American modernism: What is it? What is the nature of its encounter with mass culture? What happened to modernism as it migrated from its "high" European origins to its "middlebrow" version in America between the turn of the century and the eve of World War II? What was the rhetoric of modernism in everyday life, and what was its impact on design, photography, and advertising? In addition to the fine arts, we will look at popular media, film, and photography. Lecture/discussion. Prerequisite: L01 215 or permission of instructor.
Credit 3 units. A&S IQ: HUM, WI Art: AH, HUM BU: ETH, HUM

L01 Art-Arch 3782 Modern Art 1905-1960

This course investigates topics in European painting, sculpture, architecture, photography, and film. Lectures and readings will address major artistic developments, including Cubism, De Stijl, Futurism, Expressionism, Dadaism, Constructivism, Surrealism, the Bauhaus, and Art Brut. Prerequisite: L01 215 or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 3783 The Modernist Project: Art in Europe and the United States, 1905-1980

This course surveys major tendencies in painting and sculpture, from Fauvism in France and Expressionism in Germany to the beginnings of Postmodernism in photo-based work in the United States. About two thirds of the course will treat European art, and about one third will treat American art. Photography, architecture, and work in other forms will be considered selectively when pertinent to the individual class topics. Within the lecture topics, emphasis is on avant-garde innovation; the tension in modernist art between idealism and critique; reaction by artists to current events; the relationship between art and linguistics, philosophy, literature, economics, and science; the role of geopolitics in art production; the intersections of art and society; the role of mass culture; issues of race and gender in the production and reception of art; and the challenge to the concept of authorship and creativity posed by Postmodernism at the end of this period. Prerequisite: One course in Art History at the 100 or 200 level.
Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

L01 Art-Arch 3785 Photography in America

This course will consider the practice and use of photography in America, from its invention up to the present, and it will offer various ways of thinking about the medium and its relation to society and culture. Students will come to understand the ways photographic practices shape public perceptions of national identity, ethnicity and gender, nature, democratic selves, and a host of other concerns. We will discuss famous practitioners such as Matthew Brady, Jacob Riis, Lewis Hine, Walker Evans, and Robert Frank. We consider not only the social and public uses of the medium (through such episodes as the New Deal/FSA and photojournalism) but also the private explorations of "fine art" photographers and the everyday practices of the snapshot. Prerequisite: One course in Art History at the 100 or 200 level.
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 3795 Global Contemporary Photography

This course explores contemporary photographic traditions from around the world. We begin by grappling with a few of the theoretical issues that lie at the heart of the medium's power, such as the aura of a photograph and its potential evidentiary value. We examine how photography emerged as distinct from other artistic forms such as painting and was deployed in unique ways across the globe to assert power, counter claims of hegemony, and express identity. The scope of the class is not limited to high-art photography, but also explores the family photography and vernacular traditions, focusing on a range of genres including portraiture, narrative, and performance. Finally, we end by exploring how contemporary photographers have stretched the potential of the medium by experimenting with digital technology and non-traditional modes of display. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215), or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 3815 Rococo to Revolution: Art in 18th-Century Europe

The Long 18th Century serves as a bridge between two fundamentally different times. The Europe of 1700 was dominated by absolutism and the ancien régime. The Europe of 1800 was in an age of revolution. This course will explore the dramatic shift in artistic representation and individual self-conception that occurred throughout the century to usher in our modern age. Important topics to be considered include: the rise of the Academy; the Enlightenment and the Encyclopédie; the Grand Tour; Art and Science; and the French Revolution. Focusing on the development of artistic trends, the course will address transformations in painting, sculpture and architecture throughout Europe.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 3830 Topics in Women, Gender, and Sexuality Studies: Spectacular Blackness, Race, Gender, and Visual Cult

Topic varies. See semester course listings for current offering. Same as L77 WGSS 383

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: AH, GFAH, HUM BU: BA EN: H

L01 Art-Arch 3831 Art in the Age of Revolution: 1789–1848

This course covers European painting, sculpture, and printmaking from the French Revolution to the mid-19th century. French, English, German, and Spanish artists are discussed in a social and aesthetic context, with a focus on links between art and ideology in times of political turmoil. The styles of Classicism and Romanticism, the rise of history painting, and the development of Realism in both landscape and genre painting are also addressed. Prerequisite: L01 113 or permission of instructor.

Credit 3 units. Art: AH BU: HUM

L01 Art-Arch 3833 Realism and Impressionism

This course examines the development of European art from approximately 1848 to the mid-1880s, with a focus on the development of Realism and Impressionism in England and France. Issues to be explored include the breakdown of

academic art, the rise of landscape and naturalist themes, the emergence of alternative exhibition spaces and new dealer systems, and the relationship between gender and avant-garde practice. Prerequisites: L01 113 and L01 215 or permission of instructor.

Credit 3 units. Art: AH BU: HUM

L01 Art-Arch 3836 The Art Museum from the Louvre (Paris) to the Louvre Abu Dhabi

This course explores the cultural politics of modern and contemporary art museums in the nexus of London-Paris-New York from the late 18th century to today. It analyzes important works of art collected, displayed, and studied in the museum context as well as the politics, philosophies, and people who shaped the history of modern and contemporary art via museums and exhibitions. Students will interrogate institutions and spaces that condition the experience and reception of modern and contemporary art. Prerequisites: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 3838 Modern Art in Fin-de-Siècle Europe, 1880–1907

This course examines artistic production at the turn of the century in France, Belgium, England, and Scandinavia. Beginning with the reevaluation of impressionism and naturalism in France, we examine Neo-Impressionism (Seurat and Signac) and Symbolism (Moreau, Van Gogh, Gauguin, the Nabis, Rodin, and Munch), as well as later careers of Impressionists (Cassatt, Monet, Degas, and Renoir). We will consider cross-national currents of Symbolism in Belgium and Scandinavia; the Aesthetic Movement in Britain; the rise of expressionist painting in French art (particularly with the Fauvism of Matisse and Derain), and the juncture of modernist primitivism and abstraction in early Cubism (Picasso). Prerequisite: L01 113 or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 3862 The Mediterranean and French Modernism

This course surveys the development of the Mediterranean region as an important site of modernist artistic practice. Among the artists considered are Pierre-Auguste Renoir, Henri Matisse, Pablo Picasso, Marc Chagall and Yves Klein. Excursions to museums and other artistic sites.

Credit 1 unit. A&S IQ: HUM Art: AH BU: HUM, IS EN: H

L01 Art-Arch 3874 The Modern and Contemporary Art Market, 1863 - Present

The modern and contemporary art market is a strange and irrational entity, seemingly ungoverned by traditional economic laws of supply and demand. In 2019, *Rabbit*, a sculpture by Jeff Koons, sold for \$91.1 million at auction, setting a record for the most expensive artwork by a living artist ever sold. A few months later, at the Art Basel Miami Beach art fair, Maurizio Cattelan's *Comedian*, an installation artwork featuring a fresh banana duct-taped to a wall, sold for \$120,000. More than just a source for headlines, today's art market is also a growing art historical subfield, one that offers crucial insight into artistic production, shifts in the sociopolitical landscape, and even the practice of art history itself. This course offers a historical overview of the modern and contemporary art market, from 1863 to the present.

In this thematic survey, students will chart the art market's development by examining key concepts, personalities, and events, including the 1863 Paris Salon des Refusés, the Galerie Durand-Ruel and Impressionism, the avant-garde myth, Nazi-era art crime, the 1997 Sensation exhibition, and international biennials. Students will also become acquainted with basic art market research methods and resources. Prerequisites: Any 100- or 200-level course in art history; L01 215, Intro to Modern Art, recommended; or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM EN: H

L01 Art-Arch 3875 Rejecting Reason: Dada and Surrealism in Europe and the United States

In this multimedia interdisciplinary course, we will consider the history, theory, and practice of Dada and Surrealism, from its Symbolist and Expressionist roots at the end of the 19th century and the beginning of the 20th century through its late expressions in the beat culture and pop art of the 1950s and 1960s. Dada's emergence in Zürich and New York in the midst of World War I set the tone for its stress on irrationality as an oppositional strategy. Surrealist research into the domain of the unconscious continued this extreme challenge to dominant culture but in a revolutionary spirit that proposed new possibilities for personal and collective liberation. The international character of the movements — with substantial cross-transmission between Europe and the United States — will be emphasized. Prerequisites: L01 113, Intro to Western Art; L01 215, Intro to Modern Art; or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

L01 Art-Arch 3877 Cubism and Its Global Legacies

During the early 20th century, Cubism marked a radical break in the European representation of three-dimensional space in painting through a bold reconsideration of atmospheric and linear perspective. Early Cubists such as Pablo Picasso achieved this formal breakthrough in part through studying African and Oceanic art. Between the summer of 1908 -- when Braque and Picasso developed the style collaboratively in France -- and the advent of WWI in the summer of 1914, Cubism became the most influential style in the international art world. This course examines the development of Cubism in France, and it analyzes how artists throughout Europe and the world adapted Cubism for their own purposes. Of particular interest will be how artists from outside Europe and the United States have responded to Cubism's appropriation of non-Western art. Class format is lecture and discussion. Prerequisites: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L01 Art-Arch 388 Contemporary Art

This course is a survey of global contemporary art from 1970 to the present. Topics include happenings, minimalism, body art, and neo-expressionism as well as their placement in their social and political contexts. Prerequisite: One course in Art History at the 100 or 200 level.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 3884 Modern Design and Modern Culture

This course explores key issues of modernity (industrialization, consumerism, mass culture, nationalism, etc.) through the study of material culture. Focusing primarily on modern design in Europe and North America from William Morris to Charles Eames and Aleksandr Rodchenko to Bruce Mau, we examine major developments in design thinking and practice as both reactive to and generative of broader political, economic, and social concerns. The course is organized around important and influential exhibitions, from World's Fairs to storefront shows, where design professionals, institutions, and publics came together to reflect on topics of urgency, identify alternatives, and imagine the implications of design on everyday life. Wherever possible, class discussions/lectures and assignments make use of objects and archives in area collections. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215) or permission of instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L01 Art-Arch 3888 Museum Theory and Practice

This course explores the history of fine art museums and related debates on the nature of collecting and modes of display. Using historical and theoretical texts as well as select case studies, we will focus on how the evolving structure and mission of the museum impact our understanding of art. Topics will include the Renaissance "cabinet of curiosities," the Salon controlled by the French Academy, the rise of the modern art museum, and the proliferation of contemporary curatorial strategies in today's global art world. In addition to the study of the history of exhibitions and the role of the museum, the course will investigate the various jobs and responsibilities that people hold within museums. Guest speakers will include members of the curatorial, publications, registration, education, and installation staff at the Mildred Lane Kemper Art Museum. We will also take advantage of exhibitions and permanent collection displays at the Kemper Art Museum, the Saint Louis Art Museum, the Pulitzer Foundation for the Arts, and the Contemporary Art Museum. Prerequisite: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

L01 Art-Arch 3892 Modern Sculpture: Canova to Koons

This course will survey sculpture in Europe and the United States from about 1800 to the present, with an emphasis on the period from 1890 to 1980. A rapid traverse of Neoclassicism, Realism, and the rage for statuary during the later 19th century will take us to the work of Rodin and to a more systematic exploration of developments in the sculpture of the 20th century. Particular emphasis will also be placed upon the work of Brancusi, Picasso, Matisse, Duchamp, Giacometti, Oppenheim, David Smith, Serra, Morris, Judd, Hesse, and Bourgeois. An important theme running through the course as a whole -- from an age of nationalism and manufacturing to our own time of networks and information -- is the changing definition of sculpture itself within its social and political context. We will also explore various new artistic practices (e.g., video, performance, installations, body art) and interrogate their relationship to sculptural tradition and innovation. Prerequisite: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

L01 Art-Arch 3972 Alterna-Art

Can contemporary art be truly alternative? What does the term even mean, when the channels for distributing art are available to all? This course presents a survey of art created outside of institutions and official channels. Students are exposed to a variety of different media, from graffiti and muralism to performance and internet art. The course also deals with questions of agency, "authenticity," and co-optation of street art by commercial means. Classes consist of a hybrid lecture/discussion format with weekly readings. Prerequisites: Intro to Western, Intro to Modern or permission of the instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L01 Art-Arch 3973 New Media, New Technologies

In the summer of 2013, Random International's "Rain Room" was installed at the Museum of Modern Art in New York. Lines to experience the sensation of being rained on without getting wet ranged up to seven hours at times. This merging of new technology with the gallery space proved irresistible, but it also raises questions as to the uses of technology in contemporary art and whether or not this could be much more than a gimmick. As one Yelp reviewer put it, "The Rain Room is definitely an experience. Let's be honest... I'm mostly upset that I didn't get a cool, new Facebook profile pic out of it." This course will consider technological developments in modern and contemporary art -- including photography, video and new media, and digital and Internet art -- as well as forays into new technology that blur the lines between art and science. Prerequisite: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L01 Art-Arch 3975 Art and Activism

This course will examine political and social activism in art and visual culture, focusing on the role that visual representation has played in social movements and how artists/activists have employed visual media to challenge and resist dominant visual representations and political formations. We explore key theoretical developments in activist discourse as well as the role of art practices and aesthetic commitments in these developments. This course seeks to represent the development of the relation of art and activism in its broadest intellectual and cultural context within the 20th century and to encourage an appreciation of the complex array of disciplinary perspectives that are implicated in this development. Prerequisite: L01 113, L01 215, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, CPSC, HUM BU: HUM EN: H

L01 Art-Arch 4000 Topics in Art History and Archaeology

Prerequisites: L01 113, L01 215; one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4002 The Decorative Aesthetic in Modernism, 1860-1960

In the criticism of modern art, "decoration" and "decorative" have often been used as pejorative terms, designating art that has no intellectual basis but is merely pleasing, intended to fill space and delight the eye. However, in the late 19th century, these terms carried important cultural value and opened the door to significant experiments in abstraction. Moreover, the decoration of a public space or surface may have political implications.

This course will investigate decoration and theories of "the decorative" in modern art in Europe and the United States, with special attention paid to the evolution of ideas of modernism in both two-dimensional and three-dimensional environments. We will also consider some of the political meanings that may be borne by both public mural painting and domestic decoration as well as easel painting that aspires to conditions of the decorative. Key figures include Puvis de Chavannes, Morris, the Nabis, Van de Velde, Monet, Matisse, the Mexican muralists, Pollock, and Shapiro. Prerequisites: L01 215, any 300-level course in Art History, or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM EN: H

L01 Art-Arch 4015 Theories of Modern Art and Architecture

This course will present theories of art and architecture from the 19th to the 21st centuries in their historical contexts through a set of in-depth investigations of selected topics. Some knowledge of history and theory is integral to contemporary understandings of the disciplines of art, art history, and architecture. To foster a historical understanding of theories of modern art and architecture, we will discuss a selection of key texts, divided into three sections: theoretical sources of modern art and architectural history in the 19th century; theories of modernism, from the formalist to the Marxist; and postmodern critiques of modernism, in such areas as feminist theory and poststructuralism. Class visits to Sullivan and Adler's Wainwright Building (1890-91), Saarinen's Arch at the Jefferson National Expansion Memorial (completed 1964), Ando's Pulitzer Foundation for the Arts (2001), and Maki's Kemper Museum of Art (2006) will be integral to the work of the course. Prerequisite: Either L01 113 or L01 215 plus any 300-level course in art history, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4045 Beyond Painting: Innovation in Prints and Sculpture in Early Modern Europe

Prints and sculpture are frequently overlooked in the study of early modern European art, yet the issues they raise are critical to our understanding of the period. Both categories, too often seen as secondary to painting, entail frequently complex technical and intellectual innovations that were fundamental to their time. This course will focus on these two important media in order to offer a fuller and richer picture of how artists of the Renaissance and baroque periods reinterpreted and expanded their visual vocabularies in response to, and in participation with, changing technologies and ideologies. Beyond Painting is based on direct interaction with works of art with the aim of facilitating enhanced looking and evaluation skills essential to the study of art history. Held at the Saint Louis Art Museum, each session will focus on the Museum's collection as well as the objects in the exhibition "Learning to See: Renaissance and Baroque Masterworks from the Phoebe Dent Weil and Mark S. Weil Collection." Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM EN: H

L01 Art-Arch 4230 The Reception of Egypt in the Graeco-Roman World

Ancient Greeks and Romans found Egypt to be an exceptionally enthralling world, in terms not only of its physical features but also of its people, monuments, and traditions. This course will explore how different views of Egypt emerged in the Graeco-Roman world; it will also investigate the possible reasons for the remarkable popularity and allure of Egypt and things Egyptian as reflected in the writings of Greek and Roman authors as well as in the art and architecture of the Mediterranean world in Classical antiquity. In this seminar, we will read primary literary sources (in translation) that focus on the reception of ancient Egypt and, more specifically, its history, religion, and customs. Several of these sources also offer a privileged viewpoint to investigate how the perception of notable Egyptian figures -- chiefly Cleopatra -- was shaped by Rome to suit a specific agenda. In addition to the written sources, we will look at the artistic and archaeological evidence that best showcases the impact of Egypt's legacy on Graeco-Roman traditions. The readings assigned for each class will also provide a broad sample of secondary sources, consisting of some of the most significant scholarship on the image of Egypt in Classical antiquity.

Same as L08 Classics 4230

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L01 Art-Arch 4235 Rome in Egypt: The Archaeology of an Oasis City

This seminar will focus on the results of the archaeological fieldwork carried out at Trimithis / Amheida, a Graeco-Roman city in Egypt's Western Desert. It will investigate the available documentary and archaeological evidence, including a wealthy house with paintings inspired by Classical themes, a public bath built in the Roman tradition, a rhetorical schoolroom, pyramid-shaped Roman tombs, remains of a temple, and one of the earliest churches discovered in Egypt so far. We will explore how this evidence compares with that from neighboring sites in Egypt's Western Desert as well as in the Nile Valley. The goal is to develop an appreciation and understanding of Romano-Egyptian architecture, Classical and late antique art in Egypt, and Egypt's religious, social, and cultural history. Students will also have the opportunity to familiarize themselves with notions of archaeological methods and practice, as adopted in the context of an Egyptian excavation project. Prerequisites: One course at the 100- or 200-level in Art History, Classics, or Archaeology recommended

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: IS EN: H

L01 Art-Arch 428 The Invention of the Image: From Classical Art History to Modern Visual Studies

The scholarly field of Image or Visual Studies has developed in response to the widespread proliferation of images, both still and moving, in contemporary life. It distinguishes itself from traditional art history by examining visual representations of all types, not only works of high art, and by concentrating on the role those representations play in the formation of culture. Though most of the scholarship produced in this field focuses on the modern world, it depends upon ideas first developed in Mediterranean antiquity. This course has two primary goals. We conduct an historical examination of practices and theories of image making from Near Eastern antiquity to modernity. In so doing, we also carry out an historiographical survey of

the major works in Image/Visual Studies, thereby gaining an appreciation for the wide range of methods of inquiry employed in this important field of research. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215); one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 429 Art and Death in Ancient Rome

Perhaps more than any other phenomenon, death spurred the creation of art in the ancient Roman world. The practice of materially commemorating the deceased -- of perpetuating the memory of the dead through the creation of funerary monuments designed to appeal to both intimate familial relations and the public at large -- stretched across Roman social boundaries and endured for many centuries. But death also frequently provided the subject matter of art even outside the confines of the funerary realm. The goal of this course will be to explore the complex relationship between art and death in the Roman world. It will range from early Rome to the end of the empire and the changes brought about by widespread conversion to Christianity. In conjunction with historical readings, the course will also engage with theoretical texts in the anthropology and philosophy of death. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L01 Art-Arch 430 Topics in Northern Renaissance Art

Credit 3 units. Art: AH

L01 Art-Arch 4375 Ancient Greek Sculpture in Context

Sculpture counts among one of the greatest artistic achievements of ancient Greece, and one that has had the greatest impact on the art of later periods. This course focuses on original works of art of the Archaic and Classical periods (600--300 BCE), placing emphasis on how study of their contexts -- the places in which they were produced, displayed and found -- contributes to our understanding of their place in the ancient world. Background material, which is covered at the beginning of the semester, includes the origins of monumental Greek sculpture at the beginning of the Archaic period (late 7th to early 6th century BCE), and the stylistic development of the Archaic and Classical periods. We then proceed to discussion of various types of sculpture (architectural, cult statue, votive, commemorative, funerary) and how these works functioned within the context of the Panhellenic sanctuary, the city sanctuary, the secular center of the city, and the necropolis. In a different view of context, we also consider sculpture recovered from ancient shipwrecks, looted art on its way to the ancient Roman art market. Prerequisite: Art-Arch 331 or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4376 Pictorial Illusion in the Ancient Mediterranean

Among the many accomplishments in the history of Greco-Roman art, ancient writers especially valued the development of pictorial illusion. Pictorial illusion refers to the techniques of reproducing or approximating aspects of the visual perception of the material world on a two-dimensional surface. These include foreshortening, the application of highlights, and the indication of multiple points of depth in space relative to the picture plane.

The purpose of the course is to explore the material, stylistic, and technical history of illusionistic painting practices in the ancient Mediterranean world from Classical Greece to Late Antique Rome and to seek to understand the cultural and social significance of those practices. In addition to examining specific historical questions in the development of ancient painting, the course will investigate trans-historical connections between vision, visuality, and methods of representation. Prerequisites: Either L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L01 Art-Arch 439 Greek Art in Rome: Discourse, Dedication and Reflection

Throughout the modern period, Ancient Greek art has been perceived as a genuinely original and creative tradition in which both individual artists and regional schools made some of the most significant advances in the long development of European art. Roman art, by contrast, has been seen as derivative and secondary; Johann Joachim Winckelmann, the founder of modern art history, classified it among the "style of the imitators." However, this traditional dichotomy rests in large part on the Romans' own reactions to their encounters with the arts of Greece. Through the analysis of textual sources, architecture, statuary, and painting, this course will investigate the status and influence of Greek art in the city of Rome from the third-century BCE until the late Imperial period, and it will seek to understand how Roman responses to and uses of Greek art have come to shape the modern perception of both traditions. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Art: CPSC, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 444 The Forbidden City

Home to 24 emperors of the Ming and Qing dynasties (1368-1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace; its construction in the early Ming; the coded symbolisms of its plan and decoration; the rituals of court; and the lives of its denizens, from emperors (including Pu Yi, the "last emperor") to concubines and from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and a backdrop to major political events, as well as its role in the urban design and contemporary art of 21st-century Beijing. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 4482 Japanese Prints: Courtesans, Actors and Travelers

Woodblock prints of the 18th and 19th centuries and their relationship to literature and popular culture. Topics include the life of the pleasure quarters, sexuality and the "erotic," parody, kabuki theater and the representation of women. Prerequisite: 3 units in Japanese painting, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

L01 Art-Arch 4489 The Three Emperors: Redefining Chinese Art in the Golden Age

Ruling imperial China during its last Golden Age, the Qing emperors Kangxi, Yongzheng and Qianlong patronized the arts during an unprecedented period of prosperity and international exchange. Many of the works they commissioned are now icons of Chinese culture, but in their time these three Manchus redefined Chinese art with ideas and styles from Baroque Europe, Tibet, Mongolia and even Islamic Central Asia. This seminar focuses on the ethnically and culturally diverse art, architecture and material culture patronized by these three emperors to examine how they and their multi-ethnic empire changed the definition of Chinese art during the long 18th century. Prerequisites: Art-Arch 111 Introduction to Asian Art; or one 300-level course in Asian art history, history or literature; or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L01 Art-Arch 4490 Art, Vision, and Science in China

After China and Europe began sustained contact, the introduction of Western science, math and technology often affected Chinese art more than anything else. New optical devices and ways of visually understanding the world produced a range of positive and negative responses. Often expressed in art, these works demonstrate how new ideas affected Chinese conceptions of vision, looking, cognition and visuality. Covering the 17th through mid-20th centuries, this course discovers how Chinese art became entwined with vision and modern science, covering prints, paintings, objects and photographs across medicine, astronomy, cartography, optics and mathematics. Prerequisite: L01-111, one course in Art History or Asian Studies, or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HT Art: AH

L01 Art-Arch 4494 East, Meet West: Asia Encounters Europe

This seminar, which is grounded in cross-cultural aesthetics, examines East Asian visual responses to European art and science from the 16th through 19th centuries. The same Western ideas and works that were first introduced by Jesuit missionaries, that were continued by merchants, and that culminated with colonial enterprises left very different impressions on China and Japan. An introduction to cross-cultural aesthetics from both Western and East Asian perspectives lays the theoretical foundation to engage these works of art before the course proceeds thematically through time to cover painting, cartography, woodblock prints, ceramics, and photography within transregional and transcultural contexts. One upper-level course in Art History is recommended but not required before taking this course.

Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

L01 Art-Arch 4496 Porcelain and Lacquer Abroad: Europe Encounters Asia

From 1500 to 1800, Europeans primarily used exported porcelains and lacquers to engage with China and Japan, which were neither under colonial control, nor easily accessible by travel. Collected first in *kunstkammern* by rulers and nobles as emblems of power, these initially rare, exotic luxuries retained their prestige even as they became more widely available and explicitly gendered. Combining deep object studies with collectors' case studies from across Europe, this course examines how early modern Europeans used porcelains and lacquers to satisfy their curiosity about and material desire for China and Japan. In addition to practical training in essential

primary sources such as inventories, it will also introduce theories of luxury and consumption, gift exchange, cross-cultural interaction, material culture, and the global movement of objects. Prerequisites: L01 111 preferred; one art history course or permission of instructor
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 4615 Caricature: The Culture and Politics of Satire

This course examines the golden age of caricature. Beginning with the prints of William Hogarth, we will look at the caricatural traditions in France and England from the late 18th century through the early 20th century. Special emphasis will be placed on visual satire as a vehicle for social and political critique; on theories of humor (particularly Baudelaire and Bakhtin); and on the development of a mass market for this imagery. Other figures to be discussed include Rowlandson, Cruikshank, Daumier, Gavarni, Philippon, and Gil. We will take advantage of a major collection of French caricature in the Mildred Lane Kemper Art Museum at Washington University as well as collections available for study in Olin Library and at the Saint Louis Art Museum. Prerequisites: L01 113, L01 215, or a 300-level course in modern European history or literature; or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4621 Leonardo da Vinci

Leonardo da Vinci is universally recognized to be one of the greatest artists of all time. But who was Leonardo? Artist or scientist? Master, magus or myth? This seminar explores the reality and fiction of a fascinating, yet enigmatic genius, as well as placing this unique individual in the contexts of Renaissance Italy and the modern imagination.

Credit 3 units. A&S IQ: HUM Art: AH, HUM BU: HUM EN: H

L01 Art-Arch 4624 Michelangelo

An examination of the life and works of Michelangelo. The most important developments in his architecture, painting and sculpture; with special attention to his assistants, friends, family and contemporaries. Prerequisite: permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM EN: H

L01 Art-Arch 4625 Venice

A seminar focusing on the art of Venice, in particular on Bellini, Giorgione and Titian. Special attention to the international reputations of these three artists and to problems of patronage, connoisseurship and interpretation. Prerequisite: Art-Arch 361 or 362, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

L01 Art-Arch 4629 Caravaggio: Master and Murderer

Michelangelo Merisi (Michael Angelo Merigi or Amerighi) da Caravaggio (29 September 1571 - 18 July 1610) was one of the most important and influential painters of the 17th century, in Italy and throughout Europe. He was active in Rome, Naples, Malta and Sicily between ~1592 and 1610. But who was Caravaggio? What do we really know about his tempestuous life and how it factors in the art he created? Caravaggio was a powerful, brilliant, brutish, and hugely influential artist; a belligerent personality, brawler and murderer. He was a man of contradictions: a devout Christian and bisexual sodomite; a Knight of Malta and a fugitive from the law. This seminar

explores the reality and fiction of this fascinating and influential genius, and places him in his historical, social and artistic contexts — from Baroque Italy to the modern imagination. Prerequisites: L01 113; one 300-level course in Art History; and permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HT Art: AH, GFAH BU: IS EN: H

L01 Art-Arch 4652 Worldly Goods: Early Modern Art, Trade, Knowledge, Possession

The history of the early modern era has in recent decades been reconceived and rewritten as a history of things and goods. Global trade vectors in particular have shaped new histories of the Renaissance and Baroque eras. Material goods -- many of them newly available on a global scale -- shaped aesthetics, scientific investigation, political relations, identity formation, and devotional practices. This seminar studies the circulation of worldly goods between approximately 1500 and 1700, charting encounters around the globe by studying objects and persons in circulation. In orientation, the seminar is European, with a focus on the Dutch Republic in the world. Through secondary source readings and encounters with primary source materials, students will gain an understanding of how early modern objects relate to a newly "global" economy and horizon. Works of art, luxury trade goods, and pirated treasures are the principal sorts of "worldly goods" under consideration. We will consider the movement of individuals and the slave trade in the context of early modern colonialism as well as how the biographies of objects involve shifts in status and value over geographical space and time. Prerequisites: L01 113 and one 300-level course in Art History or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 4662 Michelangelo the Architect

When, why and how did the great Renaissance sculptor, painter and poet Michelangelo Buonarroti become an architect? This seminar surveys Michelangelo's built and unbuilt architecture, his methods and extant drawings, and the process and influence of his creations.

Credit 3 units. Art: AH

L01 Art-Arch 467 Topics in Baroque Art

Credit 3 units. Art: AH BU: HUM

L01 Art-Arch 4677 Early Modern Art, Science, Collecting

Encyclopedic or microcosmic early modern collections also known as Wunderkammers or Cabinets of Curiosities brought together all manner of artifact and natural object, and offered an arena for aesthetic contemplation and natural historical or scientific investigation alike. A space of knowledge-production and a highly socialized domain as well, the early modern collection responded to and activated the senses; some called the sorts of objects assembled in Wunderkammers-rhinoceros horns, ivory lathework carving, resins and gems, instruments, feather work, paintings, and carved coconuts and shells set in elaborate filigree-"sensualities." This seminar examines early modern collections in Spain and Portugal, at Hapsburg and Medici courts, and in Dutch and Flemish cities. Intended as both an introduction to the ways in which the practices of art and science depended on and informed one another in the early modern period in Europe, this seminar will also offer students the opportunity to engage with and make interventions in an ongoing

scholarly discussion about art, science, wonder, and the social order of objects in early modern Europe. Prerequisites: One 100- or 200-level course, and one 300-level course in Art History; or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM

L01 Art-Arch 4721 Hydrogen Jukebox: American Art and Culture, 1945-1960

The rise and "triumph" of Abstract Expressionism has long dominated the story of American art following World War II. This new seminar puts Abstract Expressionism into context with parallel developments in the arts, photography and film. Among the topics we consider: the conversation between émigré artists and American culture during and after the war; the emergence of a "noir" aesthetic in film and literature; the early work of Jasper Johns and Robert Rauschenberg and the so-called "aesthetic of indifference" in relation to Abstract Expressionism; artistic collaborations at Black Mountain College; New York school photography and photojournalism; and the cultural impact of the A bomb. Prerequisite: a 300-level course on 20th-century art, photography or history; or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 473 Art and Culture in Fin-de-Siècle America

The particular climate of the fin-de-siècle and its expression in art, architecture and letters. Concurrent development in Vienna, Paris and London as basis for comparison. Themes include new theories of mind and perception, the fate of rationalism, the "crisis in bourgeois values," and redefinitions of gender. Prerequisite: permission of instructor.

Credit 3 units. Art: AH

L01 Art-Arch 4744 TransAmerica: The United States and Mexico Between the Wars

Many areas of 20th-century U.S. culture between World Wars I and II were inspired by postrevolutionary Mexico. The Mexican Revolution (1910-1917) profoundly reoriented modern Mexico, introducing new cultural and aesthetic forms and historical themes over subsequent decades. Mexican artists contributed to a new national consciousness drawing on indigenous Mexico and on the new politics of workers and peasants, which were given monumental expression in mural painting. The bidirectional exchange between U.S. and Mexican artists was of great importance for the cultural revitalization of the New Deal and after in the United States. Among artists, writers, anthropologists, and tourists, the vogue for things Mexican was fed by many sources, including increasing travel, diplomatic exchange, and a yearning for alternatives to U.S. modernity. This seminar will support travel to Mexico City, funded by the Department of Art History and Archaeology. Students in this course must be graduate students or undergraduate majors or minors in Art History and Archaeology or Latin American Studies. Recommended prerequisite courses include one 300- or 400-level course in 20th-century U.S. art or history or one relevant course in the Latin American Studies program.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: IS EN: H

L01 Art-Arch 475 The City in American Arts and Popular Culture

From the mid-19th century forward, artists, writers, sociologists, and cultural critics have identified the city as the primary site of a vast array of historical changes associated with modernization. This course will explore the range of cultural responses to the new 20th-century city up to World War II. The American city was seen as both an incubator of difference, and of mass conformity and manipulation; a dynamic space in which to form fluid networks that catalyzed new forms of creativity, and a place of strangers and social alienation. We will trace the history of these polarized responses in the 20th-century arts and literature of the city, looking at the vibrant popular culture of film, vaudeville, and cross-dressing; new aesthetic forms such as collage and expressionism; and new urban subjects. Prerequisites: 300-level course in American 20th-century cultural history, American art, literature, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH, CPSC, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 4770 Native and Cosmopolitan Modernisms: American and European Art Between the Two World Wars

This seminar focuses on two contrasting currents within American and European modernism between the two world wars: native and cosmopolitan. Alternating between the United States and France, the content of this course begins in the years before World War I and concludes with the rise of virulent forms of cultural nationalism during the late 1930s. We consider the subjects, personalities, aesthetic strategies, and political and social investments associated with these alternative modernisms, which are linked to a search for roots on the one hand and to a desire for forms of spatial and social mobility on the other. By comparing the "homegrown" and expatriate experiences, we will consider divergent attitudes toward identity, gender, nation, time, and nature, analyzing these two fundamental responses to modernity in relation to one another. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM, HUM BU: HUM, IS EN: H

L01 Art-Arch 4774 The Age of Gatsby: American Art and Culture from World War I to the Great Crash

Mass consumption and the expansion of mass culture; mechanization; and the birth of a new visual culture that turned on animation, advertising, photography and film. Taking our cues from the cultural contradictions and historical tensions embedded in F. Scott Fitzgerald's great novel of 1925, and the 2013 film inspired by it, this seminar will trace what many at the time called the "Rediscovery of America" and its tribulations. American artists, writers, and cultural theorists embraced the possibilities and pitfalls of American modernity, the nation's mythic promise and its historical dilemmas in the face of growing commercialization and standardization. This seminar is an interdisciplinary look at the art, visual culture, music, literature, and cultural essays of the 1920s through the lens of nation, race, region, and cultural identity(-ies). Prerequisite: 300-level 20th-century American art, history, or literature course, or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4776 The Arts of Cultural Democracy: America in the 1930s

What does democratic access to the arts look like? Over the past decade, the question of distributive justice has taken on new urgency in our nation. This seminar will look at an earlier period in the nation's history -- the 1930s, from the stock market crash of 1929 to the beginning of World War II -- when the ideal of cultural democracy was put into practice on a variety of fronts, from dance to the fine arts to public murals and the collecting and inventorying of the nation's material and cultural legacies. We will also consider the possibilities and limits of political art; the impact of John Dewey on future generations of artists and culture-makers; the relationship between leftist politics and modernism; regionalism and internationalism; debates over the nature of documentary photography; and efforts to create a "usable past." Prerequisite: One 300-level course in European or American 20th-century art, literature, or cultural history; or permission of instructor.

Credit 3 units. A&S IQ: HUM, SC Art: AH, HUM EN: H

L01 Art-Arch 4782 Modern Architecture in St. Louis

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4785 Art and Culture in 1920s America

This interdisciplinary seminar examines the relationship between art and 1920s culture in the United States, including how artists and critics thought about the nature of our cultural heritage (both its rich possibilities and its limitations); the potential of technology and urbanization as well as the threats they pose to older cultural values; the nature of a multicultural society and the contributions of minority traditions to the evolution of American culture; the lure of the Southwest; early criticism of popular media; and the conversation between popular culture and high art. Prerequisite: L01 113 or permission of instructor.

Credit 3 units. Art: AH

L01 Art-Arch 4800 Roman Coins and Their Stories

This course will provide insights into everyday life in Rome and its territories through the evidence of the coins minted from the Roman Republic until the collapse of the Western Roman Empire in AD 476 and beyond. We will discuss general numismatics, starting with the history of coins and coinage, and we will understand how these small objects became an intrinsic part of the Roman way of life and what evidence they provide for daily life in Rome, from ideology to religion and from politics and culture.

Same as L08 Classics 480

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 481 Topics in Modern Art

The sources, styles, influences and content of the art of such artists as Gauguin and Cézanne examined in the context of contemporary movements in art and literature. Prerequisite: art history major or permission of instructor.

Credit 3 units. Art: AH

L01 Art-Arch 4815 Constructing the Canons of Modern Art: 1860-1960

From textbooks to museums to private collections, we experience histories of modern art through selections that present narratives of which art matters the most -- to artists, to critics, to the general public, and, supposedly, to history as a whole. How have established canons come to be, who are they for, and how do they resist or engage revision over time? This course examines narratives of modernism and its relationship to rhetorics of criticism, the power of the art market, sensationalized biographies, the practices of collectors and museums, nationalistic interests, and histories of exclusion. Who rises to the top in significance? In what ways have women artists, artists of color, and LGBTQ artists been included or excluded? Key art critics and art historians include Fry, Barr, Pollock, Nochlin and Saslow. Artists may include but are not limited to Manet, Monet, Morisot, Cassatt, Van Gogh, Gauguin, Cézanne, Bell, Modersohn-Becker, Claudel, Tanner, Sickert, Valadon, Duchamp, Cahun, Picasso, Beckmann and Krasner. Students will research comparative case studies and create their own alternative timelines of modern art from 1870-1950. Prerequisites: L01 215, Intro to Modern Art; and one 300-level Art History course.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, CPSC, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 4816 Art and Culture in Fin-de-Siecle Europe

This course presents an examination of painting, photography, and the decorative arts in France during the period between the two World's Fairs of 1889 and 1900. Artistic movements include Symbolism (Van Gogh, Gauguin, and Redon), later Impressionism (Monet and Morisot), Neo-Impressionism (Seurat and Signac), and Art Nouveau. Thematics include urban leisure and cafe culture, the agrarian ideal, the promises and threats of science and technology, the lure of the primitive, and the impact of nationalism and feminism on the arts. Prerequisites: L01 215 and any 300-level course in 19th-century art, literature, or history; or permission of instructor.

Credit 3 units. Art: AH

L01 Art-Arch 4817 Paris ca. 1900: Art, Leisure and Spectacle

Paris at the turn of the 20th century was a vibrant international center for the development of the visual arts, including painting, photography, film, and the graphic arts, particularly in the exploding domains of posters and illustrated journals. In this seminar, we study the period from 1880 to 1910, and we examine how diverse modes of urban visibility were at the heart of the development of French modern art. The place of graphic arts in promoting popular entertainments (e.g., ballet, opera, café concerts) is considered. Another focus is the powerful role of Parisian satirical journals and caricature in debating matters of class, race, and national identity. We examine diverse modes of displaying and selling the visual arts, particularly in the spheres of World's Fairs, annual salons, and in the avant-garde spaces of gallery and café exhibitions. Artists of central concern include Lautrec, Chéret, Mucha, Degas, Pissarro, the Nabis, Vallotton, and early filmmakers such as the Lumière brothers and Méliès. Prerequisite: L01 215 or permission of instructor. One 300-level course in modern art history or a course in modern French history or literature is preferred. French language reading skills are not required.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4818 Matisse and Modernisms

Certain artists generate enormous interest during their lifetimes and long after. Over time, the work of such artists is subjected to a variety of interpretive approaches in light of changing trends in art criticism and art history; the influence of contemporary art; the ebb and flow of interest in different aspects of the artist's production; changes in the political landscape; and the changing sense of how the artist's work intersects with contemporary cultural developments. This set of intersecting concerns is especially fluid in the modern period, when there is no single dominant idea of the role of art in society. The variety of interpretive strategies developed from and applied to the work of Henri Matisse demands a critical reading of the extensive literature on the artist as well as an understanding of the variety of modernisms through which to assess his artistic project. Students will gain a thorough familiarity with the work of one of the most influential artists of the 20th century, and they will engage aspects of the historiography of 20th-century art through a survey of developments in the Matisse literature. Prerequisite: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4819 The Century of Picasso

The art of Pablo Picasso (1881-1973) spanned three-quarters of the 20th century, and posthumous critical response to his work shows no sign of abating. Picasso was a leading figure in the European primitivist trends at the beginning of the last century, and with Georges Braque, he developed the aesthetic system of Cubism, which rewrote the rulebook of artistic representation. Although he was not an activist, his art routinely engaged momentous political events. Toward the end of his career, he strove to shape his legacy through artistic dialogues with artists of the past by appropriating their styles or subjects, and making them his own. Such eclectic activity, coupled with his creativity and prolific output, has ensured his place among the most influential artists of his century. Prerequisites: one 300-level course in modern art or permission of instructor; junior, senior or graduate standing.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM EN: H

L01 Art-Arch 4850 Romanticism to Realism: French Art 1830-1871

This course traces the flourishing of romanticism and the emergence of various forms of Realism in 19th-century French modernism, opening with the Revolution of 1830. Artistic tendencies ranging from the official and the academic to emergent romantic and avant-garde alternatives are addressed, as well as the unresolved social and aesthetic tensions that support the demand for an art that addresses modern times. The political idealism and the rhetoric of Republicanism in the Second Republic (1848 to 1852) intertwine with the emergence of a critical modernism that seeks truth in form, in materiality, and in political philosophy. Under the authoritarian regime of the Second Empire (1852-1870), the mandates of realism and idealism continue to vie in a period that sees both the flourishing of the academic system and the art dealer system, and the emergence of a critical avant-garde. The course closes with the emergence of Impressionism and the crisis of the Franco-Prussian war. Artists to be discussed include Delacroix, Ingres, Millet, Daumier, Courbet, Corot, Manet, Bonheur, Bayre, Clesinger, and the early careers of Bazille, Degas, Monet, Renoir, Pissarro, Degas, Morisot and Cassatt. Prerequisites:

limited to graduate students in Art History; advanced undergrads only with permission of instructor. Some prior knowledge of French modernism required; some facility with French language useful but not required.

