Department of Pathology & Immunology

The Department of Pathology & Immunology (http://pathology.wustl.edu) is involved in the clinical diagnosis and monitoring of disease, in the teaching of pathology and immunology, and in research on the molecular basis of disease and immunology.

The department is responsible through its divisions for studying the pathogenesis and the biochemical and anatomical basis of diseases. Pathologists do research on disease processes using molecular, genetic and structural analysis. Pathologists have the responsibility for the cytological and anatomical diagnosis of diseases and for developing novel structural and molecular approaches for the analysis of them, particularly cancers and infectious diseases. The divisions of Anatomic and Molecular Pathology (https://pathology.wustl.edu/divisions/amp/), Immunobiology (https://pathology.wustl.edu/divisions/immunobiology/), Laboratory and Genomic Medicine (http://pathology.wustl.edu/divisions/lgm/) and Neuropathology (http://pathology.wustl.edu/divisions/neuropathology/) have faculty involved in teaching, clinical service and research. Prominent areas of research include experimental diabetes, hematology, bone pathophysiology, cancer, and gastrointestinal and vascular pathology.

The department teaches an extensive course during the second year of the curriculum and presents a number of conferences that third- and fourth-year students can attend. The department also offers a number of clerkships. The course director of the second-year Pathology course is Erika C. Crouch, PhD, MD. Students can take clerkships in Autopsy Pathology, Surgical Pathology or Laboratory Medicine, or they may participate in the research activities of the faculty.

The Division of Immunobiology (https://pathology.wustl.edu/divisions/immunobiology/) integrates immunobiology activities at the school. It is responsible for the teaching of immunology during the first year of the curriculum (Brian T. Edelson, MD, PhD, is the course director) and for conducting basic research in immunobiology and in the immunological basis of disease.

Many faculty in the department are involved in graduate teaching and participate in the various programs offered by the Division of Biology and Biomedical Sciences (http://dbbs.wustl.edu/Pages/). The department has strong participation in the Immunology graduate program.

Faculty

Joseph Gaut, MD, PhD (https://pathology.wustl.edu/people/joseph-gaut-md-phd/)
Anatomic and Molecular Pathology Division Head

Robert Schreiber, PhD (https://pathology.wustl.edu/people/robert-schreiber-phd/)
Immunobiology Division Head

Charles Eby, MD (https://pathology.wustl.edu/people/charles-eby-md/)
Immunobiology Division Head

Robert E. Schmidt, MD, PhD (https://pathology.wustl.edu/people/robert-schmidt-md-phd/)
Neuropathology Division Head

Visit our website for more information about our faculty (https://pathology.wustl.edu/people/) and their appointments.

Michael Alberti, MD
Instructor in Pathology and Immunology (Pending Dean's Approval) (primary appointment)
BS California Lutheran Universit 2005
MD University of Alabama 2013

Paul M Allen, MS, PHD
Robert L. Kroc Professor of Pathology and Immunology (primary appointment)
MS University of Michigan 1977
BS University of Michigan 1974
PHD University of Michigan 1981

Gaya K Amarasinghe, PHD
Professor of Pathology and Immunology (primary appointment)
Professor of Biochemistry and Molecular Biophysics
Professor of Molecular Microbiology
PHD University of Maryland 2001
BS City College 1997

Ferdinand Enginco Amarillo, PHD
Associate Professor of Pathology and Immunology (primary appointment)
PHD Florida State University 2010

Neil William Anderson, BS1, MD
Associate Professor of Pathology and Immunology (primary appointment)
BS1 University of Wisconsin-Madiso 2005
MD University of Wisconsin-Madiso 2009

Maksym Artomov, PHD, MS
Associate Professor of Pathology and Immunology (primary appointment)
Associate Professor of Biomedical Engineering
PHD Mass Inst of Technology (MIT) 2009
MS University of Chicago 2005

B

Samuel James Ballentine, MD
Assistant Professor of Pathology & Immunology (primary appointment)
MD New York University 2013

