Political Science

The doctoral program in political science at Washington University is one of the top programs in the country. Graduate students take classes and engage in research with a faculty recognized nationally and internationally as among the most expert, active and productive in the country.

Our graduate program is relatively small. We admit around eight to 10 students into the PhD program each year, and most of these complete the doctorate, generally in five to six years. There are approximately 40 graduate students currently in residence.

Washington University’s PhD program in Political Science is designed to prepare students for academic careers in research and teaching at major institutions across the country. We stress the importance of political methodology (applied statistics) and formal theory (game theory and mathematical modeling), and our program is designed to teach all students in these methods, regardless of their mathematical background.

We have active research groups in American politics and institutions, comparative politics, international political economy, positive and normative theory, and political methodology. It is important to emphasize that we do not regard these subfields as separate entities. Many of our faculty have research and teaching interests that transcend political science subfields as well as traditional disciplinary boundaries. We have strong connections with other departments at Washington University (including the departments of Economics and Anthropology), with the School of Law, and with various interdisciplinary research centers on campus.

Faculty

Chancellor  
Andrew Martin (https://polisci.wustl.edu/people/andrew-martin/)  
Professor of Political Science and Law  
PhD, Washington University

Chair  
Margit Tavits (https://polisci.wustl.edu/people/margit-tavits/)  
William Taussig Professor in Arts & Sciences  
PhD, University of Pittsburgh

Assistant Chair  
Andrew Reeves (https://polisci.wustl.edu/people/andrew-reeves/)  
PhD, Harvard University

Director of Undergraduate Studies  
Francis Lovett (https://polisci.wustl.edu/people/frank-lovett/)  
PhD, Columbia University

Director of Graduate Studies  
Betsy Sinclair (https://polisci.wustl.edu/people/betsy-sinclair/)  
PhD, California Institute of Technology

Endowed Professors  
Randall Calvert (https://polisci.wustl.edu/people/randall-calvert/)  
Thomas F. Eagleton University Professor of Public Affairs and Political Science  
PhD, California Institute of Technology

Lee Epstein (http://epstein.wustl.edu/)  
Ethan A.H. Shepley Distinguished University Professor  
PhD, Emory University

James L. Gibson (https://polisci.wustl.edu/people/james-l-gibson/)  
Sidney W. Souers Professor of Government  
PhD, University of Iowa

Steven S. Smith (https://polisci.wustl.edu/people/steven-s-smith/)  
Kate M. Gregg Professor of Social Sciences; Director of the Weidenbaum Center on the Economy, Government, and Public Policy  
PhD, University of Minnesota

James Spriggs II (https://polisci.wustl.edu/people/james-f-spriggs/)  
Sidney W. Souers Professor of Government  
PhD, Washington University

Margit Tavits (https://polisci.wustl.edu/people/margit-tavits/)  
William Taussig Professor in Arts & Sciences  
PhD, University of Pittsburgh

Professors  
Brian F. Crisp (https://polisci.wustl.edu/people/brian-crisp/)  
PhD, University of Michigan

Matthew Gabel (https://polisci.wustl.edu/people/matthew-gabel/)  
PhD, University of Rochester

Clarissa Hayward (https://polisci.wustl.edu/people/clarissa-hayward/)  
PhD, Yale University
Degree Requirements

PhD in Political Science

Students in the PhD program are expected to acquire the following:

- A broad understanding of several fields of political science as a discipline
- Methodological competence sufficient to be productive professionals
- Specialized expertise in a particular field of concentration.

The procedures and requirements described below are designed to facilitate the achievement of these objectives. In addition to the formal requirements stated here, we provide a list of recommendations that students should follow to succeed in the program. For a detailed year-to-year outline of requirements and recommendations, please refer to the section “Specific Requirements for Each Year in the Program” at the end of the Guide to Graduate Studies, located on the Graduate Program website (https://polisci.wustl.edu/resources/).

