumentation and function/context. Basic music theory: notation, time signatures, subdivisions and polyrhythms. Major composers for dance (Lully, Tchaikovsky, Debussy, Ravel, Stravinsky, Cage, etc.). Introduction to percussion techniques for dance accompaniment using hand drums, drum set and hand-held instruments. Introduction to basic studio techniques including microphones, recording and editing equipment, and the use of synthesizers and drum machines. Prerequisites: for dance students at the intermediate or advanced level. Credit 2 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 308 Dance Composition Projects
Choreography juried by dance faculty or supervised choreography on themes assigned by the instructor or formulated by the student and approved by the instructor. Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 309 Composition and Technique II
Continuing work in dance composition supported by two technique classes each week at the level appropriate to the individual student. Work on composition assignments outside of class are expected. Prerequisite: Dance 201, Dance 203 or permission of instructor. Credit 4 units. A&S IQ: HUM BU: HUM EN: H

L29 Dance 310 Dance Improvisation II
Continuation of Dance 213. Prerequisites: Dance 213 or permission of instructor; concurrent registration in a dance technique course at the 300 level or higher is required. May be repeated once for credit. Credit 1 unit. A&S IQ: HUM BU: HUM

L29 Dance 3101 Dance Improvisation: Spontaneous Composition & Performance Techniques
Dance improvisation is a cumulative, integrative practice, applying every skill the performer can bring to the spontaneous present in which creative process and performance is simultaneously one and the same. In this course, students learn and create processes for improvising dance/performance art, with an aim toward developing integrated skill in: dance technique, intuitive movement invention, partnered dancing, collaborative process, performance presence/expressivity, and compositional form. Applications include improvising compositions for theatrical stage, site-specific venues, and for camera-based artistic mediums. Meets requirement for dance major. Prerequisite: Students must be qualified at 300 level in any genre of dance technique, or obtain special permission of instructor. This course is optimal for students who have previously taken Dance Composition (L29 203/208/303/309), and/or Contact Improvisation (U31 212), though they are not prerequisites. May be repeated once for credit. Credit 1 unit. A&S IQ: HUM EN: H

L29 Dance 311 Modern Dance and the African-American Legacy
This course examines the works of several African-American choreographers and their contributions to the field of modern dance in America. These works, considered modern-day classics, depict important historical events and reveal cultural influences that people of African descent have impressed upon our society. Through the medium of dance aided by discussions, video and class reading assignments, the choreographers’ works are analyzed for form, content and social relevance. Studio work includes technique to support learning the repertory. Prerequisite: one to two years training in modern, jazz or ballet. Credit 2 units. A&S IQ: HUM, SC, SD Art: CPSC, HUM BU: HUM EN: H

L29 Dance 312 Accompaniment Techniques for Dance
A wide variety of percussion instruments and techniques are studied to determine what makes effective dance accompaniment. The course includes: examples and discussion of dance musics from Western and non-Western cultures; basic notation of rhythm and form; demonstrations of musical styles and discussion of social contexts. Students have opportunities to assist in accompanying modern dance classes. Minimum of
two to three hours a week of individual practice and/or listening to recordings expected.
Credit 2 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

L29 Dance 316E From Romantic to Postmodern Dance
An overview of European and American theatre dance from the early 19th century to the present. Topics include: Isadora Duncan’s work as transition and revolution, Orientalism in early modern dance and the Diaghilev Ballets Russes, the “reconstruction” of the dancer’s body, gender issues in movement vocabulary, choreographic content and professional working conditions, the emergence of modernism and postmodernism in dance. Seminar format emphasizing discussion of reading and dance videos.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L29 Dance 319 Stage Lighting
This course will place an emphasis in the aesthetic practice of lighting design through the understanding of technology as it relates to time and space. Early on the student will learn how to properly use and apply designer’s tools and then through reading, research and experimentation explore the limitless boundaries of color and texture. This will culminate in a stage design in collaboration with directing or dance class. Upon completion of the course, the student will be able to speak eloquently on design theory and be able to move on to further design study in Advanced Lighting Design: L15 410.
Same as L15 Drama 310
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 321 Classical Ballet: Intermediate I
A course designed for those with a solid foundation in the fundamentals of ballet technique. Related reading and video assignments; attendance at one to two ballet performances. Variable content; may be repeated in a subsequent semester. Prerequisites: permission of the instructor and B+ or better in Dance 221 and 222.
Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 3221 Classical Ballet: Intermediate II
Special emphasis on the development of adagio, allegro and turn sequences. Variable content; may be repeated in a subsequent semester. Prerequisites: permission of instructor and B+ or better in Dance 221 and 222.
Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 3224 Intermediate Pointe Technique
This course is designed for dancers with a basic foundation and understanding of pointe technique. The focus of the course is the strengthening of the overall presentation of the pointe technique while additionally developing the performance quality of the dancer. Variable content: may be repeated for credit in a subsequent semester. Corequisite registration in Dance 3221, 416 or 4291, and permission of the instructor.
Credit 1 unit. A&S IQ: HUM EN: H

L29 Dance 323 Topics in Theater
Explores a variety of special interest topics in theater. Consult the course listings.
Same as L15 Drama 321
Credit 3 units. A&S IQ: HUM EN: H

L29 Dance 331 Movement and Meaning: Dance in a Global Context
This course introduces students to various approaches to studying dance in a humanities context. We will explore how people create meaning through dance and how dance, in turn, influences social norms, political institutions, aesthetic ideals and cultural practices. As we compare dance forms across the globe, we will also examine issues of race, gender, sexuality and ethnicity, analyzing how dance literally embodies identity. At the same time, we will discover how contemporary unequal power hierarchies bear on our designation of some dance forms as “Western” and others as “world” or “ethnic.” Tensions around assessment of authenticity/creativity, adaptation/appropriation, agency/resistance, and cultural hierarchies such as vernacular/modern, shift with social and political hegemony and with the individual’s position as insider or outsider relative to ethnic self-identification and traditional forms of expression. The first part of the course introduces the student to different methodological approaches to studying dance. Throughout the semester, the usual process of the course will be discussion of assigned reading and viewing and analyzing together dance videos shown in class. A few dance workshops will be included (for which no previous dance training is necessary). Required work includes a few short assignments, a take-home midterm exam, a project on a topic of student’s choice but related to course focus, a 20-minute presentation of student’s project/paper, and a final take-home exam.
Credit 3 units. A&S IQ: HUM, LCD Art: CPSC BU: HUM, IS EN: H

L29 Dance 332 Mind-Body: Integral Practices
The mind and the body are not only connected, they are a fundamental unity, always functioning in a coordinated state. Whether or not we coordinate them well or badly is a choice we make, whether we are conscious of choosing or not. Many so-called “physical” exercises, activities and arts suffer from a lack of adequate skills of sensation, attention, perception and conscious control. Conversely, many so-called “mental” activities lack adequate awareness of the bodily underpinnings of thought. Like a person learning to play a musical instrument, one’s ability to coordinate the mental and physical aspects of Self toward one’s best personal potential is a skill requiring study of strategies and techniques for good practice in “being well.” Such ideas and methods are not “new age,” but can be traced back through more than a century in the work of investigators such as F.M. Alexander, progressive educator John Dewey, anthropologist Raymond Dart, and many others. Through direct experience and related readings, this class introduces students to “somatic,” or “integral” practices — activities that are inherently more effective at developing the aspects of Self in a coordinated and authentically holistic manner. We then learn to apply our understanding to all kinds of activities, both mental and physical, from chores to exercise, from arts to sports, from hobbies to vocations. Some kind of prior movement training (e.g., athletics, martial arts, dance, etc.) is preferable but not required.
Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 340 Ballet as Ethnic Dance and Classical Art
This course examines the origins and major developments in ballet theory, technique and production practice, emphasizing their relationship to concepts of ethnicity and classicism. Issues considered include: the influence of classic Greco-Roman...
L29 Dance 401 Theory and Technique of Modern Dance V
Emphasis on versatility in movement vocabulary and on more complex and intensive technical work with discussion of theory inherent in the studio work. Related reading and projects. Variable content: may be repeated for credit in a subsequent semester. Prerequisite: Dance 302 with recommendation of the student's previous 302 instructor and permission of the 401 instructor. Students with class conflicts may, with the permission of the instructor, enroll for 2 rather than 3 units. Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 401 Theory and Technique of Modern Dance VI
Continuation of Dance 401 with emphasis on more complex and intensive technical work. Variable content: may be repeated for credit in a subsequent semester. Prerequisite: Dance 401 with recommendation of the student's previous 401 instructor and permission of the 4021 instructor. Students with class conflicts may, with the permission of the instructor, enroll for 2 rather than 3 units. Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 4021 Theory and Technique of Modern Dance VII
This course continues as an overview of these issues while presenting the intersection and interaction of these elements, which form the creative collaboration of Western Theatrical Dance. The students read from both texts and articles on creativity, creative collaboration, the process of creating Western Theatrical Dance, and critical thinking. The course continues as an overview of these issues while presenting the intersection and interaction of these elements, which form the creative collaboration of Western Theatrical Dance. The students read from both texts and articles on creativity, creative collaboration, the process of creating Western Theatrical Dance in the 20th and 21st centuries, and critical thinking. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L29 Dance 403 Jazz III
Jazz III is primarily a studio course based on traditional jazz with strong elements of ballet technique, hip-hop, Broadway, and street jazz. The main focus of the class will be on increased technical proficiency and development as an expressive performer. The studio work will introduce exercises and movement phrases that challenge the dancer’s skill level, and encourage a personal exploration that further enhances the dancer's individual expression and style. Studio work will be supported by individual research on the field of jazz dance. Variable content: may be repeated once for credit. Prerequisites: high-intermediate training in jazz dance technique and permission of the instructor. Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 404 Composition IV
The exploration of choreographic problems in small and large ensembles. Prerequisite: completion of Dance 303, senior standing or permission of instructor. Previous or concurrent registration in Dance 401 or 4021 recommended. Credit variable, maximum 3 units.

