This is an elective one-credit course that can only be taken concurrently with Chem 112A General Chemistry II. The purpose of the course is to encourage students to work in small groups, supervised by a trained peer leader, on problems from the course that are designed to require a collaborative effort and to enhance understanding. Peer-led team learning sessions guide students to become conscious of the problem-solving process and to rigorously evaluate and revise that process in light of the reasonableness of their results rather than an answer key. In this course, student groups facilitated by a peer leader meet weekly and work together on a problem set building on topics covered in the parent course, with the aim of developing problem-solving, critical-thinking, and collaboration skills. Sign-ups for PLTL begin in Week 1 of the semester, with meetings beginning on the weekend of Week 2. Students must attend at least nine sessions during the semester to earn credit; those who do not reach the attendance threshold will be dropped from the course, and the course will be removed from their transcript. To receive credit for PLTL, a student must remain enrolled in the parent course. Please note the following exceptions to the enrollment and drop policy: (1) Students will not be able to enroll in PLTL if doing so would bring them above 21 credit units, but they will still be able to participate. (2) Students who wish to participate in PLTL but want to opt-out of receiving credit should contact their course's program manager. (3) If dropping PLTL would bring a student below 12 credit units, the drop will be entered as a withdrawal instead.

Credit 1 unit. BU: SCI

Typical periods offered: Spring

CHEM 1751 General Chemistry Laboratory I

This course provides an introduction to basic laboratory techniques, the experimental method, and the presentation of scientific data, as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in the first semester General Chemistry lecture courses.

Credit 2 units. A&S IQ: NSM Art: NSM

Typical periods offered: Fall, Summer

CHEM 1752 General Chemistry Laboratory II

Continuation of General Chemistry Laboratory I. The topics and experiments in this course complement the material covered in the second semester General Chemistry lecture courses.

Credit 2 units. A&S IQ: NSM Art: NSM

Typical periods offered: Spring, Summer

CHEM 1801 Introductory General Chemistry I PB

This course covers the systematic treatment of fundamental chemical principles and their applications. Emphasis is on atomic and molecular theories, laws of chemical combination, periodic classification of the elements, and properties of gases, liquids, solids, and solutions. Prerequisites: Math U20 141 and Math U20 142 or equivalent, one year of high school chemistry, or permission of department. This course is restricted to students admitted to the Post-Baccalaureate Premedical Program or in University College. All other students should enroll in Chem 105 or Chem 111.

Credit 3 units. BU: SCI

Typical periods offered: Fall

CHEM 1802 Introductory General Chemistry II PB

Continuation of L07-125 General Chemistry I PB. Considers oxidation-reduction, chemical equilibria, electro-chemical cells, and the chemistry of representative elements. Prerequisite: L07-125. Students desiring to satisfy lab science requirements must also enroll in L07-156.

This course is restricted to students admitted to the Post-Baccalaureate Premedical program or the School of Continuing & Professional Studies. Others may register with instructor permission, and on a space available basis.
Credit 3 units. BU: SCI
Typical periods offered: Spring

CHEM 1851 General Chemistry Laboratory I PB
This course provides an introduction to basic laboratory techniques and the experimental method as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in Chem 125. Prerequisite: Concurrent enrollment in Chem 125 or permission of instructor. The first two lab lectures will be longer than the regular lectures, but without lab session. The lab sessions will convene for the first time beginning with the third class meeting. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or in the School of Continuing & Professional Studies. All other students should enroll in Chem 151.
Credit 2 units. Art: NSM
Typical periods offered: Fall

CHEM 1852 General Chemistry Laboratory II PB
Continuation of L07-155 Chem Lab I PB. Topics and experiments complement the material covered in the L07-126 lecture course. Students attend a three-hour laboratory session and a one-hour laboratory lecture. Prerequisite: concurrent enrollment in L07-126, or permission of the instructor. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or the School of Continuing & Professional Studies. Others may register with instructor permission, and on a space available basis.
Credit 2 units.
Typical periods offered: Spring

CHEM 1900 First-Year Research
This course presents an introduction to research for first- and second-year students. Students are mentored by a faculty advisor. Prerequisite: Permission of the sponsor and the Department of Chemistry. Credit/no credit only.
Credit 0.5-3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

CHEM 1996 Chemistry Elective: 100-Level
Course used for transcribing 1000-level elective CHEM units.
Credit 3 units.
Typical periods offered: Fall, Spring, Summer

CHEM 2501 Organic Chemistry I
Code for transfer credit equivalent to lecture portion of Organic Chemistry I
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Summer

CHEM 2502 Organic Chemistry II
Code for transfer credit equivalent to lecture portion of Organic Chemistry II
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring, Summer

CHEM 2551 Organic Chemistry Laboratory I
Code for transfer credit equivalent to lab portion of Organic Chemistry I
Credit 1 unit. A&S IQ: NSM
Typical periods offered: Fall

CHEM 2552 Organic Chemistry Laboratory II
Code for transfer credit equivalent to lab portion of Organic Chemistry II
Credit 1 unit.
Typical periods offered: Spring

CHEM 2561 Organic Chemistry I With Lab
This is the first part of a two-semester survey of organic chemistry. The course will include an introduction to organic structures, reactions, and reaction mechanisms. The laboratory will meet on alternate weeks and include an introduction to laboratory methods in organic chemistry, including separation and methods of purification of organic compounds. Prerequisites: Chem 106 or Chem 112 and Chem 152.
Credit 4 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Summer

CHEM 2562 Organic Chemistry II With Lab
A course covering certain areas of organic chemistry in more detail than the prerequisite course, with special emphasis on the mechanisms and the synthetic applications of organic reactions and on the organic chemistry of biological compounds. The laboratory will meet eight times and include organic synthesis and spectroscopic techniques. Required course for chemistry majors.
Credit 4 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring, Summer

CHEM 2565 Organic Chemistry Problem Solving Workshops I
The workshops for Organic Chemistry I, CHEM 2561, aim at helping students master the
fundamental key concepts, following the lecture schedule, in a collaborative learning enrollment.
The focus of the workshops is problem solving and creative/critical thinking. The workshop
problem sets are designed based on the topics discussed in the lecture. In-person instruction. Corequisite: Concurrent enrollment in CHEM 2561.
Credit 1 unit.
Typical periods offered: Fall

CHEM 2566 Organic Chemistry Problem Solving Workshops II
The workshops for Organic Chemistry II, CHEM 262, aim at helping students master the fundamental key concepts, following the lecture schedule, in a collaborative learning enrollment. The focus of the workshops is problem solving and creative/critical thinking. The workshop problem sets are designed based on the topics discussed in the lecture. Corequisite: Concurrent enrollment in CHEM 262
Credit 1 unit.
Typical periods offered: Spring

CHEM 2811 Organic Chemistry I PB (Lecture Only)
This is the lecture-only version of the first part of a two-semester survey of organic chemistry. The course will include an introduction to organic structures, reactions, and reaction mechanisms. Prerequisites: Chem 126 and Chem 156. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or in University College.
Credit 3 units. Art: NSM BU: SCI
Typical periods offered: Fall

CHEM 2821 Introduction to Medicinal Chemistry PB
This is an introductory course covering the basic concepts of drug structure, interactions and metabolism relevant to medicinal chemistry. The course will provide an understanding of the structure and physicochemical properties of drugs and their targets and how these determine the drug's mechanism of action and the body's response. In addition, basic concepts of drug design and development will be covered. Prerequisites: A background in general chemistry is required. Knowledge of organic or biochemistry is not required. Organic and biochemistry concepts needed for an understanding of the material will be taught as part of the course. Priority given to students enrolled in the Post-Baccalaureate Premedical program or in the School of Continuing & Professional Studies.
Credit 3 units. BU: SCI
Typical periods offered: Fall, Spring

CHEM 2851 Organic Chemistry I With Lab PB
This is the first part of a two-semester survey of organic chemistry. The course will include an introduction to organic structures, reactions, and reaction mechanisms. The laboratory portion of the course will have eight experiments and include an introduction to laboratory methods in organic chemistry, including separation and methods of purification of organic compounds. Prerequisites: Chem 126 and Chem 156. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or in University College. All other students should enroll in Chem 261.
Credit 4 units. Art: NSM BU: SCI
Typical periods offered: Fall

CHEM 2900 Second Year Research
This course presents research for second-year students. Students are mentored by faculty advisor. Pass/no pass.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall, Spring

CHEM 2991 Chemical Laboratory Safety
This course presents an overview of current laboratory safety, regulatory, and compliance practices. Safety and compliance issues that impact chemical, biological, and materials research will be covered.
Credit 0.5 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

CHEM 2996 Chemistry Elective: 200-Level
Credit 3 units.

CHEM 3996 Chemistry Elective: 300-Level
Credit 3 units.

CHEM 4001 Physical Science in 12 Problems
Exercises related to general chemistry, classical mechanics, quantum mechanics, statistical mechanics, thermodynamics, and kinetics, will be solved with numerical software. Each exercise will be accompanied by a lecture, a software template solving a problem and presenting a related take-home problem. The software will allow us to focus on, and treat in a transparent fashion, physical problems without the unworldly idealizations and contrivances found in textbooks.
Credit 1 unit. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

CHEM 4010 Physical Chemistry I
Introduction to quantum chemistry with applications to electronic structure and elementary spectroscopy. Prerequisites: Chem 106/112A and Math 233; prior completion of Physics 191 and 192 is strongly encouraged (but concurrent enrollment in Physics I will be accepted); or permission of instructor. Required course for all Chemistry majors.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

CHEM 4020 Physical Chemistry II
This course presents an introduction to chemical thermodynamics, statistical mechanics, and transport phenomena, and it is a required course for all Chemistry majors. Prerequisites: Chem 401, and Math 233; or permission of instructor. Prior completion of Physics 192/194 is strongly encouraged, but prior completion of Physics 191/193 and concurrent enrollment in Physics 192/194 will be accepted.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

CHEM 4030 Chemical Kinetics
This lecture course will provide an introduction to the kinetics of chemical reactions for graduate and upper-level undergraduate science and engineering students. Bulk and molecular-level considerations will be discussed and provide a foundation for the understanding of chemical reaction mechanisms and the techniques used for their study. Students will gain an understanding of the importance and significance of the rate laws of reactions and in particular the reaction rate constant. Details of how the environment in which reactions occur (i.e., gas phase, solution phase, and surface reactions) and molecular structure are reflected in the rate constant will be discussed. Examples such as catalytic loss cycles in the atmosphere, enzyme catalysis, combustion systems, chain reactions, and explosions are presented in detail to illustrate how the fundamental principles of chemical kinetics can be applied to predict reaction rates, chemical reactivity, and the outcomes of particular processes. Prerequisites: Chem 106/112A and/or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

CHEM 4035 Nuclear and Radiochemistry Lab
Application of radiochemistry to problems in chemistry, physics, and nuclear medicine, with emphasis on particle detectors and experimental techniques. Prerequisites: 3 units of physical chemistry or quantum mechanics, or permission of instructor. Five hours of laboratory a week.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

CHEM 4036 Introduction to the Atomic Nucleus
Introduction to the interaction of radiation with matter, the production and decay of radioactive nuclides, the structure and properties of nuclei, and various applications of nuclear science (including nuclear power) are all presented. Lectures will be in-person but a complete set of taped lectures will also be available. A weekly, in-person or remote, help session will be scheduled at a mutually agreed to time. There will be about 6 timed quizzes, one midterm and one final, all of which must be taken in-person on mutually agreed dates.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

CHEM 4050 Computational Problem Solving in the Chemical Sciences

Have you ever wondered how molecular interactions shape the world around us? Why do certain materials exhibit unique properties? How can we predict and manipulate chemical reactions at the atomic level? These are the mysteries at the heart of chemistry, where understanding the unseen world of atoms and molecules can unlock groundbreaking advances in science and technology. However, one needs specialized numerical methods and computational chemistry skills to explore these questions. This course is designed to bridge this gap. It provides a comprehensive introduction to the mathematical and computational skills necessary to model chemical phenomena at the atomic level. We start by building a strong foundation in mathematical representations of chemical problems, utilizing open-source software tools for problem-solving, data interpretation, and visualization of materials and molecular structures. In the second part of the course, we delve into the fascinating world of atomic-level computer modeling. You'll learn various methodologies, such as Monte Carlo and molecular dynamics. We'll analyze static (thermodynamic and structural) and dynamic properties and their statistical errors. Don't worry if you're new to coding - we'll cover the basics of Python programming in the first few lectures, setting you up for success. By the end of this course, you will be proficient in using computational tools, understanding atomic interactions, and approaching chemical problems with a structured and strategic thought process. Join us to unlock the secrets of the molecular world and transform the way you see chemistry!

Credit 3 units. A&S IQ: NSM

Typical periods offered: Fall

CHEM 4079 Instrumental Methods: Physical Chemistry

A course providing direct hands-on experience with the principles of physical chemistry (thermodynamics, quantum, kinetics) and associated experimental methods and instrumentation, including optical, infrared, and nuclear and electron spin resonance, electrochemistry, calorimetry, laser kinetics, and basic electronics. Prerequisite: Chem 401 or concurrent enrollment in Chem 402.

Credit 3 units. A&S IQ: NSM, WI Art: NSM

Typical periods offered: Spring

CHEM 4090 Physical Chemistry for the Life Sciences

This course will cover theoretical and practical aspects of physical chemistry principles applied to
biological problems

Credit 3 units. A&S IQ: NSM

Typical periods offered: Spring

CHEM 4101 Special Topics in Physical Chemistry

This course is an overview of instrumentation and techniques that are found in modern chemistry laboratories. We shall cover the design of experiments, including basic electronics, signal-to-noise considerations and signal handling. We shall also discuss the applications of a wide variety of spectroscopies, imaging techniques, surface analytical techniques, mass spectrometry and NMR. This course will be of interest to students who expect to pursue chemical research involving modern physical measurements and who wish to understand the fundamental principles behind complex analytical instrumentation. In detail, topics covered will be: 1. Physical Chemistry for Spectroscopy: Electromagnetic Spectrum; Molecular Energy Levels. 2. Signal-to-Noise: Different sources e.g. Shotky, Flicker, Johnson, interference, background radiation. 3. Basic Electronics: Kirchoff's Laws, impedance, capacitance, diodes, op-amps, filters, oscilloscopes. 4. Experimental Considerations: Light sources, magnetic fields, detectors, signal handling, vacuums. 5. CW Spectroscopies: IRS, Raman, Rayleigh Scattering, flourescence, UV-Vis. 6. Lasers: types, Q-switching, laser spectroscopies. 7. Imaging: SEM, TEM, NSOm. 8. Surface techniques: AES, WPS, RAIRS, HREELS, STM, AFM. 9. Mass Spectrometry. 10. NMR.

Credit 3 units. Art: NSM

Typical periods offered: Fall, Spring

CHEM 4510 Organic Chemistry III

A lecture course that builds on the material in the first two semesters of Organic Chemistry, covering in more detail certain topics in those courses while also introducing new topics. A transition to graduate-level study in organic chemistry; recommended for chemistry, biochemistry, and biology majors.

Credit 3 units. A&S IQ: NSM Art: NSM

Typical periods offered: Fall

CHEM 4511 Synthetic Polymer Chemistry

This course describes various methods for the synthesis and characterization of polymers. Copolymers, control of architecture, polymer reactivity, polymer properties, structure/property relationships, and applications of polymers will be discussed. Current topics of interest from the recent literature will also be covered.

Credit 3 units. A&S IQ: NSM Art: NSM

Typical periods offered: Spring

CHEM 4521 Physical Organic Chemistry

The goal of physical organic chemistry is to understand the details of reaction mechanisms, and gain insight into structures and reactivity common to organic chemicals and of high-energy chemical intermediates. This course focuses on the structure of any intermediates, the extent of a reaction from the perspective of the transition state, and identifying the relative energies of reactants, products, intermediates, and transition states. Students will learn concepts needed to solve mechanistic organic problems encountered in research, covering common organic reaction mechanisms, experimental techniques, and theoretical approaches. After the course, students will be able to design experiments to probe mechanistic questions and propose reasonable mechanisms and intermediates to explain experimental observations.

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

Typical periods offered: Fall

CHEM 4523 Organic & Inorganic Reaction Mechanisms

This course covers the fundamentals of the study of the mechanisms of reactions of organic, organometallic, and inorganic molecular compounds, primarily in the solution phase, and it surveys examples through case studies. A basic knowledge of organic chemistry is assumed. Prerequisites: Grade of B- or better Chem 261 and Chem 262 or the equivalent.

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

Typical periods offered: Spring

CHEM 4530 Spectral Methods in Organic Chemistry

A detailed treatment of the structure and stereochemistry of organic compounds with particular emphasis on ultraviolet, visible, infrared, nuclear magnetic resonance, and mass spectroscopic techniques for structure determination. Prerequisite: Chem 262 or permission of instructor.

Credit 3 units.

Typical periods offered: Spring

CHEM 4531 Computational Chemistry and Molecular Modeling

Lectures will cover the background, practice and applications of computational chemistry to the modeling of the structures and chemical reactions of organic molecules. Different levels of calculation will be presented, from molecular mechanics calculations and Hhckel

molecular orbital theory, through semi-empirical and ab initio self-consistent field calculations with correlation energy corrections, and density functional theory. Hands-on experience performing calculations is an important element in this course.
Credit 3 units. A&S IQ: NSM, WI Art: NSM

CHEM 4559 Advanced Organic Chemistry Laboratory
Initially, problem solving in organic chemistry is emphasized through an introduction to the methods of qualitative organic analysis, including the use of chromatographic and spectroscopic techniques. Each student then selects an independent synthetic project to perform. Prerequisite, Chem 262. Six laboratory hours per week. Lectures held three hours a week for the first half of the semester.
Credit 4 units. A&S IQ: NSM, WI Art: NSM
Typical periods offered: Fall

CHEM 4570 Synthetic Polymer Chemistry Laboratory
An upper-level undergraduate laboratory course that complements Chem 4511 Synthetic Polymer Chemistry. This twice-a-week lab provides hands-on training in the design, synthesis, and characterization of polymers and polymeric materials through four standard experiments (each one week) and one independent project (over five to six weeks). The independent project involves using an article from the literature as the basis for developing a short proposal. At the end of the course, students give oral presentations of their proposals, which are reviewed by their classmates.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

CHEM 4579 Synthetic Polymer Chemistry Laboratory -- Writing Intensive
An upper-level undergraduate laboratory course that complements Chem 4511 Synthetic Polymer Chemistry. This twice-a-week lab provides hands-on training in the design, synthesis, and characterization of polymers and polymeric materials through four standard experiments (each one week) and one independent project (over five to six weeks). The independent project involves using an article from the literature as the basis for developing a short proposal. At the end of the course, students give oral presentations of their proposals, which are reviewed by their classmates. This course satisfies the writing-intensive requirement.
Credit 3 units. A&S IQ: NSM, WI BU: SCI
Typical periods offered: Spring

CHEM 4610 Inorganic Chemistry
Inorganic chemistry encompasses the structure, properties, and reactivity of inorganic molecules and solids and it is a required course for all Chemistry majors. This course will focus on the symmetry, bonding, electronic structure, spectroscopy, and reactivity of inorganic coordination complexes in which ligands are bound to one or more metal centers. The course will start with using group theory to classify molecules based on the symmetry elements they possess. A series of different bonding models including VSEPR, valence bond theory, molecular orbital theory, crystal field theory, and ligand field theory will be used to describe the structure and bonding of inorganic molecules, coordination complexes, and organometallic compounds. These models will serve as a basis for interpreting and predicting the electronic and vibrational spectra of inorganic compounds.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

CHEM 4611 Organometallic Chemistry
Survey of organometallic compounds with discussion of their synthesis, structure, spectroscopy, and reactivity. Prerequisite: Chem 262.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

CHEM 4620 Solid-State and Materials Chemistry
A description of how the structures of crystalline solids at different length scales control their chemical and physical properties is critical for understanding how these materials are applied in a variety of technologies ranging from solar cells to lithium batteries. This course begins with basic crystallography and introduces common inorganic structure types as well as common defects in crystalline solids. With the aid of computer models, students will learn to analyze and index x-ray powder-diffraction patterns that provide a fingerprint to identify a crystal. The relation between the crystal structure of a solid and its resulting electronic structure, chemical reactivity, and physical properties (e.g., optical, electrical, and mechanical) will be discussed throughout the semester with an emphasis on how crystal defects alter these properties. The course will conclude with the use of phase diagrams to assess the composition and microstructure of metals and ceramics. Prerequisite: Chem 105/111A or permission of instructor
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

CHEM 4630 Inorganic Electrochemistry and Photochemistry
An understanding of electrochemical processes is critical in describing the behavior of batteries, fuel cells, and other important devices used in energy conversion and environmental remediation. This course will cover modern inorganic electrochemistry, photochemistry, and photoelectrochemistry from a microscopic perspective of solid-electrolyte interfaces. The course material will start with the thermodynamics of solid-electrolyte interfaces and the kinetics of electron transfer across these interfaces. Electroanalytical techniques, including cyclic voltammetry and potential-step experiments, will be described to understand the mechanism of electrochemical and photochemical reactions. Lectures will include applications of electrochemical cells in catalysis, materials synthesis, and solar-fuel generation. Prerequisites: Chem 461, or Chem 465, or consent of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

CHEM 4631 Inorganic Biochemistry
A class in biological chemistry that emphasizes the role of metals in electron transfer and enzymatic catalysis. After a brief survey of essential concepts from biology, coordination chemistry, and spectroscopy, topics will include: electron transfer systems; oxygen transport and activation; metal ion acquisition, transport, and homeostasis; enzymes catalyzing atom transfer reactions and radical-mediated processes. Prerequisite: Chem 262; Chem 461 recommended but not required.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

CHEM 4670 Inorganic Chemistry Laboratory
A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises will introduce novel synthetic techniques including high-temperature synthesis and vacuum-line manipulations. Compounds will be spectroscopically characterized by UV-visible absorption, gas-phase infrared, and multinuclear and dynamic NMR spectroscopies. Measurements of electrochemical behavior, magnetic susceptibility, and electrical conductivity will be performed.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

CHEM 4679 Inorganic Chemistry Laboratory -- Writing Intensive
A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises will introduce novel synthetic techniques including high-temperature synthesis and vacuum-line manipulations. Compounds will be spectroscopically characterized by UV-visible absorption, gas-phase infrared, and multinuclear and dynamic NMR spectroscopies. Measurements of electrochemical behavior, magnetic susceptibility, and electrical conductivity will be performed. This course satisfies the Writing Intensive requirement.
Credit 3 units. A&S IQ: NSM, WI Art: NSM
Typical periods offered: Spring

CHEM 4810 General Biochemistry I
Topics include the properties and structures of biomolecules, including amino acids, nucleotides, lipids, carbohydrates, proteins and nucleic acids. Additional topics include enzyme kinetics and mechanisms, membrane structure and properties, protein folding, an introduction to metabolism, oxidative phosphorylation and photosynthesis. This course is the first semester of an integrated two-semester sequence.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

CHEM 4820 General Biochemistry II
Biochemistry explores the chemistry of life processes at the molecular level. This course is the second semester of a two-semester General Biochemistry sequence. The first semester of the Biochemistry sequence covered the basics of the topic with an emphasis on the structures, functions, and interactions of biomolecules including proteins, nucleic acids, carbohydrates, and lipids. This second semester course will emphasize metabolism, the biosynthetic (anabolism) and degradation (catabolism) pathways that provide the energy of life and define the molecules associated with healthy and disease states.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

CHEM 4821 Chemical Biology
This course is a survey of modern chemical biology focusing on the application of a broad array of chemical tools to biological problems. The course is roughly divided into four sections; biopolymers, computational methods and bioinformatics, tools for chemical biology, and applications of chemical biology. A mandatory discussion section accompanies the course and is used to review current and classical literature in the field. Prereqs: Chem 262 and Biol 2970, or permission of the instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

CHEM 4830 Bioorganic Chemistry
This course presents a molecule-centered perspective on the current state of the art in antibiotic drug discovery and natural products chemistry. The molecular mechanisms of antibiotic drug action and pathogen resistance will be covered along with the biosynthetic origins of antibiotics from plants and microbes. The course is taught from the perspective of understanding how organic chemistry plays out in biological systems, with an emphasis on small organic molecules and enzymes. Curved arrow mechanisms will be used frequently in learning activities and assignments. A working knowledge of protein structure and function is helpful. Students are encouraged (but not required) to take General Biochemistry I and/or General Biochemistry II in preparation for this course. Students will be responsible for writing a review article on an assigned antibiotic molecule and presenting their paper to the class.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

CHEM 4831 Nucleic Acids
This course presents the structure, synthesis, properties, and interactions of nucleic acids and the design and synthesis of nucleic acid-based and/or targeted drugs, probes, and tools. Topics include primary, secondary, and tertiary structure; topological and thermodynamic properties; biological and chemical synthesis; DNA chips; PCR; site-directed natural and unnatural mutagenesis; chemical evolution (SELEX); ribozymes; phage display; carcinogen, drug, and protein interactions; affinity cleaving; ultraviolet light and ionizing radiation damage; DNA repair of mutagenesis; and the design and synthesis of anti-sense and anti-gene probes and drugs. Extensive use is also made of molecular modeling and the protein databank of nucleic acid structures. Prerequisites: Chem 261 and Chem 262 or equivalents.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

CHEM 4833 Protein Biochemistry
The focus of this course is protein biochemistry, and is intended to build upon General Biochemistry I. In this course we will focus on protein structure, folding, and techniques to purify and characterize protein activity. We will progress from initial studies to first understand protein fold and function to current efforts to better characterize protein structure-function relationships. We will also highlight human diseases that are underpinned by protein misfolding. This course will focus on reading and understanding primary literature, including landmark papers along with more recent work. During the second half of the semester, each student will select a paper and prepare a written analysis of that paper. The student will then present the paper and lead a journal club style discussion of the paper.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring

CHEM 4839 Bioorganic Chemistry-- Writing Intensive
This course presents a molecule-centered perspective on the current state of the art in antibiotic drug discovery and natural products chemistry. The molecular mechanisms of antibiotic drug action and pathogen resistance will be covered along with the biosynthetic origins of antibiotics from plants and microbes. The course is taught from the perspective of understanding how organic chemistry plays out in biological systems, with an emphasis on small organic molecules and enzymes. Curved arrow mechanisms will be used frequently in learning activities and assignments. A working knowledge of protein structure and function is helpful. Students are encouraged (but not required) to take General Biochemistry I and/or General Biochemistry II in preparation for this course. Students will be responsible for writing a review article on an assigned antibiotic molecule and presenting their paper to the class. This course satisfies the Writing Intensive requirement.
Credit 3 units. A&S IQ: NSM, WI Art: NSM BU: SCI
Typical periods offered: Fall

CHEM 4840 Simulation in Chemistry and Biochemistry
This course explores a wide range molecular modeling techniques and applications of computational chemistry to problems in chemistry and biochemistry. Topics include ab initio quantum mechanics, semi-empirical MO theory, molecular mechanics, molecular dynamics simulation, coarse-grained models, electrostatic methods and biomolecular structure prediction. A major component of the course is weekly laboratory sessions using common software programs in the field, including Spartan, Q-Chem, Gaussian, VMD, TINKER, APBS,

AutoDock, SDA7 and others. Many of the lab exercises target proteins, nucleic acids and other biological structures. As a final lab experience, students will complete an independent project using tools covered in the course.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

CHEM 4842 Modern Medicinal Chemistry
The focus of this course in an overview of Modern Medicinal Chemistry from the selection of a therapeutic target through the FDA-approval process. Each aspect will be exemplified by examples of drugs currently in clinical use, or in late-stage development. One aspect of particular interest to synthetic chemists is the underlying development chemistry that often determines the competitive success of a product. Topics to be covered include peptidomimetic HIV protease inhibitors, topoisomerase inhibitors, HMGCoA-reductase inhibitors (Lipitor, etc.), receptor tyrosine-kinase inhibitors (Gleevac, etc.), a synthetic mimetic of superoxide dismutase, and several others depending on the interests of the participants. Students will be responsible for presenting to the class the synthetic routes developed for the discovery and commercialization of these drugs focusing on development chemistry. Prerequisite: Chem 262 or permission of the instructor.
Credit 3 units. A&S IQ: NSM Art: NSM

CHEM 4851 Biological Chemistry Laboratory
This is an advanced laboratory course emphasizing the application of chemical methods to study biological problems of metabolism and enzyme function. This laboratory is structured as a course-based undergraduate research experience that begins with a series of "training experiments" to familiarize students with methods and instrumentation (UV/Vis & fluorescence spectroscopies, electrochemistry, qPCR, site-directed mutagenesis). Once trained in these techniques, pairs of students will use this set of experimental tools as a basis to follow their own independent hypothesis-driven line of biochemical investigation along one of two thematic pathways: cellular metabolic adaptation or structure/function relationships of flavoenzymes.
Credit 4 units. A&S IQ: NSM
Typical periods offered: Fall

CHEM 4900 Introduction to Research
Third- and fourth-year students register for this course to perform research on a selected topic in chemistry. A student planning to register with a Department of Chemistry research mentor MUST obtain approval from that faculty member before registering, but a formal proposal is not required. For research experiences with mentors outside of the chemistry department, the student must submit the Chem 4900 Project Proposal Form, which identifies the faculty mentor and includes a short description of the proposed chemical research. The Chem 4900 Project Proposal Form, which is available on the chemistry department website, should be submitted to the director of undergraduate studies in the chemistry department for approval. Pass/No Pass only.
Credit 0.5-6 units. A&S IQ: NSM
Typical periods offered: Fall, Spring

CHEM 4950 Advanced Undergraduate Research in Chemistry
Registration for this course allows for advanced research mentored by a Department of Chemistry faculty member. Chemical research with a faculty member outside of the chemistry department may be allowed with prior approval. At the end of the semester, the mentor will chair a faculty committee to evaluate an oral presentation by the student, and a letter grade will be assigned. A concise written report may also be requested by the mentor or committee in addition to the oral examination. Before registration can be allowed, the student must fill out the Chem 4950 Application Form, available on the chemistry department website, and submit it to the director of undergraduate studies. This form includes a short description of the proposed research and a list of the committee members. This course may provide a Capstone Experience, but it does not fulfill the Writing Intensive requirement. The units earned may be applied as elective advanced credits toward a chemistry major with Latin honors eligibility. The course may be taken only once for credit.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall, Spring

CHEM 4995 Chemistry Coursework Completed Abroad
Credit 0 units.

CHEM 4996 Chemistry Elective: 400-Level
Credit 3 units.

Chemistry Major

Program Requirements

- **Total Units Required:** 53
- **Grade Requirement:** All chemistry coursework must be taken in residence at Washington University to be applied toward the chemistry major. A minimum grade of C– must be earned in each course to count toward the chemistry major.
- **Note:** Regarding the double counting of course credits, College of Arts & Sciences Guidelines will be followed.

Required Courses

To prepare for a major in chemistry, students will take the following:

Code	Title	Units
CHEM 1701	General Chemistry I*	3
CHEM 1702	General Chemistry II*	3
CHEM 1751	General Chemistry Laboratory I	2
CHEM 1752	General Chemistry Laboratory II	2
CHEM 2561	Organic Chemistry I With Lab	4
CHEM 2562	Organic Chemistry II With Lab	4
PHYSICS 1740	Physics I**	3
PHYSICS 1741	Physics I Laboratory	1
PHYSICS 1742	Physics II**	3
PHYSICS 1743	Physics II Laboratory	1
MATH 1510	Calculus I***	3
MATH 1520	Calculus II***	3
MATH 2130	Calculus III***	3
Total Units		**35**

* Students may substitute CHEM 1601 Principles of General Chemistry I and CHEM 1602 Principles of General Chemistry II for CHEM 1701 General Chemistry I and CHEM 1702 General Chemistry II. Please consult the department's director of undergraduate studies for details.

** PHYSICS 1760 Focused Physics I may replace PHYSICS 1740 Physics I. PHYSICS 1762 Focused Physics II may replace PHYSICS 1742 Physics II.

*** MATH 2801 Honors Mathematics I may replace both MATH 1510 Calculus I and MATH 1520 Calculus II. MATH 2802 Honors Mathematics II may replace MATH 2130 Calculus III.

PHYSICS 2170 Introduction to Quantum Physics and additional mathematics courses are also recommended. The optional CHEM 1101 First-Year Opportunity: Why is Chemistry Called the Central Science? is open to first-year students, highlighting research activities in the department.

A working knowledge of computer programming and of a foreign language, such as German or Russian, is encouraged for the Chemistry major but not required.

Majors in Chemistry must take a minimum of 18 units of advanced courses in chemistry or biochemistry, among which the following must be included:

Code	Title	Units
CHEM 4010	Physical Chemistry I	3
CHEM 4020	Physical Chemistry II	3
CHEM 4610	Inorganic Chemistry	3
Total Units		**9**

In addition, 9 units in chemistry at the 3000 level or above must be taken (not including CHEM 4900 Introduction to Research or CHEM 4950 Advanced Undergraduate Research in Chemistry). BIOL 4510 General Biochemistry may be used to complete 3 of these additional 9 units, but this cannot occur in combination with CHEM 4810 General Biochemistry I or CHEM 4820 General Biochemistry II.

At least 3 of these 9 advanced units must be in a laboratory course chosen from the following list:

Code	Title	Units
CHEM 4035	Nuclear and Radiochemistry Lab	3
CHEM 4079	Instrumental Methods: Physical Chemistry	3
CHEM 4559	Advanced Organic Chemistry Laboratory	4
CHEM 4570	Synthetic Polymer Chemistry Laboratory	3
or CHEM 4579	Synthetic Polymer Chemistry Laboratory - Writing Intensive	
CHEM 4670	Inorganic Chemistry Laboratory	3
or CHEM 4679	Inorganic Chemistry Laboratory - Writing Intensive	
CHEM 4851	Biological Chemistry Laboratory	4

Neither CHEM 4900 Introduction to Research nor CHEM 4950 Advanced Undergraduate Research in Chemistry can be used to satisfy the advanced laboratory requirement.

Students have the advantage of planning their programs with their advisors in accordance with their personal interests. Some graduate courses are also available to seniors.

Additional Information

Study Abroad

Study Abroad programs are available both for chemistry and pre-medical studies. Details of these programs can be found at the Overseas Programs website. For chemistry programs, students may be able to receive elective/research credit for courses taken or research done abroad. It is strongly advised that students contact the Department of Chemistry Study Abroad Advisor, Prof. Richard Mabbs (mabbs@wustl.edu), as soon as possible after they declare their major in order to discuss study abroad plans.

Latin Honors for the Major in Chemistry

- **Total Units Required:** 56

To qualify for Latin Honors, students must complete a minimum of 21 units in advanced courses in chemistry or biochemistry, among which the following must be included:

Code	Title	Units
CHEM 4010	Physical Chemistry I	3
CHEM 4020	Physical Chemistry II	3
CHEM 4610	Inorganic Chemistry	3

In addition, 6 units in Chemistry at the 3000 level or above must be taken (not including CHEM 4900 Introduction to Research). CHEM 4950 Advanced Undergraduate Research in Chemistry can be used to satisfy 3 of these additional 6 units on the Chemistry Honors track. BIOL 4510 General Biochemistry may be used to complete 3 of these additional 6 units, but this cannot occur in combination with CHEM 4810 General Biochemistry I or CHEM 4820 General Biochemistry II.

Student must also take an advanced lab from at least two of the following three areas:

Synthetic:

Code	Title	Units
CHEM 4559	Advanced Organic Chemistry Laboratory	4
CHEM 4570	Synthetic Polymer Chemistry Laboratory	3
or CHEM 4579	Synthetic Polymer Chemistry Laboratory - Writing Intensive	
CHEM 4670	Inorganic Chemistry Laboratory	3
or CHEM 4679	Inorganic Chemistry Laboratory - Writing Intensive	

Physical:

Code	Title	Units
CHEM 4035	Nuclear and Radiochemistry Lab	3
CHEM 4079	Instrumental Methods: Physical Chemistry	3

BioChem:

Code	Title	Units
BIOL 4522	Laboratory in Protein Analysis, Proteomics, and Protein Structure	3
BIOL 4523	Molecular Methods in Enzyme Analysis	4
CHEM 4851	Biological Chemistry Laboratory	4

Neither CHEM 4900 Introduction to Research nor CHEM 4950 Advanced Undergraduate Research in Chemistry can be used to satisfy the advanced laboratory requirements.

Departmental Honors for the Major in Chemistry

To be eligible for Departmental Honors, a student must complete the Latin Honors program in chemistry. To graduate "with distinction," a student must maintain a Chemistry grade point average of 3.5 and complete the equivalent of at least 3 units of CHEM 4900 Introduction to Research. To graduate "with high distinction," a student must maintain a Chemistry GPA of 3.65 and complete the equivalent of at least 3 units of CHEM 4900 Introduction to Research and one semester of CHEM 4950 Advanced Undergraduate Research in Chemistry. To graduate "with highest distinction," a student must maintain a Chemistry GPA of 3.8 and complete the equivalent of at least 3 units of CHEM 4900 Introduction to Research and one semester of CHEM 4950 Advanced Undergraduate Research in Chemistry. Chemistry research is defined as a research project performed under the direction of a Chemistry faculty member or a research project approved by the Chemistry Department Undergraduate Work Committee. The Chemistry GPA is calculated from the grades received in Chemistry courses and prerequisites for the Chemistry major. The level of Departmental Honors that a student achieves will appear on the student's final transcript.

Chemistry Major, Biochemistry Specialization

Program Requirements

- **Total Units Required:** 61-62
- **Grade Requirement:** All required chemistry coursework must be taken in residence at Washington University to be applied toward the chemistry major. A minimum grade of C- must be earned in each course to count toward the chemistry major.
- **Note Regarding Double Counting Course Credits:** College of Arts & Sciences Guidelines will be followed.

Required Courses

To prepare for a major in chemistry with a specialization in biochemistry, students will take the following:

Code	Title	Units
CHEM 1701	General Chemistry I*	3
CHEM 1702	General Chemistry II*	3
CHEM 1751	General Chemistry Laboratory I	2
CHEM 1752	General Chemistry Laboratory II	2
CHEM 2561	Organic Chemistry I With Lab	4
CHEM 2562	Organic Chemistry II With Lab	4
BIOL 2960	Principles of Biology I	4
BIOL 2970	Principles of Biology II	4
PHYSICS 1740	Physics I**	3
PHYSICS 1741	Physics I Laboratory	1
PHYSICS 1742	Physics II**	3
PHYSICS 1743	Physics II Laboratory	1
MATH 1510	Calculus I***	3
MATH 1520	Calculus II***	3
MATH 2130	Calculus III***	3
Total Units		**43**

* Students may substitute CHEM 1601 Principles of General Chemistry I and CHEM 1602 Principles of General Chemistry II for CHEM 1701 General Chemistry I and CHEM 1702 General Chemistry II. Please consult the department's director of undergraduate studies for details.

** PHYSICS 1760 Focused Physics I may replace PHYSICS 1740 Physics I. PHYSICS 1762 Focused Physics II may replace PHYSICS 1742 Physics II.

** MATH 2801 Honors Mathematics I may replace both MATH 1510 Calculus I and MATH 1520 Calculus II. MATH 2802 Honors Mathematics II may replace MATH 2130 Calculus III.

Majors in chemistry with a specialization in biochemistry must take a minimum of 18 units of advanced courses in chemistry or biochemistry, among which the following must be included:

Code	Title	Units
CHEM 4810	General Biochemistry I	3
CHEM 4820	General Biochemistry II	3
CHEM 4010	Physical Chemistry I	3
CHEM 4020	Physical Chemistry II	3
CHEM 4610	Inorganic Chemistry	3
Total Units		**15**

In addition, at least one advanced lab must be chosen from the following list:

Code	Title	Units
CHEM 4035	Nuclear and Radiochemistry Lab	3
CHEM 4079	Instrumental Methods: Physical Chemistry	3
CHEM 4559	Advanced Organic Chemistry Laboratory	4
CHEM 4570	Synthetic Polymer Chemistry Laboratory	3
or CHEM 4579	Synthetic Polymer Chemistry Laboratory - Writing Intensive	

CHEM 4670	Inorganic Chemistry Laboratory	3
or CHEM 4679	Inorganic Chemistry Laboratory - Writing Intensive	
CHEM 4851	Biological Chemistry Laboratory	4

Additional Information

Study Abroad

Study Abroad programs are available both for chemistry and pre-medical studies. Details of these programs can be found on the Overseas Programs website. For chemistry programs, students may be able to receive elective/research credit for courses taken/research done abroad. It is strongly advised that students contact the Department of Chemistry Study Abroad Advisor, Prof. Richard Mabbs (mabbs@wustl.edu), as soon as possible after declaring the major to discuss study abroad plans.

Latin Honors for the Major in Chemistry With a Specialization in Biochemistry

- **Total Units Required:** 64-66

To qualify for Latin Honors, students must complete a minimum of 21 units in advanced courses, including **one** of the following courses:

Code	Title	Units
CHEM 4101	Special Topics in Physical Chemistry	3
CHEM 4631	Inorganic Biochemistry	3
CHEM 4821	Chemical Biology	3
CHEM 4830	Bioorganic Chemistry	3
CHEM 4839	Bioorganic Chemistry - Writing Intensive	3
CHEM 4831	Nucleic Acids	3
CHEM 4833	Protein Biochemistry	3
CHEM 5841	Chemical Dynamics of Biological Pathways	3
BIOL 3340	Cell Biology	3
BIOL 3490	Microbiology	4

or a second advanced laboratory course in chemistry or biology chosen from the following list:

Code	Title	Units
CHEM 4035	Nuclear and Radiochemistry Lab	3
CHEM 4079	Instrumental Methods: Physical Chemistry	3
CHEM 4559	Advanced Organic Chemistry Laboratory	4
CHEM 4570	Synthetic Polymer Chemistry Laboratory	3
or CHEM 4579	Synthetic Polymer Chemistry Laboratory - Writing Intensive	
CHEM 4670	Inorganic Chemistry Laboratory	3
or CHEM 4679	Inorganic Chemistry Laboratory - Writing Intensive	
CHEM 4851	Biological Chemistry Laboratory	4
BIOL 4522	Laboratory in Protein Analysis, Proteomics, and Protein Structure	3
BIOL 4523	Molecular Methods in Enzyme Analysis	4

All required chemistry course work must be taken in residence at Washington University to be applied toward the chemistry major. A minimum grade of C- must be earned in each course to count toward the chemistry major.

Departmental Honors for the Major in Chemistry With a Specialization in Biochemistry

To be eligible for Departmental Honors, a student must complete the Latin Honors program in chemistry. To graduate "with distinction," a student must maintain a chemistry grade point average of 3.5 and complete the equivalent of at least 3 units of CHEM 4900 Introduction to Research. To graduate "with high distinction," a student must maintain a chemistry GPA of 3.65 and complete the equivalent of at least 3 units of CHEM 4900 Introduction to Research and one semester of CHEM 4950 Advanced Undergraduate Research in Chemistry. To graduate "with highest distinction," a student must maintain a chemistry GPA of 3.8 and complete the equivalent of at least 3 units of CHEM 4900 Introduction to Research and one semester of CHEM 4950 Advanced Undergraduate Research in Chemistry. Chemistry research is defined as a research project performed under the direction of a chemistry faculty member or a research project approved by the Chemistry Department Undergraduate Work Committee. The chemistry GPA is calculated from the grades received in chemistry courses and prerequisites for the chemistry major. The level of Departmental Honors that a student achieves will appear on the student's final transcript.

Chemistry Minor

Program Requirements

- **Total Units Required:** 41 (27 in chemistry; 14 in math and physics)
- **Grade Requirement:** All chemistry coursework must be taken in residence at Washington University to be applied toward the chemistry minor. A minimum grade of C- must be earned in each course to count toward the chemistry minor.
- **Note:** Regarding the double counting of course credits, Arts & Sciences Guidelines will be followed.

Required Courses

Code	Title	Units
CHEM 1701	General Chemistry I*	3
CHEM 1702	General Chemistry II*	3
CHEM 1751	General Chemistry Laboratory I	2
CHEM 1752	General Chemistry Laboratory II	2
CHEM 2561	Organic Chemistry I With Lab	4
CHEM 2562	Organic Chemistry II With Lab	4
PHYSICS 1740	Physics I**	3
PHYSICS 1741	Physics I Laboratory	1
PHYSICS 1742	Physics II**	3
PHYSICS 1743	Physics II Laboratory	1
MATH 1510	Calculus I***	3
MATH 1520	Calculus II***	3
Total Units		**32**

* Students may substitute CHEM 1601 Principles of General Chemistry I and CHEM 1602 Principles of General Chemistry II for CHEM 1701 General Chemistry I and CHEM 1702 General Chemistry II. Please consult the department's director of undergraduate studies for details.

** PHYSICS 1760 Focused Physics I may replace PHYSICS 1740 Physics I. PHYSICS 1762 Focused Physics II may replace PHYSICS 1742 Physics II.

** MATH 2801 Honors Mathematics I may replace both MATH 1510 Calculus I and MATH 1520 Calculus II.

Elective Courses

Student must complete 9 units of chemistry encompassing three courses in at least two subdisciplines. BIOL 4510 General Biochemistry may be used to complete 3 of these additional 9 units, but not in combination with CHEM 4810 General Biochemistry I or CHEM 4820 General Biochemistry II. Courses must be at the 3000 level or above, but CHEM 4900 Introduction to Research and CHEM 4950 Advanced Undergraduate Research in Chemistry are specifically excluded.

Website:	http://chemistry.wustl.edu

Classics

The major in Classics focuses on the study of the Latin and/or ancient Greek languages. The major in Ancient Studies is for students who want to explore the whole spectrum of the classical world with little or no work in the ancient languages. Resources on campus that support the study of classics include a substantial library collection of materials related to the ancient world, collections of Greek papyri and art, and the Wulfing Coin Collection.

- Latin (p. 377)
- Interdisciplinary Courses (p. 380)

Classics

CLASSICS 1011 First-Year Seminar: Ancient Mediterranean Textile Production
Humans of the ancient world had to devote vast amounts of time and resources to the production of textiles such as clothing, bedding, ship's sails, and beyond. In this course you will dive into the textile production techniques of the ancient Mediterranean, with units on fiber preparation, spinning, weaving, laundry, and non-clothing textiles. In addition, we will explore the social structures (especially gender) which influence and are influenced by textile production. This course has a significant hands-on component. It will be approximately 50% engagement with scholarship and 50% studio work. That means that every week you will be participating in the processes that you are reading about. There are no required prerequisite courses or skills, but you must be ready and willing to try new things with your hands. The evidence for ancient fiber production is varied, and so the scholarship portion of this class will involve work in the fields of classical philology, art history, and archaeology.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM
Typical periods offered: Spring

CLASSICS 1120 Freshman Seminar: The World of Cleopatra
Cleopatra -- the last queen of ancient Egypt -- captivated her contemporaries and has fascinated the Western world ever since her famous suicide by asp in 31 BCE. She was a woman of contrasts: Pharaoh of Egypt and Greco-Macedonian queen; seductive woman and shrewd political strategist; a ruthless monarch using every means available to consolidate her position in the face of the encroaching power of the Roman Empire. Through texts and material culture, the seminar will seek to understand Cleopatra in the context both of her native Egypt and of the wider Mediterranean world. We will thus examine the traditions of Pharaonic Egypt; the historical events that brought Egypt under the control of the Macedonian Ptolemies (Cleopatra's dynasty); the wider stage of East-West tension and conquest in which Cleopatra struggled to maintain her power; her relationships (political and personal) with famous men of her day (Caesar, Herod, Mark Antony); her capital city of Alexandria, the largest metropolis of its day; Cleopatra's brilliant court and its luxury arts; and finally the many Cleopatras that have populated art and literature of later times. We will emerge with a sense of Cleopatra, both as a unique individual and as a product of her time.
Credit 3 units. A&S IQ: HUM, LCD Art: CPSC BU: HUM, IS EN: H
Typical periods offered: Fall

CLASSICS 1130 First-Year Seminar: Wining and Dining in the Classical World
The focus of this course will be food culture in Greek and Roman societies from the Archaic to the late Roman period. However, foodways from adjacent contemporary cultures will also be briefly examined. Sources will include textual evidence, as well as ethnographic studies of ancient people, iconographic and archaeological evidence, specifically osteological and botanical remains from archaeological sites. Experimental studies will be conducted in class to augment the learning experience of students.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Spring

CLASSICS 1140 First-Year Seminar: Ancient Literary Journeys
Recent social histories exploring Greek childhood have emphasized the reconstruction of the ancient child's agency. Such studies have been interested to illuminate the lived experience of children and to apprehend their voices so often silent in the sources. While such inquiry has clearly widened our understanding of ancient children's lives, the present course is designed instead to explore explicitly the representation of children as particularly rich reservoirs of cultural values. Drawing upon a range of art historical and archaeological sources and literary genres, we will examine the ways in which children were presented to mirror back social mores, thus capturing the aspirations of ancient Greek society. As figures of future potential, children continue to offer social historians one of the most striking lenses through which to explore the question of our humanity. The protean answer to this question at once reveals the proximity and vast distance that stands between our modern society and the ancient Greek one.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

CLASSICS 1150 First-Year Seminar: Engaging the Classical Past in Modern Fiction
This course will explore the persistent -- but often camouflaged -- influence of classical antiquity on modern genre (popular) fiction. Students will read and discuss both texts from antiquity (e.g., Ovid's Metamorphoses, Lucian's A True History) and selections from the works of major 20th-century authors drawn from the canon of a specific genre. Although popular fiction embraces a wide range of authors and styles, genres that are particularly engaged with the classical past include science fiction (e.g., Jules Verne, Suzanne Collins), fantasy (e.g., J.R.R. Tolkien, Rick Riordan), horror (e.g., H.P. Lovecraft, Stephen King), mystery (e.g., Elizabeth Peters, Steven Saylor), and adventure (e.g., Clive Cussler, David Gibbins). Discussion of these texts will include theorization about the nature of the genre and its origins as well as specific examples of allusions and intertexts to ancient Greek and

Roman authors, focusing on the characters, artifacts, monsters, themes, legends, and plot devices drawn from Greco-Roman mythology or modern mythology about Classical antiquity. Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

CLASSICS 1160 First-Year Seminar: Magicians and Witches in Greco-Roman Literature
This course examines the representation of magicians and witches in ancient Greek and Roman literature. The starting point is Apuleius' Metamorphoses (or The Golden Ass, as St. Augustine dubbed it), written in the second century CE. This work of narrative prose collects several tales of witches, magical transformations, and religious revelation. From there, we examine other tales of magicians and witches, paying particular attention to the role of gender in these representations and the conflict between magic and religion. The goal is to understand how these representations function within their particular society, what anxieties they reveal, and how they relate to the archaeological evidence we have for these practices.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H
Typical periods offered: Fall

CLASSICS 1170 First-Year Seminar: Villians of Ancient Rome
Fall 2024: Who were the ancient Romans? What were their lives like? What did they care about, and what did they believe? In this seminar, you will work to answer these questions and more as you examine the rich culture and literature of the ancient Romans through the lens of villainy. You will read historical and literary accounts of ancient Rome and explore the great villains of the monarchy, republic, and empire-to name a few: Tarquinius Superbus, Lucius Catiline, Livia Drusilla, Marc Anthony, and Agrippina the Younger. As we make our way through our sources you will learn about the daily life, social structures, governments,economies, and multiple religions of Roman culture. Furthermore, you will come to see how traces of Romans (virtuous and villainous) live on today! After a semester of critical reading and class discussions, you should leave the course with a greater understanding of three things: Roman culture broadly, the impact that this culture has on our modern world, and what constitutes a villain in the Roman mind across the centuries. Note: This course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

CLASSICS 1171 Christianity and Polytheism in Late Antique Egypt
This course explores the subject of polytheism in late Roman Egypt and the role that Christianity played in shaping a new religious, social, and cultural environment between the third century CE and the advent of Islam in the seventh century. The goal is to gain an understanding of the process by which the new religion spread in a deeply Hellenized part of the Mediterranean world such as Egypt. Indeed, its inhabitants had not only largely adopted the Greek language, but were deeply imbued with Greco-Roman culture and lifestyle, at the same time remaining attached to their traditional religious heritage. The seminar will touch upon issues of religious and cultural resistance, imperial involvement, official propaganda, proselytism, and syncretic manifestations of devotional practice. Attention will also be paid to the variety of forms in which Christianity (and modes of Christian life) developed in Egypt, revealing a complex but deeply fascinating world of ideas and beliefs. The religious topography of pre-Christian Egypt, in which temples were prime visual landmarks, will be examined and compared with the dramatic changes brought about, both to the built and the natural environment, by the appearance and dissemination of Christian places of cult and monastic life.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

CLASSICS 1180 First Year Seminar: The Emperor Nero: Prince, Monster, Artist
The destructive, scandal-ridden career of the Roman emperor Nero (mid-1st century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the Bad Emperors, and seen as a symbol of the decline of Rome itself - especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the Life of Nero by Suetonius (2nd century CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H
Typical periods offered: Fall

CLASSICS 1190 First-Year Seminar: Power and Persuasion: The Courts and Laws of Ancient Athens
In ancient Athens, each citizen had the power to prosecute others for wrongs committed not only against him but also against society as a whole. Each citizen defended himself without aid of lawyers and judges. This system depended upon an intensely democratic structure of jury courts and laws and upon the development of rhetoric as an artful speech by which to persuade fellow citizens to find one way or the other. Nearly 100 speeches survive from the Athenian courts. and they provide a remarkable window into Athenian society, politics, and law. In addition to reading translations of many of these speeches, we will examine the physical setting of Athenian courts and explore the manner in which this legal system was integral to Athens' democracy.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H
Typical periods offered: Spring

CLASSICS 1200 First-Year Seminar: Fabricated Histories: Ancient Greece and Rome in European Fascism
Fascist Italy and Nazi Germany created and expressed unique forms of power and justification through fabricating connections to Ancient Greece and Rome. For almost 1,500 years before Benito Mussolini and Adolf Hitler began their rises to power after World War I, these ancient civilizations had been two of the most significant symbols of power, culture, achievement, and imitation. In this class, we will dive deeply into the nature of the relationship between the ancient world and these two fascist states. We will investigate how the leaders and their states attempted to cultivate relationships with the ancient past through history, film, architecture, and propaganda. We will strive to answer two fundamental questions of great value for understanding how knowledge is manipulated to serve political power:

1. Why did Italian and German fascists turn to Ancient Greece and Rome? Addressing this question will help us understand the decisive role classical antiquity has had in one of the most destructive political ideologies of the modern era.
2. What specific mechanisms were used to interpret Graeco-Roman culture and knowledge? Answering this will allow us to evaluate how ideologies reframe knowledge to create specific identities and cultivate power.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM

Typical periods offered: Fall

CLASSICS 1330 Ampersand: The Age of Pericles
This seminar will explore the relationship between the sociopolitical history and cultural development of Athens in the fifth and fourth centuries BC. Students will be encouraged to analyze both archeological and literary evidence throughout the process of democratization, paying particular attention to the Periclean building program, including the sanctuary of Athena on the Acropolis, the Agora, domestic Athenian architecture, and the panhellenic sanctuaries of Delphi and Olympia. Selections from the histories of Herodotus and Thucydides, the plays of Sophocles and Aristophanes, the dialogues of Plato, and Aristotle's Constitution of Athens will highlight the functions and limitations of the democratic regime. This course is for first-year, non-transfer students in the Democracy and Myth in Ancient Greece Ampersand program.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Spring

CLASSICS 1510 Beginning Coptic I
This course provides an introduction to the Coptic language in the Sahidic (southern) dialect. Coptic was the vernacular language spoken and written in Egypt during the Roman, Byzantine, and Arab periods (until about 1300 CE) and as such is important for studying the history of premodern Egypt. It preserves some of the oldest known translations of the Bible, many apocryphal and heretical books that illustrate the wide diversity of ancient Christianity (e.g., the Gospels of Thomas and Mary), as well as sermons, saints' lives, monastic instructions, and liturgical manuals that still constitute the literary culture of the Coptic Orthodox Church today. In addition, a plethora of magical papyri illustrate medical and religious practices; personal letters reveal the lives of everyday people; and troves of business documents (e.g., contracts, wills, governmental petitions, receipts) have proved important for understanding Roman and Byzantine economies. Because Roman Egypt was a highly bilingual society, there are even instances of Classical Greek literature translated into Coptic (e.g., selections of Homer and Plato), and these offer a unique witness to how such texts were received by Egyptians. The goal of this course is to cover 15 of the 20 lessons in the grammar book. The remainder will be covered in the second level of this course.
Credit 4 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Fall

CLASSICS 1520 Beginning Coptic II
After completing the remaining grammar lessons from Beginning Coptic I, we will build skill and confidence as translators by reading selections from a variety of Coptic texts: the Sahidic Gospel of Mark, the hagiographic Life of John the Monk, selections from the Gospels of Mary and Thomas, and a unique Coptic translation of Plato's Republic. In our readings from the Bible and Plato, those who read Classical Greek will also have the opportunity to study how ancient translators chose to render the Greek texts into Egyptian, and how, in the process of translation, they changed the meaning of the originals. Prerequisite: Classics 188 or permission of instructor.

CLASSICS 2101 Beginning Sanskrit I
This course is an introduction to Classical Sanskrit, the ancient literary language of India. Students will learn to read and write in the Devanagari writing system and be introduced to the basics of Sanskrit grammar. By the end of the course students will be able to produce grammatical paradigms of Sanskrit words, understand and produce complex sentences in Sanskrit, and will even start reading passages of the Mahabharata in the original.

CLASSICS 2250 Latin and Greek in Current English
An astonishingly large number of English words, especially in areas such as medicine, science, and law, are derived from Latin and Greek. This course will provide a study of the impact of Latin and Greek on the English language through study of the Latin and Greek roots, prefixes, and suffixes that are most commonly found in English technical and non-technical vocabulary and the linguistic principles through which these elements have entered the English language.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

CLASSICS 2340 The Greek World
This course offers an introduction to the society and culture of ancient Greece, the civilization that created Homer, Socrates, and Herodotus, among many others. Using a wide variety of literary, documentary, and material sources, we will focus on one central question: what does it mean to be Greek in antiquity? We will explore how the negotiation of 'Greekness' affects cultural values, how it influences the geopolitics of the ancient Mediterranean, how women, slaves, and immigrants fit (or do not fit) into this Greekness, how ancient Greek democracy arises, and how it dies.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

CLASSICS 2360 The Roman World
An introduction to the society and culture of the ancient Roman Republic and Empire. The Roman World began as a small settlement by the Tiber River and became a huge and diverse empire extending into three continents, with a cultural legacy that has lasted to this day. The course will cover key events over a millennium of Roman political history, but much of our time will be given to study and analysis of Roman concepts of national identity, moral and political thought, social hierarchies and dynamics, family, religion, and entertainment. To this end, we will examine a diverse combination of primary sources - literary, documentary, and material.

CLASSICS 2510 Projecting the Past: Ancient Greece and Rome in Modern Film
Since the earliest days of film, screenwriters and directors have mined the rich history of Ancient Greece and Rome to captivate audiences with tales of heroes and slaves, soldiers and lovers. This course will examine such cinematic representations across a variety of American and European films from the 20th and 21st century. Drawing upon translated selections from ancient Greek and Roman authors,

secondary readings and weekly screenings, students will reflect upon the ways in which film adaptations of antiquity both tell us much about Ancient Greece and Rome and reveal as much about our present as they do the past.

CLASSICS 2900 Directed Research in Classics
Introduces first-years and sophomores to research by engaging them in ongoing faculty research projects within the department. Under the direction of a faculty mentor, students take part in tasks that contribute to the mentor's research. Through this hands-on experience, students learn about the research process and build foundational research skills that can benefit their future academic experience and development. Faculty mentors provide regular guidance, training, and feedback to support students' understanding and growth. Students are registered by the department after approval from the faculty member leading the research project. The course may be taken for 1-3 credit hours based on the weekly hours required. Credit/No Credit only
Credit 3 units.

CLASSICS 3000 Writing Intensive in Ancient Studies
This is a Writing Intensive course involving the study of selected topics in Classics. Recent topics include The Banquet in Antiquity; The Art of Reading and Writing an Ancient Greek Vase; and Golden Ages, Nostalgia, and the Idealized Past.
Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

CLASSICS 3010 Greek Mythology
The myths of ancient Greece are not only inherently interesting, but they are an incomparable starting point for the study of the ancient world, and they have offered numerous images and paradigms to poets, artists, and theorists. This course provides an introduction to the major Greek myths, their role in literature and art, their historical and social background, and ancient and modern approaches to their interpretation. Student work will include discussing course material in sections and online, taking two exams covering both the myths themselves and the ancient authors who represent our richest sources, and writing several essays interpreting or comparing ancient literary treatments. 3 units.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM

CLASSICS 3060 Race and Identity in Greco-Roman Antiquity
This seminar will start from one big question: Were the ancient Greeks and Romans white? We will examine this question -- and the questions that spring from it -- from two angles. First, using literary and archaeological evidence and informed by modern critical race theory, we will investigate how people living in the ancient Mediterranean understood difference: between themselves and others as well as among their own citizens. Did they have a concept of race at all? If not, how did they theorize difference? Second, we will study how and why the modern race system in the United States uses antiquity and racializes the premodern past. Students will write several short responses to sources over the semester and complete a research paper on a topic of their choice.

CLASSICS 3077 From the Renaissance to Nazi Germany:Ancient Greece and Rome in German Nationalism
In 1943 the Nazi SS stormed the Italian Villa Fontedamo in search of a book: the Germania of the ancient Roman historian Tacitus. Storming the villa was just one example of a quest Germans had been undertaking since the Renaissance: to find German national identity with the help of Ancient Greece and Rome. Graeco-Roman antiquity provided the Germans with the first comprehensive description of their ancient ancestors in the Germania and their first national hero, Arminius. In this course, we will study the impact of that Greece and Rome had on German national identity starting in the 16th century when a group of poet-scholars transformed the Germania and Arminius into central components of German national identity. We will trace it through the Enlightenment in the 17th-18th centuries and into the age of imperialism in the 19th century when the first monument to Arminius was erected in Germany, the so-called "Hermannsdenkmal" (Monument to Arminius). We will end with how the Nazis reinterpreted the culture of Ancient Greece and Rome as a justification for fascism and violent nationalism. We will debate extensively and write in detail about questions of authority, identity, tolerance, intolerance, belonging, and ultimately why classical culture has been one of the most influential forces of the last 500 years. Our focus will lie on three key questions, each of incomparable relevance in today's world: 1. Why did German nationalists turn to Ancient Greece and Rome? Addressing this question willhelp us understand the decisive role classical antiquity has had since Rome fell in 476 CE 2. What specific mechanisms were used to interpret Graeco-Roman culture and knowledge? Answering this will allow us to evaluate how history is always in service of identity and power. 3. How did German identity develop? Evaluating this will help us understand how Renaissance-era poet-scholars were at the beginning of an identity creation that exploded in the 1900s. Our goals are to understand classical culture's potential for use and abuse, and to develop tools for historical thought and insight that help us understand the past and present. CLASSICS 3150 Gender and Sexuality in Greco-Roman Antiquity
In this course, we'll explore how ancient Greeks and Romans thought about gender and sexuality. We'll draw on ancient texts in translation as well as visual and material culture, and we'll engage with different scholarly approaches to the topic. As we do this, we'll discuss questions such as: How did the Greeks and the Romans define masculinity and femininity? What can we tell from our sources about those who did not fit neatly into this binary? How did ancient Greeks and Romans think about male and female anatomy and psychology? How did the Greeks and the Romans construct sexuality and how did they approach homosexual and heterosexual relationships? How did class, ethnicity, and age intersect with ideas about gender and sexuality in antiquity? We'll study both societal ideals as well as individuals who broke norms. While our focus will be on the ancient world, we'll also think about how the past can provide new perspective on the present.

Typical periods offered: Fall

CLASSICS 3160 The Women of Greek Tragedy
This course examines the role of women in Athenian drama. Students will read English translations of the works of the three major tragedians -- Aeschylus, Sophocles, and Euripides -- and their near contemporary, the comedian Aristophanes. Direct engagement with ancient texts will encourage students to develop their own interpretations of and written responses to the political, social, and ethical manipulation that these mythological women were compelled to endure and the subtle ways

in which they appear to exercise power themselves. Selected scholarly articles and book chapters will help students to contextualize these ancient dramas in their culture of origin. Because such issues continue to preoccupy both sexes today, students will see how Greek tragedy addresses perennial historical and cultural concerns through the examination of adaptations of Greek tragedies ranging from Seneca in ancient Rome to Spike Lee's Chi-Raq and Luis Alfaro's Mojada: A Medea in Los Angeles. The final research paper will encourage students to consider how a specific female character from antiquity is transformed for a modern dramatic audience.
Credit 3 units. A&S IQ: HUM, SC, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

CLASSICS 3230 The Arts and Culture of Rome
An introduction to the culture of the ancient Romans as revealed by their arts, literature, and institutions.
Credit 3 units. A&S IQ: HUM Art: AH BU: HUM

CLASSICS 3540 Gender, Class, and Comedy: Ancient and Modern
Few cultural products are effective as dramatic comedy in revealing, reflecting, critiquing how societies respond to differences of gender and social class. In this course we will consider how writer, performers, and audiences of dramatic comedies have responded to issues surrounding gender and class. We will read, discuss, and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences surrounding gender and social class? Why does comedy have such power both to unite and divide people as they respond to gender and class? Does dramatic comedy have the power to change attitudes surrounding gender and class? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy and its responses to society.
Credit 3 units. A&S IQ: HUM, LCD, SC, WI BU: HUM
Typical periods offered: Fall, Spring

CLASSICS 3560 Ancient Sport and Spectacle
Ancient sport and spectacle seem both familiar and foreign to us today. We share the Greek obsession with athletic success, and we have revived their Olympic games-and yet the Greeks competed nude and covered in oil and included in their celebration a sacrifice of 100 oxen to Zeus. So too do we recognize the familiar form of the Roman arena, but recoil from the bloody spectacles that it housed. In this class we will examine the world of ancient Greco-Roman sport and spectacle, seeking to better understand both ancient culture and our own. We will consider Greek athletic competition, Roman gladiatorial combat, chariot racing, and other public performances. We will set these competitions in their social and historical context, considering both their evolution and their remarkable staying power.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

CLASSICS 3670 Ancient Political Thought
The course examines the most significant ancient attempts to construct an ethically and practically viable politics. Topics include imperialism, citizenship, the cultivation of virtue, utopianism, and dissent. Although the focus is on understanding key texts as interventions in particular contexts, attention is also paid to contemporary reinventions of ancient thought. Readings are drawn from historians (Herodotus, Thucydides), philosophers (Plato, Aristotle), and orators (Demosthenes, Cicero).
Credit 3 units. A&S IQ: SSC BU: BA
Typical periods offered: Spring

CLASSICS 3700 Ancient Writing
A survey of the development of writing and ancient writing systems, including cuneiform, Egyptian Hieroglyphics, Mycenaean Greek, Etruscan, early Latin, Irish Ogam, Asian writing systems, and Mayan Glyphs.
Credit 3 units. A&S IQ: HUM BU: HUM

CLASSICS 3800 Ancient Greek and Roman Medicine
This course introduces students to the practice and theory of medicine in the ancient Mediterranean, beginning in Egypt and continuing through Greece and Rome. It ends in the Middle Ages. Greco-Roman medicine will be our focus. How was disease understood by practitioners and, as far as can be reconstructed, by laypeople? What form did surgical, pharmacological, and dietitic treatment take? What were the intellectual origins of Greek medicine? The social status of medical practitioners? How was medicine written and in what terms did its practitioners conceive it?
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Spring

CLASSICS 3830 Magicians, Healers, and Holy Men
Magic is perhaps not one of the first words one associates with Greco-Roman antiquity. Yet for most individuals living in the ancient Mediterranean, including philosophers, businessmen, and politicians, magic was a part of everyday life. Casting spells, fashioning voodoo dolls, wearing amulets, ingesting potions, and reading the stars are just some of the activities performed by individuals at every level of society. This course examines Greco-Roman, early Christian, and Judaic magical practices. Students read spell-books which teach how to read the stars, make people fall in love, bring harm to enemies, lock up success in business, and win fame and the respect of peers. Students also look at what is said, both in antiquity and in contemporary scholarship, about magic and the people who practiced it, which helps illuminate the fascinating relationship between magic, medicine, and religion.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

CLASSICS 3890 The Ancient Novel
Many modern readers are familiar with the mythological and dramatic literature of Greco-Roman antiquity, but fewer are aware that the same cultures developed a tradition of prose fiction concerned with romance, human psychology and sexuality, exotic travel and adventure, and religious experience. The European tradition of extended fictional narrative begins with the Greeks, and their novels, along with Apuleius' GOLDEN ASS and Petronius' SATYRICON, had a formative influence on later narrative traditions. Students read and analyze all the surviving examples of the Greco-Roman novel, including some fragmentary works, with the goal of throwing light on the history and conventions of the genre, its appeal, and its influence.

CLASSICS 4080 Sacred Ways and Holy Spaces: Athenian Religion and Topography
From seashore to mountain top, ancient Athens was famous for being a landscape rich with myth and religion. In order to worship their gods with processions, sacrifices, and other acts of devotion, Athenians moved through, across, and within space as defined by such things as sacred roads, monumental gateways and altars, and even places considered so holy that one was forbidden to enter. This course will introduce students to the study of place (topography) and to the methods and evidence by which we can determine where specific buildings and sites were, how they were used, and what they signified. We will explore major sites like the Acropolis as well as a variety of other temples, shrines, and holy sites across urban and rural landscapes alike, each of which structured space in itsr own way. By examining a wide range of archaeological and textual evidence (c. 800 BC-AD 400), we will develop an integrated understanding of Athenian religious belief and ritual in the context of architecture and space. While this course will concentrate on the topography of architecturally definable religious sites, we will also explore religious practices (e.g., magic, early Christianity) that employed the landscape in fundamentally different ways than other parts of the Athenian religious system.

Typical periods offered: Fall

CLASSICS 4230 The Reception of Egypt in the Graeco-Roman World
Ancient Greeks and Romans found Egypt to be an exceptionally enthralling world, in terms not only of its physical features but also of its people, monuments, and traditions. This course will explore how different views of Egypt emerged in the Graeco-Roman world; it will also investigate the possible reasons for the remarkable popularity and allure of Egypt and things Egyptian as reflected in the writings of Greek and Roman authors as well as in the art and architecture of the

Mediterranean world in Classical antiquity. In this seminar, we will read primary literary sources (in translation) that focus on the reception of ancient Egypt and, more specifically, its history, religion, and customs. Several of these sources also offer a privileged viewpoint to investigate how the perception of notable Egyptian figures -- chiefly Cleopatra -- was shaped by Rome to suit a specific agenda. In addition to the written sources, we will look at the artistic and archaeological evidence that best showcases the impact of Egypt's legacy on Graeco-Roman traditions. The readings assigned for each class will also provide a broad sample of secondary sources, consisting of some of the most significant scholarship on the image of Egypt in Classical antiquity.

CLASSICS 4260 Ancient Athens
Athens was one of the great cities of antiquity. From lavishly decorated marble temples on the Acropolis, to public office buildings and inscriptions in the Agora (civic center), to the houses of the living and the monuments for the dead, the city has left a rich record of her material culture. These buildings and objects, together with an exceptionally large number of literary and historical texts, make it possible to paint a vivid picture of the ancient city. The course concentrates on the physical setting and monuments of Athens, as revealed by both archaeology and texts, and how they functioned within the context of Athenian civic and religious life. PREREQUISITES: CLA 345C, CLA 350, OR PERMISSION OF INSTRUCTOR.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM

Typical periods offered: Fall, Spring

CLASSICS 4420 The Later Roman Empire: From Constantine to Justinian
Covers the period from c. 300 through the reign of Justinian. Focus on legal developments and codification of law, social changes, rise of Christianity, and fall of the Roman Empire in the west. PREREQUISITES: CLA 342C OR PERMISSION OF INSTRUCTOR.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

CLASSICS 4530 The Greek Symposion
This course explores the history, archaeology, material culture, and sociology of the symposion in ancient Greece. While we will focus mainly on the archaic and classical Greek symposion, we will also examine its reception in the Roman world. In this context, we will study art and literature produced for the symposion, as well as representations of the symposion in literature, especially in lyric poetry, drama, and philosophical prose.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Spring

CLASSICS 4600 Ancient Greek Religion
For the ancient Greeks, religion lay at the very core of all that they valued, thought, accomplished, created, and experienced. The correct worship of the gods constituted one of the great drivers of all social interaction and structure, be that in matters of war or of housekeeping. The religion of the ancient Greeks stands therefore as one of the most important, surprising, varied, and challenging domains of ancient society that we can study and it has formed an essential part of Classics since the very inception of this discipline some seven centuries ago. There is no text, no image, no place, no idea, no act, and no object that did not partake of or was somehow deeply informed by religious experience, belief, and practice. We will explore thematically a range of major topics ranging from the nature of myth and the actuality of animal sacrifice to the architecture of temples and the development of tomb cult, especially for heroes, in early Greece. We will pay special attention to the nature and limitations of our evidence and to methodological problems, as well as to an array of perspectives and questions. Concepts such as pollution, sin, purity, and the afterlife will be frequent topics of discussion, and most of our course will focus on the archaic and classical periods. We will therefore spend time elucidating as wide a range of what constitutes 'ancient Greek religion' as possible, including the role of curse tablets and magic, the mystery cults, the prevalence and function of oracles, the introduction of new gods and cults and non-Greeks, and much more. By virtue of the evidence at hand, much of our attention will be devoted to Athens, but we will also elucidate other histories and religious phenomena across the Greek world, spatially and chronologically, wherever possible. Our practical objectives include achieving broad as well as incisive knowledge of ancient Greek world in its manifold varieties and dimensions, as well as a deep familiarity with an important branch of scholarship devoted to it. In addition, the two assigned papers will constitute important practice in the development of students' abilities to write logical, clear, and properly substantiated research papers, while the presentations and discussion will further students' abilities to develop and defend their ideas and scholarly arguments.

Typical periods offered: Spring

CLASSICS 4640 Ancient Madness
In this course we will ask what madness meant in Greek and Roman culture. We will find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating, and categorizing people treated as mad. While we will concentrate on literary (particularly tragic and epic), philosophical, and medical texts, we will also look at visual representations and evidence from ritual and cult. An important part of our project will involve tracing the afterlife of classical ideas: the history of melancholia will ground this aspect of the course. Finally, we will consider how antiquity informs psychoanalysis (Oedipus, Antigone, Narcissus), and how ancient madness might partake in a critique of contemporary understandings of mental illness.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Fall

CLASSICS 4701 Ancient Greek and Roman Gynecology
This course examines gynecological theory and practice in ancient Greece and Rome, from about the 5th century BCE to the 3rd century CE. The task is complicated by the nature of our evidence. Our surviving textual sources are authored exclusively by men, mainly physicians. They have a pronounced tendency to conceptualize the health and disease in terms of a single body, which was male by default. They distinguished female bodies from male primarily in reproductive aspects. How exactly did these physicians understand diseases of women and, as far as can be recovered, to what extent were their views represented among laypeople? What form did treatment take and what was the social status of practitioners, both that of our extant sources and female practitioners whose voices have largely been silenced by the textual tradition? We will approach the study of Greek and Roman gynecology, first from the perspective of Greco-Roman medical views, then from the point of view of contemporary Western biomedicine. The limited nature of our sources will allow students to read the majority of surviving material. These primary readings will be accompanied by current secondary scholarship that explores these fascinating and often frustrating questions about the female body in ancient medical thought. All primary materials will be available in English translation. There will be an option for students with a background in Greek or Latin to form a satellite reading group. The course does not assume familiarity with Greek and Roman medicine more broadly.

Typical periods offered: Fall

CLASSICS 4760 Money, Exchange, and Power: Economy and Society in the Ancient Mediterranean World
From seaborne trade and banking to slavery and the impact of new technology, the economy of the ancient Mediterranean world constitutes a particularly dynamic field of study. To examine a society's underlying economics is to gain critical insight into those historical phenomena that are themselves the product of multiple, overlapping dimensions of human action and thought. This course engages directly with a fascinating array of primary evidence for economic behaviors, beliefs, structures, and institutions among the Romans, Greeks, and their neighbors. We will also explore the methodological challenges and implications of that evidence as well as a variety of modern theoretical approaches. This year our focus is mainly upon developments among the Greeks, ranging from the transformative invention of coinage to the rise of commercial networks centered around religious sanctuaries like Delos.PREREQ: CLA 341C OR 342C OR 345C OR 346C OR PERMISSION OF INSTRUCTOR.

Typical periods offered: Fall

CLASSICS 4770 Olympian Shadows: Macedon and Its Neighbors in Antiquity
The home of both Alexander the Great and Aristotle, Macedon was pivotal to the course of ancient Greek and Roman history and yet stood apart as a culturally and politically distinct region. Macedonian dynasts dominated the Hellenistic world and deeply shaped Roman reception of Greek culture, while others profoundly affected the intellectual life of antiquity. We will explore topics ranging from ethnicity, religion, and the nature of kingship to urbanization and Macedon's emergence as a great power until its subsequent transformation at the hands of the conquering Romans. We will pay special attention to Macedon's neighbors, especially Thrace and Illyria, as well as to Macedon's relationships with the Persian Empire and the Greek coastal colonies. PREREQUISITES: AT LEAST ONE SEMESTER OF CLASSICS 341C, 342C, 345C, OR 346C, OR INSTRUCTOR'S PERMISSION.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

CLASSICS 4800 Roman Coins and Their Stories
This course will provide insights into everyday life in Rome and its territories through the evidence of the coins minted from the Roman Republic until the collapse of the Western Roman Empire in AD 476 and beyond. We will discuss general numismatics, starting with the history of coins and coinage, and we will understand how these small objects became an intrinsic part of the Roman way of life and what evidence they provide for daily life in Rome, from ideology to religion and from politics and culture.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

CLASSICS 4900 Independent Study
Credit 3 units.
Typical periods offered: Fall, Spring

CLASSICS 4930 Senior Project
For Classics or Ancient Studies majors who wish to fulfill their capstone requirement in Classics through a one-semester research project. A structured research assignment or independent project under the supervision of one of the department's faculty is required. Prerequisites: Senior standing and permission of the Chair of the Department.
Credit 3 units.
Typical periods offered: Fall, Spring

CLASSICS 4970 Study for Honors
Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. Prereq: Overall GPA of 3.65.
Credit 3 units.
Typical periods offered: Fall

CLASSICS 4980 Study for Honors
Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. Prereq: Overall GPA of 3.65.
Credit 3 units.
Typical periods offered: Spring

CLASSICS 4996 Classics Elective: 400-Level
Course is used for transcribing 4000-level Classics elective units
Credit 3 units. EN: H
Typical periods offered: Fall, Spring, Summer

Greek

GREEK 1510 Beginning Greek I
An introduction to Classical Greek (Attic), which will prepare the student to read texts in Greek History, Philosophy, and Medicine as well as the New Testament. This course builds the foundations for readings in Greek Tragedy, Comedy, and Lyric poetry. Our goal will be to develop reading knowledge as rapidly and efficiently as possible. By the end of the year the student should be reading continuous Greek prose.
Credit 4 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

GREEK 1520 Beginning Greek II
Continuation of the program begun in GREEK 1510. Students will complete their initial study of Classical Greek grammar and will begin reading selections from ancient Greek authors.
Credit 4 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

GREEK 1590 Intensive Beginning Greek I
An intensive study of Attic Greek.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

GREEK 1996 Greek Elective: 1000-Level
This course is used for transcribing 1000- level GREEK elective units.
Credit 3 units. EN: H
Typical periods offered: Fall, Spring, Summer

GREEK 2010 Intensive Beginning Greek II
Completion of work begun in Greek 190D followed by readings in original Greek poetry and prose. Successful completion of Greek 210 will allow the student to proceed directly to Greek 318C. PREREQ: GREEK 190D OR PLACEMENT BY EXAMINATION.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

GREEK 2900 Independent Study
For students who wish to acquire or consolidate basic language skills in ancient Greek, under the direction of a faculty member. Prerequisite: permission of the department.
Credit 6 units.
Typical periods offered: Fall, Spring

GREEK 2996 Greek Elective: 2000-Level
This course is used for transcribing 2000-level GREEK elective units.
Credit 3 units. EN: H
Typical periods offered: Fall, Spring, Summer

GREEK 3170 Introduction to Greek Literature: Plato
Introduction to Attic prose through the reading of Plato's APOLOGY and related texts. Prerequisite: L09 102D or placement by examination.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

GREEK 3180 Introduction to Greek Literature: Homer
Introduction to epic poetry through the reading of selections from Homer's ILIAD and ODYSSEY.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

GREEK 3900 Independent Study
This course is for independent study.
Credit 3 units.
Typical periods offered: Fall, Spring

GREEK 3996 Greek Elective: 3000-Level
This course is used for transcribing 3000-level GREEK elective units.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring, Summer

GREEK 4110 Homer: The Odyssey
Prerequisite: Greek 312C or permission of the department.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM
Typical periods offered: Spring

GREEK 4130 Homer: The Iliad
This course will develop students' ability to read Homeric Greek and will serve as an introduction to the academic study of Homeric poetry. Students will be expected to read sizable amounts of Homeric text and to develop an expertise in the grammar of Homeric language, both from a practical and a linguistic perspective. A wide range of scholarly topics will be included in this course, but chief among them will be the nature of Homeric composition and the relationship between orality and literacy in the history of Homer and of Greek poetry generally. PREREQ: GREEK 318C OR PERMISSION OF INSTRUCTOR.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM
Typical periods offered: Fall

GREEK 4160 Hesiod
In this course, we will read substantial passages from the works attributed to Hesiod, an archaic period Greek poet whose style and subject matter are often contrasted to Homer, and whose influence on Greek literary culture was second only to Homer's. Hesiod's two major poems - Theogony and Works and Days - form important evidence for the Greek rhapsodic tradition, and the mythological content and compressed styles of these mini-epics strongly influenced later Hellenistic Greek and Roman poets. Through discussion of readings from recent scholarship, we will consider topics including the authorship and dating of the Hesiodic corpus, Hesiod's Near-Eastern influences, oral poetics, mythography, genre studies, and narratology. Preparation of substantial Greek reading assignments will be supplemented with frequent practice of scansion (both written and oral) and the parallel development of sight translation skills. Students will be responsible for the development of a portfolio consisting of written translations, creative and interpretive mini-projects, a commentary, and an original research project.
Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H
Typical periods offered: Spring

GREEK 4210 Sophocles
In this course, we will read closely two plays by Sophocles: OEDIPUS REX and TRACHINIAN WOMEN.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM EN: H
Typical periods offered: Spring

GREEK 4220 Euripides
The tragedies of Euripides are among the most powerful dramas ever produced. In this class we will read one or more plays of Euripides in Greek as well as scholarly works on the tragedies. Among the topics discussed will be language and style, meter and music, mythological and historical backgrounds, elements of performance, and Euripides' influence in the modern world. PREREQUISITES: GREEK 318C OR PERMISSION OF THE INSTRUCTOR AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

GREEK 4230 Aeschylus
This course will focus on Aeschylus' SEVEN AGAINST THEBES and on the PROMETHEUS BOUND; in addition, we will look at a few fragmentary plays. Readings will include relevant secondary literature.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

GREEK 4240 Aristophanes
A close reading of CLOUDS, FROGS, and PLUTUS, three plays that span the career of Aristophanes. No other author can tell us more about the lives and sensibilities of fifth- and fourth-century Athenians. PREREQ: GRK 318C OR PERMISSION OF INSTRUCTOR AND SOPHOMORE STANDING OR ABOVE. (INTERESTED FRESHMEN SHOULD CONSULT THE INSTRUCTOR AND CANNOT REGISTER WITHOUT PERMISSION.)
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM
Typical periods offered: Spring

GREEK 4300 Herodotus
The Histories of Herodotus are our most important source for a key period of Greek history and are also a delight to read. We will read in Greek sections from various parts of the Histories. Among the topics discussed will be Herodotus' attitudes towards cultural and ethnic differences, the accuracy of Herodotus' narrative, and Herodotus' literary techniques. PREREQUISITES: GREEK 318C OR PERMISSION OF THE INSTRUCTOR AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM
Typical periods offered: Fall

GREEK 4310 Thucydides
The course aims to help students read and comprehend the historian in the original. PREREQUISITE: GREEK 318C OR PERMISSION OF THE INSTRUCTOR AND SOPHOMORE STANDING OR ABOVE. (INTERESTED FRESHMEN SHOULD CONSULT THE INSTRUCTOR AND CANNOT REGISTER WITHOUT PERMISSION.)
Credit 3 units. A&S IQ: HUM BU: HUM
Typical periods offered: Spring

GREEK 4320 The Attic Orators
More than mere prose, Attic oratory consists of a rich body of literature in which style was paramount to its persuasive aims, and provides vital evidence for Athenian culture, politics, mores, institutions, thought, and history. This course will survey a representative-and important-sample of forensic, epideictic, and symbouleutic speeches from classical Athenian oratory, and will give special attention to the social, legal and political context of these speeches. In addition, the class will focus on improving students' command of syntax, vocabulary and idiom as the basis for further development as well as the study of different orators and their style.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

GREEK 4360 Attic Prose of the 4th Century BC
Selected texts of Attic orators, Xenophon, Plato, or Aristotle; specific readings for each semester in COURSE LISTINGS. May be repeated for credit for study of a different author or text.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM
Typical periods offered: Fall

GREEK 4370 Topics in Greek Poetry
Reading in Greek and discussion of one or more texts by one or more ancient Greek poets. May be repeated for credit for study of different texts.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM EN: H
Typical periods offered: Fall

GREEK 4380 Topics in Greek Literature
Study of selected problems, eras, or generic sequences; specific topic for each semester in Course Listings. May be repeated for credit for study of different topics.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM
Typical periods offered: Spring

GREEK 4390 The Greek Novel:
AN ETHIOPIAN STORY by Heliodorus (4th century CE) is a Greek novel unparalleled in length, ingenious in construction, and sophisticated in style. As expected, a pair of ill-fated but faithful lovers suffer their way through the tale. That tale, meanwhile, is steeped in Greek literary and philosophical history, and Heliodorus is fascinated by identity-formation in the cosmopolitan world he depicts. Issues of race and ethnicity take center stage as we follow our hero and heroine from Greece to Ethiopia. Across the semester we will engage the social and political stances the novel takes, while we also translate and analyze selections in Greek and read the whole novel in translation. PREREQ: GREEK 317C AND 318C OR THE EQUIVALENT, AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

GREEK 4400 Lucian
Lucian's TRUE HISTORIES is neither true, nor a history, but it is often called the first science fiction novel. Lucian's voice is one of the most distinctive in antiquity: wry, sarcastic, and too clever by half. He feels distinctly modern but is steeped in the literary tradition before him. In this class, we will read his TRUE HISTORIES and several other of his works, with a focus on his questions about truth and fiction, and his engagement with other genres of writing, including historiography, epic, philosophy, and rhetoric. We also read about the first journey to the moon.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Spring

GREEK 4450 Greek Prose Composition
The tradition of writing in Attic Greek stretches from classical antiquity to the present. In this course, students will become connoisseurs of that tradition and enter into it themselves. In the process, they will become better Hellenists. Each week, students will review points of Greek grammar, compose Greek sentences illustrating those points, read and analyze the style of a Greek passage, and write an original Greek composition of their own device. We will focus not only on grammatical and idiomatic accuracy but also on elegance of style. In this course, students will develop a more nuanced understanding of the Attic Greek language in all its many-splendored glory. They will thereby increase their ability to read ancient Greek with depth, ease, and pleasure. Prerequisite: Greek 317C and Greek 318C or equivalent and sophomore standing or higher. Note: This course is required for MA and PhD students in Classics.
Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H
Typical periods offered: Fall

GREEK 4510 Plato
This course will focus on a set of Plato's dialogues known as his Early Dialogues. We will read two and perhaps three of the Euthyphro, Protagoras, and Meno in Greek. We will accompany these readings with a relatively small sample of secondary scholarship in English that aims at contextualizing the dialogues in the broader scope of Plato's work. Our aim will be to gain familiarity with Plato as a prose author as well as a philosophical thinker.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

GREEK 4600 There Be Dragons: Greek Encounters With the Unknown in History and Legend

How did ancient Greeks imagine their world, both in terms of geography and ethnography? What did they know -- or think they knew -- about foreign cultures and faraway lands such as India, Persia, Africa, and the distant north? How have their representations of foreigners influenced European conceptions of the self and others, even into our own time? This course examines these questions by focusing primarily on two foundational authors: first, Herodotus, the father of history, who provides a wealth of information about ancient geography and the customs and lifestyles of non-Greek peoples; and second, Apollonius of Rhodes, whose epic poem The Argonautica tells the legendary tale of Jason and the Argonauts' search for the Golden Fleece. We will read extensive passages of these books in ancient Greek and, we will read and discuss additional passages in English translation, along with modern scholarship and atlases with historical and modern maps.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

Typical periods offered: Spring

GREEK 4710 Galen's On Prognosis: A Social History of Medicine in Second-Century Rome

Galen of Pergamum was a Greek physician, philosopher, and intellectual active throughout most of the second century CE. He was also a voracious reader and writer of Greek literature; his surviving work far exceeds the extant output of any other Greek author before the third century CE. In this course, we will be reading Galen's treatise On Prognosis, in which he recounts his career in the city of Rome, from his arrival in the early 160s through his tenure as an imperial physician to at least the emperors Marcus Aurelius and Commodus. While ostensibly a medical account, On Prognosis has little to say on technical medical issues. Rather, Galen's story is a carefully constructed professional autobiography that pivots from searing denouncements of Roman life to tense public performances of medical expertise and finally to intimate case histories of Rome's rich and powerful. The text presents us a fascinating window through which to examine not only the social practice of elite medicine in Rome of the second century but also the complicated experience of a Greek intellectual navigating the corridors of the Imperial court. Course goals include improving accuracy and speed in reading Greek prose, acquiring greater familiarity with intellectual discourse of the Imperial Period, and training in methods of research and writing.

Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM, IS EN: H

Typical periods offered: Spring

GREEK 4900 Independent Study

This course is for independent study.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

Typical periods offered: Fall, Spring

GREEK 4970 Study for Honors

Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. PREREQUISITE: OVERALL GPA OF 3.65.

Typical periods offered: Spring

GREEK 4996 Greek Elective: 4000-Level

This course is used for transcribing 4000-level GREEK elective units.

Credit 3 units. EN: H

Typical periods offered: Fall, Spring, Summer

Latin

LATIN 1510 Beginning Latin I

Salvēte et bene vēnistis ad linguam Latīnam! In this course, students will be introduced to the Latin language and begin developing skills in both written and spoken Latin. The curriculum covers chapters 1–18 of *Familia Romana*, with the remainder completed in Beginning Latin II during the spring term. From the very first class, students will engage with Latin through reading and speaking. By the end of the semester, they will have a strong foundation in introductory Latin forms, vocabulary, and syntax to build upon in the second half of this year-long sequence.

Credit 4 units. A&S IQ: LCD, LS EN: H

Typical periods offered: Fall

LATIN 1520 Beginning Latin II

Continuation and completion of the program begun in Latin 101D.

Credit 4 units. A&S IQ: LCD, LS EN: H

Typical periods offered: Spring

LATIN 1590 Intensive Elementary Latin I

An accelerated study of Latin grammar. For students with previous knowledge of Latin, graduate students outside of Classics, and for students willing to work at an accelerated pace.

Credit 5 units. A&S IQ: LCD, LS BU: IS

Typical periods offered: Spring

LATIN 1996 Latin Elective: 1000-Level

This course is used for transcribing 1000-level LATIN elective units.

Credit 3 units. EN: H

Typical periods offered: Fall, Spring, Summer

LATIN 2090 Intensive Introductory Latin: From Grammar Basics to Translation

An intensive introduction to Latin, especially suitable for graduate students in the humanities, social, and natural sciences, but open to undergraduates who seek permission from the Department of Classics. Thorough introduction to grammar, vocabulary, and syntax will be supplemented by translation practice. The last part of the course will focus on translation of substantial selections from Latin authors including Vergil and Ovid. Students who complete the summer course should subsequently be able to enroll in a 300-level Latin course.

Credit 6 units. A&S IQ: LCD

Typical periods offered: Summer

LATIN 2111 Intensive Introductory Latin I: Introduction to Grammar and Translation

An intensive introduction to Latin, especially suitable for graduate students in the humanities, social, and natural sciences, but open to undergraduates who seek permission from the Department of Classics. Thorough introduction to grammar, vocabulary, and syntax will be supplemented by translation practice. The last part of the course will focus on translation of short selections from Latin authors including Vergil, Cicero and Ovid. Students who complete this course will be able to enroll in the continuation course of LATN L10 2120 Intensive Latin II.

Credit 3 units. A&S IQ: LCD EN: H
Typical periods offered: Summer

LATIN 2121 Intensive Introductory Latin II: Intermediate Syntax and Translation
This course is an intensive introduction to Latin, especially suitable for graduate students in the humanities, social, and natural sciences, but open to undergraduates who seek permission from the Department of Classics. A thorough introduction to grammar, vocabulary, and syntax, continuing from Intensive Latin I. L10 2110. In this continuation course there will be a greater emphasis on Latin syntax and the translation of Classical texts. The last part of the course will focus on translation of substantial selections from Latin authors including Vergil, Cicero and Ovid. Students who complete Intensive Latin II: Intermediate, should subsequently be able to enroll in a 300-level Latin course. Prereq: L10 Latin 2110
Credit 3 units. A&S IQ: LCD EN: H
Typical periods offered: Summer

LATIN 2900 Independent Study
For students who wish to acquire or consolidate basic language skills in Latin, under direction of a faculty member. Prerequisite: permission of the department.
Credit 6 units.
Typical periods offered: Fall, Spring

LATIN 2996 Latin Elective: 2000-Level
This course is for transcribing 2000-level LATIN elective units.
Credit 3 units. EN: H
Typical periods offered: Fall, Spring, Summer

LATIN 3010 Introduction to Latin Literature I
Review of Latin grammar and syntax and development of reading skills and translation techniques through short readings from original texts in prose and poetry such as Caesar and Ovid. PREREQUISITES: LATIN 102D OR LATIN 190D, PLACEMENT BY EXAMINATION, OR PERMISSION OF INSTRUCTOR.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

LATIN 3020 Introduction to Latin Literature II: Elementary Prose and Poetry
Reading of selected Latin texts, with emphasis on development of reading skills and increasing vocabulary.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

LATIN 3170 Survey of Latin Literature: The Republic
A sampling of the major literary achievements of the last two centuries of the Roman Republic, including prose and verse authors. Readings are typically drawn from Catullus, Lucretius, Caesar, and Cicero. There will be regular, selective grammar review and discussion of translation strategies. PREREQUISITE: LAT 102D OR LAT 190D WITH A GRADE OF B+ OR BETTER, OR LAT 301 AND LAT 3161, OR PLACEMENT BY EXAMINATION.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

LATIN 3180 Survey of Latin Literature: The Empire
Readings in the verse and prose literature of the Roman Empire, particularly its first two centuries, with targeted grammar review and stylistic analysis. Readings may be drawn from Vergil, Livy, Suetonius, or other appropriate authors.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

LATIN 3900 Independent Study
For students who wish to consolidate language skills in Latin, under direction of a faculty member. Prerequisite: permission of the instructor.
Credit 6 units.
Typical periods offered: Fall, Spring

LATIN 3996 Latin Elective: 3000-Level
This course is used for transcribing 3000- level LATIN elective units.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring, Summer

LATIN 4010 Medieval Latin
This class is a survey of Latin literature from late antiquity (4th-6th centuries) to the late Middle Ages (13th century). We will read selections from Latin prose and poetry by both male and female authors of this period, including excerpts from the Historia Ecclesiastica of the Anglo-Saxon scholar Bede (the Venerable). Class-time will center on translation of the readings and discussion of the texts. All students should have access to a good Latin dictionary (the large edition of Lewis and Short is recommended; the large Oxford Latin Dictionary is not) and a Latin grammar.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM
Typical periods offered: Spring

LATIN 4081 The Catilinarian Conspiracy
In this course we will study one of the most fascinating and best documented episodes of the late Roman Republic, the Catilinarian Conspiracy of 63-62 BCE. The conspiracy, an attempted coup led by the apparently dissolute and certainly disaffected aristocrat Catiline, was uncovered and suppressed by the consul Marcus Tullius Cicero. We will read the main literary sources for the conspiracy in Latin (Cicero's first and third Catilinarian speeches; Sallust's Bellum Catilinae) or in English (Cicero's second and fourth Catilinarian speeches; Cicero's Pro Murena and Pro Sulla; short extracts from other texts). We will consider these texts both as historical sources and as works of literature.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

LATIN 4130 Latin Philosophical Writers
Readings among various writers of philosophy in Latin, ranging from Cicero to Seneca to Augustine. Texts will vary. Therefore, course may be taken more than once.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM
Typical periods offered: Spring

LATIN 4150 Cicero
Cicero's PHILIPPICS, speeches denouncing Mark Antony after the death of Julius Caesar, are masterpieces of invective from one of Rome's greatest orators. We will read PHILIPPICS 1 and 2, paying particular attention to: Cicero's language and style; rhetorical genre; and Cicero's assassination of Antony's character in the political and cultural context of the 1st century BCE. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall

LATIN 4160 Seneca
The tragedies of Seneca are fascinating works in themselves and have had a profound influence on modern theatre and literature. In this class we will read one or more plays of Seneca in Latin as well as scholarly works on the tragedies. Among the topics discussed will be the tradition of tragedy in Rome, questions of performance, and Seneca's responses to the politics and philosophy of his age. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

LATIN 4170 Seneca: Philosopher and Friend
Seneca the Younger was a philosopher, politician, playwright, and propagandist; he rose from the province of Spain to become tutor and advisor to Nero, only to fall from favor and commit suicide at the emperor's command. We will study Seneca's life and works, focusing on the Epistulae Morales and select philosophical treatises. We will pay special attention to issues of language and style, cultural and historical context, and ideological and philosophical content. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

LATIN 4210 Plautus
Readings from the comedies of Plautus. Discussion of play production in Republican Rome, reception, and interpretation. The advanced level Latin reading load will be supplemented by secondary readings, quizzes, and short reports. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

LATIN 4220 Lucretius
In this course, we will read selections from Lucretius' epic-didactic poem ON THE NATURE OF THINGS. The poem explains the basic tenets of Epicurean philosophy with a focus on the physical structure of the universe, the nature of the soul, and why we shouldn't fear death. There are many things in Lucretius that feel scientific in a modern sense, such as atomism and the absence of the gods. In fact, he has been accused of inspiring the Scientific Enlightenment, a charge we will acquit him of in this class. Special attention will be given to how Lucretius uses myth and poetry, the influence of earlier Roman epic poets such as Ennius, and his relationship with earlier Greek sources. No prior knowledge of Epicureanism or any philosophy is necessary; Lucretius will be happy to explain everything to you. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

LATIN 4310 Vergil: The Aeneid
We will read books 2 and 3 of the Aeneid, in which Aeneas relates the fall of Troy and the strange series of events that leads him to Carthage and Dido. In addition to close analysis of Vergil's poetic practice in the context of the poem as a whole, we will consider ways in which he engages his epic forebear Homer.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM EN: H
Typical periods offered: Fall

LATIN 4320 Horace
This course examines Roman poetry that illuminates ancient and still-influential ideas about the functions of literature. Horace's monumental Ars Poetica and his other literary-critical works will be the major texts. These works convey the complexity of contemporary debates about literature's role in society and history and about the merits of various genres (epic, tragedy, comedy, satire, epigram). Readings in secondary sources will help to fill out the picture of Horace's career and of the climate of literary production in early Imperial Rome.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

LATIN 4330 Ovid
In this course, we will read selections from the monumental and multifaceted Metamorphoses of Ovid, which was composed before the poet's exile from Rome in 8 CE. Supplementary readings from Ovid's elegiac verse will give us a fuller picture of the poet's career and cultural context. Substantial daily Latin readings will be supplemented with practice of scansion, additional readings from related ancient works, and readings from modern scholarship on the poem. There will be regular translation quizzes, a final exam, student presentations, and a final research and writing project. Prerequisites: Latin 3171, Latin 3181 (or equivalent, and sophomore standing or above.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

LATIN 4410 Roman Satire
This course focuses on the genre of hexameter satire represented by the Roman poets Lucilius, Horace, Persius, and Juvenal (2nd century BCE - 2nd century CE). The Roman professor Quintilian called satire entirely Roman (tota nostra), and our readings will allow us to explore the meaning of this claim for satire's authors and readers. We will read a large sampling of satiric verse in the original Latin, practice reading the dactylic hexameter, and observe and discuss differences between the poets' styles and themes. We'll also read and discuss scholarship on the genre's formal characteristics and influences, its origins in Republican literary culture, and its development in the Imperial period.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

LATIN 4440 Latin Prose Composition
Readings in select authors coupled with Latin composition, primarily in prose but occasionally in verse, with attention to grammatical and idiomatic accuracy as well as elegance of style.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

LATIN 4510 The Roman Historians
The Roman Historians. A survey of the major historians of the late republic and early empire, Sallust, Livy and Tacitus. Emphasis will be on their methodology and purpose in writing history. We will also look at the research activity of the antiquarians like Varro and Gellius. If time permits, we will try to read some of Ammianus Marcellinus.
Credit 3 units. A&S IQ: HUM BU: HUM
Typical periods offered: Spring

LATIN 4650 Silver Latin Epic: Lucan
Lucan's epic poem about the civil war between Caesar and Pompey, written under Nero, investigates themes of individuality, citizenship, morality, and historical inevitability in Roman history. We will read selections from the poem, focusing on Lucan's literary models and poetic style; his treatment of the past and of historical figures

like Caesar, Pompey, and Cato; and Lucan's place in the political, philosophical, and literary world of Neronian Rome. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

LATIN 4710 Elegiac Poetry
In this course we will read a broad selection of the works of the Roman elegiac poets, focusing primarily on the works of Propertius, Tibullus, and Ovid. This course will emphasize the development of Roman elegy as a genre during the Augustan period, and will consider a range of literary topics related to elegy, including poetic voice and persona, fictionality, style, meter, intertextuality, and generic tropes, as well as the political, social, and cultural context(s) for these poems. Coursework will include translation and analysis of Latin texts, written assignments, and readings from scholarly literature on Roman elegy. Prerequisites: L10 3171 & 3181 or the equivalent.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

LATIN 4830 Readings in Latin Prose: Apuleius
A survey of the major genres of Latin prose, history, oratory, and philosophy. Authors may include Caesar, Cicero, Seneca, Tacitus. Aim is to develop reading facility and understanding.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM EN: H
Typical periods offered: Spring

LATIN 4840 Topics in Latin Literature
This course involves the study of selected problems, eras, or generic sequences; the specific topic for each semester can be found in the Course Listings. The course may be repeated for credit for the study of different topics.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

LATIN 4850 Topics in Republican Latin
May be repeated for credit for study of different topics.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM
Typical periods offered: Spring, Summer

LATIN 4860 Tacitus
Tacitus, the great historian and orator of the late 1st and early 2nd centuries CE, is one of our best sources for the early history of the Roman Empire. With his concise style and scathing political insight, Tacitus' writings influenced later authors from Ammianus Marcellinus to Macchiavelli. We will read selections from Tacitus' historical works, paying particular attention to: prose style; genre, rhetoric, and historiography; and Tacitus' critique of the Principate. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM EN: H
Typical periods offered: Fall

LATIN 4870 Topics in Empire Latin
May be repeated for credit for study of different topics.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

LATIN 4880 Martial
Martial, the prolific first-century Latin poet, left behind fifteen books of poetry. Martial's epigrams can be witty, sincere, caustic, and often quite sexually explicit. In this course, we will read a selection of Martial's epigrams in Latin, and we will discuss various themes related to Martial's work, such as gender and sexuality, ancient conceptions of authorship and publishing, flattery, invective, and the many personae Martial adopts. We will also pay close attention to Martial's language and style, and we will discuss where Martial fits into the wider social and historical context.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Spring

LATIN 4900 Independent Study
This course is for independent research credit.
Credit 3 units. EN: H
Typical periods offered: Fall, Spring

LATIN 4970 Honors Course I
Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. PREREQUISITE: OVERALL GPA OF 3.65.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

LATIN 4980 Honors Course II
Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. PREREQUISITE: OVERALL GPA OF 3.65.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

LATIN 4996 Latin Elective: 4000-Level
This course is for transcribing 4000-level LATIN elective units.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring, Summer

Interdisciplinary Courses

ARTARCH 1100 First-Year Seminar: The Trojan War in Myth, Art, and Reality
The Trojan War was one of the most significant events in the history of the world. It was also, almost certainly, fictional. The goal of this class will be to examine the wide-ranging and varied evidence for the story of the Trojan War and its long-lasting cultural influence, from antiquity to the present day. Ultimately, we will seek to understand how every reflection on the Trojan War as a past event - whether poetic, artistic, or archaeological - has also been a reflection of a contemporary society - Iron Age Greece, Imperial Rome, Modern Europe - and an attempt to situate that society within a global history. In doing so, the class will also address questions of pressing contemporary relevance: including how civilizations form and collapse, how fact and fiction are intertwined in the construction of civic and ethnic identities, and how certain kinds of evidence may be alternately privileged or suppressed in the creation of historical narratives. Prerequisites: none
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, HUM BU: HUM, IS EN: H
Typical periods offered: Fall

ARTARCH 2035 Myths and Monuments of Antiquity
An introduction to the ancient world (circa 3500 B.C. to A.D. 400) based on masterpieces of art and architecture from Mesopotamia, Egypt, Greece, and the Roman Empire. The monuments are accompanied by a selection of myths and documents representing the cultural life of these ancient societies and constituting their legacy to our modern world.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ARTARCH 2040 Cities and Towns of the Ancient World
This course is an introduction to ancient urbanism in the Mediterranean region, the Near East, and the Indus Valley. The chronological span is wide, ranging from the Neolithic era to the Late Roman/Early Byzantine period. The archaeological evidence of some of the earliest known cities will be presented and discussed, with the aim of understanding the formation process of urban centers and how these shaped and influenced their sociopolitical, economic, and cultural life. Broad issues that will be considered in class concern the origin of urban life and its different manifestations; the relationship between the natural landscape and the built environment and how the former affected the development of the latter; and the ways in which ancient civilizations constructed and used space in order to shape social relations. The course will also highlight the available evidence of monuments and artworks in context as integral parts of the urban landscape of ancient cities and towns. When available, ancient documentary sources will be introduced in order to present a more comprehensive picture of those urban centers and of the communities that created and inhabited them. The readings assigned for each session (and discussed in class) will also provide a broad sample of primary and secondary sources, the latter consisting of relevant scholarship on the topic of ancient urbanism.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, HUM BU: HUM, IS EN: H
Typical periods offered: Spring

ARTARCH 3066 Art & Archaeology of Cleopatra's Egypt
This course is an introduction to the art and archaeology of Egypt from its conquest by Alexander the Great (332 BCE) to the early fourth century CE. It will examine the rich and multi-faceted history and artistic legacy of Egypt under the Ptolemies and their last queen Cleopatra, followed by the Roman conquest under Emperor Augustus up to the flourishing of Egyptian Christianity. Students will become familiar with a wide range of ancient sources, including documentary and literary texts, coins, architecture, paintings and sculpture. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215), or permission of instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM, IS EN: H
Typical periods offered: Fall

ARTARCH 3075 Pompeii: Cultural Mosaic of the Ancient Mediterranean
This course will provide an in-depth survey of artistic, architectural, and archaeological material from the ancient town of Pompeii, a river port of middling size and importance in southern Italy with remains that were remarkably well preserved by the ash and pumice stones of Mt. Vesuvius during the eruption of 79 CE. Starting with an overview of its development -- an Oscan settlement under Greek and Etruscan influence that expanded after the conquest of the Samnite and then Roman armies -- students will explore all aspects of urban life through Pompeii's uniquely rich archaeological record, with a particular focus on the social, cultural, and ethnic diversity that can be difficult to detect and appreciate even in the much larger, wealthier, and more cosmopolitan capitals of the Roman Empire. Over the course of the semester, students will learn various methods for applying different types of material evidence (including wall paintings, sculpture, architecture, furniture, and graffiti) to a series of scholarly questions about key points of conflict and tension within society, such as local attitudes toward foreign cultures, resistance to imperialism, the marginalization of women and slaves, opportunities for social mobility, and religious censorship. By the end of the course, a dynamic and colorful mosaic of Pompeii will have emerged, far removed from the image of a static Roman town supposedly frozen in time. Prerequisite: L01 113 or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, HUM BU: HUM, IS EN: H
Typical periods offered: Spring

ARTARCH 3080 Archaeology of Roman Slavery
Slavery was a fundamental part of the ancient Roman world. In this course, we will survey various ways in which the institution of slavery played a critical role in shaping Roman society. Through an exploration of social, economic, legal, and cultural aspects of Roman slavery, we will pose questions of what it means to be a slave society, how the ubiquity of forced labor impacted the lives of ancient Romans, and the extent to which we can recover the experiences and subjectivities of enslaved people. Throughout the course, we will confront the interpretive problems posed by biased and/or scarce evidence and by assumptions we may carry as the inheritors of modern slaveries. A recurring theme we will explore is the extent to which evidence of slavery and the material traces of enslaved people's lives are visible in the archaeological record. At the end of the term, we will contextualize Roman slavery by comparing it with modern examples and by considering the legacy of ancient slavery in modern visual culture and representations of enslaved people. Prerequisites: Any 100- or 200-level course in art history or archaeology; or permission of instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM, IS EN: H
Typical periods offered: Spring

ARTARCH 3100 Greek Art and Archaeology
A survey of the artistic achievements and material culture of the Greeks in the first millenium BCE (Iron Age through the Hellenistic period). Development of architecture, sculpture, and painting, as well as minor arts and utilitarian objects, with emphasis on the insights they offer into Greek society and interactions with the wider Mediterranean world.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM, IS EN: H
Typical periods offered: Spring

ARTARCH 3105 Greek and Roman Painting
This course provides a survey of the major achievements of ancient Greek and Roman painting, broadly understood and encompassing wall painting, panel painting, painted pottery, and mosaic. We will study monuments ranging over a millennium in time and located throughout the ancient Mediterranean. Particular attention will be paid to the social, political, and religious aspects of ancient Greco-Roman painting and to questions of innovation in artistic practice. Special emphasis will be placed on students' cultivation of the tools of art-historical analysis and of the presentation of that analysis in written form. Prerequisite: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215) or permission of instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, CPSC, FAAM, HUM BU: HUM, IS EN: H
Typical periods offered: Fall

ARTARCH 4140 Rome in Egypt: The Archaeology of an Oasis City
This seminar will focus on the results of the archaeological fieldwork carried out at Trimithis / Amheida, a Graeco-Roman city in Egypt's Western Desert. It will investigate the available documentary and archaeological evidence, including a wealthy house with paintings inspired by Classical themes, a public bath built in the Roman tradition, a rhetorical schoolroom, pyramid-shaped Roman tombs, remains of a temple, and one of the earliest churches discovered in Egypt so far. We will explore how this evidence compares with that from neighboring sites in Egypt's Western Desert as well as in the Nile Valley. The goal is to develop an appreciation and understanding of Romano-Egyptian architecture, Classical and late antique art in Egypt, and Egypt's religious, social, and cultural history. Students will also have the opportunity to familiarize themselves with notions of archaeological methods and practice, as adopted in the context of an Egyptian excavation project. Prerequisites: One course at the 100- or 200-level in Art History, Classics, or Archaeology recommended
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

ARTARCH 4155 The Invention of the Image: From Classical Art History to Modern Visual Studies
The scholarly field of Image or Visual Studies has developed in response to the widespread proliferation of images, both still and moving, in contemporary life. It distinguishes itself from traditional art history by examining visual representations of all types, not only works of high art, and by concentrating on the role those representations play in the formation of culture. Though most of the scholarship produced in this field focuses on the modern world, it depends upon ideas first developed in Mediterranean antiquity. This course has two primary goals. We will conduct an historical examination of practices and theories of image making from Near Eastern antiquity to modernity. In so doing, we will also carry out an historiographical survey of the major works in Image/Visual Studies, thereby gaining an appreciation for the wide range of methods of inquiry employed in this important field of research. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM EN: H
Typical periods offered: Spring

ARTARCH 4160 Art and Death in Ancient Rome
Perhaps more than any other phenomenon, death spurred the creation of art in the ancient Roman world. The practice of materially commemorating the deceased -- of perpetuating the memory of the dead through the creation of funerary monuments designed to appeal to both intimate familial relations and the public at large -- stretched across Roman social boundaries and endured for many centuries. But death also frequently provided the subject matter of art even outside the confines of the funerary realm. The goal of this course will be to explore the complex relationship between art and death in the Roman world. It will range from early Rome to the end of the empire and the changes brought about by widespread conversion to Christianity. In conjunction with historical readings, the course will also engage with theoretical texts in the anthropology and philosophy of death. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH BU: HUM EN: H
Typical periods offered: Spring

ARTARCH 4210 Pictorial Illusion in the Ancient Mediterranean
Among the many accomplishments in the history of Greco-Roman art, ancient writers especially valued the development of pictorial illusion. Pictorial illusion refers to the techniques of reproducing or approximating aspects of the visual perception of the material world on a two-dimensional surface. These include foreshortening, the application of highlights, and the indication of multiple points of depth in space relative to the picture plane. The purpose of the course is to explore the material, stylistic, and technical history of illusionistic painting practices in the ancient Mediterranean world from Classical Greece to Late Antique Rome and to seek to understand the cultural and social significance of those practices. In addition to examining specific historical questions in the development of ancient painting, the course will investigate trans-historical connections between vision, visuality, and methods of representation. Prerequisites: Either L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.
Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

COMPLITTHT 2107 Classical to Renaissance Literature: Text & Traditions
Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's Iliad is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin, and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 2108 Early Political Thought: Text & Traditions
A selected survey of the political and moral thought of Europe from the rise of Athenian democracy to the Renaissance, with emphasis on analysis and discussion of writers such as Thucydides, Plato, Aristotle, St. Augustine, Castiglione, and Machiavelli. The course aims to introduce students to basic texts in the intellectual history of Western Europe, understood both as products of a particular time and place and as self-contained arguments that strive to instruct and persuade. The texts are simultaneously used to chart the careers of such fundamental notions as liberty, virtue, and justice.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

DRAMA 2300 Theater Culture Studies I: Antiquity to Renaissance
This course is a survey of ancient, medieval and Renaissance theater and performance: in both the West and in the East, as it both reflects and shapes culture. Coverage will include the following areas: ancient Greece, ancient Rome, classical Sanskrit theater, Yuan China, medieval Japan, medieval Europe, Renaissance Italy, and Renaissance England. Both scripted theater and performance practices will be examined through the lenses of dramatic literature, theater history, performance studies, and dramatic theory. A continual emphasis will be on marginal and underrepresented figures, as we will attempt to excavate forgotten histories from the theatrical past.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

ELIT 3139 Topics in Literature:
Topics course which varies by semester.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

PHIL 3240 Ancient Philosophy
An examination of the high-water marks of philosophy in ancient Greece and Rome, focusing primarily on Plato and Aristotle. A wide range of philosophical problems will be discussed, including the nature of the good life, the justification of knowledge, and the ultimate nature of mind and world. Attention will be paid to how these problems unfolded in their historical context and to how the ancient treatments of them compare to contemporary efforts. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM EN: H
Typical periods offered: Fall

PHIL 4350 Aristotle
This course offers a maximally full and detailed introduction to the works of Aristotle. His logic, natural philosophy, psychology, metaphysics, ethics, and political philosophy will be discussed, and stress will be laid on the interpretive problems facing contemporary philosophers seeking to understand Aristotle's achievement. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

PHIL 4360 Hellenistic Philosophy
The Hellenistic Age, traditionally dated from the death of Alexander and his (Macedonian) Empire at 323 BCE to the birth of Augustus' (Roman) Empire in 31 BCE, gave the West three of its most innovative and influential schools of philosophy: Epicureanism, Skepticism, and Stoicism. This course investigates the central features of their thought. Special attention is paid to the still-relevant debates between the Stoics and Skeptics about the possibility of knowledge, to the disagreements among all three schools about the issues of freedom, responsibility, and determinism, and to their ethical theories. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H
Typical periods offered: Spring

REST 3066 Orthodoxy and Heresy in Early Christianity
From the time Jesus of Nazareth preached in the rural countryside of Judea, his followers interpreted his words differently and wrote varied accounts of what he said and did. As time passed and as Jesus' movement grew into a world religion -- Christianity -- disagreement among Christians only continued to increase, leading to the need to define and enforce correct beliefs and practices to create a Christian orthodoxy embodied in the now-familiar institutions of creed, canon, and clergy. Yet in the process of creating an orthodoxy, what was left out? Whose voices were suppressed? Through the careful study of ancient texts that were long-ago deemed heretical and virtually lost until the 20th century, this course examines the wide varieties of Christianity in its nascent years and discusses how the framers of orthodoxy defined themselves against these alternatives.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM EN: H
Typical periods offered: Spring

REST 3095 Introduction to the New Testament
What can be known -- from an historical perspective -- about the life and teachings of Jesus and his earliest followers? How did Jesus see himself and how did his followers see him? How did the lives, teachings, and deaths of Jesus and his followers come to form the heart of a new movement? If Jesus and the apostles were all Jews, how did Christianity emerge as a distinct religion? This course investigates these questions through a focus on the earliest sources for Jesus and his first followers, including and extending beyond the canonical books of the Christian New Testament. Our approach in this course is historical and literary, rather than theological or confessional: we ask what Jesus, his first followers, and their Jewish and pagan contemporaries did and believed, and we try to catch glimpses of the worlds in which they lived and the cultures which they took for granted.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM
Typical periods offered: Spring

REST 3170 Sexuality in Early Christianity
What did Jesus of Nazareth and his early followers teach about sexuality in terms of marriage, adultery, divorce, the virtues of procreation and celibacy, same-sex relationships, and erotic desire? How and why did ancient Christians take different stances on these issues, and how do these traditions continue to inform sexual ethics and gender roles today? In this course, we will study these questions by examining key passages from the teachings of Jesus in the Gospels, Paul's letters, writings of early church leaders, martyr propaganda, monastic literature, and apocryphal books deemed heretical. We will also consider the interpretations of contemporary historians of religion informed by recent trends in sexuality and gender theories.
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H
Typical periods offered: Spring

Ancient Studies Major

Program Requirements

- **Total Units Required:** 24
- **Grade Requirement:** Ancient Studies follows the Arts & Sciences minimum grade requirement of C- or better for courses that apply to the major. Students may apply up to a maximum number of 9 credits to their major earned through study abroad and/or transfer credits.

Required Courses

Courses that count toward the major may include CLASSICS 1000-4999, GREEK 1000-4999, or LATIN 1000-2999, as well as approved interdisciplinary courses. See the Courses tab on the Classics page (p. 367) for a complete list.

Advanced Required Courses

Of the 24 required units, at least 18 units must be at the 3000 level or above. Of these 18 units, at least 6 units must be at the 4000 level or above.

Suggested Field of Interest

In this major, students are encouraged to take at least one course in ancient history and to develop a certain depth in one special field of interest (e.g., art, history, literature, medicine, philosophy). Therefore, at least 9 of the 18 advanced units of the major should be taken in one such specific area.

Please consult the sections below regarding the required capstone experience and additional information, including study abroad and senior honors.

Required Capstone Experience

All Classics and Ancient Studies majors are required to complete a capstone experience in which they can synthesize what they have learned in their Classics courses. Except in unusual cases (e.g., a junior year abroad experience), the capstone experience should occur during the student's senior year. Among the most common capstone experiences are the following:

- A senior honors thesis (two semesters of research and writing concluding in a long paper)
- A one-semester research project
- A Classics study abroad experience
- Special work within a 4000-level seminar

Students should consult with their advisor to see what kind of capstone experience will work best for them.

Additional Information

Study Abroad

Study abroad for a semester in Rome or Athens is an option many Classics and Ancient Studies majors select. Washington University is a member of the Intercollegiate Center for Classical Studies (ICCS) consortium. Majors and minors regularly attend the one-semester ICCS "Centro" program in Rome. Others choose to attend a semester at the College Year in Athens (CYA) program. Students interested in these programs should consult Professor Luis Salas. Some other study abroad programs will also allow students to earn major credit in Classics or Ancient Studies.

Senior Honors

Students who are planning to pursue graduate work should enter the honors program, and other students are encouraged to consider this program as well. To apply, a student must have junior standing, an average of an A- or better in Greek and/or Latin courses (for Classics majors) or in Classics courses (for Ancient Studies majors) numbered 3000 or higher, an overall grade point average of 3.65 or higher, and permission of the chair. A formal application should be submitted in April of the junior year. A thesis of substantial nature and length is prepared and written under the direction of a member of the department, beginning during the fall semester of the senior year. A final draft is submitted to the director no later than February 1 of the senior year, and a final copy is submitted to the full thesis committee before spring break of the senior year. Credit of 6 units is awarded upon presentation of an acceptable thesis. These credits will be in addition to the 24 credits of the major; those students who complete senior honors will, therefore, graduate with a total of 30 credits in the major.

Phone: 314-935-5123
Email: classics@wustl.edu
Website: http://classics.wustl.edu

Classics Major

Program Requirements

- **Total Units Required:** 24
- **Grade Requirement:** Classics follows the Arts & Sciences minimum grade requirement of C- or better for courses that apply to the major. Students may apply up to a maximum number of 9 credits to their major earned through study abroad and/or transfer credits.

Required Courses

Courses that count toward the major may include CLASSICS 1000-4999, GREEK 1000-4999, or LATIN 1000-2999, as well as approved interdisciplinary courses. See the Courses tab on the Classics page (p. 367) for a complete list.

Advanced Required Courses

- At least 18 of the 24 required units must be at the 3000 level or above.

Required Language Courses

- At least 6 of the 18 units must be in Greek or Latin at the 3000 level or above.
- An least 6 of the 18 units must be in Greek or Latin at the 4000 level or above.

The specific program will be determined by the student and the advisor, in accordance with the student's interests. Those who are able to enter the program at the advanced level because of previous language study will normally take 15 or more advanced units in language. Competence in both Greek and Latin — although strongly encouraged and necessary for those planning to go on to graduate study in Classics — is not required. Majors, especially those planning graduate work, should enter the honors program if time permits.

Please consult the sections below regarding the required capstone experience and additional information, including study abroad and senior honors.

Required Capstone Experience

All Classics and Ancient Studies majors are required to complete a capstone experience in which they can synthesize what they have learned in their Classics courses. Except in unusual cases (e.g., a junior year abroad experience), the capstone experience should occur during the student's senior year. Among the most common capstone experiences are the following:

- A senior honors thesis (two semesters of research and writing concluding in a long paper)
- A one-semester research project
- A Classics study abroad experience
- Special work within a 4000-level seminar

Students should consult with their advisor to see what kind of capstone experience will work best for them.

Ancient Studies Minor

Program Requirements

- **Total Units Required:** 15
- **Grade Requirement:** Ancient Studies follows the Arts & Sciences minimum grade requirement of C- or better for courses that apply to the minor.
- Students may apply up to a maximum number of 6 credits to their minor earned through study abroad and/or transfer credits.

Courses

Courses that count toward the minor may include CLASSICS 1000-4999, GREEK 1000-4999, or LATIN 1000-2999, as well as approved interdisciplinary courses. See the Courses tab on the Classics page (p. 367) for a complete list.

Required Courses

Students select at least two courses from the following list:

- CLASSICS 3410 Ancient History: The Roman Republic
- CLASSICS 3420 Ancient History: The Roman Empire
- CLASSICS 3450 Greek History: The Dawn of Democracy
- CLASSICS 3460 Greek History: The Age of Alexander

Advanced Required Courses

Of the remaining 9 required units, students must complete at least 3 additional units at the 3000 level or above. Students must earn a grade of C- or better in all courses.

Phone:	314-935-5123
Email:	classics@wustl.edu
Website:	http://classics.wustl.edu

Classics Minor

Program Requirements

- **Total Units Required:** 15
- **Grade Requirement:** Classics follows the Arts & Sciences minimum grade requirement of C- or better for courses that apply to the minor.

Courses

Courses that count toward the major may include CLASSICS 1000-4999, GREEK 1000-4999, or LATIN 1000-2999, as well as approved interdisciplinary courses. See the Courses tab on the Classics page (p. 367) for a complete list.

Required Courses

GREEK 3170 Introduction to Greek Literature: Plato **and** GREEK 3180 Introduction to Greek Literature: Homer

or

LATIN 3170 Survey of Latin Literature: The Republic **and** LATIN 3180 Survey of Latin Literature: The Empire

Advanced Language Courses

Of the 9 remaining units, at least 3 units must be in Greek or Latin at the 3000 level or above.

Additional Information

Students may apply up to a maximum number of 6 credits to their minor earned through study abroad and/or transfer credits.

Phone:	314-935-5123
Email:	classics@wustl.edu
Website:	http://classics.wustl.edu

Comparative Literature and Thought

The Department of Comparative Literature and Thought houses two main units: Comparative Literature and Thought and Germanic Languages and Literatures.

Comparative Literature and Thought undergraduate programs include the following:

- Comparative Literature and Thought Major (p. 404)
- Comparative Literature and Thought, Comparative Arts Specialization Major (p. 406)
- Comparative Literature and Thought Minor (p. 408)
- Data Science in the Humanities Minor (p. 409)
- Legal Studies Minor (p. 410)
- Medieval and Renaissance Studies Minor (p. 410)
- Translation Studies Minor (p. 411)

Germanic Languages and Literatures undergraduate programs include the following:

- Germanic Languages and Literatures Major (p. 407)
- Germanic Languages and Literatures Minor (p. 410)

Phone:	314-935-4276
Email:	complitandthought@wustl.edu
Website:	https://complitandthought.wustl.edu/

Faculty

Chair

Matt Erlin
Professor of German
PhD, University of California, Berkeley

Director of Graduate Studies

André Fischer
Assistant Professor of German
PhD, Stanford University

Director of Undergraduate Studies

Joseph Loewenstein
Professor of English
PhD, Yale University

Department Faculty

Jami Ake
Teaching Professor
PhD, Indiana University

Aylin Bademsoy
Assistant Professor of Germanic Languages and Literatures
PhD, University of California, Davis

Nancy E. Berg
Professor of Modern Hebrew Language and Literature (Affiliated Faculty)
PhD, University of Pennsylvania

J. Dillon Brown
Associate Professor of English (Affiliated Faculty)
PhD, University of Pennsylvania

Jianqing Chen
Assistant Professor (Affiliated Faculty)
PhD, University of California, Berkeley

Jiayi Chen
Assistant Professor of East Asian Languages and Cultures (Affiliated Faculty)
PhD, University of Chicago

Lingchei Letty Chen
Professor of Modern Chinese Literature (Affiliated Faculty)
PhD, Columbia University

Rebecca Copeland
Professor of Japanese Language and Literature (Affiliated Faculty)
PhD, Columbia University

Tili Boon Cuillé
Professor of French and Comparative Literature (Affiliated Faculty)
PhD, University of Pennsylvania

Amy Gais
Lecturer in Comparative Literature & Thought
PhD, Yale University

Matthias Goeritz
Professor of Practice of Comparative Literature
PhD, Washington University

Robert E. Hegel
Liselotte Dieckmann Professor Emeritus of Comparative Literature in Arts & Sciences (Emeritus Faculty)
PhD, Columbia University

Robert K. Henke
Professor of Drama
PhD, University of California, Berkeley

Mona Kareem Husain
Assistant Professor of Jewish, Islamic, and Middle Eastern Studies (Affiliated Faculty)
PhD, State University of New York at Binghamton

Ignacio Infante
Professor of Comparative Literatures
PhD, Rutgers University

Carol Jenkins
Lecturer in Germanic Languages and Literatures
PhD, Washington University in St. Louis

Hyeok Hweon Kang
Assistant Professor East Asian Languages and Cultures (Affiliated Faculty)
PhD, Harvard University

Anika Walke
Associate Professor (Affiliated Faculty)
PhD, University of California

Gerhild Scholz Williams
Barbara Schaps Thomas and David M. Thomas Professor Emerita in the Humanities (Emeritus Faculty)
PhD, University of Washington

Majors

- Comparative Literature and Thought Major (p. 404)
- Comparative Literature and Thought Major, Comparative Arts Specialization (p. 406)
- Germanic Languages and Literatures Major (p. 407)

Minors

- Comparative Literature and Thought Minor (p. 408)
- Data Science in the Humanities Minor (p. 409)
- Germanic Languages and Literatures Minor (p. 410)
- Legal Studies Minor (p. 410)
- Medieval and Renaissance Studies Minor (p. 410)
- Translation Studies Minor (p. 411)

Courses

Courses include the following:

- Comparative Literature and Thought (p. 388)
- Germanic Languages and Literatures (p. 398)
- Legal Studies (p. 403)

Comparative Literature and Thought

COMPLITTHT 1100 Freshman Seminar
Small interactive seminars based on the research and interests of the professor that introduce students to comparative ways of reading, thinking about, and writing about literature. Previous topics include autobiography, memory in eastern and western literature, comedy, and oral-formulaic poetry.
Credit 3 units. Arch: HUM Art: HUM EN: H

COMPLITTHT 1103 First Year Seminar
A variety of topics in comparative literature, designed for first-year students--no special background is required--and to be conducive to the investigation and discussion format of a seminar. Previous topics include: Story Telling Through Sound, Banned Books, Imigrants and Exiles, Literature and Democracy, Literature and the Art of Apology, Hell on Earth: Crime, Conscience, and the Arts, Magical thinknig: Literature and Theory Engage the Occult
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 1104 First-Year Seminar: Topics in Interdisciplinary Inquiry
For first-year, non-transfer students. Past topics include: Research Methodologies in Cognitive Science, Fictions of Financial Crisis, The Good Life, Speculative Worlds & Technological Futures, and Fictions of Chance.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

COMPLITTHT 1106 Freshman Seminar: Seeing is Believing: Visuality, Power, and Truth
How does seeing work? Does the process of seeing begin with light bouncing off of objects and into our eyes - or when we ascertain what we are looking at? Visual interactions are far from neutral perceptions of objective truth, as they always involve interpretation of the world. Yet visual representations are one of the most common ways that we classify and understand the world around us. This course considers seeing as it affects social, spiritual, and political life: from religious practices of iconic representation and iconoclasm (and the politics these practices engender), to the technological practices of reproduction in creating realistic forgeries, to the ways that visuality can be a technology of power. This freshman seminar considers examples from across a wide range of times and places. We begin by exploring visuality, representation, art, and the ways that these produce meaning. We then move to examining several premodern and contemporary visual practices of major religions, considering how practices and ideologies of the visual vary dramatically across space and time. Next, we explore the relationship of changing technologies to notions of reality and authenticity. We then consider how techniques of visuality can be used for domination, particularly in contexts of economic and racial inequality. Finally, we examine the ways in which people use visual codes to define themselves through clothes, hair, and other visible signs of identity. Throughout, students will use the tools of art history, anthropology, and religious studies to gain a greater critical understanding of the practices, ideologies, and histories through which seeing meaningfully emerges across space and time.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

COMPLITTHT 1995 Comparative Literature Coursework Completed Abroad
Credit 12 units.

COMPLITTHT 2010 Crossing Borders: An Introduction to Comparative Literature
An introduction to some of the ideas and practices of literary studies at the beginning of the twenty-first century. This course is designed for majors and prospective majors in comparative literature and comparative arts - and other students interested in reading literature from many parts of the world and exploring issues in literary studies including questions of epistemology and representation, the cultural biases of readers, semiotics, translation theory, and Orientalism. Plays,

novels, and poems by writers including Euripides, Vergil, Racine, Rilke, Henry James, Borges, Mellah, and Murakami, and closely related short excerpts by theorists from Aristotle to Bhabha. Prerequisite: sophomore standing or permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

COMPLITTHT 2020 Introduction to Comparative Practice I
This course permits the close examination of a particular theme or question studied comparatively, that is, with a cross-cultural focus involving at least two national literatures. Topics are often interdisciplinary; they explore questions pertinent to literary study that also engage history, philosophy, and/or the visual arts. Although the majority of works studied are texts, the course frequently pursues comparisons of texts and images (painting, photography, film). Requirements may include frequent short papers, response papers, and/or exams.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

COMPLITTHT 2080 Individuals, Community, and Institutions: Text and Traditions
Explores the relationships between the individual and community, with attention to the mediating role of institutions. The primary focus will be on the American experience, but readings from Hobbes, Locke, and Rousseau will establish the framework for later explorations of American thought. From the eighteenth and nineteenth centuries, readings will be selected from Hamilton, Jefferson, Madison. Tocqueville, and Lincoln. From the twentieth century, the influence of such thinkers as John Dewey and Walter Lippman and Reinhold Niebuhr will be studied. Social theories of the role of institutions will be addressed in readings from philosophers and sociologists, including Rawls, Nozick and Walzer. Preference given to Text and Tradition and IPH students.
Credit 3 units.

COMPLITTHT 2104 Sanity and Madness in Literature From Ancient Greece to the Renaissance
We will consider explicit and implicit models of mental life, motivation, and action in works by authors studied in 201C. We will investigate how concepts related to madness are formulated and regulated in these literary texts and in the societies that produce them, and we will read scholarship from the 19th through 21st centuries that has debated the scale and scope of irrationality in ancient, medieval, and early modern cultures.
Credit 3 units. A&S IQ: HUM BU: BA, HUM EN: H
Typical periods offered: Fall

COMPLITTHT 2105 Puzzles and Revolutions: Text & Traditions
One major force in human history has been inquiry into the natural world. Especially after 1550, natural science, by virtue of its role in the development of technology and the improvement of health, has brought about great changes on all scales of human existence, first in Western Europe and then globally. In this course, the changing character of inquiry into the natural world, from antiquity forward, will be the object of study. Does natural science enable us, for example, to study nature as it is in itself, or are culturally-determined perspectives or frameworks inescapable? How is it that natural science has, especially since 1800, proved so useful in the development of technology? How has it impinged on the arts? The requirements will include writing several short papers and brief responses to the readings.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 2106 The Great Economists: Text & Traditions
Examination of the great economic thinkers, the problems they sought to solve, the historically-conditioned assumptions that they bring to their work, and the moral issues they raise. The class will read from the works of Adam Smith, Ricardo, Malthus, Marx, Veblen, Keynes, Schumpeter, Galbraith, and others as well as commentary from Heilbronner. These readings will be paired with selected texts on the social and moral issues of their times.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

COMPLITTHT 2107 Classical to Renaissance Literature: Text & Traditions
Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's Iliad is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin, and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 2108 Early Political Thought: Text & Traditions
A selected survey of the political and moral thought of Europe from the rise of Athenian democracy to the Renaissance, with emphasis on analysis and discussion of writers such as Thucydides, Plato, Aristotle, St. Augustine, Castiglione, and Machiavelli. The course aims to introduce students to basic texts in the intellectual history of Western Europe, understood both as products of a particular time and place and as self-contained arguments that strive to instruct and persuade. The texts are simultaneously used to chart the careers of such fundamental notions as liberty, virtue, and justice.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 2109 Modern Political Thought: Text & Traditions
What is power? Why are societies divided along lines of race, class, and gender? When did politics become split between the right and the left? Can religion be reconciled with the demands of modern life? Can democracy? These are some of the questions that will be addressed in this survey of modern political thought. Thinkers covered will include Thomas Hobbes, Immanuel Kant, Karl Marx, WEB Du Bois, Hannah Arendt, and Michel Foucault.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 2110 World Literature
This course teaches ways of reading literature across eastern and western cultures, introducing students to works of great imaginative power from many different regions of the world. The course focuses on a given historical period, such as the modern period or antiquity (the latter including Near Eastern as well as European texts). Organizing themes may include cultural translation, cross-cultural encounter (e.g., orientalism), hybridity, and displacement.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 2111 Scriptures and Cultural Traditions: Text & Traditions

When we think of the word scripture in antiquity, we might think of the texts that have been compiled in the different holy books that we currently have today. Yet the function of scriptures within a community, and the status given to different texts treated as scriptural, has changed in different times and places. In this course, we will consider texts that would eventually come to be part of the Hebrew Bible, New Testament, and the Qu'ran as well as several of the exegetes and reading communities that shaped their various interpretations. We will explore how non-canonical sources played a role in the formation of the various canons we have today, comparing the authoritative status given to these texts to that given to other works from antiquity, such as the epics of Homer. Special attention will be played to the role of the receiving community in the development of scripture, and the variety of the contexts in which scripture can function in the construction of and opposition to religious authority.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM EN: H

Typical periods offered: Fall, Spring

COMPLITTHT 2600 From Literature to Opera

Much operatic repertoire is based on classics of literature, from the very first operas of 1598-1600 to the present day. From Literature to Opera will introduce students to the world of opera through a close study of a few select works based on major literary subjects, beginning with the literary works themselves and proceeding to the ways the texts are adapted for the musical stage and then transformed into another genre through their dramatic musical settings. For 2018 the works studied will be Virgil's and Ovid's versions of the Orpheus myth set to music by Claudio Monteverdi in 1607 as one of the earliest operas. Next we will move on to Carlo Goldoni's play, Don Juan which was composed by Mozart as Don Giovanni in 1787. Shakespeare will be represented by the ultimate tragedy of words, Othello, and Giuseppe Verdi's Otello of 1887. The course will conclude with Claude Debussy's Pélleas et Mélisande of 1902, based on Maurice Maeterlinck's 1892 symbolist play of the same name. No previous musical experience required. The class will be conducted as a seminar focused on student participation. Each student will also choose an opera based on a literary work as the subject of two 10-page papers. The first, due at midterm, will study the literary source and the way it is adapted as an operatic text (libretto). The second, due at the end of finals week, will analyze how the libretto is dramatized through the music. One of the important purposes of class discussion will be to develop a usable vocabulary for describing music and its dramatic effects.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

COMPLITTHT 2996 Comparative Literature Elective: 200-Level

Credit 3 units. EN: H

COMPLITTHT 3030 Introduction to Comparative Arts

Intro to Comparative Arts is an interdisciplinary, multimedia course that explores the relationship among the arts in a given period. In their written work, students will venture beyond the course material, alternately assuming the roles of artist, critic, and consumer. Students will attend (virtual and/or in-person) performances and exhibits. Ability to read music is not required.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall, Spring

COMPLITTHT 3050 Literary Modernities in Europe and America: Text & Traditions

The course examines the various facets of modernity in major works of European, Eurasian, and, sometimes, American literature from the early 17th century to the 1920s, starting with Don Quixote. We will explore, among other things, the eruption of the novel, the secularization of autobiography, the literary discovery of the city, and the rise of literary and aesthetic criticism that takes literature and art seriously as political and social institutions. In addition to literary works, the course will engage with two or three important models of critical practice (e.g., Wollstonecraft's Vindication of the Rights of Women; Marx's German Ideology; Freud's The Interpretation of Dreams; Eliot's Tradition and the Individual Talent; or perhaps that great work of fictionalized literary criticism, Borges' Pierre Menard, Author of the Quixote).

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall, Spring

COMPLITTHT 3060 Modern Jewish Writers

What is Jewish literature? While we begin with -- and return to -- the traditional question of definitions, we will take an unorthodox approach to the course. Reading beyond Bellow, Ozick and Wiesel, we will look for enlightenment in unexpected places: Egypt, Latin America, and Australia. Recent works by Philip Roth, Andre Aciman, Simone Zelitch and Terri-ann White will be supplemented by guest lectures, film, short stories and significant essays. We will focus on issues of language, memory and place. Background knowledge is not required, though it is warmly welcomed.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall, Spring

COMPLITTHT 3062 Opera: Text and Context

We will focus on operas drawn primarily from the French, Italian, and German traditions that served as watershed moments in the history of literature, music, philosophy, and criticism. We will read source texts (including famed literary works by Molière, Beaumarchais, Scott, Hugo, Béroul, Maeterlink, Mérimée, Hoffmann, and James), view performances in their entirety, discuss the literary works, philosophy, and criticism that the works inspired, and consider the American reception of the works, including their influence on pop culture. Students will gain a sense of opera's vital role at the intersection of the arts (text, music, and dance) and the disciplines (History, Philosophy, Cultural Studies, Postcolonial Studies, Gender Studies), learning to approach the study of the genre from multiple perspectives. Preference will be given to IPH majors and Text and Tradition students though others are welcome.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM, IS EN: H

COMPLITTHT 3070 Literary Modernities in East Asia: Text & Traditions

This course will explore the complex forces at work in the emergence of modern East Asia through a selection of literary texts spanning fiction, poetry, and personal narrative. Our readings-- by Chinese, Japanese, Korean, and Taiwanese writers and poets-- will point to the distinctively different and dramatically-shifting circumstances of modern East Asian nations and peoples, as well as to their shared values and aspirations.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

Typical periods offered: Spring

COMPLITTHT 3081 The Intellectual History of the Law

This seminar will examine evolving understandings of law and legal institutions in (predominantly western) philosophy and culture. We will address such questions as: What is law? What are its sources? How do societies rationalize and enforce law? What mechanisms exist to change or modify existing laws? Can all laws be changed? Our discussion will draw on theoretical as well as literary texts, including

the Old Testament and works by Aristotle, Cicero, Aquinas, Hobbes, Jefferson, Beccaria, Marx, and more. The discussion will proceed in a loosely chronological sequence, but with an eye to understandingthe origins and elaborations of conceptual traditions that continue to hold a grip on our thinking about the law today.
Credit 3 units. A&S IQ: HUM BU: HUM

COMPLITTHT 3101 An Intellectual History of Sex and Gender: Text & Traditions
When did sexuality begin? Is it safe to assume that gender constructions are universal and timeless? In this course, we will engage with a broad range of readings that serve as primary texts in the history of sexuality and gender. Our aims are threefold: (1) to analyze the literary evidence we have for sexuality and gender identity in Western culture; (2) to survey modern scholarly approaches to those same texts; and (3) to consider the ways in which these modern theoretical frameworks have become the most recent set of primary texts on sexuality and gender.
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 3120 Introduction to Digital Humanities
It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed, and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork will be supplemented by class presentations and a small assigned group project.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 3121 Introduction to Digital Humanities
It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed, and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Typical periods offered: Fall, Spring

COMPLITTHT 3180 Introduction to Renaissance Literature
Major texts of the European Renaissance examined to set English literary achievement in a continental context. Among authors to be studied: Petrarch, Castiglione, Erasmus, More, Luther, Wyatt, Rabelais, Montaigne, Shakespeare, Spenser, Jonson, Milton. Prerequisite: 6 units of literature, junior standing, or permission of instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H UColl: ENE

COMPLITTHT 3191 The European Avant Garde: Interdisciplinary Studies in the Humanities, 20th Century
The first half of the twentieth century witnessed the emergence of Artistic movements characterized by revolt against tradition, emphasis on radical experimentation, and redefinition of the art work. This course will familiarize students with the avant-garde's main currents: Italian Futurism, English Vorticism, Russian Constructivism, stateless Dadaism, and French Surrealism. We will ask ourselves how to define the avant-garde, how it is related to modernity, and whether its aesthetic is necessarily political. Texts include Futurist Manifestos, Cendrars's Trans-Siberian Prose, Stein's Tender Buttons, Breton's Nadja. We will also examine artworks such as Duchamp's Large Glass and films Buñuel's Un Chien Andalou.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

COMPLITTHT 3200 An Intellectual History of Race and Ethnicity: Text & Traditions
This course is designed to introduce students to a wide range of historical ideas, contexts, and texts that have shaped our understandings of race and ethnicity. We will examine the ways in which our definitions and categories of race and ethnicity have helped us to construct (and continuously reinvent) our sense of who counts as human, what counts as human behavior, the possibilities of artistic expression, the terms of political engagement, and our critical and analytical frameworks. Students should be prepared to do quite a bit of reading of some very challenging yet rewarding texts.
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 3203 World-Wide Translation: Language, Culture, Technology
This course considers the crucial role played by translation across the world today: from new technologies and digital media, to the global demands of professionals working in fields as diverse as literature, law, business, anthropology, and health care. We will begin our exploration of the concept of translation as a key mechanism of transmission between different languages by looking at works of literature, and film. Students will then examine how different cultures have historically required translation in their encounter with each other, studying how translation constitutes a necessary transcultural bridge both from a colonial and postcolonial point of view in different historical moments and parts of the world. The course also analyzes from practical and real-world perspectives whether concepts such as war, human rights, democracy or various illnesses have the same meaning in different societies by considering the diverse frames of reference used by linguists, lawyers, anthropologists, and medical doctors across the world. Finally, we will focus on translation from a technological perspective by examining various modes of transfer of information required for the functioning of digital tools such as Google Translate, Twitter, Duolingo, or various Iphone applications. Throughout the semester we will also examine a range of creative artworks, and various forms of digital technology and computing (AI, machine translation) related to the theory and practice of translation. Readings will include works by Jorge Luis Borges, Walter Benjamin, Gayatri Spivak, Kwame Anthony Appiah, Susan Basnett, Lawrence Venuti, Emily Apter, Gideon Lewis-Krauss, and Karen Emmerich among others. Prerequisite: None.

COMPLITTHT 3300 Topics in Comparative Literature:
Topics course in Comparative Literature. Topics vary by semester.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 3320 Topics in Comparative Literature: Narratives of Childhood
Topics in comparative literature. Subject matter will vary from semester to semester.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 3322 Visual Culture
In this interdisciplinary course, we explore this long history of vision and visual representation from antiquity to the present so as to shed light on how people at different moments have understood vision, have seen their own seeing and have encoded this seeing in different artifacts and media. More specifically, we explore the role of the visual in the historical production of subjectivity and collectivity; the political, religious, and ideological uses and abuses of vision; the relation of images to words and stories; the implication of sight in competing systems of truth, enlightenment, and scientific progress; and the function of seeing within different media of art, entertainment, and virtualization-from ancient cave painting, medieval icons and early modern church designs to modernist paintings and motion pictures.

Typical periods offered: Fall, Spring

COMPLITTHT 3353 Topics in African Literature
Beginning with a survey of African oral narratives, then analyzing selected texts by such leading African authors as Chinua Achebe, Ngugi waThiongUo, Wole Soyinka, and Ousmane Sembene, this course will examine ways in which African narrators have represented the struggle to uphold African identity in the face of such insidious influences as individualism, colonialism and neo-colonialism. Translations from indigenous African languages will supplement the study of works originally written in English. Critical issues in African literature such as the role of literature in society and the issue of language and audience in multilingual African societies will be discussed. The course will help students understand and appreciate the distinctiveness of African culture and encourage them to explore the meaning and complexity of that experience through the eyes of African narrators.
Credit 3 units. Art: HUM

COMPLITTHT 3354 Topics in Arabic Literature
Modernity, colonialism and nationalism have affected the very foundations of the self and the community in the Arab world. Arab writers began asking themselves: Who are we today? How can we establish meaningful connections to our glorious past? What is the shape of our relationships with the West? This course hopes to demonstrate that these questions are as much existential and political as they are aesthetic and formal.

COMPLITTHT 3355 Topics in Comparative Literature I:
Credit 3 units. A&S IQ: HUM BU: HUM

COMPLITTHT 3510 A World of Words
This seminar is designed for undergraduate students who are interested in literature, foreign languages, creative writing, and translating. In the course students will enrich their studies in foreign languages, cultures and literatures with creative work. Participants will read and discuss practical criticism, present their own creative projects and hone their skills as writers, translators, and readers. At the conclusion of the course, students will have the choice of presenting a polished work of translation or a piece of original writing. Besides myriad possibilities for translating into and from English, the course can accommodate creative writers in English, Spanish, French, German, Korean, and Chinese. Students who wish to enroll in the course should contact the Program in Comparative Literature for further information. There is a limit of 14 participants to this class.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 3512 Arts Reviewing
What does it mean to become writers and public intellectuals who combine their creative work as poiesis and praxis within a community of creative people? Writers will be asked to write about almost everything. Interviews, reviews, short essays, public speeches, radio plays, ekphrastic texts and staged works are among the many smaller forms with which an emerging writer has to engage. We will be writing in museums, writing in nature, performing on stage and exploring artistic collaboration. The course is designed for students who want to produce their own creative work and receive feedback, strengthening their personal writing skills as well as their creative and critical thinking. Throughout the course, students will discuss and analyze a variety of works, learn to read like writers, and deeply explore their senses, including reactions to and the incorporation of other forms of art. This experience and exposure to music, paintings architecture and nature e.g. can inspire writers to further their own expression via the multilayered genres of the written text. The course will engage with different professionals in the field of creative writing and investigate how to build a successful literary career. This course is open for first year students.

COMPLITTHT 3587 From Genghis Khan to the Taliban: War and Peace in Central Asia
From romantic invocations of the Silk Road and isolated nomads to medieval barbarisms of the Taliban, Western media and popular culture often portray Central Asia as a region out of step with time. However, Central Asia has long been a center for culture, innovation, and political power, and it has a history that is hard to reconcile with popular images of a place stuck in the past. This course, which is intended for advanced undergraduate and graduate students, traces the transformation of Central Asia from Genghis Khan's 13th-century conquests to the present, covering the territories of former Soviet Central Asia, Western

China (Xinjiang), and Afghanistan. Although the course covers nearly 1000 years, the primary emphasis is on the imperial schemes and transformations of the past 300 years. All readings will be in English, and no prior knowledge in Central Asian history is expected or required.

COMPLITTHT 3592 Literary Theory
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

COMPLITTHT 3593 Paris and New York: The Art of the City
The cultural icons Paris and New York exert a powerful hold on our imagination. We will explore how the French and Americans define themselves, and each other, through their premiere cities. The themes of integration and isolation, class and race, innovation and tradition, and commemoration and celebration will ground our discussions of writers Zola (Therese Raquin), Wharton (The Age of Innocence), Proust (Swann's Way), Foer (Extremely Loud and Incredibly Close), Krauss (The History of Love), Truong (The Book of Salt), and Gopnik (Paris to the Moon); painters Vuillard, Caillebotte, and de Kooning; photographers Brassai, Cartier-Bresson, Doisneau, Ronis, Abbott, Hine, and Stieglitz; and filmmakers Godard (Breathless), Allen (Manhattan, Midnight in Paris); Jeunet (Amelie Poulain), and Kassovitz (Hate).Through our study of public spaces (the Brooklyn Bridge, the Twin Towers, the Eiffel Tower, and the streets themselves), we will consider how each city functions as a site of memory even as it fashions the future.
Credit 3 units.
Typical periods offered: Spring

COMPLITTHT 3594 Lyric Poetry
A study of the sounds, forms, devices, voices, and pleasures of lyric poetry from international and comparative points of view. Attention to theories of lyric, formal devices, and problems of translation. The study of various lyric forms such as the ode, the elegy, and the sonnet, will generate comparisons across time and space.
Credit 3 units. Art: HUM
Typical periods offered: Fall

COMPLITTHT 3600 The Traffic in Women and Contemporary European Cinema
What binds society together? One of the most influential answers to this question was offered by French anthropologist Claude Lévi-Strauss. He argued that the fabric of a society is formed by a network of exchanges among kinship groups, which circulate three kinds of objects: economic goods, linguistic signs, and women. In this course, we will inquire into the place of women in this argument. We will trace rudiments of the traditional marriage system (a father figure still gives away the bride in the marriage ceremony), its range of displacements in a global economy (transnational wives, nannies and domestic servants), the role of new media in the formation of new systems of trafficking (internet brides), and the place of the debate on gay marriage within the larger conversation. We will read texts by Friedrich Engels, Sigmund Freud, Marcel Mauss, Claude Lévi-Strauss, Gayle Rubin, Luce Irigaray, Judith Butler, Barbara Ehrenreich and Arlie Russell Hochschild; and we will watch a number of films that dramatize the traffic in women in the context of contemporary Europe: Coline Serreau's Chaos, Lukas Moodisson's Lilja 4-ever, Cristian Mungiu's Occident, Nilita Vachani's When Mother Comes Home for Christmas, Fatih Akin's Head-on, Jean-Pierre and Luc Dardenne's The Silence of Lorna.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

COMPLITTHT 3710 The Age of Enlightenments
Introduction to European 18th-century cultures, particularly to their literatures and thought and the revolutionary foundations of modernity. Among the authors studied are Diderot, Feijoo, Goethe, Herder, Hume, Kant, Lessing, Pope, Rousseau, Sade, and Voltaire. Several lectures by specialists in the national literatures and in history.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

COMPLITTHT 3720 Comparative Studies in the Novel
This course introduces students to novels from a given period or from a geographical area, with attention to how novels are read and how they communicate.
Credit 3 units. Art: HUM

COMPLITTHT 3730 Romance
Romances tell how young lovers learn about the world and themselves by loving, suffering, and growing up. An exploration of the genre over time, space, and culture, including examples from elite and popular literatures.
Credit 3 units. Art: HUM
Typical periods offered: Spring

COMPLITTHT 3900 Undergraduate Independent Study
Students pursue personalized projects not normally covered in standard courses at this level. Prerequisites: acceptance by an appropriate instructor of a proposed project and permission of the chair of the committee.
Credit 2-4 units. Art: HUM
Typical periods offered: Spring

COMPLITTHT 3951 Shakespeare's Sonnets: Framing the Sequence
We will begin by exploring ways of reading a small number of individual sonnets, proceeding thereafter to think about patterns of meaning in language and image across broader groupings and the sequence as a whole. We will investigate the influence of earlier sonnet tradition, especially Petrarch's sonnets, and the relationship of the poems to modes of sexuality and selfhood. Finally, we will ask how some of Shakespeare's most creative readers--including Wilde, Booth, and Vendler--have responded to the challenges of the Sonnets. Students will work on writing their own commentary on a group of poems.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

COMPLITTHT 3990 Sophomore Research Tutorial
A practical introduction to research in the humanities. Students develop and complete a project in a research area of possible long-term interest.
Credit 2 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

COMPLITTHT 3991 Internship in Digital Humanities
A practicum in digital humanities. Students will work on one or more faculty research projects sponsored by the Humanities Digital Workshop. While we will try to assign students to projects that align with their research interests, we will also aim for assignments that will help students extend their skills.
Credit 6 units.
Typical periods offered: Fall, Spring, Summer

COMPLITTHT 3995 Comparative Literature Coursework Completed Abroad
Credit 12 units.

COMPLITTHT 3996 Comparative Literature Elective: 300-Level
Credit 3 units. EN: H

COMPLITTHT 4000 IPH Thesis Prospectus Workshop
Students will assist each other in developing viable thesis topics, compiling bibliographies, and preparing research plans. Students will give formal and informal oral presentations of their proposed topics. Prospectuses and, if possible, drafts of first chapters will be peer-edited.
Credit 3 units. A&S IQ: HUM, WI BU: HUM EN: H
Typical periods offered: Spring

COMPLITTHT 4004 Independent Study
This course is for undergraduate students pursuing independent study projects.
Credit 3 units.
Typical periods offered: Fall, Spring

COMPLITTHT 4010 Medieval Women's Writing
Credit 0 units.