Credit 3 units. A&S IQ: HUM EN: H

L01 Art-Arch 4854 Gauguin in Polynesia: The Late Career

This seminar focuses on the late career of Paul Gauguin, in Tahiti and the Marquesas. This course examines closely the colonial context of fin-de-siècle French Polynesia, Gauguin's response to indigenous culture, his ongoing interests in European currents of theosophy and anarchism, the development of his primitivist style in response to the French avant-garde, and Gauguin's legacy to modern art and culture in the early 20th century. Readings range from primary texts (literature and journals read by the artist, his letters, his satirical articles and caricatures produced for a Tahitian newspaper, his treatises on religion), to postcolonial theory and recent critiques of primitivism. French reading skills are useful, but not required for the course. We visit the Saint Louis Art Museum to view both the Oceanic collection, and prints and paintings by Gauguin. Prerequisite: at least one upper-level course in modern art history, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4856 French Art and Politics in the Belle Epoque

This interdisciplinary seminar addresses the rich intersection of politics, fine arts and visual culture in modern France from the Franco-Prussian War (1870) to the First World War (1914). We will study the political trends, historical events, and cultural conditions of the era, and their direct influence on the production and reception of a wide range of visual arts, ranging from official paintings and monuments to popular culture such as tourist and documentary photography, commercial posters and political caricature. We also examine the question of what it meant in the Belle Epoque to be an avant-garde artist, and how such artists expressed political sentiment in their work. Prerequisites: permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4859 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000

This seminar examines film and modern art within the framework of "Orientalism." Reading foundational texts by Said, and incorporating theory and historical discourse concerned with race, nationalism and colonialism, we explore artistic practice in European photography, painting and decorative arts from 1850 to recent times, and European and Hollywood film. We study how power and desire have been inscribed in western visual culture across the bodies of nations and peoples through conventions such as the harem, the odalisque, the desert, and the mysteries of ancient Egypt. To that end, we look at artists such as Delacroix, Ingres, Gérôme, Beardsley, and Matisse and screen films such as *The Sheik*, *The Mummy*, *Salome*, *Cleopatra*, *Pepe le Moko*, *Naked Lunch*, *Shanghai Gesture*, *Thief of Bagdad*, *Princess Tam Tam* and *The Sheltering Sky*. Subjects include the representation of gender, sexuality, desire, race and identity as well as the cultural impact of stereotype and "exotic" spectacle. Students study methods of visual analysis in film studies and art history. All students must attend film screenings.

Credit 3 units. A&S IQ: HUM, LCD, SD EN: H

L01 Art-Arch 4860 Van Gogh: Creativity, Mythology, and Commodity

Among the most famous artists of the canon of European modern art is Vincent van Gogh, known for his expressive paintings, his famous letters that chart his tumultuous career, and a short creative life marked by intense work, passionate interests in the modern art and literature of his time, and the challenges of a mental illness. This seminar will examine his art and literature in three sections: the first devoted to studying the art itself throughout his short career; the second devoted to the mythologies surrounding his art and its relationship to such notions as genius and madness; and the third looking at how his art has become a popular commodity, reproduced internationally by methods varying from precise painted replicas to commercially popular goods marked with his most famous paintings. The history and theory of modern commodity culture on a global scale and its intersection with a burgeoning art market for postimpressionist art will be explored in this final section. Prerequisites: L01 113 or L01 215 and one advanced course in art history, or permission of the instructor
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 4861 Gauguin Then and Now: Art, Myth, and Controversy

This course is an examination of the art and career of Paul Gauguin (1848-1903) and the artistic, social, and political milieu of colonialism in which he worked in France, Polynesia, and the Caribbean. Topics include avant-garde Impressionist and Symbolist cultures, the power of the art market/dealer system, the artist's writings (in translation), French colonial culture and pervasive myths of island paradise, and the pressing critiques offered today by postcolonial and feminist theory. The final third of the course will focus on the varied global reception of his work in the 20th and 21st centuries as well as controversies surrounding his art, writings, and legacies, particularly among contemporary Pacific Islander artists and artists of color. We will consult local museum collections as possible and perhaps take a class trip to Chicago to see essential collections. Prerequisite: L01 215 or any 300-level course in art history, or permission of instructor.
Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM EN: H

L01 Art-Arch 4863 The Photographic Muse: The Modern Artist and the Camera

An examination of the interplay of photography with painting and sculpture in European art from 1850 to World War I, with an emphasis on the fin-de-siècle. Readings address the history of the medium; the critical debates (starting with Baudelaire) over photography as a tool of science or of art; the rise of ethnographic photography; the Symbolist ambivalence toward technology; and the development of Pictorialism at the turn of the century. Artists studied include Nadar, Moreau, Degas, Rodin, Steichen, Gauguin, Munch, the Nabis, Brancusi and Picasso. Prerequisite: graduate standing.
Credit 3 units. Art: AH

L01 Art-Arch 4864 Exoticism and Primitivism in Modern Art

An interdisciplinary investigation of the development of exoticism and primitivism in European and American art from the Enlightenment to World War II. Topics include exoticist representations of non-Western cultures; the links between

colonialism and orientalism; the intersection of discourses on race and gender with exoticism; and the anti-modernist impulse of fin-de-siècle primitivism. Sample artists and authors include Delacroix, Flaubert, Gauguin, LaFarge, Picasso and Matisse. Prerequisites: any 300-level course in art history and permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4867 The Impressionist Landscape: Style, Place and Global Legacies 1870-1920

We will consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism, but soon expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. We will examine the place of individual perception, the physiology of sight, and theories of the natural in the development of the Impressionist landscape, through the consideration of style, genre, artistic theory, and these artists' investment in particular sites. Furthermore, the social, commercial and critical networks that supported the movement will be analyzed. Particular attention will be given to Monet, and a special exhibition of his water lily paintings on view at the Saint Louis Art Museum. Other key artists include Degas, Morisot, Renoir and Cassatt. We will also discuss the relationship of the Impressionist landscape to the development of modernist abstraction, and the aesthetic and nationalist motivations for its appropriation across the globe. Prerequisite: Introduction to Western Art; Introduction to Modern Art, or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD Art: AH EN: H

L01 Art-Arch 4868 Impressionism and the Nation in France and Beyond: Painting and Photography 1860-1920

We will consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism but expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. Our central question will be the relationship of individual perception, the physiology of sight, and theories of the natural in relation to the importance of place — both region and nation — in the political imagination of the era. We also address the relationship of the Impressionist landscape to the development of modernist abstraction as well as the aesthetic and nationalist motivations of its adaptation as a modernist style around the globe. Prerequisite: senior major in art history, or graduate student standing and permission of instructor.
Credit 3 units. A&S IQ: HUM EN: H

L01 Art-Arch 4869 Global Impressionism

How and why Impressionism has achieved its global reputation -- both positive and negative, as well as the nuanced positions between those poles -- has not been thoroughly or systematically interrogated. However, this is precisely what this seminar proposes to do. This course maps the global dissemination, exhibition, reception, and publication of French Impressionism in tandem with the rise of local Impressionisms worldwide. Globalization must be understood as concomitant with localization. This course attends to especially critical exhibitions, publications, and places that must be understood to underscore that there always remains more work to be accomplished in the production of a truly global art history. It scrutinizes how the physical translation of French Impressionist art works foreshadowed, coincided with, and fostered its stylistic

translation into local Impressionisms and its literary translation into histories of Impressionism. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: IS EN: H

L01 Art-Arch 4877 Critical Studies in Portraiture, Ancient to Contemporary

To study portraiture is to confront the complexity of human identity. The central theoretical question of this course is how identity can be expressed in a portrait. Following the consideration of theories of portraiture, identity, and artistic representation, we will treat specific historical and cultural instances of portrait-making, from ancient Greece to the present. Non-Western cultural examples will broaden the scope beyond the conventional conceptions of portraiture. We will conclude by trying to understand the continuing allure of the portrait today as digital media challenge our conventional ideas of visuality and perhaps even the urgency of portraiture in the post-human age. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in art history preferred.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH EN: H

L01 Art-Arch 4879 Marking History: Painting and Sculpture After World War II in the U.S., France, and Germany

This seminar focuses on the aesthetic, cultural, and philosophical reactions to the devastating events surrounding World War II and its later reception. We consider artistic developments within a network of international exchange -- biennials as well as gallery and museum exhibitions -- in which France, Germany, and the United States participated equally within a field of visually similar aesthetic responses to a seismic shift in historical consciousness. What distinctive artistic languages emerged after the war to express transformations in historical consciousness and in older ideas about an unfettered subjectivity? In what ways did concepts of trauma with which we live today reshape collective memory and leave their trace on painting and sculpture? Looking at abstraction and semi-abstract works in painting and sculpture, we analyze the works of Jackson Pollock, Willem de Kooning, Alberto Giacometti and Jean Dubuffet, Wols, K.O. Götz, Emil Schumacher, and Hans Hartung. Students with reading skills in German or French are encouraged. Prerequisite: L01 215 or permission of instructor. Credit 3 units. A&S IQ: HUM EN: H

L01 Art-Arch 4900 Independent Study and Research

Credit variable, maximum 3 units.

L01 Art-Arch 4905 Greenberg Curatorial Study

The Arthur Greenberg program offers undergraduate students the experience of curating an exhibition. A small team of two or three is selected through a competitive application process the year before enrollment in the course. Under the supervision of a faculty mentor in the Art History & Archaeology Department and a curator in the Mildred Lane Kemper Art Museum, students plan and curate an exhibition for the museum's Teaching Gallery. They also research and write a short brochure, prepare educational materials, and offer related programs for the exhibition, which usually opens in April. The fall 3-unit course fulfills a departmental capstone requirement for the major; 1 unit of additional course work is completed in the spring.

Credit variable, maximum 4 units. A&S IQ: HUM EN: H

L01 Art-Arch 4914 Beyond Limits: Transgression, Controversy, and Censorship in Modern Art

This course will examine some of the public controversies that surrounded the development of modern art over the last 150 years to probe the question of the social and political functions of transgressive art. After reviewing key theories of the avant-garde, we analyze both the persona of the modern artist (e.g., Van Gogh, Picasso, Pollock) and the place of women artists in the revolutions of modernism (e.g., Cassatt, Hoch, Kahlo). A key issue to address is how modernism tests limits by asking what is (and is not) art (e.g., Duchamp, Brancusi). Some of the most controversial exhibitions in this time frame, from the Salon des Refuses in 1863 to *Mirroring Evil* in 2002, highlight the challenges raised by modern artists' treatment of the body. Controversies over public funding of contemporary art, debates waged over public art in St. Louis, and the recent episodes of iconoclasm with respect to Confederate monuments and memorials will close the course. Prerequisites: L01 215 and any 300-level course in Art History or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, CPSC, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 4918 Modern War in Art

Art and war have always been intertwined, whether in glory or revulsion. But modern art and modern war are qualitatively different from their counterparts in the past in ways that ensured that their relationship would become more problematic and oppositional. The challenge of finding new artistic languages to express the new conditions of mechanized combat led many artists to explore abstraction, fragmentation, absurdity or arbitrariness to convey the energy, impersonality and nihilism of modern war. When the British soldier and poet Wilfred Owen (1893-1918) wrote of the human devastation of World War I as "obscene as cancer, bitter as the cud," he strained for metaphoric language appropriate to its magnitude. We will consider the same challenge to visual artists throughout the modern period. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM EN: H

L01 Art-Arch 4922 From the Death of the Author to the Birth of YouTube: Identity in Contemporary Art

What constitutes an artist today, when anyone can upload his or her musings to the entire world? Is the question even relevant? This course introduces students to the construction of artistic identity in contemporary art. Students consider major themes governing the production of contemporary art. We cover such topics as the death of the author and the end of art, identity politics and "authenticity," and the effects of new media on the construction of artistic persona. This course assumes a basic familiarity with the methods of art history, as well as general knowledge of art history before 1960. Prerequisites: Introduction to Western Art or Introduction to Modern Art and one 300-level course in art history, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L01 Art-Arch 4923 Globalization and Contemporary Art

What does globalization mean for contemporary art? And what do we even mean when we use the term? This upper-level seminar course considers recent art (1985–present) in the context of theories of development, postcolonialism and globalization. We focus on the tensions between the global and the local, as well what it means for an artist to be national or international. We also consider the impact of neoliberal economic policies on art production and the art market, as well as the role museums play in this international context. Finally, we consider the internet and social networks as globalizing influences that affect the production and distribution of contemporary art. Prerequisites: Introduction to Western Art or Introduction to Modern Art and one 300-level course in art history, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM EN: H

L01 Art-Arch 4924 1968 and its Legacy

The events of 1968 -- including the May riots in Paris, the Tucuman Arde exhibition in Argentina, the Tlatelolco Massacre in Mexico City, and the Prague Spring (and Russian winter) in the Czech Republic, just to name a few -- ushered in a new political and social imperative for artists. This course will start with 1968 and trace its legacy to the social and cultural movements of the 1980s, 1990s, and early 2000s. We will seek to understand the historical underpinnings of contemporary activist art and determine the roles of socially motivated art in the current political and intellectual climate. Prerequisites: L01 113, L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, CPSC, GFAH, HUM EN: H

L01 Art-Arch 4926 Contemporary Art of the U.S.-Mexico Border and Beyond

The question of the materiality of borders has attained new urgency with the resurgence of nationalist and anti-globalist movements. Calls for a "big, beautiful wall" on the U.S.-Mexico border are but one striking example of this phenomenon. A wall, a fence, a line, or a zone may focus attention on a narrow space, but it does so at the expense of broader narratives of structural inequality, the lingering violence of colonialism, and the rapid scale of climate change. The simplicity of a barrier is a particularly damaging fiction, one that avoids examinations of the larger forces that divide us. This upper-level and graduate seminar will delve into the history of "border art" as a category — whether public art, sculpture, installation, new media, or performance — using the U.S.-Mexico border as an extended in-depth case study. Analysis will not be limited to this region, as the course encourages a comparative approach that places disparate regions into dialogue with each other. In addition, we will also consider the issue of divides and borders locally, within the St. Louis area and its suburbs. Prerequisites: Intro to Western Art or Intro to Modern Art, plus one 300-level course in Art History.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, CPSC, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 4930 Picturing the Anthropocene: Landscape, Land Art, and Eco Art

Without a doubt, questions concerning environmental crisis and the habitability of our planet are among the most pressing of our time. This course will cover the history of 19th-century landscape and its legacy today, the 1960s Land Art movement and its

relationship to modern environmentalism, and the nuances of contemporary eco art. In addition, we will go in depth into some of the most prolific media within eco-art, including photography and film, and we will explore the contemporary debates specific to these fields. There will be a required field trip to the Western U.S. desert (UT, NV) to visit key sites of land art prior to the start of classes (4-5 days, approximately the third week of August). Possible visits may include Spiral Jetty, Sun Tunnels, Double Negative, Las Vegas Piece and the Center for Land Use Interpretation. The trip will be limited to eight students. Flights, lodging, ground transportation and some meals for graduate students and majors in the Department of Art History and Archaeology will be paid for by the West Bay View Travel Seminar endowment. Travel plans are subject to change due to changing pandemic restrictions. The course is limited to graduate students, majors, and possibly minors in art history and archaeology. Prerequisites: L01 113, Intro to Western Art; plus one 300-level Art History course.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L01 Art-Arch 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories

This seminar examines the theory and the cultural history of the collecting of art objects and artifacts from a range of cultures and periods, and it considers how and why both individuals and institutions create collections. What social and psychological factors drive this passion? What are the various cultural, political, and aesthetic priorities that have driven this practice historically? How is cultural patrimony defined, and how do law, the art market, and cross-cultural ethics impact the placement, study, and display of a culture's material heritage? We will build the seminar around the history of collecting in America, with a focus on Midwestern examples and particularly important case studies in St. Louis. We will consider, for example, the significant local collections built by Joseph and Emily Rauh Pulitzer (modern art) and Morton May (modern and Oceanic art), as well as the histories of both modern European and non-Western collections now owned by St. Louis-area museums. This course will be complemented by various local field trips, including to the Saint Louis Art Museum, the Pulitzer Arts Foundation, the Mildred Lane Kemper Art Museum, and Cahokia Mounds State Historic Site. Prerequisites: L01 113, L01 215, or permission of instructor. One 300-level course in Art History preferred.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4982 Public Art: History, Practice, Theory

The course will consider the history and functions of public art, with special attention to public art in St. Louis. We will survey not only the obvious forms of public art in urban sculpture and mural painting but also less traditional intersections of art and public in such sites as the internet. We will also examine the operations of institutions — national and local arts agencies, international exhibitions, nonprofit centers and the like — that foster a public engagement with contemporary art. Finally, we will consider new priorities and projects in public art, especially socially oriented and environmentally sustainable initiatives. Prerequisites: L01 113, Intro to Western Art; or L01 215, Intro to Modern Art; one 300-level course in Art History preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 499 Honors Art History and Archaeology

A major research paper acceptable to the department.
Prerequisite: permission of the department. Max. 6 units.
Credit 3 units. EN: H

L01 Art-Arch 505 Graduate Internship in the St. Louis Art Community

Graduate students will work on advanced research projects under the joint supervision of a curator at the Saint Louis Art Museum or the Mildred Lane Kemper Art Museum and a Washington University faculty member. Prior agreement on a research project and internship duties required. Permission of instructor required.
Credit variable, maximum 3 units.

L01 Art-Arch 510 Graduate Seminar: Methods in Art History

The purpose of this seminar is to introduce graduate students to some of the most important methodological approaches to the study of works of art. Students will acquire an enhanced understanding of these methods in historical terms as well as insight into how such methods can be applied in the research questions posed by art historians today. The course may include guest presentations by a range of faculty in the department.
Prerequisite: Graduate standing in Art History and Archaeology.
Credit 3 units.

L01 Art-Arch 513 The Digital Art Historian

Within the humanities, the perception exists that art history lags behind other disciplines when it comes to technology adoption. And while the "digital humanities" are now widely embraced, the definition of the field remains mutable and even contested. Is it practical, theoretical, or a combination of approaches and methodologies? This course operates under the premise that what constitutes digital art history is less about rigid interpretations and practices, and more about creating a technologically astute and nimble professional capable of "learning to learn" technologies as they emerge; determining when and how a technology may be useful in research, instruction, and other professional work; and understanding how to effectively apply technology in a broad range of contexts. "The Digital Art Historian" will emphasize experiential learning through the use of digital tools and analysis of a range of digital projects, grounded in a rubric of critical reflection. By the end of the course, students will have a significantly more thorough understanding of how to be an art historian in an increasingly digital world. Meets for 8 sessions, typically held every other week. Prereq: Graduate standing in Art History and Archaeology Dept.
Credit 1 unit.

L01 Art-Arch 5212 Art and Archaeology of Cleopatra's Egypt

This course is an introduction to the art and archaeology of Egypt from its conquest by Alexander the Great (332 BCE) to the early fourth century CE. It will examine the rich and multifaceted history and artistic legacy of Egypt under the Ptolemies and their last queen Cleopatra, followed by the Roman conquest under Emperor Augustus up to the flourishing of Egyptian Christianity. Students will become familiar with a wide range of ancient sources, including documentary and literary texts, coins, architecture, paintings and sculpture. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215), or permission of instructor.
Same as L01 Art-Arch 3212

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, GFAH, HUM BU: IS EN: H

L01 Art-Arch 526 Archaeology of Roman Slavery

Slavery was a fundamental part of the ancient Roman world. In this course, we will survey various ways in which the institution of slavery played a critical role in shaping Roman society. Through an exploration of social, economic, legal, and cultural aspects of Roman slavery, we will pose questions of what it means to be a slave society, how the ubiquity of forced labor impacted the lives of ancient Romans, and the extent to which we can recover the experiences and subjectivities of enslaved people. Throughout the course, we will confront the interpretive problems posed by biased and/or scarce evidence and by assumptions we may carry as the inheritors of modern slaveries. A recurring theme we will explore is the extent to which evidence of slavery and the material traces of enslaved people's lives are visible in the archaeological record. At the end of the term, we will contextualize Roman slavery by comparing it with modern examples and by considering the legacy of ancient slavery in modern visual culture and representations of enslaved people.
Prerequisites: Any 100- or 200-level course in art history or archaeology; or permission of instructor.

Same as L01 Art-Arch 326

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: IS EN: H

L01 Art-Arch 5330 Greek and Roman Painting

This course provides a survey of the major achievements of ancient Greek and Roman painting, broadly understood and encompassing wall painting, panel painting, painted pottery, and mosaic. We will study monuments ranging over a millennium in time and located throughout the ancient Mediterranean. Particular attention will be paid to the social, political, and religious aspects of ancient Greco-Roman painting and to questions of innovation in artistic practice. Special emphasis will be placed on students' cultivation of the tools of art-historical analysis and of the presentation of that analysis in written form.
Prerequisite: L01 113, L01 215, or permission of instructor.
Same as L01 Art-Arch 3330

Credit 3 units. A&S IQ: HUM Art: AH, CPSC, GFAH, HUM BU: HUM, IS EN: H

L01 Art-Arch 5361 Art of Early Italian Renaissance

This course is a survey of Italian Renaissance art, from its origins to the end of the 15th century. It includes an examination of artists such as Giotto, Masaccio, Donatello, Botticelli, and Leonardo da Vinci. Prerequisite: L01 113.

Same as L01 Art-Arch 361

L01 Art-Arch 5412 Japanese Art

Surveying the arts of Japan from prehistory to present, this course focuses especially on early modern, modern, and contemporary art. Emphasizing painting, sculpture, architecture, and print culture, the course will also explore the tea ceremony, fashion, calligraphy, garden design, and ceramics. Major course themes include collectors and collecting, relationships between artists and patrons, the role of political and military culture or art, contact with China, artistic responses to the West, and the effects of gender and social status on art.

L01 Art-Arch 5415 Early Chinese Art: From Human Sacrifice to the Silk Road

How does ancient and medieval Chinese art inspire contemporary artists? This course examines Chinese art, architecture, and material culture from the prehistoric period through the end of the medieval Tang dynasty to demonstrate how the past continues to affect contemporary Chinese art and the art of its future. Topics covered include Neolithic ceramics and jades, the early bronzecasting tradition, the Terracotta Army and its predecessors, early brush arts and Buddhist sites, and the varied exotica of the Silk Road. Each class teaches early and contemporary works side by side to demonstrate how artists today continue to look to the past as they create the art of the future. Prerequisite: One course in Art History at the 100 or 200 level or permission of instructor.

L01 Art-Arch 5422 Art of the Islamic World

This course surveys the art and architecture of societies in which Muslims were dominant or in which they formed significant minorities from the seventh through the 20th centuries. It examines the form and function of architecture and works of art as well as the social, historical, and cultural contexts; patterns of use; and evolving meanings attributed to art by the users. The course follows a chronological order, and selected visual materials are treated along chosen themes. Themes include the creation of a distinctive visual culture in the emerging Islamic polity; the development of urban institutions; key architectural types such as the mosque, madrasa, caravanserai, palace, and mausoleum; art objects and the art of the illustrated book; cultural interconnections along trade and pilgrimage routes; and Westernization and modernization in art and architecture.

L01 Art-Arch 5533 Pilgrimage and the Medieval City

In this course we will explore one of the primary ways people traversed Europe and beyond: pilgrimage. Specifically, this course will explore the material culture of pilgrimage in the context of the urban environment, considering the role of art in guiding, encouraging, and visualizing pilgrimage to and through some of the important religious centers in the medieval Christian world. We will begin in Jerusalem and move outwards to Constantinople as a gateway to holy sites across the Byzantine Empire. We will then move to Paris and London to explore the different ways that pilgrimage could be undertaken, both physically and in the mind's eye. Finally, we will move to the conceptual, considering how the Heavenly Jerusalem was manifested in art and architecture across the medieval world. This course will investigate this subject through engagement with primary sources, object-focused study, and visits to the Saint Louis Art Museum. The overarching goal is to foster strong critical reading and thinking skills, while also developing specialized knowledge in the history of medieval art. Emphasis will lie in critical interpretation and analysis, in engaging in rigorous class discussion, and in writing coherently at a high academic level. Prerequisite: any 100- or 200-level course in art history

L01 Art-Arch 5549 The Art of Mexico: From Aztec to Contemporary

This survey course draws from selected examples of art and architecture to tell the changing story of Mexico. Beginning with the Aztec and ending with contemporary works, this course chronologically traces artistic manifestations of beliefs, politics, and placemaking. Through movements, revolutionary moments, individuals, and trends, the course creates a portrait of Mexico that is multicultural, dynamic, and creative. Course themes include international relationships, diversity, identity, and politics. Prerequisites: L01 113, Intro to Western Art; L01 215, Intro to Modern Art; L45 165; or permission of instructor.

L01 Art-Arch 5634 Pleasure and Pain: European Fashion as (Art) History

In the words of Louis XIV, "Fashion is the mirror of history. It reflects political, social and economic changes, rather than mere whimsy." This course will survey the history of dress in early modern Europe, using art and material culture to explore the relationship between society and style. Beginning with the Renaissance, we will explore what fashion in (art) history can tell us about gender, sexuality, class, race, and revolution. To incorporate a global perspective (although concentrating primarily on the West), further themes to be considered include the textile trade, commerce and empire, identity politics, and nation-building. From the chopine to the corset, the pannier to the Pompadour pump, we will incorporate surviving examples as we explore the art and history of European fashion from the 15th to the early 19th century. This course is open to students who have previously taken or are currently enrolled in Intro to Western Art. Prerequisite: One course in Art History at the 100 or 200 level.

**L01 Art-Arch 5682 Mirrors of Nature, Dreams of Art:
Northern Renaissance Art**

This course surveys the visual culture of the Netherlands and Germany from approximately 1400 to 1550: from Burgundian court culture around the time of Jan van Eyck to the fantastic works of Hieronymous Bosch to the international renown of imperial artist Albrecht Durer and later Flemish urban culture as represented by Pieter Brueghel the Elder. Works in a variety of media will be presented in light of broader consideration of the role of art within devotional practice and the Reformation, courtly culture and the cultivation of artistic imagination, and the rise of print and "popular" culture. We will consider the power of images to mediate religious experience; the representation of folly and death; the social position of the artist; and the relevance of naturalism. We will also survey the predominant interpretive models that have been developed to analyze the significance of these works. Prerequisite: One course in Art History at the 100 or 200 level.

Same as L01 Art-Arch 3682

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: GFAH, HUM

L01 Art-Arch 5683 Global Baroque: Art and World-Making

Europe and along Eurasian contact routes between 1500 and 1700 is a primary focus. The course will open with an examination of the significance of the early modern category of "the exotic" and the role of the exotic or foreign in shaping artistic and collecting practices during a period that tends to be studied with Europe at the center of the world. Throughout the semester, we will explore different modalities of "otherness," and the political stakes of representations of self and other within the context of early modern empire- and nation-building. We will analyze paintings, prints, drawings, sculptural objects, naturalia, featherwork, ceramics, porcelain, and textiles alongside primary sources, early modern history and art history, cultural and material history, the history of science, and maritime and diplomatic history. The course attends to the atrocities of slavery in the early modern world and trace the relationship of enslavement to procuring and appreciation of exotic materials. Lectures will incorporate contemporary art (installations, photography, collage, and painting) that actively engages the modern era. The course involves close study of works of art in local collections, and will include visits to the Saint Louis Art Museum, where students will be introduced to the extraordinary holdings, in particular the Phoebe Dent Weil and Mark S. Weil collection of early modern prints, drawings, and sculpture. Prerequisites: One 100- or 200-level course in Art History; or permission of the instructor

L01 Art-Arch 5785 Photography in America

This course will consider the practice and use of photography in America, from its invention up to the present, and it will offer various ways of thinking about the medium and its relation to society and culture. Students will come to understand the ways photographic practices shape public perceptions of national identity, ethnicity and gender, nature, democratic selves, and a host of other concerns. We will discuss famous practitioners

such as Matthew Brady, Jacob Riis, Lewis Hine, Walker Evans, and Robert Frank. We consider not only the social and public uses of the medium (through such episodes as the New Deal/ FSA and photojournalism) but also the private explorations of "fine art" photographers and the everyday practices of the snapshot. Prerequisite: One course in Art History at the 100 or 200 level.

Same as L01 Art-Arch 3785

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN:

L01 Art-Arch 5892 Modern Sculpture

This course will survey sculpture in Europe and the United States from about 1800 to the present, with an emphasis on the period from 1890 to 1980. A rapid traverse of Neoclassicism, Realism, and the rage for statuary during the later 19th century will take us to the work of Rodin and to a more systematic exploration of developments in the sculpture of the 20th century. Particular emphasis will also be placed upon the work of Brancusi, Picasso, Matisse, Duchamp, Giacometti, Oppenheim, David Smith, Serra, Morris, Judd, Hesse, and Bourgeois. An important theme running through the course as a whole -- from an age of nationalism and manufacturing to our own time of networks and information -- is the changing definition of sculpture itself within its social and political context. We will also explore various new artistic practices (e.g., video, performance, installations, body art) and interrogate their relationship to sculptural tradition and innovation. Prerequisite: L01 113, L01 215, or permission of instructor.

Same as L01 Art-Arch 3892

Credit 3 units. A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

L01 Art-Arch 595 Qualifying Papers for the MA degree

Every student fulfilling the requirements of the MA degree in the Department of Art History and Archaeology will prepare two Qualifying Papers (QP), each 25-30 pages. Together the QPs will constitute the capstone experience of the MA degree, and a demonstration of potential for more advanced graduate work. Prerequisite: Art History graduate status in good standing.

Credit 3 units.

L01 Art-Arch 5973 New Media, New Technologies

In the summer of 2013, Random International's "Rain Room" was installed at the Museum of Modern Art in New York. Lines to experience the sensation of being rained on without getting wet ranged up to seven hours at times. This merging of new technology with the gallery space proved irresistible, but it also raises questions as to the uses of technology in contemporary art and whether or not this could be much more than a gimmick. As one Yelp reviewer put it, "The Rain Room is definitely an experience. Let's be honest... I'm mostly upset that I didn't get a cool, new Facebook profile pic out of it." This course will consider technological developments in modern

and contemporary art -- including photography, video and new media, and digital and Internet art -- as well as forays into new technology that blur the lines between art and science. Prerequisite: L01 113, L01 215, or permission of instructor.

Same as L01 Art-Arch 3973

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN:

H

L01 Art-Arch 5975 Art and Activism

This course will examine political and social activism in art and visual culture, focusing on the role that visual representation has played in social movements and how artists/activists have employed visual media to challenge and resist dominant visual representations and political formations. We explore key theoretical developments in activist discourse as well as the role of art practices and aesthetic commitments in these developments. This course seeks to represent the development of the relation of art and activism in its broadest intellectual and cultural context within the 20th century and to encourage an appreciation of the complex array of disciplinary perspectives that are implicated in this development. Prerequisite: L01 113, L01 215, or permission of instructor.

Asian American Studies

The minor in Asian American Studies is designed to enrich students' critical understanding of both the individual experiences and collective histories of Asian Americans in regional, national and transnational contexts. As an inter- and multi-disciplinary program, it underlines transnational contexts and comparative perspectives for the study of Asian American experiences. By promoting knowledge and understanding of a wide range of Asian American individuals and groups through teaching and research, the minor aims to provide new classroom opportunities for undergraduate students to explore Asian American experiences. It intends to enhance communication and collaboration among various cultural, ethnic and racial groups; to facilitate intellectual exchanges; and to broaden academic inquiries on the subjects of migration, ethnicity and race across different disciplines and programs at Washington University. Involved departments include American Culture Studies; East Asian Studies and South Asian Studies; African and African American Studies; Women, Gender, and Sexuality Studies; and American Indian Studies.

The minor in Asian American Studies can nicely complement a major in American Culture Studies, East Asian Studies, East Asian Languages and Cultures, English, Global Studies, History, Sociology and other fields. Because the questions that animate Asian American Studies span disciplinary boundaries, the minor will inspire students to draw on the methods and insights of multiple disciplines to engage complex real-world problems that necessitate interdisciplinary thinking. Situated in the larger

context of the university's commitment to diversity and inclusion, the minor in Asian American Studies is an integral part of the diversity and inclusion initiatives at Washington University that nurture a culturally and academically stimulating environment.

PhD, University of California, Berkeley

Majors

There is no major in Asian American Studies.

Minors

The Minor in Asian American Studies

Total units required: 18 (at least 12 units must be at the 300 level or above)

Requirements:

- 3 credits of Introductory course work
- 3 credits of Asian American Focus course work
- 6 credits of Multiethnic and Transnational course work
- 6 credits of Context course work

Regulations:

- In general, students should complete one introductory course prior to pursuing Asian American Focus courses and Multiethnic and Transnational courses.
- All advanced units must be unique to the Asian American Studies minor (i.e., not counted toward any other major or minor).
- All courses counting toward the Asian American Studies minor must be taken for a letter grade, and students must receive a grade of C+ or higher.
- Students may use a study abroad course on any subject in Asian Studies to fulfill the Asian Studies category requirement. Such courses must be approved by the study abroad advisor for the Asian American Studies minor.

Introductory Courses

Choose one from this list (3 credits, any level):

- First-Year Seminar: Easy Riders, Migrant Laborers: American Mobility in Literature and Film (E Lit 160) (unpredictable)
- Ocean, Island, Ghetto, Globe: An Introduction to Asian American Literature and Its Spatial Politics (E Lit 313) (annually)
- First-Year Seminar: Chinatown: Migration, Identity, and Space (GS 135) (annually)

- Freedom, Citizenship and the Making of American Life (History 163) (annually)
- First-Year Seminar: The Meaning of Pakistan: History, Culture, Art (History 2157) (every one or two years)
- First-Year Seminar: Beyond the Melting Pot: Life in Immigrant America (SOC 2710) (unpredictable)

Asian American Focus Courses

Choose one from this list (3 credits, any level):

- Doctors and Terrorists: The Fictions of South Asian Americans (AAS 200) (every two years)
- Techno-Orientalism: Race, Media & Society (AAS 450) (unpredictable)
- Topics in Asian American Studies: Introduction to Asian American and Pacific Islander Studies (AMCS 250) (annually)
- Topics in Asian American Studies: Asian American Racial Scripts: Relational Concepts and Theories (AMCS 3520) (unpredictable)
- Topics in Literature: Asian American Fictions: Space, Place, and the Makings of Asian America (E Lit 313) (annually)
- Topics in Literature: Asian American Writings: Contesting American Constructions of the Alien Other (E Lit 313) (annually)
- Topics in Literature: Ocean, Island, Ghetto, Globe: An Introduction to Asian American Literature and Its Spatial Politics (E Lit 313) (annually)
- Topics in American Literature: Imagining Multiracial Coalitions (E Lit 423) (every one or two years)
- "Model Minority": The Asian American Experience (GS 3512) (annually)

Multiethnic and Transnational Courses

Choose any two from these two lists (6 credits total, any level):

(1) Asian Americans in a Multiethnic/Multiracial Perspective

- Sophomore Seminar: American Dreams, American Nightmares: US Ethnic Literatures of Post-War Disillusionment (E Lit 250) (unpredictable)
- Topics in English Literature: Growing Up "Different": The Bildungsroman in a Diversifying America (E Lit 317) (annually)
- The Multiethnic Graphic Novel in 20th- and 21st-Century American Popular Culture (E Lit 3524) (unpredictable)
- Topics in Literature: Queer Youth: LGBTQ Narratives of Coming-of-Age and Coming Out in North America (E Lit 4621) (unpredictable)
- Children of Immigrants: Identity and Acculturation (GS 4036) (annually)

(2) Global Asia and Asian Diasporas in a Transnational Perspective

- Collecting Art/Excluding People: The Contradictions of Chinese Art in U.S. Museums (Art-Arch 144) (every 2 to 3 years)
- Finding China: From Sojourners to Settlers in the Chinese Diaspora and Chinese American Literature (Comp Lit 375) (unpredictable)
- Topics in Comparative Literature I: The Trope of "China" in the Imagination of the Chinese Diaspora (Comp Lit 375) (unpredictable)
- Writing From the Periphery: The Question of Chineseness (Comp Lit 449) (unpredictable)
- Chinese Diasporas (History 3165) (every two years)
- Imperialism and Sexuality: India, South Asia and the World (WI) (History 39SC) (every one or two years)
- Caste: Globalization, Sexuality and Race (WGSS 366) (unpredictable)

Context Courses

Choose one from each category (6 credits total, any level):

(1) Immigration, Race and Ethnicity

- Rainbow Radicalisms!: Ethnic Nationalism(s), the 1960s and the Politics of the New Left (AFAS 4121) (unpredictable)
- The Immigrant Experience (AMCS 202) (every one or two years)
- Global Circuits: Religion, Race, Empire (AMCS 314B) (unpredictable)
- Race & Ethnic Relations in the United States (AMCS 3296) (annually)
- Topics in American Culture Studies: Commissioned Memories: Racial Unrest and Commission Politics (AMCS 3520) (unpredictable)
- Topics in American Culture Studies: Protest and Power in Modern America (AMCS 359) (unpredictable)
- Neighborhoods, Schools and Social Inequality (Educ 4289) (unpredictable)
- Visualizing Segregation: A History of St. Louis, Chicago and New Orleans (INTER D 306M) (unpredictable)
- Histories of Intelligence: Topics in Science and Society (IPH 3451) (unpredictable)
- Immigration Law (Law 630) (every one or two years)
- Race and Ethnicity in American Politics (Pol Sci 3031) (unpredictable)
- The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S. (SOC 2010) (every one or two years)
- Social Inequality in America (SOC 2110) (unpredictable)
- The Social Construction of Race (SOC 3212) (unpredictable)
- Sociology of Immigration (SOC 3710) (unpredictable)

(2) Asian Studies

- Contemporary Chinese Culture and Society (Anthro 3055) (unpredictable)
- Archaeology of China: Food and People (Anthro 3163) (unpredictable)
- Culture, Illness and Healing in East Asia (Anthro 4033) (unpredictable)
- Introduction to Asian Art (Art-Arch 111) (annually)
- Modern and Contemporary Chinese Art (Art-Arch 3426) (unpredictable)
- The Three Emperors: Redefining Chinese Art in the Golden Age (Art-Arch 4489) (unpredictable)
- Modern and Contemporary Chinese Literature (Chinese 342) (annually)
- US-China Relations from 1800 to the Present (Chinese 350) (every two years)
- Writing New Horizons: Explorers, Envoys, and Other Encounters in Korean Travel Narratives (EALC 340)
- First-Year Seminar: The Vietnam Wars (GS 111) (unpredictable)
- From McDonald's to K-pop: New Movements in East Asia (GS 3822) (annually)
- Chinese Politics (GS 4035) (every 1 or 2 years)
- First-Year Seminar: The Meaning of Pakistan: History, Culture, Art (History 2157) (every one or two years)
- Early Modern China (History 3162) (every one or two years)
- Modern China: 1890s to the Present (History 316C) (annually)
- Japan Since 1868 (History 320C) (every one or two years)
- 19th-Century China: Violence and Transformation (History 331) (every two years)
- Advanced Seminar: Incredible India! (History 49SC) (unpredictable)
- The Modern Voice in Japanese Literature (Japan 333C) (annually)
- Literature of Modern and Contemporary Korea (Korean 352) (every 1 or two years)
- Topics in Politics: Modern South Asian Politics (Pol Sci 3292) (unpredictable)
- Globalization and Its Discontents (WGSS 270A) (unpredictable)

Courses

Please refer to the Minors (p. 372) section of this page.

Biology

Biology is an exciting, diverse field that ranges from the molecular biology of individual cells to interactions among entire populations of organisms. Members of the biology faculty are recognized internationally for their research, and they bring a variety of strengths and teaching styles into the classroom. The major program in biology provides a thorough education in the history of scientific discovery in biology, the logical and statistical procedures used to formulate and to test biological hypotheses, and the technical skills needed to conduct contemporary biological research.

The biology major program emphasizes the hierarchical nature of biological complexity and the major structures and functions that emerge at the molecular, cellular, organismal, populational and ecosystem levels. Each student masters at least one dimension of contemporary research in sufficient detail to describe the major hypotheses currently being tested and to demonstrate techniques used to test those hypotheses. Mastery of this material is evident in a student's ability to critique published data, to identify ambiguities and uncertainties in the conclusions drawn from those data, and to evaluate the societal importance of the research. Biology majors are prepared to make creative contributions to biology.

The biology major program provides a wide range of research opportunities. Because more than 400 faculty members conduct research in biology and biomedical sciences at Washington University, it is easy to find a project that suits a student's main interests. Many students complete their research projects at the Washington University School of Medicine, one of the top-ranked medical schools in the country. Summer research fellowship programs are available, funded by sources including the Howard Hughes Medical Institute, the Children's Discovery Institute, the National Science Foundation, and the Washington University Office of Undergraduate Research. Detailed information about finding a research mentor (https://pages.wustl.edu/Bio_200-500_independent_research/bio-200500-course-information-page/) is available online.

Majors

The Major in Biology

Total units required: 58 to 67

Required courses:

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
Chem 111A	General Chemistry I	3
or Chem 105	Introductory General Chemistry I	
Chem 112A	General Chemistry II	3
or Chem 106	Introductory General Chemistry II	
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Math 132	Calculus II	3
Math 2200	Elementary Probability and Statistics	3
or Math 233	Calculus III	
or Math 3200	Elementary to Intermediate Statistics and Data Analysis	
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1
Total Units		40

Students may substitute Chem 401 Physical Chemistry I for Chem 262 Organic Chemistry II with Lab. Students who plan to take physical chemistry must take Math 233 Calculus III. Math 2200 Elementary Probability and Statistics (required for the tracks in ecology and evolution and in genomics and computational biology) and Math 322 Biostatistics are valuable, particularly for students interested in research. Students who have taken Math 233 may take Math 3200 Elementary to Intermediate Statistics and Data Analysis rather than Math 2200 Elementary Probability and Statistics for a more advanced treatment of statistics.

At least 18 units in advanced biology courses (numbered 300 or above) are required. These 18 units may not include Biol 303A, Biol 307A, Biol 3160, Biol 363, Biol 374, Biol 387, Biol 388, Biol 3900, Biol 4106, Biol 4202, Biol 429, Biol 4582, Biol 487 or

Biol 488; cross-listed courses originating in other departments (except Biol 360, Biol 4580, Biol 4810, Biol 4820 and Biol 4833, which count as biology major credit despite external origins); courses in University College; or more than 3 units of history-of-science courses.