Michael James Barratt, PHD
Associate Professor of Pathology and Immunology (primary appointment)
PHD KINGS COLLEGE LONDON 1994

Cory Thomas Bernadt, MD, PHD
Associate Professor of Pathology and Immunology (primary appointment)
MD University of Nebraska 2006
PHD University of Nebraska 2004
BS Nebraska Wesleyan University 1998

Deepta Bhattacharya, PHD
Adjunct Associate Professor of Pathology and Immunology (primary appointment)
PHD University of CA Berkeley 2001
BS Indiana University Bloomington 1996

Fouad Ismat Boulos, BS1, MD
Associate Professor of Pathology and Immunology (primary appointment)
BS1 American University of Beirut 1996
MD American University of Beirut 2001

Victor Borisovich Brodsky, MD
Associate Professor of Pathology and Immunology (primary appointment)
BS Boston University 2001
MD Boston University 2005

Elizabeth M Brunt, MD
Professor Emeritus of Pathology and Immunology (primary appointment)
MD University of Texas Galveston 1981
BS Georgetown University 1974

Melissa Marie Budelier, PHD
Instructor in Pathology and Immunology (primary appointment)
PHD Washington Univ in St. Louis 2018
BS Marquette University 2013

Carey-Ann Dawn Burnham, PHD
Professor of Pathology and Immunology (primary appointment)
Professor of Medicine
Professor of Molecular Microbiology
Professor of Pediatrics
Vice Chair for Faculty Development Department of Pathology and Immunology
PHD University of Alberta 2007

BS University of Alberta 2002

Kathleen Byrnes, MD
Assistant Professor of Pathology and Immunology (primary appointment)
BS Washington Univ in St. Louis 2008
MD Tulane University 2013

Yang Cao, PHD
Assistant Professor of Pathology and Immunology (primary appointment)
PHD Univ of Wisconsin Madison 2014

Marina Cella, MD
Professor of Pathology and Immunology (primary appointment)
MD University of Genova 1989

Jiye Cheng, MS, PHD
Instructor in Pathology and Immunology (Pending Dean's Approval) (primary appointment)
MS Ohio State University 2010
PHD Ohio State University 2011

Rebecca D Chernock, MD
Professor of Pathology and Immunology (primary appointment)
Professor of Otolaryngology
MD University of Pennsylvania 2004
BS Brown University 1999

Kyunghhee Choi, PHD, MS
Professor of Pathology and Immunology (primary appointment)
BS Seoul National University 2002
PHD University of Illinois 1988
MS Seoul National University 1984

John Spellman Aranake Chrisinger, MD
Assistant Professor of Pathology and Immunology (primary appointment)
BA Washington Univ in St. Louis 2004
MD Washington Univ in St. Louis 2012

Marco Colonna, MD
Robert Rock Belliveau MD Professor of Pathology (primary appointment)
Professor of Medicine
MD Parma University 1983

Leigh Anne Compton, MD, PHD
Assistant Professor of Pathology and Immunology (primary appointment)
MD Vanderbilt University 2008
BS Centenary College Louisiana 1998
PHD Vanderbilt University 2005

Joseph C. Corbo, AB, MD, PHD
Professor of Pathology and Immunology (primary appointment)
Professor of Genetics
Professor of Ophthalmology and Visual Sciences
AB Stanford University 1990
MD University of California 1999
BS Stanford University 1990
PHD University of California 1997

Richard James Cote, MD
Professor of Pathology and Immunology (primary appointment)
Head of the Department of Pathology and Immunology
MD University of Chicago 1980

Erika C Crouch, PHD, MD
Professor of Pathology and Immunology (primary appointment)
Vice Chair for Education Department of Pathology and Immunology
PHD University of Washington 1978
MD University of Washington 1979

Sonika M Dahiya, MD
Professor of Pathology and Immunology (primary appointment)
MD Kasturba Medical College 2000