L29 Dance 4041 Composition III
The exploration of choreographic problems for small and large ensembles. Prerequisite: senior standing or permission of instructor. Previous or concurrent registration in Dance 401 or 4021 recommended. Credit variable, maximum 3 units.

L29 Dance 407 Topics in Dance Techniques
Explores a variety of special interest topics in dance techniques. Consult the course listings for the semester topic. Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 413 Modern Dance and the African American Legacy II
This course focuses on works by 2-3 renowned African-American choreographers. The selected choreographers are chosen for their contributions to the field of American modern dance based primarily on their explorations regarding the
L29 Dance 426 Performing the Political in American Dance
This course is an exploration of the politics of performance and the performance of politics through the lens of American dance in the 20th and 21st centuries. Through readings, screenings and discussion, we will examine the ways in which American dance developed against and alongside political movements in the United States, particularly ones concerning nationalism, race, gender and human rights. We will also investigate how the lens of dance and choreography offers an expansive means to conceptualize political questions of citizenship and social protest, broadening our understanding of embodied performance. Guided by several key philosophical texts, our class will focus on concepts necessary to examining the convergence of performance and politics (such as representation, ritual, spectacle, body, mimesis, propaganda, etc.) while also paying special attention to the politics of funding and censorship that has governed the creation and presentation of dance in the United States. No dance experience is necessary. Credit 3 units. A&S IQ: HUM, LCD, SC, SD, WI Art: CPSC BU: BA EN: H

L29 Dance 4281 Classical Ballet III
Designed for dancers with a solid foundation in beginning and intermediate ballet technique. Related reading, research paper/discussion, video assignments; attendance at one to two ballet performances. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: permission of instructor and B+ or better in Dance 3221 and Dance 415 or Dance 416. Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 4291 Classical Ballet IV
A course designed for dancers with a solid foundation in beginning and intermediate ballet technique. Related reading, research paper/discussion, video assignments; attendance at one to two ballet performances. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: permission of instructor and B+ or better in Dance 3221 and Dance 415 or Dance 416. Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 430 Dance Pedagogy
In this course students will learn methods of instruction, assessment and how to develop dance curriculum for K-12. Students will design classes based on national standards, grade-level expectations and sound dance principles. In the studio they will teach each other sample lessons that they have developed. This class will cover dance competencies required by DESE for beginning teachers of dance. We will pay attention to current trends in arts education. Our discussion will include the diversity of student populations and how to prepare and respond. We will discuss the role of the arts in education and the dance teacher's role as classroom instructor, arts integration instructor, diplomat and arts advocate. Credit may be applied toward the education major and potentially toward state certification. Prerequisite: minimum of two semesters of upper-level course work in dance technique. Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 433 Performing Gender and Sexuality in America
This class will cover dance competencies required by DESE for beginning teachers of dance. Guided by several key philosophical texts, our class will focus on concepts necessary to examining the convergence of performance and politics (such as representation, ritual, spectacle, body, mimesis, propaganda, etc.) while also paying special attention to the politics of funding and censorship that has governed the creation and presentation of dance in the United States. No dance experience is necessary. Credit 3 units. A&S IQ: HUM, LCD, SC, SD, WI Art: CPSC BU: BA EN: H

L29 Dance 434 Performing Gender and Sexuality in America
This course examines how the performance of gender and sexuality has shaped the social, cultural, and political history of the United States from the early 19th century to the present. Although performance happens in everyday life, we will primarily focus on how the stage has been a potent space for debating issues related to gender and sexuality. This course will put forth the argument that the stage has historically not only reflected...
broader social concerns but also actively helped to shape those social dynamics. After an introduction to foundational ideas, we will start the semester with minstrelsy, which signals that the performance of gender and sexuality in America is deeply intertwined with race, class, and national belonging. Reading and viewing assignments bring together feminist theory, queer theory, American social history, and performance texts to build robust seminar discussions.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM BU: BA, HUM EN: H

L29 Dance 457 Dance Repertory
Concert dance performance practicum. Under the direction of faculty, guest or graduate student choreographers, students rehearse and prepare for performance in a repertory dance concert or the MFA thesis production. Enrollment by audition. Prerequisite: permission of the faculty director of an appropriate production. Concurrent registration in a technique class is required. May be repeated once for credit.
Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 458 Dance Repertory
Concert dance performance practicum. Under the direction of faculty, guest or graduate student choreographers, students rehearse and prepare for performance in a repertory dance concert or the MFA thesis production. Enrollment by audition. Prerequisite: permission of the faculty director of an appropriate production. Concurrent registration in a technique class is required. May be repeated once for credit.
Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 479 Fundamentals of Sound Design
Encompassing both creative and technical aspects of sound in the performing arts, the course gives theoretical knowledge of, and practical experience in the following areas: fundamental rules of physics and electronics related to sound, use of standard digital recording studio equipment, “training” of the ear and basic techniques of sound montage. Students are expected to participate in a variety of conceptual and research oriented exercises as well as complete several lab projects. Sound-related work on Performing Arts Department productions may be required. Prerequisite: Drama 212 and permission of instructor. Same as L15 Drama 479
Credit 3 units. A&S IQ: HUM EN: H

L29 Dance 493 Senior Project
Specialized project in a selected area in dance. The student will work individually under the supervision of a faculty member. Submission of student proposal prior to registration. Final self-evaluation essay required. Prerequisite: permission of the coordinator of the Dance Division.
Credit variable, maximum 3 units.

L29 Dance 499 Study for Honors
An honors thesis or performance and thesis project designed by the student, and supervised and assessed by a faculty committee. Prerequisites: senior standing, grade point of 3.65, and 3.65 in dance classes, and permission of the coordinator of the dance division.
Credit variable, maximum 6 units.

L29 Dance 4990 Independent Work
Prerequisite: senior standing and permission of the director of undergraduate dance studies.
Credit variable, maximum 10 units.

Drama

Students may select drama as a major through the Performing Arts Department (p. 722). This major combines the historical, cultural, theoretical and literary study of theater and performance with a full array of theater arts courses, including acting, directing, performance art, design (set, costume, lighting), stage management and playwriting. The Performing Arts Department strongly believes in the mutually beneficial relationship between the study and the practice of theater. A major in drama develops students’ knowledge of theater by means of rigorous, immersive studio and lab courses, along with a strong and comprehensive grounding in theater history, dramatic literature, performance studies and dramatic theory.

The three-semester Theater Culture Studies sequence provides an expansive, global study of theater and performance, from pre-history to the 21st century; students take an additional two courses in theater and performance studies. Within the theater arts, students choose courses in acting, directing, playwriting or design. Our theater arts courses are based on a liberal arts model rather than a conservatory model. During the senior year, a capstone course is team-taught by a theater arts faculty member and a theater and performance studies faculty member.

We also offer a special study abroad program that can be credited toward the major. Since 1991, we have been holding a national summer program at Shakespeare's Globe in London, which consists of a 3-unit course on acting Shakespeare and a 3-unit course on Shakespeare studies, in addition to several master classes taught by Globe personnel.

</tr>
</tbody>
</table>

• At least 9 credit units at the 300 level or above. No more than 3 units may be production credits.

The Minor in World Music, Dance and Theater

For the world music, dance and theater minor, visit the Performing Arts (p. 724) page.

Courses

L15 Drama 1100 Ampersand: Examining America: American Dreams: Art, Culture, Politics

Rooted in the Jeffersonian ideals of "life, liberty and the pursuit of happiness," the notion of the "American Dream" actually has a complicated history, and its meanings are diverse and contested. This Ampersand course investigates how perceptions, representations, and meanings of the American Dream have changed throughout history and how they live on in the contemporary United States. Rather than seeking definitive definitions or answers, we carefully and thoughtfully examine case studies of American culture and the arts — literature, theatre, film, and painting — as the lens for understanding images of nation and identity. Utilizing an intimate seminar format to facilitate close reading and discussion of works in various media, this Ampersand course emphasizes both critical thinking and writing, and it also requires students to execute a creative project of their own making. We will visit a variety of exciting performances and exhibits, both on and off campus. Our primary goal is to provide a compelling interdisciplinary perspective on the American Dream that synthesizes the arts, performance, and politics. This course is intended for first-year students; any seats remaining after first-year students enroll are open to other students.

Same as L61 FYP 1100

Credit 3 units. A&S: AMP BU: HUM

L15 Drama 115 First-Year Seminar: What is Art?

Great works of literature, theatre, film, painting, music and dance provide us with new, intriguing — and often surprising! — ways of understanding reality. In this First-Year Seminar, we examine a variety of works in various media, paying close attention to works which have significantly altered or challenged the way we view and interpret reality. In an intimate, seminar setting, we analyze and discuss individual works of art from the Greeks to the present day. The course incorporates attendance at live performances (both on-campus and off), along with Master Classes by artists from the Performing Arts Department. Examining works both classical and the avant-garde, What is Art? forces us to understand and question how art complicates, enriches, disturbs and asks questions — both about ourselves and our world.