Majors are required to take at least one course from each of the following three areas:

Area A: Cellular and Molecular Biology

Code	Title	Units
Biol 3041	Plant Biology and Genetic Engineering	4
Biol 324	Human Genetics	3
Biol 334	Cell Biology	3
Biol 349	Microbiology	4
Biol 424	Immunology	4
Biol 4492	Infectious Diseases: History, Pathology, and Prevention	3
Biol 451	General Biochemistry	4
Biol 4810	General Biochemistry I	3
Biol 4820	General Biochemistry II	3

Area B: Organismal Biology

Code	Title	Units
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3411	Principles of the Nervous System	3
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains and Behavior	3
Biol 4023	How Plants Work: Physiology, Growth and Metabolism	3
Biol 4030	Biological Clocks	3
Biol 4071	Developmental Biology	3
Biol 4381	Cell-Based Tissue Engineering and Regenerative Medicine	3
Biol 4580	Principles of Human Anatomy and Development	3

Area C: Evolution, Ecology and Population Biology

Code	Title	Units
Biol 3220	Woody Plants of Missouri	3
Biol 347	Darwin and Evolutionary Controversies	3
Biol 3501	Evolution	4
Biol 370	Animal Behavior	3
Biol 381	Introduction to Ecology	3
Biol 4181	Population Genetics (and Microevolution)	3
Biol 4182	Macroevolution	3

Biol 4183	Molecular Evolution	3
Biol 419	Community Ecology	3
Biol 4195	Disease Ecology	4
Biol 472	Behavioral Ecology	4

Majors also must take an advanced laboratory course from the following list:

Code	Title	Units
Biol 3110	Vertebrate Structure Laboratory	4
Biol 3423	Behavioral Genetics Laboratory	3
Biol 3491	Microbiology Laboratory	3
Biol 3492	Laboratory Experiments with Eukaryotic Microbes	3
Biol 3493	Bacterial Bioprospecting and Biotechnology	3
Biol 360	Biophysics Laboratory	3
Biol 373W	Laboratory on the Evolution of Animal Behavior (Writing Intensive)	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4193	Experimental Ecology Laboratory	4
Biol 4220	Practical Bioinformatics	4
Biol 4342	Research Explorations in Genomics	4
Biol 434W	Research Explorations in Genomics (Writing Intensive)	4
Biol 437	Laboratory on DNA Manipulation	4
Biol 4522	Laboratory in Protein Analysis, Proteomics and Protein Structure	3
Biol 4523	Molecular Methods in Enzyme Analysis	4
Biol 4525	Structural Bioinformatics of Proteins (Writing Intensive)	4

All courses to be counted toward a major in biology must be taken for a letter grade if a letter grade is offered. A grade of C- or better must be earned in all of these courses.

In special cases, students may earn credit for graduate courses offered by the Division of Biology and Biomedical Sciences.

Optional Biology Major Tracks

A student majoring in biology may choose one of five optional tracks within the major if the student's interests lie primarily within one of these subfields of biology. A track provides strong training for graduate study in its subfield. *All tracks require completion of the biology major requirements as stated above but provide concentrated study in one of the five subfields.*

The Major in Biology: *Ecology and Evolution Track*

Additional requirements include Math 2200 or Math 3200. Students whose main interest is ecology must take at least two ecology electives and one evolution elective; students whose main interest is evolution must take at least two evolution electives and one ecology elective (evolution electives: Biol 3501, Biol 4181, Biol 4182 and Biol 4183; ecology electives: Biol 370, Biol 381, Biol 419, Biol 4195 and Biol 472). Also required are one elective in analytical methodology (CSE 131 or Math 322) and one elective in earth and planetary sciences (EPSc 201 or EPSc 323). The course used to fulfill the advanced laboratory requirement for the major must be Biol 373W, Biol 4193, Biol 437, Biol 4342 or Biol 434W.

The Major in Biology: *Genomics and Computational Biology Track*

Additional requirements include an advanced genomics/computational biology elective (Biol 324, Biol 4183, Biol 548 or Biol 5488); statistics (Math 2200 or Math 3200); and two outside electives (CSE 131 and CSE 247). CSE 240 is strongly recommended. The course used to fulfill the advanced laboratory requirement for the major must be Biol 3492, Biol 4220, Biol 4342, Biol 434W, Biol 437 or Biol 4525. Biology courses recommended for students in this track include Biol 334, Biol 3422, Biol 349, Biol 3491, Biol 4030, Biol 4181, Biol 4183 and Biol 4810. Recommended mathematics electives include Math 217 and Math 309.

The Major in Biology: *Microbiology Track*

Additional requirements include Biol 349, which should be taken during the spring of the sophomore year, and either Biol 451 or the pair of courses Biol 4810 and Biol 4820. The advanced laboratory course used to fulfill major requirements must be one of the following: Biol 3491, Biol 3492, Biol 3493 or Biol 437. At least one of the following must be taken as an advanced microbiology elective: Biol 4492 or Biol 5426. At least one of the following must be taken as an allied elective: the pair of courses Biol 191 and Biol 192, Biol 424, Chem 453 or EPSc 323. Students should select one course each from biology major areas B and C. Biol 3501 is highly recommended as the course used to fulfill biology major area C. The total number of upper-level credits earned in major-track biology courses and allied electives must be at least 24.

The Major in Biology: *Molecular Biology and Biochemistry Track*

Additional requirements include both Biol 4810 and Biol 4820 as well as either Biol 334 or Biol 349. The advanced laboratory course used to fulfill major requirements must be one of the following: Biol 3423, Biol 3491, Biol 3492, Biol 3493,

Biol 4342/Biol 434W, Biol 437, Biol 4522, Biol 4523 or Biol 4525. Additional biology courses recommended for students in this track include Biol 3041, Biol 4023, Biol 4071, Biol 4183, Biol 4833 and Biol 5312.

The Major in Biology: *Neuroscience Track*

Biology major requirements must be met with the following courses: Biol 3058, area A (Biol 334, Biol 451, Biol 4810 or Biol 4820), area B (Biol 3411), and any course in area C. Students must then choose one of the following laboratory pathways: (1) Laboratory Pathway 1: one of the following courses: Biol 3423, Biol 360, Biol 373W or Biol 404; or (2) Laboratory Pathway 2: any other upper-level biology laboratory course on the list of approved laboratory courses for the biology major plus 6 credits of Biol 500N and/or Biol 500U (Independent Research in Neuroscience). Students must select at least one biology elective (Biol 3110, Biol 3151, Biol 328, Biol 3421, Biol 3422, Biol 4030, Biol 437 or Biol 4580) and one outside elective either in physics (Physics 350, Physics 355 or Physics 360) or psychology (Psych 330, Psych 360 or Psych 3604). Math 2200 or Math 3200 is recommended. Optional seminar courses in neuroscience include Biol 171 and Biol 4934. Physics 360 may count either as the advanced laboratory requirement or the outside elective course but not for both requirements.

Related majors can be found in the biomedical engineering (p. 1171), philosophy-neuroscience-psychology (PNP) (p. 915) and philosophy of science (p. 901) pages of this *Bulletin*.

The Major in Environmental Biology

Students interested in environmental biology typically take Biol 2950 Introduction to Environmental Biology during fall of the first year of study, although it may be taken later.

Required courses:

Code	Title	Units
Biol 2950	Introduction to Environmental Biology	3
Biol 2960	Principles of Biology I (lecture and lab)	4
Biol 2970	Principles of Biology II (lecture and lab)	4
Biol 381	Introduction to Ecology	3
Chem 111A	General Chemistry I (lecture and lab)	3
or Chem 105	Introductory General Chemistry I	
Chem 112A	General Chemistry II	3
or Chem 106	Introductory General Chemistry II	
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
EPSc 201	Earth and the Environment (lecture and lab)	4

or EPSc 202	Introduction to Earth, Environmental, and Planetary Science	
or EPSc 219	Energy and the Environment	
Math 131	Calculus I	3
Math 132	Calculus II	3
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Total Units		38

One of the following chemistry courses:

Code	Title	Units
Chem 261	Organic Chemistry I with Lab	4
EPSc 323	Biogeochemistry	3
EECE 210	Introduction to Environmental Engineering	3
EECE 505	Aquatic Chemistry	3
EECE 531	Environmental Organic Chemistry	3

One of the following courses in statistics or GIS:

Code	Title	Units
Math 2200	Elementary Probability and Statistics	3
Math 3200	Elementary to Intermediate Statistics and Data Analysis	3
EnSt 380	Applications in GIS	3

One upper-level biology lab course:

Any course that fulfills the advanced laboratory requirement of the biology major is acceptable; we recommend Biol 4193 Experimental Ecology Laboratory (4 credits, writing intensive).

One of the following Biol 300+ courses (Areas A and B in Biology):

Code	Title	Units
Biol 3041	Plant Biology and Genetic Engineering	4
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 334	Cell Biology	3
Biol 3411	Principles of the Nervous System	3
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains and Behavior	3
Biol 349	Microbiology	4
Biol 4023	How Plants Work: Physiology, Growth and Metabolism	3
Biol 4030	Biological Clocks	3

Biol 451	General Biochemistry	4
Biol 4580	Principles of Human Anatomy and Development	3
Biol 4810	General Biochemistry I	3

One of the following Biol 300+ courses (Area C in Biology):

Code	Title	Units
Biol 3220	Woody Plants of Missouri	3
Biol 3501	Evolution	4
Biol 370	Animal Behavior	3
Biol 4181	Population Genetics	3
Biol 4182	Macroevolution	3
Biol 419	Community Ecology	3
Biol 4195	Disease Ecology	4
Biol 472	Behavioral Ecology	4

One additional Biol 300+ major-track course (may include Biol 500):

Please refer to the Biology Course Listings (p. 381) in this *Bulletin*.

One of the following EnSt or EPSC 300+ courses:

Code	Title	Units
EnSt 364	Field Methods for Environmental Science	3
EnSt 365	Applied Conservation Biology	3
EPSc 323	Biogeochemistry (only if not already taken for chemistry requirement)	3
EPSc 352	Earth Materials	5
EPSc 353	Earth Forces	4
EPSc 385	Earth History	3
EPSc 409	Surface Processes	3
EPSc 413	Introduction to Soil Science	3
EPSc 428	Hydrology	3
EPSc 429	Environmental Hydrogeology	3
EPSc 443	Methods in Biogeochemistry	3
EPSc 444	Environmental Geochemistry	3
EPSc 486	Paleoclimatology	3

Additional Information

Research: Research opportunities are available during the student's first and second years through Biol 200; such opportunities are available during the third and fourth years through Biol 500. A research emphasis in the major requires at least 6 credits (two semesters) of Biol 500 research and an approved senior thesis on this research, which is presented at the undergraduate symposium. The research emphasis is acknowledged on the degree as a research milestone.

Senior Honors: Biology majors are encouraged to work for senior honors, which require a 3.30 grade-point average in biology, a 3.30 GPA in nonbiological sciences (mathematics, chemistry and physics courses), and a 3.65 overall GPA at the time of graduation. Also required are 6 units of Biol 500 research and an approved thesis from this work, equivalent to the research emphasis described in the preceding paragraph. Students interested in senior honors should begin Biol 500 no later than the spring of the junior year.

The Department of Biology awards the Marian Smith Spector Prize to an undergraduate who has an excellent academic record and who submits an outstanding honors thesis; it also awards the Ralph S. Quatrano Prize to the student whose thesis shows the greatest evidence of creativity in design, research methodology and/or broader scientific implications. The Harrison D. Stalker Prize is awarded to a graduating senior whose college career is distinguished by scholarship, service and breadth of interest.

Minors

The Minor in Biology

Units required: 18 units of biology and 14 units of chemistry

Required courses:

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
Chem 111A	General Chemistry I	3
or Chem 105	Introductory General Chemistry I	
Chem 112A	General Chemistry II	3
or Chem 106	Introductory General Chemistry II	
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Total Units		22

Elective courses:

The minor requires 10 advanced units in biology selected from the following:

Code	Title	Units
Biol 3010	Biotechnology Project	3
Biol 3041	Plant Biology and Genetic Engineering	4
Biol 3058	Physiological Control Systems	2
Biol 3100	R Workshop in Biology	1
Biol 3110	Vertebrate Structure Laboratory	4
Biol 3151	Endocrinology	3
Biol 3220	Woody Plants of Missouri	3
Biol 324	Human Genetics	3

Biol 328	Principles in Human Physiology	4
Biol 334	Cell Biology	3
Biol 3411	Principles of the Nervous System	3
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains and Behavior	3
Biol 3423	Behavioral Genetics Laboratory	3
Biol 347	Darwin and Evolutionary Controversies	3
Biol 349	Microbiology	4
Biol 3491	Microbiology Laboratory	3
Biol 3492	Laboratory Experiments with Eukaryotic Microbes	3
Biol 3493	Bacterial Bioprospecting and Biotechnology	3
Biol 3501	Evolution	4
Biol 354	Physics of Living Systems	3
Biol 360	Biophysics Laboratory	3
Biol 370	Animal Behavior	3
Biol 373W	Laboratory on the Evolution of Animal Behavior (Writing Intensive)	3
Biol 381	Introduction to Ecology	3
Biol 4023	How Plants Work: Physiology, Growth and Metabolism	3
Biol 4030	Biological Clocks	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4071	Developmental Biology	3
Biol 4181	Population Genetics	3
Biol 4182	Macroevolution	3
Biol 4183	Molecular Evolution	3
Biol 419	Community Ecology	3
Biol 4193	Experimental Ecology Laboratory	4
Biol 4195	Disease Ecology	4
Biol 4220	Practical Bioinformatics	4
Biol 424	Immunology	4
Biol 4270	Problem Based Learning in Biomedical Sciences	3
Biol 4310	Biology of Aging	3
Biol 4342	Research Explorations in Genomics	4
Biol 434W	Research Explorations in Genomics (Writing Intensive)	4
Biol 437	Laboratory on DNA Manipulation	4
Biol 4381	Cell-Based Tissue Engineering and Regenerative Medicine	3
Biol 4492	Infectious Diseases: History, Pathology, and Prevention	3
Biol 451	General Biochemistry	4
Biol 4522	Laboratory in Protein Analysis, Proteomics and Protein Structure	3

Biol 4523	Molecular Methods in Enzyme Analysis	4
Biol 4525	Structural Bioinformatics of Proteins (Writing Intensive)	4
Biol 4540	Physics of Living Systems	3
Biol 4580	Principles of Human Anatomy and Development	3
Biol 4715	Basic Cancer Biology	3
Biol 4716	Advanced Cancer Biology	3
Biol 472	Behavioral Ecology	4
Biol 4810	General Biochemistry I	3
Biol 4820	General Biochemistry II	3
Biol 4833	Protein Biochemistry	3

Additional Information

All courses used for the biology minor must be taken for a letter grade. A grade of C- or better must be earned in all of these courses. A student may not receive credit for both Biol 370 and Biol 472, or for both Biol 4342 and Biol 434W.

The Minor in Bioinformatics

Mindful of the emerging opportunities at the interface of biology and computer science, the Department of Biology and the Department of Computer Science & Engineering have fashioned the minor in bioinformatics. This program serves students from both departments as well as other students from the natural sciences and engineering with an interest in this field.

Units required: 23 to 24 units, as described below

Core courses:

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
CSE 131	Introduction to Computer Science	3
CSE 247	Data Structures and Algorithms	3
ESE 326	Probability and Statistics for Engineering	3
or Math 2200	Elementary Probability and Statistics	
or Math 3200	Elementary to Intermediate Statistics and Data Analysis	
or Math 3211	Statistics for Data Science I	
or DAT 120 & DAT 121	Managerial Statistics I and Managerial Statistics II	
Total Units		17

Advanced biology elective: Choose one of the following:

Code	Title	Units
Biol 3492	Laboratory Experiments with Eukaryotic Microbes	3
Biol 4181	Population Genetics	3
Biol 4220	Practical Bioinformatics	4
Biol 4342	Research Explorations in Genomics	4
Biol 437	Laboratory on DNA Manipulation	4
Biol 4525	Structural Bioinformatics of Proteins (Writing Intensive)	4

Computer Science & Engineering elective: Choose one of the following:

Code	Title	Units
CSE 514A	Data Mining	3
CSE 584A	Algorithms for Biosequence Comparison	3
or Biol 5504	Algorithms for Biosequence Comparison	
CSE 587A	Algorithms for Computational Biology	3

Additional Information

It is anticipated that, for those students majoring in biology or computer science & engineering (CSE), some portion of the introductory sequence will overlap with the courses required for the major and that these courses will be applicable to both the major and the minor. Upper-level courses in biology and CSE used to fulfill the minor requirements may not be used to fulfill the requirements of another major or minor in Arts & Sciences. A minimum grade of C- is required for all courses to count toward the minor.

Courses

Visit online course listings to view semester offerings for L41 Biol (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L41&crslvl=1:4>).

L41 Biol 1103 Medical Imaging of the Human Body

A multimedia exploration of the human body via state-of-the-art imaging techniques, including CT, MRI, Ultrasound, and PET scans. The investigative challenge of diagnostic medical imaging is examined and common health issues including sports injuries, heart disease, stroke, cancer, arthritis, as well as early detection screening tests are discussed. Material is presented in a uniquely interactive and enjoyable manner. Prereq: one year high school or entry-level college biology.
Credit 3 units. A&S IQ: NSM BU: SCI

L41 Biol 112 First-Year Seminar: Introduction to Problem-Based Learning in Biology

In this course, students take responsibility for their own active, inquiry-based learning on biological problems. Instructors will guide small groups of four to six students in researching issues of biological importance using primary literature as their principal resource. Learning to read and interpret research articles from scientific literature is emphasized. Topics covered in this course

have included neurological disorders, infectious diseases, CRISPR, cancer, and stem cell therapy, among others. Students should have a strong background in general biology. They will be challenged to use critical and creative thinking in both independent and group work. Enrollment is limited. This course is intended for but not limited to prospective biology majors. Prerequisite: High school biology, preferably an honors or AP class. This course is for first-year, non-transfer students only. Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 1260 First-Year Seminar: The Secret Lives of Plants

This course is designed to familiarize undergraduate students with the fascinating lives of plants, their evolution, their remarkable structural and morphological diversity, how they grow, and how they have been modified to feed the planet. Topics include how plants can survive with just water, minerals and light; how they transport water astonishing distances; their unusual sex lives; why they make seeds; how they can grow nearly forever; how they survive extreme environments without running to hide; why they synthesize caffeine, nicotine, THC, and opiates; how they defend themselves from pathogens without an immune system; how they sense their environment without dedicated sensory organs; how they have been modified by humans to provide food, fiber, and fuel; and how genetically modified (GMO) crops are made and their implications related to the environment and society. The overall goals are to enhance students' understanding and appreciation of the plant kingdom, to help young scientists understand the primary scientific literature, and to serve as a starting point for possible careers in plant biology. Class includes field trips to the Missouri Botanical Gardens and to a local plant biotech company/institute. Where appropriate, the class will also emphasize key differences between plants and animals. This course is primarily for first-year students interested in majoring in biology, with a possible emphasis on plants. This course is also for those that want to know more about where their food comes from, how these amazing creatures survive and flourish, and how GMO crops are engineered. Upper-level students with an interest in food and sustainable agriculture but not necessarily focusing on plants will also be welcome. The course will have a lecture/discussion/hands-on format for two of the three hours per week. Students will present 20-minute papers discussing topics relevant to their interests for the remaining hour (two students per class). Prerequisites: Students must have taken both biology and chemistry in high school and at least one at the AP or IP level, or they must have taken Biol 2960 or Chem 111/112. This course can be taken by both first-year and upper-level undergraduates, with a preference given to first-year students.
Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 131 Biology in the News

Students explore a number of biology topics that are frequently discussed in the media. We begin with an investigation into how to evaluate scientific claims reported in written (e.g., news articles, blogs, social media posts), visual (e.g., YouTube videos, Instagram posts) and audio media (e.g., podcasts). We then explore the topics of genetic modification, GMOs, cloning, and direct-to-consumer home DNA testing kits. Finally, we investigate medical topics, including cancer, vaccines and antibiotic resistance. We emphasize critical thinking and reasoning as it applies to the acceptance or rejection of scientific

claims presented in popular media formats. This course is intended for students not majoring in biology and who would like to learn more about scientific topics portrayed in the media as controversial and under debate.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 144 Ampersand: The Biology of Cancer Part I

Cancer is the second-leading cause of death worldwide. In spite of focused research efforts, cancer still poses a unique biomedical puzzle as it is now recognized that cancer is not a single disease, but rather a collection of many disorders with underlying mechanistic complexities that can affect most tissues in the human body. This interactive first-semester course provides an introductory overview of the biology of human cancers. We touch upon background topics in DNA structure and replication, gene regulation and transcription, protein synthesis, mutations and DNA repair, but the primary focus is on the genetic and molecular changes that normal cells undergo during transformation into malignant tumors. Part I highlights the first three (of eight) central characteristics of cancer (known as the "hallmarks of cancer"): sustained proliferation, evasion of growth suppression, and replicative immortality. The course is a mix of lectures, student-led discussions/presentations, and activities. Lectures provide an overview of each topic, while activities and discussions of cutting-edge oncology topics in the news and primary literature familiarize students with current trends in cancer research as well as enhance reading and critical analysis skills. Students choose a specific topic/theme within the cancer paradigm for further study and near the end of the semester prepare a presentation to the class on the implications for cancer survivorship. Prerequisite: High school biology and chemistry; AP or Honors biology is highly recommended. Enrollment is limited to 20 students and restricted to first-year students in the "Hallmarks of Cancer & Patient Care" program.

Credit 4 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 1441 Ampersand: Frontiers in Cancer Research and Treatment

Cancer as a disease has touched countless people in every country and every lifestyle. Cancer is not one single disease; rather, it is a collective scourge of many underlying disorders. Over the years, biomedical research has led to a fuller understanding of cancer etiology and spawned new diagnostic and treatment strategies to better manage and treat this condition. More recently, the launch of the Precision Medicine Initiative by the National Cancer Institute has led to unprecedented insights into the cellular signaling pathways that drive the development and progression of cancer. Furthermore, the current onset of "omics" technology and high-throughput biological readouts has opened the possibility of precisely identifying molecular changes and affected metabolic pathways in individual cancers, paving the way for precision medicine and patient care. In this second semester, we will build upon our foundational understanding of cancer and explore recent and groundbreaking advances in cancer research and therapies. The course is driven largely by student-led presentations and discussions with a mix of faculty lectures and guest seminars. Students work in teams and take responsibility for their own active, inquiry-based learning by examining various cancer topics using primary literature as the principle resource. Learning to read, interpret, and assemble a presentation from scientific literature and biomedical research is emphasized. Student teams choose a hypothesis-driven topic of interest in the field of oncology for further study and, near the end of the

semester, prepare a written report and oral presentation to the class outlining its background, central hypothesis-driven question(s), experimental rationale/strategy, research data, scientific conclusion, and future direction. Prerequisite: BIOL 144. Enrollment is limited to students in the Hallmarks of Cancer & Patient Care program. Limited to 20 students.

Credit 3 units. A&S: AMP A&S IQ: NSM BU: SCI

L41 Biol 1500 First-Year Opportunity: Molecular Biology of Genetic Disease

This course is for first-year, non-transfer students only. Students gain a fluency in biological language, methods, and reasoning as applied to human health. We study the molecular, cellular, and physiological perspectives for each health-related topic, and examine data and methods that support this knowledge. We emphasize problem-solving and reasoning as it applies to understanding biological processes. The content and problem-solving work are designed to help students prepare for Biology 2960, which is offered each spring semester. Intended for students without strong AP Biology preparation, which is helpful for success in Biology 2960

Credit 2 units. A&S IQ: NSM

L41 Biol 171 First-Year Opportunity: Neuroscience Futures I: How Do We Learn About the Brain?

In this seminar course for first-year students, students learn about how neurobiologists conduct and communicate research. We focus our discussion on primary research papers written by neurobiologists. Discussion then focuses on the formulation of scientific questions, evaluation of evidence, and interpreting data within the context of a broader field. Course is for first-year, non-transfer students only. Must be taken credit/no credit.

Credit 1 unit. A&S: FYO Arch: NSM Art: NSM

L41 Biol 1770 First-Year Opportunity: The Biology of Dog Breeds

This freshman seminar uses the topic of dog behavior and genetics to teach fundamental scientific tools and to engage students in contributing to the building of an online public resource that summarizes the scientific literature on breeds. Our first task is learning to read and dissect primary scientific literature. We parse out the difference between scientific questions, hypotheses, and predictions through a guided case-study exercise. We then apply the experience to outlining primary research articles, identifying the key components of the author's arguments, and summarizing the results and implications. The second half of the semester is spent searching the scientific literature, sorting information into the new dog breed resource, and presenting results to peers around the seminar table. Course is for first-year, non-transfer students only.

Credit 2 units. A&S: FYO A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 1771 Special Topics in Biology: Plant-Microbe Interactions

Microbial organisms play very important roles in the lives of plants and animals. For example, in nature as well as in agricultural settings, the communities of microorganisms that grow near or on plants influence the growth and overall health of these plants. These plant-associated microbial communities are highly complex, and they are comprised of thousands of different species, including bacteria and fungi. However, neither the role of individual microbial species within the larger microbial community nor how such a community is beneficial to plants

is well understood. Each year, students in this course explore a different topic related to interactions between plants and their associated microbes. During the 2020-21 academic year, our research will focus on virulence mechanisms used by the plant pathogen *Pseudomonas syringae* to promote disease in plants. Recent research in the Kunkel lab has revealed that the plant hormone auxin promotes disease development in interactions between *P. syringae* strain PtoDC3000 and one of its host, *Arabidopsis thaliana*, a weedy plant in the mustard family. Auxin acts through at least two different mechanisms to promote disease: 1) suppressing defense responses in the plant and 2) regulating gene expression in the pathogen. We will investigate this second activity by screening for and characterizing PtoDC3000 mutants that do not properly respond to auxin. Students will spend two hours per week in the lab carrying out bacteriological and molecular biology experiments. Over the course of the semester, students will be exposed to a variety of fundamental topics in biology, including bacteriology, plant growth and development, pathogenic plant-microbe interactions, and key concepts in genetics, molecular biology and biochemistry. The students will also meet with Dr. Kunkel for one hour per week to discuss a variety of topics chosen to explore, including 1) basic concepts in chemistry, biochemistry, and molecular biology; 2) learning and study strategies; and 3) other topics related to thriving at Washington University. This is a research-based laboratory course offered by Dr. Barbara Kunkel in the Department of Biology. The small class size and laboratory setting of the course is intended to foster the development of student-professor mentoring relationships. The weekly time commitment involves two hours in the lab and one hour of discussion. Class size is limited to four students. Prerequisite: Permission of instructor.
Credit 1 unit.

L41 Biol 1772 Special Topics in Biology: Plant-Microbe Interactions

This is a research-based laboratory course offered by Dr. Barbara Kunkel in the Biology Department. The small class size and laboratory setting of the course is intended to foster development of student-professor mentoring relationships. Time commitment (weekly): 2 hours in lab, 1 hour of discussion (1 unit, P/F). Class size: 4 students Prerequisite: Permission of Instructor Research Question. Microbial organisms play very important roles in the lives of plants and animals. For example, in nature as well as in agricultural settings, the communities of microorganisms that grow near or on plants influence the growth and overall health of these plants. These plant-associated microbial communities are highly complex, and are comprised of thousands of different species, including bacteria and fungi. However, neither the role of individual microbial species within the larger microbial community, nor how such a community is beneficial to plants, is well understood. Each year the students in Bio1771 explore a different topic related to interactions between plants and their associated microbes. During the 2020/2021 academic year our research will focus on virulence mechanisms used by the plant pathogen *Pseudomonas syringae* to promote disease in plants. Recent research in the Kunkel lab has revealed that the plant hormone auxin promotes disease development in interactions between *P. syringae* strain PtoDC3000 and one of its host, *Arabidopsis thaliana*, a weedy plant in the mustard family. Auxin acts through at least two different mechanisms to promote disease, including 1) suppressing defense responses in the plant and 2) regulating gene expression in the pathogen. We will investigate this second activity by screening for and characterizing PtoDC3000 mutants that do not properly respond to auxin. Students will

spend two hours per week in lab carrying out bacteriological and molecular biology experiments. Over the course of the semester, students will be exposed to a variety of fundamental topics in biology, including: bacteriology, plant growth and development, pathogenic plant-microbe interactions, and key concepts in genetics, molecular biology and biochemistry. The students will also meet with Dr. Kunkel for one hour per week to discuss a variety of topics chosen to explore: i) basic concepts in chemistry, biochemistry and molecular biology, ii) learning and study strategies, and iii) other topics related to thriving at WUSTL.

Credit 1 unit.

L41 Biol 181 First-Year Opportunity: Introduction to Cutting-Edge Research in Biology

A lecture course intended for first-year students that focuses on the practice and culture of biological research. Active researchers describe the biological context of their research, the specific questions they have formulated, the means by which they pursue the answers, and their data and conclusions. The focus is on process: how biologists pursue their profession, what goes on in a research setting. Additional topics of clinical and contemporary interest are often included. Students are expected to attend all lectures. Enrollment is restricted to first-year, non-transfer students.. Must be taken Credit/No Credit.

Credit 1 unit. A&S: FYO A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 1811 First-Year Opportunity: Research and Conservation in Zoos and Botanical Gardens

An introduction to the world of zoos and botanical gardens. Students will learn of the diverse and cutting-edge ways in which scientists and conservationists study the world's biological diversity and work to conserve it. Taking advantage of two world-class institutions a short distance from the Danforth Campus, the class will meet every week at an off-campus site (primarily the Saint Louis Zoo and Missouri Botanical Garden, but also several other institutions) to hear lectures from leading authorities at these institutions and to tour facilities to see first-hand how research is conducted and how these institutions work to preserve endangered species. Students will write three short papers; each paper will be based on a class lecture and its associated readings. Must be taken credit/no credit. Course is for first-year, non-transfer students only.

Credit 2 units. A&S: FYO A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 191 Ampersand: Phage Hunters

This is a research-based laboratory course for first-year students. Students join a national experiment organized by HHMI, with the goal of isolating and characterizing bacteriophage viruses found in the soil in the St. Louis area. Laboratory work includes isolation and purification of the student's own phage, DNA isolation and restriction mapping, and EM characterization of the phage. Several Washington University phages are selected for genome sequencing over winter break and then annotated in the spring in Biol 192 Phage Bioinformatics. Students who successfully isolate and annotate a phage may become co-authors on a scientific paper. Prerequisites: High school courses in biology and chemistry, with at least one at the AP or International Baccalaureate level, and permission of instructor. This course involves one hour of lecture, one hour of discussion, and three hours in the lab per week; it is for first-year students in the Phage Hunters Program only.

Same as L61 FYP 1910

Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM
BU: SCI

L41 Biol 192 Ampersand: Phage Bioinformatics

This is a research-based laboratory class for freshmen. Students join a national experiment organized by HHMI, with the goal of genomic characterization of a local phage. Laboratory work focuses on learning computer-based tools for genome analysis followed by annotation and comparative analysis of the genome of a phage (bacterial virus) that was isolated during the fall semester at Washington University and sequenced over winter break. Prerequisites: high school courses in biology, chemistry, and physics (at least one at the AP or International Baccalaureate level); permission of the instructor. Limited to 40 students; preference given to those completing Biol 191 Phage Hunters. One hour lecture, one hour discussion, and three hours lab per week.

Same as L61 FYP 1920

Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM
BU: SCI

L41 Biol 200 Introduction to Research

This is an introduction to laboratory and field research in biology for first- and second-year students. Students work under the supervision of a mentor in a setting of established, ongoing research. Prerequisites: less than 60 units completed; permission of mentor and the department. For online enrollment instructions, visit the Bio 200/500 webpage (https://pages.wustl.edu/Bio_200-500_independent_research/register/). Students are registered by the department after approval is granted. Registration may not appear in WebSTAC until mid-semester. Credit/no credit only.

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 200N Introduction to Research in Neuroscience

This course provides an introduction to research in neuroscience under the supervision of a faculty mentor. Students work under the supervision of a mentor in a setting of established, ongoing research. Prerequisite: less than 60 units completed and permission of the mentor and the department. For online enrollment instructions, visit <https://sites.wustl.edu/bio200500independentresearch/>. Students are registered by the department after approval is granted. Registration may not appear in WebSTAC until mid-semester. Credit/No credit only. Course may not be taken for a letter grade.

Credit variable, maximum 3 units.

L41 Biol 200S Summer Introduction to Research

Summer research under the supervision of a faculty mentor. Prerequisites: first-year or sophomore standing and permission of mentor and the department. Credit to be determined in each case, usually 3 units/summer; may be repeated for credit during different summers. Credits are received during the fall semester after the summer research. The application deadline and registration information can be found on the Bio 200/500 course website (https://pages.wustl.edu/Bio_200-500_independent_research/). Credit/no credit only. Credit variable, maximum 3 units. A&S IQ: NSM

L41 Biol 200U Summer Introduction to Research in Neuroscience

Summer research in neuroscience under the supervision of a faculty mentor. Prerequisites: first-year or sophomore standing and permission of the mentor and the department. Credit to be determined in each case, usually 3 units/summer. Course may be repeated for credit in different summers. Credits are received in the fall semester following the summer research. The application deadline and registration information can be found on the Biol 200/500 course website: <https://sites.wustl.edu/bio200500independentresearch>. Credit/no credit. Course may not be taken for a letter grade.

Credit variable, maximum 3 units.

L41 Biol 2010 Ampersand: The Science of Biotechnology

Biotechnology is truly interdisciplinary, incorporating a myriad of pieces from biology, chemistry, engineering, physics, computer sciences, management, public policy, and law that apply the scientific process to societal challenges. This course introduces topics for science and engineering majors with an interest in biotech, and it teaches scientific concepts to business students considering careers in biotech management and entrepreneurship. Students who complete Biol 2010 understand key science concepts, how discoveries lead to applications addressing global challenges, how to effectively use a variety of resources to explore connections between science and biotech business, how to synthesize information from different fields, and how to exhibit strong teamwork skills and communicate information in written and oral forms. This course also provides a gateway for students interested in the two-year Biotech Explorers Program. The first two weeks of the course introduce students to the history of biotechnology, the Biotech Explorers Program, and the use of case studies. The remainder of the course uses a series of four three-week units that combine lecture material, in-class group assignments, and readings to introduce the science and scope of biotechnology. For each unit, student teams also develop short case studies of St. Louis biotech companies and present their findings to the class. A series of site visits introduce students to the vibrant St. Louis biotech community. This course is for students in the Biotech Explorers Program only.

Credit 3 units. A&S: AMP A&S IQ: NSM BU: SCI

L41 Biol 2020 Ampersand: Biotechnology Entrepreneurs Seminar

Although the biotech industry is science-based, the risks of product and technology development, legal issues, and market pressures make the landscape full of uncertainty. Lectures and textbooks fall short of delivering true insight about the process and challenges of bringing ideas to real-world products. This second semester freshman seminar course is designed to develop an appreciation of how biotech companies achieve their goals by engaging students through interactions with experienced executives and entrepreneurs, whose shared knowledge and stories add depth and context to the learning process. This 1-credit seminar course introduces students to the basics of innovation and entrepreneurship as a framework for marketable discoveries, builds an appreciation of how biotech companies start, obtain funding, and navigate intellectual property, provides an overview of career options in biotech, and insight on the hiring process. Prerequisites: Students need to have completed Biol 2010: The Science of Biotechnology for enrollment in this course and be currently enrolled in Biol 2960: Principles of Biology I. Limited to 20 students.

Credit 1 unit. A&S: FYS

L41 Biol 2111 Nutrition

This introductory course examines nutrition as an interdisciplinary science. Topics include the chemistry, function, and metabolism of nutrients; regulations of food intake; food habits; digestion and absorption of nutrients; methods of determining the nutrient content of foods and nutrient requirements for humans and animals; comparative nutrition; problems of human malnutrition; relation of nutrition to disease; toxic materials in foodstuffs; economic, nutritional, and social problems involved in feeding the world population; and future possibilities for meeting nutritional needs of the world's population.

Credit 3 units. A&S IQ: NSM BU: SCI

L41 Biol 212 uSTAR Seminar

This seminar course is designed for students who are part of the uSTAR Program at Washington University. The course will provide a formal setting to guide this population into becoming successful researchers in the academic community, with an additional goal of increasing their PhD pursuits. Students in the course will be exposed to scholarly discussions through student-selected journal readings. The course will discuss the different approaches taken to scientific inquiry and the dissemination of knowledge, in addition to the topic of integrity in research and important ethical issues that impact scientific investigation. Students will be exposed to topics relating not only to their area of study but to that of their peers as well. Student presentations on both scholarly journal readings and their own research will enable them to develop the ability to effectively communicate research to a broad audience. From this course, the uSTAR students will develop the skills to read, understand and critically evaluate publications, and they will build a broad understanding of research in multiple fields within the natural sciences. Students will also come away with a greater understanding of the ethical issues that face the scientific community on a daily basis.

Credit 1 unit.

L41 Biol 2431 Ampersand: Pathfinder - A Sense of Place: Discovering Missouri's Natural Heritage

This is the first course in the Pathfinder program, and it will introduce students to their new home for the next four years. This interdisciplinary course will cover Missouri geology, climate, archaeology, and native megafauna. We will explore many of the habitats found in Missouri (prairie, forest, glade, and stream) and the biology of our diverse plant and animal wildlife (arthropods, mollusks, fish, salamanders, lizards, birds, and mammals). This will provide a foundation that will inform the study of ecology, policy and management in other courses. In addition to weekly lectures and discussions, students in this course will visit sites across the state during three weekend camping trips and two one-day trips. Attendance on field trips is an essential component of the course. Course enrollment is open only to students admitted into the Pathfinder Fellowship program.

Same as L61 FYP 121

Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 244 Ampersand: The Oncology Healthcare Team

It's news no one wants to hear: "You have cancer." A cancer diagnosis can be overwhelming. The physical and emotional effects that come with this disease and its treatment can be significant. People often need the experience and skills of several different medical specialists to navigate and treat cancer. The various medical professionals involved in cancer care make up the oncology healthcare team. In this third-semester course, we will partner with Siteman Cancer Center and its affiliates to explore the multitude of professions that constitute the oncology healthcare team. In bi-weekly rotations, students will be introduced to various aspects of cancer-patient care and treatment through members of the oncology healthcare team, including oncologists, pathologists, surgeons, clinical geneticists, nurses, psychologists, and public health professionals. The course is a mix of guest lectures, discussions, site visits, activities, and shadowing healthcare professionals. Students will reflect on their experiences in weekly journal entries and must submit a final reflection paper that is due at the end of the semester, synthesizing semester experiences with core competencies for individuals desiring to enter a health profession. Prerequisites: Biol 144 and Biol 1441. Enrollment is limited to students in the "Hallmarks of Cancer & Patient Care" program.

Credit 2 units. A&S IQ: NSM

L41 Biol 265 Experience in the Life Sciences

Earn credit for non-classroom learning in the life sciences in a variety of activities arranged by the student: for example, students may accompany a Washington University faculty physician on rounds and prepare a paper on an organ system or disease, participate in a clinical or applied ecological study and report on it, or participate in science outreach teaching. Participants must meet regularly with a supervisor and commit at least 140 hours over two semesters. A work plan is approved prior to registration. A progress report is due after one semester, and a final paper is due after two semesters. This course does not count toward the major. Students are registered by the department after approval is granted. Credit/no credit only.

Credit 1.5 units.

L41 Biol 2651 MedPrep I: The Lecture Series

This is a unique lecture series taught by a physician, a former medical school course master, and a member of the Committee on Admissions for the School of Medicine. Through a weekly two-hour lecture, this course gives students accurate, honest, and detailed information regarding every step of the medical school application and admissions process, the entire educational process (including medical school and residency training), and the pros and cons of life as a physician. MedPrep I is particularly useful for first-year students and sophomores in that it reviews the common pitfalls encountered by unsuccessful applicants to medical school and outlines the steps to take in each year of college to be a successful applicant when the time comes. There is no outside course work and no exams. Attendance at all classes is required. There is a \$10 course fee used for guest speaker stipends, guest speaker travel to St. Louis, audiovisual needs, and other course-related items. For more information, please see the MedPrep website: medprep.wustl.edu.

Credit 1 unit.

L41 Biol 2652 Pediatric Emergency Medicine Research

Associates Program: Experiences in Life Sciences

The Pediatric Emergency Medicine Research Associates Program (PEMRAP) offers undergraduate premedical students an opportunity to participate in clinical, patient-oriented research projects in a hospital setting. Students have the opportunity to work in the St. Louis Children's Hospital Emergency Department, a nationally recognized pediatric emergency medicine and trauma care facility. A number of research projects are currently underway in various areas of pediatric emergency medicine. Research Associates are expected to work two four-hour shifts per week in the St. Louis Children's Hospital Emergency Department and to attend a weekly two-hour lecture. Lectures are given by Emergency Department faculty members. This program offers students the unique opportunity to be a vital part of the Emergency Department research team. In addition, students' experiences in this course may help them to determine if medicine is truly the career path they wish to pursue. Prerequisite: Sophomore level or higher, and permission of Instructor. Registration is done through this website: <http://pediatrics.wustl.edu/pemrap>. This course may not be taken concurrently with Biol 2654 MedPrep II. Credit 3 units.

L41 Biol 2654 MedPrep II - The Shadowing Experience: Emergency Medicine

This course offers students a real-world, behind-the-scenes experience of a life in medicine. For three hours every other week, students shadow physicians in the Charles F. Knight Emergency and Trauma Center of Barnes-Jewish Hospital, the main teaching hospital of the Washington University School of Medicine. In addition to the shadowing, there is a required class session each week. Because of the orientation material presented, excused absences will not be granted for the first two sessions for any reason whatsoever, including illness or emergency. There is no outside course work and no exams. There is a \$25 course fee for a MedPrep shirt and other course-related items (e.g., audiovisual materials), and HIPAA training and PPD testing are required. For more information and to register for this course, interested students should visit the MedPrep website at medprep.wustl.edu. Registration is done through the website, not through WebSTAC. Prerequisites: Biol 2651 and sophomore standing or above. During the summer semester, students may take Biol 2651 and Biol 2654 concurrently. Credit 1 unit.

L41 Biol 2656 Introduction to Health Professions: Audiology, Occupational Therapy, Pharmacy, and Physical Therapy

This course provides students interested in health professions with an overview of occupational therapy, physical therapy, audiology, and pharmacy. Students gain a better understanding of the scope of practice, markets, and skills required to succeed in these professions. Students learn about graduate and professional education options and how to build a competitive application for these programs. Finally, students participate in self-directed learning experiences (which may include in-person or virtual shadowing, attending professional presentations, meeting with health care professionals or graduate students, or sitting in on graduate-level classes) and culminate their study

with an inter-professional education session with a panel of faculty from the different health professions. Students finish the course with a better understanding of whether a career in health professions is right for them.

Credit 1 unit.

L41 Biol 2658 Pediatric Emergency Medicine Research Associates Program: Experiences in Life Sciences (PEMRAP II)

PEMRAP II is a continuation of Biol 2652 Pediatric Emergency Medicine Research Associates Program: Experiences in Life Sciences. Returning PEMRAP Research Associates (RAs) actively participate in new and ongoing research projects in various areas of pediatric emergency medicine. RAs assist during the active period of patient enrollment through screening of Emergency Department (ED) patients for study eligibility, reading information about the studies to the patients, collecting data regarding patient history and certain physical examination findings, and generally facilitating the study enrollment process. PEMRAP Returning RAs are vital members of the ED research team in the St. Louis Children's Hospital Emergency Department. Returning RAs assist in training and mentoring incoming PEMRAP students (Biol 2652) in ED protocol, work approximately one four-hour shift per week in the ED, record shift activities and hours worked on a daily Shift Log form, and participate in the physician shadowing program (as offered). Returning RAs are responsible for meeting hospital non-apointee requirements and staying current with new study protocols by attending or viewing new study presentations for PEMRAP students. These lectures are given by Pediatric Department faculty members to introduce the basics of the clinical research process, specific studies, and pediatric illness. The RA position carries with it important responsibility requiring maturity, initiative, diligence, and excellent interpersonal skills. There is no outside course work and no exams. Full participation is required. 45 shift hours = 1 credit. Students may repeat this course for a maximum of 6 credits. Course may not be taken concurrently with Biol 2651, Biol 2652, or Biol 2654. Enrollment with permission of instructor. Prerequisite: Biol 2652 (PEMRAP I). Pass/fail, 1 to 2 units per semester. Credit variable, maximum 2 units.

