Department of Otolaryngology

The Department of Otolaryngology-Head & Neck Surgery (http://oto.wustl.edu/) at Washington University in St. Louis has a rich, 130-year history of leadership in our field that is built on the foundations of academic medicine: patient care, research, training and service. Our past leaders include luminaries in the field of otolaryngology, such as John Blasdel Shapleigh, MD; Greenfield Sluder, MD; Lee Wallace Dean, MD; Theodore Walsh, MD; Joseph Ogura, MD; John Fredrickson, MD; Richard A. Chole, MD, PhD; and, presently, Craig A. Buchman, MD, FACS. Even from our earliest days, prior to the inception of the McMillan Eye, Ear, Nose and Throat Hospital (circa 1943), excellence has been an integral part of the department's fabric. A look at former faculty and program graduates reveals many of the true innovators in our field. While we remain humbled by our beginnings and past achievements, we choose not to rest on our laurels. Rather, we aspire to further our commitment to improving patients' lives by leading our field and its clinical application.

Today, more than ever, we are driven to provide highest-quality, cutting-edge patient care that is both safe and effective. Our Washington University physicians and team, together with our Honor Roll Award-winning hospital, Barnes-Jewish Hospital (U.S. News, 2018-19), are second to none when it comes to tackling the full spectrum of conditions involving the ear, nose, throat, head and neck. Our basic, translational and clinical research programs are remarkable, providing answers to a variety of relevant questions that build on our foundations of knowledge, lay the groundwork for future clinical trials, and provide state-of-the-art patient solutions. Our educational programs for medical and graduate students, physicians in training, and established practitioners are committed to creating a culture of lifelong learning that firmly establishes our next generation of leaders in the field. Our residency program is highly rated by all metrics, providing balanced training across the clinical subspecialties and unique opportunities for growth and development as clinician-scientists (T32 training grant) and educators. We are most proud that these activities are ongoing in a work culture that values collegiality, inclusiveness, diversity and mutual respect. The Department of Otolaryngology-Head & Neck Surgery at Washington University in St. Louis is a really outstanding place!

CID at Washington University School of Medicine

The consortium of graduate education, research and clinical programs known today as CID at Washington University School of Medicine was born out of the pioneering efforts of St. Louis physician Max Goldstein, MD. In 1914, he founded the Central Institute for the Deaf (CID), where doctors and teachers worked together to help deaf people. When CID’s school building opened two years later, its auditory/oral methods for instructing deaf children were groundbreaking.

Washington University and CID first joined forces in 1931, when CID’s established teacher training program became the first deaf education undergraduate program to affiliate with a university. Graduate programs in deaf education, audiology, and speech and hearing sciences soon followed.

CID’s research efforts began in the 1930s to study the anatomy and science of hearing. During World War II, CID’s research on hearing loss in military personnel laid the foundation for the field of audiology. CID also pioneered hearing testing and hearing aids, and it opened the country’s first hearing aid clinic in 1941. In September 2003, a new affiliation transferred CID’s graduate degree programs, research programs and adult audiology clinic — along with its building — to Washington University School of Medicine. The CID school continues to operate on the School of Medicine campus as CID — Central Institute for the Deaf.

Today, these programs continue to work together to fulfill a shared mission to serve people with hearing loss.

Faculty

Department Head

Craig A. Buchman, MD, FACS (https://oto.wustl.edu/people/craig-a-buchman-md/)

Visit our website for more information about our faculty (http://oto.wustl.edu/About-Us/Faculty-Physicians/) and their appointments.

A

Azadeh Afshari, MS, DDENT
Instructor in Clinical Otolaryngology (primary appointment)
MS Univ of Texas Med Sch Houston 2013
BS West Virginia University 2004
DDENT Univ of Texas Med Sch Houston 2014

B

Sean B Bailey, MD, MS
Instructor in Clinical Otolaryngology (primary appointment)
MD Tulane University 1987
MS Tulane University 1988
BS Tulane University 1981

Jianxin Bao, PHD
Adjunct Associate Professor of Otolaryngology (primary appointment)
PHD University of Florida 1992

Lynda Cheryl Berkowitz, MS
Instructor in Clinical Otolaryngology (primary appointment)
BA University of Virginia 1989
MD University of Virginia 1993
Heather Jean Grantham, M Ed, Phd
Associate Professor of Otolaryngology (primary appointment)
Associate Professor of Audiology and Communication Sciences
Director of Deaf Education Studies in Audiology and Communication Sciences
BA Emory University 1995
M Ed Smith College 2005
Phd Washington Univ in St. Louis 2009
Michael Anne Gratton, Phd
Professor of Otolaryngology (primary appointment)
Phd State Univ of NY Buffalo 1989
Christine Hilley Gustus, Ms
Instructor in Otolaryngology (primary appointment)
Instructor in Audiology and Communication Sciences
BS Purdue University 1973
MS Washington Univ in St. Louis 1975