L15 Drama 1151 First-Year Seminar: Transmediation
A variety of topics in comparative literature, designed for first-year students — no special background is required — and to be conducive to the investigation and discussion format of a seminar.
Same as L16 Comp Lit 115

L15 Drama 120 First-Year Seminar: Race and Performance
What does it mean to “act black”? What about “acting Jewish”? This course looks at performances of racial and ethnic identity, mostly in the United States, mostly in the 20th century. We examine novels (such as Nella Larsen’s *Passing*), plays (such as Anna Deavere Smith’s *Fires in the Mirror*), and performances of everyday life (such as “Cowboys and Indians”) to investigate the performance of race in public. Once we begin to explore the social and cultural performance of race, will it all turn out to be “only” an act?
Credit 3 units. A&S: FYS A&S IQ: HUM, SD BU: BA EN: H

L15 Drama 135 First-Year Seminar Ideation: Idea Generation
Ideation exists at all phases of a creative process: brainstorming, idea generation, innovation, prototyping, development and actualization. But ideation is less like a line and more like a loop from observing to reflecting to making — and back again. It is a rarely understood but essential part of any creative or design process. Through collaboration and conversations with classmates, readings on the topic and group exercises, Ideation is a course that strives to define and demystify what we mean by “creativity,” help students identify their creative strengths and weaknesses, encourage artistic experimentation of new ideas, establish methods of design thinking and make it clear that collaboration among varied backgrounds and disciplines is the key to coming up with creative solutions for complex problems. Successful companies such as IDEO led by visionaries in the form of Tim Brown and David Kelley have pioneered the notion of Design Thinking. “Design thinking” is defined as “the ability to combine empathy for the context of a problem, creativity in the generation of insights and solutions, and rationality to analyze and fit solutions to the context.” This course encourages students to explore their collaborative talents in new ways that they find apply to virtually any discipline and career path: from A to Z.

L15 Drama 175 Designing Creativity: Innovation Across Disciplines
Via a series of lectures from prominent thinkers and practitioners in the areas of medicine, neuroscience, law, engineering, architecture, human-centered design, business, stage design, and the performing arts, Designing Creativity is a course that covers the study and practice of the creative process across many disciplines. From “Ah-ha” epiphanies to slow-developing discoveries, the creative process is employed by innovators and artists in virtually every corner of the globe. In this course, we explore the study of those processes by hearing from creatives in many fields with practice of those techniques via a lab component that allows students to explore the development of innovative ideas in collaborative teams followed by project presentations to core faculty and classmates.
Same as I50 INTER D 175

L15 Drama 200 Theater Projects
Independent study. Students may contract with a faculty supervisor for credit for their work on theatrical productions or research. Contracts must be signed by the student, the faculty supervisor and the coordinator of Drama 200 before the student's work on the project commences. Credit and grade option are determined in each case. Credit variable, maximum 3 units.

L15 Drama 201 Black Theater Workshop
Credit 3 units. A&S IQ: HUM, SC, SD BU: HUM EN: H

L15 Drama 202 Introdução to Theater Production
An introductory study of the major elements involved with mounting a theatrical production. Utilizing guest speakers in both theater arts and theater studies, the course addresses such topics as scenic, costume, lighting and sound design; production management and procedures; and the history and culture of theatrical space and design. Students are required to serve as a crew member on one departmental production and attend productions of the Edison Theatre Ovations series and the Performing Arts Department.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 204 Voice, Speech
Independent study. Credit variable, maximum 3 units.

L15 Drama 205 Literature, Theory, Criticism
Independent study. Credit variable, maximum 3 units.

L15 Drama 206 Public Speaking: Embodied Communication
The ability to speak well and to communicate effectively in the public forum is an essential skill for all students. This course aims to offer a comprehensive and wide-ranging approach to developing the skills of the contemporary speaker. While acknowledging and utilizing traditional approaches to public speaking, this course expands its reach to include applicable techniques from the world of the Performing Arts — especially theater and dance. The course does not intend to train the student as a dancer or actor, but it maintains that the successful speaker would do well to harness some of the transferable skill sets from these disciplines. The speaker, like the performer,
must stand before an audience with an objective to communicate something well. Both should be dedicated advocates for the message. They share the common ground of requiring a strong voice for a sure delivery of the material, and an expressive physicality willing to fully embody and serve the message. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 223 Cross-Cultural Women Playwrights
This course provides an introductory survey of the work of African-American, Caribbean-American, Asian-American and Native American women playwrights. We explore the playwrights' strategies for creating work that is by turns beautiful, fascinating, humorous, moving and occasionally terrifying as they chart for contemporary theater the intersection of race and gender in performative terms. Playwrights addressed include Adrienne Kennedy, Ntozake Shange, Suzan-Lori Parks, Anna Deavere Smith, Diana Son, Jessica Hagedorn, Cherie Moraga, Wakako Yamauchi, Migdalia Cruz, Spiderwoman Theatre, Marga Gomez and Velina Hasu Houston. Credit 3 units. A&S IQ: HUM, SD Art: HUM BU: BA

L15 Drama 227 Playwriting
An introductory course in playwriting. Limited to eight students. Prerequisite: Writing 1 and permission of the instructor. Same as L13 Writing 224 Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 228C Theater Culture Studies I: Antiquity to Renaissance
A survey of ancient, medieval and Renaissance theater and performance, both in the west and in the east, both as it reflects and shapes culture. Coverage will include the following areas: ancient Greece, ancient Rome, classical Sanskrit theater, Yuan China, medieval Japan, medieval Europe, Renaissance Italy, and Renaissance England. Both scripted theater and performance practices will be examined through the lenses of dramatic literature, theater history, performance studies, and dramatic theory. A continual emphasis will be on marginal and underrepresented figures, as we will attempt to excavate forgotten histories from the theatrical past. Credit 3 units. A&S: AMP A&S IQ: HUM Art: HUM BU: HUM EN: H

L15 Drama 229C Theater Culture Studies II: From Renaissance to Romanticism
This course provides a survey of theater history from the early 17th through mid-19th centuries, covering plays, theories of drama and acting, and the material conditions of theater production. We explore events in Asia, the Americas and Europe with particular attention to the Baroque era, Sentimentalism and Romanticism. The central objectives of the course are 1) to teach students to analyze plays in complex and creative ways, and 2) to cultivate understanding of the ways theater and performance practices reflect the philosophical ideas, aesthetic values, and sociopolitical realities of their historical context — even as these practices sustained and challenged such ideas, values and realities. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 230 Topics in Theater
Explores a variety of special interest topics in theater not included in the Theater Culture Studies sequence. Consult the course listings. Credit 3 units.

L15 Drama 239 Performance and Culture
What are Lady Gaga & Beyoncé doing? How do young men and women in poverty use performance for survival? Why do we create performance and for whom? In this class we apply the vocabulary and concepts of Performance Studies to social and theatrical worlds, understanding performance broadly: from popular culture to everyday life to theatre. To understand performance, we look closely at ethnographies, plays and dance literature. Subjects span a range of topics: racial impersonation, drag/house balls, celebrity culture, reality television, black-latino theatre, and slam poetry. Key course questions: How does performance inform everyday culture? How does culture inform popular culture and theatrical performance? This course takes seriously the "doing" and the "undoing" of things — as culture shifts, transforms and adjusts as bodies engage in the art of performance. Credit 3 units. A&S IQ: HUM BU: BA EN: H

L15 Drama 240E Acting I: Fundamentals of Acting
This course offers an opportunity to investigate the nature of the theater by way of performance. Students study a variety of theatrical texts in the most direct and experiential way, by acting in them. The course is designed for those who want to understand the interpretive work of the actor. Students are introduced to the practical work of building a character for the stage, and they also gain an understanding of how dramatic texts work both on the page and on the stage. Textual analysis, movement work and vocal production skills are developed using monologues, scene work and exercises. These skills also should provide significant benefits outside the confines of the class itself, in the professional and personal lives of the students taking this class. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 250 Topics in Stage Movement
This is a rotating topics course on movement for actors. Credit 3 units. A&S IQ: HUM

L15 Drama 2503 Introduction to Performance Art
The focus of this course is on the history, theory and practice of performance art and performance theater. The class engages in exercises that generate text, movement, sound and performance scores. Students create original performances that incorporate contemporary critical concepts. Performance production is supplemented by readings and videos that introduce the history and theory of experimental performance and work by specific performance artists. Credit 3 units. A&S IQ: HUM BU: HUM

L15 Drama 251 The Art of Storytelling
As one of the oldest forms of human communication, storytelling is part of both mundane interactions and carefully crafted events. For many of us, we tell stories regularly and in informal settings (e.g., when we tell a friend about an encounter we had in the cafeteria) as well as in professional settings (e.g., class or work presentations). But what, exactly, are the elements of a well-told story? How do we identify powerful storytellers? These
questions ground this course, and we will explore stories as forms through which to present oneself and to explain an event to others. We will study storytelling from two perspectives. First, we will look at stories through rhetorical analysis: we will focus on various examples of storytelling from across different genres (e.g., cultural myths, fables, spoken word, speeches, hip-hop, R&B, rock lyrics) to understand stories as an artistic practice, a teaching method, a shaper of identity, and a conductor of history. Second, we will consider stories through embodied practice: we will perform and present stories in chosen genres to gain firsthand experience in the conventions and forms of the embodiments that complete the act of telling well-crafted stories. At the end of this course, students will have gained theoretical knowledge about storytelling as an art form, and they will also have gained the practical skills needed to become confident storytellers.

