Department of Psychiatry

Instruction in psychiatry is given during the second, third and fourth years of the medical curriculum. Emphasis is on the teaching of psychiatry as a medical discipline, including the biological, social and psychological mechanisms and manifestations of psychiatric illness as well as psychological reactions to other illnesses. Psychiatric disorders are common and disabling illnesses. An explosion of knowledge resulting from research in neuroscience, genetics and epidemiology is leading to exciting advances in understanding and treating these disorders. Our department is heavily involved in this research, and our didactic curriculum integrates current clinical information with research advances to help students develop the knowledge, skills and attitudes to recognize these illnesses and understand the basic principles of treatment.

William Greenleaf Eliot Division of Child & Adolescent Psychiatry

The Division of Child & Adolescent Psychiatry (http://wuchild.wustl.edu/) offers a varied teaching program for medical students, residents in psychiatry, and fellows at St. Louis Children's Hospital and the Child Psychiatry Center. The center provides outpatient services to children with an array of mental disorders. Trainees are assigned to these various services, where they participate in diagnostic evaluations and see patients in treatment, under the supervision of a fellow and the attending physician.

Faculty

Department Chair

Charles F. Zorumski, MD (https://psychiatry.wustl.edu/people/charles-zorumski-md/)

Visit our website for more information about our faculty (http://www.psychiatry.wustl.edu/Faculty/) and their appointments.

A

Arpana Agrawal, PHD
Professor of Psychiatry (primary appointment)
PHD Virginia Comm University 2004

Aqeeb Ahmad
Instructor in Clinical Psychiatry (primary appointment)

Kirsten Gilbert Alberts, PHD
Assistant Professor of Psychiatry (primary appointment)
BA Stanford University 2005
PHD Yale University 2014

Dale J Anderson, MD
Instructor in Clinical Psychiatry (primary appointment)
MD Washington Univ in St. Louis 1978

Richard H Anderson, MD, MS, PHD
Instructor in Clinical Psychiatry (primary appointment)
MD Saint Louis University 1989
BS Brigham Young University 1982
MS Brigham Young University 1984
PHD Brigham Young University 1986

Andrey P Anokhin, MS, PHD
Professor of Psychiatry (primary appointment)
MS Moscow State University 1981
PHD Russia Academy of Science 1987

Scott J Arbaugh, MD
Instructor in Clinical Psychiatry (primary appointment)
BA Saint Louis University 1980
MD Saint Louis University 1985

Ahmad Beheshti Ardekani, MD
Assistant Professor of Clinical Psychiatry (primary appointment)
MD School Not Listed 1974

Naazia H Azhar, MBA, MD
Instructor in Psychiatry (primary appointment)
BS Union College New York 2008
MBA Union College New York 2009
MD Albany Medical College 2012

Michael Roman Banton, MD
Instructor in Clinical Psychiatry (Child Psychiatry) (primary appointment)
BA Johns Hopkns University Medic 1981
MD Saint Louis University 1985

Vadim Baram
Instructor in Clinical Psychiatry (primary appointment)

Bruno Antonio Benitez Viloria, MD
Assistant Professor of Psychiatry (primary appointment)
MD Universidad Nacional de Columb 2003

Laura J Bierut, MD
Alumni Endowed Professor of Psychiatry (primary appointment)
BA Harvard University 1982
MD Washington Univ in St. Louis 1987

Monica E. Bishop, MD
Associate Professor of Psychiatry (primary appointment)
BA University of Pennsylvania 1995
MD Washington Univ in St. Louis 2001

Kevin J. Black, MD
Professor of Psychiatry (primary appointment)
Professor of Neurology
Professor of Neuroscience
Professor of Radiology
Robert Michael Carney, MS, PHD
Professor of Psychiatry (primary appointment)
Professor of Psychological & Brain Sciences
MS School Not Listed 1972
PHD Washington Univ in St. Louis 1978
BA University of MO Columbia 1969

Anil Govind Cashikar, MS, PHD
Assistant Professor of Psychiatry (primary appointment)
MS Madurai Kamaraj University 1991
BS Bangalore University 1989
PHD Jawaharlal Nehru University 1997

Patricia A Cavazos-Rehg, PHD
Professor of Psychiatry (primary appointment)
BA University Texas San Antonio 1998
PHD State University of New York 2004

Mina Charepoo, MD
Assistant Professor of Psychiatry (primary appointment)
BA State Univ of NY Buffalo 1997
MD Drexel University 2002

Christopher Charlot, MD
Instructor in Psychiatry (Child) (primary appointment)
BS Washington Univ in St. Louis 2005
MD Washington Univ in St. Louis 2014

