Courses

M45 ObGyn 730 OB/GYN Clerkship
All third-year medical students participate in a five-week clinical clerkship in Obstetrics and Gynecology. This is divided into components of outpatient OB/GYN, inpatient obstetrics and inpatient gynecology. Comprehensive study of the reproductive health needs of women in both the office setting and the surgical setting is the focus of the curriculum. Students are actively involved in all settings of health care delivery: outpatient faculty clinics within all specialties, resident ambulatory clinics, operating rooms for all obstetric or gynecologic cases, inpatient floors of L&D and Gynecology, and the emergency department/hospital inpatient consultations. Faculty, fellows, residents, and nurse practitioners provide teaching for this rotation. Student-directed didactics include the faculty and chief resident lecture series, procedural skill station session and faculty-assigned preceptor groups that meet throughout their five-week rotation.
Credit 192 units.

M45 ObGyn 804 OB/GYN Generalist Outpatient Care Subinternship
This experience is designed to primarily acquaint the student with the diagnosis and care of outpatients. Students will work one-on-one with attending staff, to focus on an overview of evaluation, diagnosis, and treatment of common obstetric and gynecologic concerns. The subintern will spend the majority of time attending half day clinics and private offices. Overnight OB call is required (approximately 2 evening shifts) to acquaint the student with the house staff and hospital, providing opportunity to participate in deliveries. If desired, additional time can be arranged to participate in observe outpatient surgical procedures. A 30-45 minute presentation to attendings and house staff will culminate the rotation on a selected OB/GYN topic.

M45 ObGyn 810 OB/GYN Reproductive Endocrinology & Infertility Subinternship
The subintern will participate in the office and hospital in the study and treatment of women with reproductive endocrine disorders and infertility. The student will attend and present in conferences, attend surgery, observe assisted reproductive technology procedures, have assigned reading and be an integral part of the reproductive endocrine service. Opportunities for clinical research projects in reproductive endocrinology are also available.

M45 ObGyn 830 Gynecologic Oncology Subinternship
The subintern will take part in the work-up of tumor patients prior to surgery and/or radiotherapy, assist in pelvic operations, help render perioperative care, and review pathology specimens and slides. The student will participate in GYN Tumor Clinic sessions, make hospital rounds with house staff, accompany chief residents on consultations, and attend OB/GYN conferences. Opportunities for clinical or basic research projects in gynecologic malignancy are also available.

M45 ObGyn 833 Special Topics in Reproductive Health
Students will attend a variety of outpatient clinics to interact with patients seeking different reproductive health services. These topics include family planning and abortion services at the Hope Clinic and BJH; general gynecology services at our faculty practice GYN clinic (WHC) and OB/GYN resident clinic (COH 3); specialized reproductive health services including STI testing and contraception at the St. Louis STD clinic, the SPOT, and C3 Clinic; and OB and pregnancy centering clinics at the Center for Outpatient Health and Affinia. There may also be an opportunity to attend an adolescent and pediatric gynecology clinic, a women's cardiology clinic, and an adult transgender care clinic. Clinical experiences will be mainly ambulatory, but there is potential to work with the Family Planning faculty physicians in the operating room at Barnes Jewish Hospital. The student will prepare a 15-20 minute presentation on a reproductive health topic of their choice to present at the end of the rotation.

M45 ObGyn 843 Maternal-Fetal Medicine Outpatient Care Subinternship
Students will see a variety of high-risk obstetrical patients in the outpatient setting in the Center for Outpatient Health. The student will evaluate various types of reproductive-age patients with medical or obstetrical complications, including preconception consultations, prenatal care consultations, and initial prenatal visits. The student will also see return patients to experience the continuity of prenatal care. Students will participate in antenatal testing and learn basic ultrasonography skills. The student will be responsible for one presentation to be given to the OB teams at the end of the rotation. Students are provided independent study time to put together the presentation, which should be created in PowerPoint and on a topic of their choice, inspired by a patient-related clinical condition that piqued their interest during the block. In addition, the student will have the option to take overnight call or call in the Pregnancy Assessment Center in order to gain more hands-on experience with inpatient obstetrics; this is voluntary and not a requirement.

