Degree Requirements

Master of Arts in Education

The Master of Arts in Education (MAEd) program for students seeking elementary teacher certification in grades 1-6 requires 48 credit units of professional education courses, including 8 credit units of student teaching during the final semester. The courses are typically completed in three semesters, with one summer course after the spring semester of the program.

- The first fall semester consists of foundation courses in education, including educational psychology and teaching reading courses.
- Spring includes the curriculum and instruction block, which involves courses in the basic subject areas as well as a field seminar requiring 50 hours of classroom experience.
- Summer consists of a course in the education and psychology of exceptional children.
- The second fall semester, which is the final semester of the program, includes 16 weeks of student teaching as well as courses for reading and creating a teaching portfolio. Given the intensity of the academic requirements during this final semester of study, students must focus wholly on their culminating field experience and will not be able to accept outside employment.

After students successfully complete the program and the state-mandated certification assessments, they are eligible for initial teacher certification in Missouri for their selected subject area. States all have their own unique requirements for teacher certification, but many have reciprocity agreements to allow currently certified teachers to transfer their teaching credentials to a new state. Teachers may have to meet some additional state requirements, but for most states, transferring teacher certification is fairly straightforward.

Students may be certified in the following content areas:

- For grades 5 through 9: Language Arts, Mathematics, Science, Social Science
- For grades 9 through 12: Biology, Chemistry, Earth Science, English, Physics, Mathematics, Social Science (including history, political science, economics, geography, and behavioral sciences such as psychology, sociology, and anthropology)
- For grades K through 12: Art, Dance, World Language (Latin, Chinese, French, German, Japanese, Russian, Spanish)

Students must fulfill specific content area requirements through either undergraduate course work and/or the 12 credit units of subject area graduate courses required for the Master of Arts in Teaching program. It is strongly suggested that students apply for a subject in which they have completed (or will complete) a bachelor’s degree (or earned the equivalent to an undergraduate major).

Accelerated AB/MAT Program

The Accelerated AB/MAT Program allows qualified Washington University undergraduates to complete a Master of Arts in Teaching (MAT) degree in one year after completing the AB degree. The undergraduate and graduate degrees are awarded sequentially, if approved, with admission to the master’s degree program in the fall semester following the completion of the undergraduate degree. The program is available only to students currently in their senior year and only for continuous enrollment the next year. There is no option for deferred admission.

To qualify for the AB/MAT program, undergraduate students must have completed 30 to 36 credit units of content area courses (content areas listed below) with at least 12 credit units taken at the 500/5000 level. In addition, as undergraduates, students will need to take 10 credits of professional education courses (Educ 313B, Educ 408, Educ 4052, Educ 4053) and a 3-credit foundations of education course (Educ 301C,
Our doctoral program is a six-year program that provides two main concentration pathways of study: Educational Policy Studies and Educational Psychology. Students work closely with their mentor(s) to develop expertise in their area of interest, and this research training is supplemented by required coursework in methodology and the history of education. Additional coursework may be undertaken as needed. Required and elective courses provide students with a broad understanding of scholarship and research in education. Many courses have fieldwork and research components, and they are designed to prepare students for meeting the qualifying examination requirements and for dissertation research and writing. By the third year, students should be completing their courses and submitting a qualifying portfolio of written work before entering the dissertation phase of the program. Students must have a dissertation proposal approved, generally by the fourth year, before they continue with the bulk of their research and writing for the dissertation. A dissertation is then completed and defended, usually by the end of the sixth year of study. Integrating teaching and research with scholarly development involves the doctoral candidate in the central responsibilities of the professional educator. An advantage of a small department within Arts & Sciences is that students have multiple opportunities to work closely with many of the faculty in the department. In addition, the university offers a climate that supports interdisciplinary conversations across schools, departments and programs. As Department of Education faculty, we encourage students to pursue learning experiences and contacts with faculty in other programs. Students encounter a diversity of disciplinary perspectives within and outside of the Department of Education so that they may acquire a broad understanding of the field.

Graduate Certificate in Higher Education

Doctoral students interested in pursuing a Graduate Certificate in Higher Education must take a total of either four courses (12 total credit units) or three courses (9 total credit units) and engage in a 3-credit-unit Mentored Experience in Higher Education (MEHE) through the Department of Education. Students will complete only one course from each of the following course groupings until their 9- or 12-credit-unit requirement has been met: (1) Foundations of Education, Assessment, and Evaluation; (2) Diversity and Inclusion in Education; and (3) Critical Issues in Higher Education. Students may elect to take a further course in Critical Issues in Higher Education or to enroll in an MEHE. To enroll in an MEHE, the student consults with the practicum supervisor, and then the MEHE must be approved by the director of graduate studies in the Department of Education.