COMPLITTHT 4020 Introduction to Comparative Literature
An introduction to the discipline and practice of Comparative Literature, this course explores the concepts most frequently discussed and the methods most successfully practiced. We will study what texts reveal when they are examined cross-culturally. Students will consider the various differences that emerge between texts when themes and genres are followed across more than one national literature. The course includes a short history of the discipline and recent debates about the nature and scope of the field. Topics to be discussed include genres and forms, influence and intertextuality, translation, world literature, exile, and cross-cultural encounter.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM
Typical periods offered: Spring

COMPLITTHT 4032 Woman Writers of the 20th Century
This course will examine select novels, poetry, and political writings by such noted authors as Sibilla Aleramo, Dacia Maraini, Luisa Muraro, and Anna Banti. Special attention will be paid to the historical, political, and cultural contexts that influenced authors and their work. Textual and critical analysis will focus on such issues as historical revisionism in women's writing, female subjectivity, and the origins and development of contemporary Italian feminist thought and practice. Taught in English.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM
Typical periods offered: Fall

COMPLITTHT 4050 Theory and Methods in the Humanities
This course familiarizes advanced undergraduate and graduate students with some of the basic issues in humanistic study. It follows the conversations between Marxist, psychoanalytical, anthropological, historicist, and linguistic approaches. Our work will highlight the boundaries between these fields and identify incursions across them. Some of the questions that will animate our discussions are: what does truth mean in the humanities? What is an object of study and how does one go about identifying it? Is it useful to view the past as a strange country? What is interpretation and what are its procedures? Preference given to TEXT AND TRADITIONS and IPH students.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

COMPLITTHT 4052 Citizenship: Historical, Cross-Cultural, and Interdisciplinary Perspectives
Although some have posited that citizenship may become obsolete in an increasingly globalizing and interconnected world, citizenship has never been more relevant. Discussions of migration, statelessness, naturalization policies, borders, and so many other contemporary topics hinge on questions of citizenship. In this course, we will be taking an interdisciplinary approach to the study of citizenship, drawing on a wide range of work from historians, social scientists, journalists, and writers. This is an interdisciplinary and transnational course intended for advanced undergraduate and graduate students. Examples will draw from around the world and from a variety of disciplines. Assigned materials include the work of historians, anthropologists, political scientists, sociologists, and journalists as well as novels, films, and audio and visual sources.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Fall

COMPLITTHT 4081 Africanist Travel Writing: Texts, Contexts, Theory
This course will examine the art, politics, and history of Renaissance Florence, Venice, Ferrara, and Rome. We will study how love, beauty, religion, and politics were intertwined in these cities. We will consider how the flourishing of the arts occurred along with the oppressive rule of the Church; why, for one out of two women in upperclass families, the choice was the convent rather than marriage; the rise of courtesan culture and pornography; conspicuous consumption; healing as a matter of faith and a matter of science. Prof. Wallace will present the great artists who worked in these cities, including works by Donatello, Masaccio, Brunelleschi, Botticelli, Michelangelo, Leonardo, and Vasari. Prof. Stone will examine Sarah Dunant's trilogy of best-selling historical novels: THE BIRTH OF VENUS, set in Florence; IN THE COMPANY OF THE COURTESAN, set in Venice; and SACRED HEARTS, set in Ferrara. Ms. Dunant, who will be a visitor to the University during part of the semester, will introduce the class to historical documents that she used in creating her novels. Guest lecturer Prof. Monson (Music Dept.) will explore connections between nuns who make both music and magic. Open to freshmen and sophomores only.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 4093 The Task of the Translator
This undergraduate course offers an introduction to the theory and practice of translation, consisting of three main components. First, students will have the opportunity to translate a wide range of fictional and non-fictional texts from a variety of genres (short stories, philosophy, journalism, academic prose). The focus will be on translation from German to English, but we will also translate from English to German. Next, we will read selections from key works on the theory of translation, from Martin Luther's sixteenth-century treatise on his Bible translation to twentieth-century essays by philosophers

like Walter Benjamin. Finally, we will read and discuss excerpts from some of the most celebrated literary and philosophical translations of the past 200 years, including German translations of authors ranging from Shakespeare to J.K. Rowling as well as English translations of authors such as Goethe and Kafka. The course aims to give students a sense of the challenges and rewards of translation as well as a deeper understanding of the relationship between language, thought, and culture. Prerequisite: Ger 302D and Ger 340C/34D OR Ger 341/341D OR Ger 342/342D
Credit 0 units.
Typical periods offered: Spring

COMPLITTHT 4111 Pastoral Literature: Interdisciplinary Studies in the Humanities, Antiquity
This course will open with a survey of the classical tradition in pastoral/ bucolic. We will consider questions of genre, intertextuality and ideology, and we will ask how 'the lives and loves of herders' became favored ground for literary meditation on issues of surface and depth, reality and illusion, artifice and sincerity. This portion will involve intensive reading in translation of Theocritus, Vergil and Longus.
In the second half of the semester, we will consider the survival, adaptation and deformation of ancient pastoral themes, forms and modes of thought in British and American writing from the 19th and 20th centuries. We will read works of Mark Twain, Kenneth Grahame, Thomas Hardy and Tom Stoppard.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

COMPLITTHT 4112 The Empire Writes Back
Britannia did indeed once rule the waves, controlling an empire that encompassed a quarter of the globe. In the estimation of many, literature was a crucial component of its power. This course will examine the nature of Britain's cultural power, as well as the ways colonial authors answered back through an assertive rewriting of the British canon. We will read classic texts of British literature - Charlotte Brontë's JANE EYRE, E.M. Forster's HOWARD'S END, Joseph Conrad's HEART OF DARKNESS - in tandem with later reworkings of them by authors such as Zadie Smith and Jean Rhys, in order to tease out the implications of literary emendation and adaptation. The course will also look at film versions of these works, as well as some critical theories of revision, hoping to shed light on both the opportunities and the pitfalls of attempting to critique a system of thought within the constraints of that very system.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H
Typical periods offered: Fall

COMPLITTHT 4121 The Commedia Dell'arte
This course explores the history, style and dynamics of the commedia dell'arte: an originally Italian type of improvisational theater that has flourished from the time of Shakespeare to the present day. As we study, we will also put this theater on its feet. Students with a background and interest in improvisation are encouraged to take the class. (At the same time, no acting background is required to take the course--just a willingness to try.) We will examine primary and secondary texts regarding the Italian golden age of 1570-1625, and we will study the flowering of the commedia dell'arte in Paris during the seventeenth century. The influence of the commedia dell'arte on Shakespeare and Molière will be examined, and we will experiment with a new body of French scenarios from the time of Molière that have never before been translated into English. Questions of theater and performance history will be examined, as we consider various historical myths regarding this theater in the light of actual primary documents. We'll spend the final part of the course looking at political uses of this form of theater in the twentieth and twenty-first centuries, considering things like the San Francisco Mime Troupe, the radical socialist theater of Dario Fo, and the international Theater Hotel Courage that uses commedia-style performance for social change.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 4171 Roman Remains: Traces of Classical Rome in Modern British Literature
This course will examine the use of the Roman textual and material inheritance in poets, novelists and critics of the late nineteenth and twentieth centuries working in Britain, and will ask how modernity addresses the claims of the classical tradition. We will place Thomas Hardy's Poems of 1912-13 next to Vergil's Aeneid, then survey Hardy's relationship to the visible remainders of Rome and the people it conquered -- roads, barrows, forts -- in the landscape of Dorset. After examining the representation of the Celtic hill-fort in fiction, and the legacy of Vergilian representations of the countryside in poetry, we will consider representations of Rome in light of modern imperialism (Joseph Conrad's Heart of Darkness and Ezra Pound's Homage to Sextus Propertius) and examine the place of Vergil in T. S. Eliot's critical and poetic practice.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

COMPLITTHT 4200 Narrative Theory
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

COMPLITTHT 4250 Humanities By the Numbers: Essential Readings in Digital Humanities
To what extent can computational techniques that draw on statistical patterns and quantification assist us in literary analysis? Over the semester, we will juxtapose the close reading of historical documents or literary works with the distant reading of a large corpus of historical data or literary texts. We will ask how the typically human scale of reading that lets us respond to literary texts can be captured on the inhuman and massive scales at which computers can count, quantify and categorize texts.While this class will introduce you to basic statistical and computational techniques, no prior experience with technology is required. Prerequisites: two 200 level or one 300-level course in literature or history. This is a topics-type course and the specific documents and works examined will vary from semester to semester. Please see semester course listings for current offerings.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

COMPLITTHT 4260 Imagining the City: Crime and Commerce in Early Modern London
The astonishing demographic and economic growth of early modern London, and the rapid increase in spatial and social mobility that accompanied this growth seemed to harbinger, in the eyes of many contemporaries, a society in crisis and perhaps on the brink of collapse. As increasing numbers of vagrants or masterless men flocked to the metropolis and a growing number of people - apprentices, domestic labor, street vendors etc - lived on the fringes of legitimacy and at risk of lapsing into vagrancy, policing early modern London provided unique challenges for authorities. At the same time, the very notion of the social - a shared space of kinship and community could often seem to be under threat as an emerging market and a burgeoning commodity culture reshaped the traditional underpinnings of social and economic transactions. Yet, late Tudor and early Stuart London remained by far England's most prosperous metropolis, its primary market, home to a burgeoning print culture and nourishing theater and emerged, eventually, as the epicenter of a global economy. This course will consider the topographic, social and institutional configuration of early modern London and the ways in which these were reimagined and negotiated in the literature of the period. Drawing on the drama of the period and a wide array of pamphlet literature, we will discuss how civic institutions handled the growing influx of the poor and adapted to the increasing power of an emerging bourgeoisie who asserted themselves in unprecedented ways. In addition we will consider secondary sources

ranging from maps, theories of urban space and social and economic historiography as well as digital archives and computational techniques that allow us to scale up our thinking about early modern London to a vast corpus of texts and documents.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

COMPLITTHT 4270 Technology and Feminist Practice
How can we best use technology, and the tools and insights of the Digital Humanities in particular, to promote effective approaches to addressing gender-based violence? What are the most effective ways to bridge the innovations of the research university with the everyday work of practitioners seeking to prevent violence or intervene in its aftermath? What are the ethics involved in constructing tools for public and professional use? Which interests should govern the choices in content, design, and dissemination of information? This course will introduce students to the strategies and challenges of devising technological tools for violence prevention for use beyond the classroom. Class readings and discussions will be supplemented by hands-on project work with Washington University's Gender Violence Database and lab sessions that focus on skill-building in digital project construction. Prerequisite: For undergraduate students, L77 393 01 or previous work experience with the Gender Violence Database. Graduate students by permission of instructor.
Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 4300 Data Manipulation for the Humanities
The course will present basic data modeling concepts and will focus on their application to data clean-up and organization (text markup, Excel, and SQL). Aiming to give humanities students the tools they will need to assemble and manage large data sets relevant to their research, the course will teach fundamental skills in programming relevant to data management (using Python); it will also teach database design and querying (SQL). The course will cover a number of basics: the difference between word processing files, plain text files, and structured XML; best practices for version control and software hygiene; methods for cleaning up data; regular expressions (and similar tools built into most word processors). It will proceed to data modeling: lists (Excel, Python); identifiers/keys and values (Excel, Python, SQL); tables/relations (SQL and/or data frames); joins (problem in Excel, solution in SQL, or data frames); hierarchies (problem in SQL/databases, solution in XML); and network graph structures (nodes and edges in CSV). It will entail basic scripting in Python, concentrating on using scripts to get data from the web, and the mastery of string handling.
Credit 1 unit. EN: H
Typical periods offered: Fall

COMPLITTHT 4310 Statistics for Humanities Scholars: Data Science for the Humanities
A survey of statistical ideas and principles. The course will expose students to tools and techniques useful for quantitative research in the humanities, many of which will be addressed more extensively in other courses: tools for text-processing and information extraction, natural language processing techniques, clustering & classification, and graphics. The course will consider how to use qualitative data and media as input for modeling and will address the use of statistics and data visualization in academic and public discourse. By the end of the course students should be able to evaluate statistical arguments and visualizations in the humanities with appropriate appreciation and skepticism. Details. Core topics include: sampling, experimentation, chance phenomena, distributions, exploration of data, measures of central tendency and variability, and methods of statistical testing and inference. In the early weeks, students will develop some facility in the use of Excel; thereafter, students will learn how to use Python or R for statistical analyses.
Credit 3 units. A&S IQ: HUM, AN BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 4320 Programming for Text Analysis
This course will introduce basic programming and text-analysis techniques to humanities students. Beginning with an introduction to programming using the Python programming language, the course will discuss the core concepts required for working with text corpora. We will cover the basics of acquiring data from the web, string manipulation, regular expressions, and the use of programming libraries for text analysis. Later in the course, students will be introduced to larger text corpora. They will learn to calculate simple corpus statistics as well as techniques such as tokenization, chunking, extraction of thematically significant words, stylometrics and authorship attribution. We will end with a brief survey of more advanced text-classification terminology and topics from natural language processing such as stemming, lemmatization, named-entity recognition, and part-of-speech tagging.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

COMPLITTHT 4350 Practicum in Digital Humanities: Topics in Interdisciplinary Studies
This is a variable topics course, and content will change from semester to semester.

Typical periods offered: Fall

COMPLITTHT 4351 Topics in Literature: Virtual Reality: Multimedia Stein
Topics course which varies by semester.
Credit 3 units.
Typical periods offered: Fall, Spring

COMPLITTHT 4352 Topics in Literary History: Thematics
Extensive and intensive reading and discussion of a literary theme as it appears in the literatures of several languages.
Credit 3 units. Art: HUM
Typical periods offered: Fall, Spring

COMPLITTHT 4492 Topics in Comparative Literature
In this course, we will read a broad range of literary works written by ethnic Chinese from various parts of the world. We will examine the notion of Sinophone, primarily its implications to the challenge of cultural identity formation to those Chinese who are not traditionally identified as Chinese because of war, migration, immigration, colonialism, among others. We will also examine the meaning of being on the margins of geopolitical nation-states. Finally we will discuss the notions of hybridity and authenticity vis-a-vis literary representation. We will read works by ethnic Chinese writers from the United States, France, Taiwan, Hong Kong, Singapore, Malaysia, Mongolia, Tibet, and so on. This course is limited to seniors and graduate students only. All readings will be in English. Active class participation is required.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 4500 Senior Seminar
Intensive study of a comparative topic in a seminar situation.
Credit 3 units. Art: HUM

COMPLITTHT 4502 The Intellectual History of Race and Ethnicity
This course is designed to introduce students to a wide range of historical ideas, contexts, and texts that have shaped our understandings of race and ethnicity. We will examine the ways in which our definitions and categories of race and ethnicity have helped us to construct (and continuously reinvent) our sense of who counts as human, what counts as human behavior, the possibilities of artistic expression, the terms of political engagement, and our critical and analytical frameworks. Students should be prepared to do quite a bit of reading of some very challenging yet rewarding texts. This course satisfies the IPH major senior capstone course requirement normally listed as L93 450A.
Credit 3 units. A&S IQ: HUM, LCD, SC BU: BA, HUM EN: H
Typical periods offered: Fall

COMPLITTHT 4503 Interdisciplinary Topics in the Humanities
The topic of this course varies. This course is an upper-level, interdisciplinary seminar.

COMPLITTHT 4510 Seminar in Comparative Arts I
Credit 3 units. Art: HUM

COMPLITTHT 4511 Seminar: Diverse Topics in Literature
This course may offer a variety of topics. Semester sub-title will vary. In Fall 2008, it was offered as an in depth study of the individual through autobiographies. At other times before, it has been offered as a course on visual poetics from antiquity to the present. See department for further details.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

COMPLITTHT 4530 Seminar in Dramatic Theory
The course begins with Plato's critique of mimesis and Aristotle's defense, as we read THE POETICS as a response to Plato. We will take some of Aristotle's basic concepts, such as mimesis, plot, character, and thought, and attempt to apply them to drama up to the present day. We will also consider fundamental elements of both the dramatic text and the dramatic production, such as space, time, dialogue, narrative devices, and perspective. Brecht's theory of epic drama will form the other conceptual pole in the course, opposing Aristotle. Besides these two theorists, other figures will include Ben Jonson, Corneille, Dryden, Diderot, Schiller, Hegel, Zola, Artaud, and Grotowski. The course, then, will have both chronological and thematic axes. Three papers and one oral presentation. Credit 3 units.
Credit 3 units. Art: HUM
Typical periods offered: Fall, Spring

COMPLITTHT 4550 IPH Senior Colloquium: Interdisciplinary Topics in the Humanities
Team taught course designed for IPH Senior interests and thesis topics.

COMPLITTHT 4900 IPH Thesis Tutorial
A working group for thesis writers in the humanities. Permission of department required.
Credit 3 units. A&S IQ: HUM, WI BU: HUM EN: H
Typical periods offered: Fall

COMPLITTHT 4902 Independent Work for Senior Honors
One or more long papers on a topic chosen in conjunction with the adviser and an examination. A committee determines whether the student will receive credit only or Honors. Prerequisites: senior standing and permission of chair of the committee. FALL SEMESTER ONLY.
Credit 3 units.
Typical periods offered: Fall

COMPLITTHT 4903 Independent Work for Senior Honors
Advanced work as indicated in C Lit 497. Prerequisites: senior standing and permission of chair of the committee.
Credit 3 units.
Typical periods offered: Fall, Spring

COMPLITTHT 4904 Senior Honors Thesis
Independent research for undergraduate Honors, to be supervised by a faculty member. Student chooses topic and hands in a final paper of at least 45 pages.
Credit 1 unit.
Typical periods offered: Spring

COMPLITTHT 4931 The Unmaking and Remaking of Europe: The Literature and History of the Great War of 1914-1918
The Great War of 1914-1918 is one of the most momentous events in history. We can approach its broad European import by reading its literatures comparatively. Far wider than the concerns of any one national ideology, the literature of record represents a profound crisis in the European cultural imaginary. A number of critical and interpretive issues will be in play in our readings, which will move through three major phases. We begin with the powerful immediacy of trench poetry (1914-1919), develop into the constructed narratives of the great postwar novels and memoirs (1920-1931), and then turn toward the retrospect of the 1930s, which is also the prospect on the next, now inevitable, war. The authors featured include combatant and civilian writers, names well-known and not so famous: Mann, Apollinaire, Owen, Pound, Cocteau, H.D., Woolf, Maurois, West, Celine, Joyce, Musil, Eliot, Rosenberg, Sassoon, Graves, Hardy, Trakl, Stramm, Lichtenstein, Péguy, Barbusse, Manning, Jünger, Zweig, Brittain, and Kroner. All readings for class will be in English translation. Our secondary literature will provide approaches to specific texts and models of literary and cultural history that represent the longer-range importance of the war.

Germanic Languages and Literatures

GERMAN 1000 Continuing German for Students With High School German
Builds on students' previous knowledge of German language and culture, reviewing and reinforcing the four language skills of listening, speaking, reading, and writing in cultural contexts with special emphasis on communicative competence. In addition to the regular class meetings, students sign up after the semester begins for a once-weekly subsection (time to be arranged). Prerequisite, placement by examination and at least two years of high school German, or permission of instructor. Students who complete this course successfully may enter Ger 102D or 290D.
Credit 3 units. A&S IQ: HUM BU: HUM, IS
Typical periods offered: Fall

GERMAN 1010 Basic German: Core Course I
Introductory program; no previous German required. Students will develop their competence in listening, speaking, reading, and writing German by means of interpersonal, interpretive and presentational communicative practice. This first course serves as an introduction to German grammar and culture; goals range from developing the communicative skills necessary to find an apartment to being able to read modern German poetry. Students will learn how to apply their knowledge of basic cases and tenses in order to hold a conversation or write a letter describing their interests, family, goals, routines, etc. and to discover personal information about others. Students who complete this course successfully should enter German 102D.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall, Spring

GERMAN 1020 Basic German: Core Course II
Continuation of German 101D. In preparation for more advanced academic study in German, this second course will further introduce students to fundamental German grammar, culture and history. It is comprised of a combination of situational lessons and tasks which will challenge their critical thinking abilities. Students in 102 will familiarize themselves with the language necessary to understand and give directions, apply for a job, and speak with a doctor; students will also read more advanced content such as Grimm's fairy tales and a text from Franz Kafka. Prerequisite: German 101D, the equivalent, or placement by examination. Students who complete this course successfully should enroll in German 201D.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall, Spring

GERMAN 1030 Elementary German I
Development of speaking, listening, reading, and writing skills. Exposure to cultural topics. Laboratory work included. Offered during Summer School only.
Credit 4 units. A&S IQ: HUM, LCD, LS BU: HUM
Typical periods offered: Summer

GERMAN 1031 Elementary German II
Continuation of Elementary German I. Further development of all skills and exposure to cultural topics, and to fictional and nonfictional texts. Laboratory work included. Prerequisite: Elementary German I, or equivalent. Offered during Summer School only.
Credit 4 units. A&S IQ: HUM, LCD, LS BU: HUM
Typical periods offered: Summer

GERMAN 1040 Intensive Elementary German
Covers material of Ger 101D-102D in one semester. For students with previous knowledge of German, with the ability to work independently and at an accelerated pace. In addition to the regular class meetings, students sign up after the semester begins for a twice-weekly subsection (times to be arranged). Students who successfully complete this course should enter Ger 210D.
Credit 6 units. A&S IQ: HUM BU: HUM
Typical periods offered: Fall

GERMAN 1996 Germanic Languages and Literatures Elective: 1000-Level
This course is used for transcribing 1000- level GERMAN elective units.
Credit 3 units. EN: H
Typical periods offered: Fall, Spring, Summer

GERMAN 2010 Intermediate German: Core Course III
Continuation of German 102D. This course is designed to expand and deepen students' understanding of modern German society and culture and to help them improve their skills in all four key areas of foreign-language learning: reading, speaking, listening and writing. All class discussions and assignments will be in German in order to provide students with an opportunity to expand their active and passive vocabulary and gain confidence in their ability to communicate in the language. Prerequisite: German 102D, the equivalent, or placement by examination. Students who complete this course successfully should enroll in German 202D.
Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H
Typical periods offered: Fall, Spring

GERMAN 2020 Intermediate German: Core Course IV
Continuation of German 201D. In preparation for study at the advanced level, this fourth-semester course will continue the four-skills based approach of 201D, focusing on a range of cultural topics relevant to the German-speaking lands, including diversity in modern German society, the media, local and national politics, and transatlantic relations. The course also includes additional review of grammatical structures that will enable you to express yourself more fluently and idiomatically in German. All class discussion and assignments will be in German, in order to provide you with an opportunity to expand your active and passive vocabulary and gain confidence in your ability to communicate in the language. Prerequisite: German 201D, the equivalent, or placement by examination. Students who complete this course successfully should enroll in German 301D.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall, Spring

GERMAN 2030 Internship for Liberal Arts Students
A course for students participating in a pre-approved internship program. Students will work together with a faculty adviser to determine the exact nature and scope of the work to be undertaken to receive German credit. All credit will be subject to the approval of the department.
Credit 1 unit.
Typical periods offered: Fall, Spring

GERMAN 2100 Intermediate German: Core Course III
Continuation of Ger 102D. Reading and discussion in German of short literary and non-literary texts combined with an intensive grammar review. Students will further develop their writing skills. In addition to the regular class meetings, students sign up after the semester begins for a subsection (time to be arranged). Prerequisite: Ger 102D, equivalent, or placement by examination. Students who complete this course successfully should enter Ger 301D or 313.
Credit 4 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall, Spring

GERMAN 3010 Advanced German: Core Course V
Discussion of literary and non-literary texts combined with an intensive grammar review. Systematic introduction to the expressive functions of German with an emphasis on spoken and written communication. Prerequisite: German 202D, the equivalent, or placement by examination. Students who complete this course successfully should enter German 302D.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall, Spring

GERMAN 3020 Advanced German: Core Course VI
Continuation of Ger 301D. Refinement and expansion of German communication skills (speaking, listening, writing, reading), deepening understanding of German grammatical structures, acquisition of more sophisticated and varied vocabulary, introduction to stylistics through discussion and analysis of literary and non-literary texts. In addition to the regular class meetings, students should sign up for a twice-weekly subsection. Prerequisite: Ger 301D or equivalent, or placement by examination. Students completing this course successfully may enter the 400-level. Note that Ger 340C/340D, Ger 341/341D, or Ger 342/342D are a prerequisite for most 400-level courses.
Credit 4 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall, Spring

GERMAN 3060 Topics in Holocaust Studies: Children in the Shadow of the Swastika
This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period-the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children-both those they considered Aryan and those they designated enemies of the German people, such as Jewish children - an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. OPEN TO FRESHMEN. STUDENTS MUST ENROLL IN BOTH MAIN SECTION AND A DISCUSSION SECTION.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

GERMAN 3070 Masterpieces of Modern German Literature in Translation
Content variable.
Credit 3 units. Art: HUM BU: IS
Typical periods offered: Spring

GERMAN 3080 German Literature and the Modern Era
Introduction in English to German writers from 1750 to the present. Discussion focuses on questions like the role of outsiders in society, the human psyche, technology, war, gender, the individual and mass culture, modern and postmodern sensibilities as they are posed in predominantly literary texts and in relation to the changing political and cultural faces of Germany over the past 250 years. Readings include works in translation by some of the most influential figures of the German tradition, such as Goethe, Nietzsche, Freud, Kafka, Thomas Mann, Brecht, and Christa Wolf. Open to first-year students, non-majors and majors. Admission to 400-level courses (except 402, 403D, 404, and 408D) is contingent on completion of this course or 341/341D. The main course is conducted in English, so this will only qualify for major or minor credit when taken in conjunction with one-hour discussion section in German (L21 340D).
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM, IS EN: H
Typical periods offered: Fall, Spring

GERMAN 3081 German Thought and the Modern Era
In this introduction to the intellectual history of the German-speaking world from roughly 1750 to the present, we will read English translations of works by some of the most influential figures in the German tradition, including Kant, Hegel, Marx, Nietzsche, Freud, Adorno, Heidegger, Arendt, Habermas, and others. Our discussions will focus on topics such as secularization, what it means to be modern, the possibility of progress, the role of art and culture in social life, the critique of mass society, and the intrepretation of the Nazi past. We will consider the arguments of these thinkers both on their own terms and against the backdrop of the historical contexts in which they were written. Open to first-year students, non-majors and majors. Admission to 400-level courses (except 402, 403D, 404, and 408D) is contingent on completion of this course or 340C/340D. The main course is conducted in English, so this will only qualify for major or minor credit when taken in conjunction with one-hour discussion section in German (L21 341D).
Credit 3 units. A&S IQ: HUM BU: ETH, HUM EN: H
Typical periods offered: Fall

GERMAN 3082 German Literature and the Premodern Era
In this introduction to the literary and intellectual history of the German-speaking world from roughly 800 C..E to the 17th century, we will read English translations of some of the most influential authors and works in the medieval and early modern German tradition, including the Heroic Age (e.g., Nibelungenlied), the classical period of the 12th and 13th centuries (e.g., Walther von der Vogelweide, Wolfram von Eschenbach, Gottfried von Straßburg), late-medieval philosophy and mysticism (e.g., Mechthild von Magdeburg, Meister Eckhart), and early modern humanism and the Reformation (e.g., Martin Luther). Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the German and European literary tradition; these are texts that continue to offer invaluable insights into humanity and the world around us.

Our discussions will focus on concepts such as heroism, chivalry, and courtly love and on questions regarding the relationship between the individual and society, the role of religion in society, and the emergence of modern mass media (e.g., the Gutenberg revolution). We will consider the texts both on their own terms and against the backdrop of the historical contexts in which they were written.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

GERMAN 3130 Conversational German
Practice in speaking and vocabulary development in cultural contexts. Prerequisite: Ger202D, equivalent, or placement by examination. May be repeated for credit.
Credit 1 unit. A&S IQ: LCD EN: H
Typical periods offered: Fall, Spring

GERMAN 3400 Topics in German Studies
Course description dependent on topic. Readings and discussions in English. Students wishing to receive German major or minor credit must also enroll in the German-language subsection.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Spring

GERMAN 3401 Topics in German Studies: German Language Subsection
German Language Subsection for students enrolled in German 3400. Credit counts towards German major or minor.
Credit 1 unit.
Typical periods offered: Spring

GERMAN 3402 German Literature and the Premodern Era
This course must be taken concurrently with L41 342 for major or minor credit. The discussion section provides an introduction to critical German vocabulary and is open to students with prior knowledge of German (L41 210D or equivalent or placement by examination.)
Credit 1 unit.
Typical periods offered: Spring

GERMAN 3403 German Literature and the Modern Era
This course must be taken concurrently with 340C for major/minor credit. The discussion section provides an introduction to critical German vocabulary and is open to students with prior knowledge of German (210D or equivalent, or placement by examination.)
Credit 1 unit.
Typical periods offered: Fall, Spring

GERMAN 3416 German Thought and the Modern Era
This course must be taken concurrently with 341 for major/minor credit. The discussion section provides an introduction to critical German vocabulary and is open to students with prior knowledge of German (210D or equivalent, or placement by examination.)
Credit 1 unit.
Typical periods offered: Fall

GERMAN 3996 Germanic Languages and Literatures Elective: 3000-Level
This course is used for transcribing 3000-level GERMAN elective units.
Credit 3 units. EN: H
Typical periods offered: Fall, Spring, Summer

GERMAN 3999 Undergraduate Independent Study
Permits students with proficiency in German to pursue personalized projects not normally covered in courses at this level. Prerequisites: acceptance by an appropriate instructor of a proposed project and permission of the department.
Credit 6 units.
Typical periods offered: Fall, Spring

GERMAN 4010 Advanced German: Core Course VI
Designed to foster advanced proficiency in German through analysis and discussion of a wide variety of high-level texts and through practice in advanced composition. Discussions and papers will focus on questions of style, rhetoric and cultural specificity and on developing expertise in textual interpretation. Additional emphasis on problems of advanced German grammar encountered by English speakers and on subtleties of style and idiomatic expression in spoken and written German. Prerequisite: Ger 302D, the equivalent, or permission of instructor.
Credit 3 units. A&S IQ: LCD, LS
Typical periods offered: Spring

GERMAN 4020 Advanced Grammar and Style Lab
Take your German skills to the next level! This 1-unit lab is designed for advanced students seeking to master the finer points of German grammar and style through targeted exercises and discussion. Students will learn to construct sophisticated, elegant, and accurate sentences, with the goal of improving their effectiveness as writers and speakers of German. A rotating weekly focus will cover such topics as: complex sentence structures; advanced passive and subjunctive forms; idiomatic prepositional and verb phrases; and infinitive constructions. Prerequisite: German 302 or the equivalent.
Credit 1 unit.
Typical periods offered: Fall

GERMAN 4030 Advanced Vocabulary and Usage
This one-unit workshop is designed for advanced undergraduate students wishing develop advanced communication skills by improving their grasp of German vocabulary and usage. Over the course of the semester, students will discuss a wide variety of texts related to German art, philosophy, literature and contemporary culture, focusing on specific aspects of the language that pose challenges for non-native speakers. Assignments (not to exceed 1.5 hours per week) will include short written responses and exercises aimed to help students speak and write more elegantly and idiomatically. Prerequisite: German 302 or the equivalent or permission of the Director of Undergraduate Studies.
Credit 1 unit.
Typical periods offered: Fall, Spring

GERMAN 4040 Germany Today
Introduction to the history, politics, and culture of contemporary Germany (1945 to the present). Topics include the cultural construction of identity in post-unified Germany; European integration and post-wall economy; the German constitution, electoral system and current elections; current debates and controversies; political parties and leading political figures; the role of literature, film, music, the visual arts, media and popular culture; the role of universities. Discussion, readings, and papers in German. Required for candidates planning to attend the overseas program in Tübingen, Germany. Prerequisite: Ger 302D (may be taken concurrently with Ger 404), or permission of the Director of Undergraduate Studies.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

GERMAN 4050 German as a Language of Business
This course introduces students to concepts and issues relevant to German business and economics and helps them to develop the language skills necessary to succeed in the German business world. We will concentrate on the basic elements of the German economic system, looking at Germany as a site of production and exchange, the legal structure of German firms, the relations between labor and management, and strategies for product development and marketing in national and international contexts. Students will also be introduced to specific German business practices, including forms of communication, management styles, and general corporate culture. Students will learn business vocabulary, writing skills for business correspondence, oral presentation techniques, and reading and comprehension strategies for German newspapers and news reports. All discussions, readings, and assignments will be in German. Prerequisite: German 302D.
Credit 3 units. A&S IQ: LCD, LS BU: IS EN: H
Typical periods offered: Fall

GERMAN 4060 German Literature and Culture, 1150-1750
Exploration of medieval and early modern literature and culture within sociohistorical contexts. Genres and themes vary and may include visual culture, representation, the development of fictionality and historical writing, questions of race, gender, and class, courtly culture, law, magic and marvels, medical and scientific epistemologies. Readings may include such genres as the heroic epic, drama, Minnesang, the courtly novel, the Arthurian epic, fables, the novella, religious or devotional literature, witch tracts, pamphlets, political writings, the Volksbuch, the picaresque novel, and the essay. Discussion, readings, and papers in German. Prerequisite: German 302D and German 340C/340D OR German 341/341D OR German 342/342D
Credit 3 units. A&S IQ: HUM, LCD, LS, WI BU: HUM, IS EN: H
Typical periods offered: Fall

GERMAN 4061 German Literature and Culture, 1750-1830
Exploration of the literature and culture of the Enlightenment, Storm and Stress, Weimar Classicism, and Romanticism within sociohistorical contexts. Genres and themes vary and may include the representation of history, absolutism and rebellion, the formation of bourgeois society, questions of national identity, aesthetics, gender, romantic love, and the fantastic. Reading and discussion of texts by authors such as Lessing, Goethe, Schiller, Kant, Novalis, Günderode, the Brothers Grimm, Kleist, E.T.A. Hoffmann, Eichendorff, Bettina von Arnim. Discussion, readings, and papers in German. Prerequisites: German 302D and German 340C/340D OR German 341/341D OR German 342/342D.
Credit 3 units. A&S IQ: HUM, LCD, LS, WI Art: HUM BU: HUM
Typical periods offered: Spring

GERMAN 4062 German Literature and Culture, 1830-1914
Exploration of 19th-century literature and culture within sociohistorical contexts. Genres and themes vary and may include the representation of history, liberalism and restoration, nationalism, industrialization, colonialism, class, race and gender conflicts, materialism, secularization, and fin-de-siècle. Reading and discussion of texts by authors such as Büchner, Heine, Marx, Storm, Keller, Meyer, Fontane, Droste-Hülshoff, Nietzsche, Ebner-Eschenbach, Schnitzler, Rilke. Discussion, readings, and papers in German. Prerequisites: German 302D and German 340C/340D OR German 341/341D OR German 342/342D.
Credit 3 units. A&S IQ: HUM, LCD, LS, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

GERMAN 4063 German Literature and Culture, 1914 to the Present
Exploration of modern and contemporary literature within sociohistorical contexts. Genres and themes vary and may include the representation of history, the crisis of modernity, the two World Wars, the Weimar Republic, the Third Reich, generational conflicts, the women's movement, and postmodern society. Reading and discussion of texts by authors such as Wedekind, Freud, Mann, Kafka, Brecht, Seghers, Boell, Bachmann, Grass, Wolf. Discussion, readings, and papers in German. Prerequisites: German 302D and German 340C/340D OR German 341/341D OR German 342/342D.
Credit 3 units. A&S IQ: HUM, LCD, LS, WI Art: HUM BU: HUM EN: H
Typical periods offered: Fall

GERMAN 4070 Studies in Genre
Exploration of the definition, style, form, and content that characterize a specific genre. Investigation of the social, cultural, political, and economic forces that lead to the formation and transformation of a particular genre. Examination of generic differences and of the effectiveness of a given genre in articulating the concerns of a writer or period. Topics and periods vary from semester to semester. Discussion, readings, and papers in German; some theoretical readings in English. Prerequisites: German 302D and German 340C/340D OR German 341/341D OR German 342/342D.
Credit 3 units. A&S IQ: HUM, LCD, LS, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

GERMAN 4080 Topics in German Studies
Focus on particular cultural forms such as literature, film, historiography, social institutions, philosophy, the arts, or on relationships between them. Course examines how cultural meanings are produced, interpreted, and employed. Topics vary and may include national identity, anti-semitism, cultural diversity, construction of values, questions of tradition, the magical, the erotic, symbolic narrative, and the city. Course may address issues across a narrow or broad time frame. Discussion, readings, and papers in German. Prerequisite: German 302D and German 340C/340D OR German 341/341D OR Ger 342/342D
Credit 3 units. A&S IQ: HUM, LCD, LS, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

GERMAN 4090 Studies in Gender
Investigation of the constructions of gender in literary and other texts and their sociohistorical contexts. Particular attention to the gendered conditions of writing and reading, engendering of the subject, and indicators of gender. Topics and periods vary from semester to semester and include gender and genre, education, religion, politics, cultural and state institutions, science, sexuality, and human reproduction. Discussion, readings, and papers in German; some theoretical readings in English. May be repeated with different content. Prerequisite: German 302D and German 340C/340D OR German 341/341D OR Ger 342/342D
Credit 3 units. A&S IQ: HUM, LCD, LS, WI BU: HUM EN: H
Typical periods offered: Fall

GERMAN 4120 German Romanticism, 1790-1830
The concept of love is understood differently by each generation, but the revolution and reinvention of this concept occur less frequently. The romantic epoch is such a revolutionary and reinventing period. We will read narrative texts and poems by Novalis, Tieck, Schlegel, E.T.A. Hoffmann, Kleist, Chamisso, Fouque, Brentano, and Arnim and compare them with drawings and paintings by romantic artists such

as Runge, Fohr, Schnorr von Carolsfeld, Richter, Friedrich, Overbeck, Schwind, Fuessli, and Cornelius. Selected scholarly articles on the topic will be made available. The texts and paintings thematize the utopian elements of romantic love, as well as the different meanings and contradictions of love in romanticism in regard to gender and social class and to its colonial and national aspects. For graduate students only.
Credit 3 units. Art: HUM
Typical periods offered: Spring

GERMAN 4125 Undergrad Seminar: What Dreams May Come: Explorations of the Psyche in Viennese Modernism
This course investigates the relationship of the burgeoning field of psychoanalysis to modernist art and literature in Vienna at the beginning of the 20th century. Examining literary texts and artworks alongside theories of dreams and the unconscious by thinkers such as Ernst Mach and Sigmund Freud, we will analyze the ways that visual artists, composers, and poets sought to divulge the inner workings of the psyche. Our discussion will focus on key questions: What forms and what visual, aural, and verbal languages were developed to represent subjective experience? How did theories of memory and trauma and ideas about gendered psyches shape the depiction of individual agency in these works? What can these works tell us about the larger societal forces at play in this cultural moment? Readings will include the drama, poetry, and novellas of Arthur Schnitzler and Hugo von Hofmannsthal; musical works by Mahler and Schoenberg; and the visual art of Gustav Klimt, Helene Funke, and Oskar Kokoschka. Readings and discussion in German. Prerequisites: German 302D; German 340C/340D, German 341/341D, or German 342/342D.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

GERMAN 4130 Expressionism, 1910-1925
Expressionism has left an enduring mark on 20th century art and aesthetics. Using texts from a variety of genres, this course will investigate the genesis, meaning and use of the idea of "expression." Considering the poetry of Gottfried Benn, Else Lasker-Schnler, and Georg Trakl; the music of Arnold Sch÷nberg; the art of Wassily Kandinsky and Emil Nolde; and the prose of Carl Einstein and Franz Kafka, we will discuss both the theories and the artistic production of the Expressionist generation. At the same time we will also compare different analyses of Expressionism as developed by such critics as Theodor Adorno, Ernst Bloch, Gilles Deleuze, Felix Guattari, and Georg Lukacs. Discussion in English. Readings in German and English. NOT FOR UNDERGRADUATE GERMAN MAJORS.
Credit 3 units.
Typical periods offered: Fall

GERMAN 4140 German Literature and Fascism, 1933-1945
German and Austrian Exile Literatures are the result of Hitler's racist and expansionist policy between 1933/38 and 1945. The leading figures of literary life in Berlin and Vienna fled to other countries, primarily of Europe and the Americas. We will read and discuss both examples of leading scholarship (in particular from a new handbook on the topic) as well as the primary sources: chapters from memoirs by Stefan Zweig, Hilde Spiel and Heinrich Mann, poems by Erich Fried, Nelly Sachs, Hilde Domin and Bertolt Brecht, essays by Hermann Broch, dramas by Bertolt Brecht, Carl Zuckmayer and Franz Werfel as well as novels by Klaus Mann, Irmgard Keun, Vicki Baum and Thomas Mann. In an interdisciplinary approach encompassing theories of aesthetics, gender, race and history we want to discuss the developments of literary genres under the challenging foreign conditions, as well as the anti-racist engagement of the writers in the defense of Human Dignity. The students do two in class presentations and write one semester paper. They are encouraged to draw on material from other areas of the humanities, the arts (including film) or the social sciences. The seminar meets twice a week: 3 credits. It is a graduate course but undergraduate seniors with German as their major can be permitted by the instructor.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM
Typical periods offered: Fall

GERMAN 4210 Topics in Middle High German Grammar and Text
Close reading of at least one major work or figure from the medieval canon. May be repeated for credit. Prerequisite: permission of the department.
Credit 3 units.
Typical periods offered: Fall

GERMAN 4220 Undergraduate Topics in German Film: Introduction to German Cinema
In this undergraduate course, we will watch and discuss some of the great highlights of German film history. The course will provide students with a visual and linguistic foundation for discussing German film from the early days of cinema to the present. To cover such an extensive time span and range of cinematographic output, we will view representative works from various periods, genres, and authors that deal with a wide variety of themes. Class discussions will address the social and cultural significance of cinematic production in 20th- and 21st-century German culture as well as historical moments in German culture that are viewed through film. Certain themes will reoccur throughout the semester, including gender, the city, technology, violence, and social crisis. This course will also help students to improve their reading, writing, listening and speaking proficiency in German. Classroom discussions and readings will be entirely in German. The films will have English subtitles. This class will accommodate a range of levels of German proficiency. The reading and writing assignments will be adjusted accordingly. All instruction and all discussion will be in German. Note: There will be required weekly screenings. Prerequisite: successful completion of German 302D AND German 340C/340D OR German 341/341D OR German 342/342D or permission of the Director of Undergraduate Studies.

GERMAN 4240 Cultural, Literary, and Linguistic Relations Between China and Germany
Chinese interest in Germanistik and German Studies, as well as in European Studies has been an interest in Chinese philosophy and literature on the German side since Romanticism, especially during the Fin de Siecle period around 1900. At the same time there was and is a deep interest in German philosophy, literature, linguistic theory, and culture during the last hundred years. More and more contemporary German authors are being translated into Chinese, and furthermore there is a strong interest in German paintings fromRomanticism to the present. The seminary will deal with the aspects of transcultural movements between the two countries, inlcuding the impact of German linguistics on Chinese linguistics. Graduate seminar; undergraduate seniors with special permission. Taught in German. 1 credit

GERMAN 4250 The Task of the Translator
This course offers an introduction to the theory and practice of translation, consisting of three main components. First, students will have the opportunity to translate a wide range of fictional and non-fictional texts from a variety of genres (short stories, philosophy, journalism, academic prose). The focus will be on translation from German to English, but we will also translate from English to

German. Next, we will read selections from key works on the theory of translation, from Martin Luther's sixteenth-century treatise on his Bible translation to twentieth-century essays by philosophers like Walter Benjamin. Finally, we will read and discuss excerpts from some of the most celebrated literary and philosophical translations of the past 200 years, including German translations of authors ranging from Shakespeare to J.K. Rowling as well as English translations of authors such as Goethe and Kafka. The course aims to give students a sense of the challenges and rewards of translation as well as a deeper understanding of the relationship between language, thought, and culture. Prerequisite: German 302D and German 340C/340D OR German 341/341D OR German 342/342D

GERMAN 4290 Contemporary German Lit After 1945

There is no decade since the 1950s when German or Austrian writers are not "on the road" in the United States. They are fascinated by the landscapes as well as by the cities, by the (popular) culture as well as the political movements. They meet people of various backgrounds, from different social levels, and with opposing world views, and try to make sense of their travel experiences that often include discussions with students at colleges and universities. Leading writers like Wolfgang Koeppen, Siegfried Lenz, and Guenter Kunert published successful reports and stories about their excursions in America from the 1950s to the 1970s, and the younger generation is equally well represented with their depictions from the 1970s into the new century: Peter Handke, Thomas Meinecke, Kathrin Roeggla and Felicitas Hoppe. Americans who read this literature about their country will often be surprised of the different European points of view. This undergraduate course is taught in German. Prerequisites: German 302D and 340C/D or 341/341D or equivalent, or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD BU: BA, HUM EN: H

Typical periods offered: Spring

GERMAN 4940 Graduate Seminar On German Film: New German Cinema - Influences, Origins, and New Approaches

This graduate seminar examines New German Cinema, drawing on a far broader than usual selection of films and filmmakers. The course focuses specifically on 1968 through 1982, also known as the long 1970s. Paying special attention to influences from other cinematic New Waves, we will explore some of the earliest and most revolutionary films of that era. How did major stylistic hallmarks such as self-reflexivity and nonlinearity transform after German cinema's politics began to change and explore themes such as domestic terrorism and postwar guilt? The seminar will revisit major research questions, including how New German filmmakers defined Autorenkino and how that definition differed from traditional concepts of cinematic authorship. We will also examine what was at stake in New German Cinema's adaptations of German literary works (by Hoffmann, Kleist, and others). The course will explore films by the best-known German directors such as Herzog, Wenders, and Fassbinder, but it will widen its scope of inquiry to include films by Spils, Reitz, Klick, and von Trotta. Readings in both German and English will include theoretical and historical texts dealing with the films' public and scholarly receptions. Discussions will be in English. Note: Seminar participants may be expected to view as many as two films per week. Prerequisite: graduate student standing.

Credit 3 units. A&S IQ: HUM, LCD Art: AH BU: HUM EN: H

Typical periods offered: Spring

GERMAN 4996 Germanic Languages and Literatures Elective: 4000-Level

This course is used for transcribing 4000-level GERMAN elective units.

Credit 3 units. EN: H

Typical periods offered: Fall, Spring, Summer

GERMAN 4997 Independent Work

Permits students with proficiency in German to pursue personalized projects not normally covered in courses at this level. Counts toward German Major/Minor 400-level credit requirements. Prerequisites: acceptance of a proposed project by an appropriate instructor and departmental permission.

Credit 6 units.

Typical periods offered: Fall, Spring

GERMAN 4998 Independent Work for Senior Honors

Research for an Honors thesis, on a topic chosen in conjunction with the adviser. Emphasis on independent study and writing. Open to students with previous course work in German at the 400 level, an overall 3.0 grade-point average, and at least a B+ average in advanced work in German. Prerequisites: senior standing and permission of the undergraduate adviser.

Credit 3 units.

Typical periods offered: Fall, Spring

GERMAN 4999 Independent Work for Senior Honors

Completion of the thesis. Quality of the thesis will determine whether the student will receive honors in German in addition to credit for this work. Prerequisite: L21 German 497.

Credit 3 units.

Typical periods offered: Fall, Spring

Legal Studies

LWST 1995 Legal Studies Coursework Completed Abroad

This course number is for 1000 level study abroad credits.

Credit 12 units.

Typical periods offered: Fall, Spring, Summer

LWST 1996 Legal Studies Elective

This course is for 1000 level transfer credit.

Credit 0 units.

Typical periods offered: Fall, Spring, Summer

LWST 2990 Undergraduate Internship in Legal Studies

Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities, e.g., 8-10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours. Students may not receive credit for work done for pay but are encouraged to obtain written evaluations about such work for the student's academic advisor and career placement file. To register for an internship you must complete an Internship Learning Agreement (obtained from the Career Center), which must then be approved by the Director of Legal Studies, the internship supervisor at the Career Center, and the person supervising your work as intern.

Credit 3 units.

Typical periods offered: Fall, Spring, Summer

LWST 2996 Legal Studies 200-Level Elective

This course is for 2000 level transfer credit.

Credit 3 units.

Typical periods offered: Fall, Spring, Summer

LWST 3620 Politics and the Theory of Games
This course is intended to cover through analytical discussion and illustrations the basic concepts and major achievements of Game Theory in different sub-fields of research in the social sciences today. We will discuss examples of the usefulness of cooperative and non-cooperative game theory to the study of human behavior in general and political economy in particular.
Credit 3 units.

LWST 3996 Legal Studies Elective
This course is for 3000 level transfer courses.
Credit 0 units.
Typical periods offered: Fall, Spring, Summer

LWST 4001 Directed Fieldwork in Legal Research
A fieldwork project in empirical and/or archival legal research under the direction of a member of the Washington University faculty. The fieldwork may be planned and undertaken individually or as part of a formal project. Permission of supervising faculty member and director of the program is required.
Credit 6 units. EN: H
Typical periods offered: Fall, Spring, Summer

LWST 4996 Legal Studies Elective
This course is for 4000 level transfer credit.
Credit 0 units.
Typical periods offered: Fall, Spring, Summer

Comparative Literature and Thought Major

Program Requirements

- **Total units required:** 27.5-48.5
  - Required Courses (27-36 units):
    - Humanities Core Courses (12 units): All Comparative Literature and Thought (CLT) majors will take two core (one required) courses in "Literature and Arts" and two core courses in "Thought."
    - Upper-Level Courses (15-24 units): All CLT majors will complete at least eight upper-level CLT courses (24 units) at the 3000 level or above. Up to three 3000-level Humanities Core Courses taken to satisfy the 12-unit core requirement above can count toward the eight-course upper-level requirement.
  - Capstone (0.5 units *or* honors program): All CLT majors will complete a CLT capstone project (unless CLT is not their primary major).
  - Language Study (3-12 units): All CLT majors will pursue second language study. Up to 6 units of foreign language courses focused on literature or intellectual culture may be counted toward the required 24 units of upper-level courses.

Comparative Literature and Thought (CLT) immerses students in modern and contemporary literary and intellectual cultures and in the textual and philosophical traditions that animate those cultures. The curriculum attends to the emergence of a global textual and media culture as well as to the ways in which nations, subcultures, and individuals embrace and resist thatglobal emergence.

While our faculty and students have wide-ranging interests — intellectual history, translation, arts practice, comparative arts, digital humanities, media studies and book history, political and legal thought — we have built our major and minor upon a foundational curriculum for the humanities. That foundational curriculum focuses on a set of themes and problems that have long preoccupied students and scholars: the nature of textual culture, the philosophical and ethical engagements of literature and the arts, the pressure of politics on literature and thought, the reciprocal pressure of literature and thought on politics, the specific bearing of language on intellectual life, and the transformations and excitations produced whenever texts are translated to another language or to another medium.

Many of our students are both scholars and makers. In addition to courses in translation practice, we offer courses in multilingual creative writing and arts journalism. Although some of our students do traditional scholarly work for their capstones in the major, others do creative final projects. Our digital humanities group offers students opportunities to participate in collaborative research projects comparable to those offered to students in the natural and social sciences.

The introductory core of the CLT curriculum engages a major in CLT with literature, intellectual history, social and political thought, and cultural theory. As students progress through the major, they may develop an emphasis in one of those areas, or they may maintain allegiances that blend both literature and thought.

Required Courses

Humanities Core Courses

The CLT Humanities Core is meant to introduce major texts (in both secular and sacred canons) and foundational methods of inquiry in the humanities (formal, generic, historicizing, skeptical, and appreciative) as well as to provide an historical perspective on the development of current categories of sociocultural analysis (i.e., race, ethnicity, sex, and gender).

All CLT majors must take two core courses in Literature and Arts (including one required course) and two core courses in Thought for a total of 12 units in the Humanities Core.

Literature and Arts

Code	Title	Units
Required course:		
COMPLITTHT 2110	World Literature	3
Plus one of the following:		
COMPLITTHT 2107	Classical to Renaissance Literature: Text & Traditions	3
COMPLITTHT 3030	Introduction to Comparative Arts	3
COMPLITTHT 3070	Literary Modernities in East Asia: Text & Traditions	3
COMPLITTHT 3050	Literary Modernities in Europe and America: Text & Traditions	3

Thought

Code	Title	Units
COMPLITTHT 2105	Puzzles and Revolutions: Text & Traditions	3
COMPLITTHT 2108	Early Political Thought: Text & Traditions	3
COMPLITTHT 2109	Modern Political Thought: Text & Traditions	3
COMPLITTHT 2111	Scriptures and Cultural Traditions: Text & Traditions	3
COMPLITTHT 3101	An Intellectual History of Sex and Gender: Text & Traditions	3
COMPLITTHT 3200	An Intellectual History of Race and Ethnicity: Text & Traditions	3

CLT also offers special first-year programs (FYP) and Ampersand courses that will perform the intellectual functions of courses in the Humanities Core above. Please contact the CLT department for additional information about those offered courses, as they change each semester.

Upper-Level Courses

CLT majors must complete 24 upper-level units. To build on the Humanities Core, these students will take five to eight additional courses at the 3000 or 4000 level. (Note that several courses in the Humanities Core are offered at the 3000 level; these courses can count toward the 24-unit upper-level major requirement.)

Up to 6 units of foreign language courses focused on literature or intellectual culture may be counted toward the required 24 units of upper-level courses with permission of the CLT Director of Undergraduate Studies; students must seek and obtain that permission prior to enrolling in the course.

Language Study

CLT majors should complete four semesters (roughly 12 units) of sequenced courses in a foreign language *or* two foreign language courses at the 3000 level *or* one foreign language course at the 4000 level. (Students will note that three language courses taken in sequence satisfy the Arts & Sciences graduation requirement in Language and Culture.)

Capstone

The final semester or two in the CLT major comprises an important culmination. Students enrolled in CLT as their primary major will complete a CLT capstone. Many will simply revise essays from two upper-level courses and write a sustained essay reflecting on how these exemplify the skills and concerns they have developed over the course of the major. In a few cases, students will complete their capstone requirement by means of an internship. The capstone projects for students pursuing honors are described below.

Additional Information

Honors Program in Comparative Literature and Thought

CLT offers an honors program that requires an additional 6.5 units of course work. Students who have attained a 3.7 grade point in courses in the major are encouraged to apply for admission to the honors program as early as the second semester of their sophomore year and no later than the beginning of the second semester of their junior year. Students seeking CLT honors have two options: honors by thesis or honors by course work. We expect that most CLT honors students will complete their majors with a thesis.

For most students, the honors program will begin in the fall of the junior year, when students enroll in a course in Theory and Research Methods that culminates in the production of a substantial research paper and oral defense. This course is open to students across the humanities. (For students who decide to pursue honors belatedly, the Theory and Research Methods course may be taken during the fall of senior year.)

In the spring of junior year, students pursuing theses will enroll in a short course of four workshops that address how to refine a thesis topic. The following year, this cohort of CLT honors students will complete their thesis in two semesters of highly collaborative workshops.

In a few instances, CLT honors students will forego a thesis or creative project and will instead enroll in two more 4000-level CLT courses, with a capstone essay reflecting on the coherence of those advanced courses or on the friction between them.

Students may be awarded honors, high honors, or highest honors based on the quality of their honors capstone materials. Please note that CLT honors are separate from Latin honors.

Comparative Literature and Thought Major, Comparative Arts Specialization

Program Requirements

- **Total units required:** 30-50.5
  - Required Courses (27-36 units):
    - Humanities Core Courses (12 units): All Comparative Literature and Thought (CLT), Comparative Arts (CA) Specialization majors will take two required core courses in "Literature and Arts" and two core courses in "Thought."
    - Upper-Level Courses (15-24 units): All CA majors will complete at least eight upper-level CLT courses (24 units) at the 3000 level or above, including one course with the HTH attribute. Up to three 3000-level Humanities Core Courses taken to satisfy the 12-unit core requirement above can count toward the eight-course upper-level requirement.
  - Capstone (0.5 units *or* honors program): All CA majors will complete a CA or CLT capstone project (unless CA or CLT is not their primary major).
  - Applied Art and Language Study (3-14 units): All CA majors will pursue applied arts credits and, if necessary, language study. Up to 6 units of foreign language courses focused on literature or intellectual culture may be counted toward the required 24 units of upper-level courses.

A student pursuing the Comparative Literature and Thought Major, Comparative Arts Specialization, will adapt the Comparative Literature and Thought Major (p. 404) as follows:

1. Students will select COMPLITTHT 3030 Introduction to Comparative Arts as one of the four courses from the Humanities Core. As an alternative, they may substitute a first-year program or Ampersand seminar in Comparative Arts.
2. Upper-level courses for the major must include one course in the history or theory of a non-literary art practice (HTH course attribute). If such courses are not cross-listed in CLT, students may enroll with the permission of their CLT advisor and the CLT Director of Undergraduate Studies.
3. Students must complete at least two semesters of applied arts courses for a minimum of 3 units.

Required Courses

Humanities Core Courses

The CLT Humanities Core is meant to introduce major texts (in both secular and sacred canons) and foundational methods of inquiry in the humanities (formal, generic, historicizing, skeptical, and appreciative) as well as to provide an historical perspective on the development of current categories of sociocultural analysis (i.e., race, ethnicity, sex, and gender).

All CA majors will take the two required core courses in Literature and Arts and two core courses in Thought for a total of 12 units in the Humanities Core.

Literature and Arts

Code	Title	Units
Required courses:		
COMPLITTHT 2110	World Literature	3
COMPLITTHT 3030	Introduction to Comparative Arts	3
Additional course options:		
COMPLITTHT 2107	Classical to Renaissance Literature: Text & Traditions	3
COMPLITTHT 3050	Literary Modernities in Europe and America: Text & Traditions	3
COMPLITTHT 3070	Literary Modernities in East Asia: Text & Traditions	3

Thought

Code	Title	Units
COMPLITTHT 2105	Puzzles and Revolutions: Text & Traditions	3
COMPLITTHT 2108	Early Political Thought: Text & Traditions	3
COMPLITTHT 2109	Modern Political Thought: Text & Traditions	3
COMPLITTHT 2111	Scriptures and Cultural Traditions: Text & Traditions	3
COMPLITTHT 3101	An Intellectual History of Sex and Gender: Text & Traditions	3
COMPLITTHT 3200	An Intellectual History of Race and Ethnicity: Text & Traditions	3

CLT also offers special first-year programs (FYP) and Ampersand courses that will perform the intellectual functions of courses in the Humanities Core above. Please contact the CLT department for additional information about those offered courses, as they change each semester.

Upper-Level Courses

CA majors must complete 24 upper-level units, including one course in the history or theory of a non-literary art practice (HTH course attribute). To build on the Humanities Core, these students will take five to eight additional courses at the 3000 or 4000 level. (Note that several courses in the Humanities Core are offered at the 3000 level; these courses can count toward the 24-unit upper-level major requirement.)

Up to 6 units of foreign language courses focused on literature or intellectual culture may be counted toward the required 24 units of upper-level courses with permission of the CLT Director of Undergraduate Studies; students must seek and obtain that permission prior to enrolling in the course.

Applied Arts and Language Study

CA majors must complete at least two semesters of applied arts courses for a minimum of 3 units:

- Students who take 3 to 5 units of applied arts must also take one of the following:
  - Three consecutive semesters of foreign-language study with a grade of a C or better; or
  - One semester of a language course at the 3000 level or higher.
- Students who take at least 6 units of applied arts are not required to take additional foreign language courses above the Arts & Sciences graduation requirement in Language and Culture.

Capstone

The final semester or two in the CA major comprises an important culmination. Students enrolled in CA as their primary major will complete a CLT capstone project. Many will simply revise essays from two upper-level courses and write a sustained essay reflecting on how these exemplify the skills and concerns they have developed over the course of the major. In a few cases, students will complete their capstone requirement by means of an internship. Students pursuing specializations in CA have the option of completing a creative project capstone. The capstone projects for students pursuing honors are described below.

Additional Information

Honors Program in Comparative Literature and Thought, Comparative Arts Specialization

CA offers an honors program that requires an additional 6.5 units of course work. Students who have attained a 3.7 grade point in courses in the major are encouraged to apply for admission to the honors program as early as the second semester of their sophomore year and no later than the beginning of the second semester of their junior year. Students seeking CA honors have three options: honors by thesis, honors by creative project, or honors by course work. We expect that most CA honors students will complete their majors with a creative project.

For most students, the honors program will begin in the fall of the junior year, when students enroll in a course in Theory and Research Methods that culminates in the production of a substantial research paper and oral defense. This course is open to students across the humanities. (For students who decide to pursue honors belatedly, the Theory and Research Methods course may be taken during the fall of senior year.)

In the spring of junior year, students pursuing theses or creative projects will enroll in a short course of four workshops that address how to refine a thesis or creative project topic. The following year, this cohort of CLT honors students will complete their honors project in two semesters of highly collaborative workshops.

In a few instances, CLT honors students will forego a thesis or creative project and will instead enroll in two more 4000-level CLT courses, with a capstone essay reflecting on the coherence of those advanced courses or on the friction between them.

Students may be awarded honors, high honors, or highest honors based on the quality of their honors capstone materials. Please note that CLT honors are separate from Latin honors.

Germanic Languages and Literatures Major

Program Requirements

- **Total Units Required:** 25
- **Grade Requirement:** C- or higher

Requirements

Students interested in studying German may declare German as their major or second major. Majors and second majors are required to complete 25 units of course work (GERMAN 2020 and above), at least 12 of which must be at the 4000 level, with a grade of C- or higher. If students begin German at Washington University and follow the regular sequence of courses (GERMAN 1010 → GERMAN 1020 → GERMAN 2010), they will be ready to begin the German major after three semesters. With the exception of GERMAN 3400 and its 1-unit discussion section (GERMAN 3401), only courses taught in German will count toward the major. All majors and second majors are required to participate in the senior assessment interview in the final semester of their senior year.

Applications for admission to the honors program must be submitted by the first week of classes in the student's final year of study.

Note: For both majors and minors, at least half of the courses at the 3000 level and above must have been acquired either in residence at Washington University or in overseas programs affiliated with Washington University.

Additional Information

Study Abroad

German majors or minors are encouraged to participate in one of our overseas study programs. The German department sponsors a semester and a year abroad at the University of Tübingen, Germany. To participate in the Tübingen program, students must complete GERMAN 2020 (for the semester program), GERMAN 3010 (for the year program), or their equivalent by the time the program begins. Upon returning to campus, German majors are required to take at least one 4000-level course (other than GERMAN 4998–GERMAN 4999) during their senior year.

Washington University sponsors a summer program in Berlin, Germany. Students who have taken at least one semester of German may be eligible for this intensive language program. Students studying business or engineering/computer science are also encouraged to consider the study abroad programs in Germany offered by Olin Business School and the McKelvey School of Engineering.

Departmental Distinction in German and Latin Honors in German

Students who wish to be eligible for distinction in German must undertake a project in German during their final year at Washington University. There are three ways to achieve honors in German: (1) honors by course work and portfolio; (2) honors by creative project; or (3) honors by thesis. Students receiving distinction in German may additionally qualify for Latin honors in German. By May 15 of the junior year, these students choose a project or portfolio with the help of a faculty advisor from the department, enroll in the appropriate course work during the senior year, and submit completed projects immediately following spring break of the senior year.

Comparative Literature and Thought Minor

Program Requirements

- **Total Units Required:** 15

Comparative Literature and Thought (CLT) immerses students in modern and contemporary literary and intellectual cultures and in the textual and philosophical traditions that animate those cultures. The curriculum attends to the emergence of a global textual and media culture as well as to the ways in which nations, subcultures, and individuals embrace and resist that global emergence.

While our faculty and students have wide-ranging interests — intellectual history, translation, arts practice, comparative arts, digital humanities, media studies and book history, political and legal thought — we have built our major and minor upon a foundational curriculum for the humanities. That foundational curriculum focuses on a set of themes and problems that have long preoccupied students and scholars: the nature of textual culture, the philosophical and ethical engagements of literature and the arts, the pressure of politics on literature and thought, the reciprocal pressure of literature and thought on politics, the specific bearing of language on intellectual life, and the transformations and excitations produced whenever texts are translated to another language or to another medium.

Many of our students are both scholars and makers. In addition to courses in translation practice, we offer courses in multilingual creative writing and arts journalism. Although some of our students do traditional scholarly work for their capstones in the major, others do creative final projects. Our digital humanities group offers students opportunities to participate in collaborative research projects comparable to those offered to students in the natural and social sciences.

The introductory core of the CLT curriculum engages a minor in CLT with literature, intellectual history, social and political thought, and cultural theory. The minor requires five courses, four of which must be drawn from the core curriculum; the fifth course may be taken from the same roster of core courses or from more advances courses in CLT.

Required Courses

Humanities Core Courses

The CLT Humanities Core is meant to introduce major texts (in both secular and sacred canons) and foundational methods of inquiry in the humanities (formal, generic, historicizing, skeptical, and appreciative) as well as to provide an historical perspective on the development of current categories of sociocultural analysis (i.e., race, ethnicity, sex, and gender).

All CLT minors must take two core courses in Literature and Arts (including one required course) and two core courses in Thought for a total of 12 units in the Humanities Core. CLT minors must take a fifth CLT course.

Literature and Arts

Code	Title	Units

Data Science in the Humanities Minor

Program Requirements

- **Total Units Required:** 15

Any humanities student will feel at home in this minor and in its active research community. No previous experience with computational methods is required; the curriculum equips students with the skills and knowledge necessary to navigate the field of Digital Humanities, and those skills and that knowledge are eminently "transferable." Computational approaches to questions in the humanities are slowly migrating from the methodological fringes of the disciplines of cultural, artistic and historical inquiry. Students in the minor will have the opportunity to engage with the emerging future of their fields and to help shape that future.

A student who *does* have previous computational experience — a computer science major, for instance — will also benefit from this minor. By grafting that knowledge to the problems of cultural and historical analysis and working on challenging new projects within unfamiliar fields, computer-savvy students will find themselves becoming more versatile and more attractive to graduate admissions committees and potential employers.

For the minor, students will take 15 units of course work, at least 6 units of which should be drawn from the four core Data Science in the Digital Humanities (DASH) courses, plus at least 3 units of internship (which can be repeated for up to 8 credits). The internship research experience is required and consists of working under the director of a faculty on a project through Comparative Literature and Thought (CLT) or the Humanities Digital Workshop. The DASH courses and internship can be supplemented with elective courses in Computational Humanities, Digital Culture and Design, or Computer Science.

Requirements

1. Required Course (3 units):

Code	Title	Units
COMPLITTHT 3120	Introduction to Digital Humanities	3

2. DASH Core (at least 3 units and up to 7 units):

Code	Title	Units
COMPLITTHT 4300	Data Manipulation for the Humanities	1
COMPLITTHT 4310	Statistics for Humanities	3
COMPLITTHT 4320	Programming for Text Analysis	3

3. Research via Internship (and least 2 units and up to 6 units)

Code	Title	Units
COMPLITTHT 3991	Internship in Digital Humanities*	2-6

* This course may be repeated for up to 6 units. Students intern on a faculty Digital Humanities research project either during the academic year or in summer through the Humanities Digital Workshop.

Internship Research

The DASH minor is unusual among humanities programs in its focus on hands-on undergraduate research via internship. STEM fields provide relatively straightforward pathways toward research, whereas humanities students sometimes struggle to define what humanities research entails and how to get involved. Research opportunities are built into the DASH minor. DASH requires every student to take at least 3 units of directed research during an internship on a faculty-led

project, and students are encouraged to work on more than one project or to advance their skills during another semester or summer. Students may take up to 8 units of internship/research. Lists of projects can be found on the CLT and Humanities Digital Workshop websites.

Every summer, the Humanities Digital Workshop invites applications from students for its summer fellowships. The fellowships pair students with humanities faculty engaged in digital humanities projects for 8 weeks, and past participants have overwhelmingly found this experience to be valuable.

Germanic Languages and Literatures Minor

Program Requirements

- **Total Units Required:** 16
- **Grade Requirement:** Students must earn a grade of C- or higher

Required Courses

Students who intend to minor in German must complete 16 units of coursework (GERMAN 2020 and above) with a grade of C- or higher. With the exception of GERMAN 3400 and its 1-unit discussion section (GERMAN 3401), only courses taught in German will count toward the minor. At least 3 of the 16 required units must be at the 4000 level.

Additional Information

- At least half of the courses at the 3000 level and above must have been acquired either in residence at Washington University or in overseas programs affiliated with Washington University.
- Any credits obtained at the 3000 or 4000 level during the summer institute program in Berlin may count toward the minor.

Phone:	314-935-4200
Email:	german@wustl.edu
Website:	https://german.wustl.edu/undergraduate

Legal Studies Minor

Program Requirements

- **Total Units Required:** 18

The minor in legal studies requires six courses (18 graded units), at least three of which (9 units) must be upper-division (3000- or 4000-level) courses. Two of the six courses may be drawn from the student's major, but as in all College of Arts & Sciences programs, they cannot be double-counted (i.e., applied to both the major and the minor). The six courses also must be distributed across three of four thematic subject areas. For details, please visit the Legal Studies website or consult the Director of Legal Studies.

Medieval and Renaissance Studies Minor

Program Requirements

- **Total Units Required:** 18
- **Grade Requirement:** C- or better; Pass/No Pass grades do not count for the minor

Students pursuing the minor in Medieval and Renaissance Studies must complete two years of college-level language study in Spanish, French, Italian, Latin, German, Arabic or Greek, and they are encouraged to continue their foreign-language study further. Students are expected to take six additional courses, three of which should come from the following list:

Required Courses

Code	Title	Units
ARTARCH 1515	History of Western Art, Architecture & Design	3
COMPLITTHT 2107	Classical to Renaissance Literature: Text & Traditions	3
COMPLITTHT 2108	Early Political Thought: Text & Traditions	3
COMPLITTHT 2111	Scriptures and Cultural Traditions: Text & Traditions	3
HISTORY 1010	Western Civilization	3

Additional Information

Students must also take three courses in medieval or renaissance studies from at least two different departments or programs. Students will select these three courses in consultation with their minor advisor.

- Courses must be drawn from at least two departments or programs, and at least one course must significantly address non-Western material.

Interested students may pursue the Medieval and Renaissance Studies Minor under the auspices of Comparative Literature and Thought. The minor offers students the opportunity to gain a broad and global understanding of the medieval and Renaissance world through inquiry in multiple disciplines, including literature, history, philosophy, religious studies, art history, and music.

Students may choose from multiple offerings on medieval and Renaissance topics that range in geographical reach to include the West, the Near East, the Far East, and the Global South.

Translation Studies Minor

Program Requirements

- **Total Units Required:** 15
- **Grade Requirement:** C- or higher; Pass/No Pass grades do not count for the minor.

Required Courses

Code	Title	Units
Required course:		
COMPLITTHT 3203	World-Wide Translation: Language, Culture, Technology	3
Plus three of the following:		
COMPLITTHT 2110	World Literature	3
COMPLITTHT 3101	An Intellectual History of Sex and Gender: Text & Traditions	3
COMPLITTHT 3120	Introduction to Digital Humanities	3
COMPLITTHT 3200	An Intellectual History of Race and Ethnicity: Text & Traditions	3
COMPLITTHT 3510	A World of Words	3

Additional Courses

In addition to the four required courses listed above, students must take one of the following:

- A 4000-level Translation practicum (3 units) *or*
- A course in Translation Studies (3 units)

Additional Requirements

Translation Studies minors are also expected to complete three sequenced courses of at least 3 units each in a single foreign language. (Note that this sequence of courses will also satisfy the Arts & Sciences Language and Cultural Diversity [LCD] requirement.)

Earth, Environmental, and Planetary Sciences

For students interested in studying the world beneath their feet or other worlds farther away, the Department of Earth, Environmental, and Planetary Sciences provides the tools for understanding the processes that shape our planet and other bodies within the solar system. Understanding the Earth system is also the key to addressing many environmental challenges, including climate change, water supply, and energy issues. Earth, environmental, and planetary scientists are uniquely poised to help solve some of society's most pressing problems. Because planets are complex systems, Earth, environmental, and planetary sciences is, by necessity, an interdisciplinary field. It applies biology, chemistry, physics, and math to the investigation of topics such as early life on Earth, the structure of the Earth's deep interior, the nature of contaminant transport, and the surfaces of other planetary bodies.

For students who have developed a passion for the basic sciences and who are looking for a way to study these sciences outside of traditional disciplinary boundaries, Earth, environmental, and planetary sciences is an ideal choice of major. The department offers majors and minors in Earth Science, Environmental Science, and Planetary Science. All programs offer a range of customization that allows students to focus on topics with the greatest relevance to their academic interests and career plans.

All students have the opportunity to participate in faculty research programs; however, this participation is not required. Many of our students take advantage of these varied research opportunities, which provide them with valuable experience for future employment or for graduate school. Each year, several scientific papers and abstracts are co-authored by undergraduate students, and undergraduate students have presented papers at many national science meetings.

Department Policies for Majors and Minors

Minimum grade performance: A grade of C- is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.

Transfer credits and the School of Continuing & Professional Studies: Coursework completed at another college or university must have prior approval of the department to be used to fulfill major requirements. Courses taken through the School of Continuing & Professional Studies normally may not be substituted for courses

required for an Earth, Environmental, and Planetary Sciences major. Written consent from the Director of Undergraduate Studies is required for any such substitutions to apply and must be sought before the course is taken.

Graduate-level courses: All Earth, Environmental, and Planetary Sciences graduate courses (i.e., courses numbered 5000 and above) are open to advanced undergraduates with permission of the specific course instructor.

Majors

- Earth Science Major (p. 420)
- Environmental Science Major (p. 422)
- Planetary Science Major (p. 424)

Minors

- Earth Science Minor (p. 427)
- Environmental Science Minor (p. 427)
- Geospatial Science Minor (p. 428)
- Planetary Science Minor (p. 429)

Courses

EEPS 1000 Environmental Geology
Examines the interaction between Earth system and processes with human activities and how solutions can be developed to address environmental problems. Broad topics include: Earth materials, resources, pollution, geologic hazards and global climate change. No prerequisite needed for this class, and is suitable for students with little or no background in Earth or environmental science. Homework assignments or case study discussions will help students make vital connections beween class concepts and real-world scenarios. There will also be 1-2 day field trips designed to help students develop field observation and data collection skills.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

EEPS 1010 Seminar in Earth and Planetary Sciences
Each week a different faculty member presents a lecture or laboratory demonstration relating to recent discoveries in geology and the planetary sciences, or about general topics dealing with volcanism, earthquakes, plate tectonics, geologic hazards, fossil life, and Earth history. Pass/No Pass only.
Credit 1 unit. A&S IQ: NSM Art: NSM

EEPS 1020 Earth's Atmosphere
The past, present, and future of the atmosphere. Present composition and structure. Comparison with atmospheres of other planets. History and origin of the present atmosphere, and chemical and other interactions with the solid earth, oceans, and biosphere. Extraterrestrial effects. Effects of human activities.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

EEPS 1030 Oceanography
Emphasis on geological, chemical, and physical oceanography. Topics: topography and origin of ocean basins; origin and composition of sea water; effect of compositional variations on biological productivity; dynamics of water movements, including coastal processes.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

EEPS 1040 First-Year Seminar: Geology in the Field
This course is designed to develop foundational skills in field geology and Earth science while promoting leadership and teamwork. There are no prerequisites, and the class is suitable for students with little or no academic background in Earth science. Students are not required to have extensive outdoor experience, but they must demonstrate enthusiasm for work in challenging environments. Students will receive training in a variety of geological field methods, including field mapping, sampling protocols, section measurement, and structural identification and analysis. This course is field-intensive, with multiple field exercises during class periods and two or three weekend field trips that will involve camping, caving, and backcountry hiking. This course is primarily suited for students who enjoy working outdoors and who intend to major in Earth, Environmental, and Planetary Sciences, Biology, Anthropology, or Archaeology. Course enrollment preference is given to first-year students.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

EEPS 1050 Habitable Planets
Why does the Earth have water oceans? Where did our atmosphere come from? Is Earth uniquely habitable among solar system bodies? This course is an exploration of the origins of volatiles such as water and carbon on planetary bodies and of the internal features that help to regulate our planet's surface conditions. The importance of magnetic fields, plate tectonics, and climate feedbacks with respect to the origins and sustenance of life on Earth will be discussed.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

EEPS 1060 First-Year Opportunity: Exploring the Planets
How do humans explore other worlds? This course will introduce how NASA and other space agencies explore our Solar System and beyond. The first part of the course will describe why we explore planets, and how decisions are made as to what missions to fly; the latter portion of the course then focuses on past, current, and planned missions to major Solar System bodies. Course content will include faculty- and guest lecturer-led presentations on spacecraft mission design and how missions are implemented. Students will give individual presentations on a planetary body of their choice, and will work in groups to study spacecraft missions currently in flight.
Credit 1 unit. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

EEPS 1070 Environmental Geology and Energy
Ways to minimize hazards to the environment from the use of different forms of energy. Geologic hazards of human activity. Earthquake and volcanic hazards; global warming due to greenhouse effect. Feasibility of nuclear waste disposal. Geothermal energy. Air and water pollution. Intended for non-science majors.
Credit 3 units. A&S IQ: NSM Art: NSM

EEPS 1080 Oceans and the Atmosphere
Basic concepts of the evolution and physical structures of the Earth's oceans and the atmosphere. Dynamic aspects of the oceans (waves, tides, tsunamis) and atmospheric circulation (weather). Role of biological processes (including anthropogenic) in defining the present oceans and atmosphere. Global climate issues discussed in EEPS 1110.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring

EEPS 1090 Quantitative Reasoning in Environmental Science
Introduction to practical mathematical methods for understanding environmental aspects of our planet, particularly how the environment changes with time through human interactions. Emphasis on intuitive approaches in devising simple relationships for understanding quantitative outcomes of natural processes. Introduction to basic statistical methods, including hypothesis testing, and how statistics can be applied to environmental problems.
Credit 3 units. A&S IQ: NSM, AN Art: NSM BU: SCI
Typical periods offered: Fall

EEPS 1100 Scientific Issues of the Nuclear Age
Scientific questions related to the nuclear arms race, nuclear proliferation, arms control, testing and verification of test-ban treaties. Informed policies or decisions involving these issues often rely on the answers to scientific questions. This approach isolates particular questions and issues and builds the skills and knowledge to analyze them, from basic scientific principles and in a quantitative fashion. Focus will be on questions involving Earth and Planetary Sciences, including atmospheric science.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall

EEPS 1110 Introduction to Global Climate Change in the 21st Century
Global climate and global climate change and their impacts on life and civilization. Integrated view of global climate and the diverse forces that can alter global climate. Historical and potential future consequences of global climate change on human life, our industrial civilization, and its sustainability.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring, Summer

EEPS 1120 First-Year Seminar: Engineering the Climate
Geoengineering, the deliberate manipulation of the earth's climate, may be part of a solution to the predicted future global warming. Is this advisable, or even possible? Discussions,lectures, and readings used to learn how earth's climate works. Examination of some

proposals for altering the climate. Past attempts for deliberate human alteration of natural systems discussed and evaluated. Consideration of geoengineering as an ethical issue. Prerequisite: first-year undergraduate status.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

EEPS 1140 Life of the Geologic Past
Examination of the history of life from its earliest fossil record over three billion years ago to the present. Topics: geological time, fossilization, organic evolution, relation between ancient organisms and ancient environments. Sequence of plants and invertebrates through time with emphasis on remains of mammal-like reptiles, dinosaurs, modern reptiles, mammals.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

EEPS 1150 The Future of Energy
The course will examine the topic of energy from many human-relevant perspectives in a primarily lecture-based format. Humans use an enormous amount of energy, at the staggering rate of 20 terawatts. Where does this energy come from? How long will it last? What are the consequences? This course will examine these questions and look at energy resources and their consumption from scientific, social, economic, ethical and political viewpoints. The course will first examine what energy is, as well its relation to other concepts such as heat, work, and power. We will then look at the way that energy is used by society. We will examine the different sources of energy, their availabilities, the pros and cons of using them, their consequences, and their futures. We will examine the impacts that the use of fossil fuels is having on the environment, primarily through pollution and greenhouse gas-driven climate change. We will examine the significant environmental injustices associated with energy, its production, and availability. Given that Earth receives more energy from the sun in one hour than all humans use in a year, opportunities for solar-based power (photovoltaic, wind, hydro, biomass) are plentiful. However, how we get to there from where we are now is not clear, and many questions remain (the role of nuclear power, the rate of transition, the role of government, the impacts of climate change, energy storage capabilities, battery vs. hydrogen fuel cell cars, etc.). This course will look at all of these topics related to all of the energy sources, including the roles they played in our past and the roles they might play in our future.
Credit 3 units. BU: SCI
Typical periods offered: Fall

EEPS 1160 Resources of the Earth
Introduction to major resources of the Earth: rocks, minerals, water, soil, air. Basics of geology presented so that origin, supply, and uses of resources can be better understood. Environmental awareness stressed. Field trip required.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

EEPS 1180 Geology of National Parks
Survey of geologic processes occurring at the Earth's surface and its interior using national parks and monuments as the prime venue for presentation. Volcanism and mountain-building; the work of streams, glaciers, and wind; lake and coastline development; stratigraphy and sedimentation; and Earth history. Material presented in a geographic context, with emphasis on landforms and landscape evolution, relating geology to the development and settlement of the U.S.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring, Summer

EEPS 1250 The Dinosaurs
The public interest in dinosaurs makes them an ideal organism for exploring the nature of science. In this class, we will separate dinosaur fact from fiction with discussions of evolution, ecology, extinction, anatomy, and behavior. We will also examine the roles of dinosaurs in popular media.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

EEPS 1300 Ring of Fire: Earthquakes, Volcanoes, & Plate Tectonics
Presentation of plate tectonics and physical processes shaping the Earth, using the band of recurring earthquakes and volcanoes (Ring of Fire) that borders the Pacific Ocean as a primary example. Use of plate tectonics to explain origins of continents, oceans, mountains, and effects on evolution of life. Impact of earthquakes and volcanoes on human society. Concept of deep time-evolution of Earth from Big Bang origin of the universe to the present.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

EEPS 1310 Natural Disasters
Examination of the effects of natural hazards on landscapes of the Earth in general, as well as on populated areas specifically, through numerous case studies. Social, economic, and political consequences of natural disasters. Locations, particularly in the U.S.A., where disasters are likely to occur in the future. Nature of the hazards and what preparations are possible to minimize damage and the number of casualties.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring

EEPS 1400 First Year Seminar: Geology and Human Health
This course explores the connections between human health and geological processes. Key concepts in geology are introduced as well as the pathways through which natural systems affect human health. A series of case studies will be presented, each describing a specific health hazard and its geological origin. The first set of studies will focus on human health effects associated with windborne exposure to harmful materials, including volcanic emissions, asbestos, dust and aerosols, and the products of coal combustion. The course will then use the topic of mercury, which is emitted into the atmosphere and then accumulates in aquatic systems, to transition to water and soil borne pathways of exposure. This will be followed by case studies exploring water availability and quality, arsenic in groundwater, with a special emphasis on widespread arsenic poisoning in South and Southeast Asia, lead in mining areas and urban soils, and radon and radioactive materials. Students will conduct team risk assessment projects as well as an individual project.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

EEPS 1410 First-Year Seminar: Unearthing the Science of Climate Change
How and why does the climate change? How does the climate system interact with human systems? This course investigates the physical principles of Earth's ever-changing climate, with a special focus on the present-day. Topics include Earth's energy balance; the components of the climate system, including the atmosphere; oceans, cryosphere, geosphere, and biosphere; natural and anthropogenic causes of climate change; climate change detection and attribution; weather extremes; and climate adaption/vulnerability in past and present human societies. Students will explore the science behind hot topics in climate change and learn how peer-reviewed science is communicated to popular audiences. The course format will be a mixture of lectures, demos, facilitated discussions, and student presentations. In addition to gaining scientific background on climate change, students will

develop skills in scientific writing and communication to a variety of audiences. No prior coursework in earth science is necessary. This course is open to students of any background who wish to gain literacy in the science of climate change.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring

EEPS 1450 Land Dynamics: Case Studies of Environmental Sustainability
This course is designed for first- and second-year students and will use lectures, discussions, GIS-related and computational exercises, and field trips to introduce students to a systems approach for identifying, characterizing, and solving issues associated with environmental degradation. The course will focus on three case studies. The first will cover rapid lake drawdown of Mono Lake in northern California due to engineered diversions and subsequent court-ordered recovery to an environmentally sustainable lake level. The second will focus on unresolved consequences associated with channelization and levee development on the lower Missouri River, which put federal agencies in conflict with one another on how to manage the river and its floodplains. The third will cover past and present Pb-Cu-Zn sulfide mining practices in Missouri and attempts to balance the need for these nonrenewable resources while minimizing environmental consequences.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

EEPS 1710 The Solar System
Survey of the planets and satellites of our solar system. Includes results from Apollo manned missions to the Moon and spacecraft missions to the planets and their major satellites. Present ideas about the age, formation, and early history of the sun, Earth, and meteorites.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring

EEPS 1996 Earth and Planetary Sciences Elective: 1000-Level
This course is used for transcribing 1000-level EEPS elective units.
Credit 3 units.
Typical periods offered: Fall, Spring, Summer

EEPS 2010 Earth and the Environment
Introduction to the study of the Earth as a dynamic, evolving planet. Emphasis on how internal and surface processes combine to shape the environment. Themes: Earth's interior as revealed by seismic waves; Earth history and global tectonics shown by changes to ocean floors, mountain-building, formation of continents, earthquakes, and volcanism; climate history and global biogeochemical cycles, influenced by circulation of atmosphere and oceans, ice ages, and human activity. Composition and structure of rocks and minerals. Part of the introductory sequence of courses for all Earth, Environmental, and Planetary Sciences and Environmental Studies majors. Three class hours and one two-hour lab a week.
Credit 4 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring

EEPS 2020 Introduction to Earth, Environmental, and Planetary Science
Introduction to the Earth, its environment, and its place in the solar system. This course is intended to be a starting point for majors in the Department of Earth, Environmental, and Planetary Sciences, or as a standalone course for students from all interests and backgrounds. Themes for this course include Earth's history; the structure and composition of Earth and other planets; the evolution of Earth's surface; natural hazards; climate history; global biogeochemical cycles; and the solar system. Students who are interested in gaining more depth in lab or field techniques, or students who are planning to major in EEPS, should consider co-registering in EEPS 2021.
Credit 3 units. A&S IQ: NSM, AN Art: NSM BU: SCI
Typical periods offered: Fall, Spring

EEPS 2021 Introduction to Earth, Environmental, and Planetary Science Lab Section
Students enrolling in EEPS 2020, who are interested in gaining more depth in lab or field techniques, should consider co-registering in EEPS 2021. This optional 1-credit lab session is an opportunity for students who want to go deeper into Earth, Environmental, and Planetary Sciences. A combination of lab activities, discussion, and field trips will provide context and practical experience that will enhance understanding of EEPS 2020 concepts while preparing students for advanced coursework. Sessions include opportunities to study geologic and environmental processes using hands-on approaches, including field and lab work. Seven meetings, (typically every other week), plus one required field trip on a Saturday. (1 credit)
Credit 1 unit.
Typical periods offered: Fall, Spring

EEPS 2190 Energy and the Environment
Examination of the topic of energy from many human-relevant perspectives. Humans use an enormous amount of energy, at the rate of 18 terawatts. Where does this energy come from? How long will it last? What are the consequences? Examination of energy resources and consumption from scientific, social, economic, and political viewpoints. Relationship of energy to concepts such as heat, work, and power. Energy use by society. Energy sources, pros and cons of use, availability now and in the future. Types, abundance, advantages, challenges of renewable energy sources.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring

EEPS 2200 Environmental Science
Introduction to Environmental Science as a discipline. Interlinked geological,atmospheric, hydrological, and biological processes that constitute the environment. Emphasis on natural processes that control climate, composition of air and water, support and distribution of ecosystems. Scientific framework for examining the effects of human activities on the environment. Three class hours and one two-hour laboratory period a week.
Credit 4 units. A&S IQ: NSM Art: NSM

EEPS 2210 Human Use of the Earth
Examination of the impacts of a growing population on the Earth, including habitat destruction, resource depletion, and air and water pollution. Population growth, landscape change, and the distribution and uses of the water, mineral, and energy-producing resources of the Earth.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

EEPS 2996 Earth and Planetary Sciences Elective: 2000-Level
This course is used for transcribing 2000-level EEPS elective units
Credit 3 units.
Typical periods offered: Fall, Spring, Summer

EEPS 3080 Topics in Environmental Sustainability
Mathematical sustainability models; ocean, atmospheric, wetland, agricultural, hydrological, and energy sustainability; depletion of non-renewable resources; effects of pollution, human population, urban environment.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

EEPS 3100 Geological Field Methods
Methods and principles of geological field work, including map reading, sampling and sample location, air photo interpretation, and geologic map construction. One class hour and one three-hour laboratory a week, and occasional weekend field trips.
Credit 3 units. A&S IQ: NSM Art: NSM

EEPS 3150 Environmental Impacts of Human Energy Use
Students will meet in an active-learning classroom (such as January 110 or McDonnell 362) and work in groups of up to six people at a table. Some projects will be short units, started and completed within a single class period. Other projects will be longer, extending over several class periods. The projects will include debates, analyses of recent journal articles and other primary sources, energy literacy assessments, the creation of educational modules, and quantitative problem-based learning. Classes will include some amount of lecturing, in measured doses, particularly from guest lecturers.
Credit 3 units. A&S IQ: NSM

EEPS 3173 Soil Science
Physical, chemical, and biological processes that occur within soil systems. Types of soils and their formation. Major components of soil, including soil water, minerals, organic matter, and organisms. Soils in wetlands and arid regions. Mapping of soils and their spatial variability. Cycling of nutrients and contaminants in soils. Sustainable use of soils and their role in climate change.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Spring

EEPS 3190 Physical Oceanography
Ocean circulation, El Nino, dynamical tides, tsunami, coastal ocean, enclosed seas, paleo-ocean, sedimentation, ice-atmosphere-ocean interaction, biology-carbon cycle.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

EEPS 3230 Biogeochemistry
Basic concepts of how elements cycle among Earth's crust, oceans, and atmosphere, including perturbations due to human activities. Carbon, nitrogen, phosphorus, sulfur, and water cycles. Isotopic tracers. Feedbacks, forcings, and residence times. Redox cycling and thermodynamics. Biogeochemical box models, and changes in biogeochemical cycles over Earth history. Biogeochemistry of greenhouse gases, biogeochemical feedbacks in the climate system. This course is appropriate for EEPS students, engineering students, environmental science majors, and other students with interest in the environmental or geological sciences.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

EEPS 3350 Introduction to Petrology
Classification, origin, mineralogy, and geological occurrence of major igneous and metamorphic rocks. Laboratory emphasis on identification of rocks and minerals in hand specimens and in thin sections. Three class hours and one two-hour laboratory a week.
Credit 4 units. A&S IQ: NSM Art: NSM

EEPS 3360 Minerals and Rocks in the Environment
Combined rock and mineral course with focus on environmental issues and applications. Introduction to mineralogic and petrologic concepts relevant to environmental geoscience pursuits. Foundations of mineralogy and crystallography, key mineral groups, foundations of igneous, sedimentary, and metamorphic rock systems. Mineralogy of environmental systems such as soils, marine environments, aerosols, mines, and radioactive wastes. Overview of analysis methods used for environmental geoscience applications. One full-day field trip required. Both EEPS 336 and EEPS 352 may be taken for credit, but only one may count towards the EEPS or EES majors and minors.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

EEPS 3400 Minerals, Rocks, Resources and the Environment
This course is designed for undergraduate majors and minors in the Department of Earth, Environmental, and Planetary Sciences to master fundamentals of mineralogy and their context within sedimentary, metamorphic, and igneous rocks, including an introduction to mineral resources and the role of minerals and mineral resources in current environmental issues. The course will provide fundamentals of mineralogy and crystallography, important mineral groups, and foundations of sedimentary, metamorphic, and igneous rock systems. It will provide an overview and lab demo of the modern analytical methods used in mineralogy. The course includes lecture (three hours per week) and a lab component (two hours per week). Prerequisites: EEPS 202 and Chem 105.
Credit 4 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

EEPS 3410 Introduction to Geochemistry
This is an undergraduate-level introduction to geochemistry intended for EEPS majors and non-majors interested in understanding how the discipline of chemistry is applied in the Earth, environmental, and planetary sciences. The course is structured to emphasize how elements and compounds are sorted and transferred between a planet's core, mantle, crust and surface reservoirs. A broad range of topics are covered to prepare students for in-depth study in subsequent classes: the origin of the elements, radioactive decay, chemical bonding, an overview of rock-forming minerals, the composition of the solid Earth, mantle melting and trace element partitioning, properties of solutions, reduction-oxidation reactions, water-rock reactions, the composition of river and ocean waters, the composition of the atmosphere, low-temperature geochemical cycles, subduction zone chemical cycling, and basics of stable and radiogenic isotope geochemistry. Prerequisites: EEPS 202 and Chem 105
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall, Spring

EEPS 3420 Environmental Systems
Introduction to the science of environmental systems and processes. Exploration of key functions of major environmental systems on land, in rivers and lakes, in air, at sea, and in diverse transitional settings at the boundaries between these environments. Evaluation of the ways in which humans alter and are affected by environmental systems. Interspersed throughout the semester will be a review of the major U.S. laws governing human management of environmental systems as well as case studies of environmental disparities in the St. Louis region.
Credit 3 units. A&S IQ: NSM, AN
Typical periods offered: Fall

EEPS 3520 Earth Materials
Fundamental principles of crystal chemistry, symmetry and structure of crystals (minerals), X-ray analysis of crystalline materials, information on the important mineral groups (definition of the groups; composition, structure, physical properties, occurrence, and usage of major mineral species); optical mineralogy. Geological and environmental aspects of earth materials. Both EEPS 352 and EEPS 336 may be taken for credit, but only one may count towards the EEPS or EES majors or minors. Three class hours, one two-hour laboratory, and one two-hour discussion period a week.
Credit 5 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

EEPS 3530 Earth Forces
Basic concepts regarding the forces that act upon the Earth, how geological materials react to these forces, and the time scale over which they respond. Emphasis on physical concepts needed to understand the geodynamical behavior of the Earth over a broad range of length and time scales. Application and interpretation of geophysical methods to probe the interior of the Earth. Prerequisite: EEPS 202 (may be taken concurrently) and Phys 191. Three class hours and one two-hour laboratory a week.
Credit 4 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

EEPS 3610 Structural Geology
The landforms that surround us are constantly being modified by tectonic forces. Structural geology provides a framework for investigating, describing, and quantifying these changes. This course will provide an introduction to the structures that form at all scales, from millimeter-sized fractures to rifts in Earth's lithosphere thousands of kilometers long. Through the study of these features and processes that form them, students will gain a fundamental understanding of the physical evolution of our planet. Topics will include descriptive analysis of microscopic and macroscopic structures, field methods, the physical basis for rock deformation, and global tectonics.
Credit 4 units. A&S IQ: NSM BU: SCI
Typical periods offered: Fall

EEPS 3730 Fundamentals of Planetary Science
Overview of planetary science and astrobiology as practiced today, focusing on key scientific questions. Course is an entry point to the EEPS Planetary Science major, but also provides for those interested a deeper immersion than possible in EEPS 171A. Introduces major planetary science themes: surfaces, interiors, atmospheres, and magnetospheres, and their application to terrestrial planets, giant planets and their satellites, dwarf planets, and small bodies. Final portion of the course focuses on life, ocean worlds, and planetary habitability. Prerequisite: EEPS 202.
Credit 3 units. A&S IQ: NSM

EEPS 3853 Earth History
Introduction to the concept of deep time and the parallel biological evolutionary and environmental changes that have occurred throughout Earth history. Topics include early evolution of life, rise of atmospheric oxygen, global glaciation, mass extinctions.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring

EEPS 3863 The Earth's Climate System
This course introduces an integrative view of the Earth's climate system and its coupled components - the atmosphere, the oceans, the cryosphere, the biosphere, and the geosphere - and how they interact with each other. The goal is to provide the physical scientific background that is needed to understand climate variability and climate change, both natural and anthropogenic. Topics include energy balance; general circulation of the atmosphere and the oceans; the greenhouse effect; modes of variability such as El Nino; geologic-scale climate change in the geologic past; climate models; climate change detection and attribution; projection of future climates; and societal impacts. In addition to lectures, students will gain hands-on experience analyzing and interpreting real datasets through inquiry-based practicum exercises and in-class discussions. Prerequisites: EEPS 202.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring

EEPS 3873 Geospatial Science
This course introduces students to the interdisciplinary field of geospatial science, which bridges the fields of geographic information systems (GIS), remote sensing, data science, and spatiotemporal analysis. This course will provide an overview of the fundamental concepts of geospatial science, including: visualizing and analyzing raster and vector datasets within a GIS database; coordinate systems, reference frames, and projections; the Geoid and geodetic techniques; remote sensing methods; image acquisition and interpretation; spatiotemporal analysis of geospatial data; sampling, interpolation, and time series analysis; uncertainty, error, accuracy, and precision. This course will be available at both the upper-level undergraduate and the graduate levels. Material will be covered through lectures, assignments, and computer exercises that will give students hands-on experience analyzing and interpreting real geospatial datasets. Exercises for students enrolled in the 587 option will be more in-depth and will require some basic programming experience and familiarity with quantitative techniques. These exercises will provide students with a sampling of geospatial science applications, such as environmental studies, cryospheric science, wildlife management, contagious disease monitoring, demography, and human geography. Students will complete a final project of their choosing that synthesizes the concepts and themes learned in this course; students enrolled in the 587 option are encouraged to develop a project proposal that aligns with their own research interests. Students particularly interested in GIS and remote sensing are further encouraged to also consider EnSt 380 and EEPS 407, respectively.
Credit 4 units. A&S IQ: NSM, AN BU: SCI
Typical periods offered: Fall

EEPS 3883 GIS for the Earth, Environmental, and Planetary Sciences
This course will introduce fundamental geospaLal concepts, tools, and analyses through hands-on exercises and assignments. The course will focus on common applications of geographic information systems (GIS) in the earth sciences to illustrate core geospaLal concepts, provide exposure to key data types and analysis tools, and to build proficiency with industry standard GIS software. Class meetings will feature lectures, article discussions, and hands-on exercises to demonstrate common workflows for obtaining, creating, or editing geospatial datasets and using them to perform spatial analysis and create effective map products.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall, Spring

EEPS 3900 Independent Study
Independent study for undergraduates, to be supervised by a faculty member. Credit to be determined.
Credit 3 units. Art: NSM
Typical periods offered: Fall, Spring

EEPS 4000 Special Topics
The content of this course varies each time it is offered, as announced by the Department. With permission of the advisor, this course may be repeated for credit. Variable credit.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

EEPS 4001 Special Topics
The content of this course varies each time it is offered, as announced by the Department. With permission of the advisor, this course may be repeated for credit.
Credit 3 units. A&S IQ: NSM

EEPS 4014 Earth Systems Science
This is a quantitative introduction to physical and chemical interactions among the atmosphere, oceans and solid earth. Topics covered include terrestrial atmospheric chemistry, geochemical cycles, inventories, and reservoirs of carbon, nitrogen, & sulfur, and bulk composition of the Earth.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

EEPS 4074 Remote Sensing
Use of different parts of the electromagnetic spectrum (visible, ultraviolet, infrared, and radio wavelengths) for interpretation of physical and chemical characteristics of the surfaces of Earth and other planets. Digital image systems and data processing.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

EEPS 4084 Earth's Atmosphere & Global Climate
Structure and dynamics of Earth's atmosphere. Basic factors controlling global climate of Earth. Quantitative aspects of remote sensing of atmosphere. Remote sensing instrumentation.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

EEPS 4094 Surface Processes
How do landscapes evolve? This course focuses on the physical processes of erosion and deposition that shape Earth and planetary surfaces. Course aims (1) understanding emergent landscape patterns, (2) reconstructing past conditions using the sedimentary record, and (3) predicting landscape change under climate scenarios. Review of relevant climatic and tectonic processes, followed by detailed discussion of rivers and deltas, hillslopes, weathering, glaciers, and coasts.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

EEPS 4104 Earth Remote Sensing Methods and Instrumentation
Detection of electromagnetic radiation reflected,scattered, or emitted by components of the Earth system. Spectroscopy of remote sensing. Interpretation of received radiation via radiative transfer within a context of real measurements. Theory of instruments and detectors. Comparison of realized equipment to theoretical models.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall, Spring

EEPS 4134 Introduction to Soil Science
Physical, chemical, and biological processes that occur within soil systems. Types of soils and their formation. Major components of soil, including soil water, minerals, organic matter, and organisms. Soils in wetlands and arid regions. Mapping of soils and their spatial variability. Cycling of nutrients and contaminants in soils. Sustainable use of soils and their role in climate change.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

EEPS 4224 Sedimentary Geology
Survey introduction to sedimentary processes and materials, including description, formation, and interpretation. Sedimentary materials account for most of the Earth's crust, and much of our understanding of Earth history comes from their examination. Many of our economic resources, such as coal, oil, and natural gas, and many environmental problems, are related to or derive from sediments. Goals: understanding and identifying sediments and processes and using them to interpret stratigraphic, paleoenvironmental, and tectonic information; obtaining the understanding of sedimentology that is relevant to environmental issues; increasing scientific literacy and critical thinking. Mandatory field trips.
Credit 4 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

EEPS 4254 Invertebrate Paleontology
Study of fossil invertebrates with emphasis on morphology of hard parts, geochronological and geographical distribution, and taxonomy. Comparison of fossil taxa with living representatives and interpretation of paleobiological patterns. Two class hours and one two-hour lab a week.
Credit 3 units. A&S IQ: NSM Art: NSM

EEPS 4284 Hydrology
Survey of principles that govern the flow of water in river and groundwater systems in deep geologic environments. Basic equations of fluid flow, dynamics, and the characteristics of drainage basins, rivers, floods, and important aquifers. Exploitation of ground water systems.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

EEPS 4304 Environmental Mineralogy
Topics connected with environmental mineralogy, some selected by students. Topics may include: mineral dust such as asbestos, containment materials for nuclear waste disposal, environmental ramifications of the processing and use of phosphate fertilizers, lead in the environment, acid mine drainage, microbial mediation of sulfide oxidation, minerals in the human body, weathering of building materials, materials engineering, and engineering of materials for more effective recycling. Three class hours and one two-hour laboratory a week. Participation in discussions, term paper, two field trips required. Most readings from primary sources.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

EEPS 4374 Igneous & Metamorphic Petrology
Classification, origin, mineralogy, and geological occurrence of major igneous and metamorphic rocks. Laboratory emphasis on identification of rocks and minerals in hand specimens and in thin sections. Three class hours and one two-hour laboratory a week.
Credit 4 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

EEPS 4414 Introduction to Geochemistry
Application of the principles of nuclear and physical chemistry to problems of the composition and differentiation of the Earth. Introduction to nucleosynthesis of the elements, stellar evolution, the periodic properties of the elements, chemical bonding and ionic substitution, geochronology and stable isotope geochemistry, and the age and composition of the Earth, Moon and meteorites.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

EEPS 4424 Aqueous Geochemistry
Introduction to the geochemistry of natural waters and the processes that alter their composition. Key principles of aqueous geochemistry are introduced and then used to describe the main controls of the chemistry of pristine and polluted soil, surface, and ground water environments. Topics covered include mineral solubility, complexation, acids and bases, carbonate chemistry, rock weathering and clay formation, adsorption and ion exchange, redox reactions, microbial energetics and redox zonations, the geochemistry of iron, sulfur, trace elements, and radionuclides, and geochemical kinetics. Geochemical modeling will be introduced.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

EEPS 4444 Environmental Geochemistry
Introduction to the geochemistry of natural waters and the processes that alter their composition. Key principles of aqueous geochemistry and their application to describe the main controls on the chemistry of pristine and polluted soil, surface, and ground water environments. Acids and bases, mineral solubility, carbonate chemistry, chemical speciation, redox reactions, adsorption and ion exchange, and the speciation, mobility, and toxicity of metals. Prerequisites: EEPS 202 and Chem 106 or Chem 112.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

EEPS 4454 Organic Geochemistry
Introduction to the composition and analysis of organic material in the environment and geological record. Molecular to global-level perspective of organic matter cycling, reactivity, and fluxes; formation and classification of organic matter, its preservation potential, diagenesis, catagenesis, and kerogen formation; coal, petroleum, and gas formation and accumulation; biomarkers in Earth history; genetics and phylogeny of biomarker compounds; overview of analytical techniques including both structural and isotopic aspects; oceanographic and paleoenvironmental applications of organic biomarkers; contaminants and residue analysis. Prerequisites: EEPS 202 and Chem 106 or Chem 112.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

EEPS 4464 Stable Isotope Geochemistry
Applications of equilibrium and kinetic isotope fractionation and material balance principles to the distribution of oxygen and hydrogen isotopes in natural systems. Geothermometry and paleotemperatures, mass spectrometry, isotope hydrology and ice cores, fluid-rock interaction, igneous rocks and meteorites. Prerequisites: EEPS 441 and MATH 233.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

EEPS 4524 Introduction to Seismology
Introduction to earthquake and exploration seismology. Seismic wave propagation, data analysis and processing, earthquake mechanisms, seismic constraints on the structure of the Earth, relationship of seismicity to plate tectonics.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

EEPS 4534 Interior of the Earth
Composition and temperature of Earth's mantle and core, determined by geophysical methods. Inferences about mantle and core dynamics, especially interactions. Current understanding and history of interior in fields of seismology, geomagnetism, mineral physics, geodynamics.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

EEPS 4544 Exploration and Environmental Geophysics
Basic geophysical techniques used in exploration and environmental geophysics, emphasizing seismic and electromagnetic methods. Basic theory, field procedures, and interpretation of data. Use of geophysical instruments on field trips, followed by reduction and analysis of acquired data. Two class hours and one two-hour laboratory a week, and approximately four one-day field trips during the semester. Prerequisites: EEPS 353 and Phys 191 and Math 132.
Credit 4 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

EEPS 4594 Geodynamics
Fundamental physical processes necessary to understand plate tectonics and a variety of geological phenomena. Heat flow, gravity, elasticity and flexure, rheology of Earth materials.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

EEPS 4604 Introduction to Structural Geology
The landforms that surround us are being modified constantly by tectonic forces. Structural geology provides a framekwork for investigating, describing, and quantifying these changes. This course provides an introduction to the structures that form at all scales, from millimeter-sized fractures to plate-boundary-scale rifts. Topics include descriptive analysis of microscopic and macroscopic structures, field methods, the physical basis for rock deformation, and global tectonics. Three hours of lecture and one two-hour laboratory a week. Prerequisites: EEPS 340 and EEPS 353.
Credit 4 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

EEPS 4674 Planetary Mission Design
This course will introduce EEPS, physics, and engineering students to the combined scientific and engineering aspects required for the development of a robotic spacecraft exploration mission to a body in the Solar System. Through Instructor delivered lectures, individual presentations, and a group presentation and a report, students will design a robotic spacecraft exploration mission that satisfies specific target, cost and schedule constraints.
Credit 3 units. A&S IQ: NSM

EEPS 4684 Geospatial Field Methods
This course is an introduction to field geospatial surveying using high-precision GNSS systems and UVAs (drones) outfitted with a variety of sensors such as cameras, multispectral sensors, and lidar. Coursework will cover basic principles as well as provide hands on experience. Most of the course is project based, and students will complete a series of

exercises designed to familiarize them with the effective use of field equipment. Students will design data collection strategies, collect data, and become familiar with data processing pipelines and visualization techniques. After completing the course, students will be prepared to safely and effectively conduct independent GNSS and drone surveys, and use the data for studies in Earth, environmental, and planetary science, archaeology, environmental science, ecology, landscape architecture, urban design, agriculture and a variety of other field-based disciplines.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

EEPS 4734 Planetary Geology
Discussion of the evolution of the terrestrial planets and the outer-planet satellites as evidenced by the geologic records left on the surfaces of these bodies. Focus on major processes affecting planetary surfaces:impact cratering, volcanism, tectonism, and erosion and sedimentation by wind and water. Prerequisite: EEPS 353
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

EEPS 4744 Planetary Geochemistry
A survey of the geochemistry of the planets and their satellites using data from Earth-based, Earth-orbital, and spacecraft observations.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

EEPS 4864 Paleoclimatology
The history of Earth's changing climates and environments on timescales from decades to millions of years. Key concepts in paleoclimatology include: external factors affecting the climate system (e.g., orbital cycles, volcanic eruptions, greenhouse gases); internal feedbacks, such as with monsoons and the El Nino- Southern Oscillation; abrupt versus gradual change; interactions with the biosphere (including hominins/humans); and comparison to present-day climate change. Current controversies in paleoclimate.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

EEPS 4900 Independent Study
Independent study for advanced undergraduates or for graduate students, to be supervised by a faculty member. Prerequisite: permission of instructor. Credit to be arranged. Prerequisite: permission of instructor.
Credit 12 units.
Typical periods offered: Fall, Spring

EEPS 4920 Field Camp
Practical methods of data collection and interpretation in Earth, Environmental, and Planetary Sciences. Content may include field-based geologic mapping or laboratory-based studies emphasizing particular analytical tools.
Credit 6 units. A&S IQ: NSM
Typical periods offered: Fall, Spring

EEPS 4940 Study Abroad
Studies related to Earth, Environmental, and Planetary Sciences conducted with external institutions. Prerequisite: permission of Department Study Abroad Coordinator.
Credit 6 units.
Typical periods offered: Fall, Spring, Summer

EEPS 4960 Field Geology
Hands-on application of geological field methods, providing an opportunity for students to synthesize classroom knowledge in a field setting. Students will develop the ability to recognize and analyze Earth processes, and deconstruct complex regional geology. Participation in an extended international field trip during spring break is required. Students must be prepared for an intensive, group-oriented experience. Prerequisite: must be an Earth, Environmental, and Planetary Sciences major and have permission of instructors. Enrollment is limited, and students will be selected through a written application. May be repeated for credit, with instructor permission.
Credit 3 units.
Typical periods offered: Spring

EEPS 4990 Honors Research
Independent work for undergraduate Honors, to be supervised by a faculty member. Prerequisites: Senior standing, eligibility for Honors, and permission of instructor.
Credit 3 units.
Typical periods offered: Fall, Spring

Earth Science Major

Program Requirements

- **Total Units Required:** 53-60
- **Grade Requirement:** A grade of C– is the minimum acceptable performance for each unit of credit for each required course, including those in Mathematics, Chemistry, and Physics.

The Department of Earth, Environmental, and Planetary Sciences (EEPS) offers majors in Earth Science, Environmental Science, and Planetary Science. The curriculum is broad, and the requirements are flexible enough to accommodate diverse needs and interests. Many courses present hands-on, problem-oriented experiences, including ample opportunity for fieldwork, laboratory work, and the use of state-of-the-art computational facilities and research instrumentation. All majors are required to complete certain core courses as well as electives and a capstone experience that must be presented at the Spring EEPS Undergraduate Symposium.

Requirements for All Majors

Required Core Courses

Students pursuing any Earth, Environmental, and Planetary Sciences major must complete the following courses:

Code	Title	Units
EEPS 2020	Introduction to Earth, Environmental, and Planetary Science	3
MATH 1510	Calculus I	3
MATH 1520	Caculus II	3

Students choose one of the following courses:

Code	Title	Units
MATH 2130	Calculus III	3
SDS 2020	Elementary Probability and Statistics	3
SDS 3020	Elementary to Intermediate Statistics and Data Analysis	3

Students choose one of the following courses:

Code	Title	Units
PHYSICS 1740	Physics I	3
PHYSICS 1760	Focused Physics I	4

Students choose one of the following courses:

Code	Title	Units
CHEM 1601	Principles of General Chemistry I	3
CHEM 1701	General Chemistry I	3

Additional Electives

In addition to the disciplinary electives below, which are specific to each major, students must choose three EEPS elective courses at the 3000, 4000, or 5000 level, excluding the following courses: EEPS 3900 Independent Study, EEPS 4900 Independent Study, EEPS 4930 Internship, and EEPS 4990 Honors Research.

Skills Course

Students must complete one of the following:

Code	Title	Units
EEPS 3870	Geospatial Science	4
EEPS 3883	GIS for Earth, Environmental, and Planetary Science	3
EEPS 4000	Special Topics	3
EEPS 4920	Field Camp	6
EEPS 4960	Field Geology	3
ENST 3600	Field Methods for Environmental Science	3
ENST 3710	Applications in GIS	3

Capstone Experience

Students completing any major in the Department of Earth, Environmental, and Planetary Sciences must also build a portfolio of their work from projects completed in courses such as EEPS 4960 Field Geology, ENST 4820 International Climate Negotiation Seminar, internship experiences, or research. All capstones must be presented at the Spring EEPS Undergraduate Symposium.

Disciplinary Required Courses

Students must complete all of the requirements listed above for all majors as well as the following:

Code	Title	Units
EEPS 3530	Earth Forces	4

Students must also complete one of the following:

Code	Title	Units
EEPS 3400	Minerals, Rocks, and the Envrionment*	4
EEPS 3410	Introduction to Geochemistry	3

* Earth Science Majors enrolled between Fall 2025 and Fall 2028 may fulfill their disciplinary requirement with EEPS 3400 Minerals, Rocks, and the Environment OR with EEPS 3410 Introduction to Geochemistry while students enrolled in the programs in Fall 2028 and beyond must satisfy their disciplinary requirement with EEPS 3410 Introduction to Geochemistry

Disciplinary Elective Courses

Students select five of the following courses:

Code	Title	Units
EEPS 3170	Soil Science	3
EEPS 3230	Biogeochemistry	3
EEPS 3853	Earth History	3
EEPS 3863	The Earth's Climate System	3
EEPS 4094	Surface Processes	3
EEPS 4224	Sedimentary Geology	4
EEPS 4284	Hydrology	3
EEPS 4374	Petrology	4
EEPS 4524	Introduction to Seismology	3
EEPS 4534	Interior of the Earth	3
EEPS 4534	Geodynamics	3
EEPS 4604	Introduction to Structural Geology	4
EEPS 4864	Paleoclimatology	3

Additional Information

- A grade of C– (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. A grade of C– is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- If a student has more than one major and/or minor, only introductory (1000- and 2000-level) courses may be counted, when relevant, toward the requirements of both majors. All advanced (3000- and 4000-level) courses must be unique to each major; in other words, no advanced course may "double-count" for the coursework needed to fulfill the minimal requirements for either major. Should both major programs require the same course, a departmentally-sanctioned elective must be chosen to replace the course in one of the programs.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.
- Students may transfer up to nine credits (or three courses, whichever is greater) of advanced coursework (course numbers 3000 or above) toward the completion of a major in the Department of Earth, Environmental, and Planetary Sciences.

Students may transfer up to three credits (or one course, whichever is greater) of advanced coursework (course numbers 3000 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or studying at another U.S. institution. Credits earned through the completion of an approved field camp do not count toward this limit.

- Students may not place out of the chemistry, physics, or math requirements for the EEPS major. These courses must be taken at Washington University or at another accredited institution.
- In the Department of Earth, Environmental, and Planetary Sciences, both Latin Honors and Departmental Distinctions require the completion of a senior thesis.
  - In the spring of their junior year, the student should select a faculty member to guide the generation of this thesis. The student should then enroll in EEPS 4990 Honors Research (GPA > 3.65) or EEPS 4900 Independent Study (GPA < 3.65) with that faculty member for the fall of their senior year. At that time, the student and faculty advisor should meet and choose the two additional readers for the student's thesis (the thesis committee) and establish a set of goals for the fall semester's work. At this time, the student should fill out the Senior Honors Topic Form.
  - The student may also (but is not required to) enroll in EEPS 4990 Honors Research or EEPS 4900 Independent Study in the spring semester of their senior year. The faculty advisor will determine, with the student, a date by which a complete draft is to be given to the faculty readers for review, such that the readers have ample time to review the work prior to issuing their evaluations. These drafts will be due no later than the Tuesday following spring break. A final copy containing revisions required by the committee is due by the first day of finals period.
  - An oral presentation of the senior honors research is expected to be presented to the department, usually late in the senior's last semester. The thesis document must be prepared following the department's formatting guidelines, which are available from the Director of Undergraduate Studies. All theses must be submitted in PDF format to Erin Marshall prior to graduation for online archiving.

Undergraduate Department Awards

- **The Ernest L. Ohle, Jr., Prize** is presented to the senior judged to have the greatest promise for a successful career in Earth, environmental, or planetary sciences and who has demonstrated superior academic achievement. The prize is funded by an endowed donation from Dr. Ernest L. Ohle, Jr., an alumnus who had a distinguished career as a mining geologist.
- **The Courtney Werner Memorial Prize** is awarded to a senior student who has majored in Earth, environmental, and planetary sciences and who has demonstrated outstanding academic achievement. Courtney Werner was an associate professor in the Department of Geology and Geological Engineering at Washington University. He joined the Department in 1923, having worked as a geologist for Gulf Oil Company. The prize is funded by endowed donations from his friends and former students.
- **The Harold Levin Award** is for undergraduate students who have done outstanding jobs as assistants to the instructor. Professor Levin was a paleontologist who specialized in study of microscopic fossils as indicators of environmental conditions during deposition of sedimentary rocks. He was an outstanding teacher at all levels, ensuring that students remained engaged in his courses through dynamic lectures and discussions.
- **The Margaret E. Bewig Memorial Field Camp Award** is presented to an EEPS major selected by the faculty from those attending summer field camp, based on a combination of academic merit and financial need. The award may be used to defray part of the cost of summer field camp. Margaret Bewig was the department secretary and later the administrative assistant from 1963 to 1986. She died on May 26, 1991. The award is funded by endowed donations from her friends, faculty, and former students.

PHYSICS 1760	Focused Physics I	4

Students choose one of the following courses:

Code	Title	Units
CHEM 1601	Principles of General Chemistry I	3
CHEM 1701	General Chemistry I	3

Additional Electives

In addition to the disciplinary electives below, which are specific to each major, students must choose three EEPS elective courses at the 3000, 4000, or 5000 level, excluding the following courses: EEPS 3900 Independent Study, EEPS 4900 Independent Study, EEPS 4930 Internship, and EEPS 4990 Honors Research.

Skills Course

Students must complete one of the following:

Code	Title	Units
EEPS 3870	Geospatial Science	4
EEPS 3883	GIS for Earth, Environmental, and Planetary Science	3
EEPS 4000	Special Topics	3
EEPS 4920	Field Camp	6
EEPS 4960	Field Geology	3
ENST 3600	Field Methods for Environmental Science	3
ENST 3710	Applications in GIS	3

Capstone Experience

Students completing any major in the Department of Earth, Environmental, and Planetary Sciences must also build a portfolio of their work from projects completed in courses such as EEPS 4960 Field Geology, ENST 4820 International Climate Negotiation Seminar, internship experiences, or research. All capstones must be presented at the Spring EEPS Undergraduate Symposium.

Disciplinary Required Courses

Students must complete:

Code	Title	Units
EEPS 3420	Environmental Systems	3

Students also select one of the following courses:

Code	Title	Units
EEPS 3400	Minerals, Rocks, and the Environment*	4
EEPS 3410	Introduction to Geochemistry	3
EEPS 3530	Earth Forces	4

* Environmental Science Majors enrolled between Fall 2025 and Fall 2028 may fulfill their disciplinary requirement with EEPS 3400 Minerals, Rocks, and the Environment **or** with EEPS 3410 Introduction to Geochemistry, while students enrolled in the programs in Fall 2028 and beyond must satisfy their disciplinary requirement with EEPS 3410 Introduction to Geochemistry.

Disciplinary Elective Courses

Students select five of the following courses:

Code	Title	Units
BIOL 3810	Introduction to Ecology	3
ECON 3350	Environmental Policy*	3
EECE 2010	Introduction to Energy, Environmental, and Chemical Engineering	3
EEPS 3080	Topics in Environmental Sustainability	3
EEPS 3150	Environmental Impacts of Human Energy Use	3
EEPS 3175	Soil Science	3
EEPS 3230	Biogeochemistry	3
EEPS 3865	The Earth's Climate System	3
EEPS 4074	Remote Sensing	3
EEPS 4094	Surface Processes	3
EEPS 4284	Hydrology	3
EEPS 4424	Aqueous Geochemistry	3
EEPS 4544	Exploration of Environmental Geochemistry	4
EEPS 4864	Paleoclimatology	3
POLSCI 2000	Introduction to Environmental Policy*	3

* Students may take either ECON 3350 Environmental Policy -or- POLSCI 2000 Introduction to Environmental Policy for credit towards EEPS disciplinary electives requirements.

Additional Information

- A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- If a student has more than one major and/or minor, only introductory (1000- and 2000-level) courses may be counted, when relevant, toward the requirements of both majors. All advanced (3000- and 4000-level) courses must be unique to each major; in other words, no advanced course may "double-count" for the course work needed to fulfill the minimal requirements for either major. Should both major programs require the same course, a departmentally-sanctioned elective must be chosen to replace the course in one of the programs.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.
- Students may transfer up to nine credits (or three courses, whichever is greater) of advanced coursework (course numbers 3000 or above) toward the completion of a major in the Department of Earth, Environmental, and Planetary Sciences. Students may transfer up to three credits (or one course, whichever is greater) of advanced coursework (course numbers 3000 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or studying at another US institution. Credits earned through the completion of an approved field camp do not count toward this limit.
- Students may not place out of the chemistry, physics, or math requirements for the EEPS major. These courses must be taken at Washington University or at another accredited institution.
- In the Department of Earth, Environmental, and Planetary Sciences, both Latin Honors and Departmental Distinctions require the completion of a senior thesis.
  - In the spring of their junior year, the student should select a faculty member to guide the generation of this thesis. The student should then enroll in EEPS 4990 Honors Research (GPA > 3.65) or EEPS 4900 Independent Study (GPA < 3.65) with that faculty member for the fall of their senior year. At that time, the student and faculty advisor should meet and choose the two additional readers for the student's thesis (the thesis committee) and establish a set of goals for the fall semester's work. At this time, the student should fill out the Senior Honors Topic Form.
  - The student may also (but is not required to) enroll in EEPS 4990 Honors Research or EEPS 4900 Independent Study in the spring semester of their senior year. The faculty adviser will determine, with the student, a date by which a complete draft is to be given to the faculty readers for review, such that the readers have ample time to review the work prior to issuing their evaluations. These drafts will be due no later than the Tuesday following Spring Break. A final copy containing revisions required by the committee is due by the first day of finals period.
  - An oral presentation of the senior honors research is expected to be presented to the department, usually late in the senior's last semester. The thesis document must be prepared following the department's formatting guidelines, which are available from the Director of Undergraduate Studies. All theses must be submitted in PDF format to Erin Marshall prior to graduation for online archiving.

Undergraduate Department Awards

- **The Ernest L. Ohle, Jr., Prize** is presented to the senior judged to have the greatest promise for a successful career in Earth, environmental, or planetary sciences and who has demonstrated superior academic achievement. The prize is funded by an endowed donation from Dr. Ernest L. Ohle, Jr., an alumnus who had a distinguished career as a mining geologist.
- **The Courtney Werner Memorial Prize** is awarded to a senior student who has majored in Earth, environmental, and planetary sciences and who has demonstrated outstanding academic achievement. Courtney Werner was an associate professor in the Department of Geology and Geological Engineering at Washington University. He joined the Department in 1923, having worked as a geologist for Gulf Oil Company. The prize is funded by endowed donations from his friends and former students.
- **The Harold Levin Award** is for undergraduate students who have done outstanding jobs as assistants to the instructor. Professor Levin was a paleontologist who specialized in study of microscopic fossils as indicators of environmental conditions during deposition of sedimentary rocks. He was an outstanding teacher at all levels, ensuring that students remained engaged in his courses through dynamic lectures and discussions.
- **The Margaret E. Bewig Memorial Field Camp Award** is presented to an EEPS major selected by the faculty from those attending summer field camp, based on a combination of academic merit and financial need. The award may be used to defray part of the cost of summer field camp. Margaret Bewig was the department secretary and later the administrative assistant from 1963 to 1986. She died on May 26, 1991. The award is funded by endowed donations from her friends, faculty, and former students.

Planetary Science Major

Program Requirements

- **Total Units Required:** 52-57
- **Grade Requirement:** The minimum grade required for coursework to count toward the major is a C- or better.

The Department of Earth, Environmental, and Planetary Sciences (EEPS) offers majors in Earth Science, Environmental Science, and Planetary Science. The curriculum is broad, and the requirements are flexible enough to accommodate diverse needs and interests. Many courses present hands-on, problem-oriented experiences, including ample opportunity for fieldwork, laboratory work, and the use of state-of-the-art computational facilities and research instrumentation. All majors are required to complete certain core courses as well as electives and a capstone experience that must be presented at the Spring EEPS Undergraduate Symposium.

Requirements for All Majors

Required Core Courses

Students pursuing any Earth, Environmental, and Planetary Sciences major must complete the following courses:

Code	Title	Units
EEPS 2020	Introduction to Earth, Environmental, and Planetary Science	3
MATH 1510	Calculus I	3
MATH 1520	Caculus II	3

Students choose one of the following courses:

Code	Title	Units
MATH 2130	Calculus III	3
SDS 2020	Elementary Probability and Statistics	3
SDS 3020	Elementary to Intermediate Statistics and Data Analysis	3

Students choose one of the following courses:

Code	Title	Units
PHYSICS 1740	Physics I	3
PHYSICS 1760	Focused Physics I	4

Students choose one of the following courses:

Code	Title	Units
CHEM 1601	Principles of General Chemistry I	3
CHEM 1701	General Chemistry I	3

Additional Electives

In addition to the disciplinary electives below, which are specific to each major, students must choose three EEPS elective courses at the 3000, 4000, or 5000 level, excluding the following courses: EEPS 3900 Independent Study, EEPS 4900 Independent Study, EEPS 4930 Internship, and EEPS 4990 Honors Research.

Skills Course

Students must complete one of the following:

Code	Title	Units
EEPS 3870	Geospatial Science	4
EEPS 3883	GIS for Earth, Environmental, and Planetary Science	3
EEPS 4000	Special Topics	3
EEPS 4920	Field Camp	6
EEPS 4960	Field Geology	3
ENST 3600	Field Methods for Environmental Science	3
ENST 3710	Applications in GIS	3

Capstone Experience

Students completing any major in the Department of Earth, Environmental, and Planetary Sciences must also build a portfolio of their work from projects completed in courses such as EEPS 4960 Field Geology, ENST 4820 International Climate Negotiation Seminar, internship experiences, or research. All capstones must be presented at the Spring EEPS Undergraduate Symposium.

Students must complete all of the requirements listed above for all majors as well as the following:

Disciplinary Required Courses

Students must complete the following course:

Code	Title	Units
EEPS 3730	Fundamentals of Planetary Science	3

Students also select one of the following courses:

Code	Title	Units
EEPS 3400	Minerals, Rocks, and the Environment*	4
EEPS 3410	Introduction to Geochemistry	3
EEPS 3530	Earth Forces	3

* Planetary Science Majors enrolled between Fall 2025 and Fall 2028 may fulfill their disciplinary requirement with EEPS 3400 Minerals, Rocks, and the Environment **or** with EEPS 3410 Introduction to Geochemistry, whereas students enrolled in the programs in Fall 2028 and beyond must satisfy their disciplinary requirement with EEPS 3410 Introduction to Geochemistry.

Disciplinary Electives

Students select five of the following courses:

Code	Title	Units
EEPS 4074	Remote Sensing	3
EEPS 4374	Petrology	4
EEPS 4594	Geodynamics	3
EEPS 4604	Introduction to Structural Geology	4
EEPS 4674	Planetary Mission Design	3
EEPS 4734	Planetary Geology	3
EEPS 4744	Planetary Geochemistry	3

EEPS 5670	Planetary Materials	3
EEPS 5680	Scientific Explortation of the Moon	3
EEPS 5700	Planetary Geophysics & Dynamics	3
EEPS 5760	Advanced Planetary Geology: Ice Worlds	3

Additional Information

- A grade of C– (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. A grade of C– is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- If a student has more than one major and/or minor, only introductory (1000- and 2000-level) courses may be counted, when relevant, toward the requirements of both majors. All advanced (3000- and 4000-level) courses must be unique to each major; in other words, no advanced course may "double-count" for the course work needed to fulfill the minimal requirements for either major. Should both major programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.
- Students may transfer up to 9 credits (or three courses, whichever is greater) of advanced coursework (course numbers 3000 or above) toward the completion of a major in the Department of Earth, Environmental, and Planetary Sciences. Students may transfer up to 3 credits (or one course, whichever is greater) of advanced coursework (course numbers 3000 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or studying at another U.S. institution. Credits earned through the completion of an approved field camp do not count toward this limit.
- Students may not place out of the chemistry, physics, or math requirements for the EEPS major. These courses must be taken at Washington University or at another accredited institution.
- In the Department of Earth, Environmental, and Planetary Sciences, both Latin Honors and Departmental Distinctions require the completion of a senior thesis.
  - In the spring of their junior year, the student should select a faculty member to guide the generation of this thesis. The student should then enroll in EEPS 4990 Honors Research (GPA > 3.65) or EEPS 4900 Independent Study (GPA < 3.65) with that faculty member for the fall of their senior year. At that time, the student and faculty advisor should meet and choose the two additional readers for the student's thesis (the thesis committee) and establish a set of goals for the fall semester's work. At this time, the student should fill out the Senior Honors Topic Form.
  - The student may also (but is not required to) enroll in EEPS 4990 Honors Research or EEPS 4900 Independent Study in the spring semester of their senior year. The faculty advisor will determine, with the student, a date by which a complete draft is to be given to the faculty readers for review, such that the readers have ample time to review the work prior to issuing their evaluations. These drafts will be due no later than the Tuesday following Spring Break. A final copy containing revisions required by the committee is due by the first day of finals period.
  - An oral presentation of the senior honors research is expected to be presented to the department, usually late in the senior's last semester. The thesis document must be prepared following the department's formatting guidelines, which are available from the Director of Undergraduate Studies. All theses must be submitted in PDF format to Erin Marshall prior to graduation for online archiving.

Undergraduate Department Awards

- **The Ernest L. Ohle, Jr., Prize** is presented to the senior judged to have the greatest promise for a successful career in Earth, environmental, or planetary sciences and who has demonstrated superior academic achievement. The prize is funded by an endowed donation from Dr. Ernest L. Ohle, Jr., an alumnus who had a distinguished career as a mining geologist.
- **The Courtney Werner Memorial Prize** is awarded to a senior student who has majored in Earth, environmental, and planetary sciences and who has demonstrated outstanding academic achievement. Courtney Werner was an associate professor in the Department of Geology and Geological Engineering at Washington University. He joined the Department in 1923, having worked as a geologist for Gulf Oil Company. The prize is funded by endowed donations from his friends and former students.
- **The Harold Levin Award** is for undergraduate students who have done outstanding jobs as assistants to the instructor. Earth Science Minor

Program Requirements

- **Total Units Required:** 16-19 credits

Required Courses

Students must complete:

Code	Title	Units
EEPS 2020	Introduction to Earth, Environmental, and Planetary Science	3
EEPS 3530	Earth Forces	4

Students also complete one of the following courses:

Code	Title	Units
EEPS 3410	Introduction to Geochemistry	3
EEPS 3400	Minerals, Rocks, and the Environment*	4

* Earth Science Minors enrolled between Fall 2025 and Fall 2028 may fulfill their disciplinary requirement with EEPS 3400 Minerals, Rocks, and the Environment OR with EEPS 3410 Introduction to Geochemistry while students enrolled in the programs in Fall 2028 and beyond must satisfy their disciplinary requirement with EEPS 3410 Introduction to Geochemistry

Disciplinary Electives

Students select two of the following courses:

Code	Title	Units
EEPS 3170	Soil Science	3
EEPS 3230	Biogeochemistry	3
EEPS 3853	Earth History	3
EEPS 3863	The Earth's Climate System	3
EEPS 4094	Surface Processes	3
EEPS 4224	Sedimentary Geology	4
EEPS 4284	Hydrology	3
EEPS 4374	Petrology	4
EEPS 4524	Introduction to Seismology	3
EEPS 4534	Interior of the Earth	3
EEPS 4534	Geodynamics	3
EEPS 4604	Introduction to Structural Geology	4
EEPS 4864	Paleoclimatology	3

Additional Information

- A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- Credits to be transferred from another institution must have prior approval from the director of undergraduate studies in the relevant Arts & Sciences department.
- Students may transfer up to 3 credits (or one course, whichever is greater) of advanced coursework (course numbers 3000 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or studying at another U.S. institution. Credits earned through the completion of an approved field camp do not count toward this limit.

Website: https://eeps.wustl.edu/

Environmental Science Minor

Program Requirements

- **Total Units Required:** 15-17

Disciplinary Required Courses

Students must complete the following:

Code	Title	Units
EEPS 2020	Introduction to Earth, Environmental, and Planetary Science	3
EEPS 3420	Environmental Systems	3

Students select one of the following courses:

Code	Title	Units
EEPS 3410	Introduction to Geochemistry	3
EEPS 3530	Earth Forces	3
EEPS 3400	Minerals, Rocks, and the Environment*	4

* Environmental Science Minors enrolled between Fall 2025 and Fall 2028 may fulfill their disciplinary requirement with EEPS 3400 Minerals, Rocks, and the Environment OR with EEPS 3410 Introduction to Geochemistry while students enrolled in the programs in Fall 2028 and beyond must satisfy their disciplinary requirement with EEPS 3410 Introduction to Geochemistry.

Disciplinary Elective Courses

Students select two of the following courses:

Code	Title	Units
BIOL 3810	Introduction to Ecology	3
ECON 3350	Environmental Policy*	3
EECE 2010	Introduction to Energy, Environmental, and Chemical Engineering	3
EEPS 3080	Topics in Environmental Sustainability	3
EEPS 3150	Environmental Impacts of Human Energy Use	3

EEPS 3175	Soil Science	3
EEPS 3230	Biogeochemistry	3
EEPS 3865	The Earth's Climate System	3
EEPS 4074	Remote Sensing	3
EEPS 4094	Surface Processes	3
EEPS 4284	Hydrology	3
EEPS 4424	Aqueous Geochemistry	3
EEPS 4544	Exploration of Environmental Geochemistry	4
EEPS 4864	Paleoclimatology	3
POLSCI 2000	Introduction to Environmental Policy*	3

* Students may take either ECON 3350 Environmental Policy **or** POLSCI 2000 Introduction to Environmental Policy for credit toward EEPS disciplinary electives requirements.

Additional Information

- A grade of C– (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. A grade of C– is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.
- Students may transfer up to three credits (or one course, whichever is greater) of advanced coursework (course numbers 3000 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or studying at another U.S. institution. Credits earned through the completion of an approved field camp do not count toward this limit.

Website: https://eeps.wustl.edu/

Geospatial Science Minor

Program Requirements

- **Total Units Required:** 16
- **Grade Requirement:** The minimum grade required for coursework to count toward the minor is a C– or better.

Required Courses

Students must complete the following:

Code	Title	Units
EEPS 3873	Geospatial Science	4

Students must complete one of the following courses:

Code	Title	Units
ANTHRO 3275	Introduction to GIS for Anthropologists	3
EEPS 3883	GIS for Earth, Environmental, and Planetary Sciences	3
ENST 3710	Introduction to GIS	3

Disciplinary Electives

Students select three of the following courses:

Code	Title	Units
ANTHRO 4803	Advanced GIS Modeling and Landscape Analysis	3
CSE 2107	Introduction to Data Science*	3
CSE 3104	Data Manipulation and Management*	3
CSE 4107	Introduction to Machine Learning*	3
ENST 4710	Advanced GIS	3
ENST 4720	Applications in Geospatial Intelligence	3
ENST 4730	Introduction to Spatial Epidemiology	3
EEPS 4074	Remote Sensing	3
EEPS 4684	Geospatial Field Methods	3
ESE 4170	Introduction to Machine Learning and Pattern Classification*	3

* Previous or concurrent enrollment in CSE 1301 Introduction to Computer Science is recommended.

Additional Information

- A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.
- Students may transfer up to three credits (or one course, whichever is greater) of advanced coursework (course numbers 3000 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or studying at another U.S. institution. Credits earned through the completion of an approved field camp do not count toward this limit.

Website: https://eeps.wustl.edu/

Planetary Science Minor

Program Requirements

- **Total Units Required:** 15-17
- **Grade Requirement:** The minimum grade required for coursework to count toward the minor is a C– or better.

Required Courses

Students must complete the following two courses:

Code	Title	Units
EEPS 2020	Introduction to Earth, Environmental, and Planetary Sciences	3
EEPS 3730	Fundamentals of Planetary Science	3

Students select one of the following courses:

Code	Title	Units
EEPS 3400	Minerals, Rocks, and the Environment*	3
EEPS 3410	Introduction to Geochemistry	3
EEPS 3530	Earth Forces	3

* Planetary Science Minors enrolled between Fall 2025 and Fall 2028 may fulfill their disciplinary requirement with EEPS 3400 Minerals, Rocks, and the Environment **or** with EEPS 3410 Introduction to Geochemistry, while students enrolled in the programs in Fall 2028 and beyond must satisfy their disciplinary requirement with EEPS 3410 Introduction to Geochemistry.

Disciplinary Electives

Students select two of the following courses:

Code	Title	Units
EEPS 4074	Remote Sensing	3
EEPS 4374	Petrology	4
EEPS 4594	Geodynamics	3
EEPS 4604	Introduction to Structural Geology	4
EEPS 4674	Planetary Mission Design	3
EEPS 4734	Planetary Geology	3
EEPS 4744	Planetary Geochemistry	3
EEPS 5670	Planetary Materials	3
EEPS 5680	Scientific Exploration of the Moon	3
EEPS 5700	Planetary Geophysics & Dynamics	3
EEPS 5760	Advanced Planetary Geology: Ice Worlds	3

Additional Information

- A grade of C– (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry, and physics. A grade of C– is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.
- Credits to be transferred from another institution must have prior approval from the Director of Undergraduate Studies in the relevant Arts & Sciences department.
- Students may transfer up to 3 credits (or one course, whichever is greater) of advanced course work (course numbers of 3000 or above) toward the completion of a minor in the Department of Earth, Environmental, and Planetary Sciences. This policy includes credit earned for courses taken while studying abroad or at another U.S. institution. Credits earned through the completion of an approved field camp do not count toward this limit.
- Students may not place out of the chemistry, physics, or math requirements for the Earth, Environmental, and Planetary Sciences major. These courses must be taken at Washington University or at another accredited institution.

East Asian Languages and Cultures

The Department of East Asian Languages and Cultures (EALC) offers majors and a minor that allow for cross-cultural and interdisciplinary approaches to the study of East Asia. Students can choose either to focus on one of our three linguistic and cultural traditions — Chinese, Japanese, and Korean — or to explore different traditions and societies by taking courses about multiple regions. EALC offers a wide-ranging and diverse curriculum by means of which students may acquire knowledge and understanding of the literary, historical, and cultural expressions of East Asia from ancient times up to the present. Our language programs also foster the ability to negotiate meaning in a culturally and contextually appropriate manner through the development of high levels of proficiency in speaking, listening, reading, and writing. The emphasis in the EALC programs (with specializations in Chinese, Japanese, or Korean) is on achieving high competency in the relevant language and learning how to read texts from the target culture — literary, philosophical, cultural, historical, or even visual — with an informed appreciation of the contexts in which they were produced. The goal of all of these studies — language, textual, and interdisciplinary — is to acquire the cultural sensitivities needed to become sophisticated scholars and educated global citizens as well as to provide a deeper appreciation of our common cultural experience and the intrinsic value of humanistic study.

Language Placement: Placement tests are required for all students entering EALC language programs, with the exception of those students who have had no previous exposure to the language and wish to enroll in the first semester of the first level of instruction. Students who test

into second-level, third-level, or fourth-level Chinese/Japanese/Korean and satisfactorily complete (with a grade of B– or better) at least one semester of language study may be eligible for back credit. Refer to the Back Credit Policy webpage for details. Please note that students with native language proficiency, as determined by the language section, and students who enroll in courses below their placement level are ineligible for back credit units. Students who misrepresent their language proficiency to gain entrance into a course at the elementary or intermediate level will be dropped from that course.

Faculty

Chair

Lingchei Letty Chen
Professor of Modern Chinese Language and Literature
PhD, Columbia University

Director of Graduate Studies

Ji-Eun Lee
Associate Professor of Korean Language and Literature
PhD, Harvard University

Director of Undergraduate Studies

Mijeong Mimi Kim
Teaching Professor of Korean Language
EdD, University of San Francisco

Department Faculty

Jianqing Chen
Assistant Professor of East Asian Languages and Cultures and of Film and Media Studies
PhD, University of California, Berkeley

Jiayi Chen
Assistant Professor of East Asian Languages and Cultures
PhD, University of Chicago

Wenhui Chen
Senior Lecturer in Chinese Language
MA, National Taiwan Normal University

Hea-Young Chun
Senior Lecturer in Korean Language
MA, Seoul National University

Rebecca Copeland
Professor of Japanese Language and Literature
PhD, Columbia University

Beata Grant
Professor Emeritas
PhD, Stanford University

Robert Hegel
Professor Emeritus
PhD, Columbia University

Hyeok Hweon Kang
Assistant Professor of East Asian Languages and Cultures
PhD, Harvard University

Taewoong Kim
Lecturer in Korean Language
PhD, The University of Oklahoma

Jiyoon Lee
Lecturer in Korean Language
MA, University of Oregon, Eugene

Xia Liang
Teaching Professor of Chinese Language
MA, Beijing Normal University

Jue Lu
Lecturer in Chinese Language
PhD, Washington University in St. Louis

Zhao Ma
Associate Professor of Modern Chinese History and Culture
PhD, Johns Hopkins University

Marvin H. Marcus
Professor Emeritus
PhD, University of Michigan

Virginia S. Marcus
Professor of Practice Emerita of Japanese Language
MA, University of Michigan, New York University

Jamie Newhard
Associate Professor of Japanese Language and Literature
PhD, Columbia University

Alessandro Poletto
Lecturer in East Asian Religions
PhD, Columbia University

Jingyi Wang
Senior Lecturer in East Asian Languages and Cultures
MA, Capital Normal University

Wei Wang
Teaching Professor of Chinese Language
PhD, Washington University in St. Louis

Mano Yasuda
Lecturer in Japanese Language
PhD, The University of Oklahoma

Majors

- East Asian Languages and Cultures Major (p. 446)
- East Asian Languages and Cultures Major, Chinese Specialization (p. 448)
- East Asian Languages and Cultures Major, Japanese Specialization (p. 449)
- East Asian Languages and Cultures Major, Korean Specialization (p. 450)

Minors

- East Asian Languages and Cultures Minor (p. 451)

Courses

Courses include the following:

- East Asian Languages and Cultures (p. 431)
- Chinese (p. 435)
- Japanese (p. 440)
- Korean (p. 443)

East Asian Languages and Cultures

EALC 1200 Ampersand: Knowing Through Objects:The World of an Antique Chinese Wedding Bed

Where do modern people spend almost a third of their life? Their beds! In addition to facilitating sleep and relaxation and its association with marriage and sexuality, the bed also is the centerpiece and likely the most expensive item of furniture item in the bedroom. Across cultures, from medieval Europe to imperial China, beds served as tokens of status that marked families' success and material wealth in increasingly commercialized and stratified societies. In the modern era, beds have drawn scrutiny from sociologists, sexologists, and social critics interested in questions of gender, family, and sexuality. A historical bed might also capture other meanings: its pathways through production, circulation, and consumption might illuminate global trading networks in lumber, labor, and finished commodities. It might reveal (or allow people to imagine) the transmission of craft knowledge, family formation, wealth accumulation (or dissipation), and social mobility. With these possibilities in mind, students will investigate and restore an antique Chinese wedding bed. Work will combine digital tools with humanistic research methods to facilitate a cultural history that engage questions of intimacy, nuptials, curation and conservation, and global trade and cultural exchanges.

EALC 2900 Directed Research in EALC

Introduces first-years and sophomores to research by engaging them in ongoing faculty research projects within the department. Under the direction of a faculty mentor, students take part in tasks that contribute to the mentor's research. Through this hands-on experience, students learn about the research process and build foundational research skills that can benefit their future academic experience and development. Faculty mentors provide regular guidance, training, and feedback to support students' understanding and growth. Students are registered by the department after approval from the faculty member leading the research project. The course may be taken for 1-3 credit hours based on the weekly hours required.

Credit 3 units.

Typical periods offered: Spring

EALC 2990 Undergraduate Internship in East Asian Languages and Cultures

Students receive credit for a faculty-directed and approved internship. Registration requires the completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities (e.g., eight to ten hours a week for thirteen or fourteen weeks to receive 3 units of credit; 1 or 2 credits for fewer hours).

Credit 3 units.

Typical periods offered: Fall, Spring

EALC 3250 Topics in Early Modern Korea

Topics course on early modern Korean; subject varies by semester. Fulfills premodern elective for EALC major.

Typical periods offered: Fall, Spring

EALC 3270 Topics in East Asian Performance Cultures

This course explores the constructions of gender within traditional and modern East Asian performing arts, with particular attention to cultural values, identities, and sensibilities revealed through various theatrical expressions. Genres to be studied include Chinese opera xiqu, revolutionary ballet, and spoken drama huaju, Japanese kabuki and Takarazuka Theatre, and Japanese modern drama, Korean narrative song form p'ansori and opera changgeuk, Korean new theatre shin'guk and modern dance, contemporary East Asian queer performances, among others. Consideration of gender in performance will address 1) narrative of the form, 2) persona of the character, 3) identity of the performer, and 4) role of the audience. As part of this study, students will explore the cultural specificity embedded in various forms of East Asian theatre and performance through the lens of gender. A second

interest lies in the applicability of Western models of gender, culture, and performance studies for the domain of the arts and for East Asia as a cultural region. The seminar approach will be interdisciplinary with extensive use of written, visual, and audial materials. Class combines lecture and discussion. Readings include critical, historical, literary, and descriptive writing about various genres of performing arts. All readings are in English translation.

Typical periods offered: Fall, Spring

EALC 3400 Writing New Horizons: Explorers, Envoys, and Other Encounters in Korean Travel Narratives
Whether physical or imagined, travel evokes notions of center, periphery, boundary and identity that shape the world we live in. This seminar course uses travelogues as well as literary, visual and cinematic representations of travels relating to Korea to explore how travel, art and imagination together help constitute one's sense of place. The course approaches travel from three angles. First, it examines writings by Korean authors on domestic, interregional, and international travels from premodern to modern times. Such works offer a frame for tracing conceptualizations of self and other through topics including diaspora, refugee crisis, migrant workers, political exile, prisoners of war, and others. The course also looks at stories of travel to Korea by non-Korean authors in order to see how "Korea" was perceived in various times by people outside the country. Lastly, through imagined journeys typically labeled as "sci-fi" or "fantasy", it examines notions of "truthful" and "realistic," and considers the function of the fantastic and storytelling and their relation to the world we live in. For their final project, students will create a map of real or fictional travels based on material covered in class. Using Digital Humanities tools such as StoryMaps (ArcGIS), Carto, or MyMaps (Google), they will also produce itineraries and narratives to accompany the maps, and present these results online. Necessary technical assistance will be provided by the GIS team at Olin Library throughout the semester. All reading in English. Prior knowledge of Korean language or culture may be helpful but is not required. Fulfills modern elective for EALC major.

Typical periods offered: Fall, Spring

EALC 3510 Pleasure, Amusement, and Play: Entertainment Culture in Premodern China
How do people in premodern China talk and write about pleasure? What can be learned about Chinese culture and society through pleasure, amusement, and play? This course explores the entertainment culture in premodern China, mainly from the 16th to the 18th century-an important historical moment of technological, economical, and political transformations. Throughout the semester, students will follow the scholar-officials, urban nouveau riche, courtesans, and entertainers in their travel through city spaces into gardens and pleasure quarters. Students will witness how they seek and take pleasure through reading a wide range of primary texts, including short stories, novels, essays, scholars' notation books, entertainment manuals, and philosophical writings. Students may have the opportunity to join and/or have conversations with them through in-class activities like role-play games and a mid-term creative adaptation assignment. By exploring the entertainment culture in premodern China, this course pays attention to the distinctive aspects in Chinese cultures such as gender dynamics, construction of public and private spaces, the promotion of personal emotions, as well as memories and nostalgia. All readings are in English.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

EALC 3560 Chinese Across Borders: Cultures of Diaspora and Mobility
This course explores literature and cinema of Chinese diaspora in Taiwan, the Malay Peninsula, and North America. Focusing on these three major destinations of Chinese immigration, the course will discuss how the Chinese diasporic population forge new relations with their cultural heritage through writing and filmmaking, how they use narratives and cameras to deal with the push and pull from their old and new homes, and how they create new identities to resist and negotiate with exclusion, racism, and social invisibility. Students begin their inquiry with a contemplation on the relationship between the notion of the mother tongue and the historical invention of the modern Chinese language. With the critical insights gained from language politics, students closely examine a set of literary works and films to discuss the Cold War divide between mainland China and Taiwan, the violence against the Chinese communities in Southeast Asia, and the emergence of Chinese American as a distinct identity in North America. The course will emphasize cultural politics of identity in relation to travel itineraries, memory, inter-generational linkage, and gender and sexuality. All readings will be provided in English. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM
Typical periods offered: Fall, Spring

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM
Typical periods offered: Fall, Spring

EALC 3600 US-China Relations from Conflict to Engagement, 1949-2016
This course examines the tangled relations between the United States and China in the competitive geopolitics from the mid-20th century to the recent past. The intensity of U.S.-China partnership and rivalry can be discerned in a wide range of national and international events such as imperialism and nationalism in the early 20th century, the Communist revolution and the Cold War, the economic reform and pro-democracy movement in China, and the U.S.-China normalization in the era of engagement. It aims at helping students understand the formation and transformation of U.S.-China relations and its impacts on domestic, regional, and global history. Drawing upon visual images, literature, films, policy statements, and social and cultural history, the course will examine the perceptions that have shaped the understanding of realities of the bilateral relations. It, which uses an interdisciplinary approach, will include discussions and debates from both American and Chinese perspectives.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM
Typical periods offered: Fall

EALC 3660 Chinese Theater Beyond Stage
This course explores the aesthetics and politics of Chinese theater from the Yuan dynasty (1271-1368) to the present. By focusing on three pivotal themes-media, gender, and politics, students will familiarize themselves with the ways in which theater and performance inform and fashion self, society, and history in China and beyond. Through an in-depth examination of dramatic literature, audio-visual recordings, and films, the course asks: How do various medium forms, such as onstage

performance, print, cinema, and animation, shape Chinese theater, and vice versa? In what ways do theatrical productions reflect and challenge gender norms through playwriting, role-playing, and cross-dressing? How does theater and performance negotiate diverse political agendas about China across time and space? The overarching objectives of this course are two-fold, 1) to develop a critical comprehension of major Chinese theatrical traditions and their modern and contemporary transformations, and 2) to discuss, write, and foster creative responses concerning the significance of Chinese theater, both domestically and within the changing global context. All readings will be provided in English. Fulfills premodern or modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM
Typical periods offered: Fall, Spring

EALC 3750 Imagined Pasts: Traditional Korea Through Film
This course is an introduction to traditional Korean culture through a selection of contemporary South Korean feature films and dramas. Films and dramas with historical themes have been very popular in Korea and across the globe. As powerful representations of the past, these contents have not just made Korean culture more accessible, but posed new issues and problems in learning about that culture. This course sets out to examine the content of historical films and dramas, investigating how "true" or "false" their representation of the past is, how they imagine and invent that past, and the ways they are useful-and not-in better understanding Korean culture and history. Some of the topics to be introduced are: kingship and court culture; Confucianism; social structure and people on the margin; gender relations and family; war and violence; science and technology; food and medicine; and the quotidian lives of people. This is also a media literacy course and students learn to engage critically with period pieces by writing comparative film essays and historical film critiques/scripts. Fulfills premodern elective for EALC major.

EALC 3800 EALC Seminar
EALC Seminar for majors; subject varies by semester. This course is primarily for sophomores and juniors with a major or minor in the Department of East Asian Languages & Cultures. Other students may enroll with permission. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM, IS EN: H
Typical periods offered: Fall, Spring

EALC 3810 EALC Seminar
This course introduces students to East Asian media cultures by focusing on a specific topic - the "screen." Students will explore how screen is not only an architectural construct (the painted screen) or a projection surface, but an electronic display, interface, or game console. Through examining a selection of scroll paintings, films, and digital artworks in Japan, South Korea, China, and Taiwan, students will learn to be attentive to the material, infrastructural, and formal conditions of how mass media is produced, exhibited, and consumed. Other media objects and phenomena to be discussed include manga and anime, console games, advertising walls, immersive installations, TikTok/Douyin short videos, digital filters and selfies, touch-based interfaces, among others. The class will also scrutinize the employment of the screen as motifs and metaphors in East Asian visual cultures and discuss how these metaphors and motifs negotiate questions of national identity, race and ethnicity, gender and sexuality, socialism/post-socialism, colonialism/post-colonialism, global expansion of capitalism. This class will also offer students a chance to explore multimedia productions as a new mode of critical thinking and creative expression. This course is primarily for sophomores and juniors with a major or minor in the Department of East Asian Languages & Cultures. Other students may enroll with permission. No prior knowledge of East Asia is required. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM BU: HUM
Typical periods offered: Fall, Spring

EALC 4200 Nature, Technology, and Medicine in Korea
This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary-or what historians dub early modern and modern. Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and fauna, colonial Koreans became biologists, nurses, and Edisons, and in North and South Korea, new professionals created distinctive-and in some cases, globally-competitive-regimes of knowing, making, and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be modern in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to have taken Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM EN: H

Typical periods offered: Fall, Spring

EALC 4300 Topics in Chinese Media Culture
The screen in modern China has been an important media device for social, political, and cultural transformation. This course invites students to examine Chinese screen culture from the early 20th century to the present. Discussing the screen images, the architectural environment built around the screen, and the screen as an interface that frames social relations, the course will investigate why and how cinema took roots in China, how the Chinese critics took advantage of the attraction of the film screen to instigate cultural reforms, how the socialist regime tried to extend the revolutionary spirit by delivering the screen to the remote villages, and, most recently, how the personal touchscreen introduced a set of new techniques in crafting and exploiting the self-image in the digital economy. This course will introduce critical methodologies to do research on screen culture. It will also give students opportunities to engage with media production, such as podcast and video essays, as a new mode of critical thinking and practice. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: LCD BU: IS EN: H
Typical periods offered: Fall, Spring

EALC 4320 Topics in Medical Humanities in East Asia
Topics course on medical humanities in East Asia; subject varies by semester. Fulfills either premodern or modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM
Typical periods offered: Fall, Spring

EALC 4380 Approaches to East Asian Cinema
The world-renowned masterpieces of Kurosawa and Ozu, the kung fu epics of Bruce Lee and Jackie Chan, the recent unprecedented Oscar wins of Bong Joon Ho's Parasite, and countless other films from Japan, South Korea, and the Chinese diaspora have made East Asian cinema one of the region's most visible cultural products of the past seventy years. Popular film plays a large role in constructing the cultural identity of modern societies, but Hollywood casts a long shadow over national cinemas. Critical discussions of East Asian cinema from both within and without the region have frequently approached these works as either the alien Other of Hollywood, or else subordinate to its influence. In this course we will seek to move beyond East-vs-West and Hollywood-centric approaches to analyzing East Asian cinema. While considering the unique historical development of commercial film industries in the region, we will also take into account the inherently transnational and globalizing nature of cinema. How have filmmakers in Japan, Korea, and the Chinese-speaking world responded to the hegemonic influence of the Classical Hollywood style to create works that operate in a common global vernacular, yet also forge new and distinct modes of expression? In an attempt to answer this question, we will read classic works of criticism that adopt an arguably Orientalist approach to the study of East Asian film, as well as more recent scholarship that attempts to escape the binaries that defined previous discussions. Close analysis of classic and contemporary East Asian film will provide context for these debates as well as introduce some of the major works of Japanese, Chinese, and Korean cinema to students. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Fulfills modern elective for EALC major. Prerequisites: unior level or above or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM
Typical periods offered: Fall, Spring

EALC 4400 China at the 1904 St. Louis World's Fair: The Emergence of US-China Relations
The St. Louis World's Fair in 1904 dazzled visitors and those who followed it in newspapers. By bringingthe world to the American heartland, it greatly furthered a political and cultural agenda of promotingAmerica's progress and superiority to audiences both at home and around the world. The course situates the fair in the context of the emerging US-China relations. The China exhibit bring to light a curated view of China designed specifically to appeal to an American audience who viewed the country as an "old regime," an exotic culture, an emerging capitalist market, and a battlefield for colonial powers. Byexamining the experience of American federal and state officials, Chinese royals and diplomats, andChinese exhibitors and laborers who took part in the fair, the course sheds light on the cultural diplomacy utilized by America and China, as both were navigating through the forces of capitalism, racism,imperialism, and nationalism in the rapidly globalizing world by the turn of the 20th century. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM BU: HUM
Typical periods offered: Fall, Spring

EALC 4690 Live Streaming Media: From Tencent to Tik Tok
Streaming media, in its various forms from binge-worthy serials to viral short-form videos and interactive livestreams, has become the prevailing mode of our contemporary media consumption. But what does "streaming" mean? How can we understand streaming media through the lens of its technologies, platform economy, and viewing pleasure and experience? How are streaming media fundamentally reorganizing our perception of time and remediating relationships with other time-based media including cinema, broadcast TV, video games, and computing technologies? Through an analysis of major Chinese platforms, from long-form streaming providers iQiyi and Tencent Video to short-form video and livestream platforms Douyin/TikTok and Kuaishou, this class explores (live)streaming media in its evolving global landscape. Through key theoretical concepts — liveness, seriality, flow, and contingency — the course examines emergent narrative strategies, viewing experiences and technological mechanisms of (live)streaming media. Students will investigate how practices like bingewatching, speed-watching, recommendation algorithms, and livestream e-commerce are reshaping media engagement in contemporary China. They will also analyze streaming serials that experiment with non-linear storytelling through genres such as time travel, reincarnation, and multiverse narratives, exploring how these forms reflect and shape our understanding of reality, trauma, romantic fantasies, historical memory, and future anxieties.

EALC 4750 Worldviews, World-Building, and World Literature: New Approaches to Chinese Literature (1500-1900)
This course explores how the multivalent notion of world creates new approaches for studying Chinese literature from the 16th century up to the early 20th century. It will consider the following questions: How did the Chinese people perceive, map, and write about the world prior to modernity? What are the strategies to construct fictional, virtual, or gameful worlds through literature and other media? How and why should we position Chinese literature as world literature? Issues covered in this course include premodern worldviews, literary and transmedia world-building, multilingualism, adaptation, and translation. One primary goal of this course for students is to learn how to critically apply theories from narratology, media studies, and comparative literature to study Chinese literature. To this end, the first session will focus on a particular piece of theoretical work or relevant secondary scholarship, and in the second session students will conduct a case study with selected primary sources to practice employing, questioning, and complicating those theories and methods. All readings will be provided in English. Students with classical and modern Chinese skills will be encouraged to read materials in the original to the extent possible. Fulfills premodern elective for EALC major.

