Physics

Website: http://physics.wustl.edu/graduate

Degree Requirements

The information below summarizes the physics department’s degree requirements. These requirements are in addition to those established by the Office of Graduate Studies, Arts & Sciences. For more information about requirements for doctoral degrees (http://bulletin.wustl.edu/grad/gsas/phd/academic/) or master’s degrees (http://bulletin.wustl.edu/grad/gsas/masters/academic/) in the Office of Graduate Studies, Arts & Sciences, please visit the appropriate sections of this Bulletin.

Master of Arts in Physics

36-Unit Academic Credit Course Requirement

Courses that count toward academic credit are as follows:

• Any regular 400- or 500-level lecture courses in the physics department, including Physics 582 Research Seminar
• Courses outside of the physics department, if approved by the master’s program director
• Selected Topics courses, for which students should register for Physics 589 Selected Topics in Physics I/Physics 590 Selected Topics in Physics II
• Supervised research, for which students should register for Physics 593 Introduction to Methods in Physics/Physics 594 Introduction to Methods in Physics (This can be used for a maximum of 6 units of academic credit.)

Students can take up to six 400-level physics classes toward their academic credit requirements without special permission from the graduate studies committee. However, they should discuss the merits of doing so with their advisor.

Core Course Requirements

For qualification, students must pass five core 500-level physics courses. In those courses, the student must maintain an average of a B (a grade-point average of 3.0), with no more than one grade lower than B-. A given core course may be taken only once. If more than five courses are taken, the average will be determined from the best five course grades.

Students must take the following three courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Physics 501</td>
<td>Theoretical Physics</td>
<td>3</td>
</tr>
<tr>
<td>Physics 506</td>
<td>Classical Electrodynamics II</td>
<td>3</td>
</tr>
<tr>
<td>Physics 507</td>
<td>Classical Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>or Physics 509</td>
<td>Nonlinear Dynamics</td>
<td></td>
</tr>
<tr>
<td>Physics 524</td>
<td>Quantum Mechanics II</td>
<td>3</td>
</tr>
</tbody>
</table>

They must also take at least two of the following:

PhD in Physics

Outline of Requirements

• Complete 36 units of academic credit (detailed below), maintaining an average grade of at least B (3.0 GPA).
• Pass the PhD qualification procedure. This must be done before a student can formally join a research group, and it is normally completed before the start of the third year.
• Complete the teaching requirements.
• Write a thesis (doctoral dissertation (https://graduateschool.wustl.edu/degree-requirements/#anchor-group-13909)).
• Pass an oral dissertation defense examination.

36-Unit Academic Credit Course Requirement

Courses that count toward academic credit are as follows:

• Any regular 400- or 500-level lecture courses in the physics department, including Physics 597 Supervised Teaching of Physics and Physics 582 Research Seminar
• Courses outside of the physics department, if approved by the student's advisor and the director of graduate studies
• Special topics courses, for which students should register for Physics 589 Selected Topics in Physics I/Physics 590 Selected Topics in Physics II
• Supervised research, for which students should register for Physics 593 Introduction to Methods in Physics/Physics 594 Introduction to Methods in Physics (This can be used for a maximum of 6 units of academic credit.)

Students can take up to four 400-level physics classes toward their academic credit requirements without special permission from the graduate studies committee. However, they should discuss the merits of doing so with their advisor.

PhD Qualification: Course Requirements

For qualification, students must pass six core 500-level physics courses. In those courses, the student must maintain an average of a B (3.0 GPA), with no more than one grade lower than B-. A given core course may be taken only once. If more than six core courses are taken, the average will be determined from the best six course grades.

Students must take the following four courses:
They must also take at least two of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Physics 502</td>
<td>Methods of Theoretical Physics II</td>
<td>3</td>
</tr>
<tr>
<td>Physics 506</td>
<td>Classical Electrodynamics II</td>
<td>3</td>
</tr>
<tr>
<td>Physics 507</td>
<td>Classical Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>or Physics 509</td>
<td>Nonlinear Dynamics</td>
<td></td>
</tr>
<tr>
<td>Physics 524</td>
<td>Quantum Mechanics II</td>
<td>3</td>
</tr>
</tbody>
</table>

These requirements can be modified or waived for students with previous graduate experience (e.g., a master's degree in physics).

**PhD Qualification: Oral Examination Requirement**

To qualify, the student must give a presentation to a committee of three physics faculty members (i.e., the prospective research advisor and two others). The student should demonstrate a basic understanding of a major topic of current research in the selected area of study, chosen in consultation with the student's prospective thesis advisor. One week before the oral exam, the student must prepare a written paper (approximately 1500-3000 words) summarizing the content of the presentation and give it to the committee. The student’s responses to questions raised by the examination committee are graded as adequate or not. Students have a chance to answer inadequately answered questions in writing within 48 hours after the examination. The student is not allowed to receive assistance in preparing the written response from any other individuals. The answers should either be given in person to the chair of the examination committee or emailed to the chair as a PDF file so that it is time stamped. The committee will determine whether the written answers are sufficient.

The committee must be chosen and approved by the department chairman by the end of a student's third semester (typically in December of the second year). The oral examination should be taken by the end of a student's fourth semester (typically in May of the second year). If the student fails the oral examination, they can take it again one additional time.

**Teaching Requirements**

These requirements must be completed before the student submits their doctoral dissertation to the Office of Graduate Studies, Arts & Sciences:

- **Complete L31 Physics 597**: Graduate students are required to take Physics 597 Supervised Teaching of Physics prior to serving as an assistant in instruction. Students typically take this course during their first fall semester.
- **Complete at least two semesters of mentored teaching experiences**
- **Complete four hours of oral presentations**: Graduate students must complete a total of four hours of specialized oral presentations. Examples of such presentations include teaching a class (e.g., when substituting for a professor); giving seminars, such as the weekly graduate seminar; or giving oral presentations at conferences, journal clubs, and the like.

**Dissertation Requirements**