Jason M. Hanson, MD
Instructor in Clinical Otolaryngology (primary appointment)
BA Johns Hopkins University 1988
MD Northwestern University 1992
Eugenie Guidote Herbosa
Instructor in Clinical Otolaryngology (primary appointment)
Jacques A Herzog, MD
Associate Professor of Otolaryngology (primary appointment)
MD University of MO Kansas City 1980
BA University of Missouri 1980
Keiko Hirose, MD
Professor of Otolaryngology (primary appointment)
Professor of Audiology and Communication Sciences
Professor of Pediatrics
Vice Chairman for Pediatrics Dept of Otolaryngology
MD Harvard University 1993
Dee Jay Hubbard, MA, Phd, MA1
Adjunct Assistant Professor of Otolaryngology (Speech Pathology) (primary appointment)
MA University of Iowa 1965
Phd University of Iowa 1967
BS Kansas State University 1962
MA1 University of Missouri 1999
Margaret Naunheim Huston, MD
Assistant Professor of Otolaryngology (primary appointment)
MD University of Chicago 2013
BA Duke University 2009

Ryan Scott Jackson, MD
Assistant Professor of Otolaryngology (primary appointment)
BA Saint Louis University 2004
MD Saint Louis University 2009
Arnold Scott Jacobson, MS, DDENT
Instructor in Clinical Otolaryngology (DMD) (primary appointment)
MS University of Missouri 1977
BA University of Missouri 1970
DDENT Washington Univ in St. Louis 1976

Susan Jerger
Adjunct Research Professor of Otolaryngology (primary appointment)
K

Dorina Kalogjeri, M PH, MD
Assistant Professor of Otolaryngology (primary appointment)
M PH Saint Louis University 2007
MD University of Tirana 1997

Eugenia Kardaris
Instructor in Clinical Otolaryngology (DDS) (primary appointment)

Cristine Nicole Klatt-Cromwell, MD
Assistant Professor of Otolaryngology (primary appointment)
MD University of Oklahoma 2011
BS University of Oklahoma 2007

Carl Wesley Lee, MD
Instructor in Clinical Otolaryngology (primary appointment)
MD Case Western Reserve Univ 1992
BA Stanford University 1998

David Seamus Leonard, MBCHB, MHA
Associate Professor of Otolaryngology (primary appointment)
BA Dartmouth College 1995
MBCHB National University of Ireland 2000
MHA Harvard University 2012

Jeffery Lichtenhan, MSSH, BAS, PHD
Assistant Professor of Otolaryngology (primary appointment)
Assistant Professor of Audiology and Communication Sciences
MSSH University of Kansas Medical 2002
BAS University of Kansas 2000
Phd University of Kansas 2006

Judith E Lieu, MD
Professor of Otolaryngology (primary appointment)
Vice Chairman Education Department of Otolaryngology
BS University of CA Davis 1988
MD Washington Univ in St. Louis 1992

Richard W Maack, MD
Instructor in Clinical Otolaryngology (primary appointment)
Marshall S Manne, DDENT, MS
Instructor in Clinical Otolaryngology (DDS) (primary appointment)
DDENT Washington Univ in St. Louis 1960
BA Washington Univ in St. Louis 1956
MS Indiana University Bloomington 1964

Sean Massa, MD
Assistant Professor of Otolaryngology (primary appointment)
BS Northwestern University 2008
MD University of Pennsylvania 2013

Claire Matthews, MA, PHD
Adjunct Assistant Professor of Otolaryngology (Speech Pathology) (primary appointment)
BA University of Kansas 1969
MA University of Kansas 1978
PHD University of Kansas 1980

Angela Liu Mazul, MS, PHD
Assistant Professor of Otolaryngology (primary appointment)
Assistant Professor of Surgery (Public Health Sciences)
MS Tulane University 2010
PHD University of North Carolina 2016
BS Georgia Tech 2009

Murray D McGrady, MD
Instructor in Clinical Otolaryngology (primary appointment)
BS University of Illinois 1982
MD University of Illinois 1986

Jonathan L McJunkin, MD
Associate Professor of Otolaryngology (primary appointment)
BS Northwestern University 2001
MD Jefferson Medical College 2005

Maithilee D Menezes, MD
Associate Professor of Otolaryngology (primary appointment)
BS Grinnell College 1997
MD Grinnell College 2002