L41 Biol 265S Summer Experiences in Life Sciences

Earn credit for clinical research and other non-classroom learning in the life sciences during the summer. The variety of activities arranged by the student with their WashU faculty mentor have included but are not limited to: participation in clinical research or applied ecological research and report on it; shadow a physician on rounds or in clinic; prepare a paper on an organ system or disease; participate in science outreach teaching, etc. Participants must meet regularly with the faculty mentor or designee and commit to at least 140 hours over two semesters. An application is required each semester which includes a work plan, that must be approved prior to registration. A semester Summary Report is due after one semester and a Final Summary Report after two semesters. Bio 265 does not count toward the Biology major/minor. Credit: 1.5 units per semester, contingent upon completion of two semesters. For more information and to access the application, please go to: <https://sites.wustl.edu/bio265/>. Students are registered by the Biology department after faculty mentor and course master approval is granted. Summer Application Deadline - First Friday of June. Credit/No Credit only. Credit variable, maximum 1.5 units.

L41 Biol 2950 Introduction to Environmental Biology

Introduction to Environmental Biology is designed to teach important principles of environmental biology and general science literacy skills. We cover the foundational biological principles and contemporary issues within four main topics: human population growth, transfer of energy and carbon in the ecosystem, biodiversity, and food production. We focus on the biological principles involved as we examine these topics in the context of some contentious and confusing issues related to environmental biology in everyday life. The science literacy skills that you master in this course will help you address the issues you face in your everyday life regarding scientific and pseudoscientific claims about the environment and society and will form the foundation for your development as a critical consumer of science information in the media. This course is required for all environmental biology majors and environmental studies minors. We recommend you take this course in your first- or second-year if possible. If your interests align and your schedule allows, we recommend co-enrolling in EnSt 215: Introduction to Environmental Humanities.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 2960 Principles of Biology I

This course is an introduction to biological molecules and biochemical strategies employed by the three domains of life. The flow of genetic information within cells is discussed in the context of cellular structure, organization, and function. The investigation and manipulation of genetic information by molecular genetic technologies, such as recombinant DNA, forms the final phase of the course. Labs reinforce concepts from lectures and explore common laboratory techniques and computer-based resources. Prerequisites: Chem 111 and Chem 112 (concurrently).

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 2970 Principles of Biology II

A broad overview of genetics, including Mendelian assortment, linkage, chromosomal aberrations, variations in chromosome number, mutation, developmental genetics, quantitative genetics, population genetics, mechanisms of evolution, and phylogenetics. Three lecture/problem solving sections and one laboratory period per week. Does not fulfill the laboratory requirement of the biology major. Prerequisite: Biol 2960 or permission of instructor. This course must be taken for a grade to count toward the Biology major.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3010 Biotechnology Project

This second-year Biotech Explorers Pathway (BEP) course introduces students to the process used to generate project ideas, write proposals, and evaluate concepts, with peer evaluation applied at all steps of the process. Students completing Biol 3010 will gain experience in science proposal writing with peer review, public speaking, team building, and leadership training. The first four weeks of the course will focus on individual pre-proposal brainstorming, writing, and pitching, while the remainder of the course will be dedicated to the development of full proposals by teams of students. This 3-credit project development course complements introductory courses by making connections between fields and building teams of students with experience in the process that nurtures ideas to products. Prerequisites: Biol 2010 and Biol 2020. Writing intensive. Limited to 20 students.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

L41 Biol 303A Human Biology

How did Elvis, Socrates and Babe Ruth die? How did David Letterman and Dick Cheney survive? In this course we work toward understanding the biology behind human health and disease. We examine cases from the news, literature and history. We work like detectives to understand how and why the characters were affected and healed or died. This course is designed for students who do not plan to major in science, and no prior science background is expected. Prerequisite: sophomore standing or permission of instructor. A student may not receive credit for both Biol 303A and Biol 100A, 2960, 2970, or UCollege B320, B3201, B321, B3211.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3041 Plant Biology and Genetic Engineering

A 4-credit lecture course that provides an introduction to plant development, genetics, physiology and biochemistry with emphasis on processes that can be manipulated or better understood through genetic engineering. The course is divided into three sections. The first section of the course discusses basic plant biology, development and genetics. The second part emphasizes gene structure, expression and cloning as well as methods for introducing foreign DNA into plant cells and regenerating fertile plants in tissue culture. During the third part of the course we discuss a variety of examples of genetically engineered traits, including: herbicide resistance; fruit ripening; pathogen and/or insect resistance; and the use of plants for production of industrial and pharmaceutical compounds. Friday discussion sections focus on critical reading of the primary literature related to the material covered in lecture. Prerequisites: Biol 2960 and Biol 2970.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3058 Physiological Control Systems

Systems physiology with emphasis on human physiology. Prerequisites: Biol 2960 and Chem 112A.

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 307A Human Variation

A survey of human biological diversity, considering its adaptive and taxonomic significance from the perspective of origins and distribution of traits and adaptation. Prerequisite: Anthro 150A or introductory biology.

Same as L48 Anthro 307A

Credit 3 units. A&S IQ: NSM, AN, SD Arch: NSM Art: NSM BU: SCI

L41 Biol 3100 R Workshop in Biology

Biologists in all areas increasingly find that they have the need and opportunity to work with large data sets. The goal of this 1-credit course is to provide students with an opportunity to gain skills in data analysis and presentation using R, a free software environment for statistical computing and graphics (<https://www.r-project.org/>). Topics include an introduction to basic programming in R, data types and manipulation, graphics, hypothesis testing and statistics, and applications to various fields of biology ranging from ecology to genomics. The course consists of 10 two-hour workshops that include

a brief introduction to key concepts in R and applications in biology, followed by interactive, hands-on tutorials. Prerequisite: concurrent or prior course in statistics (Math 2200 or Math 3200) or permission of instructor.

Credit 1 unit.

L41 Biol 3110 Vertebrate Structure Laboratory

A lecture/laboratory course designed to provide an integrative framework for how vertebrate form and function evolved. Weekly lectures emphasize development and the relationship between the structural and functional design of organ systems, the importance of these relationships in maintaining homeostasis while providing opportunity for adaptation, and examples of how vertebrate organ systems communicate to accomplish functional and physiological integration. 1.5 hour lecture and 5 hours lab each week. Prerequisite: Biol 2970.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3151 Endocrinology

An overview of mammalian endocrine systems with an emphasis on human physiology and development. The interplay between systemic, local cell and tissue interactions as well as the cell and molecular events associated with hormone action are discussed. Examples of endocrine evolution and pathological conditions related to endocrine imbalances also are included. Prerequisite: Biol 2970.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3160 Beyond the Evidence

Why, when all evidence points to the growing threats of climate change, is it so difficult to create movement toward addressing this issue? Why, when we have so much evidence that vaccines reduce illness and death and are extremely safe, do individuals still choose not to vaccinate their children? What if I told you that the scientific evidence does not matter? Over the last few decades, neither better education, nor guilt, nor fear has worked to produce change on important environmental and public health issues. In this course, we will explore the different factors that contribute to the reasons why scientific evidence does not matter for the individual choices we make or policies we support. We will especially consider how values, beliefs, emotions, and identity shape how we process information and make decisions. We will examine how we might talk to one another in a way that might shift thinking or behavior as well as how we can create evidence-based policy. We will explore themes of worldview, cognitive linguistics and framing, cognitive dissonance, risk perception, empathy, habit changes, bumbles in messaging, and difficult dialoguing through the examples of climate change and vaccination. Course activities will consist of regular reading, some online research, reflective journaling at home, and engaging in conversation during class. This course is designed to target upper-level students in environmental majors and pre-health studies.

Same as L82 EnSt 316

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L41 Biol 3180 Domestication: The Evolution of Our Multispecies Family

This course explores the evolution of the plants, animals, and microbes in human-mediated ecosystems. We call these evolutionary relationships domestication and they are at the heart of humanity's successful adaptation to nearly every ecosystem on Earth. From our millennia-deep friendship with gregarious wolves, to corn's continental conquests, to 'the

industrial microbiome,' this course will ask how other species have evolved in response to human societies, and how societies have been shaped by these relationships. We will primarily draw on concepts and data from anthropology and evolutionary biology to understand the process of domestication.

Same as L48 Anthro 3180

Credit 3 units. A&S IQ: LCD, SSC BU: BA

L41 Biol 3220 Woody Plants of Missouri

Washington University's Danforth Campus is home to more than 4000 trees and is now a registered arboretum. This urban forest ecosystem has been carefully curated and managed to provide habitat diversity, shade, rainwater mitigation, and aesthetic beauty. In this course, students will study the biology of woody plants in the classroom and in our arboretum. Specifically, students will learn woody plant systematics, physiology, and ecology as well as applied and hands-on techniques. Students will learn to collect forestry data and to identify trees by leaf, bud, bark, fruit and crown. They will learn to plant, propagate, and care for trees and other woody plants. They will also contribute to the ongoing research in our arboretum and to the education of their peers and campus visitors by adding new trees to the arboretum collection and by monitoring the campus trees as they learn to collect data on growth and phenology. Students who successfully complete this course will be eligible to join the Danforth Arboretum "Loraxes" for the remainder of their time at Washington University. Loraxes will be arboretum ambassadors and will be called upon from time to time to lead tours of the arboretum for prospective students, science outreach, or members of the campus community. Prerequisite: Biol 2960.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 324 Human Genetics

This course offers broad coverage of the role of genetics in medicine, with a focus on the application of genomic technologies to the understanding of human disease. Areas covered include the identification of human disease genes, modern cytogenetics, risk assessment in pedigrees, biochemical genetics, imprinting, mitochondrial genetics, gene therapy, complex inheritance, assisted reproduction, prenatal diagnosis, immunity, cancer, and pharmacogenetics. The profound ethical and legal considerations raised by modern genetic technologies are also discussed.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 328 Principles in Human Physiology

This course is designed to provide students with an understanding of the function, regulation and integration of the major organ systems of the body. Course content includes neural and hormonal homeostatic mechanisms, and study of the circulatory, respiratory, digestive, urinary, musculoskeletal, nervous, endocrine, immune and reproductive organ systems. Mechanisms of exercise physiology are integrated throughout the course. Prerequisite: Biol 3058 or equivalent.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 334 Cell Biology

Eukaryotic cell structure and function viewed from the perspective of modern cell biology. Lectures cover such topics as membrane transport; endocytosis and secretion; intracellular trafficking; hormones and signal transduction; extracellular matrix and tissue formation; cytoskeleton and motility; and cell cycle, apoptosis and the cellular basis of disease. Prerequisite: Biol 2970.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3411 Principles of the Nervous System

This course will provide a broad introduction to neuroscience, starting at the level of cellular and molecular neuroscience and ultimately ending at systems and theoretical neuroscience, with emphasis on the organization of the mammalian central nervous system. Topics will include neuronal structure, the action potential, information transmission between neurons, sensory/motor systems, emotion, memory, disease, drugs, behavior, and network dynamics. A fundamental goal of this course is to provide students with the ability to approach complex problems using the scientific method and to understand the limits of knowledge. This course will also expose students to some of the neuroscience community at Washington University. Prerequisites: Biol 2960, Biol 2970 (recommended), Biol 3058 (recommended) or Psych 3401 and permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3421 Introduction to Neuroethology

The neural mechanisms of animal behavior from an evolutionary and ecological perspective. Topics include: contributions of model systems to understanding fundamental properties of nervous system structure and function; electrical signals of sensory cells, neurons and muscle; neural processing of sensory input; neural control of behavioral output; anatomy and physiology of sensory and motor systems; learning and memory; evolution of neural circuits. Prerequisite: one of the following courses: Biol 3058, Biol 3411 or Psych 3401.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3422 Genes, Brains and Behavior

Genetic studies of physiological systems underlying animal behavior, including the genetic basis for normal and abnormal behaviors in animals and humans. Topics include: history of behavioral genetics; the ongoing debate about "nature vs. nurture"; contributions of genetic model systems including the nematode *Caenorhabditis elegans*, the fruit fly *Drosophila melanogaster*, zebrafish, the mouse *Mus musculus* and other animal models; molecular mechanisms underlying the evolution of behavioral phenotypes; the emerging role of epigenetics in regulating nervous-system functions and behavior; the use of genetic and genomic analyses in studies of human behavior and psychiatric disorders. Prerequisite: Biol 2970.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3423 Behavioral Genetics Laboratory

This course introduces students to fundamental concepts of how genes govern behavior by using the model system *Drosophila melanogaster*. Students learn modern and classic laboratory techniques, including fly crossing, genetic screens, behavioral assays, microscopy, and electrophysiology. Specifically, we use the GAL4/UAS system to assess the role of microRNAs in a variety of fly behaviors. A primary goal of the course is to develop real-world research skills by having students design, propose, and execute a set of novel research questions. Statistical analysis and interpretation of student data are emphasized. To build a solid conceptual background, lectures are given once per week, and students read, analyze, and discuss primary research articles. Understanding is assessed through journal club reports and presentations, research reports, and a final presentation of experimental results. This course is designed for upper-level students who have taken Biol 2960 and Biol 2970.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 343A Plants, Environment and Civilization

Human life, health, and civilization depend on plants. This course introduces basic plant biology, the role of plants in natural ecosystems, and the various uses of plants in both traditional cultures and in developed countries. Topics include the medicinal uses of plants, domestication of plants for agriculture, biotechnology and plant conservation. Prerequisite: Junior standing or permission of instructor. Does not count toward upper-division credits required for the major. Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 347 Darwin and Evolutionary Controversies

This course's focus is on controversies in evolutionary biology from Darwin's day to the present. Most of the controversies concern scientific issues such as Kelvin's estimate of the age of the earth, Jenkin's argument against blending inheritance, neutral variations, effects of isolation on the role of selection, and mass extinction and "nemesis," but some address social issues such as evolutionary ethics and "scientific creationism." Emphasis in the readings is on primary sources, including Darwin's "Origin of Species." Writing intensive.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

L41 Biol 349 Microbiology

This 4-credit lecture course focuses on the molecular biology of bacteria, archaea and viruses. Topics include: the bacterial cell cycle, gene regulation, stress response, cell-cell communication, viral and bacterial pathogenesis, microbial ecology, and metabolic diversity. Friday tutorials stress analysis of the primary literature with an emphasis on current research related to material covered in lecture. Prerequisites: Biol 2960 and 2970, or permission of instructor.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3491 Microbiology Laboratory

After introducing students to the basics of bacterial growth and maintenance, this laboratory course employs microscopy, genetics, cell biology, and genomics to explore various aspects of bacterial physiology, structure, and identification. Students will present their findings throughout the semester in both written and oral formats. Roughly one hour of lecture and five hours of laboratory work are required per week. This course fulfills the upper-level laboratory requirement for the biology major. Prerequisite: Biol 2970. Biol 349 also recommended.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3492 Laboratory Experiments with Eukaryotic Microbes

This research-intensive course provides an introduction to diverse molecular and cell biology techniques used in model experimental organisms to explore fundamental biological questions. Experiments are performed using selected fungi and protozoans commonly used in major research efforts. Emphasis is placed on choosing the appropriate organism for the question posed using the most current technologies. Each semester, one cellular process is studied in detail and original research is carried out. Prerequisites: Biol 2960 and 2970 and permission of instructor — contact early to ensure enrollment. One hour of lecture and six hours of laboratory a week. Fulfills the upper-level laboratory requirement for the biology major. Enrollment limited to 12.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

L41 Biol 3493 Bacterial Bioprospecting and Biotechnology

Many bacteria are essential in food industry (fermentation of meats, cheeses and beverages), agriculture (crop protection against weeds, pathogenic bacteria, and fungi), biotechnology (producing fine chemicals, cofactors, amino acids, and industrial enzymes) and the pharmaceutical industry (producing clinical antibiotics, anticancer, antiviral, veterinary, and immunomodulatory drugs). This laboratory course examines how basic biological understanding can lead to discovery of bacterial products, enzymes and activities useful to humankind. We combine core concepts from biochemistry, bacterial genetics, bioinformatics, chemistry and enzymology to study bacteria from the genus *Streptomyces* and close relatives. Lines of inquiry include environmental isolations, molecular toolbox and host development, plus bioinformatic and laboratory-based analyses of secreted proteins and antibiotics. Prerequisites: Biol 2960 and 2970. One hour of lecture and six hours of laboratory per week. This course fulfills the laboratory requirement for the biology major. Enrollment limited to 16.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 3501 Evolution

A general survey of evolutionary biology covering both microevolution and macroevolution. Topics include natural selection, genetic drift, gene flow, sexual selection, kin selection, pathogen evolution, speciation, phylogenetics, molecular evolution, and evolutionary-developmental biology. Weekly discussion sections focus on the analysis of recent studies related to lecture topics. Prerequisite: Biol 2970.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 354 Physics of Living Systems

One of the grand challenges in contemporary biophysics is placing our understanding of cellular systems on a firm quantitative footing. How does the collective activity of molecules enable the cell to sense its environment, make decisions, grow and develop? This course, aimed at physical and life science students, will serve as an introduction to the physical principles and mathematical techniques underlying the analysis of systems and synthetic biology. Topics will include modeling gene and signaling networks, the regulation of intracellular structures, and pattern formation in development. Students in this course can expect to learn both analytical and computer simulation approaches to fundamental problems in biology, biophysics, and biotechnology. Graduate students will explore the subject in more depth. Pre-requisites: Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206. or Math 217 or Math 309, or permission of instructor. 3 units

Same as L31 Physics 354
Credit 3 units. A&S IQ: NSM Arch: NSM BU: SCI EN: BME T, TU

L41 Biol 360 Biophysics Laboratory

This laboratory course consists of "table-top" experiments in biological physics that are designed to introduce the student to concepts, methods, and biological model systems in biophysics. Most experiments combine experimentation with computer simulations. The list of available experiments includes electrophysiology, human bioelectricity, optical tweezers, ultrasonic imaging, mass spectrometer, and viscosity measurements. Prerequisites: Physics 191-192 or Phys 193-194 or Physics 197-198 or Phys 205-206 or permission of instructor. Same as L31 Physics 360

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L41 Biol 363 The Neuroscience of Movement: You Think, So You Can Dance?

Although humans have expressed themselves through movement throughout time, only recently have neurophysiological investigative techniques allowed us to glimpse the complex neural processes that allow the coordination and integration of thought, action, and perception. This course introduces students to the nascent yet growing field of dance neuroscience. In part one of this course, we explore fundamental concepts of motor control, including how our central nervous system integrates information to allow us to maintain posture and balance, to coordinate our limbs to external rhythms, and to move our bodies gracefully and expressively through space and time. In part two, we explore theoretical frameworks of motor learning as they pertain to movement. We delve into the neuromechanisms underlying common tools that dancers and athletes use to improve motor performance and how dance training induces neuroplasticity in brain structure and function. In part three, we explore the neural underpinnings of aesthetic appreciation while watching dance, including the action observation network and affective responses to art. Required work includes short assignments, a final project and presentation on a topic of your choice related to the course focus, and a few movement workshops (for which dance training is not required). Prerequisite: introductory course in dance, biology, or neuroscience, or permission from the instructor.

Same as L29 Dance 363

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 370 Animal Behavior

This course examines animal behavior from an evolutionary perspective and explores the relationships between animal behavior, ecology, and evolution. Topics include foraging behavior, mating systems, sexual selection, predator-prey relationships, cooperation and altruism, competition and parental care. A student may not receive credit for more than one of the courses Biol 370, Biol 372 and Biol 472. Prerequisite: Biol 2970 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 373W Laboratory on the Evolution of Animal Behavior (Writing Intensive)

This course explores the costs, benefits, and constraints that drive the evolution of animal behavior. It is divided into four modules that cover a range of common empirical and numerical tools in modern evolutionary biology (no prior experience in any of the following topics is necessary): (1) a brief overview of basic statistics and a tutorial in R; (2) an experimental lab on agonistic behavior in crickets; (3) a computer simulation lab on the evolution of animal communication; and (4) a phylogenetic comparative analysis lab exploring the topic of sexual selection. Laboratory modules are hands-on and student driven. They begin with an overview of relevant literature and a discussion of key questions that have been addressed experimentally in that field. Students are then encouraged (and guided) to apply these concepts to the design, execution, and analysis of individual and/or collaborative research projects. In the process, they learn how to apply some of the latest numerical and/or empirical research tools in evolutionary biology. A majority of class time is devoted to active learning through the collection and analysis of data (each lab module lasts four weeks). The course also includes

weekly presentations by the instructor and class discussions on topics that help place the students' work into the broader context of evolutionary theory. Prerequisites: Biol 2970 and Psych 100B or permission of instructor. This course is writing intensive. Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

L41 Biol 381 Introduction to Ecology

This course explores the central theories and principles in ecology and evolution as well as the use of these principles to study and predict human-induced environmental changes. It emphasizes understanding species interactions and population dynamics in biological communities, and the relationships between communities and their environment. It regularly touches on applications of these principles such as ecological responses to global climate change, consequences of habitat fragmentation, disease ecology, and conservation medicine. Principles of experimental design, quantitative data analysis and interpretation, and mathematical models are critical to the field of ecology, and they are also emphasized throughout the course. Class meetings will include lectures, class activities, computer simulation labs, and smaller group discussions to familiarize students with peer-reviewed journals, scientific writing, and current issues in ecology. Assignments include regular homework reading, occasional problem sets, participation in tutorials/discussions, and a small term-paper. Prerequisite: Biol 2970 or Biol 2950 or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 387 Undergraduate Teaching

Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/no credit only. Credit variable, maximum 3 units. A&S IQ: NSM

L41 Biol 388 Undergraduate Teaching

Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/No Credit only. Credit variable, maximum 3 units. A&S IQ: NSM Art: NSM

L41 Biol 3900 Science for Agriculture and Environmental Policy

Government policies at the local, state, and national levels determine and regulate activities that range from local farmers markets to U.S. membership in the Paris Climate Agreement. Science can and should play a critical role in developing policy. This course focuses on the biological science behind policies for climate change and agricultural practice as well as the role of various organizations in providing science for policy. Now is a particularly interesting time for science-based policy with the election of a new U.S. President and the elevation of the President's science advisor to Cabinet level. This course is divided into three parts. First, we review how policy is developed and how various agencies and actors affect policy. The next section looks at biological topics that have policy implications. These case studies are presented by expert speakers who

have had experience in various science-related roles in the federal government, foundations, professional associations, advisory organizations, and scientific publications. Finally, students conduct individual research projects on a science topic that affects current legislative efforts, either state or national. Students investigate the basic science of their chosen topic and how this could affect proposed legislation. As part of the research project, students give a class presentation, lead a class discussion, and write a term paper on the foundational biological science. The goals of this course are as follows: (1) to develop an understanding of how science is used to develop policy by examining case studies presented by experts; and (2) to critique a proposed science-based policy either at the state or federal level.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4023 How Plants Work: Physiology, Growth and Metabolism

This course introduces students to the fundamentals of how plants grow, metabolize and respond to their environment. Topics to be covered include the conversion of light energy into chemical energy through photosynthesis and carbon fixation, nitrogen assimilation, water and mineral uptake and transport, source-sink relationships and long-distance transport of carbon and nitrogen, cell growth and expansion, hormone physiology and physiological responses to a changing environment. Prerequisites: Biol 2960 and Biol 2970, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 4030 Biological Clocks

Biological clocks are the endogenous oscillators that coordinate physiological and behavioral rhythms in nearly all organisms. This course examines how these rhythms are generated and regulated. The material includes molecular, cellular and systems physiology and the relevance of biological timing to ecology and health in everything from protozoans to plants to people.

Credit 3 units. A&S IQ: NSM Art: NSM

L41 Biol 404 Laboratory of Neurophysiology

Neurophysiology is the study of living neurons. Students record electrical activity of cells to learn principles of the nervous system including sensory transduction and coding, intercellular communication and motor control. The course meets for 9 hours each week. Students may leave the lab for up to 2 hours. Prerequisites: Biol 3411 or Psych 4411 and permission of Student Coordinator, Erin Gerrity. Biol 3411 may be taken concurrently.

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L41 Biol 4071 Developmental Biology

An introduction to the molecular and cell biology of animal development. The course is divided into three broad sections: (1) an introduction to the major cell-cell signaling systems used during development and their study in model organisms; (2) molecular studies of early vertebrate development; and (3) the biology of stem cells. The focus is on molecular approaches applied to important model systems but framed in classical concepts. Prerequisites: Biol 2970 and Biol 334; a course in biochemistry is recommended. Small class.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4181 Population Genetics

An introduction to the basic principles of population and ecological genetics. Mechanisms of microevolutionary processes; integrated ecological and genetic approach to study the adaptive nature of the evolutionary process. Prerequisite: Biol 2970.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4182 Macroevolution

An advanced introduction to the study of macroevolutionary patterns and processes with emphasis on the systematic methodology employed. Topics: theories of classification, phylogenetic reconstruction, testing of historical hypotheses, hierarchy theory, adaptation, extinction, speciation, developmental mechanisms of organismal evolution, biogeography. Prerequisite: permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4183 Molecular Evolution

A rigorous introduction to the study of evolution at the molecular level. Topics include the origin, amount, distribution and significance of molecular genetic variation within species, and use of molecular data in systematics and in testing macroevolutionary hypotheses. Prerequisite: Biol 2970 or permission of instructor.

Credit 3 units. A&S IQ: NSM Art: NSM

L41 Biol 419 Community Ecology

Community ecology is an interdisciplinary field that bridges concepts in biodiversity science, biogeography, evolution, and conservation. This course provides an introduction to the study of pattern and process in ecological communities, with an emphasis on theoretical, statistical, and experimental approaches. Topics include ecological and evolutionary processes that create and maintain patterns of biodiversity; biodiversity and ecosystem function; island biogeography, metacommunity dynamics, niche and neutral theory; species interactions (competition, predation, food webs); species coexistence; and environmental change. The class format includes lectures, discussions, and computer labs focused on analysis, modeling, and presentation of ecological data using the statistical program R. Prerequisite: Biol 2970 (required), Biol 381 (recommended), or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4193 Experimental Ecology Laboratory

The goal of this course is to provide skills in the design, interpretation, and written presentation of ecological and evolutionary experiments, with emphasis on sampling methodology, hypothesis testing, and data analysis. A key objective of this course is to familiarize students with the importance of statistics and experimental design as unified tool, rather than two separate processes. We will practice how to abstract theories, hypotheses, predictions, mathematically, how to contrast them with data, and interpret the results. The course does not seek to be exhaustive of all experimental designs or statistical techniques, nor intensive in any given one. Rather, its focus is on providing the tools and concepts for the critical evaluation, choice, interpretation and further independent learning of the experimental and statistical tools needed for research. Practical analysis of data will be taught in program R, but no prior knowledge is required. During the course, students will plan and execute their own ecological studies, within the limitations of the current pandemic. This is a writing intensive

course and grades are based on written assignments, including final projects, and in-class participation. This course fulfills the upper-level laboratory requirement for the Biology major.

Prerequisites: Permission of instructor and at least one of the following: Bio Bio 3501, Bio 372, Bio 381, Bio 419, or Bio 472. Enrollment is limited to 10 students. Credit 4 units.

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L41 Biol 4195 Disease Ecology

Disease ecology is an interdisciplinary field that bridges concepts from fields including population ecology, community ecology, landscape ecology, and evolutionary biology. This course provides an introduction to the study of infectious diseases, with an emphasis on theoretical, experimental, and quantitative approaches. The course will integrate studies of infectious diseases from across disciplines including human epidemiology, veterinary medicine, wildlife epidemiology, plant pathology, parasitology, and ecology. Prerequisites: Biol 2970 required, Biol 381 recommended, or permission of instructor.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 4202 Anthropological Genetics

This course examines the principles of evolutionary genetics as applied to complex characters such as morphology, behavior, life history and disease. Mathematical models of quantitative inheritance and evolution are discussed. Special topics include kin selection, sexual dimorphism and conservation genetics. Prerequisite: Anthro 150A or introductory biology.

Same as L48 Anthro 4202

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4220 Practical Bioinformatics

From medicine to genomics to ecology, all fields of biology are now generating large and complex datasets that can only be analyzed using computational approaches. This course introduces computational techniques and perspectives to biologists that are new to computational thinking. Students will learn how to design research workflows, decompose complex problems into simpler solvable units, and apply scientific computing principles to research. In addition, students will practice foundational computing skills, such as using the UNIX operating system on research clusters, writing custom analysis programs with shell scripts and with Python, and summarizing and visualizing analysis output. The laboratory exercises build on one another, culminating in the construction of a bioinformatics pipeline that can process and analyze molecular data. Students will apply their newly learned computational skills and use their pipeline to analyze virus sequence evolution and explore evolutionary models. Prerequisites: Biol 2970; Math 132 (Calculus II); Math 223 (Calculus III) or Math 2200 (Elementary Probability); CSE 131 (Computer Science I; suggested course); permission of instructor. Credit/no credit.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 424 Immunology

Basic molecular and cellular aspects of the vertebrate immune system with emphasis upon the interrelationships of non-specific and specific host defense against disease, the nature of immunological specificity and its underlying molecular biology. Includes complement systems, immunochemistry, the nature of cellular activation and effector generation, immunodeficiency, tolerance, tissue transplantation, hypersensitivity, immune regulation and specific diseases illustrative of the successes and failures of the immune system. Case studies will be presented

by the students on an array of immune system disease.
Prerequisites: Biol 2970 and Chem 262. Interested Juniors in their second semester are particularly encouraged to register for this course.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4270 Problem Based Learning in Biomedical Sciences

Groups of 5-8 students are presented with medical case studies that are then researched and discussed under faculty guidance. Students take major responsibility for their own learning within their team. Prerequisite: Biol 2970; some experience in molecular biology. A biology or science background is required. Same content as discontinued course Biol 427, but not Writing Intensive. Not available to students who have credit for Biol 427.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 429 Cellular Transformations

Cellular Transformations is a course developed for students interested in using emerging technologies and cross-disciplinary approaches in design production and implementation. This course allows each student to develop abstract thinking and learn modern design and fabrication processes including digital media and 3D technologies. In this course, students learn the basic principles underlying biological architecture, with a particular emphasis on structures and processes responsible for complex architectures within cells. Students then use biological design principles as inspiration for their individual projects. Through digital modeling and scanning of biological structures, each student develops a transformation process that analyzes the performative aspects of a new emerging design. These designs are modeled through CAD/CAM (laser cutting) and Rapid Prototyping (3D Printing) for physical outputs. Prerequisites: Biol 2970 or Biol 334.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 4310 Biology of Aging

This course provides concepts and examples of the biology of aging. We discuss current literature with emphasis on theoretical causes of aging and the practical implications of these theories. Major topics include the biochemical processes of aging, cell cycle senescence, age-related organ dysfunction, interventions to alter the aging process, and medical illnesses associated with aging (e.g., Alzheimer's disease, the dementias). We also study animal and human models for extending longevity, and current approaches for dealing with the aging process are included. Prerequisites: Biol 2960 and Biol 2970 or equivalent; Chem 105 and Chem 106 or equivalent are recommended.

Credit 3 units. A&S IQ: NSM BU: SCI

L41 Biol 4342 Research Explorations in Genomics

A collaborative laboratory investigation of a problem in comparative genomics utilizing a variety of bioinformatics tools to manage and investigate large data sets (currently including genomic sequences, gene predictions, sequence conservation, and gene expression). In spring 2018, the research problem involved improving the sequence of a region of the *Drosophila eugracilis* genome and working with one of these sequences to examine patterns of genome organization, gene structure, and gene regulation. Prerequisites: Biol 297A, Chem 111/112, Chem 151/152. Although Biol 3371 or Biol 437 and some familiarity with computers would be advantageous, this is *not* required. Fulfills the upper-level laboratory requirement for the biology major.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 434W Research Explorations in Genomics (Writing Intensive)

Content equivalent to Biol 4342. Students electing the writing option are required to revise each of three papers (on finishing of their fosmid; gene finding in a human/chip comparison; and annotating their fosmid) at least once.

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L41 Biol 437 Laboratory on DNA Manipulation

This course provides investigation-driven research on the experimental manipulation of DNA and RNA molecules. This includes the construction, isolation, and analysis of plasmids, RNA, PCR products, and DNA sequencing. Molecular cloning (genetic engineering), gene knockouts (mutants), RNA isolation, RT-PCR, and microarray projects are performed. Prerequisites: Biol 2960 and Biol 2970. One hour of lecture and six hours of laboratory each week. This course fulfills the upper-level laboratory requirement for the biology major. Enrollment is limited to 12. A laboratory fee is required for students who are not full-time Washington University undergraduates.

Credit 4 units. A&S IQ: NSM Art: NSM

L41 Biol 4381 Cell-Based Tissue Engineering and Regenerative Medicine

This course focuses on how new directions in cellular, molecular and developmental biology are interfacing with advances in biomaterials tissue engineering, innovative devices, and advanced technologies (such as 3D printing and CRISPR) to replace, restore, and/or correct genetic, acquired, or damaged tissues and organs. Coverage includes the rapidly expanding use of types of stem cells and their preparation alone or in concert with biomaterial scaffolds, nanomaterials, and growth factors. Tissue engineered therapies for cancer, diabetes, autoimmune disorders and other conditions are reviewed. Examples of tissue engineering approaches for regeneration of nerves, cardiovascular, kidney, cartilage, bone, ligament, tendons, and skin are discussed in some detail. Regulatory issues, ethical guidelines, and commercial perspectives will be woven into our discussions. Prerequisites: Biol 2970, Biol 3058, Biol 334

Credit 3 units. A&S IQ: NSM

L41 Biol 4492 Infectious Diseases: History, Pathology, and Prevention

Leveraging the primary research literature, this course examines the history and pathology of infectious disease, the development of antibiotics and vaccines, the rise of antibiotic resistance, and the emergence and reemergence of diseases including Zika virus, malaria, and tuberculosis. In addition to gaining insights into the underlying causes and treatment of infectious disease, students will hone their ability to identify important biological questions, develop testable hypotheses, design experiments tailored to particular questions, and evaluate results. Through a series of written and oral assignments, students develop the skills to communicate about science effectively to both the research community and the general public. Prerequisites: One semester of Biol 500: Independent Research or equivalent is required. Preference will be given to students who have completed Biol 349 Fundamentals of Microbiology. Area A. Writing intensive.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

L41 Biol 451 General Biochemistry

A study of structure-function relationships as applied to carbohydrates, proteins, and lipids; intermediary metabolism of principal cellular components; and general aspects of regulation. Prerequisites: Biol 2970, Chem 262, and permission of department. Recommended for students who have achieved grades of B or better in the prerequisites. Students may not receive credit for both Biol 4801 and Biol 451.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 4522 Laboratory in Protein Analysis, Proteomics and Protein Structure

In this laboratory course, students learn principles and methods of protein quantitation, protein purification, assessment of purity using SDS-polyacrylamide gel electrophoresis, separation of complex protein mixtures by 2-dimensional gel electrophoresis, definition of units of enzymatic activity, and identification of proteins using antibodies and/or mass spectrometry. The final part of the course introduces students to concepts of structural biology including protein crystallization, X-ray crystallography and computer modeling of protein structures. Fulfills the upper-level laboratory requirement for the biology major. Prerequisites: Chem 252 and either Biol 451 or Biol 4501/Chem 456. Permission of instructor required. Limit: eight students. Eight hours of laboratory/lecture per week.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 4523 Molecular Methods in Enzyme Analysis

Understanding enzyme structure and function is essential for many important drug-design projects. This course focuses on common methods used to investigate enzyme active sites to elucidate binding interactions between small molecules and enzymes. Students use three-dimensional protein viewing software to design and model modifications to an enzyme active site, and they then perform those modifications using recombinant DNA technology and site-directed mutagenesis. This course also introduces other commonly used methods to assay active-site metals, characterize inhibitors, overexpress and purify proteins, and use ultraviolet spectroscopy to analyze enzyme activity. This is an investigative course in which students complete collaborative research projects in small groups. It fulfills the upper-level laboratory requirement for the generic biology major and the biochemistry track; intended for students who have no other courses that fulfill these requirements. Prerequisite: Biol 2970. Limit 12 students.

Credit 4 units. A&S IQ: NSM Arch: NSM BU: SCI

L41 Biol 4525 Structural Bioinformatics of Proteins (Writing Intensive)

In this investigative laboratory course, students will be given high-quality, experimentally determined, three-dimensional structural coordinates, and they will use cutting-edge bioinformatics tools and methods to evaluate and analyze these datasets. Some topics to be covered include structural validation, protein-structure prediction, domain and motif recognition, secondary structure prediction, protein-protein and protein-ligand interactions, protein and structure-based sequence alignments, inferring protein function from structure, electrostatic interactions, and threading and homology modeling. Upon completing their analyses, students will be responsible for writing a manuscript that will be submitted to a scientific journal for publication. Prerequisites: Biol 2960 and Chem 262. This course fulfills the upper-level laboratory requirement for the biology major.

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

L41 Biol 4540 Physics of Living Systems

Contents are the same as Phys 354. Graduate students will explore the subject in more depth. Pre-requisites: Prerequisite: Physics 191 - 192 or Phys 193 - 194 or Physics 197-198 or Phys 205 - 206. or Math 217 or Math 309, or permission of instructor. 3 units

Same as L31 Physics 454

Credit 3 units. A&S IQ: NSM Arch: NSM EN: TU

L41 Biol 4580 Principles of Human Anatomy and Development

This course will discuss the anatomy of most of the functional systems of the human body. Topics covered will include the peripheral nervous system, respiration, circulation, the skeletal system, the gastro-intestinal tract, the urogenital system, the male and female reproductive systems, locomotion, manipulation, mastication, vocalization, the visual system, the auditory system and the olfactory system. Selected topics in human embryology will also be introduced. The course provides valuable preparation for any student interested in human biology, anthropology, medicine or the health sciences.

Same as L48 Anthro 4581

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 4582 The Physiology and Biophysics of Consciousness

This course will explore the questions surrounding the search to understand the biophysical substrate of consciousness. Some areas to be explored include the following: (1) Can consciousness be addressed like any other biological property in the sense that it has evolved by natural selection and that some elements of it are present in simple model systems, such as the fruit fly? Can insight be gained studying simple model systems? (2) Where in the brain is consciousness? What is the pattern of neurological events that occurs during consciousness? Is the brain activity that generates consciousness localized or distributed? Does it involve interacting brain regions? Does the brain activity that generates consciousness migrate to different brain regions? (3) How does the dynamic core hypothesis of Edelman relate to these questions? What can functional brain imaging add to these questions? Are gamma waves involved in higher mental activity, and do they promote synchronized firing of neurons from different brain areas? How does this relate to the binding problem? (4) How does the brain's ability to function as a computer relate to consciousness? In many respects, the brain functions like a computer using electrical signals called *action potentials*. Action potentials in neuronal networks function in a way that is analogous to how DC electrical impulses function in computer circuits. What is the output of computation in an electrical device? What are the theoretical limitations regarding what computation can achieve? Does electrical activity in the brain have a fundamentally different purpose in addition to computation? (5) Is our knowledge of the physical world too primitive and incomplete for us to understand consciousness? The brain is an electronic device, and consciousness clearly depends on its electrical activity. However, electrical forces are poorly understood, both in the context of classical physics and quantum physics. Will understanding consciousness have to wait for a unified theory that more accurately describes electrical forces? Prerequisites: Biol 3411 or equivalent; college-level physics, some knowledge of computers.

Same as L64 PNP 402

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4715 Basic Cancer Biology

More than two thirds of all people know someone who has cancer. This course provides students with a more extensive understanding of what cancer is and how it affects the human body. We will discuss the history of cancer research, the many different types of human cancers, and basic chemotherapeutics. The topics will be presented in a basic scientific nature, with an emphasis on gaining a broad understanding of the subjects. Prerequisite: Biol 2960 or equivalent. Not available to students who have credit for Biol 144 or Biol 1440.

Credit 3 units. A&S IQ: NSM BU: SCI

L41 Biol 4716 Advanced Cancer Biology

This advanced course provides students with a more in-depth understanding of the molecular mechanisms of cancer. We will discuss tumor suppressors, oncogenes, signaling pathways, animal models in cancer, and novel targeted cancer therapies being developed by biotechnology and pharmaceutical companies. Prerequisite: Biol 144, Biol 1440 or Biol 4715.

Credit 3 units. A&S IQ: NSM BU: SCI

L41 Biol 472 Behavioral Ecology

This course examines animal behavior from an evolutionary perspective and explores the relationships between animal behavior, ecology and evolution. Topics include mating systems, sexual selection, parental care, kin selection, and cooperation. There is a strong active learning component. Prerequisite: Biol 2970 or permission of instructor.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4810 General Biochemistry I

The first part of a two-semester survey of biochemistry. This course covers biological structures, enzymes, membranes, energy production and an introduction to metabolism.

Prerequisites: Biol 2960 and Chem 262. Large class.

Same as L07 Chem 481

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4820 General Biochemistry II

This course is a continuation of General Biochemistry I. Topics include carbohydrate, lipid and amino acid metabolism; signal transduction; transport across membranes; DNA replication and repair; transcription and translation; molecular motors; mechanisms of drug action; and natural products biosynthesis. Prerequisite: Chem 481 or Biol 481.

Same as L07 Chem 482

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4830 Bioenergy

This course presents a broad overview of the flow of energy, captured from sunlight during photosynthesis, in biological systems, and it discusses the current approaches to utilize the metabolic potentials of microbes and plants to produce biofuels and other valuable chemical products. An overall emphasis is placed on the use of large-scale genomic, transcriptomic, and metabolomic datasets in biochemistry. The topics covered include photosynthesis; central metabolism; the structure and degradation of plant lignocellulose; and the microbial production of liquid alcohol, biodiesel, hydrogen, and other advanced fuels. Course meets during the second half of the spring semester. Prerequisite: Biol 4810 or permission of instructor.

Credit 2 units. A&S IQ: NSM Art: NSM

L41 Biol 4833 Protein Biochemistry

The focus of this course is protein biochemistry, and is intended to build upon General Biochemistry (Chem 481). In this course we will focus on protein structure, folding, and techniques to purify and characterize protein activity. We will progress from initial studies to first understand protein fold and function to current efforts to better characterize protein structure-function relationships. We will also highlight human diseases that are underpinned by protein misfolding. This course will focus on reading and understanding primary literature, including landmark papers along with more recent work. During the second half of the semester, each student will select a paper and prepare a written analysis of that paper. The student will then present the paper and lead a journal club style discussion of the paper. Prerequisites: Chem 481 or instructor's permission.

