Bachelor of Science in Electrical Engineering

This professional degree program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

Educational Objectives of the Bachelor of Science in Electrical Engineering (BSEE) Degree Program

A. Our graduates will be engaged as practicing professionals in a broad range of careers in industry or government or will pursue advanced degrees in academic graduate education in engineering or a related field.

B. Our graduates will function effectively as members of teams demonstrating sensitivity to professional and societal contexts, integrity and versatility.

Student Outcomes

Graduates of the BSEE program are expected to know or have:

a. An ability to apply knowledge of mathematics, science and engineering
b. An ability to design and conduct experiments, as well as to analyze and interpret data
c. An ability to design a system, component or process to meet desired needs
d. An ability to function on multidisciplinary teams
e. An ability to identify, formulate and solve engineering problems
f. An understanding of professional and ethical responsibility
g. An ability to communicate effectively
h. The broad education necessary to understand the impact of engineering solutions in a global and societal context
i. A recognition of the need for, and an ability to engage in, lifelong learning
j. A knowledge of contemporary issues
k. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

BSEE Degree Requirements

To obtain the degree Bachelor of Science in Electrical Engineering, students must complete a minimum of 120 units consistent with the residency and other applicable requirements of Washington University and the School of Engineering, and subject to the following program requirements.

1. Common Studies program of the School of Engineering: This includes courses in engineering, mathematics, chemistry, humanities, social sciences and technical writing. The required chemistry sequence is Chem 111A–Chem 151, although Chem 111A–Chem 112A–Chem 151–Chem 152 is recommended.

2. Engr 4501 Engineering Ethics and Sustainability (1 unit).

3. Two of the following three computer science courses: CSE 131 Introduction to Computer Science (3 units); CSE 132 Introduction to Computer Engineering (3 units); or CSE 247 Data Structures and Algorithms (3 units).

4. Engineering and science breadth requirements: 9 units in engineering or science outside of electrical engineering. These units must be taken in the following areas: biomedical engineering; chemical engineering; computer science and engineering; mechanical engineering; systems science and engineering; economics; mathematics; physics; biology; chemistry; earth and planetary sciences; and pre-medicine. These units must be at the 200 level or higher and shall not be used to satisfy the Common Studies requirements (item 1 above) or the CS requirement (item 3). Courses in other fields can be arranged with special departmental approval. Examples of engineering and science courses are MEMS 255 Engineering Mechanics II, EECE 210 Introduction to Environmental Engineering, EECE 203 Thermodynamics I in EECE, EECE 201 Engineering Analysis of Chemical Systems, CSE 247 Data Structures and Algorithms, Engr 324 From Concept to Market: The Business of Engineering, BME 240 Biomechanics, Physics 217 Introduction to Quantum Physics, Physics 318 Introduction to Quantum Physics II, MEMS 253 Engineering Mechanics I, Biol 2960 Principles of Biology I, Biol 2970 Principles of Biology II, Chem 261 Organic Chemistry I with Lab, Chem 262 Organic Chemistry II with Lab.

5. 31 units of required ESE courses:

6. Two upper-level laboratory courses (6 units) from the following list: ESE 331, ESE 435, ESE 447, ESE 448, ESE 465, ESE 488. The selection must contain at least one course from ESE 331, ESE 435, ESE 465, ESE 488.

7. 15 units of elective ESE courses in electrical engineering subjects, from the following list: ESE 330–399, ESE 400, ESE 405, ESE 407, ESE 415, ESE 425, ESE 429-497, ESE 503–589.

8. The entire course sequence for the BSEE containing engineering topics of at least 45 units. The numbers of engineering topic units assigned to undergraduate courses in the School of Engineering & Applied Science vary from none (0) to the number of credits given to the course. For the precise number for each course, please refer to the table of Topics Units — Engineering Courses provided by Engineering Undergraduate Student Services (http://engineering.wustl.edu/current-students/student-services/Pages/default.aspx).

9. Limitations. No more than 3 credits of 500-level courses may be applied toward the EE elective requirement (item 7).

10. Limitations. No more than 6 units of the combined units of ESE 400 Independent Study and ESE 497 Undergraduate Research (including ESE 497A and ESE 497B) may be applied toward the EE elective requirement (Item 7) of the BSEE degree. The balance of combined units, if there are any left, are allowed as free electives to satisfy the requirement on the total number of units.

11. The courses taken to satisfy the following BSEE degree requirements must be taken for a letter grade and not on a pass/fail basis: Item 5 (required ESE courses), Item 6 (upper-level laboratory courses) and Item 7 (elective ESE courses).

Most students acquire more than 120 credit units. For a typical sequence of subjects for the Bachelor of Science in Electrical Engineering degree, please refer to the following table:

- Sample Electrical Engineering Curriculum (http://bulletin.wustl.edu/undergrad/engineering/electrical/bs-electrical/samplecurriculum)

For more information on BS in Electrical Engineering curriculum (https://ese.wustl.edu/undergraduate/degreeprograms/Pages/electrical-engineering.aspx), please visit the ESE website.