Li-Shiu Chen, MD, M PH, PHS
Associate Professor of Psychiatry (primary appointment)
MD National Taiwan University 1993
M PH John Hopkins University 1995
PHS Johns Hopkins University 1998

Andrew Chirchirillo, PHD
Instructor in Clinical Psychiatry (Child) (primary appointment)
BA Illinois State University 1973
PHD University of MO St Louis 1981

Paula Jean Clayton
Professor of Clinical Psychiatry (primary appointment)

William W Clendenin, MD
Assistant Professor of Clinical Psychiatry (primary appointment)
MD University of Tennessee 1963

David M Conner, MD
Instructor in Clinical Psychiatry (primary appointment)
BA University of Oklahoma 1979
MD University of Oklahoma 1983

John Nicholas Constantino, MD
Blanche F Itleson Professor of Psychiatry (Child Psychiatry) (primary appointment)
Professor of Pediatrics
BA Cornell University 1984
MD Washington Univ in St. Louis 1988

Charles Richard Conway, MD
Professor of Psychiatry (primary appointment)
Professor of Radiology
MD University of Missouri Columbi 1995

Linda B Cottler, PHD, M PH
Adjunct Professor of Psychiatry (primary appointment)
Adjunct Professor of Anthropology
PHD Washington Univ in St. Louis 1987
BA Emmanuel College 1977
M PH Boston University 1980

Lucia del Pilar Cristancho Pimiento, MD
Associate Professor of Psychiatry (primary appointment)
MD Univ Industrial de Santander 2000

Carlos Cruchaga, MA, PHD
Professor of Psychiatry (primary appointment)
Professor of Genetics
Professor of Neurology
MA University of Navarra 2002
PHD University of Navarra 2005
BA University of Navarra 2000

Mary A Davis, MD
Assistant Professor Emeritus of Clinical Psychiatry (primary appointment)
MD Washington Univ in St. Louis 1952
BA Ohio State University 1947

Jon Todd Dean, MD
Instructor in Clinical Psychiatry (primary appointment)
MD University of Texas Austin 1987
BA University of Texas Austin 1982

Carie Kollmeyer Dinehart, MD
Instructor in Clinical Psychiatry (primary appointment)
BA Saint Louis University 1999
MD Saint Louis University 2003

Meghan Rose Donohue, PHD
Instructor in Psychiatry (Pending Dean’s Approval) (primary appointment)
PHD Georgia St University 2018

Sarah Ann Eisenstein, PHD
Assistant Professor of Psychiatry (primary appointment)
Assistant Professor of Radiology
PHD University of Georgia 2008

Matthew S Ellis, M PH
Instructor in Psychiatry (primary appointment)
M PH Washington Univ in St. Louis 2011
BA Rockhurst College 2004

Nuri Bradford Farber, MD
Professor of Psychiatry (primary appointment)
MD Washington Univ in St. Louis 1989
BA Washington Univ in St. Louis 1985

Maria-Victoria Fernandez Hernandez, MS, PHD
Assistant Professor of Psychiatry (primary appointment)
MS University of Bangor 2007
BS University of Barcelona 2005
PHD University of Gerona 2012

Robert T. Fitzgerald, PHD, MS
Assistant Professor of Psychiatry (Child) (primary appointment)
BS Abilene Christian University 1998
PHD Saint Louis University 2012
MS Saint Louis University 2000

Ellen E Fitzsimmons-Craft, BS1, MS PSYC, PHD
Assistant Professor of Psychiatry (primary appointment)
BS1 University of Notre Dame 2008
MS PSYC University North Carolina 2010
PHD University of North Carolina 2014

Cynthia Florin, MD
Instructor in Clinical Psychiatry (primary appointment)
BS Grinnell College 1976
MD Columbia University 1984

Research Electives

Psychiatry Research Electives

During the fourth year, opportunities exist for many varieties of advanced clinical or research experiences.

Note to Students: There are always a number of research projects in the Department of Psychiatry. For additional information, contact Dr. Rubin at 314-362-2462.