Chinese

CHINA 1001 Basic Chinese I
Basic Chinese I is designed for zero background beginners. In this course, students will learn basic knowledge of Chinese language, including phonetics, vocabulary, grammars and to perform the language in a culturally appropriate way. This course emphasizes all four skills of a language, listening, speaking, reading and writing. After completing this course, students should be able to read and write basic Chinese characters, conduct daily conversations in a colloquial way. The topics covered in the course will include greetings, family, time, hobbies and visiting friends. In addition to lectures, students are required to attend a ten-minute one-on-one language practice with the instructor. After completing the spring course I, followed by the fall course II, interested students can then go on to CHINA 1512. Basic Chinese I and Basic Chinese II do not fulfill the language sequence requirement, nor the two-semester language requirement for the EALC minor. Note: Students with some previous Chinese language background must take the placement examination.
Credit 3 units. A&S IQ: LCD EN: H
Typical periods offered: Spring, Summer

CHINA 1002 Basic Chinese II
Basic Chinese II is a continuation of Basic Chinese I. Students will continue to learn Chinese phonetics, vocabulary, grammars and to perform the language in a culturally appropriate way. This course emphasizes all four skills of a language, listening, speaking, reading and writing. After completing this course, students should be able to read and write approximately 350 Chinese words, and to conduct daily conversations in a colloquial way. The topics covered in the course will include school life, shopping, studying Chinese and making appointments. In addition to lectures, students are required to attend a ten-minute one-on-one language practice with the instructor. After completing Basic Chinese course II, students who are interested in further studies can move on to CHINA 1512. Basic Chinese I and Basic Chinese II do not fulfill the language sequence requirement, nor the two-semester language requirement for the EALC minor.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

Typical periods offered: Fall, Spring

CHINA 1511 First-Level Modern Chinese I
This course is an introduction to the modern spoken and written national language of This course is an introduction to the modern common language of the Greater China area, known as Mandarin. The course includes conversation, reading of texts, and writing of characters. By the end of the semester, students should be able to read and write short passages (approximately 350 Chinese words) and to conduct daily conversations in a colloquial way. Note: Students with some previous Chinese language background must take the placement examination.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

CHINA 1512 First-Level Modern Chinese II
This course is a continuation of CHINA 1511 and CHINA 1002. The course will continue emphasizing listening, speaking, reading, and writing skills in the context of functional everyday Chinese. By the end of the semester, students should be able to read and write short passages (approximately 750 Chinese words) and to conduct daily conversations in a colloquial way. With the language skills acquired during the two semesters of the first year, the student should be able to survive most of the simple daily conversational situations in China.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

CHINA 1521 Beginning Chinese for Heritage Speakers I
This course is designed specifically for students who can speak and understand some spoken Chinese but have little or no knowledge in reading and writing in Chinese (so-called heritage speakers / huáyì). Students can choose either traditional or simplified Chinese characters for tests and written homework. The topics will concentrate on the life of Chinese immigrants in the U.S. By the end of the semester, students will have been introduced to a vocabulary of about 450 words, and will be expected to be able to produce, both in speaking and in writing, paragraph-length passages in modern Chinese. Note: Students with some previous Chinese language background must take the placement examination.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

CHINA 1522 Beginning Chinese for Heritage Speakers II
This course is the continuation of the beginning heritage Chinese, and is designed specifically for Chinese heritage speakers to further improve their reading, writing, listening and speaking skills in Chinese. Students can choose either traditional or simplified Chinese characters for tests and written homework. It will cover topics such as China Town, Chinese immigration history, and Chinese etiquette etc. By the end of the semester, students will have been introduced to a vocabulary of about eight hundred and fifty words. Students are expected to make conversations, clarify ideas, and produce multiple paragraph-length passages in writing. Prerequisite: L04 106 (grade of B- or better) or placement by examination.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

CHINA 1530 Chinese for Medical Purposes
This course is the continuation of Beginning Chinese taught in the fall at the Shanghai Fudan program. The spring course is targeted specifically to pre-medicine and/ or healthcare students who have studied at the Shanghai Fudan program in the fall. Students without the Fudan experience can also enroll after language evaluation. Prerequisites: L04 101D (grade of B- or better).
Credit 3 units. A&S IQ: LCD, LS Arch: HUM Art: HUM EN: H
Typical periods offered: Fall, Spring

CHINA 2011 Second-Level Modern Chinese I
This course is the first part of the intermediate level Chinese language course. It is designed to help students achieve greater proficiency in oral and written use of the language through reading, listening, speaking and writing. Upon completing the semester, students should

be able to conduct daily conversations and discussions. Topics will include but not limit to living in the dorm, ordering food, the internet and social media, working while studying, education, Chinese geography etc. By the end of the semester, students should be able to compare and discuss in a structural way, to make specific requests and give comments, to clearly express their opinions on daily topics both in speaking and in writing. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

CHINA 2012 Second-Level Modern Chinese II
This course is the second part of the intermediate level Chinese Language Course. It is designed to help students achieve greater proficiency in oral and written use of the language through reading, listening, speaking and writing. Upon completing the semester, students should be able to conduct daily conversations and discussions. Topics will include but not limit to traditional holidays, life in China, environment, gender equality, Chinese history, etc. By the end of the semester, students should be able to compare and discuss in a structural way, to express their opinions on abstract topics, to describe scenes and narrate stories in a structural way. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

CHINA 2021 Intermediate Chinese for Heritage Speakers I
This course is designed for intermediate students with Chinese heritage background. This course includes training in all four skills (speaking, listening, reading and writing) with an emphasis on writing and reading in Chinese. Students can choose either traditional or simplified Chinese characters for tests and written homework. By the end of the semester, students are expected to produce paragraph-length speeches and short essays in modern Chinese. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

CHINA 2022 Intermediate Chinese for Heritage Speakers II
This course is a continuation of CHINA 2021. It provides further training on the comprehensive skills of Chinese language, with an emphasis on writing and reading. The materials cover a wide scope of topics regarding Chinese language, society and culture, such as U.S.-China relations, social changes, family issues, and the education system in China, etc. By the end of the semester, students are expected to produce paragraph-length speeches and short essays with linguistic complexity in modern Chinese. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

CHINA 2030 Conversational Chinese: A Multimedia Course
This course is intended for students from advanced beginners to intermediate-level learners who want to improve their Chinese conversational skills and fluency. In this course, students will learn Chinese expressions and phrases encountered in daily situations, and they will also learn to read and type Chinese characters. This is a multimedia course that will utilize videos, movies, and authentic language materials for instruction and learning. By the end of semester, students should attain the abilities to use accurate pronunciation, tones, vocabulary, expressions and grammar in connected speech; to hold conversations in daily situations; to build up speaking and listening fluency; to use appropriate manners, both verbally and nonverbally, in conversations; and to acquire basic knowledge of Chinese sociocultural values and pragmatics. Prerequisites: Permission of instructor.
Credit 3 units. A&S IQ: LCD EN: H
Typical periods offered: Spring

CHINA 2100 Sophomore Seminar: U.S.-China Relations: Perceptions and Realities
The United States and China are the two most important global powers today, and the bilateral relationship is one of the most comprehensive, complex, consequential, and competitive major-power relations in the world. The course aims to examine the attitudes, ideas, and values that have shaped the relationship, from the era of colonial expansion in the 1800s to the rise of China as a major political and economic power in the 21st century. Drawing upon visual images, literature, films, policy statements, and other materials, the course will analyze the patterns of perceptions that have informed and shaped the understanding of realities. This course, which uses an interdisciplinary approach, will include discussions and debates from both American and Chinese perspectives. Prerequisite: sophomore level only.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

CHINA 2110 Sophomore Seminar
Sophomore seminar; subject varies by semester.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

CHINA 2270 Chinese Civilization
This course is an introduction to Chinese culture through selected topics that link various periods in China's past with the present. Ongoing concerns are social stratification, political organization, and the arts, gender relationships and the rationales for individual behavior, and the conceptions through which Chinese have identified their cultural heritage. Readings include literary, philosophical, and historical documents as well as cultural histories. There will be regular short writing assignments. No prerequisites.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, HUM, IS EN: H
Typical periods offered: Fall, Spring

CHINA 2990 Undergraduate Internship in Chinese
Students receive credit for a faculty-directed and approved internship. Registration requires the completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities (e.g., eight to ten hours a week for thirteen or fourteen weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Candidates must have taken at least one China related course (language or content) or concurrent enrollment. Advisor interview required if first time student is enrolling in an internship within the Chinese language section; limited to two units per semester. Credit/no credit only. Prerequisite: permission of department or DUS.
Credit 3 units.
Typical periods offered: Fall, Spring

CHINA 2999 Independent Study
This course allows students to work independently with an instructor on an agreed-upon subject. Prerequisite: permission of the instructor or department.
Credit 6 units.

Typical periods offered: Fall, Spring

CHINA 3011 Third-Level Modern Chinese I

This course is an intermediate-advanced level modern Chinese language course, which is designed to help students achieve greater proficiency in the oral and written use of the language through reading, listening, speaking and writing. More attention will be concentrated on developing the natural flow of the language, expanding vocabulary, and producing written Chinese of paragraph length. It aims at transitioning from spoken language to formal language styles. Content covered includes contemporary China's social livelihood, changes since China's Reform and Opening, as well as various aspects of people's lives, such as pollution, transportation infrastructure, urban-rural gap, market economy and consumer products. Students are required to take the placement exam unless they are advancing from the previous level.

Credit 4 units. A&S IQ: LCD, LS EN: H

Typical periods offered: Fall

CHINA 3012 Third-Level Modern Chinese II

This course is the continuation of CHINA 3011 Third Level Modern Chinese I. More attention will be concentrated on improving the natural flow of the language, expanding vocabulary, and producing written Chinese of essay length. The content of this course will cover contemporary China's social livelihood, changes since China's Reform and Opening, as well as various aspects of people's lives, such as transportation infrastructure, corruption issues, education problems in China, and the spiritual and cultural life of the Chinese people etc. Students are required to take the placement exam unless they are advancing from the previous level.

Credit 4 units. A&S IQ: LCD, LS EN: H

Typical periods offered: Spring

CHINA 3021 Advanced Chinese for Heritage Speakers I

This course is designed for heritage students who have studied at least two years of Chinese (or equivalent) to achieve greater proficiency in the oral and written use of the language through reading, listening, speaking, and writing. The teaching materials include essays and dialogues covering miscellaneous topics about today's China. Students are expected to make presentations and exchange ideas in appropriate and persuasive ways. Students are required to take the placement exam unless they are advancing from the previous level.

Credit 3 units. A&S IQ: LCD, LS EN: H

Typical periods offered: Fall

CHINA 3022 Advanced Chinese for Heritage Speakers II

This course is designed as a continuation of Advanced Chinese for Heritage Speakers to achieve more advanced competence in speech and writing of the language through studying and discussing essays and dialogues covering a variety of topics concerning Chinese society and culture. Students are expected to present opinions, make conversations and debate in appropriate and persuasive ways. Students are required to take the placement exam unless they are advancing from the previous level.

Credit 3 units. A&S IQ: LCD, LS EN: H

Typical periods offered: Spring

CHINA 3061 Culture and Business in Chinese

Students will learn Chinese linguistic skills that will prepare them to function comfortably and confidently in the Chinese business environment. Students will gain an understanding of the macro and micro Chinese economic situations and specific cultural needs. This course is aimed to enhance learners' linguistic skills and communicative competence and prepare them to function more comfortably and confidently in the Chinese business environment. By the end of the semester, students will also gain a better understanding of the macro and micro Chinese economic situations and specific culture needs. Prerequisite: L04 212 or L04 207 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD EN: H

Typical periods offered: Fall, Spring

CHINA 3160 Historical Landscape and National Identity in Modern China

This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campus, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens, and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual, political, and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local, and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory, and changing over time are an important concern of this course. Fulfills modern elective for EALC major.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

Typical periods offered: Fall, Spring

CHINA 3210 Contemporary Chinese Popular Culture

With the rise of the Chinese economy and global capitalism, popular culture has proliferated in mainland China in recent years. This course traces the development of Chinese popular and youth culture and society from the 1990s to the present. It also refers back to modern times and ancient Chinese Confucian philosophy for historical background information. The course covers various forms of Chinese popular culture, such as movies, music, television programs, Internet literature, religion, sports, and food. Students observe primary resources and read academic articles to engage in a multiperspective and multimedia view of present-day China in the age of globalization and East Asian regionalization. Fulfills modern elective for EALC major.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

Typical periods offered: Fall, Spring, Summer

CHINA 3300 Topics in Chinese Literature and Culture

Topics course on Chinese literature and culture; subject varies by semester. Fulfills modern elective for EALC major.

Typical periods offered: Fall, Spring

CHINA 3380 Readings in Popular Literature and Culture: Writing Stories in Late Imperial China

Why did stories become popular in late imperial China? How were stories written, and what were people's reading habits in a time full of dynamic social and cultural changes? This class answers these questions by reading stories from several narrative genres. Unlike the classic texts for formal education and the imperial civil service examinations, most of these writings were unconventional narratives for leisure reading, and they became part of the popular literature and culture of the time. Primary readings will include selections from formal and informal histories, vernacular short stories, classical language stories, and literary anecdotes. This class concentrates on examples

from the 17th and 18th centuries, and these will be accompanied by a small number of secondary readings. A background in Chinese language or culture is welcome but not required. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

CHINA 3410 Early and Imperial Chinese Literature
An introduction to important genres and themes of Chinese literature through the study of major writers. Brief lectures on the writers' personal, social, intellectual, and historical contexts; most class time will be devoted to student discussions of their masterworks as an avenue for understanding Chinese culture during selected historical periods. All readings are in English translation. Fulfills the premodern literature requirement for EALC degrees.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

CHINA 3420 Modern and Contemporary Chinese Literature
This course provides an introduction to the major writers and works of Chinese literature from the turn of the 20th century to the present, including fiction, poetry and film. It looks at these works in their relevant literary, sociopolitical, and cultural contexts (including Western influences). All readings are in English translation. Fulfills the modern literature requirement for EALC degrees.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM, IS EN: H
Typical periods offered: Spring

CHINA 3500 U.S.-China Relations from 1949 to the Present
The United States and China are the two most important global powers today, and the relationship between them is one of the most comprehensive, complex, and consequential major-power relations in the world. The tangled relationship is at times turbulent, and its future remains uncertain. This course studies the bilateral relationship from the Chinese Civil War to the rise of China as a major political and economic power in the 21st century. It invites students to explore the following questions: What have China and the U.S. done to confront or accommodate each other in global politics? How has foreign policy in both countries balanced the often competing goals of state security, economic stability, domestic political order, and international influence? What are the impacts of a rising China on geopolitics in the Asia-Pacific region and on the U.S.'s global leadership in the 21st century? By drawing on scholarship in political and social history and area studies, this course helps students better understand both the historical context and current developments of U.S.-China relations. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM, IS EN: H
Typical periods offered: Fall, Spring

CHINA 3999 Undergraduate Independent Study
Prerequisite: permission of instructor or department. No more than 6 units may be earned by a student.
Credit 6 units.
Typical periods offered: Fall, Spring

CHINA 4021 Fourth-Level Modern Chinese I
This course is designed for students who have successfully completed Third-Year Chinese or the equivalent. Based on their existing Chinese proficiency level, students will receive further training in all four language skills: listening, speaking, reading, and writing. The regular textbook will be supplemented with writings from Chinese newspapers, magazines, internet sources, and films. By the end of two semesters, students are expected to express themselves both orally and in written form on a variety of topics in humanities in depth and in a culturally appropriate manner. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

CHINA 4022 Fourth-Level Modern Chinese II
This course is a continuation of CHINA 4021. Based on their existing Chinese proficiency level, students will receive further training in all four language skills: listening, speaking, reading, and writing. The texts are authentic materials from Chinese newspapers, magazines, internet sources, and films. Topics include changes in social values, technology and life, public policies, and popular culture etc. By the end of this semester, students are expected to conduct in-depth discussions on social issues and produce eight hundred-character essays. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

CHINA 4031 Fifth-Level Modern Chinese I
This content-based language course is designed for advanced students expecting to improve their skills through conversation, reading and writing of essays, stories, and other types of creative writings in Chinese. The reading material consists of a variety of authentic literature texts (1930s to 2000s), including short stories, prose, and poetry. Narration and description are emphasized in both spoken and written forms. After taking this course, students will be familiar with masterpieces of contemporary Chinese literature and representative writers. In addition, students are expected to produce their own creative writings. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

CHINA 4032 Fifth-Level Modern Chinese II
This course is designed for advanced students wishing to improve their skills in conversation, reading and writing of letters, essays, reports, and other types of compositions in Chinese. The reading material is comprised of a variety of authentic texts, including newspapers, short stories, and essays. This course is conducted entirely in Chinese. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

CHINA 4041 Business Chinese I
In the present globalization, China has been fertile ground for foreign joint business ventures, and this course focusing specifically on business Chinese attests to that fact. This course aims at teaching Chinese business communication using a series of case studies to involve and challenge the students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts, from resolving contract disputes, to developing a business strategy, to establishing a franchise overseas. The course is designed to simulate real business environments where students interact with Chinese businesspeople in business settings, and are motivated to achieve business goals. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD EN: H
Typical periods offered: Fall

CHINA 4042 Business Chinese II
This is the continuation of Business Chinese I. This course uses a series of case studies to involve and challenge students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD EN: H
Typical periods offered: Spring

CHINA 4100 Introduction to Traditional Literary Chinese I
Selected readings in premodern Chinese texts. Recommended for students in fields of specialization where knowledge of literary Chinese is normally expected. Prerequisite: L04 427 (grade of B- or better) or instructor's permission.
Credit 3 units. A&S IQ: LCD, LS Arch: HUM Art: HUM BU: IS EN: H
Typical periods offered: Fall

CHINA 4110 Introduction to Traditional Literary Chinese II
Selected readings in premodern Chinese texts. Recommended for students in fields of specialization where knowledge of literary Chinese is normally expected. Prerequisite: L04 410 (grade of B- or better).
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

CHINA 4130 Readings in Classical Chinese - Morality, Reality, and Fantasy
This thematic course develops language proficiency in modern Chinese while studying classical Chinese. Students will improve their understanding of Chinese history and culture through reading Chinese classics and study Chinese classics through a comparative approach to written and multi-media materials, including videos, films and other online resources. Designed for students who have completed fourth-year Chinese for further training in all four language-skills: listening, speaking, reading, and writing, especially focusing on thematic discussion skills. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall, Spring

CHINA 4240 Culture and Politics in the People's Republic of China: New Approaches
This course inquires into the political, ideological, and social frameworks that shaped the cultural production and consumption in the People's Republic of China (PRC). In the realm of literature, film, architecture, and material culture and everyday life, this course pays a close attention to the contestation and negotiation between policy makers, cultural producers, censors, and consumers. Understanding the specific contour of how this process unfolded in China allows us to trace the interplay between culture and politics in the formative years of revolutionary China (1949-1966), high socialism (1966-1978), the reform era (1978-1992), and post-socialist China (1992 to present). The course examines new scholarship in fields of social and cultural history, literary studies, and gender studies; and it explores the ways in which new empirical sources, theoretical frameworks, and research methods reinvestigate and challenge conventional knowledge of the PRC that have been shaped by the rise and fall of Cold War politics, the development of area studies in the U.S., and the evolving U.S.-China relations. Graduate students should be proficient in scholarly Chinese, as they are expected to read scholarly publications and primary materials in Chinese. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

CHINA 4390 Topics in Chinese Literature and History
Topics course on Chinese literature and history; subject varies by semester. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

CHINA 4510 Urban Culture in Modern China
The narrative of rural crisis and peasant revolution has dominated China's modern history for decades. But there has been a growing interest in China's urban past and present with the increased prominence of cities in China's breathtaking economic development and the opening of municipal archives in post-Mao era. The course aims to introduce students to conventional wisdoms, new directions, and major debates in the urban history field. Topics include: the urban political economy, the cultural dynamics of modernity, the reconstruction of traditions in the making of modernity, the cultural production and consumption, colonialism and imperialism in the urban setting, nationalism, and reform and revolution. Acknowledging and understanding the nuance and difference in views and interpretations in historical writings (historiography) are essential. The course seeks to develop students' research and analytical skills, such as locating secondary sources, incorporating scholarly interpretations, and developing and sustaining a thesis based on secondary and primary sources in student research. This is an interdisciplinary seminar designed for advanced undergraduates and graduate students. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

CHINA 4590 Topics in Chinese Literature and Culture
Topics course on Chinese literature and culture; subject varies by semester. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: LCD, SSC Arch: HUM Art: HUM UColl: CD
Typical periods offered: Fall, Spring

CHINA 4670 The Chinese Theater
This course is a survey of the performance and literary traditions of the Chinese theater from their pre-Tang origins to the present day. The course focuses on three forms: 14th-century zaju plays, 16th- and 17th-century chuanqi plays, and recent films from China, Taiwan, and Hong Kong. Background in either China studies or theater in other cultures recommended. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM
Typical periods offered: Fall, Spring

CHINA 4700 Advanced Chinese Readings
This hybrid Chinese language-literature course is designed to meet the needs of students who have taken at least five years of Chinese language courses (including classical Chinese) and are interested in exploring Chinese language and culture in more depth by studying early modern Chinese vernacular short stories. Studying these stories will allow students to appreciate modern grammar while discerning the development of vernacular Chinese over the centuries. Stories vary by semester.
Credit 3 units. A&S IQ: LCD EN: H
Typical periods offered: Spring

CHINA 4760 Reading Seminar in Chinese Traditional Fiction
Topics reading seminar on Chinese traditional fiction; subject varies by semester. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall, Spring

CHINA 4770 Reading Seminar in Chinese Traditional Poetry
A seminar on Chinese traditional poetry with varying topics.Prerequisite: junior level or above or permission of instructor.

Guided readings in Chinese
Credit 3 units.
Typical periods offered: Fall, Spring

Japanese

JAPAN 1513 First-Level Modern Japanese I
This is the first semester of an academic-year course in beginning Japanese. It is designed for students who have had no prior study of Japanese. The course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communicative practices. It covers everyday vocabulary, expressions and basic grammatical structures and introduces all Japanese phonetic syllabaries (hiragana and katakana) as well as kanji characters. Cultural aspects of the language will also be introduced to deepen students' cultural awareness and to communicate appropriately in the global era. After completing this course, students are able to have basic conversations such as self-introduction, shopping, making invitations, describing locations, etc. They are able to read and write simple texts on topics related to oneself. Note: students with some previous Japanese language background must take a placement test.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall, Spring

JAPAN 1514 First-Level Modern Japanese II
This is the second semester of an academic-year course in beginning Japanese. This course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communicative practices. It covers everyday vocabulary and expressions, and introduces approximately 90 kanji characters. More grammatical structures and conjugation patterns will be introduced and practiced. Cultural aspects of the language are also incorporated in classroom practice to deepen students' cultural awareness and successful communication in the global era. After completing this course, students are able to understand and participate in daily conversation such as making requests, comparing things, expressing one's ideas and desires, and describing one's family members. They will be able to understand how to read and write novice-level materials on topics related to oneself and their immediate environment. Prerequisite: L05 103D (grade of B- or better) or placement by examination.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

JAPAN 2013 Second-Level Modern Japanese I
This is the first semester of an academic-year course in intermediate Japanese. The course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communicative practices. It covers the basic vocabulary, expressions, and more grammatical structures and conjugation patterns. About 100 new kanji characters are introduced. Cultural aspects of the language are consistently incorporated in classroom practice to deepen students' cultural awareness and successful communication in the global era. After completing this course, students are able to understand and participate in daily conversation about their experience, past, present and future events in more complex Japanese, and to be able to express opinions/thoughts and present information. They are able to read and write more complex texts on topics related to oneself and their immediate environment with a solid understanding of main ideas and supporting details from a variety of texts. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

JAPAN 2014 Second Level Modern Japanese II
This is the second semester of an academic-year course in intermediate Japanese. The course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communicative practices. It introduces more vocabulary, expressions, grammatical structures and conjugation patterns such as passive, causative, causative-passive and honorifics. Cultural aspects of the language are consistently incorporated in classroom practice to enforce students' cultural awareness and communication success in the global era. After completing this course, students are able to understand and participate in conversation in complex Japanese, and to be able to express opinions/thoughts and present information using appropriate vocabulary, expressions and basic grammar in context. They can communicate appropriately using a variety of speech styles. They are able to read and write more complex texts with a solid understanding of main ideas and supporting details on familiar topics from a variety of texts. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 5 units. A&S IQ: LCD, LS EN: H

Typical periods offered: Spring

JAPAN 2120 Topics in Japanese Literature & Culture
Topics course on Japanese literature and culture; subject varies by semester.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H
Typical periods offered: Fall, Spring, Summer

JAPAN 2150 Topics in Pre-Modern Japanese Literature
Topics course on premodern Japanese literature; subject varies by semester.
Credit 3 units.
Typical periods offered: Fall, Spring

JAPAN 2260 Japanese Civilization
This course will present a comprehensive overview of Japan, its history, its institutions and cultural products, and its society and people. The first half of the course will comprise a survey of Japanese history, with an emphasis on its social and cultural aspects, from the earliest period to the present day. Having established the historical framework-with its interweave of native and foreign elements, Kyoto-based imperial aristocracy, the samurai class and their crucial role, Zen-inspired meditative arts, and exquisitely diverse cultural products-the class will move on, in the second half, to an examination of recent and contemporary trends and issues. These will center on Japanese education, social and family structures, urban centers and the rural periphery, economic and socio-political trends, Japan's distinctive and vibrant popular culture, contemporary problems and challenges, and the nation's dramatically shifting position in East Asia and in the 21st-century global order.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

JAPAN 2990 Undergraduate Internship in Japanese
Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities (e.g., eight to ten hours a week for thirteen or fourteen weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Credit/no credit only.
Credit 0.5-3 units.
Typical periods offered: Fall, Spring

JAPAN 2999 Independent Study
Prerequisite: permission of the instructor or department.
Credit 6 units.
Typical periods offered: Fall, Spring

JAPAN 3240 A User's Guide to Japanese Poetry
This course introduces the art and craft of Japanese poetry, one of the world's great literary traditions. Exploring the many styles of traditional verse--the poetic diary, linked verse, haiku, and others--and their historical contexts, students gain insights into Japanese aesthetics and study the unique conventions of Japanese poetic production that have evolved over a span of some 1500 years. The course also incorporates a haiku workshop, where we engage in group-centered poetry writing and critiquing. No prior knowledge of Japanese is required.
Credit 3 units. A&S IQ: LCD EN: H
Typical periods offered: Fall, Spring

JAPAN 3260 Topics in Modern Japanese Literature
Topics course on modern Japanese literature; subject varies by semester. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

JAPAN 3320 Japanese Literature: Beginnings to 19th Century
This survey of Japanese literature covers antiquity to the early 19th century. Emphasis is on the ideological and cultural contexts for the emergence of a variety of traditions, including poetry, diaries, narrative, and theater. Fulfills premodern literature requirement for EALC degrees. No knowledge of Japanese language is required.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

JAPAN 3330 The Modern Voice in Japanese Literature
This survey explores the emerging modern voice in Japanese literature, with emphasis on prose fiction. After a brief introduction to earlier centuries, the class focuses on the short stories and novels of the 20th century. Among the authors considered are Natsume Soseki, Nagai Kafu, Tanizaki Jun'ichiro, and Nobel laureates Kawabata Yasunari and Oe Kenzaburo. Discussions center on issues of modernity, gender, and literary self-representation. Fulfills modern literature requirement for EALC degrees. No knowledge of Japanese language required.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM EN: H
Typical periods offered: Spring

JAPAN 3360 The Floating World in Japanese Literature
This survey of Japanese literature covers the 17th to the 19th century. Primary focus is on the Genroku era (1688-1703), which witnessed the growth of lively urban centers and the emergence of a robust literary voice. Emphasis is on the ideological and cultural contexts for the development of a variety of new innovations in the genres of poetry (haiku), theater (kabuki and bunraku) and prose (kana zoshi). No knowledge of Japanese language is required. Sophomore level and above recommended. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM
Typical periods offered: Fall, Spring

JAPAN 3460 Japanese Literature in Translation:
In this course students explore the tantalizing, thrilling, and sometimes macabre genre of mystery fiction in Japan. Emerging in the late 19th century, largely in response to the disruptions of industrialization, the mystery genre offered writers a way to make sense of a chaotic, unfamiliar world. The genre has also allowed a means of social critique and radical experimentation. The class considers the works of Edogawa Rampo, Matsumoto Seicho, Miyabe Miyuki, Kirino Natsuo, and others. All readings in English. No prior knowledge of Japanese required. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
UColl: CD
Typical periods offered: Fall, Spring

JAPAN 4013 Third-Level Modern Japanese I
This is the first semester of an academic-year course in pre-advanced Japanese. The course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communication. Various projects will be assigned throughout the semester in addition to the course readings, conversation exercises and class discussion. After completing this course, students are able to communicate in Japanese in a linguistically and culturally appropriate manner, to read semi-authentic materials more extensively on topics

about Japanese culture, and gather information about the topics of their interest by using a variety of resources. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 4 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

JAPAN 4014 Third-Level Modern Japanese II
This is the second semester of an academic-year course in pre-advanced Japanese. The course emphasizes the acquisition of all four language skills (listening, speaking, reading, and writing) through meaningful communication. Various projects will be assigned throughout the semester in addition to the course readings, conversation exercises and class discussion. After completing this course, students are able to communicate in Japanese in a linguistically and culturally appropriate manner, to read semi-authentic materials more extensively on topics about Japanese culture, and gather information about the topics of their interest by using a variety of resources. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 4 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

JAPAN 4023 Fourth-Level Modern Japanese I
This is the first semester of an academic-year course in advanced Japanese. The course emphasizes the acquisition of linguistic, pragmatic, and sociocultural competence in all four areas of the language as well as advanced level critical thinking skills. In addition to the textbook, more authentic materials such as movie clips, newspaper articles, etc. are selected for readings and discussion topics. Students will be assigned several projects in accordance with the interests and needs of participating students. After completing the course, students are able to manage various speaking styles according to the situational/relational context and express their opinions clearly and logically in speaking and writing. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

JAPAN 4024 Fourth-Level Modern Japanese II
This is the second semester of an academic-year course in advanced Japanese. The course emphasizes the acquisition of linguistic, pragmatic, and sociocultural competence in all four areas of the language as well as advanced level critical thinking skills. In addition to the textbook, more authentic materials such as movie clips, newspaper articles, etc. are selected for readings and discussion topics. Students will be assigned several projects in accordance with the interests and needs of participating students. After completing the course, students are able to manage various speaking styles according to the situational/relational context and express their opinions clearly and logically in speaking and writing. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

JAPAN 4033 Fifth-Level Modern Japanese I
A course intended for students with advanced proficiency in written and spoken Japanese who have had extensive study experience in Japan. The course objectives are: to achieve mastery of communication skills, to deepen understanding of Japanese structural patterns, and to expand vocabulary and control of idiomatic expressions. Emphasis on readings in contemporary texts and extensive practice with different styles of oral discourse. Class to be conducted exclusively in Japanese. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD BU: IS
Typical periods offered: Fall, Spring

JAPAN 4034 Fifth-Level Modern Japanese II
A course intended for students with advanced proficiency in Japanese who have had extensive study experience in Japan. Emphasis on improving skills in both written and spoken Japanese acquired in Fifth-Level Japanese I. Class to be conducted exclusively in Japanese. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD
Typical periods offered: Spring

JAPAN 4310 Topics in Japanese Literature & History
This course examines the culture of the Edo period (1600-1868), a time when Japan was largely closed to the outside world, but when economic growth, urbanization, the rise of commercial publishing and the establishment of theaters combined to create one of the most vibrant, innovative periods in Japanese literary and cultural history. We will consider cultural output as a means of both upholding and subverting traditional values, focusing particularly on representations of love, sex, and gender in the floating world of the pleasure quarters, images of samurai honor, stories of ghosts and the supernatural, and nascent ideas about national identity. When relevant, we will also consider images of early modern Japan in modern literature and film. Readings will be in English translation. Previous exposure to Japanese literature or history is helpful but not required. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

JAPAN 4450 Topics in Modern Japanese Literature
Topics course in modern Japanese literature; topics varies by semester. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

JAPAN 4455 Japanese Fiction
The Meiji Period (1868-1912) in Japan was a time of tumultuous change. During the era Japan made sweeping reforms to its government, educational system, and social structures. Meiji men were encouraged to modernize along Western lines, while women were expected to serve as repositories of the past. Most women prized the elegant traditions and saw these as important markers of cultural identity. But not all were willing to completely abdicate their place in the modernizing impulse. This writing intensive course will examine these women's literary works, paying attention to the way they developed strategies to both serve the nation and find an outlet for their own creative voice. Works to consider include the short fiction of Higuchi Ichiyo, Shimizu Shikin, and Tamura Toshiko, the poetry of Yosano Akiko, the essays of Kishida Toshiko, and the translations of Wakamatsu Shizuko. All readings are available in English translation and students need not be familiar with Japanese, though background in Japanese Studies, Women's Studies, or literary studies will be helpful. This is a Writing-Intensive Seminar. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

JAPAN 4460 The Japanese Theater
This course is an investigation, using English materials, of the major developments and forms of the Japanese theater, from Noh and its antecedents to the rise of a modern drama. While less concerned with the performative aspects of theatrical arts (though these will

be introduced via videos), emphasis is placed on the ways in which dramatic texts influenced and borrowed from the literary tradition. Readings are from major theatrical texts, secondary studies on Japanese theater, and literary sources. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H
Typical periods offered: Fall

JAPAN 4480 Japanese Poetry
This course is a comprehensive survey of Japanese poetry from the 8th century to the present day. Topics include the development of the great tradition of court poetry in the Heian period (ca. 800-1200) and its full flowering during the medieval period (ca. 1200-1600), the influence of the Zen aesthetic, the emergence of linked verse and haiku, and the transformation of the classical tradition with the advent of the modern era. All works will be read in English translation, although knowledge of Japanese will be useful. Graduate students will be expected to read original materials extensively. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only.
Credit 3 units. Art: HUM
Typical periods offered: Fall, Spring

JAPAN 4490 Modern Japanese Women Writers
Japanese women have been scripted by Western (male) imagination as gentle, self-effacing creatures. From their (re)emergence in the late 19th century to their dominance in the late 20th, Japanese women writers have presented an image of their countrywomen as anything but demure. Struggling to define their voices against ever-shifting expectations and social contexts, the women they create in their fiction are valiant, if not at times violent. This course examines the various manifestations of the female image in female-authored modern Japanese fiction. Writers considered are Higuchi Ichiyo, Hirabayashi Taiko, Uno Chiyo, Enchi Fumiko, Yamada Eimi, and others. A selection of novels and shorter fiction are available in English translation, and students need not be familiar with Japanese. Prior coursework in literature/women's studies may be helpful. Fulfills modern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

JAPAN 4500 Masterworks of Early Japanese Literature: The Tale of Genji and Its Afterlives
This course is an intensive study of one of the central texts of classical Japanese literature. Selection of texts rotate among works including: The Tale of Genji, court diaries, poetry anthologies, Noh drama, The Tale of the Heike, setsuwa collections, and medieval memoirs. In addition to exploring the historical, literary, and cultural significance of the work from its genesis to the present age, students engage in a close reading of the text and an investigation of the primary theoretical issues and approaches associated with the work both in Japan and abroad. Prior knowledge of early Japanese literature or history is recommended. Texts will be read in English translation. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Fall, Spring

JAPAN 4600 Pre-Modern Japanese I
The language referred to as classical Japanese (or literary Japanese, kobun, kogo, bungo, bungotai, etc.) was in use from the Heian period to the 20th century, and traces of it remain even in modern Japanese. This course gives students a systematic introduction to the grammar of bungo, through readings in texts from the Heian and medieval periods. By the end of the semester students should be able to read reasonably straightforward passages of bungo with a dictionary. They will also have a deeper understanding of the grammar and structure of modern Japanese, and will become more skilled at using Japanese-Japanese dictionaries. Readings are drawn from Japanese classical literary texts using materials from standard modern annotated editions. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

JAPAN 4610 Pre-Modern Japanese II
This course is a continuation of Pre-Modern Japanese I which reinforces and expands the student's understanding of classical Japanese grammar through close reading of texts drawn from the Heian, medieval and Edo periods, and introduces the basics of reading hentaigana, the cursive form of kana found in manuscript and woodblock print books. Readings are in classical literary texts using materials from standard modern annotated editions as well as the introduction of skills necessary for reading original texts, including kambun and hentaigana.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

JAPAN 4640 Japanese Textual Analysis
This course introduces the advanced student of Japanese to a variety of prose narratives in the modern language. Readings, which include literary texts and topical essays on aspects of Japanese society and culture, reflect the needs and interests of the enrolled students. Focus is on close reading and syntactic analysis of the selected texts. Regular translation exercises gauge the mastery of grammar, syntax, and idiomatic usages. All readings are in Japanese, with class discussion conducted predominantly in English. A final translation project, to be chosen by the student in consultation with the instructor, is required. Undergraduates enroll in the 400-level section; 500-level section is for graduate students only.
Credit 3 units. A&S IQ: LCD EN: H

JAPAN 4910 Guided Readings in Japanese
Guided readings in Japanese.
Credit 3 units.
Typical periods offered: Fall, Spring

Korean

KOREA 1007 Basic Korean I
Basic Korean I is designed to develop students' basic proficiency in all four language skill areas, listening, speaking, reading, and writing, while fostering intercultural competence. Students will improve their Korean communication skills by engaging in various interactive activities throughout the course. The topics covered in the class include self-introduction, describing surroundings, discussing daily activities, and engaging in conversations about familiar objects and people. The course introduces relevant cultural topics to enrich students' understanding of Korean culture and language. This 3-credit, slower-paced course meets three times per week and requires less time commitment than the 5-credit course First-Level Modern Korean I. Upon completing Basic Korean I in the spring semester, students can enroll in Basic Korean II in the fall semester. After successfully finishing Basic Korean II, students can advance to First-Level Modern Korean II in the subsequent spring semester. It is important to note that Basic Korean 1 and Basic Korean 2 do not fulfill the language sequence requirement, nor the two-semester language requirement for the EALC minor.
Credit 3 units. A&S IQ: LCD Arch: HUM Art: HUM EN: H
Typical periods offered: Spring

KOREA 1008 Basic Korean II
Basic Korean II is the second course in the slower-paced Basic Korean language sequence. This course focuses on developing proficiency in listening, speaking, reading, and writing, while also fostering intercultural competence. Students will participate in various interactive activities to develop their proficiency. Topics covered include describing surroundings, discussing daily activities such as school, shopping, extracurricular activities, and describing past and future events. The course also introduces relevant cultural topics to deepen students' understanding of Korean culture and language. After completing Basic Korean II, students can enroll in First-Level Modern Korean II in the spring semester. It is important to note that Basic Korean 1 and Basic Korean 2 do not fulfill the language sequence requirement, nor the two-semester language requirement for the EALC minor.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Fall

KOREA 1517 First-Level Modern Korean I
This course is an introduction to Korea's modern spoken and written language, designed for students with no prior background or minimal exposure to the language without any literacy skills. The course emphasizes developing proficiencies in all four areas of language functions, including listening, speaking, reading, and writing, specifically focusing on accurate pronunciation, basic grammar, and communicative and intercultural competence. Throughout the course, students will work towards the following objectives: gaining the ability to say greetings, tell time, and carry on basic conversations in classrooms, stores, and various social situations related to daily life, family, and school in all time frames (present, past, and future). In addition, the course aims to help students understand Korean culture as reflected in the language. Students with some previous Korean language background must take the placement exam. Note: Students with some previous Korean language background must take the placement examination.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

KOREA 1518 First-Level Modern Korean II
This course is a continuation of the first level beginning Korean course, focusing on acquiring communicative and grammatical skills in speaking, writing, and reading through active participation. The curriculum includes Interactive activities that enhance learning experiences and foster communicative and intercultural competence. By the end of the course, students will acquire basic vocabulary, accurate pronunciation, and reading and writing skills with appropriate grammar. They will be able to participate in conversations related to school, classes, social life, family, phone conversations, travel, shopping, and restaurants. Additionally, the course aims to help students understand Korean culture reflected in the language. Prerequisite: L51 117D (grade of B- or better) or placement by examination.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

KOREA 2017 Second-Level Modern Korean I
This class is designed for students who have successfully finished First Level Modern Korean I & II and those with equivalent proficiency. The course will continue to emphasize the development of cultural competency in Korean language and culture and communicative skills in speaking, listening, writing, and reading. By the end of this course, students will be able to engage in conversation on personal experiences and topics related to lessons in class, develop accurate pronunciation and intonation, further develop their reading and writing skills in Korean texts, and gain a deeper understanding of Korean culture as reflected in the language. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

KOREA 2018 Second-Level Modern Korean II
This class is designed for students who have completed Second Level Modern Korean I or have equivalent proficiency. The course's main objective is to continue developing cultural competency in Korean language and culture while further developing students' communicative skills in speaking, listening, writing, and reading. By the end of the course, students will be able to engage in expanded conversations on personal experiences and topics related to class lessons, constructing coherent and complete sentences. Additionally, students focus on improving their pronunciation and intonation, developing their reading and writing skills to engage with simple Korean texts effectively, and gaining a deeper understanding of Korean culture as reflected in the language. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

KOREA 2230 Korean Civilization
This course introduces Korean civilization from earliest times to the present. While a broad survey, the course emphasizes cultural themes and social institutions, and explores the Korean past in East Asian and global perspectives. To help with building this comprehensive view, the class follows a chronological progression of history using a textbook. But throughout, students also learn from diverse media-including film, drama, music, games, and primary historical sources-to make their own sense of Korea and Korean culture. In terms of methodology, the class adopts various approaches, from source criticism and material studies to critically engaging modern-day representations of Korea in print and new media. Some of the topics covered include: foundation myths, ancient literature, colonialism, civil war, authoritarianism, rapid industrialization, and democratization in Korea.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

KOREA 2900 Korean Undergraduate Teaching Assistants
In this course undergraduate students with native or near native proficiency in Korean assist in the first, second, and third level modern Korean language classes by serving as one-on-one session tutor, lab drill and practice session tutor, or discussion leader under close supervision of the faculty. Students can only enroll in the class with permission from the faculty member.
Credit 1-3 units.
Typical periods offered: Fall, Spring

KOREA 2990 Undergraduate Internship in Korean
Students receive credit for a faculty-directed and approved internship. Registration requires the completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities (e.g., eight to ten hours a week for thirteen or fourteen weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Credit/no credit only. Prerequisite: permission of department or DUS.
Credit 3 units.
Typical periods offered: Fall, Spring

KOREA 2999 Independent Study
Prerequisite: permission of the instructor
Credit 6 units.
Typical periods offered: Fall, Spring

KOREA 3520 Literature of Modern and Contemporary Korea
This undergraduate course surveys the major writers and works of 20th century Korean literature. During the 20th century Korea went through a radical process of modernization. From its colonization by Japan, to its suffering of a civil war within the cold war order, to its growth into a cultural and economic powerhouse, Korea's historical experience is at once unique and typical of that of a third-world nation. By immersing themselves in the most distinctive literary voices from Korea, students examine how the Korean experience of modernization was filtered through its cultural production. The course pays special attention to the writers' construction of the self and the nation. How do social categories such as ethnicity, class, gender, and race figure in the varying images of the self? And how do these images relate to the literary vision of the nation? Along the way, students observe the prominent ideas, themes, and genres of Korean literature. This class combines lecture with discussion, in which students are strongly encouraged to participate. All literary texts are in English translation and no previous knowledge of Korean is required. Fulfills modern literature requirement for EALC degrees.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM, IS EN: H
Typical periods offered: Fall, Spring

KOREA 3550 Topics in Korean Literature & Culture

Typical periods offered: Fall, Spring

KOREA 3700 When Tigers Smoke: Songs and Stories From Traditional Korea
This course has two purposes: (1) to introduce major works and topics in Korean classical literature and the cultural world in which they were produced and (2) to explore modern reimaginings of these historical works and events and wider context through contemporary literature and film. The former involves a journey through various genres, including foundation myths, songs, biographies, essays, poetry, fiction, memoirs, letters and oral performance, all produced before the 20th century. For a modern perspective, the course turns to films, dramas, cartoons and short stories, which serve as the basis for discussing the modern recreations of historical events, characters, and Korean culture more broadly. In addition to details of the works themselves, topics will include Korea's place in the context of a Sino-centric world order; the significance of two writing systems, hanmun (literary Chinese) and han'gul (Korean vernacular writing); gender and literary practice; and the dynamic relationship between tradition and creativity. No knowledge of Korean history or language is required. All readings in English. Fulfills premodern elective for EALC major.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

KOREA 4017 Third-Level Modern Korean I
This course is designed for students who have completed Second Level Modern Korean I & II or those with equivalent proficiency. The course aims to further develop students' communicative competence and proficiency in speaking, listening, writing, and reading while deepening their understanding of Korean culture at the high intermediate level. Throughout the course, students will develop the cultural and linguistic understanding necessary to communicate for various personal and social purposes. By the end of the course, students will be able to participate in detailed conversations on various familiar topics such as travel, leisure activities, health, traditions, holidays, and beliefs using complex sentences. Students can expect to read simple articles and write essays of 250-350 words. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

KOREA 4018 Third-Level Modern Korean II
This course is intended for students who have completed Third-Level Modern Korean I or have an equivalent level of proficiency. The primary goal of the course is to enhance students' communicative competence and proficiency in speaking, listening, writing, and reading while also deepening their understanding of Korean culture at the high intermediate level. By the end of the course, students will be able to participate in detailed conversations on various familiar and unfamiliar topics and social situations in a culturally appropriate manner. They will also be able to comprehend main ideas and supporting details in non-complex aural and written stories across various contexts and read articles, narrative, and descriptive texts. Students will also be able to describe, explain, and compare using structures and vocabulary items at the high intermediate level in writing and speaking. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

KOREA 4027 Fourth-Level Modern Korean I
This course is intended for students who have completed the Third Level Modern Korean I & II or possess equivalent proficiency. The course's main objective is to develop student's language skills in speaking, listening, reading, and writing, with a greater emphasis on reading and writing while enhancing their understanding of Korean

culture. The class explores various topics related to Korea and Korean culture, utilizing a primary textbook and a range of authentic materials such as newspaper articles, literature, films, and video clips that are relevant to the topics. Through these materials, students will be able to express their ideas convincingly and precisely in Korean on Korea-related topics. Additionally, students will work on improving their Korean proficiency in vocabulary and hanja (Chinese characters) at an advanced level and perfecting their sentence structure for oral and written communication in various formats. By the end of the course, students will have developed advanced-level language skills, a deeper understanding of Korean culture, and the ability to communicate their ideas in Korean effectively. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS BU: IS EN: H
Typical periods offered: Fall

KOREA 4028 Fourth-Level Modern Korean II
This course aims to help students enhance their Korean language proficiency and knowledge of Korean culture, history, and society to an advanced level. Throughout the course, students will participate in various activities, such as discussions, presentations, and reading and writing exercises based on materials such as movies and readings that provide rich cultural, historical, and sociopolitical information about Korea. Additionally, using authentic materials throughout the course provides students with opportunities to be exposed to the authentic Korean language in various situations. Students will continue to expand their advanced-level vocabulary and hanja (Chinese character) knowledge and refine their sentence structure skills for effective oral and written communication in various formats. Students are required to take the placement exam unless they are advancing from the previous level.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

KOREA 4037 Contemporary Korean I
This is an advanced to high-advanced level Korean course in standard modern Korean. Emphasis is placed on developing an advanced level of reading proficiency in Korean and writing ability in Korean for an academic or professional purpose.

East Asian Languages and Cultures Major

Program Requirements

- **Total Units Required:** 27-47 units (24 upper-level units, plus 3-23 prerequisite units); 33-53units for students pursuing Senior Honors
- **Grade Requirement:** C– or above; Pass/No Pass grades do not count toward major requirements

Prerequisites

- First and second levels of the chosen language: Chinese, Japanese, or Korean (or the equivalent) (0-20 units)
- Students are required to complete one of the following civilization courses (3 units):

Code	Title	Units
CHINA 2270	Chinese Civilization	3
JAPAN 2260	Japanese Civilization	3
KOREA 2230	Korean Civilization	3

Requirements

Students must complete eight courses for a minimum of 24 upper-level units (3000 level or above), including the following:

1. Students are required to complete one EALC seminar course (topic varies by semester). The EALC seminar may also fulfill one of the premodern or modern requirements (3 units).

Code	Title	Units
EALC 3800	EALC Seminar (premodern)	3
EALC 3810	EALC Seminar (modern)	3

2. Students are required to complete two courses focusing on the premodern era (6 units); one course must be chosen from the following:

Code	Title	Units
CHINA 3410	Early and Imperial Chinese Literature	3
JAPAN 3320	Japanese Literature: Beginnings to Nineteenth Century	3
KOREA 3700	When Tigers Smoke: Songs and Stories From Traditional Korea	3

3. Students are required to complete two courses focusing on the modern era (6 units); one course must be chosen from the following:

Code	Title	Units
CHINA 3420	Modern and Contemporary Chinese Literature	3
JAPAN 3330	The Modern Voice in Japanese Literature	3
KOREA 3520	Literature of Modern and Contemporary Korea	3

4. Students must complete one approved 4000-level capstone course (prime majors). The capstone course may also fulfill one of the premodern or modern requirements (3 units).
    a. The capstone course is taken during the senior year and must be a course offered by EALC faculty. Writing-intensive courses and language courses cannot fulfill the capstone requirement. Majors are required to present on their capstone course at the EALC Senior Symposium, which is held in the spring.
5. The remaining four (prime majors) or five (second majors) upper-level courses are electives and chosen in consultation with the advisor (12-15 units).
6. **Latin Honors:** Students wishing to pursue senior honors may complete a senior honors thesis. This option, which also entitles the student to Latin Honors, requires a minimum of a 3.65 grade point average. The thesis is researched and written over two semesters for a total of 6 units of credit; this requirement is in addition to the 24 upper-level units required for the major. Students must enroll in EALC 4998 during the fall of their senior year and in EALC 4999 during the spring of their senior year. Majors are required to present their senior honors thesis at the EALC Senior Symposium, which is held in the spring.

Additional Information

- Language placement is required for this program. Please consult the East Asian Languages and Cultures Field of Study page (p. 429) for details.
- Language courses require a grade of B– or better to continue to the next level. Those who do not meet this requirement may either repeat the course or earn at least a B– in an approved equivalent course (either during the summer or in a study abroad program).
- With advisor approval, students may include two courses in a related area offered outside of the department among the 24 upper-level units. (For example, a student may take one course in the Film and Media Studies program or Department of Art History and Archaeology that focuses on East Asia.)
- Courses for the major must be taken for credit.

Study Abroad

Up to 6 units of credit may be applied toward the major from one semester abroad, and up to 12 units of credit may be applied from two semesters abroad.

Transfer Credit

Students who wish to transfer credits from other institutions (non-study abroad units) for use toward the major must have approval from the director of undergraduate studies. With approval, students may transfer a total of 9 units from other U.S. institutions. University policy specifies that at least half of the units for the major must be completed in residence at Washington University. Therefore, no more than 12 units in total can be applied to the major whether the credits are earned via study abroad or transfer credit.

- Students are strongly encouraged to participate in a study abroad program. Please refer to the EALC website for more information about study abroad programs.
- No more than 3 units of independent study may be counted toward the required 24 upper-level units.

Departmental Honors

EALC awards Departmental Honors to majors as an acknowledgment of exemplary work in the major.

- Prime and second majors are eligible.
- Students seeking “High Distinction in EALC” or “Highest Distinction in EALC” must complete the requirements of the department’s Latin Honors program.
- For all EALC honors, students must participate actively in department-run or recommended events, such as special lectures, conferences/symposia, workshops, or films.

Highest Distinction in EALC

- Students must have a within-major GPA of ≥3.86 at the time of graduation, and they must have participated in the department’s Latin Honors program.

High Distinction in EALC

- Students must have a within-major GPA of 3.65 to 3.85 at the time of graduation, and they must have participated in the department’s Latin Honors program.

Distinction in EALC

- Students must have a within-major GPA of ≥3.65 at the time of graduation, and they must not have participated in the department’s Latin Honors program.

East Asian Languages and Cultures Major, Chinese Specialization

Program Requirements

- **Total Units Required:** 27-47 (24 upper-level units, plus 3-23 prerequisite units); 33-53 for students pursuing Senior Honors
- **Grade Requirement:** C- or above; Pass/No Pass grades do not count toward major requirements

Prerequisites

- First and second levels of Chinese (or the equivalent) (0-20 units)
- Students are required to complete one of the following Civilization courses (3 units):

Code	Title	Units
CHINA 2270	Chinese Civilization	3
JAPAN 2260	Japanese Civilization	3
KOREA 2230	Korean Civilization	3

Requirements

Students must complete eight courses for a minimum of 24 upper-level units (3000-level or above), including the following. Five of the eight courses must focus on Chinese (15 units).

1. Students are required to complete one EALC seminar course (topic varies by semester). The EALC seminar may also fulfill one of the premodern or modern requirements (3 units).

Code	Title	Units
EALC 3800	EALC Seminar (premodern)	3
EALC 3810	EALC Seminar (modern)	3

2. Students are required to complete two courses focusing on the premodern era (6 units). One course must be chosen from the following:

Code	Title	Units
CHINA 3410	Early and Imperial Chinese Literature	3
JAPAN 3320	Japanese Literature: Beginnings to Nineteenth Century	3
KOREA 3700	When Tigers Smoke: Songs and Stories From Traditional Korea	3

3. Students are required to complete two courses focusing on the modern era (6 units). One course must be chosen from the following:

Code	Title	Units
CHINA 3420	Modern and Contemporary Chinese Literature	3
JAPAN 3330	The Modern Voice in Japanese Literature	3
KOREA 3520	Literature of Modern and Contemporary Korea	3

4. One approved 4000-level capstone course (prime majors). The capstone course may also fulfill one of the premodern or modern requirements (3 units).
    a. The capstone course is taken during the senior year and must be a course offered by EALC faculty. Writing-intensive courses and language courses cannot fulfill the capstone requirement. Majors are required to present on their capstone course at the EALC Senior Symposium, which is held in the spring.
5. The remaining four (prime majors) or five (second majors) upper-level courses are electives and chosen in consultation with the advisor (12-15 units).
6. **Latin Honors:** Students wishing to pursue senior honors may complete a senior honors thesis. This option, which also entitles the student to Latin Honors, requires a minimum of a 3.65 grade point average. The thesis is researched and written over two semesters, for a total of 6 units; this requirement is in addition to the 24 upper-level units required for the major. Students must enroll in EALC 4998 Independent Work for Senior Honors (3 units) during the fall of their senior year and in EALC 4999 Independent Work for Senior Honors (3 units) during the spring of their senior year. Majors are required to present their senior honors thesis at the EALC Senior Symposium, which is held in the spring.

Additional Information

- Language placement is required for this program. Please see the Overview page (p. 429) for details.
- Language courses require a grade of B- or better to continue to the next level. Those who do not meet this requirement may either repeat the course or earn at least a B- in an approved equivalent course (either during the summer or in a study abroad program).
- With advisor approval, students may include two courses in a related area offered outside of the department among the 24 upper-level units. (For example, a student may take one course in the Film and Media Studies program or the Department of Art History and Archaeology that focuses on East Asia.)
- Courses for the major must be taken for credit.

Study Abroad

Up to 6 units of credit may be applied toward the major from one semester abroad, and up to 12 units of credit may be applied from two semesters abroad.

Transfer credit

Students who wish to transfer credits from other institutions (non-study abroad units) for use toward the major must have approval from the director of undergraduate studies. With approval, students may transfer a total of 9 units from other U.S. institutions. University policy specifies that at least half of the units for the major must be completed in residence at Washington University. Therefore, no more than 12 units in total can be applied to the major whether the credits are earned via study abroad or transfer credit.

- Students are strongly encouraged to participate in a study abroad program. Please refer to the EALC website for more information about study abroad programs.
- No more than 3 units of independent study may be counted toward the required 24 upper-level units.

Departmental Honors

EALC awards Departmental Honors to majors as an acknowledgment of exemplary work in the major.

- Prime and second majors are eligible.
- Students seeking "High" or "Highest Distinction in EALC" must complete the requirements of the department's Latin Honors program.
- For all EALC Honors, students must participate actively in department-run or recommended events, such as special lectures, conferences/symposia, workshops, or films.

Highest Distinction in EALC

- Students must have a within-major GPA of ≥3.86 at the time of graduation, and they must have participated in the department's Latin Honors program.

High Distinction in EALC

- Students must have a within-major GPA of 3.65 to 3.85 at the time of graduation, and they must have participated in the department's Latin Honors program.

Distinction in EALC

- Students must have a within-major GPA of ≥3.65 at the time of graduation, and they must not have participated in the department's Latin Honors program.

East Asian Languages and Cultures Minor

Program Requirements

Total Units Required: 18 units

Grade Requirement: C- or above; Pass/No Pass grades do not count toward minor requirements

Required Courses

- Two semesters of one of the chosen languages: Chinese, Japanese, or Korean
- At least 9 units must be from 3000-level courses or above

1. **Students are required to complete one of the following Civilization courses (3 units):**

Code	Title	Units
CHINA 2270	Chinese Civilization	3
JAPAN 2260	Japanese Civilization	3
KOREA 2230	Korean Civilization	3

2. **Students are required to complete one of the following courses focusing on the premodern era (3 units):**

Code	Title	Units
CHINA 3410	Early and Imperial Chinese Literature	3
JAPAN 3320	Japanese Literature: Beginnings to Nineteenth Century	3
KOREA 3700	When Tigers Smoke: Songs and Stories From Traditional Korea	3

3. **Students are required to complete one of the following courses focusing on the modern era (3 units):**

Code	Title	Units
CHINA 3420	Modern and Contemporary Chinese Literature	3
JAPAN 3330	The Modern Voice in Japanese Literature	3
KOREA 3520	Literature of Modern and Contemporary Korea	3

4. **One upper-level (3000/4000 level) elective course: course must be non-language and offered by EALC (course subject: CHINA, JAPAN, KOREA, EALC) (3 units)**

Additional Information

- Language placement is required for this program. Please visit the Overview tab of the East Asian Languages and Cultures page (p. 429) for details.
- Students must earn at least a B- or better in language courses to continue to the next level. Students who do not meet this requirement may either repeat the course or earn at least a B- in an approved equivalent course (either during the summer or in a study abroad program).
- Basic Chinese and basic Korean: students must take both semesters of basic and one semester of regular language to fulfill the two-semester language requirement. Two semesters of basic language do not fulfill the language requirement.
- Courses for the minor must be taken for credit.
- No more than 3 units of transfer or study abroad non-language courses may be applied to the minor.
- Students are strongly encouraged to participate in a study abroad program. Please refer to the EALC website for more information about study abroad programs.

Economics

The Economics program explores the problems of a modern economy and introduces the methodological tools that economists use. It emphasizes the development of analytical models and their application to important economic, social and political issues, such as inflation, unemployment, taxation, inequality, poverty, pollution, government decision-making, and regulation. Our faculty, which is made up of leading teacher-scholars, includes specialists in game theory, microeconomics, macroeconomics, industrial organization, monetary economics, financial economics, and public finance.

The study of economics contributes to a broad liberal arts education and helps students develop superior problem-solving skills. It is an excellent course of study to pursue, whether students plan to enter the workforce after graduation or are considering graduate work in law, engineering, or the social sciences. Economics also provides exceptional preparation for careers in business, either immediately after graduation or after completing master's-level graduate work in business (e.g., MBA, MS Finance). For further information, consult the Department of Economics website. Economics students with business interests typically complete at least one internship to obtain practical business experience, and it may be possible to obtain academic credit for that internship. Students should discuss with their advisors the possibility of taking courses, such as accounting, in the Olin Business School.

In addition to the Economics major, there are two interdisciplinary majors: Economics and Computer Science and Mathematics and Economics. In each major, students complete the core courses in the respective fields along with a set of electives that are complementary to both fields. Further information is available in the Majors section (p. 454) of this page. As noted previously, students are strongly encouraged to complete at least one internship and to complement their studies with appropriate course work from the Olin Business School.

Courses

ECON 1499 First-Year Seminar: Economics and Society
Economics and Society is a first-year seminar, open to interested students, and is without prerequisites of any kind. Two to four topics will be chosen for in-depth discussion during the semester. Possible topics include, but are not limited to: inequality (domestic and international); globalization (pros/cons); big banks and their role in financial crises; wars and national security; health and disease; capitalism and socialism. The seminar seeks to spread economic literacy among tomorrow's opinion leaders, improve their ability to analyze social issues, help them explain their viewpoint to others, and understand different opinions. (The course cannot be used for Economics major/minor credit.) 3 units.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Spring

ECON 1501 Introduction to Microeconomics
Determination of prices; distribution of national income; theory of production. For a thorough introduction to economics, Econ 1021 also should be taken.
Credit 3 units. A&S IQ: SSC, AN Art: NSM, SSC EN: S
Typical periods offered: Fall, Spring, Summer

ECON 1502 Introduction to Macroeconomics
Business fluctuations: inflation, recession; monetary and fiscal policy; economic development. For a thorough introduction to economics, Econ 1011 should also be taken.
Credit 3 units. A&S IQ: SSC, AN Art: NSM, SSC EN: S
Typical periods offered: Fall, Spring, Summer

ECON 1971 Introductory Research Seminar in Microeconomics
Exploration of principles of microeconomics in a seminar setting. Reading from primary sources by authors including Adam Smith, Thomas Schelling, and Kenneth Arrow. Internet exchanges of critiques and questions will take place prior to each class. Class will follow a question and answer format based on internet exchanges. Each student will produce and present a short research paper using economic concepts (including substitution, opportunity cost, market equilibrium). Paper topics address specific current economic questions such as: Are costs higher in poorer areas? Do injuries go up or down for university students with more restrictive alcohol policies? This course substitutes for Econ 1011 for all major and minor requirements. Enrollment limited to 20 students.
Credit 3 units. A&S IQ: SSC

ECON 1996 Economics Coursework Completed Abroad
Credit 12 units.

ECON 1997 Economics Elective: 100-Level
Credit 3 units. EN: H, S

ECON 1998 Economics Elective
This course is used for transcribing Econ Elective units in use for EMA (AP macro)
Credit 3 units.
Typical periods offered: Fall, Spring, Summer

ECON 2196 Practical Applications
Credit for Economics internships.
Credit 3 units.
Typical periods offered: Fall, Spring, Summer

ECON 2900 Internship
Students may receive up to 3 units of credit for an unpaid internship. The internship must be approved by the Career Center and supervised by a faculty member. Note: See Career Center for further information. This course does not count toward the major or minor in Economics.
Credit 3 units.
Typical periods offered: Fall, Spring

ECON 2920 Undergraduate TA
In this course, an advanced undergraduate can assist a faculty member in the teaching of an undergraduate Economics class. Students can enroll after their selection by a supervising faculty member, which occurs after an application (on the department website) is submitted and reviewed, perhaps in conjunction with an interview with the supervising faculty member. Students can enroll in only one section per semester. Students will be expected, at a minimum, to attend lectures and hold office hours. Specific grading duties will be determined by the supervising faculty member, in accord with Arts & Sciences policies. The typical number of units earned is 2, with the possibility of a maximum of 3, per semester. This course can be repeated for P/F credit. Prerequisite: instructor permission. Units: variable - 2 typical; 3 maximum.
Credit 3 units.
Typical periods offered: Fall, Spring

ECON 2970 Sophomore Research Seminar
How do you find an economically-relevant research topic? What are the different types of economic papers? How do you write like an economist? This seminar is aimed to help sophomores develop research skills in economics. Work will consist of an original research paper to be completed by the student by the end of the semester under supervision of the instructor. The paper will describe an economic problem, survey the relevant research literature, and outline a contribution to the field.
Credit 3 units. EN: S
Typical periods offered: Fall

ECON 2996 Economics Course Work Completed Abroad
Abroad Course Work
Credit 12 units.
Typical periods offered: Fall, Spring, Summer

ECON 2997 Economics Elective: 200-Level
student will receive elective credit
Credit 3 units. EN: H, S
Typical periods offered: Fall, Spring, Summer

ECON 3150 Introduction to Econometrics
Econometrics is the development and application of statistical techniques for the measurement of economic phenomena. This course is your initial study of econometric theory and practice. Topics include: translation of economic theory into statistical models, statistical foundations of econometrics, preregression analysis bivariate and multiple regression techniques, hypothesis testing, multicollinearity, specification error, autocorrelation, errors in variables, identification, and simultaneous estimation.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring, Summer

ECON 3210 Money and Banking
Money and the monetary system; money creation by the banking system; central bank functions; monetary theory and economic policy. Prerequisite: Econ 1011 & 1021.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring, Summer

ECON 3220 Financial Markets and Analysis
This course is a rigorous introduction to financial markets, financial institutions, and their purpose and functions in the economy. In financial markets, trade is essentially money now for money in the future. As such, financial decisions must often take into account future events, whether those be related to individual stocks, portfolios, or the market as a whole. This course explores the topics related to the level and structure of interest rates and of stock prices, portfolio choice, basic investment theory, and arbitrage pricing theory, among others. Prerequisites: Econ 1011 and Econ 1021.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

ECON 3230 Financial Intermediaries in the Market Economy
Financial intermediaries, like all financial institutions, channel funds from those who wish to save to those who need to borrow. Examples include commerical banks, savings and loans, mutual funds and pension funds. At the micro level, these institutions expand opportunities by allowing savers to convert current income into future spending, and permitting borrowers to convert future income into current spending. At the macro level they spur economic growth by acting as a channel through which savings can finance investment. However, savers can lend directly to firms, so intermediaries must serve other functions as well. This course analyzes in detail the opportunities and risks presented by financial intermediaries, the larger economic benefits of having both direct and indirect methods of lending, and the need for regulation. We also consider the implications for these institutions of changes in communications technology and the growth and globalization of capital markets.
Credit 3 units.

ECON 3290 Consumer Economics, Finance and Investment
Course discusses principles of individual economic behavior relating to risks, lifestyles, time streams of income and expenditure, and taxes; and analyzes individual investment and spending decisions for insurance, pensions, various types of securities, real estate, savings, etc. Prerequisites: Econ 1011 & 1021.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall

ECON 3310 Behavioral Economics
Behavioral economics incorporates insights from psychology and other social sciences into economics, with the goal of increasing the realism and accuracy of standard economic models. Topics discussed include: risk, beliefs, overconfidence, limited attention, social preferences, emotions, self-control, frames, and nudges. The framework developed from these topics can be applied to wide-ranging concerns such as decisions about savings and consumption choices; financial market participation and credit card use; gambling; procrastination; charitable giving; and happiness. Students may have the opportunity to participate in in-class/lab experiments. Prerequisite: Econ 1011.
Credit 3 units. A&S IQ: SSC BU: BA EN: S
Typical periods offered: Summer

ECON 3320 Health Economics
Analysis of consumer demand for health care, medical technology, and the role of health insurance. Emphasis placed on behavior of the physician (whether he acts as an agent for the consumer or on his own behalf); on the use of paramedics, preventive care, outpatient care, and the general market organization of the health industry. The major concern will be the rising cost of health care and appropriate public policy responses. Prerequisite: Econ 1011.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall

ECON 3345 Labor and the Economy
Economic analysis of labor markets. Theory and policy applications of labor supply and labor demand; explanations of wage and income differentials; migration and immigration; discrimination; labor unions; unemployment. Prerequisite: Econ 1011.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring, Summer

ECON 3350 Environmental Policy
Course will examine the relationship between environmental economics and environmental policy. The course will focus on air pollution, water pollution, and hazardous wastes, with some attention given to biodiversity and global climate change. The course will examine critically two prescriptions that economics usually endorses: (1) balancing of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; (2) use of market incentives (e.g., prices, taxes, or charges) or property rights instead of traditional command-and-control regulations to implement environmental policy.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall

ECON 3371 International Trade and Finance
Concept of comparative advantage arguments for free trade and protectionism and balance of payments adjustment over fixed and flexible exchange rates. Prerequisites: Econ 103B and Econ 104B
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall

ECON 3372 International Finance
This course will present ideas and concepts pertaining to international macroeconomics and the global economy. Topics to be covered include: the balance of payments; exchange rate determination; international macroeconomics; and international macroeconomic policy and policy coordination. Particular attention will be paid to the role of the United States in the global macroeconomic arena. The material will be presented through a combination of lectures and case discussions. Prerequisite: Econ 104B.
Credit 3 units. A&S IQ: SSC BU: IS
Typical periods offered: Fall

ECON 3373 International Economics
Explores consequences of economic integration from various perspectives in international trade: Ricardian, Heckscher-Ohlin, and the New International Trade Theories. Topics include patterns of trade, protectionism, international factor movements, balance of payments, exchange-rate determination, international policy coordination, the international capital market, multinational and international investments, and patterns of international business. Prerequisites: Econ 1011 and Econ 1021, or permission of instructor.
Credit 3 units. A&S IQ: SSC BU: IS
Typical periods offered: Fall

ECON 3375 Hierarchy and Organization in Economic Life
Introduction to new institutional perspectives on problems of economic growth and transition. Basic issues in economic development discussed from a microeconomic perspective with attention paid to the role of political economy, credible commitment, institutional constraints, and the problem of high transactions costs. Material from the literature on industrial organization and management also used to show similarities between hierarchical issues both in political economy and within large firms. Discussion of transition economies of Central and Eastern Europe and transformation in the wealthiest economies, like the United States and Japan, as well as traditional questions of underdevelopment. Students required to submit several short and one or two longer essays for discussion and revision. Enrollment limited to 15 students. Prerequisite: Econ 103B.
Credit 3 units. A&S IQ: SSC, WI

ECON 3380 Microeconomics of Public Policy
We will explore the key public policy issues, with a focus on the prominent issues facing our country today. In particular, we have selected ten topics that will be investigated: poverty, crime, discrimination, big business, international trade, immigration, healthcare, education, energy and the environment. We will identify and objectively analyze the problems surrounding each of the issues, including their causes, consequences, and measurement. Prerequisite: Econ 1021.
Credit 3 units. A&S IQ: SSC, WI EN: S

ECON 3390 Economics of Education
Introduction to the various aspects of the economics of education. It applies the tools of economic analysis to educational policy and problem solving. Topics include cost-benefit analysis of education, the signaling vs. human capital debate, race and gender issues in education, education production functions, and financing education at the elementary, secondary, and post-secondary levels. Emphasis placed on individual and social choice in education. Prerequisite: Econ 103B
Credit 3 units. A&S IQ: SSC
Typical periods offered: Summer

ECON 3610 The Economics of the Law
Course examines the principal findings of the scholarly literature on the application of economics to law, including such topics as public regulation of the market, concepts of property rights in law and economics, the effect of property rights assignment on income distribution, negligence, no-fault insurance, deterrence and the economic theory of remedies, evidence on the deterrent effect of punishment, and the economics of organized crime. Emphasis will be primarily on the application of theory to specific legal issues. Prerequisite: Econ 103B or permission of instructor.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall

ECON 3620 History of Economic Analysis
The purpose of this course is to introduce students to some of the theories and doctrines that constitute the main paradigms from which economists and policy makers approach the world. Rather than focusing on the whole history of economic thinking, we will focus on practical issues, including questions such as the following: What determines the wage of labor? Why is monopoly considered a bad thing? At what level does an interest rate become usury? We will consider how these questions have been framed and answered at different points in time and in different cultures. Important components of this course are participation in in-class discussion and essays submitted on the practical issues discussed throughout the semester. Prerequisites: Econ 1011 and Econ 1021.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Spring

ECON 3630 Politics, Economics and Welfare
Covers both theoretical and applied aspects of political economy: the justification of the state; problems of cooperation over public goods; intervention by government in the economy; questions of equality and efficiency; cooperation between states over common resources; trade, economic integration, international monetary stability and the operation of the global economy. Prerequisite: Econ 103B.
Credit 3 units. A&S IQ: HUM, SSC BU: BA, HUM

ECON 3631 Political Economy
The course introduces students to the field of political economy. The approach is to apply the economic theory and concepts to political actors and behavior. Students are expected to learn: how economic and political forces may shape the incentives and constraint of political actors (e.g. voters and policy makers); the role of institutions in shaping both political behavior and policy outcomes. Prerequisite: Econ 1011.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

ECON 3632 International Political Economy
The focus is on the political and economic relationships between nation states, considering both cooperation and conflict. We first consider the evolution of the international order since 1945, covering trade, monetary arrangements and commodity agreements. We also consider questions of hegemonic stability (based on the United States and Britain in the nineteenth and twentieth centuries). We conclude with a historical discussion of political economic relationships between Britain, France, Spain, and the United States in the eighteenth and early nineteenth centuries. Prerequisites: Econ 103B and Econ 104B.
Credit 3 units. A&S IQ: SSC BU: IS

ECON 3640 American Economic History
Basic theoretical concepts applied to analyze the changing structure and performance of the American economy from colonial times to the present. Prerequisites: Econ 1011 & 1021. Prior completion of, or current enrollment in, Econ 413 (or Econ 413W) is strongly recommended.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Spring

ECON 3650 The Economics of Criminal Justice
In this course, we will use the theoretical and empirical tools of economics to study the criminal justice system. By constructing models of how arrest/prosecution/conviction/sentencing/etc. decisions are made, we will evaluate these decisions for errors and especially for bias. We will also see how economists test hypotheses about the criminal justice system using the same types of natural experiments they use to study markets. Prerequisites: Econ 1011 and SDS 2200.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

Typical periods offered: Spring

ECON 3690 Socio-Economic Perspectives on Inequality
This course examines the definition and impact of social and economic inequality. Beginning with a review social, economic, and philosophical perspectives of inequality, the course considers the measurement of inequality, international comparisons of inequality, and policies designed to eliminate inequality. Students should be comfortable with methods of quantitative social science. Prerequisite: Econ 1011 is recommended.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Summer

ECON 3710 Game Theory and Its Business Applications
This course provides an introduction to game theory and its applications in real life economic decisions. Students will learn fundamental game theory concepts, including(but not limited to) Nash equilibrium, subgame perfect Nash equilibrium, etc. Students will also be exposed to how game theory can be applied to a wide variety of economic decisions: pricing, rm's decision of entering or exiting a market, etc. The ultimate goal of this course is to develop students' rational and game-theoretic thinking. Prerequisites: High-school mathematics, Econ 1011 or the equivalent. 3 units.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Summer

ECON 3810 Economics of Sports
The economics of sports focuses on the business aspects of professional and intercollegiate sports in the United States. Questions posed and addressed in this course include: do the benefits of publicly subsidized stadiums justify their costs; how do the four major sports differ in terms of the structure of their labor markets; how far away are Division I schools from Title IX compliance; are sports betting markets consistent with the theory of efficient markets; does the success of a school's intercollegiate sports program enhance alumni donations or the number of applications to that school; how can salary models be used to assist the determination of player value; how can attendance models be used to assist the marketing strategies of that team or school. Additionally, the students will be able to meet some key members of the St. Louis sports scene, and will have an opportunity to assist with creating an economic impact analysis on a local sporting event. Prerequisite: Econ 1011.
Credit 3 units. A&S IQ: SSC EN: S

ECON 3840 Economic Realities of the American Dream
Exploration of the realities of economic life in the U.S. and how they correspond to the American Dream. Interdisciplinary perspectives from economics, sociology, and other areas of social inquiry. Emphasis on the consistency between empirical data and different concepts of the American Dream. Specific topics to include sources of economic growth and changing living standards, unemployment, impact of globalization on U.S. citizens, economic mobility, poverty and inequality, and social justice. Prerequisites: An introductory course in economics or sociology, or consent of the instructors. All students who pre-register will be put on the wait list. Students will receive an email immediately after pre-registration requesting more information.
Credit 3 units. A&S IQ: SSC, WI Art: SSC BU: BA EN: S
Typical periods offered: Fall

ECON 3970 Junior Research Seminar
Seminar for juniors to develop research skills. Work will consist of an original research paper to be completed by the student by the end of the semester under supervision of the instructor. The research topic should apply economic theory and data analysis skills. Students are encouraged to collect original data where feasible. Some group meetings may be scheduled but most of the contact will be in individual meetings by appointment with the instructor. Registration in this course is encouraged for students considering senior honors work in economics. Note that this course does not satisfy economics major requirements. Prerequisites: Econ 4011 and 4021 (concurrent registration is acceptable), junior standing, GPA of 3.3 or higher.
Credit 3 units. A&S IQ: SSC EN: S

ECON 3996 Economics Coursework Completed Abroad
student will receive study abroad credit
Credit 12 units.
Typical periods offered: Fall, Spring, Summer

ECON 3997 Economics Elective: 300-Level
student will receive elective credit
Credit 3 units. EN: H, S
Typical periods offered: Fall, Spring, Summer

ECON 4001 Intermediate Microeconomic Theory
Analytic theory of consumer and producer behavior under perfect and imperfect competition. Coverage of demand theory (indifference curves and utility functions) and preferences under uncertainty, including expected utility and risk aversion. Development of general equilibrium under pure exchange, including the concepts of competitive equilibrium and Pareto efficiency. Discussion of the role of time as it pertains to interest rates, discounting and net present value. Analysis of standard monopoly and simple oligopoly problems. Development of non-cooperative game theory, including strategic and extensive-form equilibria and Nash and sub-game perfect equilibria. Thorough training in intermediate theory would require both intermediate microeconomics and intermediate macroeconomics.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

ECON 4002 Intermediate Macroeconomic Theory
National income and labor market measurement. Business cycle facts and consideration of alternative explanations for business cycle phenomena. Development of Solow growth model, along with theories of endogenous growth and an examination of reasons for differences in growth rates across counties. General equilibrium description of firms and consumers in labor and product markets. Implementation of monetary and fiscal policy, and exploration of the impact of policy changes on the macroeconomy. Prerequisites: Econ 1021 and Econ 4011.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

ECON 406 Current Topics in Health Economics
In this advanced undergraduate course, we will mix textbook surveys of major topics in health economics, with student-led critiques of current and classic journal articles, possibly including student presentations of own projects. The course is designed to prepare you to be informed participants in the current debate about health care policy. Core topics will include the social and individual determinants of health, health behavior and health care choices, and development of a critical perspective about the data sources and methodologies in health care research. Prerequisites: Econ 4011 and Econ 413.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Spring

ECON 4150 Introduction to Econometrics With Writing
Econometrics is the development and application of statistical techniques for the measurement of economic phenomena. This course is your initial study of econometric theory and practice. Topics include: translation of economic theory into statistical models, statistical foundations of econometrics, preregression analysis bivariate and multiple regression techniques, hypothesis testing, multicollinearity, specification error, autocorrelation, errors in variables, identification, and simultaneous estimation. The 3 writing assignments and the final paper will provide you an opportunity to formulate an economic model, estimate the model with appropriate data, and interpret the results. Prerequisites: Econ 4011 and Math 2200 or equivalent. PLEASE NOTE: Requests for on-line registration will be wait listed, and students will be enrolled according to Economics major/minor status and student level (e.g., priority to Level 8 Econ majors). Students should also select the A subsection.
Credit 3 units. A&S IQ: SSC, WI Art: SSC EN: S
Typical periods offered: Fall, Spring

ECON 4151 Applied Econometrics
Introduction to econometrics as it is applied in microeconomics. Emphasis is on hands-on implementation of the models covered in the course. Topics related to the analysis of microeconomic data include cross-section and panel data linear models and robust inference; instrumental variables estimation; simultaneous equation models; models for discrete choice; and truncation, censoring and sample selection models.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

ECON 4160 Topics in Econometrics: Microeconometrics
This is a topics class in econometrics but with a strong focus on microeconometrics. This course has two main objectives: (i) Teach students various advanced theoretical econometric tools to the students and (ii) guide them through the process of writing a research paper that explores an empirical research question in economics using adequate econometrics tools. We will study theory and application of methods of data analysis developed for microdata pertaining to individuals, households and firms. More, precisely, We will study recent development of theory and methods for analyzing selective samples and analyzing discrete choice models. Prerequisites: Econ 4011 and (Econ 413, Econ 413W, or Econ 536). Math 309 recommended. Students should co-enroll in the A subsection. 3 units.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall

ECON 4210 Topics in Financial Economics: Asset Pricing
The objective of the course is to develop the basic economic models that can be used to study the valuation of different financial assets and to discuss how to confront the theory with the evidence from financial markets. The course will develop the basic model of investment under uncertainty and discuss portfolio choices in static and dynamic settings as well as market equilibria and the impact of news on the forecast-ability of excess returns. The course will describe valuation in incomplete asset markets (e.g. arbitrage pricing theory) and the extension to the valuation of firms and real estate assets.
Credit 3 units. A&S IQ: SSC Art: SSC
Typical periods offered: Fall

ECON 4211 Topics in Financial Economics: Investments
This course surveys recent developments in investments and portfolio management. The course aims to provide students with a structure for thinking about investment decisions from the perspective of a portfolio manager. We start by understanding fundamental concepts for investment theory: modern asset valuation and portfolio selection under uncertainty. We will proceed to investigate various sources of risk which financial institutions are exposed to, such as interest rate risk, credit risk and liquidity risk, and study how financial institutions manage these risks. The course will also introduce student to investment evaluation techniques. We will explore recent innovations in financial markets, as well as various frictions that arise in markets. Students will have the opportunity to apply concepts learned in class on a virtual investment and trading platform, StockTrak. Prerequisites: Econ 4011, Math/SDS 2200 (or Math/SDS 3200, Math/SDS 3211, QBA 120 and QBA 121, ESE 326.) or PolSci 363 with permission from instructor.
Credit 3 units. A&S IQ: SSC Art: SSC
Typical periods offered: Fall

ECON 4212 Topics in Financial Economics
The objective of the course is to develop the basic economic models that can be used to study the valuation of different financial assets and to discuss how to confront the theory with the evidence from financial markets. The course will develop the basic model of investment under uncertainty and discuss portfolio choices in static and dynamic settings as well as market equilibria and the impact of news on the forecast-ability of excess returns. The course will describe valuation in incomplete asset markets (e.g. arbitrage pricing theory) and the extension to the valuation of firms and real estate assets.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall, Spring

ECON 4220 Open Economy Macroeconomics
This course will begin with a review of international trade theory, of the balance of payment accounts and their relationship to international borrowing and lending. We will then study the asset approach to exchange rates determination, exchange rate behavior in the short and in the long run, and the relationship of exchange rates with prices and output. The course will also explore monetary and fiscal policy under both fixed and floating exchange rates, macroeconomic policy coordination and optimum currency areas, international debt problems of developing countries and their relation to stabilization program. Prerequisite: Econ 4021.
Credit 3 units. A&S IQ: SSC Art: SSC BU: IS EN: S
Typical periods offered: Spring

ECON 4230 The Economics of Financial Intermediation
The structure and the role of banks have changed tremendously. The historically-traditional activity of granting loans and collecting deposits has evolved into a much richer and more complex set of financial contracts. The separation between financial asset trading activity and traditional commercial bank activity that was typical of the financial system in the period after the World War II also disappeared. Coincident with the evolution of financial institutions was the development of the asymmetric information model. The role of banks in the economy can be explained with the tools developed in these models of the economics of information, as a microeconomic theory of banking does not exist when information is symmetric and markets are complete. The economics of information literature is also used to explain the evolution of financial institutions and markets, and to understand the consequences of that evolution for economic outcomes (such as economic development and financial crises) and for monetary policy choices (such as central bank interventions, regulations and changes in the payments system). Prerequisite: Econ 4011; Econ 4021 recommended, but not required.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Fall, Spring

ECON 4240 Money & Monetary Policy
We will explore several classic questions in the theory of money. What is money? What forms does money take? Why is money necessary-why is there a demand for money? What determines the supply of money? What is the debate on central versus free banking? Should banking be regulated, and, if so, why and how? What determines inflation? Should nations enter into fixed exchange rate regimes, or should they let the value of their monies be market-determined? What are the tensions that arise in fixed exchange rate regimes and common currency areas? How should policymakers view cryptocurrencies? Is a central bank digital currency desirable? These, and other questions, are explored within the context of theories that model the microfoundations of monetary exchange explicitly.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Spring

ECON 4250 Understanding the Financial Crisis
The global financial crisis of 2007-2009 was the most severe since the Great Depression. The goal of the course is to provide tools to analyze key elements of this crisis. We will move from a corporate finance perspective - to understand the behavior of firms and financial institutions - to a macroeconomic perspective - to make this behavior in aggregate outcomes and policy responses. Topics covered include: The U.S. crisis in historical and international perspective; corporate finance of firms and banks in closed and open economy; monetary and fiscal policy intervention; the open economy dimension of the financial crisis; the European Sovereign Debt crisis.
Credit 3 units. A&S IQ: SSC Art: FAAM, SSC EN: S
Typical periods offered: Spring

ECON 4280 Capital Market Imperfections and Entrepreneurial Finance
Analysis of problems in capital markets for firm financing and institutional structures that address these problems. Investigation of asymmetric information between firms and potential investors and associated moral hazard and adverse selection problems that raise the cost of funds and constrain firm growth. Empirical tests for the presence of financing constraints on firms. A substantial portion of the course explores the role of venture capital, especially in the high-tech sector of the United States economy where venture capital is important for commercializing cutting-edge science. Prerequisite: Econ 4011. Econ 413 is recommended.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall

ECON 4310 Behavioral Economics and Experimental Economics
Behavioral economics is an effort to incorporate ideas from psychology into economic models of behavior. We will focus on popular experimental anomalies, including the Allais and Rabin paradoxes, ultimatum bargaining, the centipede and public goods contribution games. We will examine the extent to which these are consistent with standard economic theory and how they may contradict it. The primary focus will be a critical examination of psychological theories of non-standard preferences including loss aversion, probability weighting, reciprocity, fairness and present bias. Theories of incorrect beliefs and systematic biases such as money illusion and procrastination will be covered. The class will include an introduction to experimental methods in economics, including hands-on experience in the MISSEL laboratory. A sound grounding in economic theory is essential to the course.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

ECON 4312 Game Theory and Social Behavior
Game theory is the formal toolkit for analyzing situations in which payoffs depend not only on your actions (say, watching a baseball game), but also others' (e.g., whether you meet your friends at the game). In this course, you'll learn how to solve one-shot and repeated games using tools like Nash equilibrium, subgame perfection, Bayesian Nash equilibrium, and the one-off deviation principle. We'll apply these insights to human social behavior?examining why people are altruistic, where our sense of social norms come from, and more. Along the way, discussion will leverage empirical data from lab and field experiments about how people actually behave. Thus, one of our objectives is to become familiar with experimental economics as well. Prerequisite: Econ 4011.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Spring

ECON 4315 Market Design
The objective of this course is to study how to design mechanisms to allocate scarce resources and how to create successful marketplaces. We will primarily consider two topics: (1) two-sided matching markets, such as the National Resident Matching Program and the Kidney Exchange for transplants, and (2) auctions used by Google, Facebook, etc. Time permitting, a third topic will be the problem of designing and regulating market platforms, such as the e-commerce markets run by eBay, Amazon, and Craigslist, and applications marketplaces run by Apple, Google, etc., as well as the electronic financial trading platforms run by the NYSE.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

ECON 4325 Public Finance
The study of fundamental forms of market failure that provide the economic rationale for government action. The first third of the class examines market failure when an economy contains externalities and public goods and the general nature of public policies that address these issues. The second third addresses particular public policies, with a focus on their intended and unintended consequences and their costs. The final third addresses taxation. Topics include the measurement and evaluation of tax burdens, the federal personal income tax, tax evasion, and proposals for fundamental tax reform. Prerequisite: Econ 4011.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall

ECON 4326 Economics of Public Policy
This course will cover the logic underlying the economics and politics of public policies concerning issues such as international trade, monetary policy, fiscal policy, market reforms, pollution control, economic inequality and the welfare state more generally. The general question we will address, using specific cases, is that of the role of markets and government in an economy. The course relies heavily on the concepts and methods of microeconomics and macroeconomics. There are many theories of how economic policies work and considerable debate as to what can be done and what should be done. We will examine the facts (past and present) and then examine the theories and their explanatory power. We will also organize the class into research groups that will address specific economic policies issues. Prerequisite: Econ 4011.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Spring

ECON 4330 Innovation and Intellectual Property: Theory and Practice

Innovation - that is: figuring out better and cheaper ways of satisfying human desires - is the key to improving our well being. It is not patient saving and accumulation that makes us so much better off than we used to be: capital accumulation is only the conduit through which the innovation juices flow. The question is what drives it? How come some societies are apparently much more innovative than others? How come we have the impression that most useful inventions took place in the last three centuries? Are there policies that help fostering innovation and others that hurt? The course tries to address these questions. Economists have many theories of innovation, and some better than others. We will look at the theories, we will examine the facts (past and present), then we will go back to the theories and reconsider their explanatory power. With this background we approach the debate about Intellectual Property, what it is and what it is not good for, whose interests it serves and whose well being it thwarts. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

ECON 4335 Industrial Organization

Theoretical and empirical analysis of the presence and value of competitive forces in the United States economy. Theories of industrial organization and development of criteria for performance of noncompetitive industries. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

Typical periods offered: Fall, Spring

ECON 4345 Labor Economics

Economic analysis of labor markets. Theory and evidence on supply of and demand for labor, explanation of wage and income differentials; impact of education on human skills and productivity. Prerequisite: Econ 401 and Econ 413.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

Typical periods offered: Spring

ECON 4350 Economics of Environment and Resources

Historical development of theory of scarcity and growth; conservation movements; concepts and facts of environmental externalities; contemporary ecological issues, public policies, and regulation. Prerequisite: Econ 401.

Credit 3 units. A&S IQ: SSC

ECON 4360 Urban Economics

Economic function of the city and the role of the city in a national economy. Local decision making; financing of local government expenditures. An analysis of selected urban problems, such as causes and effects of housing market segregation; decay and abandonment, landlord-tenant relations, crime, and urban transport systems. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

Typical periods offered: Fall

ECON 4370 International Trade

Analysis of international trade from different perspectives: Ricardian, Hecksher-Ohlin, and new trade theories. Topics include patterns of trade, gains from trade, protectionism, international factor movements, political economy of trade policy, balance of payments, exchange-rate determination, and international investment. Rigorous application of microeconomic theory to trade issues and in-depth discussion of current international policy questions. Prerequisite: Econ 4011. Econ 413 is recommended.

Credit 3 units. A&S IQ: SSC BU: IS EN: S

ECON 4372 International Finance: Theory and Policy

Theory and policy of international finance: balance of payments accounting, balance of payments adjustment under fixed and flexible exchange rates, international financial cooperation. Prerequisites: Econ 402 with a B or better, Math 132 and 320.

Credit 3 units. A&S IQ: SSC

Typical periods offered: Fall

ECON 4385 Household Finance, Bankruptcy, and Credit

Economic aspects of household financial decisions and survey of data on U.S. consumer financial conditions. Topics include inter-temporal decision making; the mathematics of amortizing debt; bankruptcy decisions and the legal process of bankruptcy; and the effect of asymmetric information on access to consumer credit. This is a writing intensive class, with multiple writing assignments, a term paper developed in three or four steps, with required revisions, and a class presentation based on the final paper. Prerequisite: Economics 401.

Credit 3 units. A&S IQ: SSC, WI EN: S

Typical periods offered: Fall, Spring, Summer

ECON 4390 Economics of Education

The economics of education involves analysis of the economic and social determinants and consequences of education. Because each person's education is an investment in human capital which allows the individual to contribute to society in a productive way, education becomes a crucial determinant of an economy's ability to achieve high growth with high wages, low unemployment and strong social cohesion. This course will address three essential topics from the wide-ranging field of the economics of education. The first is demand-side oriented and includes: (i) the measurement of the returns to education in the labor market (human capital theory; the central idea of education as human capital investment); and (ii) a characterization of the education production function, which relates the various inputs affecting a student's learning (schools, families, peers, neighborhoods, etc.) to measure outputs including labor market success, graduation rates and standardized test scores. The second important topic involves political economy and the supply side: the financing and provision of education. The third part of the course is devoted to the links between education and economic development, including cross-country differences in schooling, returns to schooling and per-capita income. Prerequisites: Econ 4011, Econ 4021, and Econ 413.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

Typical periods offered: Fall

ECON 4410 Macroeconomics of Inequality

In this course, we study the driving forces of inequality across countries, across time, and across individuals within a country. We will define and measure inequality using standard measures of economic well-being, such as income, wealth, and consumption of market goods, and we will also consider broader measures such as health outcomes. Historical cross-country data, microdata, and specific case studies will be used to evaluate theories of the sources of inequality. Key variables to be evaluated include physical capital investment, education and human capital investment, technological progress, robotization, international trade, and financial markets, among others. Prerequisites: Econ 4011 and Econ 4021.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

Typical periods offered: Fall, Spring

ECON 4420 Computational Macroeconomics

This course provides a more in depth look into quantitative methods used in contemporary macroeconomic analysis. We will cover numerical methods used in dynamic optimization. In practice, we will apply these methods to solve two major models used in macroeconomic analysis, using both Excel and Matlab. The

Neoclassical Growth Model and its variants are used to study aggregate trends and aggregate effects of government policy. The lifecycle model is used to examine questions involving decision-making over the lifecycle. We will learn how to use empirical observations for the purpose of calibrating model parameters and how to conduct policy evaluation in the context of calibrated models. Our policy evaluation will focus on fiscal policy (taxes) and social security issues. Prerequisites: Econ 4011 and Econ 4021.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

ECON 4425 Macro Public Finance: Inequality, Redistribution, and Insurance
This is an advanced undergraduate course on the macroeconomics of public finance, with a particular focus on the government's role in redistributing resources and providing insurance through the tax-and-transfer system and labor market policies. In the first (and longer) part we study inequality in income, wealth, and consumption as well as risks individuals face. We proceed to study how the U.S. welfare state redistributes resources and provides insurance. Most of the first part is then devoted to studying the trade-offs the government faces in the design of the welfare state. In the second part we focus specifically on imperfect labor markets and how institutions shape labor market outcomes. Prerequisites: Econ 4011 and Econ 4021.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Spring

ECON 4480 Current Macroeconomic Issues
Review and extension of macroeconomic models from Econ 4021 from a comparative perspective and use of these models to analyze current macroeconomic and policy issues. Topics include recession and recovery, long-term growth, saving and social security, investment, and monetary policy. Multiple writing assignments that emphasize critical analysis of theoretical perspectives and readings applied to current macroeconomic topics. Writing will be revised to improve logical structure, clarity, and style. Enrollment limited to 15 students with priority given to senior economics majors. Prerequisite: Econ 4021. All students who pre-register will be put on the wait list. Students will receive an email immediately after pre-registration requesting more information.
Credit 3 units. A&S IQ: SSC, WI Art: SSC EN: S
Typical periods offered: Fall, Spring

ECON 4485 Seminar in Macro and Monetary Economics
Topics chosen by instructor from modern empirical and theoretical research papers in macroeconomics. Student participation in class discussions of research papers is essential. Topics vary, but may include the link between capital markets, consumption and investment, imperfect competition and macroeconomic fluctuations, real business cycles models, and post-Keynesian macroeconomics. Prerequisites: Econ 4011, 4021, 413. PLEASE NOTE: Requests for on-line registration will be wait listed. Undergraduates must receive instructor permission to be enrolled. Graduate students should register for Econ 586B.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Fall

ECON 4490 Modern Macroeconomic Research
In-depth analysis of some major issues in current monetary and macroeconomic research. Topics include construction of aggregate measures of the money supply using microeconomic theory, the time consistency of monetary policy, non-linear economic models, and applications of chaos to economics. Students should be comfortable with the application of differential calculus to economic problems. Prerequisite: Econ 402.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall

ECON 4510 Development Economics
This course investigates issues related to the development of the economics of third-world countries. Topics include economic growth, poverty, corruption, and human capital accumulation, with an emphasis on education and health-related policies. The course provides an in-depth understanding of the role of the state and the impact of specific public policies designed to encourage development. Empirical examples are drawn from Asia, Latin America, and the African subcontinent. Prerequisites: Econ 4011 and Econ 413 or Econ 413W.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

ECON 4520 Topics in Growth and Development
This course highlights important empirical facts concerning growth and development in various countries at different development stages. Fundamental growth theory is then provided for explaining these facts systematically and for evaluating the consequences of commonly adopted development policies. Topics vary, but may include population, human capital and labor market development, R&D and innovation, finance and growth, modernization and industrial transformation, world income disparities and poverty problems, institutions and political economy issues, environmental and social factors, and international trade and economic integration.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

ECON 4521 Advanced Topics in Modern Economic Growth
This course studies economic theories that explain the observed patterns of economic development across time and space. What explains the growth of the world economy since the Industrial Revolution? Why are the level and the growth rate of per-capita income so different across countries? What explains the decline of manufacturing, and its growth in the early stages of development? What are the determinants of inequality and risk faced by individuals in different countries? Theories featuring the role of investment in physical and human capital, technology, coordination, financial markets, and environmental variables will be presented. Theories will be evaluated using historical data and detailed case studies. This course is designed to complement Econ 472. Prerequisites: Econ 4011.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Spring

ECON 4530 Development Problems of Third World Countries
Introduction to analysis of economic problems of third world countries; emphasis on economic growth and income distribution. Prerequisites: Econ 103B and 104B.
Credit 3 units. A&S IQ: SSC

ECON 4567 Auction Theory and Practice
This course will use the theoretical and empirical tools of economics to study auctions, which are one way of buying and selling goods (or services). The course begins with a consideration of optimal bidding in different types of auctions. We will explore how to design auction rules that maximize the seller's revenue, or minimize the buyer's cost (such as in the case of government procurement). We will also study how to design auction rules that improve efficiency by reducing collusion by bidders. The course will conclude by using econometrics to analyze real-world auction data to estimate preferences and cost distributions; to determine optimal reserve prices; and to answer some questions related to auction design. Familiarity with computer programming/estimation, such as with MATLAB, R, or Julia, will be helpful. Prerequisites: Econ 4011 and Econ 413 or Econ 413W.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

ECON 4610 Economics of Law
The course provides an introduction to the economic analysis of law. Mastery of basic economic approaches to the study of legal institutions is a valuable skill that benefits a broad range of students. The course will cover the fundamental contributions made by the economic approach in five core areas: Property, Contracts, Torts, Litigation and Crime. Time permiting we will cover other areas of the law such as Family, Privacy and Discrimination Law. About 50% of the course will be devoted to formal economic modeling of legal issues. Approximately 30% of the course will focus on empirical tests of the insights from the early theoretical contributions in the field and the theoretical models developed in class. The remaining 20% of the course will use classic legal cases to illustrate the real-world applications of the theoretical models developed in class. Prerequisite: Econ 4011. Econ 413 is recommended.
Credit 3 units. A&S IQ: SSC

ECON 4620 Western Economic History
A detailed discussion of the circumstances surrounding the industrialization of the western world in the eighteenth and nineteenth century, with special attention given to Britain, France, and Germany. Various hypothesis regarding economic growth and development are examined in the light of the latest evidence and with the use of basic economic reasoning. Prerequisite: Econ 401, or Econ 103B and written permission of instructor.
Credit 3 units. A&S IQ: SSC BU: IS
Typical periods offered: Summer

ECON 4630 Economic Systems in Theory and Practice
Theory and practice of mercantilism, capitalism, and socialism. Historical and contemporary examples considered, with contemporary focus on Latin America, Eastern Europe, and Hong Kong. Primary emphasis on choices open to individuals; pecuniary and non-pecuniary prices paid to exercise those choices. Statistical evidence and case studies will be used. Course requirements include weekly written critique. Prerequisite: Econ 401.
Credit 3 units. A&S IQ: SSC BU: BA, IS
Typical periods offered: Fall

ECON 4640 The Poverty of Nations
This is a course that focuses on the failures of economic development and the extreme and persistent poverty we find in South Asia, Subsaharan Africa and other parts of the developing world, including major urban centers. What exactly is poverty? Who are the poor? How many of them are there? Why are they poor? What individual or collective actions can they (or we) take to improve their lot? Prerequisites: Econ 4011 and Econ 4021 or permission of instructor.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Fall

ECON 4650 Great Transformation
This course asks the question, What brought about the Industrial Revolution and the emergence of the contemporary 'capitalist, market society'? In particular, is there a fundamental difference between the values, norms and cultures in pre-capitalist societies compared to post-Industrial Revolution societies? The answer to these questions depends on whether the Industrial Revolution represents an historical discontinuity - a Great Transformation turning-point - or whether, instead, there is more continuity in human history than the Great Transformation theory would have us believe. These questions are important as we try to determine whether the current market society is sustainable or whether (and where and when) we should expect a Great Transformation to emerge. The course will address these questions via readings from the best lessons of psychology, economics, anthropology and history, with a particular focus on data and empirical results. Classes will consist of a combination of lectures and class discussions, supplemented by individual- and group-based writing assignments. Prerequisites: Econ 4011 and Econ 4021 or permission of instructor.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Fall

ECON 4660 Historical Development of Economic Ideas
Selected readings in the masterworks of economic literature: Adam Smith, Malthus, Ricardo, Mill, Jevons, Marshall, and others. Prerequisites: Econ 401 and 402.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall, Spring, Summer

ECON 4670 Political Economy of Regulation
Focus on different forms of government intervention in the marketplace, including economic or traditional regulation, social regulation and antitrust activity. Theories of regulation and anti-trust are examined in conjunction with more applied industry case studies. Within the government, the interaction between bureaucratic agencies and Congress is explored in the development and implementation of regulatory policy. Prerequisite: Econ 401.
Credit 3 units. A&S IQ: SSC Art: SSC
Typical periods offered: Fall

ECON 4710 Game Theory
This course covers advanced applications of Game Theory in economics. Topics include expected utility, strategic-form and extensive-form games with perfect information, Bayesian games, infinitely repeated games, dominance, Nash equilibrium and its refinements. We apply these tools to study strategic situations in industrial organization, auctions, bargaining, voting, and signaling games. Prerequisites: Econ 4011 and SDS 2200.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall

ECON 4720 Optimization and Economic Theory
An introduction to mathematical optimization and its applications within economics. The course is designed for, and should be taken by, all undergraduates considering graduate study in economics, but all interested students are welcome.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

ECON 4770 Decision Under Risk and Time
This course covers topics on individual decision making, subject to risk and to inter-temporal considerations. The emphasis is on economic modeling, which combines both theory and reality. The course will begin by establishing a framework for analyzing preferences about risky outcomes. This framework will be applied to practical problems such as portfolio choice, asset pricing and insurance. The remainder of the course will consider decision-making in the long run, with focuses on the life-cycle consumption-versus-saving decision, the problem of time inconsistency and other real-world implications. Prerequisites: Econ 4011, Math 2200.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Fall

ECON 4775 Economic Choices Under Uncertainty
Theories of gambling, insurance, and other economic choices that increase or decrease exposure to risk. Prerequisite: Econ 401.
Credit 3 units. A&S IQ: SSC

ECON 4780 Mathematical Economics
Principal mathematical formulations used in economic analysis. Acquaints student with those aspects of economic theory typically formulated in mathematical terms. Prerequisites: Econ 401 and Math 132.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall

ECON 4790 Advanced Topics in Economic Analysis
Selected topics in economic theory, building on Econ 401 and/or 402. Topics vary with instructor. Prerequisites: Math 132 or 141, Math 320, and Econ 401 and Econ 402.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall, Spring, Summer

ECON 4830 Mathematical Economics
The objective of this course is to develop the mathematical tools necessary for the study of intermediate micro- and macro-economic theory and the advanced electives in economics. The principal focus will be the calculus of multivariate functions (including total and partial differentiation), unconstrained and constrained optimization of multivariate functions, and implicit and inverse function rules. Time permitting, additional topics will be introduced. Economics majors and minors must take this course (or Calculus III) prior to, or concurrently with, Intermediate Microeconomics . Students who have taken, or are taking, Calculus III may take this course as well.
Credit 1 unit. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

ECON 4840 Introduction to STATA
This short course introduces students to the data analysis and statistical software tools used in upper-level econometrics and applied economics courses. The course is designed to serve as a bridge between introductory econometrics and practical work with real-world databases. The course will be held in the computer classroom so that students can obtain hands-on experience with data preparation, workflow, and modeling using the Stata statistical software package. Emphasis throughout the course is placed on examples of applications in economics.
Credit 1.5 units.
Typical periods offered: Fall, Spring

ECON 4841 Economic Analysis With Excel
This mini course offers students the opportunity to master the advance functionality of Microsoft Excel, and to apply those skills to common economic, statistical, and financial problems. Even those familiar with the basic functioning of Excel may be surprised to learn how little of its full capability most users access. Though basic functions will be covered, our focus will be on leveraging Excel's more advanced functions, analytical tools, reporting templates, and linking features to manage multiple workbooks, manipulate data across files, automate tasks, and produce publication quality charts, tables, and graphs. In addition to providing hands-on experience using Excel's advanced capabilities, the course is designed to serve as a bridge between introductory econometrics and practical work with real-world datasets. The course will be held in the computer classroom so that students can obtain practical experience preparing data, managing workflow, and presenting results. Added emphasis throughout the course will be placed on examples with applications in economics. Prerequisites: prior completion of, or concurrent enrollment in, Econ 413 (or equivalent).
Credit 1.5 units.
Typical periods offered: Fall, Spring

ECON 4850 Economic Analysis With Python
Coming soon!
Credit 3 units.
Typical periods offered: Spring

ECON 4970 Research in Economics
Opportunity to work as part of a research project under faculty supervision. Note: this course does not count toward the major or minor in Economics. May be repeated for credit.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

ECON 4980 Honors Seminar
Advanced application of economic theory to policy problems. This is the first part of the two-course sequence for seniors writing an honors thesis, and it is taken in the fall semester of the senior year. This course may not be used to satisfy major requirements. Prerequisite: invitation into the Honors in Economics with Thesis track of the department's Honors Program.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Fall

ECON 4990 Study for Honors
Independent reading and research under faculty direction leading to a Senior Honors Thesis. This is the second part of the two-course sequence for seniors writing an honors thesis, and it is taken in the spring semester of the senior year. This course may not be used to satisfy major requirements. Prerequisite: invitation into the Honors in Economics with Thesis track of the department's Honors Program.
Credit 3 units.
Typical periods offered: Spring

ECON 4999 Independent Work
Prerequisites: senior standing and permission of the supervising faculty member. See Academic Coordinator for further details. Note: This course does not count toward the major or minor in Economics. Credit to be determined; maximum 6 units.
Credit 6 units.
Typical periods offered: Fall, Spring

Economics and Computer Science Major

Program Requirements

- **Total Units Required:** 54
- **Grade Requirement:** All courses in the major (including MATH and SDS courses) must be completed with the letter grade option, and a grade of at least C- must be earned in each.

The College of Arts & Sciences and the McKelvey School of Engineering have developed a major that allows students interested in both economics and computer science to combine these two complementary disciplines efficiently, without having to pursue them as two separate majors.

Engineering students who declare this major must fulfill the distribution requirements and all other requirements for the BS in Applied Science degree (p. 1160) in the McKelvey School of Engineering. Arts & Sciences students who declare this major must fulfill the distribution requirements and all other requirements for a BA degree (p. 988) in addition to the specific requirements listed below. It is possible to earn the Financial Economics Specialization (p. 468) in conjunction with this major (prime or second), and interested students should consult with the Academic Coordinator (dottie@wustl.edu) in the Department of Economics.

Required Courses

Code	Title	Units
ECON 1501	Introduction to Microeconomics	3
ECON 1502	Introduction to Macroeconomics	3
ECON 4001	Intermediate Microeconomic Theory	3
ECON 3150 Introduction to Econometrics **or** ECON 4150 Introduction to Econometrics with Writing		3
MATH 1510 Calculus I (AP credit may satisfy this requirement) **or** MATH 1515 Calculus I with Foundations		3
MATH 1520	Calculus II (AP credit may satisfy this requirement)	3
SDS 3020 Elementary to Intermediate Statistics and Data Analysis* **or** SDS 3030 Statistics for Data Science I **or** ESE 3260 Probability and Statistics for Engineering		3
CSE 2400 Logic and Discrete Mathematics **or** MATH 3010 Foundations for Higher Mathematics or MATH 3015 Foundations for Higher Mathematics with Writing		3
CSE 2407	Data Structures and Algorithms	3
CSE 3407	Analysis of Algorithms	3
CSE 1301	Introduction to Computer Science	3

* Of these options, SDS 3020 is the preferred course.

Elective Courses

1. Three 3-unit economics electives drawn from any ECON 4001 prerequisite course, including ECON 4002.
   a. Economics electives of particular relevance include (but are not limited to) ECON 4315 Market Design, ECON 4151 Applied Econometrics, ECON 4160 Topics in Econometrics: Microeconomics, ECON 4335 Industrial Organization, ECON 4420 Computational Macroeconomics, and ECON 4710 Game Theory.
2. Three 3-unit computer science electives drawn from the list below:

Code	Title	Units
CSE 2107	Introduction to Data Science	3
CSE 3101	Introduction to Intelligent Agents Using Science Fiction	3
CSE 3104	Data Manipulation and Management	3
CSE 3300	Rapid Prototype Development and Creative Programming	3
CSE 3302	Object-Oriented Software Development Laboratory	3
CSE 3401	Parallel and Sequential Algorithms	3
CSE 4001	Indepent Study	varies; max. 3
CSE 4101	Ai and Society	3
CSE 4102	Introduction to Artificial Intelligence	3
CSE 4106	Data Science for Complex Networks	3
CSE 4107 Introduction to Machine Learning* **or** ESE 4170 Introduction to Machine Learning and Pattern Classification		3
CSE 4205	Programming Systems and Languages	3
CSE 4207	Cloud Computing with Big Data Applications	3
CSE 4305	Database Management Systems	3
CSE 4507	Introduction to Visualization	3
CSE 5104	Data Mining	3
CSE 5107	Machine Learning	3
CSE 5108	Human-In-The-Loop Computation	3
CSE 5403	Algorithms for Nonlinear Optimization	3
CSE 5507	Advanced Visualization	3

* Students planning to complete CSE 5107 should try to complete CSE 4107 as the prerequisite course. Non-engineering students may substitute SDS 3020 or SDS 3030 for the ESE 3260 prerequisite for ESE 4170.

Economics Major

Program Requirements

- **Total Units Required:** 37-39
- **Grade Requirement:** All courses in the major (including MATH and SDS courses) must be completed with the letter grade option, and a grade of at least C- must be earned in each.

Required Courses

Code	Title	Units
ECON 1501	Introduction to Microeconomics	3
ECON 1502	Introduction to Macroeconomics	3
ECON 4001	Intermediate Microeconomic Theory	3
ECON 4002	Intermediate Macroeconomic Theory	3
ECON 3150 Introduction to Econometrics **or** ECON 4150 Introduction to Econometrics with Writing		3
ECON 4830 Mathematical Economics **or** MATH 2130 Calculus III		1
MATH 1510 Calculus I **or** MATH 1515 Calculus I with Foundations		3
MATH 1520	Calculus II	3
One of the following:		
SDS 2020	Elementary Probability & Statistics	
SDS 3020	Elementary to Intermediate Statistics and Data Analysis	
SDS 3030	Statistics for Data Science I	
ESE 3260	Probability and Statistics for Engineering	
DAT 1200 Managerial Statistics I **and** DAT 1201 Managerial Statistics II		

Elective Courses

Four upper-level (3-unit) economics electives (12 units), at least two of which must have an ECON 4001 or ECON 4002 prerequisite.

Additional Information

- No credit is awarded in the economics major from the AP Microeconomics or the AP Macroeconomics exam(s).
- AP credit for MATH 1510, MATH 1520, and/or SDS 2020 is accepted in the economics major.

Study Abroad

- Majors selecting an approved study abroad program (for one semester) may receive transfer credit for ECON 3150. Note: many study abroad programs in Europe do not offer the equivalent of ECON 3150 in the spring semester. A grade of C (or higher) is required in study abroad coursework. Preapproval from the department's study abroad advisor is required.
- Majors selecting an approved study abroad program (for one semester) may also receive transfer credit for two economics electives, which count in the major as 3000-level electives (regardless of the abroad course prerequisite). A grade of C (or higher) is required in study abroad coursework. Preapproval from the department's study abroad advisor is required.
- Majors selecting an approved study abroad program for a full year of study will be handled on a case-by-case basis in terms of meeting degree requirements. All majors must complete at least 4, 4000-level courses from the Department of Economics.

Transfer Credit

- Majors may receive a maximum of 3 units of transfer credit from other colleges/universities to replace ECON 1501, ECON 1502, or a 3000-level economics elective. A minimum grade of C- must be earned. This policy is distinct from studying in an approved study abroad/study away program, but, in total, no more than 9 units of transfer credit will be accepted for a major matriculating as a freshman.
- Transfer credit for MATH or for SDS courses is approved by the respective departments and is accepted by the Department of Economics for major credit.
- For further details on policies and procedures, please refer to the Undergraduate Guide and the Department's website, or schedule a meeting with the department's Academic Coordinator.

Contact: Dorothy Petersen, Academic Coordinator
Phone: 314-935-5644
Email: dottie@wustl.edu
Website: http://economics.wustl.edu

Mathematics and Economics Major

Program Requirements

- **Total Units Required:** 57
- **Grade Requirement:** All required courses (both lower- and upper-level) must be taken for a letter grade and completed with a grade of C– or better.

Required Courses*

Code	Title	Units
CSE 1301	Introduction to Computer Science	3
ECON 1501	Introduction to Microeconomics	3
ECON 1502	Introduction to Macroeconomics	3
ECON 3150 Introduction to Econometrics **or** ECON 4150 Introduction to Econometrics With Writing		3
ECON 4001	Intermediate Microeconomic Theory	3
ECON 4002	Intermediate Macroeconomic Theory	3
MATH 1510	Calculus I	3
MATH 1520	Calculus II	3
MATH 2130	Calculus III	3
MATH 3010 Foundations for Higher Mathematics **or** MATH 3015 Foundations for Higher Mathematics With Writing		3
MATH 3300	Matrix Algebra	3
SDS 3020 Elementary to Intermediate Statistics and Data Analysis **or** SDS 3030 Statistics for Data Science I **or** SDS 4010 Probability		3
Total Units		**36**

* Students who complete the MATH 2801 Honors Mathematics I and MATH 2802 Honors Mathematics II sequence will be considered to have completed MATH 1510, MATH 1520, and MATH 2130. These students are also recommended to bypass MATH 3010/MATH 3015 and MATH 3300, for which they may substitute any other upper-level Mathematics courses.

Elective Courses

Majors must complete seven electives drawn from the lists below. Three electives must be drawn from the Economics list, and three electives must be drawn from the Mathematics list. The remaining elective may come from either department or from the preapproved elective list below.

Economics

One of the three Economics electives can be any Economics course with ECON 4001 or ECON 4002 as a prerequisite, including from an approved study abroad program. The other two Economics electives must come from the following list:

Code	Title	Units
ECON 4151	Applied Econometrics	3
ECON 4160	Topics in Econometrics: Microeconometrics	3
ECON 4210	Topics in Financial Economics: Asset Pricing	3
ECON 4211	Topics in Financial Economics: Investments	3
ECON 4220	Open Economy Macroeconomics	3
ECON 4230	The Economics of Financial Intermediation	3
ECON 4310	Behavioral Economics and Experimental Economics	3
ECON 4312	Game Theory and Social Behavior	3
ECON 4315	Market Design	3
ECON 4320	Auction Theory and Practice	3
ECON 4325	Public Finance	3
ECON 4335	Industrial Organization	3
ECON 4345	Labor Economics	3
ECON 4360	Urban Economics	3
ECON 4380	Current Topics in Health Economics	3
ECON 4410	Macroeconomics of Inequality	3
ECON 4420	Computational Macroeconomics	3
ECON 4425	Macro Public Finance: Inequality, Redistribution, and Insurance	3
ECON 4510	Development Economics	3
ECON 4710	Game Theory	3
ECON 4720	Optimization and Economic Theory	3

Mathematics

The three Mathematics electives must come from the following list:

Code	Title	Units
MATH 3180	Introduction to Calculus of Several Variables *	3
MATH 3420	Graph Theory	3
MATH 3520	Differential Equations and Dynamical Systems *	3
MATH 4101	Introduction to Analysis	3
MATH 4102	Introduction to Lebesgue Integration	3
MATH 4150	Introduction to Fourier Series and Integrals	3
MATH 4160	Complex Variables	3
MATH 4301	Linear Algebra	3
MATH 4501	Numerical Applied Mathematics	3
MATH 4502	Topics in Applied Mathematics	3
MATH 4540	Partial Differential Equations	3
MATH 4560	Topics in Financial Mathematics	3
SDS 4010	Probability *	3
SDS 4720	Stochastic Processes	3

* Students choosing both MATH 3180 and MATH 3520 must complete four Mathematics electives from the list above. SDS 4010 can be taken for elective credit in the major if SDS 3020 or SDS 3030 is completed to satisfy the core requirements.

Preapproved Electives

One elective in the major can come from the following list:

Code	Title	Units
SDS 4020	Mathematical Statistics	3
SDS 4110	Experimental Design	3
SDS 4155	Time Series Analysis	3
SDS 4130	Linear Statistical Models	3
SDS 4140	Advanced Linear Statistical Models	3
SDS 4210	Statistical Computation	3
SDS 4310	Bayesian Statistics	3
SDS 4430	Statistical Learning	3
SDS 4440	Mathematical Foundations of Data Science	3

Additional Information

- Students cannot declare more than one major or minor in the Department of Economics. This restriction includes dual majors, such as Mathematics and Economics (and Economics and Computer Science). Dual majors are considered "in the department" even if they are declared in another department.
- It is possible to earn the Financial Economics Specialization in conjunction with this major (prime or second).

- With instructor permission, students may use any of the following for economics elective credit: ECON 8010, ECON 8011, ECON 8020, ECON 8021, ECON 8110, or ECON 8710.
- AP credit for ECON 1501, ECON 1502, MATH 1510, and/or MATH 1520 is accepted in the major. Consult with the Department of Mathematics and the Department of Economics for International Baccalaureate and British A-level policies.

Study Abroad

- Majors selecting an approved study abroad program (for one semester) may receive transfer credit for ECON 3150. **Note:** Many study abroad programs in Europe do not offer the equivalent of ECON 3150 in the spring semester. A grade of C (or higher) is required in study abroad coursework. Preapproval from the Department of Economics' study abroad advisor is required.
- Majors selecting an approved study abroad program (for one semester) may also receive transfer credit for up to two economics electives. (Majors completing two economics electives abroad are required to complete four economics electives in the major.) A grade of C (or higher) is required in study abroad course work. Preapproval from the department's study abroad advisor is required.
- Majors selecting an approved study abroad program for a full year of study will be handled on a case-by-case basis in terms of meeting degree requirements.

Transfer Credit

- Transfer credit — including study abroad approval — for economics courses, for mathematics courses, for probability/statistics courses, or for CSE 1301 is approved by the respective departments and is accepted for major credit.
- Majors may receive a maximum of 6 units of transfer credit from other colleges/universities to replace ECON 1501 and ECON 1502 (3 units of transfer credit per course). A minimum grade of C– must be earned. Preapproval by the Academic Coordinator (dottie@wustl.edu) in the Department of Economics is required.

For further details on policies and procedures, please refer to the Undergraduate Guide and the Department of Economics' website, or schedule a meeting with the department's Academic Coordinator (dottie@wustl.edu).

Contact:	Dorothy Petersen, Academic Coordinator
Phone:	314-935-5644
Email:	dottie@wustl.edu
Website:	http://economics.wustl.edu

Financial Economics Specialization for Economics Majors

By completing a specialized set of electives, majors (prime or second, including dual majors) can earn the Financial Economics Specialization.

Students should notify the department of their intent to earn the Financial Economics Specialization by completing the form on the department's website at least one semester prior to graduation.

Program Requirements

- Declared major in Economics (p. 465), Math+Economics (p. 466), or Econ+CSE (p. 464)
- Completion of extra elective(s) and an integrated set of electives (These details are described below and are specific to each major.)

Major in Economics

- **Total Units Required:** 37 to 39 (for the major) + 3 = 40 to 42 total units
- **Grade Requirement:** All courses must be completed with the letter grade option, and a grade of at least C- must be earned in each. (A grade of at least C is required in study abroad coursework.)

Students with a B.A. or second major in economics must do the following, in addition to completing the major requirements:

- Complete one additional economics elective at the 3000 or 4000 level, or complete FIN 3150.
- A minimum of three courses must be drawn from the approved "List of Financial Economics Electives" below or be approved substitutes from a study abroad program.

List of Financial Economics Electives

Code	Title	Units
ECON 3210	Money and Banking	3
ECON 3220	Financial Markets and Analysis	3
ECON 4210	Topics in Financial Economics: Asset Pricing	3
ECON 4211	Topics in Financial Economics: Investments	3
ECON 4230	The Economics of Financial Intermediation	3
ECON 4240	Money & Monetary Policy	3
FIN 3150	Capital Markets and Financial Management (approved if the student is **not** in Finance major/minor)	3

Major in Economics + Computer Science

- **Total Units Required:** 54 (for the major) + 3 = 57 total units
- **Grade Requirement:** All courses must be completed with the letter grade option, and a grade of at least C- must be earned in each. (A grade of at least C is required in study abroad coursework.)

Students pursuing this dual major through the McKelvey School of Engineering or Arts & Sciences must do the following, in addition to the major requirements:

- Complete one additional economics elective at the 3000 or 4000 level, or complete FIN 3150.
- A minimum of three of the four courses must be drawn from the approved "List of Financial Economics Electives" above or be approved substitutes from a study abroad program.

Major in Mathematics + Economics

- **Total Units Required:** 57 (for the major) + 3 = 60 total units
- **Grade Requirement:** All courses must be completed with the letter grade option, and a grade of at least C- must be earned in each. (A grade of at least C is required in study abroad coursework.)

Students with a major in Math+Econ have two options through which the Financial Economics Specialization may be earned.

Option 1 *(when completing the major with three Economics electives and four Math electives)*

- Complete one additional economics elective at the 3000 or 4000 level, or complete FIN 3150. Therefore, completion of the major plus the specialization requires four economics electives (or three economics electives and FIN 3150) and four math electives, subject to the constraints below:
  - The four math electives must come from the approved list for the major, or a student may complete three math electives from the approved list and one SDS elective from the preapproved electives list.
  - A minimum of three of the four total economics electives must be drawn from the approved "List of Financial Economics Electives" above or be approved substitutes from a study abroad program.
  - A minimum of three of the four total economics electives must come from the approved list for the major.

Option 2 *(when completing the major with four Economics electives and three Math electives)*

Students must complete the following:

- Four economics electives, where both of the following criteria must be satisfied:
  - At least two of the four electives must be drawn from the "List of Financial Economics Electives" above.
  - At least three of the four economics electives must be drawn from the approved list for the major.
- The three math electives must be drawn from the approved list for the major.
- In addition, for the specialization, students must complete MATH 4560.

Applied Microeconomics Minor

Program Requirements

- **Total Units Required:** 22-24
- **Grade Requirement:** All courses in the minor (including Mathematics) must be completed with the letter grade option, and a grade of at least C– must be earned in each course.

Required Courses

Code	Title	Units
ECON 1501	Introduction to Microeconomics	3
ECON 1502	Introduction to Macroeconomics	3
ECON 4001	Intermediate Microeconomics	3
MATH 1510 Calculus I **or** MATH 1515 Calculus I with Foundations		3
MATH 1520	Calculus II	3
MATH 4830 Mathematical Economics **or** MATH 2130 Calculus III		3
Total Units		**18**

Elective Courses

- One (3-unit) Economics elective having at least ECON 1501 and/or ECON 1502 as a prerequisite course
- One (3-unit) Economics elective having ECON 4001 as a prerequisite course

Prerequisites

The prerequisite courses for ECON 4001 are ECON 1501 and MATH 1520. In addition, ECON 4830 or MATH 2130 must be taken prior to or concurrently with enrollment in ECON 4001.

Additional Information

- No credit is awarded in the minor from the AP Microeconomics or the AP Macroeconomics exam(s). Similar policies exist for IB and British A-level coursework. Please refer to Arts & Sciences policies. Students electing to bypass one or both of the introductory courses (ECON 1501 and ECON 1502) must complete additional (3-unit) elective coursework at the 3000 level or higher to make up for the bypassed units.
- Minors may receive a maximum of 3 units of transfer credit from other colleges/universities, including from study abroad/study away programs, to replace one of the following: ECON 1501, ECON 1502, or a 3000-level economics elective. A minimum grade of C– must be earned, unless the transfer credit is from a study abroad/study away program. Students must complete study abroad/study away credit with a letter grade option, earning at least a grade of C.
- AP credit for MATH 1510 and/or MATH 1520 is accepted in the Economics minor.
- Transfer credit for MATH or SDS courses is approved by the respective departments and is accepted by the Department of Economics for minor credit.
- For further details on policies and procedures, please refer to the Undergraduate Guide and the department's website, or schedule a meeting with the department's Academic Coordinator.

General Economics Minor

Program Requirements

- **Total Units Required:** 22-24
- **Grade Requirement:** All courses in the minor (including mathematics) must be completed with the letter grade option, and a grade of at least C- must be earned in each.

Required Courses

Code	Title	Units
ECON 1501	Introduction to Microeconomics	3
ECON 1502	Introduction to Macroeconomics	3
ECON 4001	Intermediate Microeconomic Theory	3
ECON 4002	Intermediate Macroeconomic Theory	3
MATH 1510 Calculus I **or** MATH 1515 Calculus I with Foundations		3
MATH 1520	Calculus II	3
ECON 4830 Mathematical Economics **or** MATH 2130 Calculus III		1-3
Total Units		**19-21**

Elective Course

Students must complete one (3-unit) economics elective that has at least ECON 1501 and/or ECON 1502 as a prerequisite.

Prerequisites

The prerequisite courses for ECON 4001 are ECON 1501 and MATH 1520. In addition, ECON 4830 or MATH 2130 must be taken prior to or concurrently with enrollment in ECON 4001. The prerequisite courses for ECON 4002 are ECON 1502 and ECON 4001.

Additional Information

- No credit is awarded in the minor from the AP Microeconomics or the AP Macroeconomics exam(s). Similar policies exist for IB and British A-level coursework. Please refer to Arts & Sciences policies. Students electing to bypass one, or both, of the introductory courses (Econ 1501, Econ 1502) must complete additional (3-unit) elective coursework at the 3000-level or higher to make up for the bypassed units.
- Minors may receive a maximum of 3 units of transfer credit from other colleges/universities, including from study abroad/study away programs, to replace one of: ECON 1501, ECON 1502, or a 3000-level economics elective. A minimum grade of C- must be earned, unless the transfer credit is from a study abroad/study away program. Students must complete study abroad/study away credit with a letter grade option, earning at least a grade of C.
- AP, IB, and/or British A-level credit for MATH 1510 and/or MATH 1520 is accepted in the economics minor. Please refer to Arts & Sciences policies for further information.
- Transfer credit for MATH or for SDS courses is approved by the respective departments and is accepted by the Department of Economics for minor credit.
- For further details on policies and procedures, please refer to the Undergraduate Guide and the department's website, or schedule a meeting with the department's Academic Coordinator.

Education

The Department of Education at Washington University in St. Louis is an interdisciplinary community that bridges the theoretical and research foundations of education, traditional academic disciplines (e.g., sociology, psychology, history), and the professional practice of education. Our academic programs span a variety of disciplinary

perspectives, methodological approaches (e.g., quantitative, qualitative), and levels of analysis ranging from the individual to complex systems. Each of us works from a disciplinary perspective, but we embrace and utilize other perspectives because such disciplinary synergies are critical to understanding and impacting the complex world of education. Individually and as a community, we are working to change education and other systems that perpetuate inequity and inequality. Our departmental theme of **"Equalizing Educational Opportunity: Equity, Inclusion, and Success in Classrooms, Schools, and Communities"** encapsulates this work.

Whether a student's goal is to discover how humans learn or to better understand educational institutions and policies, the Department of Education offers students a chance to explore their interests, develop their skills, and begin their journey to a rewarding career through undergraduate programs in Educational Studies. Our academic programming views the learning pathway as part of a broader transdisciplinary framework of development and well-being. Conditions associated with education and youth development represent a problem space where persistent engagement and planning across political boundaries, health care providers, youth-serving organizations, and educational institutions are critical. We offer a vibrant student-centered community in which faculty and staff are invested in the mentoring and success of students. Many of our classes are smaller and thus allow for meaningful interactions with the education community.

The Department of Education offers an undergraduate major and minor in Educational Studies for persons interested in the study of educational processes and institutions. Students in the Educational Studies program apply the perspectives and methods of a number of disciplines to questions about educational institutions, educational processes, and the social and cultural factors that affect them. They often go on to pursue careers in policy, research, and leadership.

Majors

- Educational Studies Major (p. 481)

Minors

- Educational Studies Minor (p. 483)

Courses

EDUC 1101 First-Year Seminar
This first-year seminar will highlight various aspects of critical topics in K-12 education to consider the current strengths, weaknesses, opportunities, and threats in contemporary K-12 education. This will be primarily a discussion-based course covering topics such as (but not limited to) trauma-informed care and school-based mental health, advancing technology, restorative practices, design schools, and equity in education. The course will provide students with an opportunity to observe a classroom at the P-12 grade level(s) with varied and diverse student populations for the purpose of introduction to and analysis of the culture of schooling and classrooms.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA
Typical periods offered: Fall, Spring

EDUC 1996 Education Elective: 100-Level
This course is used for transcribing 1000-level EDUC elective units.
Credit 3 units. EN: H, S
Typical periods offered: Fall, Spring, Summer

EDUC 2000 Topics in Education
An examination and appraisal of major educational issues, drawing on normative frameworks, empirical research, and analytical literature. Seminar format. Topics vary by semester.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

EDUC 2010 Introduction to Education:
Drawing from social scientific perspectives, this course surveys educational research and policy in contemporary U.S. society. It considers the relationship among controversial policy issues (e.g., school choice, public school closure, urban redevelopment) and education. Finally, it examines the implications of recent changes in education for social inequality, mobility, and group relations.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall, Spring

EDUC 2060 Introduction to Education: Uncovering and Understanding Teachers and Teaching
What makes someone a teacher; both in their profession and personal identity? In this course, many of the issues that challenge, shape and define the practice and identity of classroom teachers are explored. Goals of the course include demystifying teaching and exploring it as an intellectual act; one that requires the bridging of research and theory to practice, careful planning and attention to detail, comprehensive knowledge of diverse students, responsiveness to/creation of the learning environment, and authentic representation of one's teacher identity. Students will embrace the art of pedagogical exploration and curation to design a personalized teaching brand; one that authentically represents their teaching style, abilities, and identity, yet is flexible enough to evolve over time. Throughout the course, students will build new understandings and capabilities based on critical and engaging discourse, design-based practice, reflection, and engaging classroom activities.
Credit 3 units. A&S IQ: SSC Art: SSC
Typical periods offered: Fall, Spring

EDUC 2100 Introduction to Speech, Language, and Hearing Sciences
This course provides an introduction to the fields of speech-language pathology, audiology, the education of hearing-impaired children, and speech and hearing sciences. Normal speech and hearing processes as well as communication disorders are discussed. Selected research topics in speech and hearing sciences will also be presented.
Credit 3 units. A&S IQ: SSC BU: BA, SCI EN: S
Typical periods offered: Fall, Spring

EDUC 2900 Internship in Education
Students may receive up to 3 units of credit for an approved, faculty-sponsored internship that relates to the study and application of educational research. Credit is determined by the number of hours worked per the College of Arts & Sciences recommendations. Specific requirements -- which include but are not limited to completion of hours, an essay about the student's experience, and/or informational meetings with other faculty about the student's internship experience -- are set by the faculty supervisor in consultation with the supervisor in the organization where the internship work is completed. Students should complete a learning agreement provided by the department. Open to undergraduate majors and minors in the Department of Education only; register for the section assigned to the faculty supervisor. Prerequisites: approval of faculty instructor after completion of learning agreement.
Credit 3 units.
Typical periods offered: Fall, Spring

EDUC 2901 Directed Research in Education
Introduces first-years and sophomores to research by engaging them in ongoing faculty research projects within the department. Under the direction of a faculty mentor, students take part in tasks that contribute to the mentor's research. Through this hands-on experience, students learn about the research process and build foundational research skills that can benefit their future academic experience and development. Faculty mentors provide regular guidance, training, and feedback to support students' understanding and growth. Students are registered by the department after approval from the faculty member leading the research project. The course may be taken for 1-3 credit hours based on the weekly hours required. Credit/No Credit only
Credit 3 units.

EDUC 2996 Education Elective: 200-Level
This course is used to transcribe 2000-level EDUC elective units
Credit 3 units. EN: H, S
Typical periods offered: Fall, Spring, Summer

EDUC 3000 Topics in Education
An examination and appraisal of major educational issues, drawing on normative frameworks, empirical research, and analytical literature. Seminar format. Topics vary by semester.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA
Typical periods offered: Fall, Spring

EDUC 3010 The American School
In this course we analyze the development of American schooling within the context of American social history. Our focus is on three general themes: the differing conceptions of schooling held by some American political, social, and cultural thinkers; the changing relationships among schools and other educational institutions such as the church and the family; and the policy issues and arguments that have shaped the development of schooling in America. We spend considerable time studying the history of schooling in relation to the enduring challenges and dilemmas of marginalized groups including but not limited to systemic racial inequalities, access to schooling and inequitable schooling experiences. Undergraduate students must enroll in Educ. 301C, while graduate students must enroll in Educ. 5001.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H
Typical periods offered: Fall, Spring, Summer

EDUC 3030 Gender and Education
An examination of educational experiences, practices, and institutions across multiple levels (PK-university) using gender as a critical lens. Key topics include common beliefs, practices, and expectations related to gender in educational spaces, as well as the intersections between gender and other identities that may influence educational experiences and outcomes. Readings are drawn from multiple disciplines, including sociology, history, psychology, and philosophy. Students should be prepared to analyze their own gendered educational experiences in the context of the scholarship explored in the course, while also listening respectfully and reflecting on the experiences shared by classmates. Enrollment Note: Undergraduate students must enroll in Educ. 303, and graduate students must enroll in Educ. 5003.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA
Typical periods offered: Spring

EDUC 3040 Educational Psychology
This is a course in psychological concepts relevant to education that is organized around four basic issues: (1) how humans think and learn; (2) how children, adolescents, and adults differ in their cognitive and moral development; (3) the sense in which motivation and intention explain why people act as they do; and (4) how such key human characteristics as intelligence, motivation, and academic achievement can be measured. Offered fall and spring semesters. Enrollment Note: Undergraduate students must enroll in Educ. 304. Graduate students must obtain approval of instructor and their advisor before enrolling in Educ. 5004.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall, Spring

EDUC 3050 Education, Childhood, Adolescence, and Society
This course examines the social and developmental experiences of children and adolescents at the national and international level. Readings will focus on the development of children and adolescents from historical, sociological, psychological, and political perspectives. Students will examine how both internal and external forces impact the developmental stages of children and adolescents. Students will investigate the issues that impact children and adults such as poverty, war, media, schooling, and changes in family structure. Students will explore some of the issues surrounding the education of children such as the effects of high quality preschool on the lives of children from low income families and the connection between poverty and educational achievement. Students will focus on the efficacy of the safety nets that are intended to address issues such as nutrition, health, violence, and abuse. Throughout the course, students will review and critique national and international public policy that is designed to address the needs of children and their families throughout the educational process. Undergraduates must enroll in Educ. 313B, while graduate students must enroll in 513B.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall, Spring, Summer

EDUC 3060 Sociolinguistics, Literacies, Schools, and Communities
Literacy learning and development within a thriving community require attention to the linguistic, cultural, and economic diversity of students. Within an era of state standardization and accountability, it is imperative to use a systems approach in education that unites homes, schools, and communities. Differentiating instruction to meet the needs of all students, including English language learners and other traditionally marginalized groups of students, is essential. This course will introduce students to sociocultural theories of literacy across settings. It will prepare students to analyze how race, ethnicity, class, gender, and language influence the development of literacy skills. We will develop a multifaceted view of literacy that is embedded within culture and that acknowledges the influences of social institutions and conditions. We will incorporate strategies for individual student needs based on students' backgrounds and prior experiences to deliver differentiated instruction and to teach students to set learning goals. Offered in fall semester only. Undergraduate students must enroll in Educ. 314, while graduate students must enroll in Educ. 5114.
Credit 3 units. A&S IQ: HUM, SC Art: HUM BU: BA, HUM EN: H
Typical periods offered: Fall

EDUC 3995 Education Coursework Completed Abroad
This course is for study abroad credits.
Credit 12 units.
Typical periods offered: Fall, Spring, Summer

EDUC 3996 Education Elective: 300-Level
This course is used for transcribing 3000-level EDUC elective units.
Credit 3 units. EN: H, S
Typical periods offered: Fall, Spring, Summer

EDUC 4004 Topics in Education
An examination and appraisal of major educational issues, drawing on normative frameworks, empirical research, and analytical literature. Seminar format. Topics vary by semester.
Credit 3 units.
Typical periods offered: Fall

EDUC 4005 Educational Psychology: A Focus On Teaching and Learning
How should research in educational psychology inform teaching in contemporary schools - and how might the lived experience of professional educators in turn inform research in educational psychology? This class uses the reciprocal relationship between educational theory and practice to examine key issues in teaching and learning in contemporary school settings. Throughout, students will gain greater familiarity with topics influencing the pedagogical decision-making of teachers, from everyday topics (e.g. differentiation, classroom management, developmental appropriateness, etc.) to topics gaining ground in contemporary education (e.g. culturally responsive pedagogy, trauma-informed pedagogy, poverty-informed pedagogy, etc.). By engaging with substantive texts representing diverse perspectives, students will become more comfortable navigating scholarly research on teaching and learning in school settings, including distinguishing between multiple forms of scholarship (e.g. qualitative and quantitative studies, action research, self-study, portraiture, etc.) and other forms of writing about education (e.g. memoirs, advice based on personal experience, op-eds by thought leaders, etc.). Students will also theorize about reasons for gaps between educational research and practice by drawing on their

knowledge of the sociocultural, political, and historical contexts of schooling. Ultimately, students will become more able to articulate their reasoned perspectives as emerging professionals regarding best practices for meaningful teaching and learning in school settings. Enrollment Note: All students are enrolled onto the waitlist. Priority is given to Teacher Education majors, prospective Teacher Education majors, and majors/minors in Educational Studies.Undergraduate students must enroll in Educ. 4052, and graduate students must enroll in Educ. 6052

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

Typical periods offered: Fall, Spring

EDUC 4006 Early Field Experience

This course offers students an informed look at schooling in America and is designed for current teachers, prospective teachers (those considering a Teacher Education major), and for those simply interested in furthering their understanding of classroom interaction and the fundamental principles of teaching and learning. Students will be able to plan lessons and activities that address student's prior experiences, multiple intelligences, strengths, and needs to positively impact learning. This course provides direct and indirect experiences with contemporary K-12 educational practice in schools through 30 clock hours of field observation to be completed during the semester. Students will observe the daily life of teachers and their interactions with children and adolescents, with the dual goal of understanding the professional nature of the setting (i.e. pedagogical decision-making processes, expectations and requirements for teachers, institutional functioning, etc.) and being an active participant in a K12 classroom setting. Assignments will include, but are not limited to, observation notes, discussions with class members, and evaluation and design of instructional strategies and learning activities. Enrollment Note: All students are enrolled onto the waitlist. Priority is given to Teacher Education majors, prospective Teacher Education majors, and majors/minors in Educational Studies. Students must complete their 30 clock hours outside of class in school settings assigned by the WUSTL Department of Education Field Placement Specialist. Undergraduate students must enroll in Educ. 4053 and graduate students must enroll in Educ. 6053

Credit 1 unit. A&S IQ: SSC Art: SSC

Typical periods offered: Fall, Spring

EDUC 4008 Education and Psychology of Exceptional Children

Learning, psychological, cognitive and social characteristics of exceptional children and youth from gifted to those with disabilities. Study child and adolescent developmental stages and the application to educational settings through data-based decision making using assessment and student data in a critical thinking, problem solving team approach. Current practices of educational strategies, interventions, and modifications to differentiate instruction for individual learning needs are emphasized. Plan lessons and activities that address student's prior experiences, multiple intelligences, strengths, and needs to positively impact learning. Learn specific strategies for classroom management, consultation and collaboration with families, colleagues, and administrators to meet individual needs within a culturally and demographically diverse classroom. Influences of legislation, criteria used to identify children, and awareness of supportive services are explored. Enrollment note: All students are enrolled onto the waitlist. Priority is given to Teacher/Deaf Education majors, prospective Teacher Education majors, and majors/minors in Educational Studies. Undergraduate students must enroll in Educ. 408 and graduate students must enroll in Educ. 6008.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

Typical periods offered: Fall, Spring, Summer

EDUC 4010 Curriculum and Instruction for Secondary Teachers

This course provides an in-depth look at secondary curricula and instructional practices in order to equip teacher candidates across a spectrum of disciplines with the knowledge and skill needed to implement meaningful teaching and learning in their future classrooms. By drawing from educational research in curriculum studies and related fields, students will examine the foundations of their discipline's curriculum, consider avenues for the implementation of culturally responsive pedagogy, and gain strategies for engaging contemporary issues facing secondary teachers (e.g. controversy, burnout). A strong emphasis will be placed on connecting with colleagues in different disciplines and exploring the possibilities for interdisciplinary instruction. Enrollment note: must be taken concurrently with content-specific lab [L12 400A/6001, 400D/600D, 400E/600E, 400L/600L, 400M/6006, 400S/600S, or 40SS/60SS] unless approved by Director of Teacher Education. Undergraduate students must enroll in Educ. 4000, while graduate students must enroll in Educ. 6000

Credit 2 units. A&S IQ: HUM BU: HUM EN: H

Typical periods offered: Fall

EDUC 4020 Curriculum and Instruction in Art K-12

This course provides hands-on practice for K-12 teacher candidates in art curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment note: must be taken concurrently with L12 4000/6000 and L12 5007 unless approved by the Director of Teacher Education. Undergraduate students must enroll in Educ. 400A, while graduate students must enroll in Educ. 6001.

Credit 2 units.

Typical periods offered: Fall

EDUC 4030 Curriculum and Instruction in Dance K-12

This course provides hands-on practice for K-12 teacher candidates in dance curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment note: must be taken concurrently with L12 4000/6000 unless approved by the Director of Teacher Education. Undergraduate students must enroll in Educ. 400D, while graduate students must enroll in Educ. 600D.

Credit 2 units.

Typical periods offered: Fall

EDUC 4034 Foundations of Educational Research

Educational researchers in today's world use an interdisciplinary toolbox of approaches to examine the complex issues facing today's students, teachers, educating institutions, and communities. Providing an introduction to the basic concepts, philosophies, and kinds of methodologies used in educational research, this course will examine research designs such as experiments, surveys, mixed methods, ethnography, and action research. Students will be required to analyze the strengths, weaknesses, and limitations of each. Furthermore, the course is devoted to understanding the importance of identifying a research problem, the literature review, research questions, and the alignment with appropriate methodologies (quantitative, qualitative, or mixed methods) in responding to the research inquiry. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: Undergraduate students should register for Educ. 403, while graduate students should register for Educ. 503

Credit 3 units. A&S IQ: SSC EN: S

Typical periods offered: Fall, Spring

EDUC 4040 Curriculum and Instruction in Secondary English
This course provides hands-on practice for secondary teacher candidates in English curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment note: must be taken concurrently with L12 4000/6000 and L12 4451/6451 unless approved by the Director of Teacher Education. Undergraduate students must enroll in Educ. 400E, while graduate students must enroll in Educ. 600E.
Credit 2 units.
Typical periods offered: Fall

EDUC 4050 Curriculum and Instruction in World Languages K-12
This course provides hands-on practice for K-12 teacher candidates in world language curriculum, including French, German, Japanese, Latin, Mandarin Chinese, Russian, and/or Spanish, regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Note: must be taken concurrently with L12 4000. Undergraduate students must enroll in Educ. 400L, and graduate students must enroll in Educ. 600L.
Credit 2 units.
Typical periods offered: Fall

EDUC 4060 Curriculum and Instruction in Secondary Mathematics
This course provides hands-on practice for secondary teacher candidates in mathematics curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment note: must be taken concurrently with L12 4000. Undergraduate students must enroll in Educ. 400M, while graduate students must enroll in Educ. 6006.
Credit 2 units.
Typical periods offered: Fall

EDUC 4070 Curriculum and Instruction in Secondary Science
This course provides hands-on practice for secondary teacher candidates in science curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment Note: must be taken concurrently with L12 4000. Undergraduate students must enroll in Educ. 400S, and graduate students must enroll in Educ. 600S.
Credit 2 units.
Typical periods offered: Fall

EDUC 4080 Curriculum and Instruction in Secondary Social Science
This course provides hands-on practice for secondary teacher candidates in social science curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Enrollment note: must be taken concurrently with L12 4000/6000 unless approved by the Director of Teacher Education. Undergraduate students must enroll in Educ. 40SS, while graduate students must enroll in Educ. 60SS.
Credit 2 units.
Typical periods offered: Fall

EDUC 4090 Teaching Writing in School Contexts
Writing teachers often know how to write well but less about the teaching of writing. To provide effective instruction in writing, teachers need, first of all, experiences with writing instruction and theoretical knowledge to guide classroom practices. The goals of this course are as follows: to provide opportunities for all teachers of English and language arts, to develop theoretical knowledge and skill as teachers of writing, to connect the practices of research and teaching, to encourage teachers to give their students multiple and varied experiences with writing, to assist teachers in learning to respond to students' writing and assess their progress as writers. Offered Fall semester. Enrollment note: Undergraduate students must enroll in Educ. 4451, while graduate students must enroll in Educ. 6451.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Fall

EDUC 4100 Elementary School Mathematics
This course introduces fundamental concepts, properties, operations, and applications of mathematics related to the systems of whole numbers, integers, rational numbers, and real numbers. Also included are measurement, simple geometry, probability, and logical reasoning. The course is designed to help students develop effective teaching strategies and approaches to curriculum development in mathematics. It addresses components of effective curriculum that are aligned with learning experiences and outcomes using the academic language of mathematics. It incorporates strategies for individual student needs based on diverse backgrounds, prior experiences, and language to deliver differentiated instruction, and it teaches students to set learning goals. Students will develop strategies to engage their students in methods of inquiry and research, with interdisciplinary approaches where appropriate. They will learn research-based models of critical thinking and problem-solving, including various instructional strategies and technologies to support student engagement in higher-level thinking skills. Students will use formal and informal assessments to design instruction and improve learning activities, and these will be followed by assessment analysis to determine the effect of class instruction on individual and whole-class learning. They will understand strategies to communicate confidential student data and progress in accordance with ethical and legal protocols. Enrollment Note: Undergraduate students must enroll in Educ. 4731, and graduate students must enroll in Educ. 6731.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

EDUC 4110 Elementary Science: Content, Curriculum, and Instruction
This course focuses on key concepts appropriate for elementary school science and health instruction. A repertoire of effective teaching strategies and approaches to curriculum development are presented. Offered spring semester. Enrollment Note: Undergraduate students must enroll in Educ. 4741, and graduate students must enroll in Educ. 6741.
Credit 2 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

EDUC 4120 Elementary Social Studies: Content, Curriculum, and Instruction

Introduction to key concepts in social studies, including economics and geography. Repertoire of effective teaching strategies and approaches to curriculum development in all areas of social studies. Offered spring semester. Enrollment Note: Undergraduate students must enroll in Educ. 4751, and graduate students must enroll in Educ. 6751.

Credit 2 units. A&S IQ: SSC Art: SSC EN: S

Typical periods offered: Spring

EDUC 4130 Arts and Aesthetics: A Means of Communication

Methods and materials for integrating the arts and aesthetics into the elementary classroom are discussed. Emphasis is on art, music, and oral communication as well as curricula in movement. Offered spring semester. Enrollment Note: Undergraduate students must enroll in Educ. 4771, and graduate students must enroll in Educ. 6771.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

Typical periods offered: Spring

EDUC 4140 Language, Learning, and Instruction

This course, which emphasizes children's writing and literacy issues, is the second of three courses in a sequence on teaching reading and writing. The course reviews and elaborates on work from previous courses on children's acquisition of written language; examines approaches to teaching writing; and focuses on work from sociological, feminist, and philosophical perspectives to affirm and criticize aspects of these approaches. Enrollment Note: Undergraduate students must enroll in Educ. 470, and graduate students must enroll in Educ. 670.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Spring

EDUC 4150 Teaching Reading in the Elementary School

This course, emphasizing emergent literacy and children's literature, is the first in a sequence of three courses on teaching reading and writing. The purposes of this course are to survey children's acquisition of oral and written language from an emergent literacy perspective, to focus on methods of teaching beginning reading, to develop uses of children's literature in a reading program. Offered Fall semester. Enrollment note: Undergraduate students must enroll in Educ. 4681, while graduate students must enroll in Educ. 6681.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

Typical periods offered: Fall

EDUC 4160 Mathematics for Elementary School Teachers

A review of mathematics for grades K-8, at a level beyond its usual presentation in the schools. The purpose of this course is to ensure that teaches have the necessary foundation to teach mathematical concepts and problem solving at the elementary level. Applications of all essential mathematical concepts are presented in abundance, along with methods and strategies for instruction at the elementary level. Restricted to elementary education students, except with approval of the Director of Teacher Education. Offered Fall semester. Enrollment note: Undergraduate students must enroll in Educ. 466, while graduate students must enroll in Educ. 6660.

Credit 3 units. A&S IQ: NSM

Typical periods offered: Fall

EDUC 4200 Higher Education Administration for Social Justice & Equity: Achievable or Only Dreamable?

Higher education has long been the subject of much general public interest and discourse. Understanding the complexity of the system, its history, practices, and expertise will help define whether and how campuses can work toward social justice and equity. In this course, students will study the history, policies, and organizational decisions that underly the current state of higher education in America. These perspectives and theories will be studied with an eye toward social justice and understanding possible changes that may lead toward equity on American college campuses. Through engaged discussions around readings and case studies, students will tackle complex social questions, including: how our college campuses became so complex? Why pervasive social issues, such as system racism, sexism, and classism, continue to exist on our campuses? How and when technology and the SAT/ACT began to rule our lives in college? Perhaps even deeper, students will grapple with finding alternate, more socially just, and equitable alternatives to create more equity on our campuses. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: Undergraduate students must enroll in Educ. 4022, and graduate students must enroll in Educ. 5222.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

Typical periods offered: Fall, Spring

EDUC 4210 Diversity, Equity and Inclusion in Higher Education

This course uses multiple frameworks to explore issues of power and privilege with respect to diverse populations in higher education. Our understanding of diversity is always evolving and changing. Recognizing the fluidity and complexity of diversity, this course will critically discuss the intersectional dimensions of identity. We will explore the socio-historical, legal, political, racial, social identity and institutional contexts impacting equity and access in higher education. An examination of conceptual frameworks, self-reflection, and dialogue will be used to examine students' own biases and prejudices. Enrollment limited to undergraduate juniors and seniors and graduate students. First Years and Sophomores must request permission from the instructor. All undergraduate students must have completed a 100, 200, or 300 level Education course before enrolling. Undergraduate students should enroll in Educ. 4037, while graduate students should enroll in Educ. 5037.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

Typical periods offered: Fall, Spring

EDUC 4220 Race, Ethnicity, and Culture: Critical Qualitative Understandings of Urban Education

This course examines educational institutions as spaces where children are asked to comply to the norms, expectations, and values of the culture of power. We will study how forces -- such as de facto segregation, the disproportionate hyper-disciplining of students, punitive school climates, and the devaluing of certain forms of cultural and social capital -- can contribute to cycles of social reproduction among the marginalized. To address such challenges, this course introduces sociocultural theories and critical qualitative inquiry methods as mechanisms by which urban educational institutions can be positively transformed. Specifically, restorative practices, cogenerative dialogues, and participatory/co-researcher models are explored as methods that honor the voices of marginalized stakeholders and lead to catalytic, transformational impact. Leaving this course, students will have an understanding of the inequitable terrain of urban education institutions as well as a repertoire of theories and methods to assist with the conducting of critically grounded, culturally responsive, humane, and transformative research. In addition to lectures, readings, discussions, films, and actual classroom footage, students will conduct a school experience project to practice using the theories and methods introduced in this course. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: Enrollment is limited to juniors, seniors, and graduate students. All students are enrolled onto the waitlist. Priority is given to Department of Education

majors, minors, and graduate students. Undergraduate students must enroll in Educ. 4511, and graduate students must enroll in Educ. 5511. Prerequisite: completion of any 1000, 2000, or 3000 level Education (L12) course OR graduate standing OR permission of instructor.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall, Spring

EDUC 4221 Race, Ethnicity, and Culture: Qualitative Inquiries Into Urban Education II
This course is the second of two to examine ethnographic research at the intersecting and overlapping points of race, ethnicity, class, gender, and culture. The emphasis in this course is on developing methodology that is consistent with critically grounded, socially responsible, culturally-responsive, and humane research projects and programs.
Credit 3 units. A&S IQ: SSC, WI Art: SSC EN: S
Typical periods offered: Fall, Spring

EDUC 4230 Video Microanalysis: Methods and Tools
The purpose of this course is to explore video microanalysis as a methodological tool for studying and valuing unconscious aspects of culturally diverse settings. Utilizing social cultural theoretical lens, this type of analysis will reveal fleeting actions, subtle movements, peripheral events, and non-verbal communication that are not easily identified in real time viewing. Specifically we may look at facial expressions, direction of gaze, hand movements, body position, and use of material resources as micro techniques to expand our capacity to explore minute aspects and alternative interpretations of social interactions. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

EDUC 4240 Education and Public Policy in the United States
This course takes a triangulated approach to the field of public policy as it relates to education and social problems. First, the course emphasizes theories of public policy that frame the field of policy studies. Second, the course emphasizes the skills related to the exercise of policy analysis. Third, this course simulates the policymaking context through students' participation in mock congressional testimonies. Educational opportunity, achievement inequality, and social change will be the primary interests that link these course features.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S UColl: ACS
Typical periods offered: Fall, Spring

EDUC 4250 History of Higher Education in American Culture
This course will examine the historical and philosophical development of higher education from colonial to contemporary periods including the histories of minoritized individuals and campus types. Throughout the semester, we will learn how history continues to impact the way we run and organize our campuses today. This course concludes with an exploration of current social, political, and economic challenges in higher education and current public debates regarding contentious topics in higher education. Enrollment note: Enrollment limited to juniors, seniors, and graduate students. Undergraduate students must enroll in Educ. 4288 and graduate students must enroll in Educ. 5288.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H
Typical periods offered: Fall, Spring

EDUC 4260 Neighborhoods, Schools, and Social Inequality
A major purpose of the course is to study the research and policy literature related to neighborhoods, schools and the corresponding opportunity structure in urban America. The course will be informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis will be placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups will complement the course foci. Enrollment note: All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 4289 and graduate students must enroll in Educ. 5289.
Credit 3 units. A&S IQ: SSC, SC Art: SSC BU: BA EN: S
Typical periods offered: Fall, Spring

EDUC 4270 Culture, Language, and the Education of Black Students
This course examines the communicative patterns of what is called variously African-American language, Pan-African linguistic systems, and Ebonics within the context of public school policy and practice. In addition to a review of the structural and pragmatic aspects of Black speech, the course highlights relationships between controversies within the linguistic community, contrasting views of speech within Black lay communities, public discourse, and educational policy. Students will also conduct a field-based research project in accord with their particular interests.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

EDUC 4275 Language, Thought, and Culture
This course examines ways in which language shapes human mental and cultural practices. Drawing on linguistics, literary theory, anthropology, sociology, and psychology, discussions will take up issues such as how different languages give rise to different forms of thought, how language is tied to power and authority, and how language shapes identity. Particular emphasis is given to how these issues emerge in the context of human development, education, and socialization.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall, Spring

EDUC 4280 History of Urban Schooling in the United States
More than ever, schooling in urban areas is researched, and it is at the center of debates for improving U.S. schooling. This course, which is framed by contemporary issues, focuses on the history of urban schooling and policy to deepen our understanding of the contemporary landscape. We will focus on particular cities and their school districts; these may include New York, Boston, Chicago, Detroit, St. Louis, Los Angeles, San Francisco, and Atlanta. In this course, students will develop a strong contextual understanding of the conditions of urban schooling; the history of urban school reform; and the debates over the purposes of urban schools, past and present.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

EDUC 4300 History Education in & Beyond the Classroom
Far from requiring students to merely memorize names and dates, the work of history education rests on a robust theoretical foundation that urges complex cognitive skills. This course is intended to help students form a strong grasp of major issues in history education, including its underlying conceptualization of knowledge and related disciplinary habits of mind, instructional methods aimed at handling controversy

with sensitivity toward students' contemporary identities, and sociocultural forces that exert pressure on professional communities and curricula alike. While this course is of special interest to students with an interest in teaching history (whether in higher education, at the K-12 level, or at a museum or historic site), admission to the teacher education program is not a prerequisite for entry. Enrollment note: Undergraduate students must enroll in Educ. 4700, while graduate students must enroll in Educ. 6700

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

Typical periods offered: Fall

EDUC 4310 Sociology of Higher Education

What we call higher education in the United States is a complex web of institutions - nearly 3,000 4-year colleges, 1,500 2-year colleges, and still more postsecondary institutions that grant a variety of credentials. It is a system through which tens of millions of students pass each year; over the last few decades, the importance of earning a postsecondary credential has increased markedly. As such, higher education is deserving of rigorous scrutiny and careful interrogation. But in studying higher education, we are in fact attending to a multitude of things - among other things, varied institutional types with different resources and different imperatives, experiences of accessing and navigating higher education that are widely divergent along axes of inequality, and institutional processes that play out on campus but have resonance beyond the university gates. In this course, which will be conducted as a discussion-based seminar, we will engage with texts examining the enterprise of higher education from varied vantage points, but always through a sociological lens. We'll discuss why and how higher education came to be so important and loom so large in contemporary life, the stark differences between different sectors of the higher education landscape, and how stratification occurs between and within institutions. We'll talk at length about how higher education is a microcosm of many of the inequalities we see in the broader society, looking at issues of race, class, gender, and politics on campus. By taking a sociological lens to studying higher education, we'll learn a language and facility for rooting discussion of issues in higher education in theoretical grounding and empirical evidence. In so doing, students will develop the capacity to more critically assess research and public discourses on higher education, as well as their own work and experiences in the sector. Enrollment Note: Undergraduate students must enroll in Educ. 4310, and graduate students must enroll in Educ. 5310.

Credit 3 units. A&S IQ: SSC, SC EN: S

Typical periods offered: Fall, Spring

EDUC 4320 Historical Social Content of the American School

An analysis of the development of American schooling within the context of American social history. Focus on three general themes: differing conceptions of schooling held by leading American educational thinkers, changing relationships among schools and such other educational institutions as the church and the family, policy issues that have shaped the development of schooling in America.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

Typical periods offered: Fall, Spring

EDUC 4330 Complex Learning in Education

This course will focus on psychological research and theory pertaining to higher order learning. Each week, we will delve into a different topic such as memory, transfer of learning, analogical reasoning, conceptual change, metacognition, and problem-solving.

Credit 3 units. A&S IQ: SSC, WI BU: BA EN: S

Typical periods offered: Fall, Spring

EDUC 4350 Central Topics in Psychological Research On Teaching and Learning

This course will focus on how theory and research in psychological science and other related disciplines can inform teaching and learning in a variety of educative contexts. Each week, we will delve into research on a new set of issues that all revolve around a particular theme, such as pedagogical methods, motivation, student characteristics, assessment of learning, evaluation of teaching effectiveness, and educational technology. In addition to analyzing theory and research, we will discuss implications for educational practice and policy with an emphasis on designing interventions and fostering innovation. Enrollment note: Undergraduate students must enroll in Educ. 4055 and graduate students must enroll in Educ. 5555. Prerequisite: completion of any 1000, 2000, or 3000 level Education (L12) course OR graduate standing OR permission of instructor.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

Typical periods offered: Fall, Spring

EDUC 4360 Adolescent Psychology in School Settings

An examination of current research on adolescent psychological development and the adolescent experience across different cultures. Emphasis will be on the application of theories of adolescence to the classroom setting to those settings outside the classroom that can affect how students learn. Students will be given a repertoire of pedagogical and communication strategies for effectively teaching adolescents as well as opportunities to implement and analyze them in the classroom and school.

Credit 3 units. A&S IQ: SSC

Typical periods offered: Fall, Spring

EDUC 4430 Sociology of Education

This course provides an overview of sociological theory and research on education in contemporary U.S. society. Drawing from sociological perspectives, it covers the implications of schools and schooling for social inequality, mobility, and group relations. It examines major theoretical perspectives on the purpose and social organization of mass education in the United States, and topics related to the organization and function of schools, access to educational resources, and group disparities in school experiences and outcomes. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment note: All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 453B and graduate students must enroll in Educ. 5530.