Credit 3 units. A&S IQ: HUM Arch; HUM Art: CPSC, HUM BU: HUM EN: H

L15 Drama 256 Contemporary Comedy: Stand-up, Sketch and Improv

The United States is in the midst of a second comedy boom. The first boom, during the 1980s, turned stand-up comedy into a major force in American entertainment, creating stars like Jerry Seinfeld, Eddie Murphy, and Ellen DeGeneres. The second, which is defined in part by new social media, podcasting, and online video, is remaking the way comedians find their voices and their audiences. However, even as young comedians chart new paths through a dynamic media landscape, live performance is still the heart of the modern comedy universe. This class is a detailed survey of the contemporary American comedy scene. Pioneering artists from vaudeville through the 1970s are introduced, the stand-up boom of the 1980s is presented as a formative force in the comedy business, and alt-comedy is discussed as a stylistic watershed. Select modern theories of comedy are read and discussed, although we studiously avoid explaining jokes. Short units on improv and sketch comedy round out the syllabus. Assignments include practical exercises in performing comedy onstage, and students can choose to perform a short original stand-up set for their final assignment.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 257 Dance Theater Production

Experience in technical production. Required stage work includes two studio dance productions supervised by faculty. Prerequisite: Dance 212E.

Same as L29 Dance 257

Credit 1 unit. A&S IQ: HUM Arch; HUM Art: HUM BU: HUM EN: H

L15 Drama 271 The American Musical Theater Songbook

From its birth in vaudeville and musical reviews to current future classics such as "Hamilton," American musical theater has produced a voluminous catalogue of material referred to herein as the "American Musical Theater Songbook." Part survey and part performance, this course will focus on those composers, lyricists, performers, and subject matter that have been instrumental in defining musical theater and its role in describing a continually evolving human psychology and sociology. The performance aspect of the course will develop students existing vocal skills and knowledge of style. Because both singing and non-singing students are welcome to participate in this course, adjustments for non-singing students will be accommodated so that they may participate fully in the class. The format of the course will be a seminar of student-generated presentations, discussions, and workshop performances. A sampling of shows from which repertoire will be sourced includes the following: early song-and-dance shows ("Girl Crazy," "Anything Goes," "Kiss Me Kate"); Rodgers and Hammerstein ("Oklahoma!"); "Carousel," "South Pacific"); Stephen Sondheim ("Gypsy," "Sweeney Todd," "Sunday in the Park With George"); modern era ("West Side Story," "A Chorus Line," "Cabaret," "Hair," "Pippin"); and contemporary ("In the Heights," "Caroline, or Change," "Kinky Boots," "Dear Evan Hansen," "Hamilton"). This course serves as a prerequisite for L15 372.

Credit 3 units. A&S IQ: HUM Arch; HUM Art: HUM BU: HUM EN: H

L15 Drama 295 Portfolio Review

This course is intended as a one-hour credit to meet every Friday for two contact hours. While the main focus of this course is to dedicate time to learning and preparing a solid professional portfolio, résumé and webpage, this class also trains the students how to interact and conduct themselves through the interview process. We review numerous résumés from industry professionals, develop our own, develop both physical and digital portfolios consisting of students' academic and professional work, and culminate in building a strong and evocative webpage. Upon completion, the student has a solid understanding of the theater job market and be ready to face the world.

Credit 1 unit. A&S IQ: HUM EN: H

L15 Drama 296 Internship

Students may receive up to 3 units of credit for an approved internship with an organization where the primary objective is to obtain professional experience outside the classroom. Students must file a Learning Agreement with the Career Center, a faculty sponsor and the site supervisor. This must be approved by all three constituencies before proceeding. A final written project is agreed upon between the student and faculty sponsor before work begins, and is evaluated by the faculty sponsor at the end of the internship.

Credit variable, maximum 3 units.

L15 Drama 300 Production Practicum

Practicum experience in technical theater. Available positions include stage manager; publicist; assistant designer for costumes, scenery or lighting; or crew head of props, sound and makeup design.

Credit variable, maximum 2 units.

L15 Drama 3011 A History of African-American Theater

A survey of African-American theater from post-Civil War "coon" shows and reviews to movements for a national black theater, such as Krigwa, Lafayette and Lincoln, and the Black Arts Movement. Early black theater and minstrelsy; black theater movement and other ethnic theater movements in America. Critical readings of such plays as Amiri Baraka's Dutchman, Lorraine Hansberry's A Raisin in the Sun, Langston Hughes and Zora Neale Hurston's Mulebone. Also works by August Wilson, Ed Bullins, Charles Fuller, Georgia Douglas Johnson.

Same as L90 AFAS 301

Credit 3 units. A&S IQ: HUM, SC, SD Arch; HUM Art: HUM BU: HUM EN: H
L15 Drama 304 Makeup for the Stage
A hands-on introduction to the makeup techniques most commonly used for theater productions, including basic corrective, age, changing the shape of the face, and special effects, as well as the designing process. Students will apply makeup to their own faces and are required to purchase the makeup kit specified by the instructor.
Credit 2 units. A&S IQ: HUM EN: H

L15 Drama 309 Stage Technology
Practical study of technical theater procedures and scene shop; production techniques. Course outline includes lectures, demonstrations of equipment, production assignments and research-oriented project work. Prerequisite: Drama 212E or permission of instructor.
Credit 3 units.

L15 Drama 310 Stage Lighting
This course places an emphasis in the aesthetic practice of lighting design through the understanding of technology as it relates to time and space. Early on the student learns how to properly use and apply designer's tools and then through reading, research and experimentation explore the limitless boundaries of color and texture. This culminates in a stage design in collaboration with directing or dance class. Upon completion of the course, the student is able to speak eloquently on design theory and be able to move on to further design study in Drama 410 Advanced Lighting Design.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 311M Scenic Design
An introduction to the process of scenic design, as it relates to aesthetics, dramatic literature, collaboration and production. Projects involve design conceptualization, documentation, graphics and realization.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 314 Voice-Speech Laboratory
Fundamentals of speech for the stage focusing on breath support, resonance, articulation and speech as an expression of an individual's needs. The course includes an introduction to stage dialects. Preference given to majors.
Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 3201 Concepts in Theater Architecture and Performance Space
Can a cloakroom or a stairwell become a theater? How do site and placement affect the meaning potential of performance? How does contemporary environmental staging conjure a world different from that of the modern box set, the baroque perspective stage or Shakespeare’s Globe? We engage such questions by drawing on theory, history and hands-on creation to examine historical, actual and potential performance spaces. Readings in architectural and dramatic theory, theater history, performance studies and philosophy provide both a critical descriptive vocabulary and a conceptual repertoire for use in creative class assignments — both informing students’ investigations of actual theaters or other performance — ready spaces and provoking their creation of experimental performance spaces. Readings cover semiotic, materialist and situationist approaches to space, as well as concepts including site specificity, space vs. place, framing, perspective, miniature, the door, the curtain, the cloakroom and the monument.
Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 321 Topics in Theater
Explores a variety of special interest topics in theater. Consult the course listings.
Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 3212 Topics in Theater
Rotating topics course.
Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 3227 Devising, Adaptation, Docudrama
This course explores three ways of theatre-making that have revolutionized the contemporary stage: devising (a collaborative process emphasizing physical techniques to realize ideas), adaptation (the transposition of a narrative from one mode to another), and docudrama (the self-conscious staging of history through the assemblage of documentary records). Beginning with a focus on the current “postdramatic theatre” and the prehistories of these contemporary practices, we will engage current scholarship on each form, learning the “how” and “why” from contemporary practitioners, while considering the rhetorical structure of each form in relation to the social meanings they generate for their audiences. Divided into three units, the course will combine the study of each method with hands-on practice, and will conclude with a showcase featuring an original performance created by the student collective. A theme (variable by semester) will unite the three sections of the course, helping students see how a single topic can be illuminated in different ways through these three methods of creating performance.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L15 Drama 323 Topics in American Drama
A rotating topics course on various subjects relating to the history and theatrical practice of modern American drama.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 3301 Performing Gender
This course investigates an array of contemporary performances to explore manifestations of and challenges to gender norms in American culture. An initial reading of crucial performance theories by Judith Butler, Jill Dolan and others help set the stage for our examination of a diverse collection of contemporary texts, including plays, solo performances, stand-up and pop culture phenomenon. We raise questions about feminist performance strategies, butch/femme performance, camp, cross-dressing, feminist spectatorship, multimedia performances and the representation of lesbian desire. Prerequisite: any 100-level Women, Gender, and Sexuality Studies course.
Credit 3 units. A&S IQ: HUM, SD BU: BA EN: H

L15 Drama 3302 Culture & Identity: Black Lives Matter: Art, Theory, and Practice
Topics course focusing on instances of identity and culture within the American scope. Varies by semester, consult course listings for description of current semester's offering.
Same as L98 AMCS 330C
Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: CPSC, HUM BU: BA EN: H
L15 Drama 332 Comedy, Ancient and Modern
In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy.
Same as L08 Classics 385W
Credit 3 units. A&S IQ: HUM, LCD, WI BU: HUM EN: H

L15 Drama 336 Modern Drama

L15 Drama 3361 Modern Drama, 1945 to the Present
Course concentrates on the development of modern drama from 1945 to the present. Focus is on both literary and theatrical techniques as well as the examination of trends in the contemporary theatre from Samuel Beckett through Sam Shepard. Perspective is comparative and international in scope, with particular attention given to women and minority playwrights.
Same as L14 E Lit 3361
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

L15 Drama 338 Physical Theater: An Exploration of Viewpoints and Suzuki Training
In this course students study two very different but complementary styles of movement training. Developed by the Saratoga International Theatre Institute, this method of actor training combines the improvisational exploration of time and space through "Viewpoints" with the rigid structure and physical demands of the Suzuki method. This combined approach is designed to develop heightened awareness and acute focus in the performer. In addition, it fosters greater impulsion and freedom in the moment while maintaining discipline and control. Students gain flexibility and strength and enhance their creative potential by balancing these seemingly opposing methods.
Prerequisite: Drama 341 Acting II Fundamentals of Movement or Dance 106E Introduction to Dance as a Contemporary Art Form.
Credit 3 units.

