Division of Computational & Data Sciences

The Division of Computational & Data Sciences (DCDS) at Washington University in St. Louis trains students interested in problems from across a range of disciplines that share a common reliance on data and computing.

The introduction of now-standard tools from statistical analysis and hypothesis testing transformed the practice of natural and social science in the mid-20th century. Emerging tools from computational and data science have the potential to bring about an even larger transformation of scientific practice, especially in the social sciences. The questions raised by data generated by and about human behavior are engaging and profound. However, many if not most of these questions can only be tackled using a multidisciplinary approach that combines a deep knowledge of the capabilities and operation of data science techniques with the domain expertise needed to apply them effectively to the problems under consideration.

Doctoral students in Computational & Data Sciences receive strong methodological training in modern computational and statistical methods, and they also acquire expertise in a particular social science application area.

The program is inherently interdisciplinary and brings together leading experts from across the university who are using data to solve some of the greatest challenges that our world faces today. Faculty include both data and computing experts as well as domain experts from different application areas.

Faculty

Eunhye Ahn
Assistant Professor, Brown School
PhD, University of Southern California

Ruopeng An (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Ruopeng-An.aspx)
Assistant Professor, Brown School
PhD, Pardee RAND Graduate School

Dennis Barbour (https://engineering.wustl.edu/faculty/Dennis-Barbour.html)
Associate Professor, Biomedical Engineering
MD, Johns Hopkins University
PhD, Johns Hopkins University

Deanna Barch (https://psych.wustl.edu/people/deanna-barch/)
Professor and Chair, Psychological & Brain Sciences
PhD, University of Illinois

Janine Bijsterbosch
Assistant Professor, Radiology
PhD, University of Sheffield

Ryan Bogdan (https://psych.wustl.edu/people/ryan-bogdan/)
Associate Professor, Psychological & Brain Sciences
PhD, Harvard University

Todd Braver (https://psych.wustl.edu/people/todd-braver/)
Professor, Psychological & Brain Sciences, Radiology, and Neuroscience
PhD, Carnegie Mellon University

Michael Brent
Henry Edwin Sever Professor of Engineering, Computer Science & Engineering
PhD, Massachusetts Institute of Technology

Derek Brown (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Derek-Brown.aspx)
Associate Professor, Brown School
PhD, Duke University

Sheretta Butler-Barnes (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Sheretta-Butler-Barnes.aspx)
Associate Professor, Brown School
PhD, Wayne State University

David Carter (https://artsci.wustl.edu/faculty-staff/david-carter/)
Associate Professor, Political Science
PhD, University of Rochester

Yixin Chen (https://engineering.wustl.edu/faculty/Yixin-Chen.html)
Professor, Computer Science & Engineering
PhD, University of Illinois

Dino Christenson (https://polisci.wustl.edu/people/dino-christenson/)
Associate Professor, Political Science
PhD, Ohio State University

Brett Drake (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Brett-Drake.aspx)
Professor, Brown School
PhD, University of California, Los Angeles

Ted Enamorado (https://polisci.wustl.edu/people/ted-enamorado/)
Assistant Professor, Political Science
PhD, Princeton University

Randi Foraker (https://publichealth.wustl.edu/scholars/randi-foraker/)
Associate Professor of Public Health, Brown School
PhD, The University of North Carolina at Chapel Hill

Patrick Fowler (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Patrick-Fowler.aspx)
Track Chair, Social Work & Public Health
Associate Professor, Brown School
PhD, Wayne State University
Roman Garnett (https://engineering.wustl.edu/faculty/Roman-Garnett.html)
Assistant Professor, Computer Science & Engineering
PhD, University of Oxford

Aimilia Gastounioti
Assistant Professor, Radiology
PhD, National Technical University of Athens

Chris Gill (https://engineering.wustl.edu/faculty/Christopher-Gill.html)
Professor, Computer Science & Engineering
DSc, Washington University in St. Louis