Credit 3 units. A&S IQ: SSC, SC Art: SSC BU: BA, ETH EN: S

Typical periods offered: Fall, Spring

EDUC 4440 Philosophies of Education

An analysis of perennial themes in the philosophy of education, with particular attention to implications arising from the uneven distribution of power in an inequitable society. Significant questions to be examined include: What constitutes a truly democratic form of education? How might our answers change when we approach this question in light of the history of race in the American experience? How should teachers dedicated to a liberatory practice approach both their content and their students? Which theories of knowledge might help us envision new possibilities for teaching and learning? Readings will address both K-12 and higher education spaces while drawing on a diverse range of historical and contemporary thinkers. Seminar format. Enrollment Note: All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 459F and graduate students must enroll in Educ. 5590.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

Typical periods offered: Fall

EDUC 4450 History of Education in the United States
Examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy in different periods of our history. Because this is a writing intensive course, enrollment will most likely be 12-15 students. Enrollment preference will be given to students who are majoring/minoring in Educational Studies, Teacher Education, History, American Culture Studies, and Children's Studies and to students needing to complete their Writing Intensive requirement. Instructor will e-mail students about enrollment. Undergraduate students must enroll in Educ. 481W, and graduate students must enroll in Educ. 5810.
Credit 3 units. A&S IQ: HUM, SC, WI BU: BA, HUM EN: H
Typical periods offered: Fall, Spring

EDUC 4460 Politics of Education
In this course, politics is interpreted broadly to include both formal policy-making processes and any situation in which people have to solve a problem or come to a decision. The purpose of this course is to explore the following processes: (1) how ideologies and power dynamics influence educational policies and decisions; (2) how educational policies and decisions translate into specific school programs and practices; (3) how specific programs and practices influence pedagogies, especially in the relationships among students, teachers, and knowledge pedagogies; (4) how these pedagogies impact student opportunities and outcomes; and (5) how student outcomes and opportunities reinforce ideologies and power dynamics. This course considers politics across time, space, and individuals, noting how historical, geographical, cultural, social, psychological, political, and economic contexts can shape the politics of education. In addition, as this course considers the relationship between politics and power, we explore how politics can manifest itself in ways that promote exclusion and subjugation or work toward the common good. Finally, after carefully examining the research on inequalities and inefficiencies resulting from the current politics of education, we will transition from problem identification (i.e., What went wrong?) to problem solution (i.e., Where do we go from here?). Enrollment Note: All students are enrolled onto the waitlist. Priority is given to Department of Education majors, minors, and graduate students. Undergraduate students must enroll in Educ. 462, and graduate students must enroll in Educ. 5620.
Credit 3 units. A&S IQ: SSC, SC Art: SSC EN: S
Typical periods offered: Fall, Spring

EDUC 4470 The Political Economy of Urban Education
Defining a political economy of urban education involves the examination of power and wealth and the manner in which they operate in urban settings. It requires analysis of the larger urban social and economic context and consideration of historical forces that have brought the schools to their present state. In this course, we consider various political and economic factors that have influenced and shaped urban education in the United States, drawing upon the extant literature on urban education and related social science disciplines to characterize and discuss them. A particular focus of this course will be on the dynamic interrelationships among the political economy, urban education, and social stratification. Enrollment note: Undergraduate students must enroll in Educ. 4621, while graduate students must enroll in Educ. 5622.
Credit 3 units. A&S IQ: SSC, SC Art: SSC EN: S
Typical periods offered: Fall, Spring

EDUC 4530 Leadership in Student Affairs
This course provides an overview of the field of student affairs; its related functional areas; role in higher education in the United States; and current issues faced by practitioners. In the context of this course student affairs is defined as those programs, services, and activities designed to recruit, retain, support, and develop students in college. This course concentrates on the leadership roles within student affairs in higher education institutions across the United States. Leaders in student affairs are regularly challenged to respond to the current and emerging needs of students, as well as to expectations from various stakeholders: faculty, boards of trustees, alumni, community members, and the government, as to the priorities for the student experience in higher education. Successful student affairs leadership requires the ability to understand the context of student affairs work including how and why student affairs emerged as an organizational entity within higher education; the critical issues faced by student affairs practitioners; and the various administrative functional areas that typically exist within the portfolio defined as student affairs on a college campus. This course is designed to provide students with an overview of student affairs as an entity from both an historical and contemporary lens; introduce students to the literature in the field and examine various theoretical frameworks related to the student experience in higher education; strengthen understanding of the standards that guide student affairs practice; and explore leadership theories and practices to apply to the review of the critical student affairs issues and strengthen student understanding of their own leadership styles in preparation for possible careers in higher education. Enrollment Note: Undergraduate students must enroll in Educ. 4833, and graduate students must enroll in Educ. 5833.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

EDUC 4570 Middle School Philosophy and Organization
This course examines the history, goals, organization and philosophy of middle schools as institutions. Students will explore how the characteristics and needs of early adolescents guide the mission, structure and operation of middle schools. Prerequisite: admission to teacher education program. Enrollment note: undergraduate students must enroll in Educ. 4951, and graduate students must enroll in Educ. 6951.
Credit 2 units. A&S IQ: SSC EN: S
Typical periods offered: Fall, Summer

EDUC 4571 Middle School Curriculum and Instruction
By building on knowledge of the middle-level child and the ways in which middle schools are organized to meet the needs of middle-level children (covered in Educ 4951), this course explores the learning styles and attributes of middle-school students and examines instructional theory, methods, and materials appropriate to grades 5 through 9. In addition, portions of this course will be devoted to specific content field methodology and subdivided into English/language arts and social studies or science and math. The English/social studies and science/math sessions will be held concurrently, and students will attend the session appropriate to their content majors or minors. Interdisciplinary team teaching will be modeled and featured in these sessions. This course features a required practicum experience. Prerequisite: Admission to the teacher education program. Enrollment note: Undergraduate students must enroll in Educ. 4952, and graduate students must enroll in Educ. 6952.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Summer

EDUC 4580 Elementary Methods Field Experience
This course involves the application and analysis of specific content area methods and strategies in an elementary school classroom. Elementary teacher education majors are required to take this course during the spring semester before the year in which student teaching is completed. Offered spring semester. Enrollment Note: Undergraduate students must enroll in Educ. 4841, and graduate students must enroll in Educ. 6841.
Credit 2 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

EDUC 4590 Field Experience Seminar
This course guides students through a field experience in a middle or secondary public school. Fifty hours of observation are required for each student; these hours involve observing and documenting classroom environment characteristics, professional teacher behaviors, and student behaviors; working with students individually and/or in small groups; preparing and teaching a lesson; and learning classroom technologies such as SMART Board and digital video recording and editing. Course topics, observation, and discussion include understanding diverse cultural perspectives of English language learners and how to select appropriate strategies for addressing individual needs in meeting curriculum objectives; incorporating strategies for individual student needs based on diverse backgrounds and prior experiences to deliver differentiated instruction; creating a positive learning environment through effective classroom management using strategies based on research and pedagogically sound techniques; developing reflective practices to improve teaching while understanding the importance of utilizing professional learning opportunities in school districts and professional organizations; and understanding the importance of communication, professional relationships, and collaboration with teachers, administrators, families, and the community as well as the nature of professional, ethical, and legal behavior and the need to adhere to district policies and school procedures. Undergraduate students must enroll in Educ. 4843, while graduate students must enroll in Educ. 6843
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Fall

EDUC 4607 Education of Black Children and Youth
This course provides an overview of the education of Black children and youth in the United States. Covering both pre- and post-Brown eras, students in this course offers a deep examination of the research focused on Black education. The social, political, and historical contexts of education, as essential aspects of American and African-American culture and life, will be placed in the foreground of course inquiries. Prerequisite: Completion of any 1000, 2000, or 3000-level Education course, graduate standing, or permission of instructor. Enrollment Note: All students are enrolled onto the waitlist. Undergraduate students must enroll in Educ. 4607, and graduate students must enroll in Educ. 5607.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Spring

EDUC 4800 The Teaching-Learning Process in the Elementary School
This course focuses on four broad areas: (1) self-awareness and human relations; (2) instructional and behavioral management strategies; (3) the development of curriculum and the analysis of instruction; and (4) social, political, and legal issues affecting the classroom. Topics include teacher-pupil relationships, assessment of pupil progress, curriculum development, instructional technology, and school organization. Course discussion and study further develop knowledge in a variety of areas that are experienced during student teaching, such as the refinement of pedagogy strategies and skills; the Missouri Educator Evaluation System (MEES) for certification; understanding diverse cultural perspectives of English language learners and how to select appropriate strategies for addressing individual needs in meeting curriculum objectives; incorporating strategies for individual student needs based on diverse backgrounds and prior experiences to deliver differentiated instruction; creating a positive learning environment through effective classroom management using strategies based on research and pedagogically sound techniques; developing reflective practices to improve teaching while understanding the importance of utilizing professional learning opportunities in school districts and professional organizations; understanding the importance of communication, professional relationships, and collaboration with teachers, administrators, families, and the community; and understanding the nature of professional, ethical behavior and the need to adhere to district policies and school procedures. Enrollment note: Undergraduate students must enroll in Educ. 4831, while graduate students must enroll in Educ. 6831.
Credit 3 units. A&S IQ: SSC, WI EN: S
Typical periods offered: Fall

EDUC 481 History of Education in the United States
Examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy in different periods of our history.
Credit 3 units. A&S IQ: HUM, SC Art: HUM BU: HUM EN: H

EDUC 4810 The Teaching-Learning Process in the Secondary School
Secondary teacher education majors are required to take this teacher-learning course during the spring semester in which student teaching is completed. The course focuses on the study, practice, and analysis of generic teaching strategies and skills needed to meet the needs of all students. Topics include classroom management, lesson planning, instructional and ethical decision making, and strategies for presenting clear explanations, asking effective questions, conducting productive discussions, reaching students with different learning styles/abilities/cultural backgrounds, and using cooperative learning groups. Enrollment Note: Undergraduate students must enroll in Educ. 4821, and graduate students must enroll in Educ. 6821.
Credit 3 units. A&S IQ: SSC, WI Art: SSC EN: S
Typical periods offered: Spring

EDUC 4839 Financing Higher Education
This class will deal with all issues associated with financing higher education, including US trends and some comparison with international institutions. Topics covered will be sources of revenue and expenses associated with colleges and universities, and will include consideration of public support and private support. Revenue sources include tuition, fees, room and board, gifts, research grants and contracts, spendable income from endowment. Major expenses include employee compensation and benefits; operation of physical facilities, and expenses associated with academic programs and research. Other financial topics will be covered, including risk, internal controls, and debt. Coursework will include reading assignments, discussion, a midterm and a final examination. Enrollment is limited to undergraduate juniors and seniors and graduate students. Undergraduate students must enroll in Educ. 4839, and graduate students must enroll in Educ. 5839.
Credit 3 units.

EDUC 4900 Student Teaching in the Elementary School
This course encompasses a supervised teaching experience as well as group meetings and individual conferences. Emphasis is on the integration of theory/practice and reflections on teaching. Graduate students must register for satisfactory/unsatisfactory grading; undergraduates must register for pass/fail grading. Offered fall semester. Enrollment note: Undergraduate students must enroll in Educ. 4911, while graduate students must enroll in Educ. 6911
Credit 8 units. A&S IQ: SSC EN: S
Typical periods offered: Fall

EDUC 4910 Student Teaching in the Secondary School
Supervised teaching experience. Group meetings and individual conferences. Emphasis on integration of theory/ practice and reflection on teaching through videotape analysis. Enrollment Notes: Graduate students must register for Satisfactory/Unsatisfactory and Undergraduates must register for Pass/Fail. Secondary teacher education students enroll for 8 credits during the Spring semester. Undergraduate students must enroll in Educ. 492, and graduate students must enroll in Educ. 692
Credit 8 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

EDUC 4920 Student Teaching in Middle Schools
Supervised teaching experience. Group meetings and individual conferences. Enrollment Notes: Graduate students must register for Satisfactory/Unsatisfactory and Undergraduates must register for Pass/Fail. Middle school teacher education students enroll for 8 credits. Offered Spring semester. Undergraduate students must enroll in Educ. 4922, and graduate students must enroll in Educ. 6922.
Credit 8 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

EDUC 4930 Student Teaching in Grades K-12
This course encompasses a supervised teaching experience as well as group meetings and individual conferences. Offered spring semester. Enrollment Note: Undergraduate students must enroll in Educ. 494, and graduate students must enroll in Educ. 694.
Credit 8 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

EDUC 4970 Study for Honors
A research program arranged by the student and a faculty member. Prerequisite: recommendation for Honors study.
Credit 3 units. EN: S
Typical periods offered: Fall, Spring

EDUC 4990 Capstone Seminar in Educational Studies
All majors not writing an Education senior honors thesis are required to enroll in the senior seminar, a reading colloquium. Students read with faculty and write papers based on the readings and the courses taken to complete the major requirements in the program. All honors students are required to attend at least one session of the seminar to present their work and all graduating Educational Studies majors, including those completing honors work in Educational Studies, are required to attend the final session of the seminar.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

EDUC 4996 Education Elective: 400-Level
This course is used for transcribing 4000- level EDUC elective units.
Credit 3 units. EN: H, S
Typical periods offered: Fall, Spring, Summer

EDUC 4999 Independent Work
PREREQUISITE: PERMISSION OF INSTRUCTOR. Credit to be determined in each case.
Credit 6 units.
Typical periods offered: Fall, Spring, Summer

Educational Studies Major

Program Requirements

- **Total Units Required:** 24
- **Grade Requirement:** Students must earn at least a C- in order for coursework to count toward the major.

The Educational Studies program examines and applies the historical, social, cultural, psychological, and public policy aspects of educational institutions and educational processes as well as the social and cultural factors that affect them. The program provides an entry point into the study of the multidimensional field of education, analysis, the individual, and the collective. By becoming familiar with educational research and writing, students in Educational Studies are expected to develop basic inquiry skills as well as a critical understanding of how educational institutions function, how individuals grow and change, and how social groups are shaped by educational processes. These tools should help students develop the ability to integrate and apply systematic knowledge in order to guide personal action and professional development and to understand and possibly transform social and institutional policy.

The Educational Studies program is appropriate for students who want to enhance their understanding of educational policy and of the educational issues that they may encounter in their careers or face as students, citizens, and adults. Many educational studies majors pursue careers in policy, research, and leadership; their paths following graduation include graduate and professional study as well as work in educational, nonprofit, and government agencies. Students are strongly encouraged to complete a second major; however, a second major is not required.

Required Courses

Discipline-Based Study

Students are required to take three Discipline-Based Study courses (9 units):

Code	Title	Units
EDUC 3040	Educational Psychology	3
EDUC 4430	Sociology of Education	3
EDUC 4440	Philosophies of Education	3
EDUC 4450	History of Education in the United States	3
EDUC 4460	Politics of Education	3
EDUC 4470	The Political Economy of Urban Education	3

Students must take three courses (total of 9 units) from the Individual Processes of Education and Social Context of Education categories below. Students can choose to take one Individual Processes of Education course and two Social Context of Education courses or two Individual Processes of Education courses and one Social Context of Education course.

Individual Processes of Education

Students are required to take one or two Individual Processes of Education courses (3-6 units):

Code	Title	Units
AFAS 4250	The Construction and Experience of Black Adolescence	3
APL 4023	Second Language Acquisition & Technology	3
APL 4692	Reading Across Languages and Cultures: Theory, Research, and Practice	3
EDUC 4005	Educational Psychology: A Focus on Teaching and Learning	3
EDUC 4008	Education and Psychology of Exceptional Children	3
EDUC 4330	Complex Learning in Education	3
EDUC 4350	Central Topics in Psychological Research on Teaching and Learning	3

Social Context of Education

Students are required to take one or two Social Context of Education courses (3-6 units):

Code	Title	Units
APL 4111	Linguistics and Language Learning	3
EDUC 3010	The American School	3
EDUC 3030	Gender and Education	3
EDUC 3050	Education, Childhood, Adolescence, and Society	3
EDUC 3060	Sociolinguistics, Literacies, Schools, and Communities	3
EDUC 4220	Race, Ethnicity, and Culture: Critical Qualitative Understandings of Urban Education	3
EDUC 4230	Video Microanalysis: Methods and Tools	3
EDUC 4240	Education and Public Policy in the United States	3
EDUC 4250	History of Higher Education in American Culture	3
EDUC 4260	Neighborhoods, Schools, and Social Inequality	3
EDUC 4280	History of Urban Schooling in the United States	3
EDUC 4290	Education of Black Children and Youth	3

Elective Courses

In addition to the six courses (18 credits) completed from the areas of Discipline-Based Study, Individual Processes of Education, and Social Context of Education, students must complete one elective course (3 credits) which may be satisfied by the following:

- Any course listed in the tables above
- EDUC 2900: Internship in Education
- Students can consult with their advisor regarding additional courses offered outside of the Department of Education that address educational topics and issues.

EDUC 4990 Capstone Seminar in Educational Studies

All majors not writing an educational senior honors thesis are required to enroll in this senior seminar (3 credits), and through this course complete a serious intellectual project designed to bring together the total learning experiences within the major, thereby understanding growth over time in Educational Studies.

Additional Requirements

- All courses for the Educational Studies major must be taken for a letter grade (with the exception of EDUC 2900 Internship in Education, which must be taken Pass/No Pass). Per Arts & Sciences requirements, students must earn at least a C- in order for coursework to count toward the major.
- All students must complete a 1000-, 2000-, or 3000-level Education course before enrolling in a 4000-level course. Exceptions may be granted through permission of the 4000-level course instructor.
- By the end of the fall of senior year, all majors need to have taken at least six of the seven required courses before taking Capstone in the spring of senior year; if unable to fulfill this requirement, majors must meet with the Director of Undergraduate Studies for Educational Studies.
- If planning to graduate early (i.e., at the end of the fall of senior year), majors are required to meet with their advisor in fall of their junior year prior to course registration for the spring semester.

Additional Information

Honors Program

Students in Educational Studies may pursue honors. Honors in the Department of Education involves both the demonstration of acquired knowledge and a report on an original research project. The appropriateness of honors work in education for a given student is determined by reference to both GPA and faculty recommendation. Students may be eligible for either the College of Arts & Sciences' Latin Honors Program or departmental honors from the Department of Education. Students interested in Latin Honors work should speak with the Director of Educational Studies about eligibility and requirements as early as sophomore year or, ideally, during the junior year.

Transfer Credit

All courses for the major in Educational Studies should be taken after the student has declared the major as a student at Washington University. Exceptions (up to 6 transfer credits) may be granted on an individual basis.

Study Abroad

Educational Studies Majors and Minors

- Courses taken abroad for the Educational Studies major or minor must be equivalent to 3000-level or 4000-level courses at Washington University.
- Students may transfer up to 6 credits earned abroad with the approval of the Department of Education Study Abroad Advisor.
- Courses taken abroad do not necessarily serve as substitutes for specific Educational Studies courses. Rather, courses are reviewed holistically to determine if they address the Individual Processes of Education and/or Social Context of Education (two areas of study for the Educational Studies major and minor). Any study abroad course determined to address the Individual Processes of Education and/or Social Context of Education can also count for an elective.
- Study Abroad courses cannot count for a discipline-based requirement.

Preapproved Study Abroad Sites

There are six preapproved sites for semester-long study abroad in Educational Studies:

1. Danish Institute for Study Abroad (DIS) Copenhagen — Child Development and Diversity Program in Copenhagen, Denmark
2. IES Abroad Amsterdam Semester Program in Amsterdam, Netherlands
3. Trinity College Dublin with IES Abroad in Dublin, Ireland
4. University of Auckland with IES Abroad in Auckland, New Zealand
5. WU in Chile at Pontifcia Universidad Catolica de Chile (PUC) (**Note:** This program has a Spanish language prerequisite.)
6. University of Sydney in Sydney, Australia

There are also two preapproved sites for summer study abroad in Educational Studies:

1. Summer in Scandinavia Danish Institute for Study Abroad (DIS) Program in Copenhagen, Denmark, or Stockholm, Sweden
2. The School for International Training (SIT) Study Abroad Africa: Education and Social Change in Durban, South Africa

Educational Studies Minor

Program Requirements

- **Total Units Required:** 18
- **Grade Requirement:** All courses for the Educational Studies minor must be taken for a letter grade, and per Arts & Sciences requirements, students must earn at least a C– for coursework to count toward the minor.

Required Courses

Discipline-Based Study (two courses required; 6 units):

Code	Title	Units
EDUC 3040	Educational Psychology	3
EDUC 4430	Sociology of Education	3
EDUC 4440	Philosophies of Education	3
EDUC 4450	History of Education in the United States	3
EDUC 4460	Politics of Education	3
EDUC 4470	The Political Economy of Urban Education	3

Individual Processes of Education (one course required; 3 units):

Code	Title	Units
AFAS 4250	The Construction and Experience of Black Adolescence	3
APL 4023	Second Language Acquisition & Technology	3
APL 4692	Reading Across Languages and Cultures:Theory, Research, and Practice	3

EDUC 4005	Educational Psychology: A Focus on Teaching and Learning	3
EDUC 4008	Education and Psychology of Exceptional Children	3
EDUC 4330	Complex Learning in Education	3
EDUC 4350	Central Topics in Psychological Research on Teaching and Learning	3

Social Context of Education (one course required; 3 units):

Code	Title	Units
APL 4111	Linguistics and Language Learning	3
EDUC 3010	The American School	3
EDUC 3030	Gender and Education	3
EDUC 3050	Education, Childhood, Adolescence, and Society	3
EDUC 3060	Sociolinguistics, Literacies, Schools, and Communities	3
EDUC 4220	Race, Ethnicity, and Culture: Critical Qualitative Understandings of Urban Education	3
EDUC 4230	Video Microanalysis: Methods and Tools	3
EDUC 4240	Education and Public Policy in the United States	3
EDUC 4250	History of Higher Education in American Culture	3
EDUC 4260	Neighborhoods, Schools, and Social Inequality	3
EDUC 4280	History of Urban Schooling in the United States	3
EDUC 4290	Education of Black Children and Youth	3

English

Undergraduates who major or minor in English explore literature as readers and writers in small classes that focus on the individual student. With exposure to our wide array of course topics and intellectual approaches, alumni of the English department have succeeded in top-notch graduate programs in English and creative writing as well as in law, business, medicine, journalism, and government.

Preparation for the English major begins at the first-year level. In both the fall and spring semesters, first-year seminars of 15 students or fewer are led by distinguished faculty on subjects such as detective fiction, literature and justice, the invention of romantic love, and the cultural history of the American university. Majors go on to acquire a comprehensive understanding of the history and criticism of literature written in English. Our department's commitment to cross-fertilizing creative and critical literacy is genuine and longstanding. Home to a strong and rigorous MFA program that fosters a close-knit community of talented writers in poetry, fiction, and creative nonfiction, the department offers an undergraduate minor in writing as well as a major with a specialization in creative writing. English students frequently enroll in creative writing workshops or classes in advanced rhetoric, and three such courses may count toward the regular English major.

- Children's Studies (p. 503)
- Writing (p. 505)

English Literature

ELIT 1101 First-Year Seminar: The Literary Life
This class approaches literature from many angles: the creative to the scholarly, the personal to the ethical, the edifying to the entertaining. At the heart of our study will be a survey of literary values such as invention, emotion, style, subversion, beauty, humor-those fundamental reasons readers come to literature in the first place. Through readings and discussion, we will consider the great variety of ways literature expresses these values, and will explore them ourselves via creative assignments. Along the way, we will learn about literary life today through discussions with nationally renowned writers who will visit the class, and through units on literary scholarship, book reviewing, and magazine and book publishing. In the midst of it all, you will write and workshop your own stories, poems, and non-fiction works. Course enrollment preference is given to first-year students.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 1102 First Year Literature Seminar
This course explores the transformational effects of estrangement by pairing modern English literary and popular musical figures famous for their roles in reflecting and effecting radical social shifts. Questions of performance, alienation, mass culture, and fame will thread through five units: Godot and Glam: Beckett / Bowie; Portrait and Punk: Joyce / The Clash; Aestheticism and Alternative: Wilde / Morrissey; Gender and GenX: Woolf / Lady Gaga; Romance and Rap: Keats / Kendrick. Students will then construct their own pairing for a class presentation and final essay. Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM BU: ETH, HUM EN: H
Typical periods offered: Spring

ELIT 1103 First Year Literature Seminar
Literature has traditionally been a welcoming space for people who, by choice or history, do not fit easily in the mainstream of community life. The widespread changes and upheavals of the last century have vastly expanded the ranks of such people, accelerating the processes of immigration and exile while fundamentally altering traditional notions of home and belonging. This course will examine fiction by writers such as Jhumpa Lahiri, Albert Camus, Jean Rhys, Franz Kafka, and Teju Cole, who write from and about the position of outsider, exploring what such texts have to say about living in an unsettled, diasporic modern world - a world in which real belonging seems an increasingly elusive goal. In reading these texts, we will investigate how their authors have portrayed the journeys, hopes, and hardships of dislocation and alienation, as well as the role literature might play in creating a sense of community for immigrants, refugees, and people living in various forms of exile.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 1104 First Year Literature Seminar
Reading courses, each limited to 15 students. Topics: selected writers, varieties of approaches to literature, e.g., Southern fiction, the modern American short story, the mystery; consult Course Listings. Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Fall

ELIT 1105 First Year Literature Seminar
Literature has traditionally been a welcoming space for people who, by choice or history, do not fit easily in the mainstream of community life. The widespread changes and upheavals of the last century have vastly expanded the ranks of such people, accelerating the processes of immigration and exile while fundamentally altering traditional notions of home and belonging. This course will examine fiction by writers such as Jhumpa Lahiri, Albert Camus, Jean Rhys, Franz Kafka, and Teju

Cole, who write from and about the position of outsider, exploring what such texts have to say about living in an unsettled, diasporic modern world - a world in which real belonging seems an increasingly elusive goal. In reading these texts, we will investigate how their authors have portrayed the journeys, hopes, and hardships of dislocation and alienation, as well as the role literature might play in creating a sense of community for immigrants, refugees, and people living in various forms of exile. Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 1106 First Year Literature Seminar
Reading courses, each limited to 15 students. Topics: selected writers, varieties of approaches to literature, e.g., Southern fiction, the modern American short story, the mystery; consult Course Listings. Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 1107 First Year Literature Seminar
Reading courses, each limited to 15 students. Topics: selected writers, varieties of approaches to literature, e.g., Southern fiction, the modern American short story, the mystery; consult Course Listings. Prerequisite: first-year standing.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 1400 Introduction to Writing About Literature
This is a discussion based course focused on analytical reading skills and the principles of effective writing. Through weekly writing assignments and revision, students learn the importance of critical thinking and questioning that are required for the development of ideas and good, clear writing.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Summer

ELIT 1505 Ampersand: Modern Media: The Good, the Bad and the Future I
This first term of a two-semester course would establish an essential background in media literacy and theory for both traditional mass media and the types of digital, or "new," media which have exploded over the past thirty years of the digital age. Accruing a nuanced understanding of the historic and present-day realities of journalism, publishing, documentary, and news reportage, we will consider the myriad ways in which new media have transformed the landscape of each. Eileen G'Sell will be leading discussion on readings relevant to mass media and new media histories, and assigning short, generative assignments. John R. Green will appear via Zoom to discuss television in the time of 9/11 and the new landscape of documentary. Small class. First-year students only. Credit only.
Credit 3 units.
Typical periods offered: Fall

ELIT 1506 Ampersand: Modern Media: The Good, the Bad, & the Future II
Given that the first term of this year-long course is devoted to gaining a firm grasp of the last five decades of mass and new media history, this spring is more driven by the desire to look toward the future of journalism, news media, and the expanding spectrum of new media industries. This semester will also provide tutelage in your own content creation across various new media platforms. Based on his decades of experience as a broadcast journalist and television producer, Professor John R. Green will lead instruction in the creation of multimodal media content; Professor Eileen G'Sell will supplement his instruction with insights on navigating new media as a critical thinker and consumer. Experts and scholars will visit regularly on Zoom and in person to grant a vivid sense of their professional experience and the rapidly shifting media climate. During this semester, fewer formal readings will be assigned, and students will be more focused on producing content specific to traditional and new media channels. This course is only open to people currently enrolled in the fall semester of the Ampersand Modern Media course.
Credit 3 units.
Typical periods offered: Spring

ELIT 1996 English Literature Elective: 1000-Level
This course is used for transcribing 1000-level ELIT elective units.
Credit 3 units. EN: H
Typical periods offered: Fall, Spring, Summer

ELIT 2151 Literature in English: Early Texts and Contexts
How did what we now call English literature emerge? How did such literary activity reflect the world, and how did the world shape this writing? How can literature help us understand the history of art, race, religious identity and sectarian conflict, nations and empires, gender, sexuality, and class? We will address these questions by studying the early history of literature in English, from the Middle Ages through the late 18th century, as well as the tools, vocabularies, and critical practices of contemporary literary studies. We will learn about the material forms of English literature (manuscript, print, and performance traditions) as well as major poetry and prose forms (e.g., sonnet, epic, blank verse, romance, letter, slave narrative). In addition to Geoffrey Chaucer, William Shakespeare, John Milton, and Ignatius Sancho or Olaudah Equiano, the syllabus may include authors and texts such as Beowulf, Sir Gawain and the Green Knight, Julian of Norwich, Edmund Spenser, Margaret Cavendish, Aphra Behn, Daniel Defoe, and Eliza Haywood. Note: This course satisfies one of the two 200-level requirements for the English major.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 2152 Literature in English: Modern Texts and Contexts
What is modern English literature, and how do we tell its story? Is it a succession of literary movements from romanticism to realism to modernism and beyond? Is it a canon of classic texts to survey? Is it a sustained critique of that canon's exclusions, a recentering of the marginalized authors whose works reveal previously obscured accounts of modernity? It is, in fact, all of the above. In this course, we will introduce students to the central themes, forms, and forces that have shaped the history of English-language literature from the late 18th century to the present, as well as to the tools, vocabularies, and critical practices of contemporary literary studies. Throughout, we will examine the norms and assumptions of literary history, including those based in race, ethnicity, class, gender, and sexuality. Students will encounter fiction, poetry, drama, and creative nonfiction from Britain and the United States, along with African, Caribbean, or other global literatures in English. Authors studied may include William Wordsworth, Phillis Wheatley, Jane Austen, Charlotte Brontë, Frederick Douglass, Oscar Wilde, T.S. Eliot, Virginia Woolf, Claude McKay, Samuel Beckett, James Baldwin, Wole Soyinka, Toni Morrison, Ngugi wa Thiong'o, and Zadie Smith. Note: This course satisfies one of the two 200-level requirements for the English major.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 2201 Sophomore Seminar
Topic will vary by semester.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 2210 Topics: Children's Literature
Topics changes each semester.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

ELIT 2211 Topics: Banned Books: From the Giver to Lord of the Flies
Topics in literature, will vary by semester.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Summer

ELIT 2301 Publishing: History and Contexts
This course offers a broad introduction to book publishing, with the goal of establishing an understanding the larger issues facing publishing today, as well as the historical and cultural contexts that informs these issues. We will look at both multiple types of book publishing, with a general emphasis on contemporary Anglophone trade publishing, and will have frequent class visits (via Zoom) by professionals from different sectors of the publishing community. This course will count for one of the core requirements of the forthcoming Publishing Concentration.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 2811 Ampersand: Literary Culture of Modern Ireland
This course will examine the literature of Ireland from the fall of Parnell to the outbreak of the Second World War. This is the period of an emerging cultural nationalism, a great efflorescence of literature in many genres, and some of the most important political, social, and military events in modern Irish history. One of the remarkable things about the period is the close relationship between prominent figures in the literary and artistic world and those in the realm of politics and social change. The result was a rich cross-fertilization of ideas and attitudes which had enormous implications for the future of this embattled island nation. We will explore this vital and transformative exchange by close attention to some primary texts of the period. Writers to be studied will include: Yeats, Gregory, Wilde, Synge, Shaw, Joyce, O'Casey, and Bowen. Course is for first-year, non-transfer students only.

Typical periods offered: Fall

ELIT 2812 Ampersand: Literary Culture of Modern Ireland II
This course will explore the intersection of literature and culture in Ireland from the establishment of the Fianna Fail government of de Valera in the 1930s, through the lean years of the 40s-70s, to the economic boom of the Celtic Tiger in the 1990s and beyond. To appreciate this small nation's rocky road to a successful entrance into the European Union, economic security and national confidence, we will closely read how Ireland's rich and diverse literature casts a cold but feeling eye on its hard-earned independence and fraught nationalism. For the fiction, poetry, and drama of Ireland not only mirrors but often moves the story of this nation's growth and transformation over the decades of economic, social, and political strife. Writers to be studied will include Kate O'Brien, Samuel Beckett, Edna O'Brien, Seamus Heaney, Eavan Boland, Eiléan Ní Chuilleanáin, Brian Friel, William Trevor, John McGahern, Nuala Ní Dhomhnaill, Sebastian Barry, Colm Tóibín, Marina Carr, and Conor Mc Pherson. The Ampersand Ireland trip will take place in May 2025, after final exams.

ELIT 2996 English Literature Elective: 2000-Level
This course is used for transcribing 2000-level ELIT elective units.
Credit 3 units. EN: H
Typical periods offered: Fall, Spring, Summer

ELIT 2999 Research Assistantship
For students assisting English faculty members with their research. The student must provide a description of his or her assistantship and secure permission of the Director of Undergraduate Studies. At the end of the semester, the student must submit a four-page essay describing the work done during the assistantship, along with any documents or work produced. In addition, a written evaluation by the faculty member they assisted is required. Up to three units acceptable toward the English Major. Only for declared English Majors. Must be taken pass/fail.
Credit 3 units.
Typical periods offered: Fall, Spring

ELIT 3000 Introduction to Literary Theory
This course introduces students to some of the most influential theoretical approaches to interpretation applied to English-language literature; to significant conceptual and historical debates about literary and cultural theory; and to the keywords used in these debates. Students will learn how to write and speak about theoretical texts and how to recognize the theoretical assumptions that underlie acts of literary interpretation. Theoretical approaches to be featured may include formalism; Marxism; psychoanalysis; gender and sexuality studies; structuralism and post-structuralism; postcolonial studies; critical race studies; new historicism and cultural materialism; cultural studies; affect theory; neurocognitive approaches; and disability studies. This course fulfills the literary theory requirement for the English major; no substitutions will be permitted. In order to preserve necessary seats for English majors, the course will be enrolled through the wait list.

ELIT 3100 The Great American Novel
What is the Great American Novel? This is a question that has been hotly debated for decades, from Harriet Beecher Stowe to Ralph Ellison, William Faulkner to Toni Morrison. It's a question with a hundred answers and no answers at all-a question of taste, of prejudice, of time. But what is a "Great American Novel"? What does it look like? What do we expect of it? What have Americans throughout history wanted it to say about America? These are questions we can, and will, answer in this course. As elusive a thing as the Great American Novel has been, the idea of the Great American Novel has a long and fascinating history that mirrors all the major movements of American literature from the American Renaissance to the present. Piecing together the story of this dream, this cultural quest with all of its inclusions and exclusions, is a way of telling a shadow history of American society. The Great American Novel tradition is something like a fossil record of America's shifting norms in relation to race, gender, sexuality, domesticity, democracy, citizenship, immigration, labor, capitalism, and war. And so each presumptive Great American Novel is a new variation in an evolving genre and a new thesis statement of American grandiosity or guilt. By cataloguing shared themes, conventions, and preoccupations, and by paying close attention to a handful of likely-and unlikely-candidates, this course will ask big questions about American exceptionalism, American tragedy, and the role of art in American culture. Authors will likely include Harriet Beecher Stowe, Herman Melville, Toni Morrison, Leslie Marmon Silko, and Carmen Boullosa, among others. Satisfies the Twentieth Century and later requirement
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall, Spring

ELIT 3101 Literature and Consent
Western literature begins with a war fought over the raptus (abduction) of a woman, the theft of Helen by the Trojan prince Paris. It's no secret that the violent abduction and sexual assault of women plays a constant-sometimes central, sometimes incidental-role in myth, history, fictional narrative, and poetry from the ancient Greeks to today. This class will consider the omnipresence of sexual violence in English literary history (and its antecedents) and ask why it is there, what its effects are, and how it shapes the way we think about gender, violence, freedom, and desire. This course contends that literature and literary history are keys to understanding the relationship between culture and sexual violence, and, conversely, that attention to sexual violence is key to understanding literary history. Students will acquire a broad historical understanding of consent as it evolved in literary, legal, and philosophical discourses to become a concept that organizes sexual and political freedom. We will ask: Is consent the best framework through which to mediate sexual harm? Are there alternative ways to imagine sexual encounters? How do various media manage sexual experiences? From the medieval romance to the eighteenth-century pornographic novel, from Ovid's "Metamorphoses" to "The Handmaid's Tale," this course will interrogate how literary explorations of consent provoke theories of subjectivity, desire, and power.
Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: BA, HUM EN: H

ELIT 3102 Old English Literature: Beowulf
Beowulf is the earliest and one of the best vernacular works of western literature. In this course, we will learn enough of the Old English language to read much of the poem in the original, relying on translations to bridge the gaps. Student led discussion of scholarly articles will supply historical and literary contexts for the poem. Our emphasis will be on understanding, interpretation, and criticism of the poem. Satisfies pre-1700 requirement.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

ELIT 3103 Old English Literature: Introduction to Old English Language and Literature
Some of Europe's earliest and best vernacular literature is written in Old English, a language so different from the English of today that even the best modern translations cannot capture the character and power of original works. Because of its relation to modern English, however, enough of the language can be learned within weeks to begin reading Old English texts. In this course students will master the elements of Old English language, and learn enough to read and enjoy some of the greatest poetry in Old English, including Beowulf, and the culture that produced it. We shall compare the originals with modern translations by great poets such as Heaney and Pound. We shall also look forward to changes in the English language after the Norman conquest. Limited enrollment. Students should be ready for intensive language work in the first few weeks of the course. Satisfies the Medieval requirement.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 3104 The Writing of the Indian Subcontinent
The Indian Sub-continent has in recent years yielded a number of writers, expatriate of otherwise, whose works articulate the postcolonial experience in the foreign English tongue. This course is designed to be an introductory survey of such writing, drawing on select Sub-continental writers. Covering both fiction and non-fiction by several authors including R. K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatjie and Romesh Gunesekera, we will discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM

ELIT 3105 Caribbean Literature in English
Rum! Fun! Beaches! Sun! This is the image of the Caribbean in America today. This course will survey literature and culture from these islands, looking both at and beyond this tourists' paradise. It will aim to introduce students to the region's unmistakably vibrant tradition of multicultural mixture, while keeping an eye on the long history of slavery and rebellion out of which the islands' contemporary situation formed. Along the way we will encounter a wide variety of texts, from the earliest writing focused on life in urban slums, to the first novel ever to have a Rastafarian as its hero, to more contemporary considerations of the region's uncertain place in a U.S.-dominated world. Toward the end of the course, we will also look at important films like The Harder They Come as well as discussing the most globally famous cultural product of the contemporary Caribbean: reggae music. The course will involve readings from multiple genres, and will cover authors such as C.L.R. James, Derek Walcott, Jean Rhys, V.S. Naipaul, Jamaica Kincaid, and Caryl Phillips.

ELIT 3109 The Medieval Romance
The romance grows out of the epic: how we get from the fall of Troy to the fall of Troilus. Readings from Vergil's Aeneid to Sir Gawain and the Green Knight.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

ELIT 3110 Topics in Literature: Heroes and Lovers
We will read Beowulf, Sir Gawain and the Green Knight, Chaucer's Troilus and Criseyde, The Mabinogion, The Tain, Margery Kempe, and Malory's Morte d'Arthur.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

ELIT 3111 Topics In Literature
Called the Age of Revolution, the Romantic Age of British literature, 1770-1830, witnessed the birth of new lyric forms, the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, over simply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal Jerusalem. It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we will consider the historical contexts, and the sometimes competing histories of ideas, that shaped the five major British

Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron, and John Keats. We will follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts also to be assigned will include Mary Shelley's Frankenstein and Byron's Don Juan.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall, Spring

ELIT 3115 Topics in American Literature: Travel Writing and Empire
There are two main strands in twentieth- and early twenty-first-century science fiction, which exist in tension: Escape from Earth (together with whatever you can salvage) and Return to Earth (with a new perspective, an alternate sense of how things actually work). Lower-case "sf" is a grab-bag category which includes pretty much all modern science fiction; all-cap "SF" is a more recently formulated category which tends to involve some form of Return to Earth. We will read an assortment of classic science fiction texts as well as several brief theoretical accounts of SF, always keeping the Escape from/Return to Earth dichotomy in mind and the particular significance it assumes in the Age of Covid and the Climate Crisis. What we now call science fiction was formerly termed scientific romance or speculative fiction - do these categories remain useful? Readings include diverse works by Hinton, Zamyatin, Stapledon, Le Guin, Delany, Butler, Gibson, and Brin. Satisfies the Twentieth Century and later requirement.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 3116 Topics In Literature
Islands have always lured the human imagination. They are places of longing, of splendid isolation--places where you can discover new forms of life and give up old ones. This course will explore the island as a place and as a state of mind. We will get to know loners and dreamers, travelers and survivors. We begin our journey with island stories from Homer's Odyssey and Ibn Tufayl's Hayy Ibn Yaqzan, stop over at Robinson Crusoe Island, and visit Jonathan Swift's Houyhnhnm-land, where we'll meet the man who wanted to be a horse. We'll finish our journey in the twentieth century. Along the way, we will get to know the different genres that have given islands literary form, from satire and novel to utopia and dystopia. Satisfies the Eighteenth-Century requirement.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 3117 Topics in American Literature
This course surveys the classics of nineteenth-century gothic fiction. We will approach the gothic as a realm of writing preoccupied with the monstrous and the foreign--and witness how these dark and exotic forces could become domesticated in novels that depicted what Henry James called "those most mysterious of mysteries, the mysteries which are at our own doors." At times dismissed as superficial, formulaic and merely entertaining, the gothic texts under scrutiny here will also get credit for addressing profound and controversial questions about human nature and the nature of desire. Authors will include Mary Shelley, Charlotte and Emily Bronte, Sheridan Le Fanu, Robert Louis Stevenson and Bram Stoker. Satisfies the Nineteenth Century requirement.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 3118 Topics In Literature
What does it mean to be a woman writer in a today's global literary community? What issues are women thinking, talking, and writing about now? How do women writers explore contemporary events? Do they share meaningful connections and contribute to a gender-specific literary tradition, or is "women's writing" simply a marketing category in the vein of "chick lit"? While we will consider recent novels, memoirs, essays, short stories, and poetry in light of specific socio-historical developments, we will also ask how these authors shape new political futures through their imaginative and critical works. By reading a diverse spectrum of writers from around the world, we'll assess the limitations and possibilities of the writing so often relegated to what novelist Meg Wolitzer has called "the second shelf." Authors studied may include Charlie Jane Anders, Alison Bechdel, Anne Boyer, Stephanie Burt, Leila Chatti, Danielle Dutton, Bernardine Evaristo, Elena Ferrante, Aracelis Girmay, Lauren Groff, Saidiya Hartman, N.K. Jemison, Ada Limón, Patricia Lockwood, Layli Long Soldier, Valeria Luiselli, Ling Ma, Helen Macdonald, Carmen Maria Machado, Helen Oyeyemi, Warsaw Shire, Zadie Smith, Kai Cheng Thom, and Shola von Rheinhold. Satisfies the Twentieth Century and later requirement for the English major; non-majors welcome.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 3119 Contemporary American Women Poets
An introduction to the work of contemporary American poets who are women; extensive reading of both poetry and prose. Readings include the work of poets such as Bishop, Rich, Plath, Sexton, Clampitt, Gluck, Moss, Graham, Howe, Dove, Oliver, Forche, Lauterbach.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 3120 American Literature to 1865
A survey of significant writers, works, and intellectual developments from the early Puritan settlements to the late 19th century. Our goal is the construction of a serviceable narrative of the nation's cultural and literary history. Readings include selections of fiction, poetry, and non-fiction prose by Franklin, Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and Emily Dickinson. Satisfies both the 1700-1900 and the American requirement.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 3124 Selected American Writers
Intensive study of one or more American writers. Consult Course Listings for offerings in any given semester.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

ELIT 3125 Selected Writers: Jane Austen
In this class we will read all of Austen's novels -- "Northanger Abbey," "Sense and Sensibility," "Pride and Prejudice," "Mansfield Park," "Emma," and "Persuasion" -- as well as selections from her juvenilia and minor works, including the uncharacteristically wicked "Lady Susan" and the epistolary burlesque Love and Friendship. Since Austen was one of the earliest women writers to achieve both popular acclaim and canonical status, we will look closely at the evolution of her literary reputation. Was she a "lady novelist" who knew her place and limited her material accordingly? Or was she an uncompromising critic of her society who punctured its pretensions with her satirical pen? Of special interest in our investigations will be: family feuds and domestic relationships; gender and social roles; imitation and parody; sentimentalism and radicalism; Austen and the romance novel; and Austen's humor. We will also view an Austen film adaptation. Satisfies the Eighteenth Century requirement.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 3126 Selected American Writers: Toni Morrison
Toni Morrison has emerged as one of the most influential writers and critics in contemporary American culture. This course will examine her diverse literary and critical work from a variety of perspectives. Special attention will be paid to Morrison's contributions to African American literature and theory, in particular how she conceives of Black art and the responsibilities of its practitioners. In our study of her novels, we will explore such issues as the importance of history and myth in the creation of personal identity, constructions of race and gender, the dynamic nature of love, the role of the community in social life, and the pressures related to the development of adolescent girls. We will also examine the changing nature of Morrison's reception by critics and academics, and consider how and why she has achieved such widespread acclaim and influence. Satisfies the Twentieth Century and later requirement. This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 3127 Selected American Writers
"Could a greater miracle take place than for us to look through each other's eyes for an instant?" (Thoreau). In place of a wide sampling the course will focus on a few selected authors, most of them contemporary or near-contemporary, and explore the fictive worlds their writings bring forth. We will read texts closely, but we will also step back from them and consider how a writer's fiction creates a universe of character types, a network of interpersonal dynamics, a structure of values, and a vision of life; we will try to look at the world through a succession of others' eyes. Authors will likely include five or six of the following: Flannery O'Connor, John Updike, Alice Munro, Milan Kundera, Raymond Carver, Andre Dubus, Ann Beattie.
Credit 3 units. Art: HUM

ELIT 3128 Tragedy
Much of our attention in this course will focus on the tragedies of Aeschylus, Sophocles, and Euripides and on determining what is unique to each playwright and what is common to the ancient Greek sensibility -- especially in terms of morality. We will then look at selected tragedies of the twentieth century (those of O'Neill, Dove, and others), plays whose strategy has been to revisit particular Greek tragedies and recast them in the contemporary period. What aspects of Greek morality remain constant over time and across differences of culture? In what ways and to what degree are the parameters for morality always -- necessarily -- in shift? These are among the questions we will attempt to answer in the course of our investigations into tragedy from its beginnings up to the present day.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 3129 Reading in the Renaissance: Texts and Practices
This course aims, first, to acquaint students with English Renaissance literature, from Shakespeare to Dryden; then to investigate the ways in which that literature might have been read by its original audience; and finally to consider how such knowledge might, or should influence, our own understanding and experience of Renaissance texts.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

ELIT 3130 A History of the Golden Age of Children's Literature
A comprehensive survey of the major works for children written during this period.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 3131 Modern Drama 1850-1920
The emergence of modern drama: emphasis on Ibsen, Strindberg, Chekhov, Shaw.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 3132 Modern Drama 1880-1945
Major figures of modern drama: Ibsen, Strindberg, Shaw, Chekhov, Lorca, Synge, Pirandello, Brecht and O'Neill. Close literary study and consideration of these plays as examples of the art of the stage. Reference will also be made to contemporary experiments in the other arts, and to major literary movements in the time period under consideration.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 3133 Modern Drama, 1945 to the Present
Course concentrates on the development of modern drama from 1945 to the present. Focus is on both literary and theatrical techniques as well as the examination of trends in the contemporary theatre from Samuel Beckett through Sam Shepard. Perspective is comparative and international in scope, with particular attention given to women and minority playwrights.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

ELIT 3134 Modern Drama
The establishment of modern drama: emphasis on Brecht, Giraudoux, Pirandello, Osborne, Williams, Miller. A look at major literary and theatrical movements shaping contemporary drama.
Credit 3 units. Art: HUM

ELIT 3135 Topics in 19th- and 20th-Century American Writing: American Short Fiction
This course is directed toward a broad range of majors and non-majors with a serious but not scholarly interest in American Short Fiction.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

ELIT 3136 Topics in 20th-Century American Writing
An introduction to major American works and writers from the later 19th century through the mid-20th century. Writers studied include Twain, James, Crane, Fitzgerald, Hemingway, Faulkner, Frost, Eliot and Stevens. The course assumes no previous acquaintance with the

material and is directed toward a broad range of majors and non-majors with a serious but not scholarly interest in the subject. Students with little or no background in literature might be advised to take E Lit 213C (Chief American Writers), while English majors looking to do advanced work should consider the 400-level American literature sequence. Students who have taken E Lit 213C should not enroll in this course.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 3137 Two Cultures: Literature and Science
The relation between biology and literature as it has been examined and expressed in poetry, fiction, and nonfiction of the past two centuries.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 3138 Introduction to Postcolonial Literature
At its zenith, the British Empire encompassed almost a quarter of the globe, allowing the diminutive island nation unprecedented economic, military, and political influence upon the rest of the world. This course will introduce some of the foundational responses to this dominance, both literary and theoretical, by the colonized and their descendants. We will examine important critiques of colonialism by theorists such as Frantz Fanon, Aimé Césaire, Edward Said, Homi Bhabha, and Gayatri Spivak, as well as literary works that reflect a postcolonial critique by authors such as V.S. Naipaul, George Lamming, Doris Lessing, and N'gugi wa Thiong'o. The course will interrogate how literature could be said to help consolidate Empire as well as ways in which it might function as rebellion against imperial power, with a view toward teasing out the problematics of race, gender, language, nationalism, and identity that postcolonial texts so urgently confront. This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

Topics course which varies by semester.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

ELIT 3140 Topics in Literature:
Cleopatra, queen of the Nile, has become famous for her romantic liaisons, political maneuvering, and her death by snake bite. Yet Cleopatra was also a formidable military strategist, a powerful leader who studied medicine and spoke nearly a dozen languages. Most importantly, Cleopatra was the prototype for depicting strong women on the throne. This course will explore how Early Modern playwrights re-imagined Cleopatra in the Renaissance, a time which saw another strong queen, Elizabeth I, rise to power. We will pay special attention how these dramatists used Cleopatra to engage with issues of race, globalization, gender, history, and politics. Finally, we will think about how Shakespeare and his contemporaries analogized the exotic and sometimes scandalous Cleopatra with the virginal Queen Elizabeth, two women who mobilized the power of performance in order to assert female authority in their male-dominated societies. Readings may include works by Cicero, Lucan, Plutarch, and Virgil from antiquity; and plays by Marlowe, Mary Sidney, Daniel, Brandon, Elizabeth Cary, Fletcher, Dryden, and Shakespeare as well as the writings of Queen Elizabeth from the Renaissance. 3 short responses; midterm and final papers; and a presentation introducing one of the assigned readings. First-year and/or students with no prior knowledge of this topic are encouraged to enroll. Satisfies the Early Modern requirement.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 3141 Topics in Literature
Popular discourses celebrate globalization as a contemporary phenomenon characterized by increased connectivity, access, and diversity. Yet, the proliferation of borders-geographical, legal, and symbolic-radically troubles these idealistic accounts of inclusivity and progress. This course grapples with a range of global Anglophone literatures to explore the dark underside of globalization, minding the unevenness and violences of its histories and structures. Particularly, we will work through a set of literary and theoretical texts to investigate the role of literature and literary criticism in reproducing, complicating, and transforming the very conditions of the "global." Following the routes and historical legacies of colonialism and postcoloniality that structure the modern world, our participation in larger academic conversations will be guided by the following inquiries: How do literary and cultural productions not only reflect, but also produce and uphold the very contours of globalization? How do the proliferation of borders, histories of colonialism, and structures of violence trouble celebratory visions of an increasingly interconnected world? How can we perform readings that attend to a literary text's relationship to power dynamics and the world? The course will draw on writings from such artists and scholars as Aimé Césaire, Michelle Cliff, J. M. Coetzee, Franz Fanon, and Jhumpa Lahiri. This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

ELIT 3142 Blacks and Jews in America
What do U.S. writers who identify as Jewish and/or African American have in common with each other? As some of you undoubtedly know, there has been much ink spilt on the correspondences and conflicts between these influential American groups. With an eye towards understanding their common ground-the move from ghetto to gated community, as it were (and, for some, the inability to do so)-we will look also to comprehend the fault lines that shape their literary identities. Too, we will see how other categories-of class, of gender, of immigrant status-further mark their productions. Readers of modern American literature should know the shared and vexed history of their literary worlds. Satisfies the Twentieth Century and later requirement.This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond.
Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 3143 Selected English & American Writers
This course will cover English and American writers.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM
Typical periods offered: Fall

ELIT 3144 Topics in Literary Criticism and Theory
This course will juxtapose a wide variety of critical approaches to literary texts to current research in the digital humanities and statistical natural language processing to ask how we can think about the complexity of literary texts in computational terms. The computational turn in literary studies emphasizes scale and a broad perspective often described as "distant reading" and implicitly contrasts this to the kind of "close reading" that has traditionally been the focus of literary scholars. However, in spite the obvious benefits of scale, such approaches tend to focus on features that are completely internal to texts or to the corpus. In this course, we will explore how we can represent ambiguities of words, nuances of structure, the interaction of motifs, and the intensely intertextual way in which most literary research problems are formulated? While we will discuss the limitations

and potentials of various computational approaches, we will focus more on the possible futures of computationally assisted literary criticism than a practical survey of various tools and techniques. No prior experience with statistics or computing is required.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 3145 Topics: Literary Criticism and Theory: Ways of Approaching a Literary Text
What are some of the different ways of approaching a literary text? How do you choose among them? In this course we will begin by reading two important works from different genres (for instance, a novel such as Virginia Woolf's 'Mrs Dalloway' and a mid-length poem, perhaps "Notes Toward a Supreme Fiction" by William Stevens) together with a selection of critical essays about these works and their historical context. The bulk of the course will then consist of readings among various theoretical approaches to literature, including deconstructionist, new historicist, cultural, hermeneutic, psychoanalytic, and feminist approaches, which we will then apply to the texts at hand. The course is designed as a practical introduction to literary theory.
Credit 3 units.

ELIT 3146 The Art of the Novel
This course will take as its starting point traditional models of the novel and will then examine a variety of novels from different traditions - American, British, continental - which in differing ways play against this type, bending, challenging or ignoring the rules. We will be interested in attempting to understand the logic of such idiosyncratic forms, both why each writer is attempting to defy or undo our understanding of a normative reality and of the usual novelistic proprieties and how each novel provides its own manner of coherence.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 3147 The Art of Poetry
Techniques of poetry, considered theoretically and practically in relation to problems of form and significance: meter, rhyme, image, metaphor, stanzaic patterns, and others.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 3148 20th-Century Poetry
This class sets course through 21st century poetry written and translated into English, focusing entirely on how poets write across cultures. Certain topics will seem particularly modern: ecopoetics, #BlackLivesMatter, and social media. Other topics will raise important and enduring questions: How do poets influence other poets? How do poems speak to oneanother? What can poetry learn from other arts? And what is a poem anyways? This course will introduce students to the practice of reading and writing about contemporary works of poetry in order to gain a keen understanding of how our own social, political, and cultural locations influence our readings of texts, and how diverse voices and experiences resonate cross-culturally. We'll discuss the boundaries and borders of poetry, what it means to think of poetry as a representation of our society and of our world, and how poetry reflects and speaks to our current political, economic, and social realities. We will also analyze the forms and modes that define contemporary poetry, and how these forms and modes are changed and adapted by poets of different races, genders, sexualities, nationalities, backgrounds, lineages and traditions. In the first half of the semester, we will work on a small-scale version of the primary prose genre of contemporary poetry criticism-the book review. In the second half of the semester, our writing will culminate in a final paper dealing with poetry and various aspects of globalization. This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond. Satisfies the Twentieth Century and later requirement.
Credit 3 units. A&S IQ: HUM Arch: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 3149 Black Literature: Race, Class, and Writing in the United States and the Caribbean, 1900-1950
Study of the differences in literary tradition arising from the divergent social, racial, and educational milieux of the United States and the West Indies.
Credit 3 units. A&S IQ: HUM BU: BA, HUM

ELIT 3150 The Writings of Philip Roth
Fiction by Philip Roth in chronological order from his earliest to his last major effort.
Credit 3 units.

ELIT 3152 The Bible as Literature
The Bible is one book among many; the Bible is a book like no other; the Bible is not one book but many. The course will debate such positions and the different histories and practices of reading they involve. We shall read extensively in English translations of the Bible, both Jewish and Christian, with emphasis on literary form and ideas. We shall look at the Bible's material forms, and the history of its interpretation and translation. The aim is not to adjudicate its meaning but to explore what over time it has been taken to mean, attempting to locate within the book the potential for different interpretations. The course requires, and should foster, attentive reading, vigorous yet courteous argument, and respect for the readings of others.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM EN: H
Typical periods offered: Fall, Spring

ELIT 3153 The Women of Greek Tragedy
This course examines the role of women in Athenian drama. Students will read English translations of the works of the three major tragedians -- Aeschylus, Sophocles, and Euripides -- and their near contemporary, the comedian Aristophanes. Direct engagement with ancient texts will encourage students to develop their own interpretations of and written responses to the political, social, and ethical manipulation that these mythological women were compelled to endure and the subtle ways in which they appear to exercise power themselves. Selected scholarly articles and book chapters will help students to contextualize these ancient dramas in their culture of origin. Because such issues continue to preoccupy both sexes today, students will see how Greek tragedy addresses perennial historical and cultural concerns through the examination of adaptations of Greek tragedies ranging from Seneca in ancient Rome to Spike Lee's Chi-Raq and Luis Alfaro's Mojada: A Medea in Los Angeles. The final research paper will encourage students to consider how a specific female character from antiquity is transformed for a modern dramatic audience.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

ELIT 3154 The Renaissance
Major texts of the European Renaissance examined to set English literary achievement in a continental context. Among authors to be studied: Petrarch, Castiglione, Erasmus, More, Luther, Wyatt, Rabelais, Montaigne, Shakespeare, Spenser, Jonson, Milton. Prerequisite: 6 units of literature, junior standing, or permission of instructor.

ELIT 3156 Writing and the Representation of Pain
Writing intensive course on the representation of pain at every level, from private suffering to public policy. Course reader consists of examples of or extracts from a diversity of materials: the Bible and Ovid, medieval religious lyric, saints' lives, visions of hell and damnation, descriptions of visionary illness, Freud's Anna O, Kafka's In the Penal Colony, Wilde's The Nightingale and the Rose, Woolf's On Being Ill, Artaud and the theater of cruelty; autobiographical and other writings by Susan Sontag and Inga Clendinnen; theory by Bataille, Deleuze, Dollimore, and Elizabeth Grosz; work on pain by Leder, Morris, Rey and others; poetry by Anne Sexton, Sylvia Plath, Gwen Harwood, Alan Jenkins and others. We will also read Elaine Scarry's The Body in Pain and two recent novels: Andrew Miller's Ingenious Pain and Manil Suri's The Death of Vishnu.
Credit 3 units. A&S IQ: HUM BU: HUM

ELIT 3157 The Victorian Period
This course begins with two classic mid-century novels-Jane Eyre by Charlotte Bronte and Great Expectations by Charles Dickens-once celebrated as intimate portrayals of a first person narrator meant to be representative of a new national type: the post-Romantic English subject rewarded by hard work and delayed gratification. We'll explore why some critics in the late 20th century began to emphasize how these once paradigmatic English stories were in fact fictions of empire, complicated portraits of an era when Englishness was inevitably defined by events and experiences that were geographically and culturally estranged from the British Isles. The remainder of the course will focus on authors of the late 19th century grappling with imperialism, colonization, globalization and the transformative technologies that gave birth to our modern world. Satisfies the Nineteenth Century requirement.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 3158 Banned Books
Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago a Russian student was exiled to Siberia for possessing a copy of Emerson's Essays; today, schoolboards in the United States regularly call for the removal of Huckleberry Finn and The Catcher in the Rye from classrooms and library shelves. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. The course explores these issues by looking closely at several American and translated European texts that have been challenged on moral, socio-political or religious grounds to determine what some readers have found so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments.
Credit 3 units. A&S IQ: HUM Art: HUM BU: ETH, HUM

ELIT 3159 African-American Literature: Early Writers to the Harlem Renaissance
This class/directed reading group will focus on approximately the first century of African American publications-of autobiographies and novels, manifestos and newspaper editorials. Although many works by early Black writers are now available in print-Frederick Douglass and Harriet Jacobs spring instantly to mind-many more can be accessed through digital archives. We will survey a core group of printed texts, augmenting our readings via digital entities such as the Colored Conventions: Bringing Nineteenth-Century Black Organizing to Digital Life, Common-Place's Just Teach One: Early African American Print and the Digital Collections of the Schomburg Division of the New York Public Library. Assignments will include essays and/or digital/online projects. Some classes may meet in the library or the Digital Humanities Workshop. This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM
Typical periods offered: Spring

ELIT 3160 African-American Literature: African-American Writers Since the Harlem Renaissance
African-American literature in the 20th and 21st centuries grows from the Harlem Renaissance into a world-shaping institution. Guggenheim, Pulitzer, and Nobel prize winners; card-carrying Communists, rock-ribbed Republicans, and Black Power nationalists; Broadway playwrights, Book-of-the-Month Club novelists, and even a U.S. President are among the many whose fictions and memoirs we will study, with special attention given to the intimate links between Black writing and Black music. The syllabus will thus feature authors ranging from poet Alice Dunbar Nelson (born 1875) to satirist Colson Whitehead (born 1969), with more than a dozen stops in between. Written assignments may include two papers and two exams. No prerequisites, but related courses such as E Lit 215 and/or AFAS 208 are suggested. Satisfies the American literature requirement in English and/or one 300-level elective requirement in AFAS.
Credit 3 units. A&S IQ: HUM, SC BU: HUM EN: H

ELIT 3161 African Literature in English
The West has imagined Africa in fanciful but simplifying ways for centuries. This course will, instead, approach Africa as a complex site of modernity characterized by a kaleidoscopic blend of racial, ethnic, religious, political, and socioeconomic identities that defy easy summary or description. We will do this through a survey of the continent's formidable and dynamic tradition of literature written in English. The course will trace the development of African literature, from its roots in the oral tradition, to its response to colonial oppression, through its articulation of an autonomous identity on the road to political independence, and on to its contemporary status as a crucial, innovative powerhouse in the global literary marketplace. The course readings will include imaginative texts by authors such as Chinua Achebe, Bessie Head, Nadine Gordimer, Ayi Kwei Armah, and Dinaw Mengestu, as well as secondary readings on the political, cultural, and theoretical contexts within which African literature took shape. Satisfies the Twentieth Century and later requirement.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Spring

ELIT 3162 Shakespeare in Performance
This course is an introduction to Shakespeare's plays and poems through the interpretive framework of performance. A thespian himself, Shakespeare drew on his stage experience when writing his plays, collaborating with a theater company and shaping his characters to reflect the talents of its actors. Reading the plays as literature, we will study the evolution of how they have been produced on stage from their early modern premieres to the present day, comparing and contrasting different strategies for generating meaning in performance with reference to various film adaptations. By reciting a sonnet of their choosing and rehearsing a scene from one of the plays, students will gain new insight into performance as an interpretive act and a deeper understanding of the production and reception histories of Shakespeare's plays. Most importantly, we will consider why Shakespeare's works have continued not only to resonate, but also to entertain, for over 400 years. Assignments include: two papers; an in-

class performance of a sonnet; and a group presentation of a scene from one of Shakespeare's playsaccompanied by a brief reflection statement. First-year and/or students with no prior knowledge of this topic are encouraged to enroll. Satisfies the Early Modern requirement.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 3163 Shakespeare
Introductory course emphasizing critical interpretation. Representative plays are studied in detail. Required of all English majors and minors.
Credit 3 units. A&S IQ: HUM Arch: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 3164 Adaptations Literature / Film / TV
The book was better than the movie. The movie wasn't faithful to the book. The TV series didn't capture the book like the movie did. These have forever been the complaints of readers watching their favorite works of literature adapted to the screen, and, in a media ecosystem increasingly flooded with adaptations and reboots of existing intellectual property, these complaints won't be going away any time soon. Film and literature have been interconnected since the very first films screened at end of the nineteenth century, but the dynamic between literature and media has sometimes been strained: film reviled as the cheap degradation of a vital art form, the novel anxious at the rise of narrative film - and later television - as rival storytelling media. But, viewing literature and visual media in opposition can obscure what becomes visible if we view them together. This is a course about the history, theory, and practice of adaptation from literature to film and television and back again rooted in both canonical and non-canonical case studies. We will study authors whose works have been repeatedly adapted across eras and media; filmmakers whose works are pastiches of various literary and cinematic sources; rigorously, obsessively faithful adaptations; radically transformative unfaithful adaptations; and works of literature and media that are themselves about the process and ethics of adaptation. The course will be anchored by a reading of Emily St. John Mandel's 2014 novel Station Eleven and a serial viewing - replicating the unusual original release - of HBO Max's miniseries adaptation.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 3165 Topics in 19th-Century American Writing
The exultant but conflicted period that followed the success of the American Revolution initiated themes and began to weave cultural strands still familiar in the 21st century: American heroes and scoundrels; the role of women in public life; Christianity vs. Islam; the psychology of moralism and delusion; race as caste and subversive voice. Course readings will include Franklin's Autobiography and the autobiography of Henry Tufts, a confidence man;
Parson Weems' cherry tree biography of Washington; Tyler's The Algerine Captive (novel) and Susanna Foster's Slaves in Algiers (drama); other fiction and drama by Hannah Foster (The Coquette), Charles Brockden Brown (Wieland), Royall Tyler (The Contrast) and William Dunlap (Andre) - in which Washington weeps while ordering a spy's hanging; narratives by enslaved Africans Briton Hammon and John Marrant; the narrative of Samson Occam, a Mohegan; selections from "The Gleaner," Judith Sargent Murray. Satisfies 1700-1900 requirement.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 3172 The Eighteenth Century
This course will cover literature from the eighteenth century.
Credit 3 units.

ELIT 3404 Literature and Medicine
Because illness, disease, pain, and fear of death are essential features of the human condition, these themes frequently appear in major literary works, a survey of which we will read in this class. We will focus especially on the suffering, helplessness, insight, and enlightenment experienced by both the ill and those who care for them. Works responding to the devastating plagues in the medieval and early modern periods hold especial interest for those studying illness and medicine; we will read works on plague by Boccaccio, Chaucer, and Defoe, with Sontag's Illness as Metaphor providing a starting point for our analysis. Two twentieth-century novels-The Plague, by Camus, and Blindness, by José Saramago-will show us the additional imaginative possibilities of plague as metaphor and allegory. We will also read shorter works of fiction by Tolstoy, Mann, Chekhov, Eliot, Gilman, and Porter, as well as Edson's play W;t. Students will be encouraged to consider how illness, disease, and fear of death affect both individual human beings and entire societies. Prerequisite: Writing 1.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

ELIT 3501 Topics In Literature
Starting with Allan Bloom's The Closing of the American Mind, a book that helped re-ignite the Culture Wars, this course will consider the debates and problems that pervaded American culture during the 1990s. From the end of the Cold War to the sexual scandals that rocked Bill Clinton's presidency, from the emergence of the Internet to the rise of grunge and rap, the 1990s were a time of vast change in American culture. It was period when we, as a nation, reconsidered the legacy of the 1960s, the Reagan revolution, and the end of the Cold War, a time of economic expansion and cultural tension. In our consideration of this period, we will take a multidisciplinary approach when tackling a variety of materials-ranging from literary fiction (Philip Roth's The Human Stain, Jonathan Franzen's The Corrections) and popular films (Spike Lee's Do the Right Thing and The Cohen brothers' The Big Lebowski) to the music of Nirvana and Public Enemy-in an attempt to come to a better understanding of our recent history. Throughout the semester, we will pursue the vexed cultural, political, and historical questions that Americans faced in the years between the fall of the Berlin Wall and the terrorist attacks of September 11th, 2001, and consider how literary texts imagined this period of American history.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

ELIT 3503 Topics in English and American Literature
Selected Topics. Varies from semester to semester. Writing Intensive
Credit 3 units. A&S IQ: HUM, WI BU: HUM EN: H

ELIT 3504 Literature and Medicine
Because illness, physical and mental suffering, and fear of death can have such powerful and disturbing effects, literary works depicting them offer unique insights into human experience. In this class we will read a selection of literary works that depict the suffering caused by diseases like cancer, tuberculosis, asthma, and plague; explore the symbolic and allegorical meanings that have come to be associated with them; and consider the roles and responsibilities of physicians charged with treating patients with these conditions. Readings will be drawn from such writers as Sontag, William Carlos Williams, Defoe, Dickens, Poe, and George Eliot. We will read modern English translations of works by such writers as Boccaccio, Tolstoy, Chekhov, Mann, Proust, and Camus. In this writing-intensive course, students will

develop their skill in literary analysis, and will be urged to establish their own voices as writers and thinkers. Students will be enrolled from the waitlist; preference will be given to Medical Humanities minors, English majors and minors, and seniors.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 3510 Writing Modern War
The twentieth century, as Graham Greene observed, was a century in which there would never be a peace. This writing intensive course examines the ways in which modern writers have tried to describe warfare and its impact on both combatants and those on the home front.
Credit 3 units.

ELIT 3512 Bots, Drones, and Cyborgs: Being Human in the Age of Intelligent Machines
We llive in a world where not only our access to information, but our social interactions, and bodily autonomy are increasingly mediated by- surveilled, analyzed, facilitated, enhanced- by technology. This course will ask what it means to be human in an age of intelligent machines. What happens to our notions of individuality, autonomy, and political subjecthood when domains or categories once thought exclusively to be the preserve of humanity- language, emotion, complex information processing (playing chess, or driving cars, for example)- are increasingly threatened, replicated, and extended by technology? We will cover a range of science fiction texts including Karel Capek's play Rossum's Universal Robots, Isaac Asimov's I, Robot, Phillip K. Dick's Do Androids Dream of Electric Sheep, and William Gibson's Neuromancer along with works of speculative fiction such as Aldous Huxley's Brave New World and Margaret Atwood's Oryx and Crake, and Kazuo Ishiguro's Klara and the Sun along with films such as Blade Runner and The Matrix. We'll juxtapose these cultural representations of artificial intelligence with emerging philosophical and scientific discussions to ask to what extent the fundamental ways AI continues to redefine the boundaries of the human as a category.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 3513 The Literature of the American Revolution
While not a historical survey, the course will present several case studies raising questions about later myth and contemporary reportage.
Credit 3 units. A&S IQ: HUM BU: HUM

ELIT 3514 Selected English and American Writers
This course is intended as an in-depth introduction to, arguably, the two most significant American fiction writers of the first half of the twentieth century. We will focus primarily on each author in his own right, beginning in each case with some short stories and then moving to exemplary novels by each. However, we will also consider their shared thematic concerns: the construction of identity; memory and mortality; sexuality and gender - and the contrasting techniques and forms through which each represented these issues. (Writing Intensive). Satisfies the American (old major) or Twentieth Century (new major) requirement.
Credit 3 units. A&S IQ: HUM, WI BU: HUM EN: H

ELIT 3515 The American Novel: Split and Hybrid American Identities
Examination of the struggle to form an enabling identity for author, characters, and text against the divisive pressures of family and society.
Credit 3 units. A&S IQ: HUM, WI BU: BA, HUM EN: H

ELIT 3516 Writing About Performance
In this writing-intensive course, students will develop critical strategies for writing about theatre and other performance events, in the present and in a range of historical periods.
Credit 3 units. A&S IQ: HUM BU: HUM

ELIT 3517 Memory and Narrative: The Literature of Memory
Writing intensive course that examines the role of memory in drama and fiction.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 3518 On Time: Clocks, Calendars, Crisis in Modern British Fiction
This course focuses on the cultural understanding and literary representation of time in the first half of the twentieth century. Our authors include Virginia Woolf, H. G. Wells, Jean Rhys, Katherine Mansfield, Joseph Conrad, C.I. James, Mulk Raj Anand, and a number of other canonical and non-canonical writers. In their novels, novellas, and short fiction, these writers take account of a profound change in the metrics and meanings of time. Following the establishment of Standard or Greenwich Mean Time at the end of the nineteenth century, the experience of time shifted from a "natural" (daily, seasonal, annual) to an "artificial' (numerical, standard, global) measure. This new standard time, also known as "rational" or "public" time, moved at once stimulated interesting, significant, and lasting responses in the arts of literature, the novel and short fiction especially, that moved in time. What we know as "the stream of consciousness," for instance, witnesses a new emphasis on "private" internal time as a reaction to rational, public time. We will follow this evolving sense of time into and through some of the cataclysmic, not so "rational" events in real historical time: two World Wars (both undergone and anticipated), the rising and spreading crises of Empire, a global financial meltdown, and the near-revolutions achieved by the women's and workers' movements. Here the understanding of the meaning and shape of history and the direction of historical time is richly conflicted, and the literature of the period takes the measure of this duress. Our reading will include work from the British Isles as well as colonial (soon to be postcolonial) locations. Satisfies the Twentieth Century and later requirement in the English Major and the university's Advanced Writing requirement.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 3519 Epistolary Literature in the 18th Century: Other Peoples' Letters
In this writing intensive course, we will examine the attraction the letter held for authors and readers alike, taking into consideration the advantages and the disadvantages of the form, its role in the development of the early novel, and current theories of epistolary writing.
Credit 3 units. A&S IQ: HUM, WI BU: HUM EN: H

ELIT 3539 Jews, Jersey, and America: Philip Roth Reconsidered
Beginning with the publication of his debut Goodbye, Columbus in 1959, Philip Roth remained a highly visible, and at times highly controversial presence on the American literary scene. Questions of Jewish American identity; the power struggle between fathers and sons; the irrationality of male sexual desire; the consequences of exercising one's (artistic, sexual, personal) freedom; the tumultuous history of Newark; the nature of the American experiment-these are the central concerns that percolate throughout his thirty-one books. In this course, we will read Roth's major novels and explore how his fiction addressed these questions. Moreover, we will discuss how we can approach Roth's fiction in the wake of such events as the Trump presidency, the Covid-19 pandemic, and the #Me Too Movement. How do we read Roth

in the wake of the political and social traumas that have shaped our recent history? How does Roth's fiction speak to the recent rise in anti-Semitism? To help inform these questions, we will also consider how contemporary writers, such as Nicole Krauss and Taffy Brodesser-Akner, have directly reconsidered Roth's legacy in their fiction, rethinking his treatment on such topics as Jewish-American identity, sexual politics, and the status of the novel.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 3690 Reading Sex in Premodern England
This course introduces students to the literary representation of gender and sexuality in England from the medieval period to the eighteenth century. To understand a tradition that addressed the intractable problem of human sexuality in terms very different from ours, we will ask: how does pre-modern culture imagine gendered identities, sexual difference, and erotic desire? How do various contexts-medical, religious, social, private, public-inform the literary representation of gender and sexuality? What are the anatomies and economies of the body, the circuits of physical pleasure, and the disciplines of the self that characterize human sexuality? Students will have the opportunity to study romances, saints' lives, mystical writings, diaries, plays, sex guides, novels, and scientific treatises. By learning how to read sex in pre-modern literature, students will acquire a broad cultural and historical understanding of English sexualities before the descent of modern sensibilities.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 3891 Senior Research Seminar I
This course is tailored to the needs of students who are pursuing honors in English in their senior year. It will develop students' ability to gauge how different approaches affect the research and the outcome of a project in literary studies. It will guide them in their research by analyzing and discussing research design, the construction of an archive, and the assessment and use of sources. Assignments will include annotated bibliographies, summaries of the critical debate on student topics, abstract writing, research presentations, as well as drafts and final versions of chapters or essays. We will workshop many of these assignments in the classroom and practice peer review. The seminar will stretch over two semesters, ending before spring break, when honors work is due in the college. It is required for students who pursue honors by coursework and by thesis.
Credit 3 units.
Typical periods offered: Fall

ELIT 3892 Senior Research Seminar II
This course is tailored to the needs of students who are pursuing honors in English in their senior year. It will develop students' ability to gauge how different approaches affect the research and the outcome of a project in literary studies. It will guide them in their research by analyzing and discussing research design, the construction of an archive, and the assessment and use of sources. Assignments will include annotated bibliographies, summaries of the critical debate on student topics, abstract writing, research presentations, as well as drafts and final versions of chapters or essays. We will workshop many of these assignments in the classroom and practice peer review. The seminar will stretch over two semesters, ending before spring break, when honors work is due in the college. It is required for students who pursue honors by coursework and by thesis.
Credit 2 units.

ELIT 3999 Independent Study
This course is for independent study in English Literature.
Credit 3 units.
Typical periods offered: Fall, Spring

ELIT 4100 Old English Literature
Close study of some major literary texts (e.g.. Beowulf, the Exeter book) and major issues (e.g., Anglo-Saxon and Latin culture, traditions of heroic literature) of the Anglo-Saxon tradition. Prerequisite: E Lit 407, or permission of instructor.
Credit 3 units. Art: HUM

ELIT 4101 Medieval English Literature I
Can an abundance of "melancholy humor" cause one to dream of black bears? Can dreams foretell the future? This course will encounter such questions in the popular medieval genre of the dream vision. Medieval writers used the dream to frame explorations of love, grief, history, writing, religious experience, political critique, apocalypse, and prophecy. We will encounter dreams about animals and dreams had by animals, men in love with flowers, flowers transformed into queens, and pilgrims seeking truth. As we make our way through the works of writers including Chaucer, William Langland, John Gower, and Christine de Pizan, we will also read about dreams in the Bible and in Ovid's Metamorphoses, and will investigate theorists of dreams from Macrobius to Freud. We will gamble, slightly revising Freud, that the interpretation of dream visions is the "royal road" to the understanding of medieval literature. Satisfies the Medieval requirement.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 4102 Medieval English Literature II:Medieval Womens Writing
Topics course in Medieval English literature.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 4103 Sixteenth-Century English Literature
A study of literary culture as inflected by the material conditions of production, distribution, and consumption of the early book. Taking seriously Francis Bacon's claim that printing was one of the three material constituents of early Modernity, we will devote attention to the relation of manuscript and print, the social effects of the printing of the Bible and devotional literature, and the influence of print on literary form and on the nature of authorship. We will consider the effects of monopolistic practices within the book trade, and probe a set of complementary relations: between print and cultural nationalism, text and image, printed script and live performance, and coterie and mass consumption. Most of the texts and authors under examination will be central to the traditional English and continental literary canon, but we'll pepper them with nontraditional questions. This course satisfies the Early Modern historical requirement. This course counts towards the Publishing Concentration.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 4104 17th-Century English Literature: 1603-1660
Selected readings in English literature from Donne and Jonson through Dryden.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 4105 Restoration & Augustan Literature: 1660-1740
Our subject in this course is the relation between literature and biography in early modern England. We will read examples of early modern biography -- Aubrey's BRIEF LIVES, Walton's lives of Herbert and Donne, Burnet's life of Rochester, Clarendon's biographical

sketches in THE HISTORY OF THE REBELLION - but we will also be concerned with the ways in which constructions of the life of a writer can be made from their own work, and from a variety of contemporary materials including letters, diaries, gossip, and slander. In addition to Aubrey, Walton, Burnet, and Clarendon, we will read Jonson, Donne, Herbert, Milton, Marvell, Rochester, and Dryden.
Credit 3 units. Art: HUM

ELIT 4106 18th-Century English Literature
Selected readings in English literature from Pope and Swift through the age of Johnson.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 4107 Readings in 19th-Century English Literature
Primarily reading the works of two novelists - Eliot and Trollope - and two poets - Tennyson and Browning - we will look at how literary culture sought to challenge, reform, and convey religious authority. Beginning with an overview of the ideas of three theorists of an irreligious modernity - Marx, Nietzsche, and Freud - we will then focus on the creative writing of our major authors. Some attention will fall upon the prophets of religious decline and problems of belief; more often we will observe how writers and readers became essential agents in the experiment of constructing communities where the expression and toleration of religious dissent became an ideal. Likewise, we will mostly stop our ears to the manifestoes of theologians in favor of listening to redeeming conversations and arguments about liberty and duty, pleasure and pain, life and death.
Credit 3 units. Art: HUM

ELIT 4108 English Literature of the Romantic Period
This course will focus on the most important writing of the Age of Romanticism in England, Scotland, and Ireland. An era that emerged from the Enlightenment, it was galvanized by the French Revolution and its repurcussions in Ireland and elsewhere, and ended (long before the death of Wordsworth) with the victory of a conservatism epitomized by the leading theorist of beauty and the sublime, the Anglo-Irish Edmund Burke. Along with such topics as the Romantic sublime (and the uncanny), we will consider the Romantic writer's fascination with the interior self, daemonic models of Creation and creativity, and the vicissitudes of the melancholic poet in the changing public sphere. Our focus will be the poetry and prose of Blake, Wordsworth, Coleridge, Byron, Shelley, and Keats--giving due attention to the longer works of these major poets--but we will also look at the writing that emerged at this time from the geographic and cultural margins of the two islands. Of particular interest will be the ways in which our ongoing efforts to define "British Romanticism" in the 20th and 21st centuries have led--even when they have failed to circumscribe adequately that elusive object--to some of the most vital and controversial approaches to the study of literature in our time, from modernist reaction to the Romantic lyric to the recuperation of Romanticism for Cold War America (Abrams and Bloom) to the deconstructive practice of Paul de Man and his successors. Most recently we are witnessing a revival of the nature school of Romantic poetry, particularly of the work of John Clare, that coincides with ecological approahces to literary study.

Typical periods offered: Fall, Spring

ELIT 4112 Topics in American Literature I
In some ways, this is a course about firsts. In 1930, novelist Sinclair Lewis became the first American to win the Nobel Prize in Literature. In 1938, novelist and memoirist Pearl S. Buck was the first American woman to win the Award and the third American overall (playwright Eugene O'Neill won it in 1936). Both were not only highly esteemed writers; Lewis a satirist of American classes and cultural manners, and Buck largely known for her realistic works about Asia (she grew up in China), the theme of the pull of tradition against rebellion, and her biographies of her missionary parents. Both were popular as well: Lewis's novels Babbitt, Arrowsmith, Elmer Gantry, Mantrap, Dodsworth, Ann Vickers, and Cass Timberlane were made into films. Buck's novels The Good Earth, Dragon Seed, China Sky, and Pavilion of Women were made into films as well as her script for what turned out to be Leo McCarey's last film, Satan Never Sleeps. Except for Lewis's dystopian novel about a fascist takeover of the United States, It Can Happen Here, the works of neither author are as read as they were at the authors' height of fame. This course is an exploration of some the major and lesser-known works of Lewis and Buck, and a consideration of their status in American letters. Why did their best works make the impact they did? And how did their work affect the direction of American literature, particularly from the 1920s through the 1940s?
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 4113 Slavery and the American Imagination
In this course we will read, think about, discuss, and analyze a variety of texts in which the experience of the American slave is remembered, memorialized, or recreated. Members of the class will gain a profound appreciation of how the tumultuous lives of men and women in bondage have been transformed into literature. This is a class intended for advanced students, generally in English and African American studies; graduate students may also take this course for credit but will have additional assignments. Possible requirements: Regular reading logs; a bibliography assignment; an oral presentation; an 8-10 page research paper. Satisfies the American Requirement.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 4114 Topics in American Literature II: Modernisms in America
This course offers an advanced introduction to both the literature and the concept of modernism, the ism used to mark the experimental verve of early twentieth-century writing and to grasp its ties to modernity, or the modern social world. As the course title suggests, we will devote most of our time to the career of modernism in the United States, a place imagined as both the modernist nation par excellence and the desert modernism escaped to be born. Three groups of primary texts--early modernist experiments, 1920s modernist landmarks, and Great Depression revisions--will illuminate the grand ambitions of eccentric literary forms and sequestered avant-garde movements; the public disputes and buried alliances between high expatriate and Harlem Renaissance modernisms; and the influential Depression-era reinterpretation of modernism as reactionary self-

indulgence. The syllabus will feature fiction, poetry, and drama by old and new literary celebrities: Djuna Barnes, John Dos Passos, T. S. Eliot, F. Scott Fitzgerald, Mike Gold, Ernest Hemingway, Nella Larsen, Meridel LeSueur, Claude McKay, Clifford Odets, Tillie Olsen, Ezra Pound, Jean Toomer, and Richard Wright. A shorter list of critical essays will highlight modernism's tendency to theorize itself while introducing 21st-century perspectives from the New Modernist Studies. Satisfies the American requirement. For undergraduates, Junior or Senior standing is required.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 4115 Topics in American Literature II
Fiction not often found in the standard survey course, such as Harold Frederic's The Damnation of Theron Ware, G. W. Cable's The Grandissimes, Frank Norris' The Octopus, Jack London's Martin Eden, Thornton Wilder's Heaven's My Destination, Dorothy Baker's Young Man With a Horn, R. P. Warren's All the King's Men, Thomas Pyncheon's V, short works by Edith Wharton and Ring Lardner.
Credit 3 units. Art: HUM
Typical periods offered: Fall

ELIT 4116 Topics in African-American Literature
In this course, we'll be bridging two interdisciplinary fields- the digital humanities and Black diaspora studies- in order to examine how technology has mediated new engagements with the Black Atlantic. Following the concept of "juxtaposition," what Kelly Baker Josephs and Roopika Risam see as the intersection "of disciplines, cultures, and methods" (The Digital Black Atlantic 2021), this course will consist of traditional class discussion, writing assignments, and lab days that bridge theory, method, and application. Ultimately, we will aim to discover how scholars utilize digital tools to engage with and better understand the cultures, histories, and literatures of the Black diaspora. We will examine a broad range of scholarship, such as Brittle Paper, an online literary magazine, "Digital Nollywood," "The Global Poetics Project," and "Archive of Languages and Oral Resources of Africa," which are digital archives and repositories, "Migration Stories: Africans in Midwestern Communities," a digital storytelling initiative, and the web series "Left of Black," which is a multimedia source. Throughout the semester, students will learn to work with DH tools like Voyant and Omeka, will conduct text analysis, develop maps and network models, and learn how to utilize and build databases. Readings and classwork will be supplemented by practicums, and a small-scale final DH project will serve as an entry-point into both the public and digital humanities. This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond.

Typical periods offered: Fall, Spring

ELIT 4119 American Literature: The Rise of Realism to World War I
The maturing of American literature from the regional origins of realistic fiction just prior to the Civil War through the early naturalist novel and the beginnings of modern American poetry.
Credit 3 units. Art: HUM

ELIT 4120 Modernism and Postmodernism
Readings in early sources of 20th-century developments, followed by a selective survey of literary discourse from the 1920s through the 1990s in the United States. Prerequisites: junior standing and 6 units of literature or graduate standing.
Credit 3 units. Art: HUM

ELIT 4121 American Fiction Since 1945
This course is an advanced survey of the American novel from 1945 to 1999. We will consider a range of topics: the impact of America's growing superpower status during the Cold War; the usefulness of the nation as an organizing principle for studying literature in an increasingly globalized world; the presence of the Second World War and the Holocaust in American culture; the relationship between the social changes of the period (civil rights, feminism, counterculture, and the rise and fall of the new left) and literary history; the impact of technology on models of communication (literary and otherwise); and the relationship between large-scale demographic changes (immigration, the rise of the suburb, the movement towards a post-industrial economy) and literary practice. NOTE: Undergraduates should enroll in section 01 and graduate students in section 02.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

ELIT 4122 Early Drama
This unit is concerned with English and European drama and spectacle from late Roman theatre onwards: primarily in England, but with comparative material from France and Italy. The chronological span of the course will end at about 1600; the working assumption is that there is no clean break between 'medieval' and 'Renaissance' drama, but that the theatres and scripts of the late sixteenth century should be understood as developing out of, as well as departing from, earlier theatrical traditions and practices.
Credit 3 units. Art: HUM

ELIT 4123 Topics in Renaissance Drama
A study of Elizabethan and Jacobean theatrical culture--the plays, players, playwrights, and audiences of public theaters, private theaters, and banqueting halls. Study includes the plays of Lyly, Kyd, Marlowe, Jonson, Chapman, Ford, Beaumont, Fletcher, Marston, Middleton, Webster, and Shakespeare.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 4124 Reading in the Renaissance: Literature and Media in Early Modern England
Examination of reading practices among original audiences for Wyatt, Sidney, Shakespeare, Donne, Jonson, Herrick, Marvell, Rochester, and Dryden and application to our understanding and experience of early modern texts.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

ELIT 4125 Topics In Literature

Typical periods offered: Spring

ELIT 4126 Literary Theory
Literary Theory course
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

ELIT 4127 Modernism
James Joyce's "Ulysses" is probably the most important novel of the twentieth century, possibly of English literary history. It is one of the funniest but also, supposedly, one of the most challenging and difficult. As such, it lends itself to the sustained single focus of a 400-level English course. In 2024, as we read the novel on its 102nd birthday (2/2/24), we will be asking why it continues to speak to and through novelists as various as Zadie Smith and Samuel Beckett and engage the imaginations and intelligences of readers and writers alike. We will read the book first of all for its intrinsic interest, examining the use of the Homeric parallel as well as of the various organizational schemes Joyce devised in writing the story. We will also reference the novel to a number of external contexts: as an example of the emergent project of literary Modernism; as an imaginative remaking of the concepts of race and ethnicity as well as the political and religious cultures of the Ireland in which Joyce grew up; as a vision of a new Europe in the aftermath of the First World War; as a daring experiment in fashioning new gender imaginaries, for female as well as male characters; and, ultimately, as a reinvention of the form of the novel, which extends tendencies in modern linguistic thought to unprecedented dimensions. We'll supplement and enrich these considerations with various critical accounts of the novel, ranging from helpful expositions of Joyce's art to understandings of the novel's impact on subsequent literary and cultural history. Satisfies the Twentieth Century and later requirement.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 4128 Literature of Catastrophe
In this course we will examine the ways in which art, both literary and visual attempt to adress catastrophic events.
Credit 3 units.

ELIT 4129 Readings in American Literature
In this class we will examine the relationship between 21st-century American fiction and the new forms of community and commerce made possible by the Web. How have developments like Facebook, online gaming, and the blogosphere shaped contemporary narrative innovation? What do these writers have to say about the egalitarian potential, aesthetically and politically, of these new technologies? How do old media types relate to new media values like "interactivity" and "the wisdom of crowds"? Readings will likely include texts by Chimamanda Ngozi Adichie, Dennis Cooper, Don DeLillo, Jennifer Egan, Dave Eggers, Shelley Jackson, Tao Lin, Thomas Pynchon, Jess Walter, and contributors to the Electronic Literature Collection. Satisfies the Twentieth century and beyond requirement.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

ELIT 4130 Irish Women Writers
Giving close attention to the social, political, and particularly post-colonial and feminist contexts of these authors, we will read the works of such writers as Maria Edgeworth, Lady Morgan, Lady Gregory, Elizabeth Bowen, Kate O'Brien, Eilean Ni Chuilleanain, Edna O'Brien, Eavan Boland, Medbh McGuckian, and Nuala Ni Dhomhnaill. We will consider the ways in which the Irish situation may prove problematic for now standard post-colonial and feminist paradigms and in particular the ways in which the innovative Irish woman writer makes of this necessity a creative strength. Please note that Ni Chuilleanain will be reading poetry on campus this spring.
Credit 3 units. Art: HUM

ELIT 4131 Modern British and American Poetry
Modern poetic forms, schools and techniques. Readings in such poets as Yeats, Eliot, Pound, Moore, Auden, Bishop, Hill.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

ELIT 4132 Modern Poetry I: Modernisms
American and British poetry before, during, and after World War I. Readings include Hardy, Yeats, Frost, Stein, Eliot, Williams, Moore, Johnson, Pound, H.D. and Stevens, as well as selections from Wordsworth, Whitman and Dickinson. First half of two-course sequence; second half optional
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 4133 Topics in Irish Literature: Modern Irish Poetry
Topics course in Irish literature.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 4134 20th-Century Irish Poetry
In this course we will read poems by Ireland's most important 20th-century poets in historical, biographical, postcolonial, and mythological context. Beginning with the writings of Yeats that were most influential, we will then read poems by his immediate heirs: Clarke, Kavanagh, and MacNeice. Of the living poets we will read books by John Montague, Thomas Kinsella, Seamus Heaney, Derek Mahon, Michael Longley, Paul Muldoon, Medbh McGuckian, Ciaran Carson, and Eilean NiChuilleanain. We will consider the ongoing relevance of Irish language and myth for these poets, looking (for example) at excerpts from Kinsella's masterful translation of The Tain and tracking the unlikely persistence of the Irish in Muldoon's post-modern narratives. Students are strongly encouraged to take time before the class begins to familiarize themselves with Ireland's thorny history. Two texts are especially recommended for historical background: Roy Foster's "Modern Ireland" and Declan Kiberd's "Inventing Ireland: The Literature of the Modern Nation" (both are available in paperback). Requirements: attendance at Paul Muldoon's reading on March 17 at the International Writers Center, an oral report on one of the poets we are reading, a 5-7 page close reading of a poem, and a final paper that may develop from the oral report.
Credit 3 units. Art: HUM

ELIT 4135 The Irish Literary Revival
The class will study major writings by Oscar Wilde, W. B. Yeats, J. M. Synge, James Joyce, & Flann O'Brien within the contexts of the language movement, colonialism, cultural nationalism, the socialist movement and the 1913 Lockout, the Easter Rising and the War for Independence, the Civil War, the founding of the Irish Free State, the Partition, and the Irish Theocracy. Wilde's notions of the primacy of art with regard to politics and their elaboration by W. I. Thompson and Declan Kiberd will be an organizing principle in the course. The class will see two films, offer oral reports, and write papers.

Credit 3 units.

ELIT 4136 English Novel of the Eighteenth Century
Prose fiction by such writers as Defoe, Richardson, Fielding, Smollett, and Sterne.
Credit 3 units. Art: HUM

ELIT 4137 English Novel of the 19th Century
Prose fiction by such writers as Jane Austen, Dickens, Thackeray, George Eliot, the Brontæs, and Hardy.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

ELIT 4138 The Modern Novel
Content and craft in the varying modes of the American, British, and continental modern novel by such writers as James, Joyce, Lawrence, Faulkner, Kafka, Mann, Gide, Camus.
Credit 3 units. Art: HUM

ELIT 4139 British Fiction After Modernism
Course attempts to identify characteristics of British postmodern fiction: experimental novels of the 1970s and 1980s -- works by, for example, John Fowles, Alasdair Gray, and Martin Amis; the devolution of British fiction into its constituent Scottish and English strands in the 1980s and 1990s, as well as its simultaneous globalizing as diasporic novelists wrote from Britain about home. Younger writers, in frequently provocative ways, address the questions of nation, place, class, and sexual identity that have dominated the post-war period.
Credit 3 units.

ELIT 4140 Contemporary Fiction
This course will cover contemporary fiction.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 4141 The Modern European Novel
"A register of the crimes, follies, and misfortunes of mankind" -- that is what Gibbon said history is. Being another kind of historian, the novelist confronts these selfsame catastrophes, this wreckage that human nature brings to pass. And whether what he chronicles is upon the great stage of events or upon the secret stage of the heart, the truth the novelist tells us must always be that of individuals overmatched by crimes and follies and misfortunes. Pathos is the novelist's stock-in-trade. We shall study the modern pathos, the particularly painful record of twentieth-century history -- a sequence of unexampled barbarisms alongside of (and interconnected with) the unexampled advances in science and technology -- through novels from several different national traditions. Our working assumption is that these books, at the end of the day, can best tell us what to make of the crimes, the follies, and misfortunes of Europe in our century: The Road into the Open (Arthur Schnitzler); The Vatican Cellars (Andre Gide); The Trial (Franz Kafka); The Confessions of Zeno (Italo Svevo); Young Torless (Robert Musil); Confessions of Felix Krull, Confidence Man (Thomas Mann); The Gift (Vladimir Nabokov); Journey to the End of Night (Louis-Ferdinand Celine); Kaputt (Curzio Malaparte); The Sword of Honour Trilogy (Evelyn Waugh); Cancer Ward (Alexander Solzhenitsyn). Prior to our first meeting, and with a view to beginning to sort out the place of historical events in modern fiction, students are asked to read two works telling not of our own but of other centuries -- Memoirs of Hadrian (Marguerite Yourcenar) and The Leopard (Giuseppe di Lampedusa), both available now at the University bookstore.
Credit 3 units. Art: HUM

ELIT 4143 The Shaping of Modern Literature
Themes and major figures associated with the shaping of the modern literary imagination, including such topics as Freudian and Jungian versions of the self, phenomenological thought, the symbolist imagination, and such masters as Hegel, Kafka, Kierkegaard, William and Henry James. Topics vary each semester; consult Course Listings.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

ELIT 4144 The Shaping of Modern Literature
Hardy, at the end of an era and on the cusp of transition, and Kafka, a central paradigm of modernism, may seem an odd couple. But when we read them together, feel their relentless tragi-comic resistance to cultural solace and synthesis, they have real chemistry and illuminate the philosophical, historical and narrative passages from the 19th to 20th century. Major readings and discussion of Hardy's Tess, Jude, selected poetry, autobiographical and journal entries of both authors, Kafka's stories and fables.
Credit 3 units. Art: HUM

ELIT 4145 Shaping of Modern Literature: Modernity After the Millenium
Over the past two decades, modernity (understood roughly as the era inaugurated by the second half of the eighteenth century, with Enlightenment reformation leading to Romantic revolution) has been characterized in several ways, depending on whether or not it is seen as having finally come to an end in the second half of the twentieth century. Against Francois Lyotard's 1984 account of a distinctly "postmodern condition," Albrecht Wellmer argues for "the persistence of modernity," whereas Bruno Latour proposes that "we have neer been modern." In conjunction with the book-length works in which these theorists forcefully flesh out their contrary positions, we will read several influential literary texts (fiction and/or poetry) from the early and mid-twentieth century as well as a handful of important texts published in the past decade.
Credit 3 units.

ELIT 4146 Topics in English Literature I
Studies in special subjects, e.g., allegory and symbolism in the medieval period, the sonnet in English literature, English poetry and politics. Consult Course Listings.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 4147 Topics in English Literature II
Variable topics, such as Travel and Colonization in the Renaissance; Renaissance Skepticism and the Literature of Doubt.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ELIT 4148 Topics in English Literature
We all love our things -- our Supreme streetwear, Nike sneakers, Iphones -- but we rarely take time to analyze what our attachment to these things means. In this class, we will visit the origins of modern consumer culture to find some answers. We will investigate narratives that claim to be written by things, poems in which persons become things, and narrators who obsess about things. We will read these literary texts alongside works that will help us think about the nature of our attachments, about the gift, the fetish, and what it means to be a person. Our working assumption will be that the early days of commodity culture are especially revealing for insights into our relationships to things. Satisfies the Eighteenth Century requirement.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H UColl: ENL
Typical periods offered: Fall, Spring

ELIT 4149 Topics in English Literature and History: The 17th Century

Variable topics, such as Writing, Politics, and Society in Revolutionary England, Life Writing and Literature in Early Modern England.

Credit 3 units. Art: HUM

ELIT 4150 Topics in European Literature & History

This new course offers advanced undergraduates and graduate students the opportunity to work with a faculty member in the development of an individual professor's research project. The aim is to expose the student to the practices as well as the principles of advanced literary research. Each student will participate in the growth of the scholarly concept and help with the progress of its documentation and elaboration, at once learning the craft of research by example and turning the lessons to work of their own. The outcomes foreseen include the extension and refinement of the faculty member's project and substantial progress on the part of the students toward publishable work of their own. The faculty project at the center of this course is a book-length study, "A Literary History of the European War of 1914-1918," which entails a comparative study of the literatures written from the major nations in the First World War (Great Britain, France, and Germany). As students make progress toward publishable work of their own, they may be working within the large subject of this book or in related historical and literary directions.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

ELIT 4151 Banned Books

Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago, a Russian student was exiled to Siberia for possessing a copy of Emerson's ESSAYS. Today, school boards in the United States regularly call for the removal of HUCKLEBERRY FINN and THE CATCHER IN THE RYE from classrooms and library shelves. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. We will explore these issues by looking closely at several American and translated European texts that have been challenged on moral, socio-political or religious grounds; we will try to determine what some readers have found so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments. This course is directed primarily, though not exclusively, to future teachers.

Credit 3 units. Art: HUM

ELIT 4152 Topics in World Literature & History

Fabricate: To construct or build; to form by art or labor, sometimes implying the use of the imagination; to invent; to devise falsely; to lie. We will read the fabrications of some of the great and near-great autobiographers, including five or six of the following: Rousseau (Confessions), Franklin (Autobiography), Goethe (Italian Journey), Wordsworth (The Prelude and other poetry), John Stuart Mill (Autobiography), Edmund Gosse (Father and Son), Mary McCarthy (Memories of a Catholic Girlhood), and John Updike (Self-Consciousness). Topics will include the (re)construction of the self, the transformation of biographical patterns as they appear in fiction (Updike) and non-autobiographical prose (Mill), modern approaches to autobiography as a genre, and psychological theories of personality. During the last few weeks of the course we will study one writer, Ernest Hemingway, in depth, exploring the relationship between biography (Kenneth Lynn's Hemingway), autobiography (A Moveable Feast), mythicized or transposed autobiography (The Nick Adams Stories), and the novel (The Sun Also Rises and/or The Garden of Eden).

Credit 3 units. Art: HUM

ELIT 4153 Topics in World Literature and History

This course will combine practical experience in translation with close examination and comparison of existing translations of major works, including -- tentatively -- passages from the Bible, the Tao te Ching, Homer and other classical poets and playwrights, Dante, Villon, Moliere, on up to more modern writers such as Baudelaire, Dostoievski, Proust, and Szymborska. The approach will be less theoretical than analytical, focusing on the intricacies and nuances of language as they are brought into relief by the demands of translation, as well as on how translations change over time, depending on idiomatic shifts and cultural climates. For instance, we might look at Pope's translation of a passage of Homer alongside later versions, up to the present (e.g., Robert Fagles' Homer), to discover what the translators' choices indicate about changing literary values and tastes. Bi-lingual editions of certain works may be used. Issues such as the relation of translation to adaptation and paraphrase may be addressed. Guest translators will be invited occasionally to discuss their work. Each student's major seminar project will be: either a brief (10-20 page) translation to be presented in class or, for those students not sufficiently versed in a foreign language, a presentation tracing the translation history of a single work and comparing versions of a particular passage in it (which will also be submitted as a paper). Open to graduate students and well-qualified seniors. Students in The Writing Program, Comparative Literature, and Classics are especially encouraged to enroll. Knowledge of one or more foreign languages is desirable but not essential.

Credit 3 units. Art: HUM

ELIT 4154 History of the English Language

Concepts and methods of linguistical study: comparative, historical, and descriptive. Application of methods to selected problems in the history of English. Contrastive analysis of excerpts from Old, Middle, and later English; sounds, meanings, syntax, and styles.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall

ELIT 4155 Frankenstein

As the 200th anniversary of the publication of Mary Shelley's Frankenstein recently passed, this class will study both the novel's origins and its powerful and abiding influence on our culture across a wide range of disciplines. The text itself is complex and layered, responding to its literary precursors, Enlightenment science, radical politics, aesthetic theory, feminism, Romantic idealism, Gothic horror, and more. In order to understand these influences, we will examine texts read by Mary Shelley (and her characters), including letters, essays, poems, and scientific reports. Our study of the novel's afterlives will begin with R. B. Peake's 1823 play, Presumption, which shaped much of the popular understanding of the Frankenstein myth during the 19th century. Our investigation of 20th- and 21st-century manifestations of Frankenstein will focus on its appearance in film, racial discourse, scientific ethics, popular culture, and advertising. This portion of the course will include a viewing of the iconic 1931 Boris Karloff film, which established indelible versions of the mad scientist and his "monster." Students in this seminar will be supported in developing individual final projects of their own design. For the English major, this course satisfies the Nineteenth Century requirement.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

Typical periods offered: Fall

ELIT 4156 Selected English Writers I

Concentrated study of one or two major English writers, e.g., Spenser, Dickens, Blake, Yeats. Consult Course Listings.

ELIT 4158 Chaucer
Readings in the Canterbury Tales. Lectures on background; critical analysis.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 4199 Milton
Major poems and prose works in relation to literary and intellectual currents of the 17th century.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 4200 Spenser
Readings in the Faerie Queene and Shepheardes Calender, with attention to Spenser's deliberate fashioning of a literary career.
Credit 3 units. Art: HUM

ELIT 4201 The Spenser Lab
This course involves graduate and undergraduate students in the ongoing work of the Spenser Project, an inter-institutional effort to produce a traditional print edition of the Complete Works of Edmund Spenser.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

ELIT 4299 Research Lab
This class allows faculty members to work on their research in collaboration with undergraduate and graduate students. The content of the class (and its subtitle) will be determined by the faculty member's research project; its primary activities will involve the students in making concrete contributions to the faculty member's research. The basic idea is to create a collaborative environment akin to a lab, in which researchers of various skills pursuing various tasks contribute to a distinctive project.
Credit 3 units. Arch: HUM EN: H
Typical periods offered: Fall

ELIT 4300 The Business of Books
Book publishing shapes our literary and intellectual landscape in defining ways, yet only with the recent rise of Publishing Studies has the theory and practice of publishing become a serious subject of attention within the academy. This course offers a broad introduction to publishing, with a practical emphasis on contemporary literary publishing. We will explore how publishing communities form in relation to aesthetics, demographics, and technologies, and will consider how ethics and business practices are defined within these communities. On the applied side, we will study editing, contracts, marketing, sales & distribution, infrastructure, and media, and students will write reader's reports, marketing plans, and a final paper analyzing a contemporary publishing project and placing its work in relation to the historical and cultural context, demonstrating how each particular publishing practice is adapted to its own cultural ecosystem. Industry professionals will visit to speak with the class by Zoom, and Professor Riker brings two decades of experience as a book publisher, author, and reviewer. Alongside these other activities, over the course of the semester students will follow the progression of a book published by the nationally acclaimed publishing house Dorothy, a Publishing Project, of which Professor Riker is the publisher.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

ELIT 4501 The Spenser Lab
In this Writing Intensive course, the students will be given a variety of writing tasks: writing commentaries, introductions, software manuals, grant proposals, software requirements, and design documents (SRDDs).

CHST 2999 Internship in Children's Studies
This course offers up to three hours of academic credit (on a pass/fail basis) for an unpaid internship with an outside organization in some area of Children's Studies. Enrollment is restricted to Children's Studies minors and will require completion of a final written project as well as coordination with a site supervisor. For more information, please contact Dr. Wendy Anderson at andersonwl@wustl.edu or 314-935-9523.
Credit 3 units.
Typical periods offered: Fall, Spring

CHST 3000 Interdisciplinary Introduction to Children's Studies
What is childhood? Is it supposed to be happy? And what can children's books, toys, and memoirs tell us about the experience of childhood in a certain time and place? This course is designed to introduce students to the field of children's studies, including readings in the history and literature of global childhood, excerpts from children's films and TV, visits from Wash U. faculty studying children across various disciplines, and real or virtual field trips to a children's museum and a juvenile detention facility. The course is intended to give students a richly detailed picture of how children and childhood are dealt with as subjects throughout the curriculum and the impact these approaches have had on how the greater society thinks about children. Freshmen are welcome to enroll. This course fulfills the Social Contrasts requirement in Arts & Sciences.

Typical periods offered: Fall, Spring

CHST 3003 Children's Publishing: History, Context & Craft
Publishing for children requires creativity, craft, and the ability to engage with the complex culture of childhood. This course will examine various facets of the children's publishing world-its history, its creative products, and its professional applications. In this course, we will explore critical moments in the history of children's publishing, including the innovations of notable publishers both in the Ango-American context and in East Asia, highlighting how social, educational, and technological factors impact publishing outputs. As part of this study, we will also explore current publishing houses and their philosophies, and interrogate a publisher's responsibility amid contemporary controversies. An analysis of representative and innovative board books, picture books, early readers, middle grade novels, and young adult graphic novels will facilitate a deeper understanding of genre, audience, and trends.
Credit 3 units. A&S IQ: HUM BU: HUM
Typical periods offered: Spring

CHST 3005 Childrens Picture Books: Culture and Content
Even in our world of apps and e-readers, paging through a picture book remains a beloved pastime for children. What has allowed the picture book to persist as a cultural object for over 300 years and what can it teach us about childhood? In this course, we will examine the history of the picture book, from the earliest illustrated educational texts to John Newbery's groundbreaking delights to the socially conscious picture books of the 21st century. We will use the picture book to trace important social and educational movements given its use as a tool to impart cultural values and knowledge. We will also examine important moments in picture book publishing history, most notably, the post-war Little Golden Books phenomenon. Authors and illustrators of study will include Randolph Caldecott, Beatrix Potter, Maurice Sendak, Ezra Jack Keats, Bruno Munari, Jerry Pinkney, Eric Carle, Tana Hoban, Leo and Diane Dillon, and Christian Robinson. Students will engage critically with both text and image, delving into the way images communicate meaning. The course will also contemplate important contemporary issues, most notably, race and representation in picture books and the rise of picture book bans. This course is well-suited for students interested in illustration, education, publishing, and cultural studies, and is appropriate for students pursuing the children's studies minor. This course will count towards the Publishing Concentration. For the concentration this course will provide a publishing elective.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

CHST 3330 Children and Censorship: What We Permit Children to Read and Why
The books that raise the issue of censorship most intensely are those written for children, not adults. Today, when parents seem more concerned than ever about what their children are exposed to, what children should read has become a burning issue, but an issue that often divides communities rather than uniting them. What is appropriate for children to read? Has this changed over time? Who determines what is appropriate reading material? And how have the issues of gender and race affected these determinations? In this course we will read and discuss many controversial children's books and comics, starting with Mark Twain's The Adventures of Huckleberry Finn and Helen Bannerman's Little Black Sambo, and work our way through to such modern children's authors as Sherman Alexie, Judy Blume, Maurice Sendak, Walter Dean Myers, and J.K. Rowling as well as R. Crumb's controversial and sexually explicit underground comics.
Credit 3 units.
Typical periods offered: Fall, Spring

CHST 3410 Children and Childhood in World Religions
This course will investigate the roles children play in some of the world's major religious traditions and how those traditions construct their concepts of childhood. From child disciples to child martyrs, from the miraculous childhoods of religious founders to the rites marking childhood's end, and from divine commandments involving fertility to those mandating celibacy, we will explore a wide range of different religions' teachings about children and childhood. We will combine primary and secondary sources including written texts, movies/video, and web-based content in order to learn more about the complex relationships between children and the religious traditions of Judaism, Christianity, Islam, Hinduism, Buddhism, and Confucianism.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H
Typical periods offered: Spring

CHST 3420 Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World
From child saints to child scholars and from child crusaders to child casualties, the experience of childhood varied widely throughout the European Middle Ages. This course will explore how medieval Jews, Christians, and Muslims developed some parallel and some very much divergent concepts of childhood, childrearing, and the proper cultural roles for children in their respective societies. Our readings will combine primary and secondary sources from multiple perspectives and multiple regions of Europe and the Mediterranean World, including a few weeks on the history and cultural legacy of the so-called Children's Crusade of 1312. We will conclude with a brief survey of medieval childhood and its stereotypes as seen through contemporary children's books and TV shows. This course fulfills the Language & Cultural Diversity requirement for Arts & Sciences.

CHST 4000 Senior Seminar in Children's Studies
The WU Children's Studies Minor brings together a range of disciplinary and methodological approaches to the study of children and childhood. In this one-credit seminar, meeting for five three-hour evening sessions, junior and senior Children's Studies minors will discuss a series of interdisciplinary readings about the past and future

of Children's Studies as a field, reflect on their own pasts and futures in the Children's Studies Minor, and create and present portfolios of their minor experience. This course is a capstone experience for the minor in Children's Studies. Prerequisite: junior or senior standing and a minor in Children's Studies.
Credit 1 unit. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

CHST 4070 Topics in Youth Studies
This course is designed as a special topics on youth studies. The focus examines youth as a cultural group in the US and global context. It takes an interdisciplinary approach to explore youth, media arts, and culture and draws on education, sociology, cultural studies, and literature. Such topics as youth development, youth engagement, and youth empowerment provide entry points for understanding youth as learners, consumers, producers, and active members of society. Central to the course are youth's very own textual productions, including but are not limited to poems, performances, visual art, short documentaries, music videos, web blogs, and podcasts, among others. Readings, discussions, and other activities will culminate in an inquiry-based multimedia project about youth or a specific youth group/ organization.
Credit 3 units.
Typical periods offered: Fall, Spring

CHST 4996 Children's Studies Elective
Course is used for transcribing 4000-level CHST elective units

CHST 4999 Independent Work in Children's Studies
This course provides credit for Children's Studies Minors who undertake a program of independent reading and/or research under the supervision of a faculty mentor on some subtopic within Children's Studies for which there is no regular course available. Please contact the Academic Coordinator for more information.
Credit 3 units.
Typical periods offered: Fall, Spring

Writing

WRITING 1004 Writing Identity
Who are you? This simple question becomes ever more complicated the more closely you examine it. How should you define yourself? By ancestry, hometown, gender, cultural allegiance, ethnic background, nationality, sexual preference, social class, personal history, fashion sense, career aspirations, taste in music, or by some other category? This course will examine the complexities of identity as they have been expressed in a wide variety of modern literary (and some philosophical) writings in order to develop the advanced reading, writing, and research skills that students need in a university setting. This course will satisfy the Writing 1 requirement.
Credit 3 units.

WRITING 1996 Writing Elective: 100-Level
Credit 3 units. EN: H

WRITING 2000 Rhetoric and Power
The study of rhetoric, one of the original seven Liberal Arts, is perhaps more relevant today, in a world where diverse opinions reverberate 24/7 from television and the internet, than in ancient times when rhetors invented arguments to help people choose the best course of action when they disagreed about important political, religious, or social issues. How do we make our voices heard? How can we invent and present compelling written discourse. This course will introduce students to common rhetorical principles and to the disciplinary history of rhetoric and compositional studies. Assignments in this class include rhetorical exercise in invention and craft, imitations, and varied compositions, ranging from the personal to critical, from the biographical to argumentative. We will examine rhetorical principles (audience, context, kairos, exigency, ethos, pathos, logos, and so forth) that are employed, for example, not only in literary analysis but in law, politics, education, and science. We will aim for a mastery of craft and a refinement of thought.

Typical periods offered: Fall, Spring

WRITING 2001 Writing the Visual World
Art, like writing, is a form of storytelling. Yet while writers and artists set out with a purpose-a clear vision and intention-those motives may change or evolve throughout the creative process. In Bird by Bird, for instance, Anne Lamott likens the writing process to "watching a Polaroid develop." As a writer, she claims, "[y]ou can't-and, in fact, you're not supposed to-know exactly what the picture is going to look like until it has finished developing." It is only after "the portrait comes into focus, [that] you begin to notice all the props surrounding these people, and you begin to understand how props define us and comfort us, and show us what we value and what we need, and who we think we are." Likewise, in At Work, Annie Leibovitz recalls staging the portrait of John Lennon and Yoko Ono in "their apartment in the Dakota early in December" of 1980. Initially, Leibovitz had a clear vision and mission in mind; she conceived of the photo as a moment of stolen intimacy: "a simple kiss in a jaded time." But everything changed in an instant-in the blink of an eye. That night, Lennon was shot and killed while returning to the Dakota. In retrospect, recounts Leibovitz, the portrait "looks like a last kiss." This is a course about stories and storytelling. What stories do we tell and what stories are we told?? How does art (written, visual, and performative) enable us to share our experiences-to bring purpose and meaning to our lives and to the lives of others? Throughout this course, we will explore these (and other) questions by drawing from a broad range of discourse communities, including (but not limited to) art history, sociology, psychology, film studies, and cultural studies. We will read, write, and share (both instructor and students) expository prose (personal, persuasive, and interpretative) to consider our perception of and place within the visual world. This course does not count toward the Creative Writing Concentration. Design credit 3 units.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 2002 The Sentence in English
Though formal knowledge of English grammar is not always necessary for effective writing, learning it can help students understand how sentences are put together, and it can allow them to develop their own writing using a new set of skills. The Reed-Kellogg system of diagramming is a method of learning grammar by creating pictures, or maps, of sentences. These pictures show the logical relations between words, phrases, and clauses, and they illustrate the choices writers are making as they craft individual sentences. Using a recent textbook by Eugene Moutoux, we will learn to diagram sentences both famous and ordinary, both contemporary and of historical interest. Our aims will be (1) to learn both the rules and the peculiarities of English grammar, (2) to understand how the structure of a sentence can influence its meaning, and (3) to use this knowledge productively in crafting and revising our own prose. By the end of the course, students should be

able to diagram just about any sentence in English, whatever the genre or time period, including their own. Extensive practice in writing and revising sentences will give students a consciousness of how grammar and syntax influence the meaning and effectiveness of their own writing.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 2010 Practice in Composition
Study in fundamentals of rhetoric, consistency in grammatical structure, and varieties of usage with attention to audience adaptation and the writer's style. Frequent practice in writing, primarily exposition, although specific assignments are determined by the needs of each class. Limit: 15 students. Prerequisite: E Comp 100 or equivalent.
Credit 3 units.

WRITING 2100 Creative Nonfiction Writing 1
A course designed to introduce students to the fundamental craft elements involved in writing creative nonfiction. While the course will cover the major forms within the genre of creative nonfiction, including literary journalism, biography, profiles, nature writing and travel writing, special emphasis will be given to personal essay and memoir.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

WRITING 2999 Journalism: Communications Internship
For students undertaking projects in newspaper or magazine journalism, in radio or television, or in business, government, foundations, and the arts. The student must secure permission of the Chair of the Undergraduate Committee, file a description of his or her project with the Department and, at the end of the semester, submit a significant portfolio of writing together with an evaluation by the internship supervisor. Up to three units acceptable toward the Writing Minor, but cannot be counted toward the English Major or Literature Minor. Prereq: Writing 1. Must be taken Credit/No Credit.
Credit 3 units.
Typical periods offered: Fall, Spring

WRITING 3000 Argumentation
This upper-level writing course considers the strategies of argumentation emphasizing audience awareness, reflective thinking and strategic presentation. We will explore elements of argument such as enthymeme, the three appeals, claim types, and fallacies. Students will learn to evaluate a wide range of arguments (including their own), considering the rhetorical strategies that make for effective argumentative performance in a given situation. The course will involve regular practice in both written and oral argument. Prereq: Writing 1 (L13 100) and junior standing. A note for students and advisors: when registering refer to WebStac for updated information on section times and available seats.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring, Summer

WRITING 3001 Exposition
This advanced writing course considers style in relationship to audience and purpose, asking the writer to engage more consciously with writing conventions, and to explore strategies appropriate to various writing situations. PREREQS: Writing 1 (L13 100) and junior standing. A note for students and advisors: when registering refer to WebStac for updated information on section times and available seats.

Typical periods offered: Fall, Spring

WRITING 3002 The Long Essay: Researched Writing
Credit 3 units. A&S IQ: HUM, WI BU: HUM EN: H
Typical periods offered: Fall

WRITING 3003 Political Writing
Defined most simply, politics is that which pertains to the affairs of the polis, one's community. In its real-life context, writing always interacts with a community in some way, engaging a defined audience to produce an intended effect. In this sense, writing always touches the affairs of a polis, and thus, writing is inherently political, regardless of whether the writer considers this during composition. In this class, we will focus on explicitly political writing by writers who are not politicians, that is to say, sanctioned experts in the affairs of the polis. Foregoing public policy memoranda and economic analyses, we will look at how journalists, grassroots organizers, and creative writers have consciously written to intervene in the affairs of their communities despite their outsider status. Using techniques of rhetorical analysis and logical structure, we will examine how these writers crafted works that inspire and move audiences through the conventions of several genres: essay, polemic, journalism, and satire.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

WRITING 3004 Writing and Medicine
Patients have always written about the experiences of being ill and of receiving treatment from doctors. Increasingly, doctors also are writing about their patients, and not always to praise them. Journalists are using the experiences of both patients and physicians to explore current problems in the health care system. We will read narrative and argumentative pieces by patients (such as Trillin, Hillenbrand, and Mairs), physicians (such as Gawande, Harper, Ofri, Chen, Khullar, and Mukherjee) and journalist-essayists (such as Specter, Epstein, and Aviv) to get a broad survey of the way these very public conversations among doctors, patients, and other stakeholders have been conducted over the past two decades or so. In this writing-intensive course, students will work on developing their own voices as writers, and on reading and commenting on the writing of their peers. Students will be enrolled from the waitlist; preference will be given to Medical Humanities minors, English majors and minors, and seniors.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3005 Writing the Natural World
For students interested in the environment and natural sciences. This course brings together essays from a wide range of communities including biology, physics, medicine, environmental studies, creative writing and more. Readings and assignments are intended to enhance

students' understanding of the relationship between writing and their experience/knowledge of the natural world. Major assignments allow students to follow, explore, and write about their own unique interest in a related subject, and include a personal essay, an expository essay, and a researched argumentative essay, as well as peer review workshops, oral presentations, and revision. Students will record and explore their own experiences of nature in short creative assignments that prepare them for the major papers. Prerequisites: Writing 1 and junior standing.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3030 Imaginative Fiction: Science Fiction and Fantast Writing
Credit 3 units.

WRITING 3080 Guided Research in Composition: Theory and Pedagogy of One-To-One Writing Instruction
This course teaches theoretical and practical approaches to the tutoring of writing, specifically focusing on tutoring writing within the context of undergraduate courses. Students will learn collaborative methods of tutoring writing, explore different approaches to writing comments on student work in various content areas, and examine the connections between writing and thinking. Students in this course will analyze their own writing processes and learn how to help others through the writing and revision process. Readings and discussions will focus on writing theory and pedagogy, and students will practice one-to-one methods in mock conferences and with sample essays. Assignments: two short essays, a longer research paper and presentation, and a journal.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

WRITING 3090 Topics in Composition
An advanced writing course focusing on selected topics related to writing. Topics to be chosen by department/instructor. See section description for details about specific class emphases. (Note: In some cases, this course may be cross-listed with other programs/departments and may satisfy the writing-intensive requirement.) PREREQ: Writing 1 (L13 100) and junior standing.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3100 Creative Nonfiction Writing 2
This course is aimed at undergraduates who have taken Non-Fiction Writing 1 and wish to pursue both their development as writers and the study of craft in the context of a more rigorous workshop. PREREQ: Writing 1, Non-Fiction Writing 1.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3101 Creative Nonfiction: Personal Essay and Memoir
This is an intermediate course in writing creative nonfiction, with a concentration on personal essay and memoir. PREREQ: Creative Nonfiction Writing 1.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3102 Modern Humor Writing
This course will analyze and put into practice what makes good humor writing both good and humorous, from subject matter to the mechanics of setting up a punchline, from crafting an unexpected metaphor to perfecting the reversal.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3103 Music Journalism
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

WRITING 3104 Cultural Journalism
In the Internet Age, journalism has migrated from traditional, or legacy institutions (book publishers, film & television production companies, newspapers) to digital versions of the same thing, however the craft remains tied to its legacy models. The migration online has endangered certain ecologies of journalistic practice - in particular, arts journalism, especially criticism, the long form investigative essay, and foreign reporting. The first two of these three fit under what I describe as cultural journalism, and our purpose in this class is to practice what have been Cultural Journalism's forms, at the same time as we inquire into the modes and genres that are its future.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3200 Fiction Writing 2
This course is aimed at undergraduates who have taken Fiction Writing 1 and wish to pursue both their development as writers and the study of craft in the context of a more rigorous workshop. PREREQ: Writing 1, Fiction Writing 1. 3 units.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3201 Fiction Writing: The Short-Short, Sudden Fiction, and Microfiction
This course is aimed at undergraduates who have taken Fiction Writing 1 or Poetry Writing 1 and wish to further explore the craft of fiction through the medium of the short-short story-a story. The course will focus on reading, writing, and thinking critically about short-shorts.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3202 Fiction Writing: Coming of Age in the Short Story
A fiction writing course that explores coming of age themes.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

WRITING 3203 Fiction Writing: Stories in the Suburbs
In the fifties, the suburbs were still somewhat of a novelty in American culture-most people still lived in cities and small towns, or on the farm. Back then, Levitowns and the like were embraced with either gee-whiz optimism, or seen as sinister dystopias where youth, ideals, and romance went to fester and die. But now that the American mainstream is stucco McMansions, strip malls, and big box stores; now that the suburbs have become more ethnically diverse; now that literature is being generated from these places instead of just about them, how have stories set in the 'burbs changed? We'll read short stories written from the fifties until the present day exploring this particular setting, and, through a series of exercises, workshops, and our own short fiction, we'll explore the milieu as writers (whether we happen to be from the suburbs or not), always on the lookout for the unexpected in these familiar places.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

WRITING 3204 Fiction Writing: Fiction and Obsession
Desire is at the heart of fiction, from the forces that drive the decisions characters make to the ways stories work on us as readers.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

WRITING 3205 Fiction Writing: Historical Fiction
A literature/creative writing hybrid course, students will read a number of contemporary historical fictions and then write one of their own. We'll consider the ways in which these fictions inhabit, depart from, and reflect upon the historiography and history they're built from--upon the indeterminacy of the historical record, and the limits of its reach--but we'll also discuss fiction's reponsibility to historical facts and documents, and the relevance of fictions among non-fictions in approaching an event or figure. PREREQ: Writing 1, Fiction 1
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

WRITING 3208 Imaginative Fiction: Science Fiction and Fantasy
In his introduction to "McSweeney's Mammoth Treasury of Thrilling Tales," editor Michael Chabon laments, "As late as about 1950, if I referred to 'short fiction,' I might have been talking about any one of the following kinds of stories: the ghost story; the horror story; the detective story; the story of suspense, terror, fantasy, or the macabre; the sea, adventure, spy, war, or historical story; the romance story." Today, of course, if readers were to go looking for science fiction or fantasy stories (to say nothing of the other genres Chabon references) in their local bookstore, they would find them shunted to their own section, safely cordoned off from the aisles of "mainstream" fiction. In this course, we will examine, from a writerly perspective, the nature of that divide. Is it merited? Are science fiction and fantasy stories so fundamentally different in their construction from their conventional counterparts as to require a radically different approach, and if so, what unique devices do writers of imaginative fiction employ to set their stories apart? Our guide in this exploration will be Jeff Vandermeer's "Wonderbook: The Illustrated Guide to Creating Imaginative Fiction," which we will be considering not just as an instruction manual, but as a representative text. How does Wonderbook -- in its content, construction, and conceit -- differ from more standard writing reference books? How is it similar? In what ways does Vandermeer's guide embody its subject matter? To aid us in this examination, we will be considering contemporary science fiction and fantasy stories by writers on both sides of the genre fence. The purpose of our reading is generative as well as illustrative. We seek to employ what we learn. There will be multiple writing exercises building towards a 10- to 20-page science fiction or fantasy story. As a final project, students will submit their collected writings as part of their own Wonderbook.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3210 Mellon Undergraduate Fellows Seminar
Credit 1.5 units. A&S IQ: HUM BU: HUM

WRITING 328 Seminar On the Theory and Practice of Tutoring Writing
This course teaches the art of one-to-one writing instruction. Students will discuss several theoretical models of writing instruction and learn how to use these models in their own tutoring practice. While exploring their own writing processes, students will learn how to help other writers strengthen and clarify their ideas through the process of revision. The course emphasizes interpersonal dynamics, audience adaptation, and collaborative learning. Students will practice tutoring each other in class and eventually lead some tutoring sessions of their own, whether in other classes, The Writing Center, or the St. Louis community. Assignments: five essays and a journal. Prerequisites: Recommendation of an instructor, a writing sample, and instructor's permission.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

WRITING 3300 Poetry Writing 2
This course is aimed at undergraduates who have taken Poetry Writing 1 and wish to pursue both their development as poets and the study of craft in the context of a more rigorous workshop. PREREQ: Writing 1, Poetry Writing 1. 3 units.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3400 Introduction to Playwriting
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3401 Topics in Composition
Topics intended to increase the range and skill of writers who have already attained satisfactory competence. Typical subjects include applications of classical and modern rhetoric, writing problems in a variety of professional fields, differences between essay and research writing. Prerequisites: College Writing and junior standing.
Credit 3 units. A&S IQ: HUM, WI BU: HUM
Typical periods offered: Fall, Spring

WRITING 3402 Topics in Composition
This craft course will examine the techniques and approaches used to create renderings of real people on the page. Our reading will be a mix of essay-length personal portraits (in which the subject is someone known to the writer) and article-length profiles (in which the subject is someone in the public arena) as well as two book-length works of portraiture. Writers of shorter works will include Edwidge Danticat, John Berger, Susan Orlean, Jamaica Kincaid, Lillian Ross, Joseph Mitchell, Hilton Als, Alicia Ostriker, Larissa MacFarquhar, Bernard Cooper, John McPhee, Rachel Kaadzi Ghansah, Joseph Epstein, Kay Larson, and others. Students will write several short exercises leading up to two longer works, one portrait and one profile. Open to undergraduate students who have completed Creative Nonfiction 1. This course counts toward the Creative Writing Concentration.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

WRITING 3500 Copyediting
This course fulfills one of the requirements of the Publishing track in the English major, but all students who wish to improve their skills in editing and revision are welcome. We will begin with definitions of editing in the publishing world, but move quickly to focus on the practice of editing for grammar, syntax, and mechanics. While learning the conventions for edited prose suggested by the Chicago Manual of Style, we will note how arbitrary those conventions are by looking at other systems (e.g., MLA, APA, AMA) next to Chicago's. Two exams will assess what students have learned about editorial practice, including citation of source, as well as grammar, syntax, and style. Three written projects will ask students to do their most careful work in editing, analysis, and revision. The final project, with presentation, will ask students to learn about fact checking. Active participation in discussions of this often controversial material will be expected.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

WRITING 3601 The Art of Publishing
This course introduces students to the art and craft of book publishing through a practical emphasis on types of writing and thinking that are specific to publishing, and by creative engagement with the variety of forms books now take in our culture. As part of our study, we will follow two different books through the publication process, studying the different roles (editor, designers, marketer, publicist) that contributed to their creation and their published life. We will have frequent class Zoom

visits by book professionals who worked on the books we are studying, as well as writing assignments (such as reader's reports, jacket copy, and book reviews) that put you in the position of working on these titles yourself. And we will have creative assignments in which you apply what you've learned to hypothetical publishing projects of your own. NOTE: This course is one of three required courses for students enrolled in the Publishing Concentration.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

WRITING 3900 Mellon Undergraduate Fellows Seminar
Credit 1.5 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

WRITING 3901 Mellon Undergraduate Fellows Seminar
Credit 1.5 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

WRITING 3902 Mellon Undergraduate Fellows Seminar
Credit 3 units. A&S IQ: HUM, WI BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 3903 Kling Undergraduate Honors Fellowship Seminar
Credit 3 units. A&S IQ: HUM, WI BU: HUM EN: H

WRITING 3996 Writing Elective: 300-Level
Credit 3 units. EN: H

WRITING 3999 Independent Study
This independent study in creative writing is for students who have taken the 200-level introductory course in the genre they want to focus on with the instructor. The whole syllabus should be directed toward developing the student's higher-level skills, among them the capacity to reflect on craft methods. It is strongly recommended that two to four multiple-page written assignments be assigned over the course of the semester.
Credit 3 units.
Typical periods offered: Fall, Spring

WRITING 4000 Prose Style in English: History and Craft
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

WRITING 4090 Topics in Composition
Topics course to vary according to semester offerings.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

WRITING 4100 Advanced Nonfiction
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

WRITING 4110 Proseminar in Writing: Nonfiction Prose
For students qualified to pursue their own projects in nonfiction prose; criticism by other members of the class and by the instructor. Limit: 12 students. Prerequisite: permission of instructor upon submission of writing samples.
Credit 3 units.

WRITING 4200 Advanced Fiction Writing
For qualified students who wish to continue their creative writing and reading through immersion in an intensive fiction workshop. Students wishing to enroll must not only register but also submit a 15 page (double-spaced) fiction sample. The sample must include a cover page with: your name, the semester you took Fiction Writing 2, and the name of the Fiction Writing 2 instructor. Submit samples to the English Dept. mailbox of the L13 421 instructor no later than April 20th. No one is officially enrolled in this class until contacted by the instructor. PREREQ: Writing 1, Fiction Writing 1, Fiction Writing 2.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

WRITING 4210 Craft of Fiction
A literature/creative writing hybrid course; students will read a number of contemporary historical fictions-an increasingly important and innovative genre-and then write one of their own.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 4240 Poetry Tutorial
These credits are available to students who have completed Poetry I and Poetry II. This is an opportunity for students who have already completed Advanced Poetry, or who are not able to take Advanced Poetry because of scheduling conflicts, to meet individually with the instructor to develop a portfolio of poems. During weekly meetings students will explore various writing processes and revision techniques. There will be directed readings and discussions of selected topics related to contemporary poetry and poetics. Credits may be taken concurrently with Advanced Poetry. Permission of the instructor is required.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

WRITING 4300 Advanced Poetry Writing
For qualified students who wish to continue their creative writing and reading through immersion in an intensive poetry workshop. Students wishing to enroll must not only register but also submit 8 poems. The sample must include a cover page with: your name, the semester you took Poetry Writing 2, and the name of the Poetry Writing 2 instructor. Submit samples to the English Dept. mailbox of the L13 421 instructor no later than April 20th. No one is officially enrolled in this class until contacted by the instructor. PREREQ: Writing 1, Poetry Writing 1, Poetry Writing 2. 3 units.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

WRITING 4310 The Craft of Poetry
This course is for writers who wish to study long-form poetic composition and book arrangement. The major assignment will be to compose a poem or poetic sequence of considerable length. Gwendolyn Brooks (The Anniad) and Theresa Hak Kyung Cha (Dictee) will be chief among our guides. We will study how poets arrange their books, and we will also make a brief foray into the material history of the book. Texts by Rosa Alcalá, John Ashbery, Daniel Borzutzky, Barbara Guest, Lyn Hejinian, Lorine Niedecker, Alice Notley, George Oppen, Ed Roberson, Brian Teare, and Simone White will also be included. This course counts toward the creative writing concentration. Prerequisite: L13 322.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

WRITING 4400 Topics in Composition
Composition topics course -- offerings will vary from semester to semester.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

WRITING 4401 Critic as Writer
This course's premise is that critical writing--about fiction, poetry, visual art, and culture generally--is a genre capable of as full a range of expression as any, as potentially artful as any; that at its best, criticism is art. The course will be part survey, part workshop. The workshop aspect will entail writing two different works within the genre, chosen from among the various types of critical writing we survey. For the survey aspect, we'll read book reviews to manifestos to book-length poetic-critical hybrids. The goal is not really compare-and-contrasting but rather considering each form within its rhetorical context and seeing what we can learn. We might look at how a single writer handles various subjects, and at how various writers handle a single subject. Writers we have read in past years, and are likely to read this semester, include Susan Howe, James Baldwin, Dave Hickey, Anne Carson, William Carlos Williams, Carl Phillips, Susan Sontag, James Wood, Maggie Nelson, Oscar Wilde, Maureen N. McLane, and Renee Gladman. We will definitely read Roland Barthes. This course counts toward the Creative Writing Concentration.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

WRITING 4402 Creative Writing Capstone Seminar
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

WRITING 4410 Writing for Children and Young Adults
In this course we will examine various genres of writing for young people: poetry, fiction, and non-fiction.
Credit 3 units.

WRITING 4996 Writing Elective: 400-Level
Credit 3 units. EN: H

WRITING 4999 Independent Study
This independent study in creative writing is envisioned as more specialized than a 300-level course, with students intensively investigating a particular topic, theme, craft element, genre, and so on. Students should, along with the instructor, create an intensive reading list in the area of focus and complete a substantial creative project during the semester.
Credit 3 units. BU: SCI
Typical periods offered: Fall, Spring

English Literature Major

Program Requirements

- **Total Units Required:** 30
- **Grade Required:** C or above

Required Courses

Code	Title	Units
ELIT 2151	Early Texts & Contexts	3
ELIT 2152	Modern Texts & Contexts	3
ELIT 3000	Introduction to Literary Theory	3

Requirements

In addition to the 9 units of required coursework, students must complete 21 units of upper-division (3000- and 4000-level) coursework (at least 6 units of which must be at the 4000 level), distributed as follows. Students must earn a C or better in all courses to count them toward the major.

1. Historical requirements

Three historical courses covering three of the following five historical periods in American, British, or Anglophone literature and including at least one course from each of the following two groups:

Group 1

- Medieval

Code	Title	Units
ELIT 3103	Introduction to Old English Language and Literature	3
ELIT 3139	Topics - Queer Medievalisms	3
ELIT 3153	Reading Sex in Premodern England: Medieval Sexualities	3
ELIT 3153	Topics - Reading Sex in Premodern England: Monstrous Desire from Eros to Eroticism in the Early Modern Period	3
ELIT 4101	Medieval Dream Visions	3
ELIT 4102	Medieval Women's Writing	3
ELIT 4158	Chaucer	3
ELIT 4158	Global Chaucer	3

- Early Modern

Code	Title	Units
ELIT 3114	Shakespeare And The City	3
ELIT 3118	Topics - Early Modern Misbehavior	3
ELIT 3140	Topics - Drama Queens: Cleopatra in Elizabethan England	3
ELIT 3140	Topics - Early Modern Frenemies: Literary Competition, Envy and Admiration	3
ELIT 3154	The Renaissance - Magic and Mayhem, Desire and Disguise: A Novel Beginning	3
ELIT 3154	The Renaissance - The Marvelous and the Monstrous in Early Modern Literature	3
ELIT 3155	Topics - The Renaissance of Doubt	3
ELIT 3162	Shakespeare in Performance	3
ELIT 3163	Shakespeare - The Godly and Grotesque	3

ELIT 4103	The Cultural Poetics of the Early Modern Book	3
ELIT 4123	Topics - Early Modern Comedy	3
ELIT 4201	Spenser / Spenser Lab	4
ELIT 4323	Reading in the Renaissance: Literature and Media in Early Modern England	3

Group 2

- The 18th Century

Code	Title	Units
ELIT 3116	Topics - The Savage and the Civilized	3
ELIT 3116	Topics - Island Stories	3
ELIT 3125	Selected Writers - Jane Austen	3
ELIT 4146	Topics - Inventing The Novel	3
ELIT 4148	Topics - The Secret Life of Things	3

- The 19th Century

Code	Title	Units
ELIT 3111	Topics - Black Riders: 19th Century African American Print Culture	3
ELIT 3113	River, Marsh, Coast - American Literature and the Environment	3
ELIT 3114	Topics - 19th Century Science Fiction	3
ELIT 3117	Topics - Gothic Traditions: From Frankenstein to Dracula	3
ELIT 3130	A History Of The Golden Age Of Childrens' Literature	3
ELIT 3153	Topics - Scribbling Women: 19th Century Women Writers	3
ELIT 4109	Topics - Best Sellers and Baggy Monsters: Victorian Serial Fiction	3
ELIT 4109	Wilde Times - Aestheticism and Decadence	3
ELIT 4109	Topics - Literature and Religion in an Age of Doubt	3
ELIT 4110	Topics - The Literature of Climate Change	3
ELIT 4110	Topics - Henry James: The American in Europe	3
ELIT 4110	Topics - Bodies in Pain: Disability and Illness in the 19th Century	3
ELIT 4112	Topics - American Women Poets and the Trouble with Normal	3
ELIT 4112	Topics - Whitman, Dickinson, and the Trouble with Normal	3
ELIT 4115	Topics - Romanticism, Post-Romanticism and the Problem of Belief	3
ELIT 4118	Topics - Refounding America: Emerson and the American Renaissance, 1836-1860	3
ELIT 4125	Topics - 19th Century American Drama	3
ELIT 4155	Frankenstein: Origins and Afterlives	3

- The 20th Century and Later

Code	Title	Units
ELIT 3100	The Great American Novel	3
ELIT 3105	Caribbean Literature in English	3
ELIT 3105	Topics - Welcome to the Party: Black Nightlife in the United States	3
ELIT 3106	Topics - Gender and Sexuality in American Asian Lit	3
ELIT 3107	Topics - International Modernism	3
ELIT 3111	Topics - Asian American Fictions: Space, Place and the Makings of Asian America	3
ELIT 3111	Topics - Asian American Writings: Contesting American Constructions of the Alien Other	3
ELIT 3112	James Baldwin Now	3
ELIT 3113	Topics - Turn and Face the Strange: Alienation and Transformation in Modern Literature and Contemporary Music	3
ELIT 3113	Topics - The 1960s: Literature, Culture, Politics and the Beginnings of Now	3
ELIT 3114	Topics - Excellent Women: Spinsters, Singletons and Sorcerers	3
ELIT 3114	Topics - You Are Being Watched: The Work of Art in the Age of Surveillance Capitalism	3
ELIT 3115	Topics - SF/SF	3
ELIT 3116	Topics - The Nightmare Canon: American Horror Stories	3
ELIT 3117	Topics- The Small Press in the 20th Century	3
ELIT 3118	Topics - The Cultural History of the American Teenager	3
ELIT 3118	Topics - Contemporary Women Writers	3
ELIT 3138	Introduction to Postcolonial Literature	3
ELIT 3139	Topics - Feminist Science Fiction: Reproduction, Death and the Beyond	3
ELIT 3139	Topics - Law and Literature	3
ELIT 3140	Topics - The Big World of the Little African Magazine	3
ELIT 3140	Topics - The Multiethnic Graphic Novel in 20th and 21st Century American Popular Culture	3
ELIT 3140	Topics - What If? On Counterfactual Fiction	3
ELIT 3142	Topics - From Ghetto to Gated: Blacks and Jews in America	3
ELIT 3160	Topics - African American Writers Since the Harlem Renaissance	3
ELIT 3161	African Literature in English	3
ELIT 3501	Topics - 30 Years Of Queer	3
ELIT 3501	Topics - The Body in Pain	3

ELIT 3502	Topics - Girls' Fiction	3
ELIT 3517	Topics - Memory and Narrative: The Literature of Memory	3
ELIT 3518	Topics - On Time: Clocks, Calendars and Crisis in Modern British and Anglophone Fiction	3
ELIT 3571	Global Poetics	3
ELIT 4110	Topics - The Novel and Globalisation	3
ELIT 4110	Predicting A Bestseller	3
ELIT 4111	Topics - The Harlem Renaissance at 100: Reconceiving Black American Modernism	3
ELIT 4111	Topics - Food and Literature	3
ELIT 4111	Topics - Diaspora and the African American Literary Tradition	3
ELIT 4111	Topics - Popular Music and American Literature from Rag to Rap	3
ELIT 4112	The Art Of Black Social Movements	3
ELIT 4112	Topics - American Women Writers and Modernism	3
ELIT 4114	Topics - Slavery and its Legacies	3
ELIT 4116	It Did Happen Here - Authoritarianism and Anti-Authoritarianism in American Thought	3
ELIT 4127	James Joyce's Ulysses	3
ELIT 4132	Modernist Poetry	3
ELIT 4133	Topics - Modern Irish Poetry	3
ELIT 4146	Topics - Literature and Culture of the 1960s	3
ELIT 4146	Topics - Fictions of the Anthropocene	3
ELIT 4148	Topics - Queer Youth: LGBTQ Narratives of Coming-of-Age and Coming Out in North America	3
ELIT 4156	Selected Writers - Virginia Woolf: Novelist and Feminist	3
ELIT 4299	Research Lab: The Modernist Pre-History of Facial Recognition	3

2. One course centered on either global or minority literatures

At least one 3000- or 4000-level literature course must be taken in one of the following areas:

- *Global literatures* in English, defined as the Anglophone literatures of Africa, the Caribbean, South Asia, and other non-British or non-U.S. territories
- *Minority literatures* of the United States or the United Kingdom, which include Anglophone African American, Asian American, Native American, Latinx, and Black British writing.

Code	Title	Units
ELIT 3105	Caribbean Literature in English	3
ELIT 3106	Topics - Gender and Sexuality in American Asian Literature	3
ELIT 3111	Welcome to the Party - Black Nightlife in the United States	3
ELIT 3111	Topics - Asian American Writings: Contesting American Constructions of the Alien Other	3
ELIT 3112	James Baldwin Now	3
ELIT 3126	Selected Writers: Toni Morrison	3
ELIT 3138	Introduction to Postcolonial Literature	3
ELIT 3139	Topics - Passing: Identities Lost and Found	3
ELIT 3140	Topics - The Big World of the Little African Magazine	3
ELIT 3141	Topics - The Practice of Diaspora: Literatures of Race, Power and Cultural Crossings	3
ELIT 3141	Topics - The Discontents of Globalization	3
ELIT 3142	Topics - From Ghetto to Gated: Blacks and Jews in America	3
ELIT 3160	Topics - African American Writers Since the Harlem Renaissance	3
ELIT 3161	African Literature in English	3
ELIT 3420	Topics - Masculinity and 20th Century African American Literature	3
ELIT 3571	Global Poetics	3
ELIT 3881	Topics - Black Women Writers	3
ELIT 4111	Topics - The Harlem Renaissance at 100: Reconceiving Black American Modernism	3
ELIT 4111	Topics - Diaspora and the African American Literary Tradition	3
ELIT 4111	Topics - Popular Music and American Literature from Rag to Rap	3
ELIT 4112	The Art of Black Social Movements	3
ELIT 4114	Topics - Slavery and its Legacies	3
ELIT 4116	Topics - The Digital Black Atlantic	3
ELIT 4505	Interdisciplinary Topics in the Humanities: Freedom / Information / Acts	3
ELIT 4530	Topics - Stars of the Canon	3
AFAS 3254	African Americans and Childrens' Literature	3
AFAS 3451	Topics in African American Literature - Rebels, Sheroes and Race Men	3
AFAS 3550	Undoing Empire - Introduction to Postcolonial Writing and Art	3

Courses applied to this requirement may also satisfy other English major requirements involving historical range (requirement 1) and the need to complete two 4000-level courses.

3. Portfolio capstone

All majors are required to complete a portfolio capstone project, for which the student provides a 2000-level paper, a 4000-level paper, and a brief essay (two to three pages) that reflects on the student's overall learning experience in the major.

4. Electives

All majors are required to complete four different elective courses, one of which may be either an English first-year or sophomore seminar. These seminars, usually topically focused, cannot be used to fulfill the historical distribution requirement. Students may count up to nine upper-division units in courses labeled WRITING as electives toward the English major.

Additional Information

- Only one non-ELIT or non-WRITING course may be counted toward the 21 units required. The two required 4000-level courses must be ELIT.
- A maximum of 6 units from the School of Continuing & Professional Studies and/or Summer School courses may count toward the major. These selections require English department approval.
- Study abroad students are expected to complete the 2000-level prerequisite courses and at least two upper-level courses in English literature before going abroad.
- 3 units of 3000- or 4000-level courses in the literature of a language other than English may be counted toward the English major, as an elective, provided that the reading for the course was done in the original language and that the course is not also being credited towards another program.
- Before the end of their junior year, majors are encouraged to consult with advisors regarding the fulfillment of major requirements.

ELIT 3161	African Literature in English	3
ELIT 3501	Topics - 30 Years Of Queer	3
ELIT 3501	Topics - The Body in Pain	3
ELIT 3502	Topics - Girls' Fiction	3
ELIT 3517	Topics - Memory and Narrative: The Literature of Memory	3
ELIT 3518	Topics - On Time: Clocks, Calendars and Crisis in Modern British and Anglophone Fiction	3
ELIT 3571	Global Poetics	3

ELIT 4110	Topics - The Novel and Globalisation	3
ELIT 4110	Predicting A Bestseller	3
ELIT 4111	Topics - The Harlem Renaissance at 100: Reconceiving Black American Modernism	3
ELIT 4111	Topics - Food and Literature	3
ELIT 4111	Topics - Diaspora and the African American Literary Tradition	3
ELIT 4111	Topics - Popular Music and American Literature from Rag to Rap	3
ELIT 4112	The Art Of Black Social Movements	3
ELIT 4112	Topics - American Women Writers and Modernism	3
ELIT 4114	Topics - Slavery and its Legacies	3
ELIT 4116	It Did Happen Here - Authoritarianism and Anti-Authoritarianism in American Thought	3
ELIT 4127	James Joyce's Ulysses	3
ELIT 4132	Modernist Poetry	3
ELIT 4133	Topics - Modern Irish Poetry	3
ELIT 4146	Topics - Literature and Culture of the 1960s	3
ELIT 4146	Topics - Fictions of the Anthropocene	3
ELIT 4148	Topics - Queer Youth: LGBTQ Narratives of Coming-of-Age and Coming Out in North America	3
ELIT 4156	Selected Writers - Virginia Woolf: Novelist and Feminist	3
ELIT 4299	Research Lab: The Modernist Pre-History of Facial Recognition	3

2. One course centered on either global or minority literatures

At least one 3000- or 4000-level literature course must be taken in one of the following areas:

- *Global literatures* in English, defined as the Anglophone literatures of Africa, the Caribbean, South Asia, and other non-British or non-U.S. territories
- *Minority literatures* of the United States or the United Kingdom, which include Anglophone African American, Asian American, Native American, Latinx, and Black British writing.

Code	Title	Units
ELIT 3105	Caribbean Literature in English	3
ELIT 3106	Topics - Gender and Sexuality in American Asian Literature	3
ELIT 3111	Welcome to the Party - Black Nightlife in the United States	3
ELIT 3111	Topics - Asian American Writings: Contesting American Constructions of the Alien Other	3
ELIT 3112	James Baldwin Now	3
ELIT 3126	Selected Writers: Toni Morrison	3
ELIT 3138	Introduction to Postcolonial Literature	3
ELIT 3139	Topics - Passing: Identities Lost and Found	3
ELIT 3140	Topics - The Big World of the Little African Magazine	3
ELIT 3141	Topics - The Practice of Diaspora: Literatures of Race, Power and Cultural Crossings	3
ELIT 3141	Topics - The Discontents of Globalization	3
ELIT 3142	Topics - From Ghetto to Gated: Blacks and Jews in America	3
ELIT 3160	Topics - African American Writers Since the Harlem Renaissance	3
ELIT 3161	African Literature in English	3
ELIT 3420	Topics - Masculinity and 20th Century African American Literature	3
ELIT 3571	Global Poetics	3
ELIT 3881	Topics - Black Women Writers	3
ELIT 4111	Topics - The Harlem Renaissance at 100: Reconceiving Black American Modernism	3
ELIT 4111	Topics - Diaspora and the African American Literary Tradition	3
ELIT 4111	Topics - Popular Music and American Literature from Rag to Rap	3
ELIT 4112	The Art of Black Social Movements	3
ELIT 4114	Topics - Slavery and its Legacies	3
ELIT 4116	Topics - The Digital Black Atlantic	3
ELIT 4505	Interdisciplinary Topics in the Humanities: Freedom / Information / Acts	3
ELIT 4530	Topics - Stars of the Canon	3
AFAS 3254	African Americans and Childrens' Literature	3
AFAS 3451	Topics in African American Literature - Rebels, Sheroes and Race Men	3
AFAS 3550	Undoing Empire - Introduction to Postcolonial Writing and Art	3

Courses applied to this requirement may also satisfy other English major requirements involving historical range (requirement 1) and the need to complete two 4000-level courses.

3. Genre sequence

Three creative writing courses specializing in one particular genre (poetry, fiction, or creative nonfiction) that follow the sequence: introductory (2000-level), intermediate (3000-level), and advanced (4000-level).

4. Electives

Three electives: one upper-level literature (ELIT) elective, one creative writing elective, and one creative writing elective outside the chosen genre of specialization. One of the two creative writing electives must be at the 3000 or 4000 level.

5. Additional information

- At least two literature (ELIT) courses must be at the 4000-level.
- Only one non-ELIT or non-WRITING course may be counted toward the 27 units required.
- A maximum of 6 units from the School of Continuing & Professional Studies and/or Summer School courses may count toward the major. These selections require English department approval.
- Study abroad students are expected to complete the 2000-level prerequisite courses and at least two upper-level courses in English literature before going abroad.
- 3 units of 3000- or 4000-level courses in the literature of a language other than English may be counted toward the English major, as an elective, provided that the reading for the course was done in the original language and that the course is not also being credited towards another program.
- Before the end of their junior year, majors are encouraged to consult with advisors regarding the fulfillment of major requirements.

6. Portfolio capstone

All majors are required to complete a portfolio capstone project, for which the student provides a 2000-level paper, a 4000-level paper, and a brief essay (two to three pages) that reflects on the student's overall learning experience in the major.

Creative Writing Specialization

There is the option of completing an English Literature major with a creative writing specialization. To do so, students must take five creative writing courses, including at least three upper-division courses. Students will specialize in one particular genre — poetry, fiction, or creative nonfiction — and, ultimately, take a three-course sequence (2000-, 3000-, and 4000-level courses) in that genre while taking at least one course outside of the chosen genre. The specialization requirements will not change the requirement structure for the English major and, thus, requires 6 additional credit units to complete as compared with a regular English Literature major. For more information, please consult the description of the major on the English department website.

English Literature Major, Publishing Specialization

Program Requirements

- **Total Units Required:** 36
- **Grade Requirement:** Students must earn a C or better in all courses to count them toward the major.

Required Courses

Code	Title	Units
ELIT 2151	Early Texts & Contexts	3
ELIT 2152	Modern Texts & Contexts	3
ELIT 2301	Publishing: History and Contexts	3
ELIT 3000	Introduction to Literary Theory	3
WRITING 3500	Fundamentals of Editing	3
WRITING 3601	The Art of Publishing	3

Requirements

In addition to the 18 units of required coursework, students must complete 18 units of upper-division (3000- and 4000-level) coursework (at least 6 units of which must be at the 4000 level), distributed as follows. Students must earn a C or better in all courses to count them toward the major.

1. Historical requirements

Three historical courses covering three of the following five historical periods in American, British, or Anglophone literature and including at least one course from each of the following two groups:

Group 1

- Medieval

Code	Title	Units
ELIT 3103	Introduction to Old English Language and Literature	3
ELIT 3139	Topics - Queer Medievalisms	3
ELIT 3153	Reading Sex in Premodern England: Medieval Sexualities	3
ELIT 3153	Topics - Reading Sex in Premodern England: Monstrous Desire from Eros to Eroticism in the Early Modern Period	3
ELIT 4101	Medieval Dream Visions	3
ELIT 4102	Medieval Women's Writing	3
ELIT 4158	Chaucer	3
ELIT 4158	Global Chaucer	3

- Early Modern

Code	Title	Units
ELIT 3114	Shakespeare And The City	3
ELIT 3118	Topics - Early Modern Misbehavior	3
ELIT 3140	Topics - Drama Queens: Cleopatra in Elizabethan England	3
ELIT 3140	Topics - Early Modern Frenemies: Literary Competition, Envy and Admiration	3
ELIT 3154	The Renaissance - Magic and Mayhem, Desire and Disguise: A Novel Beginning	3
ELIT 3154	The Renaissance - The Marvelous and the Monstrous in Early Modern Literature	3

ELIT 3155	Topics - The Renaissance of Doubt	3
ELIT 3162	Shakespeare in Performance	3
ELIT 3163	Shakespeare - The Godly and Grotesque	3
ELIT 4103	The Cultural Poetics of the Early Modern Book	3
ELIT 4123	Topics - Early Modern Comedy	3
ELIT 4201	Spenser / Spenser Lab	4
ELIT 4323	Reading in the Renaissance: Literature and Media in Early Modern England	3

Group 2

- The 18th Century

Code	Title	Units
ELIT 3116	Topics - The Savage and the Civilized	3
ELIT 3116	Topics - Island Stories	3
ELIT 3125	Selected Writers - Jane Austen	3
ELIT 4146	Topics - Inventing The Novel	3
ELIT 4148	Topics - The Secret Life of Things	3

- The 19th Century

Code	Title	Units
ELIT 3111	Topics - Black Riders: 19th Century African American Print Culture	3
ELIT 3113	River, Marsh, Coast - American Literature and the Environment	3
ELIT 3114	Topics - 19th Century Science Fiction	3
ELIT 3117	Topics - Gothic Traditions: From Frankenstein to Dracula	3
ELIT 3130	A History Of The Golden Age Of Childrens' Literature	3
ELIT 3153	Topics - Scribbling Women: 19th Century Women Writers	3
ELIT 4109	Topics - Best Sellers and Baggy Monsters: Victorian Serial Fiction	3
ELIT 4109	Wilde Times - Aestheticism and Decadence	3
ELIT 4109	Topics - Literature and Religion in an Age of Doubt	3
ELIT 4110	Topics - The Literature of Climate Change	3
ELIT 4110	Topics - Henry James: The American in Europe	3
ELIT 4110	Topics - Bodies in Pain: Disability and Illness in the 19th Century	3
ELIT 4112	Topics - American Women Poets and the Trouble with Normal	3
ELIT 4112	Topics - Whitman, Dickinson, and the Trouble with Normal	3
ELIT 4115	Topics - Romanticism, Post-Romanticism and the Problem of Belief	3
ELIT 4118	Topics - Refounding America: Emerson and the American Renaissance, 1836-1860	3
ELIT 4125	Topics - 19th Century American Drama	3
ELIT 4155	Frankenstein: Origins and Afterlives	3

- The 20th Century and Later

Code	Title	Units
ELIT 3100	The Great American Novel	3
ELIT 3105	Caribbean Literature in English	3
ELIT 3105	Topics - Welcome to the Party: Black Nightlife in the United States	3
ELIT 3106	Topics - Gender and Sexuality in American Asian Lit	3
ELIT 3107	Topics - International Modernism	3
ELIT 3111	Topics - Asian American Fictions: Space, Place and the Makings of Asian America	3
ELIT 3111	Topics - Asian American Writings: Contesting American Constructions of the Alien Other	3
ELIT 3112	James Baldwin Now	3
ELIT 3113	Topics - Turn and Face the Strange: Alienation and Transformation in Modern Literature and Contemporary Music	3
ELIT 3113	Topics - The 1960s: Literature, Culture, Politics and the Beginnings of Now	3
ELIT 3114	Topics - Excellent Women: Spinsters, Singletons and Sorcerers	3
ELIT 3114	Topics - You Are Being Watched: The Work of Art in the Age of Surveillance Capitalism	3
ELIT 3115	Topics - SF/SF	3
ELIT 3116	Topics - The Nightmare Canon: American Horror Stories	3
ELIT 3117	Topics- The Small Press in the 20th Century	3
ELIT 3118	Topics - The Cultural History of the American Teenager	3
ELIT 3118	Topics - Contemporary Women Writers	3
ELIT 3138	Introduction to Postcolonial Literature	3
ELIT 3139	Topics - Feminist Science Fiction: Reproduction, Death and the Beyond	3
ELIT 3139	Topics - Law and Literature	3
ELIT 3140	Topics - The Big World of the Little African Magazine	3
ELIT 3140	Topics - The Multiethnic Graphic Novel in 20th and 21st Century American Popular Culture	3
ELIT 3140	Topics - What If? On Counterfactual Fiction	3
ELIT 3142	Topics - From Ghetto to Gated: Blacks and Jews in America	3

ELIT 3160	Topics - African American Writers Since the Harlem Renaissance	3
ELIT 3161	African Literature in English	3
ELIT 3501	Topics - 30 Years Of Queer	3
ELIT 3501	Topics - The Body in Pain	3
ELIT 3502	Topics - Girls' Fiction	3
ELIT 3517	Topics - Memory and Narrative: The Literature of Memory	3
ELIT 3518	Topics - On Time: Clocks, Calendars and Crisis in Modern British and Anglophone Fiction	3
ELIT 3571	Global Poetics	3
ELIT 4110	Topics - The Novel and Globalisation	3
ELIT 4110	Predicting A Bestseller	3
ELIT 4111	Topics - The Harlem Renaissance at 100: Reconceiving Black American Modernism	3
ELIT 4111	Topics - Food and Literature	3
ELIT 4111	Topics - Diaspora and the African American Literary Tradition	3
ELIT 4111	Topics - Popular Music and American Literature from Rag to Rap	3
ELIT 4112	The Art Of Black Social Movements	3
ELIT 4112	Topics - American Women Writers and Modernism	3
ELIT 4114	Topics - Slavery and its Legacies	3
ELIT 4116	It Did Happen Here - Authoritarianism and Anti-Authoritarianism in American Thought	3
ELIT 4127	James Joyce's Ulysses	3
ELIT 4132	Modernist Poetry	3
ELIT 4133	Topics - Modern Irish Poetry	3
ELIT 4146	Topics - Literature and Culture of the 1960s	3
ELIT 4146	Topics - Fictions of the Anthropocene	3
ELIT 4148	Topics - Queer Youth: LGBTQ Narratives of Coming-of-Age and Coming Out in North America	3
ELIT 4156	Selected Writers - Virginia Woolf: Novelist and Feminist	3
ELIT 4299	Research Lab: The Modernist Pre-History of Facial Recognition	3

2. One course centered on either global or minority literatures

At least one 3000- or 4000-level literature course must be taken in one of the following areas:

- *Global literatures* in English, defined as the Anglophone literatures of Africa, the Caribbean, South Asia, and other non-British or non-U.S. territories
- *Minority literatures* of the United States or the United Kingdom, which include Anglophone African American, Asian American, Native American, Latinx, and Black British writing.