Gautam Dantas, PHD
Professor of Pathology and Immunology (primary appointment)
Professor of Biomedical Engineering
Professor of Molecular Microbiology
PHD University of Washington 2005
BS Macalester College 2000

Louis P Dehner, MD
Professor of Pathology and Immunology (primary appointment)
Professor of Pathology in Pediatrics
MD Washington Univ in St. Louis 1966
BA Washington Univ in St. Louis 1962

George J Despotis, MD
Associate Professor of Pathology and Immunology (primary appointment)
Associate Professor of Anesthesiology
MD Saint Louis University 1985
BA Greenville College 1981

Dennis J. Dietzen, PHD
Professor of Pathology and Immunology (primary appointment)
Professor of Pediatrics
BS Marian College 1986
PHD Indiana University Bloomington 1992

Eric James Duncavage, MD
Professor of Pathology and Immunology (primary appointment)
BS Vanderbilt University 1998
MD University of Tennessee 2004

William Michael Dunne Jr, PHD
Adjunct Professor of Pathology and Immunology (primary appointment)
PHD Univ of Wisconsin Madison 1981
BS Univ of Wisconsin Madison 1975

Charles S Eby, MD
Professor of Pathology and Immunology (primary appointment)
Professor of Medicine
BS Duke University 1977
MD Vanderbilt University 1981

Brian T. Edelson, MD, PHD, UNKNOWN
Associate Professor of Pathology and Immunology (primary appointment)
MD Washington Univ in St. Louis 2004
PHD Washington Univ in St. Louis 1995
UNKNOWN Brown University 1995

Takeshi Egawa, PHD, MD
Associate Professor of Pathology and Immunology (primary appointment)
PHD Osaka University 2002
MD Osaka University 1994

David Eisenstein, MD
Associate Professor of Pathology and Immunology (primary appointment)
MD University of Cincinnati 1989

Ali Hassan Ellebedy, PHD
Assistant Professor of Pathology and Immunology (primary appointment)
Assistant Professor of Medicine
Assistant Professor of Molecular Microbiology
BS Cairo University 2004
PHD Univ of TN - Health Sci Center 2011

Christopher William Farnsworth, PHD
Assistant Professor of Pathology & Immunology (primary appointment)
BS Roberts Wesleyan College 2009
PHD University of Rochester 2017

John Lawrence Frater, MD
Associate Professor of Pathology and Immunology (primary appointment)
MD Medical College of Ohio 1996
BS University of Notre Dame 1992

Daved H Fremont, PHD
Professor of Pathology and Immunology (primary appointment)
Professor of Biochemistry and Molecular Biophysics
Professor of Molecular Microbiology
BS Univ of Wisconsin Madison 1986
PHD University of CA San Diego 1993

Joseph P. Gaut, PHD, MD
Associate Professor of Pathology and Immunology (primary appointment)
Associate Professor of Medicine
PHD Washington Univ in St. Louis 2004
BA Washington Univ in St. Louis 1996
MD Washington Univ in St. Louis 2004

Susan Gilfillan, PHD
Associate Professor of Pathology and Immunology (primary appointment)
BA University of Denver 1982
PHD Stanford University 1990

Juan G Gonzalez, MD, BS1
Professor of Pathology and Immunology (primary appointment)
MD Universidad Autonoma De Nuevo 1978
BS1 New Mexico St University 1971

Jeffrey I Gordon, MD
Professor of Pathology and Immunology (primary appointment)
Director of the Center for Genome Sciences
Dr Robert J Glaser Distinguished University Professor
Professor of Developmental Biology
Professor of Medicine
Professor of Molecular Microbiology
BA Oberlin College 1969
MD University of Chicago 1973

Ann Marie Gronowski, MS, PHD
Professor of Pathology and Immunology (primary appointment)
Professor of Obstetrics and Gynecology
Vice Chair for Faculty Development Department of Pathology and Immunology
MS Iowa State University 1988

Frances V White, MS, MD
Associate Professor of Pathology and Immunology (primary appointment)
Associate Professor of Pediatrics
MS University of North Carolina 1978
BA Princeton University 1975
MD University of North Carolina 1989
This lab’s focus is on research in immunology and the recognition of antigen by T cells. We are investigating how the T cell receptor functions developmentally, biochemically and structurally. We utilize in vivo models to study the role of T cells in alloreactivity/graft rejection and inflammatory bowel disease.