Brian Gordon
Assistant Professor, Radiology
PhD, University of Illinois

Roch Guérin (https://engineering.wustl.edu/faculty/Roch-Guerin.html)
Professor and Chair, Computer Science & Engineering
PhD, California Institute of Technology

Shenyang Guo (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Shenyang-Guo.aspx)
Professor, Brown School
PhD, University of Michigan–Ann Arbor

Ross Hammond (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Ross-Hammond.aspx)
Associate Professor, Brown School
PhD, University of Michigan

Jenine Harris (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Jenine-Harris.aspx)
Associate Professor, Brown School
PhD, University of Michigan

Chien-Ju Ho (https://engineering.wustl.edu/faculty/Chien-Ju-Ho.html)
Assistant Professor, Computer Science & Engineering
PhD, University of California, Los Angeles

Josh Jackson (https://psych.wustl.edu/people/joshua-jackson/)
Associate Professor, Psychological & Brain Sciences
PhD, University of Illinois Urbana-Champaign

Nathan Jacobs
Professor, Computer Science & Engineering
PhD, Washington University in St. Louis

Kim Johnson (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Kimberly-Johnson.aspx)
Associate Professor, Brown School
PhD, University of Minnesota

Melissa Jonson-Reid (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Melissa-Jonson-Reid.aspx)
Professor, Brown School
PhD, University of California, Berkeley

Brendan Juba (https://engineering.wustl.edu/faculty/Brendan-Juba.html)
Assistant Professor, Computer Science & Engineering
PhD, Massachusetts Institute of Technology

Thomas Kannappalli (https://anesthesiology.wustl.edu/people/thomas-kannappalli-phd/)
Assistant Professor, Anesthesiology
PhD, University of Illinois

Caitlin Kelleher (https://engineering.wustl.edu/Profiles/Pages/Caitlin-Kelleher.aspx)
Associate Professor, Computer Science & Engineering
PhD, Carnegie Mellon University

Wouter Kool (https://psych.wustl.edu/people/wouter-kool/)
Assistant Professor, Psychological & Brain Sciences
PhD, Princeton University

Matt Kreuter (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Matthew-Kreuter.aspx)
Professor, Social Work & Public Health
PhD, The University of North Carolina at Chapel Hill

Albert Lai (https://informatics.wustl.edu/research-lab-albert-lai/)
Associate Professor and Deputy Director, Institute for Informatics
Associate Professor, Computer Science & Engineering
PhD, Columbia University

Calvin Lai (https://psych.wustl.edu/people/calvin-lai/)
Assistant Professor, Psychological & Brain Sciences
PhD, University of Virginia

Matthew Lew (https://engineering.wustl.edu/faculty/Matthew-Lew.html)
Assistant Professor, Electrical & Systems Engineering
PhD, Stanford University

Jr-Shin Li (https://engineering.wustl.edu/faculty/Jr-Shin-Li.html)
Professor, Electrical & Systems Engineering
PhD, Harvard University

Fangqiong Ling (https://engineering.wustl.edu/faculty/Fangqiong-Ling.html)
Assistant Professor, Energy, Environmental & Chemical Engineering
PhD, University of Illinois Urbana-Champaign

Chenyang Lu (https://engineering.wustl.edu/faculty/Chenyang-Lu.html)
Professor, Computer Science & Engineering
PhD, University of Virginia

Christopher Lucas (https://polisci.wustl.edu/people/christopher-lucas/)
Assistant Professor, Political Science
PhD, Harvard University

Professor, Brown School
PhD, University of Illinois
Phillip Marotta (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Phillip-Marotta.aspx)
Assistant Professor, Brown School
PhD, Columbia University

Andrew D. Martin (https://polisci.wustl.edu/people/andrew-martin/)
Professor, Political Science and Law
Chancellor, Washington University in St. Louis
PhD, Washington University in St. Louis

Timothy McBride (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Timothy-McBride.aspx)
Professor, Brown School
PhD, University of Wisconsin–Madison

Jacob Montgomery (https://polisci.wustl.edu/people/jacob-montgomery/)
Track Chair, Political Science
Associate Professor, Political Science
PhD, Duke University