Code	Title	Units
ELIT 3105	Caribbean Literature in English	3
ELIT 3106	Topics - Gender and Sexuality in American Asian Literature	3
ELIT 3111	Welcome to the Party - Black Nightlife in the United States	3
ELIT 3111	Topics - Asian American Writings: Contesting American Constructions of the Alien Other	3
ELIT 3112	James Baldwin Now	3
ELIT 3126	Selected Writers: Toni Morrison	3
ELIT 3138	Introduction to Postcolonial Literature	3
ELIT 3139	Topics - Passing: Identities Lost and Found	3
ELIT 3140	Topics - The Big World of the Little African Magazine	3
ELIT 3141	Topics - The Practice of Diaspora: Literatures of Race, Power and Cultural Crossings	3
ELIT 3141	Topics - The Discontents of Globalization	3
ELIT 3142	Topics - From Ghetto to Gated: Blacks and Jews in America	3
ELIT 3160	Topics - African American Writers Since the Harlem Renaissance	3
ELIT 3161	African Literature in English	3
ELIT 3420	Topics - Masculinity and 20th Century African American Literature	3
ELIT 3571	Global Poetics	3
ELIT 3881	Topics - Black Women Writers	3
ELIT 4111	Topics - The Harlem Renaissance at 100: Reconceiving Black American Modernism	3
ELIT 4111	Topics - Diaspora and the African American Literary Tradition	3
ELIT 4111	Topics - Popular Music and American Literature from Rag to Rap	3
ELIT 4112	The Art of Black Social Movements	3
ELIT 4114	Topics - Slavery and its Legacies	3
ELIT 4116	Topics - The Digital Black Atlantic	3
ELIT 4505	Interdisciplinary Topics in the Humanities: Freedom / Information / Acts	3
ELIT 4530	Topics - Stars of the Canon	3
AFAS 3254	African Americans and Childrens' Literature	3
AFAS 3451	Topics in African American Literature - Rebels, Sheroes and Race Men	3
AFAS 3550	Undoing Empire - Introduction to Postcolonial Writing and Art	3

Courses applied to this requirement may also satisfy other English major requirements involving historical range (requirement 1) and the need to complete two 4000-level courses.

3. Publishing electives

Two additional courses focusing on publishing, drawn from inside and outside the department. These electives require approval from the director of the Publishing Specialization.

Code	Title	Units
CHST 3005	Chilldrens Picture Books - Culture and Content	3
ELIT 3111	Black Riders - 19th Century African American Print Culture	3
ELIT 3115	Topics - The Writer, The Editor and The Digital World	3
ELIT 3140	Topics - The Big World Of The Little African Magazine	3
ELIT 4103	The Cultural Poetics of the Early Modern Book	3
ELIT 4110	Topics - Predicting A Bestseller	3
ELIT 4110	Topics - Scissors, Paper, Pixel: Books and Ephemera, from Blake to AI	3
ELIT 4300	The Business Of Books	3
ELIT 4323	Reading In The Renaissance: Literature and Media in Early Modern England	3
WRITING 4400	Topics in Composition - Craft of the Literary Magazine	3

4. Portfolio capstone

All majors are required to complete a portfolio capstone project, for which the student provides a 2000-level paper, a 4000-level paper, and a brief essay (two to three pages) that reflects on the student's overall learning experience in the major.

Additional Information

- Only one non-ELIT or non-WRITING course may be counted toward the 18 units required. The two required 4000-level courses must be ELIT.
- A maximum of 6 units from the School of Continuing & Professional Studies and/or Summer School courses may count toward the major. These selections require English department approval.
- Study abroad students are expected to complete the 2000-level prerequisite courses and at least two upper-level courses in English literature before going abroad.
- 3 units of 3000- or 4000-level courses in the literature of a language other than English may be counted toward the English major, as an elective, provided that the reading for the course was done in the original language and that the course is not also being credited towards another program.
- Before the end of their junior year, majors are encouraged to consult with advisors regarding the fulfillment of major requirements.

Children's Studies Minor

Program Requirements

- **Total Units Required:** 16
- **Grade Requirement:** Students must receive a C- or above in order for credit to count towards the minor.

Required Courses

Code	Title	Units
CHST 3000	Interdisciplinary Introduction to Children's Studies	3
CHST 4000	Senior Seminar in Children's Studies	1
Total Units		**4**

Core Courses

Students choose 6 units from the following list:

Code	Title	Units
EDUC 3010	The American School	3
EDUC 3050	Education, Childhood, Adolescence, and Society	3
ELIT 3115	Topics in American Literature when taught as "The Cultural History of the American Teenager"	3
ELIT 3130	A History of the Golden Age of Children's Literature	3
PSYCH 3210	Developmental Psychology	3
PSYCH 3250	Psychology of Adolescence	3

Note: The children's studies minor will allow minors to substitute one elective course in children's studies for one core course that the student has taken but needs to count toward a different major or minor (e.g., PSYCH 3210 Developmental Psychology for a Psychological & Brain Sciences major). The number of independent credits required for the children's studies minor remains the same, but minors in this situation have more choices for those 3 credits.

Two core courses must come from two different home departments. Both EDUC 3010 The American School and EDUC 3050 Education, Childhood, Adolescence, and Society are Education courses; ELIT 3115 Topics in American Literature: The Cultural History of the American Teenager and ELIT 3130 A History of Golden Age of Children's Literature are English courses; and PSYCH 3210 Developmental Psychology and PSYCH 3250 Psychology of Adolescence are Psychological & Brain Sciences courses.

Additional Courses

Students choose 6 additional units from either the core list or from elective courses, including but not limited to the following:

Code	Title	Units
AFAS 1105	First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change	3
AFAS 2140	Juvenile Justice in the Black Experience	3
AFAS 3254	African Americans and Children's Literature	3
AFAS 4250	Construction and Experience of Black Adolescence	3
AMCS 3270	Comics, Graphic Novels, and Sequential Art	3
ANTHRO 3620	Anthropological Perspectives on the Fetus	3
ARCH 3407	Re-Discover the Child	3
CHST 3003	Children's Publishing: History, Context & Craft	3
CHST 3005	Childrens Picture Books: Culture and Content	3
CHST 3410	Children and Childhood in World Religions	3
CHST 4999	Independent Work in Children's Studies	3
CLASSICS 114	First Year Seminar: Childhood in Greek Antiquity	3
COMPLIT 385	Topics in Comparative Literature: Narratives of Childhood	3
EDUC 3040	Educational Psychology	3
EDUC 3060	Sociolinguistics, Literacies, Schools, and Communities	3
EDUC 4008	Education and Psychology of Exceptional Children	3
EDUC 4260	Neighborhoods, Schools, and Social Inequality	3
EDUC 4280	History of Urban Schooling in the United States	3
EDUC 4430	Sociology of Education	3
EDUC 4450	History of Education in the United States	3
EDUC 4607	Education of Black Children and Youth	3
ELIT 3158	Banned Books	3
ELIT 318	Topics in American Literature: The Cultural History of the American Teenager	3
ELIT 3502	Topics in American Literature: Girls' Fiction	3
ELIT 420	Topics in Lit: Scissors, Paper, Pixel: Books and Ephemera, From Blake to AI	3
GERMAN 3060	Topics in Holocaust Studies: Children in the Shadow of the Swastika	3
GS 4036	Children of Immigrants: Identity and Acculturation	3
PSYCH 219	The Infant Mind: Sophomore Seminar	3
PSYCH 3195	Abnormal Child Psychology	3
PSYCH 4046	Developmental Neuropsychology	3
PSYCH 4591	The Development of Social Cognition	3
REST 3421	Childhood, Culture, and Religion in Medieval Europe & the Mediterranean	3
WGSS 3240	Girls' Media and Popular Culture	3
WGSS 3446	No Boys Allowed: Girlhood and Programming for Girls in 19th and 20th Centuries, United States	3

Additional Information

The most up-to-date list of approved electives is located on the Children's Studies Minor website. Courses not on that list may be used to fulfill the requirements of the minor only if they have been approved by the minor director.

Transfer Credit

A maximum of 3 units of coursework completed at another university, whether in the United States or abroad, may be applied toward the children's studies minor. Credit will be awarded only for those courses that have been approved by the minor's director and study abroad advisor.

Phone:	314-935-5190
Email:	english@wustl.edu
Website:	http://english.artsci.wustl.edu

English Minor

Program Requirements

- **Total Units Required:** 15
- **Grade Requirement:** Students are expected to take courses for letter grades and to receive a grade of C or higher in each.

Required Courses

Code	Title	Units
ELIT 2151	Literature in English: Early Texts and Contexts	3
ELIT 2152	Literature in English: Modern Texts and Contexts	3

Elective Courses

Students must complete three upper-division (3000- or 4000-level) English electives (i.e., courses with the ELIT prefix).

Additional Information

No credits from outside the College of Arts & Sciences may be applied to the minor without approval from the Director of Undergraduate Studies.

Phone:	314-935-5190
Email:	english@wustl.edu
Website:	http://english.artsci.wustl.edu

Writing Minor

Program Requirements

- **Total Units Required:** 15 units
- **Grade Requirement:** Students are expected to take courses for letter grades and to receive a grade of C or better in each.

Required Courses

Students must take one of the following courses:

Code	Title	Units
WRITING 3000	Argumentation	3
WRITING 3001	Exposition	3

Elective Courses

Students must complete 12 additional units, at least 6 of which must be at the 3000 level or higher.

Additional Information

With department approval, up to 6 units of journalism courses in writing or editing offered by the School of Continuing & Professional Studies can be counted toward the minor. An off-campus internship (WRITING 2999 Journalism: Communications Internship) oriented toward writing may also be counted toward the minor. Regardless of level, at least 9 units counted toward the minor must be completed in regular courses home-based in Writing.

For undergraduate scholars in the Howard Nemerov Program, two semesters of the 1000-level Nemerov seminar (GENST 1702 Howard Nemerov Seminar I) may count as 3 units of 2000-level work toward the writing minor. Two semesters of the 3000-level Nemerov seminar (GENST 3703 Howard Nemerov Seminar II) may count as 3 units of 3000-level work toward the writing minor. A maximum of 6 Howard Nemerov units may count toward the writing minor.

Students who wish to take a writing minor in addition to an English major are advised to take English and American literature courses (ELIT) exclusively for the major and writing courses (WRITING) exclusively for the minor. (**Note:** 1000-level WRITING courses do not normally count toward the writing minor.) Students who wish to combine writing with their English major are encouraged to consider an English major with a concentration in creative writing.

Environmental Studies

Environmental Studies offers one major and one minor. The Environmental Analysis major creates a framework to integrate environmental courses and places a strong emphasis on critical thinking and general analytical and problem-solving skills. We offer an explicit focus on the application of those skills to analyze and design solutions to contemporary environmental challenges. The curriculum for this major is integrated and interdisciplinary, drawing from many disciplines across Arts & Sciences and the university as a whole. Thus, the major captures the strengths of the traditional academic departments and incorporates the interdisciplinary innovation necessary to fully explore the multiple issues and questions posed by the study of the environment. Our curriculum is sequenced and scaffolded so that students encounter concepts at increasing levels of depth, analysis, and real-world application. We offer opportunities for students with different disciplinary interests to repeatedly encounter one another and to engage in reflection with peers throughout their programs, especially during our fourth-year reflection seminar.

The Environmental Studies minor includes core coursework in biology, Earth science, and political science. Students may choose upper-level elective courses in a variety of natural and social science disciplines. Please visit the Environmental Studies website for more information.

Minors

- Environmental Studies Minor (p. 534)

Courses

ENST 1150 Environmental Issues
This course examines the science behind current environmental issues, with emphasis on Ecology and Conservation. Students will gain an understanding about the consequences of the way that humans currently interact with the natural environment and potential solutions that would allow long-term sustainability of the Earth. Topics will include: Human population growth, ecosystem structure and diversity, types and origin of pollution, global climate change, energy resources and use, challenges to feeding the world, and the interaction between the environment and human health.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Fall

ENST 1210 People, Planet, Health
First year students in the People, Planet, Health Ampersand program will explore the connection between earth's changing environment and its impacts on human health through an interdisciplinary lens. Students will investigate how the air, land, water, and food on our planet have changed over time and the consequences this has had on human health. Students will analyze patient case studies, explore the interdisciplinary nature of the field through site visits and guest lectures, and collaboratively apply concepts of systems thinking to address a local environmental health challenge. This course will require attendance on four field trips outside of regularly scheduled class time
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall

ENST 1212 A Sense of Place: Discovering the Environment of St. Louis
Go exploring in and around St Louis. You'll learn about the St. Louis backyard, and your home for the next four years. Through field trips, readings, and discussion, you'll see first-hand what challenges face the environment and the people who live here. You will learn how to examine multiple perspectives, how to think critically and how to approach problems from an interdisciplinary and holistic approach. You'll also learn why it is important to know a community at the local level if you're going to affect change on any level-state, national, or international. In addition to weekly readings and discussion, this class includes several field trips.
Credit 3 units. A&S IQ: NSM BU: SCI

Typical periods offered: Spring

ENST 1540 Beyond Boundaries: Environmental Racism and the Health of Everyone

Environmental inequalities threaten the health and well-being of low-income communities and communities of color who are increasingly on the frontlines in the fight against climate change, air and water pollution, food security, and many other urgent environmental problems. Like many urban areas, the St. Louis region faces egregious social, environmental and health disparities. In this course, we critically examine the role of racism and other structural policy inequalities that produce unequal environments and how those unequal environments contribute to public health disparities in St. Louis and beyond. We explore the use of public health data, policy options, and case studies that allow for evidence-based solutions to environmental racism and improved population health. This course that combines small group sessions, case studies and speakers working on environmental justice in the St. Louis region. We provide students with interdisciplinary perspectives and methods, challenging them to address racism and environmental policy through a population health lens. Student learning will be assessed through case studies, reflections, online assignments, and exams. This course is for credit only and offered to first-year (non-transfer) students only.

Credit 3 units. A&S: FYBB A&S IQ: SSC EN: S

Typical periods offered: Fall, Spring

ENST 1995 Environmental Studies Coursework Completed Abroad

This course is for study abroad credit.

Credit 12 units.

Typical periods offered: Fall, Spring, Summer

ENST 1996 Environmental Studies Elective: 100-Level

This course is for elective credit.

Credit 3 units.

Typical periods offered: Fall, Spring, Summer

ENST 2031 Environmental Seminar

A survey of pressing environmental issues, both local and global, as well as an introduction to the breadth of environmental work occurring on campus.

Credit 1 unit.

Typical periods offered: Fall

ENST 2033 A Sense of Place: Discovering Missouri's Natural Heritage

This is the first course in the Pathfinder program, and it will introduce students to their new home for the next four years. This interdisciplinary course will cover Missouri geology, climate, archaeology, and native megafauna. We will explore many of the habitats found in Missouri (prairie, forest, glade, and stream) and the biology of our diverse plant and animal wildlife (arthropods, mollusks, fish, salamanders, lizards, birds, and mammals). This will provide a foundation that will inform the study of ecology, policy and management in other courses. In addition to weekly lectures and discussions, students in this course will visit sites across the state during three weekend camping trips and two one-day trips. Attendance on field trips is an essential component of the course. Course enrollment is open only to students admitted into the Pathfinder Fellowship program.

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

Typical periods offered: Fall

ENST 2220 One Health: Linking the Health of Humans, Animals, and the Environment

This course provides an introduction to One Health, a collaborative effort of multiple disciplines -- working locally, nationally, and globally -- to attain optimal health for people, animals, and the environment. The student will learn about the challenges threatening environmental, animal, and human health. More importantly, they will learn about the transdisciplinary/holistic/One Health approach, which is necessary if we are to develop the solutions to these challenges. To address the loss of biodiversity, climate change, and environmental pollutants, students will participate in project-based learning modules to understand the how and why of these challenges as well as the mechanisms available to study current threats to conservation and public health. Class lessons will consist of lectures, clicker-based discussions, and case-study discussions. Assignments will include regular readings, quizzes, three exams, the creation of one infographic to convey a concept to a lay audience, and one short final reflection essay. This course will be limited to first- and second-year students.

Credit 3 units. A&S IQ: NSM Art: SSC BU: BA EN: S

Typical periods offered: Fall, Spring

ENST 2230 Research and Practice in Environmental Health

The interdisciplinary and complex nature of environmental health necessitates collaborative problem solving to address the challenges that lie ahead. This course will introduce the fundamentals of research design, examine methods used by environmental health practitioners, and critically evaluate scientific evidence. Students will discuss primary literature, hear from guest speakers, and write their own grant proposal, while exploring different areas of expertise and potential career trajectories within environmental health.

Credit 1 unit.

Typical periods offered: Spring

ENST 2310 FYS: Introduction to Environmental Humanities

In this environmental humanities course we will explore the human and ecosystem impacts resulting from Euro- American colonization and agricultural settlement of the U.S. Our reflection will include the social, political and economic factors which shape individual relationships with and experiences of nature in Indigenous, enslaved and newly-arrived immigrant communities. Topics will include: the fragmentation of the Sioux American Indian ecosystem and subsequently the dispersion of Sioux people into settled, disparate reservation lands; agrarian democracy, including plantation agriculture, improvement farming and Homestead farming on the Great Plains; and the Dust Bowl. This course is for first-year students and sophomore students only.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall

ENST 2411 Sophomore Seminar: Slow Violence: An Introduction to Political Ecology

Same as History L22: 2410

Credit 3 units.

ENST 2500 Sophomore Seminar in Sustainability and the Environment

This course will provide an opportunity for students to evaluate and explore potential paths in environmental studies, and learn presentation skills to carry forward in their careers. Students will also get the opportunity to get out of the classroom and participate in environmental field trips and activities.

Credit 3 units. A&S IQ: NSM Art: NSM

Typical periods offered: Fall

ENST 2510 Systems Thinking
Our complex world is bound together by multiple overlapping systems. Social systems interact with physical and biological systems. Societies and individuals, ecosystems and species, interact in ways that influence each other. Systems thinking is the ability to see the relationships and patterns within and across systems, as well as the underlying structures which shape those relationships and patterns. This course provides an introduction into systems thinking for sustainability. We will explore the key features of systems and students will learn the basics of the systems thinking lens which they will be able to use for addressing sustainability in an ever-changing world. Class time will be devoted to lectures, case studies, group activities and discussions.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall

ENST 2520 Sustainability in Business
In today's complex business environment, organizations are constantly challenged to develop innovative policies and processes that ensure profitability. Some leaders believe that the sole purpose of business is to maximize shareholder wealth and that fiscal sustainability is not compatible with environmental responsibility. In reality, ecological and economic performance need not--and should not--be mutually exclusive. Fortunately, the outmoded mindset of profit-at-any-cost is beginning to shift as organizations recognize the importance of adopting balanced business practices that promote social equity and environmental prosperity without sacrificing financial stability. Organizations that embed sustainability into their corporate strategies increase operational efficiency by using resources more responsibly and minimizing waste. In an increasingly crowded and competitive marketplace, sustainability has become a source of competitive advantage through which an organization can have a positive impact not only on the financial bottom line but also on the environment and society. In this course, we explore key concepts and issues driving sustainability in business. We also examine core sustainability principles, frameworks, and tools that companies can use to better understand and work within the natural systems that enable their existence and sustain their operations.
Credit 3 units. Art: SSC BU: BA EN: S
Typical periods offered: Fall, Spring

ENST 2530 Metropolitan Environment
Understanding the forces shaping urban growth and change is increasingly important for addressing environmental issues. The United Nations projects up to 3/4ths of the world's population will live in urban areas by the end of the century. Urbanization rates now outpace population growth rates in many parts of the world. Changes within the metropolitan environment will have profound impacts on people and planet. This course provides an interdisciplinary overview of the metropolitan growth and change, paying particular attention to the role of planning, politics, and policy. Class time will be devoted to lectures, case studies, group activities and discussion. Student learning will be assessed through exams, online assignments, and a research paper on an environmental issues in a city of student's choice. This course is targeted toward first and second year students looking for foundational understand of urban environmentalism.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Spring

ENST 2620 Conservation Biology
Conservation Biology will focus on biodiversity, current threats, and keys as well as obstacles to its preservation for the future. We will examine the different levels of biodiversity present in nature as well as highlighting its importance and why it matters to the human population. In studying conservation biology, students will also learn key concepts from related fields such as evolution and ecology that are necessary to understand concepts and concerns. These themes include species and ecosystem management, restoration, strategies to combat threats, and past successes and failures relating to biodiversity conservation. This course is introductory level and intended for Environmental Analysis majors as well as potential science majors who may be investigating their interests. The purpose of this class is to provide a foundation for future coursework in ecology and conservation as well as to create citizen stewards for our natural environment as they proceed through life. By better understanding our natural biological world and the importance of the issues facing it, my hope is that you also become active participants in environmental protection and awareness as citizens, voters, volunteers, and even in potential professional applications. It is clear that conservation and true environmental sustainability lies in an educated and aware public.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Spring

ENST 2900 Undergraduate Teaching Assistant
In this course, an advanced undergraduate can assist a faculty member in the teaching of an introductory-level ENST course.
Credit 3 units.
Typical periods offered: Fall, Spring

ENST 2990 Impact Internship Course Credit
The Environmental Studies Program Impact Internships embed students within St. Louis organizations, engaging with the environmental issues that impact people's lives every day. This course credit option is reserved for students who have been accepted into the Impact Internship Program and who meet at least one of the following two requirements: students who are international students or students with high financial need. Registration for this course is approved by instructor permission only after students have met with the instructor to discuss the above requirements. Students who enroll in this course credit option will participate, along with students in the Impact Intern cohort, in all activities associated with the Impact Internship learning agreement. To become an Impact Intern, students must apply to available internships with Environmental Studies' existing partner, found here: https://sustainability.wustl.edu/internships/environmental-studies/.
Credit 6 units.

This course is for 2000 level study abroad credits.
Credit 12 units.
Typical periods offered: Fall, Spring, Summer

ENST 2996 Environmental Studies Elective
This course is for 2000 level transfer credit.
Credit 0 units.
Typical periods offered: Fall, Spring, Summer

ENST 3034 Pathfinder: Environmental Modernism
As committed environmentalists, one of our greatest fears is that not enough people take climate change seriously. To ward off that fear, we assess the state of the world in the most dramatically pessimistic ways to indicate the seriousness of our situation and our personal commitment to environmentalism. Highlighting (much less admiring) human progress in areas where solid evidence of its flourishing exists, seems blasphemous, dismissive of evident, copious human suffering and natural systems abuse. However, the absence of acknowledging human progress reinforces social fear and a sense of danger. The resulting panic leads to a preferencing of solutions which appear in harmony with nature, limiting our understanding and trust of

viable alternative solutions using our best social, economic and technological powers. As antidote to this cycle, in this course we will explore the precepts of environmental modernism, the reconciliation of environmental preservation with human development.

Typical periods offered: Fall

ENST 3060 Community Based Conservation: Madagascar Sustainability Initiative
This course in community-based conservation through the lens of Madagascar represents a partnership between Missouri Botanical Garden (MBG) and Washington University in Saint Louis. The course is designed to support MBG's Community Based Conservation Program sites, while building student understanding of challenges at the intersection of rural agricultural subsistence communities, climate change, and biodiversity hot spots. The course involves preparatory learning during the WUSTL spring semester and ongoing communication and collaboration with Malagasy community representatives during this period. An additional lab credit option entails interactive research project deployment and monitoring on the ground in Madagascar during a summer window. MBG has been facilitating conservation work in Madagascar for over 40 years. Among these initiatives is a Community Based Conservation Program (CBCP) in Mahabo, a ten-community commune in southeastern Madagascar within a rare forest ecosystem. This commune is the most mature of MBG's eleven conservation sites, each of which share similar challenges for both biodiversity conservation and human wellbeing. Over several years MBG has established trusted relationships with rural Malagasy community members, building cooperation on community-specific, grassroots conservation efforts with indigenous communities. Such cooperation can be undermined by the forces of poverty, which compel communities to extract resources unsustainably from the sensitive forest. Therefore, the community-based conservation approach integrates a full understanding of the need for economic stability and health priorities alongside conservation of flora and fauna. Program targets range from forest conservation and use to nutrition, health, food security, clean water, and education. This course integrates study of biodiversity, poverty, and community-based conservation principles with research design, professional teamwork, and cultural competency skills. Through enrollment in this course and the optional subsequent field experience, students will select a focal area in community-based conservation, and build a robust understanding of a challenge in principle, as well as its specific manifestation in the Mahabo case. They will engage with preexisting and/or collaboratively proposed on-the-ground initiatives in MBG's CBCP, develop a study design to assess the efficacy of these initiatives, and support iterative implementation.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S
Typical periods offered: Spring

ENST 3061 Community Based Conservation Practicum: Madagascar Field Experience
This class, available to students in the Pathfinder Environmental Leadership Fellow Ampersand program, is an extension of EnSt 3060, Community-Based Conservation. In parallel with EnSt 3060, this course will guide students through travel preparation and Malagasy language learning, followed by a three-week field experience in Madagascar. The community-based conservation approach integrates a full understanding of the need for economic stability and human health priorities alongside conservation of flora and fauna. This initiative represents a partnership between Missouri Botanical Garden (MBG) and Washington University in Saint Louis. MBG has been facilitating conservation work in Madagascar for over 40 years. Among these initiatives is a Community Based Conservation Program (CBCP) in Mahabo, a ten-community commune in southeastern Madagascar within a rare forest ecosystem. Over several years MBG has established trusted relationships with rural Malagasy community members, building cooperation on community-specific, grassroots conservation efforts with indigenous communities. Program targets range from forest conservation and use to nutrition, health, food security, clean water, and education. Having conceptualized and prepared for field deployment of a CBC-supporting research project in Madagascar, this field experience entails travel to the remote rural community of Mahabo Mananivo, where students will actualize their plan. Travel is intense, including up to three days of travel each way on poorly maintained roads to reach the primitive living accommodations at the MBG Community-Based Conservation program site.
Credit 3 units.
Typical periods offered: Spring

ENST 3310 Beyond the Evidence
This class is about the science of science communication. Why, when all evidence points to the growing threats of climate change, is it so difficult to create movement toward addressing it? Why, when we have so much evidence that vaccines reduce illness and death and are extremely safe, do individuals still choose not to vaccinate their children? What if I told you that the scientific evidence does not matter? Over the last few decades, not better education, nor guilt, nor fear has worked to produce change on important environmental and public health issues. In this class, we will explore how values, beliefs, emotions and identity shape how we receive and process information and make decisions. We will explore themes of moral world view, cognitive linguistics and framing, cognitive dissonance, risk perception, empathy, habit changes, and difficult dialoguing through the case studies of climate change and vaccination. Course activities will consist of regular reading, some online research, reflective journaling at home, and engaging in conversation during class. There are no prerequisites, but the class is designed for fourth-year students in environmental majors and pre-health studies. Upper-level environmental majors and minors will receive priority enrollment from the waitlist.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Spring

ENST 3320 Fallout: Analyzing Texts and Narratives of the Nuclear Era
Nuclear technology has long been developed, used, studied, and debated. Capable of both healing and harm, it challenges our notions of risk verses benefit at every level. It is also poised to potentially play a significant environmental role in climate change mitigation by delivering large amounts of nearly carbon-free energy. In this class you will trace the public perception and experience of this technology, and scientific and medical assessments of it through an environmental humanities lens. You will use texts such as literary non-fiction, history, environmental anthropology, natural history, and public health. Topics will include but not be limited to, the Manhattan Project, the Chernobyl nuclear reactor accident, and nuclear waste (including that from uranium processing in St. Louis). The course will include a visit to the Weldon Springs Interpretive Center and is designed as an upper-level elective for third- and fourth-year students. Note: While we will talk abut nuclear reactors in general, this course will not explore them from a detailed scientific or engineering perspective. For those who would like to pursue that understanding, see our new 1-hour course: EnSt 400 Topics in Environmental Science: Technical Overview of Nuclear Power. This course is taught by Lee Sobotka, nuclear scientist and Professor of Physics and Chemistry, who is also the science advisor for the Fallout course.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ENST 3330 Multiparty Environmental Decision Making
This course aims to provide students with the opportunity to develop and apply problem-solving skills in the context of environmental challenges. Students will learn basic frameworks of negotiation and decision-making through readings and role-play. Through the role-play

students will grapple with the perspectives of multiple stakeholders, the interplay of science and policy, and the ambiguity and uncertainty inherent in decision-making processes. This classis designed as an upper-level elective for third and fourth year students.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Spring

ENST 3340 Writing Skills for Environmental Professionals
For students interested in climate change, sustainability and the environment. Consider writing as a tool. Who will read it? Why are you writing it? What do you want the reader to know or do? What structure or format effectively makes your case? We will consider these questions while building effective written communications with a focus on climate change. Students will explore audience awareness, purpose, and format as they analyze document types and create their own. Activities will include writing, reading, discussion, and peer workshops. Major assignments include a letter of inquiry and a grant proposal. Students will write a grant proposal to an imaginary climate change foundation. Preference given to upper-level majors in Environmental Analysis.
Credit 3 units. A&S IQ: NSM, WI BU: SCI
Typical periods offered: Fall, Spring

ENST 3410 Native American Storytelling - Healthy Land Practice
The earth does not belong to man, man belongs to the earth. All things are connected like the blood that unites us all. Man did not weave the web of life, he is merely a strand in it. Whatever he does to the web, he does to himself. - Chief Seattle The history of this country has had many stories and many practices which shaped the landscape pre-colonization. These Indigenous practices regularly teach methods of living within the world and can provide significant insight into current practices to manage public and private lands. This course looks to examine some of those stories, cultural beliefs, and Native American life practices which have shaped the land. For example the practice of valuing and gaining insight from natural elements such grain and fire bring one into harmony with the earth. Many people, from pre-1492 to the present and agencies, such as the U.S. Forest Service and Bureau of Land Management have changed the landscape into what we have today. Through this course we will look at common agency-based practices which have caused harm to the earth and current indigenous inspired practices designed to restore a healthy eco-system. The final portion of this course will not only look at these positive outcomes of integration of indigenous practices in the environment, but to look at additional positive health outcomes in regards to individuals living within their environment.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

ENST 3520 Ecological Economics
Our planet is finite but our economic theories and practices assume that our economy can grow forever. The paradoxical pursuit of infinite growth on a finite planet has real-world consequences: from climate change to increasing income inequality to stagnant and declining quality of life for most of us to the ongoing mass extinction of species not deemed economically useful to us, but whose loss simplifies ecosystems to the point of collapse. If these trends continue, we will face very difficult times ecologically and socio-politically. One alternative to infinite-planet economic theory is Ecological Economics, which can be described as economics as if the laws of thermodynamics are true and apply to us. Alone among disciplines with aspiration to analytic rigor, the field of economics has remained unaffected by the thermodynamic revolution that transformed the fields of biology, chemistry, physics, even history in the late nineteenth and early twentieth centuries. This failure to take physical law into account is one great source of our society's environmental (and social, and political) problems. Ecological economics thus represents the continuation of the thermodynamic revolution begun in the 1880s. This course is designed to give you an appropriate grounding in the fundamental assumptions, the conceptual novelties, and the distinctive tools of analysis that comprise this emergent school of economic theory, while placing this theorizing in historical and ecological context. We'll pay particular attention to how the precepts and practice of Ecological Economics illuminate the largest challenge facing humans today, the necessity of developing an ecologically sustainable society, one that is sized to the limits of our finite planet.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall

ENST 3530 Sustainable Cities
Urbanization is one of the most significant forces shaping today's environment. More than half of the world's population now lives in urban, rather than rural, areas. This migration has profound consequences for people and the planet, connecting a sustainable future to the developments in cities around the world. Many cities are already advancing sustainable policies and practices in all areas of urban systems and services - green infrastructure, renewable energy, waste management and climate mitigation. This course explores the impact of the rise of cities in an interconnected world and the efforts to sustainably address environmental issues in urban settings. This course pays particular attention to the role of planning, politics and policy. Class time will be devoted to lectures, case studies, group activities and discussion. Student learning will be assessed through exams, online assignments, and a research paper on an environmental issue in a city of the student's choice.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall

ENST 3535 The Sustainable Transportation
Transportation is essential to the function of cities and regions. Even in growing service/digital economies transportation remains critical for moving goods and people. The speed and quality of transportation has significant impacts on equity, economic function and mobility, and social cohesion. The transportation modes and technologies we deploy in our cities and regions have significant environmental impacts, with transport contributing 1/5 of global carbon, as well as major consequences for air and water pollution, health, resource consumption, and land-use. Creating sustainable transportation systems, particularly in the face of continued, rapid urbanization, is one of the world's most pressing challenges. This course is an introduction to transportation, with a focus on urban and regional transportation, through the lens of making transportation more economically, socially and environmentally sustainable. Students will be introduced to key transportation modes, their impacts, and current thinking on moving towards a more sustainable future. Transport is a huge and important field, and this class will inherently cover a lot of territory. The goal is to give students a foundation in sustainable transportation that will allow them to understand and critically engage the topic in their future studies, careers, and communities.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall

ENST 3540 Environmental Justice
Environmental quality varies widely across race, class, gender and other forms of social difference. This course explores how and why these differences exist. It provides an overview of the history and foundations of the environmental justice movement in the United States while covering classic environmental justice issues, such as toxic waste and pollution, along with more recent issues such as food access, urban green space, transportation and climate change. Environmental justice concerns in St. Louis are featured as part of the course. Class time will be devoted to lectures, case studies, group activities and discussion.

Student learning will be assessed through exams, reflection, online assignments, a policy brief on an environmental justice issue and a group presentation. This is an advanced elective targeted toward third and fourth year students.

Credit 3 units. A&S IQ: SSC Art: CPSC, SSC BU: BA EN: S

Typical periods offered: Spring

ENST 3600 Field Methods for Environmental Science

This course provides a broad survey of practical and applied methods for environmental field work for site assessments, ecological studies, conservation land management, habitat monitoring, and ecological restoration. A primary focus will be sources and techniques for obtaining and interpreting field data across a range of abiotic, organismal and system/community parameters, with emphasis on hands-on field experience providing students with direct knowledge highlighting the advantages and limitations of various methods. In the process, students will learn about multiple taxonomic and organismal groups and natural community types, and the relationships among these and the physical environment in functional natural systems. Course topics include theory and practice of methods for sampling biotic and abiotic resources, including vegetation, fauna, aquatic systems, stream geomorphology, and soils, as well as using these data for assessments, habitat monitoring, land management decisions, and developing ecological restorations. Students will gain familiarity with responding to issues driving applied environmental science and related fields today, including data quality, sampling design, field techniques, viability and threat analyses, and incorporating field data into multi-scale conservation planning and design work. The course consists of instructor presentations, guest lectures, readings and written response papers, student projects and presentations, classroom discussions, and extensive field exercises and hands-on training. Class logistics: one lecture (1.5 hours) and one lab (5 hours) per week, plus 2-3 all day Saturday field trips (see policy on absences for back-up plan regarding field trips).

Typical periods offered: Fall

ENST 3610 Urban Ecology

Urban Ecology is a field of study within ecology that focuses on the urban environment as an ecosystem and attempts to understand how humans and nature can better coexist in these highly modified environments. The ultimate goal is to aid efforts for more sustainable cities through better urban planning and practices. It is a multidisciplinary study including topics from ecology, evolution, and conservation biology, as well as architecture, economics, and business. The class format will include both lectures and discussions.

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

Typical periods offered: Spring

ENST 3620 Applied Conservation Biology

A practical, case-based approach to the concepts of conservation biology and applied conservation practice, including designing and implementing conservation projects. Readings, lectures, classroom activities and discussions, student presentations, and exercises will immerse students in all aspects of conservation in the contemporary landscape, and provide the tools and techniques needed for successful and sustainable conservation outcomes. Two Saturday field trips required. Prerequisites: a biology/ecology class or permission of instructor.

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

Typical periods offered: Spring

ENST 3630 Arctic Climate System

In this course we will learn about the Arctic region, with an emphasis on how the Arctic plays a key role in the global climate system. Students will be introduced to the basic physical characteristics of the Arctic and its climate. They will learn how the physical and geographic characteristics of the Arctic contribute to, and are shaped by, the Arctic climate system. Emphasis will be placed on studying the Arctic from a systems science perspective, highlighting the complex interactions between different subsystems of the Arctic, such as the hydrosphere, atmosphere, cryosphere, and biosphere. We will also explore how the Arctic has changed in the past, and what the future holds for the Arctic. Students will develop critical thinking and analysis skills through our emphasis on applying systems-level thinking to understand the interplay between physical principles, geography, landscape, climate, and human society. Class sections will be a mix of lectures and collaborative discussions on readings and course content. Most class sections will begin with a short reading recap. Completion of ENST 202 may be helpful but is not required; please ask instructor if you have questions about enrolling in this class.

Credit 3 units. A&S IQ: NSM, AN Art: NSM

Typical periods offered: Spring

ENST 3710 Applications in GIS

This introductory course in Geographic Information Systems (GIS) is designed to provide you with the knowledge, skills, and confidence to be an independent user of GIS. The course will use the latest version of ESRI ArcGIS. The course is taught using a combination of lectures, demonstrations, and hands-on, interactive tutorials in the classroom. You will also explore the scientific literature to understand how GIS is being used by various disciplines to address spatial questions. The course takes a multidisciplinary approach that is focused on learning the tools of GIS versus working with data from a particular field. The goal is to establish a solid foundation you can use to address spatial questions that interest you, your mentor, or your employee. The first weeks of the course will provide a broad view of how you can display and query spatial data and produce map products. The remainder of the course will explore the power of GIS with a focus on applying spatial analytical tools to address questions and solve problems. As the semester develops, more tools will be added to your GIS toolbox so that you can complete a final independent project that integrates materials learned during the course with those spatial analyses that interest you the most. Students will have the choice of using a prepared final project, a provided data set, or designing an individualized final project using their own or other available data.

Typical periods offered: Fall, Spring

ENST 3920 Directed Field Work in Environmental Studies

Fieldwork carried out under the direction or supervision of an instructor in the Program. Permission of an instructor and of the Chair of the Program is required.

Credit 6 units.

Typical periods offered: Fall, Spring

ENST 3995 Environmental Studies Coursework Completed Abroad
This course is for 3000 level study abroad credit.
Credit 12 units.
Typical periods offered: Fall, Spring, Summer

ENST 3996 Environmental Studies Elective
This course is for 3000 level transfer courses.
Credit 0 units.
Typical periods offered: Fall, Spring, Summer

ENST 4000 Topics in Environmental Science
The conspicuous effects of global climate change compels a reexamination of nuclear power. It is also true that in terms of a power source globally, nuclear power is not going away. (The same can be said of concerns about nuclear conflict.) This 1-cr course will meet once a week for 80 minutes and provide a technical overview of nuclear power. The lecture outline is as follows: four lectures on the relevant nuclear science, one lecture on the

ENST 4050 The Social and Public Policy of St. Louis
Cities are on the frontlines for many of the world's most important policy challenges and have long wrestled with a wide range of pressing social, economic, and environmental problems. This course focuses on policy challenges in St. Louis and will use an interdisciplinary lens to understand the policy problems and processes found in the region. The course features speakers working on local policy issues and students will engage local data and methods using the St. Louis Data Dashboard and St. Louis Survey developed by the St. Louis Policy Initiative. Student learning will be assessed.
Credit 3 units. A&S IQ: SSC
Typical periods offered: Fall

ENST 4350 Foundations of Research: Building a Literature Review
This course provides training in essential research and writing skills needed to either contextualize and justify a research study or to synthesize existing research on a specific topic. The main outcome of the course is a completed literature review and a well-defined, researchable question on a topic of your choice. Before beginning a study, researchers must develop a compelling and meaningful research question. This question should be grounded in existing knowledge, informed by prior research, and justified by gaps in our current understanding. Researchers communicate this rationale through a literature review, which serves to contextualize, justify, and motivate their research. Writing and revising a literature review is a key part of this process, as the act of writing helps clarify and refine your thinking. Class topics include advanced database searching, evaluating the quality and types of sources, summarizing and analyzing literature, constructing logical and persuasive argu ments, managing references and data, visualizing information, writing with clarity and style, and using generative AI as a tool for research and writing. You will learn and practice these skills through readings, homework, class discussions, and activities. Over the semester, you will complete a series of assignments that build toward your final literature review. Your grade will be based on participation, homework, in-class work, and assignments related to your literature review. The course is recommended for juniors and seniors. While Environmental Studies majors and minors have enrollment priority, students from all majors are welcome.

Typical periods offered: Fall

ENST 4410 Writing Home: Creating Cultural Guides for Environmental Site Workers
Each of you comes from a different cultural landscape, each with its own demographic, racial, religious, linguistic, economic profile, (and endless other attributes). Effectively describing your community is integral to its sense of being respected by outsiders and to its capacity to support others. For example, each community carries a different sense of what kind of landscape constitutes safety, well-being, and happiness. Whatever your cultural landscape, sharing the unique nature of your commuity with global citizen experts is integral to the success of applied environmental solutions to climate change. Towards the attainment of that success, join this guided, writing intensive class to identify and reflect upon the cultural attributes that constitute your community, and how those are reflected in its landscape requirements. Identify, assess, and prioritize those sensitivities deemed most important by you for others to understand,. By semester's end, write a cultural guide for environmental site workers, leading them to a better awareness of how best to help and move through, your world. Revisions and resubmission of writing work will be emphasized, as well as camaraderie and mutual interest in each other's landscapes.

Typical periods offered: Spring

ENST 4510 Intro to Environmental Law
Survey of the most prominent federal laws designed to control pollution and protect human health and the environment. Examines laws applicable to environmental impact statements, biodiversity, air pollution, water pollution, and hazardous waste. Discusses the role of state law and cooperative federalism, as well as the roles of the courts, the legislature, and the administrative state in protecting the environment.

Typical periods offered: Fall

ENST 4527 Ipcc: Governance, Policy and Science
This course is a three-credit advanced seminar for students who are interested in the intersection of science and policy in the area of climate change. The Intergovernmental Panel on Climate Change (IPCC) is regarded as world's top scientific authority on climate change. Using the Synthesis Report of the IPCC's 6th Assessment Review as our guide, students will explore the unique role of the IPCC as an intergovernmental body. We will dig into what it means for the IPCC to be an intergovernmental body, the underlying reports that makeup the AR6 assessment cycle, and what the future holds for the IPCC. In doing so we will explore the current science and knowledge around land use, oceans and cryosphere, mitigation, adaptation, loss and damage, vulnerability and how that is presented in a 'policy relevant but not policy prescriptive' format. Students will be able to evaluate key questions and concepts around climate change as they find and understand how they are included in the IPCC reports. They will then learn to assess and analyze the questions/concepts in the context of the IPCC findings and see how those findings are integrated in the international policy space. Prerequisites: junior level standing.
Credit 3 units. A&S IQ: SSC Art: SSC
Typical periods offered: Fall

ENST 4710 Advanced GIS
This course is designed to move beyond tools and skills learned in Applications in GIS (EnSt 380/580). Classes will feature hands-on exercises selected to help you master advanced GIS analysis tools and techniques, while providing experience in the planning and execution of real-world projects. Primary emphasis will be on applying fundamental GIS concepts, performing spatial analysis, developing proficiency with core ArcGIS software (e.g., Network Analyst extension),

resolution of problems, and efficient delivery of results. Readings from books and scientific literature will introduce key concepts and provide real-world examples that will be reinforced in the hands-on exercises, assignments, and projects. As the semester develops, you will gain a variety of new tools and techniques that will allow you to complete a final independent project that integrates the material learned during the course.

Typical periods offered: Fall, Spring

ENST 4720 Applications in Geospatial Intelligence

This course introduces the concept of geospatial intelligence (GEOINT) and how to use location to see patterns, connections and relationships to ultimately see what others can't. Learn about the Intelligence Cycle, the mission of the National Geospatial-Intelligence Agency (NGA), potential career pathways in GEOINT, and other members of the Intelligence Community (IC) leveraging GIS to solve problems and make decisions related to Intelligence. This course is designed to incorporate both a theoretical understanding with a variety of subject matter expert (SME) presentations from the industry, as well as a practical understanding with hands-on exercises using ArcGIS Pro and other Esri software applications.

Credit 3 units. A&S IQ: NSM

Typical periods offered: Spring

ENST 4730 Introduction to Spatial Epidemiology

This 14-week course is to introduce essential concepts and methods of spatial epidemiology. Spatial epidemiology is a methodology for dealing with spatial-correlated issues in environmental and public health,epidemiological, and medical research. The lecture will give the knowledge in the designs and approaches of spatial epidemiology. Homework assignments after each lecture will test student knowledge the concepts we covered. GIS mapping exercises will allow students to practice and apply their knowledge of basic geospatial analyses in epidemiology. The paper discussions and final project (presentation and paper) will help the students develop a better understanding how to integrate geospatial and GIS modeling into epidemiological and population health studies to address spatial-correlated research questions. This course requires a previous completion of a GIS course with basic skill in the application of GIS software (such as ESRI ArcGIS) for mapping. This course will be suggested to the third-, fourth-year undergraduate students and/or master students.

Credit 3 units. A&S IQ: NSM Art: NSM

Typical periods offered: Fall

ENST 4801 Sustainability Exchange: Community and University Practicums

The Sustainability Exchange engages interdisciplinary teams of students to tackle real-world energy, environmental, and sustainability problems through an experiential form of education. Students participate in projects with on- or off-campus clients, developed with and guided by faculty advisors from across the University. Teams deliver to their clients an end-product that explores wicked problems requiring innovative methods and solutions. New and varied projects are introduced each semester. Past projects have included conducting greenhouse gas inventories for a community organization; developing a tool to screen University investments for sustainability parameters; developing a sustainability plan for a local nonprofit; addressing water savings initiatives for local breweries; and assessing the vulnerability of city sanitation systems. Team-based projects are complemented by seminars that explore problem solving strategies and methodologies drawn from a wide range of creative practices, including design, engineering, and science, as well as contemporary topics in energy, environment, and sustainability. Students will draw on these topics to influence their projects. The course is designed primarily for undergraduates, with preference given to seniors.

Credit 3 units. A&S IQ: SSC Art: CPSC, SSC

Typical periods offered: Fall, Spring

ENST 4810 RESET- Renewable Energy Policy, Engineering and Business

RESET is an interdisciplinary course that explores the incredible potential of renewable energy, energy storage, and electrification to mitigate climate change. Students will gain an in-depth understanding of the complex dynamics that are driving rapid deployment of renewables and present both opportunities and challenges to decarbonization in the years ahead. Through the lenses of business, policy, and engineering, students in RESET will learn through classroom lectures from faculty, industry professionals, and policy-makers; group discussions; field trips to solar arrays and a landfill gas power plant; and a final team project where students serve as consultants to a local government, proposing an on-site solar strategy, local policy changes to support decarbonization, and more. By the end of the course, students will have an understanding of many large-scale issues influencing decarbonization, as well as the real-world factors that are necessary for designing, financing, and building new renewable energy projects. Why renewables and the grid? Decarbonizing the electric grid paired with electrifying sectors that currently run on fossil fuels - including transportation, heating, buildings, and manufacturing and construction - together have the potential to reduce more than 50% of global greenhouse gas emissions. The global energy transition, which was already well-underway, accelerated in 2022 due to a combination of countries' energy security concerns following Russia's invasion of Ukraine and expanding climate ambition resulting in new policies that support renewable energy, including the Inflation Reduction Act in the United States. The International Energy Agency's 2022 Renewables report found that renewables are set to account for over 90% of global electricity expansion over the next five years, overtaking coal to become the largest source of global electricity by early 2025. Registration for this course is direct to the waitlist, and students are selected by application. The application can be found here . The deadline for the application is 5 PM on April 24th.

Typical periods offered: Fall

ENST 4820 International Climate Negotiation Seminar

This course is designed to prepare students to attend and observe annual meetings associated with the United Nations Framework Convention on Climate Change (UNFCCC) as a delegate of Washington University. The course and meetings provide student delegates with a unique educational experience to observe the development of international climate policy through interdisciplinary negotiations and interactions inside the negotiating space. Students see the interaction between climate policy, science and technology as they identify and analyze policy decisions across the international climate regime. The COP 30 meeting will be held in Belem, Brazil from Monday, November 10, 2025 to Friday, November 21, 2025. While the number of students who can attend meetings is limited by the United Nations, we will do our best to have course participants attend one week of the COP. Course enrollment is limited. Indicate your interest by placing yourself on the waitlist and completing an application. The cost of meeting attendance is estimated to be $3750 and need based support is available. Additional information is included on the course FAQ page. Prerequisite: Junior standing. Contact the instructor with questions at martin@wustl.edu. Registration for this course is direct to the waitlist, and students are selected by application. The application can be found here: https://enst.wustl.edu/capstones/. The deadline for the application is 5 PM on April 23.

ENST 4920 Environmental Studies Fourth-Year Reflection Seminar

Over the course of your time at Washington University, you have taken a depth and breadth of coursework toward your major in Environmental Analysis. Your major coursework has likely been supplemented by your oursework in other departments and programs of study. The purpose of this course is for you to meet your peers who have done the same. As a group you will reflect on and share representations of your learning across the years, make connections among thngs you have learned and to experiences in other arenas of your life. Reflection will occur through personal writing, discussion with peers in the course and the sharing of favorite podcasts, films, etc.

Typical periods offered: Spring

ENST 4995 Environmental Studies Coursework Completed Abroad

This course is for 4000 level study abroad credit.

Credit 12 units.

Typical periods offered: Fall, Spring, Summer

ENST 4996 Environmental Studies Elective

This course is for 3000 level transfer credit.

Credit 0 units.

Typical periods offered: Fall, Spring, Summer

ENST 4998 Senior Honors Research

This course is designed to support fourth-year students who are pursuing senior thesis research with the Environmental Studies Program. This 3-credit course includes a weekly 80-minute class session during which the instructor and students co-create a supportive cohort-based learning environment in which students share ideas, drafts of their scholarly work, feedback, and mutual encouragement as they engage in their independent research processes. The instructor guides students through common elements of the research process that span disciplines, such as effective communication with mentors and committee members, goal setting, planning and task management, accessing and reviewing the appropriate literature, concept mapping to organize ideas, outlining proposed methodology and hypothesized figures, and using reference management software. In a series of scaffolded assignments that match thesis timelines, students develop a short thesis proposal, write and twice revise the introduction and/or literature review for their thesis, and create an action plan for their winter/spring path to completion. Some class periods are used as workshops for feedback, idea sharing, and peer review. This course is required for all students working on senior thesis research, which can serve to partially satisfy the requirements for Latin Honors if the student also meets minimum GPA requirements (>3.6). Students graduating in spring should take this course in fall and ENST 4999 in spring of their senior year; students graduating in December should take ENST 4999 in spring of third year and this course in the fall of their third year or fall before graduation. Registration for this course requires completion of the senior thesis intent form and departmental/instructor permission to enroll. Please visit https://enst.wustl.edu/student-research to learn more about the process and find the senior thesis intent form.

Credit 3 units.

Typical periods offered: Fall, Spring

ENST 4999 Senior Honors

Independent work for undergraduate Honors, to be supervised by a faculty member. Prerequisites, senior standing, eligibility for Honors, and permission of instructor.

Credit 3 units.

Typical periods offered: Fall, Spring

Environmental Analysis Major

Program Requirements

- **Total Units Required:** 49
- **Grade Requirement:** A grade of C- is the minimum acceptable performance for each unit of credit for all coursework for the major.

The Environmental Analysis Major is a flexible, 49-credit program that focuses on developing critical skills and competencies in interdisciplinary environmental problem-solving. It is ideal for students seeking interdisciplinary training focused on the environment and sustainability, and it is designed to stand alone or complement another major.

Required Courses

Students must complete a total of 28 units of required courses as described below:

- Choose three of the following (9 units):

Code	Title	Units
BIOL 2150	Introduction to Environmental Biology	3
BEYOND 1001	Earth's Future: Cause & Consequences of Climate Change*	3
BEYOND 1004	Sustainability and Beyond: People, Planet, Prosperity*	3
BEYOND 1014	Environmental Racism and the Health of Everyone*	3
EEPS 2020	Intro to Earth, Env., and Planetary Science	3
ENST 1210	People Planet Health	4
and ENST 2230	Professional Development Seminar	
ENST 2220	One Health: Linking Human, Animal, Environmental Health	3
ENST 2310	Introduction to Environmental Humanities	3
ENST 2520	Sustainability in Business	3
ENST 2530	Metropolitan Environment	3
ENST 2620	Conservation Biology	3
POLSCI 2000	Introductionn to Environmental Policy	3

* These Beyond Boundaries courses, open to first-year students only, may apply to this section; students may count up to two toward the major.

- Required core courses in analysis and communication; choose four of the following (12 units):

Code	Title	Units
DRAMA 2201	Public Speaking: EmbodiedCommunication	3
DRAMA 4081	Theatre for Social Change	3
ENST 3310	Beyond the Evidence	3
ENST 3320	Fallout: Analyzing Texts and Narratives of the Nuclear Era	3
ENST 3330	Multiparty Environmental Decision-Making	3
ENST 3340	Writing Skills for Environmental Professionals	3
ENST 3600	Field Methods for Environmental Science	3
ENST 3710	Introduction to GIS	3
ENST 4350	Foundations of Research: Building a Literature Review	3
ENST 4410	Writing Home: Creating cultural guides for environmental site workers	3
ENST 4710	Advanced GIS	3
IPH 3123	Introduction to Digital Humanities	3
SDS 2020	Elementary Probability and Statistics	3
or SDS 3020	Elementary to Intermediate Statistics and Data Analysis	
or SDS 3030	Statistics for Data Sceince 1	
WRITING 3005	Writing the Natural World	3

Note: Students may count a fifth analysis and communication course toward the depth electives.

- Required course in social identity and environment; choose one of the following (3 units):

Code	Title	Units
AFAS 1130	Introduction to Race	3
BEYOND 1014	Environmental Racism and the Health of Everyone	3
JIMES 2910	Racism and Antiracism	3
SOC 2010	The Roots of Ferguson	3
SOC 2110	Social Inequlity in America	3
SOC 2520	Inequality by Design	3
SOC 3212	The Social Construction of Race	3
SOC 3910	Economic Realities of the American Dream	3
SOC 4289	Neighborhoods, Schools, and Social Inequality	3
SOC 4810	Global Sturctures and Problems	3
SOC 4830	Global Racial Systems	3

- Required interdisciplinary environmental capstone course; choose one of the following (3 units):

Code	Title	Units
ENST 4801	Sustainbility Exchange	3
ENST 4810	RESET: Decarbonizing the Grid	3
ENST 4820	International Climate Negotiation Seminar	4
ENST 4998	Senior Honors Research	3
ENST 5830	Interdisciplinary Environmental Clinic	4

Note: Due to the intensity of these project-based courses, students may only take one per semester. Students may count a second capstone course toward the depth electives.

- Fourth-year reflection seminar (1 unit):

Code	Title	Units
ENST 4920	Environmental Studies Fourth-year Reflection Seminar	1

Note: The purpose of this seminar is to create a written narrative portfolio that synthesizes, integrates, and reflects on the student's learning across the courses and experiences of the major. Reflection will occur through personal writing and discussion with peers in the course.

Elective Courses

Students will choose 21 units of depth and breadth elective courses from the three categories below: Social Sciences, Humanities and Arts, and Natural Science. Students must choose seven elective courses, with at least four courses from one category and at least one course in the other two categories. This requirement means students can choose a 5/1/1 combination or a 4/2/1 combination from the elective categories.

The following flexibility is allowed regarding substitutions:

- Students may count a fifth analysis and communication course toward the depth electives.
- Students may count a second capstone course toward the depth electives.
- Students may request one course substitution outside of the electives listed below to take advantage of unique one-time or rarely-offered courses.

Students must complete no fewer than 18 units of courses numbered 3000 or above within the major with a grade of C- or higher. There is no double counting of advanced (3000- and 4000-level) courses between two majors or between a major and a minor. This "no double-counting rule" also applies to students who are double majoring across schools.

- Social sciences electives:

Code	Title	Units
AMCS 2270	Topics in Native American Studies: Intro to Native American and Indigenous Studies	3
ANTH 3102	Topics: Sustainability in Extractive Communities	3
ANTH 3215	Food, Culture and Power	3
ANTH 3472	Global Energy and the American Dream	3

ANTH 3602	Env. Inequal: Toxicity, Health, and Justice	3
ANTH 3610	Culture and Environment	3
ANTH 3740	Social Landscapes in Global View	3
ANTH 3796	Meltdown:The Archaeology of Climate Change	3
ANTH 4281	Ecological Anthropology	3
ECON 3350	Environmental Policy	3
ENST 2510	Systems Thinking	3
ENST 3060	Community-based Conservation in Madagascar	3
ENST 3310	Beyond the Evidence	3
ENST 3520	Ecological Economics	3
ENST 3530	Sustainable Cities	3
ENST 3535	Sustainabile Transportation	3
ENST 3540	Environmental Justice	3
ENST 4350	Foundations of Research: Building a Literature Review	3
ENST 4510	Environmental Law	3
ENST 4527	IPCC: Governance, Policy and Science	3
ENST 4710	Advanced GIS	3
ENST 4720	Applications in Geospatial Intelligence	3
MGT 4510	Business & Governmnet: Understanding and Influencing the Regulatory Environment	3
MGT 4603	Introduction to Social Entrepreneurship	3
MPH 5002	Epidemiology*	3
MPH 5323	TPS: Climate CHange and Public Health*	3
POLSCI 3171	Politics of Environmental Regulation	3
POLSCI 3328	Energy Politics	3
POLSCI 3630	Quantitative Political Methodology	3
POLSCI 3760	Globalization, Urbanization, and the Environment	3
POLSCI 3890	Power, Justice, and the City	3
POLSCI 4043	Policy Analysis, Assessment and Practical Wisdom	3
POLSCI 4905	Research Design and Methods	3
SOC 3350	Poverty and the New American City	3
SOC 4810	Global Structures and Problems	3
URST 2000	The Study of Cities and Metropolitan America	3

* Students should request permission from the instructor to enroll in this course.

- Environmental humanities and arts electives:

Code	Title	Units
AFAS 2881	Free theLand: Black Lives and Environmental (in)Justice	3
AFAS 3075	Recipes for Respect: Black Foodways in the U.S.	3
ARCH 2090	Design Process	3
ART 3317	Photography: Art Practice (Documentary Photography in the 21st Century)	3
ART-ARCH 3961	Art and Ecology	3
COMPLIT 4111	Pastoral Literature	3
DRAMA 4081	Theatre for Social Change	3
ENST 3034	Environmental Modernism	3
ENST 3320	Fallout: Analyzing Texts and Narratives of Nuclear Era	3
ENST 3410	Native American Storytelling for Health Land Practice	3
ENST 4410	Writing Home: Creating Clutural guides for environmental site workers	3
HIST 2360	Urban America	3
HIST 3194	Environment and Empire	3
HIST 3810	Between Sand and Sea: History, Environment and Politics in the Arabian Pennisula	3
IPH 3120	Introduction to Digital Humanities	3
IPH 4310	Statistics for Humanities Scholars	3
LAND 5424	Seeds	3
PHIL 2080	Environmental Ethics	3
WRITING 3005	Writing the Natural World	3
WRITING 3400	Introduction to Playwriting	3

- Natural science electives:

Code	Title	Units
ANTH 3053	Nomadic Strategies andExtreme Ecolgies	3
ANTH 3660	Primate Ecology, Biology, and Behavior	3
ANTH 3662	Primate Conervation Biology	3
ANTH 4285	Environmental Archaeology	3
ANTH 4803	Advanced GIS Modeling & Landscape Analysis	3
BIOL 3172	Biology for Climate Change Solutions	3
BIOL 3220	Woody Plants of Missouri	3
BIOL 3221	Research and Public Education in the Arboretum	3
BIOL 3430	Plants, People, and the Environment	3
BIOL 3494	Microbes and the Environment	4
BIOL 3700	Animal Behavior	3
BIOL 3730	Laboratory on the Evolution of Animal Behavior	3
BIOL 3810	Introduction to Ecology	3
BIOL 3900	Science for Agriculture and Environmental Policy	3

BIOL 4193	Experimental Ecology Laboratory	3
BIOL 4195	Disease Ecology	3
BIOL 4196	Community Ecology	3
EEPS 3150	Environmental Impacts of Human Energy Use	3
EEPS 3173	Introduction to Soil Science	3
EEPS 3230	Biogeochemsitry	3
EEPS 3400	Minerals, Rocks, and Resources in the Environment	4
EEPS 3420	Environmental Systems	3
EEPS 3853	Earth History	3
EEPS 3860	The Earth's Climate Systems	3
EEPS 3873	Geospatial Science	3
EEPS 4074	Remote Sensing	3
EEPS 4094	Surface Processes	3
EEPS 4284	Hydrology	3
EEPS 4425	Aqueous Geochemistry	3
EEPS 4544	exploratin and Env. Goephysics	3
EEPS 4864	Paleoclimatology	3
ENST 3600	Field Methods for Environmental Science	3
ENST 3610	Urban Ecology	3
ENST 3620	Applied Conservation Biology	3
ENST 3630	Arctic Climate System	3
ENST 4710	Advanced GIS	3
ENST 4730	Introduction to Spatial Epidemiology	3
LAND 5330	Landscape Ecology	3

Additional Information

Grades and Credits

The program has set the following policy concerning the minimum acceptable grade performance. A grade of C- is the minimum acceptable performance for each unit of credit for all coursework for the major. Courses with grades of D may fulfill the College's requirement for 120 total credit units, but they do not meet the program requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses. Please visit the Academic Regulations page (p. 1007) of the College of Arts & Sciences Bulletin for more information. **Note:** Students must ensure that, while completing the major, they complete a minimum of 18 units of upper-level coursework (3000 level or above). At least half of the units (i.e., 25 units) for the major must be completed in residence.

Substitutions and Transfer Credit

Requests for substitutions for courses from other institutions (transfer credit) need approval by the College Office. Please visit the Policies and Procedures for more information.

Majors requesting a course substitution should complete the Course Petition Form.

Study Abroad

To study abroad, students must be in their junior or senior year and have a 3.0 grade point average. Students must understand the language of the country they plan to study in. Grades do not transfer back to Washington University. Credits can be applied toward the 120 credits needed to graduate, and courses taken abroad can substitute for classes for the Environmental Major and Minors. These substitutions should be worked out before leaving for Study Abroad. Final decisions for course credit will be made once the student has returned and the courses and grades are reported to Washington University. The minimum grade for study abroad coursework to apply to major/minor credit is C-.

Environmental Studies will accept up to 4 courses (12-16 units) from a study abroad program toward the Environmental Analysis Major. This can include courses in the social identity and environment and breadth and depth elective sections of the major, as well as a research methods courses taken on a field-based program, but not other sections of the major. Requests for substitutions should be submitted to the director and study abroad coordinator for Environmental Studies, Dr. Jeff Catalano.

Considerations

- Participating in a Washington University program allows financial assistance, and students may earn full academic credit for study abroad if they participate in Washington University programs.
- Students wishing to participate in non-Washington University programs must petition for credit before participating in the program.
- Students must communicate regularly with their advisors while abroad and report to them upon return.
- Each student must contact the Overseas Office to arrange for credit transfer.
- For details, contact the Overseas Office.

Distinctions

In Environmental Studies, we recognize student accomplishment by awarding departmental distinction to graduating students who have excelled in various ways within the Environmental Analysis Major, such as high performance in coursework, exceptional analytical and critical thinking skills, or leadership in promoting environmental awareness, initiating sustainability projects, and inspiring others. Visit the Academic Honors & Awards page (p. 1005) of this *Bulletin* for more information.

Latin Honors

Any Environmental Analysis Major may conduct senior thesis research regardless of GPA. To complete senior thesis/Latin honors research, students must register for ENST 4998 (senior thesis class) and ENST 4999 (senior thesis independent study) in their final two semesters to receive credit for their time spent on research.

To be eligible for Latin Honors, students must complete senior thesis research (complete ENST 4998, complete ENST 4999, and submit a satisfactory thesis) and have maintained a 3.65 grade point average through the sixth semester and must be accepted for candidacy by Environmental Studies. To earn honors, students must maintain a minimum 3.65 GPA through the final semester. In accordance with university guidelines, for Latin Honors, students may be awarded the A.B. cum laude, magna cum laude, or summa cum laude according to the following proportions: the top 15% in overall GPA of the full cohort of Latin Honors candidates who complete the requirements of their major departments will graduate summa cum laude; the next 35% magna cum laude; and the next 50% cum laude. For more information, please visit the Student Research page of the Environmental Studies website.

Department Awards

In Environmental Studies, we offer the following awards (recognition and a modest monetary prize) to graduating Environmental Analysis Majors with outstanding accomplishments. Program faculty members nominate and choose students.

- Environmental Studies Award for Academic Achievement
- Environmental Studies Award for Scholarship and Research
- Environmental Studies Award for Environmental Leadership

Phone:	314-935-7047
Email:	bowinston@wustl.edu
Website:	http://enst.wustl.edu

Environmental Studies Minor

Program Requirements

- **Total Units Required:** 18

This minor is a good fit for students for many reasons:

- **Exposure:** Includes introductory-level courses
- **Accessibility:** Includes introductory courses
- **Flexibility:** Wide degree of choice in elective categories
- Pairs easily with many majors to provide interdisciplinary exposure

Students must have at least 9 units of course work at the 300 level or higher that are unique to this minor.

Required Courses

Required core introductory courses (students choose two of the following; 6 units):

Code	Title	Units
BEYOND 1001	Earth's Future: Cause & Consequences of CC*	3
BEYOND 1004	Sustainability and Beyond: People, Planet, Prosperity*	3
BEYOND 1014	Environmental Racism and the Health of Everyone*	3
BIOL 2150	Introduction to Environmental Biology	3
EEPS 2020	Intro. to Earth, Env. and Planetary Science	3
ENST 2220	One Health:Linking Human, Animal, Environmental Health	3
ENST 2310	Introcution to Environmental Humanities	3
ENST 2520	Sustainability in Business	3
ENST 2530	Metropolitan Environment	3
ENST 2620	Conservation Biology	3
POLSCI 2000	Introduction to Environmental Policy	3

* Students may count one of these Beyond Boundaries courses (first year only): BEYOND 1001, BEYOND 1004, or BEYOND 1014.

Elective Courses

One elective in analysis and communication (3 units):

Code	Title	Units
ENST 3310	Beyond the Evidence	3
ENST 3320	Fallout: Analyzing Texts and Narratives of Nuclear Era	3
ENST 3330	Multiparty Environmental Decision-Making	3
ENST 3340	Writing Skills for Environmental Professionals	3
ENST 3600	Field Methods for Environmental Science	3
ENST 3710	Applications in GIS	3
ENST 4350	Foundations of Research:Building a Literature Review	3
ENST 4410	Writing Home:Creating Cultural guides for environmental site workers	3
ENST 4710	Advanced GIS	3
ENST 4801	Sustainability Exchange	3
ENST 4810	RESET:Decarbonizing the Grid	3
ENST 4820	International Climate Negotiation Seminar	3
ENST 5830	Interdisciplinary Environmental Clinic	3

One elective in environmental humanities and arts (3 units):

Code	Title	Units
AFAS 2881	Free the Land: Black Lives and Environmental (in)Justice	3
AFAS 3075	Recipes for Respect: Black Foodways in the U.S.	3
ARCH 2090	Design Process	3
ART 3317	Photography: Art Practice (Documentary Photography in the 21st Century)	3
ARTARCH 3961	Art & Ecology	3
COMPLIT 4111	Pastoral Literature	3

DRAMA 4081	Theatre for Social Change	3
ENST 3034	Environmental Modernism	3
ENST 3320	Fallout: Analyzing Texts and Narratives of Nuclear Era	3
ENST 3410	Native American Storytelling for Healthy Land Practice	3
ENST 4410	Writing Home: Creating Cultural guides for environmental site workers	3
HIST 2360	Urban America	3
HIST 3194	Environment and Empire	3
HIST 3810	Between Sand & Sea: History, Environment, and Politics in the Arabian Peninsula	3
IPH 3120	Introduction to Digital Humanities	3
IPH 4310	Statistics for Humanities Scholars	3
LAND 5424	Seeds	3
PHIL 2080	Environmental Ethics	3
WRITING 3005	Writing the Natural World	3
WRITING 3400	Introduction to Playwriting	3

One elective in social sciences (3 units):

Code	Title	Units
AMCS 2270	Topics: Intro to Native Amercian and Indigenous Studies	3
ANTH 3102	Topics: Sustainbility in Extractive Communities	3
ANTH 3215	Food, Culture and Power	3
ANTH 3472	Global Energy and the American Dream	3
ANTH 3602	Env. Inequal: Toxicity, Health and Justice	3
ANTH 3610	Culture and Environment	3
ANTH 3740	Social Landscapes in Global View	3
ANTH 3796	Meltdown: THe Archaeology of Climate Change	3
ANTH 4281	Ecological Anthropology	3
ECON 3350	Environmental Policy	3
ENST 2510	Systems Thinking	3
ENST 3060	Community-Based Conservation in Madagascar	3
ENST 3310	Beyond the Evidence	3
ENST 3520	Ecological Economics	3
ENST 3530	Sustainable Cities	3
ENST 3540	Environmental Justice	3
ENST 4350	Foundations of Research: Building a Literature Review	3
ENST 4510	Environmental Law	3
ENST 4527	IPCC: Governance, Policy and Science	3
ENST 4710	Advanced GIS	3
ENST 4720	Applications in Geospatial Intelligence	3
MGT 4510	Business & Gov't: Understanding & Influencing the Regul.Env.	3
MGT 4603	Intro. to Social Entrepreneurship	3
MPH 5002	Epidemiology*	3
MPH 5323	TPS: Climate Change and Public Health*	3
POLSCI 3171	Politics of Environmental Regulation	3
POLSCI 3328	Energy Politics	3
POLSCI 3630	Quantitative Political Methodology	3
POLSCI 3760	Urbanization, Globalization, and the Environment	3
POLSCI 3890	Power, Justice and the City	3
POLSCI 4043	Policy Analysis, Assessment and Practical Wisdom	3
POLSCI 4905	Research Design and Methods	3
SOC 3350	Poverty and the New American City	3
SOC 4810	Global Structures and Problems	3
URST 2000	The Study of Cities and Metropolitan America	3

One elective in natural science (3 units):

Code	Title	Units
ANTH 3053	Nomadic Strategies and Extreme Ecologies	3
ANTH 3660	Primate Ecology, Biology and Behavior	3
ANTH 3662	Primate Conservation Biology	3
ANTH 4285	Environmental Archaeology	3
ANTH 4803	Advance GIS Modeling & Landscape Analysis	3
BIOL 3171	Biology for Climate Change Solutions	3
BIOL 3220	Woody Plants of Missouri	3
BIOL 3221	Research and Public Education in the Arboretum	3
BIOL 3430	Plants, People, and the Environment	3
BIOL 3494	Microbes and the Environmnent	3
BIOL 3700	Animal Behavior	3
BIOL 3730	Laboratory on the Evolution of Animal Behavior	3
BIOL 3810	Introduction to Ecology	3
BIOL 3900	Science for Agriculture and Environmental Policy	3
BIOL 4193	Experimental Ecology Laboratory	3
BIOL 4195	Disease Ecology	3
BIOL 4196	Community Ecology	3
EEPS 3150	Environmental Impacts of Human Energy Use	3
EEPS 3173	Introduction to Soil Science	3
EEPS 3230	Biogeochemistry	3
EEPS 3400	Minerals, Rocks, and Resources in the Environment	3
EEPS 3420	Environmental Systems	3
EEPS 3853	Earth History	3
EEPS 3860	The Earth's Climate System	3

EEPS 3873	Geospatial Science	3
EEPS 4074	Remote Sensing	3
EEPS 4094	Surface Processes	3
EEPS 4284	Hydrology	3
EEPS 4425	Aqueous Geochemistry	3
EEPS 4544	Exploration and Environmental Geophysics	3
EEPS 4864	Paleoclimatology	3
ENST 3600	Field Methods for Environmental Science	3
ENST 3610	Urban Ecology	3
ENST 3620	Applied Conservation Biology	3
ENST 3630	Arctic Climate System	3
ENST 4710	Advanced GIS	3
ENST 4730	Introduction to Spatial Epidemiology	3
LAND 5330	Landscape Ecology	3

Film and Media Studies

During the 21st century, as our national and global cultures become increasingly dominated by the visual in ubiquitous modes of technology-based communication, the need to become critical viewers — knowledgeable in the history of the most popular art forms of our time and possessing the analytical skills to understand and interpret mass media — is acute.

To address this need, the major in Film and Media Studies requires the rigorous study of history and aesthetics so that students come to understand the creative force of moving image texts, whether digital, electronic, or filmic. Courses examine the place of these texts in culture and how their production of meaning relates to industrial and business practices as well as to other artistic endeavors. By complementing the critical studies undergraduate curriculum in Film and Media Studies, courses in production and screenwriting provide — through acts of creation and collaboration — an understanding of the aesthetic and ethical choices that artists confront when working with moving image-based media. Such practical experience integrates theoretical and historical awareness to further enhance students' understanding of the ways in which visual culture makes meaning with established and emergent technologies in contemporary society. This major will benefit any student interested in gaining an intellectual perspective on the relationship between art and technology, culture and industry, and history and theory. This major trains students in rigorous analytical thinking and provides them with research skills and historical knowledge that will assist them in becoming effective participants in the mediated culture of the 21st century.

Film and Media Studies' academic mission is focused on the intellectual and professional development of students, but our faculty regard educating the larger Washington University and St. Louis communities about our field of study to be another important element of our work. To that end, we are committed to sponsoring events — including film festivals, academic lectures, and symposia — that further the discussion of and intellectual engagement with all forms of moving image media.

Courses

FILM 1100 First-Year Seminar: Science Fiction Literature & Film: A Contrast in Hyper-Imaginative Media
This course will present a historical overview of the forms that racial and ethnic representations have taken in American television. The course will chart changes in public perception of racial and ethnic difference in the context of sweeping cultural and social transformations. The course examines how notions of medium and ponders the implications for these identities of the contemporary practice of narrowcasting. Required Screening.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: BA, HUM EN: H
Typical periods offered: Fall, Spring

FILM 1120 First-Year Seminar: Race and Ethnicity in American Cinema
From the early documentary roots of cinema through the Civil Rights movement and to the recent democratization of the means of media production, questions of race and ethnicity have proved crucial both to the content of American films and also to the perspective from which they are made. This class will look at the representation of historical moments from the Civil War to Hurricane Katrina, the production of cinematic stereotypes as well as their appropriation for subversive purposes, and the gradual evolution of multi-culturalism as a central factor in the stories told and the telling of stories on the American screen. Students will use film texts to develop a critical understanding of one of the most important issues in American history. Required screenings.
Credit 3 units. A&S IQ: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Spring

FILM 1122 First-Year Seminar:
Over the past three decades, contemporary film and television have seen a trend of increasingly complex storytelling, in the US and worldwide. We see such innovative narrative forms in Hollywood films such as Source Code (Duncan Jones, 2011), Inception (Christopher Nolan, 2010), and Butterfly Effects (Eric Bress and J.Mackye Gruber, 2004), as well as in TV serials such as FlashForward (ABC, 2009-10) and Russian Doll (Netflix,2019), not to mention global art cinema Too Many Ways to Be No.1 (Wai Ka-fai, 1997) and Peppermint Candy (Chang Dong Lee, 1999). Named puzzle films, mind-game films, or complex TV, these films and series manifest common new features, such as non-linear narratives, jumbled chronologies, labyrinthine spatial orientation; they creatively use time travel, multiverse, compulsive repetition, and loops to transcend spatial-temporal limitations. These films play with our perception of the reality, present new psychological and cognitive challenges, and thereby create new spectatorial pleasure. This course teaches students to enjoy, view, closely analyze, and critically think about films and series of complex storytelling. Reading these films along with recent film and television studies scholarship, students learn

analytical skills and conceptual frameworks to untangle the convoluted narrative logic and discern in the narrative architecture new modes of rethinking identity, reality, history, and future in our contemporary societies. Required Screenings: Wednesdays @ 4pm. This course is appropriate for first-year students.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

FILM 1130 Freshman Seminar: Science Fiction and Cultural Modernity
Science Fiction has been called the twentieth century's most characteristic genre because it addresses many of the issues that are central to the concept of cultural modernity: utopian/dystopian visions, technological development/disasters, mass media/mass culture, rapid social change, cultural clashes, and encounters with the alien other (differentiated by gender, race, class, etc.). What is interesting about works of science fiction is not so much what they have to say about an imagined future, but what they tell us about the culture that created them. In this course we will think and write critically about key themes from approximately four science fiction novels (such as Brave New World and War of the Worlds) and from a range of science fiction films and television series (such as the original Invasion of the Body Snatchers, A Clockwork Orange, Blade Runner, and Star Trek: The Next Generation) in order to examine how science fiction comments on the cultural present.
Credit 3 units.

FILM 1140 First-Year Seminar: Superhero Media
This course will examine the superhero as American myth and media industry commodity. We will consider historical, cultural, and industrial aspects of the superhero genre across comic books, films, television series, and video games. Focusing on multiple media allows us to examine an array of medium-specific and cross-media issues (e.g., how criticism of superhero films as not cinema reflects a legacy of comics being perceived as juvenile). Our study will encompass a number of critical frameworks, including myth, adaptation, gender, race, and transmedia storytelling. Each course unit will focus on how different media have presented one or more superhero franchises (e.g., Superman, Batman, Black Panther, Captain Marvel, Watchmen). Required screenings. Enrollment limited to first-year students.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Fall, Spring, Summer

FILM 1150 First-Year Seminar:
This course will explore the complex relationship between moving images and ideas of the real in both movies and television. It will explore theories of representation, surveillance, authenticity, truth, and realism in this context. From the earliest actuality films to the recent phenomenon of reality television programming, it will ask if screen images capture what is really happening in front of the camera or if conventions of representation, genre, and narrative mediate the reality of these images. More significantly, it will inquire into why such questions matter. At issue is the role that moving images on both the big and the small screen have in our understanding of the world as it is and ourselves as we experience it.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Spring

FILM 1160 First-Year Seminar: Cult TV: Critical Approaches to Fans and Fictions
What do such disparate television series as Dr. Who, Star Trek, The Avengers, Monty Python's Flying Circus, The X-Files, Buffy the Vampire Slayer, Xena: Warrior Princess, and Sealab 2021 have in common? They all attract loyal audiences, stimulate subcultural sensibilities, lend themselves to textual poaching, and thus qualify as examples of Cult TV, a term that has become increasingly salient within critical studies of the medium. In this course we will explore the subject of cult television from a variety of social, cultural, and thematic perspectives, so that by the end of the semester students will have gained a deeper understanding of its historical importance as a barometer of both popular and oppositional tastes. We will examine how these and other examples of genre-based network and cable programming complicate distinctions between lowbrow and highbrow tastes while sustaining worldwide interpretative communities years after their original airdates. Students will also examine the importance of syndication, home video technologies, ancillary markets, publishing, and the Internet in the construction of fan cultures. Required Screening.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

FILM 1170 First-Year Seminar: Asians in American Film
This course surveys the history of Asian representations in American cinema from the silent period to the contemporary era. Throughout the semester we will focus on images of Chinese, Japanese, Koreans, Filipinos, and Vietnamese that have become most ingrained in American popular culture over the last century, from Fu Manchu and Madame Butterfly stereotypes popular during the classical studio era to more recent reconfigurations of racialized imagery in Jackie Chan and Jet Li films. We will also examine selected works by Asian American independent writer-directors-films and videos like Chan is Missing, History and Memory, and Better Luck Tomorrow that challenge the stereotypes and normative tropes of Orientalism still permeating mainstream media. Students will be asked to frame textual analyses of key films (such as The Cheat, Daughter of Shanghai, Battle Hymn, Flower Drum Song, and Enter the Dragon) within various political, social, cultural, and industrial contexts (e.g. anti-Asiatic immigration and labor policies; U.S. foreign policies; the practice of yellowface; censorship codes; wars in East and Southeast Asia; anti-miscegenation laws; grassroots campaigns to stem the tide of stereotypes and hate-crimes; etc.).
Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

FILM 1180 First-Year Seminar: Mr. Kiss Kiss Bang Bang: James Bond in Film, Literature and Popular Culture
Originally a character in Cold War spy literature, James Bond has emerged as an international pop culture phenomenon. In this course, we will explore the evolution of James Bond from Ian Fleming to the spy parodies in international cinema. We will read several of Fleming's novels and short stories, including Casino Royale (1953), Octopussy (1966) and The Property of a Lady (1967), and discuss these texts in light of post-war spy literature. We will screen numerous Bond films, and compare and contrast James Bond the literary and cinematic character, how Bond emerged as a franchise hero through the vision of producers Harry Saltzman and Albert Cubby Broccoli, and critical aspects of the film franchise, including its storytelling roots in Hollywood serials, its use of gadgets and special effects, and the role of stardom in their marketing (Sean Connery, Ursula Andress, Roger Moore, Madonna, Pierce Brosnan and Daniel Craig). Finally, we will explore the re-envisioning of Bond in various media and art forms in global popular culture, including music, DC and Marvel Comics, games, children's television and in Asian cinema (Stephen Chow's 1994 From Beijing with Love). Required Screenings.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

FILM 1190 First-Year Seminar: Anime as Popular Culture
In the contemporary media landscape, film, television, games, publishing, and merchandizing are increasingly connected and help distribute cultural products across the globe. Japanese animation is one of the earliest and most successful examples of this powerful

strategy. This course examines the global franchising industry of Japanese anime to explore basic questions about media and popular culture: How do we define a medium? How do consumer practices shape media and popular culture? What is the impact of globalization on media, and global media on national culture? Our investigations of Japan cool and its avid consumer cultures will cover: animation aesthetics and technology; media convergence; anime fan cultures; science-fiction and remaking the body, history, and identity through global media. No prerequisites. Enrollment limited to fifteen college freshmen. In addition to class meetings, there will be a mandatory weekly scheduled screening.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H
Typical periods offered: Spring

FILM 1200 First-Year Seminar:
In spite of -- and because of -- its propensity for terrifying readers and viewers, horror has proven to be one of the most resilient and popular genres across all forms of media. Why are audiences attracted to a genre that causes fear, revulsion, and distress? This course will consider the cultural, philosophical, and generic dimensions of horror and explore how it operates across an array of media platforms: film, literature, television, comics, and video games. We will read two literary masters of the genre, H.P. Lovecraft and Stephen King, and we will screen some of the most successful horror films of the last 50 years. We will also study horror through a variety of critical frameworks, including gender, stardom, special effects, transnationality, adaptation, transmedia storytelling, and interactivity. The course will culminate in two extended case studies. In the first, we will compare and contrast literary, filmic, and televisual adaptations of The Shining. In the second, we will consider The Walking Dead as a franchise that spreads its narrative across comics, multiple television programs, and video games. Required screenings. Enrollment limited to first-year students.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

FILM 1210 First-Year Seminar: Youth Culture and Visual Media
Since the advent of cinema through the recent development of online social networking, visual media in the United States and around the world have been identified with a market of youthful consumers and producers. This course will look at the development of youth culture in the United States and its unique relationship to visual media, including film, television, comic books, video games, and the Internet, in the twentieth and twenty-first centuries. We will examine youth culture as a social phenomenon generated by the young, a means of representing the experience of being youthful, and as part of the ongoing debates over the effects of media on the young. As alternately mass culture, popular culture, counter culture, and participatory culture, youth culture holds a privileged place in the history of American visual media and continues to influence production and innovation within the media marketplace.
Credit 3 units. A&S IQ: HUM BU: BA, HUM EN: H
Typical periods offered: Spring, Summer

FILM 1995 Film & Media Studies Coursework Completed Abroad
This course is for study abroad credits.
Credit 12 units.

FILM 1996 Film and Media Studies Elective: 100-Level
Credit 3 units. EN: H

FILM 2000 Special Projects
This course is intended for freshmen and sophomores who wish to register for internships. Students must receive Program approval prior to beginning the internship. Please consult the Program guidelines governing internships. Credit variable, maximum 3 units.
Credit 3 units.
Typical periods offered: Fall, Spring

FILM 2006 Video/Film
In order to enroll in this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit 3 units.

FILM 2200 Introduction to Film Studies
How do film images create meaning? What are the tools the film artist uses to create images? This course will introduce students to basic techniques of film production and formal methodologies for analyzing film art. Students will learn the essential components of film language -- staging, camera placement, camera movement, editing, lighting, special effects, film stock, lenses -- to heighten perceptual skills in viewing films and increase critical understanding of the ways films function as visual discourse. The course is foundational for the major in Film and Media Studies. Required Screening
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring, Summer

FILM 2250 Making Movies
This course introduces the core concepts and skills for producing dramatic narrative film and video, building on the Hollywood paradigm. No previous technical experience is required, but students should have taken or be concurrently enrolled in Film 220. This course teaches students how films are put together to tell stories, negotiating between the possibilities of cinematic language and the practicalities of working with machines and other people. In order to develop an understanding of filmic narration, students will learn the basics of camera operation, lighting, digital video editing, sound design and recording, casting and directing actors, visual composition and art direction, and production planning and organization. These concepts will be put into practice through a series of exercises culminating in a creative, narrative short digital video. This course fulfills the prerequisite for 300 and 400 level video and film production courses in Film and Media Studies and the production requirement in the FMS major. Admission by waitlist only. Prereq: Film 220.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring, Summer

FILM 2300 Moving Images and Sound
Note: Admission by Wait-list only. Preference will be given to Film and Media Studies majors and minors. This introductory video production course explores how images and sounds function as cinematic building blocks and purveyors of content. Through creative assignments involving at times personal inquiry, at other times the understanding of elementary semiotics, the components of film and video are examined. Students learn the basics of key sound and editing software to produce, outside of class time, an original two-minute narrative piece. This course is a prerequisite to all other Film and Media Studies video courses. Prereq: Film Studies 220 or consent of instructor.
Credit 3 units. A&S IQ: HUM BU: HUM

FILM 2490 Intro to Digital Video Post-Production
Within this introduction to the electronic studio and the general principles of editing, some of the most commonly used techniques in post-production will be explored. Students will go from object oriented graphics to bitmap imaging software like Illustrator, Photoshop and Painter, to create titles and short animations to be incorporated into their final edited piece. Sound and Web presentation issues will also be touched upon. Students are expected to provide their own video material, ready to edit, by the start of the semester. Prerequisite: Film Studies 245.

Credit 3 units.

FILM 2907 Special Projects
In order to encoll in this course, students must complete a contract and submit it to the Performing Arts Department office.
Credit 3 units.

FILM 2995 Film & Media Studies Course Work Completed Abroad
This course is for study abroad credits.
Credit 12 units.

FILM 2996 Film and Media Studies Elective: 200-Level
Credit 3 units. EN: H

FILM 3003 From Shaft to Django: The History of Blaxploitation Film
Hollywood was in steep decline in the late 1960's. On the brink of collapse, the film industry was rescued by an unprecedent boom in films that featured Black casts and targeted Black audiences. Narratives of slick-talking hustlers and afro-sporting femme fetales intent on sticking it to the man, these would come to be known as Blaxploitation films. This class will historically contextualize and critically examine the Blaxploitation phenomenon of the 1970's. We will explore what led to the emergence of Blaxploitation, the peaks of its popularity, the controversies that surrounded it, its rapid demise, and its lasting influence. Blaxploitation was a brief, bombastic and highly polarizing era in the history of American film. Heralded by some as a revolution in representations of Black empowerment and by others as pandering to longstanding racial stereotypes. Indeed, it's influence on Black culture stretches beyond the 1970's and into cultural realms beyond the silver screen. While this is primarily a film course emphasizing close readings of canonical Blaxploitation cinema, we also will explore: Blaxploitation soundtracks (i.e., Curtis Mayfield and Isaac Hayes), Black Pulp Fiction novels that inspired the films (i.e., Ernest Tidyman and Sam Greenlee), the aesthetics of Blaxploitation promotion via the Black Film Promotional Material Collection located in the Julian Edison Department of Special Collections, and finally we will consider how Blaxploitation aesthetics influenced subsequent cultural movements like the 1990's renaissance in Black film, Hip-Hop and contemporary satire.
Credit 3 units.

FILM 3050 Music and Masculinity in the Movies of Martin Scorsese
This course considers the work of American filmmaker Martin Scorsese, with close attention to (1) how Scorsese uses music (and sound) to construct intense cinematic worlds and (2) how his film characters and plots represent various sorts of white American men. The consistent collision between Scorsese's interest in music as a driver of film style and content and his penchant for male-centered, frequently violent narratives makes him an ideal central figure for our study of white American masculinities at the movies over the last five decades. Films to be studied include Mean Streets, Taxi Driver, Raging Bull, Goodfellas, Cape Fear, The Departed, Shutter Island, and The Wolf of Wall Street. Required screenings.
Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

FILM 3100 Video Production
An advanced course exploring the creative and technical aspects of video production. Students sharpen their knowledge of cameras, directing, lighting, sound recording, non-linear systems, and narrative structures. In addition to acquiring a theoretical understanding of the production process, students will gain practical experience by producing, outside of class time, a short project reflecting their visual and conceptual maturity. Prerequisite: L53 Film 230 (Moving Images and Sound) or permission of the instructor.
Credit 3 units. A&S IQ: HUM BU: BA, HUM EN: H
Typical periods offered: Spring

FILM 3110 Documentary Production
In parallel with an overview of various documentary genres, ranging from the personal, the poetic, the agitprop, and cinema verité, this course will offer students the opportunity to produce a short documentary piece on the topic of their choosing. Aesthetic and ethical issues will be explored by considering the overall methodology in terms of subjectivity, content, structure, and the possible usage of music and/or voice-over. For the sake of completing the project in time, it is recommended that students be familiar with the subject matter of their investigation, before taking the course. Prerequisite: L53 Film 230 (Moving Images and Sound) or permission of the instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

FILM 3190 Documentary Film and Media
From movie screens to cell phones, moving images that document life have never been more ubiquitous. What do these images tell us about the relationship between representation and reality? How have film and media makers used moving images to represent major cultural, political, and social upheavals as well as communicated an understanding of everyday life? To answer these questions, this course will survey the rich, vibrant legacy of documentary filmmaking as well as demonstrate its ongoing artistic and cultural relevance to newer media. We will examine key modes of documentary film while contextualizing the historical development of these forms within aesthetic, industrial, and political factors. We will also consider ethical issues in filmic representation, especially in relation to the ethnographic tradition. In addition to studying the work of documentary pioneers, we will explore contemporary activist documentaries, as well as new industrial developments such as serialized online documentary. Required screenings. Tuesdays @ 4pm

FILM 3200 British Cinema: A History
British cinema has gotten a bad rap. French film director François Truffaut once declared that cinema and Britain were incompatible terms since the English countryside, the subdued way of life, the stolid routine-are anti-dramatic. . . [even] the weather itself is anti-cinematic. Yet British films proudly rank among some of the most acclaimed and beloved in film history: Monty Python and the Holy Grail, A Hard Day's Night, Lawrence of Arabia, The Third Man, Zulu, The Ladykillers, A Night to Remember, Trainspotting, The King's Speech, and the James Bond franchise. Admittedly, British cinema has had its ups and downs, never quite knowing whether to position itself as a distinctive national cinema or as a rival to Hollywood. This uncertainty has fostered a rich diversity and complexity that this course will emphasize in a survey approach. We will give equal attention to the work of high-profile directors like Alfred Hitchcock and Michael Powell and to important genres in which the British seem to excel--like black comedy, imperialist adventure, kitchen sink drama, documentary, and the so-called heritage films that paved the way for television's Downton Abbey. Required Screenings.

FILM 3220 Contemporary East Asian Cinema
This course focuses on films made in Japan, Mainland China, Taiwan, Hong Kong and South Korea over the past three decades. Students will examine how the global/local geopolitics specific to the post-Cold War period, the passing of authoritarian regimes, the boom and bust of the Asian economy, and international film festivals have influenced the shaping of New East Asian cinemas across borders. REQUIRED SCREENING: [day, time].

Typical periods offered: Fall

FILM 3230 The Cinema of Eastern Europe in the Cold War Era
This course has two objectives. On the one hand, we will watch masterpieces of European cinema, awarded at international festivals and directed by legendary names such as Milos Forman, Emir Kusturica and Andrzej Wajda, and focus on their artistic genius. On the other hand, we will study the way in which the confrontational politics of the Cold War inform these films, with a special focus on the perplexing predicament of a divided and antagonized Europe. The readings for this class emphasize our dual exploration. We will work with texts dealing with both film history and its aesthetics and with broader analyses of the intellectual and political landscape of the Cold War context. Required Screenings.

FILM 3240 History of Chinese Cinemas: 1930s-1990s
This course offers an overview of Chinese cinemas, including those of Mainland China, Hong Kong, and Taiwan, over the twentieth century. We will study major trends such as the left-wing filmmaking in the 1930s, the Maoist revolutionary narratives, Taiwanese healthy realism, the New Cinemas of the three regions, and contemporary transnational productions. Major topics include urban modernity, gender formation, national and transnational cinemas within specific historical contexts. All films come with English subtitle. Required Screenings.

Typical periods offered: Spring

FILM 3250 French Film Culture
Called the seventh art, film has a long tradition of serious popular appreciation and academic study in France. This course will offer an overview of French cinema, including the origins of film (Lumière brothers, Méliès), the inventive silent period (which created such avant-garde classics as Un chien andalou), the poetic realism of the 30s, the difficulties of the war years, the post-war emphasis on historical/nationalist themes in the tradition of quality films, the French New Wave's attempt to create a more cinematic style, the effects of the political turmoil of May '68 on film culture, the art house reception of French films in the US, and the broader appeal of recent hyper-visual (cinéma du look) films, such as La Femme Nikita and Amélie. While the primary focus of the course will be on French cinema, we will also discuss the reciprocal influences between American and French film culture, both in terms of formal influences on filmmaking and theoretical approaches to film studies. French film terms will be introduced but no prior knowledge of the language is expected. REQUIRED SCREENING: [day, time].

Typical periods offered: Fall, Spring

FILM 3260 Samurai, Rebels, and Bandits: The Japanese Period Film
Tales of heroism, crime, revolt, and political intrigue. Bloody battles, betrayal, madness, and flashing swords. This is the world of jidaigeki eiga, the Japanese period film. In this course, we will analyze the complex (and often flamboyant) narrative, visual, and thematic structures of films about the age of the samurai. We will discuss jidaigeki representations of violence and masculinity, self-sacrifice and rebellion, and the invention of tradition as well as critical uses of history. In addition to the historical content of the films, we will study the historical contexts that shaped jidaigeki film production and discuss relevant transformations in Japanese cinema and society. Period films have been shaped by and exert strong influences on Japanese theater, oral storytelling, popular literature, comics, and international film culture, all of which are helpful for understanding the films. As we track changes in jidaigeki style and subject matter, the course will introduce theories for interpreting narrative structure, genre repetition and innovation, intertextuality, and representations of the past. All readings will be in English. No knowledge of Japanese required. No prerequisites. Required Screenings Tuesdays @ 7 pm.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H
Typical periods offered: Fall

FILM 3270 Anime and Manga
This course examines the production and reception of Japanese animation and comics, with special emphasis on animation techniques and technology, industrial practices, cultural analysis, and fan cultures. Students will learn about the intertwined histories of anime and manga, and engage with contemporary examples. No prerequsites or Japanese language necessary. This course is appropriate for first year students.

Typical periods offered: Spring

FILM 3280 History of German Cinema
This course explores the major developments of German cinema throughout the twentieth century. More specifically, this course will engage with issues relating to German film culture's negotiation of popular filmmaking and art cinema, of Hollywood conventions and European avant-garde sensibilities. Topics will include the political functions of German film during the Weimar, the Nazi, the postwar, and the postwall eras; the influence of American mass culture on German film; the role of German émigrés in the classical Hollywood studio system; and the place of German cinema in present-day Europe and in our contemporary age of globalization. Special attention will be given to the role of German cinema in building and questioning national identity, to the ways in which German feature films over the past hundred years have used or challenged mainstream conventions to recall the national past and envision alternative futures. Films by directors such as Murnau, Lang, Fassbinder, Herzog, Tykwer and many others. All readings and discussions in English. May not be taken for German major or minor credit. Required screenings. This course is appropriate for first year students.
Credit 3 units. BU: IS EN: H
Typical periods offered: Spring

FILM 3290 Italian Neorealism
This course explores the visual language of one of the most influential film movements of the twentieth century. We will concentrate on the origins of neorealism in Italian post-war cinema and history, and focus on the works of film-makers such as Roberto Rossellini, Vittorio De Sica and Luchino Visconti. We will also consider the longer-term influence of the movement both in Italy and elsewhere. Throughout this course, we will reflect on the possibilities of mimesis in cinema, on the social and political engagement of neorealist film, and on the factors that caused its decline.

FILM 3300 History of American Cinema
This course traces the history of the American cinema from the earliest screenings in vaudeville theaters through the birth of the feature film to movies in the age of video. The course will examine both the contributions of individual filmmakers as well as he determining contexts of modes of production, distribution, and exhibition. The course aims to provide an understanding of the continuing evolution of the American cinema, in its internal development, in its incorporation of new technologies, and in its responses to other national cinemas. Required screenings.

Typical periods offered: Spring

FILM 3310 The New Hollywood Cinema
This course will examine the history of film culture and the film industry in the United States since the end of the classical Hollywood studio system. It will pay special attention to the period of auteur-centered filmmaking in the 1970s. During this time, the end of the production code, the financial crisis of the industry, the unparalleled influence of European New Wave and Art films, and the introduction of the first generation of film school graduates (the so-called movie brats) all combined amidst the tumultuous cultural politics of such movements as the counterculture, civil rights, and second wave feminism to form a film-historical moment often called the Hollywood Renaissance. This brief period was soon followed by a newly reinvigorated Hollywood industry focused on the high-concept blockbuster. Such rapid transformations in the practice and nature of American film not only continue to influence commercial filmmaking today but also continue to shape our understanding of the role of authorship, genre, and ideology within Hollywood. The course will consider films of the New Hollywood in the context of tensions between radicalism and populism, progressivism and nihilism, entertainment and ideology, artistic and commercial success. Required screenings.

Typical periods offered: Fall

FILM 3330 Making Movies II: Intermediate Narrative Filmmaking
In Making Movies II, students advance their skills in filmmaking through a series of exercises and individual short films culminating in a final narrative project shot in high definition digital video and edited in Adobe CC and Premiere Pro. With faculty guidance, and working in groups, students collaborate in producing a narrative film that is a minimum of 10 minutes in length, following three-act structure and involving elements of motivation, conflict, and resolution. In addition to this structured approach to content, students are encouraged to achieve a unified aesthetic approach to picture and soundtrack that reinforces/enhances the meaning of their final projects. The course develops student skills through lectures, demonstrations, in-class screening of excerpts and critiques. Topics covered include idea development, preproduction planning, directing actors, composition, lighting, and editing. Students are required to assist other students in their productions and attend all classes. 3 credits. Admission by waitlist only. Prerequisite: Film 220 and Film 225 or 230.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

FILM 3360 Cinema and Ireland
Like many other anglophone and francophone countries, Ireland only even started to develop a robust national cinema in the 1970s. As in, for instance, Australia and New Zealand, growth had previously been blocked by the dominance of local screens by films from, on the one hand, the overbearing 'imperial' power, Britain, and, on the other, Hollywood, center of an even stronger cultural imperialism. Increased national self-assertion coincided with the weakening of the grip of those two cinemas in the post-classical period. A major focus of the class is on some of the key works of the film-makers who established themselves in the 1980s, notably Neil Jordan and Jim Sheridan. But, as the title indicates - not simply Irish Cinema - it deals with more than this. Like Ireland itself, Irish cinema is deeply marked by, and preoccupied with, the political and cultural struggles of the past, and recent cinema is illuminated by seeing it in the context of earlier films: Hollywood and British versions of Ireland, whether shot on location or in the studio, as well as the isolated earlier landmarks of an indigenous Irish cinema. We also look at the rich topic of the representation of Irish immigrants in Hollywood films. Required Screenings.

Typical periods offered: Spring

FILM 3370 Retro Game Design
Before they became retro, games played on platforms of the 1970s and 1980s were just games. But early game-console hardware was designed with very particular ideas of what made a game a game, and under extreme constraints of cost and technical viability. Creators designed for these constraints, and their work then influenced the design of later hardware and software. This is a course about the history, design, and technology of one retro game console, the 1977 Atari Video Computer System (also known as the Atari VCS or the Atari 2600). The first popular home console, the Atari VCS is a truly weird computer: It boasts 128 bytes of RAM, no video buffer, and a custom graphics and sound chip designed to interface with then-universal cathode ray tube televisions. Against all odds, creators made fun and successful games within these extreme constraints. Just as an artist benefits from learning the fundamentals of their craft, so a game designer or developer can benefit from returning to these early and crude hardware platforms. In this course, students will learn the technical and creative history of the Atari, and they will also learn the fundamentals of programming its unfamiliar hardware. Students will carry out programming exercises, mostly in the assembly language instructions required to operate this unusual computer. They will then make their own games for the Atari, which will be able to run on the actual, 45-year-old hardware.

Typical periods offered: Fall

FILM 338 Global Game Industries
This course examines the history and practices of the video game industry from a global perspective. We will begin by charting the history of video games through corporate case studies that reflect industrial turning points. Next, we will review frameworks by which to understand the industry both historically and contemporarily. The final part of the course will be spent breaking down processes involved in the creation, distribution, and consumption of video games. Our analysis of the global video game industry will be based on game studies scholarship, trade press reports, and historical material. Lab meetings will provide the opportunity for engagement with documentaries, gameplay demonstrations, and guest speakers. By the end of the course, you will have gained a better sense of how to both study and participate in the increasingly global video game industry. Weekly requred screening/lab: Tuesdays @ 7pm. This course is appropriate for first-year students.

FILM 3400 History of World Cinema
The course surveys the history of cinema as it developed in nations other than the United States. Beginning with the initially dominant film producing nations of Western Europe, this course will consider the development of various national cinemas in Europe, Asia, and third world countries. The course will seek to develop an understanding of each individual film both as an expression of a national culture as well as a possible response to international movements in other art forms. Throughout, the course will consider how various national cinemas

sought ways of dealing with the pervasiveness of Hollywood films, developing their own distinctive styles, which could in turn influence American cinema itself. Priority given to majors. REQUIRED SCREENING: [day, time].

FILM 3410 Transnational Cinema(s): Film Flows in a Changing World
Across a century of extreme nationalism, Cold War imperialism, and increased globalization, moving image culture remains deeply tied to the evolution of global economics, shifting notions of local identity, and human migration. Recent changes in the dynamic of international economics and cultural flow have led to new critical approaches that reassess international cinema as being constructed by relationships that transcend national borders. This course examines multiple ways in which cinema works transnationally, focusing on recent theories of modernism, globalization, and borderless cultures. Exploring a range of contexts from American domination of the early international market, to the recent evolution of Chinese blockbuster action films, to contemporary Palestinian video art, this course looks at the way in which material developments, narrative and aesthetic conventions, and film professionals have circulated over the past century. We will also look at how new technologies of production, distribution, and exhibition challenge traditional notions of cultural borders. Required screenings and in-class textual analysis will be used to complement industrial studies of how transnational flows have come to define contemporary audio-visual media practices. Required Screenings.

FILM 3420 Introduction to Video Game Studies
This course will introduce students to multiple facets of video games as an art form, as a business, and as a part of American popular culture. The course will begin with a broad establishment of game studies and an investigation of the uniqueness of video games as a medium. Subsequent weeks will introduce different approaches to studying video games -- including historical, industrial, technological, cultural, theoretical, and aesthetic -- drawn from a variety of sources. Weekly lab sections will provide the opportunity for screenings -- including documentaries, news reports, television episodes, web series, and feature films -- and video game play. Students will complete a final research project on a video game of their choice and present on their projects in class. Required lab.

FILM 3440 Childrens Television
How does contemporary television imagine children? How does the industry speak to them, with what aims, and using what types of representational strategies and modes of address? In turn, how do young people respond, both as viewers and, with the advent and increasing accessibility of new technologies, as media producers? This seminar will address these and other related questions while introducing students to the study of children's television in cultural and critical media studies. Throughout, we will address the theoretical question suggested by the course's title, a reference to the work of literary scholar Jacqueline Rose: is children's television possible?

FILM 3450 Sexual Politics in Film Noir and Hard-Boiled Literature
Emerging in American films most forcefully during the 1940s, film noir is a cycle of films associated with a distinctive visual style and a cynical worldview. In this course, we will explore the sexual politics of film noir as a distinctive vision of American sexual relations every bit as identifiable as the form's stylized lighting and circuitous storytelling. We will explore how and why sexual paranoia and perversion seem to animate this genre and why these movies continue to influence neo-noir filmmaking into the 21st century, even as film noir's representation of gender and sexuality is inseparable from its literary antecedents, most notably, the so-called hard-boiled school of writing. We will read examples from this literature by Dashiell Hammett, James Cain, Raymond Chandler and Cornell Woolrich, and discuss these novels and short stories in the context of other artistic and cultural influences on gendered power relations and film noir. We will also explore the relationship of these films to censorship and to changing post-World War II cultural values. Films to be screened in complete prints or in excerpts will likely include many of the following: The Maltese Falcon, Double Indemnity, Murder My Sweet, Phantom Lady, Strangers on a Train, The Big Sleep, The Killers, Mildred Pierce, The High Wall, Sudden Fear, The Big Combo, Laura, The Glass Key, The Big Heat, Kiss Me Deadly, The Crimson Kimono, Touch of Evil, Alphaville, Chinatown, Taxi Driver, Devil in a Blue Dress, The Bad Lieutenant, and Memento. Required Screenings.

Typical periods offered: Spring

FILM 3460 From Golden Age to Wasteland: US Television in the 1950s and 1960s
How did television become the dominant news and entertainment medium of the second half of the 20th Century? How did the medium come to define itself and American identities in the post-WWII era? In an era where various social movements began to lay claim to the cultural center, why did mad men eventually give way to magical women and fantastic families? This course examines the cultural, industrial, and aesthetic changes in U.S. television broadcasting during a time that was crucial to defining its relationship to the public as well as to Hollywood, the government, critics, and American commerce. The class explores the relationships and shifts that made television the U.S.'s most popular consensus medium but one that also would profit by the expression of alternative tastes, politics and identities. Required screenings.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

FILM 3490 Gender, Race, and Sexuality in Popular Media
This course is an introduction to methods in media and cultural studies. We will analyze intersections of media with race, gender, and sexuality by focusing on television and digital media examples. The course begins by exploring questions of representation in media then continues by interrogating how media are implicated in existing structures of inequality and differences of social and cultural power. We will end by discussing some ways that scholars have theorized media consumers as actively engaging with media texts, including scholarship on fan cultures and social media. Required screenings.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC BU: BA, HUM EN: H
Typical periods offered: Fall, Spring

FILM 3500 History of Television
This course traces the history of electronic media as they have become the dominant source for entertainment and information in contemporary culture, starting with over-the-air broadcasting of radio and television through to cable and the narrowcasting achieved by digital technologies. While some attention will be paid to other national industries, the chief focus of the course will be on electronic media in the United States to determine, in part, the transformative role they

have played in the cultural life of the nation. The course will explore the relationship of the electronic media industries to the American film industry, determining how their interactions with the film industry helped mutually shape the productions of both film and electronic media. Required screenings.

Typical periods offered: Spring

FILM 3520 Introduction to Screenwriting
Writers will explore the various elements, structures and styles used in crafting a motion picture screenplay. They will experience this process as they conceive, develop and execute the first act of a feature-length script. Writers will create a screenplay story, present an outline for class discussion and analysis, then craft Act One. Writers will be encouraged to consult with the instructor at various stages: concept, outline, character and scene development, and dialogue execution. While the students fashion their screenwriting independently, the class will also explore the general elements of THEME, GENRE, and VOICE. A more specific examination of mechanics, the nuts and bolts of story construction, plotting, pacing, etc. will follow to support the ongoing writing process. In-class exercises will aid the writer in sharpening skills and discovering new approaches to form and content. Writers' work will be shared and discussed regularly in class. Screening of film scenes and sequences will provide students with concrete examples of how dramatic screenwriting evolves once it leaves the writer's hands.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

FILM 3530 Writing Episodic Television
This class will focus on all the factors that go into preparing and writing an episode for a network TV series (dramas only). Students begin with a pitch (verbally or in short outline form) for an idea for a show currently on a network schedule. Once the pitch is accepted, the student will then complete a beat sheet, and ultimately a spec script that can run from 62 to 75 pages. Two drafts of the script will be required. During the course of this process, students will also learn how to research their narrative premises by contacting legal, medical, and law enforcement experts in order to guarantee the accuracy of their scripts. In addition to learning the actual writing process, students will be expected to watch several television shows and to read books, scripts, and industry trade papers as they pertain to the craft and business of television writing. Finally, students will also meet agents, producers, directors, and other television industry professionals in order to gain their insights into the script writing process and to gain a more global view of the steps involved in bringing their ideas to the screen.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

FILM 3560 Television Culture and Cult TV: Critical Approaches to Fandom
Why do television series inspire passionate involvement on the part of some viewers? What are the differences among being a viewer, an audience member, and a fan? How can we make scholarly sense of cultural practices such as learning to speak Klingon or building a repli-car of the General Lee? Studies of fandom have attempted to answer such questions and continue to explore issues that are crucial to understanding contemporary television culture. The phenomenon of Cult TV offers fertile ground for examining the complex dynamics at play among fans, popular culture, the institutions of American media, and individual programs. In its exploration of cult television and fans, this course will engage with key issues in contemporary media such as the proliferation of new media technologies and the repurposing of existing media forms, the permeable boundaries between high and low or mass and oppositional culture, and the fragmentation and concentration of media markets. The class will combine close textual analysis with studies of fan practices to examine a variety of television programs, from canonical cult texts such as Star Trek and Doctor Who to quality fan favorites such as Designing Women and Cagney & Lacey to contemporary cult/quality hybrids such as Lost and Heroes. In mapping out this cultural territory, we will develop a set of critical perspectives on audience identities and activities and examine the continuing and conflicted imagination of fans by media producers, distributors, regulators, and critics. Required Screening. Prerequisite: Film Studies 220 or Film Studies 350 or consent of instructor.
Credit 3 units. A&S IQ: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Fall

FILM 3570 Quality Television and the Primetime Novel
Over the past four decades, the cultural status of television in the United States has been reconfigured and complicated with changes in industrial structures, audience formations, regulatory presumptions, and production techniques and strategies. This course examines these interrelated forces, particularly as they have fostered a set of programs and practices often hailed as Quality Television. The class will survey the institutional paradigms that gave rise to particular generations of programming celebrated as quality and analyze the systems of distinction and cultural value that make the label socially and industrially salient. We will critically investigate the role of audiences and the conceptions of viewer choice at play in these developments. In addition, the course will analyze the textual features that have come to signify narrative complexity and aesthetic sophistication. We will examine foundational historical examples of this phenomenon from The Mary Tyler Moore Show to Hill Street Blues and Cagney & Lacey to Northern Exposure as well as more contemporary broadcast and cable fiction such as LOST, The Wire, and Mad Men. In addition, students will be expected to watch a complete series, chosen in consultation with the instructor, as part of their final research project. REQUIRED SCREENING. Prerequisite: Film Studies 220 or Film Studies 350 or consent of instructor.

FILM 3580 Combat Movie Music and Sound After Vietnam
This course considers the Hollywood combat movie genre after the Vietnam War (post 1975) by listening closely to how these always noisy films use music and sound effects to tell stories of American manhood and militarism. Centering on an elite group of prestige films--actions movies with a message for adult audiences--the course examines thirty-five years of Hollywood representations of World War II, the Vietnam War, the Gulf War, and post-9/11 wars against terrorism. Close analysis of how combat film directors and composers have used music and sound in conjunction with the cinematic image will be set within a larger context of ancillary texts (source materials, soundtrack recordings, published and unpublished scripts), media folios (press kits, reviews, editorials, newspaper and magazine stories and interviews), and scholarly writing from across the disciplines. Films to be screened include Apocalypse Now, Platoon, Hamburger Hill, Courage Under Fire, Saving Private Ryan, The Thin Red Line, We Were Soldiers, Flags of our Fathers, The Hurt Locker, and Act of Valor, as well as pre-1975 combat films starring John Wayne. The ability to read music is not required. Required Screenings. Prequisites: None
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

FILM 3590 The American Musical Film
Film musicals were crucial to the success of the American film industry from the dawn of sound film in the late 1920s to the demise of the studio system in the late 1950s. This course examines the American film musical from a variety of aesthetic, critical, and historical perspectives, with particular attention to how the genre interacted with popular music and dance and the major political and social trends of the Thirties, Forties, and Fifties. REQUIRED SCREENING: [day, time].

Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

FILM 3600 The History of the Film Score
This course looks at the role of music in Hollywood films from the beginning of the sound era to the present. Larger themes include the importance of technology, industry structures shaping the nature of scores, notable film music composers, the relationship between music, gender and genre, music's role in the adaptation of literary texts to film, the power of directors to shape the content of film scores, and the importance of popular music as a driving economic and aesthetic force in film music history. Films to be screened include From Here to Eternity, Stagecoach, High Noon, The Night of the Hunter, Butch Cassidy and the Sundance Kid, Born on the Fourth of July, Casino, Jarhead and The Social Network. Required Screenings
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

FILM 3610 Film Sound
Although film critics and theorists tend to think of cinema as a visual art, this shorthand description of the medium overlooks the importance of film sound in cinematic storytelling. This course is intended to provide a general overview of the way in which film theorists have treated the issue of sound in the cinema. Among the issues addressed in the course are: the contribution sound technology and practice makes to film form; the various possible formal relationships between sound and image; the effects of sound technologies on notions of realism and verisimilitude; the importance of sound to particular genres, like the horror film; and lastly, the role of sound in film spectatorship. The course will also showcase the work of the most important sound stylists in film history, such as Fritz Lang, Orson Welles, Alfred Hitchcock, Robert Altman, and David Lynch. Required screenings.
Credit 3 units.
Typical periods offered: Spring

FILM 3620 Film Producing
Today, more than at any time in our history, our lives are being impacted by a steady diet of images fed to us through the electronic media. This course will examine all types of film in order to better understand how images are captured and manufactured and how they are used to influence our thoughts and feelings. Students who have already taken Drama 475 may not enroll in this course. Students must enroll for this course at the Performing Arts Department Office. Lab, materials fee: $20.00.
Credit 3 units.

FILM 3630 Video Post-Production
While post-production of the soundtrack has been around for years, post-production of the visual track has increasingly become a major phase in the video and movie-making process. It often allows filmmakers to enhance existing footage with potentially dazzling results. As in all our production courses, we will be concerned with developing strong content. The focus is not on special effects per se, but rather on how they may be used to enhance the message. Students find a non-profit organization of vital importance in need of exposure and produce a Public Service Announcement to be broadcast. Key post-production software like Commotion, AfterEffects and Motion are explored throughout the semester. Prereq: Film 230 (Moving Images and Sound) or consent of instructor. 3 units.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

FILM 3651 Women in American Media Culture
In this class we will critically examine and evaluate the cultural construction and representation of women, femininity, and feminism in contemporary American mass media and trace their development throughout the 20th century. We will focus on a variety of mass-produced commercial media texts, surveying radio, television, magazines, advertising, and popular music. Although gender is the primary identity construction examined in this course, we will also pay close attention to other aspects of identity defining American women, such as ethnicity, class, and sexuality. We will investigate representational issues in relation to their political repercussions, and draw from a broad range of academic literature, including feminist television criticism, film theory, cultural studies, communication theory, and popular music criticism. Students will be responsible for weekly response papers and two critical essays.
Credit 3 units.

FILM 3660 Women and Film
The aim of this course is primarily to familiarize students with the work of prominent women directors over the course of the twentieth century, from commercial blockbusters to the radical avant-garde. Approaching the films in chronological order, we will consider the specific historical and cultural context of each filmmaker's work. In addition we will be discussing the films in relation to specific gender and feminist issues such as the status of women's film genres, representations of men and women on screen and the gender politics of film production. Required screenings.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

FILM 3680 Contemporary Women Directors
Despite recent media attention to the gender gap in Hollywood, women still account for less than 10% of all directors, and only five women have ever been nominated for the Best Director Oscar. However, these abysmal statistics do not reflect the reality that female directors are producing some of the most innovative and exciting films of the 21st century. This course is intended to provide a general overview of the remarkable contributions of women directors to contemporary cinema (1990 to present). First, we will turn our attention to women in the commercial industry, examining topics such as female authorship, popular genres, and the gender politics of production cultures in Hollywood. Then, we will survey women directors working outside of the system in documentary, independent, and experimental filmmaking modes. Finally, we will adopt a transnational perspective to investigate the contributions of women directors to world cinema, contextualizing the films of women cinéastes from countries such as Hong Kong, Argentina, and Iran in relation to their national cinemas and international film festival networks. In addition, we will discuss the films of women directors in terms of feminist and gender issues and as texts that clarify critical issues in film analysis, interpretation, and criticism. Required screenings.

FILM 3700 American Horrors
Horror movies. Fright films. Scream marathons. Blood and gore fests. Why should we want to look at movies that aim to frighten us? What is the attraction of repulsion? Is there an aesthetics of ugliness? Except for some early prestige literary adaptations like Dr. Jekyll and Mr. Hyde, the horror film began as a low class genre, a notch above exploitation movies. In the 1970s-1980s, it became the dominant commercial genre by offering increasingly graphic images of violence and mayhem. The horror film had arrived: lavish budgets, big stars, and dazzling special effects in mainstream major studio films competed with low-budget, no frills productions that helped establish artistically ambitious and quirky filmmakers like George Romero and David Cronenberg. By

a chronological survey of the American horror film, this course will explore how differing notions of what is terrifying reflect changing cultural values and norms. Throughout, we will consider the difficult questions raised by horror's simple aim of scaring its audience. In addition to weekly screenings, work for the course will include analytical and theoretical essays on the horror film. Written analyses of films with a close attention to visual style will be required. Prerequisite: Film 220. Required screenings.

Typical periods offered: Fall

FILM 3710 Making War
This course examines the cinematic representation of war. Using World War Two as a case study, students will examine a series of combat pictures, documentaries, and home front films from the 1940s to the present. Several key questions will guide the class discussion: How do war films respond to and shape the political worlds in which they are produced? How do these films confront the aftermath of war and the soldier's homecoming? Where is the line between the home front and the front line? More broadly, what does it mean to portray the violence and suffering that war inevitably brings? At the close of the semester, students will partake in an in-class symposium presenting their research on the cinematic treatment of other conflicts, from the Civil War to the War on Terror. Films include: The Boat, Saving Private Ryan, The Thin Red Line, Why We Fight, and Mrs. Miniver. Readings will include works by Susan Sontag, Kaja Silverman, and W.G. Sebald. Required screenings.

Typical periods offered: Fall

FILM 3750 Screening the Holocaust
The course will survey ways in which the story of the Holocaust is conveyed through film. Focusing on the individual and aesthetic pleasure, modern Western film seem to be an inappropriate genre to depict the German mass murdering of six million Jews. But since the broadcasting of the NBC series Holocaust in 1975, feature films have replaced documentaries and historiographies in educating the public about the traumas of the unprecedented genocide. With the continuing impact of the Holocaust on Jewish, American, and German identity and politics, Holocaust films are more scrutinized than any other genre. We will examine these aesthetic and philosophical controversies as well as the narrative and editing strategies filmmakers use to relate collective history and individual trauma. Special attention will be given to the complex cinematographic perspectives on human agency in a world of bureaucratically administered killing. In the course, we will try to close the gap between reading film theory and watching a Holocaust movie: we will analyze the properties of cinematic language, reconstruct the sociohistorical and psychological formation of memory and imagination, and even question our own evaluation of a film. Screenings include Shoah, The Wannsee Conference, Europa, Europa, Enemies, a Love Story, Jakob the Liar, Schindler's List, and Life Is Beautiful. Required screenings.
Credit 3 units. BU: BA

FILM 3760 French New Wave
French cinema from 1958-1968 offered La Nouvelle Vague or The New Wave, one of the most innovative, influential, and critically discussed movements in film history. The New Wave marked a major turning point in the relationship between film, thought, and politics in France, as well as a unique bridge between art cinema and pop-culture. Speaking for more than just the youth generation of its own country, it had a major influence on new approaches in subsequent European, American and Asian cinemas. This course offers a detailed look at the social values, artistic motivations, and aesthetic experiments embodied in the French New Wave through the films of Jean-Luc Godard, Agnès Varda, François Truffaut, Alain Resnais, Claude Chabrol, Eric Rohmer, and others, positioning their work within the larger social, political, and cultural environment of this period. As many of these directors collaborated as filmmakers and also were active as film critics and theorists, this class provides a unique insight into the overlapping between visual theory and practice, film and other media, culture and society. Weekly screening required.

FILM 3780 Topics in American Culture Studies: The History of Popular Culture in the United States
Credit 3 units.

FILM 3800 Taboo: Boundary and Transgression in American Cinema
Almost from the first public exhibition of motion pictures in the United States, concerns were expressed about the content of film. Denied the First Amendment protection of free speech by a 1915 Supreme Court decision, movies were repeatedly subject to various attempts at regulating content by government at federal, state and even municipal levels. Trying to stave off government control, Hollywood would eventually institute forms of self-regulation, first in the formation of the Production Code Administration and subsequently in the Ratings system. Control of content in American movies may be seen as paternalistic, a top-down attempt to impose moral norms and standards of behavior on a diverse audience. But it also reflects changing standards of acceptable public discourse, most particularly with regard to violence, sexuality, and race. That topics once barred from dramatic representation by the Production Code - miscegenation, non-normative sexuality and lower forms of sexuality, abortion, drug addiction - could eventually find a place in American movies speaks to changes in the culture at large. In trying to understand these cultural changes, this course will explore films that challenged taboos, films from the early teens that brought on the first attempts to control film content to films released under the Ratings system, which has exerted subtler forms of control over content. Required Screenings.

This course is for study abroad credits.
Credit 12 units.

FILM 3996 Film and Media Studies Elective: 300-Level
Credit 3 units. EN: H

FILM 4040 Cultural Analysis of Social Media Algorithms
Social media platforms like TikTok, X (previously Twitter), and Facebook use algorithms-a set of programmed rules that determine what, when, and how viewers engage with media online-to bolster profits, optimize the user experience, distinguish themselves from the competition, among other reasons. A quick search of the term algorithm on most search engines yields results as far reaching as 'how to' tutorials on Tik Tok's For You Page, guides on coding for beginners, and everything in between. Further, while most platforms' algorithms are proprietary and 'black boxed', the ways that we as users think about and perceive of them shapes at least a few things: (i) the content we get online; (ii) our relationship with technology, more broadly; and (iii) our politics and views that become emboldened and/or challenged online. This class will take up a cultural and media studies approach to algorithms to ask: what social, political, and economic factors influence the way that people engage with technology, and algorithms specifically? How do users differently respond to algorithms and what do those differences tell us about the changing relationship between users and technology? What is the relationship between polarization and online

personalization and how can media studies intervene in this area? Students will gain a better understanding of personalization algorithms and how culture intersects with the undercurrents of any technology, past, present, and future.
Credit 3 units. A&S IQ: HUM BU: HUM
Typical periods offered: Fall, Spring

FILM 4060 Media Fandom
This course explores the diverse ways individuals engage with, transform, and resist media texts through fandom. Students will examine the evolution of media fandom discourse and fan studies, tracing its development from early work on gender and sexuality to contemporary research addressing race, nationality, and transcultural fandoms. The course investigates the unique practices of a range of fan communities, including cult, mainstream, and genre-specific fandoms. Key topics include transformative works, the dynamics of industry-fan relationships, gatekeeping within fan communities, and the effects of fan activism. Assignments emphasize the development and application of ethical fan studies research practices. Through readings, case studies, and analysis of fan-created content, students will gain a deeper understanding of media fandom as a site of cultural production, negotiation, and identity formation.
Credit 3 units. A&S IQ: HUM BU: HUM

FILM 4190 Theories of Mass Media
This course explores theories of the mass media with an emphasis on television as well as its convergences with other media and computer technologies. It starts by examining theories that posit the media as instruments of societal maintenance or transformation and then examines the ways in which various theorists have refined or rejected elements of these theories in a quest for both specificity and complexity. In particular, the course examines media and cultural studies' attempts to synthesize critical paradigms ranging from political economy to semiotics to feminism. The course concludes with an examination of the challenges and opportunities posed to theorizations of the mass media by contemporary circumstances such as media conglomeration, niche marketing and micro-casting, and global flows of information, capital, and people. Required screenings.
Credit 3 units. A&S IQ: HUM BU: BA, HUM EN: H
Typical periods offered: Fall

FILM 4200 Film Theory
This course is an introduction to both classical and contemporary film theory. Beginning with the earliest attempts to treat cinema as a new and unique art form, the course will initially review the various ways in which film theory attempted to define cinema in terms of its most essential properties. The course will then examine more contemporary developments within film theory, more specifically its attempt to incorporate the insights of other critical and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory, and postmodernism. Throughout the course, we will consider questions regarding the ontology of cinema, its relation to spectators, and the various ways in which its formal properties create meaning. Readings for the course will include the major works of Sergei Eisenstein, Andre Bazin, Christian Metz, Laura Mulvey, and Fredric Jameson. Required screenings.
Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

FILM 4210 Film Historiography
This course is a seminar on the writing of film history for advanced students. Through an engagement with the historiographical writings of scholars, such as Dominic LaCapra, Hayden White, and Michel Foucault, students will gain an understanding of various genres of film historical writing, an appreciation for the kinds of research that film historians do, and a familiarity with the ways in which film historians delimit their field of study, form research questions, and develop hypotheses. In addition to reading and classroom discussions, students will be expected to write a fairly lengthy paper (17-20 pages) that involves original historical research and the close examination of trade press, professional journals, fan magazines, and news articles. As preparatory assignments leading up to the final project, students will also prepare project descriptions, bibliographies, and outlines that will be shared and discussed in a workshop format.

FILM 4220 Film Stardom, Performance, and Fan Culture
This course focuses the Hollywood star system. We will explore stars in relation to celebrity and consumerism, especially how stardom is created by a system that seeks to create effects in film viewers whether conceived as audiences, fans, or spectators. We will examine the performance element of stardom and its relationship to genre, style, and changing film technology. Also of concern will be how stars and the discursive construction of stardom intersect with gender representation, race, ideology, sexuality, age, disability, nationality, and other points of theoretical interest to and historical inquiry in contemporary film studies. While emphasis will be placed on mainstream commercial U.S. cinema, students are encouraged to pursue questions beyond this framework within their own research. REQUIRED SCREENING: [day, time].
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Fall, Spring

FILM 4230 Histories of Media Convergence
Entertainment and communications forms combine and blend, and they have done so across millennia. However, the phenomenon of media convergence has taken on a special salience over the last one-and-a-half-centuries, as exemplified by the growing intermixture of film, radio, television, gaming, and the internet. In particular, critics, consumers, politicians, and producers used convergence as structuring principle in understanding, regulating, and planning for the future of media culture. This course engages with contemporary worries and enthusiasms about convergence by considering the specific conditions in which the phenomenon has been understood and practiced. Tracing a historical arc though the Twentieth Century, we will first examine convergences of radio and film, film and music publishing, television and film exhibition, and disparate corporate entities as basis for understanding more recent media combinations. Building on that foundation, the majority of the course will consist of case studies of media convergence since 1980, considering it in terms of industry, technology, regulation, and audiences. These case studies

will also provide students with a survey of and inquiry into questions of historiographic theory and method. Note: This course satisfies the history & historiography requirement for the FMS Graduate Certificate. Required Screenings.

FILM 4240 Broadcasting Equality: Radio, Television, and Social Change in Postwar America
The period between World War II and the 1970s was one of profound cultural, political, and demographic shifts that brought the problems of ethno-religious and racial prejudice to the forefront of U.S. national consciousness. Religious leaders, secular social activists, media industry professionals, and African American civil rights leaders often worked together to combat intolerance, bigotry, and inequality. What did these activists achieve in their attempts to deploy U.S. broadcast media in what they sometimes referred to as propaganda against prejudice? How did this activism relate to the institutions of broadcast media, including governmental agencies, national networks and local broadcasters? What was television and radio's impact on the Civil Rights Movement of the 1950s and 1960s? In addressing these questions, we will consider a wide range of media: public service programming as well as commercially produced series, specials, network news and documentaries produced between the 1940s and the 1970s. Programs considered will include A New World 'A Coming, Amos 'n Andy, ' American Bandstand, NBC White Papers: Sit In, Sanford and Son, Eyes on the Prize, and Soul Train, among many others. REQUIRED SCREENING

FILM 4250 Seminar in Video Games: Video Games, Gender and Sexuality
This seminar considers different topics that illuminate the relationship of video games to culture. Topics vary by semester. The course may have a variety of analytical frames: gender and sexuality, interactivity and reception, narrative and aesthetic theory, industrial or technological history. Prerequisite is graduate status or completion of a 300-level FMS or WGSS course and permission of the instructor. Credit 3 units. REQUIRED LAB/SCREENING TIME weekly.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

FILM 4260 Media Archives: Political and Technological Interventions
Media archives structure our knowledge of film and TV's past. They help determine what survives of today's media productions into the future. While that gatekeeping work might seem opaque from the outside, an array of archivists and curators, both professional and amateur, are reevaluating what gets saved to make the historical record more inclusive and complete. This course will introduce you to the debates and new technologies that are transforming moving image archiving. It mixes readings and discussions of scholarly works and professional white papers with hands-on activities to show how the seemingly apolitical labor of archivists, like cataloging and reference, reflects ideologies of professionalism, gender, class, and race. While introducing you to the current best practices in digitizing media for long-term preservation, it will also ask you to analyze how those professional standards came into being. This class is made possible by WashU Libraries Film & Media Archive's (FMA) collections and legacy technologies, as well as its staff's time and expertise. As such, we will focus on areas of moving image archiving that the FMA specializes in including nontheatrical film, the 16mm film format, social justice documentaries, and Black media production. In this course, you will gain: a knowledge of archival practices an introduction to the concepts of archival power and efforts to democratize the preservation of our shared cultural heritage an overview of moving image archiving profession including the range of institutions, collections, and jobs in the field an understanding of legacy media formats and playback technologies hands-on experience repairing and digitizing film and video and an introduction to digital preservation strategies and open-source tools

Typical periods offered: Spring

FILM 4283 Nationalism and Public Fantasy in Bollywood Cinema
Nationalism, Benedict Anderson has famously argued, can best be understood by aligning it alongside the large cultural systems that preceded it--out of which, as well as against which, it came into being. Using India as a case study, we will examine the extent to which popular Hindi film exerted, diverted, and contorted the many impulses toward nationalism preying upon the purveyed by the country that annually produces the most films in the world. Within months of the cinematograph's debut, the Lumiere brothers' invention arrived in Bombay in 1896 inaugurating an ongoing romance between film and India, one that saw the rise of the anti-colonial movement, the nationalist movement, Independence, Partition, and the almost daily recreation of modern India, that place that Salman Rushdie has called 'a broken creature spilling pieces of itself into the street.' In a country where full literacy is still a distant dream, we will examine the extent to which popular film is Anderson's 'cultural system' par excellence that deploys and addresses the social, cultural, and political myths of the modern nation. Focusing on Hindi blockbusters largely from the Golden Fifties, the Angry Seventies, and the Saccharine Nineties, we will explore how Bollywood movies construct and critique the grand narratives of Indian nationalism; ask what fantasies and illusions they elicit and project; and interrogate their relationship to India's preoccupations with its emerging modernity. In addition to scheduled class times, students will be expected to attend screenings on Wednesdays from 4:00 pm to 8:00 pm.
Credit 3 units.

FILM 4290 Mass Culture and Modern Media: Fantasylands: Cinema, Spectatorship, and the Spatial Imagination
This course provides an introduction to cultural theories that are pertinent to the study of cinema, mass culture, and modernity. Rotating topics will highlight different aspects of cinema's relationship to popular culture, urbanism, modern technology, capitalism, and mass media. Students will encounter key theorists for understanding modern life and subjectivity, such as Marx, Freud, Foucault, Benjamin, and Raymond Williams. In addition, the course introduces core readings in the history and cultural theory of early cinema, which may include work by Miriam Hansen, Anne Friedberg, Tom Gunning, Charles Musser, Giuliana Bruno, Jacqueline Stewart, and others. Topics may include cinema and modernity, cinema and mass culture, cinema and leisure, cinema and urbanism, and cinema and consumer culture.

Typical periods offered: Fall, Spring

FILM 4302 Clown Princes
Dying is easy, comedy is hard, runs an old theatrical adage. Nevertheless, some of the most popular actors in American film have chosen the hard path by typecasting themselves in comedy, playing repeated variations on the same character. Comedian comedy, representing films that showcase the distinctive skills of great clown-actors, is the central concern of this course. We will analyze how individual comedians rework performance traditions through the distinctive concerns of their time and culture to create idiosyncratic comic personae. We will look at films starring Charles Chaplin, Buster

Keaton, Harold Lloyd, Laurel and Hardy, the Marx Brothers, Jack Benny, Peter Sellers, Jim Carey and Eddie Murphy. Work for the course will require reading in comic theory and analytical essays. Required screenings.

Typical periods offered: Spring

FILM 4310 Renegades and Radicals: The Japanese New Wave
In 1960, the major studio Shochiku promoted a new crop of directors as the Japanese New Wave in response to declining theater attendance, a booming youth culture, and the international success of the French Nouvelle Vague. This course provides an introduction to those iconoclastic filmmakers, who went on to break with major studios and revolutionize oppositional filmmaking in Japan. We will analyze the challenging politics and aesthetics of these confrontational films for what they tell us about Japan's modern history and cinema. The films provoke as well as entertain, providing trenchant (sometimes absurd) commentaries on postwar Japanese society and its transformations. Themes include: the legacy of WWII and Japanese imperialism; the student movement; juvenile delinquency; sexual liberation; and Tokyo subcultures. Directors include: Oshima Nagisa, Shinoda Masahiro, Terayama Shuji, Masumura Yasuzo, Suzuki Seijun, Matsumoto Toshio, and others. No knowledge of Japanese necessary. Credit 3 units. Mandatory weekly screening:
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

FILM 4320 Global Art Cinema
How do art films tell stories? The dominant storytelling genre of the contemporary festival circuit, the art film has since World War Two combined realist and modernist impulses. Influenced by Italian neorealism, art films grant priority to characters from working class, sexual, and other exploited and imperiled minorities. Drawing on the fine arts, literature and music, art films also experiment with modernist themes and formal principles, such as subjectivity, duration, serial structure, denotative ambiguity and reflexivity. This course explores art cinema from a variety of national contexts, analyzing storytelling techniques and themes that challenge the economical and diverting forms associated with mainstream commercial filmmaking. Required Screenings.

FILM 4430 Memory, Tears, and Longing: East Asian Melodrama Film
Excessive emotion, unreasonable sacrifice, hidden truth, untimely knowledge, and forbidden desire-the power of melodrama and its moving representations have fueled the popularity of hundreds, if not thousands, of books, plays, and films. Melodrama has variously been defined as a genre, a logic, an affect, and a mode, applied to diverse media, divergent cultural traditions, and different historical contexts. The course provides a survey of East Asian melodrama films-as well as films that challenge conventional definitions of melodrama-by pairing Japanese, Korean, and Chinese-language productions with key critical texts in melodrama studies. We will see classics such as Tokyo Story, Two Stage Sisters, and The Housemaid. We will examine melodrama's complex ties to modernity, tradition, and cultural transformation in East Asia; special emphasis will be placed on representations of the family, historical change, gender, and sexuality. In addition to historical background and film studies concepts, we will also consider a range of approaches for thinking about the aesthetics and politics of emotion. No prerequisites. No prior knowledge of East Asian culture or language necessary. Mandatory weekly scheduled screening.

Typical periods offered: Spring

FILM 4450 Horror in Japanese Media
Elements of the macabre and horrific have been present in Japanese culture and media since time immemorial. The 11th-century work The Tale of Genji, for example, features an elite lady's living ghost killing off her main rivals for the prince's affections. Tales of ghosts, demons, and the supernatural entities known as yokai continued to appear in collections of Buddhist didactic and folktale literature of the following centuries, finding renewed popularity in the 17th-19th centuries in the form of kaidan or strange tales which were enjoyed as printed works, parlor games, and stage plays. Some of the very first films made at the turn of the 20th century in Japan were about the popular ghosts of yore. Building on this long legacy of fearsome creatures in popular media of times now past, this course will consider selections of Japanese horror media (film, literature, anime, manga, and video games) from the mid-20th to early 21st centuries, highlighting the intertextuality that different media within the horror genre has and how the horror genre itself even bleeds into other genres. Analyzing major figures and themes in each work, this course will explore how Japanese horror -the strange realm home to ghosts with a grudge, misunderstood monsters, and merciless murderers-can function not only as thrilling entertainment but can also reflect Japanese societal and cultural anxieties present in the real world, ranging from the problems that technology may create in a changing world to the threats posed by shifts in traditional family dynamics. Although this course will focus on horror media in the Japanese context, understanding how horror can function to highlight such anxieties will prepare students to consider the deeper possibilities of horror media in their own respective cultural contexts. All readings will be in English, and visual media will be in Japanese with English subtitles. Required Screenings

Typical periods offered: Spring

FILM 4460 The Israeli-Palestinian Conflict Through Cinema
The Israeli-Palestinian conflict is often considered the longest-running national conflict in the world. The dispute, which started in the early 20th century, attracts much attention more than a hundred year later, stirring intense passions and generating controversial headlines. This course explores the Israeli-Palestinian conflict though Palestinian and Israeli cinema. We examine the ways in which cinema depicts the conflict in the Middle East, starting from the British Mandate to the present day. Adopting a relational history reading, the course examines the treatment, the influences, and the representation of major historical and political events in the region - Israeli independence/Palestinian Nakba (1948), the Six-Day War/Arab Naksa (1967), the Yum Kippur war (1973), the Lebanon War I (1982), the Palestinian uprising Intifada I (1987), the Oslo accords (1993), Intifada II (2000) - in both Israeli and Palestinian films. The course examines the social and historical processes which shape Palestinian and Israeli cinematic narratives, self-representation, the representation of the Other, the relationship to the

land, diaspora, national narratives, collective memory, and trauma. This course offers a dialectical cinematic and historic journey from national films to transnational modernist and experimental films, from the collective to the individual, and from hope to despair. Required Screenings:

FILM 4500 American Film Genres
By close examination of three or four specific types of film narratives, this course will explore how genre has functioned in the Hollywood mode of production. Students will gain an understanding of genre both as a critical construct as well as a form created by practical economic concerns, a means of creating extratextual communication between film artist/producers and audience/consumers. Genres for study will be chosen from the western, the gangster film, the horror movie, the musical, screwball comedy, science fiction, the family melodrama, the woman's film, and others. In addition to film showings, there will be readings in genre theory as well as genre analyses of individual films. Required screenings
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

FILM 4510 American Television Genres
Questions of genre are central to any exploration of television's texts, whether they are being analyzed as craft, commerce, or cultural phenomenon. Genre has been used by critics and historians to ascribe social functions to groups of programs and to diagnose cultural preoccupations, while genre has been used industrially to manage expectations among audiences, advertisers, programmers, producers, and creative professionals. Investigating genres ranging from the soap opera to the western, workplace situation comedies to sports, and game shows to cop shows, this course will explore the role of genre in the production, distribution, and reception of American television. Students will gain a critical understanding of genre theory and key arguments about the form and function of television texts and will develop a set of tools for analysis of televisual narrative and style, the social uses and meanings of genre, the institutional practices and presumptions of the American television industry, and the persistence of textual forms and audience formations in the face of structural changes such as deregulation, media convergence, and globalization. Required Screenings.
Credit 3 units. A&S IQ: HUM BU: BA, HUM EN: H

Typical periods offered: Fall

FILM 4540 American Film Melodrama and the Gothic
American film melodrama has been considered both the genre of suffering protagonists, incredible coincidences, and weeping spectators as well as a mode of action, suspense, and in-the-nick-of-time rescues. In this course, we will examine American film melodrama as a dialectic of sentiment and sensation which draws heavily on Gothic tropes of terror, live burial, and haunted internal states. We will trace the origins of film melodrama and the cinematic Gothic to their literary antecedents, the horrors of the French Revolution, and classical and sensational stage melodramas of the nineteenth century. In addition to the 1940s Gothic woman's film cycle, we will excavate the Gothic in the maternal melodrama, the suspense thriller, film noir, domestic melodrama, the slasher film, and the supernatural horror film. Required screenings.

FILM 4550 History and Cinema
Credit 3 units.

FILM 4560 Soundtrack Studies: Music, Voices, Noise
This course considers the interaction of film, sound, and music from the silent era to the present by screening representative films from around the world and exploring current directions in scholarship from the disciplines of film studies and musicology. Topics to be discussed include: historical and critical understandings of the sound track, major film sound theorists (such as Michel Chion), technological shifts (such as synchronized sound, Dolby, and digital surround sound), the uses of Richard Wagner (both his music and his ideas), the relationship between a film genre (noir) and sound and music and the relationship between a musical genre (opera) and film, and the juxtaposition of popular and classical, Western and non-Western musical styles in art cinema. Films to be screened include Meek's Cutoff, Blow Out, Days of Heaven, Sous le toits de Paris, Love Me Tonight, Casablanca, Alien, Apocalypse Now, La cérémonie, Le Cercle rouge, The Pillow Book, The Scent of Green Papaya, and The Bourne Ultimatum. The course is in seminar format. Readings from recent scholarly work on film sound and music will inform class discussions of the films to be screened. Close analysis of how music, sound, and image interact in film making and the film experience lies at the heart of the course. The ability to read music is not required. A primary goal of the course will be the development of specific listening skills that are useful when working in this area. Targeted writing assignments will ask students to write about film sound and music from a variety of critical and historical perspectives. Pre-requisites: graduate status or completion of The History of the Film Score (FMS 360 / AMCS 360 / MUS 328) and permission of the instructor. REQUIRED SCREENING:
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

FILM 4570 From Vitaphone to Youtube: Popular Music and the Moving Image
This course considers American popular music as represented in audiovisual media from 1926 to the present. The relationship between the popular music industry (a commercial sphere oriented primarily towards the selling of sheet music and audio recordings) and audiovisual technologies (various screens and formats encountered in changing social and commercial contexts) will be explored along

two complementary tracks: popular music performers as presented in performance-centered media and popular music as a narrative topic or resource in feature films. Three related analytical frames will shape our discussions: industrial and technological history (the material conditions for the making and distribution of popular music and moving images) the question of liveness in recorded audiovisual media aesthetics of various popular music styles as translated into audiovisual forms and contexts The course is in seminar format. The ability to read music is not required but students with music reading or transcription skills will be encouraged to draw upon these tools. Pre-requisites: graduate status or completion of a 300-level FMS or Music course and permission of the instructor

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall, Spring

FILM 4580 Major Film Directors

What does the film director do? In the earliest movies, film directors modeled themselves on their theatrical counterparts: they chiefly focused on how to stage an action in a confined space for a stationary camera that represented an ideal member of the audience. As the camera began to be used to direct audience attention, first through cutting, then through actual movement, the film director evolved from a stager of events to a narrator. By analyzing the work of one or more major film directors, this course will explore the art of film direction. We will learn how film directors may use the camera to narrate a scene, to provide their own distinctive view of the actions playing out on the movie screen. May be repeated for credit with permission of the instructor. REQUIRED SCREENING: [day, time].

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall, Spring

FILM 4600 Taboo: Contesting Race, Sexuality and Violence in American Cinema

Pushing the envelope or going too far? What is the boundary between films that challenge us and films that offend us? This is a course about films that crossed that boundary, most often by presenting images of race, sexuality and violence, images that could attract audiences as much as they offended moral guardians and courted legal sanctions. Because they were denied the First Amendment protection of free speech by a 1915 Supreme Court decision, movies more than any prior art form were repeatedly subject to various attempts at regulating content by government at federal, state, and even municipal levels. Trying to stave off government control, Hollywood instituted forms of self-regulation, first in a rigid regime of censorship and subsequently in the Ratings system still in use. Because taboo content often means commercial success, Hollywood could nonetheless produce films that pushed the envelope and occasionally crossed over into more transgressive territory. While control of content is a top-down attempt to impose moral norms and standards of behavior on a diverse audience, it also reflects changing standards of acceptable public discourse. That topics once barred from dramatic representation by the Production Code - miscegenation, homosexuality and lower forms of sexuality, abortion, drug addiction - could eventually find a place in American movies speaks to changes in the culture at large. In trying to understand these cultural changes, this course will explore films that challenged taboos, defied censorship, and caused outrage, ranging from films in the early 20th Century that brought on the first attempts to control film content through to films released under the Ratings system, which has exerted subtler forms of control. REQUIRED SCREENING:

Typical periods offered: Fall

FILM 4650 Theory and Practice of Experimental Film

Filmmaker Stan Brakhage famously wrote the following: Imagine an eye unruled by man-made laws of perspective, an eye unprejudiced by compositional logic, an eye which does not respond to the name of everything but which must know each object encountered in life through an adventure of perception. In this course, we will embark upon our own adventures of perception, examining and producing works of art that challenge our preconceptions of what cinema is or can be. From city symphonies to pop collages, portraiture to handcrafted animation, and ethnography to gender studies, we will explore the multifaceted and transformative avant-garde cinema through the work of its greatest practitioners, contextualize films in relation to aesthetic aspirations (e.g., formalism, opposition, reflexivity, transcendence) and movements in art and cultural theory (e.g., Dadaism, Abstract Expressionism, Pop, Performance Art, Minimalism), and acquire the digital production skills needed to make our own experimental videos. Each week, we will mix the classic with the contemporary to demonstrate the ongoing vitality of -- and make our own contributions to -- this often misunderstood cinematic tradition. Required screenings.

Typical periods offered: Fall

FILM 4750 Screening the Holocaust

This course surveys the history of Holocaust representation on film, examining a wide range of documentary and fictional works from 1945 to the present day. Discussions will consider a number of key questions, including: What challenges does the Holocaust pose to cinematic representation, and how have filmmakers grappled with them? How have directors worked within and against notions of the Holocaust as unrepresentable, and how have they confronted the challenge of its association with a limited set of highly iconic images? What are the more general ethical and political dimensions of representing the Holocaust onscreen -- its victims as well as its perpetrators, the systematic genocidal violence that characterized it, and the sheer absence of so many dead? We will also probe the changing significance of cinematic representation of the Holocaust, exploring the medium's increasingly memorial function for audiences ever further removed from the historical moment of its occurrence. Screenings may include The Last Stage; Distant Journey; Night and Fog; Judgment at Nuremberg; Shoah; Europa, Europa; Schindler's List; Train of Life; The Specialist; Photographer; A Film Unfinished. Critical readings by figures such as Giorgio Agamben, Jean Amery, Shoshana Felman, Geoffrey Hartman, Marianne Hirsch, Sidra Israhi, Dominick LaCapra, Alison Landsberg, Berel Lang, Michael Rothberg, and James Young. Required screenings

FILM 4780 Topics in Transmedia Franchises

This variable topics course for advanced undergraduate and graduate students is an interdisciplinary seminar on transmedia franchises. In particular, it is recommended for those seeking to understand transmedia storytelling as an artistic, industrial, and cultural practice. As such, this course will bring into conversation various methodologies and perspectives, including film and media scholarship as well as other fields of study in the humanities and social sciences. The goal of this interdisciplinary approach is to illuminate how transmedia franchises have developed since the early 20th century to become the dominant product of the American -- and, increasingly, global -- cultural industries. Foci of this course may include such topics as individual franchises; global transmedia history; the franchise strategies of individual cultural industries (e.g., the Japanese media mix); or representation within franchise texts, production cultures, and fan communities. This course serves as a capstone for Film & Media Studies majors. Weekly or bi-weekly screenings or hands-on media labs are required.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Spring

FILM 4790 Seminar In Interdisciplinary Approaches to Culture and Film

This variable topics course is an interdisciplinary seminar on film/media designed for advanced undergraduate and graduate students. In particular, it is recommended for those seeking to understand film/media as a lived experience that takes place within cultural frameworks. As such, this course will bring into conversation various methodologies and perspectives, including film/media scholarship, as well as ones drawn from other fields of study in the humanities, sciences, or social sciences. The goal of this interdisciplinary approach is to illuminate how film/media both elicits and represents human response. The foci of this course may include such topics as violence and film/media, the body and film/media, the cognitive impact of film/media viewing, the relationship of environment to experiencing film/media, or the relationship of culturally specific events or trends to film/media production and reception. This course serves as a capstone for Film & Media Studies majors. Weekly or biweekly screenings or hands-on media labs required.

FILM 4850 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000

This seminar examines film and modern art within the framework of Orientalism Reading foundational texts by Said, and incorporating theory and historical discourse concerned with race, nationalism, and colonialism, we explore artistic practice in European photography, painting, and decorative arts from 1850 to recent times and European and Hollywood Film. We study how power and desire have been inscribed in Western visual culture across the bodies of nations and peoples through conventions such as the harem, the odalisque, the desert, and the mysteries of ancient Egypt. To that end, we will look at artists such as Delacroix, Ingres, Gérôme, Beardsley, and Matisse and will screen films such as "The Sheik," "The Mummy," "Salome," "Cleopatra," "Pepe le Moko," "Naked Lunch," "Shanghai Gesture," "Thief of Bagdad," "Princess Tam Tam," and "The Sheltering Sky." Subjects include the representaion of gender, sexuality, desire, race, and identity as well as the cultural impact of stereotype and exotic spectacle. Students will study methods of visual analysis in film studies and art history. All students must attend film screenings.

Typical periods offered: Fall, Spring

Film and Media Studies Major

Program Requirements

- **Total Units Required:** 30
- **Grade Requirement:** A grade of C– or higher is required for a course to count toward the major.

Required Courses

Code	Title	Units
FILM 2220	Introduction to Film Studies	3
FILM 2250	Making Movies	3
or FILM 3520	Introduction to Screenwriting	
FILM 3300	History of American Cinema	3
FILM 3400	History of World Cinema	3
FILM 3500	History of Electronic Media	3
FILM 4200	Film Theory	3
Total Units		**18**

Elective Courses

In addition to these required courses, students must take 12 credits in advanced electives (3000 level or higher). All students must take one 3-credit elective that focuses on a national cinema other than that of the United States. In addition, all students must take one 3-credit critical studies elective at the 4000 level or above. A 4000-level elective in a national cinema may satisfy both of these elective requirements, but a total of 12 credits in electives is still required. Electives in critical studies may be drawn from courses on individual directors, specific genres, limited historical periods, individual crafts (e.g., acting), and so on. Students with an interest in production may count two production and/or screenwriting courses toward the major within these 12 elective credits.

Additional Information

A total of 6 Film & Media Studies–approved credits can be applied toward this program from study abroad work at the 3000 level or higher: 3 credits can be applied to the national cinema elective, and the other 3 credits would count toward the remaining 9 credits of advanced electives.

The program allows Film & Media Studies–approved transfer credits from other universities for advanced electives.

Senior Honors (FILM 4999) is intended for majors pursuing honors in Film and Media Studies. In order to enroll for this course, students must apply in advance for honors, possess a minimum cumulative grade point average of 3.65, and be approved by a faculty committee.

Film and Media Studies Major, Film and Media Production Specialization

Program Requirements

- **Total Units Required:** 36
- **Grade Requirement:** A grade of C- or higher is required for a course to count toward the major.

Required Courses

Code	Title	Units
FILM 2200	Introduction to Film Studies	3
FILM 2250	Making Movies	3
FILM 3300	History of American Cinema	3
FILM 3400	History of World Cinema	3
FILM 3500	History of Electronic Media	3
FILM 3520	Introduction of Screenwriting	3
FILM 4200	Film Theory	3
Total Units		**21**

Elective Courses

The specialization in film and media production provides majors in Film and Media Studies with the opportunity to enhance their skills in and knowledge of various forms of moving image media creative production. The student must also complete 15 credit units of electives consisting of the following:

1. One 3-credit critical studies course in a national or regional (non-U.S.) cinema at the 3000 or 4000 level (required of all majors)
2. One 3-credit critical studies course at the 4000 level (screenwriting or production does not count toward this requirement)
3. 9 units total credit or three 3-credit electives in digital or film production or screenwriting (3 credits may be for courses at the 2000 level or above; 6 credits must be for courses at the 3000 level or above)

Courses taken in overseas study are eligible to be used to satisfy the above C category for up to a total of 6 credit units with permission of the Film and Media Studies overseas advisor. Courses offered by another academic department or school at Washington University may be accepted in the above C category for up to 6 credit units with the prior permission of the student's Film and Media Studies advisor. A minimum of C- must be earned for any course to count toward the 36 credit units required for the film and media production specialization.

A total of 6 Film & Media Studies–approved units can be applied for credit toward this program from study abroad work. If the course was production-based, 3 units can be applied toward the production electives at the 2000 level or higher. If the course was not production-based, 3 units can be applied to the national cinema elective, and the other 3 units would count toward the remaining 12 units of advanced electives.

The program allows Film & Media Studies–approved transfer credits from other universities for advanced electives.

Additional Information

Senior Honors (FILM 4999) is intended for majors pursuing honors in Film and Media Studies. In order to enroll for this course, students must apply in advance for honors, possess a minimum cumulative grade point average of 3.65, and be approved by a faculty committee.

Film and Media Studies Minor

Program Requirements

- **Total Units Required:** 15
- **Grade Requirement:** A grade of C- or higher is required for a course to count toward the minor.

Required Courses

Code	Title	Units
FILM 2200	Introduction to Film Studies	3
FILM 3300	History of American Cinema	3
FILM 3400	History of World Cinema	3
FILM 3500	History of Electronic Media	3
Total Units		**12**

Elective Courses

In addition to the required courses, students must also take a 3-credit advanced elective course (3000 level or above) to complete the minor.

A total of 3 Film & Media Studies–approved units can be applied for credit toward this program from study abroad work at the 3000 level or higher, which will satisfy the advanced elective requirement.

The program allows Film & Media Studies–approved transfer credits from other universities for advanced electives.

Additional Information

Elective courses change every academic year, so please visit the Program in Film and Media Studies website for current course listings.

Internships and independent study do not count toward any Film and Media Studies minor.

Website:	https://fms.wustl.edu/

Global Film and Media Studies Minor

Program Requirements

- **Total Units Required:** 15
- **Grade Requirement:** A minimum grade of C- is required for all courses to count toward the minor; pass/no pass grades do not count toward the minor.

Required Courses

Code	Title	Units
FILM 2200	Introduction to Film Studies	3
FILM 3400	History of World Cinema	3
Total Units		**6**

Elective Courses

A. Two courses (3 credits each) at the 3000 or 4000 level dealing with national or regional cinemas, such as the following:

Code	Title	Units
FILM 3200	British Cinema: A History	3
FILM 3211	Contemporary Chinese Popular Culture	3
FILM 3250	French Film Culture	3
FILM 4300	Topics in Chinese Media Culture: China and the Screen: From the Early 20th Century to the Present	3
FILM 4310	Renegades and Radicals: The Japanese New Wave	3
FILM 4430	Memory, Tears, and Longing: East Asian Melodrama Film	3
FILM 4790	Seminar in Interdisciplinary Approaches to Culture and Film: (In)Visible Media: Connection and Crisis in Contemporary Japan	3
FILM 5430	Topics in Chinese Media Culture: Charting Identity in the Digital Age	3

B. One course (3 credits) at the 3000 level or higher that analyzes film or moving image media from different countries or parts of the world. Options in this category include the following:

Code	Title	Units
FILM 3190	Documentary Film and Media	3
FILM 3420	Introduction to Video Game Studies	3
FILM 3680	Contemporary Women Directors	3
FILM 4200	Film Theory	3
FILM 4230	Histories of Media Convergence	3
FILM 4320	Global Art Cinema	3
FILM 4430	Memory, Tears, and Longing: East Asian Melodrama Film	3
FILM 4650	Theory and Practice of Experimental Film	3
FILM 4780	Topics in Transmedia Franchises	3
FILM 5007	The 007 Saga: James Bond and the Modern Media Franchise	3

Note: With the permission of the director of undergraduate studies, one course (3 credits) on media/film taken in another department or program at the 3000 or 4000 level may count toward the global media studies minor. Students should consult with their Film and Media Studies advisor or the Film and Media Studies director of undergraduate studies before enrolling in a course offered outside of the program that they hope to count toward this minor.

A total of 6 Film & Media Studies–approved units can be applied for credit toward this program from study abroad work at the 3000 level or higher, which could satisfy the national cinema advanced elective requirements.

The program allows Film & Media Studies–approved transfer credits from other universities for advanced electives.

Additional Information

Elective courses change every academic year, so please visit the Program in Film and Media Studies website for current course listings.

A grade of C- or higher is required for a course to count toward the minor.

Internships and independent study do not count toward any Film and Media Studies minor.

Global Studies

Students in Global Studies develop a broad understanding of the world while exploring the diversity and richness of other cultures. The complex relationship between globalization and local differences is a hallmark of the contemporary era. Globalization increases the movement of people, goods, capital, technology, and ideas throughout the globe. At the same time, strong attachments to local languages, cultures, and societies remain. Global Studies students seek to understand globalization and the relationship between the global and the local.

The Global Studies major is unique, emphasizing the interdisciplinary study of the cultural, economic, ecological, historical, social, and political processes that contribute to interdependence or globalization. Global Studies courses span the humanities and social sciences, and they encourage both contemporary and historical points of view. In addition, Global Studies challenges students to master a modern language and to understand the cultural contexts in which the language is spoken. It encourages the exploration of contemporary foreign affairs through speakers, conferences, and faculty panels, and it provides an introduction to international careers. Global Studies also provides robust support for foreign study and independent research. Through this approach, students explore the effect of global and local factors on historical events, current affairs, and public policy. They develop analytical skills, cross-cultural awareness and sensitivity, proficiency in another language, and overall abilities to be productive and ethical global citizens.

There are six concentrations available to Global Studies majors: (1) Global Studies with a concentration in development; (2) Global Studies with a concentration in Eurasian Studies; (3) Global Studies with a concentration in European Studies; (4) Global Studies with a concentration in Global Asias; (5) Global Studies with a concentration in Global Cultural Studies; and (6) Global Studies with a concentration in International Affairs.

Minors

There are no minor programs in Global Studies.

