

Clinical Research Management

The **Certificate in Clinical Research Management** is designed primarily for individuals with clinical research responsibilities who want the formal course work to complement their skills and experience in the field.

This certificate program targets key processes for managing research protocols that develop and use drugs, devices and treatments for patient care. The program focuses on the scientific methods of clinical research, good clinical practice, research ethics and the regulatory guidelines that protect human subjects, all of which are integral components of clinical trial management in academic research and pharmaceutical industry settings.
