M01 OT 595 Independent Study
Active participation in research activities with program faculty. A written plan of study agreed upon by faculty and student. Permission of faculty adviser required. Credit variable, maximum 6 units.

M01 OT 611 Professional Immersion in Occupational Therapy
This foundational course prepares students to manage the changing paradigms of health care that are encountered in future practice. Students are introduced to settings across the continuum of care, professional team roles, and health policy which are integrated into future coursework. Health informatics systems support professional practice and are explored as a means to understand continuum of service delivery, documentation, and reimbursement systems. Students learn foundational tools of the profession, including the current practice framework and activity analysis. Credit 3 units.

M01 OT 612 Neuroscience Principles Supporting Occupational Performance
This foundational course explores the structures and functions of the nervous system as they relate to occupational performance. Students develop a basic understanding of the neural mechanisms that underlie motor function, sensation, perception, cognition, and affect. Credit 3 units.

M01 OT 613 Theoretical Foundations Supporting Occupational Performance
This course explores the philosophical and theoretical foundations of the profession. The evolving theories, models, and frames of reference which support occupational therapy research and practice are compared and applied to case scenarios. Emphasis will be on the PEOP model of occupational performance and the core principles of client-centered care and disability. The meaning and complexity of occupation and occupational performance will be explored as students gain an understanding of humans as occupational beings. Credit 2 units.

M01 OT 614 Elements of Research Design and Use of Data
Building on prerequisite knowledge, the student engages in research design and data analysis. Students locate sources of grant funding, compose an IRB proposal, identify appropriate statistical analyses of data based on the research question, evaluate the psychometrics of assessments, and analyze both qualitative and quantitative data. Credit 3 units.

M01 OT 615 Fundamentals of Professional Communication
This course provides foundational skills in effective verbal and nonverbal communication for all aspects of occupational therapy practice. Evidence-based models of professional communication are presented with an emphasis on therapeutic modes of communication. Students develop competency in therapeutic use of self, stages of change, group dynamics, leadership and roles, and the process of conducting an occupational profile using semi-structured assessment. Credit 3 units.

M01 OT 616 Professional Identity and Practice I
This course explores the person, environment, and occupation of the student as a representative of the profession and institution. The initial course of the series introduces students to theories, models, frames of reference and best evidence. They select health conditions and apply the occupational therapy process to design comprehensive evidence-based intervention plans using applicable theories, models, frames of reference and best evidence. Credit 2 units.

M01 OT 641 Elective MSOT to PhD Mentored Scholarship II
This is the second in a three-course sequence in which students participate in a mentored scholarship experience to prepare for entry into a PhD program. Students conduct clinical research or engage in the scholarship of teaching and learning under the direction of a researcher. Learning experiences include designing, implementing, evaluating, and disseminating research to advance knowledge translation, professional practice, service delivery, or professional issues. Students will actively participate in a research laboratory as a means to gain exposure to the skills needed to run an independent laboratory as a career scientist. Credit 2 units.

M01 OT 642 Evaluation and Intervention: Adults and Older Adults I
This course explores the person, environment, and occupation factors that influence occupational performance of adults and older adults. Students evaluate these factors, interpret findings, and design components of intervention plans using applicable theories, models, frames of reference and best evidence. Credit 6 units.

M01 OT 643 Case-Based Learning II: Occupational Performance Enabling Participation
In this second of a three-semester sequence, students continue to study select health conditions and apply the occupational therapy process to cases under the guidance of a facilitator. Students integrate concepts learned in the evaluation and intervention coursework to design comprehensive evidence-based intervention plans using applicable theories, models, frames of reference and best evidence. They select assessments, plan interventions, delineate OT/OTA roles, and make discharge recommendations that are client-centered and incorporate appropriate community resources. Credit 3 units.
M01 OT 645 Management Strategies for a Changing Practice Environment I
This is the first of a two-course series examining management and organizational principles for occupational therapy services as delivered in multiple practice environments. Students participate in a needs assessment, begin building capacity with a community partner, and develop a business or program plan. Interactions with managers, clinic leaders, community agencies, interprofessional teams, and other entrepreneurs allow students the opportunity for experiential learning. Credit 3 units.

M01 OT 646 Professional Identity and Practice III
This four-course series emphasizes the personal and professional growth of the student as a representative of the profession and institution. Students continue to develop professional identity and ethical practice in this third course. Students reflect on individual contributions to institutional culture, mission, vision, and core values. Supervised experiences in a clinical or community setting allow the student to practice skills and behaviors learned in the classroom. Credit 2 units.