David W. Molter, MD
Professor of Otolaryngology (primary appointment)
MD Duke University 1988
BS Duke University 1980

Gerald William Moritz, MD
Instructor in Otolaryngology (primary appointment)
MD Saint Louis University 1970
BS University of California 1965

Nancy Tye Murray, PHD, MS
Professor of Otolaryngology (primary appointment)
Professor of Audiology and Communication Sciences
PHD University of Iowa 1979
BS Texas Christian University 1977

O

Margaret A Ogden, MD
Professor of Otolaryngology (primary appointment)
Vice Chairman for Clinical Operations Dept of Otolaryngology
BA Amherst College 1997
MD Washington Univ in St. Louis 2002

Kevin Kenneth Ohlemiller, PHD
Associate Professor of Otolaryngology (primary appointment)
Associate Professor of Audiology and Communication Sciences
BS Indiana University Bloomington 1983
PHD Northwestern University 1990

Amanda J Ortmann, PHD, MS
Assistant Professor of Otolaryngology (primary appointment)
Assistant Professor of Audiology and Communication Sciences
Director of Audiology Studies in Audiology and Communication Sciences
BS Missouri Baptist College 2001
PHD University of Pittsburgh 2012
MS Washington Univ in St. Louis 2003

Randal C Paniello, MS, MD, BS1, MBA
Professor of Otolaryngology (primary appointment)
BS University of Illinois 1979
MS University of Illinois 1980
MD University of Illinois 1984
BS1 University of Illinois 1979
MBA Washington Univ in St. Louis 1999

Margaret Grace Peak, MA, PHD
Adjunct Assistant Professor of Otolaryngology (Audiology) (primary appointment)
MA Saint Louis University 1961
BS Maryville University 1959
PHD Columbia University 1975

Jonathan Erik Peelle, BAS, MS PSYC, PHD
Associate Professor of Otolaryngology (primary appointment)
Associate Professor of Psychological & Brain Sciences
BAS Houghton College 1999
MS PSYC Brandeis University 2002
PHD Brandeis University 2005

Jay Francis Piccirillo, MD
Professor of Otolaryngology (primary appointment)
Professor of Biostatistics
Professor of Medicine
Professor of Occupational Therapy
Vice Chairman for Research, Dept of Otolaryngology
MD University of Vermont 1985
BA University of Vermont 1979

Patrik Pipkorn, MD
Assistant Professor of Otolaryngology (primary appointment)
MD University of Gothenburg 2007

**Gerald Raymond Popelka**
Adjunct Professor of Otolaryngology (primary appointment)

**Lisa Gayle Potts, MS, PHD**
Assistant Professor of Otolaryngology (primary appointment)
Assistant Professor of Audiology and Communication Sciences
MS Washington Univ in St. Louis 1991
PHD Washington Univ in St. Louis 2006

BS Middlebury College 2000
Research Electives
Otolaryngology Research Electives

During the fourth year, opportunities exist for many varieties of advanced clinical or research experiences.

The type of research will depend upon the current phase of the research program in each laboratory. Students should contact the director of each laboratory to negotiate.

Pablo M. Blazquez, PhD
East McDonnell Science Building
4566 Scott Avenue
Phone: 314-362-1013

This lab studies the role of the vestibulocerebellum and its target nuclei for eye movement control and spatial orientation. We use a range of methodologies, including single and multiunit recordings, electrical brain stimulation, computational methods, pharmacology and behavioral studies. Our main lines of research are as follows: (1) signal transformations carried out by the vestibulocerebellum during visual and vestibular stimulation; (2) neuronal computations performed by the anterior and posterior cerebellar vermis for spatial navigation in mice; and (3) the role of the cerebellum-brainstem loop in motor learning in the vestibulo-ocular reflex.

Students will be instructed in one or several techniques and are expected to contribute significantly to the development of specific lab projects.

Judith E.C. Lieu, MD, MSPH
3S3 Children's Hospital; and McMillan, 9th Floor
Phone: 314-747-8205

Our focus is clinical outcomes research in pediatric otolaryngology. The Clinical Outcomes Research office performs clinical epidemiology and health services research. (Please refer to the research elective offered by Dr. Jay Piccirillo for more details.) These techniques and methodologies are applied to investigate clinical problems in children. Projects currently underway include the evaluation of the quality of life of young children with hearing loss, the evaluation of hearing loss on the perception of fatigue in children, and the use of MRI to investigate the effects of hearing loss in children. Potential studies include evaluating changes in the quality of life of children who begin using hearing amplification devices. Other projects of the student’s choosing that would utilize these research techniques may also be pursued.