Same as L07 Chem 483

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 487 Undergraduate Teaching

Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/no credit only.

Credit variable, maximum 3 units.

L41 Biol 488 Undergraduate Teaching

Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/No Credit only.

Credit variable, maximum 3 units.

L41 Biol 493 Seminar in Advanced Biology

In special cases, credit may be given for individual study. Topics of study and credit must be arranged with a faculty sponsor and approved by the department.

Credit variable, maximum 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4933 Molecular Biology on the Cutting Edge

Recent biomedical discoveries have been greatly advanced through the development of innovative, state-of-the-art techniques. For example, Nuclear Magnetic Resonance (NMR) has proved to be an invaluable tool in both efforts to determine the atomic structure of proteins and small molecules, as well as in clinical settings, as MRI to identify tumors that would otherwise go unnoticed. This course introduces students to a variety of cutting-edge laboratory techniques, and discusses the impact of these techniques on biology and medicine. Students have the unique opportunity to learn from graduate students employing these approaches in their doctoral studies. Topics to be covered include: high-throughput sequencing of genetic disorders, x-ray crystallography, and single molecule force spectroscopy by AFM. Weekly classes consist of a 30-45 minute presentation

on a particular technique, followed by a 60-minute discussion of the assigned readings. Prerequisites: Biol 2960 and 2970 and at least one semester of Biol 500 or equivalent research experience approved by the course master.

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

L41 Biol 4934 Neuroscience Futures II

Students in this course engage with the neuroscience community both at Washington University and beyond by attending, summarizing and discussing neuroscience seminars on campus throughout the semester. Specifically, students are expected to attend three neuroscience seminars over the course of the semester and submit summaries of each seminar. Students meet twice during the semester, in week 5 and week 11, for guided discussion of the science in the seminars they attended. Additionally, students in this seminar attend two combined classes with Neuroscience Futures 1 during the first and last weeks of the semester. In both meetings, students have an opportunity to give brief presentations on their own research. The last class combines short student presentations with a keynote address from an invited speaker from within or outside the Washington University neuroscience community.

Credit 1 unit.

L41 Biol 4935 Research Perspectives

Critical reading, writing, statistics, and effective communication are all part of research and are the focus of this course, with topics changing each semester but always including a poster presentation and weekly writing. Enrollment is by permission of instructor.

Credit variable, maximum 2 units. A&S IQ: NSM

L41 Biol 4936 Seminars in Ecology and Evolution

What: At least once a week there are seminars from researchers in ecology or evolution. These seminars are given by local people and by visitors. This semester there are also a number of presentations by job candidates. The point of these seminars is to learn about exciting research. What questions are they asking? What are they discovering? What new scientific stories can we hear about ecology or evolution? What makes up these fields anyway? The seminars are often followed by receptions which are a chance to get to know each other better and to ask questions. This course invites undergraduates to listen to these presentations and write about them. After all, this is a major part of the ideas climate at WashU. It would be a great idea to get in the habit of going to seminars, with this course, or without. In addition to attending seminars, we will meet three times during the semester, early on and a couple of times later. When: Most seminars are at 4:00 on Thursdays, though some are on other days. The three meetings will be arranged at a time that works for the students in the course. Small class. No final.

Credit 1 unit.

L41 Biol 500 Independent Research

Research under the supervision of a faculty mentor.

Prerequisites: junior or senior standing and permission of mentor and the department. Credit/No Credit or Audit grade options; credit to be determined in each case, usually 3 units/semester and not to exceed 3 units/semester; may be repeated for credit. Because this course has a large number of sections, some sections are listed and enrolled as Bio 500A. If work is to be submitted for Latin honors, see p. 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program. The handbook can be found online at: <https://wustl.app.box.com/s/d63rx5o0kygqtsv899eyhax5v31gvy1a>.

wustl.app.box.com/s/d63rx5o0kygqtsv899eyhax5v31gvy1a.

Arrangements for registration should be completed during the preregistration period through the Bio 500 course website https://pages.wustl.edu/Bio_200-500_independent_research.

Credit variable, maximum 3 units.

L41 Biol 500A Independent Research

Research under the supervision of a faculty mentor.

Prerequisites: junior or senior standing and permission of mentor and the department. Credit/No Credit or Audit grade options; credit to be determined in each case, usually 3 units/semester and not to exceed 3 units/semester; may be repeated for credit. 500A is equivalent to Bio 500. If work is to be submitted for Latin honors, see p. 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program. The handbook can be found online at: <https://wustl.app.box.com/s/d63rx5o0kygqtsv899eyhax5v31gvy1a>. Arrangements for registration should be completed during the preregistration period through the Bio 500 course website: https://pages.wustl.edu/Bio_200-500_independent_research.

Credit variable, maximum 3 units.

L41 Biol 500N Independent Research in Neuroscience

Research in neuroscience under the supervision of a faculty mentor. Prerequisites: junior or senior standing and permission of mentor and the department. Credit/no credit or audit grade options; credit to be determined in each case, usually 3 units/semester and not to exceed 3 units/semester; may be repeated for credit. If work is to be submitted for Latin honors, see page 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program (PDF) (<https://wustl.app.box.com/s/2n0gj01opcwiovb6hs26yj1jfovW09lg/>). Arrangements for registration should be completed during the preregistration period through the Biol 500 course website (https://pages.wustl.edu/Bio_200-500_independent_research/).

Credit variable, maximum 3 units.

L41 Biol 500S Summer Independent Research

Summer research under the supervision of a faculty mentor.

Prerequisites: junior or senior standing and permission of mentor and the department. Credit to be determined in each case, usually 3 units/summer; may be repeated for credit in different summers. Because this course has a large number of sections, some sections are listed and enrolled as Bio 500T. Credits are received in the fall semester following the summer research. If work is to be submitted for Latin honors, see p. 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program. The handbook can be found online at: <https://wustl.app.box.com/s/d63rx5o0kygqtsv899eyhax5v31gvy1a>. Arrangements for registration should be completed no later than the end of Summer Session I through the Bio 500 course website: https://pages.wustl.edu/Bio_200-500_independent_research. Credit/No Credit or Audit grade options. Course may not be taken for a letter grade. 1-3 units

Credit variable, maximum 3 units.

L41 Biol 500U Summer Independent Research in Neuroscience

Summer research in neuroscience under the supervision of a faculty mentor. Prerequisites: junior or senior standing and permission of mentor and the department. Credit to be determined in each case, usually 3 units/summer; may be repeated for credit in different summers. Credits are received

in the fall semester following the summer research. If work is to be submitted for Latin honors, see page 3 of the Department of Biology Handbook for Majors, Latin Honors Through a Biology Major Program (PDF) (<https://wustl.app.box.com/s/2n0gj01opcwiobv6hs26yj1f0vw09lg/>). Arrangements for registration should be completed no later than the end of Summer Session I through the Biol 500 course website (https://pages.wustl.edu/Bio_200-500_independent_research/). Credit/no credit or audit grade options. Course may not be taken for a letter grade.

Credit variable, maximum 3 units.

L41 Biol 501 Human Anatomy & Development

Study of the human body primarily by dissection; extensive use of X-rays and CT scans. Emphasis on functional and clinical aspects of anatomy. Prerequisite: This course is restricted to first year medical students. Same as L48 Anthro 502 and M05 AnatNeuro 501A.

Credit 6 units.

L41 Biol 5011 Ethics & Research Science

Exploration of ethical issues which research scientists encounter in their professional activities. Topics will include, but are not limited to: student-mentor relationships, allegations of fraud, collaborators' rights and responsibilities, conflicts of interest, confidentiality, publications. Case study and scenario presentations will provide focus for discussions. Prerequisite, open to graduate students engaged in research. Six 90 minute sessions.

Credit 1 unit.

L41 Biol 5014 Biotech Industry Innovators

Late one Friday afternoon in April 1976, the late venture capitalist Robert Swanson met with biochemist Herb Boyer, PhD, at his UCSF lab. Swanson had requested 10 minutes of Boyer's time; when the meeting ended, three hours later, the foundations had been laid for the formation of Genentech, the first biotechnology company, and the beginnings of the biotechnology industry. This course, The Basics of Bio-Entrepreneurship, investigates issues and choices that inventor/scientists encounter when considering the applications and commercialization of early stage scientific discoveries. This course is intended for anyone interested in working in the medical device, life-, bio-, or pharma-sciences industries as a founder, scientist, entrepreneur, manager, consultant, or investor. It focuses on the decision processes and issues that researchers and their business partners face when considering how a discovery might best be moved from academia to successful commercialization.

Credit 3 units.

L41 Biol 502 General Physiology

This course applies the fundamental physiological mechanisms of cell biology to the functions of the major organ systems of the body, namely, the cardiovascular, renal, respiratory, gastrointestinal, and endocrine systems. The course is intended primarily for first-year medical students. The Physiology and Microscopic Anatomy courses are closely coordinated within the same schedule. Course continues into the spring semester with a different schedule. Prerequisite, Biol 5061 or the equivalent and permission of course director.

Credit 6 units.

L41 Biol 5051 Foundations in Immunology

Designed for graduate students and medical students as an in-depth introduction to immunology. Topics: antibody structure and genetics, B and T cell receptor, structure and recognition, major histocompatibility complex and antigen processing, cytokine signaling and regulation of the immune response, innate immunity, humoral and cellular effector mechanisms. Discussion Group will meet once a week on Thursdays from 10:00-12:00 p.m. Prerequisite: Introductory Biochemistry and/or Genetics helpful, permission of instructor.

Credit 4 units.

L41 Biol 5053 Immunobiology I

Immunobiology I and II are a series of two courses taught by the faculty members of the Immunology Program. These courses cover in depth modern immunology and are based on Janeway's Immunobiology 8th Edition textbook. In Immunobiology I, the topics include: basic concepts in immunology, innate immunity: the first lines of defense, the induce responses of innate immunity, antigen recognition by B-cell and T-cell receptors, the generation of lymphocyte antigen receptors, antigen presentation to T lymphocytes and signaling through immune system receptors. In Immunobiology II the topics include: the development and survival of lymphocytes, T cell-mediated immunity, the humoral immune response, dynamics of adaptive immunity, the mucosal immune system, failures of host defense mechanisms, allergy and allergic diseases, autoimmunity and transplantation, and manipulation of the immune response. These courses are open to graduate students. Advanced undergraduate students may take these courses upon permission of the coursemaster. Prereq: DBBS students and advanced undergraduates with permission.

Credit 4 units.

L41 Biol 5054 Immunobiology II

Immunobiology I and II are a series of two courses taught by the faculty members of the Immunology Program. These courses cover in depth modern immunology and are based on Janeway's Immunobiology 8th Edition textbook. In Immunobiology I, the topics include: basic concepts in immunology, innate immunity: the first lines of defense, the induce responses of innate immunity, antigen recognition by B-cell and T-cell receptors, the generation of lymphocyte antigen receptors, antigen presentation to T lymphocytes and signaling through immune system receptors. In Immunobiology II the topics include: the development and survival of lymphocytes, T cell-mediated immunity, the humoral immune response, dynamics of adaptive immunity, the mucosal immune system, failures of host defense mechanisms, allergy and allergic diseases, autoimmunity and transplantation, and manipulation of the immune response. These courses are open to graduate students. Advanced undergraduate students may take these courses upon permission of the coursemaster. Prereq: DBBS students and advanced undergraduates with permission.

Credit 4 units.

L41 Biol 5068 Fundamentals of Molecular Cell Biology

This is a core course for incoming graduate students in Cell and Molecular Biology programs to learn about research and experimental strategies used to dissect molecular mechanisms that underlie cell structure and function, including techniques of protein biochemistry. Enrolling students should have backgrounds in cell biology and biochemistry, such as courses

comparable to L41 Biol 334 and L41 Biol 4501. The format is two lectures and one small group discussion section per week. Discussion section focuses on original research articles. Same as M15 5068 and M04 5068.

Credit 4 units.

L41 Biol 5069 Expanding the Central Dogma: Detours Between Genome and Proteome

How many genes are in the genome? That number is only the beginning of the story leading to a regulated, functional proteome. Recent discoveries suggest that the production and regulation of a functional proteome is quite complex. Several emerging themes may serve to regulate transcription and translation in ways we hadn't considered. In this course we will take a look at these exciting new discoveries and recent twists on existing knowledge that increase our understanding of how the cell responds to internal and environmental changes. Prerequisites: Nucleic Acids.

Credit 2 units.

L41 Biol 5075 Fundamentals of Biostatistics for Graduate Students

This course is designed for first-year DBBS students who have had little to no prior experience in programming or statistics. The course will cover common statistical practices and concepts in the life sciences, such as error bars, summary statistics, probability and distributions, and hypothesis testing. The class will also teach students basic programming skills for statistical computation, enabling them to retrieve and analyze small and large data sets from online databases and other sources.

Credit 2 units.

L41 Biol 5077 Pharmaceutical Research and Development: Case Studies

The course will provide an overview of the history of pharmaceutical research and development activities, with emphasis upon understanding a blend of the scientific, public health, regulatory and business decisions that have shaped the pharmaceutical industry over the past eight decades. Particular emphasis will be placed on understanding how past trends have raised questions about the sustainability of the enterprise. Although no prerequisites are formally required, the course will blend basic understanding of scientific and medical terminology with an understanding of the commercial and policy decision-making processes that govern the pharmaceutical and biotechnology enterprises. The course will provide an overview of the history of pharmaceutical research and development activities, with emphasis upon understanding a blend of the scientific, public health, regulatory and business decisions that have shaped the pharmaceutical industry over the past eight decades. Particular emphasis will be placed on understanding how past trends have raised questions about the sustainability of the enterprise. Although no prerequisites are formally required, the course will blend basic understanding of scientific and medical terminology with an understanding of the commercial and policy decision-making processes that govern the pharmaceutical and biotechnology enterprises.

Credit 2 units.

L41 Biol 5079 The Science, Medicine and Business of Drugs & Vaccines

The course will provide an overview of the history of research and development in the biotechnology and pharmaceutical industries, with emphasis upon understanding a blend of the scientific, public health, regulatory and business decisions that have shaped the pharmaceutical industry over the past eight decades. Particular emphasis will be placed on understanding how past and ongoing trends have raised questions about the sustainability of the enterprise. Although no prerequisites are formally required, the course will blend basic understanding of scientific and medical terminology with an understanding of the commercial and policy decision-making processes that govern the pharmaceutical and biotechnology enterprises.

Credit 2 units.

L41 Biol 5084 Single Molecule Biophysics Journal Club

Molecular motors in the cell harness chemical energy to generate mechanical work in a host of processes including cell motility, DNA replication and repair, cell division, transcriptional regulation, and intracellular transport. The purpose of this course is to discuss recent advances in the field of molecular motors. Special emphasis will be placed on understanding and critically evaluating single molecule studies. The course will consist of both journal club presentations and small group discussions.

Credit 1 unit.

L41 Biol 5098 Graduate Research Fundamentals

This course introduces first-year Ph.D. students to the foundational skills, knowledge, and habits of mind required of successful independent biological scientists: 1) Social dynamics in the scientific research enterprise 2) Epistemology and ethics of bio research methods 3) Development and communication of research questions and results 4) Interdisciplinary scientific thinking. Class sessions and homework introduce these topics; major assignments prompt student to connect them with the broader scope of graduate training in lab rotations, course work, and interdisciplinary scientific seminars. The interactive, student-driven class structure facilitates autodidactic development while integrating small group activities and peer mentoring from advanced DBBS students. Prerequisite: Students must be enrolled in a graduate program through the Division of Biology & Biomedical Sciences.

Credit 0.5 units.

L41 Biol 5123 Experimental Hematopoiesis Journal Club

Journal club in which papers that describe significant advances in the field of experimental hematopoiesis are discussed. Students are expected to present one paper per semester and attend the weekly (1 hour) session. No prerequisites.

Credit 1 unit.

L41 Biol 5125 Student-Run Cell Biology Journal Club

Participants (students) present summaries of current research published in various journals in the field of cell biology. A large component of this journal club includes coaching in oral presentation. Students receive one credit for regular participation and for making one presentation.

Credit 1 unit.

L41 Biol 5128 Cell Biology of Extracellular Matrix Journal Club

This journal club covers a broad range of topics related to extracellular matrix and cell-cell communication, including the fields of biochemistry, molecular biology, cell biology, and developmental biology. Speakers give a brief background to introduce the topic and then focus on one paper from the current literature. Presentations are given by students, faculty, and post-doctorates. Students receive 1 unit of credit for regular participation and for making one presentation.

Credit 1 unit.

L41 Biol 5137 Ion Channels Journal Club

Weekly presentations of recent papers on mechanisms of ion channel function and membrane excitability, as well as the role of channel defects in human and model diseases, with lively group discussions the norm! Once per semester, each participant will choose a paper and present it to the group.

Credit 1 unit.

L41 Biol 5138 Journal Club for the Molecular Mechanism of Aging

Why do we age? What causes aging? How is our life span determined? This journal club will address such fundamental, but challenging questions of aging and longevity. Recent studies on aging and longevity are now unveiling regulatory mechanisms of the complex biological phenomenon. We'll cover the latest progress in this exciting field and stimulate discussions on a variety of topics including aging-related diseases. One hour of paper presentation or research talk and discussion per every two weeks. Prerequisite: Basic knowledge of molecular biology and genetics of model organisms, such as yeast, *C. elegans*, *Drosophila* and mouse. Registered students are expected to have at least one presentation for 1 unit credit.

Credit 1 unit.

L41 Biol 5142 Cell & Molecular Biology of Bone

The course is designed around a core of general lectures, each supplemented by two to four student presentations, from the recent literature. Topics include, but are not limited to, bone cell ontogeny, integrin/cadherin-based signal transduction, hormonal regulation, and cell:cell communication. Prerequisite: Biol 5068 or consent of coursemaster.

Credit 2 units.

L41 Biol 5145 Nanomedicine Applications

Biomedical applications of nanotechnology. This course is intended to survey the field of nanobiomedicine in a lecture format given by invited experts. Topics will range from multimodality imaging to targeted therapeutics to molecular diagnostics. Benefits and toxicities will be presented and the translational aspects of commercialization of nanosystems for medical use will be covered.

Credit 1 unit.

L41 Biol 5146 Principles and Applications of Biological Imaging

Principles and Applications of Biological Imaging will introduce the interdisciplinary nature of the imaging sciences and conduct a comprehensive survey of the array of interrelated topics that define biological imaging. The course will cover the basics of the optical, magnetic resonance, CT, SPECT and PET imaging

modalities, and microscopy, while focusing on applications of imaging to different disease states, such as oncology, neurology, cardiology and pulmonary diseases. Prerequisites: One year each of Biology, Chemistry, Physics and Calculus.

Credit 3 units.

L41 Biol 5147 Contrast Agents for Biological Imaging

Contrast Agents in Biological Imaging will build the chemistry foundations for the design and use of contrast agents in imaging applications such as nuclear medicine, magnetic resonance imaging (MRI) and optical imaging. The course will include lectures on the design of radiopharmaceuticals for gamma scintigraphy and positron emission tomography, MRI contrast agents and agents for optical imaging, including bioluminescence and fluorescence microscopy. Prereqs: one year of general chemistry, one semester of organic chemistry.

Credit 3 units.

L41 Biol 5148 Metabolism Journal Club

The purpose of the Metabolism Journal Club is to introduce the graduate students to advanced topics spanning the biochemistry, cell biology and genetics of cellular and whole body metabolism. Under the guidance of the course directors (Drs. Ory and Schaffer), students will select recent topical articles for discussion in the weekly journal club. Students will be expected to provide a succinct introduction to the topic and lead discussion of the data presented in the journal article. Students will be evaluated on the basis of their presentation and their participation in the seminar throughout the semester. Prerequisites: Successful completion of Fundamentals of Molecular Cell Biology (Bio 5068) and Nucleic Acids and Protein Biosynthesis (Bio 548).

Credit 1 unit.

L41 Biol 5149 High Throughput, High Content, Assay Development, Screening & Target Validation-Principle & Practice

The objective of our course is to introduce students to the world of automation-based discovery science. We will discuss the power of this approach, its constraints and their practical solutions. Specifically, we will introduce the class to the range of available assay tool kits (detection modalities), and the principles that apply towards assay development, library selection (compound, RNAi) and the translation of benchtop methods to automated platforms. We will also discuss sources of error and statistical tools for analyzing large datasets, the hit validation process and lead optimization. Along the way, we will hear from individual investigators describing their own academic or industry screens and critique the growing literature describing results born from high throughput/high content approaches. We realize that high throughput screening raises philosophical issues such as the merit of discovery science vs. hypothesis-driven research, big science, the role of technology in opening new fields of research, etc. We encourage the students to engage with us in these debates while covering the nuts and bolts of high throughput experiments. Minimum enrollment is 5; those interested should contact the coursemaster before May 2011. Prerequisites: Sound foundation in at least one of: biochemistry, cell biology, developmental biology, microbiology, virology, statistics or computational biology.

Credit variable, maximum 2 units.

L41 Biol 5151 RNA Biology Journal Club

The purpose of the RNA Biology Journal Club is to introduce the graduate students to advanced topics spanning the bioinformatics, biochemistry, cell biology and genetics of RNA biology. Under the guidance of the course directors (Drs. Ory and Schaffer), students will select recent topical articles for discussion in the weekly journal club. Students will be expected to provide a succinct introduction to the topic and lead discussion of the data presented in the journal article. Students will be evaluated on the basis of their presentation and their participation in the seminar throughout the semester. Prerequisites: Successful completion of Fundamentals of Molecular Cell Biology (Bio 5068) and Nucleic Acids and Protein Biosynthesis (Bio 548).

Credit 1 unit.

L41 Biol 5152 RAD Journal Club (Regeneration, Aging, and Development)

Focuses on developing a dialog around current topics in developmental and regenerative biology at the molecular, cellular and systems levels.

Credit 1 unit.

L41 Biol 5161 Lymphoid Organogenesis: Ontogeny, Inflammation and Cancer

This course will cover the topic of the role of cytokines and innate immune cells in orchestrating the development of important lymphoid structures that form the physical scaffold for the unfolding immune response. The roles of TNF family member, molecular addressins, and integrins will be covered in the development of Lymph node structures. The regulation of cellular trafficking and the basis of chemokine actions will be covered. The development of tertiary lymphoid organs and associated vascular structures will be covered in terms of their ontogeny and their role in infections and in tumor metastasis.

Credit 3 units.

L41 Biol 5171 Medical Immunology

An introduction to basic concepts in immunology and immunopathology. Lectures focus on antigen-antibody interactions, immunoglobulin structure and genetics, the cellular basis of the immune response and immune regulation, T cell effector mechanisms, the inflammatory response, complement, the positive and negative roles of hypersensitivity, and immune deficiency. Prerequisite, some background in biochemistry and genetics helpful. Restricted to medical students only except in unusual circumstances, with permission of coursemaster. Offered during the first half of the second medical semester. Three-four lecture hours a week, two 2-hour lab periods, four 1-hour clinical discussion groups.

Credit variable, maximum 3 units.

L41 Biol 5191 Pathobiology of Human Disease States

Three human disease states will be discussed in detail. Topics will include background clinical and epidemiological information, followed by a detailed examination of the molecular and cellular events that underlie the disease state. Examples of pertinent topics include Alzheimer's disease, AIDS, leukemia, cystic fibrosis, sickle cell anemia, diabetes, etc. Prerequisite: Must be a Markey Pathway student.

Credit 2 units.

L41 Biol 5192 Cancer Biology Journal Club

This journal club covers current papers in molecular oncology, cancer genetics and contemporary molecular biology. Presentations will be given by students, post-docs and faculty, then discussed.

Credit 1 unit.

L41 Biol 5193 Frontiers in Human Pathobiology

Leading physician-scientists from the Washington University community will present state-of-the-art lectures on important areas of human pathobiology in which they are expert. This program will provide graduate students, post-doctoral fellows, and medical students with a "cutting-edge" introduction to important biological principles relevant to human diseases. Prerequisites: Graduate or medical student in good standing at WUMS.

Credit 1 unit.

L41 Biol 5196 Special Emphasis Pathway in Cancer Biology

This course is designed to present pre- and postdoctoral trainees with an organized educational format to explore major contemporary topics in cancer biology. The elective will provide an integrated view of cancer research including basic science, translational science, and clinical investigation. Approximately 60 minutes will be devoted to a didactic presentation by a faculty member with interaction by the participants. The remaining 30 minutes will be used to discuss a pivotal research paper from this field, preselected by the faculty member. Outside reading (30-60 min/week) will be required.

Credit 2 units.

L41 Biol 5201 Membrane Protein Biophysics Journal Club

Cells are encapsulated by lipid bilayers providing a physical barrier for the passage of charged molecules and ions in and out of the cell. The proteins that reside within this layer of oil are called membrane proteins, and they act as the molecular gatekeepers, controlling the passage of ions, nutrients, waste products and signaling elements, across cell membranes. This journal club focuses on examining key literature in the field that investigates how membrane proteins fold, adopt certain structures, and how they function inside of the strange environment of the lipid membrane. The papers will be selected from biophysical studies that combine new and notable research with key historical work, for a broad perspective of the science being conducted in this complex and emerging field. Special emphasis will be placed on emerging topics, such as regulation of protein function by lipid composition, membrane protein synthesis and folding, cutting-edge developments in membrane biophysics. The course will consist of both journal club presentations, as well as small group discussions in the form of "chalk-talks."

Credit 1 unit.

L41 Biol 5215 Thursday Development Rave

Travel the Medical School to gain hands-on experience with new techniques and approaches to developmental biology. We will emphasize a different approach in which doing goes hand-in-hand with asking. Developmental biology can be fun...so...no note taking allowed; we'll give you the notes. Bring your curiosity. Food, beverages, and music are all part of the mix. You will learn! Due to the nature of the class, size will be limited. Prerequisite, Graduate standing and coursemaster approval required.

Credit 2 units.

L41 Biol 5217 Special Topics in Microbial Pathogenesis

Primarily for graduate and MSTP students, this course involves oral presentation and discussion of current research articles on pathogenic microorganisms (bacteria, viruses, parasites, and fungi). Discussion will include design of specific aims for research proposals. Emphasis will be on literature that addresses the cellular and molecular basis of host-pathogen interactions. Students are expected to prepare all articles covered and to participate actively in each discussion.

Prerequisite: advanced elective course "Molecular Microbiology and Pathogenesis" or permission of instructors. Class meets twice per week for 1.5 hours each.

Credit 2 units.

L41 Biol 5222 Introduction to SAS for Biomedical Researchers

This course is a hands-on introduction to analyzing data using the SAS programming language and procedures. SAS stands for Statistical Analysis System and is one of the most powerful statistical packages used to analyze biological (and other) data sets in a meaningful way. The course will train students how to create, manage, manipulate, store, retrieve, and analyze SAS data sets as well as how to produce graphs and reports from different types of data sets. Critically, the course will also teach students the fundamental concepts of key statistical tests (e.g.: t-test, Chi-square test, ANOVA and non-parametric tests), and therefore provide students the intellectual foundation from which to identify the most appropriate statistical test depending on the specific data set to be analyzed. Upon completion of the course, students should have a basic understanding of how to use the SAS program and be able to use SAS to work with various types of data to perform routine statistical analyses and testing. In addition, the course should facilitate the future ability of students to use SAS to manipulate and analyze the ever increasingly large data sets common in essentially all genome-wide approaches.

Credit 2 units.

L41 Biol 5224 Molecular, Cell and Organ Systems

This course will introduce Ph.D. and MSTP students to fundamental problems in cell and molecular biology at the systems level. The course is divided into 5 themes: 1) microbial systems; 2) organ development and repair; 3) cardiovascular system and disease; 4) tumor & host systems; and 5) metabolic systems and disease. Topics within each theme highlight current research concepts, questions, approaches and findings at the molecular, cellular and physiological levels. Students will write an original research grant proposal on a topic of their choosing in one of the 5 themes. Students will critique proposals anonymously in an NIH-like study section. Prereqs: Fundamentals of Molecular Cell Biology and Nucleic Acids and Protein Synthesis.

Credit 3 units.

L41 Biol 5235 Genetics Journal Club

This journal club will be focused on the Genetics department seminar series. Students will present one or a few recent papers by the seminar speaker scheduled for that week. Students will provide a brief written evaluation (on a form that will be provided) of their peers' presentations, and the faculty advisors will meet with each student after the presentation to provide feedback.

Credit 1 unit.

L41 Biol 5246 Coding and Statistical Thinking in the Neurosciences

Students will learn common programming constructs and how to visualize and analyze data. Coding will be integrated into a statistics curriculum introducing summary statistics, probability distributions, simulation and hypothesis testing, and power analysis for experimental design.

Credit 1 unit.

L41 Biol 5255 Experimental Skeletal Biology Journal Club

The journal club, which meets weekly, focuses on cellular and molecular biology of the skeleton. Emphasis is placed on gaining insights into normal skeletal homeostasis as well as systemic disorders of bone. Papers presented for review are selected from the most competitive journals. Participants are encouraged to "think outside of the box" and discuss novel molecular discoveries that may impact bone cell function. Prerequisite, permission of instructor.

Credit 1 unit.

L41 Biol 5261 Molecular Mechanisms of Immunological Diseases

Advanced immunology students will be exposed to human diseases that appear to have an immunological basis. In addition to lectures and evaluation of recent clinical and relevant basic immunology literature, an emphasis will be placed on direct encounters with patients and pathologic material when feasible, providing students with a human aspect to discussions of immune pathogenesis. Diseases covered will include those with known causes such as AIDS and autoimmune disorders such as systemic lupus erythematosus and rheumatoid arthritis for which a molecular basis is not fully understood. Other areas may include asthma and tissue transplantation where effector mechanisms are better characterized. Since most of these disorders have no cure or are imperfect clinical entities, the class will discuss research areas that may be fruitful and lead to improved diagnosis and treatment. Prerequisite: Foundations of Immunology or permission of instructor.

Credit 2 units.

L41 Biol 5262 Human Immunobiology

Advanced immunology students will be exposed to clinical manifestations of human diseases which have an immunological base, such as rheumatoid arthritis, systemic lupus erythematosus, juvenile rheumatoid arthritis, allergy and asthma, by interacting with physicians seeing these patients in the outpatient clinic. One credit, satisfactory/unsatisfactory. Prerequisite, Molecular Mechanisms of Immunological Diseases or consent of instructor and HIPAA training. Spring semester; schedule to be arranged.

Credit 1 unit.

L41 Biol 5272 Advanced Topics in Immunology

This course uses a journal club format to discuss contemporary issues in the cell and molecular biology of the immune system. Discussions focus on the use of current approaches to analyze the cellular and molecular basis of immunity. Topics include mechanisms of antigenic specificity, diversity, cell communication, differentiation, activation, and effector activity. Prerequisite, Bio 5051 and permission of instructor.

Credit 2 units.

L41 Biol 5282 Chromatin Structure and Gene Expression

This special topics course will use "Epigenetics" ed. By Allis, Jenuwein, Reinberg, and Caparros (2007, Cold Spring Harbor Laboratory Press) as the organizing text. Each week a faculty member will provide a background lecture on an important topic or model system, and a student will present and lead discussion of a paper from the current scientific literature related to the previous week's background lecture. Topics to be considered will include background on chromatin structure, histone modifications and histone variants; epigenetic regulation in yeast, other fungi, ciliates, flies, mammals and plants; dosage compensation in different systems; DNA methylation and imprinting in mammals; stem cells, nuclear transplantation and reprogramming; and the epigenetics of cancer and other human diseases (some variation in topics in different years). Students enrolled in the course will be required to present one paper and to come prepared to each session, with a question for discussion. Prerequisite, BIO 548 Nucleic Acids and Protein Biosynthesis.

Credit 2 units.

L41 Biol 5284 Current Research in Chromatin, Epigenetics and Nuclear Organization

This journal club considers papers from the current literature on chromatin structure and function, with an emphasis on regulation of transcription, epigenetics and genomics. Presentations are given by students, postdocs and faculty, with discussion by all. Students enrolled for credit are expected to attend regularly, and to present a minimum of one paper during the term, with consultation and critique from the faculty.

Credit 1 unit.

L41 Biol 5285 Current Topics in Human and Mammalian Genetics

This course aims to provide both biologists and those with mathematical backgrounds with a basis in mammalian genetics. The course will include the following modules: Nucleic acid biochemistry; Gene and chromosome organization; Introduction to Human Genetics; Mutations and DNA repair; Cancer Genetics; Genomic methodologies; Biochemical genetics; Murine Genetics; Epigenetics; Neurodegenerative diseases; Mitochondrial disorders; Pharmacogenetics; Introduction to human population genetics; Applications of modern human genetics; Introduction to web-based informatics tools for molecular genetics. One of the required courses in the Quantitative Human Statistical Genetics graduate program.

Credit 3 units.

L41 Biol 5288 Special Topics in Molecular Genetics

A special topics course with lectures and discussion on the molecular basis of cancer including cell cycle regulation, tumor suppressor genes, tumor invasion, angiogenesis, immune evasion, resistance to apoptosis, signaling, imaging, gene expression, chromosomal translocations, and viral oncology.

Credit 2 units.

L41 Biol 5303 Protein NMR Journal Club

This journal club covers the recent literature on protein NMR with a focus on using NMR to study protein function, NMR dynamics, and novel methods that expand the range of systems accessible to solution NMR studies. Students, postdocs and faculty discuss a recent paper and present background information on the relevant technical aspects of NMR. Students receive 1 credit for participation and presenting one paper.

Credit 1 unit.

L41 Biol 5304 Introduction to Biomedical Data Science I

This course is designed primarily for individuals who wish to learn the research tools and approaches required for biomedical informatics-based research and who have little or no computational experience using command line shells, programming, and databases.

Credit 4 units.

L41 Biol 5311 Dynamics in Mesoscopic Molecular Systems

This course will provide a background in the theory of the dynamics of mesoscopic systems and introduction to methods for measuring the dynamics of these systems. It will include measurement methods, some of which are in common use and others that have only recently been introduced. This course would be useful for biophysics students and others that are interested in molecular processes and mechanisms in small systems such as cells. Prerequisites, Physical Chemistry.

Credit 3 units.

L41 Biol 5312 Macromolecular Interactions

This course will cover equilibria, kinetics and mechanisms of macromolecular interactions from a quantitative perspective. Thermodynamics, multiple binding equilibria (binding polynomials), linkage phenomena, cooperativity, allostery, macromolecular assembly, analysis of binding isotherms, enzyme catalysis and mechanism, steady-state and pre-steady-state kinetics, kinetic simulation, and isotope effects. Prerequisite, physical chemistry, biochemistry, calculus, and organic chemistry. 3 class hours per week.

Credit 3 units.

L41 Biol 5317 The RNA World

Current biology and biochemistry of RNA. Prerequisite, Bio 548 or consent of instructor.

Credit 2 units.

L41 Biol 5318 DNA Repair

This course is an advanced graduate course that explores all aspects of DNA damage and the cellular responses to DNA damage. It is designed for graduate students who have a working knowledge of Chemistry, Molecular Biology and Cellular Biology, and for interested postdocs and researchers. Specific topics that will be covered are: The chemical basis of DNA damage, specific DNA repair mechanisms, cell cycle responses to damage, translesion DNA replication and mutagenesis, and human diseases related to defects in DNA damage response. The course consists of a lecture module, open to all, and a discussion module for registered students. In addition, several invited speakers in the field of DNA repair will give seminars and meet with registered students for discussion. Students will present and discuss research papers. Grades will be given based on student presentation and participation. Prerequisite; Permission of instructor.

Credit 2 units.

L41 Biol 5319 Molecular Foundations of Medicine

This course will cover fundamental aspects of biochemistry and cell biology from a medical perspective. The course begins with a treatment of protein structure and the function of proteins in the cytoskeleton and cell motility. The principles of enzyme kinetics and regulation are then discussed and basic pathways

for the synthesis and metabolism of carbohydrates and lipids are introduced. This leads in to a discussion of membrane structure and the function cellular organelles in biological processes including energy production, protein degradation and protein trafficking. Prerequisite: Two semesters of organic chemistry. Coursemaster approval is required. Please note: This course is given on the medical school schedule and so it begins 8 days before the grad school schedule.
Credit 3 units.

L41 Biol 5327 Optical Spectroscopy: Theory and Applications

Spectroscopic methods to be covered include fluorescence, both ensemble and single molecule, and absorption (circular dichroism); fluorescence correlation spectroscopy will also be discussed. The quantum chemistry /physics behind these methods will be reviewed. Prerequisite: Consent of instructor.
Credit 2 units.

L41 Biol 5328 Structural Biology Journal Club

Multi-laboratory research colloquia for DBBS graduate students focused on structural biology and complementary biophysical techniques. Course credit requires student presentation for credit.
Credit 1 unit.

L41 Biol 5329 Mathematical Methods for Biophysics and Biochemistry

The purpose of this course is to introduce the basic concepts of mathematical physics to students in the context of problems they are likely to encounter in their course work and research. Specifically, the course will introduce analytical and numerical mathematical methods in linear and matrix algebra, ordinary and partial differential equations, and linear transform methods relevant to the fields of biophysics and biochemistry. By the end of the course, the students should have a good grasp of these basic techniques, their application to biological problems, and related software and computational resources.
Credit 3 units.

L41 Biol 5335 Linkage Theory and Experiment

The course will cover basic concepts of linkage and their application to the analysis of protein function and interactions. The course is meant to expose students in Biochemistry to the conceptual framework behind current approaches to the study of protein function and interactions, using a very simple mathematical treatment (no knowledge of calculus required) and the discussion of specific biological systems. Topics to be covered include: 1. Linkage cycles; 2. Allostery and cooperativity; 3. Site-specific linkage; 4. Epitope mapping using Ala-scanning mutagenesis; 5. Double-mutant cycles; and 6. Rational protein engineering. Prerequisite: Basic knowledge of protein structure and function.
Credit variable, maximum 1.5 units.

L41 Biol 5336 Computational Biophysics Journal Club

This course covers a combination of classic and recent publications on computational methods for studying biomolecules. Students participating for credit will be required to present at least once.
Credit 1 unit.

L41 Biol 5342 Macrophage Biology

This special topics course will examine aspects of cell and molecular biology of the macrophage; endocytosis, phagocytosis, adhesion, motility, signal transduction, antigen processing, lysosomes, intracellular parasitism. Prerequisite, Molecular Cell Biology (Bio 5068) or Foundations in Immunology (Bio 5051). Two hours a week.
Credit 2 units.

L41 Biol 5352 Developmental Biology

Analysis of a selected set of key processes in development, such as pattern formation, cell-cell signaling, morphogenesis, etc. The focus is on molecular approaches applied to important model systems, but framed in classical concepts. The discussion section provides instruction in presenting a journal club and writing a research proposal. Prerequisites, Molecular Cell Biology (Bio 5068) and Nucleic Acids (548).
Credit 3 units.

L41 Biol 5357 Chemistry and Physics of Biomolecules

This course covers three major types of biomolecular structures: proteins, nucleic acids, and membranes. Basic structural chemistry is presented as well as the biophysical techniques used to probe each type of structure. Selected topics covered include protein folding, protein design, X-ray crystallography, NMR spectroscopy, nucleic acid bending and supercoiling, nucleic acid:protein interactions, RNA folding, membrane organization, fluidity, permeability and transport, and membrane channels. The weekly discussion section will cover problem sets and present current research papers. This is one of the required courses for the biochemistry and for the molecular biophysics graduate programs. Prior course work in biochemistry and physical chemistry is recommended but not required.
Credit 3 units.

L41 Biol 5358 Biochemical and Biophysical Investigations of Infectious Diseases Journal Club

Biochemical and biophysical approaches continue to advance as powerful approaches to the understanding of human disease processes. This journal club covers recent papers in which these approaches address aspects of infectious diseases or inflammation. Students who enroll for credit will be expected to participate in weekly presentations and to present one to two papers along with accompanying background information. Prerequisites: Graduate standing in DBBS; prior introductory course work in biochemistry, physical chemistry, or Chemistry and Physics of Biomolecules (Biol 5357). Course work in microbiology or immunology is not required.
Credit 1 unit.

L41 Biol 5381 Mechanisms of Protein Targeting & Intercompartmental Transport

Recent advances regarding the molecular mechanisms responsible for targeting and intercompartmental transport of proteins to and between specific organelles, such as the endoplasmic reticulum, golgi apparatus, lysosomes, mitochondria, and nucleus. Particular emphasis on the development and use of cell-free systems that faithfully reconstitute key protein targeting and transport events. Material consists primarily of original research articles presented by students. Prerequisite, Molecular Cell Biology (may not be taken concurrently).
Credit 1 unit.

L41 Biol 5384 Advanced Cell Biology

A lecture/discussion course for graduate and MSTP students that focuses on current research directions in fundamental processes of cellular biology. Topics will be covered in depth over two week blocks and will include glycobiology, lipid homeostasis, protein degradation, and cell senescence. Emphasis on development of journal club presentation and grant writing skills. Prerequisite, Bio 5068 or permission of coursemasters.

Credit 3 units.

L41 Biol 5392 Molecular Microbiology & Pathogenesis

Course is devoted to studying microorganisms, particularly those that cause disease, with an emphasis on the molecular interactions between pathogens and hosts. First third of the course focuses on virology, second third on bacteriology and the last third on eukaryotic pathogens. Prereq, first semester core curriculum for Programs in Cell and Molecular Biology.

Credit 3 units.

L41 Biol 5394 Introduction to Metagenomics: The Study of Microbial Ecosystems

This course introduces students to key questions, approaches, and computational tools used to study the properties of microbial communities in their various habitats. Complex microbial ecosystems are found in a variety of terrestrial and oceanic environments as well as in the various body habitats of metazoan species including humans. These ecosystems, which are composed largely of microbial species that have never been cultured in a lab, are laboratories for the study of genome evolution (eco-genomics), ecological principles, and myriad biotransformations. In particular, many animals, including ourselves, have evolved to live with and benefit from the commensal microbial communities in their GI tracts. The study of microbial ecosystems gives rise to the field of metagenomics - the acquisition, identification, and functional and evolutionary analysis of the combined genomic sequences of a diverse population of organisms. Metagenomic analyses must contend with many challenges, including a high volume of genomic sequence data, fragmentary and incomplete sequences, and genomic heterogeneity of sampled organisms. To tackle these challenges, we must bring to bear computational tools that apply models of sequence evolution to interpret metagenomic sequence data. These interpretations form a basis for further investigation and hypothesis testing. Course content will include an overview of questions and major results in metagenomic research, along with an introduction to the experimental protocols and computational tools, models, and algorithms of metagenomic analysis. The class will have two 1.5 hour meetings per week for 14 weeks. Enrollment is limited to 25 students. Prerequisites: Graduate standing or permission of instructor. Some basic knowledge of biology is recommended. Students should know or be prepared to learn basic Python scripting to carry out some course assignments.

Credit 3 units.

L41 Biol 5397 Current Literature in Microbiology

Presentations by students on a broad range of topics of current interest in microbiology. The course will emphasize presentations and discussion skills. Credit requires attendance and participation at all sessions and one presentation.