M01 OT 648 OTD Mentored Scholarship II
This is the second in a three-course sequence in which students participate in a mentored scholarship experience. Students select topics, background and contextual information, and sources for evidence-based practice. Students conduct clinical research, clinical and community program development, or the scholarship of teaching and learning within the mentor’s line of scholarship. Learning experiences will include designing, implementing, evaluating, and disseminating research to advance knowledge translation, professional practice, service delivery, or professional issues. Credit 2 units.

M01 OT 650 Theories, Models and Classifications
This course will explore the historical and theoretical foundations of Rehabilitation and Participation Science and track the development of rehabilitation models and classification systems. Students will find and use specific theories to ground their understanding of the area of their specialization, and they will be taught how to classify and apply levels of evidence to build the background for their doctoral work. The course will be team-taught with students and include faculty presentations and discussions. Credit 3 units.

M01 OT 651 Elective MSOT to PhD Mentored Scholarship III
This is the third in a three-course sequence in which students participate in a mentored scholarship experience to prepare for entry into a PhD program. Students conduct clinical research or engage in the scholarship of teaching and learning under the direction of a researcher. Learning experiences include designing, implementing, evaluating, and disseminating research to advance knowledge translation, professional practice, service delivery, or professional issues. Students will actively participate in a research laboratory as a means to gain exposure to the skills needed to run an independent laboratory as a career scientist. Credit 2 units.

M01 OT 652 Evaluation and Intervention: Adults and Older Adults II
This course explores the person, environment, and occupation factors that influence occupational performance of adults and older adults. Students evaluate these factors, interpret findings, and design components of intervention plans using applicable theories, models, frames of reference and best evidence. Mechanisms for reimbursement, re-evaluation, and discharge planning as applicable to various practice settings are addressed. Credit 6 units.

M01 OT 653 Case-Based Learning III: Occupational Performance Enabling Participation
In this last course of the series, students continue to study select health conditions and apply the occupational therapy process to cases under the guidance of a facilitator. Students integrate concepts learned in the evaluation and intervention course work to design comprehensive evidence-based intervention plans using applicable theories, models, frames of reference and best evidence. They select assessments, plan interventions, delineate OT/OTA roles, and make discharge recommendations that are client-centered and that incorporate appropriate community resources. Credit 3 units.

M01 OT 655 Management Strategies for a Changing Practice Environment II
This is the second of a two-course series that examines management and organizational principles for occupational therapy services as delivered in multiple practice environments. Students implement and evaluate a community program, report an outcomes and sustainability plan back to the community, and prepare an application for funding based on the need for services. Interactions with managers, clinic leaders, community agencies, interprofessional teams, and other entrepreneurs allow students the opportunity for experiential learning. Credit 3 units.

M01 OT 656 Professional Identity and Practice IV
This four-course series emphasizes the personal and professional growth of the student as a representative of the profession and institution. This last course addresses preparation for national certification, state requirements for scope of practice and licensure, interprofessional collaboration, supervision of other OT personnel, ethical behavior, continuing competence and professional service. Orientation to Level II fieldwork is covered. Credit 2 units.

M01 OT 658 OTD Mentored Scholarship III
This is the third in a three-course sequence in which students participate in a mentored scholarship experience. Students conduct clinical research, clinical and community program development, or the scholarship of teaching and learning within the mentor’s line of scholarship. Learning experiences will include designing, implementing, evaluating, and disseminating research to advance knowledge translation, professional practice, service delivery, or professional issues. Credit 2 units.

M01 OT 660 Biopsychosocial Factors Influencing Performance
The course will provide an in-depth understanding of the biomedical research literature pertaining to factors that influence performance. The course focuses on psychological, physiological, sensory, perceptual, motor, cognitive processes as well as subjective and objective assessments of the environment for home, work and community contexts that contribute to performance and performance changes with rehabilitation. The course will be team taught with a combination of lecture and seminar formats to lay the foundational principles of performance and to discuss how the capacity to perform supports participation. Credit 3 units.
The role of experience in shaping brain functions is a central question in psychology and neuroscience. The prevailing view is that the functional organization of even the mature brain is dynamic — changing in response either to increases or decreases in stimulation. However, this has not always been the accepted perspective. Even now, many fundamental questions remain, and the answers should directly impact the way that we approach learning and the rehabilitation (re-learning) in the future. Just what are the limits on plasticity in the adult brain? How should environments be structured to exploit this capacity effectively? Is all reorganization behaviorally relevant? What factors contribute to adaptive, as opposed to maladaptive, changes? Together, we will consider historical perspectives on, and what is presently known about, these and related questions.

Credit 3 units.
Credit variable, maximum 12 units.