Jay F. Piccirillo, MD
McMillan, 9th Floor
Phone: 314-362-8641

The focus of this lab is on gene–environment interactions in cochlear injury. We study the interaction of genes and environment that increase cochlear injury due to noise and ototoxic exposure, with an emphasis on how these may yield apparent presbycusis. Because cochlear function and injury is the same in mice and humans and governed by the same genes, we use mostly mouse models. Methods employed include standard auditory brainstem response assessment and intracochlear recording, quantitative light microscopy, immunohistochemistry, and Western blots. We also collaborate to map and perform the expression profiling of genes that underlie traits we have discovered. We and our collaborators have identified specific genes and inbred strains of mice that mimic the three major forms of human presbycusis (sensory, neural and strial). Sensory presbycusis appears to be promoted by alleles and mutations that impair protective factors (e.g., antioxidant enzymes) or that impair ion homeostasis. Neural presbycusis can be modeled by mutations that alter the function of cholinergic receptors. Although we are not sure what types of genes and mutations can lead to strial presbycusis, we have discovered four mouse strains that show the key feature of this disease (age-related endocochlear potential reduction) and that also show distinct types of strial pathology.

We have shown that some of the same gene alleles and mutations that promote presbycusis also promote cochlear noise injury. Such findings point to an interpretation of sensory presbycusis as principally cumulative injury. We have also published evidence for one or more quantitative trait loci that impact the qualitative character of noise injury. Important implications of our findings are (1) that there exists no single "mammalian" archetype of cochlear noise injury and (2) that injury to the organ of Corti and the lateral wall are mechanistically and genetically independent.

Our research is eminently adaptable in difficulty and scale to students' schedules and other requirements. Students may expect to learn the full range of methods we employ, including physiology, immunohistochemistry, histopathology and cellular/molecular techniques.

Kevin K. Ohlemiller, PhD
2205 Central Institute for the Deaf
Phone: 314-747-7179

The type of research will depend upon the current phase of the research program in each laboratory. Students should contact the director of each laboratory to negotiate.

The type of research will depend upon the current phase of the research program in each laboratory. Students should contact the director of each laboratory to negotiate.
technology to capture ecological momentary assessments of tinnitus. Additional projects include exploiting neuroplasticity as part of olfactory training for patients with anosmia. With the use of clinical epidemiology methodology, we can also study a variety of other diseases.

Courses

M55 Oto 660B Clinical Topics In Otolaryngology
This course consists of nine introductory lectures on common diseases of the head and neck, including voice disorders, head and neck cancer, hearing loss, management of vertigo, pediatric otolaryngology, salivary gland disorders, sinusitis, otolaryngologic emergencies and facial trauma. Additionally, there is a case-based roundtable focusing on otolaryngology disorders affecting the geriatric population and the involvement of allied health care disciplines in the evaluation and management of these patients. Each lecture is highlighted by case presentations and treatment options in addition to pathophysiology. This course follows the physical examination practicum given earlier in the academic year. Credit 9 units.

M55 Oto 801 Otolaryngology Subinternship
Four-week rotation includes evaluation of ENT problems presented to specialist for diagnosis and treatment. The student participates in the clinic, hospital, and operating room. This may also include time on the Pediatric ENT Service, Audiology, Voice Laboratory, and Vestibular Evaluation Laboratory. Option of rotation on the ENT Service at VAMC is possible.

M55 Oto 803 Pediatric Otolaryngology
The student will actively participate in the clinical office, inpatient consultations, and surgery with the attending staff at St. Louis Children's Hospital. Care would be taken to provide experience in the common problems one would see in primary care pediatrics or family practice. Participation in sub-specialty/multidisciplinary clinics such as the Cleft and Craniofacial clinic is encouraged. Opportunity will be provided to learn the fundamentals of audiological evaluation. Students participating in this elective will attend academic conferences in both the pediatric and adult divisions.

M55 Oto 833 Ambulatory Otolaryngology for the Primary Care Physician
This course offers a four-week exposure to ambulatory care of patients with diseases of the head and neck. Eight half-day sessions per week will be offered in attending clinics for general otolaryngology, head and neck cancer, otology, and pediatric otolaryngology. Two half-day sessions are reserved for audiology, vestibular lab, and voice lab experience. Surgical exposure is available for selected cases as identified by the student and attending physician, but the main goal of this rotation is outpatient diagnosis and management.

M55 Oto 900 Research Elective - Otolaryngology
Research opportunities may be available. If interested, please contact the Department of Otolaryngology.