William Nomikos
Assistant Professor, Political Science
PhD, Yale University

Alvitta Ottley (https://engineering.wustl.edu/faculty/Alvitta-Ottley.html)
Assistant Professor, Computer Science & Engineering
PhD, Tufts University

Neal Patwari (https://engineering.wustl.edu/faculty/Neal-Patwari.html)
Professor, Electrical & Systems Engineering
Professor, Computer Science & Engineering
PhD, University of Michigan

Philip R.O. Payne (https://informatics.wustl.edu/research-lab-philip-payne/)
Professor and Director, Institute for Informatics
Professor, Computer Science & Engineering
PhD, Columbia University

Netanel Raviv (https://engineering.wustl.edu/faculty/Netanel-Raviv.html)
Assistant Professor, Computer Science & Engineering
PhD, Technion – Israel Institute of Technology

Zachariah Reagh (https://psych.wustl.edu/people/zachariah-reakh/)
Assistant Professor, Psychological & Brain Sciences
PhD, University of California, Irvine

Andrew Reeves (http://www.andrewreeves.org/)
Associate Professor, Political Science
PhD, Harvard University

Guillermo Rosas (https://polisci.wustl.edu/people/guillermo-rosas/)
Associate Professor, Political Science
PhD, Duke University

Betsy Sinclair (https://polisci.wustl.edu/people/betsy-sinclair/)
Professor, Political Science
PhD, California Institute of Technology

Bruno Sinopoli (https://engineering.wustl.edu/faculty/Bruno-Sinopoli.html)
Professor and Chair, Electrical & Systems Engineering
PhD, University of California, Berkeley

Aristeidis Sotiras (https://informatics.wustl.edu/research-lab-aristeidis-sotiras/)
Assistant Professor, Radiology
PhD, École Centrale Paris

Fred Ssewamala (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Fred-Ssewamala.aspx)
Associate Dean for Transdisciplinary Faculty Research, Brown School
PhD, Washington University in St. Louis

Joe Steensma (https://brownschool.wustl.edu/Faculty-and-Research/Pages/Joseph-Steensma.aspx)
Professor of Practice, Brown School
EdD, Indiana Wesleyan University

Joshua Swamidass (https://pathology.wustl.edu/people/s-joshua-swamidass-md-phd/)
Associate Professor, Pathology & Immunology
Associate Professor, Biomedical Engineering
MD, University of California, Irvine
PhD, University of California, Irvine

Jessie Sun
Assistant Professor, Psychological & Brain Sciences
PhD, University of California, Davis

Yevgeniy Vorobeychik (https://engineering.wustl.edu/faculty/Yevgeniy-Vorobeychik.html)
Associate Professor, Computer Science & Engineering
PhD, University of Michigan

Chenguang Wang
Assistant Professor, Computer Science & Engineering
PhD, Peking University

Yong Wang (https://engineering.wustl.edu/faculty/Yong-Wang.html)
Associate Professor, Electrical & Systems Engineering

Emily Willroth
Assistant Professor of Psychological & Brain Sciences
PhD, University of California, Berkeley

William Yeoh (https://engineering.wustl.edu/faculty/William-Yeoh.html)
Track Chair, Computational Methodologies
Associate Professor, Computer Science & Engineering
PhD, University of Southern California

Jeffrey Zacks (https://psych.wustl.edu/people/jeffrey-zacks/)
Track Chair, Psychological & Brain Sciences
Professor and Associate Chair, Psychological & Brain Sciences
PhD, Stanford University
Required Core Courses (24 credit units)

- CSE 502N: Data Structures and Algorithms (3 credits): This is an existing fundamental course in algorithms and data structures, including significant implementation in an object-oriented programming language (currently Java). We expect that many students will already have this background; the course is intended as a pathway for students with very little computational training.

