

Combined Master of Engineering/ Master of Business Administration (MEng/MBA)

In recent years, student interest has grown rapidly in the intersection between engineering and business approaches to issues of sustainability, energy, the environment and corporate social responsibility. An interdisciplinary approach is necessary to address these issues with innovative, critical thinking that will lead to practical, effective solutions. This combined program — the Master of Engineering in Energy, Environmental & Chemical Engineering/Master of Business Administration (MEng/MBA), offered by McKelvey School of Engineering and Olin Business School — is well positioned to address this critical intersection.

The Olin MBA curriculum offers a comprehensive set of required and elective courses built upon a foundation of critical-thinking and leadership skills. Olin MBAs are able to shape the curriculum to meet their unique personal objectives and to incorporate the MEng degree requirements.

Both the MEng and the MBA degrees will be awarded simultaneously at the completion of the program.

Please visit the Olin Combined Programs webpage and the EECE MEng/MBA webpage for details.