L15 Drama 340 Topics in Stage Movement
Exploration of a variety of theatrical and movement concepts with emphasis on process rather than product. Concentrates on developing the expressive flexibility of the body and linking the imaginative impulse with physical movement. Preliminary work in relaxation and efficient self-use. Prerequisite: Drama 240E or permission of instructor.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 341 Acting II
Fundamental scene study using texts with emphasis on integration of voice and body and the playing of actions. Students are encouraged to precede this course with Drama 207C. Prerequisite: Drama 240E. Preference given to majors.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 342 Acting III
Emphasis on characterization while working with a diversity of playwriting styles. Prerequisites: Drama 341, either Drama 207C or 208C, and permission of instructor.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 343 Fundamentals of Directing
Directing is the most liberal art of the creative theatre-making areas, drawing on analytical, critical thinking, communication, design, and actor-coaching skills. This course will explore fundamental lessons in some of those areas, including text analysis from a directorial perspective, stage composition, auditions/casting, actor communication, time management, and team leadership skills. Major course components will include two extensive script analysis papers and the direction of two scenes, which will require considerable outside-of-class rehearsal time.
Prerequisites: Drama 212E, Drama 240E, Drama 229C or permission of instructor. Preference given to drama majors.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 347 Shakespeare Globe Program: Acting
This Acting Shakespeare course is paired with Drama 3472 as part of a four-week summer intensive program held at the Shakespeare's Globe Education Centre in London. This course, as well as the companion Text and History course (Drama 3472), is taught by a Washington University faculty member, and the program also draws heavily on British theater professionals and educators from Globe Education, who teach a set of short courses on movement, voice, textual analysis, historical context, monologue performance and stage combat. Frequent access to the Globe stage allows actors to work in a spatial configuration very similar to that once used by Shakespeare's company itself. The course culminates with performances of scenes and monologues on the Globe stage. Application process must initiate through the Performing Arts Department office.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
L15 Drama 3473 Shakespeare and Early Modern Performance

Paired with Drama 347 Shakespeare Globe Program: Acting, this course uses the resources of London and the Globe Theatre as departure points for an examination of Shakespearean performance in its historical and cultural context. We pay close attention to the dramatic text: meter, style, metaphorical language, dramatic composition, rhetoric, genre, etc. We consider such topics as Shakespeare's playing spaces, the actor-audience relationship in the Globe Theatre, acting, movement, original rehearsal practices, the boy actor, costumes, sound, music, props and the culture of the Bankside (bear-baiting, taverns, violence, prostitution, etc.).

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 3491 Media Cultures

This course is an introduction to the interdisciplinary field of cultural and media studies. Through a focus on television and new media, it analyzes current theoretical ideas and debates about culture. Main topics include the relationship between new technologies and everyday life and popular culture; analysis of media messages and images; how media help construct new identities and mark differences between groups; analysis of the globalization of the production and circulation of media culture; the rise of multimedia cultural industries; and the role of the audience. Required screenings.

Same as L53 Film 340

Credit 3 units. A&S IQ: HUM BU: BA EN: H

L15 Drama 351 Intro to Playwriting

Same as L13 Writing 351

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 361 Stage Management

A practical approach to the study of theater stage management focusing on organizational and communication skills. Workshops, lectures and discussion; guest speakers and field trips covering the pre-production, rehearsal and performance periods; labor relations/performing arts unions; career opportunities; and supporting the vision of the artistic team. Prerequisites: Drama 212E and Drama 240E.

Credit 3 units.

L15 Drama 365C Theater Culture Studies III: Melodrama to Modernism

The third in the department's three-course history sequence, TCS III surveys the dramatic literature and cultural history of the modern theater. Beginning with Romanticism's self-conscious break with the past, we'll study the rise of bourgeois melodrama with its intensely emotional rendering of character and spectacular effects. We'll consider how those effects were made possible by advances in industrial stage technology which reproduced the everyday world with unprecedented verisimilitude, and how playwrights responded to those technologies by calling for the theater to become either a "total work of art" — plunging its spectators into a mythical realm — or a petri dish — analyzing the struggles of the modern individual within their modern milieu. Exploring a range of aesthetic modes — including Realism, Naturalism, Symbolism, Expressionism, the Epic Theatre, and the Theatre of the Absurd — we will read classic plays by modern playwrights to consider how the modern theatre helped its audiences understand as well as adapt to the rapidly changing conditions of the modern world.

Credit 3 units. A&S IQ: HUM WI: ETH, HUM BU: ETH, HUM EN: H

L15 Drama 367 Introduction to Drafting for the Theater

This course provides the student with a basic understanding of all of the various types of technical drawings needed to successfully execute a scenic design. Throughout the course, the student masters all the technical and aesthetic skills needed to produce clean and effective drafting for the theater. In order to successfully complete this class, the student is required to purchase a drafting board and related drafting materials.

Credit variable, maximum 3 units.

L15 Drama 368 Black Theater Workshop III

A performance-oriented course that explores the black experience through acting, directing and playwriting. Students develop through classroom improvisation short performance pieces during the semester. They also are required to attend three to five plays. Each student must participate in a final performance which is in lieu of a written final examination.

Credit 3 units. A&S IQ: HUM, SD Art: HUM EN: H

L15 Drama 372 Advanced American Musical Theater

This course focuses on developing the acting, singing and dancing techniques required for performing in musical theater. The student develops group pieces and participates in scenes that explore character within a musical theater context. The class culminates in a workshop performance. Prerequisites: Drama 221 and permission of instructor, by audition. Repeatable one time for credit.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 374 Theories of Modern Drama

What makes modern drama "modern?" How does it differ from the drama of other cultural movements? When does the modern period begin? This course takes up such fundamental questions in order to examine not only the influential plays that have come to define the "canon" of modern drama, but the various theories that have been proposed as a way of understanding them in relation to the history of Western culture. From Friedrich Nietzsche's The Birth of Tragedy to Walter Benjamin's thesis on the Trauerspeil to Emile Zola's Manifesto on Naturalism in the theater, we start by considering when modern drama begins and what constitutes its defining features. With such provisional definitions in place, we then engage the responses of fellow modernists such as Richard Wagner, William Archer, T.S. Eliot, Bertolt Brecht, Georg Lukacs and Theodor Adorno. We also consider whether so-called postmodern drama has broken with the modern period to introduce something altogether new, and how recent debates concerning interculturalism, the ideology of form and performance invite new ways of understanding the cultural function of modern drama and its legacy in our own historical moment.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L15 Drama 3751 Methods & Visions: Audiences, Spectators, and Fans

Required course for AMCS majors. Refer to semester listing for current topic. As a Writing intensive course, this course serves as an occasion for students to think about matters of argument and presentation, and to develop ideas and models for future research. This course is intended for students at the junior level or higher; it fulfills the “multidisciplinary” (MD) requirement for...
AMCS minors and the “Methods Seminar” requirements for AMCS majors.
Same as L98 AMCS 375A
Credit 3 units. A&S IQ: HUM, WI; Arch: HUM; Art: HUM; EN: H

L15 Drama 378 Contemporary American Theater
This course is a focused investigation of the aesthetic, political, and urban landscapes of the contemporary American theatre. We will read published and unpublished plays, familiarize ourselves with the country’s most important companies, festivals, and institutions, and discuss issues facing the American theatre now. We will explore the role of the arts in urban planning and development, and address the relationship between higher education and arts institutions, paying particular attention to ideas of community engagement and social justice work undertaken by both. Artists to be studied may include Tony Kushner, Suzan-Lori Parks, Caryl Churchill, Branden Jacobs-Jenkins, Lynn Nottage, Young Jean Lee, and Lin-Manuel Miranda. This course will include a mandatory class trip at the end of March to the Humana Festival of New American Plays in Louisville, Kentucky. Students will prepare for this trip by reading the works of featured playwrights and establishing a research project that will be carried out on-site. Findings from the research project will be presented upon the return to St. Louis. Admission to the course is by instructor permission only; an application form will be sent to all registered students at the conclusion of the registration period. In consultation with and with the permission of the instructor, this course may fulfill the Fieldwork requirement for American Culture Studies majors.
Credit 3 units. A&S IQ: HUM; Arch: HUM; Art: HUM; BU: HUM; EN: H

L15 Drama 379 Expressionism in Theater and Film
This course is designed as an advanced introduction to the aesthetic movement of Expressionism as it appeared in Germany and the United States in the media of theater and film. Characterized by stylized settings that “ex-press” the internal spiritual/mental/emotional/psychological state of its central character, Expressionism is usually discussed as a reaction to Realism, given its overt symbolism, telegraphic diction and episodic action. Beginning with a brief general introduction to the movement (including its manifestation in the visual arts), we consider its cultural, political and critical history, while exploring more recent scholarly investigations into the significance of its performance dimensions.
Credit 3 units. A&S IQ: HUM; Art: HUM; BU: HUM; EN: H

L15 Drama 392E Greek and Roman Drama
Survey of the tragic and comic dramas produced in Ancient Greece and Rome. Study of the plays’ religious and civic performance contexts, responses of the ancient audiences, and literary interpretations.
Same as L08 Classics 392E
Credit 3 units. A&S IQ: HUM; Art: HUM; BU: HUM

L15 Drama 393 The Tragic Muse
Intensive study of the major tragic playwrights of Ancient Greece (Aeschylus, Sophocles and Euripides) and some of their imitators and critics in the Western tradition. We consider tragedy’s origins, its literary elements and theory, its performance and religious contexts, and its social functions. Lectures with discussions.
Same as L08 Classics 393
Credit 3 units. A&S IQ: HUM; BU: HUM; EN: H