Exceptions to any of these requirements must be approved by the director of graduate studies (DGS) in consultation with the Graduate Committee and, as needed, the respective Field Committee.

General Course Requirements

In general, all students must successfully complete the following core courses with a grade of B or better:

Francis Lovett (https://polisci.wustl.edu/people/frank-lovett/)
PhD, Columbia University

William R. Lowry (https://polisci.wustl.edu/people/william-lowry/)
PhD, Stanford University

Guillermo Rosas (https://polisci.wustl.edu/people/guillermo-rosas/)
PhD, Duke University

Betsy Sinclair (https://polisci.wustl.edu/people/betsy-sinclair/)
PhD, California Institute of Technology

Associate Professors

Deniz Aksoy (https://polisci.wustl.edu/people/deniz-aksoy/)
PhD, University of Rochester

Michael Bechtel (https://polisci.wustl.edu/people/michael-m-bechtel/)
PhD, University of Konstanz

David Carter (https://polisci.wustl.edu/people/david-carter/)
PhD, University of Rochester

Dino Christenson (https://polisci.wustl.edu/people/dino-christenson/)
PhD, Ohio State University

Justin Fox (https://polisci.wustl.edu/people/justin-fox/)
PhD, University of Rochester

Jacob Montgomery (https://polisci.wustl.edu/people/jacob-montgomery/)
PhD, Duke University

Sunita Parikh (https://polisci.wustl.edu/people/sunita-parikh/)
PhD, University of Chicago

Andrew Reeves (https://polisci.wustl.edu/people/andrew-reaves/)
PhD, Harvard University

Assistant Professors

Taylor Carlson (https://polisci.wustl.edu/people/taylor-carlson/)
PhD, University of California, San Diego

Ted Enamorado (https://polisci.wustl.edu/people/ted-enamorado/)
PhD, Princeton University

Christopher Lucas (https://polisci.wustl.edu/people/christopher-lucas/)
PhD, Harvard University

William Nomikos (https://polisci.wustl.edu/people/william-nomikos/)
PhD, Yale University

Michael Olson (https://polisci.wustl.edu/people/michael-olson/)
PhD, Harvard University

Keith Schnakenberg (https://polisci.wustl.edu/people/keith-schnakenberg/)
PhD, Washington University

Carly Wayne (https://polisci.wustl.edu/people/carly-wayne/)
PhD, University of Michigan

Professors Emeriti

Gary Miller (https://polisci.wustl.edu/people/gary-miller/)
PhD, University of Texas at Austin

Itai Sened (https://polisci.wustl.edu/people/itai-sened/)
PhD, University of Rochester

John Sprague (https://polisci.wustl.edu/people/john-sprague/)
Sidney W. Souers Professor Emeritus of Government
PhD, Stanford University

Degree Requirements

PhD in Political Science

Students in the PhD program are expected to acquire the following:

- A broad understanding of several fields of political science as a discipline
- Methodological competence sufficient to be productive professionals
- Specialized expertise in a particular field of concentration.

The procedures and requirements described below are designed to facilitate the achievement of these objectives. In addition to the formal requirements stated here, we provide a list of recommendations that students should follow to succeed in the program. For a detailed year-to-year outline of requirements and recommendations, please refer to the section “Specific Requirements for Each Year in the Program” at the end of the Guide to Graduate Studies, located on the Graduate Program website (https://polisci.wustl.edu/resources/).

Exceptions to any of these requirements must be approved by the director of graduate studies (DGS) in consultation with the Graduate Committee and, as needed, the respective Field Committee.

General Course Requirements

In general, all students must successfully complete the following core courses with a grade of B or better:
• Math Camp (offered during the August before the first semester)
• Game Theory (505) (first semester)
• Mathematical Modeling in Political Science (5052) (first semester)
• Quantitative Methods I (581) (second semester)
• Quantitative Methods II (582) (third semester)
• Causal Inference (5024) (fourth semester)
• Research Workshop I (590) (fifth semester)

According to the Probation and Dismissal Policy, if a student fails to obtain a B in one of the required courses, they will be placed on probation and have the opportunity to retake the course the following year. Failure to obtain a B after taking the course for the second time will result in dismissal from the program. Furthermore, failure to obtain a B in another required course while on probation is considered extreme underperformance and will result in dismissal from the program.