Andrey Anokhin, PhD
Genetics of the Brain, Behavior and Psychopathology
Central Institute for the Deaf (CID) Building
660 S. Euclid Ave., Suite 1
Phone: 314-286-2201
andrey@wustl.edu

This research elective is intended for students interested in cognitive neuroscience, biological psychiatry, and behavior genetics. Dr. Anokhin’s laboratory investigates the links between genes, brain and behavior in order to better understand the complex etiology of mental disorders. Our major focus is on the externalizing spectrum of psychopathology characterized by deficits in inhibitory self-regulation and related psychopathologies, including ADHD, conduct disorder and addictive behaviors. We are particularly interested in the intermediate phenotypes (endophenotypes) mediating genetic risk for addiction, such as impulsivity, risk taking, and abnormal reward processing. In our laboratory-based studies with human volunteers, including twins, we investigate individual differences in brain activity using the recording of brain oscillations (event-related brain potentials) and functional magnetic resonance imaging (fMRI). For example, an ongoing longitudinal study of adolescent twins explores the developmental and genetic determinants of brain activity related to reward and punishment processing, inhibitory control of behavior, and risk taking to identify prospective predictors of substance abuse and associated behavioral problems. In another ongoing study, we examine twins who are discordant for adolescent marijuana use in order to identify the consequences of substance abuse for the brain, cognition and emotion and to distinguish them from preexisting risk factors. Interested students will be able to learn a variety of methods used in these studies, such as the recording and analysis of neural activity, including electroencephalogram (EEG) and event-related brain potentials (ERPs), MRI scanning, startle response, autonomic measures, the administration of neuropsychological and behavioral tests, and the statistical analysis of data. The format of this research elective may include the following: (1) directed reading; (2) participation in laboratory experiments involving human subjects; (3) analysis of existing...
data from various research projects; and (4) designing and piloting new behavioral experiments. Qualifications include reliability and responsibility, the ability to commit a specified amount of time per week and to work a schedule that can be negotiated on an individual basis, and good computer skills.

Deanna M. Barch, PhD
Cognitive and Affective Neuroscience of Schizophrenia and Depression
4525 Scott Avenue, Suite 1153K
Phone: 314-747-2160

Students may participate in the conduct of clinical studies of schizophrenia and depression. Involvement in clinical studies can include training and experience in interviewing psychiatric patients, or it may involve gaining experience in the techniques of assessing cognitive and emotional function using behavioral and brain imaging methods.

Laura Jean Bierut, MD
Maternity Building
Phone: 314-362-2544

This research elective will focus on analyzing data from high-risk studies of smoking and other addictions. Students will have the opportunity to examine genetic and environmental factors that place some individuals at risk for developing nicotine, alcohol and other substance dependence and that protect others from the development of these disorders.

Kevin J. Black, MD
4525 Scott Ave., Room 2205
Phone: 314-362-5041
kevin@wustl.edu

Students will participate in ongoing studies of brain imaging, movement disorders or neuropsychiatric illnesses. Degree of participation will relate to the student's available research time, skills and interest. Visit the laboratory's webpage (http://www.nil.wustl.edu/labs/kevin/) for examples of past research.

Ginger E. Nicol, MD
Taylor Avenue Building, Suite 121
Phone: 314-362-5154

We are part of the Healthy Mind Lab in the department of psychiatry, and our clinical research broadly focuses on increasing longevity and quality of life in children, adolescents, adults and older adults. Our specific projects focus primarily on obesity treatment and prevention, and they include clinical and genetic studies of psychotropic medications known to cause weight gain, like antipsychotic agents. We are interested in developing and testing medication-assisted psychotherapies with agents like ketamine and psilocybin for weight management and disordered eating. We also employ mobile health (mHealth) tools for collecting data and for delivering healthy lifestyle and behavioral weight loss treatments, and we use precision functional brain mapping and EEG-guided transcranial magnetic stimulation (TMS-EEG) to study individual, brain-based mechanisms of illness and treatment response. This elective offers the student a broad exposure to clinical research protocols, including protocols in adults and children. Students will have an opportunity to focus on a particular project of interest.

Rumi Kato Price, PhD, MPE
Central Institute for the Deaf (CID) Building
4560 Clayton Rd.
Phone: 314-286-2283

Medical students, post- and pre-doctoral students, and clinical fellows will work closely with Dr. Price and her collaborators on ongoing research projects in psychological trauma, substance abuse, psychiatric epidemiology and methodologies relevant for prevention and intervention in the community research context. Current projects include epidemiology and clinical studies of human trafficking and gender-based violence in the St. Louis region as well as in a global context. We work closely with the Institute for Public Health, and we collaborate with multidisciplinary researchers, community leaders, international governmental agencies, and NGOs.