L15 Drama 3950 American Musical Film
Film musicals were crucial to the success of the American film industry from the dawn of sound film in the late 1920s to the demise of the studio system in the late 1950s. This course examines the American film musical from a variety of aesthetic, critical, and historical perspectives, with particular attention to how the genre interacted with popular music and dance and the major political and social trends of the Thirties, Forties, and Fifties. Required screenings.
Same as L93 Film 359
Credit 3 units. A&S IQ: HUM; BU: HUM; EN: H

L15 Drama 396 History of Western Costume
Of particular interest to fashion, history, anthropology, and performing arts majors, this course is an exploration of the clothing worn by predominantly Western cultures, from Ancient Greece through the 1890s. Lectures incorporating images of extant garments, sculpture, art, and photographs will inspire discussion regarding the influences on fashion evolution and the cyclical nature of fashion. Assessment is by exam, the first of which will be during the fourth class meeting, so this is not a recommended course to “shop.” Please note that this class is a prerequisite for History of Western Costume in the 20th Century, which is offered during the spring semester.
Credit 3 units. A&S IQ: HUM; Arch: HUM; Art: HUM; BU: HUM; EN: H

L15 Drama 3975 Wolves of Wall Street: American Business and Popular Culture
America’s perceptions about Big Business and the Free Enterprise system have evolved and changed over time from the 1920s to the present. During the 1980s, for example, Oliver Stone’s Wall Street seemed to endorse the notion that “greed is good.” Today, however, the topic of rising income inequality has been connected with the collapse of prestigious Wall Street firms, the “housing bubble,” a declining middle class, and widespread fear about the future of “The American Dream.” This new course examines a variety of artistic, ethical and historical perceptions about American Business as depicted in popular culture and the arts over the past hundred years. How have America’s foremost artists (among them F. Scott Fitzgerald, Eugene O’Neill, Arthur Miller, Martin Scorsese), dealt with questions of conspicuous consumption, the acquisition of capital for its own sake, and the disparity between rich and poor? We survey several artistic genres and artistic forms, including American tragic works like The Great Gatsby and Death of a Salesman, to popular musicals such as How to Succeed in Business without Really Trying and The Producers.
Same as L98 AMCS 3975
Credit 3 units. A&S IQ: HUM; BU: HUM; EN: H

L15 Drama 400 Theatrical Rendering for Scenery
An exploration of media and rendering techniques used for presentation of design ideas in scenery. A variety of stage sets, still lifes and figure drawing are rendered during a two-hour studio format with some additional studio time required. Materials are provided by students.
Credit 3 units.

L15 Drama 4001 Computer-Assisted Design for the Theater
This course is an in-depth study of how computers can assist designers in drafting and rendering processes. Primary study is focused on the program Vectorworks. We fully explore the
use of this program in development of scenic and lighting design projects from basic line drawings to fully rendered 3D images. Other programs covered are Autocad, Google Sketch Up, AG132, Photoshop CS3 and some lighting design previsualization software. Projects are centered on theatrical applications and based on students’ imaginations. Credit 3 units. A&S IQ: HUM: EN: H

L15 Drama 403 Dramaturgical Workshop
A laboratory course that investigates dramaturgy from four vantage points: New Play Dramaturgy, Institutional Dramaturgy, Dramaturgy of Classics and Dramaturgical Approaches to Nontraditional and Devised Theater. This is a “hands-on” course where student dramaturges not only pursue the study of dramaturgy, but work actively and collaboratively with playwrights, actors and each other. Prerequisite: Drama 343. Credit 3 units. A&S IQ: HUM: Arch: HUM: Art: HUM

L15 Drama 4031 Black and White in American Drama
This course addresses the complex issue of race in America through the 19th and 20th centuries as dramatized by American playwrights, black and white. Authors include Countee Cullen, Lillian Hellman, Eugene O’Neill, Jean Toomer, Langston Hughes and Arthur Miller. Prerequisites: junior standing, two 300-level courses or better. Same as L14 E Lit 403 Credit 3 units. Art: HUM

L15 Drama 404 Topics for Writers: Beckett
Waiting for Godot, Happy Days, Krapp’s Last Tape. These are but three of Samuel Beckett’s revolutionary texts for theater. The complete canon of plays are examined for structure and compositional elements. Students undertake exercises in dramatic composition and perform a chamber presentation of Endgame. Course is intended for writers with some experience of the dramatic form. Intending students must interview with instructor Nov. 12-14. Same as L14 E Lit 404 Credit 3 units. Art: HUM

L15 Drama 4081 Theater for Social Change
Drawing upon the principles and teachings of Brazilian director Augusto Boal, students explore ways of effecting positive social change in a theatrical context. Students study the aesthetic of Boal’s Theatre of the Oppressed and learn various games and exercises designed to mine issues of social (in)justice. Using Boal’s techniques of “image” and “forum” theater, students then create and perform plays focused on these issues. This public performance is an interactive event offered for and with the university community. No prior performance training or experience is required for this course. Credit 3 units. A&S IQ: HUM, SC, SD Art: CPSC EN: H

L15 Drama 4082 Advanced Theater for Social Change
This course is a continuation of exploration begun in Drama 4081, Theater for Social Change: a prerequisite for this advanced course. Students expand from exploring their own experience with oppression to facilitating that exploration with others. Students are introduced to the “Joker” system, developed by Brazilian director Augusto Boal. The Joker is the director of a forum theater event. He leads both the exploration and playmaking phases of the process. In preparation for stepping into this role, students read Paulo Freire’s Pedagogy of the Oppressed, which gives them a foundation in the power and efficacy of collaborative educational techniques. In addition, students read Theatre for Living, Canadian director David Diamond’s book detailing his application of Boalian techniques in a less overtly oppressive society. Students begin their practical exploration by first working with one another, learning how to lead exercises and games, followed by an exploration of playmaking and the facilitation of an interactive forum theater event. The course culminates in an outside project in which each student is placed with a St. Louis area school or social organization. The student applies skills they have acquired throughout the semester by serving as the “Joker” of the workshop. In this role, the student leads the entirety of the workshop process with a selected group exploring ways of effecting positive social change in a theatrical context. The student facilitates exercises with the group that mine a chosen area of oppression with which the group is grappling. The student guides playmaking with the group that highlights this area of oppression. The resulting plays are presented then to the larger school or organization community. This culminating event is an interactive forum theater presentation that the student leads as “Joker.” Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM: EN: H

L15 Drama 409 The Modernist Revolution in the Arts
What is/was Modernism? How did this worldwide phenomenon impact the arts in every genre and medium from the turn of the 20th century to the present? Do we still live in the age of Modernism, or should we consider ours a new, Postmodern age? This course examines these and other questions as they relate to the theater, prose, poetry and the visual arts. Our investigation focuses on most of the major literary and artistic movements, including Naturalism, Impressionism, Symbolism, Surrealism and Expressionism. We examine literary manifestoes that help to illuminate the periods under discussion, as well as look at individual works themselves. Central to our approach in the course is an interdisciplinary perspective. Among the luminaries whose work is considered are Ibsen, Strindberg, Chekov, Hemingway, Dali, Picasso, Stravinsky, Artaud, Kafka and Beckett. Credit 3 units. A&S IQ: HUM Art: HUM

L15 Drama 410 Advanced Stage Lighting
An advanced-level continuation of Drama 310. Emphasis is placed on design aesthetics and their application in a laboratory setting. Students explore color theory, lightboard programming and design analyses as well as execute a variety of finished projects. These projects cover a wide range of production styles and performance venues. Prerequisite: permission of instructor. Credit 3 units. A&S IQ: HUM: EN: H

L15 Drama 4101 Lighting Technology
Lighting Technology is an extremely hands-on approach to learning how the top industry designers create major shows and concerts with the most state-of-the-art equipment. We spend a considerable amount of time learning how to use and program robotic/moving lights, LED fixtures and video integration for use in drama, dance, musical and concert settings. The student gains intensive training in the use and programming of the ETC Express, ETC Ion and GrandMA 2 Light consoles with a full range of Vari*Lite robotic fixtures. In addition, the student receives training in Isadora, a very powerful video design program. Prerequisites: Drama 212 and Drama 310.
assumptions upon which it is based. This course is open to in-residence and a master teacher in the St. Louis or Normandy — in consultation and collaboration with an Interchange artist— a core subject area that incorporates the performing arts. Then Credit 3 units.