In addition to required courses, students will be taking courses in different fields. Courses are mainly concentrated during the first two years. Students should plan to take four courses per semester during their first year and three courses per semester during their second year.

Incompletes

Students are strongly discouraged from accumulating incompletes. The Graduate School prohibits more than 9 credit units’ worth of incomplete courses. The department supports this policy and will consider the number of incompletes that students have accumulated when evaluating their work and making decisions about financial support.

Fields

The department divides the discipline of political science into six fields:

• American politics
• Comparative politics
• Formal theory
• International politics
• Political and social theory
• Quantitative methods

Field requirements are met by completing the required courses with a grade of B+ or better. A major field requires completing five courses in that field with a grade of B+ or better; a minor field requires completing three courses in that field with a grade of B+ or better.

Students are expected to complete course requirements for the major and minor by the end of their fourth semester. Exceptions can be granted by the DGS on a case-by-case basis but not beyond the student’s sixth semester.

Field Requirements

American Politics

• Major: Students must satisfactorily complete (with a grade of B+ or better) at least four graduate-level seminars in American politics, including American Political Institutions (520) and American Political Behavior (5678).
• Minor: Students must satisfactorily complete (with a grade of B+ or better) at least three graduate-level seminars in American politics, including American Political Institutions (520) and American Political Behavior (5678).

Comparative Politics

• Major: Students must satisfactorily complete (with a grade of B+ or better) at least four graduate-level seminars in comparative politics, including Approaches to Comparative Politics (510).
• Minor: Students must satisfactorily complete (with a grade of B+ or better) at least three graduate-level seminars in comparative politics, including Approaches to Comparative Politics (510).

Formal Theory

• Major: Students must satisfactorily complete (with a grade of B+ or better) at least four graduate-level seminars in formal theory, including Game Theory (505), Seminar in Political Economy (5551), and three other 500-level courses requiring one of the above as a prerequisite or offered in the economics department.
• Minor: Students must satisfactorily complete (with a grade of B+ or better) at least three graduate-level seminars in formal theory, including Game Theory (505), Seminar in Political Economy (5551), and one other 500-level course requiring one of the above as a prerequisite or offered in the economics department.

International Politics

• Major: Students must satisfactorily complete (with a grade of B+ or better) at least four graduate-level seminars in international politics. This includes the 500-level graduate sequence and 400- and 500-level political science and economics courses authorized by the International Politics Committee.
• Minor: Students must satisfactorily complete (with a grade of B+ or better) at least three graduate-level seminars in international politics. The includes the 500-level graduate sequence and 400- and 500-level political science and economics courses authorized by the International Politics Committee.

Political and Social Theory

• Major: Students must satisfactorily complete (with a grade of B+ or better) at least four graduate-level courses in political theory; the theory faculty recommends at least two of the History of Political Thought courses (5090, 5092 and 5093) and at least two seminars in political theory.
• Minor: Students must satisfactorily complete (with a grade of B+ or better) at least three graduate-level courses in political theory authorized by the Political Theory Committee.

Quantitative Methods

• Major: Students must satisfactorily complete (with a grade of B+ or better) at least four methods courses, including the required sequence (581 and 582) and additional elective methodology courses authorized by the Quantitative Methods Committee.
• Minor: Students must satisfactorily complete (with a grade of B+ or better) at least three methods courses, including the required sequence (581 and 582) and an additional elective methodology course authorized by the Quantitative Methods Committee.