Jacques U. Baenziger, MD, PhD
Kingshighway Building, 2nd Floor, Room 2423
Phone: 314-362-8730
Glycobiology; informational role of carbohydrates in protein targeting and reproductive endocrinology.

4444 Forest Park, 5th Floor
Phone: 314-362-7243
Genomic and metabolic foundations of symbiotic host-microbial interactions in the human gut; impact on obesity and malnutrition.

Michael McDaniel, PhD
3709 West Building
Phone: 314-362-7435
The focus of this laboratory is to study the function and growth of pancreatic islets in Types 1 and 2 diabetes. Mammalian target of rapamycin (mTOR) is a protein kinase that integrates signals from growth factors and nutrients to regulate DNA and protein synthesis. G-protein-coupled receptor agonists such as GLP-1 have been shown to enhance proinsulin biosynthesis and secretion and to stimulate cellular growth and proliferation. Our objective is to further explore the mechanisms of action of GLP-1 to enhance DNA and protein synthesis via mTOR in rodent and human islets. These studies are of fundamental interest for optimizing mTOR to induce cellular growth and proliferation, to enhance pre- and post-islet transplantation in Type 1 diabetes, and to prolong b-cell compensation in response to insulin resistance in Type 2 diabetes. The failure of b-cells in obesity-associated Type 2 diabetes is believed to correlate with the intracellular accumulation of lipids that contribute to defects in insulin secretion and the maintenance of b-cell mass. Our studies have identified lipoprotein lipase in b-cells; this is a key enzyme for catalyzing the hydrolysis of lipoprotein-associated TAG to produce free fatty acids (FFAs) for local cellular uptake. We are also characterizing the effects of enhanced FFA uptake through fatty acid transporters and determining the regulation of lipid droplet synthesis and breakdown by lipid droplet-associated proteins. Recent studies suggest that FFAs upregulate mitochondrial uncoupling proteins proposed to dissipate the proton gradient across the mitochondrial inner membrane. The objective of this study is to delineate the link between FFAs and b-cell mitochondrial dysfunction in Type 2 diabetes.
Function of dendritic cells in T cell responses and anti-tumor vaccines.

Robert D. Schreiber, PhD
BJC Institute of Health, 8th Floor
Phone: 314-362-8747

Tumor immunology and cancer immunoediting; research on natural and therapeutically induced responses to tumors; definition of the molecular roles of interferon-gamma and interferon-alpha/beta in these processes.

Carl H. Smith, MD
St. Louis Children's Hospital
Phone: 314-454-6029

Placental transport; surface membrane structure and function.

Robert D. Schreiber, PhD
BJC Institute of Health, 8th Floor
Phone: 314-362-8747

Tumor immunology and cancer immunoediting; research on natural and therapeutically induced responses to tumors; definition of the molecular roles of interferon-gamma and interferon-alpha/beta in these processes.

Thaddeus S. Stappenbeck, MD, PhD
Clinical Sciences Research Building, North Tower, Room 1020
Phone: 314-362-4214

My lab studies the cause of inflammatory bowel disease, a condition that leads to spontaneous inflammation of the intestine. We study the mechanisms of host gene mutations as well as abnormalities in host-microbial interactions that drive this disease.

Steven Teitelbaum, MD
Barnes-Jewish Hospital
Phone: 314-454-8463

This lab studies the cellular and molecular mechanisms of bone remodeling, with particular emphasis on osteoclast biology as it relates to the pathogenesis and prevention of diseases such as osteoporosis. We focus on integrin and cytokine biology utilizing a variety of genetically manipulated mice.