Psychiatric and Behavioral Health Sciences Concentration

Rumi Kato Price, PhD, MPE (concentration program director); Patricia Cavazos-Rehg, PhD; Sarah Hartz, PhD MD; Ginger Nicol, MD
Taylor Avenue Building (TAB)
660 S. Taylor Ave.
Phone: 314-286-2283

Courses are held at the Institute for Public Health TAB building. The Psychiatric and Behavioral Sciences concentration is an integral component of the Master of Population Health Sciences (MPHS) and taught by psychiatry faculty members. The concentration provides clinician-researchers, postdoctoral fellows, and advanced medical and other graduate students with strong conceptual and methodological skills required for the design, advanced analysis and interpretation of epidemiological and treatment-effectiveness studies. Didactic training focuses on the understanding of disease phenotypes and developmental trajectories; understanding the underlying biological and environmental factors and their interactions; understanding the role of psychiatric and substance abuse epidemiology in disease prevention and intervention locally and globally; and evaluating psychiatric clinical treatment and management of
psychopathology, including digital applications. A fellow/student has an option of applying for an MPH degree program or taking appropriate courses as part of their training or academic program.

Current available courses include the following:

1. M19 PHS 562 Addictions and Addictive Behaviors (Course director: S. Hartz, MD; 3 credits): This course provides an overview of the principles of substance-related addictions and the processes and mechanisms that underlie addiction. Students will work on data analysis and manuscript preparation simultaneously.

2. M19 PHS 5656 Global Burden of Diseases: Methods and Applications / S55 MPH 4003 (Course director: R.K. Price, PhD; 3 credits): This course provides an overview of the current methods for studying the global burden of medical and psychiatric diseases from a multidisciplinary perspective.

3. M19 PHS 566 Psychiatric and Behavioral Assessment in the Digital Age (Course directors: G. Nicol, MD, and P. Cavazos-Rehg, PhD; 2 credits): The first segment of this course introduces psychiatric disorder nosology and diagnostic assessment and screeners. The second segment will provide didactic and student-initiated digital applications of evidence-based prevention and intervention examples coupled with implementation frameworks of such digital applications.

Courses

M85 Psych 676A Diseases of the Nervous System: Psychiatry
This course will emphasize the diagnosis of major psychiatric illnesses in adults and children. Psychiatric diseases will be described in terms of epidemiology, clinical presentations, natural history, genetics, differential diagnosis and clinical management. Biological and psychological influences on these diseases will be presented. Interviewing techniques and performance of the mental status exam will be demonstrated by patient interviews.
Credit 44 units.

M85 Psych 770 Psychiatry Clerkship
Students spend three weeks on the inpatient psychiatry service of Barnes-Jewish Hospital at the main campus unit. Students evaluate and treat patients with psychiatric illness under the supervision of house staff and an attending physician. Students are also assigned for one week at either an ambulatory treatment site or an inpatient consult-liaison service. There is also an opportunity for students to gain exposure to emergency psychiatric services in the Barnes-Jewish Hospital emergency department. The clerkships includes required attendance at teaching conferences, including small-group sessions with WUSM clinical faculty and upper-level psychiatry residents. Students are responsible for completing learning exercises and other assignments.
Credit 154 units.

M85 Psych 771 Ambulatory Clerkship: Psychiatry for Generalists
Up to 2 students may elect to pursue their ambulatory medicine selective through the psychiatry department. Students participate in clinical duties depending on assigned locations, which can include the BJH adult psychiatry clinic, a community mental health center, the Wash U child and adolescent psychiatry clinic, and both the adult and child psychiatry consultation services. Students will also submit a written review of a relevant clinical topic of their choice. There are no call obligations at any clinical site.
Credit 154 units.

M85 Psych 805 Psychiatry Consult Subinternship
Students spend four weeks on the psychiatry consult service at Barnes-Jewish Hospital. Under the supervision of house staff and attending physicians, students participate in the evaluation and collaborative management of inpatients on medical and surgical units for a broad range of psychiatric and behavioral concerns. They learn about the intersection between psychiatry and other medical specialties and important skills for collaborative patient care. Students attend departmental conferences and other educational sessions, and they also prepare and present a clinical topical review of their choice.

M85 Psych 810 Outpatient Community Psychiatry
This elective will provide the student with a significant outpatient experience in Psychiatry. Students will be paired with a Resident physician and have exposure to two adult clinics and one child clinic over the course of the rotation. Students will observe and assist in the diagnosis and treatment of patients in the clinic setting. Students will also attend scheduled lectures and conferences over the course of the rotation relevant to outpatient Psychiatry. During the elective, the student will learn about the outpatient presentations of psychiatric disorders, a variety of treatment techniques (psychotherapy and psychopharmacology), and general principles of outpatient clinical management.