Courses

GLOBAL 1102 First-Year Seminar: The Vietnam Wars
US-centric historical treatments of the Vietnam War tend to obscure the perspectives and lived experiences of Vietnamese and Southeast Asians. Equally problematic they tend to foster a historical interpretation that ignores the diversity of anti-colonial and anti-imperialist struggles and glosses over the wider regional dimensions of the war(s). To address these weaknesses, this course adopts a Vietnamese and Southeast Asian Studies approach. It highlights the belief systems, values, agency, and experiences of northern and southern Vietnamese, rural and urban Cambodians and Laotians,

and Thais. It analyzes anti-colonial regional networks, the rise of Indochinese nationalist and communist movements, wars for national liberation, processes of decolonization, the rise and fall of the Khmer Rouge, and memories and meanings of the Vietnam Wars for Southeast Asians. Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: BA, IS
Typical periods offered: Fall

GLOBAL 1103 First-Year Sem: Bridging London: An Interdisciplinary Exploration of One of the World's Great Cities
This course provides a multi-disciplinary perspective on the past, present, and future of London. Topics include the historic roots of the city, the development of the British urban system, transportation and the shaping of the city; social, political, and economic dynamics of the Greater London Area; urban growth, decline, and revitalization; suburbanization; and the challenges facing the city in the 21st Century.
Credit 3 units. A&S IQ: SSC Art: SSC BU: IS EN: S
Typical periods offered: Fall

GLOBAL 1104 First-Year Seminar: Chinatown: Migration, Identity, and Space
Chinatown, as a cultural symbol and a spatial entity, links various topics and studies in this course. Our survey starts with a historical and geographical glimpse of Chinatowns and ethnoburbs in the U.S. through real-life stories of their residents. We then expand our horizon to global Chinatowns with selected case studies of Chinatowns in Japan, Southeast Asia, Europe, and Australia. Our historical and ethnographic inquiries also investigate the ways in which Chinese food has been adapted to each local culture and society. Through the lens of Chinatown, this seminar looks into migration and settlement while tackling questions about representations of identity and culture as well as spatial constructions by immigrant communities. In doing so, we reconsider popular narratives about Chinatowns or ethnic enclaves in general. The assignments include ethnographic surveys of Chinese businesses.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

GLOBAL 1106 Ampersand: Geographies of Globalization and Development
This course provides an overview to the geographies of globalization and development in the world today. We begin by engaging with a variety of theoretical perspectives, definitions, and debates in order to establish the foundations upon which students can conceptualize and understand existing patterns of inequality, social injustice and environmental conflicts. In order to further highlight the different ways in which development and globalization interventions are experienced and contested, in the second half of the course we will focus our considerations towards specific contemporary issues at the forefront of globalization and development debates, including migration and refugees, urbanization, sustainable development, tourism, and alter-globalization social movements. This course is restricted to first-year students in the Global Citizenship Program.
Credit 3 units. A&S IQ: SSC, SC Art: SSC BU: IS EN: S
Typical periods offered: Spring

GLOBAL 1107 Ampersand: Global Migration and Transnational Cultures in Modern Times
This Ampersand seminar explores global migrations, citizenship and identity, and transnational and cross-cultural dynamics through an interdisciplinary lens. We examine themes and patterns of human migration and address questions about the cultural implications of movement across borders. The course begins with an overview of global migrations supported by specific case studies, then shifts to investigating cultural change and reproduction, with particular attention to diasporic food cultures. While nation-states are entangled in our inquiries, our primary focus is on movement and mobility, exploring agency and subjectivity among individual migrants and migrant communities, and examining interrelations and connections within a transnational and global context. This course is restricted to first-year students in the Global Citizenship Program.
Credit 3 units. A&S IQ: HUM, LCD, SC BU: HUM
Typical periods offered: Spring

GLOBAL 1109 First-Year Seminar: Mapping the World: Introduction to Human Geography
What is human geography and why is it important? This course addresses these questions by introducing students to the fundamentals of the discipline of human geography. A geographic perspective emphasizes the spatial aspects of a variety of human and natural phenomena. This course first provides a broad understanding of the major concepts of human geography, including place, space, scale and landscape. It then utilizes these concepts to explore the distribution, diffusion and interaction of social and cultural processes across local, regional, national and global scales. Topics include language, religion, migration, population, natural resources, economic development, agriculture, and urbanization. In addition to providing a general understanding of geographic concepts, this course seeks to engender a greater appreciation of the importance of geographic perspectives in an increasingly interconnected and globalized world. No prerequisites. NOT AVAILABLE TO STUDENTS WHO ARE ENROLLED IN OR WHO HAVE TAKEN L61 116. Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: SSC Art: SSC BU: IS, SCI
Typical periods offered: Fall, Spring

GLOBAL 1503 Workshop for the Global Citizenship Program
This yearlong workshop, which is restricted to and required of participants in the Global Citizenship Program (GCP), is a companion to the core GCP fall course. The first semester of the workshop asks students to reflect critically on their own relationship to the concept of Global Citizenship. Through popular education and creative-based methods, students will explore their situated knowledges, worldviews, positionalities, and biases. The course engages with social, environmental, and epistemic justice themes through a decolonizing lens to question and reimagine how to embody critical global citizenship. By the end of the workshop, students will have tools to support their analysis and intentional engagement with the global-local community.
Credit 1 unit.
Typical periods offered: Spring

GLOBAL 1504 Workshop for the Global Citizenship Program
This workshop, which is restricted to and required of participants in the Global Citizenship Program, is a continuation of the Fall L61 FYP 1503 workshop. The spring Global Citizenship Workshop is praxis-oriented and asks students to apply and further reflect on the concepts learned during the Fall. Students are required to volunteer in the community for at least 10 hours per month. Each workshop session will provide a space for collective sharing about our experiences in the community and offer tools for meaningful engagement, social change, community building, and collective care. Towards to end of this journey, students will have gained important frameworks to understand the global and its relationship to our local realities, meaningful life experiences collaborating across differences, and powerful tools for future community engagement. An optional trip at the end of the semester, after exams, will provide further opportunities for hands-on learning and interaction with organizations and people involved in the themes of the course.

GLOBAL 2000 Crossing Borders: An Introduction to Institutions and Concepts in Global Studies
This course provides an overview of the emergence of international governing institutions, the ideologies that shaped them, and concepts helpful for understanding them. Identifying the systems that have emerged to govern modern human societies at the national and international levels provides the means to consider how human beings are categorized within those systems, as citizens, subjects, asylum seekers, refugees, and the stateless. We engage a few classic works -- including The Communist Manifesto, Imagined Communities, and Orientalism -- and consider how they have transformed knowledge. The goal is for students to gain an empirical grasp of world institutions and a critical vocabulary that will provide the means for an informed engagement with international issues across different world regions and academic approaches.

GLOBAL 2009 Introduction to European Studies
This course provides an introduction to the study of contemporary Europe through an historical examination of the moments of crisis, and their political and cultural aftermath, that shaped modern Europe and continue to define it today. These crises will include: the revolutions of 1848, the advent of 19th-century nationalisms, the Great War, the Spanish Civil War, the rise and defeat of state fascism, the Cold War, the formation of the EEC and Union, May 1968, and the return of right-wing politics. After the study of these traditions, the final portion of the semester will consider contemporary Europe since 1991, considering such subjects as Green politics, internal migration and immigration, and the culture of the European Union.

GLOBAL 2100 Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan Through Film
An examination of key turning points in the history of Japan from the mid-19th century to the present, this course uses film, in addition to written materials, to gain an understanding of political and social transformation over time. We focus in particular on the role of public servants in facilitating and, at times, obstructing change. Students will view and discuss eleven films screened in Japanese with English subtitles, including The Twilight Samurai, To Live, and Shin Godzilla. In-person attendance at screenings is required. Through written and visual materials, students will learn about the history of Japan, consider the value of public service, and evaluate the utility of film for engaging the past.

GLOBAL 3006 Global Health and Language
Long before COVID-19, scholars across the globe postulated that language in health care is one of the most significant, and yet underexplored, social determinants of health in underserved linguistic diverse communities. This new course attempts to harmonize work across the disciplines of Global Public Health and Applied Linguistics by analyzing studies that examine language acquisition and language use across contexts with populations that experience serious health disparities- immigrants, refugees, indigenous peoples, racial and ethnic minority groups- and the course offers corresponding implications for health equity. Broadly speaking, this course addresses global health literacy issues, in both spoken and written communications, and its relationship to public health. As part of the seminar, students will apply the theory and research they learn to help meet the local language health needs of a changing population of refugees and immigrants in St. Louis community.

GLOBAL 3020 Global Futures
In this core Global Studies (GS) course, students will develop a broad understanding of our interconnected world by exploring a series of global issues that may include but are not limited to: border crossing and forced migration, climate change, human rights, inequality, or war and conflict. We will study these issues and their interrelated qualities from a variety of perspectives and intellectual frameworks. Students will situate major developments in a historical and cultural perspective and identify and understand discipline-specific methodologies as well as the benefits and challenges of a transdisciplinary approach. Throughout the semester students will attain a shared, critical vocabulary and theoretical expertise that will enable them to bring together the range of approaches - quantitative, qualitative, mixed - used in other GS courses. Students will also hone argumentation and communication skills for their post-graduation careers, and different forms of community engagement in global contexts. This course is required for all GS majors matriculating in Fall 2023.

GLOBAL 3176 Chinese Economy in World History
From the Belt and Road Initiative to high-tech surveillance, China is at the center of contemporary discussions about the future of the global economy. This course will expose students to a historical understanding of how China not only became part of the world economy, but in fact defined its development in major ways. Over the course of the semester, students will explore a variety of subjects, from the Great Divergence between Europe and China in the eighteenth century to the rise of Maoist socialism in mid-twentieth century, to China's transition to capitalism and involvement in Africa in the twenty-first century. Examining the past two hundred fifty years of Chinese and global economic history, the students will gain a deep understanding of how China became the world's second largest economy, and what that means for the future.

GLOBAL 3183 Learning to Use GIS in Development, Area Studies and International Affairs
In this course you will be introduced to the concept of spatial thinking, which will help you determine why and when to use GIS to address a spatial problem relevant to Global Studies. The course will be organized into four sections based on 1) area studies, focused on demographic inquiry; 2) development, focused on site selection; 3) global cultural studies, focused on data creation and editing; and 4) international affairs, focused on digital elevation, density and basic spatial statistics. The class will explore some tools available for visualizing and analyzing data, but our main tool will be ArcGIS. The aim of this course is that you learn concepts and develop a skillset that you can apply to other projects.

GLOBAL 3248 Intercultural Communication
Intercultural communication and cross-cultural communication are interchangeable terms in referring to the field of studies covered in this course. We will start with a critical examination of Geert Hofstede's cultural dimensions theory and then explore theories of verbal and non-verbal cues, space and time, tastes and smells, and shame and politeness from multidisciplinary angles and by using varied case studies in intercultural settings. Finally, we will tackle intercultural dynamics through the lens of foods as well as the people who produce and consume them. The readings cover case studies of different world regions across various cultural, linguistic, and ethnic groups. This course aims to provide analytical tools to understand and navigate cultural difference and to develop critical skills of intercultural competence.

Typical periods offered: Spring

GLOBAL 3511 Global Surveillance Culture
Surveillance in its most basic definition is often understood as watching someone from above and has proven to be one of the most effective ways of exercising power in political communities since the Middle Ages. If it is true, as the surveillance scholar David Lyon writes, that cultures of surveillance develop differently depending on their political economies and post-authoritarian or colonial past, a focus on the global circulation of surveillance imaginaries then raises the question of how such local differences are narrated, visualized or imagined. In this course, we will focus on the narrated differences within artistic and cultural expressions from Europe, Asia, Africa, North and South America to explore how local surveillance practices shape, disrupt or create global imaginaries. Surveillance and the linkages between its diverging cultures, as one might argue, then become a part of the globalization processes themselves. Against this backdrop, a focus on the global imaginaries of surveillance promises a unique inquiry into how local attitudes towards information collection, beliefs in (mass) monitoring, or values and desires associated with social media surveillance translate, shape, and intervene with the global. In final projects students will have the opportunity to work on a (digital) humanities project that explores the themes of Sharing is Caring, Counter-Surveillance, and (In)Visibility in Surveillance Capitalism.

GLOBAL 3566 Andean History: Culture and Politics
Since pre-Columbian times, the central Andean mountain system, combining highlands, coastal and jungle areas, has been the locus of multiethnic polities. Within this highly variegated geographical and cultural-historical space, emerged the Inca Empire, the Viceroyalty of Peru - Spain's core South American colony, and the central Andean republics of Ecuador, Peru, and Bolivia. Taking a chronological and thematic approach, this course will examine pre-Columbian Andean societies, Inca rule, Andean transformations under Spanish colonialism, post-independence nation-state formation, state-Indian relations, reform and revolutionary movements, and neoliberal policies and the rise of new social movements and ethnic politics. This course focuses primarily on the development of popular and elite political cultures, and the nature and complexity of local, regional, and national power relations.

GLOBAL 3602 Borders, Checkpoints, and the Frontiers of Literature
Borders are some of the most strange, dangerous, and changeable places in the world. They help define not only where we are, but also who we are. This course will read literature from and about border regions around the world: the Mexican-American frontera, the Indian and Pakistani Partition line, the German Iron Curtain, the African colonial borders, and the Israeli-Palestinian divisions. Even if we live far from any international boundary, the notion of the border shapes our thinking about the world. Literature is a place where borders are vividly imagined, marked, and debated in ways that both affect preexisting frontiers and help draw new ones on the ground. We will read all texts in English.

GLOBAL 3740 Russian Literature At the Borders: Multiculturalism and Ethnic Conflict
In this course we explore Russian literary works (from the nineteenth century to the present day) that address issues of multiculturalism and ethnic conflict. The course is structured as a virtual tour of culturally significant places. Our readings take us to Ukraine/Belarus, the Caucasus, Siberia, and Central Asia. Some of the topics we discuss include national narratives and metaphor, authority and rebellion, migration and mobility, empire, orientalism, religious identities, gender roles, memory, and the poetics of place. Materials include poetry, drama, novels, short stories, critical articles, and oral history.

GLOBAL 3750 Topics in Russian Literature and Culture (WI)
he words "Russian Literature" might conjure up long, sprawling, "loose and baggy monsters." However, the short story is arguably the most significant genre in the Russian literary tradition. In this course we do close readings of some of the greatest Russian short stories, mostly from the 19th and 20th centuries. Authors might include Pushkin, Lermontov, Gogol, Dostoevsky, Tolstoy, Turgenev, Chekhov, Gippius, Teffi, Tsvetaeva, Platonov, Bunin, Nabokov, and others. Some of the questions we explore: Is a short story (rasskaz) just a shorter piece of fiction or does it aim to do something very different from a novel? How did the Russians develop-and maybe change-the genre? In what ways are these stories connected to the place and time in which they were written? We will read one or two short stories a week. This is a Writing Intensive course. No knowledge of Russian is required. All readings are in English translation.

GLOBAL 3822 From Mcdonald's to K-Pop: New Movements in East Asia
This course introduces contemporary East Asian cultures and societies from transregional and transnational perspectives through the lens of consumer and popular cultures. We employ McDonald's as the first case study to look into East Asian responses to Western cultural products and ideas. For K-pop, we examine its emergence and transregional reception and impact across different regions in East Asia as well as in the US. Beginning with these two subjects, our investigation extends to other examples of transnational cultural phenomena originating in or being adapted to the East Asian context. In doing so, our discussions also reflect on key topics in the study of East Asian cultures such as face, filial piety, and social networks.

Typical periods offered: Spring

GLOBAL 3832 Global Tibet: Culture and Society On the Roof of the World
Far from the imagined land of snows closed off to the rest of the world, Tibet always had dynamic interactions with Inner Asia, South Asia, and China. With an expansive view on Tibetan history, this course traces these interactions from the sixteenth to the twenty-first century through a variety of topics, ranging from the power of the Dalai Lamas to the spread of Tibetan Buddhism across the world, to the effects of global warming on the third pole. Students will be exposed to religious texts, memoirs, and novels to trace the lives of women saints and Tibetan communists as well as exiled nationalists, and watch documentaries and films to interrogate Tibet's place in China and the Tibetan diaspora's experience in India and the United States. Using Tibet as a lens, students will learn to question larger problems of religion versus secularism, cultural preservation versus globalization, and national identity versus colonization, subjects that continue to matter to Tibet and the world today.

GLOBAL 3860 Empire in East Asia: Theory and History (WI)
An introduction to how historians and anthropologists incorporate theoretical insights into their work, this course first reverse engineers the main arguments in several insightful books and articles on empire in Asia, arguments which are informed by a range of theorists. Retaining our theoretical knowledge, we then focus on the more empirical aspects of the Japanese empire in Asia, including settler colonialism, the colonial economy, representations of colonialism and the long-term ramifications of empire. We conclude with a general assessment of the history of empire. In these ways, this course seeks to equip students with a knowledge of empire in East Asia in the late 19th and 20th centuries while simultaneously investigating the nature of that knowledge.

Typical periods offered: Spring

GLOBAL 3866 Interrogating Crime and Punishment
Whether read as psychological thriller, spiritual journey, or social polemic, Dostoevsky's 1866 novel CRIME AND PUNISHMENT has inspired diverse artistic responses around the world. From the nineteenth century to the present day, writers and filmmakers have revisited (and often subverted) questions that Dostoevsky's novel poses: What internal and external forces cause someone to step over into crime? What are the implications of a confession? To what extent can the legal system provide a just punishment? Are forgiveness and redemption possible, or even relevant? What role does grace--or luck--play in the entire process? This course begins with our close reading of Dostoevsky's novel and then moves on to short stories, novels, literary essays, and movies that engage in dialogue with the Russian predecessor. A central concern of our intertextual approach is to explore the interplay between specific socio-historical contexts and universal questions. All readings are in English. No prerequisites.

GLOBAL 3890 Furies and Die-Hards: Women in Rebellion and War
Women in Rebellion and War juxtaposes contemporary social science perspectives on women and war with the history and testimonies of Irish women during the Irish revolutionary period (1898-1922), the Irish Civil War (1922-1923), and the Free State. Under English rule from the twelfth century Norman invasions to the establishment of the Irish Free State and the partition of Northern Ireland in 1922, Ireland presents a compelling, historical laboratory to deliberate on the relationship between gender and political conflict. Intentionally transdisciplinary, the course draws from across disciplinary discourses and highlights perspectives across race, gender, class, ethnicity, religion, and

sexuality. Topics include: political organizing, nationalism, rebellion, radicalization, militarism, terrorism, pacifism, and peacebuilding. Rooted in Cynthia Enloe's enduring question Where are the women? and drawing on sociologist Louise Ryan's landmark essay by the same name, we inquire how and why Irish nationalist women, who were integral to building the revolutionary movement, became Furies and Die-hards in the eyes of their compatriots when the Free State was established (Bishop Doorley, 1925; President Cosgrave, 1923). Taking advantage of the plethora of archival resources now available through the Irish Decade of Centenaries program, the course incorporates the voices of Irish women through their diaries, military records, letters, interviews, speeches, newspapers, and memoirs.

GLOBAL 3926 Remembrance of Things Past in Modern Turkish Literature and Film
How does literature examine and enable us to understand issues and complex situations such as displacement, violence, human rights abuses? Asserting that literature provides unique insight into global events and personal histories, this course focuses on modern Turkish literature and film of the 20th and 21st centuries as it addresses both the local and the global. With roots in both the multi-ethnic and multi-lingual folk tradition and in the Western notion of progress, the literature of modern Turkey (1923-) has from its inception been concerned with crisis, loss, Turkey's troubled past/s, and melancholy in the aftermath of the fall of the Ottoman Empire. In this course, we will bring to the fore the entanglement of literary, cultural, and political currents from the 1940s to the present. We will initially focus on Turkey in the eyes other cultures, considering its internationally recognized cultural scene, the politics of East and West divide, and current cosmopolitan moves. We will then move our gaze to the past and focus on the problems of modernity following the transition from the Ottoman Empire to the Turkish Republic. We will engage with a wide selection of genres, from a novel to a memoir, short stories, poetry, and films that trace the effects of cultural and political turmoil, coups d'états, censorship, and human rights abuses in modern Turkey today. In a broad sense, we will consider how literature and film can create response to various social and political events, disrupting the status quo. Our discussion of the particular situation and themes of modern Turkish literature and film will be informed by readings in culture studies. The course will include texts by such writers as the Turkish novelist Yashar Kemal, best known for his Robin Hood tale, the novel Memed, My Hawk; the Nobel-prize winning Turkish novelist Orhan Pamuk; the essayist and novelist Latife Tekin, who made her mark in the post 1980 Turkish and international literary scene by engaging magical realism in the vein of Gabriel Garcia Márquez; and the renowned novelist and human rights activist Aslı Erdogan, among others. Films to be considered are The Edge of Heaven by the Golden Globe winner Turkish-German director Fatih Akın, Distant by the Palme d'Or winner Nuri Bilge Ceylan; and Mustang, an internationally co-produced film by Turkish-French director Deniz Gamze Ergüven.

GLOBAL 4007 Global Studies Research Methods Proseminar and Assistantship
Global Studies research explores thorny historical and contemporary questions around the world, such as the climate crisis, public health challenges, uneven development, the strife for racial justice, precarious labor, curtailed rights and liberties, and technological revolutions. In this course, students attend a weekly Proseminar and complete a Research Assistantship (around 5 hours per week). The Proseminar orients students to the practice of research, including the fundamentals of research design, methodologies, and methods. In addition, students are matched with a Faculty Mentor for a Research Assistantship. Ideally, students should apply for and enroll in this course in their sophomore or junior year. Apply at: https://globalstudies.wustl.edu/research-team-application. The deadline for submitting an application is May 1 for the next fall semester and December 1 for the next spring semester.

GLOBAL 4036 Children of Immigrants: Identity and Acculturation
This seminar takes an interdisciplinary approach to children of immigrants as an analytical subject. Our case studies span from 1.5- and second-generation Americans to those who grew up in immigrant families in Canada, Australia, Europe, and Japan. We will ground the experience of these young people in the large context of the immigration history and policies of the country to which their family migrated and explore different sorts of narratives about their identities and belonging. Our discussions shed light on the extent to which the young people share common experiences such as strategies of identity negotiation, as well as the ways in which their experiences differ and for what reasons. Students are required to conduct an individual research project among a selected group of children of immigrants.

GLOBAL 4200 Islam, Immigrants, and the Future of European Culture
Coming from Turkey, North and West Africa, Pakistan, and elsewhere, Muslim immigrants in Europe are changing what it means to be a European. In the process, they have brought questions of cultural identity into the international media. Examining literature, the press, and secondary studies, this writing-intensive course will study the ways in which national governments and institutions have chosen to deal with the arrival of large numbers of Muslims as permanent residents. We will consider what the various controversies and prejudices surrounding their presence mean for the future of European culture. Such issues as citizenship, assimilation, the right to cultural difference, and the use of cultural and religious symbols will be among our major interests. No foreign language background is assumed. Priority will be given to IAS majors for this WI course.

GLOBAL 4201 International Relations of Latin America
This course examines Latin American foreign relations in the world from the 1820s to the present with a primary emphasis on the period since 1945. Focusing on inter-state and transnational relations, it seeks to historically contextualize and analyze long term patterns and trends between Latin American states and between Latin America and the United States, Europe, and the global South. Given Latin America's shared experience with imperialism and more recently with neo-imperialism, special attention will be paid to the ways Latin America has sought to manage and/or resist foreign domination, especially U.S. hegemonic pretensions. To this end it will analyze patterns of inter-American conflict and cooperation. When, why, and

under what conditions Latin America articulated an independent foreign policy, forged anti-imperialist blocs, embraced U.S. sponsored diplomatic efforts and military alliances, and pursued Latin American unity and solidarity will be closely examined. To better understand the continuities, discontinuities, contradictions, and complexities of Latin American foreign policy, this course will also assess the influence of changing regional and national political cultures from both a theoretical and a historical perspective. In doing so, it explores how elite culture, the balance of domestic social forces, ideological and economic development, and shared cultural identities and meanings informed national political cultures and how these in turn shaped Latin American foreign policies.

Typical periods offered: Spring

GLOBAL 4204 International Relations of Latin America (WI)

How should we understand Latin American international relations since the early republican era? Standard Western-centric IR studies emphasize Latin America's marginal position in the world system and its historical subordination to either European and/or U.S. hegemony. This course challenges this one-sided approach and reductionist characterization. Adopting a global historical perspective, one that privileges a Latin American-centric view, this course will examine the ways Latin America generated its own ideas, articulated its own concerns, and acted in its own interests in international affairs. Special attention will be paid to how Latin America sought to resist foreign domination and/or hegemony and maintain its relative autonomy. It will also analyze when, why, and under what conditions Latin America forged anti-imperialist blocs, pursued regional integration, and engaged in transnational solidarity. To provide a more nuanced understanding of Latin American international relations, this course will historically contextualize and analyze the influence of changes in the international state system, national and sub-national political cultures, the balance of domestic forces, and non-state actors.

GLOBAL 4220 Europe, Questions of Identity and Unity

Nation states and their cultures have been changed by globalization. Within this process, continentalisation has played an important role. The European Union is only half a century old, but continental unity has been discussed and demanded by European writers and thinkers for hundreds of years. We will read essays on Europe (its identity, its cultural diversity and its cultural roots, contemporary problems, and future goals) by writers like Coleridge, Madame de Staël, Novalis, Chateaubriand, Heine, Nerval, Hugo, Thomas Mann, Ernst Jünger, T.S. Eliot, Klaus Mann, de Madariaga, Kundera, Enzensberger, Frischmuth, and Drakulic; we will discuss studies re-inventing Europe by philosophers like the Abbé de Saint-Pierre, Kant, Hegel, Nietzsche, and Ortega y Gasset; we will deal with the mythological figure of Europa and her resurrections in the world of art; we will study the Nazarene painters of the early 19th century in Rome and will discuss portraits of Bonaparte by French painters of the time. CompLit students will meet with the instructor for an additional two hours per month.

GLOBAL 4350 War and Peace

What happens when wars end? This course examines social experiences around violent conflict and its aftermath. How does the portrayal and memory of war shape future possibilities, whether in terms of social policy or ideas about civic inclusion? How does martial conflict shape social policies? We examine war and the social experiences of those adjacent to geopolitical conflict through the experiences of survivors, policy makers, soldiers and families, and international relief agencies. Our emphasis is in understanding the social implications of war. What are the social consequences of martial conflict? How is war represented to those not directly involved? How is war and its aftermath witnessed? How is its commemoration and remembrance constitutive for future action?

GLOBAL 4414 Gender Analysis for International Affairs

In this transdisciplinary course, gender is not a synonym for women, as Terrell Carver reminds us; rather, students take gender seriously as both an analytical category and a lived experience, examining how masculinities, femininities, gender identities, and sexualities shape international affairs. Traversing from the macro to the micro level, the course functions as a learning community in which students are exposed to diverse voices from around the world, and students conduct gender analyses in case studies and simulations. Throughout, the class will be mindful of 1) how gender functions in tandem with other aspects of identity, such as race, religion, class, sexuality, and more (intersectionality) and 2) how multidimensional identities morph historically, regionally, and culturally. Students build a gender analysis toolkit and practice what Cynthia Enloe describes as feminist curiosity, exploring the relationship between gender and power in international affairs.

Typical periods offered: Fall, Spring

GLOBAL 4633 20th-Century Latin American Revolutions

Latin America has been described as one of the most revolutionary regions of the world in the twentieth century. It experienced four major social revolutions and gave rise to many consequential guerrilla movements. This course uses theories of revolution and a social science historical approach to elucidate the causes, processes, outcomes, and implications of revolutions in Mexico (1910), Bolivia (1952), Cuba (1959), and Nicaragua (1979). It also analyzes late 20th century revolutionary guerrilla movements in El Salvador and Peru. Why peasants, university students, and women formed key social bases of support for revolutionary movements and how revolutions were institutionalized and consolidated will receive special attention.

GLOBAL 4644 The Indochina Wars
The Vietnam wars of the twentieth century were more accurately Indochinese wars. They were intimately intertwined with broader Indochinese anti-colonial and anti-imperialist struggles, civil wars, and socialist and communist revolutions. This course will probe deeply into the causes, processes, and outcomes of the Indochina wars and will highlight the roles of regional states (Vietnam, Cambodia, Laos, Thailand) and non-state actors (e.g. social, cultural, and anti-imperialist networks and movements). It will elucidate the influence of imperial powers (France, Japan, US, China) while prioritizing the agency, experience, perceptions, and understandings of Vietnamese, Laotian, Cambodian, and Thai peoples. The articulation of ethnic, gender, class, religious, and national identities, the Cambodian genocide, and the postwar development of Southeast Asia in the 21st century will also receive analytical treatment.

Typical periods offered: Spring

GLOBAL 4820 War, Migration, and Human Rights
In this course we will explore the recent history of displacement and human rights; this includes the origins of laws that still govern the lives of refugees and asylum seekers. While migration has been a constant in history, we will center our inquiries on more recent events, beginning in the 1930s and up to the present day. We will pay close attention to several conflicts that led not only to global displacements, but that also raised important questions about human rights. These conflicts include, but are not limited to: the Spanish Civil War, World War II, and the Vietnam War. While most of our more contemporary sources will involve migration to the United States from Latin America, we will also address the present flow of people across visible and invisible borders in other parts of the world. We will work our way through complex arguments about extremely contentious and timely topics and make use of primary sources and secondary literature, fiction, memoirs, film and other media. The last section of the class will center on different research and writing methods.

GLOBAL 4868 Russia and the West: Creating and Representing Identity
What does the West look like through Russia's eyes, and what does Russia look like through the eyes of the West? And to what extent does this relationship matter to the rest of the world? In this course, students will examine American/European/Russian philosophical and polemical essays, literary texts (novels, poetry, short stories), films, dance/vocal/theatrical performances, architecture, travelogues, autobiographies, visual arts, propaganda, and primary historical documents- from the early 19th century to the Cold War to the present day. Our focus is on how group identity (national, ideological, coalitional, and so forth) intersects with various types of personal or individual identity. This is a discussion-based course and active participation (speaking and listening) each class-day is expected. There will be two short writing assignments and weekly online Canvas discussion and collaboration. Students will research a topic of their choice, culminating in an in-class presentation and final paper or project. No prerequisites. All interested students are welcome.

GLOBAL 4869 Reading War and Peace
What is it like to enter into a fictional world for a semester? In this course we read Leo Tolstoy's War and Peace in its entirety. Set during the Napoleonic wars (1805-1812), War and Peace takes the reader on a panoramic journey from the battlefield to the hay field, from the war room to the ballroom. It is a vivid portrayal of 19th-century Russian society as well as a penetrating examination of the causes and consequences of violence and the nature of love and family dynamics. In our discussions, we explore philosophies of history, issues of social injustice and gender inequality, the psychology of human suffering and joy, questions of literary form and genre, and the very experience of reading a long work of fiction. We begin with a selection of Tolstoy's early works that laid the foundation for War and Peace and conclude with a few of Tolstoy's late works that had an enormous influence on, among others, Mahatma Gandhi. Primary texts are supplemented with literary theory and film. All readings are in English.

Typical periods offered: Spring

GLOBAL 4897 Global Asias
This course engages a new methodological approach to Asia that expands beyond the spatial concept of the region as a set of political entities occupying a specific part of the world. Global Asias seeks to open up avenues of inquiry to accommodate the study of flows of people, ideas, and practices across Asia and throughout the world. It provides the opportunity to consider Asian communities as they manifest themselves in different places and different ways. We begin with a survey of past attempts to define, understand, and manage Asia, which resulted in an area studies approach. We then engage transnational and interdisciplinary efforts, and conclude by considering the possibility that Global Asias can challenge and perhaps unseat the reigning epistemologies that exist today.

Typical periods offered: Fall

GLOBAL 4942 Independent Study
Prerequisite: junior or senior standing. CONTACT MRS. TONI LOOMIS FOR APPROPRIATE SECTION NUMBER AND CORRESPONDING FACULTY. The student works directly with a Global Studies faculty member (mentor) to establish a research project and expectations for the outcome of the semester (readings; paper; etc.). Approvals of the mentor and the student's major advisor are required before enrolling in the course. Only one independent study can count as a 400 level elective towards the Global Studies major.
Credit 3 units.
Typical periods offered: Fall, Spring

GLOBAL 4985 Preparation for Global Studies Honors Thesis
Required for GS senior thesis writers, this course addresses the methods and mechanics of research and writing in GS, concurrently with independent work with the thesis adviser. The seminar provides structure, guidance, and response to your work. Students will already have identified a thesis topic; in the seminar, they will identify a research question and develop a thesis proposal. In workshop format, students will examine one another's research questions, hypotheses, and methods of analysis. In additional sessions, students will learn the basics of several models of electronically assisted research, and they will develop and refine presentation skills through the presentations of their proposals and results at various stages of progress. Prerequisites: 1) a GPA of 3.65 at the time of application to the thesis program; 2) the identification of a thesis adviser; and 3) the approval of the GS Honors Program Director. Attendance is required.
Credit 3 units.
Typical periods offered: Fall

GLOBAL 4986 Global Studies Senior Honors Thesis
Second semester of the Global Studies Senior Honors Thesis. Enroll in the section number that is unique to your thesis advisor. While this course earns you 3 credits, those may not be counted toward the GS major requirements. The course involves intensive research leading to the completion of your GS honors thesis conducted under the supervision and guidance of a faculty sponsor.
Credit 3 units.
Typical periods offered: Spring

GLOBAL 4996 Elective: 4000-Level
This course is used for transcribing 4000-level GLOBAL elective units.
Credit 3 units. EN: H
Typical periods offered: Fall, Spring, Summer

Global Studies Major, Development Concentration

Program Requirements

- **Total Units Required:** 36

All societies change over time, sometimes for better and sometimes for worse. In this concentration, students explore different conceptions of development and consider why some societies develop while others languish. What accounts for disparities in longevity, wealth, and access to food and health care? How can we explain differences in extreme poverty, malnutrition, and treatable disease? Students consider how societies move from being heavily rural to having higher levels of urbanization. What explains differences in political, civil, and economic liberties? What accounts for differences in gender rights and opportunities? What are the implications of climate change and environmental distress?

Concentration Objectives

The Global Studies concentration in development offers an interdisciplinary approach to examine why some societies develop politically, socially, and economically while others languish. Students can explore disparities in wealth, political freedoms, gender rights, urbanization, access to basic resources like food and health care, environmental conditions, and social justice.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 3000 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 4000 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of coursework:

- 3 units of core coursework: GLOBAL 3020 Global Futures
- 3 units of Research Methods coursework (any level)
- 6 units of introductory coursework (1000-2000 level) from two different academic disciplines
- 9 units of advanced coursework from the Core Courses list (3000-4000 level)
- 12 units of advanced coursework (3000-4000 level)
- 3 units of additional coursework (any level)

Africa, East Asia, Eurasia, Europe, Latin America, the Middle East, South Asia, and North America are considered world areas for the development concentration. A student must complete two courses in one of these world areas and one course in another world area.

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or world area). Some of these requirements may be completed while abroad.

Introductory Courses

Students choose two courses from the following list, for a total of 6 units:

Code	Title	Units
AFAS 1105	First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change	3
AFAS 2550	Introduction to Africana Studies	3
ANTHRO 1101	First-Year Seminar: Past Tense, Future Imperfect: The Rise & Fall of Societies & Global Civilization	3
ANTHRO 1520	Introduction to Cultural Anthropology	3
BEYOND 1014	Environmental Racism and the Health of Everyone	3
BEYOND 1106	Gender, Youth, and Global Health	3
BIOL 2150	Introduction to Environmental Biology	3
CAPS-GIS 2000	Introduction to GIS	3
CHINA 2100	Sophomore Seminar: U.S.-China Relations: Perceptions and Realities	3
CHINA 2270	Chinese Civilization	3
COMPLITTHT 2109	Modern Political Thought: Text & Traditions	3
ECON 1501	Introduction to Microeconomics	3

ECON 1502	Introduction to Macroeconomics	3
EEPS 1110	Introduction To Global Climate Change In the 21st Century	3
EEPS 2010	Earth and the Environment	4
EEPS 2020	Introduction to Earth, Environmental, and Planetary Science	3
EEPS 2190	Energy and the Environment	3
ENST 1150	Environmental Issues	3
ENST 2500	Sophomore Seminar in Sustainability and the Environment	3
FYP 1117	Migration Policies and Colonialism: Refugee Resettlement and Integration	3
FYP 1119	Mediterranean Migration: Dynamics and Consequences on the EU and MENA	3
FYP 1133	Legacies of the Silk Road	3
GLOBAL 1101	Migration in the Global World	3
GLOBAL 1102	First-Year Seminar: The Vietnam Wars	3
GLOBAL 1103	First-Year Sem: Bridging London: An Interdisciplinary Exploration of One of the World's Great Cities	3
GLOBAL 1104	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GLOBAL 1105	East Asia in the World	3
GLOBAL 1106	Geographies of Globalization and Development	3
GLOBAL 1107	Global Migration and Transnational Cultures in Modern Times	3
GLOBAL 1109	First-Year Seminar: Mapping the World: Introduction to Human Geography	3
GLOBAL 2000	Crossing Borders: An Introduction to Institutions and Concepts in Global Studies	3
GLOBAL 2009	Introduction to European Studies	3
GLOBAL 2100	Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film	3
HISTORY 1020	Introduction to Modern European History	3
HISTORY 1120	First-Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities	3
HISTORY 1124	First-Year Seminar: The Meaning of Pakistan: History, Culture, Art	3
HISTORY 1146	Introduction to World History: The Second World War in World History	3
HISTORY 1151	Health and Disease in World History	3
HISTORY 1500	Silver, Slaves and the State: Globalization in the 18th Century	3
HISTORY 2158	Outcasts and Outlaws: The History of Othering in Modern Europe	3
JAPAN 2260	Japanese Civilization	3
JIMES 2081	Introduction to Jewish Civilization: History and Identity	3
JIMES 2100	Introduction to Islamic Civilization	3
JIMES 2630	Democracies & Dictatorships in the Middle East	3
JIMES 2910	Recism and Antiracism	3
KOREA 2230	Korean Civilization	3
LATAM 1000	Latin America: Nation, Ethnicity and Social Conflict	3
MEC 2900	Microeconomics	3
MEC 2920	Global Economy	3
PHIL 1000	Logic and Critical Analysis	3
PHIL 1060	Present Moral Problems	3
PHIL 2060	Biomedical Ethics	3
PHIL 2080	Introduction to Environmental Ethics	3
PHYSICS 1671	Physics and Society	3
POLSCI 1100	Introduction to Comparative Politics	3
POLSCI 1200	International Politics	3
POLSCI 1300	Introduction to Political Theory	3
POLSCI 2000	Introduction to Environmental Policy	3
POLSCI 2102	Introduction to Migration Policy and Politics	3
PSYCH 1000	Introduction to Psychology	3
PSYCH 2210	First-Year Seminar: Introduction to Memory Studies	3
RELPOL 2020	Islamophobia & U.S. Politics	3
SDS 1600	Introduction to Statistics	3
SDS 2020	Elementary Probability and Statistics	3
SOC 1006	Social Problems and Social Issues	3
SOC 2010	The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S.	3
SOC 2030	Social Movements	3
SOC 2040	Social Inequality in America	3
URST 1100	First-Year Seminar: Introduction to Urban Studies	3
WGSS 1500	Introduction to Women, Gender, and Sexuality Studies	3
WGSS 2070	Sexuality and the State: Introduction to Sexuality Studies	3
WGSS 2101	Sophomore Seminar: Globalization and its Discontents	3

Core Courses

Students choose three courses from the following list, for a total of 9 units:

Code	Title	Units
ANTHRO 3283	Introduction to Global Health	3
ANTHRO 3391	Economies as Cultural Systems	3
ANTHRO 3612	Population and Society	3
ANTHRO 4022	Transnational Reproductive Health Issues: Meanings, Technologies, Practices	3
ANTHRO 4517	Anthropology and Development	3
ECON 3350	Environmental Policy	3
ECON 3373	International Economics	3
GLOBAL 3020	Global Futures	3
GLOBAL 3176	Chinese Economy in World History	3
GLOBAL 4201	International Relations of Latin America	3
GLOBAL 4204	International Relations of Latin America (WI)	3
GLOBAL 4414	Gender Analysis for International Affairs	3
GLOBAL 4622	Labor and Labor Movements in Global History	3
HISTORY 3147	The Wheels of Commerce: From the Industrial Revolution to Global Capitalism	3
HISTORY 3148	The First World War and the Making of Modern Europe	3
HISTORY 3294	History of Global Capitalism: From Slavery to Neoliberalism	3
HISTORY 3296	Environment and Empire	3
HISTORY 3404	The Creation of Capitalism	3
POLSCI 3171	Conflict and Security in International Relations	3
POLSCI 3171	International Conflict Management & Resolution	3
POLSCI 3173	International Political Economy	3
POLSCI 3328	Energy Politics	3
POLSCI 3399	Political Violence	3
POLSCI 4306	Global Justice	3
POLSCI 4792	Globalization and National Politics	3
SOC 3000	Social Theory	3
SOC 4170	Global Structures and Problems	3
WGSS 4153	Decolonization to Globalization: How to End an Empire	3

Research Methods Courses

Students choose one course from the following list, for a total of 3 units:

Code	Title	Units
AFAS 4402	Intersectionality	3
ANTHRO 4123	Argumentation Through Ethnography	3
ANTHRO 4481	Writing Culture	3
ANTHRO 4517	Anthropology and Development	3
ANTHRO 4803	Advanced GIS Modeling and Landscape Analysis	3
APL 4111	Linguistics and Language Learning	3
ARCH 3404	Community Building	3
CAPS-ECON 4090	Econometric Techniques	3
CAPS-GIS 2000	Introduction to GIS	3
CAPS-GIS 3000	Advanced GIS	3
CAPS-GIS 3005	Digital Cartography	3
CAPS-GIS 4010	Spatial Data Modeling and Design	3
CAPS-IA 5000	Process and Design of Research (U85)	3
CAPS-IA 5380	Alternative Analytic Techniques for International Affairs (U85)	3
CAPS-NPM 4050	Social Entrepreneurship (only if offered in person)	3
CFH 4000	Merle Kling Undergraduate Honors Fellowship Seminar	3
COMPLITTHT 3203	Worldwide Translation: Language, Culture, Technology	3
CSE 1301	Introduction to Computer Science	3
DAT 1200	Managerial Statistics I	3
DAT 1201	Managerial Statistics II	3
ECON 3150	Introduction to Econometrics	3
ENST 3710	Applications in GIS	3
GLOBAL 3248	Intercultural Communication	3
GLOBAL 4007	Global Studies Research Methods Proseminar and Assistantship	3
GLOBAL 4414	Gender Analysis for International Affairs	3
HISTORY 3007	Historical Methods-African History	3
HISTORY 3008	Historical Methods-Latin American History	3
HISTORY 3009	Historical Methods-Middle Eastern History	3
HISTORY 3314	Historical Methods-European History	3
HISTORY 3315	Historical Methods-Transregional History	3
PHIL 3130	Philosophy of Science	3
POLSCI 2400	Data Science for Politics	3
POLSCI 3015	Computational Modeling in the Social Sciences	3
POLSCI 3621	Politics and the Theory of Games	3
POLSCI 3630	Quantitative Political Methodology	3
POLSCI 4043	Public Policy Analysis, Assessment and Practical Wisdom	3
POLSCI 4905	Research Design and Methods	3
PSYCH 3000	Introduction to Psychological Statistics	3
SDS 1600	Introduction to Statistics	3
SDS 2020	Elementary Probability and Statistics	3
SDS 3020	Elementary to Intermediate Statistics and Data Analysis	3
SDS 4210	Statistical Computation	3
SOC 3040	Statistics for Sociology	3
Civic Scholars Program*		max. 3
Mellon Mays Fellows Program*		max. 3

* Global Studies allows students to use one course from either the Civic Scholars Program or the Mellon Mays Fellows Program as their Research Methods course. **Note:** Both of these are multi-semester programs, and Civic Scholars courses are offered at 2 units per course.

Advanced Courses

Students choose five courses from current, relevant, internationally focused course offerings in the following departments.* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

African and African-American Studies

- Islam, Culture and Society in West Africa (AFAS 3062)
- Topics on Africa: African Urban Futures (AFAS 3070)
- Culture, Politics and Society in Francophone Africa (AAS 3113)
- Capitalism, Socialism and Labor: The Political Economy of 20th Century Africa (AFAS 3117)
- African Immigration to the United States of America (AFAS 3120)
- African Civilization: 1800 to the Present (AFAS 3130)
- African Civilization to 1800 (AFAS 3160)
- Emerging Africa: Language, Identity and Social Change (AFAS 3385)
- Language and Society in Africa: The Polics of Identity and Empowerment (AFAS 3680)
- Terror and Violence in the Black Atlantic (AFAS 3880)
- Gender, Sexuality and Change in Africa (AFAS 4090)
- Engineering Authority: Design, Architecture and Power in Africa (AFAS 4100)
- Black Decolonial Thought (AFAS 4104)
- Topics in African History: Power and Rebellion in 20th Century Africa (AFAS 4170)
- Sufism and Islamic Brotherhood in Africa (AFAS 4213)
- Advanced African History Seminar (AFAS 4290)

Anthropology

- Anthropology of Refugees, Asylum and Forced Migration (ANTHRO 3038)
- Africa: Peoples and Cultures (ANTHRO 3045)
- Topics in Anthropology: Global Mental Health (ANTHRO 3103)
- Politics and Religion in Contemporary Society (ANTHRO 3157)
- Archaeology of China: Food and People (ANTHRO 3163)
- Culture and Health (ANTHRO 3170)
- Gender, Culture, and Madness (ANTHRO 3201)
- Food, Culture, and Power (ANTHRO 3215)
- Health, Healing and Ethics: Intro to Medical Anthropology (ANTHRO 3310)
- Women and Islam (ANTHRO 3313)
- Economies as Cultural Systems (ANTHRO 3391)
- Global Energy and the American Dream (ANTHRO 3472)
- Anthropology of Human Rights (ANTHRO 3521)
- Environmental Inequality: Toxicity, Health, and Justice (ANTHRO 3602)
- Culture and Environment (ANTHRO 3610)
- Population and Society (ANTHRO 3612)
- Anthropology of Human Birth (ANTHRO 3621)
- Meltdown: The Archaeology of Climate Change (ANTHRO 3796)
- Transnational Reproductive Health Issues: Meanings, Technologies, Practices (ANTHRO 4022)
- Culture, Illness and Healing in Asia (ANTHRO 4033)
- Topics in Anthropology: Ethnographies of Care (ANTHRO 4100)
- The AIDS Epidemic: Inequalities, Ethnography and Ethics (ANTHRO 4134)
- Anthropology of Food (ANTHRO 4215)
- Political Ecology (ANTHRO 4282)
- Sex, Gender, and Power (ANTHRO 4365)
- Europe's New Diversities (ANTHRO 4366)
- Anthropology and Development (ANTHRO 4517)
- Biomarkers: Measuring Population Health, Reproductive, and Social Endocrinology (ANTHRO 4598)
- Out of the Wild: Domestication and Socioeconomic Diversity in Africa (ANTHRO 4771)
- Social Theory and Anthropology (ANTHRO 4772)

Applied Linguistics

- Second Language Acquisition and Technology (APL 4023)
- Linguistics and Language Learning (APL 4111)
- Reading Across Languages and Cultures: Theory, Research and Practice (APL 4692)

Arabic

- Topics in Modern Arabic Literature in Translation: The Syrian Revolution: Literature, Art, Ideology (ARAB 4130)

Architecture

- Community Building (A46 Arch 307X)

Art History

- Globalization and Contemporary Art (ARTARCH 4726)

Biology and Biomedical Sciences

- Intro to Ecology (BIOL 3810)
- Community Ecology (BIOL 4196)

Chinese

- Historical Landscape and National Identity in Modern China (CHINA 3160)
- Contemporary Chinese Popular Culture (CHINA 3210)
- Topics in Chinese Lit & Culture: Chinese Cities in the Global Context (CHINA 3300)
- US-China Relations: from 1949 to the Present (CHINA 3500)

Classics

- Money, Exchange and Power: Economy and Society in the Ancient Mediterranean World (CLASSICS 4760)

Earth, Environmental, and Planetary Sciences

- Topics in Environmental Sustainability (EEPS 3080)

East Asian Languages and Cultures

- Topics in Early Modern Korea: Guns, Tobacco, and Sweet Potato: A History of Material Culture EALC 3250)
- US-China Relations from Conflict to Engagement, 1949-2016 (EALC 3600)
- US-China Relations, 2017-present (EALC 3610)
- Nature, Technology and Medicine in Korea (EALC 4200)
- Culture and Politics in the People's Republic of China: New Approaches (EALC 4240)
- Urban Culture in Modern China (EALC 4510)

Economics

- Intro to Econometrics (ECON 3150)
- Labor and the Economy (ECON 3345)
- Environmental Policy (ECON 3350)
- International Economics (ECON 3373)
- American Economic History (ECON 3640)
- Economic Realities of the American Dream (ECON 3840)
- Intermediate Microeconomic Theory (ECON 4001)
- Intermediate Macroeconomic Theory (ECON 4002)
- Applied Econometrics (ECON 4151)
- Open Economy Macroeconomics (ECON 4220)
- Behavioral Economics (ECON 4310)
- Public Finance (ECON 4325)
- Urban Economics (ECON 4360)
- Economics of Education (ECON 4390)
- Topics in Growth and Development (ECON 4520)
- Advanced Topics in Modern Economic Growth (ECON 4521)

Education

- Education, Childhood, Adolescence and Society (EDUC 3050)
- Sociology of Education (EDUC 4430)

Environmental Studies

- Environmental Modernism (ENST 3034)
- Community Based Conservation: Madagascar Sustainability Initiative (ENST 3060)
- Environmental Issues: Writing (ENST 3340)
- Sustainable Cities (ENST 3530)
- Environmental Justice (ENST 3540)
- Urban Ecology (ENST 3610)
- Applications in GIS (ENST 3710)
- Intro to Environmental Law (ENST 4510)
- IPCC: Governance, Policy and Science (ENST 4527)
- Advanced GIS (ENST 4710)
- International Climate Negotiation Seminar (ENST 4820)
- Interdisciplinary Environmental Clinic (ENST 5830)

Film and Media Studies

- Transnational Cinema(s): Film Flows in a Changing World (FILM 3410)

Finance (Business School)

- International Finance (B52 Finance 443)

Germanic Languages and Literatures

- Topics in Holocaust Studies: Children in the Shadow of the Swastika (GERMAN 3060)

Global Studies

- Global Health and Language (GLOBAL 3006)
- Topics in Global Studies: Modern Indian Literature (GLOBAL 3008)
- Topics in Global Studies: Understanding Today's Russia (GLOBAL 3008)
- Global Futures (GLOBAL 3020)
- Chinese Economy in World History (GLOBAL 3176)
- Intercultural Communication (GLOBAL 3248)
- Global Surveillance Culture (GLOBAL 3511)
- "Model Minority": The Asian American Experience (GLOBAL 3512)
- Andean History: Culture and Politics (GLOBAL 3566)
- Borders, Checkpoints, and the Frontiers of Literature (GLOBAL 3602)
- Anarchism: History, Theory and Praxis (GLOBAL 3641)
- Russian Literature and Empire OR Russian Literature at the Borders: Multiculturalism and Ethnic Conflict (GLOBAL 3740)

- Topics in Russian Lit and Culture: Madmen or Visionaries? (WI) (GLOBAL 3750)
- Topics in Russian Lit and Culture: The Short Story (WI) (GLOBAL 3750)
- Topics in Russian Lit and Culture: The Soviet Experiment through Novels and Novellas (GLOBAL 3750)
- Nabokov and Others: Emigration, Literature, Identity (GLOBAL 3790)
- Nabokov in Europe and America (GLOBAL 3790)
- From McDonald's to K-Pop: New Movements in Asia (GLOBAL 3822)
- Empire in East Asia: Theory and History (WI) (GLOBAL 3860)
- Interrogating "Crime and Punishment" (GLOBAL 3866)
- Furies and Die-Hards: Women in Rebellion and War (GLOBAL 3890)
- Children of Immigrants: Identity and Acculturation (GLOBAL 4036)
- International Relations of Latin America (GLOBAL 4201)
- International Relations of Latin America (WI) (GLOBAL 4204)
- Islam, Immigration and the Future of European Culture (GLOBAL 4220)
- Gender Analysis in International Affairs (GLOBAL 4414)
- Latin American Populism and Neo-Populism (GLOBAL 4611)
- Labor and Labor Movements in Global History (GLOBAL 4622)
- 20th Century Latin American Revolutions (GLOBAL 4633)
- The Indochina Wars (GLOBAL 4644)
- Russia and the West: Creating and Representing Identity (GLOBAL 4868)
- Reading War and Peace (GLOBAL 4869)
- Global Asias (GLOBAL 4897)

Hindi

- Religion and Culture in South and Southeast Asia (HINDI 3050)

History

- Historical Methods (in appropriate modern, non-U.S. region)
- Historical Methods: Decolonization in the 20th Century (HISTORY 3006)
- Historical Methods: African History (HISTORY 3007)
- Historical Methods: Latin American History (HISTORY 3008)
- Historical Methods: Middle Eastern Politics (HISTORY 3009)
- Hot Peace: US – Russia Relations Since the Cold War (HISTORY 3018)
- The Global War on Terrorism (HISTORY 3030)
- Jews in French History and Culture (HISTORY 3034)
- Islamic History: 600-1200 (HISTORY 3039)
- Early Modern China (HISTORY 3047)
- Chinese Diaspora: A Social History of Global Migration (HISTORY 3049)
- Modern Latin America (HISTORY 3070)
- 19th Century China: Violence and Transformation (HISTORY 3085)
- The Holocaust: History and Memory of the Nazi Genocide (HISTORY 3087)
- Vienna, Prague, Budapest: Politics, Culture and Identity in Central Europe (HISTORY 3092)
- Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History (HISTORY 3093)
- The World Is Not Enough: Europe's Global Empires, 1400-1750 (HISTORY 3103)
- War, Genocide and Gender in Modern Europe (HISTORY 3104)

* Students may submit a request to add a course by following the instructions for the Petition Process.

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 3000 or 4000 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Study abroad credit only counts at the 3000 level.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, the School of Continuing & Professional Studies, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit form with Arts & Sciences to take the course for "general credit" and then petition to have the course count as an elective toward their Global Studies major.
- Students may not receive credit for January Intensive Term (J-Term) study abroad programs; these programs are too short in duration.

Latin Honors

- Students must graduate with an overall grade point average of 3.65 or higher to qualify for Latin Honors.
- Students must submit an intent form and be accepted for candidacy.
- Students should enroll in GLOBAL 4985 during the fall of senior year and in GLOBAL 4986 during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

All Global Studies majors must satisfy a language requirement that entails both the successful completion of four semesters of a modern language for a letter grade and placement into the third year of that language.

Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili.

Please see the FAQs on the Global Studies website for more information.

Global Studies Major, Eurasian Studies Concentration

Program Requirements

- **Total Units Required:** 36

This concentration focuses on the social, cultural, and economic interconnections among the peoples of Eurasia. We define Eurasia as the vast landmass stretching east to west from China to Europe and north to south from Siberia into the Caucasus, the Crimean Peninsula, Central Asia, and the Himalayas. Ancient trade routes that crisscrossed the interior spaces of Europe and Asia, known collectively as the Silk Road, served as a globalizing thoroughfare for the movement of peoples, cultural practices, religious values, and commodities. Recent infrastructural improvements in these areas — as well as international economic, environmental, and political concerns — have once again opened up transnational economic networks and cross-cultural exchange along these "new silk roads."

Concentration Objectives

For the Eurasian Studies concentration, students draw from a variety of disciplines to study not only specific geographical regions but also vital intersections and interrelationships among regions and peoples.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 3000 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 4000 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of coursework:

- 3 units of core coursework: GLOBAL 3020 Global Futures
- 6 units of introductory coursework (1000-2000 level)
- 27 units of advanced Eurasian studies coursework (3000-4000 level) dealing with three different regions (e.g., Eastern, Western, and Central Eurasia) or with a transregional focus
- Students must fulfill the standard Global Studies language requirement with Arabic, Chinese, Hebrew, Hindi, Persian, Russian, or another Eurasian language as determined in consultation with their Global Studies advisor.
- The study abroad location must be in a country relevant to this concentration area. Otherwise, the student will not meet the study abroad requirement and will need to complete an additional 3000- or 4000-level course on campus.

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or regional). Some of these requirements may be completed while abroad.

Advanced Courses

Students choose nine courses from current, relevant, internationally focused course offerings in the following areas of study.* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

Code	Title	Units
Anthropology		
ANTHRO 3053	Nomadic Strategies and Extreme Ecologies	3
ANTHRO 3285	Warriors, Merchants, Monks, and Courtesans: Ancient Narratives of Globalization in Google Earth	3

Global Studies Major, European Studies Concentration

Program Requirements

- **Total Units Required:** 36
- **Grade Requirement:** Student must receive a grade of C+ or higher in all courses

This concentration focuses on the new Europe and its historical and cultural contexts, attempting to understand the European contribution to world politics and cultural exchange. It involves the study of both traditional and new European cultural products (e.g., literature, film, visual art, electronic media) as well as of European institutions and contexts. This concentration will educate students interested in understanding Europe for its own sake but also help them to discover the ways in which the continent connects with other parts of the world. The concentration is committed to interdisciplinary approaches, and students may take courses in the traditional language-and-literature disciplines as well as in anthropology, art history, economics, film, history, music, philosophy, and political science.

Concentration Objectives

The European Studies concentration defines the geography of modern Europe to include the Atlantic world as well as its Eurasian and Mediterranean neighbors.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 3000 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 4000 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of coursework:

- 3 units of core coursework: GLOBAL 3020 Global Futures
- 3 units of introductory coursework (1000 or 2000 level)
- 3 units of European history coursework (3000 level or above from history department offerings on Europe [from 1750 forward])
- 3 units of non-European world area coursework (any level)
- 24 units of advanced European studies coursework (3000-4000 level; at least one course must focus on gender, race, or class)
- Students must fulfill the standard Global Studies language requirement with a European language consistent with their study abroad location (e.g., French, German, Italian, Portuguese, Spanish).

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary; race, gender, class; or world area). Some of these requirements may be completed while abroad.

Introductory Courses

Students choose one course from this list, for a total of 3 units:

Code	Title	Units
GLOBAL 2000	Crossing Borders	
GLOBAL 2009	Introduction to European Studies *preferred	
HISTORY 1020	Barbarity and Civilization: Introduction to Modern European History	
HISTORY 2158	FYS: Outcasts and Outlaws: The History of Othering in Modern Europe	

Non-European Area Courses

Students choose one course, for a total of 3 units. We consider world areas to be Africa, East Asia, Eurasia, Latin America, the Middle East, and South Asia. Courses that may be used to satisfy this requirement may include advanced area-specific courses or the following lower-level courses:

Code	Title	Units
ARTARCH 1510	Introduction to Asian Art	
CHINA 2270	Chinese Civilization	
GLOBAL 1104	Chinatown: Migration, Identity and Space	
GLOBAL 1105	East Asia in the World	
GLOBAL 2100	The Public Servant and Other Heroes: A History of Japan Through Film	
HISTORY 1124	The Meaning of Pakistan: History, Culture, Art	
JAPAN 2260	Japanese Civilization	
JIMES 2081	Introduction to Jewish Civilization	
JIMES 2100	Introduction to Islamic Civilization	
KOREA 2230	Korean Civilization	
LATAM 1000	Latin America: Nation, Ethnicity and Social Conflict	

Gender, Race, and Class Courses

Students pursuing this concentration are required to complete one upper-level course focused on gender, race, or class that is chosen from the following list:

Code	Title	Units
AFAS 3062	Islam, Culture and Society in West Africa	3
AFAS 3360	Zambaje: Afro-Indigenous Relations in Latin America	3
AFAS 4090	Gender, Sexuality and Change in Africa	3
ANTHRO 3313	Women and Islam	3
ANTHRO 4134	The AIDS Epidemic: Inequalities, Ethnography and Ethics	3
ANTHRO 4365	Sex, Gender, and Power	3
ANTHRO 4366	Europe's New Diversities	3
ARCH 307X	Community Building	3
CHINA 4390	Topics in Chinese Lit & History: Writing Women of the Late Imperial and Early Republican Periods	3
COMPLITTHT 3101	An Intellectual History of Sex and Gender	3
COMPLITTHT 3300	Topics in Comp Lit: The Asian Experience: Negotiating the In-Betweenness	3
COMPLITTHT 4492	Topics in Comp Lit: Writing from the Periphery: The Question of Chineseness	3
ELIT 3106	Topics in Asian American Literature: Gender and Sexuality in American Asian Lit	3
ELIT 3111	Topics in English & American Lit: Asian American Writings: Contesting American Constructions of the Alien Other	3
GLOBAL 3248	Intercultural Communication	3
GLOBAL 3512	"Model Minority": The Asian American Experience	3
GLOBAL 3840	Migration & Modernity: Human Mobility, Identity & State Formation in the Russian/ Soviet/Post-Soviet Context	3
GLOBAL 3880	Topics in Migration and Identity	3
GLOBAL 3890	Furies and Die-Hards: Women in Rebellion and War	3
GLOBAL 4036	Children of Immigrants: Identity and Acculturation	3
GLOBAL 4414	Gender Analysis in International Affairs	3
HEBREW 3090	Israeli Women Writers	3
HISTORY 3049	Chinese Diaspora: A Social History of Global Migration	3
HISTORY 3087	The Holocaust: History and Memory of the Nazi Genocide	3
HISTORY 3094	History of the Jews in Islamic Lands	3
HISTORY 3104	War, Genocide and Gender in Modern Europe	3
HISTORY 3131	Gender, Sexuality and Communism in 20th Century Europe	3
HISTORY 3146	Topics in European History: Modern European Women	3
HISTORY 3951	Imperialism and Sexuality: India, South Asia, and the World (WI)	3
HISTORY 4038	Beyond the Harem: Women, Gender and Revolution in the Modern Middle East	3
ITAL 3500	Topics in Italian Lit and Culture: Global Italy: Race, Gender, Migration and Citizenship	3
ITAL 4302	Divergent Voices: Italian Women Writers	3
JAPAN 3260	Topics in Modern Japanese Lit: Mirrors and Masks: Gender and Sexuality in Japanese Literature	3
JAPAN 4490	Modern Japanese Women Writers	3
JAPAN 4495	Modern Japanese Women Writers: Writing-Intensive Seminar	3
JIMES 3184	A Rainbow Thread: A History of Queer Identitites in Judaism and Islam	3

JIMES 4043	Race and Ethnicity in the Middle East and North Africa	3
KOREA 3550	Topics in Korean Lit & Culture: Sexing Korea: Gender & Sexuality in Korean Pop Culture	3
KOREA 4550	Topics in Korean Lit & Culture: Gender in Korean Literature and Film	3
LATAM 3020	Survey of Brazilian Cultures: Race, Nation and Society	3
LATAM 3060	Survey of Southern Cone Cultures: Argentina, Chile, and Uruguay	3
LATAM 4120	Gender and Modernity in Latin America	3
LATAM 4280	Constructing the (Racial) Other: Race and Ethnicity in Latin America from the Colonial Caste System to U.S. Latinos	3
RELPOL 3070	Islam, Gender, Sexuality	3
SOC 3190	Gender in Society	3
SOC 4170	Global Structures and Problems	3
SOC 4831	Global Racial Systems	3
SPAN 4500	Special Topics in Hispanic Literature and Culture: Spanish Women Writers from the Enlightenment to the Contemporary Period	3
SPAN 4500	Special Topics in Hispanic Literature and Culture: Women's Writing in Latin America	3
WGSS 3014	Queer Citizenship	3
WGSS 3041	Making Sex and Gender: Understanding the History of the Body	3
WGSS 3203	Bodies Out of Bounds: Feminist and Queer Disability Studies	3
WGSS 3256	Sex Trafficking	3
WGSS 3550	Trans* Studies	3
WGSS 3555	Caste: Sexuality, Race and Globalization	3
WGSS 3685	Gender Violence	3
WGSS 4085	Everyday Unruliness: Feminist and Queer Resistance	3
WGSS 4150	Feminist Literary and Cultural Theory	3
WGSS 4245	Transnational Feminisims	3

Advanced Courses

Students choose nine courses from current European-focused course offerings in the following departments.* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

African and African American Studies

- Terror and Violence in the Black Atlantic (AFAS 3880)

Anthropology

- Anthropology of Refugees, Asylum and Forced Migration (ANTHRO 3038)
- Sex, Gender, and Power (ANTHRO 4365)
- Europe's New Diversities (ANTHRO 4366)
- Culture, Power, Knowledge (ANTHRO 4367)
- Writing Culture (ANTHRO 4481)
- Advanced GIS Modeling and Landscape Analysis (ANTHRO 4803)

Applied Linguistics

- Second Language Acquisition and Technology (APL 4023)
- Linguistics and Language Learning (APL 4111)
- Reading Across Languages and Cultures: Theory, Research and Practice (APL 4692)

Art History

- Topics in Art History (WI): Fauvism and Expressionism in Europe, c. 1905-1945 (ARTARCH 3000)
- Pleasure and Pain: European Fashion as (Art) History (ARTARCH 3380)
- The Modernist Project: Art in Europe and the US, 1905-1980 (ARTARCH 3500)
- Rococo to Revolution: Art in 18th Century Europe (ARTARCH 3520)
- Rejecting Reason: Dada and Surrealism in Europe and the United States (ARTARCH 3590)
- Modern Sculpture: Canova to Koons (ARTARCH 3637)
- The Century of Picasso (ARTARCH 4545)
- Gauguin Then and Now: Art, Myth and Controversy (ARTARCH 4575)
- The Impressionist Landscape: Style, Place and Global Legacies 1870-1920 (ARTARCH 4605)
- Impressionism and the Nation in France and Beyond: Painting and Photography 1860-1920 (ARTARCH 4610)
- 1968 and Its Legacy (ARTARCH 4735)
- Marking History: Painting and Sculpture After World War II in the US, France and Germany (ARTARCH 4879)

Classics

- Greek History: The Dawn of Democracy (CLASSICS 3450)

Comparative Literature

- Intro to Comparative Arts: the 20th Century (COMPLIT 3030)
- Intro to Comparative Arts: Cultural Constructs (COMPLIT 3030)
- Paris and New York: The Art of the City (COMPLIT 3320)
- Topics in Comparative Literature: Points of Intersection (COMPLIT 3320)
- Topics in Comparative Literature: Central European Modernisms (COMPLIT 3320)
- Intro to Comparative Literature (COMPLIT 4020)

- Topics in Lit and History: Constructing Strangeness: Witches, Ghosts & Vampires (1500-2000) (COMPLIT 4112)
- The Commedia dell'Arte (COMPLIT 4121)
- The Unmaking and Remaking of Europe: The Literature and History of the Great War of 1914-1918 (COMPLIT 4931)

Drama

- Seminar: Actors as Celebrities + Public Figures - 18th Century England + France (DRAMA 4305)

Economics

- Open Economy Macroeconomics (ECON 4220)

English Literature

- Introduction to Literary Theory (ELIT 3000)
- Topics in English & American Lit: International Modernism (ELIT 3107)
- Topics in English & American Lit: British Fiction 1900-1945 (ELIT 3111)
- Topics in English & American Lit: British & Anglophone Fiction 1945 – Present (ELIT 3113)
- Introduction to Postcolonial Literature (ELIT 3138)
- Modern British Literature (ELIT 3139)
- Topics in Lit: Drama Queens: Cleopatra in Elizabethan England (ELIT 3140)
- Topics in Lit: 20th Century Irish Poetry: Yeats and Heaney (ELIT 3173)
- The Victorian Period (ELIT 3157)
- Shakespeare (ELIT 3163)
- Topics in Irish Lit: Understanding Recent (Irish) Poetry (ELIT 4133)
- English Novel of the 19th Century (ELIT 4137)
- Topics in English Lit II: Sex and the City – Sexual Economies in Early Modern London (ELIT 4147)
- Frankenstein: Origins and Afterlives (ELIT 4155)

Environmental Studies

- IPCC: Governance, Policy and Science (ENST 4527)

Film and Media Studies

- British Cinema (FILM 3200)
- French Film Culture (FILM 3250)
- Screening the Holocaust (FILM 4750)

French

- French Culture and Civilization: The New Face of France (FRENCH 3015)
- Topics I: Sport et Societé (FRENCH 3210)
- Topics II: In Perspective: Graphic Novels (FRENCH 3220)
- Topics II: In Perspective: The French New World (FRENCH 3220)
- French Lit I: Dramatic Voices: Poets and Playwrights (FRENCH 3250)
- French Lit II: Narrative Voices: Fiction and Non-Fiction (FRENCH 3260)
- In-Depth: Science Fiction (FRENCH 3740)
- In-Depth: Medical Narratives, Narrative Medicine (FRENCH 3750)
- Cinema and Society (FRENCH 3760)
- The 19th Century French Novel: From Realism to Naturalism to Huysmans (FRENCH 4150)
- The French Islands: Isles and Exiles: Lit of the Francophone Tropics (FRENCH 4191)
- Tragedy and Farce in African Francophone Literature (FRENCH 4192)
- The 20th Century French Novel (FRENCH 4210)
- Topics in French Lit and History: Perspectives on Paris (FRENCH 4610)

German

- Topics in Holocaust Studies: Children in the Shadow of the Swastika (GERMAN 3060)
- German Literature and the Modern Era (GERMAN 3080)
- German Thought and the Modern Era (GERMAN 3081)
- Germany Today (GERMAN 4040)
- German Lit and Culture, 1750-1830 (GERMAN 4061)
- German Lit and Culture, 1830-1914 (GERMAN 4062)
- German Lit and Culture, 1914-Present (GERMAN 4063)
- Studies in Genre (GERMAN 4070)
- Topics in German Studies: Kafka and his Contemporaries (GERMAN 4080)
- Topics in German Studies: Telling Tales - The Magical, the Wondrous, and the Strange (1500-present) (GERMAN 4080)
- Topics in German Studies: The Book Was Better Than the Movie: Literary Adaptations in the Age of Multimedia (GERMAN 4080)
- Contemporary German Literature (GERMAN 4380)

Global Studies (*All* GS Home-based courses count for this concentration)

- Global Health and Language (GLOBAL 3006)
- Topics in Global Studies: Modern Indian Literature (GLOBAL 3008)
- Global Futures (GLOBAL 3020)
- Global Surveillance Culture (GLOBAL 3511)
- Borders, Checkpoints, and the Frontiers of Literature (GLOBAL 3602)
- Anarchism: History, Theory and Praxis (GLOBAL 3641)
- Russian Literature and Empire OR Russian Literature at the Borders: Multiculturalism and Ethnic Conflict (GLOBAL 3740)
- Topics in Russian and Culture: Madmen or Visionaries? (WI) (GLOBAL 3750)
- Topics in Russian and Culture: The Short Story (WI) (GLOBAL 3750)
- Topics in Russian Literature and Culture: The Soviet Experiment through Novels and Novellas (GLOBAL 3750)
- Nabokov and Others: Emigration, Literature, Identity (GLOBAL 3790)
- Nabokov in Europe and America (GLOBAL 3790)

- Migration & Modernity: Human Mobility, Identity & State Formation in the Russian/Soviet/Post-Soviet Context (GLOBAL 3840)
- Empire in East Asia: Theory and History (WI) (GLOBAL 3860)
- Interrogating "Crime and Punishment" (GLOBAL 3866)
- Topics in Migration and Identity (GLOBAL 3880)
- Furies and Die-Hards: Women in Rebellion and War (GLOBAL 3890)
- Global Studies Research Methods Proseminar and Assistantship (GLOBAL 4007)
- Islam, Immigrants and the Future of European Culture (GLOBAL 4200)
- Gender Analysis in International Affairs (GLOBAL 4414)
- Labor and Labor Movements in Global History (GLOBAL 4622)
- Russia and the West: Creating and Representing Identity (GLOBAL 4868)
- Reading War and Peace (GLOBAL 4869)

History

- Jews in French History and Culture (HISTORY 3034)
- The Holocaust: History and Memory (HISTORY 3087)
- Vienna, Prague, Budapest: Politics, Culture and Identity in Central Europe (HISTORY 3092)
- Becoming "Modern": Emancipation, Anti-Semitism and Nationalism in Modern Jewish History (HISTORY 3093)
- The World Is Not Enough: Europe's Global Empires, 1400-1750 (HISTORY 3103)
- War, Genocide and Gender in Modern Europe (HISTORY 3104)
- Riots and Revolution: A History of Modern France from 1789 to the Present (HISTORY 3109)
- Modern Germany (HISTORY 3111)
- Europe in the 20th Century: Unruly Populations (HISTORY 3116)
- Gender, Sexuality and Communism in 20th Century Europe (HISTORY 3131)
- Révolution with an Accent: The Haitian and French Revolutions, 1770-1805 (HISTORY 3135)
- Socialist and Secular? A Social History of the Soviet Union (HISTORY 3137)
- 20th Century Russian History (HISTORY 3138)
- Topics in European History: Modern European Women (HISTORY 3146)
- The First World War and the Making of Modern Europe (HISTORY 3148)
- Out of the Shtetl: Jewish Life in Central and Eastern Europe in the 19th and 20th Centuries (HISTORY 3351)
- Race, Ethnicity, and Migration: A Transatlantic History (HISTORY 3514)
- The Cold War: 1945-1991 (HISTORY 3682)
- European Population Politics, 1900-2000 (HISTORY 3715)
- Unruly Populations: Biopolitics in 20th-Century Europe (HISTORY 3715)
- The Fascist Challenge in Europe, 1919 – 1945 (HISTORY 4035)
- Humanitarianism and Human Rights (HISTORY 4092)
- Advanced Seminar in History: History of the Body (HISTORY 4889)

Interdisciplinary Project in the Humanities

- Introduction to Digital Humanities: Cultural Analysis in the Information Age (IPH 3121)
- The Traffic in Women and Contemporary European Cinema (IPH 3600)
- Imagining the City: Crime and Commerce in Early Modern London (IPH 4260)

Italian

- Italian Literature II (WI) (ITAL 3240)
- Topics in Film Studies: Cinema and Society in Contemporary Italy (ITAL 3320)
- Topics in Italian Lit and Culture: Global Italy: Race, Gender, Migration and Citizenship (ITAL 3500)
- Disease, Madness, and Death Italian Style (ITAL 4080)
- Divergent Voices: Italian Women Writers (ITAL 4302)
- Caffé, Cadavers, Comedy and Castrati: Italy in the Age of the Grand Tour (ITAL 4370)

Jewish, Islamic and Middle Eastern Studies

- Diaspora in Jewish and Islamic Experience (JIMES 4005)

Philosophy

- Kant and 19th Century Philosophy (PHIL 3290)
- Advanced Social and Political Philosophy (PHIL 4321)

Political Science

- Politics of the European Union (POLSCI 3096)
- Topics in Politics: Political Economy of Immigration (POLSCI 3189)
- Topics in Politics: Comparative Political Parties (POLSCI 3242)
- History of Political Thought (POLSCI 3391)
- History of Political Thought (POLSCI 3392)
- Understanding Political Protest and Violence (POLSCI 3565)
- Quantitative Political Methodology (POLSCI 3630)
- History of Political Thought (POLSCI 3930)
- Global Justice (POLSCI 4306)
- Research Design and Methods (POLSCI 4905)

Russian

- Russian Theatre, Drama and Performance: From Swan Lake to Punk Prayer (RUSS 3320)
- The 19th Century Russian Novel (RUSS 3500)
- Dostoevsky's Novels (RUSS 3721)

Sociology

- Statistics for Sociology (SOC 3040)
- Sociology of Immigration (SOC 3150)
- Gender in Society (SOC 3190)
- Global Racial Systems (SOC 4831)

Spanish

- Literary and Cultural Studies in Spanish (SPANISH 3410)
- Iberian Literatures and Cultures (SPANISH 3420)
- Special Topics in Hispanic Literature and Culture: Spanish Women Writers from the Enlightenment to the Contemporary Period (SPANISH 4500)

Women Gender and Sexuality Studies

- Making Sex and Gender: Understanding the History of the Body (WGSS 3041)
- Feminist Literary Theory and Cultural Theory (WGSS 4150)

* Students may submit a request to add a course by following the instructions for the Petition Process.

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 3000 or 4000 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Study abroad credit only counts at the 3000 level.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, the School of Continuing & Professional Studies, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit form with Arts & Sciences to take the course for "general credit" and then petition to have the course count as an elective toward their Global Studies major.
- Students may not receive credit for January Intensive Term (J-Term) study abroad programs; these programs are too short in duration.

Latin Honors

- Students must graduate with an overall grade point average of 3.65 or higher to qualify for Latin Honors.
- Students must submit an intent form and be accepted for candidacy.
- Students should enroll in GLOBAL 4985 during the fall of senior year and in GLOBAL 4986 during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

All Global Studies majors must satisfy a language requirement that entails both the successful completion of four semesters of a modern language for a letter grade and placement into the third year of that language.

Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili.

Please see the FAQs on the Global Studies website for more information.

Global Studies Major, Global Asias Concentration

Program Requirements

- **Total Units Required:** 36

Global Asias provides the means for students to study Asia transnationally and transculturally, thereby expanding the geographic concept of the region beyond a set of political entities occupying a specific world region. East Asia, South Asia, Southeast Asia, Central Asia, and the Asian diaspora are all part of this concentration, with the goal of recognizing that the flows of people, objects, ideas, and practices of Asia have spread across the region and around the globe.

Concentration Objectives

Drawing on a range of approaches, the Global Asias concentration provides the means to study Asia in its many manifestations — in the past and in the present — in our world today.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 3000 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 4000 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level coursework undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of coursework:

- 3 units of introductory coursework (1000-2000 level)
- 3 units of core course: GLOBAL 3020 Global Futures
- 3 units of core coursework: GLOBAL 4897 Global Asias
- 6 units of multiethnic, diaspora, transnational, or transregional Asia-related coursework (at least 3 units at the 3000-4000 level)
- 21 units of advanced Global Asias coursework (3000-4000 level; at least one course must focus on premodern Asias [pre-1850])
- East Asia, North Asia, South Asia, Southeast Asia, Central Asia, and the Asian diaspora are the relevant areas for the Global Asias concentration. A student must complete one course in at least three of these areas or with a transregional focus.
- Students must fulfill the standard Global Studies language requirement with Arabic, Chinese, Hindi, Japanese, Korean, or Urdu. Russian may be considered upon petition if a student is a native speaker of one of the listed languages or has tested into the fourth year of one of the listed languages.
- The study abroad location must be in a country relevant to this concentration area. Otherwise, the student will not meet the study abroad requirement and will need to complete an additional 3000- or 4000-level course on campus.

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or regional). Some of these requirements may be completed while abroad.

Introductory Courses

Students choose one course from this list, for a total of 3 units:

Code	Title	Units
AMCS 2003	Doctors and Terrorists: The Fictions of South Asian America	3
ARTARCH 1111	First Year Seminar: Beijing and the Forbidden City	3
ARTARCH 1510	Introduction to Asian Art	3
CHINA 2270	Chinese Civilization	3
GLOBAL 1102	First-Year Seminar: The Vietnam Wars	3
GLOBAL 1104	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GLOBAL 2000	Crossing Borders: An Introduction to Institutions and Concepts in Global Studies	3
HISTORY 1099	First-Year Seminar: Silk Roads and Empires	3
HISTORY 1124	First-Year Seminar: The Meaning of Pakistan: History, Culture, Art	3
JAPAN 2260	Japanese Civilization	3
JIMES 2100	Introduction to Islamic Civilization	3
KOREA 2230	Korean Civilization	3

Multiethnic, Diaspora, Transnational, or Transregional Asia-Related Courses

Students choose two courses from this list, for a total of 6 units; at least one course must be at the 3000 or 4000 level:

Code	Title	Units
AMCS 2003	Doctors and Terrorists: The Fictions of South Asian America	3
AMCS 2025	The Immigrant Experience	3
ANTHRO 3102	Topics in Anthropology: Vibrant Matter: Social Ecology of the Asia-Pacific	3
ANTHRO 3313	Women and Islam	3
ANTHRO 3775	Ancient Eurasia and the New Silk Roads	3
ANTHRO 4033	Culture, Illness, and Healing in Asia	3
ARTARCH 1109	FYS: Collecting Art/Excluding People: The Contradictions of Chinese Art in U.S. Museums	3
ARTARCH 4320	East, Meet West: Asia Encounters Europe	3
CHINA 3300	Topics in Chinese Lit & Culture: Screen Culture in the Sinophone World	3
CHINA 3500	U.S.-China Relations from 1949 to the Present	3
CHINA 4590	Topics in Chinese Lit & Culture: History and Fictionality in East Asian Cinema	3
COMPLIT 3300	Topics in Comp Literature: Finding China: From Sojourners to Settlers in Chinese Diaspora and Chinese American Literature	3
EALC 3340	Topics in East Asian Religions: The Lotus Sutra in East Asia: Buddhism, Art, Literature	3
EALC 3800	EALC Seminar: Kitchen, Studio, Factory: Making in East Asia	
ELIT 3106	Topics in Asian American Literature: Gender and Sexuality in American Asian Lit	3

ELIT 3111	Topics in English Literature: Asian American Fictions: Space, Place, and the Makings of Asian America	3
FILM 4430	Memory, Tears, and Longing: East Asian Melodrama Film	3
FYP 1119	Mediterranean Migration: Dynamics and Consequences on the EU and MENA	3
FYP 1133	Legacies of the Silk Road	3
GLOBAL 1101	Migration in the Global World	3
GLOBAL 1102	First-Year Seminar: The Vietnam Wars	3
GLOBAL 1104	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GLOBAL 1105	East Asia in the World	3
GLOBAL 1106	Geographies of Globalization and Development	3
GLOBAL 1107	Global Migration and Transnational Cultures in Modern Times	3
GLOBAL 1109	First-Year Seminar: Mapping the World: Introduction to Human Geography	3
GLOBAL 2100	Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film	3
GLOBAL 3512	"Model Minority": The Asian American Experience	3
GLOBAL 3822	From McDonald's to K-pop: New Movements in East Asia	3
GLOBAL 3860	Empire in East Asia: Theory and History (WI)	3
GLOBAL 4036	Children of Immigrants: Identity and Acculturation	3
HISTORY 1099	First-Year Seminar: Silk Roads and Empires	3
HISTORY 2102	Sophomore Seminar: Where Do We Come From? Families, Ancestors, and Genealogies in World History	3
HISTORY 3006	Historical Methods: Decolonization in the 20th Century	3
HISTORY 3049	Chinese Diasporas	3
HISTORY 3085	19th Century China: Violence and Transformation	3
HISTORY 3289	Economic History of China: From the Silver Age to Reform and Opening, 1500-1990	3
HISTORY 3295	Modern South Asia	3
HISTORY 3296	Environment and Empire	3
HISTORY 3315	Historical Methods-Transregional History	3
HISTORY 3458	Cultural Encounters: China and Eurasia Since the Middle Ages	3
HISTORY 3951	Imperialism and Sexuality: India, South Asia, and the World (WI)	3
HISTORY 4070	Advanced Seminar: Japan in World War II-History and Memory	3
HISTORY 4804	Advanced Seminar in History: Partition: The Making of India and Pakistan	3
HISTORY 4871	Colonial Cities and the Making of Modernity	3
HISTORY 5377	Science and Technology in East Asia	3
JIMES 2100	Introduction to Islamic Civilization	3
JIMES 3510	Muhammad: His Life and Legacy	3
JIMES 3540	Anthropological and Sociological Study of Muslim Societies	3
WGSS 3740	Imperialism and Sexuality: India, South Asia and the World: Writing-Intensive Seminar	3
WGSS 4153	Decolonization to Globalization: How to End an Empire	3

Advanced Courses

Students choose seven courses from current, relevant, internationally focused course offerings in the following departments.* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

* Students may submit a request to add a course by following the instructions for the Petition Process.

Anthropology

- ANTHRO 3102 Topics in Anthropology: Vibrant Matter: Social Ecology of the Asia-Pacific
- ANTHRO 3163 Archaeology of China: Food and People
- ANTHRO 3313 Women and Islam
- ANTHRO 3285 Warriors, Merchants, Monks and Courtesans: Ancient Narratives of Globalization in Google Earth
- ANTHRO 3775 Ancient Eurasia and the New Silk Road
- ANTHRO 4033 Culture, Illness and Healing in Asia

Art History

- ARTARCH 3155 Japanese Art
- ARTARCH 3160 Early Chinese Art: from Human Sacrifice to the Silk Road
- ARTARCH 3180 Classical to Contemporary Chinese Art
- ARTARCH 3181 Modern & Contemporary Chinese Art
- ARTARCH 3200 Chinese Painting, Then and Now
- ARTARCH 4265 The Forbidden City
- ARTARCH 4296 Japanese Prints: Courtesans, Actors and Travelers
- ARTARCH 4320 East, Meet West: Asia Encounters Europe

Chinese

- CHINA 3160 Historical Landscape and National Identity in Modern China
- CHINA 3210 Contemporary Chinese Popular Culture
- CHINA 3300 Topics in Chinese Lit & Culture
- CHINA 3300 Topics in Chinese Lit & Culture: Chinese Cities in the Global Context
- CHINA 3300 Topics in Chinese Lit & Culture: Modern Chinese Poetry
- CHINA 3300 Topics in Chinese Lit & Culture: Poets, Musicians and Revolutionaries
- CHINA 3300 Topics in Chinese Lit & Culture: Screen Culture in the Sinophone World
- CHINA 3300 Topics in Chinese Lit & Culture: Stories & Storytelling in Late Imperial China
- CHINA 3300 Topics in Chinese Lit & Culture: Stranger Things: Tales of the Supernatural in Chinese Literature
- CHINA 3300 Topics in Chinese Lit & Culture: The Art of War & Peace: Modern Reception of the Three Kingdoms Story
- CHINA 3300 Topics in Chinese Lit & Culture: The Cultural Lives of the Environment in China, 1949-Present
- CHINA 3300 Topics in Chinese Lit & Culture: Three Streams: Major Religious Traditions in Premodern East Asia
- CHINA 3410 Early and Imperial Chinese Literature
- CHINA 3420 Modern and Contemporary Chinese Literature
- CHINA 3500 US-China Relations: from 1949 to the Present
- CHINA 4240 Culture and Politics in the People's Republic of China: New Approaches
- CHINA 4390 Topics in Chinese Lit & History: Literary Representation of Colonial Modernity: Taiwan & East Asia
- CHINA 4390 Topics in Chinese Lit & History: Writing Women of the Late Imperial and Early Republican Periods
- CHINA 4510 Urban Culture in Modern China
- CHINA 4590 Topics in Chinese Lit & Culture: Chinese Cities in the Global Context
- CHINA 4590 Topics in Chinese Lit & Culture: Commentary, Philology, & Theories of Reading in East Asian History
- CHINA 4590 Topics in Chinese Lit & Culture: History and Fictionality in East Asian Cinema
- CHINA 4590 Topics in Chinese Lit & Culture: Jingju (Beijing/Peking Opera)
- CHINA 4670 The Chinese Theater
- CHINA 4790 Reading Seminar in Modern Chinese Lit: Envisioning a New China: The May Fourth Era, 1919-1949
- CHINA 4800 Reading Seminar in Chinese Popular Lit & Culture
- CHINA 4890 Topics in Modern Chinese Literature
- CHINA 4905 Guided Readings in Chinese

Comparative Literature

- COMPLIT 3300 Topics in Comp Literature
- COMPLIT 3300 Topics in Comp Literature: Finding China: From Sojourners to Settlers in Chinese Diaspora and Chinese American Literature
- COMPLIT 3300 Topics in Comp Literature: The Asian Experience: Negotiating the In-Betweeness
- COMPLIT 3300 Topics in Comp Literature: The Trope of "China" in the Imagination of the Chinese Diaspora
- COMPLIT 4492 Topics in Comp Literature: Writing from the Periphery: The Question of Chineseness

East Asian Languages and Cultures

- EALC 3250 Topics in Early Modern Korea: Guns, Tobacco, and Sweet Potato: A History of Material Culture
- EALC 3340 Topics in East Asian Religions: The Lotus Sutra in East Asia: Buddhism, Art, Literature
- EALC 3400 Writing New Horizons: Explorers, Envoys, and Other Encounters in Korean Travel Narratives
- EALC 3510 Pleasure, Amusement, and Play: Entertainment Culture in Premodern China
- EALC 3600 US-China Relations from Conflict to Engagement, 1949-2016
- EALC 3610 US-China Relations, 2017-present
- EALC 3750 Imagined Pasts: Traditional Korea through Film
- EALC 3800 EALC Seminar
- EALC 3800 EALC Seminar: East Asian Buddhism
- EALC 3800 EALC Seminar: East Asian Buddhism: Chan/Son/Zen
- EALC 3800 EALC Seminar: Kitchen, Studio, Factory: Making in East Asia
- EALC 3800 EALC Seminar: Screening East Asia: From Scroll Painting to Haptic Interface
- EALC 3810 EALC Seminar: Ghosts, Gods and Monsters Reimagined
- EALC 4200 Nature, Technology and Medicine in Korea
- EALC 4240 Culture and Politics in the People's Republic of China: New Approaches
- EALC 4250 Topics in Religion and Culture in East Asia: Women, Confucianism and Buddhism in East Asia
- EALC 4300 Topics in Chinese Media Culture: Charting Identity in the Digital Age
- EALC 4380 Approaches to East Asian Cinema
- EALC 4710 Topics in Japanese Culture: Otaku: Anime and Beyond
- EALC 4750 Worldviews, World-Building, and World Literature: New Approaches to Chinese Literature
- EALC 4930 Guided Readings in EALC

English Literature

- ELIT 3104 The Writing of the Indian Subcontinent
- ELIT 3106 Topics in Asian American Literature: Gender and Sexuality in American Asian Literature
- ELIT 3111 Topics in English Literature: Asian American Fictions: Space, Place, and the Makings of Asian America

Environmental Studies

- ENST 4527 IPCC: Governance, Policy and Science

Film and Media Studies

- FILM 3260 Samurai, Rebels, and Bandits: The Japanese Period Film
- FILM 3410 Transnational Cinema(s): Film Flows in a Changing World
- FILM 4310 Renegades and Radicals: The Japanese New Wave
- FILM 4430 Memory, Tears, and Longing: East Asian Melodrama Film
- FILM 4580 Major Film Directors: Oshima Nagisa and the Japanese New Wave
- FILM 4850 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000

Global Studies

- GLOBAL 3006 Global Health and Language
- GLOBAL 3008 Topics in Global Studies: Understanding Today's Russia
- GLOBAL 3020 Global Futures *(required core course)*
- GLOBAL 3176 Chinese Economy in World History
- GLOBAL 3248 Intercultural Communication
- GLOBAL 3512 "Model Minority": The Asian American Experience
- GLOBAL 3641 Anarchism: History, Theory and Praxis
- GLOBAL 3822 From McDonald's to K-Pop: New Movements in East Asia
- GLOBAL 3860 Empire in East Asia: Theory and History
- GLOBAL 3890 Furies and Die-Hards: Women in Rebellion and War
- GLOBAL 4007 Global Studies Research Methods Proseminar and Assistantship
- GLOBAL 4036 Children of Immigrants: Identity and Acculturation
- GLOBAL 4414 Gender Analysis in International Affairs
- GLOBAL 4644 The Indochina Wars
- GLOBAL 4897 Global Asias *(required core course)*

Hindi

- HINDI 3050 Religion and Culture in South and Southeast Asia
- HINDI 3090 Understanding Indian Literature Through Visual Media

History

- HISTORY 3006 Historical Methods: Decolonization in the 20th Century
- HISTORY 3018 Hot Peace: US-Russia Relations Since the Cold War

Political Science

- POLSCI 3320 Topics in Politics: Terrorism & Counterterrorism

Religious Studies

- REST 3635 Theories and Methods in the Study of Religion

Women, Gender, and Sexuality Studies

- WGSS 3555 Caste: Sexuality, Race and Globalization
- WGSS 3740 Imperialism and Sexuality: India, South Asia, and the World (WI)
- WGSS 4153 Decolonization to Globalization: How to End an Empire

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 3000 or 4000 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Study abroad credit only counts at the 3000 level.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, the School of Continuing & Professional Studies, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit form with Arts & Sciences to take the course for "general credit" and then petition to have the course count as an elective toward their Global Studies major.
- Students may not receive credit for January Intensive Term (J-Term) study abroad programs; these programs are too short in duration.

Latin Honors

- Students must graduate with an overall grade point average of 3.65 or higher to qualify for Latin Honors.
- Students must submit an intent form and be accepted for candidacy.
- Students should enroll in GLOBAL 4985 during the fall of senior year and in GLOBAL 4986 during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

All Global Studies majors must satisfy a language requirement that entails both the successful completion of four semesters of a modern language for a letter grade and placement into the third year of that language.

Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili.

Please see the FAQs on the Global Studies website for more information.

Global Studies Major, Global Cultural Studies Concentration

Program Requirements

- **Total Units Required:** 36
- **Grade Requirement:** Students must receive a grade of C+ or higher in all courses.

The concentration in Global Cultural Studies focuses on the practical and theoretical issues arising from cross-cultural encounters around the world. Students will study these issues by both examining conventional cultural products (e.g., literature, film, visual art, new media) and investigating their broader political and social contexts. This concentration addresses compelling issues of cultural interchange for students interested in cultures for their own sake as well as in careers in NGOs and international business and law.

Concentration Objectives

The Global Cultural Studies concentration is committed to interdisciplinary approaches to contemporary problems. Students may take courses in the language and literature disciplines as well as in anthropology; art history; film; history; music; religious studies; and women, gender, and sexuality studies.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 3000 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 4000 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level coursework undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of coursework:

- 3 units of core coursework: GLOBAL 3020 Global Futures
- 6 units of disciplinary introductions and methods coursework (from two different disciplines; 1000-2000 level)
- 9 units of world area coursework (any level)*
- 18 units of advanced coursework (at least one course must focus on gender, race, or class) (3000-4000 level)

* Of the three required world area courses, one must be at the advanced level. The other two courses may be taken at any level.

Africa, East Asia, Eurasia, Europe, Latin America, the Middle East, South Asia, and North America are considered world areas for the Global Cultural Studies concentration. A student must complete two courses in one of these world areas and one course in another world area.

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary; gender, race, class; or world area). Some of these requirements may be completed while abroad.

Disciplinary Introductory and Methods Courses

Students choose two courses from this list,* for a total of 6 units:

Code	Title	Units
AFAS 2550	Introduction to Africana Studies	3
ANTHRO 1520	Introduction to Cultural Anthropology	3
ARTARCH 1510	Introduction to Asian Art	3
ARTARCH 1515	History of Western Art, Architecture & Design	3
ARTARCH 2020	Introduction to Modern Art, Architecture and Design	3
COMPLITTHT 1106	First-Year Seminar: Seeing is Believing: Visuality, Power and Truth	3
COMPLITTHT 2109	Modern Political Thought: Text & Traditions	3
COMPLITTHT 2110	World Literature	3
COMPLITTHT 3121	Introduction to Digital Humanities	3
ECON 1501	Introduction to Microeconomics	3
ECON 1502	Introduction to Macroeconomics	3
FILM 2200	Introduction to Film Studies	3
FYP 1133	Legacies of the Silk Road	3
GLOBAL 1101	Migration in the Global World	3
GLOBAL 1103	First-Year Sem: Bridging London: An Interdisciplinary Exploration of One of the World's Great Cities	3
GLOBAL 1104	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GLOBAL 1106	Geographies of Globalization and Development	3
GLOBAL 1107	Global Migration and Transnational Cultures in Modern Times	3

GLOBAL 1109	First-Year Seminar: Mapping the World: Introduction to Human Geography	3
GLOBAL 2000	Crossing Borders: An Introduction to Institutions and Concepts in Global Studies	3
HISTORY 1146	Introduction to World History: The Second World War in World History	3
HISTORY 1151	Health and Disease in World History	3
HISTORY 1500	Silver, Slaves and the State: Globalization in the 18th Century	3
Introduction to Literature courses as appropriate (English, Comp Lit, or foreign language)		3
IPH 2110	Introduction to Digital Humanities: Cultural Analysis in the Information Age	3
LING 1600	Introduction to Linguistics	3
MUSIC 1040	Musics of the World	3
PHIL 1030	Problems in Philosophy	3
PHIL 1060	Present Moral Problems	3
POLSCI 1200	International Politics	3
POLSCI 1300	Introduction to Political Theory	3
POLSCI 2102	Introduction to Migration Policy and Politics	3
PSYCH 2210	First-Year Seminar: Introduction to Memory Studies	3
SOC 2010	The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S.	3
WGSS 1102	First-Year Seminar: Gender, Sexuality and Settler Colonialism	3
WGSS 1500	Introduction to Women, Gender, and Sexuality Studies	3
WGSS 2070	Sexuality and the State: Introduction to Sexuality Studies	3
WGSS 2101	Sophomore Seminar: Globalization and its Discontents	3

* Students may submit a request to add a course by following the instructions for the Petition Process.

World Area Courses

Of the three required world area courses, one must be at the advanced level, and it will be counted toward the 21 credits of advanced work needed to complete the major. The other two courses may be taken at any level. Examples of lower-level courses that may be used to satisfy this requirement include the following:

Code	Title	Units
AFAS 1105	Imagining and Creating Africa: Youth, Culture and Change	
AFAS 2090	African Studies: Mapping Urban Languages and Resistance in Africa	
AFAS 2550	Introduction to Africana Studies	
AMCS 2700	Topics in Asian American Studies: Introduction to Asian American & Pacific Islander Studies	
CHINA 2270	Chinese Civilization	
GLOBAL 1102	The Vietnam Wars	
GLOBAL 1105	East Asia in the World	
GLOBAL 2008	Modern European History: Migrations, Nation States, Identities	
GLOBAL 2009	Introduction to European Studies	
GLOBAL 2100	The Public Servant and Other Heroes: A History of Japan Through Film	
HISTORY 1020	Introduction to Modern European History	
HISTORY 1124	The Meaning of Pakistan: History, Culture, Art	
HISTORY 2158	FYS: Outcasts and Outlaws: The History of Othering in Modern Europe	
JAPAN 2260	Japanese Civilization	
JIMES 2081	Introduction to Jewish Civilization	
JIMES 2100	Introduction to Islamic Civilization	
KOREA 2230	Korean Civilization	
LATAM 1000	Latin America: Nation, Ethnicity and Social Conflict	

Gender, Race, and Class Courses

Students pursuing this concentration are required to complete one upper-level course focused on gender, race, or class that is chosen from the following list:

Code	Title	Units
AFAS 3062	Islam, Culture and Society in West Africa	3
AFAS 3360	Zambaje: Afro-Indigenous Relations in Latin America	3
AFAS 4090	Gender, Sexuality and Change in Africa	3
ANTHRO 3313	Women and Islam	3
ANTHRO 4134	The AIDS Epidemic: Inequalities, Ethnography and Ethics	3
ANTHRO 4365	Sex, Gender, and Power	3
ANTHRO 4366	Europe's New Diversities	3
ARCH 307X	Community Building	3
CHINA 4390	Topics in Chinese Lit & History: Writing Women of the Late Imperial and Early Republican Periods	3
COMPLITTHT 3101	An Intellectual History of Sex and Gender	3
COMPLITTHT 3300	Topics in Comp Lit: The Asian Experience: Negotiating the In-Betweenness	3
COMPLITTHT 4492	Topics in Comp Lit: Writing from the Periphery: The Question of Chineseness	3
ELIT 3106	Topics in Asian American Literature: Gender and Sexuality in American Asian Lit	3

ELIT 3111	Topics in English & American Lit: Asian American Writings: Contesting American Constructions of the Alien Other	3
GLOBAL 3248	Intercultural Communication	3
GLOBAL 3512	"Model Minority": The Asian American Experience	3
GLOBAL 3840	Migration & Modernity: Human Mobility, Identity & State Formation in the Russian/ Soviet/Post-Soviet Context	3
GLOBAL 3880	Topics in Migration and Identity	3
GLOBAL 3890	Furies and Die-Hards: Women in Rebellion and War	3
GLOBAL 4036	Children of Immigrants: Identity and Acculturation	3
GLOBAL 4414	Gender Analysis in International Affairs	3
HEBREW 3090	Israeli Women Writers	3

- Latin American Subcultures (LATAM 4180)
- Media Cultures in Latin America (LATAM 4190)
- Modernity, Culture and the State in Mexico (LATAM 4200)
- The Binational Condition. The Mexico-US Relationship in Mexican History and Culture (LATAM 4210)
- Popular Culture and the Representation of Youth in Latin America (LATAM 4250)
- Constructing the (Racial) Other: Race and Ethnicity in Latin America from the Colonial Caste System to US Latinos (LATAM 4280)
- Citizenship in the Hot Seat. Migration and Borders in Latin America (LATAM 4290)
- Cities, Race and Development in Latin America (LATAM 4651)

Latin American Studies (CAPS)

- Food and Culture in Latin America: Colonialism, Transculturation, Nationalism, Globalization (CAPS-LAS 3100)

Music

- Ethnomusicology (MUSIC 3014)

Philosophy

- Advanced Social and Political Philosophy (PHIL 4321)

Political Science

- Computational Modeling in the Social Sciences (POLSCI 3015)
- Theories of Social Justice (POLSCI 3313)
- Understanding Political Protest and Violence (POLSCI 3565)
- Quantitative Political Methodology (POLSCI 3630)
- Topics in International Politics: Ethnic Conflict: Causes and Remedies (POLSCI 3720)
- History of Political Thought III: Liberty, Democracy and Revolution (POLSCI 3930)
- Immigration, Identity and the Internet (POLSCI 4115)
- Presidents, Legislators and Economic Policy in Latin America (POLSCI 4231)
- Global Justice (POLSCI 4306)
- Topics in Comparative Politics: Latin American Politics thru Film (POLSCI 4331)
- Research Design and Methods (POLSCI 4905)

Psychological and Brain Sciences

- Contemporary Topics in Social Psychology: Political Psychology (PSYCH 4130)

Religion and Politics

- Islam, Gender, Sexuality (RELPOL 3070)

Religious Studies

- Theories and Methods in the Study of Religion (REST 3635)
- Topics in Religious Studies: Religion and Violence (REST 3715)
- The Making of the Modern Catholic Church (REST 3830)
- Senior Seminar in Religious Studies: Saints and Society (REST 4801)

Russian

- Russian Theatre, Drama and Performance: From Swan Lake to Punk Prayer (RUSS 3320)
- The 19th Century Russian Novel (RUSS 3500)
- Dostoevsky's Novels (RUSS 3721)

Sociology

- Statistics for Sociology (SOC 3040)
- Sociology of Immigration (SOC 3150)
- Gender in Society (SOC 3190)
- Global Structures and Problems (SOC 4170)
- Global Racial Systems (SOC 4831)

Spanish

- Spanish Culture and Civilization (SPAN 3181)
- Debating Cultures (SPAN 32xx – consult advisor!)
- Hispanic Art/Arte Hispano (SPAN 3310)
- Literary and Cultural Studies in Spanish (SPAN 3410)
- Iberian Literatures and Cultures (SPAN 3420)
- Latin American Literatures and Cultures (SPAN 3430)
- Researching Cultures (SPAN 36xx – consult advisor!)
- Major Seminar (SPAN 4050)
- Spanish-American Fiction: 1970 to the Present (SPAN 4360)
- Special Topics in Hispanic Literature and Culture: Spanish Women Writers from the Enlightenment to the Contemporary Period (SPAN 4500)
- Special Topics in Hispanic Literature and Culture: Women's Writing in Latin America (SPAN 4500)

Women, Gender, and Sexuality Studies

- Queer Citizenship (WGSS 3014)
- Making Sex and Gender: Understanding the History of the Body (WGSS 3041)
- Bodies Out of Bounds: Feminist and Queer Disability Studies (WGSS 3203)
- Sex Trafficking (WGSS 3256)
- Trans* Studies (WGSS 3550)
- Caste: Sexuality, Race and Globalization (WGSS 3555)
- Gender Violence (WGSS 3685)
- Everyday Unruliness: Feminist and Queer Resistance (WGSS 4085)
- Feminist Literary and Cultural Theory (WGSS 4150)
- Decolonization to Globalization: How to End an Empire (WGSS 4154)
- Transnational Feminisms (WGSS 4245)

* Students may submit a request to add a course by following the instructions for the Petition Process.

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 3000 or 4000 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Study abroad credit only counts at the 3000 level.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, the School of Continuing & Professional Studies, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit form with Arts & Sciences to take the course for "general credit" and then petition to have the course count as an elective toward their Global Studies major.
- Students may not receive credit for January Intensive Term (J-Term) study abroad programs; these programs are too short in duration.

Latin Honors

- Students must graduate with an overall grade point average of 3.65 or higher to qualify for Latin Honors.
- Students must submit an intent form and be accepted for candidacy.
- Students should enroll in GLOBAL 4985 during the fall of senior year and in GLOBAL 4986 during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

All Global Studies majors must satisfy a language requirement that entails both the successful completion of four semesters of a modern language for a letter grade and placement into the third year of that language.

Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili.

Please see the FAQs on the Global Studies website for more information.

Global Studies Major, International Affairs Concentration

Program Requirements

- **Total Units Required:** 36
- **Grade Requirements:** Students must receive a grade of C+ or higher in all courses.

Why do states, nations, and societies cooperate, compromise, and fight? Living and working in our rapidly changing global arena presents great opportunities to advance the human condition, improve political and civil liberties, recast bargains between governments and their societies, transform social welfare, and advance the boundaries of knowledge and scientific exploration. Yet, this same context presents great risks as people fear loss of identity, worry about economic subordination and loss to those beyond their borders, encounter the export of environmental degradation, and confront potential decline in personal and social autonomy. Students can explore the heightened economic, political, social, cultural, and environmental interdependence that generates prospects for cooperation; at the same time, this interdependence involves serious challenges, which create the possibility for conflict but also for compromise.

Concentration Objectives

The concentration in International Affairs offers an interdisciplinary approach to understanding relations between societies. It provides opportunities to examine complex global issues and processes from multiple perspectives and to help understand the fundamental processes of cooperation, compromise, and conflict in the global arena. The program provides students with knowledge and skills for understanding and working with difficult international and cross-cultural problems that states, societies, and communities face.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 3000 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 4000 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level coursework undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of coursework:

- 3 units of core coursework: GLOBAL 3020 Global Futures
- 3 units of Research Methods coursework (any level)
- 6 units of introductory coursework (1000-2000 level) from two different academic disciplines
- 9 units of advanced coursework from the Core Courses list (3000-4000 level)
- 12 units of advanced coursework (3000-4000 level)
- 3 units of additional coursework (any level)

Africa, East Asia, Eurasia, Europe, Latin America, the Middle East, South Asia, and North America are considered world areas for the International Affairs concentration. A student must complete two courses in one of these world areas and one course in another world area.

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or world area). Some of these requirements may be completed while abroad.

Introductory Courses

Students choose two courses from this list, for a total of 6 units:

Code	Title	Units
AFAS 1105	First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change	3
AFAS 2550	Introduction to Africana Studies	3
ANTHRO 1101	First-Year Seminar: Past Tense, Future Imperfect: The Rise & Fall of Societies & Global Civilization	3
ANTHRO 1520	Introduction to Cultural Anthropology	3
BEYOND 1014	Environmental Racism and the Health of Everyone	3
BEYOND 1106	Gender, Youth, and Global Health	3
BIOL 2150	Introduction to Environmental Biology	3
CAPS-GIS 2000	Introduction to GIS	3
CHINA 2100	Sophomore Seminar: U.S.-China Relations: Perceptions and Realities	3
CHINA 2270	Chinese Civilization	3
COMPLITTHT 2109	Modern Political Thought: Text & Traditions	3
ECON 1501	Introduction to Microeconomics	3
ECON 1502	Introduction to Macroeconomics	3
EEPS 1110	Introduction To Global Climate Change In the 21st Century	3
EEPS 2010	Earth and the Environment	4
EEPS 2020	Introduction to Earth, Environmental, and Planetary Science	3
EEPS 2190	Energy and the Environment	3
ENST 1150	Environmental Issues	3

ENST 2500	Sophomore Seminar in Sustainability and the Environment	3
FYP 1117	Migration Policies and Colonialism: Refugee Resettlement and Integration	3
FYP 1119	Mediterranean Migration: Dynamics and Consequences on the EU and MENA	3
FYP 1133	Legacies of the Silk Road	3
GLOBAL 1101	Migration in the Global World	3
GLOBAL 1102	First-Year Seminar: The Vietnam Wars	3
GLOBAL 1103	First-Year Sem: Bridging London: An Interdisciplinary Exploration of One of the World's Great Cities	3
GLOBAL 1104	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GLOBAL 1105	East Asia in the World	3
GLOBAL 1106	Geographies of Globalization and Development	3
GLOBAL 1107	Global Migration and Transnational Cultures in Modern Times	3
GLOBAL 1109	First-Year Seminar: Mapping the World: Introduction to Human Geography	3
GLOBAL 2000	Crossing Borders: An Introduction to Institutions and Concepts in Global Studies	3
GLOBAL 2009	Introduction to European Studies	3
GLOBAL 2100	Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film	3
HISTORY 1020	Introduction to Modern European History	3
HISTORY 1120	First-Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities	3
HISTORY 1124	First-Year Seminar: The Meaning of Pakistan: History, Culture, Art	3
HISTORY 1146	Introduction to World History: The Second World War in World History	3
HISTORY 1151	Health and Disease in World History	3
HISTORY 1500	Silver, Slaves and the State: Globalization in the 18th Century	3
HISTORY 2158	Outcasts and Outlaws: The History of Othering in Modern Europe	3
JAPAN 2260	Japanese Civilization	3
JIMES 2081	Introduction to Jewish Civilization: History and Identity	3
JIMES 2100	Introduction to Islamic Civilization	3
JIMES 2630	Democracies & Dictatorships in the Middle East	3
JIMES 2910	Recism and Antiracism	3
KOREA 2230	Korean Civilization	3
LATAM 1000	Latin America: Nation, Ethnicity and Social Conflict	3
MEC 2900	Microeconomics	3
MEC 2920	Global Economy	3
PHIL 1000	Logic and Critical Analysis	3
PHIL 1060	Present Moral Problems	3
PHIL 2060	Biomedical Ethics	3
PHIL 2080	Introduction to Environmental Ethics	3
PHYSICS 1671	Physics and Society	3
POLSCI 1100	Introduction to Comparative Politics	3
POLSCI 1200	International Politics	3
POLSCI 1300	Introduction to Political Theory	3
POLSCI 2000	Introduction to Environmental Policy	3
POLSCI 2102	Introduction to Migration Policy and Politics	3
PSYCH 1000	Introduction to Psychology	3
PSYCH 2210	First-Year Seminar: Introduction to Memory Studies	3
RELPOL 2020	Islamophobia & U.S. Politics	3
SDS 1600	Introduction to Statistics	3
SDS 2020	Elementary Probability and Statistics	3
SOC 1006	Social Problems and Social Issues	3
SOC 2010	The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S.	3
SOC 2030	Social Movements	3
SOC 2040	Social Inequality in America	3
URST 1100	First-Year Seminar: Introduction to Urban Studies	3
WGSS 1500	Introduction to Women, Gender, and Sexuality Studies	3
WGSS 2070	Sexuality and the State: Introduction to Sexuality Studies	3
WGSS 2101	Sophomore Seminar: Globalization and its Discontents	3

Core Courses

Students choose three courses from this list, for a total of 9 units:

Code	Title	Units
ANTHRO 3283	Introduction to Global Health	3
ANTHRO 3391	Economies as Cultural Systems	3
ANTHRO 3612	Population and Society	3
ANTHRO 4022	Transnational Reproductive Health Issues: Meanings, Technologies, Practices	3
ANTHRO 4517	Anthropology and Development	3
ECON 3350	Environmental Policy	3
ECON 3373	International Economics	3
GLOBAL 3020	Global Futures	3
GLOBAL 3176	Chinese Economy in World History	3
GLOBAL 4201	International Relations of Latin America	3
GLOBAL 4204	International Relations of Latin America (WI)	3

GLOBAL 4414	Gender Analysis for International Affairs	3
GLOBAL 4622	Labor and Labor Movements in Global History	3
HISTORY 3147	The Wheels of Commerce: From the Industrial Revolution to Global Capitalism	3
HISTORY 3148	The First World War and the Making of Modern Europe	3
HISTORY 3294	History of Global Capitalism: From Slavery to Neoliberalism	3
HISTORY 3296	Environment and Empire	3
HISTORY 3404	The Creation of Capitalism	3
POLSCI 3171	Conflict and Security in International Relations	3
POLSCI 3171	International Conflict Management & Resolution	3
POLSCI 3173	International Political Economy	3
POLSCI 3328	Energy Politics	3
POLSCI 3399	Political Violence	3
POLSCI 4306	Global Justice	3
POLSCI 4792	Globalization and National Politics	3
SOC 3000	Social Theory	3
SOC 4170	Global Structures and Problems	3
WGSS 4153	Decolonization to Globalization: How to End an Empire	3

Research Methods Courses

Students choose one course from this list, for a total of 3 units:

Code	Title	Units
AFAS 4402	Intersectionality	3
ANTHRO 4123	Argumentation Through Ethnography	3
ANTHRO 4481	Writing Culture	3
ANTHRO 4517	Anthropology and Development	3
ANTHRO 4803	Advanced GIS Modeling and Landscape Analysis	3
APL 4111	Linguistics and Language Learning	3
ARCH 3404	Community Building	3
CAPS-ECON 4090	Econometric Techniques	3
CAPS-GIS 2000	Introduction to GIS	3
CAPS-GIS 3000	Advanced GIS	3
CAPS-GIS 3005	Digital Cartography	3
CAPS-GIS 4010	Spatial Data Modeling and Design	3
CAPS-IA 5000	Process and Design of Research (U85)	3
CAPS-IA 5380	Alternative Analytic Techniques for International Affairs (U85)	3
CAPS-NPM 4050	Social Entrepreneurship (only if offered in person)	3
CFH 4000	Merle Kling Undergraduate Honors Fellowship Seminar	3
COMPLITTHT 3203	Worldwide Translation: Language, Culture, Technology	3
CSE 1301	Introduction to Computer Science	3
DAT 1200	Managerial Statistics I	3
DAT 1201	Managerial Statistics II	3
ECON 3150	Introduction to Econometrics	3
ENST 3710	Applications in GIS	3
GLOBAL 3248	Intercultural Communication	3
GLOBAL 4007	Global Studies Research Methods Proseminar and Assistantship	3
GLOBAL 4414	Gender Analysis for International Affairs	3
HISTORY 3007	Historical Methods-African History	3
HISTORY 3008	Historical Methods-Latin American History	3
HISTORY 3009	Historical Methods-Middle Eastern History	3
HISTORY 3314	Historical Methods-European History	3
HISTORY 3315	Historical Methods-Transregional History	3
PHIL 3130	Philosophy of Science	3
POLSCI 2400	Data Science for Politics	3
POLSCI 3015	Computational Modeling in the Social Sciences	3
POLSCI 3621	Politics and the Theory of Games	3
POLSCI 3630	Quantitative Political Methodology	3
POLSCI 4043	Public Policy Analysis, Assessment and Practical Wisdom	3
POLSCI 4905	Research Design and Methods	3
PSYCH 3000	Introduction to Psychological Statistics	3
SDS 1600	Introduction to Statistics	3
SDS 2020	Elementary Probability and Statistics	3
SDS 3020	Elementary to Intermediate Statistics and Data Analysis	3
SDS 4210	Statistical Computation	3
SOC 3040	Statistics for Sociology	3
Civic Scholars Program*		max. 3
Mellon Mays Fellows Program*		max. 3

* Global Studies allows students to use one course from either the Civic Scholars Program or the Mellon Mays Fellows Program as their Research Methods course. **Note:** Both of these are multi-semester programs, and Civic Scholars courses are offered at 2 units per course.

Advanced Courses

Students choose five courses from current, relevant, internationally focused course offerings in the following departments.* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage and concentration course list for the full list of options.

African and African-American Studies

- Islam, Culture and Society in West Africa (AFAS 3062)
- Topics on Africa: African Urban Futures (AFAS 3070)
- Culture, Politics and Society in Francophone Africa (AAS 3113)
- Capitalism, Socialism and Labor: The Political Economy of 20th Century Africa (AFAS 3117)
- African Immigration to the United States of America (AFAS 3120)
- African Civilization: 1800 to the Present (AFAS 3130)
- African Civilization to 1800 (AFAS 3160)
- Emerging Africa: Language, Identity and Social Change (AFAS 3385)
- Language and Society in Africa: The Polics of Identity and Empowerment (AFAS 3680)
- Terror and Violence in the Black Atlantic (AFAS 3880)
- Gender, Sexuality and Change in Africa (AFAS 4090)
- Engineering Authority: Design, Architecture and Power in Africa (AFAS 4100)
- Black Decolonial Thought (AFAS 4104)
- Topics in African History: Power and Rebellion in 20th Century Africa (AFAS 4170)
- Sufism and Islamic Brotherhood in Africa (AFAS 4213)
- Advanced African History Seminar (AFAS 4290)

Anthropology

- Anthropology of Refugees, Asylum and Forced Migration (ANTHRO 3038)
- Africa: Peoples and Cultures (ANTHRO 3045)
- Topics in Anthropology: Global Mental Health (ANTHRO 3103)
- Politics and Religion in Contemporary Society (ANTHRO 3157)
- Archaeology of China: Food and People (ANTHRO 3163)
- Culture and Health (ANTHRO 3170)
- Gender, Culture, and Madness (ANTHRO 3201)
- Food, Culture, and Power (ANTHRO 3215)
- Health, Healing and Ethics: Intro to Medical Anthropology (ANTHRO 3310)
- Women and Islam (ANTHRO 3313)
- Economies as Cultural Systems (ANTHRO 3391)
- Global Energy and the American Dream (ANTHRO 3472)
- Anthropology of Human Rights (ANTHRO 3521)
- Environmental Inequality: Toxicity, Health, and Justice (ANTHRO 3602)
- Culture and Environment (ANTHRO 3610)
- Population and Society (ANTHRO 3612)
- Anthropology of Human Birth (ANTHRO 3621)
- Meltdown: The Archaeology of Climate Change (ANTHRO 3796)
- Transnational Reproductive Health Issues: Meanings, Technologies, Practices (ANTHRO 4022)
- Culture, Illness and Healing in Asia (ANTHRO 4033)
- Topics in Anthropology: Ethnographies of Care (ANTHRO 4100)
- The AIDS Epidemic: Inequalities, Ethnography and Ethics (ANTHRO 4134)
- Anthropology of Food (ANTHRO 4215)
- Political Ecology (ANTHRO 4282)
- Sex, Gender, and Power (ANTHRO 4365)
- Europe's New Diversities (ANTHRO 4366)
- Anthropology and Development (ANTHRO 4517)
- Biomarkers: Measuring Population Health, Reproductive, and Social Endocrinology (ANTHRO 4598)
- Out of the Wild: Domestication and Socioeconomic Diversity in Africa (ANTHRO 4771)
- Social Theory and Anthropology (ANTHRO 4772)

Applied Linguistics

- Second Language Acquisition and Technology (APL 4023)
- Linguistics and Language Learning (APL 4111)
- Reading Across Languages and Cultures: Theory, Research and Practice (APL 4692)

Arabic

- Topics in Modern Arabic Literature in Translation: The Syrian Revolution: Literature, Art, Ideology (ARAB 4130)

Architecture

- Community Building (ARCH 307X)

Art History

- Globalization and Contemporary Art (ARTARCH 4726)

Biology and Biomedical Sciences

- Intro to Ecology (BIOL 3810)
- Community Ecology (BIOL 4196)

Chinese

- Historical Landscape and National Identity in Modern China (CHINA 3160)
- Contemporary Chinese Popular Culture (CHINA 3210)
- Topics in Chinese Lit & Culture: Chinese Cities in the Global Context (CHINA 3300)
- US-China Relations: from 1949 to the Present (CHINA 3500)

Classics

- Money, Exchange and Power: Economy and Society in the Ancient Mediterranean World (CLASSICS 4760)

Earth, Environmental, and Planetary Sciences

- Topics in Environmental Sustainability (EEPS 3080)

East Asian Languages and Cultures

- Topics in Early Modern Korea: Guns, Tobacco, and Sweet Potato: A History of Material Culture (EALC 3250)
- US-China Relations from Conflict to Engagement, 1949-2016 (EALC 3600)
- US-China Relations, 2017-present (EALC 3610)

- Nature, Technology and Medicine in Korea (EALC 4200)
- Culture and Politics in the People's Republic of China: New Approaches (EALC 4240)
- Urban Culture in Modern China (EALC 4510)

Economics

- Intro to Econometrics (ECON 3150)
- Labor and the Economy (ECON 3345)
- Environmental Policy (ECON 3350)
- International Economics (ECON 3373)
- American Economic History (ECON 3640)
- Economic Realities of the American Dream (ECON 3840)
- Intermediate Microeconomic Theory (ECON 4001)
- Intermediate Macroeconomic Theory (ECON 4002)
- Applied Econometrics (ECON 4151)
- Open Economy Macroeconomics (ECON 4220)
- Behavioral Economics (ECON 4310)
- Public Finance (ECON 4325)
- Urban Economics (ECON 4360)
- Economics of Education (ECON 4390)
- Topics in Growth and Development (ECON 4520)
- Advanced Topics in Modern Economic Growth (ECON 4521)

Education

- Education, Childhood, Adolescence and Society (EDUC 3050)
- Sociology of Education (EDUC 4430)

Environmental Studies

- Environmental Modernism (ENST 3034)
- Community Based Conservation: Madagascar Sustainability Initiative (ENST 3060)
- Environmental Issues: Writing (ENST 3340)
- Sustainable Cities (ENST 3530)
- Environmental Justice (ENST 3540)
- Urban Ecology (ENST 3610)
- Applications in GIS (ENST 3710)
- Intro to Environmental Law (ENST 4510)
- IPCC: Governance, Policy and Science (ENST 4527)
- Advanced GIS (ENST 4710)
- International Climate Negotiation Seminar (ENST 4820)
- Interdisciplinary Environmental Clinic (ENST 5830)

Film and Media Studies

- Transnational Cinema(s): Film Flows in a Changing World (FILM 3410)

Finance (Business School)

- International Finance (FINANCE 443)

Germanic Languages and Literatures

- Topics in Holocaust Studies: Children in the Shadow of the Swastika (GERMAN 3060)

Global Studies

- Global Health and Language (GLOBAL 3006)
- Topics in Global Studies: Modern Indian Literature (GLOBAL 3008)
- Topics in Global Studies: Understanding Today's Russia (GLOBAL 3008)
- Global Futures (GLOBAL 3020)
- Chinese Economy in World History (GLOBAL 3176)
- Intercultural Communication (GLOBAL 3248)
- Global Surveillance Culture (GLOBAL 3511)
- "Model Minority": The Asian American Experience (GLOBAL 3512)
- Andean History: Culture and Politics (GLOBAL 3566)
- Borders, Checkpoints, and the Frontiers of Literature (GLOBAL 3602)
- Anarchism: History, Theory and Praxis (GLOBAL 3641)
- Russian Literature and Empire OR Russian Literature at the Borders: Multiculturalism and Ethnic Conflict (GLOBAL 3740)
- Topics in Russian Lit and Culture: Madmen or Visionaries? (WI) (GLOBAL 3750)
- Topics in Russian Lit and Culture: The Short Story (WI) (GLOBAL 3750)
- Topics in Russian Lit and Culture: The Soviet Experiment through Novels and Novellas (GLOBAL 3750)
- Nabokov and Others: Emigration, Literature, Identity (GLOBAL 3790)
- Nabokov in Europe and America (GLOBAL 3790)
- From McDonald's to K-Pop: New Movements in Asia (GLOBAL 3822)
- Empire in East Asia: Theory and History (WI) (GLOBAL 3860)
- Interrogating "Crime and Punishment" (GLOBAL 3866)
- Furies and Die-Hards: Women in Rebellion and War (GLOBAL 3890)
- Children of Immigrants: Identity and Acculturation (GLOBAL 4036)
- International Relations of Latin America (GLOBAL 4201)
- International Relations of Latin America (WI) (GLOBAL 4204)
- Islam, Immigration and the Future of European Culture (GLOBAL 4220)
- Gender Analysis in International Affairs (GLOBAL 4414)
- Latin American Populism and Neo-Populism (GLOBAL 4611)
- Labor and Labor Movements in Global History (GLOBAL 4622)
- 20th Century Latin American Revolutions (GLOBAL 4633)
- The Indochina Wars (GLOBAL 4644)
- Russia and the West: Creating and Representing Identity (GLOBAL 4868)
- Reading War and Peace (GLOBAL 4869)
- Global Asias (GLOBAL 4897)

Hindi

- Religion and Culture in South and Southeast Asia (HINDI 3050)

History

- Historical Methods (in appropriate modern, non-US region)
- Historical Methods: Decolonization in the 20th Century (HISTORY 3006)
- Historical Methods: African History (HISTORY 3007)
- Historical Methods: Latin American History (HISTORY 3008)
- Historical Methods: Middle Eastern Politics (HISTORY 3009)
- Hot Peace: US – Russia Relations Since the Cold War (HISTORY 3018)
- The Global War on Terrorism (HISTORY 3030)
- Jews in French History and Culture (HISTORY 3034)
- Islamic History: 600-1200 (HISTORY 3039)
- Early Modern China (HISTORY 3047)
- Chinese Diaspora: A Social History of Global Migration (HISTORY 3049)
- Modern Latin America (HISTORY 3070)
- 19th Century China: Violence and Transformation (HISTORY 3085)
- The Holocaust: History and Memory of the Nazi Genocide (HISTORY 3087)
- Vienna, Prague, Budapest: Politics, Culture and Identity in Central Europe (HISTORY 3092)
- Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History (HISTORY 3093)
- The World Is Not Enough: Europe's Global Empires, 1400-1750 (HISTORY 3103)
- War, Genocide and Gender in Modern Europe (HISTORY 3104)
- Riots and Revolution: A History of Modern France: 1789 to the Present (HISTORY 3109)
- Modern Germany (HISTORY 3111)
- Europe in the 20th Century: Unruly Populations (HISTORY 3116)

- Transnational Feminisms (WGSS 4245)

* Students may submit a request to add a course by following the instructions for the Petition Process.

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 3000 or 4000 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Study abroad credit only counts at the 3000 level.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, the School of Continuing & Professional Studies, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit form with Arts & Sciences to take the course for "general credit" and then petition to have the course count as an elective toward their Global Studies major.
- Students may not receive credit for January Intensive Term (J-Term) study abroad programs; these programs are too short in duration.

Latin Honors

- Students must graduate with an overall grade point average of 3.65 or higher to qualify for Latin Honors.
- Students must submit an intent form and be accepted for candidacy.
- Students should enroll in GLOBAL 4985 during the fall of senior year and in GLOBAL 4986 during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

All Global Studies majors must satisfy a language requirement that entails both the successful completion of four semesters of a modern language for a letter grade and placement into the third year of that language.

Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili.

Please see the FAQs on the Global Studies website for more information.

History

The Department of History engages its students through a study of the past. We are committed to the idea that the most compelling stories are often the most revealing ones. In addition to teaching students the particular skills of historical inquiry, we provide them with tools that serve them beyond their majors and beyond the university.

The discipline of history poses challenging questions about the ways that human beings have made the worlds they live in. There are many approaches to history. Some historians study politics, whether that means political parties or the ways that people who never held public office nonetheless act to shape public life. Others study the lived experience of everyday Americans or the popular culture that reflects how people understand the world around them. Still others are especially interested in the kinds of stories about the past that we tell ourselves, for those stories reveal a great deal about our own society as well as that of a different time. Although it is not true that history repeats itself, it is true that, without knowledge of the past, we are unable to understand the present.

The Department of History at Washington University offers history majors and minors the opportunity to develop a coherent and challenging program of study. We also encourage all undergraduates to incorporate the discipline of historical thinking into their liberal arts education. In all courses, students are taught the kinds of skills that will help them succeed both in classes at Washington University and in their postgraduate careers. History students learn to read carefully, think critically, research honestly, and present information and ideas clearly and concisely, both verbally and in writing.

The Department of History offers a wide variety of courses, ranging from the ancient world to the present and spanning across Africa, Asia, the Middle East, Europe, and the Americas. There are many opportunities for small-group learning and discussion in first-year seminars, sophomore honors colloquia, writing-intensive seminars, and advanced seminars. The history major is structured to be flexible and to encourage students both to pursue established interests and to explore topics, time periods, and locales that may be less familiar.

The Department of History prides itself on the individual attention that faculty mentors provide to students. Graduates express great satisfaction with their experiences in the major, specifically mentioning the faculty's knowledge of the subject matter, dynamic teaching styles, and respect for students.

Some history majors go on to pursue graduate work in the field and become professional historians, but most find that the knowledge and skills they build through history courses prepare them for a wide range of careers. Our graduates have attended law and medical schools and have pursued careers in government, education, research, business, communications, international agencies, publishing, museums and archives, public advocacy, and many other fields.

History

HISTORY 1000 Introduction to History
Who was Abraham Lincoln, and what accounts for the persistence of that question? For generations after his death, Lincoln's life has undergone dramatic reinterpretations. Countless interventions have added untidy layers of context, myth, and ideology to our understanding of Lincoln-seemingly to the extent that America's most iconic man seems more icon than man. This course foregrounds the challenge of historicizing Lincoln as a way into the discipline of history. Through active engagement with primary and secondary sources, students will learn how to read historical evidence critically. Students will cultivate a historical imagination, allowing them to make original and persuasive arguments. This course counts toward the History major and fulfills a Humanities (HUM) distribution requirement. THIS COURSE IS FOR FSAP STUDENTS ONLY.
Credit 3 units. A&S IQ: HUM BU: HUM
Typical periods offered: Summer

HISTORY 1010 Western Civilization
This course is a history of Western civilization from 3500 BC to AD 1600. Western civilization may be characterized as one long debate on the holy. In no other civilization did this debate about the limits of the sacred and the profane -- this constant effort at trying to grasp the divine through word and deed -- last continuously for more than 5000 years. To argue over the holy is to argue over the very nature of how to live a life, from the most mundane daily activity to the most sublime act of the imagination. It is to argue over how politics, economics, art, philosophy, literature, and religion are realized in a society. Apart from many types of polytheism, we study the three great world monotheistic religions: Judaism, Christianity, and Islam. We study the ancient cultures of northern Africa and the eastern Mediterranean, the empires of Alexander the Great and imperial Rome, the Christianization of the Roman Empire and the rise of Islam, the early medieval world in the North Sea and the Byzantine Empire in Constantinople, the formation of Latin Christendom and the papal monarchy, the Crusades and the reaction of the Islamic lands, concepts of individuality, the persecution of Jews and heretics, chivalry and peasant servitude, the Mongol Empire, the Black Death and the devastation of the 14th century, the Renaissance in Italy and the Protestant reformation, the hunt for witches and the scientific revolution, and the medieval origins of the African diaspora and the European conquest of the Americas. What defined being human -- and so a man, a woman, or a child -- over five millennia? Fundamental questions of this course include the following: What is Western civilization? When do the characteristics defined as Western come together as a coherent phenomenon? What, then, is historical truth? This course (through lectures, reading primary sources, discussion sections, and essay writing) gives the student a learned background in almost 5000 years of history. This is an introductory course for the history major and minor.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

HISTORY 1011 Western Civilization
This course provides an introduction to the history of modern Europe. It begins by following Europeans from the upheavals of the Enlightenment to the French Revolution, and from the industrial revolution to the era of nation-state building; continues by exploring how Europeans became embroiled in the scramble for empire, the era of totalitarianism, and two disastrous world wars; and ends by examining how Europeans coped with the divisions of the Cold War, the collapse of communism, and the challenges of unification and resurgent nationalism. Introductory course to the major and minor.
Credit 3 units. EN: H
Typical periods offered: Summer

HISTORY 1012 Western Civilization
This course provides an introduction to the history of modern Europe. It begins by following Europeans from the upheavals of the Enlightenment to the French Revolution, and from the industrial revolution to the era of nation-state building; continues by exploring how Europeans became embroiled in the scramble for empire, the era of totalitarianism, and two disastrous world wars; and ends by examining how Europeans coped with the divisions of the Cold War, the collapse of communism, and the challenges of unification and resurgent nationalism. Introductory course to the major and minor.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Spring

HISTORY 1020 Introduction to Modern European History
The history of Europe since 1500 is a remarkable array of contradictions: freedom and fascism; democracy and imperialism; industrialization and Romanticism; international capitalism and fervent nationalism; social change and scientific racism. What produced these

developments in European social, economic, and political spheres and how did these different currents diverge and converge? How did European developments affect global actors and vice versa? What are the consequences for our own time of these contradictory aspects of Europe's modernization? Class assignments include textbook and primary source reading (c. 75 pages/week), discussion participation, 2 short analytical papers, 3 in-class exams, and a final cumulative take-home essay. This course satisfies the Introductory Survey requirement for the history major and minor.
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Spring

HISTORY 1023 An Ancient Murder Mystery: The Death of Jesus From the Gospels to Mel Gibson
When Mel Gibson's movie The Passion of the Christ was released in 2004, it provoked a tremendous amount of public debate and divided Christians (Catholics and Protestants of all sorts) and Jews (Orthodox, Conservative, Liberal and Reform) in every possible combination. Although the virulence of the discussions may have given us the impression that this was a new issue, in reality the question of the Jews' role and involvement in Jesus' death has been disputed for almost two thousand years. The claim that the Jews are responsible for Christ's death is the subject of this class and we will study its history from the gospels to today using textual sources (historical, religious and literary works) and the visual arts (paintings and movies). But this class is not about who did or did not kill Jesus, nor is it about judging people's positions on the issue. Rather it is about the power of a story to travel through time and space, to being told and retold in different versions and with different purposes, and to affect the real lives of men and women. First-Year Seminar; Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

HISTORY 1030 History of the United States Since 1865
This class examines American political, social, and cultural history from 1865 to the present. Topics to be covered include immigration, industrialization, urbanization and suburbanization, the changing role of women, the Great Depression and New Deal, the two World Wars and the Cold War, the Civil Rights Movement, and the rise of political polarization. This course provides an opportunity for students to conduct their own research into historical topics and to hone their writing and analytical skills.
Credit 3 units.
Typical periods offered: Summer

HISTORY 1050 Economic History and Entrepreneurialism in Modern Western Civilization
This introductory course surveys Western Civilization (predominantly European history, but with a component of American history) from the seventeenth century to the present, focusing on economic history and the rise of entrepreneurialism.
Credit 3 units. A&S IQ: HUM BU: HUM, IS
Typical periods offered: Fall

HISTORY 1099 First-Year Seminar: Silk Roads and Empires
Did the Silk Road even exist? Coined by a German geographer in the late 19th century, the term Silk Road has long been a metaphor for global connectivity. Evoking the image of camels and traders, diplomats and warriors, and missionaries and artists roaming across Eurasia from Chinese cities to Mediterranean shores, the so-called Silk Road has captivated the imagination of historians, novelists, and film makers for decades. This course investigates the fact and fiction of the Silk Road. Over the course of the semester, we will encounter people, texts, and objects that weaved a world wide web before the age of the internet. We will examine Buddhist monks, Muslim scholars, and Mongol rulers who connected disparate regions of the globe before the age of globalization, and we will discuss whether the concept and history of the Silk Road may offer anything novel for us in the 21st century. This course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, HUM, IS EN: H
Typical periods offered: Spring

HISTORY 1100 First-Year Seminar: England in the Age of Shakespeare
This course will examine certain themes central to our understanding of Shakespeare's England, such as monarchy, order, power and the limits on action, national identity, gender and family. Students will read and discuss modern historical scholarship, a range of contemporary sources, and Shakespeare's plays, and the relationship between them.
Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

HISTORY 1101 First-Year Seminar in African History
Gender is a powerful lens through which to examine Africa's past. Defined as the behaviors, attitudes and roles that society assigns the sexes, gender is one of the principles that has shaped African societies from the earliest times to the present. This course provides a broad introduction to major themes and debates relating to gender in African history. We will examine how gender has been produced, reproduced and transformed in the lives of African women and men from the latter parts of the 19th century to the 20th century. We will highlight African agency and structures of power as we seek to examine gender as a social and historical construct in Africa. We will also analyze how gender intersects with race, sexuality and politics. Beginning with some of the methodological questions about gender in African history, our case studies -- drawn from a range of sources including articles, book chapters, novels and films -- will cover topics such as domesticity and the colonial encounter, wicked women and the reconfiguration of gender relations, nationalism and the women's question in African history, and sexuality and the state.

HISTORY 1106 First-Year Seminar: Race, Ethnicity, & Nation in Latin America and the Caribbean
This course examines the historical formation of racial and ethnic discourses, identities, and communities in Latin America and the Caribbean from the colonial period to the present. The course focuses on how race relations have shaped Latin American and Caribbean society over time, as well as how race and racial identities have been central to the construction of Latin American national identities in the nineteenth and twentieth centuries. Topics to be covered include: slavery and blackness; creole and creolization; new categories of people such as Indians, mestizos, and mulatos; nation-building and racial discourse, including racial democracy, cosmic race, racelessness, gender and honor, and mestizaje; immigration to Latin America; and U.S. and Latin American race relations in comparative perspective.

HISTORY 1109 First-Year Seminar: The Politics of Health in the Modern Middle East

Middle Eastern history has often been studied in terms of political and military conflicts while other aspects of society are marginalized. This course will look at how public health, medical knowledge, and particular gender norms were implicated in creating and maintaining modern states and communities in the 20th century. The course will cover topics such as: muscular Judaism and Zionism; fertility and modernity; gender roles and militarism; psychiatry and religion; the state's role in preserving health; and pluralism in the provision of health services.

HISTORY 1117 First-Year Seminar: The City in Early Modern Europe

From the city-states of Renaissance Italy to the eighteenth-century boomtowns of London and Paris, cities functioned as political, economic, and cultural centers, creating unique opportunities and challenges for their diverse inhabitants. Using a wide variety of primary and secondary sources, this course will examine how men and women, rich and poor, established citizens and marginal groups, tried to understand and manage life in the city. Their conflicting experiences and expectations created not only social and economic unrest, but also a resilient social infrastructure, a tradition of popular participation in politics, and a rich legacy of cultural accomplishment. Topics studied include: urban political and economic organization; the creation and use of public spaces; religion as a source of community and conflict; and urban crime and public punishment.

HISTORY 1120 First-Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities

What does it mean to identify as mestizo, moreno, or mulato? How have Latin American nations dealt with their mixed racial populations and their rich African and indigenous heritages? What does it mean to be black in nations where the official discourse is one of racial hybridity or color blindness? This course examines the history of racial thinking and the experience of race in Latin America. While the focus of the course will be on the complexities of race in Latin America, a place of enormous ethnic and cultural diversity, we will also draw comparisons to the history of race in the U.S.

HISTORY 1124 First-Year Seminar: The Meaning of Pakistan: History, Culture, Art

Pakistan is the second largest Muslim nation and the sixth most populous country in the world. First imagined as an anti-majoritarian and anti-imperial idea, the nation came to be split between East and West Pakistan, with a hostile Indian nation dividing the country. The subsequent emergence of Bangladesh, from within, exposed the complexities of US imperial and Indian power, colonialism, identity, ethnicity, race, nationalism and repression. More recently, the War on Terror has once again exploited the ethnic and cultural conflicts produced by world histories of power and resistance. The events of the past two hundred years have undoubtedly and violently exacerbated the politicization of social and cultural identities. This course situates Pakistan in the context of pre-colonial social formations, British colonialism, internal colonialism, US imperialism, the Cold War, Soviet interests, Indian regional hegemony and then turns to the powerful and diverse struggles launched by its own citizens against these external forces. How did successive empires construct and politicize social identities, and how did people contest and adapt these? How did caste, gender, race and religion shape empire and anti-imperial histories? Our sources will be historical, ethnographic, and literary. We will cover topics such as colonial fantasies, decolonization, the political uses of social categories of tribe, caste, language and gender, the political economy of militarism, terrorism, 'development', activism, diasporic formations, poetry, music and art. The course will deepen our collective understanding of a critical series of developments in world history. Just as crucially, we will build a framework within which to address the stereotypes about Pakistan that dominate popular and media discourses today.

HISTORY 1127 First-Year Seminar: The Caribbean and the World

For many, the Caribbean evokes images of an exotic place with beautiful beaches, friendly, happy natives and unbridled hedonism. Yet, much more than a distant vacation destination for first world consumption, the Caribbean has long been closely intertwined with major events in World History. This course explores the ways in which the Caribbean has been a part of the making of World History, beginning in the 14th century and ending in the contemporary period. Themes covered will include: capitalism and slavery; the Haitian Revolution and its global reverberations; U.S. imperialism in the Caribbean; the impact of Caribbean migration on British culture; Caribbean sports; music and food in a global context; and the contributions of Caribbean thinkers to anti-colonial and anti-imperialist thought and action.

HISTORY 1129 First-Year Seminar: The Nuremberg Trials and International Justice

This course is an exercise in understanding how professional historians and the general public discover and use the past. The main goals of this course are to understand the many different methods and standards applied to the past; to understand how and why each generation changes the past as it seeks to make it usable; and to develop the skills of exposition and argumentation necessary to describe and analyze complex historical issues and to express critical ideas effectively. The subject of this inquiry will be the Nuremberg trials - the innovations and critiques around the law and politics of the trials themselves, as well as the trials' legacies for ideas about international justice in postwar America and the world. Course is for first-year, non-transfer students only.

HISTORY 1131 First-Year Seminar: Conquest Cultures: Colonialism, Violence, and Memory in Latin America

What was the Spanish Conquest? How have projects of colonization, acculturation, and religious conversion been pursued in Latin America since? Beginning with the military campaigns of Spanish conquistadores in the sixteenth century and ending with literary reinterpretations of the Spanish Conquest by Latin American writers, we explore the perpetuation of violence in the service of empire, Christianity, and nation-state formation through primary documents, films, art, literature, and scholarly work. The goal is to go beyond Columbus, Cortés, Pizarro, and other famous explorers to understand the range of actors who have played a role as interpreters, military allies, and chroniclers, with special emphasis on women and people of native American and African descent. This seminar is intended as a critical introduction to some of the major problems in Latin American history for students with limited prior knowledge of the region.

HISTORY 1132 First-Year Seminar: From the City On a Hill to 9/11: Religion and Social Justice in America

From the Puritans' search to build the city on a hill, to the growing conflation of Islam with terrorism, Americans have long nurtured a self-identity as God's chosen people, an idea that has helped them justify and normalize a theology of both conquest and suffering. This course will analyze how religion served to both buttress and contest notions of social domination, punishment, reform, and revolution in the U.S. from the colonial era to the present. Topics will include the American Jeremiad, abolitionism, slave rebellions, Native American Catholicism, Fundamentalism, the Catholic Worker Movement, Pacifism, the Black Freedom Struggle, the Moral Majority, and Post-9/11 military and gender interventions with the Islamic world.

HISTORY 1151 Health and Disease in World History

Health and disease are universal human experiences, yet vary profoundly across time and place. Extending from ancient times to the present, this course surveys that variety from a global perspective. We will explore medical traditions from around the world, then examine how these responded to major epidemic diseases such as the Black Death. We will study the globalization of disease and the emergence of scientific medicine after 1450, then turn to the interrelated histories of health and disease in the modern era. Throughout, we will attend carefully to how the biological aspects of health and disease have shaped world history, while at the same time exploring the powerful mediating role of social, cultural, economic, and political factors--from religious beliefs and dietary practices to inequality, poverty, empire, and war--in determining the myriad ways in which health and disease have been experienced and understood. Introductory course to the major and minor.

HISTORY 1170 Beatrice's Last Smile: A History of the Medieval World, 200-1500

The medieval world, stretching from the Mediterranean to the Americas, lasted from the third to the sixteenth centuries. This course is a sweeping historical narrative framed around holiness. By vividly interweaving stories about men, women, children, gods, angels and demons, it is possible to evoke the reality of holiness in ideas, spaces, buildings, smells, rivers, religion, art, noises, trees, blood, shoes, etc., from one century to another. Students will study the Late Roman Empire, Christianization, paganism, the barbarian invasions, the rise of Islam, the Carolingians, Vikings, Anglo-Saxons, and the Crusades, just to name a few. Students will read poets, philosophers, historians and novelists, which are often the only surviving fragments of wills or testimonies.

HISTORY 1190 Introduction to the History of Modern Medicine

The medical revolution is the last of the three greatest events in human history, alongside the agricultural and industrial revolutions. While all three have resulted in population increases, modern medicine has been the most responsible for the exponential growth of human society. This course will introduce students to the history of Western medicine from the Hippocratic Oath to the Human Genome Project, with special emphasis on the major problems in American medicine. Among the concepts students will explore are: the responsibility of medical practioners; the understanding of healing and suffering; surgery and the role of anesthesia; the study of human anatomy; improved diagnostic techniques; cells and microbiology; public health and the role of the state.

HISTORY 1501 First-Year Seminar: The Presidency 101: From Washington to Trump

Is this your first presidential election, or are you a policy wonk? Regardless of your political experience, this course provides an opportunity for students to learn about the American presidency as a contemporary political institution with deep roots in American history. This first-year seminar introduces undergraduates to the presidency by considering the institution in its political and cultural contexts. Using the 2020 election as a point of departure, this course will explore how the current president as well as the aspiring candidates reveal broader trends and new developments in American political history. In addition to introducing students to the study of the presidency, this course will also introduce students to diverse means of studying culture, with assignments that range from political speeches to policy documents to popular media.

HISTORY 1551 Temple & Palace in World History: Approaches to Religion and Politics in the Middle East

This course aims to examine the ways in which temple and palace cooperated with and competed against each other in the Middle East from ancient to the present times. As sites of spiritual and political power, temples and palaces have played a major role in human history. They have been a source of cooperation and conflict by inspiring and regulating the spiritual and social lives of people, including how they enacted laws, developed cultures, established institutions, and interacted with each other as individuals, families, and societies. The course will trace how their interactions produced various models of authority, law and social association and how they collectively and separately rationalized social hierarchy and diversity in human societies. Introductory course to the major and minor.

HISTORY 2053 Historical Fiction & Fictional Histories

The relationship between history and fiction has always been contentious and sometimes turbulent, not least because the two genres have traditionally been seen as mutually exclusive. However, new hybrid forms of writing-from historical fiction, to docudramas, to fictionalized biographies-have led to the blurring of the boundary and encouraged the claim that history itself is just another form of fiction. At the same time, historical novelists have placed increasing emphasis on the authenticity, sometimes even the accuracy, of their narratives and characterizations. And further still, contemporary writers are challenging dominant historical narratives by creating plausible fictions from the perspectives of the subordinated, the marginalized and the disenfranchised: plebeians, women, and indigenous, enslaved, and diasporic peoples. As historical novels become ever more popular, the distinction between history and fiction appears to be collapsing before our eyes. Through reading and discussing some outstanding examples of the genre of historical fiction published between the early nineteenth and the early twenty-first century (from Walter Scott to Charles Dickens, from Toni Morrison to Amitav Ghosh, from Graham Swift to Hilary Mantel), this course will investigate whether history is 'factual' or just another form of fiction; whether the appeal of historical fiction should lie in its authenticity; whether the recent success of historical novels should be viewed as a new development, or rather, as a revival of an older literary tradition; and whether novelists and dramatists are more adept than historians at interrogating issues of memory, identity, and change.

HISTORY 2105 Sophomore Seminar: Mobilizing Shame: Violence, the Media, and International Intervention

Deciding when and when not to intervene in the affairs of a foreign and autonomous state has become a hot-button issue in light of the occupation of Iraq and Afghanistan, and of the more recent lending of support to Syrian rebels. In this course, students will examine the emergence of the international community, the development of human rights, the rise of the war correspondent as a mythical figure, the creation of supranational political and military institutions, the influence of the media on public sympathies, and the changing nature of global politics. Case studies may include: the Greek War of Independence, the Crimean War, the break-up of the Ottoman Empire, the Spanish Civil War, the Second World War, the Vietnam War, Apartheid in South Africa, the Rwandan genocide, the Somali Civil War, and the Balkan conflicts of the 1990s.

HISTORY 2117 First-Year Seminar: Angels, Prostitutes and Chicas Modernas: Women in Latin American History

Women have been active players in the construction of Latin American nations. In the last two decades, leading scholars in the field have taken up the challenge of documenting women's participation. This research explosion has produced fruitful results to allow for the development of specialized courses. This course looks at the nation building process through the lens of Latin American women. Students will examine the expectations, responsibilities and limitations women confronted in their varied roles from the Wars of Independence to the social revolutions and dictatorial regimes of the twentieth century. Besides looking at their political and economic lives, students will explore the changing gender roles and relations within marriage and the family, as well as the changing sexual and maternal mores.

HISTORY 2124 Sophomore Seminar: Slavery and Memory in American Popular Culture

Sophomores receive priority registration. The history of slavery has long created a sense of unease within the consciousness of many Americans. Recognizing this continued reality, this seminar examines how slavery is both remembered and silenced within contemporary popular culture. Although slavery scholarship continues to expand, how do everyday Americans gain access to the history of bondage? Taking an interdisciplinary approach to these intriguing queries, we will examine a range of sources: literature, public history, art/poetry, visual culture, movies and documentaries, as well as contemporary music

including reggae and hip hop. The centerpiece of this course covers North American society, however, in order to offer a critical point of contrast students will be challenged to explore the varied ways slavery is commemorated in others parts of the African Diaspora.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Spring

HISTORY 2127 First-Year Seminar: Empire At Play: Gaming, Gambling, & Material Culture in Late Imperial China
This course offers a new perspective on what people played, how they played, and why. A series of historical changes in late imperial China, including domestication, consumerism, gender divisions, sexual fetishes, war and finances, westernization, and diasporas, have shaped the activities that people enjoyed. This course will examine game play and material culture as a lens to examine Ming-Qing history and people, especially the people's anxiety, excitement, taboos, desires, and daily life that was shaped by the broader social environment.
Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

HISTORY 2158 First Year Seminar: Outcasts and Outlaws: The History of Othering in Modern Europe
Villainous figures such as pirates, bandits, rebels, and terrorists have easily jumped from the historical record into the broader cultural imaginary. But what, beyond their disdain for the law, do they have in common, and why do they keep resurfacing in accounts of contemporary politics? This course will survey several outsider archetypes across 19th- and 20th-century Europe and its empires. We will ask: what does it mean to be outside of the community, and which mechanisms and spaces have historically produced and maintained this exclusion? With particular attention to the history of European imperialism, this course will analyze how images of outcasts and outlaws have been shaped by perceptions of gender, race, and class, and how they have produced distinct forms of management and policing. The class will also highlight the central role that mobility has played for this type of othering. Putting archetypes from the European underworld into conversation with one another and investigating their reconfigurations across time, we will systematically work out what function they perform for past and present society and what, if any, forms of resistance they afford.

Typical periods offered: Spring

HISTORY 2162 First Year Seminar: Global Histories of Science and Knowledge
What makes a scientist a scientist? What is science? What are the social and cultural processes that have rendered science its meaning? This first-year seminar is an introduction to the global histories of science and knowledge, focusing especially on modern science's dynamic relationship with colonial rule, decolonization, indigenous or local knowledge traditions, and Cold War
scientific internationalism. The course examines a wide range of historical, sociological, and anthropological materials and methods in order to trace the everyday workings of different scientific disciplines within a "living laboratory," which are a series of spaces and sites that produce knowledge. These also happen to be spaces that are conventionally not viewed as normative scientific spaces, but spaces where cross-cultural contact produced knowledge (i.e., early modern philosophical, brokered and subaltern, cartographic, mechanical, astral, environmental knowledge). We will trace the uneven and "indetermined" progression of this knowledge across the Global South to understand how these ideas were made, circulated, resisted, and changed over time not just in Europe, but in Africa, East Asia, the Middle East, and South Asia. Given the interconnected nature of world history, students will also acquire tools to understand themes such as colonization, modernization, democracy, and social change critically engaged with categories of race, gender, and class.
Credit 3 units.
Typical periods offered: Spring

HISTORY 2190 The Theory and Practice of Justice: The American Historical Experience
This introductory course uses historical case studies combined with readings in law, literature, and philosophy to illuminate key episodes where definitions of justice were contested in 19th and 20th century America. Some of the conflicts to be explored include: Cherokee Removal, Civil War era debates over southern secession; whether reparation should be offered to freed people to redress the injustices of racial slavery; the denial of voting rights to women as a case of taxation without representation; 20th century controversies over legal bans on racial intermarriage; free speech versus hate speech in the 1960s and 70s; and recent debates over affirmative action and gay marriage. Attendance Required.

Typical periods offered: Fall

HISTORY 2200 How to Sit On an Iron Throne: Reading (Early Modern) Politics and Violence Through Game of Thrones
This class will attempt to enthusiastically pillage Game of Thrones and investigate what possible storylines were supplied by the history of 15th-17th century Europe. These storylines are heavily politicized in Game of Thrones and thus offers an exceptional opportunity to investigate how early modern men and women thought about power, fought with words and gift, built loyalties, betrayed one another, killed one another, married one another, and fielded armies of soldiers and cronies. Through the characters of Jon Snow and Tyrion Lannister, students will study the historical stain of bastardy, and with the help of Cersei Lannister, Catelyn Tully and Arya Stark, the place of women in webs of power will also be examined.

HISTORY 2210 Who Died and Made Them Kings? People, Politics, and Power in the Atlantic World, 1500-1800
Who were the few, and who were the many, in the early-modern Atlantic World? The discovery of the Americas and the coalescing of an Atlantic World would do much to transform profoundly, the common understanding of the body politics in the early-modern world. The Americas provided new models of kingship and empire; Aztecs and Incas ruled in way which both seemed familiar and strange to Spaniards' eyes. In the Caribbean, the North, and the Amazon, nomadic and semi-nomadic nations presented even more puzzling situations, where no one seemed to rule. And yet other nations, such as the Iroquois, were experimenting with new political forms. This course is thus focused on tracking this multitude of experiences from a socio-political and anthropological perspective, rather through intellectual history.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H
Typical periods offered: Spring

HISTORY 2220 The Atlantic World, 1000-1800
Survey of the peoples, cultures and civilizations that bordered and traveled the Atlantic Ocean from Norse voyages up to the Napoleonic Wars. Examines the importance of the Atlantic as a frontier, an economic resource, a highway, and an impetus to technological innovation. Considers also the political, cultural, economic and demographic effects of increasing contact among Europeans, Americans, and Africans.

HISTORY 2240 African Urban History
This introductory course explores the origins and growth of African cities through the historical process of urbanization in sub-Saharan Africa. By focusing on the form and function of cities and examining their changing relations with the surrounding countryside, we will explore the fundamental urban issues and tensions which have helped to shape the history of Africa. Some of the topics to be covered include environmental issues, the creation of states, religion, cross-cultural contact, colonization, public health, gender relations and decolonization.

Typical periods offered: Fall

HISTORY 2290 From St. Louis to Shanghai: Cities and Citizens in Global Urban History
This course is designed to give students an introduction to key themes and scholarship in urban history. Readings and class discussions will examine how cities change over time, how urban spaces are continually built and rebuilt, and the way in which activists and government officials assert power. The course will span a large geographical and chronological scope. Special attention will be paid to St. Louis, in relation to urban spaces around the globe, especially Chinese, Brazilian and Indian cities, to reveal how an international framework forces us to rethink what we know about cities and what the concept of urban means.

HISTORY 2320 War, Rebellion, and the Formation of American Identity, 1754-1865
Warfare is a creative process. New states, identities, and cultural movements appear from the violence and destruction. This course will survey the United States' experiences with organized armed conflict from before the American Revolution to the end of the Indian Wars. Though the class will deal with war, its focus will not be on military tactics or the outcome of battles. Rather, the course will utilize war as a prism through which to view the ways in which Americans conceived of themselves. Students will address a number of questions: How and why did people in North America conceive of themselves as distinct from Europeans? Did war lead to more inclusive or exclusive views of who was considered American? How did people of different backgrounds view violent conflict? Why did some wars become central to American myth and others largely forgotten? Did war and rebellion promote a newly formed nationalism or did they help lead to sectionalism and the Civil War? What is the relationship of warfare to cultural products? Readings will consist of secondary materials from a range of disciplines and primary documents that include novels, speeches, newspaper articles, letters, memoirs, editorial cartoons, and paintings.

HISTORY 2340 Power and the Holy in Latin Christendom
This course focuses on the conflicts for legitimization between popes and emperors in late medieval Europe. We will explore the various discourses through which power was legitimated and reproduced throughout Latin Christendom. The weakening of imperial control in northern and central Italy in the eleventh century allowed for the creation of new forms of organization: city communes. As new structures of social aggregation emerged within the urban landscape of late-medieval Europe, city elites experimented with new forms of power. Religion and heresy were indissoluble elements of the new discourses deployed to claim legitimate authority. Some of the questions we will pose through our discussion of primary sources and secondary readings will impinge on the relation between political and religious discourses in shaping the world of late medieval Europe. Can we separate between the secular and the religious? Are these adequate categories for an historical analysis of the ways in which medieval people experienced their world?

HISTORY 2346 The Living American Civil War
This course focuses on the Civil War and Reconstruction as the central drama of American life in the 19th century, and also, the central event of American history itself, to the present day. How do we begin to understand the significance of the killing fields of the American Civil War, its three quarters of a million dead? The bloody conflict, and its causes and consequences, are explored from multiple perspectives: those of individuals such as Lincoln, McClellan, Davis, Grant, Longstreet and Lee, Dix and Tubman, Douglas and Douglass, who made momentous choices of the era; of groups such as the African American freedpeople and the Radical Republicans, whose struggles for freedom and power helped shape the actions of individuals; and of the historians, novelists, filmmakers and social movements that have fought to define the war's legacy for modern America. How is the Civil War both long ended and, at the same time, very much alive and still contested in contemporary America? Modern, U.S. PREREQUISITE: Sophomore standing or permission of the instructor.

HISTORY 2360 Urban America
The city is a crucial frame for understanding the nation's cultural, economic, social, political and ecological concerns. This course discusses its importance in shaping American society and consider urban environments as living, breathing, contracting and expanding regions in the landscape. Questions of race, class and gender will be explored in an attempt to understand the current configuration of American cities, and to allow students to engage meaningfully with the continual transformation of urban space. Attention will be paid to the role played by popular imagination in the formation of public policy, civic spatial arrangement, suburban development and urban historical geography.

HISTORY 2412 Sophomore Seminar: Slow Violence: An Introduction to Political Ecology
This sophomore seminar is as an introduction to the related fields of political ecology and environmental history. Students will learn how to use the tools of political economy and historical inquiry to understand how environmental change and conflict are informed by political, economic, and social dimensions. While hurricanes and forest fires serve as spectacular symbols for an ecosystem gone wrong, it is the pervasive slow violence of the unspectacular, the invisible, that seeps into the daily lives of millions across the globe. From toxic waste

deposits creating cancer clusters to the long-term effects of consistent heat exposure, the environmental consequences of human agency are played out in the deteriorating bodies of the poor and in the slow and steady contamination of the landscape.

HISTORY 2420 Globalization and Its Discontents
Today, the heady promises of globalization appear to have failed us. The notion of global markets and global citizens seems to have remained at best, an ideal. Meanwhile the world's majority has witnessed a staggering decline in education, nutrition, health and even physical mobility. Nowhere have these developments passed unquestioned: from the rise of the so-called Maoist insurgency in India to the Occupy movement in the US, people and especially the youth have expressed their outrage in creative and unconventional ways. This course plots the long and necessarily violent history of forging global interconnections. The lens for our analysis will be India, South Asia and their relationship with the United States. We will approach a range of novels, films and popular cultural artifacts as we build our own understanding of the nature, critique and promise of globalization.