John Turk, MD, PhD
6609 Wohl
Phone: 314-362-8190

This lab looks at phospholipase A2 (PLA2) enzymes in the regulation of insulin secretion from pancreatic islet cells (e.g., a novel iPLA2 that does not require Ca2+ cloned from rat and human islets that is involved in cell secretion and proliferation). We also perform studies of iPLA2, its post-translational modifications, and its interactions with other proteins involving mice that are iPLA2-deficient globally or in selected tissues, transgenic mice that overexpress iPL2 in -cells, and insulinoma cells with genetically manipulated iPL2 expression. The mass spectrometric characterization of proteins and complex lipids is an important tool in these studies.

Emil R. Unanue, MD
BJC Institute of Health, 8414
Phone: 314-362-8748

Our focus is research that involves immunobiology and immunopathology. We examine cellular interactions that result in immune induction and cellular immunity. These cellular interactions are examined in normal immune responses and in autoimmune diseases. The focus is to identify the proteins responsible for the activation of lymphocytes in Type 1 diabetes.

Herbert Virgin, MD, PhD
Clinical Sciences Research Building, Room 8849
Phone: 314-362-9223

We work on issues at the interface of virology and immunology by analyzing aspects of viral immunity, viral pathogenesis and viral genetics that contribute to virulence and disease.

Mark A. Watson, MD, PhD
Clinical Sciences Research Building, North Tower, Room 1029
Phone: 314-454-7919

Our laboratory is interested in defining patterns of somatic gene mutation, gene expression and quantitative tumor clonality that can be used to predict distant site metastases and therapeutic vulnerability in patients with lung and breast cancer. Experimental approaches use histopathological review as well as the next-generation DNA exome and RNA sequencing (NGS) of primary cancer patient tissues, coupled with bioinformatics and statistical modeling, to identify candidate biomarker patterns that may be useful for the clinical management of cancer patients.

Courses
Visit online course listings to view offerings for M60 Path (https://courses.wustl.edu/CourseInfo.aspx?sch=M&dept=M60).

M60 Path 523 Immunology
The course consists of lectures, laboratory exercises and clinical correlations. It covers all aspects of the immune response - general properties of the immune system, effector molecules, cells and their function, cellular interactions, vaccines, and immunological diseases. Two laboratory exercises focus on blood typing and allergy. Students will also meet in groups (20-25 students) with clinicians to discuss a variety of clinical cases that relate to the course material.
Credit 37 units.
M60 Path 665 Pathology
This course is a comprehensive survey of the biology and morphology of human disease through a combination of lectures and laboratory sessions. The year begins with a review of basic disease mechanisms at the cellular and molecular level. Subsequently, the pathogenesis and characteristics of important diseases involving each organ system of the body are presented. During the year, students will become familiar with the methods of contemporary pathologic analysis. They will also learn how the results of pathologic studies are used in the clinical setting to establish diagnoses, to assess prognosis and response to therapy, and to evaluate the quality of patient care.
Credit 115 units.

M60 Path 702 Laboratory Medicine Clerkship
This elective is designed to teach the student how clinical laboratory assays are used in the diagnosis of disease and to understand the quality assurance tools the laboratory utilizes to assure the reliability of tests. The two-week elective includes rotations through laboratories in clinical chemistry, clinical microbiology, transfusion medicine, molecular diagnostics and hematopathology. During the elective the student will have a daily schedule, which includes didactic sessions with senior staff and house staff. Particularly useful clinical skills to be acquired include: morphology of peripheral blood smears and bone marrow biopsies; interpretation of coagulation tests, biomarkers of cardiac damage and serum protein electrophoresis patterns. Also covered are appropriate use of blood component therapy, and therapeutic apheresis and identification of infectious organisms. Students will attend quality assurance meetings with senior staff, participate in microbiology rounds and present case discussions during this elective.
Credit 77 units.