Credit 1 unit.

L41 Biol 5398 Microbiology Program Grant Writing**Workshop**

This grant writing workshop will focus on defining identifying key unanswered questions from the literature, formulating hypotheses for testing, defining Specific Aims, and developing a research plan. Students will submit specific aims on a topic of their choice, receive critiques from faculty members, and develop a NIH-style proposal to investigate them. Students will participate in class discussions and a mock study section to evaluate proposals. Prerequisite, completion of the MMMP advanced elective, Bio 5392 Molecular Microbiology & Pathogenesis or permission of the coursemaster.

Credit 1 unit.

L41 Biol 5401 Introduction to Bioinformatics I

This year-long course for first-year BIDS PhD students introduces a broad spectrum of biomedical informatics theories and methods that support and enable translational research and, ultimately, precision health care. The course is organized into modules spanning levels of inquiry from biomolecules to patients to populations. For each module, a relevant set of biomedical informatics frameworks will be introduced and then demonstrated via experiential learning involving the analysis of a variety of biological, clinical, and population-level data sets.

Credit 4 units.

L41 Biol 5403 Introduction to Biomedical Data Science I

This course provides a hands-on introduction to fundamental principles of informatics and data analysis tools and methods. It is designed primarily for individuals who wish to learn the research tools and approaches required for biomedical informatics-based research and who have little or no computational experience using command line shells, programming, and databases.

Credit 4 units.

L41 Biol 5412 Tropical and Molecular Parasitology

Graduate level seminar course focusing on current scientific literature in molecular parasitology. The journal club will meet biweekly during the Fall and Spring semesters. Students will attend both semesters in order to receive one credit. The seminar series will run jointly with a research conference in Tropical and Molecular Parasitology. Outside speakers will be invited for the seminar series to emphasize important developments in tropical medicine and molecular parasitology. In advance of the invited speakers, topics will focus on their previous research publications. Prerequisites, BIO 5392 Molecular Microbiology & Pathogenesis.

Credit 0.5 units.

L41 Biol 5416 Molecular Microbiology & Pathogenesis**Journal Club**

Presentations by students on a broad range of topics of current interest in microbiology and pathogenesis including areas of research in bacteriology, mycology, parasitology, virology and immunology. The course will emphasize techniques used to give good presentations and scientific critique. Speakers provide a brief background to introduce the topic and then focus on one-two papers from the current literature. Credit requires attendance at all sessions and one presentation.

Credit 1 unit.

L41 Biol 5417 Hematology Division Journal Club: Current Topics in Biochemistry, Cellular, and Molecular Biology

This journal club covers a broad range of topics of current interest, including the fields of biochemistry, molecular biology, cell biology, developmental biology, and immunology. Speakers usually give a brief background to introduce the topic and then focus on one-two papers from the current literature. Presentations are given by graduate students, post-doctorates, and faculty. Each attendee presents two-three times per year. Participants are expected to attend all the sessions. This journal club was founded in 1966.

Credit 1 unit.

L41 Biol 5419 Seminars in Microbiology & Infectious Diseases

Work in-progress seminars by graduate students and postdoctoral fellows. Prerequisite: BIO 5392 Molecular Microbiology & Pathogenesis.

Credit 1 unit.

L41 Biol 5420 Membrane Protein Biophysics Journal Club

Cells are encapsulated by lipid bilayers providing a physical barrier for the passage of charged molecules and ions in and out of the cell. The proteins that reside within this layer of oil are called membrane proteins, and they act as the molecular gatekeepers, controlling the passage of ions, nutrients, waste products and signaling elements, across cell membranes. This journal club focuses on examining key literature in the field that investigates how membrane proteins fold, adopt certain structures, and how they function inside of the strange environment of the lipid membrane. The papers will be selected from biophysical studies that combine new and notable research with key historical work, for a broad perspective of the science being conducted in this complex and emerging field. Special emphasis will be placed on emerging topics, such as regulation of protein function by lipid composition, membrane protein synthesis and folding, and cutting-edge developments in membrane biophysics. The course will consist of both journal club presentations, as well as small group discussions in the form of "chalk-talks."

Credit 1 unit.

L41 Biol 5425 Immunology of Infectious Diseases Journal Club

The goal of this Journal Club (JC) is to provide 2nd year students in MMMP program a platform to discuss new and emerging concepts on mechanisms by which host immune responses mediate protection against infectious diseases. This exercise will also enable the student who attend the fundamental Immunology course to apply their knowledge to understand the basis for immunology of infectious diseases. The format will include faculty who will select cutting-edge papers and head the discussion during the JC session.

Credit 1 unit.

L41 Biol 5426 ID Gateway: Translational and Public Health Aspects of Basic Infectious Disease Research

This course provides an opportunity for students, postdoctoral fellows, infectious disease fellows and faculty to explore issues at the interface between patient care, public health and basic research in the area of microbial pathogenesis. Prerequisites, Application and L41 Bio 5392 or M30 526, or permission of instructor.

Credit 2 units.

L41 Biol 5445 DNA Metabolism Journal Club

Presentation of current research papers in DNA replication, DNA repair, and DNA recombination, with an emphasis on basic biochemical and biophysical approaches.

Credit 1 unit.

L41 Biol 5456 Advanced Crystallography

The advanced course in Protein Crystallography will address all aspects of modern protein crystallography including fundamentals of crystallography, the derivation of the structure factor and electron density equation, symmetry and space groups, direct methods, isomorphous replacement, molecular replacement, data collection, and crystal growing theory and techniques. Prerequisite, Physical Chemistry & Bio 5325 Protein Structure and Function. Two class hours per week.

Credit 2 units.

L41 Biol 5461 Molecular Recognition

The physical basis of recognition as exemplified in ligand binding to receptors is the focus with modeling of interactions between macromolecules of biological interest such as G-protein coupled receptors and ligands such as drugs, hormones, etc. Approaches to structure-based design of novel ligands as well as development of active site hypotheses when the three-dimension structure of the receptor is unknown will be developed. Emphasis will be placed on pharmacophore determination, receptor site modeling, three-dimensional quantitative structure-activity relationships, neural networks, de novo design, etc. Applications will be taken from biological systems of therapeutic interest such as inhibition of proteases (HIV protease, thrombin, collagenase, etc.), homology modeling of enzyme targets, design of minor groove ligands for DNA, etc. Each student should expect to complete a project applying one of the computational methods discussed. Two hours of lecture plus three hours of lab per week. Prerequisite, Physical Chemistry, basic Biological Chemistry. Course offered every other year. Minimum 5 students.

Credit 3 units.

L41 Biol 5464 Computational Biochemistry

This course covers the application of computer modeling and simulation to problems involving biological macromolecules of interest such as enzymes, receptors, nucleic acids, etc. Lectures discuss the theory and algorithms underlying a variety of simulation techniques. Alternative paradigms for modeling at differing levels of structural resolution will be emphasized. Topics examined in detail include molecular mechanics force fields, optimization, dynamics simulation, protein structure prediction, molecular recognition and homology modeling. Problem sets provide computer exercises designed to give students practice with actual programs and applications. Students are asked to complete a computational project of their choice using one of the methods discussed. Prerequisite: background in physical chemistry, multivariable calculus and basic computer usage. Minimum 5 students.

Credit 3 units.

L41 Biol 5466 Current Topics in Biochemistry

Special topics course offered every other week involving the discussion of research papers covering a broad range of topics in the field of biochemistry. Papers selected from the primary literature will be presented and discussed by students with guidance from the instructor. Emphasis will be placed on papers that illustrate the application of chemical approaches to important biological processes. Designed primarily for first- and second-year graduate students in the Biochemistry Ph.D. program. Prerequisites: coursemaster permission.

Credit 0.5 units.

L41 Biol 5468 Cardiovascular Biophysics Journal Club

This journal club is intended for beginning graduate students, advanced undergraduates, and MSTP students with a background in the quantitative sciences (engineering, physics, math, chemistry, etc). The subjects covered are inherently multidisciplinary. We will review landmark and recent publications in quantitative cardiovascular physiology, mathematical modeling of physiologic systems and related topics such as chaos theory and nonlinear dynamics of biological systems. Familiarity with calculus, differential equations, and basic engineering/thermodynamic principles is assumed. Knowledge of anatomy/physiology is optional.

Same as E62 BME 5911

Credit 1 unit.

L41 Biol 5469 Biochemistry, Biophysics, and Structural Biology Seminar

Student presentation of Biochemistry, Biophysics or Structural Biology topic. Second Year Students present from literature; senior students give formal research seminar. Attendance required of all BBSB Graduate Students. Prerequisites: BBSB Graduate Student.

Credit 0.5 units.

L41 Biol 5476 Modeling Biomolecular Systems I

This course covers the applications of computer modeling and simulation to problems involving biological macromolecules. Lectures will discuss the theory and algorithms underlying a variety of simulation techniques. Laboratory exercises and a student project will provide experience with software presently used in the field. Topics examined in detail include: computational tools, molecular visualization, simulation methodology, force field methods, optimization, experimental design, QSAR, scoring and screening of ligands, docking, structure databases, and refinement and prediction of structures. Prereqs: basic background in biochemistry and physical chemistry; ability to write simple computer programs in any language.

Credit 3 units.

L41 Biol 548 Nucleic Acids & Protein Biosynthesis

Fundamental aspects of the structure, biosynthesis, and function of nucleic acids and the biosynthesis of proteins. Emphasis on mechanisms involved in the biosynthetic processes and the regulation thereof. Lecture course supplemented with student discussions of research papers. Prerequisites: Biol 3371, Biol 451, Chem 481 or equivalent, or permission of instructor.

Credit 3 units.

L41 Biol 5483 Human Genetic Analysis

Basic Genetic concepts: meiosis, inheritance, Hardy-Weinberg Equilibrium, Linkage, segregation analysis; Linkage analysis: definition, crossing over, map functions, phase, LOD scores, penetrance, phenocopies, liability classes, multi-point analysis, non-parametric analysis (sibpairs and pedigrees), quantitative trait analysis, determination of power for mendelian and complex trait analysis; Linkage Disequilibrium analyses: allelic association (case control designs and family based studies), QQ and Manhattan plots, whole genome association analysis; population stratification; Quantitative Trait Analysis: measured genotypes and variance components. Hands-on computer lab experience doing parametric linkage analysis with the program LINKAGE, model free linkage analyses with Genehunter and Merlin, power computations with SLINK, quantitative trait analyses with SOLAR, LD computations with Haploview and WGAViewer, and family-based and case-control association analyses with PLINK and SAS. The methods and exercises are coordinated with the lectures and students are expected to understand underlying assumptions and limitations and the basic calculations performed by these computer programs. Auditors will not have access to the computer lab sessions. Prerequisite: M21-515 Fundamentals of Genetic Epidemiology. For details, to register and to receive the required permission of the Coursemaster contact the MSIBS Program Manager (biostat-msibs@email.wustl.edu or telephone 362-1384).

Credit 3 units.

L41 Biol 5484 Genetics and Development of C. elegans Journal Club

Students will present a research paper (or present their current thesis research) and the appropriate background material.

Credit 1 unit.

L41 Biol 5486 Classic Experiments in Molecular Biology

A few key papers stand out as the historical foundations of molecular genetics. They illuminate the process of intuition, creative experimentation and insight that led to what we now accept as dogma in our field. This class, organized in the style of a journal club, will explore this history through presentations by students of these classic papers. Each student will be responsible for presenting one topic, consisting of 2 to 3 papers, placing them in their historical context through background reading from the contemporary literature, and in Judson's "The Eighth Day of Creation" and Cairns, Stent, and Watson's "Phage and the Origin of Molecular Biology." Prerequisite, graduate standing and BIO 548 and BIO 5491, or consent of instructors.

Credit 1 unit.

L41 Biol 5487 Genetics and Genomics of Disease

The course will cover the use of genomic and genetic information in the diagnosis and treatment of disease, with an emphasis on current practice and existing gaps to be filled to achieve precision medicine. Areas of discussion include: bioinformatics methods; assessment of pathogenicity; use and curation of disease variant databases; discovery of incidental findings; genomics applications in Mendelian disease, complex traits, cancer, pharmacogenomics, and infectious disease; design of clinical trials with genetic data; ethical and policy issues. Prerequisites: Genomics (Bio 5488), Advanced Genetics (Bio 5491), or Fundamentals of Mammalian Genetics (Bio 5285) or equivalent (permission from instructor)

Credit 2 units.

L41 Biol 5488 Genomics

This course is designed for beginning students who want to become familiar with the basic concepts and applications of genomics. The course covers a wide range of topics including how genomes are mapped and sequenced as well as the latest computational and experimental techniques for predicting genes, splice sites, and promoter elements. High throughput techniques for ascribing function to DNA, RNA, and protein sequences including microarrays, mass spectrometry, interspecies genome comparisons and genome-wide knock-out collections will also be discussed. Finally, the use of genomic techniques and resources for studies of human disease will be discussed. A heavy emphasis will be put on students acquiring the basic skills needed to navigate databases that archive sequence data, expression data and other types of genome-wide data. Through problem sets the students will learn to manipulate and analyze the large data sets that accompany genomic analyses by writing simple computer scripts. While students will become sophisticated users of computational tools and databases, programming and the theory behind it are covered elsewhere, in Michael Brent's class, Bio 5495 Computational Molecular Biology. Because of limited space in our teaching lab, enrollment for lab credit will be limited to 24 students. Priority will be given to students in the DBBS program. Others interested in the course may enroll for the lectures only. If you have previous experience in computer programming, we ask that you do not enroll for the laboratory credit. Prerequisites, Molecular Cell Biology (Bio 5068), Nucleic Acids (Bio 548) or by permission of instructor. Lecture 3 units of credit; lab 1 additional unit, space limited. Credit variable, maximum 4 units.

L41 Biol 5489 Human Genetics Journal Club

In this biweekly journal club on Human Genetics we will present and discuss current cutting edge papers in human and mammalian molecular genetics. Students learn presentation skills, how to critique a paper and how to interact with a very active and critical audience. Prerequisites; Any person interested in the current state of the art in Human Genetics may attend this course. It is a requirement that all students wishing to earn credit in this course must present a 1.5 hour journal club talk and must regularly attend and participate in the journal club throughout the year. Credit 0.5 units.

L41 Biol 5491 Advanced Genetics

Fundamental aspects of organismal genetics with emphasis on experimental studies that have contributed to the molecular analysis of complex biological problems. Examples drawn from bacteria, yeast, nematodes, fruit flies and mammalian systems. Prerequisite, graduate standing or permission of instructor. Credit 3 units.

L41 Biol 5494 Quantitative Cardiovascular Physiology

The course will cover the mechanical, thermodynamic, electrical and pump function role of the heart as well as tissue elasticity, viscosity of selected media, aspects of the microcirculation, wave propagation. Mathematical modeling of various physiologic functions will be stressed. The connection between model prediction and comparison to in-vivo human physiologic data will be emphasized. The question of whether new physiology can be predicted from first principles will be considered. Credit 3 units.

L41 Biol 5495 Computational Molecular Biology

This course is a survey of algorithms and mathematical methods in biological sequence analysis (with a strong emphasis on probabilistic methods) and systems biology. Sequence analysis topics include introduction to probability, probabilistic inference in missing data problems, hidden Markov models (HMMs), profile HMMs, sequence alignment, and identification of transcription-factor binding sites. Systems biology topics include the discovery of gene regulatory networks, quantitative modeling of gene regulatory networks, synthetic biology, and (in some years) quantitative modeling of metabolism. Prerequisite: CSE 131 or CSE 501N.

Credit 3 units. EN: BME T, TU

L41 Biol 5496 Seminar in Computational Molecular Biology

Students present current research papers and the appropriate background material in the field of Computational Biology.

Arts and Sciences students must take this course for credit; Engineering students must take this course Pass/Fail.

Credit 1 unit.

L41 Biol 5497 Special Topics in Computational Molecular Biology

Indepth discussion of problems and methods in Computational Molecular biology. Each year three topics will be covered and those will change yearly. Prerequisite, Bio 5495 or instructor's consent.

Credit 2 units.

L41 Biol 5498 An Introduction to Genomic Analysis

Formal lectures will serve to highlight the role that genomic analysis currently plays in all areas of genetics. A series of lectures and demonstrations will introduce the students to many of the techniques presently used in genomic analysis. Prerequisite: Nucleic Acids (Biol 548) or approval of coursemaster. One hour lecture and 1 hour of laboratory demonstration/lecture each week.

Credit 2 units.

L41 Biol 5499 Cancer Informatics Journal Club

This journal club will explore current topics in cancer informatics. Current literature will be reviewed for advanced cancer genome analysis methods, statistics, algorithms, tools, databases, and other informatics resources.

Credit 1 unit.

L41 Biol 550 Medical Genetics

A significant portion of the first-year course in basic medical genetics devoted to human and clinical genetics, with emphasis on how genomic information will transform the practice of medicine. Topics covered include population genetics; molecular basis of mutations; human functional genomics; mouse models of human disease; pharmacogenomics; metabolic defects. Lectures, small group discussions, patient information session. Prerequisite: an introductory genetics course and permission of the instructor.

Credit 2 units.

L41 Biol 5501 The Biology and Pathology of the Visual System

The purpose of the course is to provide a fascinating view of vertebrate eye development, anatomy, physiology and pathology. Topics to be covered include the molecules that control eye formation, ocular stem cells, the physiology of transparency, hereditary ocular diseases, phototransduction, the neurobiology of the retina and central visual pathways, age-related eye diseases, and many others. The course is open to all second year graduates students and above. Ophthalmology residents and postdocs with an interest in vision are strongly encouraged to attend.

Credit 3 units.

L41 Biol 5504 Algorithms for Biosequence Comparison

This course surveys algorithms for comparing and organizing discrete sequential data, especially nucleic acid and protein sequences. Emphasis is on tools to support search in massive biosequence databases and to perform fundamental comparison tasks such as DNA short-read alignment. Prerequisite: CSE 347 or permission of instructor. These techniques are also of interest for more general string processing and for building and mining textual databases. Algorithms are presented rigorously, including proofs of correctness and running time where feasible. Topics include classical string matching, suffix array string indices, space-efficient string indices, rapid inexact matching by filtering (including BLAST and related tools), and alignment-free algorithms. Students complete written assignments and implement advanced comparison algorithms to address problems in bioinformatics. This course does not require a biology background. Prerequisites: CSE 347 or instructor permission Revised: 2019-02-21
Same as E81 CSE 584A

Credit 3 units. EN: BME T, TU

L41 Biol 5505 Independent Study in Fundamentals of Molecular and Microbial Genetics

This literature-based course will introduce students to seminal and current studies in molecular and microbial genetics. Students will read and present a minimum of 12 landmark papers that helped shape our understanding of molecular and microbial genetics. Emphasis will be placed on students' ability to comprehend and explain these studies via chalk talks. All presentations will be given by students. Prerequisites: L41 5491 Advanced Genetics and permission from instructor.

Credit 2 units.

L41 Biol 5507 Genome Engineering Methods and Applications

This course will cover the basic principles of genome engineering with emphasis on Cas9/CRISPR technology. It will consist of discussion sessions in which students will present assigned manuscripts followed by a general discussion of the topic directed by the instructor. The course will cover the mechanisms of genome editing using host DNA repair systems, the function of Cas9, and how Cas9 can be harnessed to introduce defined mutations into almost any genome. The use of Cas9 to activate or repress genes, alter chromatin modifications, and the application of these Cas9 systems to conducting genome-scale screens in mammalian cells as well as its use in studying cell fate will be highlighted. Finally, we will study

how Cas9 methodologies can be used to introduce disease-associated variants into pluripotent stem cells (e.g. iPSCs) that can be differentiated into disease-relevant cell for use in functional genomic studies.

Credit 1 unit.

L41 Biol 5511 Molekoolz

Behind in your reading? Molekoolz is dedicated to bringing you the latest and greatest from the past year. This year we return to our roots and bring you a dozen of the hottest molecules of '97/'98 and the biology that makes 'em great. Come join us as we explore the Ras pathway, the Notch pathway, TGF β signaling, the intrepid Hedgehog, those sneaky Wnt's, the latest in circadian rhythms, and many more of your favorites. All are welcome, but it will be aimed at advanced graduate students, postdoc, and interested faculty. Two credits, contingent on attendance and reading of (short) assigned paper.

Credit 2 units.

L41 Biol 5512 Diseases of Membrane Transport & Excitability

Classes will consider the molecular basis of the disease as well as animal models and current clinical studies. Addressing studies from the level of basic biophysical and molecular properties of the underlying ion channels/transporters, to the cellular defects, to organ and animal outcomes and therapies., which will encourage and force students to develop their ability to integrate understanding at multiple levels. Students will be introduced to emerging ideas in clinical diagnosis, management and treatment, when appropriate, clinical specialists will allow student participants to directly observe and participate in the clinical experiences. Prerequisites, Bio 5068 Fundamentals of Molecular Cell Biology.

Credit 2 units.

L41 Biol 554 Neural Sciences

An integrated course dealing with the structure, function and development of the nervous system. The course will be offered in the Spring of the first year Medical School calendar. Prerequisite: Biol 3411 or Biol 501 and approval of the instructor.

Credit 5 units.

L41 Biol 5542 Neural Constructs of Spatial Orientation

The course will explore the neural mechanisms and perceptual constructs that underlie spatial orientation. The brain's capacity to use several sensory systems to integrate information relative to position in space, movement direction, and navigation will be examined. Quantitative models of sensory transduction and neural information coding for vestibular, visual, proprioceptive, and magnetoreception will be derived and tested in an effort to comprehend the global interactive representation of spatial orientation. The class will meet twice weekly where readings will be assigned from the extant literature and secondary sources. Materials will be provided. Previous experience with engineering systems analysis and MATLAB will be helpful, but not necessary.

Credit 3 units.

L41 Biol 5565 Oral Presentation of Scientific Data

Practical course on how to prepare and present scientific data to an audience. Prerequisite: First year neuroscience program courses. Meets once a week for 90 minutes.

Credit 1 unit.

L41 Biol 5571 Cellular Neurobiology

This course will present a fully integrated overview of nerve cell structure, function and development at the molecular and cellular level. Broad topics to be covered include gene structure and regulation in the nervous system, quantitative analysis of voltage- and chemically-gated ion channels, presynaptic and postsynaptic mechanisms of chemical neurotransmission, sensory transduction, neurogenesis and migration, axon guidance and synapse formation. Two lectures plus one hour of discussion per week for 14 weeks. There will be three exams, as well as homework problems and summaries of discussion papers. Prerequisites: graduate standing or permission of the instructor.

Credit 6 units.

L41 Biol 5577 Synapses Journal Club

Synaptic function and malleability are fundamental to nervous system function and disease. This is an advanced seminar in the development, structure, and function of the synapse in health and disease. It is a natural extension of topics covered in Bio 5571. It may be primarily of interest to students in the Neurosciences Program, but also to students in MCB, Development, Biochemistry, Computational Biology, and Molecular Biophysics. Generally a topic for the semester helps focus the group; past topics have included Synapses and Disease, Neurotransmitter Transporters, Glutamate Receptors, Dendrites, GABA receptors. Participants (students, postdocs, and faculty) alternate responsibility for leading critical discussion of a current paper. Active participation offers the opportunity for students to hone their critical thinking and presentation skills. Students enrolling for credit will be expected to attend each week, to lead discussion once per semester and to provide written critiques (1-2 pages each) of two papers. Prerequisites, Graduate standing in DBBS; Bio 5571 preferred.

Credit 1 unit.

L41 Biol 5581 Neural Basis of Acoustic Communications

Lectures and seminars in hearing and acoustic signals of animals, from invertebrates to humans. Structural and functional adaptation for processing the signals for communication and echolocation are considered. Prerequisite: Bio 3411 or Bio 3421, or a course comparable to Physiological Psychology. One two-hour class a week. Offered in the fall semester of odd numbered years.

Credit 2 units.

L41 Biol 5606 Cognitive Neuroscience of Human Memory

A survey of issues related to the cognitive neuroscience of human memory will be discussed including working and long-term memory. Reading will consist of classic works by James, Fuster, Goldman-Rakic, Milner, Squire as well as many contemporary articles that highlight hot issues and new techniques. Requirements will include readings, attendance, brief presentations, and active participation in classroom discussion. Prerequisite: Graduate standing. Same as L41 Biol 5606.

Same as L33 Psych 5090

Credit 3 units.

L41 Biol 560A Special Topics in Nuclear Chemistry:**Radiochemistry for the Life Sciences**

This course will provide an introduction to nuclear science (e.g. radioactive decay, nuclear stability, interactions of radiation with matter) and followed by an overview of how radiochemistry is used in the life sciences. Lectures on radiolabeling chemistry with radionuclides used in medical imaging (single photon emission computed tomography (SPECT) and positron emission tomography (PET) and their applications will be presented. In addition, lectures on radiochemistry with tritium (H-3) and C-14 will also be included. Additional applications include environmental radiochemistry as applied to nuclear waste disposal and biofuels.

Same as L07 Chem 536

Credit 2 units.

L41 Biol 5617 Development Biology PhD Program Seminar

In response to student feedback for additional training in Developmental Biology obtained from surveys and group meetings, we propose a new seminar course in Developmental Biology. This once a week course will introduce student in the Developmental, Regenerative, and Stem Cell Biology PhD Program both to the classical embryological experiments that defined key concepts in developmental biology, such as cellular fields, equivalence groups, cytoplasmic determinants, and the more modern experiments that uncovered the genetic and molecular basis of these processes. In general, the classes will be individual sessions on professional development, such as scientific presentation, how to navigate graduate school, etc.

Credit 1 unit.

L41 Biol 5619 Advanced Cognitive, Computational, and Systems Neuroscience

This course will develop critical thinking and analysis skills with regard to topics in Cognitive, Computational and Systems Neuroscience. Course format will be a series of modules composed of intensive, faculty-led case studies on interdisciplinary topics at the intersection of psychology, computation and neuroscience. The goal will be to highlight the benefits of integrative, interdisciplinary approaches, by delving into a small set of topics from a variety of perspectives, rather than providing a survey-level introduction to a broader set of topic areas. Modules will involve a combination of lectures and student-led discussion groups, with students further expected to complete a multi-disciplinary integrative final review paper. Case-study topics will vary somewhat from year to year, but are likely to include some of the following: temporal coding as a mechanism for information processing, coordinate transformations in sensory-motor integration, mechanisms of cognitive control, motor control strategies including application to neural prosthetics, and memory systems in health and disease. Same as L33 Psych 519

Credit 3 units.

L41 Biol 5621 Computational Statistical Genetics

This course covers the theory and application of both classical and advanced algorithms for statistical modeling in genetics. Students learn how to derive, design and implement their own statistical genetics models through computer labs by writing their own software program from the basic model equations up to analyze one of four major term project datasets. Didactic lectures cover a wide range of important topics including: Maximum Likelihood theory, Frequentist vs. Bayesian approaches, Information Theory, Model Selection techniques,

analysis methods for pedigrees vs. unrelated individuals, rare vs. common variant approaches, the E-M Algorithm, mixed model approaches, MCMC methods, Hidden Markov Models, Coalescent Theory, Haplotyping Algorithms, Epigenetic Analysis methods, Genetic Imputation Algorithms, Graphical Models, Decision Trees and Random Forests, Permutation/Randomization Tests, classification and Data Mining Algorithms, Population Stratification and Admixture Mapping Methods, Multiple comparisons corrections, and Power and Monte-Carlo simulation experiments. Same as M21-621

Credit 3 units.

L41 Biol 5622 Cognitive, Computational, and Systems Neuroscience Project Building

The goal of this course is to help students in the CCSN Pathway develop the critical thinking skills necessary to develop and implement high quality, interdisciplinary research projects. Throughout the course of the semester, each student will develop a research plan in their chosen area of interest. The plan will be developed in consultation with at least two faculty members (from at least two different subdisciplines within the pathway) as well as the other students and faculty participating in the course. The culmination of this course will be for each student to produce an NIH-style grant proposal on the research project of their choosing. For most students, this will serve either as their thesis proposal or a solid precursor to the thesis proposal. The course will be designed to help facilitate the development of such a research plan through didactic work, class presentations, class discussion, and constructive feedback on written work. The course will begin with a review of written examples of outstanding research proposals, primarily in the form of grant submissions similar to those that the students are expected to develop (i.e., NRSA style proposals, R03 proposals). Review of these proposals will serve as a stimulus to promote discussion about the critical elements of good research proposals and designs in different areas. Each student will be expected to give three presentations throughout the semester that will provide opportunities to receive constructive feedback on the development and implementation of research aims. The first presentation (towards the beginning of the semester) will involve presentation of the student's general topic of interest and preliminary formulation of research questions. Feedback will emphasize ways to focus and develop the research hypotheses into well-formulated questions and experiments. The second presentation will involve a more detailed presentation of specific research questions (along the lines of NIH-style Specific Aims) and an initial outline of research methods. The final presentation will involve a fuller presentation of research questions and proposed methods. Feedback, didactic work, and group discussion throughout the semester will include guidance on critical components of the development of a research plan, including how to perform literature searches, formulate testable hypotheses, write critical literature summaries, and design experiments and analyses. The course will meet once a week, with faculty members from different tracks within the Pathway present at each meeting. This will allow students to receive feedback from several perspectives. Prerequisite: Member of CCSN Pathway, permission of instructor.

Credit 3 units.

L41 Biol 5646 First-Year Fundamentals

This course will provide a two-part introduction to neuroscience research fundamentals. Namely, it will introduce elementary statistical analysis for neuroscience research as well as grant writing to support neuroscience-related research. Enrollment is limited to first-year neuroscience students.

Credit 0.5 units.

L41 Biol 5648 Coding and Statistical Thinking in the Neurosciences

Students are introduced to scientific programming in Python. Students will learn common programming constructs and how to visualize and analyze data. Coding will be integrated into a statistics curriculum introducing summary statistics, probability distributions, simulation and hypothesis testing, and power analysis for experimental design.

Credit 1 unit.

L41 Biol 5651 Neural Systems

The course will consist of lectures and discussions of the sensory, motor and integrative systems of the brain and spinal cord, together with a weekly lab. The lectures will present aspects of most neural systems, and will be given by faculty members who have specific expertise on each topic. The discussions will include faculty led group discussions and papers presented and discussed by students. The labs will include human brain dissections, examination of histological slides, physiological recordings, behavioral methods, computational modeling, and functional neural imaging.

Credit 4 units.

L41 Biol 5657 Biological Neural Computation

This course will consider the computations performed by the biological nervous system with a particular focus on neural circuits and population-level encoding/decoding. Topics include, Hodgkin-Huxley equations, phase-plane analysis, reduction of Hodgkin-Huxley equations, models of neural circuits, plasticity and learning, and pattern recognition & machine learning algorithms for analyzing neural data. Note: Graduate students in psychology or neuroscience who are in the Cognitive, Computational, and Systems Neuroscience curriculum pathway may register in L41 5657 for three credits. For non-BME majors, conceptual understanding, and selection/application of right neural data analysis technique will be stressed. Hence homework assignments/examinations for the two sections will be different, however all students are required to participate in a semester long independent project as part of the course. Calculus, Differential Equations, Basic Probability and Linear Algebra Undergraduates need permission of the instructor. L41 5657 prerequisites: Permission from the instructor

Same as E62 BME 572

Credit 3 units. EN: TU

L41 Biol 5663 Neurobiology of Disease

This is an advanced graduate course on the pathology of nervous system disorders. This course is primarily intended to acquaint Neuroscience graduate students with a spectrum of neurological diseases, and to consider how advanced neuroscientific approaches may be applied to promoting recovery in the brain. Topics will be presented by Washington University faculty members and include: neurooncology, stroke, retinal disease, perinatal brain injury, neurodegenerative disorders, neuroinflammation, epilepsy, and psychiatric disorders. The class will meet for 2 hours each week. Each

session will be led by a faculty guest with expertise in a specific neurological or psychiatric disease. In the first hour, the speaker will discuss clinical manifestations and pathophysiology. Where possible, the clinical presentation will be supplemented with a patient demonstration or videotape. After a 30 minute break for pizza and soda, the second hour will follow a journal club format. Two or three students will review current papers assigned by the speaker or course director. This course is offered in alternate years. Prerequisite: Introductory neuroscience course at the graduate or medical school level.
Credit 2 units.

L41 Biol 5665 The Science of Behavior

The primary function of nervous systems is to control behavior. Understanding the links between brain and behavior requires an understanding of cognition-the computations performed by the brain, as well as the algorithms underlying those computations and the physical substrates that implement those algorithms. The goal of this course is to introduce students to the tools, concepts, and techniques for the experimental study of cognition and behavior in humans and nonhuman animals. We will focus on cognitive capacities that are well-developed in humans and can be compared with those of other species, to develop an understanding of how evolution shapes cognition and behavior. Students who complete this course will be able to ask questions and form hypotheses about the computations and algorithms underlying cognition and behavior, and to design experiments that test these hypotheses. PREREQ: Graduate standing or permission of the instructor
Same as L33 Psych 5665
Credit 3 units.

L41 Biol 5678 Clockclub

Clockclub focuses on recent advances in the study of biological timing including sleep and circadian rhythms. Participants discuss new publications and data on the molecules, cells and circuits underlying daily rhythms and their synchronization to the local environment. Students registered for this journal club will lead a discussion once during the semester. Prerequisites: BIO 2970 or permission of instructor.
Credit 1 unit.

L41 Biol 5682 Foundations in Biological Neural Computation

This course meets with E62 BME 572/L41 Biol 5657, Biological Neural Computation. Students in this Foundations course will not design and implement an independent modeling project. Instead they will complete directed simulation of classic models in computational and theoretical neuroscience. Graduate students in psychology or neuroscience who are in the Cognitive, Computational, and Systems Neuroscience pathway can take either this 2-credit Foundations course or the 3-credit full course to satisfy pathway requirements for a computational course. Prerequisites, Multivariate calculus and either biological or psychological foundations of neuroscience.
Credit 2 units.

L41 Biol 5691 Mathematics and Statistics of Experimental Neuroscience

This course will be open to the WU brain science community; first and second year graduate students are especially welcome. We aim to develop practical insights and strategies for experiment design, data reduction, and statistical tests. Topics will include foundations of statistical analysis; resampling and

bootstrapping; multivariate analysis and dimension reduction; and applications appropriate for cellular and molecular, systems, imaging, and behavioral neuroscience. Prerequisites: Some calculus; some laboratory experience in neuroscience.
Credit 2 units.

L41 Biol 5702 Current Approaches in Plant and Microbial Research

This course is designed to introduce graduate students and upper-division undergraduates to contemporary approaches and paradigms in plant and microbial biology. The course includes lectures, in-class discussions of primary literature and hands-on exploration of computational genomic and phylogenetic tools. Evaluations include short papers, quizzes, and oral presentations. Over the semester, each student works on conceptualizing and writing a short NIH-format research proposal. Particular emphasis is given to the articulation of specific aims and the design of experiments to test these aims, using the approaches taught in class. Students provide feedback to their classmates on their oral presentations and on their specific aims in a review panel. Prereq: Bio 2970 or permission of the instructor.
Credit 4 units.

L41 Biol 5703 Experimental Design and Analysis in Biological Research

In-depth exploration of landmark and current papers in genetics, molecular and cell biology, with an emphasis on prokaryotes and eukaryotic microbes. Class discussions will center on such key discoveries as the chemical nature of genetic material, the genetic code, oxygen producing light-spectrum, cell-cell signaling, transcriptional regulation, the random nature of mutation, and cell cycle regulation. Emphasis will be placed on what makes a good question or hypothesis, expedient ways to address scientific problems, and creative thinking. The last third of the course will consist of student-run seminars on selected topics to increase proficiency in the synthesis of new material and public presentation skills.
Credit 2 units.

L41 Biol 572 Seminar in Plant Biology

A weekly discussion of modern research in plant biology including topics in molecular genetics, development, biochemistry, physiology, population dynamics and plant-pathogen interactions. Credit will be contingent on one journal club presentation per student, regular attendance and active participation in group discussions.
Credit 1 unit.

L41 Biol 5721 Student-Run Plant Biology Journal Club

Students of the Plant Biology Program are responsible for organizing this journal club which highlights new papers that significantly advance our understanding of plants. Students arranging to give presentations should consult with one of the faculty organizers at least one week in advance of their talk to gain approval of their topic and the paper chosen. Students taking the journal club for credit are expected to attend regularly and to make one presentation per semester. Course meets on alternate Fridays. No prerequisites, open to all graduate students and to undergraduates who obtain permission from one of the faculty advisors.
Credit 1 unit.

L41 Biol 5723 Seminar in Plant and Microbial Bioscience

This course emphasizing presentation skill and critical analysis counts towards the PMB Graduate Program's journal club course requirement. Students will be responsible for dividing and presenting 30 current research publications selected by the course masters. In addition to assembling brief PowerPoint presentations providing background and significance for their assigned articles, students are expected to provide classmates with a 1 page primer and short list of relevant references

Credit 2 units.

L41 Biol 580 Seminar in Population Biology

This weekly seminar, covering different topics each semester, should be taken by graduate students in the program.
Prerequisite: graduate standing or permission of the instructors.
Credit variable, maximum 3 units.

L41 Biol 5801 Biochemistry & Molecular Biophysics Seminar Journal Club

This will be a journal club-based seminar course mirroring the topics covered by Biochemistry and Molecular Biophysics (BMB) seminar speakers during the concurrent semester. Students will present a paper published by one of the BMB seminar speakers one-week ahead of that speaker's seminar. This will allow students and faculty to become more familiar with the research programs of BMB invited speakers, likely stimulating discussion within the Q&A period after the seminar, as well as during informal meet-the-speaker lunch sessions. Students will be evaluated on their journal club presentation, attendance and class participation.

Credit 1 unit.

L41 Biol 584 Climate Change Reading Group

The Climate Change Reading Group is made up of multi-disciplinary faculty and students from multiple institutions in St Louis: WUSTL, UMSL, SLU, Missouri Botanical Garden, Danforth Center, and more. Many of us in different labs, departments, and institutions around STL are actively investigating aspects and effects of climate change; this reading group provides a venue for interacting with others in the community. Subject matter within the context of Climate Change will be chosen each week by a different presenter. Students can join this reading group for 1 credit if they agree to read all papers, actively participate in discussions, find and present one high quality scientific paper on climate change in the field of their choice and moderate the discussion of this paper. The students will be evaluated on their participation, their understanding of the issues, and their presentation. Prerequisites: Contact the course coordinator.

Credit 1 unit.

L41 Biol 585 Seminar in Floristic Taxonomy

This weekly seminar provides an introduction to/overview of Plants, each semester progressively covering orders and families in a sequence derived from the Angiosperm Phylogeny Website (<http://www.mobot.org/MOBOT/Research/APweb/welcome.html>); in Spring 2015, the seminar will cover several crown orders of the monocots, including grasses and relatives. Weekly presentations include a summary of all relevant information (molecular, chemical, anatomical, embryological, morphological, ecological, geographical, historical/paleontological, etc.) about the plant group under consideration, review of the classification/phylogeny of the group, examination of fresh and/or preserved specimens, and

discussion of relationships, human uses, and other relevant aspects of the biology of that group. Credit will be contingent on one (or two) seminar presentation(s) per student, regular attendance and active participation in group discussions.

Credit 1 unit.

L41 Biol 5862 Seminar on Professional Development for Graduate Students in Ecology, Evolution & Population Biology

This is a weekly discussion seminar course in which advanced graduate students and postdocs in STEM will discuss the practices of scientific teaching and basic professional development skills. Topics covered will include scientific teaching, active learning, assessment driven instruction, creation inclusive classrooms, preparing for job interviews, preparing grant proposals, and balancing family and work. There will be several panel discussions with invited speakers on a range of potential career options to STEM PhDs. Students will prepare or revise their professional portfolio materials over the course of the semester. The course is open to all DBBS graduate students and is required for GAANN fellows. Prerequisite: Graduate student status in the DBBS or permission of instructor.

Credit 1 unit.

L41 Biol 5866 Communicating Science: Writing for Multiple Audiences

This course introduces strategies for writing effectively and communicating scientific research to a variety of audiences. Students will learn to reduce jargon, explain scientific concepts in common language, write clearly and concisely, and use sentence structure to maximum efficiency. Written assignments emphasize the significance and innovation in scientific research that appeal to broad audiences, including: the general public, students, policy makers, grant reviewers, and journal editors. This course meets biweekly and consists of lectures and small group sessions. You must enroll in both the lecture session (section 1) and a small group (section A, B, C, or D).

Credit 1 unit.

L41 Biol 5867 Career Planning for Biological Scientists

This 6-week course will guide you through nationally recognized and evidence-based career exploration curricula. It is intended for DBBS Ph.D. students and bioscience postdocs who want to jump-start career planning and professional skills needed for a broad range of scientific careers. Topics include self-assessment, career exploration, and goal-setting for long-term success. You will work on a team to research the scientific career path of your choice. Each team will study the specific required knowledge, skills, and attributes of their career interest or employment sector. As part of this research project, you will complete a simulated job exercise and network with alumni or local leaders in your chosen field, gaining valuable real-world insights and creating essential professional connections. Meets October 22, 2018-December 3, 2018.

Credit 1 unit.

L41 Biol 590 Research

Credit to be arranged.
Credit variable, maximum 12 units.

L41 Biol 5901 Biomolecular Condensates Journal Club

Biomolecular condensates are non-stoichiometric assemblies of protein and nucleic acids that provide a means for cellular spatiotemporal organization. Over the last decade, a growing appreciation has emerged that many such condensates (which include nucleoli, stress granules, paraspeckles, or even transcriptional assemblies) may form in part via liquid-liquid phase separation, although this does not preclude other assembly mechanisms. A challenge for those new to this field reflects the need to apply ideas from condensed matter physics, biochemistry, physical chemistry, and cell biology. In this journal club we will focus on developing an understanding of the core concepts surrounding biomolecular condensates and phase transitions in biology by reading a mixture of cutting edge and more 'classic' (i.e. mid 2010s) literature.

Credit 1 unit.

L41 Biol 5902 Introduction to the Scholarship of Teaching and Learning

In this course, advanced graduate students and postdocs in STEM will 1) learn the fundamentals of the Scholarship of Teaching and Learning (SoTL)-which is the practice of developing, reflecting on, and evaluating teaching methods to improve student learning, 2) Develop a working knowledge of SoTL, which draws on research in education, STEM education, and cognitive science, 3) Understand how SoTL can lead to the dissemination of new knowledge to a broad audience of educators through publication and presentations., and 4) Develop the central elements of a SoTL project. These elements include articulating questions about classroom teaching that can be addressed in a SoTL research project; developing working hypotheses in response to the questions; designing an evaluative plan, including specific research methods, the type of data to be collected, and how the data will be analyzed in relation to the hypotheses; identifying and understanding necessary procedures to obtain IRB approval for the research. Prereqs: Must be an advanced graduate student or a postdoctoral appointee with some teaching experience, and must have completed 4 STEM Pedagogies workshops (2 are foundational topics) offered by The Teaching Center or received approval from one of the instructors. Same as U29 Bio 4902.

