Degree Requirements
Master of Science in Biology

Students seeking the MS in Biology must satisfactorily complete 30 units of graduate course work in the life sciences, including two capstone courses designed to be completed over the two years of the program. In Capstone I, students will work with the program director to conduct an action research project on a topic relevant to life science learning in their classrooms. Capstone II provides an opportunity for the students to conduct research on the implementation of a leadership project they have chosen to fulfill over their final academic year prior to graduation.