M60 Path 750 Surgical Pathology Clerkship
This elective is designed to familiarize students with the discipline of surgical pathology and to encourage the development of basic skills in gross pathology and histopathological interpretation. The Laboratory of Surgical Pathology at Barnes-Jewish Hospital receives a broad range of medical biopsy material in addition to specimens derived from the busy surgical subspecialty practices. As a result, this elective is beneficial not only for students considering a career in pathology, but also for students planning careers in internal medicine, surgery, OB/GYN, ENT, and radiology. The focus of the experience can be customized based on the interest of the student. Desk space and a microscope are provided. Students on the elective will (1) learn how patient specimens are received and processed, (2) acquire skills in the gross examination and microscopic diagnosis of disease through active participation and (3) learn the role of the cytopathologist in the care and management of patients. Students will function as junior house staff managing their own cases with supervision from residents, fellows and attending pathologists. Students may also wish to participate in ongoing research projects within the Department as time, and interest, allows. The daily schedule for students begins at 8:00 a.m. with morning conference. In general, the student will be able to complete all gross examination and sign-out activities by 4:30 p.m. Students are welcome to stay beyond 4:30 p.m. to participate in any of the academic or other working activities of the Division. Student time distribution: Clinical duties 85%, Conference/Lectures 15%; Major teaching responsibility: Attending staff, residents and fellows; Patients seen/weekly: N/A; On call/weekend responsibility: None.
Credit variable, maximum 77 units.

M60 Path 805 Autopsy Pathology
This elective is designed to introduce students to autopsy pathology. Students will assist in performing autopsies, and together with the first-year pathology residents, will participate in all of the activities of the Autopsy Service including brain cutting, specialty microscopic conferences, and weekly autopsy case conferences. Students will be under the direction of senior pathology faculty. Note that this elective is not available during the COVID-19 pandemic.

M60 Path 807 Dermatopathology
The student will be involved in all activities of the dermatopathology service. These include review, discussion and signout of microscopic skin specimens. Signout occurs each day with a team that includes an attending, fellow, and residents from both dermatology and pathology. The medical student will work closely with the residents and fellow to preview cases prior to signout. Dermatology Grand Rounds is held on Thursday mornings and is mandatory. In addition, dermatopathology slide review conferences are held on Friday mornings and are mandatory. Other learning opportunities include informal unknown slide sessions, weekly Inpatient Dermatology Clinopathologic Conference and monthly Cutaneous Lymphoma Conference. The primary goal of this elective is to acquire and competence in the diagnosis of skin diseases at the microscopic level. A secondary goal is to acquire understanding of the structure and function of the laboratory at the technical, administrative and medical professional level as it pertains to skin specimens.

M60 Path 812 General Cytopathology
This elective is designed to familiarize students with the discipline of Cytopathology and to encourage the development of basic skills. Cytopathology impacts many different areas of patient care and medical practice. The Cytopathology Laboratory at Barnes-Jewish Hospital receives a broad range of medical cytology material involving fine needle aspiration biopsies (FNA), body fluids and Pap tests. As a result, the elective is beneficial for students considering a career in pathology and for students planning careers in internal medicine, surgery, OB/GYN, ENT, and radiology. The focus of the experience can be customized based on the interest of the student. Desk space and a microscope are provided. Students on the elective will (1) learn how patient specimens are received and processed, (2) acquire skills in the microscopic diagnosis of disease through active participation, and (3) learn the role of the cytopathologist in the care and management of patients. Students will have the opportunity to function as junior house staff managing their own cases with supervision from residents, fellows, and attending cytopathologist. There are text books and extensive study sets to permit students to focus on specific areas of interest. The daily schedule for student begins previewing the cytology cases at 8:00 am. The student will attend daily pathology noon didactic conferences. In general, the student will be able to complete sign-out activities by 4:30 pm.