M85 Psych 836 Inpatient Psychiatry Subinternship
This is a senior rotation that provides the students with an opportunity to expand their knowledge of inpatient clinical psychiatry by functioning as interns. Students attend all staffing and teaching conferences given to first-year psychiatry residents, take patients in rotation, and share night call with first-year residents approximately every fifth night. Immediate supervision is provided by the inpatient attending, and additional supervision can be arranged as desired. Teaching emphasis is directed toward psychiatric diagnosis, appropriate use of psychopharmacologic agents, psychotherapeutic intervention, use of community resources and pursuit of the psychiatric scientific literature. The student will write a self-selected clinical topic relevant to treatment and management of psychiatric inpatients.
M85 Psych 840 Child Psychiatry
This elective in child psychiatry utilizes the Child Psychiatry Outpatient Clinic and the consult-liaison service at St. Louis Children's Hospital. It provides experience in age-appropriate diagnostic and treatment methods in children and adolescents. A portion of the student's time may be spent on the inpatient behavioral unit at St. Louis Children's Hospital if interested and if circumstances permit. A paper on a topic of the student's choosing is required.

M85 Psych 844 Forensic Psychiatry
The medical student will be actively involved in many aspects of forensic psychiatry including civil litigation, workman's compensation, malpractice, civil commitment, and guardianship. There may be opportunities to be involved in criminal forensic issues. The student will work with several instructors within the Department of Psychiatry but will primarily meet with the Course Director a minimum of two hours per week. They will also work with The BJH Manager of Case Management and The City of St Louis Probate Court. The student will also be assigned readings of landmark cases, textbooks, psychiatric expert opinions, legal filing with the probate court and attend civil hearings. The student will learn relevant criminal statutes regarding competency and civil commitment, causation in civil litigation, the concept of medical malpractice and risk assessment of violence and suicide. There may be the opportunity to witness sexually violent predator evaluations and/or treatment. The student will be required to research and write an opinion on a specific approved topic in forensic psychiatry. The objectives will be measured by attendance and by formal evaluation of the student's participation and knowledge during the supervision discussion. It will also be determined by the originality, thoroughness, and quality of the research paper.

M85 Psych 855 Introduction to Eating Disorders
Students will learn the basics of assessment, participate in groups that focus on family education, gain experience in interdisciplinary psychiatric team work, attend case discussions with psychiatrists, and participate in treatment planning. Students will be able to describe core symptoms, recommend treatment options, and discuss the medical, nutritional, and psychiatric components of treatment.

M85 Psych 880 Schizophrenia Precursors & Prodomal States
This is an opportunity for trainees to gain experience in the evaluation of children and adolescents who may be at high risk for schizophrenia. The rotation would center around the "First Contact Assessment Service", which evaluates patients who show characteristics suggestive of prodromal schizophrenia (such as new-onset attenuated psychotic symptoms along with recent deterioration in functioning) and/or early life characteristics that may indicate risk for developing schizophrenia later in life (for example, nonspecific social/ emotional/behavioral symptoms in a child/adolescent with a strong family history of schizophrenia). Since the full symptoms of schizophrenia are often preceded by a wide range of childhood behavioral and developmental abnormalities, this rotation would also help trainees integrate information regarding the continuity between childhood development and adult psychopathology. Trainee would observe all aspects of First Contact evaluations (including semi-structured diagnostic interviews and examination of subtle neurological signs), participate in case discussions, and observe follow-up consultations involving patients with psychotic and/or complex neurodevelopmental disorders. Trainee would also be required to write a literature review on a topic relevant to the rotation.

M85 Psych 889 Interventional Psychiatry
Interventional Psychiatry involves the application of procedures including ECT (Electroconvulsive Therapy), rTMS (Repetitive Transcranial Magnetic Stimulation) and other neuromodulation techniques such as VNS (Vagus Nerve Stimulation) in the treatment of medication-resistant psychiatric illness. The student will learn about indications for ECT and rTMS, participate in the clinical management of patients undergoing these interventions and will receive training in the application of these procedures. As cases become available, the student will be involved in evaluations of patients receiving VNS. The student will participate in the evaluations of patients referred to the Treatment Resistant Depression Clinic supervised by Dr. Charles Conway. The student will be encouraged to review appropriate literature and make clinically relevant case-oriented presentations. The student will be expected to write a review of a self-selected clinic topic relevant to interventional psychiatry. As advances in the field occur, the rotation may also involve exposure to individuals receiving other modalities of intervention, such as esketamine for treatment resistant depression.

M85 Psych 900 Research Elective-Psychiatry
Research opportunities may be available. If interested, please contact the Department of Psychiatry.