HISTORY 2450 Ben Franklin's America
In this course, we will explore Ben Franklin's America, from the earliest stirrings of political and religious dissent in the first decades of the eighteenth century to the post-Revolutionary debates over the meaning of republican virtue, American character, and representative government. We will read primary sources from a variety of figures who contributed to the century-long debate over these subjects, and then we will hear from Franklin himself, as he offers his own insight into these issues, observing the changes taking place around him.

HISTORY 2460 Sophomore American Frontiers: Badlands and Borderlands in U.S. History, 1776-1898
This course will examine the northern, southern, and above all western regions that comprised the borders and borderlands of the United States from the American Revolution through the late nineteenth century. Exploring local cultures and politics in depth, American Frontiers will address not only the mechanisms by which the United States wrested control of the continental interior, but the immediate and longer-term social consequences of this process for the peoples living within its diffuse regions. In addition to reading scholarly literature, students will work with primary sources such as travel narratives, maps, newspapers, photographs and paintings. Further, there will be frequent explorations into recent fiction and film, encouraging students to question and critique the very imagery that Americans use to construct their visions of the frontier. Through interwoven lectures and in-class discussion, students will be exposed to Indian, Mexican, Canadian, and American voices, black and white, female and male, that will lend original perspectives to the questions of governance, labor, warfare, law, immigration, freedom, and family that consumed border residents straddling multiple worlds.
Credit 3 units. A&S IQ: HUM, LCD BU: BA, HUM EN: H

HISTORY 2470 Contested Histories of International Development: Theories, Case Studies, and Controversies
These are the central questions with which students will grapple as they draw from conventional historical texts, fiction, poetry, United Nations reports, films, and cartoons in Histories of International Development. As the end of World War II gave rise to the Cold War, the Third World emerged as a battle ground on which global superpowers vied for influence, often through development initiatives. Critically examining development therefore provides a lens into the major historical processes that dominated the second half of the 20th century, from decolonization to the Cold War, the expansion of capitalism in its many forms and, eventually, the War on Terror. Combining an intellectual history of development with a series of case studies from around the globe, this course examines the myriad ways policy makers, theorists, and everyday people have created, contested, and reworked the complicated meanings of international development.

HISTORY 2480 Undergraduate Internship in History
Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities, e.g., 8-10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours. Students may not receive credit for work done for pay but are encouraged to obtain written evaluations about such work for the student's academic adviser and career placement file.
Credit 3 units.
Typical periods offered: Fall, Spring

HISTORY 2721 Ampersand: Rethinking Washu's Relation to Enslavement: Past, Present and Future
Explore Washington University's entanglement with the institution of slavery over its 168-year history. This full-year course guides students into independent research that engages the distortions, erasures, and silences of the slavery archive, especially as they pertain to Black lives in St. Louis whose stories shape the University's long and important tradition. Use textual and digital methods in an endeavor to understand this past, learn how it shapes our present, and consider how it ought to shape our institutional future. This class is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Fall

HISTORY 2722 Ampersand: Rethinking Washu's Relation to Enslavement: Past, Present, and Future
The goal of our course, Ampersand L61 2722, "Rethinking Wash U's Relationship With Enslavement: Past, Present, and Future, II," (the companion course to L61 2721), is to provide the mentoring, supporting structures, learning experiences, and resources, and above all, the time and space (see "Benchmarks," below), to allow first-year students to produce an original final research paper, 15-20 pages in length, through a graduated process over the fourteen weeks of the spring term. Students will construct this paper on the foundation of the Prospectus that they have produced as the final project for L61 2721 in the previous fall term. This course will also feature a series of engagements with key turning points and conjunctures in the intertwined histories of Washington University and St. Louis city and region, focusing on the rise and development of the modern university in the long emancipation era which has been profoundly shaped by the afterlives of the era of enslavement we have been studying in the fall semester: the Emancipation moment ("Emancipation, Freedom and the Afterlives of Enslavement"); the World's Fair of 1904 and the Construction of the Modern Washington University, Hilltop Campus; 1968-69: The Creation of Black Studies at Washington University; and Contemporary Challenges and Struggles, Washington University in the Era of Ferguson: Past, Present, and Future.
Credit 3 units.

HISTORY 2850 Ampersand: The Holocaust: A European Experience
Between 1939 and 1945, Nazi troops invaded, occupied and destroyed major parts of Europe. A central aim of the Nazi project was the destruction of European Jewry, the killing of people, and the annihilation of a cultural heritage. This course seeks to deal with questions that,more than seventy years after what is now known as the Holocaust, still continue to perplex. Why did Germany turn to a dictatorship of racism, war, and mass murder? Why did the Nazis see Jews as the supreme enemy, while also targeting Poles, Ukranians, Soviets, homosexuals, the Roma, and the disabled? The course introduces students to issues that are central to understanding Nazi occupation and extermination regimes. Students will look at survival strategies in Western Europe including emigration, resistance movements in Eastern European ghettos, local residents' reactions to the murder in their midst, and non-European governments' reactions. Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

HISTORY 2851 Ampersand: Representations of the Holocaust in Literature and Film
As the Holocaust recedes into the historical past, our knowledge of the event becomes increasingly dominated by literary and cinematic representations of it. This course focuses on such depictions of the Holocaust in literature and film and raises a number of provocative questions: What does it mean to represent the horror of the Holocaust, and how can literary works and films adequately do so? Can one effectively depict the event in realistic terms, or do unrealistic representations work better? What happens to the history of the Holocaust when it becomes the subject of a fictional text? Who is authorized to speak for the victims? Are representations of perpetrators appropriate? Which experiences of the Holocaust are most often represented in the contemporary public imagination, and which are ignored or repressed? Can one speak of a "master narrative" of the Holocaust? We will grapple with these challenging questions by examining representations in a range of genres and media, including survivor memoirs, wartime accounts, journalistic explorations, fictional narratives, a graphic novel, art and photography, documentary and feature film, museums and memorial sites, and social media. Reserved for first-year students enrolled in the Ampersand Program on the History, Memory, and Representation of the Holocaust. Successful completion of L61 FYP 2850 Ampersand: The Holocaust: A European Experience required.

HISTORY 3016 Renaissance Europe
The Renaissance was a time of tremendous cultural change, global expansion, and political and religious conflict that gave birth to the modern world. Yet, these dynamic developments were produced by an anxious society, where limited technological capabilities and an increasingly rigid system of social and gender divisions discouraged innovation and encouraged repressive measures. This course seeks to answer the question of how these contradictory impulses shaped the European Renaissance.

HISTORY 3017 Humors, Pox and Plague: Medieval and Early Modern Medicine
This course examines how people thought about, experienced, and managed disease in the medieval and early modern periods. Students will consider developments in learned medicine alongside the activities of a diverse range of practitioners-e.g. surgeons, empirics, quacks, midwives, saints, and local healers-involved in the business of curing a wide range of ailments. Significant attention will be paid to the experiences of patients and the social and cultural significance of disease. Major topics include: the rise and fall of humoral medicine; religious explanations of illness; diseases such as leprosy, syphilis, and plague; the rise of anatomy; herbs and pharmaceuticals; the experience of childbirth; and the emergence of identifiably modern institutions such as hospitals, the medical profession, and public health. The focus will be on Western Europe but we'll also consider developments in the Islamic world and the Americas.

HISTORY 3018 Hot Peace: U.S.-Russia Relations Since the Cold War

This course is an historical analysis of U.S.-Russia relations since the end of the Cold War. Focusing on reset diplomacy during the terms of five American and three Russian presidents since 1990, it reveals a familiar historical pattern that begins with high hopes, dialogue, and optimism only to be followed by vast disappointment, standoffs, and pessimism. Despite this dynamic, the course shows how and why the two countries have been able to cooperate at times to make substantial headway on critical issues such as arms control, nonproliferation of WMD, NATO expansion, counterterrorism, and economic and energy development, whereas at other times they have run afoul of major obstacles such as further NATO expansion, missile defense, and democracy and human rights in Russia. The course also examines how many political events created substantial challenges to U.S.-Russia relations, including the Balkan Wars; U.S. wars in Iraq and Afghanistan; Russia's wars in Chechnya, Georgia and Ukraine/Crimea; the Color Revolutions; the Arab Spring and subsequent civil wars in Iraq, Syria, Yemen and Libya; the fight against ISIS and other militant Islamists; the threats posed by Iran and North Korea; the rise of China; espionage crises; hybrid wars; cyberattacks; and disinformation campaigns. Two vital questions frame the analysis: (1) Why has it been so difficult for these two great powers to develop a mutually beneficial relationship? (2) What would be required to move beyond the limited partnership to something more productive and sustaining? The course concludes by evaluating reset diplomacy and the ongoing attempts to move U.S.-Russia relations beyond a Hot Peace.

HISTORY 3019 Life and Death On the High Seas

The sea is one harsh mistress. For centuries, men - and women - have crisscrossed the oceans on frail bits of wood, rope, and canvas, sometimes in hopes of adventure, a better life, pillage; sometimes, in anger and despair that came with harsh labor, or enslavement. In this class, we will retrace their voyages, their steps, their stories - from ports to ships, from the seas to the coast. We will encounter women of power and influence on the coast of Senegal; merchants and marauders in the Caribbean, cross-dressing sailors and tyrannical captains in the North Atlantic; scientists and botanists in the Pacific. We will follow rebellions and mutinies of sailors and enslaved people. This class therefore looks at urban history, the history of labor, of slavery, of gender, and of power. Pre-modern, Transregional

HISTORY 3027 Topics in the History of Medicine: History of Madness

Mental health -- its diagnosis, social implications, and experience -- is a central and increasingly visible part of the practice of medicine. This course explores madness. How have different societies explained and responded to states of mind, behavior, and emotion judged to be unreasonable? What role has medicine played in framing understandings about mental disorders and their management? During this course we will engage these questions, charting the shifting experience of mental illness roughly from the Middle Ages to the present. Themes covered include: religious models of madness; humoral medicine and disorders such as melancholy; the pre-modern madhouse and the emergence of the modern asylum; the history of psychiatry; the insanity defense in the courtroom; patient autobiography; gender, race, and mental health.

HISTORY 3028 An Inconvenient Truth: The Human History of Climate Change

While climate change has become a hot-button issue in recent decades, it is by new means a new concern. Advisors to the king of France were warning against deforestation in the eighteenth century and nineteenth century. Scientific experiments revealed the arrival of acid rain in the industrial centers of Great Britain. This course will examine the longer history of climate change and how it has been addressed as a scientific, political and environmental issue. Students will be introduced to the field of environmental history and explore how the methods of this field of inquiry challenge traditional historical categories.

HISTORY 3034 Jews in French History and Culture

This course will explore the rich history of the representations of Jews within French culture and contributions to French history. The class will consider how French Jews served as incubators of cultural modernity. France was the first country in Europe to emancipate Jews from their ghettos, offering them civil rights and civic equality. But at the same time, France was a crucible for the development of modern anti-Semitism. Jews appear as characters in novels, hosts of intellectual salons, as actors on the French stage, as icons of financial capitalism, as examples of the limits and possibilities of immigration, integration, and even assimilation, as authors and intellectuals, as quintessentially French and Other to France. We will navigate these tensions through literature, art, film, theater, and in their diverse historical contexts.

HISTORY 3036 Poverty and Social Reform in American History

This course explores the history of dominant ideas about the causes of and solutions to poverty in American society. We will investigate changing economic, cultural, and political conditions that gave rise to new populations of impoverished Americans and to the expansion or contraction of poverty rates at various times in American history. However, we will focus primarily on how various social commentators, political activists, and reformers defined poverty, explained its causes,

and struggled to ameliorate its effects. The course aims to highlight changes in theories and ideas about the relationship between dependence and independence, personal responsibility and social obligation, and the state and the citizen.

HISTORY 3038 9/11 in World History
A century from now, historians will identify 9/11 as a milestone in twentieth and twenty first century world history. This course questions why a single terrorist episode redefined the landscape of global geopolitics. It proceeds from the assumption that the tragedy's global consequences stem no less from the historical context of the Muslim world than from America's contemporary superpower status. Put more simply, a rigorous world history lens upon twentieth century Islam is a prerequisite for understanding 9/11's profound transnational significance in our time and for future generations.

Typical periods offered: Fall

HISTORY 3049 Chinese Diasporas
Five hundred years ago, the Chinese population was concentrated in core areas of China proper. Beginning in the 16th century, significant numbers of Chinese people moved to the frontiers of an expanding China and across its borders: to Japan and Southeast Asia, to the Americas and Australia, and to Africa and Europe. Although Chinese migration certainly existed beforehand, the period from the 16th century to the present day is marked by the emergence of sustained movement of non-state actors and the development of institutions -- ranging from native-place associations to tourist agents' websites -- that supported this vast circulation of people. Likewise, in many emigrant communities and host societies, Chinese diasporic families adapted to migration as a way of life. This course traces this worldwide circulation of Chinese people over these five centuries.

HISTORY 3053 Cyborgs in History: From Cybernetics to Artificial Intelligence
Who coined the word cyborg, and why? How did cyborgs become so integral to our imaginative worlds and daily existence? In this course, we will contemplate the intersection between technologies and societies through the lens of cyborgs, a term that is shorthand for cybernetic organisms. Defying the separation between humans and machines, cyborgs have been critical to sciences, humanities, pop culture, feminism, afrofuturism, and queer studies, among many other fields of inquiry. This course will take a deep dive into the worlds of scientists, scholars, artists, and ordinary people to discover the cultural meanings of cyborgs across time and space. Along the way, we will meet Norbert Wiener, who coined the term cybernetics; Donna Haraway, for whom the cyborgs were a revolutionary species; and John C. Lilly, who thought he could speak with dolphins. We will also travel to the USSR to read about a failed internet; to Chile, where cybernetics was a socialist project; and to Japan, to learn about gender and technology in non-Western spaces. By the end of the course, students will have a strong theoretical and historical grasp on the social worlds of cybernetic technologies.

HISTORY 3083 Beautiful Losers: The French in North America, 1500-1850
Adventurous fur-traders, fun-loving carnival-goers, magnanimous noblemen, simple but goodhearted Catholic peasants: the portrait of the French in the Americas rarely goes beyond these time-honored stereotypes. The French have usually been treated as quaint remnants of a bygone age, vanquished first by the British army and then by the march of modernity. This course seeks to rescue these historical actors from the typecasting to which we often condemn them. Through this examination of the French presence in the Americas, we will rethink and revisit the familiar stories of British North America: stories of slavery, commerce, property, piety and migration. The contrasted differences will also allow us to reflect on the nature of colonialism and question some ready-made understandings about colonial British America and the Early Republic.

HISTORY 3085 19th-Century China: Violence and Transformation
This course traces the history of China over the course of the 19th century, with an emphasis on social and cultural history. This was one of the most tumultuous centuries in Chinese history, during which China faced threats from abroad in the form of Western and Japanese imperialism as well as from within in the form of environmental degradation and rebellions resulting in an unprecedented loss of human life. The 19th century has thus often been portrayed as a period of sharp decline for China. At the same time, we will explore the ways in which the origins of the dynamic society and economy found in China today -- as well as the worldwide influence of overseas Chinese -- can be traced to this century of turmoil.

HISTORY 3087 From the Renaissance to Nazi Germany:Ancient Greece and Rome in German Nationalism
In 1943 the Nazi SS stormed the Italian Villa Fontedamo in search of a book: the Germania of the ancient Roman historian Tacitus. Storming the villa was just one example of a quest Germans had been undertaking since the Renaissance: to find German national identity with the help of Ancient Greece and Rome. Graeco-Roman antiquity provided the Germans with the first comprehensive description of their ancient ancestors in the Germania and their first national hero, Arminius. In this course, we will study the impact of that Greece and Rome had on German national identity starting in the 16th century when a group of poet-scholars transformed the Germania and Arminius into central components of German national identity. We will trace it through the Enlightenment in the 17th-18th centuries and into the age of imperialism in the 19th century when the first monument to Arminius was erected in Germany, the so-called Hermannsdenkmal (Monument to Arminius). We will end with how the Nazis reinterpreted the culture of Ancient Greece and Rome as a justification for fascism and violent nationalism. We will debate extensively and write in detail about questions of authority, identity, tolerance, intolerance, belonging, and ultimately why classical culture has been one of the most influential forces of the last 500 years. Our focus will lie on three key questions, each of incomparable relevance in today's world: 1. Why did German nationalists turn to Ancient Greece and Rome? Addressing this question will help us understand the decisive role classical antiquity has had since Rome fell in 476 CE 2. What specific mechanisms were used to interpret Graeco-Roman culture and knowledge? Answering this will allow us to evaluate how history is always in service of identity and power. 3. How did German identity develop? Evaluating this will help us understand how Renaissance-era poet-scholars were at the beginning of an identity creation that exploded in the 1900s. Our goals are to understand classical culture's potential for use and abuse, and to develop tools for historical thought and insight that help us understand the past and present

HISTORY 3089 Gender, Health, and Resistance: Comparative Slavery in the African Diaspora
Slavery is a field of historical study that continues to undergo considerable transformation within scholarly investigation. As such, scholars have sought to initiate much broader understandings of the evolution of slavery across both time and geographical space. This course will utilize a comparative approach to examine the experiences of enslavement common throughout the African Diaspora, particularly within the United States, the Caribbean, and parts of Latin America. Some themes briefly covered within this course include: gender, sexuality, community, resistance, medicine, labor, and culture.

HISTORY 3090 Crusade, Conflict, and Coexistence: Jews in Christian Europe
This course will investigate some of the major themes in the history of the Jews in Europe, from the Middle Ages to the eve of the French Revolution. Jews constituted a classic, nearly continuous minority in the premodern Christian world-a world that was not known for tolerating dissent. Or was it? One of the main purposes of the course is to investigate the phenomenon of majority/minority relations, to examine the ways in which the Jewish community interacted with and experienced European societies, cultures, and politics. We will look at the dynamics of boundary formation and cultural distinctiveness; the limits of religious and social tolerance; the periodic eruption of persecution in its social, political, and religious contexts; and the prospects for Jewish integration into various European societies during the course of the Enlightenment era.

HISTORY 3092 Vienna, Prague, Budapest: Politics, Culture and Identity in Central Europe
The term Central Europe evokes the names of Freud and Mahler; Kafka and Kundera; Herzl, Lukács, and Konrád. In politics, it evokes images of revolution and counter-revolution, ethnic nationalism, fascism, and communism. Both culture and politics, in fact, were deeply embedded in the structures of empire (in our case, the Habsburg Monarchy)--structures which both balanced and exacerbated ethnic, religious, and social struggles--in modern state formation, and in the emergence of creative and dynamic urban centers, of which Vienna, Budapest, and Prague were the most visible. This course seeks to put all of these elements into play--empire, nation, urban space, religion, and ethnicity--in order to illustrate what it has meant to be modern, creative, European, nationalist, or cosmopolitan since the 19th century. It engages current debates on nationalism and national identity; the viability of empires as supra-national constructs; urbanism and modern culture; the place of Jews in the social and cultural fabric of Central Europe; migration; and authoritarian and violent responses to modernity.

HISTORY 3093 Becoming Modern: Emancipation, Antisemitism and Nationalism in Modern Jewish History
This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be-or to become-modern. To answer this question, we look at two broad trends that took shape toward the end of the eighteenth century-the Enlightenment and the formation of the modern state-and we track changes and developments in Jewish life down to the close of the twentieth century with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time-from innovation to revolution, exclusion to integration, calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish emancipation; acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political and racial antisemitism; mass migration and the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

HISTORY 3094 History of the Jews in Islamic Lands
This course is a survey of Jewish communities in the Islamic world, their social, cultural, and intellectual life from the rise of Islam to the Imperial Age.Topics include: Muhammad, the Qur'an and the Jews; the legal status of Jews under Islam; the spread of Rabbinic Judaism in the Abbasid empire; the development of new Jewish identities under Islam (Karaites); Jewish traders and scholars in Fatimid Egypt; the flourishing of Jewish civilization in Muslim Spain (al-Andalus); and Sephardi (Spanish) Jews in the Ottoman empire. On this background, we will look closely at some of the major Jewish philosophical and poetical works originating in Islamic lands. Another important source to be studied will be documents from the Cairo Genizah, reflecting social history, the status of women, and other aspects of daily life.

HISTORY 3103 The World is NOT Enough: Europe's Global Empires, 1400-1750
Non sufficit orbis (the world is not enough) became the motto for King Philip II of Spain, whose empire touched nearly every part of the globe. Europe's expansion to Africa, Asia, and the Americas was a transforming event for world history and for its willing and unwilling participants. This course examines the religious, political, and economic forces driving the overseas expansion of Europe, compares the experience of European sailors, soldiers, and merchants in different parts of the world, and analyzes the effect of empire on the colonizers, the colonized, and the balance of world power. Topics covered include: Portuguese and Spanish conquests in the East and West Indies, religious conversion and resistance, trade routes and rivalries, colonial practices and indigenous influence, the establishment of Atlantic slavery, and the rise of the Dutch and English empires.

HISTORY 3104 War, Genocide and Gender in Modern Europe
This course explores the way in which gender and gender relations shaped and were shaped by war and genocide in 20th century Europe. The course approaches the subject from various vantage points, including economic, social and cultural history, and draws on comparisons between different regions. Topics covered will include: new wartime tasks for women; soldier's treatment of civilians under occupation, including sexual violence; how combatants dealt with fear, injury and the loss of comrades; masculilne attributes of soldiers and officers of different nations and in different wartime roles; survival strategies and the relation to expectations with regard to people's (perceived) gender identity; the meanings of patriotism for women and men during war; and gender specific experiences of genocide.

HISTORY 3106 Europe in the Age of Reformation
How should people act towards each other, towards political authorities and towards their God? Who decided what was the right faith: the individual? the family? the state? Could a community survive religious division? What should states do about individuals or communities who refused to conform in matters of religion? With Martin Luther's challenge to the Roman Catholic Church, the debates over these questions transformed European theology, society, and politics. In this class we will examine the development of Protestant and Radical theology, the Reformers relations' with established political authorities, the response of the Catholic Church, the development of new social and cultural expectations, the control of marginalized religious groups such as Jews, Muslims, and Anabaptists, and the experiment of the New World.

HISTORY 3110 The Rise and Fall of Indian Country, 1776-1900
What does the phrase Indian Country mean in American history? Was it a soverign state with complex political societies, an ill-defined place distinguished by a savage wilderness, or something else entirely? By examining the long history of Indian Country as both a physical space and a political concept, this course asks questions about how North America's indigenous people shaped the political history of the continental interior from the establishment of the United States to the closing of the frontier in the 1890s. Indian Country as a historical concept touches on some of the crucial aspects of American history: race, space and political identity, and challenges our assumptions about what government, nationality and cultural identity look like in the American context.

HISTORY 3111 Modern Germany
This course surveys the political, social, economic, and cultural forces that have shaped German history since 1800. After examining the multiplicity of German states that existed in 1800, we will identify the key factors that resulted in unification in 1871. We then turn to a study of modern Germany in its various forms, from the Empire through the Weimar Republic and Third Reich, to post-war division and reunification. A major focus will be the continuities and discontinuities of German history, particularly with regard to the historical roots of Nazism and attempts to break with the past after 1945.

HISTORY 3131 Gender, Sexuality and Communism in 20th-Century Europe
This upper-division course examines the role of gender and sexuality for the establishment of communist societies in Europe in 20th century. We will explore to what extent societies built on the communist model succeeded with the achievement of gender equality and allowed for sexual relations liberated from religious or economic constraints. Class materials examine how state socialism shaped gender roles and women's and men's lives differently as well as how gays and lesbians struggled against social taboo and state repression. Students analyze the impact of modernization, industrialization, war and other conflicts on concepts of femininity and masculinity as well as on the regulation of sexuality and family relations in several Eastern European countries. We will place these dynamics within the context of broader political and cultural developments, ending with an analysis of the breakdown of socialism in the early 1990s and its impact on gender relations and the freedom of expression. The course provides students with a basic knowledge of the history of Eastern Europe and of left-wing movements active in the area, emphasizing the effects of communist ideas on women, gender equality, and non-normative sexual orientations.

HISTORY 3135 Revolution With an Accent: The Haitian and French Revolutions, 1770-1805
How can politics enact fundamental changes? What make those changes a revolution? How do we judge the legitimacy of such changes? When these questions arise over the course of ordinary political arguments, the example of the French Revolution often looms large, casting a shadow tinted with blood and Terror. Much less present in the collective political imagination is the Haitian Revolution. These two events are complex and complicated, and are filled with fascinating, chilling, inspired characters, enflamed rhetoric and challenging questions. This course will examine both the unfolding of events and the rise and fall of protagonists within these two Revolutions and will explore the ways that issues such as religion, state finance, loyalty, race, slavery became politicized.

HISTORY 3137 Socialist and Secular? A Social History of the Soviet Union

This class explores daily life and cultural developments in the Soviet Union, 1917 to 1999. Focusing on the everyday experience of Soviet citizens during these years, students learn about the effects of large-scale social and political transformation on the private lives of people. To explore daily life in the Soviet Union, this class uses a variety of sources and media, including scholarly analysis, contemporaneous portrayals, literary representations, and films. Students will receive a foundation in Soviet political, social, and cultural history with deeper insights into select aspects of life in Soviet society.

HISTORY 3139 All Measures Short of War

This course focuses on the return of great power competition in the 21st century. In particular, it examines the security challenges facing the United States in the form of strategic competition from revisionist states (Russia and China) and hostile threats from rogue regimes (Iran and North Korea). Through a consideration of the strategic, military, political, economic, and intelligence dynamics germane to foreign policy and national security, it will examine the hypothesis that the United States is not likely to go to hot war with any of these four nations but instead resort to what President Roosevelt in another context and time famously called all measures short of war -- in other words, engaging one another through new technologies such as cyber, artificial intelligence, robotics, big data, hypersonics, biotechnology, and other means that have come to demarcate a hybrid battlefield in an age of hostile competition. As such, the course will assess the recent past, current state, and likely future of American power in the new global security environment.

Typical periods offered: Spring

HISTORY 3147 The Wheels of Commerce: From the Industrial Revolution to Global Capitalism

This course introduces the methods, issues, and debates that shape our understanding of economic change and development from the Industrial Revolution to the post-industrial age. Engaging economic theorists from Marx to Smith, to Weber and Wallerstein, this course problematizes the notion of rational economic actors and interrogates notions of free trade in an attempt to understand the impact of capitalism on the world. We start the course with a discussion of the exceptionalism of Great Britain as the first industrial nation and reconsider the impact of new trade, production, property and monetary/financial regimes that resulted in the so-called Great Divergence between China and the West. We then turn to the late industrializers of China, Japan, and Mexico in order to investigate the varieties of development, specifically focusing on monetary integration, legal integration and the global impact of the great depression. Continuing into the Bretton Woods Conference and the post-war international monetary systems, we bring the course to a close with the advent of the post-industrial age. This course is designed both for students specializing in economic history and students in all disciplines interested in historical approaches to political/economic development.

HISTORY 3158 The Birth Crisis of Democracy: The New United States of America, 1776-1850
Go get yourself some democracy! Americans have so often preached to other nations, but just how did Americans themselves go about creating the world's largest and most successful democratic republic? How democratic was this violent new nation that reeled from one crisis to another and ultimately to the brink of collapse in its first 75 years? This survey of American history from the creation of the Republic to the eve of the Civil War explores the Revolution and its ambiguous legacies, the starkly paradoxical marriage of slavery and freedom, and the creation of much of the America that we know; mass political parties; a powerful presidency; sustained capitalist growth; individualistic creeds; formalized and folkloric racism; heteronormative patriarchal family life; technological innovation; literary experimentation; distinctively American legal, scientific and religious cultures; and the modern movements of labor, feminism, and African-American empowerment. Prerequisite: sophomore standing or permission of the instructor. Modern, U.S.

HISTORY 3179 Law in American Life: 1776 to the Present
Among the many contradictions of American history, none has been more recurrent than the tension of justice and law--of aspiration and reality--as Americans have sought to make good on the promises of the Revolution. Although we pride ourselves as a nation devoted to the principle of equal justice under the law, the terms equal and justice have prompted bitter debate, and the way we place them under law has divided Americans as often as it has united them. It is the purpose of this course to examine the many and conflicting ways in which Americans have sought to use law to achieve the goals of the republic established in 1776. Viewing law as the contested terrain of justice, cultural construction, social necessity, and self-interest, this course will pay close attention to the way Americans have used, abused, or evaded law thoughout their national history.
Credit 3 units. A&S IQ: HUM BU: ETH, HUM, IS
Typical periods offered: Spring

HISTORY 3181 American Politics and Society in the 1970s
This course provides both a chronological and thematic approach to the history of 1970s America. Class time will focus on only a few of the most significant shifts in American politics, culture, and society. The course will encourage students to think more deeply about: the fate of liberalism in post-1960s America; the rise of ethnic identity and its impact on the rights revolution; gender and the politics of sexuality; religion and the rise of the South; Nixon and Watergate; Carter and political malaise; urban decay; environmentalism; and the United States' earliest encounters with terrorism.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

HISTORY 3184 U.S. Immigration in Historical Perspective
The idea of the United States as a nation of immigrants has become a widely accepted feature of American identity, but defining who and which immigrants to include (and exclude) in the nation remains a hotly debated issue today. This course will put some of today's immigration debates in a historical perspective, examining how past Americans debated questions about the fitness of immigrants for freedom and citizenship, and how those debates in turn shaped immigrant experiences and American identity.

HISTORY 3199 Topics in American History: The Urban Crisis: Historical Perspectives on Modern American Cities.
Since World War II, American cities have undergone enormous changes. Industrial decline, rumbling neighborhoods, rigid segregation, racial trauma, and suburban sprawl have all contributed to a troubled urban world. This course will equip students with an historical perspective on the urban crisis. Rather than simply identifying urban problems, we will use the tools of historical inquiry to grapple with the underlying causes of these problems. Students will learn the value of history as a method for illuminating the social, cultural, political, and economic forces that underlie the current urban crisis. Students will also apply their historical understandings toward the creation of an informed position on metropolitan policy and planning issues.

HISTORY 3209 How Free is Free?: African American History Since Emancipation
The events that unfolded in Ferguson this past fall revealed the contradictions of a national government that is led by a black president yet also sanctions the susceptibility of its black citizens to police brutality. What has freedom really meant for African Americans since emancipation? This course addresses key events and movements that shaped African Americans' definition and pursuit of freedom and citizenship, emphasizing various strategies, successes, failures, and legacies developed as a result. Key developments will include the Reconstruction, Jim Crow, the Harlem Renaissance, the World Wars, the Civil Rights Movement, and mass incarceration.

HISTORY 3214 Religion and Politics in South Asia: Writing-Intensive Seminar
The relationship between religion, community, and nation is a topic of central concern and contestation in the study of South Asian history. This course will explore alternative positions and debates on such topics as: changing religious identities; understandings of the proper relationship between religion, community, and nation in India and Pakistan; and the violence of Partition (the division of India and Pakistan in 1947). The course will treat India, Pakistan and other South Asian regions in the colonial and post-colonial periods.

HISTORY 3215 The Making of the Modern American Landscape-Writing-Intensive Seminar
This writing intensive seminar explores environmental change in relation to human actions in the United States. It provides a vision of American history from the perspective of the land itself. It traces transformations in the organization and uses of landed property from the eighteenth century surveys of western lands: through the expansion of slavery and the cotton kingdom; the construction of irrigation systems in the west; the emergence of new technologies of production and communication in nineteenth century cities to the mass production of surburban housing; and finally to the rise of Disneyland and Las Vegas.

HISTORY 3217 Imagining the African Diaspora: Slavery, Black Radicalism & Globalization: Writing Intensive Seminar
This course introduces students to the African diaspora as both a practice and a subject of study. From Latin America to the U.S., the Atlantic World, and Asia, students will critically consider the construction of the African diaspora across time and space, and the foundational role of people of African descent in the making of the modern world. While the overarching framework of the course is historical, we will assume an interdisciplinary approach, examining memoirs and historical works as well as film, music, and the performing arts. We will think about how the African diaspora complicates our understandings of home, identity, race, geography, gender, and politics. This course does not aim to establish a single understanding of the African diaspora but to appreciate its flexibility as both a practice and concept.

HISTORY 3234 Women and Crime in the Evolution of American History

Crime happens. Property is damaged and stolen, lives are lost, and law, order, and justice evolves. This course taps into that ongoing reality by centering the herstorical evolution of female crime, highlighting women and girls of many kinds across time and spaces of America. It moves across centuries (through to the contemporary period) probing within and far beyond icons to unveil the gendered nature of crime and moreover to empower students to see and trace everyday female criminality that ignited across racial, ethnic, as well as lines of age in the winding path of American history. While men and boys dominate public and even scholarly expectations of crime and carceral conversations for many, students will leave this course with a far more rigorous understanding of the herstories gained by taking serious the types of crimes that women and girls acted out by exploring: robbery, assault, infanticide, larceny, murder, arson, prostitution, serial killers, and drug-related crimes. As well as going further to probe state and federal power through carceral medicine - showing the interior world of female prisoners, physicians, the movement of females into asylums'' and mental state hospitals, incarceration based on insanity while going further to examine births, illnesses, and death of women and teens in jails and prisons. Students will be likewise pushed to engage America's timeline of race, gender, and executions that includes women and girls. Racialized and gendered criminality, law enforcement violence, healthcare and deathcare in prisons are critical public health issues that students can better understand the complicated evolutions by deeply probing the herstorical lives of women, girls, and crime through this course. Students will read, learn, dig up the past, and write to ensure a future of herstory and remembrance.

HISTORY 3236 Mao and the World

Was Mao Zedong an uncompromising tyrant who caused the death of millions, or was he a revolutionary leader who was daring enough to imagine an alternative existence? This course is a close investigation of Mao and his world through a global perspective. The students will be exposed to primary sources written by Mao himself, and they will situate Mao within the turbulent decades of China's engagement with Western colonialism, imperialism, and revolutionary thought in the 20th century. Putting Maoism at the center of world history, students will learn the intimate links between China, Southeast Asia, Africa, and North America, and they will examine in detail how Maoism shaped a variety of political and infrastructural transformations around the world, from the Black Panthers to Tanzanian railroads. By the end of the course, students will have a strong grasp of the contradictions that Mao himself faced throughout his life -- contradictions that changed nothing less than the world itself.

HISTORY 3255 Seminar: Perceptions of Time and Place in Early Modern England

This seminar analyses perceptions of time and place in England, c.1500-1800, and their relationship to both personal and social identity. These issues will be explored using appropriate theoretical and substantive readings and both visual and textual primary sources. Particular attention will be given to the use of visual images as historical evidence. Specific issues addressed include the development of cartography, chorography and antiquarianism; conventions of time reckoning and the dating of events; perceptions of the life course; the creation of social memory and historical narratives; representations of social place; agrarian change and the transformation of the landscape; the impact of the Reformation on the calendar, the landscape, and senses of the past; and representations of previously unknown places and peoples. Primary sources for discussion include maps and prospects; chorographical surveys; illustrated antiquarian writings; almanacs; pictorial representations of notable events; engravings; paintings (portraits; 'country house portraits'; landscapes; 'conversation pieces'; history painting and 'documentary' works); memorials; family histories; extracts from court records.

HISTORY 3259 I Know IT When I See It: A History of Obscenity & Pornography in the United States

When Supreme Court Justice Potter Stewart was asked to describe his test for obscenity in 1964, he responded: I know it when I see it. But do we? What is pornography and how has it changed over the last two and a half centuries? What role does pornography play in our society and how is our society reflected in its contents? This course seeks to explore these questions and more and actively engages in the debate and controversies inherent to discussions of pornography in America. In this course we will engage with primary sources to track the changing nature of pornographic material- written, physical, and visual- and to recognize the way pornography reflects changes in the wider social milieu, as well as secondary and theoretical sources to contextualize and provoke our understanding of patterns of pornography use and regulation. It is likely that our definition of pornography will change over the semester- our initial definition is broadly bounded by material considered pornographic by its contemporaries and that which is created with the intent of erotic simulation.

HISTORY 3277 Hinduism & the Hindu Right

We are witnessing a global rise in rightwing politics, and India is no exception. In May 2019, Narendra Modi and his Hindu Nationalist party were elected to power for a second term. Observers in the United States and Europe may be stunned by what seems to be a new development, but observers in India have been following the rise of the Hindu Right since the early 1990s. In its wake, the Hindu Right has brought violence against minorities; curbs on free speech; and moves toward second-class citizenship for Indian Muslims. This course will track the history of the Hindu Right in India from its 19th-century roots to the present. The struggle to come to grips with the Hindu Right is of immediate political relevance. It also raises big questions about the history of religion and the politics of secularism.

HISTORY 3283 South Asia in Global History

In this course, we will explore the vibrant global history of modern South Asia from 1750 to the present. Through an in-depth exploration of the histories, cultures, and global connections of South Asia, a region encompassing the modern nations of Afghanistan, Bangladesh, Bhutan, India, the Maldives, Nepal, Pakistan, and Sri Lanka, we will trace the region's history from its early modern periods to the period of decolonization. Although anchored in the modern chronology of South Asia, the aim is to explore the subcontinent's global connections with Eastern and Southern Africa, the Indian Ocean World, the Middle East, East and Southeast Asia, and Western Europe. This means that students will acquire tools to understand themes such as colonization, modernization, democracy, and social change more broadly and apply them to other geographic regions. Themes include the early modern global economy, the rise and influence of Indo-Persianate culture, colonial encounters, the complex process of decolonization, and nation-building in the 20th century. Through the circulation of peoples, ideas, and objects we will explore the region's oceanic, subterranean, and peripheral connections that help us understand how South Asians experienced and historicized their history.

HISTORY 3284 The Late Ottoman Middle East

This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to the First World War). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students will focus on how everyday people's lived experiences were affected by the increased monetarization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity.

HISTORY 3287 A History of Modern China
This course explores the 19th- and 20th-century history of China. Its purpose is to provide students with a historical foundation to understand the momentous changes the country underwent during its traumatic transition from an empire to a nation-state. We start the course at the height of the empire's power in the late 18th century, when the Qing dynasty (1637-1912) conquered vast swathes of lands and people in Inner Asia. We then move on to the Qing's troubled relationship with Western capitalism and imperialism in the 19th century, which challenged the economic, social, and ideological structures of the imperial regime, culminating in the emergence of China as a nation-state. By situating China's national history within a global context, the course outlines in detail the transformations that took place in the 20th century, from the rise of communism and fascism to the Second World War to Maoism and cultural revolution. We end the semester with yet another major change that took place in the 1980s, when a revolutionary Maoist ideology was replaced with a technocratic regime, the legacies of which are still with us today.

HISTORY 3289 Economic History of China: From the Silver Age to Reform and Opening, 1500-1990
This seminar explores the economic history of China from the 16th to the 20th century; this time period is the half a millennium during which China became part of the world economy and defined its development in major ways. Over the course of the semester, students will be exposed to the main debates in the field of Chinese economic history while acquiring a strong grasp of the nuts and bolts of how economy functioned and changed from the imperial to the modern times. Situating China within a comparative perspective, we will examine a multitude of debates ranging from the global silver age of the 16th century to the birth of capitalism, the socialist economy, and the PRC's recent involvement in Africa. We will in particular discuss the contradictions that arose out of China's integration into the world economy and the different kinds of economic regimes that existed and continue to exist within China. While this course assumes a basic familiarity with Asian history, students with backgrounds in other world histories and/or social science disciplines should feel comfortable with the course material.

Typical periods offered: Fall, Spring

HISTORY 3294 History of Global Capitalism: From Slavery to Neoliberalism
This course introduces the methods, issues, and debates that shape our understanding of economic change and development from the Industrial Revolution to the post-industrial age. Engaging economic theorists from Marx to Smith to Weber and Wallerstein, this course problematizes the notion of rational economic actors and interrogates notions of free trade in an attempt to understand the impact of capitalism on the world. We start the course with a discussion of the exceptionalism of Great Britain as the first industrial nation and reconsider the impact of new trade, production, property and monetary/financial regimes that resulted in the so-called Great Divergence between China and the West. We then turn to the late industrializers of China, Japan, and Mexico in order to investigate the varieties of development, specifically focusing on monetary integration, legal integration and the global impact of the great depression. Continuing into the Bretton Woods Conference and the post-war international monetary systems, we bring the course to a close with the advent of the post-industrial age. This course is designed both for students specializing in economic history and students in all disciplines interested in historical approaches to political/economic development.

HISTORY 3296 Environment and Empire
In this course we study British imperialism from the ground up. At bottom, the British empire was about extracting the wealth contained in the labour and the natural resources of the colonized. How did imperial efforts to maximize productivity and profits impact the ecological balance of forests, pastures, and farm lands, rivers and rainfall, animals and humans? We'll ask, with environmental historians of the U.S., how colonialism marked a watershed of radical ecological change. The course will cover examples from Asia to Africa, with a focus on the jewel in the crown of the British empire: the Indian subcontinent. We'll learn how the colonized contributed to the science of environmentalism, and how they forged a distinctive politics of environmentalism built upon local resistance and global vision, inspired by religious traditions and formative thinkers, not least Mahatma Gandhi.

HISTORY 3297 Empire and Ethnicity: Qing Legacies in China and Inner Asia, 1600 to Today
Eschewing traditional narratives of a closed Chinese civilization, this course explores the cultural, religious, and ethnic diversity of China and its dynamic interactions with Inner Asia during the early modern period. It questions the myth of a monolithic Chinese culture and uncovers the region's multiple and ethnically entangled past through an in-depth look at the Manchu-led Qing dynasty (1644-1912). This was the last non-Han dynasty of the Imperial Era, and it gave the People's Republic of China its vast Inner Asian territories: Xinjiang, Inner Mongolia, and Tibet. In rethinking the Qing Empire, this course particularly focuses on Tibetan Buddhism and Islam as religious ideologies that linked China with Tibetan, Mongolian, and Turkic-Muslim regions of Inner Asia through the imperial center at Beijing. Specific topics will range from food culture (Halal) to the Qing's expansion into and later colonization of Xinjiang, the reverberations of which persist even today under the Belt and Road Initiative.

HISTORY 3318 The Early Medieval World: 200-1000
This course begins with the crisis of the Roman Empire in the third century and the conversion of the Emperor Constantine to Christianity in 312. We will study the so-called barbarian invasions of the fourth and fifth centuries and the collapse of the Roman Empire in the West. The Roman Empire in the East (and commonly known as the Byzantine Empire after the seventh century) survived intact, developing a very different style of Christianity than in the lands of the former western empire. Apart from examining Christianization in the deserts of Egypt or the chilly North Sea, we will discuss the phenomenon of Islam in the seventh century (especially after the Prophet Muhammad's death in 632) and the Arab conquests of the eastern Mediterranean and north Africa. In the post-Roman world of the West we will read about the Anglo-Saxons, the Carolingians, and the Vikings. In exploring these topics we will have to think about the relationship of kings to popes, Emperors to patriarchs, of missionaries to pagans, of cities to villages, of the sacred to the profane. Our attention will be directed to things as various as different forms of monasticism, the establishment of frontier communities, the culture of the Arabian peninsula, magic, paganism, military tactics, Romanesque churches, sea travel, manuscript illumination, the architecture of mosques, early medieval philosophy, the changing imagery of Christ, holiness, and violence as a redemptive act.

HISTORY 3322 Japan Since 1868
For some, the word Japan evokes Hello Kitty, animated films, cartoons, and sushi. For others, it makes them think of the Nanjing Atrocity, comfort women, the Bataan Death March, and problematic textbooks. Still others will think of woodblock prints, tea ceremonies, and cherry blossoms or perhaps of Sony Walkmans and Toyota automobiles. At the same time, still others may have no image of Japan at all. Tracing the story of Japan's transformations - from a preindustrial peasant society managed by samurai-bureaucrats into an expansionist nation-state and then into its current paradoxical guise of a peaceful nation of culture led by conservative nationalists - provides the means for deepening our understandings of historical change in one region and grappling with the methods and aims of the discipline of history.

HISTORY 3323 Introduction to Colonial Latin America Until 1825
This course surveys the history of Latin America from the pre-Columbian civilizations through the Iberian exploration and conquest of the Americas until the Wars of Independence (roughly 1400-1815). Stressing the experiences and cultural contributions of Americans, Europeans, and Africans, we consider the following topics through primary written documents, first-hand accounts, and excellent secondary scholarship, as well as through art, music, and architecture: Aztec, Maya, Inca, and Iberian civilizations; models of conquest in comparative perspective (Spanish, Portuguese, and Amerindian); environmental histories; consolidation of colonialism in labor, tributary, and judicial systems; race, ethnicity, slavery, caste, and class; religion and the Catholic Church and Inquisition; sugar and mining industries, trade, and global economies; urban and rural life; the roles of women, gender, and sexuality in the colonies. Geographically, we will cover Mexico, the Andes, and to a lesser extent, Brazil, the Southwest, Cuba, and the Southern Cone. Pre-modern, Latin America.

HISTORY 3335 Hands On the Past: History, Murder and the Archive
The future depends on the past. This course taps into that understanding by offering an alternative hands-on methods class to encourage undergraduate student engagement with history and archives, both on and off line. In this particular class, students will be nurtured to more deeply interact with the historical past by exploring gender, race, violence and sexuality through three central questions explored throughout the course: What and how is African American history conducted? How do we best document the past with students fully at the intellectual table of production and preservation? How do we make history with history? These exciting and diverse interests will be pursued through in class discussions and course assigned readings, but especially by taking a spring break research project trip across Missouri to various local repositories and the State archives, to activate and fuel the idea of putting hands on the past.

HISTORY 3338 Understanding Lincoln: Writing-Intensive Seminar
This course explores the life, art (political and literary) and historical significance of Abraham Lincoln. It focuses first on how he understood himself and foregrounds his inspired conception of his own world-historical role in the Civil War. The course also traces how the larger world furnished the contexts of Lincoln's career, how his consciousness, speeches and writings, and presidential decisions can be understood against the backdrop of the revolutionary national democratic upheavals of the 19th century. Finally the course will investigate how the sixteenth president, so controversial in his day, has remained a site of cultural contestation, with historians, novelists, poets, cartoonists, filmmakers, advertisers, and politicians struggling over his memory and meaning, to the present.

HISTORY 3351 Out of the Shtetl: Jewish Life in Central and Eastern Europe in the 19th and 20th Centuries

Out of the Shtetl is a course about tradition and transformation; small towns and urban centers; ethnicity and citizenship; and nations, states, and empires. At its core, this course asks the following questions: What did it mean for the Jews of Central and Eastern Europe to emerge from small market towns and villages to confront modern ethnicities, nations, and empires? What lasting impact did the shtetl experience have on Jewish life in a rapidly changing environment? The focus is on the Jewish historical experience in the countries that make up Central and Eastern Europe (mainly the Bohemian lands, Hungary, Poland, and Russia) from the late 18th century to the fall of the Soviet Union. Among the topics that we will cover are Jews and the nobility in Poland-Lithuania; the multicultural imperial state; Hasidism and its opponents; absolutism and reform in imperial settings; the emergence of modern European nationalisms and their impact on Jewish identity; antisemitism and popular violence; nationalist and radical movements among Jews; war, revolution, and genocide; and the transition from Soviet dominion to democratic states.

HISTORY 3421 Americans and Their Presidents

How have Americans understood what it means to be President of the United States? This seminar uses that question as a point of departure for a multidisciplinary cultural approach to the presidency in the United States, examining the shifting roles of the chief executive from George Washington through Barack Obama. In addition to a consideration of the President's political and policymaking roles, this course examines how the lived experiences of presidents have informed the ways Americans have conceived of public and private life within a broader political culture. In the process, this course uses the presidency as a means to explore topics ranging from electioneering to gender, foreign policy to popular media. Readings are drawn from a broad range of fields.

HISTORY 3458 Cultural Encounters: China and Eurasia Since the Middle Ages

Eschewing traditional narratives of Chinese civilization, which imply a society closed to the outside world, this course follows current scholarship in situating Chinese history within a broader spatial context. In particular, this course explores cultural encounters between China and other subregions of the Eurasian continent to the north and west of China, from the Tang Dynasty (618-907) to the present. The course begins by analyzing the relationship between nomadic societies on the steppe (and, more generally, non-state spaces) and settled agricultural societies such as China. We then turn to the influence of two religions imported from central Eurasia: Buddhism and Islam. A related theme is the relationship, in the early modern era, between trade, which tended to erode boundaries, and states, which sought to create boundaries. We will then trace the changing dynamics among commerce, religion, and nation-states in the 20th century. Finally, we return to the role of Buddhism and Islam in the contemporary relationship between China and the various peoples and states across its western frontier.

HISTORY 3514 Race, Ethnicity, and Migration: A Transatlantic History

This course interrogates the making and re-making of racial and ethnic categories in the long history of transatlantic migration from the 1850s to the present. We will examine how the steady movement of people and ideas between Europe and the United States have shaped the discourses and policies of immigration, social reform, and globalization on both sides of the mighty Atlantic. Students will be exposed to historical processes and discourses which not only affected the racialization of different groups in various nations but also the ways in which those processes and discourses were influenced by events unfolding across vast spaces. Rather than simply working in a comparative modality, students will think relationally and transnationally to explore the material and representational consequences of racial and ethnic politics.

HISTORY 3607 Beyond Sea, Sunshine and Soca: A History of the Caribbean

This course examines major themes in the history of the Caribbean from the fifteenth to the twentieth century. The first half of the course will focus on the fifteenth to the nineteenth century, exploring issues such as indigenous societies, European encounter and conquest, plantation slavery, the resistance of enslaved Africans and emancipation. The remainder of the course focuses on aspects of the cultural, economic, political and social experiences of Caribbean peoples during the twentieth century. Major areas of inquiry include the labor rebellions of the 1930s, decolonization, diasporic alliances, Black Power, identity construction and the politics of tourism. While the English-speaking Caribbean constitutes the main focus, references will be made to other areas such as Cuba and Haiti.

HISTORY 3614 Artificial Intelligence: The Mind and the Machine

At once bewildered and terrified, here we enter the age of artificial intelligence (AI). Can this new technology be the solution to all problems plaguing our societies? Or will it be the Pandora's Box? As heated discussions around AI take place around the world, this course will examine the deeper history of mechanizing the human mind. Students will explore the first attempts to build calculating machines, the origins of the information age that started much earlier than the invention of computers, the cybernetic revolution that transformed the meaning of the human, and the politics that drove the desire to invent the first artificial intelligence. We will collectively ponder the past of AI to see what the future holds.

HISTORY 3620 Aliens and Undesirables: The Making of American Immigrants
What makes the right kind of immigrant? This question has been on the minds of Americans for generations, yet we still are often left without an answer. This course explores that question by proposing another set of questions: what is an immigrant? How are certain people included or excluded from this category?, and why is immigration still a concern in the 21st century? We will explore these questions by examining cultural materials such as film, music, photographs, and ephemera alongside the social, legal, and political discourses which framed immigration throughout the long 20th century. We will learn about refugees from Europe, migrants from Latin America, and those deemed undesirable from around the world as they travelled to our own fine city of Saint Louis. Starting in the late 19th century this course will untangle the legislative, cultural, and political actions that impact the discussions around immigration and migration today. A large component of the course will explore the cultural productions which overlapped with the social and political discourses and ensured the longevity and spread of those ideas far beyond the homes and halls of the powerful and into the streets and theaters of the nation. Examining the cultural artifacts that individuals and groups produced for the public allows us to practice historical thinking, material cultural analysis, and draw connections between different time periods and emergent concerns. Throughout the course students will have the opportunity to examine primary source material alongside selected texts which explore the various immigration issues related to concerns around mobility including race, ethnicity, gender, sexuality, and progressive and liberal politics. In the end students will walk away from this course with an understanding of the historical forces which have shaped American immigration from the calls of Benjamin Franklin to exclude Germans to the cries of Build the Wall in the 21st century.

HISTORY 3665 Experts, Administrators and Soldiers: Governance and Development in Post-Colonial Africa
Between 1957 and 1975, one African territory after another made the transition from European colony to independent nation state. Widespread optimism that these transfers of power would bring a new era of prosperity and dignity dissipated quickly as the new nations struggled with political instability, military coups, social unrest, and persistent poverty. Consequently many western observers and development specialists are certain that they have become failed states requiring foreign assistance to develop properly. This course challenges these assumptions by tracing the origins of African governance and economic development from their imperial origins into the independence era. By exploring nation-building, economic planning, and public administration from the perspective of political elites, foreign experts, and ordinary people the class takes an intimate look at how colonies became nation states. These new perspectives offer students a historical grounding in international public administration and development by exploring how imperial ideas and concepts continue to influence contemporary social planning and development policy in both Africa and the wider world.

HISTORY 3672 Medicine, Healing and Experimentation in the Contours of Black History
Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, this course examines the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus will be extended towards the underpinnings of race and gender in the medical treatment allocated across time and space--the U.S., Caribbean, and Latin America--to give further insight into the roots of contemporary practice of medicine.

HISTORY 3714 What a Way to Make a Living: Work, Politics, & Culture in the 20th Century United States
This course explores the lives, labors, and leisure of working people in the twentieth century United States. Students will focus on the seismic transformations and bitter conflicts that went into making a mass production, mass consumption society. How did working people experience and fight to exert control over jobs increasingly dictated by the unyielding pace of vast assembly lines? What happened when manufacturing jobs disappeared? Who left? Who got left behind? How were households and neighborhoods made and remade by huge movements of people from the countryside into cities, and then from urban centers to suburban sprawl? How have working people narrated their own stories from below, and, in turn, how has working life was

narrated and (re)packaged from above? To answer these questions, and many more, we will pay close attention to how the organization of work under 20th century capitalism (re)defined social hierarchies, the meaning of citizenship, and racial, gendered, and sexual identity.

HISTORY 3722 The American South: Histories, Cultures, and Representatives Beyond a Region
In 1995 Atlanta based hip hop group Goodie Mob released their debut album entitled Soul Food. On the record is a song called Dirty South. The track talks about life in the South highlighting the war on drugs, racism, and stereotypes that people thought about Black southerners. That same year another Southern hip hop group, Outkast, won the best new hip hop award and brought widespread attention to the rap and hip-hop scene which had been dominated by East Coast and West Coast artists. A new generation of Southern music would quickly become the dominant form of hip hop we hear today. In the early albums you hear lines which ask what it means to be Southern, questions where the South is, and speaks of Southern culture. We will attempt to answer some of those questions that Goodie Mob, Outkast, and more recently Beyoncé posed through a historical exploration of a region steeped in mystery and mystique. The South has fascinated generations of Americans, often represented as a deeply divided and troubled area of backward peoples and histories which continue to shock the nation. At the same time, the South is home to more diverse peoples, businesses, foodstuffs, and geography than most of the United States. The South often defies expectations and surprises the most seasoned social scientist. This course will introduce students to the history of a place that is both familiar and strange while exploring difficult issues of race, ethnicity, and identity. Students will be exposed to a variety of sources including music, film, and art produced by and/or about Southerners. Students will walk away from this course with a deeper understanding of the diversity of cultures and histories of the South and question what makes the South exceptional.

HISTORY 3746 Great Ideas That Changed the World: Humanism to Postmodernism
With a focus on Western Europe, this course is designed to make you familiar with the major intellectual movements and thinkers in the modern period. We cover both the towering, canonical figures and those critical of the canon. We look at the main schools of thought, the major political doctrines, and key literary and artistic groups, including humanism, Protestantism, Enlightenment rationalism, Romanticism, realism, nationalism, liberalism, capitalism, socialism, racism, feminism, colonialism, impressionism to surrealism, fascism, existentialism, and postmodernism. We also discuss the most significant conceptual categories that have defined the modern European world, including the concepts of nature, human nature, God, truth, reason, freedom, justice, gender, and race. The course differs from other history courses in that its emphasis is on intellectual matters--ideas, discourses, thinkers, schools of thought--and differs from a philosophy, literature or social science course in its emphasis on how ideas both reflect and contest their historical contexts.

HISTORY 3788 Building St. Louis Oral History
This course aims to provide a national and local understanding of how Americans and St. Louisians dealt with the problems of racism, poverty, and sexism from 1945 to the present. While history courses traditionally require that students analyze the credibility and subjectivity of each historical source, this course will further challenge students to use the methods of oral history to compare evidence from oral historical memory with written texts. By comparing St. Louis history with that of the rest of the nation, students will analyze regional differences and understand the unique historical conditions that shaped this city.

HISTORY 3813 Between Sand and Sea: History, Environment, and Politics in the Arabian Peninsula
Although it is today primarily associated with oil, the Arabian peninsula was for most of its history defined by water: its surrounding seas, its monsoon-driven winds, and its lack of water in its vast and forbidding interior deserts. As home to the major holy cities of Islam and a key source of global oil, the region has played an important role in the Western European and North American imagination. Despite being relatively sparsely populated, the peninsula hosts millions of believers each year on the annual Muslim pilgrimage, and it has been the site of major wars and military occupations by European, American, and other Middle Eastern countries for much of the 20th and 21st centuries. It has been an outpost of the Ottoman Empire, a center of British colonialism and (at Aden) an axis of its global empire, the location of Egypt's Vietnam (its long war in Yemen in the 1960s), the Gulf Wars I and II, and the recent wars in Yemen, to name just a few of the major conflicts. Often depicted as unchanging until caught up by the influx of massive oil wealth, this region is frequently characterized as a place of contradictions: home to some of the world's largest skyscrapers and also the most inhospitable and largest sand desert in the world, known as the Empty Quarter; the location of crucial American allies and the home of al-Qa'eda founder `Usama Bin Laden. In this course, we will examine the development of the peninsula historically to understand these contradictory images. We will investigate changes in the following arenas: environment and society; colonial occupation; newly independent states; the demise and development of key economic sectors (pearling; shipping; agriculture; oil; finance; piracy); political regimes; resources such as water, oil, and date palms; the growth of oil extraction infrastructure and its effects on the political regimes and societies in the region; the emergence of new Gulf cities; Islamic law; women's rights; human rights debates; and religious and ethnic minorities.

HISTORY 3904 Existentialist Thought
Existentialism begins with a disoriented individual facing a confused world that s/he cannot accept (Robert Solomon). Existentialists seek to make meaning of the brokenness (Marcel), dislocation (Merleau-Ponty), and ambiguity (de Beauvoir) of modern life. While its origins go back to the nineteenth-century (Kierkegaard, Dostoevsky, Nietzsche), with even older antecedents, as a specific moment in the history of ideas existentialism was created in response to the age of anxiety from the end of World War I through the 1960s. It continues to ripple through to the present. We will explore the richness and depth of the canonic figures of existentialism. But we will also consider how that canon was itself shaped and what this entailed for how these thinkers have been understood. We will consider existentialist giants such as Sartre and Heidegger. But we will also spend time with less totemic thinkers. One

key thematic strand will focus on is race and existentialism. In short, we will explore why existentialism continues to speak to the Millennial generation's concerns about the meaning and purpose of human existence.

HISTORY 3922 Secular & Religious: A Global History
Recent years have seen a dramatic rethinking of the past in nearly every corner of the world as scholars revisit fundamental questions about the importance of religion for individuals, societies and politics. Is religion as a personal orientation in decline? Is Europe becoming more secular? Is secularism a European invention? Many scholars now argue that religion is a European term that doesn't apply in Asian societies. This course brings together cutting-edge historical scholarship on Europe and Asia in pursuit of a truly global understanding. Countries covered will vary, but may include Britain, France, Turkey, China, Japan, India and Pakistan.

HISTORY 3977 The Making of the Modern Catholic Church
This course examines the work of three church councils that put their stamp on the Catholic Church at key moments in its history, making it what it is today. The first section is dedicated to the Fourth Lateran Council (1215), which defined the high medieval church as an all-encompassing papal monarchy with broad powers over the lives of all Europeans, Christian and non-Christian alike. In the second section we turn our attention to the Council of Trent (1545-1563), which responded to the threat posed by the Protestant Reformation by reforming the Catholic church, tightening ecclesiastical discipline, improving clerical education, and defining and defending Catholic doctrine. We conclude with a consideration of the largest church council ever, Vatican II (1962-1965), which reformed the liturgy and redefined the church to meet the challenges of the modern, multicultural, post-colonial world.

HISTORY 4017 Technology, Empire, and Science in China
How did technology, science, and empire intersect in early modern and modern Chinese history? Was there a unique Chinese way of studying nature? How did non-Chinese scientists and engineers contribute to China's knowledge of the world? This course offers a historical and historiographical survey of science and technology studies in China, from the 13th to the 20th century. It particularly examines the global circulation of scientific knowledge in the late imperial period, the place of technology in the empire building of the Qing dynasty (1637-1912), and the violent epistemic encounters between the West and China from the 19th century onward. Throughout the semester, we will explore Confucian scientists as well as Muslim geographers, Jesuit engineers, Manchu anatomies, and Chinese barefoot doctors. Positioning China within a global order, the students will question the premises of modern scientific discourses and try to respond to a seemingly simple question: What does science and technology even mean in a Chinese context?

HISTORY 4049 Research Seminar in Post-War Urbanism: Shrinking City or Growth Machine?
This course will explore the way that American cities have evolved in the face of shrinking de-industrialized economies and the shift to neo-liberal post-industrial growth. Focusing on the 1960s to the present, the class will examine the process of urban change in the late 20th century, including: de-industrialization; urban decline; growth policies; and gentrification.
Credit 4 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

HISTORY 4052 Advanced Seminar: Mexican Agriculture: Land, Politics and Development
Access to and ownership of land has been a major issue in Mexican history. Land tenure in economic development has been a constant source of tension and debate since the 18th century. Paradoxically, land tenure has been put forth as both the obstacle and the solution to the country's modernization. Given its centrality in the construction of the modern period, this course examines liberalism, agrarian revolts, the revolution, the green revolution and neoliberalism through the lens of land issues. This course will also explore how these have shaped and have been shaped by indigenous peoples and peasants, from land disentailment to the fight against GMO maize. Students will evaluate agrarian reforms, agricultural modernization programs, concepts of and transformations of natural resources, food production/consumption and social policies.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

HISTORY 4056 Advanced Seminar: Mad: Mental Illness, Power and Resistance in Africa and the Caribbean
This seminar explores the history of mental illness in Africa and the Caribbean during the colonial and post-colonial periods. We will be guided by the following questions: What is mental illness? How do social, cultural and political realities affect how mental illness is defined? Should mental illness always be analyzed within a specific cultural context? How did psychiatry factor into the efforts of European colonizers to maintain social order in their colonies? How have colonized people resisted colonial notions of madness? What is the place of religion in these histories? How did mental institutions change after the end of colonial rule and how was post-colonial Caribbean and African psychiatry harnessed in service of decolonization? The course will pay special attention to how European colonial powers employed similar understandings of blackness across regions as they formulated ideas concerning the black populations they deemed mad across Africa and the Caribbean.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Spring

HISTORY 4057 Advanced Seminar: Medicine, Disease and Empire
This course examines the history of medicine in connection to the politics of colonialism and empire-building, spanning the sixteenth century through the twentieth century. Topics covered include: epidemic disease outbreaks (e.g. smallpox, cholera, malaria); the role of science and medicine in endorsing the civilizing missions of empires; tropical climates and tropical diseases as western constructs; tensions between western medicine and indigenous healing practices and beliefs; ideas of race and racism in science and medicine; modern advancements in sanitation and public health and their implementation overseas; and the historical roots of the modern global health movement.

Typical periods offered: Fall

HISTORY 4080 Nuns
Nuns -- women vowed to a shared life of poverty, chastity, and obedience in a cloistered community -- were central figures in medieval and early modern religion and society. This course explores life in the convent, with the distinctive culture that developed among communities of women, and the complex relations between the world of the cloister and the world outside the cloister. We look at how female celibacy served social and political, as well as religious, interests. We read works by nuns: both willing and unwilling; and works about nuns: nuns behaving well, and nuns behaving scandalously badly; nuns

embracing their heavenly spouse, and nuns putting on plays; nuns possessed by the devil, and nuns managing their possessions; nuns as enraptured visionaries, and nuns grappling with the mundane realities of life in a cloistered community.
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, HUM EN: H

HISTORY 4087 Advanced Seminar: The Inquisition in Europe, Asia, and Latin America, 1200-1700
This seminar will study the history of the Inquisition from its beginnings in southern France in the first half of the 13th century up to the investigations undertaken by Dominicans and Franciscans in 17th century Mexico and Peru. Along the way the seminar will focus upon other inquisitions in Europe (especially those made in Italy, Spain, and Germany), and the hunt for heresy in Goa and the Phillipines. This course will read inquisitional manuals (books on how to conduct an inquisition), and original inquisitional documents (the records of the trials and interrogations). Consequently, the history of heresy and witchcraft, as understood by people in the past and historians in the present, will be discussed.

Typical periods offered: Fall

HISTORY 4088 Advanced Seminar: Europe's Jewish Question: Emanicpation, Antisemitism, & Jewish-Christian Confrontation
The so-called Jewish Question was a product of European modernity. It emerged in conjunction with the formation of modern states, Enlightenment projects for political reform, the decline of religious influence in society, and struggles over Jewish emancipation. In this seminar, students will examine the unusual career of this obsession from the sixteenth through the twentieth century by focusing selectively on a number of illustrative episodes: Christian Hebraism and the Reformation; the Enlightenment assault on religious power; European debates on Jewish emancipation; the emergence of the Jewish Question in the nineteenth century; antisemitism as a modern political phenomenon; the renewed discourse of Jewish ritual murder at the turn of the 20th century; Zionism and other forms of Jewish nationalism; and the question of anti-Zionism in the reformulation of the Jewish Question during the past half-century.

Typical periods offered: Spring

HISTORY 4092 Humanitarianism and Human Rights: Power, Paradigms, Protection
This course charts the twin development of Western humanitarianism and human rights, with a particular focus on aid and protection as forms of European and US imperialism. Each week, we will focus on one particular set of actors in the humanitarian field each week: representatives of states, international organizations, NGOs, philanthropists, emergency workers, legal experts, reporters, and not least the affected communities themselves. We will conclude with a discussion of how the complicated history of Western humanitarianism frames our understanding of more recent humanitarian emergencies, such as the European refugee crisis of 2015.
Credit 3 units. A&S IQ: HUM, SC BU: HUM
Typical periods offered: Spring

HISTORY 4115 Advanced Seminar: Gender, Race, and Class in South Africa, 1880-Present
By focusing on the complex historical dynamics of race, gender and class in South Africa over the past 120 years, this course is aimed at understanding the development of segregation, apartheid, and racial capitalism, as well as the emergence of multiple forms of resistance to counter white minority rule. Topics include: white settler expansion and the defeat of the African peasantry; the rise of mining capital and the emergence of a racially divided working class; the origins of African and Afrikaner nationalisms; migrant labor and the subordination of African women; and the prospects for a non-racial, non-sexist democracy in a unified South Africa.

HISTORY 4118 Advanced Seminar: Renaissance Florence and Venice
Venice was the most famously stable city-state in Renaissance Italy, Florence the most notoriously unstable one. This course explores how those contrasting political environments and experiences shaped social relations and cultural production (and vice versa) in those two cities.

HISTORY 4124 Advanced Seminar: Women and Religion in Medieval Europe
This course explores the religious experience of women in medieval Europe and attempts a gendered analysis of the Christian Middle Ages. In it, we will examine the religious experience of women in a variety of settings - from household to convent. In particular, we will try to understand how and why women came to assume public roles of unprecedented prominence in European religious culture between the twelfth century and the sixteenth, even though the institutional church barred them from the priesthood and religious precepts remained a principal source of the ideology of female inferiority.

Typical periods offered: Spring

HISTORY 4129 Advanced Seminar: The Crusades
This seminar will study the phenomenon of crusading in medieval Latin Christendom, from the First Crusade proclaimed by Pope Urban II in 1095 to the late crusades of the fourteenth and fifteenth centuries. We will particularly focus on crusading in the twelfth and thirteenth centuries, when the ideas and practices of being a martial pilgrim were developed and formalized by the Church. The concept of holy war in Latin Christianity and Islam will be examined. We will analyze the Fourth Crusade and the sack of Constantinople in 1204. We will investigate the Albigensian Crusade (1208-1229) into what is now southern France, when Christians were promised salvation for killing other Christians and whether genocidal moments occurred during this holy war against heretics. Topics to be discussed are the Kingdom of Jerusalem and other crusader colonies in the Levant, women on crusade, the poetry of crusading, chivalry, military orders like the Knights Templars and the Hospitallers, and violence as a redemptive act. One historiographic paper and a research essay are required.

HISTORY 4132 Advanced Seminar: Religion and the Secular: Struggles Over Modernity

A generation ago, scholars and observers around the world felt assured that modernization would bring the quiet retreat of religion from public life. But the theory of secularization now stands debunked by world events, and a host of questions has been reopened. This course provides students with a forum to think through these issues as they prepare research papers on topics of their own choosing.

HISTORY 4133 Advanced Seminar: Medicine On the Frontiers

When Europeans established maritime empires and trading routes beginning in the sixteenth century, they encountered not only new cultures, but new environments, natural products, and understandings of the human body. The encounters also introduced new ideas and vectors of disease, injury, and death to the societies of Africa, Asia, and the New World. This course examines how ideas about health and healing shaped global interactions in the early modern period and how these ideas were transformed by the movement of information, drugs, and medical practitioners around the world.

HISTORY 4134 Advanced Seminar: Women in Renaissance Italy

In Renaissance Italy, long-standing yet self-contradictory stereotypes of women contended with one another, as well as with new notions of domesticity, emergent models of education for women, and harsh social realities of legal subordination and political exclusion. This course explores ideas about women and the lived experience of women in the varied environments of Renaissance Italy, from the merchant republics of Florence and Venice to the princely courts of the Po valley, and from middle-class households to aristocratic convents. Readings will include primary sources (sermons, short stories, letters, diaries, chronicles, treatises, and court records, as well as surviving examples of material culture including paintings and sculpture) in English translation, as well as modern studies of women in Renaissance culture, society, and politics. Pre-modern, Europe.

HISTORY 4136 Advanced Seminar: Meet Me in St. Louis

This seminar uses the 1904 Louisiana Purchase Exposition held in St. Louis as a lens to explore the intersection of exhibitionary culture, nation building and history. In the second half of the 19th century, world's fairs became a fact of life in many parts of the world. By the end of the century, American historian and cultural critic Henry Adams argued there was indeed a religion of world's fairs. These international expositions, as sites of pilgrimages not only informed people's perception of the world but also were ideal stages for young countries to showcase their achievements, to attract investors and to craft a national identity. Students will examine the rise of exhibitionary culture and the construction of patriotic histories and national symbols, the manufacturing of racial ideologies and otherness, and how these were all embedded in debates on civilization, modernity and progress.

HISTORY 4140 Advanced Seminar: The U.S. in Afghanistan: Origins, Developments, Consequences

This course offers a historical examination and analysis of America's involvement in Afghanistan from the Cold War through the present, focusing in particular on the US War in Afghanistan from 2001 onward. Special attention will be given to political, military, diplomatic and economic dynamics as well as to international relationships, the experience of war and the subsequent developments upon both American and Afghani societies. Major topics covered include US covert operations against the Soviets in Afghanistan during the 1980s; revolution, civil war and the rise of the Taliban during the 1990s; 9/11 and the War on Terror; national building and stability measures during the early 2000s and subsequent security threats in the form of an insurgency, warlords, drug gangs, criminal networks and the al-Qaeda alliance of terrorist organizations; the key roles played by Pakistan, India, Iran, Russia, China and Central Asian states; the Obama surge and counterinsurgency operations starting in 2009; the soldier's experience, special forces, and covert operations; prisoners, torture and human rights abuses; the end of NATO's mission in 2014 and subsequent developments: the Ghani government, the return of the Taliban, the arrival of ISIS, the peace process, the U.S. drawdown and the elusive quest for peace and stability in Afghanistan. This is a capstone course open to history majors only. This course fulfills the History major capstone requirement as an Advanced Seminar.

HISTORY 4142 Advanced Seminar: Women and Gender in Modern Caribbean History

This course will highlight women in the making of Caribbean history, and it will consider how men and women were made in the English-speaking Caribbean from emancipation (1838) to the present. We will explore women and gender issues within the context of significant political shifts including the transition from slavery to wage and indentured labor, the labor rebellions of the 1930s, the rise of labor unions and political parties, anti-colonial activism, decolonization and nationalism. The course will also situate the Caribbean within an international context, paying attention to migration, black internationalism and the Third World movement.

HISTORY 4147 Advanced Seminar: The Enlightenment in Latin America: Science & Reason On the Colonial Frontier

What is Enlightenment? Neither the harbinger of a utopian society 'philosophes' and bureaucrats in the Age of Revolutions anticipated nor as totalitarian or destructive as social critics judged from the twentieth century, the projects of self-styled rationalists and empiricists have had repercussions in seemingly every aspect of life. This course invites students to consider the contributions of non-Western actors to the emergence of our modern world. Specifically, we examine the variety of ways scientists, administrators, and laypeople in Latin America and the Caribbean thought about medicine and disease, race, religion, social and political organization, and problems of truth and empiricism in the eighteenth and nineteenth centuries. The goal is to engage critically with the view that the modern world emerged from predominantly textual, literate, English, or French traditions and to think about how we can recover the cultural contributions of non-literate groups of indigenous American, African, and Spanish descent.

HISTORY 4149 Advanced Seminar: Slavery in America: The Politics of Knowledge Production

This course focuses on the long history of chattel slavery in North America, from origins through emancipation, encompassing Black and Indigenous enslavement. The course foregrounds the struggles over power, over life and death, that were at the heart of slavery's traumatic and grotesquely violent two-hundred-fifty-year career in North America, with attention to hemispheric context. At the same time, it highlights the fiercely contested historical battleground where scholars have argued about how to define American slavery--as a system or site of labor, production, and reproduction; law, property, and dispossession; racial and gender domination; sexual violation, rape, and incest; psychological terror and social death; containment and marooning; selfhood and nationality; agency and resistance; anti-colonial and revolutionary liberation and millennial redemption. Finally, it engages the politics of knowledge production that have produced the slavery archive, replete with its annihilating silences, repressions, and erasures, and overdetermined presences. In the end, the course's overarching question is how the politics of slavery, of its material experiences, interpretations, and archives, have shaped the lives and afterlives of slavery and race, to the present day. Students will conduct original research on topics related to North American slavery in consultation with the instructor that will culminate in a 12-15-page

final essay. The course includes attention to the role of slavery in the founding and development of Washington University, and research projects that engage the University's slavery archive and questions related to enslavement in the history of the University and/or the history of St. Louis are welcome and will be supported by Olin Library Special Collections and other resources. Modern, U.S.

HISTORY 4150 Advanced Seminar: Inventing India
From Christopher Columbus' misguided search for a mythical notion of India, to the Incredible India branding campaign launched by the Indian State's Department of Tourism, to the allure of yoga and true love, the notion of India has its own history. In this Advanced Seminar we trace the invention of India - as a concept - over time. We'll learn how the fabrication of India has proceeded through the centuries, and how the many meanings of India coalesce, nimbly side-stepping any popular or professional narrative of Indian history. Mobilizing an array of interdisciplinary tools, we will plot how the fetishization of India has itself become a flexible industry, how the management of Indian exceptionalism drives caste expansion. We'll study how the process renders certain subject positions and hierarchies as neutral and hegemonic while violently discarding others; how India is a product collectively manufactured, circulated, and consumed by a range of people around the world; the very real work of translation in bringing India into our everyday lives and imaginaries. This course fulfills the History major capstone requirement as an Advanced Seminar.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H
Typical periods offered: Fall

HISTORY 4158 Topics in American History: Race and Drugs in American History
This course explores the racial construction of the use of legal and illegal substances in American history from the mid-19th century to the present. We will spend time engaging in a historical analysis of the social, economic, and racial dynamics that defined drug addiction in popular imagination, and examine how these factors contributed to discussions about legality, access to substances, one's ability to be rehabilitated, and criminal status. Regarding criminality we will particularly explore sociological and theoretical perspectives of labeling, habitual and occasional offenders, and moral panic in order to understand how racial minority groups were targeted for different rhetorical, legislative, and economic purposes. One major goal of the course will be to outline the early 20th century beginnings of the war on drugs and connect it to the century long growth of a militarized police system and prison industrial complex. We will secondly work to understand the role of local and national political actors, law enforcement, and the media in manufacturing and maintaining connections between race, crime and drugs. Ultimately, we will use our study of drugs to contextualize 21st century issues of police violence, increases in homicide in minority communities, mass incarceration, poverty, segregation, and mass movements of protest.

Typical periods offered: Fall, Spring

HISTORY 4160 The Culture of Death in East Asia
This course explains a wide range of historical themes pertaining to death in East Asia, namely China, Korea, and Japan. The key questions addressed in this course are how and why people in the past understood and experienced death in certain ways, and in what ways the experience and meaning of death transformed over time. We will try to answer these questions by exploring historical and cultural terrains that shaped the ways in which people conceptualized death and afterlife in the three countries. Throughout the first half of the semester, we will observe how notions of death and afterlife evolved and were shaped and influenced within the multifaceted interplay between religions, philosophies, ideologies, and popular customs. We then move on to the impact of modernization on the practices of death in the late 19th and 20th centuries. Students will be asked to think critically and creatively about how to define death as a historical experience or event, as well as how we could see history differently through the lens of death. For this purpose, we will consult a variety of course materials, such as selected secondary scholarship, primary documents, ghost tales, and films. Although a short lecture will be given when necessary, the class will be discussion-based. Studenets who are interested in death but have no background in East Asian studies and history are welcome; we value any creative input from the perspective of diverse cultural backgrounds as far as death is taken seriously.

HISTORY 4251 Advanced Seminar: Race, Crime, and American Prisons
This course will explore the politics of race, crime, policing, criminal justice, and the American prison system. Specifically, the race component of the class will focus on the racial dichotomy of Black and White, and how that has manifest in crime and imprisonment. Students will read several important texts that engage these subjects and will become familiar with the prominent ideas in a growing historiography that addresses inequality in law enforcement. We will also examine a few historical theories that have shaped this scholarship in order to understand how historians have dealt with the problem of racial prejudice in crime and punishment. As a result, the class will begin with themes of criminalization along lines of gender and racial identity, and ultimately lead to a history of the American carceral state.

HISTORY 4254 Advanced Seminar: Medieval Foundations of Modern Law
This seminar will study the law codes, legal theories, forensic methods, modes of litigation, judicial processes, criminal punishments, and legal cultures of the medieval West from the fifth century to the fifteenth. Topics to be discussed include the Late Roman Theodosian and Justinianic Codes, law in a lawless world after the collapse of the Western Roman Empire, the early English (or Anglo-Saxon) law codes, laws as songs, monastic Rules, Carolingian capitularies, the early medieval penitentials, feudal law, the Gregorian Reforms, secular and canon law, the rediscovery of Roman law, the rise of lawyer popes, the first university law schools in the twelfth century, the Fourth Lateran Council, Magna Carta, the early inquisitions into heretical depravity, courtroom testimony and confession, methods of interrogation and cross-examination, torture, life imprisonment, the development of English common law and the jury system, law as a secular profession,

and the writing of laws and legal documents in vernacular languages (especially English and French) rather than Latin by the fifteenth century. The modern legal system of the United States (and the United Kingdom, Canada, New Zealand, and Australia) was founded upon the legal history of this medieval millennium. The fundamental differences between Anglo-American and European law (and much of Central and South American law) also derives from these early centuries. Students will participate in weekly seminars reading and discussing primary and secondary sources in translation. Students are required to write a historiographic essay (4-6 pages) and a research essay (20-30 pages) on topics of their choosing. No prerequisites. 4 Units.

HISTORY 4351 Advanced Seminar: Connected Histories of Sciences, Technology and Medicine in East Asia and South Asia
Asia has been a key site for the rise of new disciplines and modes of inquiry in early modern and modern world history. By focusing on a series of ways of knowing – from anthropology and astronomy to botany, surveying, medicine and racial and gendered science, this course embeds knowledge and its practice in the specific cultural, environmental, infrastructural, economic and political context of East Asia and South Asia. It draws from over three decades of charged debates undertaken by scholars who have advocated, challenged, or amended the framework of "Asia as a Method" in the study of science, technology, medicine, and the environment. The course will also provide methodological insights into the sociology of scientific knowledge to the intersection of postcolonial theory, the Anthropocene debate, climate change and posthumanism. Decidedly anti-diffusionist and soundly empirical in its approach, the course will have the added aim of introducing students to a variety of sources within the collections of our medical library and museums as a means of grounding the discussions in a rich archive.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM

HISTORY 4532 The Culture of the Renaissance
The scholars, artists, and assorted adventurers who self-consciously broke with the medieval past and called for new methods of communication, the rethinking of human affairs, and the exploration of the wide world created a vast and influential culture. Once thought to herald the start of the modern era, the Renaissance has been revealed as contradictory, complex, and cross-cultural; a subject worthy of examination in its own right. In this course we will analyze key primary sources and use recent scholarly works to consider the social, political, and intellectual contexts that produced and promoted this cultural transformation. As historians, we will always be concerned with the purpose(s) culture serves and who culture is for.

HISTORY 4804 Advanced Seminar: Partition: The Making of India and Pakistan
The division of India and Pakistan at the time of Independence from British colonial rule was a major event that has left its mark on the lives, memories, and politics of contemporary South Asians. Why did British India break apart along apparently religious lines? Was sectarian or communal violence inevitable, or endemic in South Asian society? How was Partition - a time of violence, mistrust, dispossession, displacement, and mass migration -- experienced by ordinary people? How is the traumatic memory of this event borne by individual women, children, by families? How does its legacy persist, and how is it being remembered, and reckoned with, today? In this course, we will not find final answers to these difficult questions, but we will learn how to explore them responsibly, using literature, film, and other archival sources. This course provides students with a forum to discuss and explore topics of their own choosing.
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM EN: H

HISTORY 4815 Advanced Seminar: New York, New York: The Empire City From Stuyvesant to Trump

This research seminar engages the long history of greater New York City: from the place Native Americans called Manna-hata to the largest city in the United States and the world political, financial, and cultural capital that it is today. The course explores New York City's ambivalent relationship with America, with the world, and with itself. It focuses on matters of power - how, in different moments of the city's history, it was defined, who held it, and how various groups managed to contest for it; matters of exchange and extraction - political, cultural, and economic; and matters of belonging - whether a city of immigrants, exiles and refugees succeeded in becoming a home for the homeless. It pays close attention to both the micro - the street corner and the political ward; the bridge and the tunnel; the gentrifying neighborhood; the mosaic of the city's foodways; the theater, financial, slaughterhouse, brothel, and other districts - and the macro - the banks and the stock exchange; the port and transit authorities; the instrumentalities of knowledge and cultural production in the city's universities, print media, clubs, and salons; the sports empires; and the political machines, organized crime, grassroots labor and political movements, insurgencies, and undergrounds. Above all, the course will foreground the city's massive and unbearable contradictions, as a city of skyscrapers and of basement dives, lures, and snares; as a symbol of the future and freedom bound to traumatic, slave, and unfree pasts; as a symbol of modern independence bound to modern interdependence; and as a place of renaissances and ruinations, where the world either comes together or spectacularly falls apart. Sites of potential investigation, in a list that is suggestive rather than exhaustive, range from the African Burial Ground to the 9/11 Memorial and Museum, from Hamilton to Hamilton, from Boss Tweed to Robert Moses, from the Five Points to Chinatown, from Delmonico's to Sylvia's, from Blackwell's Island Lunatic Asylum to Hart Island Potter's Field, from the African Free School to Ocean Hill-Brownsville, from Marcus Garvey to Amadou Diallo, from Billie Holiday to Andy Warhol, from James Baldwin's Harlem to Stonewall, from George Steinbrenner to Jerry Seinfeld, from the Gowanus Canal to Estée Lauder, and, in the spirit of the course title, from Stuyvesant to Trump. Students will engage with the history of New York City via two three-page book reviews, a three-page site analysis, and two five-minute oral reports on assigned readings before conducting their own original research in consultation with the instructor that will culminate in a 15-page final essay. Attendance at all classes and participation in class discussions required. This course fulfills the history major capstone requirement as an Advanced Seminar.

HISTORY 4871 Colonial Cities and the Making of Modernity

Massive urban growth has been a central result of the incorporation of many areas--both central and peripheral--into the global economy in the 19th and 20th centuries. Scholars have long theorized urbanization as a key component of modernity, but they have usually done so by looking at urbanization and modernization from the perspective of the West. This course will investigate the character of cities in the colony and then use these empirical and analytical entry points to examine critically some theories of modernity. The geographical focus of the course will be primarily on cities in the Middle East, North Africa, and South Asia.

HISTORY 4882 Advanced Seminar: Money Talks: Readings in Economic History

To date, economic history has been dominated by quantitative research. In recent years, however, there has been a turn toward more qualitative analysis. With his landmark Capital in the Twenty-First Century, Thomas Piketty argued that Economics ought to return to its origins in political and moral philosophy. Similarly, on this side of the Atlantic, a new generation of historians has begun to revisit the history of capitalism with methods that combine both numbers and narrative. In this advanced seminar, students will read both contemporary and seminal works in the field of economic history as well as writings from a wide variety of social scientists and humanistic scholars who study the economy. The aim of this course is to think critically about the historical construction of both economics as a discipline and the economy as a field of inquiry.

HISTORY 4884 Advance Seminar: The Roots of the American Working Classes: Myths, Realities, Histories

The diverse realities of American labor and working-class experience have long been submerged under layers of politics and ideology. How should we study the lives of working people? What questions should we ask? Where do we go to answer them? This research seminar engages the lived experiences of the American working classes, in all their complexity, over the long 19th- and 20th-centuries, to the present. The course has the double project of (1) exploring the roots of mythologies about American working people that have the effect of distorting or erasing their experiences, efforts and accomplishments, and struggles for organization, visibility, citizenship, and power, with special attention to mythologies about American workers who are non-white, non-male, and non-U.S.-born who did/do not fit conventional tropes of American labor or the white worker; and (2) exploring the roots of working people's experiences, as shaped by forces of technology, class, race, gender and sexuality, religion, nationalism, and violence : what are the challenges, conceptual and archival, of studying the people, in their working and familial/community lives, as producers and consumers, in their organizing efforts, and in their civic and political capacities? How did the transformation of work, technology, culture, and society over this long era from Enslavement to Artificial Intelligence, from Blackface Minstrelsy to Hip Hop, shape working people's lives and struggles? How did working people survive cataclysmic crises, from the Civil War to Covid, and mold the evolution of American citizenship and democracy? Each student will produce a 12-15 page original research paper related to the course material, based on an analysis of primary sources, in consultation with the instructor, and due at the end of the semester; the course is designed to closely mentor students in this project.

Credit 3 units. A&S IQ: HUM, SC BU: HUM EN: H

Typical periods offered: Spring

HISTORY 4886 Advanced Seminar: The U.S. in Vietnam: Origins, Developments, and Consequences

This course will focus on America's involvement in Vietnam from the era of French colonialism through the collapse of United States intervention. Special attention will be given to political, military, economic, and cultural aspects, as well as to international relationships, and the significance of the experience and subsequent developments upon both American and Vietnamese societies.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

Typical periods offered: Fall

HISTORY 4888 Advanced Seminar: Digital Frontiers in History
Can digital technologies offer new ways to rethink historical narratives? Is DH the future of the humanities and of history as a profession? Can DH and critical inquiry be brought together? This course explores the history, present, and future of digital humanities (DH) to seek responses to these questions. From its origins in the Cold War to its rise to fame in the 1990s, the digital turn in the humanities has garnered excitement and support as well as critique and even disavowal from historians. In this course, we will examine the debates in the field of DH and learn about new ways in which historians are using digital tools for academic research as well as public outreach and activism. The course will be divided into two parts. The first half of the course will be devoted to understanding the historical growth and the present status of the field. In the second half, students will be learning basic digital tools to conduct research. The purpose of the course is not to turn historians into coders; it is to understand what codes can do for historians.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

HISTORY 4889 Advanced Seminar: History of the Body
Do bodies have a history? Recent research suggests that they do. Historians have tapped a wide variety of sources - including vital statistics, paintings and photographs, hospital records, and sex manuals - to reconstruct changes in how humans have conceptualized and experienced their own bodies. We will pay particular attention to the intersection of European cultural history and history of medicine since 1500. This course fulfills the History major capstone requirement as an Advanced Seminar.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

HISTORY 4965 Advanced Seminar: Magic, Heresy and Witchcraft in the Medieval World, 350-1550
This seminar will study the history of magic, heresy, and witchcraft in the medieval world. It will begin in the fourth century after the conversion of Constantine the Great and end with the great witchcraft trials of the fifteenth and sixteenth centuries. The seminar will read magical treatises, ecclesiastical polemics against vulgar belief, inquisitorial trials, chronicles, and histories, in our attempt to define what was considered the ordinary and the extraordinary, the natural and the supernatural, good and evil, the boundaries of heaven and earth. How do modern historians use medieval documents to evoke the lives of men, women, and children who believed in magic or were accused of heresy? Can this only be done through a form of historical anthropology? What methods do historians use in trying to understand past ideas and practices? What is historical truth then? What is the relationship of supposedly heterodox belief and behavior with religious orthodoxy? How do we define religion? A theme throughout this seminar will be the definition of evil and the powers of the devil. Students will write a short historiographic essay and a long research essay. Pre-modern, Europe. PREREQUISITE: Sophomore standing or permission of the instructor.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

Medical Humanities

MEDH 1996 Medical Humanities Elective
This course is for independent study in Medical Humanities.
Credit 0 units.
Typical periods offered: Fall, Spring

MEDH 2996 Medical Humanities Elective
This course is for independent study in Medical Humanities.
Credit 0 units.
Typical periods offered: Fall, Spring

MEDH 3000 What is Medical Humanities?
What is medical humanities? What are its core questions and methods? When and how did the field emerge? To whom does it matter and why? These questions will ground our exploration of recent work in medical humanities. We begin with readings chosen by the instructor to illuminate various humanistic methods (e.g., historical, literary, philosophical) and their approach to recurrent topics and problems in the field (e.g., the doctor-patient relationship, illness as experience, the social construction of disease, health inequality, medicalization). In the second part of the course, students will be guided in co-writing and co-teaching the rest of the syllabus. Students will finish the class able to provide their own definition of medical humanities and to explain the field's origins and concerns as well as why and to whom the field matters. Enrollment preference will be given to students who have already declared the minor in medical humanities.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H
Typical periods offered: Fall, Spring

MEDH 3995 Medical Humanities Coursework Taken Abroad
This course is for study abroad credits.
Credit 3 units.
Typical periods offered: Summer

MEDH 3996 Medical Humanities Elective
This course is for independent study in Medical Humanities.
Credit 0 units.
Typical periods offered: Fall, Spring

MEDH 3999 Independent Work in Medical Humanities
This designation can be used for independent studies and reading courses in medical humanities. It requires prior approval from the director of the medical humanities minor.
Credit 3 units.
Typical periods offered: Fall, Spring

MEDH 4996 Medical Humanities Elective
This course is for independent study in Medical Humanities.
Credit 0 units.
Typical periods offered: Fall, Spring

History Major

Program Requirements

- **Total Units Required:** 28
- **Grade Requirement:** Students much achieve a grade of C- or higher in a course in order for that course to count toward the major requirements.

Required Courses

Requirements	Units
Introductory courses	6
Upper-level courses	18
Capstone experience	4

Introductory Courses

- One introductory survey (1000 level)
- One additional introductory course, chosen from any 1000- or 2000-level course listed in History and taught by history department faculty*

Note: Students may satisfy introductory course requirements using AP credit if they have earned *a score of 5* on the AP European, U.S., or World History examinations.**

* This course can be an introductory survey, lecture, or seminar, and it can be either home-based or cross-listed in History. **Note:** "History department faculty" does *not* include affiliated faculty.

** Students will be awarded 3 units of credit per AP exam for a maximum of 6 credits toward the major or minor. A score of 4 on any of these exams may earn 3 units of elective credit but will not be counted toward the major or minor.

Upper-Level Courses

History majors must complete at least 18 units at the 3000- or 4000-level (History units or courses in other units listed under Academic Requirements as counting toward the History major), *plus* a capstone experience (for a minimum of 22 advanced units). Requirements at this level include the following:

- At least one course designated "premodern" and one course designated "modern"
- At least one course from three of the following geographical areas: Africa, East Asia, South Asia, Europe, Latin America, Middle East, or the United States or in transregional history (please refer to note 5 below)
- The capstone experience: History majors must, prior to graduation, complete a capstone experience that consists of the following:
  - Successful completion of the senior honors thesis; *or*
  - An advanced seminar; *or*
  - An independent research project with a significant writing component; *or*
  - Directed fieldwork in the historical or archival profession, with a significant writing component

Notes

1. Students much achieve a grade of C- or higher in a course in order for that course to count toward the major requirements.
2. International Baccalaureate: The department recognizes the superior preparation that many students have received in this program; however, no credit is awarded for the International Baccalaureate.
3. The department recognizes that some students take their first history course or develop an interest in majoring in history only during their junior year and then face a dilemma in choosing between required introductory courses and upper-level course work more appropriate to their abilities. Such students, with the recommendation of their advisor in history, may petition the director of undergraduate studies to permit a designated upper-level course to substitute for one of the introductory courses. In all such cases, the minimum number of units remains 18 in the minor and 28 in the major.
4. All upper-level units must be separate courses that are not double-counted toward a minor or second major. Courses in the major are excluded from the Pass/No Pass option.
5. If a student chooses to count a transregional course toward the geographical requirement, at least one of the two other geographical areas that the student counts toward the major must cover a region that is not included in the transregional course. For example, a student who has completed courses in U.S. and Latin American history could not count a transregional course that examines the comparative history of the United States and Latin America. However, a student who has taken a transregional course on the United States and Latin America could take a course on either U.S. or Latin American history and would then need to take a course covering an area other than the United States or Latin America to satisfy the third area requirement.
6. Courses taken Pass/No Pass do not count toward the major or minor.

Additional Information

Fieldwork

History majors are eligible for fieldwork at the Missouri Historical Society or at other museums. Opportunities are also sometimes available in the special collections at Olin Library, with local businesses, and at historical sites.

Study Abroad

The Department of History strongly encourages student participation in the various year and semester abroad programs approved by the College. A maximum of 6 history credits earned from studying abroad may be applied to the major in history. Students must have their courses preapproved by the department's study abroad advisor prior to departure. It is possible to pursue a senior honors thesis after study abroad, but careful planning is required.

Transfer Credits

While the Department of History does not restrict the number of transfer credits a student can apply to the major requirements, University policy does specify that at least half of the units for the major must be completed in residence at Washington University.

Senior Honors

Students who have a strong academic record may work toward Latin Honors. Students graduating with Latin Honors must meet grade point average requirements and satisfactorily complete HISTORY 3224 Senior Honors Thesis and Colloquium while writing a thesis during the senior year.

Awards and Prizes

The Department of History annually awards the following prizes:

- The Helen and Isaac Izenberg Prize for a superior paper written for an Advanced Seminar
- The Shirley McDonald Wallace Prize for an outstanding first-year student enrolled in both semesters of Western Civilization
- The J. Walter Goldstein Prize for an excellent, well-written senior honors thesis
- The Konig Prize in Law & History for the best-written paper addressing the connection between law and history in any history course

Special Opportunities

Undergraduates interested in history are encouraged to join the Undergraduate History Association, which is the local chapter of Phi Alpha Theta (PAT). Led by the ongoing campus PAT members, the chapter usually holds an initial organizing meeting in the fall of each year. The activities of the chapter vary, but they typically include sponsorship of lectures, films, discussions and social events. Although national PAT membership requires 12 completed units of history courses, the local chapter welcomes the participation of all students interested in history. Each year, PAT publishes *The Gateway History Journal*, an anthology of the best student historical writing at Washington University.

History Minor

Program Requirements

- **Total Units Required:** 18
- **Grade Requirement:** Students must achieve a grade of C- or higher; Pass/No Pass grades do not count for the minor.

Required Courses

Requirements	Units
Introductory courses	6
Upper-level courses	12

Introductory Courses

- One introductory survey (1000 level)
- One additional introductory course, chosen from any 1000- or 2000-level course listed in history and taught by history department faculty*

Note: Students may satisfy introductory course requirements using AP credit if they have earned *a score of 5* on the AP European, U.S., or World History examinations.**

* This course can be an introductory survey, lecture, or seminar, and it can be either home-based or cross-listed in History. **Note:** "History department faculty" does *not* include affiliated faculty.

** Students will be awarded 3 units of credit per AP exam for a maximum of 6 credits toward the major or minor. A score of 4 on any of these exams may earn 3 units of elective credit but will not be counted toward the major or minor.

Upper-Level Courses

- Students must complete 12 additional history units or courses in other units listed under academic requirements as counting toward the history minor, 9 of which must be at the 3000 or 4000 level.

Additional Information

- All 18 units must be separate courses not double-counted toward the major or another minor.
- The department recognizes that some students take their first history course or develop an interest in declaring a minor in history only during their junior year and then face a dilemma in choosing between required introductory courses and upper-level course work more appropriate to their abilities. Such students, with the recommendation of their advisor in history, may petition the director of undergraduate studies to permit a designated upper-level course to substitute for one of the introductory courses. In all such cases, the minimum number of units in the minor remains 18.

Study Abroad

The Department of History strongly encourages student participation in the various year and semester abroad programs approved by the college. A maximum of 3 history credits earned from studying abroad may be applied to the minor. Students must have their courses preapproved by the department's study abroad advisor prior to departure.

Transfer Credit

While the history department does not restrict the number of transfer credits a student can apply to the minor requirements, college policy does specify that at least half of the units for the minor must be completed in residence at the Washington University.

Medical Humanities Minor

Program Requirements

Total Units Required: 18

- Of the 18 required units, 15 units (i.e., five courses) must be core courses.
- The remaining 3 units (i.e., one course) can be either a core course or an affiliate course.
- Of the 18 required units, 9 units (i.e., three courses) must be at the 3000 level or above. For example, “What is Medical Humanities?” is a 3000-level core course.

Core Courses

Code	Title	Units
AFAS 4656	Historical Racial Violence: Legacies & Reckonings	3
ANTHRO 4134	The AIDS Epidemic: Inequalities, Ethnography, and Ethics	3

Jewish, Islamic, and Middle Eastern Studies

Jewish, Islamic, and Middle Eastern Studies is an academic department, unique in North America, in which Jewish studies, Islamic studies, and Middle Eastern studies are integrated. It is an interdisciplinary department that motivates students to explore the historical experience; the literary, religious, and cultural expression; and the political and material life of Jewish, Islamic, and Middle Eastern civilizations. Whether students favor the study of language, literature, religion, history, or politics, they will find a way to deepen their appreciation and understanding of these complex and diverse societies and cultures in our courses. Students will also be inspired to explore the interaction of Jews and Muslims with neighboring societies and cultures in the Middle East, Europe, North Africa, and other parts of the world.

Students completing our majors and minors have gone on to do many things after graduation. Many have entered professional schools in such fields as law, government, journalism, international affairs, education, the rabbinate or ministry, and communal or social work. Others have gone on to do graduate work in either Jewish, Islamic, or Middle Eastern studies or related disciplines. Still others have combined their interest in Jewish, Islamic, and Middle Eastern Studies with careers in business, medicine, or scientific research. All have found the major to be an intellectually and emotionally rewarding experience and an important component of their overall development.

The goals of the department are as follows:

- Convey an appreciation for the complexities, depth, diversity, and cultural richness of Jewish and Islamic civilizations in their historical context, from antiquity to the present.
- Explore the interaction of Jewish, Islamic, and other Middle Eastern societies and cultures with neighboring peoples both within and outside the Middle East.
- Encourage the mastery of the primary languages and literatures in which Jews and Muslims have expressed their cultures.
- Prepare students for graduate or professional studies in these or related fields.

Majors

- Arabic Major (p. 667)
- Hebrew Major (p. 668)
- Jewish, Islamic, and Middle Eastern Studies Major, Comparative Jewish and Islamic Studies Concentration (p. 670)
- Jewish, Islamic, and Middle Eastern Studies Major, Modern Middle Eastern Studies Concentration (p. 671)

Minors

- Arabic Minor (p. 672)
- Hebrew Minor (p. 673)
- Jewish, Islamic, and Middle Eastern Studies Minor, Comparative Jewish and Islamic Studies Concentration (p. 674)
- Jewish, Islamic, and Middle Eastern Studies Minor, Modern Middle Eastern Studies Concentration (p. 675)
- South Asian Studies (Hindi) Minor (p. 676)

Courses

Courses include the following:

- Arabic (p. 648)
- Hebrew (p. 650)
- Hindi (p. 652)
- Jewish, Islamic, and Middle Eastern Studies (p. 656)

Arabic

ARAB 1000 Beginning Arabic I
Introduction to modern Arabic; concentrates on rapidly developing basic skills in reading, writing, speaking, and understanding. Students with previous Arabic language background must take a placement examination.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

ARAB 1001 Beginning Arabic II
Continuation of Beginning Arabic I. Emphasis on enhancing skills in reading, writing, speaking, and aural comprehension of modern Arabic. PREREQ: Grade of B- or better in L49 107D Beginning Arabic I or placement by examination.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

ARAB 1021 Basic Arabic I
Elementary course provides basic competence in modern standard Arabic and introduces general aspects of Arabic culture. Emphasis on fast acquisition of speaking skills, although basic grammar and Arabic script also are introduced. Course intended to meet practical needs for travel and business. (Note: this course does not replace the Arabic 107-108 sequence in the College of Arts & Sciences.)
Credit 3 units.

ARAB 1030 Intensive Arabic
Introduction to Modern Standard Arabic. This intensive course provides basic competence in the four language skills: reading, writing, speaking, and listening. Authentic simple reading and listening materials from Arab newspapers, magazines and Arab satellite television are used. Students will also be exposed to basic phrases of Egyptian Colloquial Arabic, the most widely understood dialect in the Arab world. In addition, the course introduces general aspects of Arabic culture. The course is based on the communicative approach in language teaching and learning. It focuses on functional usage of the language and on communication in context. Note: students with some previous Arabic language background must take a placement examination.
Credit 5 units.

ARAB 1600 Arab Culture and Media
An introduction to modern Arab culture with emphasis on changes in the Arab society during the 20th century. In this course students will view and discuss films and programs relating to major cultural and religious traditions in various Arab countries including Egypt, Lebanon, the Gulf region, and North Africa. The course will also examine the role of the Arab media in society, with special focus on the international war on terrorism.
Credit 3 units. BU: IS

ARAB 1995 Arabic Coursework Completed Abroad
This course is designed for Study Abroad credit.
Credit 12 units.
Typical periods offered: Fall, Spring

ARAB 1996 Arabic Elective
This course is designed for transfer credit.
Credit 12 units. EN: H
Typical periods offered: Fall, Spring, Summer

ARAB 2010 Intermediate Arabic I
Study of grammar of literary Arabic and reading of annotated classical and modern prose texts; elementary composition; practice in speaking and comprehending modern Arabic. PREREQ: Grade of B- or better in L49 108D Beginning Arabic II or placement by examination.
Credit 4 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

ARAB 2011 Intermediate Arabic II
Continuation of Intermediate Arabic I. Study of grammar of literary Arabic and reading of annotated classical and modern prose texts; elementary composition; practice in speaking and comprehending modern Arabic. PREREQ: Grade of B- or better in L49 207D Intermediate Arabic I or placement by examination.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

ARAB 2996 Arabic Elective
This course is for 2000 level transfer credit.
Credit 12 units.
Typical periods offered: Fall, Spring, Summer

ARAB 3000 Advanced Arabic I
Continuation of Arabic 208D. Competence in reading, writing, speaking, listening and culture is developed through intensive exposure to media language in its written and audio-visual forms. Continued introduction to Egyptian colloquial Arabic. Prerequisite: Grade of B- or better in Arab 208D or placement by examination.
Credit 4 units. BU: IS
Typical periods offered: Fall

ARAB 3010 Third-Level Arabic I
This course is a continuation of Intermediate Arabic II. Competence in reading, writing, speaking, listening and culture is developed through intensive exposure to classical and modern standard Arabic in its written and audiovisual forms. Prerequisite: Grade of B- or better in L49 208D or placement by examination. Note: L75 5075 is intended for graduate students only.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

ARAB 3011 Third-Level Arabic II
This course is a continuation of Third-Level Arabic I. The continued integration of language development will occur through reading, writing, speaking, and listening activities centered around advanced authentic material. This semester will prove critical for making the transition from modern Arabic to classical Arabic, including Qur'anic Arabic. There will also be focus on the continued development of colloquial Arabic. Prerequisite: Grade of B- or better in L49 3075 or placement by examination. Note: L75 5085 is intended for graduate students only.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

ARAB 3020 Advanced Arabic I
Continuation of Arabic 208D. Competence in reading, writing, speaking, listening and culture is developed through intensive exposure to classical and modern standard Arabic in its written and audio-visual forms. Prerequisite: grade of B- or better in Arab 208D or placement by examination. Three class hours a week with one additional laboratory hour as assigned by instructor. Student may not take this class pass/fail or audit.

Credit 4 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

ARAB 3021 Advanced Arabic II
A continuation of Arabic 307D. Continued integration of language development through reading, writing, speaking, and listening activities centered around advanced authentic material. This semester will prove critical for making the transition from Modern Arabic to Classical Arabic, including Qur'anic Arabic. Continued development of colloquial Arabic. Prerequisite, Arabic 307D or equivalent. Student may not take this class pass/fail or audit.
Credit 4 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

ARAB 3050 Introduction to Arabic Literature
A survey of the major genres and themes in Arabic literature from the pre-Islamic era to the modern period. Texts will include pre-Islamic, classical and Sufi poetry, as well as popular tales and critical prose from the Umayyad and Abbasid empires and Andalusia. The modern sections of the course will interrogate political commitment in Arabic literature and introduce students to feminist and magical realist novels from North Africa and the Levant. All readings will be in English translation. Please note: L75 525 is intended for graduate students only.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

ARAB 3060 Middle Eastern Islamic Literatures in Translation
This course will study, in English translation, several great works of Islamic literature that still influence or reflect the ways in which we perceive Islamic culture today. We will critically consider great and disparate literary works, originally written in a variety of languages including Arabic, Turkish, and Persian and stretched from Spain to India, which share the common backdrop of an urban and educated milieu in which they were produced, widely read, and circulated. The course aims at exploring the literary cultures in their historical and social context. Possible themes include court literature, politics, Sufi literature, history, theology, and literature of romance. All readings are in English.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

ARAB 3070 Iraqi Literature
This course introduces students to major works in Iraqi literature in the twentieth and twenty-first centuries, with a focus on the post-World War Two period up to the present day.
Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H

Typical periods offered: Fall, Spring, Summer

ARAB 4020 Colloquial Arabic
The aim of this course is to introduce the students to colloquial Arabic through their knowledge of Modern Standard Arabic (MSA). We will focus on the main differences between colloquial and MSA so that the students can use the colloquial form for practical purposes in everyday life. Prerequisite: Arab 208D or instructor's permission.
Credit 3 units. A&S IQ: LCD BU: IS EN: H
Typical periods offered: Spring

ARAB 4051 Fourth-Level Arabic: Modern Literature
Focused reading and discussion of texts written by modern Arab intellectuals. These texts will center on the interrelated topics of modernity, politics, and religion. The course will emphasize: (1) increasing reading speed; (2) increasing depth of reading comprehension; (3) strengthening grammar; (4) building Arabic to English translation skills. PREREQ: Grade of B- or better in L49 308D Advanced Arabic I or L49 3085 Third-Level Arabic II or placement by examination.
Credit 3 units. A&S IQ: LCD, LS Art: HUM EN: H
Typical periods offered: Fall

ARAB 4061 Fourth-Level Arabic: Classical Literature
This class provides an overview of pre-modern Arabic-Islamic thought (i.e., Islamicate intellectual traditions expressed in the Arabic language). Topics to be covered include Pre-Islamic Poetry, Quran, Hadith, Islamic Law, Sufism, Philosophy, Natural Science, and Social Thought. Students will be introduced to these topics through focused reading and discussion of Classical Arabic texts by key thinkers like al-abari, Ibn ajar, Ibn Qudama, al-Ghazali, Ibn Sina, Ibn Rushd, and Ibn Khaldun. In addition to reading Classical Arabic texts, students will be given select exercises designed to strengthen their grammar, expand their vocabulary, and build their translation. PREREQ: Grade of B- or better in L49 308D Advanced Arabic I or L49 3085 Third-Level Arabic II or placement by examination.
Credit 3 units. A&S IQ: LCD, LS Arch: HUM Art: HUM EN: H
Typical periods offered: Spring

ARAB 4070 Topics in Classical Arabic Literature and Culture
Exploration of medieval Arabic Belles-Lettres (Adab). All texts read in Arabic. Prerequisite: senior standing.

Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

HBRW 3041 Third-Level Modern Hebrew II
Designed to develop communicative skills, this course provides opportunities for students to practice the art of speaking and writing correctly, clearly, and effectively. Includes reading and discussion of selected short stories from modern Hebrew literature as well as articles from current Hebrew newspapers. Class discussions deal with literary topics as well as contemporary social and political issues related to life and institutions in Israel. PREREQ: Grade of B- or better in L74 320D Third-Level Modern Hebrew I or placement by examination. Please note: L75 522D is intended for graduate students only.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

HBRW 3051 Conversational Hebrew
Designed to focus on and strengthen oral proficiency, we will explore a variety of different topics together based on our common interests - not limited to current affairs, space travel and exploration, advances in medical technology, climate change, pandemic preparedness, economic inequality, and the future of work. With each topic, we will learn relevant vocabulary and structures and apply them in small group discussions, individual presentations, simulated interviews, and classroom debates. Students will also listen to different to Israeli news reports and documentaries in order to learn how to present at a formal level. The course is designed to simulate a variety of real-life situations, which require the balance of both rehearsal as well as improvisation. By learning Hebrew in different contexts, students will be exposed to a wide range of vocabulary and will be prepared to use the language in a variety of situations. The language of instruction is Hebrew only. PREREQ: Grade of B- or better in L74 214D Intermediate Modern Hebrew II or placement by examination. Please note: L75 5211 is intended for graduate students only.
Credit 3 units. A&S IQ: LCD, LS
Typical periods offered: Spring

HBRW 3090 Israeli Women Writers
Study of selected novels and shorter fiction by women. Attention to the texts as women's writing and as products of Israeli literature. No knowledge of Hebrew necessary; all readings in English translation.
Credit 3 units. A&S IQ: HUM, LCD, SC, WI Art: HUM BU: HUM EN: H
Typical periods offered: Spring

HBRW 3140 Intro to Biblical Hebrew
This course will enable students to read the Bible in the original Hebrew. Review of Hebrew grammar. History of the Hebrew language. Intended for students with a foundation in modern Hebrew. PREREQ: Grade of B- or better in L74 214D Intermediate Modern Hebrew II or instructor's permission. Please note: L75 584 is intended for graduate students only.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

Hindi

HINDI 1010 Basic Conversational Hindi in India
An introduction to conversational Hindi offered on-site at Washington University's Summer Program in India. The course will provide beginning students with the practical conversational skills needed to conduct their local research projects (see JNE 225S, Indic Civilization) and to experience daily living in a Hindi-speaking environment. It will also provide an introduction to the Devanagari script and to the study of Hindi. Students will be encouraged to continue their study of Hindi at Washington University.
Credit 2 units.
Typical periods offered: Summer

HINDI 1020 Explorations in Hindi
This course is based on-site at Washington University's Summer Program in India. It is intended for students who already have some knowledge of Hindi. Students will improve their existing skills in a Hindi-literate environment and explore the language on their own. Students who plan to take this course must meet with Dr. Timalsina (in the Department of Asian & Near Eastern Languages & Literatures, 121 Busch Hall; e-mail samvidullasa@hotmail.com) by March 31. Students will be given an assignment (in literature, media study, translation, an interview-based project, etc.) that suits their interests and their level of proficiency in the language, and that they will complete in India under the guidance of Mr. Chundawat, the local Hindi instructor.
Credit 3 units. A&S IQ: HUM BU: HUM
Typical periods offered: Summer

HINDI 1030 Beginning Hindi I
An introduction to the most widely spoken language of South Asia. The aim of this course is to achieve proficiency in spoken comprehension, and to enable the student to acquire the major language skills--listening, speaking, reading, and writing. A standard text, web-based materials, a reader prepared by the instructor, as well as audio materials are used, with equal emphasis on both spoken and written Hindi. The language presented in the course is colloquial. The Hindi (Devanagari) script will be taught as part of the same class. Please note: There are no prerequisites (no previous knowledge of Hindi is required). Students with some previous Hindi language background must take a placement examination.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

HINDI 1031 Beginning Hindi II
Continuation of Beginning Hindi I, devoted to the further development of basic skills--listening, speaking, reading, and writing--with a particular emphasis on the acquisition of speaking proficiency. PREREQ: Grade of B- or better in L73 111D Beginning Hindi I or placement by examination.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

HINDI 1032 Beginning Urdu II
Beginning Urdu II is the continuation of the 130 Beginning Urdu course, devoted to the further development of basic skills - listening, speaking, reading and writing - with a particular emphasis on the acquisition of speaking proficiency. Training in spoken Urdu emphasizes speaking and listening at normal speed with near native pronunciation and intonation. The course meets 3 hours per week. Those who have not taken the sequence of Urdu courses offered by the department may be able to join this course, if they have obtained prior knowledge of the language by some other means (see instructor for placement). The course is tailored to address students' interests not only in the language, but also in the culture it is rooted in. Along with texts for script and grammar, new and additional materials will be constantly introduced, especially as the students develop increased facility and proficiency in the language. The class sequence relies heavily on student interaction, partner activities and group work. Prerequisite: Urdu-I (130) or placement by examination.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

HINDI 1050 Beginning Urdu
This course covers all five skills (reading, writing, listening, speaking, cultural competency) for beginning students. Starting with the Nastaliq script and simple greetings, we will then cover the basics of Urdu grammar while building vocabulary. The class will be conducted in Urdu. Homework is due by the beginning of class the day it is assigned. All work must be completed to pass the course. Student may not take this class pass/fail or audit.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

HINDI 1060 First-Year Urdu I
This course covers all five skills -- reading, writing, listening, speaking, cultural competency -- for beginning students. Starting with the Nastaliq script and simple greetings, we will then cover the basics of Urdu grammar while building vocabulary. The course will be conducted in Urdu.
Credit 5 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

HINDI 1061 First-Year Urdu II
This course is a continuation of the first semester of First-Year Urdu I. It is devoted to the further development of basic skills - listening, speaking, reading and writing - with a particular emphasis on the acquisition of speaking proficiency. Training in spoken Urdu emphasizes speaking and listening at normal speed with near native pronunciation and intonation. Prerequisite: Grade of B- or better in L73 150 First-Year Urdu I or placement by examination.
Credit 5 units. A&S IQ: LCD, LS
Typical periods offered: Spring

HINDI 1070 Advanced Beginning Hindi I
Designed for the student with some background in Hindi. Emphasis on review of grammar, increased fluency, and vocabulary enrichment. Prerequisite: placement by examination or instructor's permission. Student may not take this class pass/fail or audit.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

HINDI 3000 Third Level Hindi I
This course is designed to help students gain advanced proficiency in the oral and written use of Hindi through reading and discussion of short stories, newspaper articles, and other selected materials.. Students will engage in discussions and debates based on these readings as well as current topics, to improve spoken and conversational language skills. Group and project-based learning is encouraged to enhance students' critical thinking in Hindi. PREREQ: Grade of B- or better in L72 202 Intermediate Hindi II or placement by examination.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

HINDI 3001 Third Level Hindi II
A continuation of Third Level Hindi I, this course is designed to further enhance students' advanced proficiency in the oral and written use of Hindi language. Students are exposed to a variety of readings such as short stories and plays by renowned authors, magazine and newspaper articles, other selected readings and visuals. Students will engage in discussions and debates based on these readings to improve spoken and conversational language skills. Group and project based learning is encouraged to enhance students' critical thinking in Hindi. PREREQ: Grade of B- or better in L73 301 Third Level Hindi I or placement by examination.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

HINDI 3010 Third-Level Urdu I
This course is a continuation of Second Year Urdu II. It has been designed to help students gain advanced proficiency in the oral and written use of Urdu through the reading and discussion of stories from Urdu books, newspaper articles, topics in advanced grammar, and other selected materials. Prerequisite: Grade of B- or better in L73 251 or L73 232A, or placement by examination.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Fall

HINDI 3011 Third-Level Urdu II
This course is a continuation of Third-Level Urdu I. It is designed to help students gain advanced proficiency in the oral and written use of Urdu through the reading and discussion of stories from Urdu books and newspaper articles, Topics in advanced grammar and Urdu poetry will also be included. Students will be expected to converse clearly across a wide variety of communicative tasks using diverse language strategies. Prerequisite: Grade of B- or better in L73 305 or placement by examination.
Credit 3 units. A&S IQ: LCD, LS EN: H
Typical periods offered: Spring

HINDI 3040 Sacred Architecture of the Indian Subcontinent
The built structure remains a principal visible record of the evolution of a civilization and its culture. Through this interdisciplinary course on culture, art, design, religion and society, students will be introduced to and gain a deeper insight into the rich diversity of South Asia through the study of the architecture of its significant sacred places. We will take a journey through the Hindu, Jain and Buddhist Temples; the Islamic Mosque; the Sikh Gurudwara; the Zoroastrian Fire Temple; the Jewish Synagogue; and the Christian Church, tracing the evolution of these places of worship from the Indus Valley Civilization to Pre-Colonial times. Through visuals, readings, and discussions, students will learn about the different architectural styles and motifs used in sacred buildings and how they came about. We will explore the inter-relationships between the design elements through the lens of political, social, religious, regional, artistic, and technological influences and understand the ways in which evolving design principles reflect these influences overtime. This course will be of interest to students of languages and cultures, architecture, archeology, art history, history, preservation, religion, and South Asian culture, among others. Please note: At the end of the semester, students will go on a field trip to experience the diverse sacred architecture in the St. Louis region. No prior knowledge of architecture or the history of this region is required.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H
Typical periods offered: Fall

HINDI 3050 Religion and Culture in South and Southeast Asia
Although it is now common to differentiate between South and Southeast Asia, historically these regions have often been conceptualized as part of a single geographical area. Known as the (East) Indies, this area is marked by a rich history of (earlier) Hindu and Buddhist influences, as well as (later) Islamic and Christian influences. The present course will take an in-depth look at the four aforementioned religious traditions, and examine how they have shaped local forms of culture in premodern and modern times. Students will be introduced to host of phenomena in South and Southeast Asian societies, including religious worship, education, law, traditional governance, colonial governance, art, architecture, economic production, kinship, gender, and sexuality. Countries to be studied in the course include India, Pakistan, Sri Lanka, Thailand, Myanmar, Indonesia, Malaysia, the Philippines, and Papua New Guinea.
Credit 3 units. A&S IQ: HUM, LCD, SC BU: ETH, HUM, IS
Typical periods offered: Spring

HINDI 3080 Introduction to South Asian Literature in Translation
An introduction to the primary works, themes, and authors of the Indian subcontinent. We will explore texts in different genres, including mystical and religious poetry, love songs, modern short stories, etc. We will also discuss the historical and social context of these works as well as the critical response to them on the part of readers. The emphasis will be on works originally composed in Hindi or Urdu, although all readings will be in English translation. Authors include Kabir, Surdas, Premchand, Saadat Hasan Manto, and others. No prerequisites.
Credit 3 units. A&S IQ: HUM BU: HUM
Typical periods offered: Spring

HINDI 3090 Understanding Indian (Hindi/Urdu) Literature: Through Text and Images (Visual)
This course focuses on the films and cultural traditions of South Asia in general and of India in particular. Students will be introduced to a variety of contemporary literary genres through visuals. Readings and class discussions will be followed by film screenings from the popular Hindi cinema (known as the Bollywood industry in India) to demonstrate how images and visuals influence modern-day cultural traditions. Students will also get a chance to work on films based on literary texts by well-known writers of the subcontinent. These readings and films focus on various social, cultural, political and historical aspects of Indian society. Students will be encouraged to explore these issues in their written assignments as well as in their class discussions.

Jewish, Islamic, and Middle Eastern Studies

JIMES 1020 First-Year Seminar: The New Arab Gulf: Migrants, Weirdos, and Rebels
The Arab Gulf (also known as the Arabian Peninsula, or the Persian Gulf) is a central yet understudied region of the modern Middle East. The six oil-rich countries (Saudi Arabia, United Arab Emirates, Qatar, Kuwait, Bahrain, and Oman) have been allies of the United States for decades, hosting some of the U.S. largest military bases, and spending billions on US arms sales every year. The Gulf region has also been a main destination for blue-collar workers from the Arab world, South and East Asia, and more recently from Africa. Historically, the region was a central point on the trade routes between the Indian subcontinent, West Asia, Africa, and into Europe. These routes involved spice and tea trades, pearl and gold trade, and what is known as the Indian Ocean slave trade. In addition to its colonial history and economic power, the Gulf region has become a place of cultural production, capital, and infrastructure, representing a shift away from the traditional centres of Arab culture like Egypt, Lebanon, and Iraq. It hosts remote campuses of western universities such as New York University Abu Dhabi, Georgetown Doha, or global branches of western arts institutions like the Louvre and Guggenheim. Moreover, most of the major literary and arts awards, funds, grants, and galleries in the Arabic-speaking world are now located in the Gulf region, established and funded as government initiatives. Parallel to this growing infrastructure, the Gulf region is also a hub of ideas and movements where diverse groups come to critique and contest conceptions of identity, class, gender, and race, against official histories. This course will explore the following set of special topics to help us learn about the region, its politics, cultures, and societies: Petro-capitalism, Race and Ethnicity, Migration, Ecology, Gender and Sexuality, and Pop Culture. We will be studying the region through an interdisciplinary lens that involves fiction, non-fiction, literary criticism, scholarship, and visual arts. Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

JIMES 1022 First Year Seminar: A Century of Egyptian Cinema
This First-Year-Seminar offers a survey of Egyptian Cinema, from silent film to contemporary productions. In addition to regular film screenings, we will be reading articles in film criticism, as well as in history and fiction. This course is designed to enable students to develop their academic and conceptual tools to critically approach national cinemas. Students should utilize and further advance their knowledge of major historical and theoretical themes in cinema studies, cultural studies, and literary studies and apply them to analyze Egyptian Cinema as a case study. Additionally, this course will function as a window to reflect on political, rand critical themes, such as: colonialism and postcolonialism, modernism and postmodernism, class, gender, identity, nationalism, representation among other questions.

Typical periods offered: Fall

JIMES 1110 Jewish History in Antiquity
Credit 3 units.

JIMES 1750 Discovering the Other and the Self: Jewish Travel Literature and Autobiographical Writing, 1200-1800
Travel literature usually describes other places and peoples--otherness and the unfamiliar are its major themes. At the same time, travel writers reflect on notions of the Self and the home. Autobiography is a representation of one's self. However, the self can only be explored in relation to others. Reading early Jewish travel accounts and autobiographies from the MIddle Ages to the 18th century, this class will address questions such as: How did premodern Jews perceive themselves in a world dominated by Christians and Muslims? Where did they locate themselves between East and West? Did Jewish travelers giong from the lands of Christendom to those of Islam share certain Western perceptions of the Islamic world? How did a Jew from Renaissance Italy negotiate between Jewish and Italian identities? Were Egyptian Jews to him distant relatives, or ultimately foreigners, Orientals? How did a German Jewish businesswoman view her role within a rapidly changing, yet male-dominated society? All primary sources will be read in translation. In the course of their study, attention will be paid to peculiarities of literary genre and the problem of how to diffeentiate between fact and fiction.Throughout the semester we will devote time to discussing practical questions such as how to use the library's catalogue and (electronic) reference sources, as well as techniques for structuring and writing students' essays.
Credit 3 units. A&S IQ: HUM, LCD BU: ETH, HUM EN: H

JIMES 1760 First Year Seminar: A Nation Apart? Jewish Identity in an Age of Nationalism
This course invites you to explore the varieties and limits of Jewish identity in a world in which nations appear to be the driving forces of history. In the age of nationalism, begining in the second half of the 18th and continuing to the end of the 20th century, traditional forms of Jewish identity as well as the place of Jews within the social fabric became problematic. Who were the Jews as individuals and as a collective? A nation? A religious group? Neither exactly? And what was their relationship to the emerging, modern nations of Europe to be? Did the process of emancipation resolve the problem? To what extent was antisemitism a response to the dilemma of defining and situating Jews

in the new European order? How has the existence of a Jewish nation state in the Middle East affected Jewish identity in other parts of the world? Finally, how has globalization altered the relationship of Jews to the state as well as toward other Jews?
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

JIMES 1770 First Year Seminar: The Exodus in the Jewish Experience
This course will investigate how the Exodus has been, and continues to be, a crucial source of identity for both Jews and Judaism. We will explore how the Exodus has functioned as the primary model from which Jews have created historical self-understanding and theological meaning. We will investigate how and why this story continues to be vital to Jews throughout the unfolding of the Jewish experience. How does the Exodus remain pertinent? How has the Exodus been re-imagined multiple times throughout the history of Judaism? Why has the Passover celebration been transformed radically in different Jewish communities? We will analyze many types of expression: historical sources, liturgy, art, commentaries, theology, literature, film, mysticism, and music.
Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H

JIMES 1790 First Year Seminar: Midrash: The Imaginative Interpretation of Biblical Texts
FRESHMAN SEMINAR. The aim of this course is to introduce students to Midrash, the highly fascinating literature of Rabbinic Biblical interpretation. Among the topics to be studied are: How did the classical Rabbis read the Bible? What is the relationship between the plain meaning of the Biblical text and the polyphone interpretations of Midrash? How can numerous, at times even contradictory interpretations of the same verse coexist? What is the function of imaginative narratives, parables, and folklore in Midrash? Initially the Midrashic logic may seem elusive from the viewpoint of a modern Western reader, in turn its creative thinking will prove to be smart, playful, at times even slippery, and yet substantial. Addressing the literary, historical, and cultural context in which Rabbinic Midrash developed, we will get to know a variety of Midrashic collections and styles covering a time span from late antiquity to the Middle Ages. All primary sources will be read in translation. Throughout the semester we will devote time to discussing practical questions such as how to use the Library's catalogue and (electronic) reference sources, as well as techniques for structuring and writing students' essays.
Credit 3 units. A&S IQ: HUM BU: ETH, HUM EN: H

JIMES 1800 First-Year Seminar: Jewcy: Jewish Culture in the 21st Century
This course will examine cultural expressions of American Jewish identity within an ethnographic context. We will analyze processes of assimilation, Americanization, and innovation, as well as Jewish contributions to popular American culture and entertainment, from Irving Berlin to Madonna, and the 'The Joys of Yiddish' to 'jewlicious.com.' Moving from tradition to modernity, pluralism and transdenominationalism and back to tradition (sometimes with a vengeance) we explore challenges to Jewish identity and creative responses through the cultural lens. Course is for first-year, non-transfer students only.

Credit 3 units.
Typical periods offered: Fall, Spring

JIMES 2081 Introduction to Jewish Civilization: History and Identity
The anthropologist Clifford Geertz once famously invoked Max Weber in writing that man is an animal suspended in webs of significance he himself has spun. I take culture to be those webs. The main goal of this course-designed as an introduction to Jewish history, culture, and society-will be to investigate the webs of significance produced by Jewish societies and individuals, in a select number of historical periods, both as responses to historical circumstances and as expressions of Jewish identity. Over the course of the semester we will focus on the following historical settings: 7th century BCE Judah and the Babylonian exile; pre-Islamic Palestine and Babylonia (the period of the Mishnah and the Talmud); Europe in the period of the Crusades; Islamic and Christian Spain; Europe in the 18th and 19th centuries; North America in the 20th century; and the modern State of Israel. For each period we will investigate the social and political conditions of Jewish life; identify the major texts that Jews possessed, studied, and produced; determine the non-Jewish influences on their attitudes and aspirations; and the explore the efforts that Jews made to define what it meant to be part of a Jewish collective.

Typical periods offered: Fall, Spring

JIMES 2242 Ampersand: Migration Policies and Colonialism: Refugee Resettlement and Integration
This Course will continue our investigation of the Dynamics of Migration in the MENA and African countries primarily and re-orient the discussions towards a/the much-overlooked cause of migration: Colonialism. To achieve genuine refugee/ Migrant oriented reform policies, the Global North needs to reconcile with its colonial past. Towards this end, we will highlight how the history of Migration is deeply entangled with colonialism. Our readings-based discussions

will focus on analyzing how colonial logics continue to shape the dynamics of migration as well as fuel the growing Xenophobia and Anti-migration rhetoric in the Global North towards intercontinental human mobility. To understand the enduring legacies of colonialism on the contemporary politics of migration, our discussions will argue the premise that colonial histories should be central to migration studies today for there to be real reform in refugee, asylum, and migrant policies. We will explore a wide range of inspiring and challenging perspectives on migration and learn what postcolonial and decolonial scholarships can offer us studying international migration today. We will address these areas through our weekly readings of Migration Studies and Colonialism as a primary source; we will also survey a selection of articles as a secondary source. To supplement the readings, we will watch short documentaries addressing the topic as well as hear from activists, journalists, and specialists in the field. Course is for first-year, non-transfer students only.
Credit 3 units. A&S IQ: LCD, SSC BU: BA EN: S
Typical periods offered: Spring

JIMES 2243 Ampersand: Mediterranean Migration: Dymanics and Consequences on the Eu and Mena
First course in the Ampersand: Safe Asylum program. What are the causes, dynamics and consequences of international population movements? What are the key trends and patterns of migration in the major world region? How does migration trends form both destination and origin societies? What are the effects of migration and increasing ethnic diversity on national identity and politics? How has the Global North elected to manage the forced flow of people from the Global South? We will address these questions among others and survey the critical assessments of the policies whereby the host nations try to manage these flows and discourage mobility. The readings of the first weeks of the Spring semester - based on our main textbook the Age of Migration- will give us a profound understanding of the theories of migration, and empirical research from a variety of disciplines; namely Sociology, Political science, history, anthropology and geography. We will also have an opportunity to hear from some of the leading scholars and Journalists, lawyers specialized in international migration law...We will also watch short documentaries to get a closer sense of cases in the EU and MENA regions. Our End of the Semester project will be exploring success stories of migrants in St. Louis; this could be building on your project in the Fall semester; or we could agree on identifying success stories of refugees/ migrant communities in the state. E.g. the Iraqi, Senegalese, Bosnian communities. Besides the planned travel to Konstanz, Germany to get a closer look at the public-civic interaction in facilitating refugee incorporation, we will discuss our planned visits to Morocco as one of the main key crossing border states linking both sides of the Mediterranean.

Typical periods offered: Fall

JIMES 2403 Representations of the Holocaust in Literature and Film
As the Holocaust recedes into the historical past, our knowledge of the event becomes increasingly dominated by literary and cinematic representations of it. This course focuses on such depictions of the Holocaust in literature and film and raises a number of provocative questions: What does it mean to represent the horror of the Holocaust? Can one effectively depict the event in realistic terms, or do unrealistic representations work better? What happens to the history of the Holocaust when it becomes the subject of a fictional text? Who is authorized to speak for the victims? Are representations of perpetrators appropriate? What types of representations will help us to remember the Holocaust in the twenty-first century? We will grapple with these challenging questions by examining both literary texts by American, European and Israeli authors from a range of genres, including survivor memoirs, fictional narratives, a graphic novel, drama and poetry, and a number of films that depict the Holocaust.
Credit 3 units. A&S IQ: HUM BU: BA, HUM EN: H

JIMES 2630 Democracies & Dictatorships in the Middle East
What makes a country a democracy? A dictatorship? How do we know? In this course, we take a comparative approach toward the regimes of the Middle East and North Africa in order to critically examine the history, politics, religions, demographics, and economies of different case studies. Students will learn to identify key characteristics of contemporary governments of prominent Middle Eastern countries, the extent to which they can be called democratic, and the different degrees and nuances of authoritarianism. With the 2011 Arab Spring and its aftermath in mind, students will also explore academic debates over why regimes do, or do not, respond to popular pressure for change as they continually adapt and upgrade their capacities to remain in power.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

JIMES 2910 Racism and Antiracism
When President Obama was elected, it ignited a debate about whether America had finally become post-racial. This assertion was belied by an entrenched underclass of Blacks and others from immigrant backgrounds; by the regular killing of innocent, young Black men alongside their mass incarceration, along with a whole series of other social indicators; by the dramatic rise in anti-Semitic incidents and Islamophobia globally; and most evidently by the discourse used during the Trump era that weaponized white Christian nationalism. At the end of four years of the Trump presidency defined by racist discourse and policies, it culminated in an insurgent riot on the Capitol designed to block the peaceful transfer of power, the basis of American democracy. This course provides the long view to understanding this recent period in American and global history. We begin by defining key terms in the discussion around racism today, including what we mean by racism and what unites anti-Semitism, anti-Black racism and Islamophobia, but also notions like privilege, cultural appropriation, and microaggressions. We then move on to the long history of the category of race. We start with a unit on race and religion and then move on to the role of the discovery of the New World and the development of the Atlantic slave system, and its impact on the Enlightenment, which was the incubator for the concept of race. From there, we consider how fundamental race was to European and American colonial dominance by the end of the nineteenth-century and the role it played in racial states like Nazi Germany and South Africa. The last portion of the class will focus on struggles to dismantle racism over the the last century, considering the anti-colonial and Civil Rights movement, and the anti-apartheid struggle. Along the way, we will have addressed the overlaps and disconnects between anti-Black, anti-Jewish, and anti-Islamic racism and read a number of key thinkers and activists who can help us in the fight against racism.

JIMES 3013 Biblical Law and the Origins of Western Justice
This course will explore how law developed from the earliest periods of human history and how religious ideas and social institutions shaped law. The course will also illuminate how biblical law was influenced by earlier cultures and how the ancient Israelites reshaped the law they inherited. It will further analyze the impact of biblical law on Western culture and will investigate how the law dealt with those of different social classes and ethnic groups, and we will probe how women were treated by the law.

Typical periods offered: Spring

JIMES 3015 Kings, Priests, Prophets, and Rabbis: The Jews in the Ancient World
We will trace Israelite and Jewish history from its beginnings in the biblical period (circa 1200 BCE) through the rise of rabbinic Judaism and Christianity until the birth of Islam (circa 620 CE). We will explore how Israel emerged as a distinct people and why the rise of the imperial powers tranformed the political, social, and religious institutions of ancient Israel. We will illuminate why the religion of the Bible developed into rabbinic Judaism and Christianity and how rabbinic literature and institutions were created.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: BA, HUM
Typical periods offered: Fall, Spring

JIMES 3023 Introduction to the History and Culture of Ancient Mesopotamia
This course will introduce students to the first great human civilization, Ancient Mesopotamia. Combining textual evidence and material remains we will survey all major facets of Mesopotamian culture: the environment, political history, and everyday life including portraits of several material, social, and economic aspects of society: religion, myth, art, science and medicine. The course will focus on helping the student to understand empathetically the Mesopotamian worldview, to interact with primary materials (in translation), and to evaluate the ideas of historians dedicated to investigating this culture. Since some of the practices of this ancient culture are quite different from our own (e.g. magic, divination, the gods), yet others have made important contributions to world civilization (including the West, e.g. writing and astronomy), the course will also be an important experience in cross-cultural learning.
Credit 3 units. A&S IQ: HUM BU: HUM, IS

JIMES 3026 Topics in Jimes: Race, Class, and Ethnicity in Israel
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

JIMES 3031 Topics in Jimes: Education in Divided Societies - the Israeli Case
Education policies in Israel are designed in the context of a deeply divided society. In this course, we will question the potential for shared core values in a public system that serves a divided society. Israeli compulsory and higher education policies and practices will serve as case studies shaping the public sphere. Together, we will discuss the role of policies in creating, reducing, or enhancing divisions and disparities and question the relevance of the Israeli case to policies around the world. Each student will analyze educational experiences and policies in various national contexts and will have the opportunity to form their own opinion on the role education can play in diverse and divided societies.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Spring

JIMES 3036 Antisemitism: History, Causes, Consequences
Why do people hate other people? Why have religion, race, gender, ethnicity and so on led to sectarian violence with terrifying regularity throughout history? Focused on antisemitism from Biblical times to today, this class will grapple with those questions. Please note: L75 5035 is intended for graduate students only.
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, HUM EN: H
Typical periods offered: Fall

JIMES 3087 From Israelite Religion to Rabbinic Judaism
Though essentially a continuation of Biblical Israel, Rabbinic Judaism diverges from the Israelite religion of biblical times in many respects. In this course, we will explore the nature of the relationship between two religious systems. A large part of the course will be devoted to studying the highly diversified and dynamic spiritual world of Second Temple Judaism. A key question to be addressed will be in what ways does Rabbinic law relate to its roots in biblical law.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

JIMES 3090 Classical Jewish Philosophy
The history of Jewish philosophy, from the ancient world through medieval thinkers such as Maimonides and Halevi, is surveyed in the context of the development of Western philosophy.
Credit 3 units. BU: ETH

JIMES 3102 Contemporary Jewish Thought
A study of the representative figures and problems of modern Jewish thought from Spinoza to the present. Other topics include: the impact of the European Enlightenment; Zionism; Buber; Rosenzweig; Kaplan; and Soloveitchik. Prerequisite: JNE 208F or the equivalent.
Credit 3 units. A&S IQ: HUM Art: HUM BU: ETH, HUM

JIMES 3161 Beauty & Aesthetics in Islam: Islamicate Literature, Material Art, & Architecture
This course provides an introduction to beauty and aesthetics in Muslim societies from across the world. The course focuses on Islamicate literature (e.g., poetry, narrative, biography), material art (e.g., textiles, ceramics, decorated manuscripts), and architecture (e.g., palaces, built gardens, mosques, mausoleums). Some attention is also given to performing arts (e.g., dance, music, plays, puppetry). Various types of material will be considered, ranging from religious to non-religious. Material will be drawn from across the Muslim world, including the Middle East, Sub-Saharan Africa, Central Asia, South Asia, and Southeast Asia. Although the course is primarily concerned with the premodern period, it will also consider the impact of modernity on Muslim literature, art, and architecture.

JIMES 3182 The Jews of North Africa
This course examines the colonial and postcolonial experiences of Jews living in North Africa (mainly Algeria, Morocco, Tunisia, Libya and Egypt) in the context of the region's connections with and relationships to the European powers in the 19th and 20th centuries. We will focus on how the intrusion of foreign powers disrupted and shifted long-standing relationships between Jews and their non-Jewish neighbors, particularly the Muslim populations. We will also explore changes that occurred within the Jewish community as Jews negotiated their place within the new European Imperial system and its subsequent dismantling. Students will have the opportunity to engage with European ideas of regenerating North African Jews living under Ottoman Rule, the changing political and social statuses of Jews

throughout the French and British regions, the changing relationship between Jews and their non-Jewish neighbors, the rupture caused by both World Wars, and how Jews coped with and responded to the dismantling of European empires and the birth of nation-states in the region, including Israel.

JIMES 3184 A Rainbow Thread: A History of Queer Identities in Judaism and Islam
The notion that gender and sexuality minorities are forbidden or simply do not exist within traditional judaism and islamic traditions is an assumption that has been questioned in recent years. For these scholars and activists, it is not up for debate whether someone can be queer and Jewish or queer and Muslim. Therefore, what follows is an exploration of how to resurrect gender non-conforming interpretations of religious texts and rediscover the spectrum of gender and sexual identities that have always existed within Judaism and Islam. The course is divided into three parts. First, we will examine the religious textual traditions of both faiths to establish the space for queer identities in both the Qur'an and Torah as well as the traditions of Hadith and Talmud. Second, we will study key communities such as medieval Iberia, the Ottoman Mediterranean, Hasidic communities in Eastern Europe, Qajar Iran, and the colonial empires of the Middle East. This survey will show the influence European christian dominance had (or did not have) on the evolution of jewish and islamic gender and sexual norms from pre-modern times through the 20th century. Finally, we will examine the 21st century by reading the memoirs of trans muslims and trans Jews in order to analyze the ways in which contemporary queer jewish and islamic individuals frame their experiences and tell their stories of faith with agency, in their own words.

JIMES 3186 The Jewish Experience in the United States: A History of Exceptions and Exceptionalism
This course surveys American Jewish life from the colonial settlement of the new world to the present day with special emphasis on configurations of the Jewish Question in a variety of historical and geographical contexts. We will explore the paradox between American Jewish social and economic success over the last three and a half centuries and the sense of ambivalence many Jews feel toward their place in American society. As a class, we will consider key moments in American Jewish history, including the converso community that arrived alongside early spanish settlers, the role of jews in the slave trade and plantation complex, Jewish appeals for acceptance and equality within the American colonies and early republic, as well as how Jews coped with a divided union during the Civil War. We will analyze successive waves of Jewish immigration from different countries, the building of Jewish communal structures, and the evolution of Judaism and Jewish identity within the United States. Jewish contributions to American culture will also be an important focus of the class as we explore the birth of American popular culture through music, film, television, and fiction. Throughout the course we will be cognizant of the regional, religious, ethnic, racial, class, gender, and sexual differences that comprise American Jewish society from its early inception to the present. We will observe how Jews have been simultaneously welcomed as well as excluded from political, economic, and social realms of the American community. As often as possible we will engage in a multitude of case studies and primary sources so we can gain specific regional expertise, while maintaining a national, and often transnational lens for analyzing these central questions.

JIMES 3231 Jews and Jewishness in Black American Thought
The history of what has been called Black-Jewish relations in the United States has a rich and contested history. The stories told feature solidarity, controversy, and betrayal. This course will look at that history by attending to the role of Jews and Judaism in Black thought. How has Jewishness featured in the self-understanding of Black writers? Have Jews been regarded as allies or adversaries, role models or competitors? What role have Jewish texts or narrative paradigms played in Black religion? What have Black writers made of the Jewish project of national liberation?
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

JIMES 3233 Religion & Nationalism in the Middle East & South Asia
How does religion shape national identity? How and why do some religious traditions become intertwined with the identities of national communities, often at the expense of others? In this course we explore how Islam, Judaism, Hinduism, and Christianity have interacted with modern nationalism to shape the nation-states of the Middle East and South Asia in profound ways. Throughout the course, we examine a range of case studies to compare and contrast, for example, the complex interaction between religion and nationalism in the creation of Pakistan and Israel in 1947 and 1948 as Muslim and Jewish national homes, the rise of the Hindu Right in India, religion and race in Iran, or the significance of Christianity and Islam for Palestinians and Iraqis. As we do so, we investigate how national movements have selectively and creatively engaged religious traditions over time in order to redefine communal boundaries, narrate new histories, exclude minorities, and reread sacred texts to draw the borders of their national homelands, which have often overlapped at great cost.

JIMES 3276 Introduction to Israel Studies
An exploration of Israel in the Jewish experience from antiquity to modernity and in the history and culture of the Middle East. Special attention will be paid to the modern state of Israel and current issues in its politics, economy, and society. L75 5273 is intended for graduate students only.
Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H

JIMES 3301 Modern Islam
What does it mean to be modern? Should a religious tradition adapt in response to modern technological, political, economic, or social change? If so, how? These are just some of the questions that Muslim thinkers and believers have asked themselves since the 18th and 19th centuries, as they have engaged the global transformations commonly known as 'modernity'. Our examination of modern Islam in all its diversity considers a wide range of themes. These can include: new approaches to reading the Qur'an and Scripture; the impact of material goods and modern technologies; women's religious authority; Islamic law in the courtroom and nation-state; democracy, politics, and social activism; traditionalism and environmentalism; as well as the often fraught debates around the emergence of groups such as the Islamic State in Iraq and al-Sham (ISIS). The course's geographical center of gravity is the Middle East, and we also consider other key regions including sub-Saharan Africa and the United States. By the end of the course, students will have gained an understanding of key Muslim responses to the global transformations commonly known as modernity. They will acquire the skills to critically analyze widely used concepts such as 'tradition' to explore in depth both the work of Muslim intellectuals and the everyday experiences of ordinary believers in modern times. Pre-Requisites: Introduction to Islamic Civilization preferred but not required.

Typical periods offered: Spring

JIMES 3302 International Relations of the Middle East
Why did all of Syria's neighbors intervene in the country's decade-long civil war? Why are Arab states like the United Arab Emirates establishing diplomatic relations with Israel, and how is the war in Gaza reshaping the region? Does religion matter for Iran's and Saudi Arabia's foreign policies? If so, how? In this course, we take a comparative approach toward the international relations of the Middle East and North Africa (MENA) to explore these kinds of questions. As we do so, we critically examine the historical emergence of the region's nation-states and international system from the end of World I to the present day. Throughout the course, we consider a wide of range of themes including international law and institutions, political economy, religion and minorities, states' foreign and security policies, the geopolitics of tourism and migrant labor, as well as matters of war and peace. We also interrogate the role of outside powers in the region, such as China, Russia, India, and the US, and consider the history and politics of who gets to decide what American 'interests' in the region really are.

JIMES 3362 The Jews of Arab Lands in Modern Times
An exploration of Jewish social history in the Arab World from East to West: the Orient (Persia and the Levant), the Ottoman Empire (Turkey and the Balkan countries), and North Africa. Discussion of the diaspora as it was and the impact of modernity.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

JIMES 3390 Exile: Jews, Literature and History
From Adam and Eve's banishment through the advent of modern Zionism, exile has been a major theme in Jewish literature and history. We explore exile not only as an issue of geography, but also from the perspectives of politics, religion, and psychology. We examine different experiences and interpretations of exile throughout Jewish history to the present. Contemporary Israeli writers continue the literary tradition of exile by writing the conflict between nation and individual. All readings in English. Prerequisite, one course in history or literature or permission of instructor.
Credit 3 units.

JIMES 3403 Introduction to Yiddish Language and Culture
This course is an introduction to the Yiddish language and Ashkenazic culture. Through the acquisition of basic skills in speaking, listening, reading, and writing you will learn to communicate in Yiddish. By the end of the semester, you should be able to comprehend simple conversations and stories, read and understand short texts, engage in brief conversation on everyday topics, and compose short texts on familiar topics using the grammatical structures and vocabulary you have learned. In addition, you will learn about Ashkenazic culture in Europe and North America and its deep relationship to the Yiddish language. No prior knowledge of the language is expected.
Credit 3 units. A&S IQ: LS
Typical periods offered: Spring

JIMES 3410 Jews and American Popular Culture
History of the Jews in North America from the colonial era to the present. Close reading of primary sources, with an emphasis on the central issues and tensions in American Jewish life; political, social, and economic transformations; and religious trends.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Spring

JIMES 3430 Topics in Islamic Literature
For centuries, Persian lyric poetry depended on motifs such as roses and nightingales, candles and moths-a repetitiveness of poetic imagery that contradicted the variety of social and personal themes. Yet these images and motifs, far from being rigid, acquired in the poetry of masters such as Khayyam, Hafiz, and Rumi, an inherent flexibility for constant redefinition and change. Readings in English translation.
Credit 3 units.
Typical periods offered: Fall

JIMES 3440 Imagining the Holocaust in Contemporary Jewish Literature
Recent public discourse on the Holocaust has displayed an anxiety that, with the gradual dying out of the survivor generation, the Holocaust too will soon pass into oblivion and one day be forgotten. Accompanying this anxiety about the vanishing eyewitness and the crisis of forgetting is often a parallel skepticism about narratives of the Holocaust that are not rooted in the direct experience of the survivor. Despite an injunction against fictional and imaginative representations of the Holocaust by survivors such as Elie Wiesel, however, the last twenty years have seen a wave of imaginative literature about the Holocaust written by non-survivors. This course will examine recent post-Holocaust literature, both fictional and autobiographical, by contemporary Jewish writers from Europe, Israel and the U.S., including works by Art Spiegelman, David Grossman, Aharon Appelfeld, Nathan Englander, Anne Michaels, Nava Semal, Patrick Modiano, Jurek Becker and others. Central to our inquiry into this literature will be the questions of language, narrative structure, referentiality, artistic representation, intergenerational trauma, vicarious memory and post-Holocaust Jewish identity.
Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

JIMES 3460 Islamic Law
This course will present a general overview of Islamic law and an introduction to the study of religious legal authority, which values consensus. It will then explore the formation of the major schools of law. Next, it will debate the notions of ijtihad and taqlid and discuss how open and independent legal decisions have been in the Islamic world. It will also trace the transmission of legal knowledge in religious institutions across time and place by focusing on medieval Muslim societies and by closely examining the education of a modern-day Ayatollah. Note: L75 546 is intended for graduate students only.

JIMES 3490 Yidishkayt: Yiddish Literature in English Translation
This course will trace the emergence, development, flourish, and near-decline of Yiddish literature, beginning with some of the earliest writings to appear in Yiddish in the late middle ages and early modern period, continuing with 19th-century attempts to establish a modern Yiddish literature and the 20th-century emergence of both a classical canon and a literary avant-garde, and ending with post-Holocaust attempts to retain a Yiddish literary culture in the near absence of Yiddish-speaking communities. Focusing on the role of Yiddish as the national language of Ashkenaz, the course will examine the ways in which Yiddish literature has responded to the social conditions of European Jewish life, exploring among others the relationship between Yiddish and the non-Jewish cultures in which it existed, the tensions between secular trends versus religious tradition, life in the shtetl and in the metropolis, immigration from the old world to the new, and Yiddish literary responses to the Holocaust.

JIMES 3510 Muhammad in History and Literature
This course intends to examine the life and representations of the Prophet Muhammad from the perspective of multiple spiritual sensibilities as articulated in various literary genres from medieval to modern periods. The course is divided roughly into two parts. One part deals with the history of Muhammad and the related historiographical questions. The second part deals with the representations of Muhammad in juristic, theological, Sufi, etc. literature. Because of the availability of primary sources in English translation, there will be a healthy dose of primary source reading and analysis throughout the semester. Those students with advanced Arabic (and Persian and Turkish) skills will be encouraged to engage sources in their original language.

Typical periods offered: Spring

JIMES 3520 Fantasy, Horror, Sci-Fi: Genre-Fiction in Arabic Literature
Genre is a category, or to use Aristotle's term, a species. It is a category of literature, arts, music, and other forms of composition, to classify works of shared conventions, practices, and aesthetics. A typical example would be poetry. Subgenre is a single division of a given genre. In this example, epic poetry, the sonnet, haiku are subgenres of poetry. But who gets to decide what is genre, subgenre, and how? These would be some of the main questions we willl address in this course. Genre theory can teach us a fascinating history of how various cultures imagine their forms of creative expression. The development of genres and subgenres reveal complex histories on who has the power to define and redefine creative expression. For example, the novel, now a dominant and prestigious global literary genre, was once considered an inferior and working-class genre in Europe over a century ago. The novel genre then developed into numerous subgenres, which are today placed under one large umbrella that is genre-fiction, such as sci-fi, fantasy, horror, gothic, mystery etc.. However, the borders between these subgenres and the larger genre itself are always contested and reformulated. Through the history of genre and subgenre, we get to learn about literary taste and literary criticism, and whose definitions and conventions have changed the course of literature and the arts, and for what reason. The dominance of the historical novel today, for example, is attributed to larger phenomenon such as decolonization, feminism, and anti-racism. The sociopolitical urge to utilize fiction to address larger issues has not only boosted the impact of the historical novel but elevated it to become a common form of the genre itself. Within this grand history, Arabic literature has a complex and rich story to tell about genre and subgenre. The most obvious example here, which will be our entry point in this course, is 1001 Nights (also known as The Nights, or The Arabian Nights). This multi-volumed masterpiece has influenced fiction writers across the globe, especially in the past three centuries as the novel began to formulate into a modern genre. It is an exceptional work where we see a cosmology of subgenres of storytelling, narrative, but also of poetry, and in some editions, illustration and drawing, as well as translation. The Nights is often seen as the first hybrid work of literature where subgenres and forms co-exist but also blur and converge. This dynamic, revolutionary, and mobile nature of The Nights expresses the meeting of various cultures, experiences, and traditions of storytelling during the Abbasid empire. Today, it remains ever more relevant and inspiring in a cosmopolitan world. The question and history of sub/genre, however, will guide us through an exploration of modern and contemporary Arabic literature. We will get to engage with these texts thematically, stylistically, and intellectually. The aesthetic choices made in literature are never isolated from the intellectual, political, and sociohistorical contexts of a given text. Through the assigned texts and artworks, we will also learn about colonization, gender, imperialism, class, migration, ecology, among other pressing topics. No knowledge of Arabic is necessary; all readings in English translation.

JIMES 3540 Anthropological and Sociological Study of Muslim Societies
This course introduces students to anthropological and sociological scholarship on Muslim societies. Attention will be given to the broad theoretical and methodological issues which orient such scholarship. These issues include the nature of Muslim religious and cultural traditions, the nature of modernization and rationalization in Muslim societies, and the nature of sociopolitical relations between Islam and the West. The course explores the preceding issues through a series of ethnographic and historical case studies, with a special focus on Muslim communities in the Middle East, Southeast Asia, and Europe. Case studies address a range of specific topics, including religious knowledge and authority, capitalism and economic modernization, religion and politics, gender and sexuality, as well as migration and globalization. Please note: L75 554 is intended for graduate students only.

JIMES 3562 Exodus
We will investigate the biblical book of Exodus in both its original significance in the ancient Near East and its later meanings for Jews, Christians, and Muslims in societies around the world. Why did its narratives and ideas about law and justice and religion resonate so strongly both in biblical times and afterwards? Which assumptions did the biblical authors make about writing stories and poetry? What is the historical reality of the Exodus? How did the biblical Israelites conceive of their religious practices and institutions? We will also explore how Exodus and the celebration of Passover has been, and continues to be, a crucial source of identity in Jewish and Christian circles. How

has Exodus been re-imagined and transfigured multiple times, and how has the Passover celebration reflected transformations in the understanding of the Exodus? We will analyze many types of expression influenced by Exodus: historical sources, liturgy, art, commentaries, theology, literature, film, mysticism, and music.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall

JIMES 3590 Travelers, Tricksters, and Storytellers: Jewish Travel Narratives and Autobiographies,
Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman. We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an other, against which and through which they define a particular sense of self? This course is open to students of varying interests, including Jewish, Islamic, or Religious Studies, medieval and early modern history, European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only.

JIMES 3661 The Sephardic Experience: 1492 to the Present
In the public perception, modern Jews divide into two subethnic groups: Ashkenazi and Sephardi, or European and Middle Eastern Jews. However, this is an oversimplification that does not do justice to the diversity and complex history of Jewish identities, which are often multilayered. Strictly speaking, Sephardi Jews trace their ancestral lines or cultural heritage to the medieval Iberian Peninsula, present-day Spain and Portugal. That said, according to some scholars, Sephardi Judaism did not even exist before the general expulsion of Spanish Jewry in 1492 and is the result of their subsequent migrations within the Mediterranean and transatlantic worlds. We will start with an introduction into the history of Spanish Jews prior to 1492, asking to what extent memories of pre-expulsion Iberia are at the heart of Sephardi identity. We will then follow the migratory path of Sephardi exiles to North Africa, Italy, the Ottoman Empire, the Netherlands, and the Americas. The questions we will explore include: in what sense did Sephardim form a transnational community? How did they transmit and transform aspects of Spanish culture in form of Ladino (Judeo-Spanish) language and literature? How did they become intermediaries between Christian Europe and the Ottoman Empire? What was their role in Europe's transatlantic expansion and the slave trade? How did Ottoman and North African Jews respond to European cultural trends in the nineteenth century and create their own forms of modernity? How did the Holocaust impact Sephardi Jews?
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

Typical periods offered: Fall, Spring

JIMES 3740 Of Dishes, Taste, and Class: History of Food in the Middle East
This course will cover the history of food and drink in the Middle East to help us understand our complex relation with food and look at our lives from perspectives we intuitively feel or by implication know, but rarely critically and explicitly reflect on. Food plays a fundamental role in how humans organize themselves in societies, differentiate socially, culturally, and economically, establish values and norms for religious, cultural, and communal practices, and define identities of race, gender, and class. This course does not intend to spoil, so to speak, this undeniably one of the most pleasurable human needs and activities, but rather to make you aware of the social meaning of food and reflect on how food shapes who we are as individuals and societies. We will study the history of food and drink in the Middle East across the centuries until the present time, but be selective in choosing themes, geographic regions, and historical periods to focus on. Please consult the instructor if you have not taken any course in the humanities. Enrollment priority given to seniors and juniors.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, HUM, IS EN: H UColl: CD

JIMES 3750 In the Beginning: Creation Myths of the Biblical World
This course will study myths and epic literature from the Bible, ancient Egypt, the ancient Near East and ancient Greece about the birth of the gods, the creation of the world and of humanity, and the establishment of societies. These masterpieces of ancient literature recount the deeds of gods and heroes and humanity's eternal struggle to come to terms with the world, supernatural powers, love, lust, and death. This course will examine how each culture borrows traditions and recasts them in a distinct idiom. The course will further examine different approaches to mythology and to the study of ancient cultures and the Bible.
Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM BU: HUM EN: H

JIMES 3751 How the World Began: Creation Myths of the Ancient World
We will read myths and epic literature from the Bible, ancient Greece, ancient Egypt, and the ancient Near East about the birth of the gods, the creation of the world and of humanity, and the establishment of societies. These masterpieces of ancient literature recount the deeds of gods and heroes and humanity's eternal struggle to come to terms with the world, supernatural powers, love, lust, and death. This course will examine how each culture borrows traditions and recasts them in a distinct idiom.
Credit 3 units. BU: ETH

JIMES 3770 History of Slavery in the Middle East
This course examines slavery and its abolition in the Middle East and North Africa from 600 C.E. to the 20th Century. It addresses slavery as a discourse and a question of political economy. We begin with an overview of slavery in late antiquity to contextualize the evolution of this practice after the rise of Islam in the region. We then examine how it was practiced, imagined, and studied under major empires, such as the Umayyads, the Abbasids, the Fatimids, the Mamluks, the Ottomans, and the Safavids. In addition to examining the Qur'anic discourse and early Islamic practices of slavery, to monitor change over time we address various forms of household, field, and military slavery as well as the remarkable phenomenon of slave dynasties following a chronological order. We discuss, through primary sources, theoretical, religious, and moral debates and positions on slavery, including religious scriptures, prophetic traditions, religious law, and a plethora of narratives from a range of genres. We highlight a distinct theme each week to focus on until we conclude our discussion with the abolition of slavery in the 19th and 20th centuries. Topics of discussion include various forms of male and female slavery, Qur'anic and prophetic discourse on slavery, legal and moral views on slavery, slavery as represented in religious literature, political, military, and economic structures of slavery, issues of race and gender as well as slave writings to reflect on the experiences of slavery from within. The goal is to enable students to understand the histories of slavery in the Middle East and eventually compare it to that of other regions and cultures, such as European and Atlantic slavery. No second language required.
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, HUM, IS EN: H

JIMES 3780 Hasidism
A study of the history, literature, thought, and spirituality of Hasidism from its beginnings in the 18th century to the present. The relationship between Hasidism and other movements (Talmudism, Haskalah, Zionism) in modern Jewish history are explored. Guest lecturers from the Program in Jewish and Near Eastern Studies will share in the instruction. Prerequisites: sophomore standing and 3 units in Jewish studies, or permission of instructor.
Credit 3 units.