M45 ObGyn 844 Maternal-Fetal Medicine Inpatient (Antepartum) Subinternship
Areas of patient care will include the Women's Assessment Center (WAC), the Antepartum Unit, and Labor & Delivery. The primary team will be the Antepartum Team, which includes a second-year and third-year OB/GYN resident, an MFM fellow, and the MFM attending. Students are expected to become functioning members of the antepartum team, with their own patients whom they will be responsible for rounding on and completing day-to-day tasks. Our patients include those who are admitted to the Antepartum Unit, various intensive care units, and other services with complications in pregnancy. The student will prepare a brief talk on a topic of their interest during the course of the rotation.
M45 ObGyn 856 OB/GYN Ultrasound: Genetics
Working with the attending physicians in the Ultrasound Units at the Center for Outpatient Health and the Center for Women’s Wellness at Missouri Baptist Medical Center, the student will learn the principles and techniques of non-invasive screening for fetal disorders and observe the performance of invasive prenatal diagnostic procedures. The student will also learn the standards and guidelines for performance of the antepartum obstetrical ultrasound examination and female pelvic examination. Normal and abnormal fetal and gynecologic anatomy will be reviewed. Experience will be gained in pedigree analysis and familial risk factor assessment by working with genetic counselors. One day is spent in the Cytogenetics Laboratory observing the preparation of prenatal specimens for karyotype analysis. Opportunities for participation in clinical research are also available.

M45 ObGyn 870 Pediatric & Adolescent Gynecology Subinternship
Students will be working with two attendings, a fellow, and residents in both the inpatient and outpatient settings. They will largely be following this team from the outpatient offices located at COH 7, South County, Missouri Baptist & St. Louis Children’s Hospital. In addition, OR experiences are located at both Parkview Tower 3 and Children’s. The range of topics likely encountered will include gynecologic care in children and young adults, including menstrual and pubertal concerns; sexual health and contraception; vulvar vaginal irritation and labial adhesions; adolescent breast disorders; ovarian pathology and torsion; genital trauma; adolescent PCOS; pelvic pain and endometriosis; and the diagnosis and management of congenital gynecologic abnormalities and fertility preservation. Students will be involved in general pediatric and adolescent gynecology clinics as well specialty clinics (Disorders of Sexual Difference and Fertility Preservation/Gynecologic Late-Effects), and they will assist with inpatient and emergency room consultations and scheduled and emergent surgical cases as available. Subinterns will be required to give a presentation on a PAG topic of their choice by the end of the rotation, and they will have the option to participate in PAG research.

M45 ObGyn 875 Affinia Ambulatory OB/GYN Subinternship
Subinterns will be working one-on-one with a small subset of Affinia OB/GYN physicians at their office locations spread throughout St. Louis city. These federally-qualified health center sites will allow for a broad array of outpatient obstetrical and gynecologic exposures. Beyond general OB/GYN practice, this rotation will lend more perspective on access to care challenges and various aspects of health inequities.

M45 ObGyn 880 Family Planning Ambulatory Subinternship
Subinterns will work in small groups typically comprised of the attending, fellow, and resident within the office setting. The array of encounters will vary between ambulatory gynecology and family planning consultations. Topics specific to family planning include more complicated contraceptive counseling and treatment options in addition to providing treatment options for first- and second-trimester abortions, whether elective, due to lethal anomalies, or for maternal health concerns. Exposures to office-based procedures will include manual vacuum aspiration usage, laminaria placement, familiarity with medication usage (e.g., mifepristone), and other general gynecologic procedures (e.g., colposcopies, biopsy samplings, contraceptive placements).

M45 ObGyn 900 Research Elective - Obstetrics and Gynecology
Research opportunities may be available. If interested, please contact the Department of Obstetrics and Gynecology.
