

Audiology and Communication Sciences

The Program in Audiology and Communication Sciences (PACS) offers exceptional graduate education programs in clinical audiology (AuD), deaf education (MSDE), and speech and hearing sciences (PhD) as well as an undergraduate minor in speech and hearing (<http://bulletin.wustl.edu/undergrad/artsci/speechhearing/#minors>).

PACS provides students with a uniquely supportive and approachable atmosphere where they are encouraged and respected by one another and by faculty as they develop their passion, knowledge, and experience. With hearing research programs, a school for children who are deaf or hard of hearing, and audiology clinics located on campus, our students gain a breadth and depth of firsthand experience with opportunities to further their educations and careers. As one of the oldest and most respected centers for education, clinical care, and research in hearing disorders, balance, and language, our history is rich in groundbreaking discoveries, and our highly ranked graduate programs are taught by some of the leading minds in these fields.

By preparing passionate and experienced graduates, we strive to improve outcomes for people with hearing disorders.

Additional Information

Additional information — including application and admission information, program descriptions, and tuition and fees — can be found on the PACS website (<https://pacs.wustl.edu/>) or through direct correspondence with PACS.