Credit 1 unit.

L41 Biol 590B Research

Credit to be arranged.

Credit variable, maximum 12 units.

L41 Biol 590C Research

Credit to be arranged.

Credit variable, maximum 12 units.

L41 Biol 590D Research

Credit to be arranged.

Credit variable, maximum 12 units.

L41 Biol 5911 Seminar in Biology & Biomedical Sciences

These seminars cover the recent literature in various areas not included in other courses, or in more depth than other courses. Prerequisite: permission of instructor. Credit to be arranged.

Credit variable, maximum 12 units.

L41 Biol 5922 Entering Mentoring

This course is a series of facilitated discussions aimed at developing and improving mentoring skills for those involved in supervising undergraduate research experiences. It is designed for postdocs and graduate students who are or will be 'bench mentors' for undergraduates doing Bio 500 and/or Summer Research. Participants will receive "Entering Mentoring" materials, including articles and worksheets to facilitate mentoring interactions with their mentee, plus several resource books relevant to mentoring. They will develop a mentoring philosophy statement, work on specific assignments designed to improve their relationship with their mentee and share their present and past experiences as mentors and mentees. Bench mentors will be eligible for a travel award to help defray expenses for attending a meeting with their mentee, if that student wins one of the HHMI SURF travel awards (4-5 awarded annually) or is otherwise being supported to present at a scientific meeting. Prerequisite: open to graduate students and postdocs, with priority for those who plan to mentor undergraduates in summer research experiences. Graduate students and postdocs do NOT need to be mentoring a student at the time of the course; it is open to all with an interest in mentoring now or in the future. Note: The sessions will be held either at the beginning of the day or the end of the day at the Danforth campus. Once registration closes, an email will be sent to those registered to poll for the best days & times.

Credit 1 unit.

L41 Biol 5930 Advanced Topics in Neuroscience

This course will expose upper level students and postdocs to advanced topics and methods in Neuroscience. The course will rapidly fill gaps in student knowledge in areas that may be relevant to new directions in thesis work or interest areas. Each section of the course will be offered asynchronously, sometimes in coordination with existing journal clubs and other seminars. Each section will meet for 2-hours per week for 3-weeks. Sections may start with a didactic component or review paper, but will quickly delve into discussion of primary papers curated by faculty and covering a focused topic. It is expected that papers will cover historical and current contexts. Some sections will be techniques-focused; others conceptually focused. Each section will be led by a faculty member drawn from the Neuroscience program in an area of their expertise. Objectives include deepening critical thinking, statistical knowledge, experimental design, and technical prowess.

Credit 0.5 units.

L41 Biol 5940 Foundations in Cancer Biology and Experimental Cancer Biology

This advanced course will teach the clinical perspective of cancer biology using topics from oncology, radiation biology, radiology, pathology, immunology and surgery. Students will learn to write a grant proposal that includes a clinical trial element while also shadowing physicians in a real cancer clinical setting.

Credit 3 units.

L41 Biol 598 Topics in Evolution, Ecology and Population Biology

This course will meet weekly to discuss ongoing research and future directions of the Evolution, Ecology, and Population Biology (EEPB) graduate program. A different EEPB faculty member will present each week. This course introduces new EEPB students to the diversity of research questions and

approaches undertaken by laboratories in the EEPB program; it will also introduce new students to faculty and vice versa. The course will educate the students about the breadth of research in evolution, ecology, and behavior. It will also provide knowledge that students can use when choosing lab rotations and interdisciplinary exposure to enhance creativity in research. Credit 1 unit.

L41 Biol 5989 Advanced Topics in Neuroscience

This course will expose upper-level and postdoctoral students to advanced topics and methods in neuroscience. The course will rapidly fill gaps in student knowledge in areas that may be relevant to new directions in thesis work or interest areas. Each section of the course will be offered asynchronously, sometimes in coordination with existing journal clubs and other seminars. Each section will meet for two hours per week for three weeks. Sections may start with a didactic component or a review paper, but they will quickly delve into the discussion of primary papers curated by faculty and covering a focused topic. It is expected that papers will cover both historical and current contexts. Some sections will focus on technique; others will be conceptually focused. Each section will be led by a faculty member drawn from the Neuroscience program in an area of their expertise. Objectives include deepening critical thinking, statistical knowledge, experimental design, and technical prowess.

Credit 0.5 units.

L41 Biol 5991 Decision Neuroscience

This is an advanced, reading-intensive graduate course. We will meet once a week for 3 hrs and focus primarily on discussing the literature on decision making from various perspectives. Decision making is a central object of study in multiple disciplines including neuroscience, cognitive psychology, and economics. Within systems neuroscience, research in the past 20 years has developed in two main areas - namely perceptual decisions and economic (value-based) decisions. Each week we will discuss a specific topic and/or research question. Discussion topics will originate from perceptual decisions or economic decisions, and often be relevant to both. Readings will include experimental papers and computational/theoretical papers. Every week, students are expected to read the assigned papers and to write a short comment before class. In class, we will discuss the papers and the weekly topic in a journal-club format. Participation of PhD students from different programs is encouraged, pending permission from the instructor. The goal of the class is to bring graduate students from different disciplines up-to-date on the current debate(s) in decision neuroscience, and to inspire and support their future research.

Credit 3 units.

L41 Biol 5999 Independent Work

This course is designed for individual students wishing to explore in depth specialized areas of literature or technology with one or more faculty members. Credit will vary with the amount of work and discussion, but cannot be more than 3 credits.

Credit variable, maximum 3 units.

Chemistry

For students interested in discovering insights into nature, exploring new ways to meet the needs of our technological society, and learning new methods for creating novel compounds and useful materials, chemistry is an excellent major to pursue.

Chemistry is a multifaceted science that extends into biology, medicine, physics, mathematics, business and commerce. Studying chemistry provides students with the opportunity to explore the structure and constitution of the microworlds of atoms and molecules, the chemical and physical transformations that occur there, and the principles that govern these changes.

Our program provides a strong foundation in the core areas of chemistry: organic, physical, inorganic, nuclear and theoretical. Special emphases in the department include such emerging interdisciplinary fields as organometallic, bioorganic, biophysical, macromolecular, polymer, environmental and materials chemistry. The department has close research ties with the departments of Physics; Earth and Planetary Sciences; Biology; Biomedical Engineering; Energy, Environmental & Chemical Engineering; and Mechanical Engineering & Materials Science. It also works closely with various departments at the Washington University School of Medicine.

Undergraduate majors in chemistry study chemistry with renowned scientists who are teacher-scholars dedicated to the students' learning experience. The department is small, and it has world-class instruments and facilities, which allows students to receive individualized instruction and to participate in cutting-edge science. Each student works closely with a faculty member to design and carry out an original research project. Students may participate in interdisciplinary research at the School of Medicine or the McKelvey School of Engineering. Research internships at local companies can also be arranged.

A variety of creative and productive careers are available to graduates with a degree in chemistry. Graduates may pursue a career in chemistry or in such related professions as biochemistry, medicine and chemical engineering. Most students continue on to graduate or medical school, and some go on to business or law school. Positions in government, industry and education are also available.

Majors

The Major in Chemistry

Total units required: 53 to 62

Required courses: To prepare for a major in chemistry, students will take the following:

Code	Title	Units
Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Math 131	Calculus I	3
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1
Math 132	Calculus II	3
Math 233	Calculus III	3
Total Units		35

Note: In certain instances, students may substitute Chem 105 and Chem 106 for Chem 111A and Chem 112A. Please consult the department's director of undergraduate studies for details.

Majors in chemistry must take a minimum of 18 units of advanced courses in chemistry or biochemistry, among which the following must be included:

Code	Title	Units
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 461	Inorganic Chemistry	3
Total Units		9

In addition, 9 units in chemistry at the 300 level or above must be taken (not including Chem 490 Introduction to Research or Chem 495 Advanced Undergraduate Research in Chemistry). Biol 451 General Biochemistry may be used to complete 3 of the required 9 units.

At least 3 of these 9 advanced units must be in a laboratory course chosen from the following list:

Code	Title	Units
Chem 358	Organic Chemistry Laboratory II	4
Chem 435	Nuclear and Radiochemistry Lab	3
Chem 445	Instrumental Methods: Physical Chemistry	3
Chem 462	Synthetic Polymer Chemistry Laboratory	3
Chem 470	Inorganic Chemistry Laboratory	3

Physics 217 Introduction to Quantum Physics and additional mathematics courses are also recommended. Chem 181 First-Year Opportunity: Applications in Chemistry, a seminar to introduce first-year students to research activities in the department, is optional. A working knowledge of computer programming and of a foreign language, such as German or Russian, is encouraged but not required.

Students have the advantage of planning their course program with their advisor in accordance with their personal interests. Some graduate courses are also available to seniors.

All chemistry course work must be taken in residence at Washington University to be applied toward the chemistry major. A minimum grade of C- must be earned in each course to count toward the chemistry major.

Note: Per the College of Arts & Sciences guidelines, for students who also pursue a minor or more than one major or minor program, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both programs. All advanced (300- and 400-level) courses must be unique to each program; in other words, no advanced course may be "double-counted" for the course work needed to fulfill

either program's minimal requirements. Should a student's major and minor programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.

The Major With a Concentration in Biochemistry

Chemistry majors with a concentration in biochemistry should add Biol 2960 Principles of Biology I and Biol 2970 Principles of Biology II as prerequisites to the major and specify a minimum of 18 units in advanced courses in biology and chemistry, among which the following must be included:

Code	Title	Units
Chem 481	General Biochemistry I	3
Chem 482	General Biochemistry II	3
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 461	Inorganic Chemistry	3
Total Units		15

In addition, at least one advanced lab must be chosen from the following list:

Code	Title	Units
Chem 358	Organic Chemistry Laboratory II	4
Chem 435	Nuclear and Radiochemistry Lab	3
Chem 445	Instrumental Methods: Physical Chemistry	3
Chem 462	Synthetic Polymer Chemistry Laboratory	3
Chem 470	Inorganic Chemistry Laboratory	3
Biol 4522	Laboratory in Protein Analysis, Proteomics and Protein Structure	3
Biol 4523	Molecular Methods in Enzyme Analysis	4

All chemistry course work must be taken in residence at Washington University to be applied toward the chemistry major. A minimum grade of C- must be earned in each course to count toward the chemistry major.

Note: Per the College of Arts & Sciences guidelines, for students who also pursue a minor or more than one major or minor program, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both programs. All advanced (300- and 400-level) courses must be unique to each program; in other words, no advanced course may be "double-counted" for the course work needed to fulfill either program's minimal requirements. Should a student's major and minor programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.

Additional Information

Latin Honors for the Major in Chemistry: To qualify for Latin Honors, students must complete a minimum of 21 units in advanced courses in chemistry or biochemistry, among which the following must be included:

Code	Title	Units
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 461	Inorganic Chemistry	3

The student must also take two additional advanced courses in chemistry.

Students must also complete **two** additional laboratories. Students must choose one synthetic laboratory:

Code	Title	Units
Chem 358	Organic Chemistry Laboratory II	4
Chem 462	Synthetic Polymer Chemistry Laboratory	3
Chem 470	Inorganic Chemistry Laboratory	3

and one physical laboratory:

Code	Title	Units
Chem 435	Nuclear and Radiochemistry Lab	3
Chem 445	Instrumental Methods: Physical Chemistry	3

Neither Chem 490 Introduction to Research nor Chem 495 Advanced Undergraduate Research in Chemistry can be used to satisfy the advanced laboratory requirements, but Chem 495 can be used to satisfy an elective.

Latin Honors for the Major in Chemistry With a Concentration in Biochemistry: To qualify for Latin Honors, students must complete a minimum of 21 units in advanced courses, including **either** one of the following six courses:

Code	Title	Units
Biol 334	Cell Biology	3
Biol 349	Microbiology	4
Chem 453	Bioorganic Chemistry	3
Chem 464	Inorganic Biochemistry	3
Chem 483	Protein Biochemistry	3
Chem 485	Nucleic Acids	3

or a second laboratory course in advanced chemistry or biology chosen from the following list:

Code	Title	Units
Chem 358	Organic Chemistry Laboratory II	4
Chem 435	Nuclear and Radiochemistry Lab	3
Chem 445	Instrumental Methods: Physical Chemistry	3
Chem 462	Synthetic Polymer Chemistry Laboratory	3
Chem 470	Inorganic Chemistry Laboratory	3
Biol 4522	Laboratory in Protein Analysis, Proteomics and Protein Structure	3
Biol 4523	Molecular Methods in Enzyme Analysis	4

Departmental Honors for the Majors in Chemistry and Chemistry With a Concentration in Biochemistry: To graduate "with distinction," a student must maintain a Chemistry grade-point average of 3.5 and complete at least one semester of Chem 490 research. To graduate "with high distinction," a student must maintain a Chemistry GPA of 3.65 and complete at least two semesters of chemistry research, one of which must be Chem 495. To graduate "with highest distinction," a student must maintain a Chemistry GPA of 3.8 and complete at least two semesters of chemistry research, one of which must be Chem 495. Chemistry research is defined as a research project performed under the direction of a Chemistry faculty member or a research project approved by the Chemistry Department Undergraduate Work Committee. A Chemistry GPA is calculated from the grades received in chemistry courses and chemistry prerequisites. The level of Departmental Honors that a student achieves will appear on the student's final transcript.

Minors

The Minor in Chemistry

Units required: 27 in chemistry; 17 in math and physics

Required courses:

Code	Title	Units
Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Physics 191	Physics I	3

Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1
Total Units		35

Note: In certain instances, students may substitute Chem 105 and Chem 106 for Chem 111A and Chem 112A. Please consult with the department's director of undergraduate studies for details.

Elective courses:

Student must complete 9 units of chemistry encompassing three courses in at least two subdisciplines. Biol 451 General Biochemistry may be used to satisfy one course of the three required. Courses must be at the 300 level or above, but Chem 490 Introduction to Research is specifically excluded.

All chemistry course work must be taken in residence at Washington University to be applied toward the chemistry minor. A minimum grade of C- must be earned in each course to count toward the chemistry minor.

Note: Per the College of Arts & Sciences guidelines, if a student has a major and a minor or has two minors, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both programs. All advanced (300- and 400-level) courses must be unique to each program; in other words, no advanced course may be "double-counted" for the course work needed to fulfill either program's minimal requirements. Should a student's major and minor programs require the same course, a departmentally sanctioned elective must be chosen to replace the course in one of the programs.

Courses

Visit online course listings to view semester offerings for L07 Chem (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L07&crslvl=1:4>).

L07 Chem 105 Introductory General Chemistry I

This course traces the development of chemistry from early atomic theory to modern descriptions of structure, bonding, and intermolecular interactions. Over the course of the semester, the students learn how macroscopic observations of stoichiometry, chemical reactions, the properties of elements and compounds, and chemical periodicity developed into the microscopic understanding of molecular structure and bonding. The semester begins with fundamentals related to stoichiometry, chemical reactions, solution chemistry, and gas properties, with an emphasis on quantitative problem solving. The octet rule, Lewis structures, and valence-shell-electron-pair repulsion (VSEPR) theory are then introduced as early efforts to describe the stability and structures of molecules. The localized electron model (LEM) and molecular-orbital theory (MOT) are next described as modern descriptions of chemical bonding. The course concludes with intermolecular forces such as hydrogen bonding and van der Waals interactions. This course will be a

serious introductory series that requires and develops algebraic-computation and problem-solving skills. Prerequisites: Two years of high-school math and one year of high-school chemistry or physics, or permission of instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L07 Chem 106 Introductory General Chemistry II

This course covers chemical equilibrium, thermodynamics, and kinetics at a fundamental level, with an emphasis on in-class problem solving. Gas-phase reactions, heterogeneous (multi-phase) reactions, acid-base reactions, and solubility equilibria are introduced first. Chemical thermodynamics is then taught in its relation to chemical equilibrium. The course finishes with chemical kinetics and rate laws. The content is similar to that of Chem 112A, but advanced applications are omitted to allow for more in-class guided active learning. Prerequisites: two years of high-school math, one year of high-school chemistry or physics, and Chem 105 or Chem 111A, or by permission of the instructors.

Credit 3 units. A&S IQ: NSM, AN BU: SCI

L07 Chem 106P Peer-Led Team-Learning: Introductory General Chemistry II

This is an elective 1-credit course that can only be taken concurrently with Chem 106 Introductory General Chemistry II. The purpose of the course is to encourage students to work in small groups, supervised by a trained peer leader, on problems from the course that are designed to require a collaborative effort and to enhance understanding. Peer-led team learning sessions guide students to become conscious of the problem-solving process and to rigorously evaluate and revise that process in light of the reasonableness of their results rather than an answer key. Exam is May 10th from 8-10am

Credit 1 unit.

L07 Chem 111A General Chemistry I

Systematic treatment of fundamental chemical principles and their applications. Particular reference to the concept of energy and its uses, gas laws, kinetic molecular theory, atomic and molecular structure, chemical bonding, and the periodic classification of the elements. Prerequisites: two years of high school algebra and one of high school chemistry, or permission of instructor. Exam times TBA.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L07 Chem 112A General Chemistry II

An introduction to the principles of chemical equilibrium and chemical change. Topics include chemical equilibria, acid/base chemistry, and other ionic equilibria, electrochemistry, elementary chemical thermodynamics and kinetics. Three lecture hours and a problem-solving subsection. Prerequisite, Chemistry 111A and prior completion (or concurrent registration in) Math 131 (Calculus I) or permission of the instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L07 Chem 112P Peer-Led Team-Learning: General Chemistry II

This is an elective 1-credit course that can only be taken concurrently with Chem 112A General Chemistry II. The purpose of the course is to encourage students to work in small groups, supervised by a trained peer leader, on problems from the course that are designed to require a collaborative effort and to

enhance understanding. Peer-led team learning sessions guide students to become conscious of the problem-solving process and to rigorously evaluate and revise that process in light of the reasonableness of their results rather than an answer key.

Credit 1 unit. BU: SCI

L07 Chem 125 Introductory General Chemistry I PB

This course covers the systematic treatment of fundamental chemical principles and their applications. Emphasis is on atomic and molecular theories, laws of chemical combination, periodic classification of the elements, and properties of gases, liquids, solids, and solutions. Prerequisites: Math U20 141 and Math U20 142 or equivalent, one year of high school chemistry, or permission of department. This course is restricted to students admitted to the Post-Baccalaureate Premedical Program or in University College. All other students should enroll in Chem 105 or Chem 111.

Credit 3 units. BU: SCI

L07 Chem 126 Introductory General Chemistry II PB

Continuation of General Chemistry I. Considers oxidation-reduction, chemical equilibria, electro-chemical cells, and the chemistry of representative elements. Prerequisite: L07-125 or U05-105. Students desiring to satisfy lab science requirements must also enroll in L07-156 or U05-152. This course is restricted to students admitted to the Post-Baccalaureate Premedical program. Others may register with instructor permission, and on a space available basis.

Credit 3 units. BU: SCI

L07 Chem 151 General Chemistry Laboratory I

This course provides an introduction to basic laboratory techniques, the experimental method, and the presentation of scientific data, as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in the Chem 105/111A lecture course.

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 152 General Chemistry Laboratory II

Continuation of Chem 151. Topics and experiments complement material covered in Chem 106/112A lecture course.

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 155 General Chemistry Laboratory I PB

This course provides an introduction to basic laboratory techniques and the experimental method as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in Chem 125. Prerequisite: Concurrent enrollment in Chem 125 or permission of instructor. The first two lab lectures will be longer than the regular lectures, but without lab session. The lab sessions will convene for the first time beginning with the third class meeting. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or in University College. All other students should enroll in Chem 151.

Credit 2 units. Arch: NSM Art: NSM

L07 Chem 156 General Chemistry Laboratory II PB

This course provides an introduction to basic laboratory techniques, the experimental method, and the presentation of scientific data. Additionally, students obtain direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in the Chem 126. Prerequisite: Concurrent enrollment in Chem 126 or permission of instructor.

This course is restricted to students admitted to the Post-Baccalaureate Premedical Program or in University College. All other students should enroll in Chem 152.

Credit 2 units.

L07 Chem 181 First-Year Opportunity: Applications in Chemistry

This seminar involves a weekly lecture by a chemistry faculty member or another scientist from academia or industry about their current research activities. The goal is to provide students with a sampling of current research activities dealing with fundamental and applied problems in science and society that are being approached from a chemical point of view. Students will see how fundamental chemical principles can be obtained from experiment and theory and used to both better understand and improve the world in which we live. Each week, a different scientist presents a lecture or offers an additional activity. This course is intended primarily for first-year students who anticipate majoring in science, but interested upperclass students should also find the lectures interesting and stimulating. Students are expected to attend all lectures and associated activities during the semester. Credit/no credit only.

Credit 1 unit. A&S: FYO A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 182 Chemistry for Concerned Citizens: Topics in Energy, the Environment, and More

This course is designed to provide an overview of chemistry as it relates to problems in environmental science, energy and related topics. It is constructed such that all students, irrespective of their major area of study, can learn about chemistry in these contexts. The course is intended to be highly interdisciplinary; therefore, it covers subjects including chemistry, physics, engineering, geology, biology, environmental policy and others.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L07 Chem 183 First-Year Opportunity: Chemistry and Energy

This seminar is intended for first-year undergraduates to learn about the role that chemistry can play in addressing one of the greatest challenges we face: climate change. Chemistry has played a vital role in providing the energy needs of society, and advances in chemistry can help to develop abundant and economically viable energy technologies that do not have adverse consequences on the environment. Chemistry has long been central to the use of fossil fuel, and there remain opportunities to improve the efficiency of fossil energy resources, thereby contributing to lower carbon dioxide emission per unit of energy generated. Chemistry is critical to the development of renewable energy resources, especially solar energy for the generation of electricity and fuels. Material covered will include the challenges associated with meeting the world's increasing energy needs while reducing the emission of carbon dioxide. This class will cover the role of chemistry in energy technologies, including the storage of energy.

Credit 1 unit. A&S: FYO

L07 Chem 225 Introduction to Medicinal Chemistry PB

This is an introductory course covering the basic concepts of drug structure, interactions and metabolism relevant to medicinal chemistry. The course will provide an understanding of the structure and physicochemical properties of drugs and their targets and how these determine the drug's mechanism of action and the body's response. In addition, basic concepts of drug design and development will be covered. Prerequisites: A background in general chemistry is required. Knowledge of organic or biochemistry is not required. Organic and biochemistry concepts needed for an understanding of the material will be taught as part of the course. Priority given to students enrolled in the Post-Baccalaureate Premedical Program or in University College.

Credit 3 units. BU: SCI

L07 Chem 261 Organic Chemistry I with Lab

This is the first part of a two-semester survey of organic chemistry. The course will include an introduction to organic structures, reactions, and reaction mechanisms. The laboratory will meet on alternate weeks and include an introduction to laboratory methods in organic chemistry, including separation and methods of purification of organic compounds. Prerequisites: Chem 106 or Chem 112 and Chem 152.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 262 Organic Chemistry II with Lab

A course covering certain areas of organic chemistry in more detail than the prerequisite course, with special emphasis on the mechanisms and the synthetic applications of organic reactions and on the organic chemistry of biological compounds. The laboratory meets eight times and includes organic synthesis and spectroscopic techniques. Required course for chemistry majors. Prerequisite: Chem 261.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 265 Organic Chemistry I With Lab PB

This is the first part of a two-semester survey of organic chemistry. The course will include an introduction to organic structures, reactions, and reaction mechanisms. The laboratory portion of the course will have eight experiments and include an introduction to laboratory methods in organic chemistry, including separation and methods of purification of organic compounds. Prerequisites: Chem 126 and Chem 156. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or in University College. All other students should enroll in Chem 261.

Credit 4 units. Arch: NSM Art: NSM BU: SCI

L07 Chem 2651 Organic Chemistry I PB (Lecture Only)

This is the lecture-only version of the first part of a two-semester survey of organic chemistry. The course will include an introduction to organic structures, reactions, and reaction mechanisms. Prerequisites: Chem 126 and Chem 156. This course is restricted to students admitted to the Post-Baccalaureate Premedical program or in University College.

Credit 3 units. Arch: NSM Art: NSM BU: SCI

L07 Chem 266 Organic Chemistry II w/ Lab PB

A course covering certain areas of organic chemistry in more detail than the prerequisite course, with special emphasis on the mechanisms and synthetic applications of organic reactions and on the organic chemistry of biological compounds. The laboratory meets eight times and includes organic synthesis and spectroscopic techniques. Prerequisite: Chem 265. This course is restricted to students admitted to the Post-Baccalaureate Premedical Program or in University College. All other students should enroll in Chem 262.

Credit 4 units. BU: SCI

L07 Chem 2661 Organic Chemistry II PB (Lecture Only)

This course is the lecture-only version of Chem 266, covering certain areas of organic chemistry in more detail than the prerequisite course, with special emphasis on the mechanisms and synthetic applications of organic reactions and on the organic chemistry of biological compounds. Prerequisites: Chem 265 or Chem 2651. This course is restricted to students admitted to the Post-Baccalaureate Premedical Program or in University College.

Credit 3 units. BU: SCI

L07 Chem 290 First-Year and Sophomore Research

This course presents an introduction to research for first- and second-year students. Students are mentored by a faculty advisor. Prerequisite: Permission of the sponsor and the Department of Chemistry. Credit/no credit only.

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 299 Chemical Laboratory Safety

This course presents an overview of current laboratory safety, regulatory, and compliance practices. Safety and compliance issues that impact chemical, biological, and materials research will be covered.

Credit 0.5 units. A&S IQ: NSM Art: NSM

L07 Chem 358 Organic Chemistry Laboratory II

Initially, problem solving in organic chemistry is emphasized through an introduction to the methods of qualitative organic analysis, including the use of chromatographic and spectroscopic techniques. Each student then selects an independent synthetic project to perform. Prerequisite: Chem 262. Six laboratory hours per week. Lectures held three hours a week for the first half of the semester.

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L07 Chem 400 Physical Science in 12 Problems

Exercises related to general chemistry, classical mechanics, quantum mechanics, statistical mechanics, thermodynamics, and kinetics, will be solved with numerical software. Each exercise will be accompanied by a lecture, a software template solving a problem and presenting a related take-home problem. The software will allow us to focus on, and treat in a transparent fashion, physical problems without the unwieldy idealizations and contrivances found in textbooks. Prerequisites: General Chemistry and/or Physics, and prior or concurrent enrollment in either Chem 401 or Phys 217. The lectures will be in-person however a complete set of taped lectures will also be available. A remote help session will be scheduled at a mutually agreed to time. There are no quizzes, exams or a final.

Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 401 Physical Chemistry I

Introduction to quantum chemistry with applications to elementary spectroscopy and computational chemistry. Prerequisites: General Chem, concurrent enrollment in Chem 401, and prior or concurrent enrollment in General Physics. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 402 Physical Chemistry II

This course presents an introduction to chemical thermodynamics, statistical mechanics, and transport phenomena, and it is a required course for all Chemistry majors. Prerequisites: Chem 111A-112A, Chem 401, and Math 233; or permission of instructor. Prior completion of Physics 191-192 is strongly encouraged, but prior completion of Physics 191 and concurrent enrollment in Physics 192 will be accepted. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 403 Chemical Kinetics

This lecture course will provide an introduction to the kinetics of chemical reactions for graduate and upper-level undergraduate science and engineering students. Bulk and molecular-level considerations will be discussed and provide a foundation for the understanding of chemical reaction mechanisms and the techniques used for their study. Students will gain an understanding of the importance and significance of the rate laws of reactions and in particular the reaction rate constant. Details of how the environment in which reactions occur (i.e., gas phase, solution phase, and surface reactions) and molecular structure are reflected in the rate constant will be discussed. Examples such as catalytic loss cycles in the atmosphere, enzyme catalysis, combustion systems, chain reactions, and explosions are presented in detail to illustrate how the fundamental principles of chemical kinetics can be applied to predict reaction rates, chemical reactivity, and the outcomes of particular processes. Prerequisites: General Chem 111A-112A, concurrent enrollment in Chem 401, and/or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 426 Inorganic Electrochemistry and Photochemistry

An understanding of electrochemical processes is critical in describing the behavior of batteries, fuel cells, and other important devices used in energy conversion and environmental remediation. This course will cover modern inorganic electrochemistry, photochemistry, and photoelectrochemistry from a microscopic perspective of solid-electrolyte interfaces. The course material will start with the thermodynamics of solid-electrolyte interfaces and the kinetics of electron transfer across these interfaces. Electroanalytical techniques, including cyclic voltammetry and potential-step experiments, will be described to understand the mechanism of electrochemical and photochemical reactions. Lectures will include applications of electrochemical cells in catalysis, materials synthesis, and solar-fuel generation. Prerequisites: Chem 461 or Chem 465 or consent of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 430 Simulation in Chemistry and Biochemistry

This course explores a wide range molecular modeling techniques and applications of computational chemistry to problems in chemistry and biochemistry. Topics include ab initio quantum mechanics, semi-empirical MO theory, molecular mechanics, molecular dynamics simulation, coarse-grained models, electrostatic methods and biomolecular structure prediction. A major component of the course is weekly laboratory sessions using common software programs in the field, including Spartan, Q-Chem, Gaussian, VMD, TINKER, APBS, AutoDock, SDA7 and others. Many of the lab exercises target proteins, nucleic acids and other biological structures. As a final lab experience, students complete an independent project using tools covered in the course.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 435 Nuclear and Radiochemistry Lab

Application of radiochemistry to problems in chemistry, physics, and nuclear medicine, with emphasis on particle detectors and experimental techniques. Prerequisites: 3 units of physical chemistry or quantum mechanics, or permission of instructor. One lecture hour and five hours of laboratory a week.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 436 Introduction to the Atomic Nucleus

Introduction to the production and decay of radioactive nuclides, the structure and properties of nuclei, and the applications of nuclear and radiochemical techniques to current scientific problems. Prerequisites: one year each of chemistry, mathematics and physics.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 445 Instrumental Methods: Physical Chemistry

A course providing direct hands-on experience with the principles of physical chemistry (thermodynamics, quantum, kinetics) and associated experimental methods and instrumentation, including optical, infrared, and nuclear and electron spin resonance, electrochemistry, calorimetry, laser kinetics, and basic electronics. Prerequisite: Chem 401 or concurrent enrollment in Chem 402.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L07 Chem 451 Organic Chemistry III

A lecture course that builds on the material in Chem 261 and Chem 262, covering in more detail certain topics in those courses while also introducing new topics. A transition to graduate-level study in organic chemistry; recommended for chemistry, biochemistry and biology majors. Prerequisite: Chem 262.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 452 Synthetic Polymer Chemistry

This course that describes various methods for the synthesis and characterization of polymers. Copolymers, control of architecture, polymer reactivity, polymer properties, structure/property relationships, and applications of polymers will be discussed. Current topics of interest from the recent literature will also be covered. Prerequisite: Chem 262 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 453 Bioorganic Chemistry

This course presents a molecule-centered perspective on the current state of the art in antibiotic drug discovery and natural products chemistry. The molecular mechanisms of antibiotic drug action and pathogen resistance will be covered along with the biosynthetic origins of antibiotics from plants and microbes. The course is taught from the perspective of understanding how organic chemistry plays out in biological systems, with an emphasis on small organic molecules and enzymes. Curved arrow mechanisms will be used frequently in learning activities and assignments. Thus, Chem 262 (Organic Chemistry 2) is a mandatory prerequisite for this course. A working knowledge of protein structure and function is helpful. Students are encouraged (but not required) to take Chem 481 (General Biochemistry 1) and/or Chem 482 (General Biochemistry 2) in preparation for this course. Students will be responsible for writing a review article on an assigned antibiotic molecule and presenting their paper to the class.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 453W Bioorganic Chemistry

A molecule-centered perspective is presented on the current state of the art in antibiotic drug discovery and natural products chemistry. The molecular mechanisms of antibiotic drug action and pathogen resistance will be covered along with the biosynthetic origins of antibiotics from plants and microbes. The course is taught from a perspective of understanding how organic chemistry plays out in biological systems, with an emphasis on small organic molecules and enzymes. Curved arrow mechanisms will be used frequently in learning activities and assignments. Thus, Chem 262 (Organic Chemistry 2) is a mandatory prerequisite for this course. A working knowledge of protein structure and function is helpful. Students are encouraged but not required to take Chem 481 (General Biochemistry 1) and/or Chem 482 (General Biochemistry 2) in preparation for this course. Students will be responsible for writing a review article on an assigned antibiotic molecule and presenting their paper to the class. This course satisfies the Writing Intensive requirement.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: SCI

L07 Chem 458 Chemical Reaction Mechanism Journal Club

This seminar meets for one hour each week. During the meetings, student participants are responsible for presenting topics from the current literature. The format of the presentation varies from informal talks to student-authored problem sets. Attendance at meetings is strongly recommended for all students who are currently taking the organic cumulative examinations. Prerequisite: Chem 262.

Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 459 Organometallic Chemistry

Survey of organometallic compounds with discussion of their synthesis, structure, spectroscopy and reactivity. Prerequisite: Chem 252.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 460 Organic & Inorganic Reaction Mechanisms

This course covers the fundamentals of the study of the mechanisms of reactions of organic, organometallic, and inorganic molecular compounds, primarily in the solution phase, and it surveys examples through case studies. A basic knowledge of organic chemistry is assumed. Prerequisites: Grade of B- or better Chem 261 and Chem 262 or the equivalent.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 461 Inorganic Chemistry

This course explores atomistic structure, spectroscopy as well as electronic states by probing energy levels and delving into bonding and structure-property relationships extant in inorganic coordination complexes. Moreover, the inorganic curriculum introduces students to the world of symmetry and emphasizes group theory as powerful tool for understanding spectroscopy and predicting bonding. Underpinning our discussions are Lewis Dot, VSEPR as well as Valence Bond, Molecular Orbital, Crystal Field and Ligand Field Theories. The conceptual models addressed in Chem 461 provide students with a fundamental basis for discussing geometry of inorganic species, orbitals involved in interactions and bond characteristics. Chem 461 serves a pedagogical platform for understanding reactivity across the periodic table that teaches students how to pinpoint frontier orbitals and substitution mechanisms responsible for the formation of inorganic complexes. Prerequisites: Chem 111A or Chem 105 (required); Chem 112A or Chem 106 (recommended); or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 462 Synthetic Polymer Chemistry Laboratory

Chem 462 is an upper-level undergraduate and graduate level laboratory course that complements Chem 452 Synthetic Polymer Chemistry. This twice-a-week lab provides hands-on training in the design, synthesis, and characterization of polymers and polymeric materials through four standard experiments (each one week) and one independent project (over five to six weeks). The independent project involves using an article from the literature as the basis for developing a short proposal. At the end of the course, students give oral presentations of their proposals, which are reviewed by their classmates. Prerequisite or Concurrent: Chem 452 or permission from instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 462W Synthetic Polymer Chemistry Laboratory -- Writing Intensive

Chem 462W is an upper-level undergraduate and graduate level laboratory course that complements Chem 452, Synthetic Polymer Chemistry. This twice-a-week lab provides hands-on training in the design, synthesis, and characterization of polymers and polymeric materials through four standard experiments (each one week) and one independent project (over five to six weeks). The independent project involves using an article from the literature as the basis for developing a short proposal. At the end of the course, students give oral presentations of their proposals, which are reviewed by their classmates. Prerequisite or Corequisite: Chem 452 or permission of instructor. This course satisfies the writing-intensive requirement.

Credit 3 units. A&S IQ: NSM, WI BU: SCI

L07 Chem 464 Inorganic Biochemistry

A class in biological chemistry that emphasizes the role of metals in electron transfer and enzymatic catalysis. After a brief survey of essential concepts from biology, coordination chemistry and spectroscopy, topics include: electron transfer systems; oxygen transport and activation; metal ion acquisition, transport and homeostasis; enzymes catalyzing atom transfer reactions and radical-mediated processes. Prerequisites: Chem 252; Chem 461 recommended but not required.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 465 Solid-State and Materials Chemistry

The course begins with basic crystallography and common inorganic structure types. With the aid of computer modeling, students learn to analyze, index and refine X-ray powder-diffraction data. Students are then taught to use phase diagrams to assess the compositions and microstructures of materials produced by various synthetic or processing methods. Crystal nucleation and growth, defects, and ion-conduction mechanisms also are introduced. The course concludes with an analysis of the mechanical properties of materials from a chemistry perspective. What makes some materials strong, stiff and resistant to fracture? Prerequisites: Chem 111A-Chem 112A.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 470 Inorganic Chemistry Laboratory

A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises will introduce novel synthetic techniques including high-temperature synthesis and vacuum-line manipulations. Compounds will be spectroscopically characterized by UV-visible absorption, gas-phase infrared, and multinuclear and dynamic NMR spectroscopies. Measurements of electrochemical behavior, magnetic susceptibility, and electrical conductivity will be performed. Prerequisite: Chem 461 or permission of instructor. A Writing Intensive option is available with the permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 470W Inorganic Chemistry Laboratory — Writing Intensive

A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises will introduce novel synthetic techniques including high-temperature synthesis and vacuum-line manipulations. Compounds will be spectroscopically characterized by UV-visible absorption, gas-phase infrared, and multinuclear and dynamic NMR spectroscopies. Measurements of electrochemical behavior, magnetic susceptibility, and electrical conductivity will be performed. Prerequisite: Chem 461 or permission of instructor. This course satisfies the Writing Intensive requirement.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L07 Chem 475 Chemical Biology

This course is a survey of modern chemical biology focusing on the application of a broad array of chemical tools to biological problems. The course is roughly divided into four sections; biopolymers; computational methods and bioinformatics; tools for chemical biology; and applications of chemical biology. A mandatory discussion section accompanies the course and is used to review current and classical literature in the field. Prerequisites: Chem 262 and Biol 2970, or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 481 General Biochemistry I

Topics include the properties and structures of biomolecules, including amino acids, nucleotides, lipids, carbohydrates, proteins and nucleic acids. Additional topics include enzyme kinetics and mechanisms, membrane structure and properties, protein folding, an introduction to metabolism, oxidative phosphorylation, and photosynthesis. This course is the first semester of an integrated two-semester sequence. The second course is Chem 482. Prerequisites: Biol 2970, Chem 262.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 482 General Biochemistry II

This course is a continuation of General Biochemistry I. Topics include carbohydrate, lipid and amino acid metabolism; signal transduction; transport across membranes; DNA replication and repair; transcription and translation; molecular motors; mechanisms of drug action; and natural products biosynthesis. Prerequisite: Chem 481 or Biol 481.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 483 Protein Biochemistry

The focus of this course is protein biochemistry, and is intended to build upon General Biochemistry (Chem 481). In this course we will focus on protein structure, folding, and techniques to purify and characterize protein activity. We will progress from initial studies to first understand protein fold and function to current efforts to better characterize protein structure-function relationships. We will also highlight human diseases that are underpinned by protein misfolding. This course will focus on reading and understanding primary literature, including landmark papers along with more recent work. During the second half of the semester, each student will select a paper and prepare a written analysis of that paper. The student will then present the paper and lead a journal club style discussion of the paper. Prerequisites: Chem 481 or instructor's permission.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L07 Chem 485 Nucleic Acids

This course presents the structure, synthesis, properties, and interactions of nucleic acids and the design and synthesis of nucleic acid-based and/or targeted drugs, probes, and tools. Topics include primary, secondary, and tertiary structure; topological and thermodynamic properties; biological and chemical synthesis; DNA chips; PCR; site-directed natural and unnatural mutagenesis; chemical evolution (SELEX); ribozymes; phage display; carcinogen, drug, and protein interactions; affinity cleaving; ultraviolet light and ionizing radiation damage; DNA repair of mutagenesis; and the design and synthesis of anti-sense and anti-gene probes and drugs. Extensive use is also made of molecular modeling and the protein databank of nucleic acid structures. Prerequisites: Chem 261 and Chem 262 or equivalents.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 488 Modern Spectroscopy

This course focuses on the fundamental principles and methodologies associated with numerous optical spectroscopy techniques that are commonly utilized in physical and life sciences research laboratories. In order to develop a solid understanding of the material as well as best practices, and the strengths and limitations of the techniques, this course combines

lectures with laboratory experiments. Students also learn how to analyze and interpret data and succinctly describe their results. During one lecture each week the underlying principles of a specific type of spectroscopy are presented. The second lecture each week is spent covering the general details of the instrumentation and methods for acquiring spectra on different types of samples. The students then acquire spectra using the spectroscopic methods presented during the laboratory session. The students independently analyze the data and write brief reports of their findings. During the last two weeks of class, pairs of students are given an unknown, and they need to identify and characterize the sample. Students then write and submit a final report describing this independent research and their findings. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L07 Chem 490 Introduction to Research

Third- and fourth-year students register for this course to perform research on a selected topic in chemistry. A student planning to register for Chem 490 with a Department of Chemistry research mentor should obtain approval from that faculty member before registering, but a formal proposal is not required. For research experiences with mentors outside of the chemistry department, the student must submit the Chem 490 Project Proposal Form, which identifies the faculty mentor and includes a short description of the proposed chemical research. The form is available on the chemistry department website and should be submitted to the director of undergraduate studies in the chemistry department for approval. Credit/no credit only. Credit variable, maximum 6 units. A&S IQ: NSM

L07 Chem 495 Advanced Undergraduate Research in Chemistry

Registration for this course allows for advanced research mentored by a Department of Chemistry faculty member. Chemical research with a faculty member outside of the chemistry department may be allowed with prior approval. At the end of the semester, the mentor will chair a faculty committee to evaluate an oral presentation by the student, and a letter grade will be assigned. A concise written report may also be requested by the mentor or committee in addition to the oral examination. Before registration can be allowed, the student must fill out the Chem 495 Application Form, available on the chemistry department website, and submit it to the director of undergraduate studies. This form, which is required for all Chem 495 registrants, includes a short description of the proposed research and a list of the committee members. This course may provide a Capstone Experience, but it does not fulfill the Writing Intensive requirement. The units earned may be applied as elective advanced credits toward a chemistry major with Latin honors eligibility. The course may be taken only once for credit. Prerequisite: Chem 490 and/or other advanced electives or research experience as specified by the mentor. Credit 3 units. A&S IQ: NSM

L07 Chem 500 Independent Work

Independent mentored work in Chemistry, such as (but not limited to) a detailed literature search and report on a topic of current interest. Prerequisite: Permission of the faculty mentor. Credit variable, maximum 6 units.