According to the Probation and Dismissal Policy, if a student fails to meet field requirements as a result of grades or for other reasons by the end of their fourth semester, then they will be placed on probation for one semester. Failure to meet the field requirements by the end of that semester results in dismissal from the program.

Qualifying Evaluations

Each student will be evaluated at the end of each semester through their second year. These evaluations will take place at the end of their first and second semesters, the end of their first-year summer, and at the end of their third and fourth semesters.

Evaluation criteria for the academic year include the following: regular classroom attendance (at least 90%), participation in departmental intellectual life (e.g., seminars, conferences, professionalization workshops), and grades (a grade of B or higher for all required courses). Grades will be particularly emphasized, and faculty of required courses will use grades as clear communication that students have mastered the course material. Each required course will include a cumulative final exam or another final assignment of a cumulative nature that will assess the student’s broad mastery of relevant materials.

At the end of their first-year summer, students must submit (a) evidence of research progress (which can consist of skill development, collaborative research, or individual research output) and (b) feedback from a faculty mentor.

The DGS will distribute a survey to all faculty to collect the necessary feedback regarding student performance and engagement. To remain in good standing, students must (a) be making good progress with respect to their coursework and mentored teaching experience assignments; (b) be advancing in terms of their research trajectory, as appropriate for their stage in the program; and (c) be maintaining professional comportment with faculty, peers, and staff.

If a student fails to successfully pass any of these evaluations, they will be placed on probation. If the student makes significant progress during the next evaluation period and satisfactorily addresses the terms of the standing probation, they will be removed from probation. Failing to make significant progress during the next evaluation period may result in dismissal from the program.

Third-Year Paper Requirement

During their second and third years, each student is required to produce a solo-authored research paper. The expectation is that this paper will be in the same field as the student's dissertation and at the level of quality for submission to a peer-reviewed journal.

Students need to identify two advisers (i.e., the research paper chair and a second reader) and obtain their signatures on the Research Paper Proposal Form after taking the qualifying exam (i.e., by the end of January of their second year). In consultation with these advisers (i.e., the committee), they need to develop a research design (motivation, theory, design, data sources) by the last day of classes of the spring semester of their second year. By the end of the spring semester, the student needs to schedule a formal defense of the proposal with their committee and submit a form with the advisers' signatures after the defense to the departmental administrative assistant responsible for graduate affairs.

The third-year paper is due to the committee by the first day of classes of the third year. The committees will grade these submissions within the first two weeks of the semester. At this point, students will either receive a "revise and resubmit" or a "reject and resubmit" from their committee. A "reject and resubmit" is a judgment by the faculty that the paper does not reflect satisfactory progress toward the research paper. Students receiving this evaluation will be placed on academic probation, and a failure to significantly improve the project will result in dismissal from the program. In extraordinary circumstances, a "conditional accept/high pass" can be granted.

Students will enroll in Research Workshop during their third year. This fall workshop is devoted to helping students revise their papers for final submission.
The final papers are due to the DGS and both readers by the start of the sixth semester. Students are required to defend this paper publicly. The DGS will organize a public presentation for all research papers within the first three weeks of the semester.

The Third-Year Committee will evaluate the quality of the research paper and its potential for submission to and acceptance in a peer-reviewed journal. Students who received a "reject and resubmit" during the first round should anticipate stricter scrutiny from faculty at this stage. The paper can be graded as pass or fail. A failing grade in this defense by students who previously received a "reject and resubmit" will result in dismissal from the program. A failing grade without a prior "reject and resubmit" will result in the student being placed on probation until they resubmit and successfully pass the research paper requirement, which must occur before the end of the spring term. Failing to do so will result in dismissal from the program.

In the event of disagreement between the chair and the reader, the DGS will select a third reader in consultation with the faculty in the student's area of study to evaluate the paper and make a decision about the final grade. The research paper chair and the reader(s) will inform the student and the DGS of the final grade, together with an explanation, within two weeks after the defenses have been completed.