L15 Drama 4234 Performing Knowledge: Arts Integration Pedagogy in Theory and Practice
This course invites students interested in the performing arts to apply their talents to the K-12 classroom through a service-learning component that allows them to develop and implement an arts-integrated curriculum grounded in current research in the cognitive sciences. Divided into four units, the course begins with a survey of recent research in cognitive science that traces the effects of arts-related activities on brain development. The second unit builds upon that theoretical grounding, focusing on concepts necessary for examining the convergence of performance and politics (such as representation, ritual, spectacle, body, mimesis, propaganda, etc.) while also paying special attention to the politics of funding and censorship that has governed the creation and presentation of dance in the United States. No dance experience is necessary. Same as L14 E Lit 431
Credit 3 units. A&S IQ: HUM BU: BA EN: H

L15 Drama 4261 Performing the Political in American Dance
This course is an exploration of the politics of performance and the performance of politics through the lens of American dance in the 20th and 21st centuries. Through readings, screenings and discussion, we will examine the ways in which American dance developed against and alongside political movements in the United States, particularly ones concerning nationalism, race, gender and human rights. We will also investigate how the lens of dance and choreography offers an expansive means to conceptualize political questions of citizenship and social protest, broadening our understanding of embodied performance. Guided by several key philosophical texts, our class will focus on concepts necessary for examining the performance of politics and performance (such as representation, ritual, spectacle, body, mimesis, propaganda, etc.) while also paying special attention to the politics of funding and censorship that has governed the creation and presentation of dance in the United States. No dance experience is necessary. Same as L29 Dance 426
Credit 3 units. A&S IQ: HUM, LCD, SC, SD, WI Art: CPSC BU: BA EN: H

L15 Drama 431 English Drama Exclusive of Shakespeare to 1642
Studies of selected major plays against a background of change and tradition in English drama from its beginnings to the closing of the theatres. Same as L14 E Lit 431
Credit 3 units. Art: HUM

L15 Drama 432 Topics in Renaissance Drama
A study of Elizabethan and Jacobean theatrical culture — the plays, players, playwrights and audiences of public theaters, private theaters and banqueting halls. Study includes the plays of Lyly, Kyd, Marlowe, Jonson, Chapman, Ford, Beaumont, Fletcher, Marston, Middleton, Webster and Shakespeare. Same as L14 E Lit 432
Credit 3 units. A&S IQ: HUM Arch: HUM BU: HUM BU: HUM EN: H

L15 Drama 435 Expressionism in the Arts
A close study of expressionism as an international phenomenon in the arts, from the anti-naturalist movements of the 1890s to Hitler’s condemnation of expressionism as decadent. The evolution of expressionist theater from Wedekind to Toller and Kaiser and such composers as Schoenberg and Berg; in the visual arts, such groups as Der bluie Reiter and Die Brucke, such independents as Kokoschka; in cinema, such figures as Pabst, Murnau, Von Sternberg and Lang. Prerequisite: Drama 208E, Drama 336 or permission of instructor.
Credit 3 units. Art: HUM

L15 Drama 436 Seminar in Comparative Drama
The course begins with Plato’s critique of mimesis and Aristotle’s defense, as we read The Poetics as a response to Plato. We take some of Aristotle’s basic concepts, such as mimesis, plot, character and thought, and attempt to apply them to drama up to the present day. We also consider fundamental elements
L15 Drama 437 Performing Ghosts: Blackness, Performance, and Archival Erasure
Taking ghost as apparition, metaphor, an imaginary, and type of possession, this course focuses on the intersections between performance, affect theory, and archival practice to investigate how scholars and artists contend with the psychic and affective terrors against blackness. Part of these terrors, the course asserts, happened and is happening in the realm of the affective, ephemeral and archival. Moving across theoretical works, literature and theater, our readings differently query: How can performance enable us to recuperate the lives of those violently erased from the archive? How to imagine embodiment for subjects “tracked” by history, such as black folks whose bodies suggest other forms of pathology, like sexual deviancy, mentally “insanity,” and other forms of criminalization? How have attachments to ghosts been used as a methodology to stage and reperform blackness in the past and in the present? And lastly, how can we capture embodiment (or enfleshment) without live bodies? By rethinking “liveness,” “absence,” “loss” and “remains,” the readings and discussions will offer performance as a methodological and analytical infrastructure to conduct historical and/or archival research.
Credit 3 units. A&S IQ: HUM, SD Art: CPSC EN: H

L15 Drama 4370 Music and Performance
In his 1998 book, Musicicking, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater and rock. We examine artists whose work blurs the line between “music” and “theater,” including George Clinton, Taylor Mac and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome.
Same as L98 AMCS 4370
Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 440 Acting IV
Acting IV synthesizes the student’s performance training; creative and scholarly writing skills; and knowledge of dramatic literature. The advanced acting student is encouraged to develop and articulate his/her own aesthetic convictions. The course includes intensive solo performance projects, including writing and performing original monologues. Also, significant emphasis is placed on preparing the student for the work of professional acting, including workshops on audition monologues, head shots, résumés and economic issues. In addition, the students become familiar with various American theater cities, the regional theater system, and prominent working theater artists. The course closes with a public performance of the original, scripted and audition material developed over the semester.
Prerequisite: Drama 342.
Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 444 Directing II
Further study in the fundamentals of directing. Emphasis on the director’s work with actors, designers and a realized metaphorical concept. Prerequisites: Drama 343 and permission of instructor.
Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 445 Seminar
Rotating upper-level seminar. Senior seminar normally offered each semester and meant to satisfy the 400-level requirement for the drama major.
Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 4452 Senior Drama Capstone
This course, which is required for seniors completing the drama major, is team-taught by one PAD faculty member in Theater Arts and one in Theater and Performance Studies. In order to remain responsive to each senior class as well as the particular expertise of the faculty pair, the course is built on a flexible curricular model. Components will include an exploration of contemporary theatre literature and theatre-making, individual and ensemble-based activities, research and critical writing projects. A culminating project that synthesizes the semester’s study will be part of the course.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L15 Drama 446 Japanese Theater
An investigation using English materials, of the major developments and forms of the Japanese theater, from Noh and its antecedents to the rise of a modern drama. In this course we are less concerned with the performative aspects of theatrical arts (though these will be introduced via videos) than with the ways in which dramatic texts influenced and borrowed from the literary tradition. Readings from major theatrical texts, secondary studies on Japanese theater, and literary sources. Prerequisite: junior standing or permission of instructor.
Same as L05 Japan 446
Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM EN: H

L15 Drama 448 The History of Theater Design
Survey course covering the history of the performance space and the scenic design elements contained within that space. The visual elements and theater architecture of each period are examined in relationship to the art and technology of the time. Prerequisites: Drama 207C or Drama 208C, and Drama 212E.
Credit 3 units. Art: HUM

L15 Drama 449 Seminar in Dramatic Theory
This course is an in-depth exploration of core works of dramatic theory from the ancient world to the present, and studies texts
that enunciate what theater is, has been, and should be. We study authors' expressions of theater's role in society, their articulations of and responses to anti-theatrical prejudice, and their negotiations of the contradiction of putting "the real" on stage. Other significant themes include: accounting for the aesthetic pleasures of drama and theater; theater as a means of educating the citizen; and the relationship between dramatic form and social and political revolution. Moving chronologically, we begin with foundational documents of the ancient world, including Aristotle's *Poetics*, Bharata's *Natyasastra*, and Horace's *Ars Poetica*. The course then progresses through the Middle Ages, the Neoclassical and Romantic eras, and the explosion of fin de sicle avant-gardes. We also read key texts from beyond the European tradition, including works of dramatic theory written in medieval Japan (Zeami), postcolonial Nigeria (Soyinka), and the millennial, multicultural U.S. (Parks). Along these same lines, we also are attuned to transnational exchange and influence, particularly as it appears in the 20th-century theories of Bertolt Brecht, Antonin Artaud, and Konstantin Stanislavsky. Though focused on efforts to describe and prescribe theories of drama, dramatic genre, and theatrical pleasure, the course also positions play scripts alongside the theoretical treatises that guide or are guided by them. Credit 3 units. A&S IQ: SSC EN: S

L15 Drama 450 Advanced Scenic Design
Advanced projects in scenic design including drafting, rendering, model building, and conception. Prerequisite: Drama 311M, or permission of instructor. Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 451 Topics in Period Style: Baroque Opera and Neoclassical Style
An exploration of the dynamic interplay between high Baroque culture and the perceived style of the ancient Greeks and Romans. Primary sources used are paintings, sculpture and renderings for Baroque operas, as well as rare artifacts which exist from that time as these sources relate to classical evidence extant in that period. Secondary sources are journal articles and records of fully staged productions of intervening years. Primary interest is retracing the thought processes of the designers of Baroque opera. Focus is on Purcell's *Dido and Aeneas*, looking at the libretto and its relationship to source texts, both ancient and contemporary, and also its place within the cultural history of the theatre. Projects include: in-class presentations and a research paper or fully realized design project. Credit 3 units. A&S IQ: HUM

L15 Drama 453 American Drama
Topics in American Drama. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L15 Drama 455 Practicum in Arts Management
Assigned work and projects under faculty supervision in Washington University's Edison Theatre or off-campus cooperating institutions. Prerequisite: permission of instructor. Credit variable, maximum 3 units.

L15 Drama 456 A Madman in the Theater: The History of Insanity on Stage from Sophocles to Shaffer
The image of the madman and the theme of insanity have been extraordinarily captivating to theater artists from the Greeks to the present. In this course we consider some of the most remarkable examples from the classical period, including Sophocles' *Ajax* and Euripides' *Medea* and *The Bacchae*, and the Renaissance (Hamlet, Othello, The Spanish Tragedy, The Duchess of Malfi, Life is a Dream). We investigate these works both for what they tell us about the image of the madman in the historical period and culture in which they were written as well as in order to closely examine the texts themselves. We also examine plays from the 19th and 20th centuries, including Buchner's *Woyzeck*, O'Neill's *Emperor Jones*, Anouilh's *The Madwoman of Chaillot*, Miller's *Death of a Salesman* and Shaffer's *Equus*. Finally, the course makes extensive use of the Performing Arts Department's production of Peter Weiss' extraordinary work *Marat/Sade* and incorporate theoretical writings such as Michael Foucault's *Madness and Civilization* into discussions. Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

L15 Drama 459 The Filmed Stage Play
Close textual analyses of stage plays and their film adaptations, examining structural parameters such as space, time point of view, spectator position and performance in the two art forms. Prerequisite: permission of the instructor. Credit 3 units.