- Quantitative Methods I and II (6 credits): This two-semester sequence covers essential probability and statistics, including hypothesis testing, inference and experimental methodology using a modern statistical computing language like R. The introductory courses offered by the departments of Psychological & Brain Sciences (Psych 5066) and Political Science (Pol Sci 581) will count for Quantitative Methods I credit. Their follow-up courses (Psych 5067 and Pol Sci 582) will count for Quantitative Methods II credit.

- DCDS 510: Data Wrangling (3 credits): We are in a new era in terms of the volume and modalities of data generated by efforts to measure human behavior. This will be a new cross-listed course that introduces students to the tools and techniques used to collect, maintain and process large-scale data sets of the kind generated in the course of studying people and social systems.

- CSE 417T and CSE 517A: Machine Learning I and II (6 credits): This is a two-semester sequence in machine learning. Together, the two courses cover the fundamental principles of supervised learning, including generalization, overfitting, regularization, cross-validation, model selection, and core machine learning techniques and algorithms, including linear models like logistic regression, gradient descent, tree-based and ensemble methods, kernel methods, deep neural networks and topics in unsupervised learning.

- Computational and Data Sciences Seminar Series (6 credits): This two-semester seminar sequence is cross-listed across participating departments and team-taught by participating faculty.
  - DCDS 499: Introduction to Graduate Research in Computational & Data Sciences will be structured around topics and ideas that do not need detailed specific-content background. The topics covered will include ethics, the nature of research, robustness and reproducibility of research, and presentations from across the different areas of interest to give students an understanding of research in human and social data analytics across the university.
  - DCDS 500: Computational and Data Sciences Research Exploration will be structured as a series of deep dives into data-driven approaches in each of the domain areas, including a module on computational methodologies. In each of these modules, the students will either be given a specific dataset to investigate or a specific hands-on task to complete (e.g., developing a visualization, assessing how easy a computational tool is for social scientists to use). Students will work in teams on these projects.

Domain Depth Tracks

Students will choose one of four focus tracks: Political Science, Psychological & Brain Sciences, Social Work & Public Health, or Computational Methodologies. Depending on the track, students must complete the following domain depth requirements:

1. **Political Science track:** Students must complete three substantive courses in one subfield (e.g., American politics, comparative politics, international relations) from a specified list for each subfield as well as a research design course (Pol Sci 540).

2. **Psychological & Brain Sciences track:** Students must complete three substantive courses in one subfield (e.g., brain, behavior and cognition, clinical science, social/personality, development and aging). With permission, students may substitute the Psychological & Brain Sciences Research Methods Course (Psych 5011) for one of the substantive courses, depending on their background in psychological science.
3. **Social Work & Public Health track:** Students must complete a three-course core doctoral seminar series, including conceptual foundations of social science, advanced research methods, and a theory seminar, either in public health or social work. Students will also be required to take an advanced substantive course from an approved list in their area of interest.

4. **Computational Methodologies track:** Students must take CSE 541T Advanced Algorithms and either CSE 412A Introduction to Artificial Intelligence or CSE 515T Bayesian Methods in Machine Learning. In addition, students must take two substantive courses in their area of interest (i.e., political science, psychological & brain sciences, or social work & public health) from among the courses acceptable for students in that track as noted above.

### Sample Curriculum

A typical progression of courses is described below, with separate examples for students who enter with and without more extensive computational backgrounds.

#### Students Without Much Computer Science Background

### Further Requirements

Additional requirements for this program are as follows:

- A minimum of 72 credit units beyond the bachelor’s level, with a minimum of 37 being course credits (including the core curriculum)
- A minimum of 24 credit units of doctoral dissertation research
- Students must maintain a cumulative average grade of B (3.0 grade-point average) for all 72 credit units.
- Required courses must be completed with no more than one grade below a B-.
- Up to 24 graduate credit units may be transferred with the approval of the Graduate Studies Committee, which is chaired by the director of graduate studies.

In addition to fulfilling the course and research credit requirements, students must do the following:

- Complete at least two three-month-long research rotations.
- Pass a qualifying exam.
- Successfully defend a thesis proposal.
- Present and successfully defend a dissertation.
- Complete a teaching requirement consisting of two semesters of mentored teaching experience.