Dissertation Committee and Prospectus Requirement

Students are required to form a Dissertation Committee that consists of at least three faculty members by the start of the fifth semester (January of their third year). Forming a committee requires selecting a dissertation chair and at least two other faculty members and then submitting the Dissertation Committee Proposal Form, which includes the signatures of all committee members. With the assistance of the DGS, students will make sure the composition of the committee also meets the Graduate School requirements.

Students will enroll in the year-long Research Workshop during their third year. The spring semester of this workshop is devoted to helping students develop their dissertation prospectuses.

Students are required to have defended the dissertation prospectus by the end of the sixth semester (May of their third year). Dissertation prospectus defenses will be announced in advance and will be open to the public. Students who fail to schedule a defense or who fail the defense will be put on probation and may re-defend their prospectus by August 1. Failing to schedule or failing the re-defense results in dismissal from the program.

Students are encouraged to apply for the National Science Foundation Dissertation Improvement Grant and to other outside funding agencies to pursue additional financial support for their dissertation research.

Summary Timeline

(Please refer to “Specific Expectations for Each Year in Program” in the Guide to Graduate Studies on the Graduate Program website for more details.)

- End of second semester: Evaluation of class performance and meeting with the DGS
- End of third semester: Required courses (with the exception of the Research Workshop) completed
- Beginning of fourth semester (January): Submit Third-Year Paper Form (seeking chair and reader)
- End of fourth semester: Major and minor field requirements completed; defend research paper prospectus to chair and second reader
- Before the start of fifth semester (August): Submit third-year paper
- Beginning of sixth semester (January): Resubmit and defend third-year paper; submit Dissertation Committee Proposal Form
- End of eighth semester: Defend Dissertation Prospectus (resubmitted prospectus must be defended before the start of the seventh semester)

Dissertation and Defense

The requirements for the completion of the dissertation are described in the general Degree Requirements by the Graduate School, which are applicable to all Washington University doctoral candidates.

Graduation

Students need to graduate by May of their sixth year. Failure to do so results in the student being placed on probation. The student then has a chance to finish their dissertation by August of their seventh year. Failing that, they will be dismissed from the program.

Foreign Language Requirement

There is no uniform foreign language requirement set by the Graduate School or by the department. The extent and substance of foreign language competence required will be determined by the Graduate Committee in consultation with the student and their adviser.

Mentored Teaching Experience and Mentored Professional Experience Responsibilities

Students collaborate with a faculty member for a mentored teaching experience (MTE), a mentored professional experience, or a combination of the two, depending on their stage of development.
Mentored teaching responsibilities vary from course to course but in all cases may consist of attending class and grading papers and assignments. Examples of other responsibilities include running discussion sections or reviews, disseminating course materials and holding office hours.

Mentored professional experiences vary across faculty members but in all cases consist of participating in research activities.

Graduate students are expected to participate in the MTE for an average of 13.5 hours per week. During some weeks, this will involve considerably fewer hours; during other weeks (usually around midterm and finals), it will involve considerably more.

Faculty are expected to set expectations for grading at the beginning of each semester, and graduate students should plan accordingly for weeks of heavier grading or other responsibilities.

According to the Probation and Dismissal Policy, poor performance in the fulfillment of mentored teaching or mentored professional responsibilities will result in the student being placed on probation. Lack of improvement while on probation will result in dismissal from the program.

**Mentored Experience Requirement**

All students need to meet the Graduate School’s mentored experience requirement by the time they graduate. This requirement includes the following:

- Participating in departmental intellectual life, which includes but is not limited to meeting with outside speakers, attending talks and in-house conferences, presenting their own research, assisting with graduate student recruitment, and helping to organize in-house conferences (e.g., CPAC)
- Participating in an MTE for a “core” class in the student’s field of study; this includes introductory classes, Quantitative Political Methods, or other classes considered “core” by the DGS
- Giving at least one supervised guest lecture or presentation
- Participating in the MTE or teaching a class that involves regular interaction with students