L15 Drama 460 The Creative Impulse
Developed with the director and designer in mind, this course encourages imaginative theater making by developing the student's own sense of creative confidence and ability, by expanding the source options for artistic inspiration, by recognizing and valuing the synergistic properties of transcendent theater making, and by strengthening the collaborative skills essential to the art. The course includes creativity exercises, comprehensive forms of text analysis, exploration of other art forms, cooperative conceptual projects, and field trips to area productions and museums. Students is expected to complete several individual projects, presentations and research papers, as well as intensive small-group projects. Prerequisite: one of the following courses: Drama 307, 310, 311 or 343. Credit 3 units. A&S IQ: HUM

L15 Drama 465 The Chinese Theater
Survey of the performance and literary traditions of the Chinese theater from their pre-Tang origins to the present day. The course focuses on three forms: 14th-century zaju plays, 16th- and 17th-century chuanqi plays, and recent films from China, Taiwan, and Hong Kong. Background in either China studies or theater in other cultures recommended. Same as L04 Chinese 467 Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

L15 Drama 469 Topics in Shakespearean Production
This course examines Shakespeare's comedies in performance. Combining scene work and production history, students gain access to the world of the comedies from a hands-on, theoretical and historical perspective. Prerequisites: Drama 395C or permission of instructor. Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 4691 Shakespeare and Early Modern Performance
Credit 3 units.
L15 Drama 471 Millinery Design and Construction
A hands-on course exploring the major sewing and patterning techniques used to make hats from a variety of materials in a variety of styles. Students will be required to purchase some of their own materials to create several hats over the course of the semester. Prerequisite: Drama 207 or sewing equivalent or permission of instructor. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L15 Drama 473 Advanced Playwriting
This course explores the tendencies and relationship between each individual student writer and the page. Exercises dispel any lingering doctrine that presupposes a certain style of writing. A large part of the class centers around collaborations. The writers write scenes as a final project for an acting class, and also work with two professional actors in an extended writing project that culminates in a script-in-hand presentation. The informal moments between collaborations look at the process beyond the first draft — i.e., the playground of language, nonverbal options, and the maintaining of "the work" through rewrites, readings, workshops and productions. Prerequisite: Drama 227. Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 474 Acting Theories
This course explores in depth the major theoretical texts on acting and performance theory. Pertinent philosophical texts, dramatic theories, acting systems and methodologies are studied. The survey operates chronologically from early documents on acting (Greek, Roman, Italian Renaissance) through to modern and contemporary documents that inform acting and acting training today (Stanislavsky, Brecht, Grotowski, Meisner, Spolin, Suzuki). Methodologies and practices of select major stage actors are explored as well. In some cases, directing theories that have had major influence on acting theory are examined. Credit 3 units. A&S IQ: HUM

L15 Drama 479 Fundamentals of Sound Design
Encompassing both creative and technical aspects of sound in the performing arts, the course gives theoretical knowledge of and practical experience in the following areas: fundamental rules of physics and electronics related to sound, use of standard digital recording studio equipment, "training" of the ear, and basic techniques of sound montage. Students are expected to participate in a variety of conceptual and research-oriented exercises as well as complete several lab projects. Sound-related work on Performing Arts Department productions may be required. Prerequisites: Drama 212 and permission of instructor. Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 487 Theater Culture Studies Seminar
Rotating upper-level topics course. Topics come from Theater Culture Studies sequence. Credit 3 units. A&S IQ: HUM, WI

L15 Drama 491 Staging Illness
"Suddenly some force struck him in the chest and side, making it still harder to breathe, and he fell through the hole and there at the bottom was a light." This quotation, from Tolstoy's story "The Death of Ivan Ilyich," offers an example of how artists have employed serious or life-threatening diseases as a means of illuminating both physical suffering and spiritual rebirth. Even as it invades the body and isolates us from our fellow man, illness may offer opportunities for spiritual growth and renewal, serving as an apt metaphor for human survival in times of extremis. In her brilliant essay, "Illness as Metaphor" (1978), Susan Sontag takes issue with how illnesses like tuberculosis were misunderstood or even romanticized during the 19th century in works like Dumas's "Camille" and Puccini's "La Boheme." During the AIDS crisis in the 1980s and 1990s, American artists — particularly theatre artists, whose communities were decimated by the disease — were forced to consider how this global pandemic impacted their lives, especially at a time when the term AIDS was not even mentioned by the President of the United States. In conjunction with the Performing Arts Department's 25th anniversary production of Tony Kushner's extraordinary play, "Angels in America, Part One: Millennium Approaches," this new course examines how disease has been a focal point of artistic inquiry over the course of centuries. By examining works that are focused on illness throughout history, this seminar offers both a deeper understanding of and context for Kushner's masterpiece and the AIDS crisis, and it considers how illness has always been an important subject for the investigation of what it means to be fully human. Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

L15 Drama 493 Senior Project
Specialized study in a selected area in drama. Required of all drama majors not taking Drama 499. Prerequisite: 15 units of advanced work in drama at the 300 or 400 level. Credit 3 units.

L15 Drama 497 Performance Theory
This course introduces students to contemporary theories of performance, with "performance" understood as both metaphor and event. From a multidisciplinary perspective, students consider how cultures produce meanings — and, indeed, perform those meanings — to create and/or disrupt their own social coherence. Theories likely to be studied include: J.L. Austin's speech-act theory and its engagement by John Searle and Jacques Derrida; Victor Turner's analysis of ritual as social process and Richard Schechner's use of it to transform "theater studies" into "performance studies;" Erving Goffman's sociology of the self and its relation to a post-structuralist model of subjectivity; Michael Fried's screed against minimalist art and its relation to Happenings, Body Art, Fluxus, and other mid- to late-20th century examples of "performance art;" and Judith Butler's influential revision of Austin's performative in her theory of queer "performativity. Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 499 Study for Honors
Prerequisites: senior standing, a cumulative and a major GPA of 3.5, and permission of the chair of the Performing Arts Department. Credit variable, maximum 6 units.

L15 Drama 4990 Independent Work
Students may contract with a faculty supervisor for credit for their work on theatrical productions or research. Contracts must be signed by the student and the coordinator of Drama 500 before the student's work on the project commences. Credit and grade option to be determined in each case. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit variable, maximum 6 units.

L15 Drama 4991 Acting
Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit variable, maximum 3 units.

L15 Drama 4992 Directing
Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit variable, maximum 3 units.

L15 Drama 4993 Technical Theater
Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit variable, maximum 3 units.

L15 Drama 4994 Voice, Speech
Independent study.
Credit variable, maximum 3 units.

L15 Drama 4995 Literature, Theory, Criticism
Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit variable, maximum 3 units.

Earth and Planetary Sciences
For students interested in studying the world beneath their feet or other worlds farther away, the Department of Earth and Planetary Sciences provides the tools for understanding the processes that shape our planet and other bodies within the solar system. Understanding the Earth system is also the key to addressing many environmental challenges, including climate change, water supply and energy issues. An Earth scientist is uniquely poised to help solve some of society’s most pressing problems. Because planets are complex systems, Earth and planetary sciences is by necessity an interdisciplinary field. It applies biology, chemistry, physics and math to the investigation of topics such as early life on Earth, the structure of the Earth’s deep interior, the nature of contaminant transport, and the surfaces of other planetary bodies.

For students who have developed a passion for the basic sciences and who are looking for a way to study these sciences outside of traditional disciplinary boundaries, Earth and planetary sciences is an ideal choice of major. The department offers majors in geology, geophysics, geochemistry, and environmental Earth sciences as well as minors in Earth and planetary sciences and environmental Earth sciences. All programs offer a range of customization that allows students to focus on topics with the greatest relevance to their academic interests and career plans.

All students have the opportunity to participate in faculty research programs, although this is not required. Many of our students take advantage of these varied research opportunities, which provide them with valuable experience for future employment or for graduate school. Each year, several scientific papers and abstracts are co-authored by undergraduates, and undergraduates have presented papers at many national science meetings.

Department Policies for Majors and Minors

Minimum grade performance: A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry and physics. Courses with grades of D may fulfill the college’s 120 total hours requirement, but they do not meet the departmental requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.

Transfer credits and University College: Course work completed at another college or university must have prior approval of the department to be used to fulfill major requirements. Courses taken at University College normally may not be substituted for the courses required for an Earth and planetary sciences major. Written consent from the director of undergraduate studies is required for any such substitutions to apply and must be sought before the course is taken.

Graduate-level courses: All Earth and Planetary Sciences graduate courses (i.e., courses numbered 500 and above) are open to advanced undergraduates with permission of the undergraduate adviser and the specific course instructor.

Majors

There are four majors in this department:

- Geology (p. 362)
- Geophysics (p. 363)
- Geochemistry (p. 363)
- Environmental Earth Sciences (p. 364)

For the most current information, visit the Department of Earth and Planetary Sciences website (http://eps.wustl.edu/undergraduate).

All majors are required to complete a capstone experience during their junior or senior year. Information regarding the capstone experience (https://eps.wustl.edu/capstone-experiences) can be found on the departmental website. The majors in Earth and planetary sciences focus on the application of chemistry, biology and physics to Earth and planetary sciences and on the nature of planets, their resources and their relationships to human activity. The curriculum is broad, and the requirements are flexible enough to accommodate diverse needs and interests. Many courses present hands-on, problem-oriented experiences, including ample opportunity for fieldwork, laboratory work, and the use of state-of-the-art computational facilities and research instrumentation.

The Major in Geology

Geology addresses the formation processes, spatial organization, tectonic origins, age and chemistry of rocks on Earth and other planets. In addition to other requirements, geology track students take EPSc 437 Introduction to Petrology and a 6-credit field camp.

Core courses: EPSc 201 Earth and the Environment, EPSc 352 Earth Materials, EPSc 353 Earth Forces and EPSc 437 Introduction to Petrology
Additional required course work: Chem 105, Chem 106 (or Chem 111A, Chem 112A); Math 131, Math 132, Math 233; Physics 191, Physics 192