JIMES 3783 Before The Clinic Was Born: Medicine Among European Jews From the Middle Ages to Modern Period
This course offers a survey of European medical history in general and of the Jewish medical world in particular, from the middle ages to the threshold of modernity.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

JIMES 3820 The History and Politics of Middle East Studies: Producing Expert Knowledge
How do we know Muslim women need gender equality? How do we know minorities in the Middle East suffer from religious persecution, and that religious freedom is the solution? How do we know promoting human rights is a universal good? How do we know development aid improves the lives of Palestinian or Syrian refugees? Why do we need so many US military bases in the Arab Gulf? In this class, we consider the history and politics behind the answers to these kinds of questions. To do so, we examine the field of Middle East Studies in the United States, historically and today, and its role in the production of expert knowledge about the region. After learning foundational theories around knowledge production, we consider the history of US foreign policy and analyze how certain theories of the Middle East became common sense notions at the expense of other possibilities. We then investigate the history and politics of universal concepts and their promotion in the region such as human rights, gender equality, and religious freedom.

JIMES 4002 Capstone Seminar
The capstone course for Jewish, Islamic, & Near Eastern Studies majors, Arabic majors, and Hebrew majors. The course content is subject to change.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

JIMES 4005 Diaspora in Jewish and Islamic Experience
Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term diaspora -- from the ancient Greek, meaning dispersion or scattering -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and they continued to be central

motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home in both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

JIMES 4022 Comparative Expulsions of Jews: England, France, Spain, Portugal, and Milan
This course provides an in-depth exploration of the expulsions of Jews from England, France, Spain, Portugal, and Milan during the medieval and early modern periods. Studying expulsions forces us to confront the thorny question of religious toleration and introduces students to some of the significant issues that historians of Medieval and Early Modern Jewish history work on. We will first examine the social, religious, political, and economic bases of the Jews' stay. Then, we will try to understand why, at some point, their presence became intolerable. The course emphasizes comparative analysis, allowing students to identify patterns and divergences across different regions and explore the broader implications for Jewish communities and European societies.
Credit 3 units.

JIMES 4023 Jewish Christian Relations: A Multimedia History
When Mel Gibson's movie The Passion of the Christ was released in 2004, it provoked a tremendous amount of public debate and divided Christians (Catholics and Protestants of all sorts) and Jews (Orthodox, Conservative, Liberal and Reform) in every possible combination. Although the virulence of the discussions may have given us the impression that this was a new issue, in reality the question of the Jews' role and involvement in Jesus' death has been disputed for almost two thousand years. The claim that the Jews are responsible for Christ's death is the subject of this class and we will study its history from the gospels to today using textual sources (historical, religious and literary works) and the visual arts (paintings and movies). But this class is not about who did or did not kill Jesus, nor is it about judging people's positions on the issue. Rather it is about the power of a story to travel through time and space, to being told and retold in different versions and with different purposes, and to affect the real lives of men and women.

JIMES 4043 Race and Ethnicity in the Middle East and North Africa
This seminar explores formations, articulations, and legacies of race in the Middle East and North Africa. The main purpose is to acquaint students with different theories and methodological approaches to studies of race and racialization in the region. Given the large scope of the topic, the course will mainly focus on Egypt and Sudan, as well as the Arabian Peninsula and Persian Gulf. In dialogue with a transnational body of scholarship, political theory, as well as artistic and literary production, we will read about the following set of topics: slavery and abolition; race and racialization; empire and colonialism; third world-ism and nationalism; revolution and solidarity; ethnicity and nationality; migration and minorities. By studying how peoples of the region have debated issues of race and racialization, from the Abbasid era to the contemporary moment, we come to realize the legibility and urgency of race as an analytics in Middle East studies. In considering pre-modern and modern articulations of race across the region, we begin to understand how race has functioned as a technology of power and hierarchization, and its intersectional role in forming categories of ethnicity, nationality, or even gender and sexuality. This section is intended for undergraduate students only. Graduate students should enroll in L75 5043.

JIMES 4062 Conflict or Convivencia? Muslims, Jews, and Christians in Medieval Spain
This seminar will explore various facets of the coexistence (convivencia) of Muslims, Jews, and Christians in medieval Spain. Its horizon stretches from the Muslim conquest of Iberia (al-Andalus) up to the turn of the 16th century when Spanish Jews and Muslims were equally faced with the choice between exile and conversion to Christianity. Until about 1100, Muslims dominated most of the Iberian Peninsula; from then onward, Christians ruled much and eventually all of what would become modern Spain and Portugal. Through a process known as reconquista (reconquest), Catholic kingdoms acquired large Muslim enclaves. As borders moved, Jewish communities found themselves under varying Muslim or Christian dominion. Interactions between the three religious communities occurred throughout, some characterized by shared creativity and mutual respect, others by rivalry and strife. The course focuses on these cultural encounters, placing them in various historical contexts. It will explore the ambiguities of religious conversion, and the interplay of persecution and toleration. Last not least, the course will address the question of how the memory of medieval Spain's diversity reverberates-and is utilized-in modern popular and academic discourse. All sources will be read in English translation; however, students are encouraged to make use of their linguistic and cultural expertise acquired in previous classes. This course serves as the capstone seminar for Jewish, Islamic & Near Eastern Studies majors, Arabic majors, and Hebrew majors. Graduate students, minors, and other interested undergrads are likewise welcome.

JIMES 4071 Judaism and Islam in Comparative Perspective
The historical trajectories of Rabbinic Judaism and Islam are intimately intertwined. Moreover, a strong argument can be made that Rabbinic Judaism and Islam bear some obvious affinities with one another. Nevertheless, the two traditions generally continue to be studied in isolation from one another. The goals of this seminar are (1) to foster better understanding of areas of historical contact and intersections between Jewish and Islamic civilizations and (2) to start the work of developing a common framework for the comparative study of the two traditions. We will examine examples of sustained and meaningful contact such as Muslim-Jewish symbiosis in early Islam as well as interaction on the level of philosophical and theological discourses between medieval Jews and Muslims. We will also attempt to identify instances of affinity between the two traditions through comparative study of their exegetical, messianic, legal, and mystical dimensions. Seniors in Jewish, Islamic and Near Eastern Studies will be given preference in admission. This i sthe capstone course in JINESAdvanced students from other departments and programs should contact the instructor prior to enrollment.

JIMES 4101 The Ottoman Empire: 1300-1800
Credit 3 units.

JIMES 4150 Topics in Judaism
Consult Course Listings for current topics. Prerequisite: permission of instructor.
Credit 3 units.

JIMES 4220 Topics in Jewish Studies: Special Seminar in Rabbinic Culture and Thought
This course will analyze a variety of topics in rabbinic culture and thought.
Credit 1 unit. Art: HUM

JIMES 4270 Jewish Philosophical Classics
Philosophical thinkers writing out of the Jewish culture, including Philo, Halevi, and Maimonides, are studied in their respective philosophical, religious, and historical contexts. Prerequisite: 3 units in philosophy or Jewish thought, or permission of instructor.
Credit 3 units.

JIMES 4420 Empire and Memory: Approaches to Islamic Historiography (ca. 800-1250)
The subject of this course is an in-depth study of medieval Arabic historiography from the 8th through the 13th centuries, when the Mongols run over the remnants of the Abbasid caliphate, established their own rule over Eurasia, and thereby sparked new questions about the past. After the initial survey of medieval Islamic history as background, we will focus on the development of historiographical writing in its socio-political context and examine one by one the most major historiographical traditions and philosophies from the 8th through the 13th centuries: prophetic traditions, belles-lettres, annals, biographical dictionaries, and genealogical literature.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

JIMES 4450 Topics in Islam
This course aims to study political thought and practice in Islamic history through a close reading of a selection of primary sources in translation (and in their original language, if language proficiency is satisfactory). Particular attention will be given to the historical contexts in which thoughts are espoused and texts written. We plan to examine the development of political concepts and themes as articulated in diverse literary genres (e.g., legal, theological, political) from the eighth through the 13th centuries. We hope to engage various theoretical models to analyze the relationship between politics and religion and to tease out the role of power in determining sociopolitical relations, distinctions, and structures. We hope to have a better grasp on the historicity of ideas presented in timeless categories in political discourse. Advanced knowledge of Arabic preferred but not required.
Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H
Typical periods offered: Fall, Spring

JIMES 4461 History of Political Thought in the Middle East
This course aims to study political thought and practice in Islamic history through a close reading of a selection of primary sources in translation (and in their original language, if language proficiency is satisfactory). JIMES 4852 Topics in American Jewish Studies
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

JIMES 4870 Topics in Jewish and Near Eastern Studies: Readings in Midrash
The aim of this course is to learn to read Midrash, the literature of classical Rabbinic Bibilical interpretation. Addressing the literary, historical, and cultural context in which rabbinic Midrash developed, we will get to know a variety of Midrashic collections covering a time span from late antiquity to the Islamic Middle Ages. These works were composed according to a complex set of exegetical and literary rules to be illustrated by the selected readings. Certain Midrashic genres reflect their origins in academic discourses, while others were delivered as public sermons, drawing on parables, legends, and folk lore. Among the topics to be studied are: How did the Rabbis read the Bible? What is the relationship between the plain meaning of the Biblical text and the polyphone interpretations of Midrash? Is Midrash a commentary or a literary discourse in its own right? Initially the Midrashic logic may seem elusive from the viewpoint of a modern Western reader, in turn its creative thinking will prove to be smart, playful, at times even slippery, and yet substantial. ALL TEXTS WILL BE READ IN TRANSLATION.
Credit 3 units. A&S IQ: HUM BU: HUM

JIMES 4902 Topics in Islamic Thought: Proseminar in Methods and Approaches in Islamic Studies
This seminar is an introduction to the methods, research tools, and theoretical assumptions that Islamicists have used to study diverse aspects of Islamic societies and civilizations, past and present. Critical reading and discussion of scholarly works will be paired with bibliographical research assignments. PERMISSION OF THE INSTRUCTOR.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

JIMES 4961 Seminar in Jewish Religion
Special subjects out of the entire range of Jewish religion systematically and analytically explored.
Credit 3 units.

JIMES 4988 Empire and Messianism in the Middle East
Senior Seminar: This course looks at imperial politics in its relations to monotheistic messianic movements and ideologies in the Islamic Mediterranean from the late antiquity to the sixteenth century. Messianic beliefs offered political hope, rallied opposition against the existing rule, defined and ordered lived reality for imperial subjects, presented a political leitmotiv for rulers, and advocated a just socio-political order to be realized in the immediate or indefinite future. Thus, this course attempts to see how politics became messianic by its very ability to promise a better future. Despite the chronological scope of the course, we will examine only specific ideas, practices, and movements as case studies to study in depth various facets of messianic movements and thought in their geographic and historical context. We will use primary sources, which will be the main methodological focus of the course, and secondary literature. We aim to develop skills in identifying, reading, analyzing, and dealing with primary sources in their variety and critically engaging modern scholarship on the political role of messianism. Students will write a term paper and several reports on preassigned readings, and make regular class presentations. Admission preference will be given to graduating seniors in JINELC, but the course is open to all advanced students provided that they consult the instructor prior to enrolling. Knowledge of a relevant primary source language is highly desired but not required.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

JIMES 4990 Study for Honors in Jewish, Islamic, and Near Eastern Studies

Arabic Major

Program Requirements

- **Total Units Required:** 24 advanced, in addition to prerequisites
- **Grade Requirement:** Students must maintain a B average in all courses for the major; Grades of B- or higher must be earned in each language course in order to advance to the next level; Pass/No Pass grades do not count toward the prerequisites or the major.

Prerequisites

- 1000- and 2000-level Arabic, by coursework or by placement exam. (A student who skips the first four semesters of Arabic courses by placement exam must successfully complete ARAB 3010 Third-Level Arabic I. Students who complete the third-level language course with a grade of B- or better will receive 6 units of back credit.)
- JIMES 2081 Introduction to Jewish Civilization: History and Identity and JIMES 2100 Introduction to Islamic Civilization. (Students with substantial prior coursework may substitute an additional upper-level course with permission of their advisor and the Director of Undergraduate Studies.)

Requirements

- 12 credits in 3000- and 4000-level language courses

Code	Title	Units
ARAB 3010	Third-Level Arabic I	3
ARAB 3011	Third-Level Arabic II	3
ARAB 4051	Fourth-Level Arabic I	3
ARAB 4061	Fourth-Level Arabic II	3

- 6 credits distributed as the student wishes, in other 3000- and 4000-level JIMES courses such as, but not limited to, the following (please confirm applicability of a course with your advisor):

Code	Title	Units
JIMES 3510	Muhammad: His Life and Legacy	3
JIMES 3520	Fantasy, Horror, Sci-Fi: Genre-Fiction in Arabic Literature	3
JIMES 3740	Of Dishes, Taste, and Class; History of Food in the Middle East	3
JIMES 3770	History of Slavery in the Middle East	3
JIMES 4043	Race and Ethnicity in the Middle East and North Africa	3
ARAB 4130	Topics in Modern Arabic Literature in Translation	3

- At least 3 credits in 3000- and 4000-level courses in a JIMES culture other than that of the selected language tradition such as, but not limited to, the following (please confirm applicability of a course with your advisor):

Code	Title	Units
JIMES 3036	Antisemitism: History, Causes, and Consequences	3
JIMES 3232	Religion and Nationalism in the Middle East & South Asia	3
JIMES 3410	Jews and American Popular Culture	3
JIMES 3562	Exodus	3
JIMES 3661	The Sephardic Experience: 1492 to the Present	3
JIMES 3750	In the Beginning: Creation Myths of the Biblical World	3

- 3 credits in a departmental capstone course to be taken during the senior year (Students may take this course during their junior year with permission of their advisor and the Director of Undergraduate Studies.) Capstone courses include, but are not limited to, the following (please check the course listings in a given semester to see which Capstone is being offered or consult with your advisor):

Code	Title	Units
JIMES 4002	Capstone Seminar	3
JIMES 4009	Beyond Geography: The Meaning of Place in the Near East	3
JIMES 4062	Conflict or Convivencia? Muslims, Jews, and Christians in Medieval Spain	3

Additional Information

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester can earn a maximum of 9 credits subject to review by their advisor and the director of undergraduate studies. Summer programs and transfer courses can be granted as many as 6 credits subject to review by the student's advisor and the director of undergraduate studies. A limit of 9 credits in total can be applied to the major whether the credits are earned via study abroad, summer programs, or transfer credit. For more information about preapproved study abroad programs, please visit the Jewish, Islamic, and Middle Eastern Studies Study Abroad Programs website.

Students must maintain a B average in all courses for the major. A grade of B- or higher must be earned in each language course in order to advance to the next level.

No course taken Pass/No Pass can count toward the prerequisites or the major.

A student may request credit for courses taken outside of the department by seeking the permission of the director of undergraduate studies and the department chair.

To be eligible to write a senior thesis, a student must maintain a grade point average of 3.65 through the sixth semester. Senior thesis writers should sign up for an appropriate 3-credit course during both the fall and spring semesters. (The 6 credits from these courses may be applied to the primary area of study.)

JIMES 4023	Jewish Christian Relations: A Multimedia History	3
JIMES 4043	Race and Ethnicity in the Middle East and North Africa	3

- 3 to 6 credits in 3000- and 4000-level courses that are pertinent to the modern Middle East and that may be based outside of the department (e.g., based in Anthropology, History, Global Studies, Political Science, Religious Studies), including (but not limited to) the following (students should confirm the applicability of a course with their advisor):

Code	Title	Units
JIMES 3232	Religion and Nationalism in the Middle East & South Asia	3
JIMES 3301	Modern Islam	3
JIMES 3302	International Relation of the Middle East	3
JIMES 3520	Fantasy, Horror, Sci-Fi: Genre-Fiction in Arabic Literature	3
JIMES 4025	Muslims in the Media and Popular Culture	3

- At least 3 credits in 3000- and 4000-level pre-modern Middle Eastern studies courses, such as (but not limited to) the following (students should confirm the applicability of a course with their advisor):

Code	Title	Units
JIMES 3087	From Israelite Religion to Rabbinic Judaism	3
JIMES 3510	Muhammad: His Life and Legacy	3
JIMES 3562	Exodus	3
JIMES 3750	In the Beginning: Creation Myths of the Biblical World	3
JIMES 3770	History of Slavery in the Middle East	3

- 3 credits in a departmental capstone course to be taken during the senior year. (Students may take this course during their junior year with permission of their advisor and the Director of Undergraduate Studies.) Capstone courses include (but are not limited to) the following (students should check the course listings in a given semester to see which Capstone is being offered or consult with their advisor):

Code	Title	Units
JIMES 4002	Capstone Seminar	3
JIMES 4009	Beyond Geography: The Meaning of Place in the Near East	3
JIMES 4062	Conflict or Convivencia? Muslims, Jews, and Christians in Medieval Spain	3

Additional Information

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester can earn a maximum of 9 credits subject to review by their advisor and the director of undergraduate studies. Summer programs and transfer courses can be granted as many as 6 credits subject to review by the student's advisor and the director of undergraduate studies. A limit of 9 credits in total can be applied to the major whether the credits are earned via study abroad, summer programs, or transfer credit. For more information about preapproved study abroad programs, please visit the Jewish, Islamic, and Middle Eastern Studies Study Abroad Programs website.

Students must maintain a B average in all courses for the major. A grade of B- or higher must be earned in each language course in order to advance to the next level.

No course taken Pass/No Pass can count toward the prerequisites or the major.

A student may request credit for courses taken outside of the department by seeking the permission of the director of undergraduate studies and the department chair.

To be eligible to write a senior thesis, a student must maintain a grade point average of 3.65 through the sixth semester. Senior thesis writers should sign up for an appropriate 3-credit course during both the fall and spring semesters. (The 6 credits from these courses may be applied to the primary area of study.)

Arabic Minor

Program Requirements

- **Total Units Required:** 18, in addition to prerequisites
- **Grade Requirement:** Grades of B- or higher must be earned in each language course in order to advance to the next level. No course taken Pass/No Pass can count toward the minor.

The minor in Arabic requires a minimum of 9 units at the 3000 level or above and a minimum of 18 total units. The goal of the minor is language proficiency at the 2000 level or above. Students placing into ARAB 2011 Intermediate Arabic II or above must complete two consecutive semesters of Arabic language instruction at Washington University to fulfill the language requirement.

Required Courses

Language Prerequisites

- ARAB 1000 Beginning Arabic I and ARAB 1001 Beginning Arabic II, by coursework or by placement exam

Language Requirements

- ARAB 2010 Intermediate Arabic I and ARAB 2011 Intermediate Arabic II, by coursework *or*
- If placed into ARAB 2011 Intermediate Arabic II or above, two consecutive semesters of language instruction at Washington University

Required Foundational Course

Choose one of the following courses:

- JIMES 2081 Introduction to Jewish Civilization: History and Identity
- JIMES 2100 Introduction to Islamic Civilization

Elective Courses

- 9 credits, distributed as the student wishes, of 3000- or 4000-level Arabic or JIMES courses, such as (but not limited to) the following:

Code	Title	Units
ARAB 3010	Third-Level Arabic I	3
ARAB 3011	Third-Level Arabic II	3
ARAB 4051	Fourth-Level Arabic I	3
ARAB 4061	Fourth-Level Arabic II	3
ARAB 4130	Topics in Modern Arabic Literature in Translation	3
JIMES 3184	A Rainbow Thread: A History of Queer Identities in Judaism and Islam	3
JIMES 3301	Modern Islam	3
JIMES 3510	Muhammad: His Life and Legacy	3
JIMES 3520	Fantasy, Horror, Sci-Fi: Genre-Fiction in Arabic Literature	3
JIMES 3770	History of Slavery in the Middle East	3
JIMES 3820	Imagining the East: The History & Politics of Middle East Studies	3
JIMES 4043	Race and Ethnicity in the Middle East and North Africa	3

Additional Information

Study Abroad

Students enrolled in pre-approved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their advisor and the Director of Undergraduate Studies.

Back Credit

Any earned back credit does not count toward the total number of units for the Language Requirement. All students are required to take at least one year of language instruction at Washington University.

Hebrew Minor

Program Requirements

- **Total Units Required:** 18 units, in addition to prerequisites
- **Grade Requirement:** A grade of B- or higher must be earned in each language course in order to advance to the next level. No course taken Pass/No Pass can count toward the minor.

The minor in Hebrew requires a minimum of 9 units at the 3000 level or above and a minimum of 18 total units. The goal of the minor is language proficiency at the 2000 level or above. Students placing into HBRW 2013 Second-Year Modern Hebrew II or above must complete two consecutive semesters of language instruction at Washington University to fulfill the language requirement.

Required Courses

Language Prerequisites

- HBRW 1001 First-Year Modern Hebrew I and HBRW 1002 First-Year Modern Hebrew II, by coursework or by placement

Language Requirements

- HBRW 2010 Second-Year Modern Hebrew I and HBRW 2013 Second-Year Modern Hebrew II, by coursework *or*
- If placed into HBRW 2013 Second-Year Modern Hebrew II or above, two consecutive semesters of Hebrew language instruction at Washington University

Required Foundational Course

Choose one of the following courses:

- JIMES 2081 Introduction to Jewish Civilization: History and Identity
- JIMES 2100 Introduction to Islamic Civilization

Elective Courses

- 9 credits, distributed as the student wishes, of 3000- or 4000-level Hebrew or JIMES courses such as (but not limited to) the following:

Code	Title	Units
HBRW 3040	Third-Level Modern Hebrew I	3
HBRW 3041	Third-Level Modern Hebrew II	3
HBRW 3140	Introduction to Biblical Hebrew	3
HBRW 4020	Fourth-Level Modern Hebrew I	3
HBRW 4030	Fourth-Level Modern Hebrew II	3
JIMES 3036	Antisemetism: History, Causes, and Consequences	3
JIMES 3231	Jews and Jewishness in Black American Thought	3
JIMES 3183	The Jews of North Africa	3
JIMES 3184	A Rainbow Thread: A History of Queer Identities in Judaism and Islam	3
JIMES 3410	Jews and American Popular Culture	3
JIMES 3661	The Sephardic Experience: 1492 to the Present	3
JIMES 3750	In the Beginning: Creation Myths of the Biblical World	3
JIMES 3870	Topics in Jewish Studies	3
JIMES 4023	Jewish Christian Relations: A Multimedia History	3

Additional Information

Pass/No Pass

No course taken Pass/No Pass can count toward the minor.

Grades

A grade of B- or higher must be earned in each language course in order to advance to the next level.

Study Abroad

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their advisor and the Director of Undergraduate Studies.

Back Credit

Any earned back credit does not count toward the total number of units for the Language Requirement. All students are required to take at least one year of language instruction at Washington University.

Jewish, Islamic, and Middle Eastern Studies Minor, Comparative Jewish and Islamic Studies Concentration

Program Requirements

- **Total Units Required:** 18
- **Grade Requirement:** Grades of B- or higher must be earned in each language course in order to advance to the next level. No course taken Pass/No Pass can count toward the minor.

The minor in Jewish, Islamic, and Middle Eastern studies requires a minimum of 12 units at the 3000 level or above and a minimum of 18 total units. Students who wish to minor in Jewish, Islamic, and Middle Eastern studies will select one of two concentrations: the **Comparative Jewish and Islamic Studies Concentration** or the **Middle Eastern Studies Concentration.**

Required Course for the Comparative Jewish and Islamic Studies Concentration

Choose one of the following courses:

- JIMES 2081 Introduction to Jewish Civilization: History and Identity
- JIMES 2100 Introduction to Islamic Civilization

Elective Courses

- 6 credits in 3000- or 4000-level Islamic studies or Arabic language and literature courses (Arabic or JIMES) such as (but not limited to) the following:

Code	Title	Units
JIMES 3510	Muhammad: His Life and Legacy	3
JIMES 3520	Fantasy, Horror, Sci-Fi: Genre-Fiction in Arabic Literature	3
JIMES 3730	Topics in Near Eastern Cultures	3
JIMES 3770	History of Slavery in the Middle East	3
JIMES 3820	Imagining the East: The History & Politics of Middle East Studies	3
JIMES 4043	Race and Ethnicity in the Middle East and North Africa	3
ARAB 3010	Third-Level Arabic I	3
ARAB 3011	Third-Level Arabic II	3
ARAB 4051	Fourth-Level Arabic I	3
ARAB 4061	Fourth-Level Arabic II	3
ARAB 4130	Topics in Modern Arabic Literature in Translation	3

- 6 credits in 3000- or 4000-level Jewish studies or Hebrew language and literature courses (Hebrew or JIMES) such as (but not limited to) the following:

Code	Title	Units
JIMES 3036	Antisemitism: History, Causes, and Consequences	3
JIMES 3184	A Rainbow Thread: A History of Queer Identities in Judaism and Islam	3
JIMES 3410	Jews and American Popular Culture	3
JIMES 3562	Exodus	3
JIMES 3661	The Sephardic Experience: 1492 to the Present	3
JIMES 3750	In the Beginning: Creation Myths of the Biblical World	3
JIMES 3870	Topics in Jewish Studies	3
JIMES 4023	Jewish Christian Relations: A Multimedia History	3
HBRW 3040	Third-Level Modern Hebrew I	3

HBRW 3041	Third-Level Modern Hebrew II	3
HBRW 3140	Introduction to Biblical Hebrew	3
HBRW 4020	Fourth-Level Modern Hebrew I	3
HBRW 4030	Fourth-Level Modern Hebrew II	3

- 3 credits of JIMES courses at any level (which does not include language courses), including those courses listed above.

Additional Information

Study Abroad

South Asian Studies (Hindi) Minor

Program Requirements

- **Total Units Required:** 18 units, in addition to prerequisites
- **Grade Requirement:** A grade of B- or higher must be earned in each language course in order to advance to the next level. No course taken Pass/No Pass can count toward the minor.

The minor in South Asian Studies requires a minimum of 9 units at the 3000 level or above and a minimum of 18 total units. The goal of the minor is language proficiency at the 2000 level or above in either the Hindi or Urdu language. Students placing into HINDI 2018 Intermediate Hindi II, HINDI 2051 Intermediate Urdu II, or above must complete two consecutive semesters of either Hindi or Urdu language instruction at Washington University to fulfill the language requirement.

Required Courses

Language Prerequisites

- Hindi Language: HINDI 1030 Beginning Hindi I and HINDI 1031 Beginning Hindi II, by coursework or by placement *or*
- Urdu Language: HINDI 1050 Beginning Urdu I and HINDI 1032 Beginning Urdu II, by coursework or by placement

Language Requirements

Students should choose one primary language for the minor and fulfill the associated language requirement.

- **Hindi Language:**
  - HINDI 2020 Intermediate Hindi I and HINDI 2018 Intermediate Hindi II, by coursework *or*
  - HINDI 2030 Hindi for Heritage Speakers and one additional semester of Hindi language instruction *or*
  - If placed into HINDI 2018 Intermediate Hindi II or above, two consecutive semesters of Hindi language instruction at Washington University
- **Urdu Language:**
  - HINDI 2050 Intermediate Urdu I and HINDI 2051 Intermediate Urdu II, by coursework *or*
  - If placed into HINDI 2051 Intermediate Urdu II or above, two consecutive semesters of Urdu language instruction at Washington University

Required Foundational Course

Choose one of the following courses:

- JIMES 2100 Introduction to Islamic Civilization
- HINDI 3050 Religion and Culture in South and Southeast Asia

Elective Courses

9 credits, distributed as the student wishes, of 3000- or 4000-level Hindi or JIMES courses such as (but not limited to) those in the list below. Students should check with their advisors regarding the applicability of courses that interest them.

Code	Title	Units
HINDI 3000	Third Level Hindi I	3
HINDI 3001	Third Level Hindi II	3
HINDI 3010	Third Level Urdu I	3
HINDI 3011	Third Level Urdu II	3
HINDI 3040	Sacred Architecture of the Indian Subcontinent	3
HINDI 3090	Understanding Indian Literature Through Visual Media	3
JIMES 3233	Religion & Nationalism in the Middle East & South Asia	3
JIMES 3301	Modern Islam	3
JIMES 3161	Beauty & Aesthetics in Islam: Islamicate Literature, Material Art, & Architecture	3
JIMES 3510	Muhammad: His Life and Legacy	3
JIMES 3661	The Sephardic Experience: 1492 to the Present	3

Latin American Studies

Latin American Studies (LAS) is a gateway to the region and its cultures, politics, and history. The major in LAS can be studied on its own, providing knowledge about a region valuable for employers across different fields and industries. Focusing on Latin America allows students to engage with one of the most fascinating historical trajectories in the world; to explore diverse cultures where the traditional and the modern are always negotiating; and to participate in vibrant business, intellectual, and political scenes. Latin America is a region at the forefront of policy reform, embedded in the complex networks of global economics, development, social engagement, and cultural expression. Because of the region's importance, the LAS major provides key skills for today's jobs.

A major or minor in LAS is also an excellent complement to any other major program. Latin America is the location of major U.S. trade partners, and Latin American immigrants constitute the largest segment of market growth in the United States, including in the major economic markets of Boston, California, New York, Chicago, Texas, and Florida, which makes the LAS major a great companion to a business degree. In this world, business majors and MBA graduates with an LAS background have a competitive advantage in the world market as large corporations seek executives with a better understanding of the region's complex social, cultural, and economic issues.

Pre-medical students and public health majors will find value in the fact that the growing Latino population and the diverse Latin American peoples are two major topics in the health care field. Majors in global studies, political science, economics, and other social sciences can complete their studies by becoming experts in one of the most economically and politically complex regions in the world; Latin America is a true policy laboratory. Scientists of all disciplines work in the region's spectacular biodiversity. LAS students can attend study abroad programs across the region, earn credit, and explore any field of study.

Latin America offers an increasing number of study abroad and fellowship opportunities. At Washington University, we have in-house programs in Chile, Mexico, and Ecuador, with other countries forthcoming. Some of our students apply to other programs and fellowships with environmental, political, and social organizations in the region. NGOs and institutions such as Fullbright, Comexus, the Ford Foundation, Human Rights Watch, and Greenpeace have a strong presence in Latin America, and students with a Latin American background have a wide array of fellowship and internship opportunities available to them.

Given these reasons and more, Washington University students are more encouraged to look into LAS with each passing day. In the job market, in the academic field, and in the world at large, Latin America is the way to go! LAS alumni have gone on to work in the coffee industry, at the Center for International Policy, and at other nonprofit think tanks. They have also pursued graduate degrees in such fields as international relations and public policy.

Majors

- Latin American Studies Major (p. 685)

Minors

- Latin American Studies Minor (p. 686)

Courses

LATAM 1000 Latin America: Nation, Ethnicity and Social Conflict
This class is an interdisciplinary introduction to the academic study of modern and contemporary Latin America. The course focuses on main issues in Latin American politics, history and culture, both in the continent at large and in the specific regions and sub-regions within it. The class will particularly explore topics such as nation creation, national identity, modes of citizenry, the role of race, ethnicity, gender and class in the region's historical development, as well as social and political conflicts, which have defined the region over the centuries. This course is suggested before taking any other upper-level courses on Latin America or going abroad to other countries, and required for all Latin American Studies majors and minors. Through the course, students gain basic bibliographic knowledge and experience with research tools for a comparative study of Latin American politics society and culture. Prereq. None.
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

LATAM 1119 Freshman Seminar: Women in Latin American History
Women have been active players in the construction of Latin American nations. In the last two decades, leading scholars in the field have taken up the challenge of documenting women's participation. This research explosion has produced fruitful results to allow for the development of specialized courses. This course looks at the nation building process through the lens of Latin American women. The course examines the expectations, responsibilities and limitations women confronted in their varied roles from the Wars of Independence to the social revolutions and dictatorial regimes of the twentieth century. Besides looking at their political and economic lives, students will explore the changing gender roles and relations within marriage and the family, as well as the changing sexual and maternal mores.
Credit 3 units. A&S IQ: HUM BU: HUM, IS
Typical periods offered: Spring

LATAM 1995 Latin American Studies Coursework Completed Abroad
This course is for 1000 level study abroad credit.
Credit 12 units.
Typical periods offered: Fall, Spring, Summer

LATAM 1996 Latin American Studies Elective
This course is for 1000 level transfer credit.
Credit 0 units. EN: H
Typical periods offered: Fall, Spring, Summer

LATAM 2995 Latin American Studies Courses Studied Abroad
This course is for 2000 level study abroad credit.
Credit 0 units.
Typical periods offered: Fall, Spring, Summer

LATAM 2996 Latin American Studies Elective
This course is for 2000 level transfer credit.
Credit 0 units. EN: H
Typical periods offered: Fall, Spring, Summer

LATAM 3020 Survey of Brazilian Cultures: Race, Nation and Society
This course will introduce students to Brazilian culture from the colonial period to the present through literature, art, music, film and other cultural forms. The course gives a historical overview of Brazilian culture and society, exploring major sociohistorical and artistic moments from the colonial, imperial, and republican periods, and their legacies or influences on Brazilian society. Students will learn about the Amerindian, European, and African influences of Brazilian culture through the study of representative texts and cultural practices. The course also illustrates Brazil's place within Latin America and the world. The course will seek to deconstruct and expand preconceived notions of Brazil, such as Lusotropicalism and racial democracy. Classes will combine lectures by the instructor, student presentations, collective debates and cooperative learning, and will entail the use of required bibliography and audiovisual materials. Prereq. None.
Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

LATAM 3030 Survey of Mexican Cultures
This course provides an interdisciplinary introduction to the study of Mexico, with a particular focus on the 20th and the 21st century. The class will cover the main historical and cultural processes of Mexico in this period: The Mexican Revolution; the consolidation of a one-party political system; the construction of Mexican national identity and the arrival of neoliberalism. The course also focuses on the main aspects of Mexico's relationship to the United States: the Free Trade Agreement, the history of Mexican migration and the Drug War. From this framework, the course touches upon questions of race (particularly the politics of racial mixture), modernization, construction of social identities and the unique nature of governance in Mexico, due to the single-party regime. It also touches on Mexico's specificities and particularities due to the uniqueness of situation as the southern neighbor of the United States. PreReq. None.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Spring

LATAM 3040 Survey of Southern Cone Cultures: Argentina, Chile, and Uruguay
This course provides an introduction to the culture and society of the region known as the Southern Cone, encompassing Argentina, Chile, and Uruguay. The course will follow a long-term chronological approach, from the nineteenth century to the present, and will cover a wide spectrum of cultural production: literature, newspapers, music, cinema, television, as well as other examples of popular culture such as soccer. From an interdisciplinary perspective, we will explore how race, class, and gender interact in different historical periods. The class will cover the main historical and cultural processes of these countries: the formation of the Nation-State and the construction of national identities, capitalist modernization, Afro-descendant and Indigenous activism, Populism -with special attention to the case of Peronism in Argentina-, military dictatorships, as well as the contemporary feminist movement. In doing so, the class engages with questions of media, identity, memory, and labor, as they allow us to understand the historical processes of the region.

LATAM 3056 Survey of Yucatecan Cultures
This course provides a comprehensive introduction to the culture of the Yucatan peninsula. The course will begin with a detailed engagement with Pre-Columbian Maya culture, including its various stages of development and the work of uncovering it through archeology. The second part of the class provides an overview of colonial and modern Yucatecan culture through historical and anthropological sources. PreReq. Enrollment in the Washington University Program in Yucatán. Prerequired language level: L38 202. Taught in Spanish.
Credit 3 units. A&S IQ: HUM, LCD BU: HUM

LATAM 3080 Hello, Hello Brazil! Popular Culture, Media, and the Making of a Nation
Our image of Brazil has been deeply shaped by its cultural production, from Tom Jobim and Vinicius de Moraes' ever-popular Girl from Ipanema to the spectacular mega-production of Carnival in Rio and from the Afro-Brazilian martial art of capoeira to the international stardom of pop artists like Anitta. This course is an introduction to popular culture in contemporary Brazil. Students will approach the theme through theoretical works that seek to define popular culture, understanding it as a hybrid form of expression that troubles the line between the traditional and the mass-produced. This course will examine how the circulation of sounds and images manifests and shapes Brazilian culture historically and in the present. We will also interrogate the different ways in which culture is produced and received, how it circulates in symbolic markets, and how it comes to be both consumed by diverse audiences and utilized in often unexpected ways. The course will cover topics such as the Tropicalia movement, Afro-centric Carnival blocos, street art such as graffiti, baile funk, forro, favela protest theater, telenovelas (soap operas), the popularization of samba, soccer and the World Cup, and Carnival. Students will use an interdisciplinary lens to approach popular culture in Brazil through music lyrics, TV and film, cultural performances, and graphic novels. These materials will form the basis of our class discussions and written assignments. The course will be taught in English. Prerequisite: L45 165D, L45 304, or another course on Latin America suggested.

Typical periods offered: Fall, Spring

LATAM 3100 Gender, Sexuality and Power in Brazil
This course examines the nexus of gender, sexuality, and power in Brazil through an interdisciplinary lens. We will aim to understand how varying understandings of gender and sexuality have impacted the development of Brazilian society in history and continue to shape contemporary society and politics. We will pay special attention to the ways in which the intersections of race, gender, sexuality, class, ethnicity, and so on impact people's lived experiences and how heteronormativity and homophobia shape current politics. We will take an intersectional feminist approach to analyze topics such as slavery in colonial Brazil, national aspirations to modernity, authoritarian repression and moral panics, domestic labor, motherhood, sex tourism, Brazilian feminisms, and LGBTQ+ activism. Scholarly work from various fields of study -- with an emphasis on gender studies, history, and anthropology -- will be supplemented by documentaries, film, podcasts, and other media. This is a Writing Intensive and a Social Contrasts class in the IQ curriculum. Prerequisite: L45 165D, or two courses on Latin American or Women and Gender Studies, or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD, SC, WI Arch: HUM Art: HUM BU: BA, HUM, IS
Typical periods offered: Spring

LATAM 3110 The Body in Brazil: Race, Representation, Ontologies
This course is an introduction to various ways of understanding, representing, and performing the body in Brazil. Course materials will draw on insights from anthropology, the medical humanities, and science and technology studies in order to approach the body not just as biological material but also in its social, cultural, and spiritual dimensions. We will cover topics such as the importance of race and ethnicity since the time of colonization, sexualized media representations of gendered bodies, how some bodies are cast as disposable or out of place in contexts of social inequality, indigenous ways of viewing the body in relation to the natural and spiritual world, the politics of disability and access, and constructions of the body politic in the formation of national identity through ideas such as antropofagia (cultural cannabalism). Throughout, we will pay particular attention to how race, gender, sexuality, and disability shape the lived experiences of Brazilians. Topics will include the impact of slavery in the construction of the body in Brazil, the role played by race in the construction of discourses of corporality, and the development of beauty stereotypes and practices such as the medical industry of plastic surgery, among others. Students will analyze visual materials, ethnographies, historical texts, and internet sources in dialogue with critical theories from the social sciences and humanities, assessing how the body matters in a variety of ways that reflect Brazil's cultural diversity while also starkly highlighting its persistent racialized and gendered social inequities. These materials will form the basis of our class discussions and written assignments. The course will be taught in English. Prerequisite: L45 165D, L45 304, or another course on Latin America suggested.

Typical periods offered: Spring

LATAM 3120 Mexican Visual Culture

This course will explore the ways in which different aspects of visual culture were used to construct national, regional, political, social and cultural identities in Mexico. The omnipresence of the visual in the everyday life of Mexicans -including state-sponsored muralism, cinema, photography, graphic press, wide-circulating comic books and nationalist architecture- allows for the study of different ways in which citizens become embedded both in official national projects and in projects of political dissidence. The class will thus use the Mexico in the 20th and 21st centuries to introduce students to the study of the visual as a social practice, through theoretical discussions that will run parallel to the study of different visual manifestations. The course will discuss the changing social and political role of art, the influence that Mexican visual culture exerts in other parts of the world and the way in which visual culture allows Mexicans to think about their identity.

LATAM 3160 Cultures of Health in Latin America

This course is a survey of the cultural and political-economic aspects of health, illness, and embodied difference in Latin America. We will approach these themes from an interdisciplinary perspective with an emphasis on anthropology and history, exploring how local, national, regional, and global factors affect health and healthcare and how people experience and respond to them. Topics will include interactions between traditional healing practices and biomedicine; the lasting impacts of eugenic sciences on contemporary ideas about race and disability; the unequal impacts of epidemic disease; Indigenous cosmologies and healing systems; the politics of access to healthcare; the cultural and political specificities of reproductive health; and the intersections of race, gender, ethnicity, class, and bodily capacities in the pursuit of well-being. This course is designed for students of all levels interested in health and/or Latin American cultures. It will be taught in English.

LATAM 3200 Humans and Others in Latin America: Natures, Cultures, Environments

What does it mean to inhabit the world with other beings? How are we to cultivate life -- both human and nonhuman -- in toxic environments? What does it mean to be human, and what would it mean to decenter humanity? This course addresses these questions through an exploration of more-than-human worlds in Latin America. Students will examine a variety of Latin American thought and practices through the interdisciplinary lens of environmental humanities and social sciences, unsettling presumed boundaries between human and nonhuman, real and imaginary, native and culture. We will engage primarily with ethnographic and other scholarly texts, which will be supplemented by short works of fiction, documentary film, podcasts, and works of art. In the first part of this course, students will be challenged to think about what defines the limits of the human and engage with the concept of more-than-human worlds. We will then examine the dark side of such worlds, namely, the ways in which extractive capitalism and environmental destruction demonstrate the permeability of bodies and comprise a kind of slow violence against the most vulnerable communities. In the next unit, students will consider Black and Indigenous ecological knowledge and these communities' struggles to care for their lifeways and the environments that sustain them. In our final section, we will explore multispecies entanglements through Indigenous cosmologies and the nexus of science, history, and art. Students will complete several assignments throughout the semester that have been designed to make them think imaginatively and critically about the course themes, including weekly reading responses and in-class discussion facilitation. The final assignment for this course is a creative independent research project where students will synthesize what they learned over the course of the semester and extend it through independent research. Prerequisite: L45 165D or permission of instructor.

Typical periods offered: Spring

LATAM 3256 Medical Traditions in Yucatan and Health Systems in Mexico

This course explores traditional Maya medicine in Yucatán, including its foundations, healing practices and its relationship to modern biomedicine. There are discussions of Maya knowledge and its relationships of power and resistance in relationship to Western systems, and their evolution from the Pre-Columbian era to the present. The course also engages the ways on how Maya medicine has influenced and shaped modern Mexican health systems in Mexico and the evolution of Maya medicine towards its current practices. PreReq. Enrollment in the Washington University Program in Yucatán. Prerequired language level: L38 202. Taught in English. Readings in English and Spanish.
Credit 3 units. A&S IQ: LCD, SSC

LATAM 3410 Film and Revolution in Latin America

This class is a Writing Intensive course focused on the study of the way in which four landmark Latin American revolutions (The Independence Wars, The Mexican Revolution, The Cuban Revolution and The Bolivarian Revolution) are represented in cinema. Each one of these revolutions will constitute a unit of study, and students will be expected to work with historical texts, films and works of film theory and criticism for each one of them. The course will engage in subjects such as the difference between fiction and nonfiction films when representing history; the politics that underlie specific representations; the way in which cinema questions and revises ideas developed by historians; and the uses of film in creating popular views of history in Latin America. Students will develop a research project comparing two revolutionary processes over the semester. Prereq. L45 165D (Latin America: Nation, Ethnicity and Social Conflict) for LAS majors. Otherwise none.

LATAM 3420 Contemporary Latin American Cinema: Market Economy, Social Injustice, New Technologies

This class studies the relationship between cinema and society in Latin America between 1988 and the present. Latin American cinema in this period has gone to a period of deep crisis to the consolidation of industries and production with significant global recognition and impact. In this, cinema has strong correlations with neoliberalism, the political doctrine tied to free-market reform, democratization and privatization, among other ideas. The class will be based on the study and discussion of key films of the period to develop two themes. First, we will study the way in which cinema has become a cultural practice central to the discussion of the effects of neoliberalism in the region, as well as the opposition to neoliberalism. Topics in this regard will include: the social impact of free market reforms, growing economic and social inequality, the emergence of working class, Black and indigenous communities, the rise and fall of the New Left, the creation of new elites and other related themes. Second, we will study the way in which films are made and distributed and the changes on film production over the past decades. Topics will include the privatization of production and exhibition, the role of home video and streaming, the importance of film festivals and the move from national to translational

scenes of production. Prereq: L45 165D or L53 220 or other coursework in Latin American Studies, or Film and Media Studies, desirable but not required. Students without this background are encouraged to contact the instructor.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

LATAM 3570 Latin American Subcultures
This course has been planned as an introduction to the interconnections between "high" culture, popular culture and mass culture, with particular emphasis on the formation of urban subcultures in contemporary Latin America. The topic of subculture and counterculture will be analyzed taking into consideration the influence of factors of class, race, and gender, in the construction of alternative cultural identities. Some of the connections to be studied are between political power and cultural resistance, affect, violence, and symbolic value, hegemony and marginality. Distinctions will be made between culture, subcultures, traditions, and lifestyles, as well as between multiculturalism and interculturality. While the first part of the course will introduce critical concepts, theories and methodologies, the second half will focus on specific articulations between cultural practices and the domains of belief, sexuality, violence, and social media, including uses of music, video and films. Students will prepare a final paper on a Latin American subculture of their choice and analyze it using the critical and theoretical tools discussed in class.
Credit 3 units.

LATAM 4120 Gender and Modernity in Latin America
The purpose of this course is to introduce students to the particular forms modernity assumes in Latin American countries and to the ways in which national cultures, identity politics, and gender issues interweave during the 20th-century. The course will discuss three particular articulation of this topic: 1) Gender and the national question in Argentina: Eva Peron; 2) Gender and Visual Arts: Frida Kahlo; and 3) Gender and Ethnicity: Rigoberta Menchu. Through these iconic figures students will be introduced to the specific features that characterized three very different but representative cultural scenarios in Latin America. In each case, the context for the emergence of these highly influential public figures will be studied from historical, social and cultural perspectives. In order to explore the cultural and political significance of Eva Peron, Frida Kahlo and Rigoberta Menchu, the course will utilize literary texts (speeches, letters, diaries, etc.), visual materials (photography, films, and paintings) and critical bibliography.

LATAM 4130 Latin-American Cultural Studies: Critical and Theoretical Approaches
The goal of the course is to provide students with critical and theoretical tools that could be used for the analysis of Latin American cultural history from a transdisciplinary perspective, from colonial times to the present. Some of the concepts to be discussed in class are: colonialism and coloniality, national culture, dependency theory, cultural antropofagia, lettered city, miscegenation, heterogeneity, hybridity, transculturation, peripheral modernity, media and mediation, postmodernity, postcoloniality, and collective memory.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H
Typical periods offered: Fall

LATAM 4170 Nation and Desire in Latin America
The purpose of this course is to analyze the process of nation formation in Latin America, since the imaginaries of the Creole nation to the first half of the 20th century. Class discussion will encompass the study of theories on nation formation and nationalism as well as textual representations of national projects, such as Simon Bolivar' letters and discourses, selections from Facundo, Civilization and Barbarism by Domingo F. Sarmiento, selected texts by Andres Bello, Alfonso Reyes, et al, Ariel, by J. E. Rodo, Pedro Henriquez Urena's Seis ensayos en busca de nuestra expresion, Jose Vasconcelos' La raza cosmica, Jose Carlos Mariategui, Siete ensayos de interpretacion de la realidad peruana, Jose Marti's Nuestra America and other essays. Some of the main topics to be discussed are the leading role of Creole elites in the consolidation of national cultures, the marginalization of women as well as indigenous and Afro-Hispanic populations, and the role of nationalism in the shaping of modern societies. Colonialism, Occidentalism, liberalism, positivism, nationalism and modernity are some of the concepts that will be explored both theoretically and in their particular discursive usages. Finally, the concept of nation(alism) will be studied as a political/rhetorical device and as the resulting expression of agency, interest, and desire, in peripheral societies.
Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H
Typical periods offered: Spring

LATAM 4180 Latin American Subcultures
This course has been planned as an introduction to the interconnections between high culture, popular culture, and mass culture, with particular emphasis on the formation of urban subcultures in contemporary Latin America. The topic of subculture and counterculture will be analyzed, taking into consideration the influence of factors of class, race, and gender in the construction of alternative cultural identities. Some of the connections to be studied are between political power and cultural resistance, affect, violence, symbolic value, hegemony and marginality. Distinctions will be made between culture, subcultures, traditions, and lifestyles as well as between multiculturalism and interculturality. While the first part of the course will introduce critical concepts, theories, and methodologies, the second half will focus on specific articulations between cultural practices and the domains of belief, sexuality, violence, and social media, including uses of music, video, and films. Students will prepare a final paper on a Latin American subculture of their choice and analyze it using the critical and theoretical tools discussed in class. Prerequisite: L45 165D. This course fulfills the seminar requirement for Latin American Studies majors and minors.

Typical periods offered: Spring

LATAM 4190 Media Cultures in Latin America
One of the key topics in Latin American Studies today is the history and theory of media and the way in which media cultures have shaped the nation, social subjectivities and the reigion's relationship to modernity. This course is a study of both the history of key audiovisual media in Latin America (print, radio, television, cinema, cybermedia) as well as of the key paradigms for media studies regarding this production. After discussing foundational concepts (media, mediation, cultural industry, popular culture), the course proceeds by in-depth studies of the role media played in different countries from the 19th century, through the different national processes of the 20th century to the present.

In doing so, the class engages with questions of technology, identity, indigenous culture, urbanization and other theoretical concerns. This course fulfills the Seminar Requirement for Latin American Studies majors and minors. PreReq L45 165D or a 300-level course on Latin American culture.
Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H
Typical periods offered: Spring

LATAM 4200 Modernity, Culture and the State in Mexico
This course is an advanced seminar on the process of the cultural, ideological and institutional modernization of Mexico. Drawing on readings from fields such as history, cultural anthropology, political sociology and cultural theory, the course discusses the shaping of various forms of social subjectivity and cultural ideology that sustained the formation and development of the state. The course also engages with the identities and processes that led both to the formation of structures of citizenship and to the contestation of state power. This course is structured chronologically, following the development of three interrelated processes unfolding between 1810 and the present: (1) the creation of state institutions and ideology and their evolution in relationship to events such as the liberal Reforma of the 1850s and the Mexican Revolution; (2) the cultural and social implication of processes of capitalist development, modernization and globalization; and (3) the ways in which Mexico's histories of sociocultural difference led to political and cultural insurgencies and rebellions. This course fufills the seminar requirement for Latin American Studies majors. Prerequisite: L45 165D, L45 305, any other 300-level course with significant focus on Mexico, or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD BU: ETH, HUM, IS EN: H
Typical periods offered: Fall

LATAM 4210 The Binational Condition. The Mexico-US Relationship in Mexican History and Culture.
From the 19th century onwards, the relationship between Mexico and the United States has been defined by intense tensions and contradictions. Closely intertwined by geopolitical engagement and integrations, mutual migration flows, and rich cultural exchange, both countries belong to a binational system with few equivalents around the world, which defines the lives of people living across North America. And yet, few people in the United States have access to a clear and rigorous understanding of the Southern neighbor, often leading to conflict at the political and social levels. This class explores this historically, from the early frictions caused by territory and slavery to the binational conditions of the present. The class emphasizes the Mexican perspective of the relationship, often erased in discussions from the U.S. From this perspective, the course will engage critical moments in the history of the relationships, such as the underground railroad to the South, the Mexican American War, the Guadalupe Hidalgo treaty, and the Cold War. The class will also discuss the ways in which Mexico has influenced the United States culturally, from the impact of Mexican post-Revolutionary art in the New Deal to the rise of film directors like Alfonso Cuarón and Gullermo del Toro. Finally, the class will lay out the ways in which Mexicans and scholars of Mexican studies think about questions such as regional development, the border, immigration, and the Drug War. Prereq. L45 165D or prior coursework on Global Studies, Latin American Studies or American Studies. The course covers the seminar requirement for majors and minors in Latin American Studies.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM, IS EN: H
Typical periods offered: Fall, Spring

LATAM 4238 Introduction to Latin American Philosophy - Contemporary Topics
The main goal of this course is to familiarize students with a distinct philosophical corpus closely linked to the postcolonial conditions of cultural production in the Latin American region. The selected works will expose the connections between as socio- political reflection and intellectual development, and the characteristics of situated knowledge related to questions of coloniality, interculturality, and decolonization. Different approaches to transcendental issues, to questions of temporality, subjectivity and Being, will be developed vis a vis diverse conceptions of historicity, positionality, power and resistance. Factors of race, gender, inequality and cultural diversity will be discussed as part of the introduction of issues such as indigeneity, miscegenation, creolization, archipelagic thought, and the like. Some of the authors to be studies in the course are: Leopoldo Zea, Enrique Dussel, Santiago Castro Gomez, Nelson Maldonado Torres, Aime Cesaire, Frantz Fanon, Walter Mignolo, Anibal Quijano, Bolivar Echeverria, Sylvia Wynter, Rita Segato, Maria Lugones, et al.

Typical periods offered: Fall

LATAM 4250 Popular Culture and the Representation of Youth in Latin America
The objective of this course is to introduce students to different aspects related to the representation of youth in Latin America, particularly through the depiction this sector receives in the realm of popular culture. The course will focus on the relationship between youth and social/political conflict and on the literary and cinematic representation of juvenile sectors in cultural production in different Latin American countries. The roles of music, melodrama and the media will be studied in connection to the construction of subjectivity and collective identity. The course will also analyze the involvement of juvenile sectors in narco-culture, gangs, maras, and the like, as well as the impact of violence, fear, and social inequality in early life. The analysis of films, literary texts, critical studies and cultural practices will be approached through a combination of biopolitical analysis and the analysis of representational strategies utilized in the elaboration of symbolic materials. This course fulfills the seminar requirement for Latin American Studies majors and minors. Prerequisite: LatAm 165D or another Latin American Studies course.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H
Typical periods offered: Fall

LATAM 4278 The Representation and Politics of Latin American Anthropology
This course is focused on the intertwining of anthropology and representation in Latin America, an interrelation that can be traced since colonial times to the present. The specific geo-cultural characteristics of the New World invited, from the beginning, both philosophical and scientific inquiries about human nature, environmental conditions and social organization outside the domains of Western civilizations. The need to represent and disseminate knowledge about the new discoveries inspired both in Europeans and American societies reflections on identity/otherness and cultural development, as well as creative attempts to elaborate symbolic/aesthetic paradigms to capture cultural difference and intercultural relations. Issues of memory, imagination, language, cultural translation and transculturation will be discussed in the analysis of symbolic representation and construction of meaning. “Writing culture” become, as observed by James Clifford, one of the most controversial and important enterprises since it involved, both in colonial and in modern times, political assumptions, strategies of stereotyping, notions about hegemony/subalternity, and questions about the creation of world, the nature of language and the incommensurate meaning of collective subjectivity. The course will combine critical/theoretical materials regarding anthropology as a specific cognitive approach

and the analysis of literary works, films and paintings that express issues of (self) recognition, alterity and ethnographic imagination in Latin America. Some of the literary works to be studies include narrative by J. L. Borges, M. Barnet, J. M. Arguedas, and Juan Rulfo, among others. Films include Colombian masterpiece "The Embrace of the Serpent" (2015). Paintings focus on Ecuadorian artist Oswaldo Guayasamín and Brazilian Tarsila do Amaral. The course will be conducted in English.

Typical periods offered: Fall, Spring

LATAM 4280 Constructing the (Racial) Other: From the Colonial Caste System to U.S. Latinos

The goal of this course is to introduce students to categories and concepts related to the questions of race and ethnicity in Latin America, from colonial times to the present. The course also covers U.S. Latinos as a population of Latin American descent that presents particular characteristics connected to the issues of migration, identity politics, reterritorialization, and cultural hybridity. Based on the theoretical and critical study of problems related to colonialism, social classification, miscegenation, whiteness, discrimination, and the like, representative literary and visual materials will be discussed to illustrate the connections between race, social roles, domestic/public spaces, work, democracy and modernization. The issue of race will be analyzed in its multiple articulations to the themes of nationalism, interculturalism, migration, and symbolic representation. This course covers the seminar requirement for Latin American Studies majors. Prerequisite: L45 165D, one other class in Latin American studies, or one class on race studies.

Credit 3 units. A&S IQ: HUM, SC BU: HUM EN: H

Typical periods offered: Fall

LATAM 4290 Citizenship in the HOT Seat. Migration and Borders in Latin America

This course is an introduction to concepts, interpretations, and debates related to different forms of human mobilization across borders, particularly in contemporary Latin America. However, class discussions will expand to other scenarios in order to contextualize the experience and characteristics of migration today. Some of the notions to be analyzed in connection to this topic are freedom of movement, citizenship, inequality, the labor market, borders, territoriality, and national security. Borders will be studied as material constructions (i.e., walls, wire fences, technological surveillance, funnel systems, and strategies of deterrence) and as conceptual/symbolic representations. In addition to migratory movements, other phenomena such as diaspora, exile, and forced displacements will also be introduced as they have developed in Latin America. Cultural and psychological aspects related to migratory experiences -- such as the role of memory and affect, individual and collective trauma, social effects of deportation, stereotyping, the role of race and gender, and so on -- will also be considered, as they constitute integral aspects of migratory studies. The course will be conducted in English as a combination of lectures, student presentations, and collective discussions of assigned readings. Fulfills the seminar requirement for Latin American Studies majors and minors. Prerequisite: L45 165D.

LATAM 4320 Bodily Injuries: Violence, Gender and Representation in Latin America

The course will focus on the definitions, uses and languages of violence in Latin America, particularly during the last decades of the 20th century and the beginning of the 21st century. Students will be introduced to philosophical, ethical and political issues related to the existence of structural violence and to the problems connected to the symbolic representation of this phenomenon in literature, fictional/ documentary films, and visual arts. One of the course's objectives will be to problematize the conceptualization of violence and to promote critical thinking about its emergence, significance and effects on local/global societies. Some of the topics to be analyzed are the body in its multiple manifestations (the body politic, the social body, the individual body, the treatment of the corpse, etc.), the narrativization of violence (violence as discourse, documentation and fictional elaborations, violence and the media, violence and ideology, etc.), violence and the city, citizenry and otherness, bio-politics, etc. Finally, violence will be presented in different contexts and associated to different activities (ordinary crime, narco-cultures, maras, political movements, domestic environments) and different situations (e.g. violence in rural areas, violence in the borderlands, violence and migration). In all cases the course will call for a reflection on the interrelations between private/public spheres, gender politics, ideological/aesthetic values, and individual/ institutional levels. The role of memory and emotions will be emphasized as a crucial element for the construction /mobilization of subjectivity and for the elaboration of agendas that challenge the State's monopoly of legitimate violence and propose alternative and often perverse forms of association and mobilization at the margins of institutional configurations.

LATAM 463 Seminar On Urban Cultures in Latin America

The course will focus on the key role urban development and urban cultures have had in Latin America with particular emphasis on contemporary times. The goal of the course is to discuss the connections between the formation and expansion of cities, the definitions of citizenship, and the role of modernity in the development of high and popular cultures within different historical and geo-cultural contexts. Particular attention will be paid to the issues of race, class and gender. Te course, which will utilize an interdisciplinary and comparative approach, will also focus on the phenomena of marginality, cultural resistance, nationalism and consumerism as well as on the role played by the media in contemporary Latin American societies. Some of the cultural expressions to be analyzed in the course are music (rock, pop, rap), sports, film and video. Prerequisite: L97 165C Survey of Latin American Culture

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

LATAM 4651 Cities, Race and Development in Latin America

This course offers a multi-disciplinary approach to the study of the Latin American city: its history, development and inherent economic, social, cultural, ethnic, and political tensions. Lectures, readings, and class debates will explore interactions between the materiality and structure of Latin American modern cities and the social and cultural phenomena related to urban life in multicultural societies. Particular attention will be devoted to the effects of internal/external migration, and to the development of public spaces and sites of memory. Patterns of social segregation, marginalization, inequality, and the like, will be analyzed in order to elaborate on the contemporary challenges of the city in a globalized yet traditional world. In addition to the analysis of living, institutional, and commercial spaces, the course will cover social dynamics that break the discipline of the city through different forms of transgression, including crime, informal housing, and underground movements. The goal of the course is to expose students to historical and social developments as exemplified in a variety of urban environments, and to encourage reflection on issues of social justice related to the living conditions of rural, disadvantaged, and indigenous populations. The course will be conducted in English. Mandatory readings will be in English. Additional readings in Spanish will be required for those students fluent in the language. Prereq. None.

Latin American Studies Major

Program Requirements

- **Total Units Required:** 30

The major in Latin American Studies (LAS) allows undergraduate students to pursue an in-depth study of Latin America across diverse disciplines, theoretical approaches and historical periods. Through regular courses, seminars and additional activities such as film series, programs abroad, lectures, and the like, students will explore the processes that resulted in the integration of the so-called New World and Western civilizations, from the discovery of America to the present. An essential aspect of this major is the focus on economic, social and political dynamics corresponding to intercultural relations developed between indigenous cultures, Creole societies, and European and North American nations.

This aspect of the major stresses the study of social change, migration, social movements, multiculturalism, inequality, violence and social justice, and it combines regional analysis with critical interdisciplinary approaches. The program of study combines the analysis of urban environments; issues of education, gender, language and ethnicity; and modernization and border studies. It emphasizes transatlantic approaches as well as the study of topics related to autochthonous cultures in their conflictive interaction with Western traditions, systems of domination, values and economic/political projects.

Focusing on Latin America allows students to engage with a fascinating historical trajectory that promotes a multifaceted reflection on colonialism, diversity issues, economic development and international relations. The major has been designed to provide students with a historical background that will be instrumental both in itself, as an exciting field of specialization, and in combination with their pursuit of other fields of inquiry, such as international relations, business, globalization, and the like. Latin America is a region embedded in the complex networks of global economics, development, social engagement and cultural innovation.

The LAS major offers a sound, updated and competitive approach to the study of the region, both in its specificity and in its connections to the world, through the study of Latin America's processes of internationalization and its changing position in global scenarios. This major has also been designed to further contribute to the university mission of improving engagement with race, ethnicity and diversity.

Credit Requirements

The major in LAS requires students to complete 30 units. At least 24 units must be at the 3000 level or higher, and at least 9 units must be at the 4000 level. All units must be exclusive to the major and may not be double counted, unless the College of Arts & Sciences regulations state otherwise. To count for LAS, courses must have a LATAM number or receive authorization from the Director of Undergraduate Studies (DUS) of LAS, who determines which requirements can be fulfilled by each available course. Units must be fulfilled as follows:

- 3 units for the successful completion of LATAM 1000 offered annually.
- 3 units for the successful completion of an elective introductory course at the 1000, 2000, or 3000 level. Courses that fulfill this requirement must meet the approval of the DUS of LAS. This requirement may also be fulfilled with an approved course abroad or with a 3000-level elective approved by the DUS of LAS.
- 3 units in history or politics at the 3000 level or higher. Courses may come from relevant offerings in the departments of History or Political Science, the Global Studies program, or study abroad. Courses must be cross listed with LatAm or approved by the DUS of LAS.
- 3 units in literary or cultural studies at the 3000 level or higher. These units may include courses offered by the departments of Romance Languages and Literatures, Art History, and Archaeology; LAS home-based courses; or study abroad.
- 3 units in anthropology or pre-Columbian cultures at the 3000 level or higher. These courses may come from offerings in the departments of Anthropology and Global Studies; LAS home-based courses; or study abroad.
- 9 units of elective credit at the 3000 level or higher. At least 3 of these units must be fulfilled at the 400 level; 3 units of elective credit may be fulfilled through an honors thesis (LATAM 4970) or a special project (LATAM 4950).

- 6 units of a Latin American seminar. Seminar courses are 4000-level courses that are taught by core LAS faculty on theoretical issues related to the region. These courses include LATAM 4120, LATAM 4130, LATAM 4170, LATAM 4320, and LATAM 4631.

Capstone

Prime majors in LAS must fulfill their capstone requirement by writing an honors thesis (if the student meets the College of Arts & Sciences requirements to do so), writing a Latin American research paper (LATAM 4950), or completing the two LAS seminar courses with a grade of B+ or better.

Language Requirement

LAS requires all majors to complete a language requirement in Spanish or Portuguese. The Spanish requirement may be fulfilled by the completion of SPAN 3020, SPAN 3021 or certification as a native speaker by the DUS of LAS.

The Portuguese requirement may be fulfilled as follows:

- Successful completion of PORTUG 2010 with a grade of B- or higher
- Native or heritage speaker status, as determined by the DUS in LAS
- Successful completion of a program abroad, conducted in Portuguese, with a minimum of 3 credit units in the target language

Additional Information

Study Abroad

All majors in LAS must complete at least one study abroad experience in Latin America. This requirement may be fulfilled by the completion of a summer or semester program in the region approved by the Office of Overseas Programs.

Students who attend study abroad programs may request credit for appropriate courses at the 3000 level, with approval from the DUS. A maximum of 9 units for one semester (or equivalent) of study abroad or of 12 units for more than one semester is allowed. LATAM 1000- and 4000-level credit requirements must be completed in residence at Washington University.

Students unable to attend a study abroad program may complete an additional 3 units of 3000-level elective credit instead.

Latin American Studies Minor

Program Requirements

- **Total Units Required:** 18

The minor in Latin American Studies (LAS) allows undergraduate students pursuing other major programs to complement their existing curriculum with a study of Latin America across diverse disciplines and how the region engages with the Western world — to which it belongs — at large. The minor in LAS is conceived as an option for students across a variety of disciplines in the social sciences, the humanities, the sciences, the pre-med program, and business and engineering to add knowledge about Latin America to their professional portfolio. The vast relations that the United States has with Latin America in all fields make the minor in LAS the source of valuable skills for our existing population. It also allows students in other major programs to access discussions of socioeconomic and ethnic diversity in one of the regions central to those debates in the world.

Credit Requirements

The minor in LAS requires students to complete 18 units. At least 15 units must be at the 3000 level or higher, and at least 3 units must be at the 4000 level. All units must be exclusive to the minor and may not be double counted, unless the College of Arts & Sciences regulations state otherwise. The requirements for the minor mirror some of the requirements for the major. To count for LAS, courses must have an LATAM number or receive authorization from the LAS Director of Undergraduate Studies (DUS), who determines which requirements can be fulfilled by each available course. Units must be fulfilled as follows:

- 3 units for the successful completion of LATAM 1000, offered annually. LatAm 165C can also fulfill this requirement.
- 3 units in history or politics at the 3000 level or higher. Courses may come from relevant offerings in the departments of History or Political Science, the Global Studies program, or study abroad.
- 3 units in literary or cultural studies at the 3000 level or higher. These units may include courses offered by the departments of Romance Languages and Literatures, Art History, and Archaeology; LAS home-based courses; and study abroad.
- 3 units in anthropology or pre-Columbian cultures at the 3000 level or higher. These courses may come from offerings in the Anthropology, Global Studies, and the LAS departments or from study abroad.
- 3 units of elective credit at the 3000 level or higher.
- 3 units of a Latin American seminar. Seminar courses are 4000-level classes that are taught by core LAS faculty on theoretical issues related to the region.

Language Requirement

LAS requires all minors to complete a language requirement in Spanish or Portuguese. The Spanish requirement may be fulfilled by the completion of SPAN 2020 or certification as an advanced heritage or native speaker by the DUS in LAS.

The Portuguese requirement may be fulfilled as follows:

- Successful completion of PORTUG 2000 with a grade of B- or higher
- Native or heritage speaker status, as determined by the DUS in LAS.
- Successful completion of a program abroad, conducted in Portuguese, with a minimum of 3 credit units in the target language

Additional Information

Study Abroad

All minors in LAS are strongly encouraged (but not required) to pursue a study abroad program in the region. Students who attend study abroad programs may request credit for appropriate courses at the 3000 level, with approval from the DUS. A maximum of 6 units is allowed. LATAM 1000 and the seminar requirement must be completed in residence at Washington University.

Linguistics

At Washington University, the Linguistics program offers an undergraduate major and minor. The core of the Linguistics program focuses on the study of how languages are structured. Students examine how words are built from sounds, how sentences are built from words, and how all of this structure manages to communicate meaning. With a good understanding of these formal properties, students can pursue other questions about language. How does language change over time? Do diverse languages have more in common than meets the eye? What functions does language play in society? What is its relation to thought? What are its biological and psychological underpinnings? And just how do children manage to acquire language so well in the first place?

Linguistics takes a scientific approach to the study of language and develops skills in data analysis and scientific experimental methods. Linguistics students may or may not speak many languages, but they definitely will learn how to collect and analyze data about languages in an effort to answer these questions.

Majors

- Linguistics Major (p. 690)

Minors

- Linguistics Minor (p. 691)

Courses

LING 1526 First-Year Seminar: The Linguistics of Constructed Languages
What's "wrong" with English, or French, or Chinese, or any one of the 6,000+ languages spoken natively by humans today? Why invent a language like Esperanto to be a common tongue among all people, or invent a "calculus of thought" to "perfectly" express pure meaning? Why is it hard to sound romantic while speaking Klingon? What are the benefits of Lojban's attempt to rid the world of confusion and ambiguity? This course explores the design of and motivation for constructed languages from a modern linguistic point of view. Constructed languages are those that are the result of some conscious and deliberate design rather than ones occurring naturally. We will explore the different motivations for language construction, from

the desire to create a "perfect language", to fictional world building, to fostering global harmony. In characterizing the different types of invented languages, students will develop familiarity with the basic tools of linguistic theory, focusing on phonology, morphology, syntax, and semantics. Languages analyzed in detail include Klingon, Esperanto, Heptapod B, Lojban, Dothraki, Valyrian, Elvish, and various philosophical languages. This class is only open to first-year students.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

LING 1536 First Year Seminar:Storming Off and Slaying Serpents: Linguistic Approaches to Comparative Mythology
This course is an introduction to comparative mythology through the lens of linguistic theory. As all of our most ancient mythological narratives are poetic-and given that the production of poetic texts is a fundamentally linguistic enterprise-students will acquire the linguistic skills necessary to fully engage with and analyze the language of ancient mythological texts.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall

LING 1600 Introduction to Linguistics
Language is one of the fundamental capacities of the human species, and there are many interesting and meaningful ways in which it can be studied. This course explores the core components of linguistic theory: speech sounds (phonetics and phonology), word formation (morphology), sentence structure (syntax), and meaning (semantics). It also provides an overview of interdisciplinary ideas and research on how language is acquired and processed, its relation to the mind-brain and to society, and the question of whether the essential properties of language can be replicated outside the human mind (specifically, in chimpanzees or computer programs).
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall, Spring

LING 1995 Linguistics Coursework Completed Abroad
This course is for study abroad credits.
Credit 12 units.
Typical periods offered: Fall, Spring, Summer

LING 1996 Linguistics Elective
This course is for elective or transfer credits.
Credit 0 units. EN: H, S
Typical periods offered: Fall, Spring

LING 2225 Linguistics for Legal Purposes
This course exposes students to an array of legal matters in which forensic linguistic science can play a key role. It simultaneously introduces them to linguistic concepts, theories, and methods that can be differentially applied for a combination of forensic and legal purposes. Topics include trademark disputes, defamation suits, civil litigation, authorship identification, and linguistic evaluations of testimony presented during murder trials. Assignments will include the formulation of affidavits and the production of legal opinions derived from diverse linguistic analyses.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall, Spring

LING 2550 Methods in Linguistic Research
This course will introduce students to a range of formal, computational, and experimental tools for conducting linguistic research. Students will learn about different types of linguistic data, experimental design, and statistical techniques in the context of research in general linguistics, psycholinguistics, and sociolinguistics. This course aims to make students more capable readers of linguistic research (and scientific research more generally) and to provide them with hands-on experience in employing linguistic research methods. The course will also serve as an introduction to R for statistical computing. The class is intended for freshman and sophomore students who are considering advanced study in the linguistics program. Prerequisite: Ling 170D.
Credit 3 units. A&S IQ: SSC, AN EN: S
Typical periods offered: Fall

LING 2995 Linguistics Coursework Completed Abroad
This course is for study abroad credits.
Credit 0 units.
Typical periods offered: Fall, Spring, Summer

LING 2996 Linguistics Elective
This course is for elective or transfer credits.
Credit 0 units. EN: H, S
Typical periods offered: Fall, Spring

LING 3050 Phonetics
Phonetics is the study of the sounds of the languages of the world. The primary goal of the course is to learn how speech sounds are produced, so that the student can describe them in articulatory terms, write them out in a standard notational system, and produce them accurately. Other topics include a basic introduction to the acoustics of speech and the use of personal computers to display, analyze, and synthesize human speech. The course should prove useful to students desiring a deeper understanding of one of the fundamental underpinnings of linguistics, but also has practical applications in such fields as foreign language learning and the appreciation and acquisition of new dialects and accents. Prerequisite: Ling 170D.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

LING 3075 Introduction to Sociolinguistics
Studies of language in social context are presented, including research related to diglossia, bilingualism, pidginization, creolization, and dialectology. Discourse analyses and conversational analyses of face-to-face conversation are examined in methodological and analytical terms. Beyond assigned readings, critical discourse analyses, the ethnography of speaking, the sociology of language, and accommodation theory are also considered. Students are required to develop a course project related to one or more studies of language in use. Experimental studies of sociophonetics and sociohistorical linguistics are presented during lectures to demonstrate advanced interdisciplinary research with potential educational and legal relevance. Prerequisite: Ling 170D.
Credit 3 units. A&S IQ: SSC, SC Art: SSC EN: S
Typical periods offered: Fall

LING 3150 Syntactic Analysis
The ability to produce and understand an infinite number of sentences is perhaps the most fascinating aspect of the human language faculty. Syntax is the study of how the brain organizes sentences from smaller phrases and words. This course explores syntactic analysis from several perspectives within generative linguistics, focusing primarily on the Government and Binding framework but also introducing Minimalist and Optimality Theoretic approaches. Topics to be discussed include phrase structure, transformations, case theory, thematic roles, and anaphora. Assignments will help students learn to construct and compare analyses of syntactic problems in English and other languages. Prerequisite: Ling 170D or permission of instructor.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S

Typical periods offered: Fall, Spring

LING 3175 Morphology
Concepts covered: morphemic analysis and investigation of morphological processes. Additional topics may include relationship of morphology to language-typology and to syntax. Prerequisite: Ling 170D, or permission of instructor.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

LING 3185 Linguistic Diversity in the United States
Linguistic diversity has always existed within the United States, and this course begins with a survey of many of the indigenous Native American languages that existed prior to European colonization. The emphasis of this course is linguistic research, as we examine diverse studies of language across the nation with respect to regional differences, racial and ethnic differences, historical differences, and differences in education and economic status. American bilingualism is explored, as are many of the dialects that have evolved in different parts of the nation. Students study a range of sophisticated linguistic analyses of language diversity in different parts of the USA at different points in the nation's history. The culmination of the course explores practical linguistic applications in legal and educational contexts. Prereq: Ling 170D and some familiarity with elementary statistics.
Credit 3 units. A&S IQ: SSC, SC Art: SSC BU: BA EN: S
Typical periods offered: Fall

LING 3225 Linguistic Pragmatics
Discourse analysis and pragmatics are the subfields of linguistics that investigate language as it is used in real-life contexts. The focus of this course is on the following question: What do people do with language, and how do they do it? One goal is to demonstate how the results of such investigations are relevant for a number of concrete problems in human communication. Some of the more specific questions we will explore are as follows: What distinguishes discourse analysis and pragmatics from each other? What is their relation to the other branches of linguistics? How can the two fields contibute to the establishment of a paradigm for interdisciplinary and intercultural studies? Prerequisite: Ling 170D or permission of instructor.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall

LING 3250 Introduction to Computational Linguistics
Use of computers to analyze, understand, and generate human language. Emphasis on appreciating practical applications such as text analysis, search and creation of dictionaries and corpora, information retrieval, machine translation, and speech interfaces. Survey of rule-based and statistical techniques. Students acquire programming skills appropriate for solving small- to medium-scale problems in linguistics and text processing, using a language such as Python. Students have regular programming assignments and complete a semester project. No previous knowledge of programming required. Prerequisite: L44 Ling 170D.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

LING 3350 Phonological Analysis
There are several important abilities involved in the use of human language, one of these being the ability to organize speech sounds. The system that the brain uses to accomplish this task is the subject matter of phonology. This course will explore phonology from several perspectives within generative linguistics, including both traditional rule-based and current Optimality Theoretic approaches. Topics to be discussed include phonological features, lexical phonology, prosodic morphology, tone, and metrical stress. Assignments will help students learn to analyze phonological problems in a variety of languages and to evaluate the consequences of using different analytic approaches. Prerequisite: Ling 170D or permission of instructor.
Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S
Typical periods offered: Fall, Spring

LING 3450 Introduction to Semantics
Semantics is the branch of linguistics which studies how speakers assign meaning to words, sentences, and larger units of discourse. We combine perspectives from both linguistics and philosophy to explore a variety of topics including polysemy, compositionality, quantification, anaphora, definite descriptions, attitude reports, presupposition, and implicature. Prerequisite: Ling 170D or Phil 301G or permission of instructor.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

LING 3525 Linguistics Seminar
Readings on a selected topic in theoretical linguistics with an emphasis on discussion, presentation, and writing. Prerequisite: varies with topic.
Credit 3 units. A&S IQ: SSC EN: S
Typical periods offered: Spring

LING 3526 Linguistics Seminar: Writing Intensive
Readings on a selected topic in theoretical linguistics, with an emphasis on discussion, presentation, and writing. Prerequisite: varies with topic.
Credit 3 units. A&S IQ: SSC, WI Art: SSC
Typical periods offered: Fall, Spring

LING 3550 Historical and Comparative Linguistics
Historical linguistics focuses on how languages change over time. Comparative linguistics focuses on their similarities and differences. In this course we will trace some of the differences and changes in sound (phonetics and phonology) word formation (morphology), sentence structure (syntax), and meaning (semantics). Topics include linguistic universals, the structural and genetic classification of languages, the techniques of reconstructing proto-languages, and the causes of language change. Examples from Indo-European languages (for example, Greek, English, and Spanish) and from Native American languages (for example, Quechua and Mayan) will be emphasized. Prerequisite: Ling 170D.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

LING 3995 Linguistics Coursework Completed Abroad
This course is for study abroad credits.
Credit 12 units.
Typical periods offered: Fall, Spring, Summer

LING 3996 Linguistics Elective
This course is for elective or transfer credits.
Credit 0 units. EN: H, S
Typical periods offered: Fall, Spring

LING 4040 Topics in Linguistics
Meets with designated linguistics course, but with additional writing and research required for graduate credit and certification.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

LING 4062 Second-Language Acquisition
There are many ways in which a second language can be learned: from infancy as the child of bilingual parents, or later through formal instruction, immersion in a new culture, or in a particular work or social situation. This class is an inquiry into the processes by which acquisition occurs. Topics include the nature of language learning within the scope of other types of human learning; the relationship between first and second language acquisition; the role of linguistic, cognitive, and sociocultural factors; insights gained from analyzing learners' errors; key concepts such as interlanguage and communicative competence; bilingualism; the optimal age for second language acquisition; and a critical appraisal of different theories of second language acquisition. Both theoretical and instructional implications of second language acquisition research are considered. This course can be used towards certification in TESOL and is a required course for the Graduate Certificate in Language Instruction. Prerequisite: Ling 170D or equivalent is recommended, especially for undergraduates, but is not required.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H
Typical periods offered: Fall, Spring

LING 4250 Computation and Learnability in Linguistic Theory
This course introduces the advanced linguistics or computer science student to the fields of learnability and computation as they apply to the study of linguistic theories and natural language. Topics covered include the formal language hierarchy, including the subregular languages; issues in the learnability of phonology, morphology, and syntax; and algorithms specific to constraint-based linguistic grammars. Prerequisites: either CS 130 or Ling 317 and at least one of the following: Ling 309, Ling 311, Ling 313, or Ling 315.
Credit 3 units. A&S IQ: SSC Art: SSC EN: S
Typical periods offered: Fall, Spring

LING 4850 Senior Seminar in Linguistics:
The Senior Seminar affords students an opportunity to integrate the various fields of linguistics. Readings, discussions, and presentations let students address issues that combine the content and the research methods of areas such as phonetics, phonology, morphology, syntax, diachrony, and semantics. Students have individual projects within the scope of the semester's particular topic, but the class as a whole helps in choosing, developing, and refining the treatment. This course fulfills the requirement for a senior capstone for primary majors in Linguistics. It is the normal option for students who wish to take the capstone as a regular class rather than as sponsored independent study.
Credit 3 units. A&S IQ: SSC Art: SSC
Typical periods offered: Fall, Spring

LING 4975 Independent Work for Senior Honors
Prerequisites: senior standing and permission of the Linguistics Program.
Credit 6 units.
Typical periods offered: Fall, Spring

LING 4995 Linguistics Coursework Completed Abroad
This course is for study abroad credits.
Credit 0 units.
Typical periods offered: Fall, Spring, Summer

LING 4996 Linguistics Elective
This course is for elective or transfer credits.
Credit 0 units. EN: H, S
Typical periods offered: Fall, Spring

Linguistics Major

Program Requirements

- **Total Units Required:** Students must complete a total of 30 units to complete the major. At least 24 of these must be at the 3000 level or above.
- **Grade Requirement:** Students must receive a grade of C- or higher in a course to count it toward the major. Pass/No Pass grades do not count toward the major.

Required Courses

Majors must complete the following list of courses. Courses used to complete this requirement cannot also count towards the elective requirement further below.

Code	Title	Units
LING 1600	Introduction to Linguistics	3
LING 2550	Methods in Linguistic Research	3
or LING 3250	Introduction to Computational Linguistics	
LING 3050	Phonetics	3
LING 3150	Syntactic Analysis	3
LING 3350	Phonological Analysis	3
LING 3450	Introduction to Semantics	3
Total Units		**18**

Elective Courses

Majors must take 12 units from the courses listed below. At least 9 units must be at the 3000 level or higher. No more than 6 units may be drawn from LING 4975 or Ling 5000.

Code	Title	Units
CLASSICS 2250	Latin and Greek in Current English	3
LING 1526	First-year Seminar: The Linguistics of Constructed Languages	3
LING 1536	First-Year Seminar: Storming Off and Slaying the Serpents: Linguistic Approaches to Comparative Mythology	3
LING 2225	Linguistics for Legal Purposes	3
LING 2550	Methods in Linguistic Research	3
LING 3075	Introduction to Sociolinguistics	3
LING 3175	Morphology	3
LING 3185	Linguistic Diversity in the United States	3
LING 3225	Linguistic Pragmatics	3
LING 3250	Introduction to Computational Linguistics	3
LING 3525	Linguistics Seminar	3
LING 3526	Linguistics Seminar: Writing Intensive	3
LING 3550	Historical and Comparative Linguistics	3
LING 4062	Second-Language Acquisition	3

LING 4250	Computation and Learnability in Linguistics Theory	3
LING 4850	Senior Seminar in Linguistics	3
LING 4975	Independent Work for Senior Honors	3-6
LING 5000	Independent Study	3-6
PSYCH 3580	Language Acquistion	3
PSYCH 4330	Psychology of Language	3

Under certain circumstances, majors may count a limited number of relevant courses not listed above toward the elective requirement. Such circumstances include, for example, study abroad and preparation for a specialized capstone. A specific plan of study must be worked out with the director of the Linguistics program in advance of the courses being taken.

Language Requirement

Majors must have a foreign language competency equivalent to one year of study at the college level. Courses taken to complete this requirement do not count towards the 30 total units required for the major.

Capstone Requirement

Primary majors are required to complete a capstone course or project during their Senior year. The capstone requirement can be satisfied by taking one of the courses listed below. Students wishing to count Ling 5000 for their capstone need to have their independent studies approved in advance by the director of the Linguistics program.

Code	Title	Units
LING 3550	Historical and Comparative Linguistics	3
LING 4850	Senior Seminar in Linguistics	3
LING 4975	Independent Work for Senior Honors	3-6
LING 5000	Independent Study	3-6

Additional Information

Study Abroad and Transfer Credits

The maximum number of credits from outside Arts and Sciences that students may apply to the major is 6. This includes credits taken outside of Washington University, such as credits transferred from other US institutions and credits from approved Study Abroad programs.

Senior Honors Thesis

At the end of their Junior year, eligible majors may apply to enter the honors program by submitting a proposal for a senior thesis. To be eligible, a major must have the following:

- An overall University GPA of 3.65 or higher
- A Linguistics GPA of 3.65 or higher

If admitted into the program, the major will register for 3 units of LING 4975 Independent Work For Senior Honors in both fall semester and spring semester of their senior year. The major must complete the thesis and pass an oral defense by the middle of April of their senior year.

Linguistics Minor

Program Requirements

- **Total Units Required**: Students must complete a total of 15 units to complete the minor. At least 9 of these must be at the 3000 level or above.
- **Grade Requirement:** Students must receive a grade of C- or higher in a course to count it toward the minor. Pass/No Pass grades do not count toward the minor.

Requirements

Minors must take the following introductory course:

Code	Title	Units
LING 1600	Introduction to Linguistics	3
Total Units		**3**

Elective Courses

Minors must complete 12 units of electives. At least 6 units must come from the following list:

Code	Title	Units
LING 3050	Phonetics	3
LING 3150	Syntactic Analysis	3
LING 3250	Introduction to Computational Linguistics	3
LING 3350	Phonological Analysis	3
LING 3450	Introduction to Semantics	3

The remaining 6 units may be drawn from the list above, or they may be drawn from the additional courses in the list below:

Code	Title	Units
CLASSICS 2250	Latin and Greek in Current English	3
LING 1526	First-Year Seminar: The Linguistics of Constructed Languages	3
LING 1536	First-Year Seminar: Storming Off and Slaying the Serpents: Linguistic Approaches to Comparative Mythology	3
LING 2225	Linguistics for Legal Purposes	3
LING 2550	Methods in Linguistic Research	3
LING 3075	Introduction to Sociolinguistics	3

LING 3175	Morphology	3
LING 3185	Linguistic Diversity in the United States	3
LING 3225	Linguistic Pragmatics	3
LING 3550	Historical and Comparative Linguistics	3
LING 3525	Linguistics Seminar	3
LING 3526	Linguistics Seminar: Writing Intensive	3
LING 4062	Second-Language Acquisition	3
LING 4850	Senior Seminar in Linguistics	3
LING 4975	Independent Work for Senior Honors	3-6
LING 5000	Independent Study	3-6
PSYCH 3580	Language Acquisition	3
PSYCH 4330	Psychology of Language	3

Mathematics

Mathematics has always held a central position in the liberal arts, and over time, it has also come to play an important role in more and more aspects of our lives. Mathematical analysis and modeling are involved in many areas far beyond the traditional association of mathematics with the physical sciences and engineering. This fact is reflected in the diversity of the students who study at least some mathematics during their time at Washington University — students who recognize the importance of quantitative skills in a world that is becoming more and more technological.

Students major in mathematics for many reasons. Some are planning academic careers in mathematics that involve teaching or research. Others plan to work as actuaries or at other jobs in industry or government. Some plan careers in secondary education. Many majors do not intend to become "mathematicians" at all but simply realize that quantitative training is a valuable asset in many kinds of careers; often, work in mathematics is meant to complement their study in other areas. Other majors view mathematics as an interesting concentration in their liberal arts education, even though they plan to enter professional fields such as medicine or law.

The Mathematics program gives majors and minors a broad introduction to the subject. To fit students' varying academic interests and professional goals, the department offers majors in Mathematics, Applied Mathematics, and Mathematical Sciences, along with two dual majors in Mathematics and Computer Science and in Mathematics and Economics. Majors are encouraged to complete additional work (perhaps even a minor or a second major) in other related areas.

Faculty

Chair

Brett Wick
Professor
PhD, Brown University
Complex analysis; harmonic analysis; operator theory; several complex variables

Director of Graduate Studies

Gregory Knese
Professor
PhD, Washington University
Complex function theory; operators; harmonic analysis

Director of Undergraduate Studies

Ari Stern
Professor
PhD, California Institute of Technology
Geometric numerical analysis; computational mathematics

Associate Director of Undergraduate Studies

Blake Thornton
Teaching Professor
PhD, University of Utah
Geometric topology

Department Faculty

Roya Beheshti Zavareh
Professor
PhD, Massachusetts Institute of Technology
Algebraic geometry

Alan Chang
Assistant Professor
PhD, University of Chicago
Geometric measure theory; harmonic analysis

Quo-Shin Chi
Professor
PhD, Stanford University
Differential geometry

Lawrence Conlon
Professor Emeritus
PhD, Harvard University
Differential topology

Aliakbar Daemi
Assistant Professor
PhD, Harvard University
Gauge theory; low-dimensional topology; symplectic geometry

Parker Evans
William Chauvenet Postdoctoral Lecturer
PhD, Rice University
Differentia geometry

Renato Feres
Professor
PhD, California Institute of Technology
Differential geometry; dynamical systems

Steven Frankel
Associate Professor
PhD, University of Cambridge
Geometric topology; dynamics

Ron Freiwald
Professor Emeritus
PhD, University of Rochester
General topology

Gary R. Jensen
Professor Emeritus
PhD, University of California, Berkeley
Differential geometry

Silas Johnson
Senior Lecturer
PhD, University of Wisconsin–Madison
Algebraic number theory; arithmetic statistics

Matt Kerr
Professor
PhD, Princeton University
Algebraic geometry; Hodge theory

Steven G. Krantz
Professor Emeritus
PhD, Princeton University
Several complex variables; geometric analysis

N. Mohan Kumar
Professor Emeritus
PhD, Bombay University
Algebraic geometry; commutative algebra

Wanlin Li
Assistant Professor
PhD, University of Wisconsin–Madison
Number theory; arithmetic geometry

Hsin-Chieh Liao
William Chauvenet Postdoctoral Lecturer
PhD, University of Miami
Algebraic, enumerative and topological combinatorics

Henri Martikainen
Associate Professor
PhD, University of Helsinki, Finland
Harmonic analysis; geometric measure theory

John E. McCarthy
Spencer T. Olin Professor of Mathematics
PhD, University of California, Berkeley
Analysis; operator theory; one and several complex variables

Charles Ouyang
Assistant Professor
PhD, Rice University
(Higher) Teichmuller theory; Riemann surfaces; harmonic maps and minimal surfaces

Martha Precup
Associate Professor
PhD, University of Notre Dame
Applications of Lie theory to algebraic geometry and the related combinatorics

Donsub Rim
Assistant Professor
PhD, University of Washington
Applied mathematics

Rachel Roberts
Elinor Anheuser Professor of Mathematics
PhD, Cornell University
Low-dimensional topology

Richard Rochberg
Professor Emertius
PhD, Harvard University
Complex analysis; interpolation theory

Karl Schaefer
Lecturer
PhD, University of Chicago
Algebraic number theory

Jack Shapiro
Professor Emeritus
PhD, City University of New York
Algebraic K-theory

John Shareshian
Professor
PhD, Rutgers University
Algebraic and topological combinatorics

Edward Spitznagel
Professor Emeritus
PhD, University of Chicago
Statistics; statistical computation; application of statistics to medicine

Yanli Song
Associate Professor
PhD, Pennsylvania State University
Noncommutative geometry; symplectic geometry; representation theory

Brandon Sweeting
Postdoctoral Lecturer
PhD, University of Cincinnati
Harmonic analysis, operator theory

Xiang Tang
Professor
PhD, University of California, Berkeley
Symplectic geometry; noncommutative geometry; mathematical physics

Mladen Victor Wickerhauser
Professor
PhD, Yale University
Harmonic analysis; wavelets; numerical algorithms for data compression

Edward N. Wilson
Emeriti Professor
PhD, Washington University
Harmonic analysis; differential geometry

David Wright
Emeriti Professor
PhD, Columbia University
Affine algebraic geometry; polynomial automorphisms

Jay Yang
Postdoctoral Lecturer
PhD, University of Wisconsin–Madison
Commutative algebra; algebraic geometry

Majors

- Applied Mathematics Major (p. 699)
- Mathematical Sciences Major (p. 701)
- Mathematics and Computer Science Major (p. 704)
- Mathematics and Economics Major (p. 708)
- Mathematics Major (p. 711)

Minors

- Mathematics Minor (p. 713)

Courses

MATH 1010 Foundations for Calculus
A limited enrollment class for students planning to take calculus but who need additional precalculus preparation. The course aims to build both the technical skills and the conceptual understanding needed to succeed in calculus. Course emphasizes links between the graphical, numeric, and algebraic viewpoints. A variety of approaches are used to present the material. Prerequisites: 2 years of high school algebra and a course in geometry (or the equivalent).
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall, Summer

MATH 1510 Calculus I
Derivatives of algebraic, trigonometric, and transcendental functions, techniques of differentiation, Mean Value Theorem, applications of the derivative. The definite integral and Fundamental Theorem of Calculus. Areas. Simpler integration techniques. Prerequisites: high school algebra and precalculus, including trigonometry.
Credit 3 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Fall, Spring, Summer

MATH 1513 Peer-Led Team Learning: Calculus I
This is an elective one-credit course that can only be taken concurrently with L24 131 Calculus I. The purpose of the course is to encourage students to work in small groups, supervised by a trained peer leader, on problems from the course that are designed to require a collaborative effort and to enhance understanding. Through PLTL sessions, students will gain an understanding of the problem-solving process. They will practice careful and rigorous thinking. They will learn to evaluate and revise their solutions by considering whether their results are reasonable, rather than by looking at an answer key. Grading is Pass/Fail based on participation; a student must attend and participate fully in at least nine of eleven sessions to pass the course. Note: Students may opt to participate in PLTL without enrolling in this optional one-credit elective. Enrollment in the PLTL program occurs through an online application at the beginning of the semester. Once enrolled in the PLTL program, students can then choose to also enroll in this one-credit elective OR to participate in PLTL without the additional credit hour appearing on their transcript. In this course, student groups facilitated by a peer leader meet weekly and work together on a problem set building on topics covered in the parent course, with the aim of developing problem-solving, critical-thinking, and collaboration skills. Sign-ups for PLTL begin in Week 1 of the semester, with meetings beginning on the weekend of Week 2. Students must attend at least eight sessions during the semester to earn credit; those who do not reach the attendance threshold will be dropped from the course, and the course will be removed from their transcript. To receive credit for PLTL, a student must remain enrolled in the parent course. Please note the following exceptions to the enrollment and drop policy: (1) Students will not be able to enroll in PLTL if doing so would bring them above 21 credit units, but they will still be able to participate. (2) Students who wish to participate in PLTL but want to opt-out of receiving credit should contact their course's program manager. (3) If dropping PLTL would bring a student below 12 credit units, the drop will be entered as a withdrawal instead.
Credit 1 unit.
Typical periods offered: Fall, Spring

MATH 1515 Calculus I With Foundations
Math 131E covers the same content as Math 131 but includes the additional review of precalculus concepts integrated throughout the semester. It is aimed at students whose precalculus skills are not yet fully developed. By the end of this course, students should be ready to enroll in Math 132.
Credit 4 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Fall

MATH 1517 Real Mathematical Applications: Solving Problems With Calculus I
The purpose of this course is to show how mathematics can solve real-world problems and how calculus dramatically expands the range of problems that can be tackled. Each class will be devoted to the analysis of some problems, which may include dimensional analysis, the mathematics of convoys, Fibonacci numbers, fractals, linear regression, Euclid's algorithm, Stein's algorithm, network capacities, Braess's paradox, Galton's approach to surnames, how genes spread through populations, and the SIR model of infectious diseases. The first few classes will not use differentiation. Course enrollment preference is given to first-year students. Corequisite: Math 131.
Credit 1 unit. Art: NSM
Typical periods offered: Fall

MATH 1520 Calculus II
Continuation of Math 131. A brief review of the definite integral and Fundamental Theorem of Calculus. Techniques of integration, applications of the integral, sequences and series, Taylor polynomials and series, and some material on differential equations. Prerequisite: Math 131 or a B or better in a one-year high school calculus course, or permission of the department.
Credit 3 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Fall, Spring, Summer

MATH 1523 Peer-Led Team Learning: Calculus II
This is an elective one-credit course that can only be taken concurrently with L24 132 Calulus II. The purpose of the course is to encourage students to work in small groups, supervised by a trained peer leader, on problems from the course that are designed to require a collaborative effort and to enhance understanding. Through PLTL sessions, students will gain an understanding of the problem-solving process. They will practice careful and rigorous thinking They will learn to evaluate and revise their solutions by considering whether their results are reasonable, rather than by looking at an answer key. Grading is Pass/Fail based on participation; a student must attend and participate fully in at least nine of eleven sessions to pass the course. Note: Students may opt to participate in PLTL without enrolling in this optional one-credit elective. Enrollment in the PLTL program occurs through an online application at the beginning of the semester. Once enrolled in the PLTL program, students can then choose to also enroll in this one-credit elective OR to participate in PLTL without the additional credit hour appearing on their transcript. In this course, student groups facilitated by a peer leader meet weekly and work together on a problem set building on topics covered in the parent course, with the aim of developing problem-solving, critical-thinking, and collaboration skills. Sign-ups for PLTL begin in Week 1 of the semester, with meetings beginning on the weekend of Week 2. Students must attend at least eight sessions during the semester to earn credit; those who do not reach the attendance threshold will be dropped from the course, and the course will be removed from their transcript. To receive credit for PLTL, a student must remain enrolled in the parent course. Please note the following exceptions to the enrollment and drop policy: (1) Students will not be able to enroll in PLTL if doing so would bring them above 21 credit units, but they will still be able to participate. (2) Students who wish to participate in PLTL but want to opt-out of receiving credit should contact their course's program manager. (3) If dropping PLTL would bring a student below 12 credit units, the drop will be entered as a withdrawal instead.
Credit 1 unit.
Typical periods offered: Fall, Spring

MATH 1710 Mathematics And Music
An elementary introduction to the connections between mathematics and musical sound. Review of integers, ratios, prime numbers, functions, rationality, exponents, logarithms, trigonometry. Review of scales, clefs, key signatures, intervals, time signatures. Frequency and pitch. The connection between intervals and logarithms. Tuning and temperament, just intonation. Scales and modular arithmetic. The mathematics of harmony; the sound of the low prime numbers and their roles in harmony. Harmonics, partials and overtones. Numerical integration and basic Fourier analysis. The nature of complex tones. Analysis of instrument sounds. Human vowels and formants. Prerequisites: 2 years of high school algebra, and trigonometry.
Credit 3 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Fall, Spring

MATH 1996 Mathematics Elective: 100-Level
This course is for 1000 level transfer credit.
Credit 3 units.
Typical periods offered: Fall, Spring

MATH 2050 Finite Mathematics
Topics from discrete mathematics will be explored with an emphasis on problem-solving and methods of proofs. Modules on counting; combinatorial tools; binomial coefficients and Pascal's triangle; Fibonacci numbers; combinatorial probability; integers, divisors and primes; and graphs will be covered as well as additional topics as time permits. Addressed mainly to college freshmen and sophomores; it would also be suitable to advanced high school students with an interest in mathematics. Prerequisites: A good understanding of high school mathematics.
Credit 3 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Summer

MATH 2130 Calculus III
Multivariable calculus. Topics include differential and integral calculus of functions of two or three variables: vectors and curves in space, partial derivatives, multiple integrals, line integrals, vector calculus at least through Green's Theorem.
Credit 3 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Fall, Spring, Summer

MATH 2133 Peer-Led Team Learning: Calculus III
This is an elective one-credit course that can only be taken concurrently with L24 233 Calculus III. The purpose of the course is to encourage students to work in small groups, supervised by a trained peer leader, on problems from the course that are designed to require a collaborative effort and to enhance understanding. Through PLTL sessions, students will gain an understanding of the problem-solving process. They will practice careful and rigorous thinking. They will learn to evaluate and revise their solutions by considering whether their results are reasonable, rather than by looking at an answer key. Grading is Pass/Fail based on participation; a student must attend and participate fully in at least nine of eleven sessions to pass the course. Note: Students may opt to participate in PLTL without enrolling in this optional one-credit elective. Enrollment in the PLTL program occurs through an online application at the beginning of the semester. Once enrolled in the PLTL program, students can then choose to also enroll in this one-credit elective OR to participate in PLTL without the additional credit hour appearing on their transcript. In this course, student groups facilitated by a peer leader meet weekly and work together on a problem set building on topics covered in the parent course, with the aim of developing problem-solving, critical-thinking, and collaboration skills. Sign-ups for PLTL begin in Week 1 of the semester, with meetings beginning on the weekend of Week 2. Students must attend at least eight sessions during the semester to earn credit; those who do not reach the attendance threshold will be dropped from the course, and the course will be removed from their transcript. To receive credit for PLTL, a student must remain enrolled in the parent course. Please note the following exceptions to the enrollment and drop policy: (1) Students will not be able to enroll in PLTL if doing so would bring them above 21 credit units, but they will still be able to participate. (2) Students who wish to participate in PLTL but want to opt-out of receiving credit should contact their course's program manager. (3) If dropping PLTL would bring a student below 12 credit units, the drop will be entered as a withdrawal instead.
Credit 1 unit.
Typical periods offered: Fall, Spring

MATH 2135 Calculus III Enhanced
An enriched treatment of the topics of Math 233, designed for students with a strong background in differential and integral calculus and serious interest in mathematics. Not offered concurrently with Math 201. Students with credit for 2331 cannot also receive credit for 233 or 201. Prerequisite: score of 5 on Advanced Placement calculus BC, or permission of instructor.
Credit 4 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

MATH 2197 Practical Applications
Credit for internships in Mathematics.
Credit 3 units.
Typical periods offered: Fall, Spring

MATH 2500 Differential Equations
Introduction to ordinary differential equations: first-order equations, linear equations, systems of equations, series solutions, Laplace transform methods, numerical solutions. Prerequisite: Math 233 (or Math 233 concurrently).
Credit 3 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Fall, Spring, Summer

MATH 2801 Honors Mathematics I
This is the first half of a one-year calculus sequence for first year student with a strong interest in mathematics with an emphasis on rigor and proofs. The course begins at the beginning but assumes the students have already studied the material from a more mechanical view. Students who complete both semesters will have complete the material Calc III and other topics that may let them move through the upper level math curriculum more quickly. Sets, functions, real numbers, and methods of proof. The Riemann-Darboux integral, limits and continuity, differentiation, and the fundamental theorems of calculus. Sequences and series of real numbers and of functions. Vector spaces and linear maps. Prerequisite: Score of 5 on the A.P Calculus Exam, BC version, or the equivalent.
Credit 4 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Fall

MATH 2802 Honors Mathematics II
Matrices, linear systems, and determinants. Eigenvalues and eigenvectors, diagonalization, and the spectral theorem. Scalar and vector fields, differential and integral calculus of several variables, and the fundamental theorems of Green, Gauss, and Stokes. Restricted to first year students who have completed Math 203 in the fall semester. Math 204 can replace Math 233 in major/minor requirements.
Credit 4 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Spring

MATH 2996 Mathematics Elective: 200-Level
This course is for 2000 level transfer credit.
Credit 3 units.
Typical periods offered: Fall, Spring, Summer

MATH 3010 Foundations for Higher Mathematics
Introduction to the rigorous techniques used in more advanced mathematics. Topics include propositional logic, use of quantifiers, set theory, methods of proof and disproof (counterexamples), foundations of mathematics. Use of these tools in the construction of number systems, and in other areas such as elementary number theory, combinatorial arguments, and elementary proofs in analysis. Prerequisite: Math 233.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

MATH 3015 Foundations for Higher Mathematics With Writing
Introduction to the rigorous techniques used in more advanced mathematics. Topics include basic logic, set theory, methods of proof and counterexamples, foundations of mathematics, construction of number systems, counting methods, combinatorial arguments and elementary analysis. At least 3 papers will be required, which with at least one revision. Prerequisite: Math 233.
Credit 3 units. A&S IQ: NSM, WI Art: NSM
Typical periods offered: Fall, Spring

MATH 3180 Introduction to Calculus of Several Variables
Selected topics for functions of several variables involving some matrix algebra and presented at a level of rigor intermediate between that of Calculus III and higher level analysis courses. Students may not receive credit toward a mathematics major or minor for both Math 308 and 318. Prerequisites: Math 233 and Math 309. Math 310 is recommended but not required.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

MATH 3280 Elementary Geometry From an Advanced Point of View
A rigorous modern treatment of Euclidean geometry, and an introduction to non-Euclidean geometry. Prereq: Math 310 or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

MATH 3300 Matrix Algebra
An introductory course in linear algebra that focuses on Euclidean n-space, matrices and related computations. Topics include: systems of linear equations, row reduction, matrix operations, determinants, linear independence, dimension, rank, change of basis, diagonalization, eigenvalues, eigenvectors, orthogonality, symmetric matrices, least square approximation, quadratic forms. Introduction to abstract vector spaces. Prerequisite: Math 132.
Credit 3 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Fall, Spring, Summer

MATH 3310 Algebraic Systems
Polynomials, binomial expansions, factoring, rings (integers and polynomials), unique factorization, and other topics relevant to the high school curriculum. Designed for future secondary school teachers and other students looking for a course in algebra at a less abstract level than Math 430. Prerequisite: Math 310 or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

MATH 3410 Introduction to Combinatorics
Basics of enumeration (combinations, permutations and enumeration of functions between finite sets), generating functions; the inclusion-exclusion principle, partition theory and introductory graph theory. As time permits, additional topics may include Ramsey's Theorem, probabilistic methods in combinatorics and algebraic methods in combinatorics. Prerequisites: Math 132, 309 and 310, or permission of the instructor.
Credit 3 units. A&S IQ: NSM, AN Art: NSM
Typical periods offered: Fall, Spring

MATH 3420 Graph Theory
Introduction to graph theory including the basic definitions and theorems and some more advanced topics which drive much current research in graph theory: Ramsey's Theorem, random graph theory and, if time permits, Szemeredi's regularity lemma. Graphs will be studied as abstract objects; however graph theory is also of interest to applied mathematicians because graphs are natural models for networks (social, electric,...). Prerequisite: Math 310 or a roughly equivalent course, or permission of instructor. Students should know what a proof is and how to produce one. Some informal understanding of probability will be helpful, but students need not have taken a probability course.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

MATH 3520 Differential Equations and Dynamical Systems
Linear systems of differential equations. Dynamical systems and flows. Bifurcations. Limit Cycles. Chaos. Prerequisites: Math 233 and Math 309. Note: Math 217 is not a prerequisite.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

MATH 3550 Mathematics for the Physical Sciences
Continuation of Math 233 emphasizing topics of interest in the physical sciences. Topics in multivariable and vector calculus (div, grad, curl); line, surface integrals and connections to electromagnetism; Fourier series and integrals; boundary value problems (diffusion and wave equations); additional topics if time permits. Students may not receive credit toward a math major or minor for both Math 308 and Math 318. Prerequisite: Math 233 and 217, or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI
Typical periods offered: Spring

MATH 3590 Topics in Applied Mathematics
Topics change with each offering of the course. Past topics have included Mathematics and Multimedia, The Mathematics and Chemistry of Reaction-Diffusion Systems, Mathematical Biology, and Simulation Analysis of Random Processes and Intrrduction to Monte Carlo Methods. Prerequisites will vary, but always include at least Math 233, Math 309 and basic programming skills in some language.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

MATH 3996 Mathematics Elective: 300-Level
This course is for 3000 level transfer credit.
Credit 3 units.
Typical periods offered: Fall, Spring, Summer

MATH 4000 Undergraduate Independent Study
Credit for independent research. Approval of instructor required.
Credit 3 units.
Typical periods offered: Fall, Spring

MATH 4001 Honors Seminar in Math
Honors seminar in Math. Course description TBD.
Credit 3 units.
Typical periods offered: Spring

MATH 4101 Introduction to Analysis
The real number system and the least upper bound property; metric spaces (completeness, compactness, and connectedness); continuous functions (in R^n; on compact spaces; on connected spaces); C(X) (pointwise and uniform convergence; Weierstrass approximation theorem); differentiation (mean value theorem; Taylor's theorem); the contraction mapping theorem; the inverse and implicit function theorems. Prerequisite: Math 310 or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

MATH 4102 Introduction to Lebesgue Integration
Riemann integration; measurable functions; measures; Lebesgue measure; the Lebesgue integral; integrable functions; L^p spaces; modes of convergence; decomposition of measures; product measures. Prerequisite: Math 4111 or permission of the instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

MATH 4150 Introduction to Fourier Series and Integrals
The basic theory of Fourier series and Fourier integrals including different types of convergence. Applications to certain differential equations. Prerequisites: Math 4111 or permission of instructor.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall

MATH 4160 Complex Variables
Analytic functions, elementary functions and their properties, line integrals, the Cauchy integral formula, power series, residues, poles, conformal mapping and applications. Prereq: Math 310 and (Math 318 or Math 4111), or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

MATH 4193 Topics in Analysis
This is an introduction to Ito Calculus and Stochastic Differential Equations with applications. Prerequisite: Math 493 or equivalent. Math 4121 (Lebesgue Integration) is recommended but not required as the necessary concepts from measure theory will be reviewed throughout the course.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall, Spring

MATH 4201 Topology I
An introduction to the most important ideas of topology. Course includes necessary ideas from set theory, topological spaces, subspaces, products and quotients, compactness and connectedness. Some time is also devoted to the particular case of metric spaces (including topics such as separability, completeness, completions, the Baire Caregory Theorem, and equivalents of compactness in metric spaces). Prerequisite: Math 4111 or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

MATH 4202 Topology II
A continuation of Math 4171 featuring more advanced topics in topology. The content may with each offering. Prerequisite: Math 4171, or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

MATH 4220 An Introduction to Differential Geometry
A study of properties of curves and surfaces in 3-dimensional Euclidean space. The course is essentially a modern recounting of a seminal paper of Gauss. Prerequisites: Math 233, Math 309, Math 310.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Spring

MATH 4301 Linear Algebra
This course is an introduction to the linear algebra of finite-dimensional vector spaces. It includes systems of equations, matrices, determinants, inner product spaces, and spectral theory. Prerequisite: Math 310 or permission of instructor. Math 309 is not an explicit prerequisite, but students should already be familiar with such basic topics from matrix theory as matrix operations, linear systems, row reduction, and Gaussian elimination. (Material on these topics in early chapters of the text will be covered very quickly.)
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

MATH 4302 Modern Algebra
Introduction to groups, rings, and fields. Includes permutation groups, group and ring homomorphisms, field extensions, connections with linear algebra. Prerequisite: Math 310, Math 429 or permission of the instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

MATH 4350 Number Theory and Cryptography
The course will cover many of the basics of elementary number theory, providing a base from which to approach modern algebra, algebraic number theory and analytic number theory. It will also introduce one of the most important real-world applications of mathematics, namely the use of number theory and algebraic geometry in public key cryptography. Topics from number theory involve divisibility (Euclidean algorithm, primes, Fundamental Theorem of Arithmetic), congruences (modular arithmetic, Chinese Remainder Theorem, primality testing and factorization). Topics from cryptography will include RSA encryption, Diffie-Hellman key exchange and elliptic curve cryptography. Topics about algebraic numbers may be include if time permits. Prerequisites: Math 233, 309 and 310 (or permission of instructor)
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

MATH 4360 Algebraic Geometry
Introduction to affine and projective algebraic varieties, the Zariski topology, regular and rational mappings, simple and singular points, divisors and differential forms, genus, the Riemann-Roch theorem. Prerequisites: Math 310, 429, and 430, or permission of the instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

MATH 4393 Topics in Algebra
Topics vary each semester.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall, Spring

MATH 4493 Topics in Graph Theory
Analytic combinatorics is the study of counting sequemces associated to combinatorial configurations and breaks up into two complementary components. First, we systematically encode and study counting problems through the use of power series (generating functions). Second, the analytic properties of these power series are used to understand the growth of counting sequences. Some examples are counting structured strings, functions, permutations, trees, and lattice paths. The principal analytic technique will be complex analysis and the course will include a user's self-contained introduction to complex analysis. Time permitting, we may study counting problems with parameters which naturally leads to multivariable generating functions and allows us to investigate statistical properties of counting sequences. Prerequisites: Math 310.
Credit 3 units. A&S IQ: NSM
Typical periods offered: Fall, Spring

MATH 4501 Numerical Applied Mathematics
Computer arithmetic, error propagation, condition number and stability; mathematical modeling, approximation and convergence; roots of functions; calculus of finite differences; implicit and explicit methods for initial value and boundary value problems; numerical integration; numerical solution of linear systems, matrix equations, and eigensystems; Fourier transforms; optimization. Various software packages may be introduced and used. Prerequisites: Math 217 or 312, Math 309, Math 310 and CSE 131 (or other computer background with permission of the instructor).
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

MATH 4502 Topics in Applied Mathematics
Topic may vary with each offering of the course. Prerequisite: CSE 131 and, Math 449, or permission of the instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Spring

MATH 4540 Partial Differential Equations
Introduction to the theory of PDE's with applications to selected classical problems in physics and engineering. Linear and quasilinear first order equations, derivation of some of the classical PDE's of physics, and standard solution techniques for boundary and initial value problems. Preliminary topics such as orthogonal functions, Fourier series, and variational methods introduced as needed. Prerequisites: Math 217 or 312, Math 309, and Math 310, or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

MATH 4560 Topics in Financial Mathematics
An introduction to the principles and methods of financial mathematics, with a focus on discrete-time stochastic models. Topics include no-arbitrage pricing of financial derivatives, risk-neutral probability measures, the Cox-Ross-Rubenstein and Black-Scholes-Merton options pricing models, and implied volatility. Prerequisites: Math 233, Math 3200, Math 310 or permission of instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

MATH 4570 The Mathematics of Quantum Theory
An introduction to the mathematical foundations of quantum theory aimed at advanced undergraduate/beginning graduate students in Mathematics and Engineering, although students from other disciplines are equally welcome to attend. Topics include: the mathematical postulates of quantum theory and simple physical systems, spectral theory of self-adjoint operators, rudiments of Lie groups, Lie algebras and unitary group representations, elements of quantum probability and quantum information theory. Prerequisites: Linear algebra at the level of Math 429 or equivalent, multivariate calculus at the level of Math 318, and basic probability theory at the undergraduate level such as Math 493 or instructor's permission.

Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall

MATH 4590 Topics in Applied Mathematics:
An introduction to the theory of group representations and some of its applications. Topics include: general facts about group and linear algebra; linear representations of finite and compact groups; Lie groups and Lie algebras; applications to partial differential equations and quantum theory. Prerequisites: Math 309 and 318 or permission from the instructor.
Credit 3 units. A&S IQ: NSM Art: NSM
Typical periods offered: Fall, Spring

MATH 4595 Topics in Applied Mathematics
Topics vary each semester.
Credit 3 units.
Typical periods offered: Fall

MATH 4996 Mathematics Elective: 400-Level
This course is for 4000 level transfer credit.
Credit 3 units.
Typical periods offered: Fall, Spring, Summer

Applied Mathematics Major

Program Requirements

- **Total Units Required:** 42
- **Grade Requirement:** All required courses (both lower- and upper-level) must be taken for a letter grade and completed with a grade of C– or better.

Required Courses

- The three-course calculus sequence (9 units)* and an introductory computer science course (3 units)**:

Code	Title	Units
MATH 1510	Calculus I	3
MATH 1520	Calculus II	3
MATH 2130	Calculus III	3
CSE 1301	Introduction to Computer Science	3
Total Units		**12**

* AP credit may be applied in place of MATH 1510 and/or MATH 1520. Students who have completed MATH 2801 Honors Mathematics I and MATH 2802 Honors Mathematics II will be considered to have fulfilled the calculus-sequence requirement.

** This course may be waived after consultation with the director of undergraduate studies of the Department of Computer Science & Engineering.

- The following required upper-level courses (24 units):*

Code	Title	Units
MATH 3010	Foundations for Higher Mathematics	3
or MATH 3015	Foundations for Higher Mathematics With Writing	
MATH 4101	Introduction to Analysis	3
MATH 4102	Introduction to Lebesgue Integration	3
MATH 4301	Linear Algebra	3
MATH 4501	Numerical Applied Mathematics	3
MATH 4502	Topics in Applied Mathematics	3
At least two of the following:		
MATH 4150	Introduction to Fourier Series and Integrals	3
MATH 4160	Complex Variables	3
MATH 4350	Number Theory and Cryptography	3
MATH 4540	Partial Differential Equations	3

* Students who take MATH 2801 and MATH 2802 are recommended to bypass MATH 3010/MATH 3015, for which they may substitute any other upper-level Mathematics course.

- Two additional upper-level (numbered 3000 or higher) Mathematics courses that have not been used to fulfill any other requirement (6 units).

Additional Information

Course Substitutions

At most one approved substitution can be made using a course outside the Department of Mathematics.

In general, the following courses can count as upper-level Mathematics electives, but specifics may vary for the various majors in the department (e.g., those requiring electives to be taken from a specific list):

Code	Title	Units
ESE 3190	Engineering Mathematics B	3
ESE 4030	Operations Research	3
PHYSICS 5010	Theoretical Physics	3
PHYSICS 5020	Methods of Theoretical Physics II	3
SDS 4010	Probability	3
SDS 4720	Stochastic Processes	3

Additional Requirements

1. A student cannot declare more than one major or minor in the department. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.

2. No *upper-level* course used to satisfy a major requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
3. At most 3 units of independent study or research work can count toward the major requirements.
4. Students may count courses from the Department of Statistics and Data Science (SDS) as Mathematics courses if the student matriculated in 2023-24 or earlier and if the course was previously offered by the Department of Mathematics and Statistics, as reflected by the student's matriculation-year Bulletin.
5. At most one of the following courses can be used to fulfill major requirements: MATH 3180 Introduction to Calculus of Several Variables or MATH 3550 Mathematics for the Physical Sciences.
6. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
   a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
   b. At least half of the upper-level units required in a major must be earned at Washington University or in a Washington University-approved overseas study program.
   c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill major requirements.

Latin Honors

At the time of graduation, the Department of Mathematics will recommend that a candidate receive Latin Honors (*cum laude*, *magna cum laude*, or *summa cum laude*) if that student has completed the department's requirements for High Distinction or Highest Distinction in Mathematics, including an Honors Thesis. The actual award of Latin Honors is managed by the College of Arts & Sciences.

The Honors Thesis

Arts & Sciences mathematics majors who want to be candidates for Latin Honors, High Distinction, or Highest Distinction must complete an honors thesis. Writing an honors thesis involves a considerable amount of independent work, reading, creating mathematics, writing a paper that meets acceptable professional standards, and making an oral presentation of the results.

Types of Projects

An honors thesis can take two forms:

1. A thesis that presents significant work by the student on one or more nontrivial mathematics problems.
2. A substantial expository paper that follows independent study on an advanced topic under the guidance of a department faculty member. Such a report would involve the careful presentation of ideas and the synthesis of materials from several sources.

Process and Suggested Timeline

Junior Year, Spring Semester:

1. Talk with a faculty advisor about possible projects.
2. Complete the Honors Proposal Form and submit it to Blake Thornton.

Senior Year:

1. By the end of January, provide the advisor with a draft abstract and outline of the paper.
2. By the end of February, submit a rough draft, including an abstract, to the advisor.
3. The student and the advisor should agree on a date that the writing will be complete and on a date and time for the oral presentation in mid-March (the deadline is March 31).

Departmental Prizes

Each year, the department considers graduating majors for two departmental prizes and also awards a prize to juniors. Recipients are recognized at an annual awards ceremony in April where graduating majors each receive a certificate and a set of honors cords to be worn as part of the academic dress at Commencement. Awards are noted on the student's permanent university record.

Ross Middlemiss Prize

The Ross Middlemiss Prize is awarded to a graduating major with an outstanding record. The award was established by former Professor Ross Middlemiss, who taught at Washington University for 40 years. Middlemiss authored several books, including a widely popular calculus text that was used in courses offered by the School of Continuing & Professional Studies until the late 1970s.

Martin Silverstein Award

The Martin Silverstein Award was established in memory of Professor Martin Silverstein, who, until his death in 2004, was a pioneer in work at the interface of probability theory and harmonic analysis. Graduating students completing any major we offer will be considered for this award, but preference is given to those who have done excellent work in applied mathematics or analysis.

Brian Blank Award

The Brian Blank Award was established in memory of Professor Brian Blank, who passed away in 2018. Each year, the Department of Mathematics selects distinguished juniors who have declared a major in the department to receive this award.

Distinctions in Applied Mathematics

Distinction

- Complete at least 33 units of upper-level Mathematics courses.
- The GPA for these 33 upper-level units must be at least 3.7. If more than 33 units are taken for a letter grade, the courses with the lowest grades can be omitted when computing the GPA for this purpose.

- Complete at least five courses numbered 4000 or higher, each with a grade of B or better.
- All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis.

Highest Distinction

- Complete all requirements for High Distinction.
- Complete at least five courses numbered 4000 or higher, each with a grade of B+ or better. These courses can be the same five courses used for the Distinction requirement, but the grades must be B+ or better.
- Complete one of the two paths described below:
  - **Graduate Qualifier Path:** Graduate qualifying courses* in Mathematics are two- or three-semester sequences that start in the fall, with a qualifying exam held at the end of each semester. Students must complete and pass two qualifying courses* and their corresponding qualifying exams. (These can be consecutive courses in the same sequence, or they can be courses from two different sequences.)
  - **Coursework Path:**
    - Complete at least 42 units of upper-level Mathematics courses. The GPA for these 42 upper-level units must be at least 3.7. If more than 42 units are taken for a letter grade, the courses with the lowest grades can be omitted when computing the GPA for this purpose.
    - Complete at least nine total courses numbered 4000 or higher, all with a grade of B+ or better. These courses can include the five courses taken for Distinction. All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

* These qualifying courses can count toward the additional course requirements for Distinction.

Mathematical Sciences Major

Program Requirements

- **Total Units Required:** 36
- **Grade Requirement:** All required courses (both lower- and upper-level) must be taken for a letter grade and completed with a grade of C– or better.

Required Courses

- The three-course calculus sequence (9 units)* and an introductory computer science course (3 units)**:

Code	Title	Units
MATH 1510	Calculus I	3
MATH 1520	Calculus II	3
MATH 2130	Calculus III	3
CSE 1301	Introduction to Computer Science	3
Total Units		**12**

* AP credit may be applied in place of MATH 1510 and/or MATH 1520. Students who have completed MATH 2801 Honors Mathematics I and MATH 2802 Honors Mathematics II will be considered to have fulfilled the calculus-sequence requirement.

** This course may be waived after consultation with the director of undergraduate studies of the Department of Computer Science & Engineering.

- The following required upper-level courses (9 units):*

Code	Title	Units
MATH 3010	Foundations for Higher Mathematics	3
or MATH 3015	Foundations for Higher Mathematics With Writing	
MATH 3300	Matrix Algebra	3
SDS 3020	Elementary to Intermediate Statistics and Data Analysis	3

* Students who take MATH 2801 and MATH 2802 are recommended to bypass MATH 3010/MATH 3015 and MATH 3300, for which they may substitute any other upper-level Mathematics courses.

- One of the following full-year 4000-level sequences (6 units):*

Code	Title	Units
MATH 4101	Introduction to Analysis	6
and MATH 4102	Introduction to Lebesgue Integration	
or		
MATH 4201	Topology I	6
and MATH 4202	Topology II	

or		
MATH 4301	Linear Algebra	3
and MATH 4302	Modern Algebra	
or		
MATH 4501	Numerical Applied Mathematics	6
and MATH 4502	Topics in Applied Mathematics	

* Students whose primary major is secondary education may fulfill this requirement by taking MATH 3310 Algebraic Systems and MATH 4220 An Introduction to Differential Geometry (or another geometry course by departmental approval).

- At least one course from the following list that has not already been used to fulfill any of the previous requirements listed (3 units):

Code	Title	Units
MATH 3410	Introduction to Combinatorics	3
MATH 3420	Graph Theory	3
MATH 4101	Introduction to Analysis	3
MATH 4150	Introduction to Fourier Series and Integrals	3
MATH 4160	Complex Variables	3
MATH 4201	Topology I	3
MATH 4301	Linear Algebra	3
MATH 4350	Number Theory and Cryptography	3
MATH 4501	Numerical Applied Mathematics	3
MATH 4540	Partial Differential Equations	3

- Two additional upper-level (numbered 3000 or higher) courses in Mathematics or Statistics and Data Science that have not been used to fulfill any other requirement (6 units).

Additional Information

Course Substitutions

At most one approved substitution can be made using a course outside the Department of Mathematics.

In general, the following courses can count as upper-level Mathematics electives, but specifics may vary for the various majors in the department (e.g., those requiring electives to be taken from a specific list):

Mathematics and Computer Science Major

Program Requirements

- **Total Units Required:** 51
- **Grade Requirement:** All required courses (both lower- and upper-level) must be taken for a letter grade and completed with a grade of C– or better.

This major, developed through a collaboration between the McKelvey School of Engineering and the College of Arts & Sciences, efficiently captures the intersection of the complementary studies of computer science and math.

McKelvey Engineering students who declare this major must fulfill the core course requirements listed below and all other requirements for the Applied Science degree in the McKelvey School of Engineering. They must also complete ENGR 3100 Technical Writing and 8 units of courses designated as NSM (Natural Sciences & Math) from Anthropology (ANTHRO), Biology and Biomedical Sciences (BIOL), Chemistry (CHEM), Earth, Environmental, and Planetary Sciences (EEPS), Physics (PHYSICS), or Environmental Studies (ENST).

Arts & Sciences students who declare this major must fulfill the distribution requirements and all other requirements for the Bachelor of Arts (BA) degree in addition to the specific requirements listed below.

Core Course Requirements*

Code	Title	Units
CSE 1301	Introduction to Computer Science	3
CSE 2400	Logic and Discrete Mathematics **	3
CSE 2407	Data Structures and Algorithms	3
CSE 3407	Analysis of Algorithms	3
MATH 1510	Calculus I **	3
MATH 1520	Calculus II **	3
MATH 2130	Calculus III **	3
MATH 3010 Foundations for Higher Mathematics ** **or** MATH 3015 Foundations for Higher Mathematics With Writing **		3
MATH 3300	Matrix Algebra **	3
SDS 3020 Elementary to Intermediate Statistics and Data Analysis **or** SDS 3030 Statistics for Data Science I **or** ESE 3260 Probability and Statistics for Engineering		3
Total Units		**30**

* Each of these core courses must be passed with a C- or better.

** AP credit may be applied in place of MATH 1510 and/or MATH 1520. Students who complete the MATH 2801 Honors Mathematics I and MATH 2802 Honors Mathematics II sequence will be considered to have completed MATH 1510, MATH 1520, MATH 2130, and CSE 2400; these students are also recommended to bypass MATH 3010/MATH 3015 and MATH 3300, for which they may substitute any other upper-level Mathematics courses.

Electives

Seven upper-level courses from Math or Computer Science & Engineering can be chosen from the approved list, with the following caveats:

- At least three courses must be taken from CSE and at least three courses must be taken from Math.
- At most one preapproved course from outside both departments can be selected.
- CSE 4000 or CSE 4001 Independent Study may be taken for a maximum of 3 units and must be approved by a CS+Math review committee.
- For each of the following pairs of electives, students may count one as an elective toward the major but not both:
  - CSE 2107 Introduction to Data Science **or** BME 4400 Biomedical Data Science
  - CSE 4107 Introduction to Machine Learning **or** ESE 4170 Introduction to Machine Learning and Pattern Classification
  - CSE 4109 Introduction to AI for Health **or** CSE 5310 AI for Health
  - MATH 4560 Topics in Financial Mathematics **or** ESE 4270 Financial Mathematics

Additional Information

1. A student cannot declare more than one major or minor in the Department of Mathematics. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.
2. No *upper-level* course used to satisfy a major requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
3. At most 3 units of independent study or research work can count toward the major requirements.
4. Students may count courses from the Department of Statistics and Data Science (SDS) as Mathematics courses if the student matriculated in 2023-24 or earlier and if the course was previously offered by the Department of Mathematics and Statistics, as reflected by the student's matriculation-year (p. 17)Bulletin *(p. 17)*.
5. At most one of the following courses can be used to fulfill major requirements: MATH 3180 Introduction to Calculus of Several Variables or MATH 3550 Mathematics for the Physical Sciences.
6. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
   a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
   b. At least half of the upper-level units required in a major must be earned at Washington University or in a Washington University-approved overseas study program.
   c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill major requirements.

Latin Honors

At the time of graduation, the Department of Mathematics will recommend that a candidate receive Latin Honors (*cum laude*, *magna cum laude*, or *summa cum laude*) if that student has completed the department's requirements for High Distinction or Highest Distinction in Mathematics, including an Honors Thesis. The actual award of Latin Honors is managed by the College of Arts & Sciences.

The Honors Thesis

Arts & Sciences mathematics majors who want to be candidates for Latin Honors, High Distinction, or Highest Distinction must complete an honors thesis. Writing an honors thesis involves a considerable amount of independent work, reading, creating mathematics, writing a paper that meets acceptable professional standards, and making an oral presentation of the results.

Types of Projects

An honors thesis can take two forms:

1. A thesis that presents significant work by the student on one or more nontrivial mathematics problems.
2. A substantial expository paper that follows independent study on an advanced topic under the guidance of a department faculty member. Such a report would involve the careful presentation of ideas and the synthesis of materials from several sources.

Process and Suggested Timeline

Junior Year, Spring Semester:

1. Talk with a faculty advisor about possible projects.
2. Complete the Honors Proposal Form and submit it to Blake Thornton.

Senior Year:

1. By the end of January, provide the advisor with a draft abstract and outline of the paper.
2. By the end of February, submit a rough draft, including an abstract, to the advisor.
3. The student and the advisor should agree on a date that the writing will be complete and on a date and time for the oral presentation in mid-March (the deadline is March 31).

Departmental Prizes

Each year, the department considers graduating majors for two departmental prizes and also awards a prize to juniors. Recipients are recognized at an annual awards ceremony in April where graduating majors each receive a certificate and a set of honors cords to be worn as part of the academic dress at Commencement. Awards are noted on the student's permanent university record.

Ross Middlemiss Prize

The Ross Middlemiss Prize is awarded to a graduating major with an outstanding record. The award was established by former Professor Ross Middlemiss, who taught at Washington University for 40 years. Middlemiss authored several books, including a widely popular calculus text that was used in courses offered by the School of Continuing & Professional Studies until the late 1970s.

Martin Silverstein Award

The Martin Silverstein Award was established in memory of Professor Martin Silverstein, who, until his death in 2004, was a pioneer in work at the interface of probability theory and harmonic analysis. Graduating students completing any major we offer will be considered for this award, but preference is given to those who have done excellent work in applied mathematics or analysis.

Brian Blank Award

The Brian Blank Award was established in memory of Professor Brian Blank, who passed away in 2018. Each year, the Department of Mathematics selects distinguished juniors who have declared a major in the department to receive this award.

Distinctions in Mathematics and Computer Science

Distinction

- For Distinction in Mathematics and Computer Science, a student must take an additional two electives for a total of nine electives.
- The student's GPA in the nine electives must be at least 3.7. If the student takes additional courses that satisfy these requirements, the courses with the lowest grades may be omitted when calculating the GPA for this purpose.
- The student must complete at least four courses from the list of approved courses, each with a grade of B or better. These courses can be in either department (i.e., Mathematics or Computer Science & Engineering) and must be classroom courses, not independent study. The list of courses will be maintained by both departments. Current approved courses include the following:

Code	Title	Units
MATH 4101	Introduction to Analysis	3
MATH 4102	Introduction to Lebesgue Integration	3
MATH 4201	Topology I	3
MATH 4202	Topology II	3
MATH 4301	Linear Algebra	3
MATH 4302	Modern Algebra	3
MATH 4350	Number Theory and Cryptography	3
MATH 4493	Topics in Graph Theory	3
MATH 4501	Numerical Applied Mathematics	3
MATH 4502	Topics in Applied Mathematics	3
MATH 4560	Topics in Financial Mathematics	3
CSE 4101	AI and Society	3
CSE 4106	Data Science for Complex Networks	3
CSE 4107	Introduction to Machine Learning	3
CSE 4207	Cloud Computing with Big Data Applications	3
CSE 4402	Introduction to Cryptography	3
CSE 4470	Introduction to Formal Languages and Automata	3
CSE 4608	Introduction to Quantum Computing	3
CSE 5103	Theory of Artificial Intelligence and Machine Learning	3
CSE 5104	Data Mining	3
CSE 5105	Bayesian Methods in Machine Learning	3
CSE 5106	Multi-Agent Systems	3
CSE 5107	Machine Learning	3
CSE 5108	Human-in-the-Loop Computation	3
CSE 5401	Advanced Algorithms	3
CSE 5403	Algorithms for Nonlinear Optimization	3
CSE 5404	Special Topics in Computer Science Theory	3
CSE 5406	Computational Geometry	3
CSE 5504	Geometric Computing for Biomedicine	3
CSE 5801	Approximation Algorithms	3
CSE 5807	Algorithms for Computational Biology	3

High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis in either department (Mathematics or Computer Science & Engineering).

Highest Distinction

- Complete the requirements for High Distinction.
- Complete one of the two paths described below:
  - **Graduate Qualifier Path:** Graduate qualifying courses* in Mathematics are two- or three-semester sequences that start in the fall, with a qualifying exam held at the end of each semester. Students must complete and pass two qualifying courses* and their corresponding qualifying exams. (These can be consecutive courses in the same sequence, or they can be courses from two different sequences.)
  - **Coursework Path:** Complete three additional electives for a total of 12 courses. As with Distinction, the student's GPA in the 12 electives must be at least 3.7, and additional courses beyond 12 can be disregarded when calculating the GPA. The 12 electives must include at least eight courses selected from the list under Distinction, with the student earning a grade of B+ or better in each course. At least two of these eight courses must be from each department (Mathematics and Computer Science & Engineering).

* These qualifying courses can count toward the additional course requirements for Distinction.

Email: mathadvising@wustl.edu
Website: http://math.wustl.edu

Mathematics and Economics Major

Program Requirements

- **Total Units Required:** 57
- **Grade Requirement:** All required courses (both lower- and upper-level) must be taken for a letter grade and completed with a grade of C– or better.

Required Courses*

Code	Title	Units
CSE 1301	Introduction to Computer Science	3
ECON 1501	Introduction to Microeconomics	3
ECON 1502	Introduction to Macroeconomics	3
ECON 3150 Introduction to Econometrics **or** ECON 4150 Introduction to Econometrics With Writing		3
ECON 4001	Intermediate Microeconomic Theory	3
ECON 4002	Intermediate Macroeconomic Theory	3
MATH 1510	Calculus I	3
MATH 1520	Calculus II	3
MATH 2130	Calculus III	3
MATH 3010 Foundations for Higher Mathematics **or** MATH 3015 Foundations for Higher Mathematics With Writing		3
MATH 3300	Matrix Algebra	3
SDS 3020 Elementary to Intermediate Statistics and Data Analysis **or** SDS 3030 Statistics for Data Science I **or** SDS 4010 Probability		3
Total Units		**36**

* Students who complete the MATH 2801 Honors Mathematics I and MATH 2802 Honors Mathematics II sequence will be considered to have completed MATH 1510, MATH 1520, and MATH 2130. These students are also recommended to bypass MATH 3010/MATH 3015 and MATH 3300, for which they may substitute any other upper-level Mathematics courses.

Elective Courses

Majors must complete seven electives drawn from the lists below. Three electives must be drawn from the Economics list, and three electives must be drawn from the Mathematics list. The remaining elective may come from either department or from the preapproved elective list below.

Economics

One of the three Economics electives can be any Economics course with ECON 4001 or ECON 4002 as a prerequisite, including from an approved study abroad program. The other two Economics electives must come from the following list:

Code	Title	Units
ECON 4151	Applied Econometrics	3
ECON 4160	Topics in Econometrics: Microeconometrics	3
ECON 4210	Topics in Financial Economics: Asset Pricing	3
ECON 4211	Topics in Financial Economics: Investments	3
ECON 4220	Open Economy Macroeconomics	3
ECON 4230	The Economics of Financial Intermediation	3
ECON 4310	Behavioral Economics and Experimental Economics	3
ECON 4312	Game Theory and Social Behavior	3
ECON 4315	Market Design	3
ECON 4320	Auction Theory and Practice	3
ECON 4325	Public Finance	3
ECON 4335	Industrial Organization	3
ECON 4345	Labor Economics	3
ECON 4360	Urban Economics	3
ECON 4380	Current Topics in Health Economics	3
ECON 4410	Macroeconomics of Inequality	3
ECON 4420	Computational Macroeconomics	3
ECON 4425	Macro Public Finance: Inequality, Redistribution, and Insurance	3
ECON 4510	Development Economics	3
ECON 4710	Game Theory	3
ECON 4720	Optimization and Economic Theory	3

Mathematics

The three Mathematics electives must come from the following list:

Code	Title	Units
MATH 3180	Introduction to Calculus of Several Variables *	3
MATH 3420	Graph Theory	3
MATH 3520	Differential Equations and Dynamical Systems *	3
MATH 4101	Introduction to Analysis	3
MATH 4102	Introduction to Lebesgue Integration	3
MATH 4150	Introduction to Fourier Series and Integrals	3
MATH 4160	Complex Variables	3
MATH 4301	Linear Algebra	3
MATH 4501	Numerical Applied Mathematics	3
MATH 4502	Topics in Applied Mathematics	3

MATH 4540	Partial Differential Equations	3
MATH 4560	Topics in Financial Mathematics	3
SDS 4010	Probability *	3
SDS 4720	Stochastic Processes	3

* Students choosing both MATH 3180 and MATH 3520 must complete four Mathematics electives from the list above. SDS 4010 can be taken for elective credit in the major if SDS 3020 or SDS 3030 is completed to satisfy the core requirements.

Preapproved Electives

One elective in the major can come from the following list:

Code	Title	Units
SDS 4020	Mathematical Statistics	3
SDS 4110	Experimental Design	3
SDS 4155	Time Series Analysis	3
SDS 4130	Linear Statistical Models	3
SDS 4140	Advanced Linear Statistical Models	3
SDS 4210	Statistical Computation	3
SDS 4310	Bayesian Statistics	3
SDS 4430	Statistical Learning	3
SDS 4440	Mathematical Foundations of Data Science	3

Additional Information

- Students cannot declare more than one major or minor in the Department of Economics. This restriction includes dual majors, such as Mathematics and Economics (and Economics and Computer Science). Dual majors are considered "in the department" even if they are declared in another department.
- It is possible to earn the Financial Economics Specialization in conjunction with this major (prime or second).
- With instructor permission, students may use any of the following for economics elective credit: ECON 8010, ECON 8011, ECON 8020, ECON 8021, ECON 8110, or ECON 8710.
- AP credit for ECON 1501, ECON 1502, MATH 1510, and/or MATH 1520 is accepted in the major. Consult with the Department of Mathematics and the Department of Economics for International Baccalaureate and British A-level policies.

Study Abroad

- Majors selecting an approved study abroad program (for one semester) may receive transfer credit for ECON 3150. **Note:** Many study abroad programs in Europe do not offer the equivalent of ECON 3150 in the spring semester. A grade of C (or higher) is required in study abroad coursework. Preapproval from the Department of Economics' study abroad advisor is required.
- Majors selecting an approved study abroad program (for one semester) may also receive transfer credit for up to two economics electives. (Majors completing two economics electives abroad are required to complete four economics electives in the major.) A grade of C (or higher) is required in study abroad course work. Preapproval from the department's study abroad advisor is required.
- Majors selecting an approved study abroad program for a full year of study will be handled on a case-by-case basis in terms of meeting degree requirements.

Transfer Credit

- Transfer credit — including study abroad approval — for economics courses, for mathematics courses, for probability/statistics courses, or for CSE 1301 is approved by the respective departments and is accepted for major credit.
- Majors may receive a maximum of 6 units of transfer credit from other colleges/universities to replace ECON 1501 and ECON 1502 (3 units of transfer credit per course). A minimum grade of C– must be earned. Preapproval by the Academic Coordinator (dottie@wustl.edu) in the Department of Economics is required.

For further details on policies and procedures, please refer to the Undergraduate Guide and the Department of Economics' website, or schedule a meeting with the department's Academic Coordinator (dottie@wustl.edu).

Additional Requirements

1. A student cannot declare more than one major or minor in the Department of Mathematics. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.
2. No *upper-level* course used to satisfy a major requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
3. Students may count courses from the Department of Statistics and Data Science (SDS) as Mathematics courses if the student matriculated in 2023–24 or earlier and if the course was previously offered by the Department of Mathematics and Statistics, as reflected by the student's matriculation-year (p. 17)Bulletin *(p. 17).*
4. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
   a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
   b. At least half of the upper-level units required in a major must be earned at Washington University or in a Washington University-approved overseas study program.
   c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill major requirements.

Latin Honors

At the time of graduation, the Department of Mathematics will recommend that a candidate receive Latin Honors (*cum laude*, *magna cum laude*, or *summa cum laude*) if that student has completed the department's requirements for High Distinction or Highest Distinction in Mathematics, including an Honors Thesis. The actual award of Latin Honors is managed by the College of Arts & Sciences.

The Honors Thesis

Arts & Sciences mathematics majors who want to be candidates for Latin Honors, High Distinction, or Highest Distinction must complete an honors thesis. Writing an honors thesis involves a considerable amount of independent work, reading, creating mathematics, writing a paper that meets acceptable professional standards, and making an oral presentation of the results.

Types of Projects

An honors thesis can take two forms:

1. A thesis that presents significant work by the student on one or more nontrivial mathematics problems.
2. A substantial expository paper that follows independent study on an advanced topic under the guidance of a department faculty member. Such a report would involve the careful presentation of ideas and the synthesis of materials from several sources.

Process and Suggested Timeline

Junior Year, Spring Semester:

1. Talk with a faculty advisor about possible projects.
2. Complete the Honors Proposal Form and submit it to Blake Thornton.

Senior Year:

1. By the end of January, provide the advisor with a draft abstract and outline of the paper.
2. By the end of February, submit a rough draft, including an abstract, to the advisor.
3. The student and the advisor should agree on a date that the writing will be complete and on a date and time for the oral presentation in mid-March (the deadline is March 31).

Departmental Prizes

Each year, the department considers graduating majors for two departmental prizes and also awards a prize to juniors. Recipients are recognized at an annual awards ceremony in April where graduating majors each receive a certificate and a set of honors cords to be worn as part of the academic dress at Commencement. Awards are noted on the student's permanent university record.

Ross Middlemiss Prize

The Ross Middlemiss Prize is awarded to a graduating major with an outstanding record. The award was established by former Professor Ross Middlemiss, who taught at Washington University for 40 years. Middlemiss authored several books, including a widely popular calculus text that was used in courses offered by the School of Continuing & Professional Studies until the late 1970s.

Martin Silverstein Award

The Martin Silverstein Award was established in memory of Professor Martin Silverstein, who, until his death in 2004, was a pioneer in work at the interface of probability theory and harmonic analysis. Graduating students completing any major we offer will be considered for this award, but preference is given to those who have done excellent work in applied mathematics or analysis.

Brian Blank Award

The Brian Blank Award was established in memory of Professor Brian Blank, who passed away in 2018. Each year, the Department of Mathematics selects distinguished juniors who have declared a major in the department to receive this award.

Distinctions in Mathematics and Economics

Distinction

- Complete one additional course in Economics and one additional course in Mathematics, for a total of nine electives. Both courses must be completed at the 4000-level or above with a grade of B or better.
- Maintain a GPA of 3.7 or higher in all the major courses.
- If the student takes additional courses that satisfy these requirements, then the courses with the lowest grades may be omitted when calculating the GPA for this purpose.

High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis in either department (Mathematics or Economics).

Highest Distinction

- Complete all requirements for High Distinction.
- Complete three additional courses in Economics or Mathematics for a total of 12 electives. At least one of the three additional courses must be taken in each department, and all three additional electives must be completed at the 4000-level or above.

- All 12 electives (including the seven electives for the major, the two electives for Distinction, and the three electives for Highest Distinction) must be completed with a grade of B+ or better.
- If the student takes additional courses that satisfy these requirements, then the courses with the lowest grades may be omitted when calculating the GPA for this purpose.

Mathematics Major

Program Requirements

- **Total Units Required:** 42
- **Grade Requirement:** All required courses (both lower- and upper-level) must be taken for a letter grade and completed with a grade of C– or better.

Required Courses

- The three-course calculus sequence (9 units)* and an introductory computer science course (3 units)**:

Code	Title	Units
MATH 1510	Calculus I	3
MATH 1520	Calculus II	3
MATH 2130	Calculus III	3
CSE 1301	Introduction to Computer Science	3
Total Units		**12**

* AP credit may be applied in place of MATH 1510 and/or MATH 1520. Students who have completed MATH 2801 Honors Mathematics I and MATH 2802 Honors Mathematics II will be considered to have fulfilled the calculus-sequence requirement.

** This course may be waived after consultation with the director of undergraduate studies of the Department of Computer Science & Engineering.

- The following required upper-level courses (24 units):*

Code	Title	Units
MATH 3010	Foundations for Higher Mathematics	3
or MATH 3015	Foundations For Higher Mathematics With Writing	
MATH 4101	Introduction to Analysis	3
MATH 4102	Introduction to Lebesgue Integration	3
MATH 4160	Complex Variables	3
MATH 4201	Topology I	3
MATH 4301	Linear Algebra	3
MATH 4302	Modern Algebra	3
At least one of the following:		3
MATH 4202	Topology II	
MATH 4220	An Introduction to Differential Geometry	
MATH 4350	Number Theory and Cryptography	
MATH 4540	Partial Differential Equations	

* Students who take MATH 2801 and MATH 2802 are recommended to bypass MATH 3010/MATH 3015, for which they may substitute any other upper-level Mathematics course.

- Two additional upper-level (numbered 3000 or higher) Mathematics courses that have not been used to fulfill any other requirement (6 units).

Additional Information

Course Substitutions

At most one approved substitution can be made using a course outside the Department of Mathematics.

In general, the following courses can count as upper-level Mathematics electives, but specifics may vary for the various majors in the department (e.g., those requiring electives to be taken from a specific list):

Code	Title	Units
ESE 3190	Engineering Mathematics B	3
ESE 4030	Operations Research	3
PHYSICS 5010	Theoretical Physics	3
PHYSICS 5020	Methods of Theoretical Physics II	3
SDS 4010	Probability	3
SDS 4720	Stochastic Processes	3

Additional Requirements

1. A student cannot declare more than one major or minor in the department. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.
2. No *upper-level* course used to satisfy a major requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
3. At most 3 units of independent study or research work can count toward the major requirements.
4. Students may count courses from the Department of Statistics and Data Science (SDS) as Mathematics courses if the student matriculated in 2023-24 or earlier and if the course was previously offered by the Department of Mathematics and Statistics, as reflected by the student's matriculation-year Bulletin.
5. At most one of the following courses can be used to fulfill major requirements: MATH 3180 Introduction to Calculus of Several Variables or MATH 3550 Mathematics for the Physical Sciences.

6. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
   a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
   b. At least half of the upper-level units required in a major must be earned at Washington University or in a Washington University-approved overseas study program.
   c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill major requirements.

Latin Honors

At the time of graduation, the Department of Mathematics will recommend that a candidate receive Latin Honors (*cum laude*, *magna cum laude*, or *summa cum laude*) if that student has completed the department's requirements for High Distinction or Highest Distinction in Mathematics, including an Honors Thesis. The actual award of Latin Honors is managed by the College of Arts & Sciences.

The Honors Thesis

Arts & Sciences mathematics majors who want to be candidates for Latin Honors, High Distinction, or Highest Distinction must complete an honors thesis. Writing an honors thesis involves a considerable amount of independent work, reading, creating mathematics, writing a paper that meets acceptable professional standards, and making an oral presentation of the results.

Types of Projects

An honors thesis can take two forms:

1. A thesis that presents significant work by the student on one or more nontrivial mathematics problems.
2. A substantial expository paper that follows independent study on an advanced topic under the guidance of a department faculty member. Such a report would involve the careful presentation of ideas and the synthesis of materials from several sources.

Process and Suggested Timeline

Junior Year, Spring Semester:

1. Talk with a faculty advisor about possible projects.
2. Complete the Honors Proposal Form and submit it to Blake Thornton.

Senior Year:

1. By the end of January, provide the advisor with a draft abstract and outline of the paper.
2. By the end of February, submit a rough draft, including an abstract, to the advisor.
3. The student and the advisor should agree on a date that the writing will be complete and on a date and time for the oral presentation in mid-March (the deadline is March 31).

Departmental Prizes

Each year, the department considers graduating majors for two departmental prizes and also awards a prize to juniors. Recipients are recognized at an annual awards ceremony in April where graduating majors each receive a certificate and a set of honors cords to be worn as part of the academic dress at Commencement. Ross Middlemiss Prize

The Ross Middlemiss Prize is awarded to a graduating major with an outstanding record. The award was established by former Professor Ross Middlemiss, who taught at Washington University for 40 years. Middlemiss authored several books, including a widely popular calculus text that was used in courses offered by the School of Continuing & Professional Studies until the late 1970s.

Martin Silverstein Award

The Martin Silverstein Award was established in memory of Professor Martin Silverstein, who, until his death in 2004, was a pioneer in work at the interface of probability theory and harmonic analysis. Graduating students completing any major we offer will be considered for this award, but preference is given to those who have done excellent work in applied mathematics or analysis.

Brian Blank Award

The Brian Blank Award was established in memory of Professor Brian Blank, who passed away in 2018. Each year, the Department of Mathematics selects distinguished juniors who have declared a major in the department to receive this award.

Distinctions in Mathematics

Distinction

- Complete at least 33 units of upper-level Mathematics courses.
- The GPA for these 33 upper-level units must be at least 3.7. If more than 33 units are taken for a letter grade, the courses with the lowest grades can be omitted when computing the GPA for this purpose.
- Complete at least five courses numbered 4000 or higher, each with a grade of B or better.
- All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis.

Highest Distinction

- Complete all requirements for High Distinction.
- Complete at least five courses numbered 4000 or higher, each with a grade of B+ or better. These courses can be the same five courses used for the Distinction requirement, but the grades must be B+ or better.
- Complete one of the two paths described below:
  - **Graduate Qualifier Path:** Graduate qualifying courses* in Mathematics are two- or three-semester sequences that start in the fall, with a qualifying exam held at the end of each semester. Students must complete and pass two qualifying courses* and their corresponding qualifying exams. (These can be consecutive courses in the same sequence, or they can be courses from two different sequences.)
  - **Coursework Path:**
    - Complete at least 42 units of upper-level Mathematics courses. The GPA for these 42 upper-level units must be at least 3.7. If more than 42 units are taken for a letter grade, the courses with the lowest grades can be omitted when computing the GPA for this purpose.
    - Complete at least nine total courses numbered 4000 or higher, all with a grade of B+ or better. These courses can include the five courses taken for Distinction. All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

* These qualifying courses can count toward the additional course requirements for Distinction.

Website: http://math.wustl.edu

Mathematics Minor

Program Requirements

- **Total Units Required:** 27
- **Grade Requirement:** All required courses (both lower- and upper-level) must be taken for a letter grade and completed with a grade of C– or better.

Required Courses*

Code	Title	Units
CSE 1301	Introduction to Computer Science	3
MATH 1510	Calculus I	3
MATH 1520	Calculus II	3
MATH 2130	Calculus III	3
MATH 3010	Foundations for Higher Mathematics	3
or MATH 3015	Foundations for Higher Mathematics With Writing	
MATH 3300	Matrix Algebra	3
or MATH 4301	Linear Algebra	
Three additional upper-level electives (any course numbered 3000 or higher) in the Department of Mathematics		9
Total Units		**27**

* Students who complete the MATH 2801 Honors Mathematics I and MATH 2802 Honors Mathematics II sequence will be considered to have completed MATH 1510, MATH 1520, and MATH 2130. These students are also recommended to bypass MATH 3010/MATH 3015 and MATH 3300, for which they may substitute any other upper-level Mathematics courses.

Additional Information

Course Substitutions

At most one approved substitution can be made using a course outside the Department of Mathematics.

In general the following courses can count as upper-level Mathematics electives, but specifics may vary for the various majors in the department (e.g., those requiring electives to be taken from a specific list):

Code	Title	Units
ESE 3190	Engineering Mathematics B	
ESE 4030	Operations Research	
PHIL 4010	Mathematical Logic 1	
PHYSICS 5010	Theoretical Physics	
PHYSICS 5020	Methods of Theoretical Physics II	
SDS 4010	Probability	
SDS 4720	Stochastic Processes	

Additional Requirements

1. A student cannot declare more than one major or minor in the department. This restriction includes dual majors, such as Mathematics and Economics and Mathematics and Computer Science. These majors are considered "in the department" even if they are declared in another department.
2. No *upper-level* course used to satisfy a minor requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
3. At most, 3 units of independent study or research work can count toward the minor requirements.
4. Students may count courses from the Department of Statistics and Data Science (SDS) as Mathematics courses if the student matriculated in 2023-24 or earlier and if the course was previously offered by the Department of Mathematics and Statistics, as reflected by the student's matriculation-year (p. 17)*Bulletin.*

5. At most one of the following courses can be used to fulfill major requirements: MATH 3180 Introduction to Calculus of Several Variables or MATH 3550 Mathematics for the Physical Sciences.
6. Courses transferred from other accredited colleges and universities can be counted, with the following caveats, if they receive department approval:
   a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
   b. At least half of the upper-level units required in a minor must be earned at Washington University or in a Washington University-approved overseas study program.
   c. Courses from the School of Continuing & Professional Studies cannot be used to fulfill minor requirements.

Music

The Department of Music offers a music program of exceptional quality and diversity. In this varied course of study — where music is approached as a liberal and fine art rather than as an isolated, separate subject — students may pursue practical and creative music-making or study musical traditions and individual works. Music courses are open to all students at the university.

We offer students the opportunity to develop performance skills in voice or instruments through private instruction or through participation in small or large ensembles. Private music lessons with our prominent faculty, including members of the St. Louis Symphony Orchestra, are available in voice, piano, organ, guitar, and all orchestral and jazz instruments.

Music majors can explore critical issues of tradition, individual composers, compositional craft, aesthetic interpretation, and music's social and cultural significance through a wide range of courses, from introductory classes to highly specialized seminars. Instruction is available in jazz, popular music, world musics, the history and literature of Western music, ethnomusicology, music theory and analysis, musical composition, and electronic music. All performance, creative, and academic endeavors in music are supported by a thorough grounding in musicianship and keyboard skills.

Music majors may take advantage of music-focused study abroad programs in Italy, Ireland, France, South Africa, or other countries upon request and approval. To learn more about these opportunities, please visit the Overseas Programs page of the Arts & Sciences website.

Several options are available for students interested in music: the Bachelor of Arts degree with a major in Music, the Bachelor of Music degree, a Minor in Music, and a Minor in Jazz Studies. Students may take the AB degree in combination with a major in another field or as their primary major in a broad liberal arts education. Majoring in Music can prepare students well for graduate work and for a variety of musical careers and other professions.

Performance Opportunities

Ensembles: The department sponsors numerous performing ensembles. Students must audition for admission to the ensembles; they should visit the Ensemble Opportunities and Auditions page of the Department of Music to sign up for an audition). All ensembles are available for graded credit or Pass/No Pass credit. Ensembles give one or more public performances each semester. Students who are enrolled for credit in one of the department's ensembles may be entitled to a rebate that covers a portion of the fee for music lessons. Rebate information can be found on the Rebates, Fees & Refund Policy of the Department of Music website.

Vocal Ensembles: Concert Choir, Chamber Choir

Instrumental Ensembles: Jazz Band, Chamber String Ensembles, Symphony Orchestra, Wind Ensemble, Jazz Combos

Lessons: Students may take lessons in voice, piano, organ, guitar, and all orchestral and jazz instruments in the appropriate course sequences. All lessons are available for graded credit or Pass/No Pass credit. A separate fee is charged for private instruction. Information regarding the rebates, fees, and refund policies can be found on the Rebates, Fees & Refund Policy of the Department of Music website.

Faculty

Chair

Patrick Burke
Professor
PhD, University of Wisconsin

Director of Graduate Studies

Paul Steinbeck
Associate Professor
PhD, Columbia University

Director of Undergraduate Studies

Esther Viola Kurtz
Assistant Professor
PhD, Brown University

Department Faculty

Vicente Atria
Assistant Professor
DMA, Columbia University

Todd Decker
Paul Tietjens Professor of Music
PhD, University of Michigan

Christopher Douthitt
Lecturer
MFA, Princeton University

Ben Duane
Associate Professor
PhD, Northwestern University

Lauren Eldridge Stewart
Assistant Professor
PhD, University of Chicago

Amanda Kirkpatrick
Senior Lecturer
MM, University of Missouri-Columbia

Jeffrey Kurtzman
Professor
PhD, University of Illinois

William Lenihan
Professor of Practice
BMus, University of Missouri-Columbia

John McDonald
Lecturer
DMA, University of Missouri-Kansas City

Robert Snarrenberg
Associate Professor
PhD, University of Michigan

Christopher Stark
Associate Professor
DMA, Cornell University

Alexander Stefaniak
Associate Professor
PhD, Eastman School of Music

Vince Varvel
Lecturer
BM, Southern Illinois University at Edwardsville

Emeritus Faculty

Hugh McDonald
Avis H. Blewett Professor Emeritus of Music
PhD, Cambridge University

Craig Monson
Paul Tietjens Professor Emeritus of Music
PhD, University of California, Berkeley

Dolores Pesce
Avis Blewett Professor Emerita of Music
PhD, University of Maryland

Majors

- Music Major (AB) (p. 728)
- Music Major (BMus) (p. 729)
- Music Major, Composition Concentration (BMus) (p. 730)
- Music Major, General Concentration (BMus) (p. 731)
- Music Major, History and Culture Concentration (BMus) (p. 732)
- Music Major, Performance Concentration (BMus) (p. 733)
- Music Major, Theory Concentration (BMus) (p. 734)

Minors

- Jazz Studies Minor (p. 735)
- Music – General Studies Minor (p. 736)

Courses

MUSIC 1028 Listening to Classical Music
Classical music pervades musical cultures around the globe: in concert halls, choir classrooms, and music lessons, but also in "music for studying" playlists, retail stores, advertisements, films, Olympic ceremonies, and numerous other practices and products. In these many contexts, classical music has shaped the way listeners think about issues fundamental to their broader engagement with the arts and humanities:

- Most importantly, classical music has commanded extraordinary cultural prestige since the nineteenth century, and it is central to beliefs about what artworks count as "masterworks" and what constitutes creative "genius" (and what a "genius" looks like).
- White European men have dominated the classical-music canon and the way it's often taught-however, a wave of scholarship and performance in the past decades has illuminated ways in which women and musicians of color have engaged passionately and creatively with classical music. This course therefore invites us to consider how canons form, whom they marginalize, and what we can learn by looking beyond them.
- Classical music has played an important role in forming listeners' beliefs about music and the performing arts more generally: the importance of self-expression, the roles and responsibilities of creator and performer, the extent to which art can be detached from its context, and how (indeed whether) we can both enjoy and critique an artistic tradition.