M60 Path 813 Molecular Pathology
This elective is designed to introduce students to the field of Molecular Pathology, including established molecular diagnostics and Next Generation Sequencing clinical assays. Students will learn through observation in the laboratory, didactic sessions, resident and fellow presentations, sign out with attending pathologists, and clinical informatics workshops. Opportunities
for assay validation as well as additional instruction in cytogenomics are available and tailored to student interest. Students will work with residents/fellows on the rotation and participate as part of the team.

**M60 Path 815 OB/GYN Pathology**
This elective is a subinternship in Ob/Gyn pathology. The expectation is that the student participate in the service along with house officer rotating on the service. The elective stresses the principles of anatomic pathology when applied to operative material in obstetrics and gynecology. The sub-intern will examine gross and microscopic specimens in the Ob/Gyn Pathology Lab and review the histology along with pertinent literature with a senior pathologist. The elective is appropriate both for students intending a career in pathology, and those intending careers in other specialties. The student will gain familiarity with the diagnosis of more common Ob/Gyn diagnoses, including malignancy, and premalignant conditions, as well as placental conditions. Ample time will be available for attending conferences in both OB/Gyn and Pathology.

**M60 Path 820 Surgical Pathology**
This elective is designed to familiarize students with the discipline of Surgical Pathology and to encourage the development of basic skills in gross pathology and histopathological interpretation. The Laboratory of Surgical Pathology at Barnes-Jewish Hospital receives a broad range of medical biopsy material in addition to specimens derived from the busy surgical subspecialty practices. As a result, this elective is beneficial not only for students considering a career in pathology, but also for students planning careers in internal medicine, surgery, obstetrics-gynecology, pediatrics, radiology, radiation oncology and dermatology. Students on this elective will (1) learn how patient specimens are received and processed, (2) acquire skills in the gross examination and microscopic diagnosis of disease through active participation, and (3) learn the role of the pathologist in the preoperative, intraoperative, and postoperative care and management of patients. Students will function as junior house staff, managing their own cases with supervision from residents, fellows, and attending pathologists. Students may also wish to participate in ongoing research projects within the department as time and interest allow. At the end of the rotation, students are required to do a formal case presentation for the residents, fellows, and attending staff. The daily schedule for students begins at 8:00 am with morning conference. In general, the student will be able to complete all gross examination and sign-out activities by 4:30 pm. Students are welcome to stay beyond 4:30 pm to participate in any of the academic or other working activities of the Division.

**M60 Path 825 Introduction to Neuropathology**
The course is structured to give the student a full-time immersion in the specialty of Neuropathology, including both Neurosurgical and Neuroautopsy derived material. The course is structured to give the student a full-time immersion in the specialty of neuropathology, including both neurosurgical and neuroautopsy derived material. There are daily didactic sessions that cover the spectrum of neurological diseases, review gross and microscopic neuro-anatomy, discuss approaches to the diagnosis of nervous system disease, and point out the interrelationships of research to clinical problems. Multiple clinical conferences and diagnostic working sessions complement reading, use of a large microscopic divisional study set and project work.

**M60 Path 860 Clinical Laboratory Medicine**
This elective rotation is designed to teach the student how clinical laboratory assays are used in the diagnosis of disease and to understand the quality assurance tools the laboratory utilizes to assure the reliability of tests. The elective includes rotations through a variety of clinical laboratories including clinical chemistry, clinical microbiology, hematopathology, molecular pathology, and transfusion medicine. During the elective the student will have a daily schedule, which includes didactic sessions with faculty and regular interactions with house staff. Some examples of useful clinical skills acquired during the experience include: morphologic review of peripheral blood smears and bone marrow biopsies; interpretation of coagulation tests, biomarkers of cardiac damage and serum protein electrophoresis patterns; identification of infectious organisms; and appropriate use of blood component therapy and therapeutic apheresis. The rotation culminates with a case discussion presented by the medical student which focuses on application of clinical laboratory evaluations to direct patient care.

**M60 Path 900 Research Elective - Pathology**
Research opportunities may be available. If interested, please contact the Department of Pathology and Immunology.