L07 Chem 510 Chemical Dynamics of Biological Pathways

This course will provide a highly advanced evaluation of cellular metabolism. The course will interrogate metabolic pathways and associated enzymatic mechanisms by tracking stable isotope labeling patterns as measured by liquid chromatography/mass spectrometry. The course will not contain any background treatment of mass spectrometry or basic metabolism. To be enrolled, students must already have an in-depth understanding of these topics. Major objectives of the course are: (1) to learn how to use labeling patterns qualitatively to understand chemical mechanisms at the arrow-pushing level as well as metabolic regulation, (2) to learn metabolic flux analysis, (3) to understand the complex metabolic interactions between cells and organs, and (4) to understand how metabolic reprogramming of specific cell types supports physiologic coordination at the organismal level. Pre-reqs: Chem 482 (Biol 4820) AND permission of instructor, Chem 550. Credit 3 units.

L07 Chem 5147 Contrast Agents for Biological Imaging

Contrast Agents in Biological Imaging will build the chemistry foundations for the design and use of contrast agents in imaging applications such as nuclear medicine, magnetic resonance imaging (MRI) and optical imaging. The course will include lectures on the design of radiopharmaceuticals for gamma scintigraphy and positron emission tomography, MRI contrast agents and agents for optical imaging, including bioluminescence and fluorescence microscopy. Prereqs: one year of general chemistry, one semester of organic chemistry. Same as L41 Biol 5147. Credit 3 units.

L07 Chem 515 Biological Chemistry Seminar

This course is required for all graduate students following the biological chemistry track. The course will consist of tutorials for first year graduate students and research presentations by second year students. Prerequisites: enrollment in the biological chemistry track or permission of the instructor. Credit 1 unit.

L07 Chem 520 Nucleic Acid Chemistry

Structure, synthesis, properties, and interactions of nucleic acids, and the design and synthesis of nucleic acid-based and/or targeted drugs, probes and tools. Topics: primary, secondary, and tertiary structure; topological and thermodynamic properties; biological and chemical synthesis; DNA chips; PCR; site-directed natural and unnatural mutagenesis; chemical evolution (SELEX); ribozymes; phage display; carcinogen, drug and protein interactions; affinity cleaving; ultraviolet light and ionizing radiation damage, DNA repair of mutagenesis; design and synthesis of anti-sense and anti-gene probes and drugs. Extensive use is also made of molecular modeling and the protein databank of nucleic acid structures. Prerequisite, Chem 251 and Chem 252 or equivalent). Credit 3 units.

L07 Chem 533 Time-Dependent Quantum Mechanics & Spectroscopy

This graduate-level course lays the foundations of time-dependent quantum mechanics and applications to contemporary optical spectroscopies, particularly ultrafast techniques. Formal theoretical descriptions for nonlinear spectroscopic techniques including transient absorption, photon echo, and two-dimensional spectroscopies will be developed.

Practical aspects of these experiments including modern laser systems, instrument design, data collection, data processing, and data analysis will also be discussed. Discussion of current literature in the field will be an important component of the course. Prerequisite courses: Chem 401 or permission from the instructor.

Credit 3 units.

L07 Chem 536 Radiochemistry for the Life Sciences

This course will provide an introduction to nuclear science (e.g. radioactive decay, nuclear stability, interactions of radiation with matter) and followed by an overview of how radiochemistry is used in the life sciences. Lectures on radiolabeling chemistry with radionuclides used in medical imaging (single photon emission computed tomography (SPECT) and positron emission tomography (PET) and their applications will be presented. In addition, lectures on radiochemistry with tritium (H-3) and C-14 will also be included. Additional applications include environmental radiochemistry as applied to nuclear waste disposal and biofuels.

Credit 2 units.

L07 Chem 540 Inorganic/Organometallic Chemistry Seminar

Students present informal seminars on topics of current interest from the chemical literature or from their own dissertation research.

Credit 1 unit.

L07 Chem 541 Advanced Inorganic Chemistry

Study of physical inorganic concepts with an emphasis on modern experimental methods applied to inorganic and bioinorganic systems. The spectral and magnetic properties of inorganic and bioinorganic compounds will be discussed. Topics in group theory will be covered, including symmetry of molecules and ions, the application of group theory in molecular structure determination, chemical bond theory and spectroscopy for inorganic materials as molecular species and in crystal lattices. Prerequisite: Chem 461, or consent of instructor.

Credit 3 units.

L07 Chem 542 Special Topics in Inorganic Chemistry

This course focuses on an important current topic in inorganic chemistry. Open to undergraduates with permission of the instructor. Chemistry 461 recommended.

Credit 3 units.

L07 Chem 543 Physical Properties of Quantum**Nanostructures**

This course will explore the physical properties of semiconductor nanomaterials with dimensions that are small enough to give rise to quantum-confinement effects. These effects strongly influence the electronic structures, absorption/emission behavior, and charge-carrier dynamics within quantum wells, rods, wires, dots, and nanotubes. The course begins with an overview of the electronic structure of bulk semiconductors. The theoretical and experimental bases for quantum-confinement effects, which are of considerable fundamental and applied interest, will then be developed. A significant emphasis will be placed on the optical absorption and photoluminescence properties of semiconductor quantum nanostructures. Recent advances and observations as reported in the literature will be emphasized throughout the semester. Prerequisites: Chem 461 and Chem 465, or permission of the instructor. While the course

is steered to graduate students in the Chemistry Department, Chemistry undergraduate students, graduate or undergraduate students in Physics, Electrical & Systems Engineering, Energy, Environmental & Chemical Engineering, Mechanical Engineering & Materials Science may also find this course valuable.

Credit 3 units.

L07 Chem 550 Mass Spectrometry

The first focus of the course is an overview of the subject and its history. The second covers the fundamentals of ionization to produce molecular ions. Ionization methods include electron ionization, chemical ionization, electrospray, and matrix-assisted laser desorption. Thermodynamic principles of ionization including ionization energies, proton affinities, and gas-phase acidities provide a fundamental basis for ionization. The third major focus is interpretation of EI and product-ion spectra from MS/MS. Mechanisms of gas-phase ion decomposition reactions, rates and thermodynamics of gas-phase ion processes, and ion-molecule reactions are discussed in terms of interpreting spectra. A major emphasis is the spectra of peptides and proteins, providing a basis for the field of proteomics and related "omics" areas. The fourth focus is the fundamentals of instrumentation design and implementation: quadrupole, time-of-flight, ion trap, orbitraps, and Fourier transform instruments. Combined or hyphenated GC/MS, LC/MS, and tandem mass spectrometry are also discussed. Applications in a variety of areas are worked in as the course progresses: structure determination of synthetic, natural products, metabolites, and biomolecules, exact mass measurements (high resolution MS), peptide and protein and other biomolecule sequencing, sensitive detection, trace analysis, and mixture analysis. Prerequisite: Chem 252 or permission of instructor.

Credit 3 units.

L07 Chem 551 Mechanistic Organic Chemistry

The first half of a sequence of two semesters, followed by Chem 554 in the Spring, encompassing important topics in physical organic chemistry. The first semester is devoted to the fundamental concepts of mechanistic organic chemistry. The major classes of organic reactions are surveyed from a mechanistic perspective. Prerequisite: Chem. 262 or permission of the instructor.

Credit 3 units.

L07 Chem 552 Synthetic Methods

A lecture course presenting a detailed survey of synthetically useful reactions of carbonyl compounds and their derivatives, with particular attention to their stereoselectivity aspects and asymmetric methodology. The course is intended to provide the necessary background for more advanced work in organic synthesis.

Credit 3 units.

L07 Chem 554 Molecular Orbital Theory

Lectures will cover the background, practice and applications of computational chemistry to the modeling of the structures and chemical reactions of organic molecules. Different levels of calculation will be presented, from molecular mechanics calculations and Hückel molecular orbital theory, through semi-empirical and ab initio self-consistent field calculations with correlation energy corrections, and density functional theory. Hands-on experience performing calculations is an important element in this course.

Credit 3 units.

L07 Chem 555 Special Topics in Organic Chemistry

This course focuses on an important current topic in organic chemistry. Open to undergraduates with the permission of the instructor.

Credit 3 units.

L07 Chem 557 Advanced Organic Synthesis

A course focusing on newer synthetic strategies used in the construction of complex organic molecules, particularly in the natural products area. Included are in-depth analyses of advances in several areas of synthetic methodology bearing on the development of strategies for control of chemo-, regio-, enantio-, and diastereo-selectivity. Prerequisite, Chem 451, or permission of the instructor.

Credit 3 units.

L07 Chem 558 Spectral Methods in Organic Chemistry

A detailed treatment of the structure and stereochemistry of organic compounds with particular emphasis on ultraviolet, visible, infrared, nuclear magnetic resonance, and mass spectroscopic techniques for structure determination.

Credit 3 units.

L07 Chem 559 Organic Chemistry Seminar

The organic chemistry graduate students enrolled will each present one seminar on a topic of current interest in the literature.

Credit 1 unit.

L07 Chem 562 Statistical Thermodynamics

Statistical mechanical methods will be used to characterize equilibrium and non-equilibrium thermodynamic systems. Computer programming assignments are given. An initial familiarity with ideal equilibrium systems will be assumed. Prerequisite Chem 401 or its equivalent or permission of the instructor.

Credit 3 units.

L07 Chem 571 Quantum Chemistry and Spectra

This course covers the development and application of quantum mechanics as applied to molecular structure and properties. Material to be discussed will include the fundamentals of quantum mechanics; representations; matrix formalisms; applications to model systems; perturbation theory; variational methods; many-electron wavefunctions; Hartree-Fock theory and post-Hartree Fock methods; density functional theory; additional topics and applications. Prereq: Chem 401.

Credit 3 units.

L07 Chem 5721 Quantum Chemistry in Practice

A spectrum of modern computational tools -- from semiempirical, self-consistent field theory, and density functional theory one-electron pictures to perturbative and simulation many-electron pictures -- will be used to determine potential energy surfaces, spectroscopic cross-sections, and oxidation-reduction energetics.

Credit 3 units.

L07 Chem 576 Magnetic Resonance

Quantum mechanical and classical aspects of paramagnetism and of nuclear and electronic magnetic resonance. Phenomenological equations of motion, spin interactions, spin temperature, thermal relaxation, dynamic polarization, multiple resonance phenomena.

Credit 3 units.

L07 Chem 5762 Electron Spin Resonance

Principles of magnetic resonance of paramagnetic species, structure and dynamics of organic free radicals and transition metal ions in the condensed phase. Detection of transient paramagnetic species generated in photochemical reactions and photo physical processes. Prereq, Chem 401.

Credit 3 units.

L07 Chem 578 Nuclear Magnetic Resonance Spectroscopy

A course dealing with the quantum and classical description of the nuclear magnetic resonance of an isolated system of two spin-1/2 nuclei. The design of pulsed NMR spectrometers and the Fourier analysis of time-dependent observable magnetization in 1 and 2 dimensions are treated in detail, NMR relaxation in liquids and solids is included phenomenologically. Prerequisite: Physical Chemistry or permission of the instructor.

Credit 3 units.

L07 Chem 580 Special Topics in Physical Chemistry: NMR for Biological Solids

The course will cover theoretical and practical aspects of nuclear magnetic resonance (NMR) spectroscopy. Specific focus will be given to solid-state NMR and its application for studying amorphous biological solids, including how solid-state NMR can complement other biochemical and biophysical approaches. Prerequisites: undergraduate-level course in quantum mechanics (Chem 401)

Credit 3 units.

L07 Chem 581 Advanced Quantum Chemistry

A study of the theory and methods of quantum mechanics, with applications to problems of chemical interest. Prerequisite, Chem 571 or permission of the instructor.

Credit 3 units.

L07 Chem 584 Molecular Spectroscopy

Principles of molecular spectroscopy, molecular rotations, vibrations and electronic transitions. Structural and dynamic aspects of molecules in the condensed phase. Recent topics in experimental spectroscopy. Prerequisite, Chemistry 571.

Credit 3 units.

L07 Chem 585 Molecular Reaction Dynamics

This course addresses the question, "what happens in a chemical reaction?" at the atomic/molecular level. Topics: Non-reactive and reactive molecular collisions, scattering and resonances, unimolecular and bimolecular reactions, potential energy surfaces, reaction rate calculations and models, state to state experiments and stereodynamics, energy transfer mechanisms, time resolved and frequency resolved dynamics, condensed phase dynamics, control of chemical reactions.

Requirements: Chem 401 is a pre-requisite and prior completion or current registration in Chem 402 is required. However, equivalent courses will be considered at the discretion of the instructor.

Credit 3 units.

L07 Chem 586 Commercialization of Science and Technology

Commercialization of Science and Technology is an interdisciplinary course that investigates the issues and decisions that inventor/scientists, engineers, and entrepreneurs encounter when taking early stage scientific discoveries from the laboratory to applied use. The course employs case studies, invited speakers, and team projects to engage graduate and professional students in interdisciplinary collaboration, idea generation and the feasibility of applying scientific discoveries in commercial marketplaces. Participants learn about the basics of commercialization and entrepreneurship and how these relate to their personal goals and scientific interests. The course is ideal for anyone interested in working as an academic, chief scientist, entrepreneur, manager, consultant, or investor.

Same as L31 Physics 586

Credit 3 units.

L07 Chem 599 Chemical Laboratory Safety

An overview of current laboratory safety, regulatory, and compliance practices. Safety and compliance issues that impact chemical, biological, and materials research will be covered. Required for entering chemistry graduate students.

Credit 0.5 units.

Children's Studies

In the children's studies minor, students learn about children and childhood while drawing on the expertise of departments and programs from across Arts & Sciences, especially the departments of Education, English, and Psychological & Brain Sciences. Children's studies minors will develop a sophisticated interdisciplinary understanding of childhood and the issues surrounding the treatment and status of children throughout history. The minor combines social science courses that measure and analyze how children mature and how institutions have affected children with courses in the humanities that examine how children are portrayed and constructed in art, literature and film. Thus, a minor in children's studies will supplement students' majors while exposing them to an interconnected set of ideas about children as objects and subjects in a variety of essential disciplines. The minor in children's studies is housed in the Washington University Center for the Humanities.

Majors

Children's studies is an interdepartmental minor; Washington University does not offer a separate major in children's studies.

Minors

The Minor in Children's Studies

Total units required: 16

Required courses (4 units):

Code	Title	Units
ChSt 300	Interdisciplinary Introduction to Children's Studies	3
ChSt 499	Senior Seminar in Children's Studies	1

Core courses (6 units from the following*):

Code	Title	Units
ChSt 301C	The American School	3
ChSt 313B	Education, Childhood, Adolescence and Society	3
ChSt 318	Topics in American Literature: (when taught as "The Cultural History of the American Teenager")	3
ChSt 321	Developmental Psychology	3
ChSt 325	Psychology of Adolescence	3
ChSt 334	A History of the Golden Age of Children's Literature	3

* For students matriculating Fall 2022 and later, the two core courses must come from two different home departments. Both 301C and 313B are Education courses; 318 and 334 are English courses; and 321 and 325 are Psychological & Brain Sciences courses. Minors entering before Fall 2022 are encouraged but not required to follow this requirement.

Note: The Children's Studies minor will allow minors to substitute an elective course in Children's Studies for a core course that the student has taken but needs to count toward a different major or minor (e.g., ChSt 321 Developmental Psychology for a Psychological & Brain Sciences major). The number of independent credits required for the Children's Studies minor remains the same, but minors in this situation have more choices for those 3 credits.

6 additional units from either the core list or from elective courses, including but not limited to the following:

Code	Title	Units
ARCH 316F	Re-Discover the Child	3
ChSt 114	First-Year Seminar: Childhood in Greek Antiquity	3
ChSt 178	First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change	3
ChSt 219	The Infant Mind: Sophomore Seminar	3
ChSt 251	Juvenile Justice in the Black Experience	3
ChSt 304	Educational Psychology	3
ChSt 316W	Topics in American Literature: Girls' Fiction	3

ChSt 3221	Girls' Media and Popular Culture	3
ChSt 3254	African Americans and Children's Literature	3
ChSt 3270	Comics, Graphic Novels, and Sequential Art	3

Additional Information

A more up-to-date list of approved electives is located on the Children's Studies Minor website (<https://humanities.wustl.edu/childrens-studies-minor/>). Courses not on that list may be used to fulfill the requirements of the minor only if they have been approved by the student's minor advisor and/or by the academic coordinator.

A maximum of 3 units of course work completed at another university, whether in the United States or abroad, may be applied toward the children's studies minor. Credit will be awarded only for those courses that have been approved by the student's minor advisor or by the academic coordinator.

Courses

Visit online course listings to view semester offerings for L66 ChSt (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L66&crslvl=1:5>).

L66 ChSt 114 First-Year Seminar: Childhood in Greek Antiquity

Recent social histories exploring Greek childhood have emphasized the reconstruction of the ancient child's agency. Such studies have been interested to illuminate the lived experience of children and to apprehend their voices so often silent in the sources. While such inquiry has clearly widened our understanding of ancient children's lives, the present course is designed instead to explore explicitly the representation of children as particularly rich reservoirs of cultural values. Drawing upon a range of art historical and archaeological sources and literary genres, we will examine the ways in which children were presented to mirror back social mores, thus capturing the aspirations of ancient Greek society. As figures of future potential, children continue to offer social historians one of the most striking lenses through which to explore the question of our humanity. The protean answer to this question at once reveals the proximity and vast distance that stands between our modern society and the ancient Greek one.

L66 ChSt 178 First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change

The goal of this course is to provide a glimpse into how youth reshape African society. Whether in North Africa with the Arab Spring, in West Africa with university strikes, or in East Africa through a linguistic full bloom, youth have been shaping social responses to societies for a long period. In this course, we will study social structures, including churches, NGOs, and developmental agencies, and we will learn about examples of Muslim youth movements and the global civil society. The course will also explore how youth impact cultural movements in Africa and how they influence the world. In particular, we will examine hip-hop movements, sports, and global youth culture developments that center on fashion, dress, dance, and new technologies. By the end of the course, students will have enriched ideas about youth in Africa and ways to provide more realistic comparisons to their counterparts in the United States. Course is for first-year, non-transfer students only.

L66 ChSt 251 Juvenile Justice in the Black Experience

This course examines the sociolegal past, present, and future of American juvenile justice, with a focus on the Black American experience. The course is organized in three parts. Part I surveys the late 19th- and early 20th-century development of the "parental state," including its institutional centerpiece

(the juvenile court), its principle legal subjects ("dependents" and "delinquents"), and how these took shape alongside the contemporaneous rise of American Apartheid. Part II examines several key changes and challenges in contemporary juvenile justice, including the transformation of this institution in the wake of the Civil Rights Movement and the endurance of racialized juvenile social control in the post-Civil Rights period. Finally, Part III considers possible futures of youth justice in the United States and beyond as well as practical strategies for achieving equal protection within and beyond the law. For AFAS majors, this course counts as Area Requirement 2.

L66 ChSt 299 Internship in Children's Studies

This course offers up to three hours of academic credit (on a pass/fail basis) for an unpaid internship with an outside organization in some area of Children's Studies. Enrollment is restricted to children's studies minors and will require completion of a final written project as well as coordination with a site supervisor. For more information, please contact Dr. Wendy Anderson by email (andersonwl@wustl.edu) or phone: 314-935-9523.

Credit variable, maximum 3 units.

L66 ChSt 300 Interdisciplinary Introduction to Children's Studies

What is childhood? Is it supposed to be happy? And what can children's books, toys, and memoirs tell us about the experience of childhood in a certain time and place? This course is designed to introduce students to the field of children's studies, including readings in the history and literature of global childhood, excerpts from children's films and TV, visits from Wash U. faculty studying children across various disciplines, and real or virtual field trips to a children's museum and a juvenile detention facility. The course is intended to give students a richly detailed picture of how children and childhood are dealt with as subjects throughout the curriculum and the impact these approaches have had on how the greater society thinks about children. Freshmen are welcome to enroll. This course fulfills the Social Contrasts requirement in Arts & Sciences.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

L66 ChSt 301C The American School

In this course, we examine the development of American schooling. Our focus is on three general themes: (1) the differing conceptions of schooling held by some American political, social, and cultural thinkers; (2) the changing relationships among schools and other educational institutions, such as the church and the family; and (3) the policy issues and arguments that have shaped the development of schooling in America.

L66 ChSt 304 Educational Psychology

This is a course in psychological concepts relevant to education that is organized around four basic issues: (1) how humans think and learn; (2) how children, adolescents, and adults differ in their cognitive and moral development; (3) the sense in which

motivation and intention explain why people act as they do; and (4) how such key human characteristics as intelligence, motivation, and academic achievement can be measured. Offered fall and spring semesters.

L66 ChSt 313B Education, Childhood, Adolescence and Society

This course examines the social and developmental experiences of children and adolescents at the national and international level. Readings will focus on the development of children and adolescents from historical, sociological, psychological, and political perspectives. Students will examine how both internal and external forces impact the developmental stages of children and adolescents. Students will investigate the issues that impact children and adults such as poverty, war, media, schooling, and changes in family structure. Students will explore some of the issues surrounding the education of children such as the effects of high quality preschool on the lives of children from low income families and the connection between poverty and educational achievement. Students will focus on the efficacy of the "safety nets" that are intended to address issues such as nutrition, health, violence, and abuse. Throughout the course, students will review and critique national and international public policy that is designed to address the needs of children and their families throughout the educational process.

L66 ChSt 3140 Sociolinguistics, Literacies, Schools, and Communities

Literacy learning and development within a thriving community require attention to the linguistic, cultural, and economic diversity of students. Within an era of state standardization and accountability, it is imperative to use a systems approach in education that unites homes, schools, and communities. Differentiating instruction to meet the needs of all students, including English language learners and other traditionally marginalized groups of students, is essential. This course will introduce students to sociocultural theories of literacy across settings. It will prepare students to analyze how race, ethnicity, class, gender, and language influence the development of literacy skills. We will develop a multifaceted view of literacy that is embedded within culture and that acknowledges the influences of social institutions and conditions. We will incorporate strategies for individual student needs based on students' backgrounds and prior experiences to deliver differentiated instruction and to teach students to set learning goals. Offered in fall semester only.

L66 ChSt 321 Developmental Psychology

This course concentrates on the cognitive and social development of the person from conception to adolescence. Topics covered include: infant perception, attachment, cognitive development from Piagetian and information processing perspectives, aggression and biological bases of behavior. Prerequisite: Psych 100B.

Same as L33 Psych 321

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 3221 Girls' Media and Popular Culture

This course will analyze girls as cultural consumers, mediated representations, cultural producers, and subjects of social anxiety. Readings will cover a range of media that have historically been associated with girlhood, including not only film, television, and digital media but also dolls, magazines, literature, and music. We will explore what role these media texts and technologies have had in the socialization of girls, the construction of their gendered identities, and the attempts at regulation of their behavior, sexuality, and appearance. Although the course will focus on girlhood media since the 1940s, we will consider how constructions of girlhood identity have changed over time and interrogate how girlhood identity intersects with race, sexuality, and class. The course will examine important debates and tensions arising in relation to girls' media. We will evaluate concerns and moral panics about girls and their relationship to or perceived overinvestment in media and compare and contrast this with accounts of girls as active media consumers and producers. We will critically analyze how girls have been understood to negotiate agency in relation to commercialized culture — how they have been represented as wielders of "girl power," as passive or active consumers, as fans, and as media producers themselves. We will also analyze attempts to intervene in girls' media and popular culture and consider how these interventions have attempted to empower, inspire, or regulate girls or how they have worked to reinforce or challenge gendered understandings of childhood.

L66 ChSt 325 Psychology of Adolescence

This course concentrates on brain, cognitive, and social development during adolescence. This period of development is marked by transition and change. Special topics will include the vulnerability of the adolescent brain and the development of sexual orientation. Prerequisite: Psych 100B.

Same as L33 Psych 325

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 3270 Comics, Graphic Novels, and Sequential Art

This course traces the evolution of comics in America from the "comic cuts" of the newspapers, through the development of the daily and Sunday strips, into the comic book format, and the emergence of literary graphic novels. While not a uniquely American medium, comics have a specifically American context that intersects with issues of race, class, gender, nationalism, popular culture, consumerism, and American identity. Comics have repeatedly been a site of struggle in American culture; examining these struggles illuminates the way Americans have

constructed and expressed their view of themselves. The way comics have developed as a medium and art form in this country has specific characteristics that can be studied profitably through the lens of American Culture Studies.

L66 ChSt 331 Topics in Holocaust Studies: Children in the Shadow of the Swastika

This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period — the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children — both those they considered "Aryan" and those they designated "enemies" of the German people, such as Jewish children — an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. *Open to freshmen. Students must enroll in both main section and a discussion section.*

L66 ChSt 336 The Cultural History of the American Teenager

This course will explore the recent history of the teenager in the United States, from the rise of teen culture in the 1950s to the current state of adolescence in the new century. Why have so many novels and films memorialized adolescence? How has the period of development been portrayed in books and film? How have depictions and attitudes toward teen culture changed over the past 50 years? We will begin with J.D. Salinger's classic novel of adolescence alienation, *The Catcher in the Rye*, a book that in many ways helped initiate the rise of the youth movement in the 1950s and 60s. From there, we will read a series of novels and historical studies that will trace the changes in teen culture that have occurred over the past half century. Our class will also consider a few films, such as *Rebel Without a Cause* and *Dazed and Confused*, which have helped shape our conception of the American teenager. Ultimately, we will question what these depictions of teen culture can tell us about larger trends and concerns in American life. Readings will include Judy Blume's *Forever*, Stephanie Meyer's *Twilight*, and Colson Whitehead's *Sag Harbor*.

Credit 3 units.

L66 ChSt 341 Children and Childhood in World Religions

This course will investigate the roles children play in some of the world's major religious traditions and how those traditions construct their concepts of childhood. From child disciples to child martyrs, from the miraculous childhoods of religious founders to the rites marking childhood's end, and from divine commandments involving fertility to those mandating celibacy, we will explore a wide range of different religions' teachings about children and childhood. We will combine primary and secondary sources including written texts, movies/video, and web-based content in order to learn more about the complex relationships between children and the religious traditions of Judaism, Christianity, Islam, Hinduism, Buddhism, and Confucianism.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L66 ChSt 342 Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World

From child saints to child scholars and from child crusaders to child casualties, the experience of childhood varied widely throughout the European Middle Ages. This course will explore how medieval Jews, Christians, and Muslims developed some parallel and some very much divergent concepts of childhood, childrearing, and the proper cultural roles for children in their respective societies. Our readings will combine primary and secondary sources from multiple perspectives and multiple regions of Europe and the Mediterranean World, including a few weeks on the history and cultural legacy of the so-called Children's Crusade of 1312. We will conclude with a brief survey of medieval childhood and its stereotypes as seen through contemporary children's books and TV shows. This course fulfills the Language & Cultural Diversity requirement for Arts & Sciences.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L66 ChSt 344 Children's Television

How does contemporary television imagine children? How does the industry speak to them, with what aims, and using what types of representational strategies and modes of address? In turn, how do young people respond, both as viewers and, with the advent and increasing accessibility of new technologies, as media producers? This seminar will address these and other related questions while introducing students to the study of children's television in cultural and critical media studies. Throughout, we will address the theoretical question suggested by the course's title, a reference to the work of literary scholar Jacqueline Rose: is children's television possible?

Same as L53 Film 344

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L66 ChSt 354 No Boys Allowed: Girlhood and Programming for Girls in the 19th and 20th Centuries, United States

If boys and girls go to school together, why do we find so much sex-segregated extracurricular programming in the United States? Are there benefits? This course seeks to answer these questions by exploring the history of girlhood and girls' programming in the United States in the 19th and 20th centuries.

We will explore the movement of girls' organizations from developing out of girls' exclusion from boys' clubs to a gradual emphasis on "empowering" girls. A critical examination of gender, sexuality, race and class will inform course discussions. Same as L77 WGSS 354

L66 ChSt 3620 Anthropological Perspectives on the Fetus

Where do we come from? How do we get here? When does "life" begin? Is the fetus a "person" or something else? How could we decide? This course will integrate biological, medical, philosophical, and cross-cultural perspectives to examine how various societies (including our own) understand the nature of the human fetus. The course will examine basic human embryology, beliefs about conception and fetal development, ideas about the moral status of the fetus, controversies surrounding prenatal care and antenatal diagnostic testing (including sex-selection and genetic screening tests), current controversies about fetal medicine and surgery, and the problem of abortion in cross-cultural perspective.
Same as L48 Anthro 3620
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 381 Banned Books

Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago a Russian student was exiled to Siberia for possessing a copy of Emerson's *Essays*; today, school boards in the United States regularly call for the removal of *Huckleberry Finn* and *The Catcher in the Rye* from classrooms and library shelves. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. The course explores these issues by looking closely at several American and translated European texts that have been challenged on moral, sociopolitical or religious grounds to determine what some readers have found so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments.

L66 ChSt 400 Independent Work in Children's Studies

This course provides credit for children's studies minors who undertake a program of independent reading and/or research under the supervision of a faculty mentor on some subtopic within Children's Studies for which there is no regular course available. Please contact the Academic Coordinator for more information.
Credit variable, maximum 3 units.

L66 ChSt 4036 Children of Immigrants: Identity and Acculturation

This seminar takes an interdisciplinary approach to children of immigrants as an analytical subject. The course texts are in sociology, anthropology, and cultural studies, and a significant number of our case studies focus on 1.5- and second-generation Asian Americans and Latinx. Identity and identity politics are main topics; in addition, the course will critically examine theories on acculturation and assimilation. Our discussions cover a wide range of topics from culture, ethnicity, and race, to bilingualism, education, family, school, ethnic community, and youth culture. Students are required to conduct an individual research project among a selected group of children of immigrants.

L66 ChSt 4280 History of Urban Schooling in the United States

More than ever, schooling in urban areas is researched, and it is at the center of debates for improving U.S. schooling. This course, which is framed by contemporary issues, focuses on the history of urban schooling and policy to deepen our understanding of the contemporary landscape. We will focus on particular cities and their school districts; these may include New York, Boston, Chicago, Detroit, St. Louis, Los Angeles, San Francisco, and Atlanta. In this course, students will develop a strong contextual understanding of the conditions of urban schooling; the history of urban school reform; and the debates over the purposes of urban schools, past and present.
Same as L12 Educ 4280
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L66 ChSt 4289 Neighborhoods, Schools, and Social Inequality

A major purpose of the course is to study the research and policy literature related to neighborhoods, schools and the corresponding opportunity structure in urban America. The course will be informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis will be placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups will complement the course foci.
Same as L12 Educ 4289
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L66 ChSt 453B Sociology of Education

This course provides an overview of sociological theory and research on education in contemporary U.S. society. Drawing from sociological perspectives, it covers the implications of schools and schooling for social inequality, mobility, and group relations. It examines major theoretical perspectives on the purpose and social organization of mass education in the United States, and topics related to the organization and function of schools, access to educational resources, and group disparities in school experiences and outcomes.

Same as L12 Educ 453B

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA, ETH EN: S

L66 ChSt 4591 The Development of Social Cognition

This course will explore what is known about the development of social cognition. Our starting point will be infants' capacity to navigate the social world, for instance, detecting agents, identifying social partners, and learning from those around us. We will consider what happens when the human ability to reason about others breaks down (as with autism), and what this can teach us about typical development. Each week we will cover one topic and a related set of readings. Class meetings will be devoted to active discussion and debate about the content of the readings. Students are required to write a weekly reaction paper to the readings to promote class discussion, and will give an in-class presentation on a novel research topic at the end of the semester. Graduate students may have additional course requirements. Prerequisites: Psych 100B and one of the following: Psych 315 or 321 or 360.

Same as L33 Psych 4591

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L66 ChSt 4607 Education of Black Children and Youth

This course provides an overview of the education of Black children and youth in the United States. Covering both pre- and post-Brown eras, students in this course offers a deep examination of the research focused on Black education. The social, political, and historical contexts of education, as essential aspects of American and African-American culture and life, will be placed in the foreground of course inquiries.

L66 ChSt 461B Construction and Experience of Black Adolescence

This course examines the construct of black adolescence from the general perspectives of anthropology, sociology and psychology. It begins by studying the construct of black adolescence as an "invention" of the social and behavioral

sciences. The course then draws upon narrative data, autobiography, literature and multimedia sources authored by black youth to recast black adolescence as a complex social, psychological, cultural and political phenomenon. This course focuses on the meaning-making experiences of urban-dwelling black adolescents and highlights these relations within the contexts of class, gender, sexuality and education.

L66 ChSt 481W History of Education in the United States

Examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy in different periods of our history. Note About Enrollment: All students will be initially waitlisted. Because this is a writing intensive course, enrollment will most likely be 12 to 15 students. Enrollment preference will be given to students who are majoring/minoring in Educational Studies, Teacher Education, Applied Linguistics, History, American Culture Studies, and Children's Studies and to students needing to complete their Writing Intensive requirement. Instructor will e-mail students about enrollment.

L66 ChSt 499 Senior Seminar in Children's Studies

The children's studies minor brings together a range of disciplinary and methodological approaches to the study of children and childhood. In this 1-credit seminar, meeting for five three-hour evening sessions, junior and senior children's studies minors will discuss a series of interdisciplinary readings about the past and future of children's studies as a field, reflect on their own pasts and futures in the children's studies minor, and create and present portfolios of their minor experience. This course is a capstone experience for the minor in children's studies. Prerequisite: junior or senior standing and a minor in children's studies.

Credit 1 unit. A&S IQ: HUM Arch: HUM Art: HUM EN: H

Chinese

The Department of East Asian Languages and Cultures (EALC) offers a major and minor in East Asian Languages and Cultures that allows cross-cultural and interdisciplinary approaches to the study of East Asia. Students can choose either to focus in one of our three linguistic and cultural traditions — Chinese, Japanese, and Korean — or to explore different traditions and societies by

taking courses in multiple regions. Our major opens up career opportunities in diplomacy, business, law, journalism, and higher education, in addition to providing preparation for further study in the relevant languages and cultures. The major entails advanced training in the chosen language and a sound background in the respective literature and culture. Students are encouraged to enhance their cultural knowledge by enrolling in relevant courses offered through other departments and programs such as Anthropology, Art History, Film and Media Studies, History, Global Studies, Performing Arts, and Religious Studies.

For information about the major, please visit the EALC Majors page (p. 508).

For information about the minor, please visit the EALC Minors page (p. 509).

Language Placement: Placement tests are required for all students entering our language programs, with the exception of those students who have had no previous exposure to the language and wish to enroll in the first semester of the first year of instruction. Students who test into second-year Chinese and satisfactorily complete (with a grade of B- or better) at least one semester of language study may petition for 3 units of retroactive credit; students who test into third year or above and satisfactorily complete (with a grade of B- or better) at least one semester of language study may petition for 6 units of retroactive credit. Credit is limited to 3 units for those testing into second year and 6 units for those testing into third year or above. Please note that students with native language proficiency as determined by the Chinese language section, as well as students who enroll in courses below their placement level, are ineligible for retroactive credit units. Students who misrepresent their language proficiency so as to gain entrance into a course at the elementary or intermediate level will be dropped from that course.

L04 Chinese 101D First-Level Modern Chinese I

Introduction to the modern spoken and written national language of China. Five regular hours and additional drill session. Students with some previous Chinese language background must take a placement examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 102D First-Level Modern Chinese II

Continuation of 101D. Prerequisite: L04 101D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 106 Beginning Chinese for Heritage Speakers I

This course is designed for students who have basic speaking and listening skills and some background in writing or reading. Prerequisite: placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 107 Beginning Chinese for Heritage Speakers II

Continuation of 106. Emphasis on improving basic reading and writing skills. Prerequisite: L04 106 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 1070 Ampersand: A Performative Perspective on Chinese Culture and Identity

This course examines the diversified and rich history of Chinese visual and performance cultures from the Chinese mainland, Taiwan, Hong Kong, and throughout the Chinese diaspora. A collaboration between the East Asian Languages and Cultures and Performing Arts departments, this course explores Chinese cultural narratives in relation to how they have been performed — on stage in traditional forms of dance-drama, on screen in film, and as lived in the practice of everyday life — from the late Imperial period to the present. It includes a practice component that introduces the students to movement disciplines such as Tai' Chi and opera, and it allows students to pursue creative assignments such as interview, stage plays, and filmmaking that demonstrate their developing knowledge of historical and contemporary Chinese culture. Building bridges of understanding between the United States and the Republic of China in Taiwan, the course will culminate in a spring break trip to Taiwan.

This course is only for first-year, non-transfer students in the Ampersand: Encountering China program.

Same as L61 FYP 107

Credit 3 units. A&S: AMP A&S IQ: LCD, SC BU: HUM, IS EN: H

L04 Chinese 1080 Encountering Chinese Culture: Performing Tradition, Engendering Transformations

This course examines the development of modern Chinese culture and its dynamic relationship with traditions and renovations. During the past century, China has gone through a series of political, cultural, economic, and technological transformations that constantly reshaped the form and content of Chinese culture. Tracing the drastic changes in Chinese

language, performance and media forms from the late 19th century to contemporary time, this course guides the student through the pivotal moments in modern Chinese history and analyzes their impacts on literature, drama, dance, film and internet culture. What transformative promise did new media and art forms deliver? How do we make sense of the intricate connection between tradition and renovation? The purpose of this course is to foster an understanding of Chinese culture as a dynamic process of formation rather than a static, homogeneous entity. However, instead of seeing this formation as a linear progression with one form or style replacing the other, we will study how past traditions — both ancient and recently constructed ones — are reconfigured in new cultural representations and practices.

L04 Chinese 130 Basic Chinese I

Basic Chinese I is the first half of the beginning level Chinese and is designed to meet the practical needs of students who are interested in learning Chinese but do not have time for a full-load study. This course is scheduled to move at half the pace of regular Chinese 101. Students will learn slowly but surely the same basic knowledge of Mandarin phonetics, standard grammar and 300 to 350 vocabulary items. This basic course emphasizes listening comprehension and conversational skills through aural-oral practices. The reading and writing of basic Chinese are strongly encouraged as secondary skills. After completing the spring course I, followed by the fall course II, interested students can then go on to regular Chinese 102. Basic Chinese 1 and Basic Chinese 2 do not fulfill the language sequence requirement.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L04 Chinese 131 Basic Chinese II

This is the continuation of Basic Chinese I (L04 130). It is designed to meet the practical needs of students who are interested in learning Chinese but do not have time for a full-load study. This course will move at half the pace of Chinese 101D and will present the second half of the 101D curriculum. Students will learn basic knowledge of Mandarin phonetics, standard grammar, and approximately 350 new lexical items. This course emphasizes listening comprehension and conversational skills through aural-oral practice, with reading and writing Chinese as complementary skills. After completing this course, students can continue with Chinese 102D. Basic Chinese 1 and Basic Chinese 2 do not fulfill the language sequence requirement. Prerequisite: L04 130 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L04 Chinese 150 First-Year Seminar: Exploring East Asian Classics

This first-year seminar introduces students to major works of the Chinese, Korean, and Japanese traditions. Although written centuries in the past, these texts still reverberate with meaning today and offer important means to understand the often chaotic and confusing events occurring daily around us. What is the self? What is the relationship between the individual and society? How do we live an ethical life? What is literature and for whom is it intended? In grappling with these questions, we will directly engage with the texts through close reading and in-class discussion. We will, at the same time, also ask broader

questions that concern how knowledge is produced, spread, and consumed: what is a canon? Who are the gatekeepers? What does it mean to approach East Asia through a set of "canonical" texts? Among the texts considered this term will be The Analects, Daodejing, Lotus Sutra, Tale of Genji, Tales of the Heike, Tales of Moonlight and Rain, Samguk yusa, and Memoirs of Lady Hyegyong. This course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: BA EN: H

L04 Chinese 206 Intermediate Chinese for Heritage

Speakers I

Designed for students who have either completed Chinese 107 or who have basic speaking and listening skills and mastery of at least 300 written characters. Prerequisite: L04 107 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 207 Intermediate Chinese for Heritage

Speakers II

Designed for students who have either completed Chinese 206 or who have basic speaking and listening skills and mastery of at least 800 written characters. Prerequisite: L04 206 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 211 Second-Level Modern Chinese I

The standard second-year level of instruction in modern Chinese. Students learn both long and short forms of characters. Prerequisite: L04 102D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 212 Second-Level Modern Chinese II

The standard second-year level of instruction in modern Chinese. Students learn both long and short forms of characters. Prerequisite: L04 211 (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 221 Conversational Chinese: A Multimedia Course

This course is intended for students from advanced beginners to intermediate-level learners who want to improve their Chinese conversational skills and fluency. In this course, students will learn Chinese expressions and phrases encountered in daily situations, and they will also learn to read and type Chinese characters. This is a multimedia course that will utilize videos, movies, and authentic language materials for instruction and learning. By the end of semester, students should attain the abilities to use accurate pronunciation, tones, vocabulary, expressions and grammar in connected speech; to hold conversations in daily situations; to build up speaking and listening fluency; to use appropriate manners, both verbally and nonverbally, in conversations; and to acquire basic knowledge of Chinese sociocultural values and pragmatics. Prerequisites: Permission of instructor.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L04 Chinese 227C Chinese Civilization

An introduction to Chinese culture through selected topics that link various periods in China's past with the present. Ongoing concerns are social stratification, political organization, and the arts, gender relationships and the rationales for individual behavior, and the conceptions through which Chinese have identified their cultural heritage. Readings include literary, philosophical, and historical documents as well as cultural histories. Regular short writing assignments.
Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: BA, IS EN: H

L04 Chinese 270 Sophomore Seminar: U.S.-China Relations: Perceptions and Realities

The United States and China are the two most important global powers today, and the bilateral relationship is one of the most comprehensive, complex, consequential, and competitive major-power relations in the world. The course aims to examine the attitudes, ideas, and values that have shaped the relationship, from the era of colonial expansion in the 1800s to the rise of China as a major political and economic power in the 21st century. Drawing upon visual images, literature, films, policy statements, and other materials, the course will analyze the patterns of perceptions that have informed and shaped the understanding of realities. This course, which uses an interdisciplinary approach, will include discussions and debates from both American and Chinese perspectives.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L04 Chinese 275 Sophomore Seminar: Beijing: From Imperial Capital to Olympic City

This course examines recent English-language scholarship on Beijing's history and culture. From the early modern period to the contemporary era, Beijing has served as the capital for imperial, early Republican, and revolutionary and post-socialist China. The city thus has been virtually synonymous with governmental power and elite politics. However, recent scholarship has shifted focus from the political perspective to uncovering the social and cultural changes at the grassroots. Notable scholarly works have demonstrated that the modernization impulse and the move to industrialization served to create the city's modern face. Administrative reforms gave rise to new conceptions and a host of institutions to manage social relief, public services, and legal and punitive institutions. The rise, fall, and subsequent revival of the consumer marketplace impacted cultural production and consumption. Mass (de)mobilization closed old venues while opening new possibilities for residents to understand and participate in politics. The recent English-language scholarship not only delineates forces that shaped the lives of millions of residents of Beijing but also situates their experience in the national and global context of modernization and revolution.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L04 Chinese 2980 Undergraduate Internship in Chinese

Students receive credit for a faculty-directed and approved internship. Registration requires the completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center

and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities (e.g., eight to 10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Credit/no credit only.
Credit variable, maximum 3 units.

L04 Chinese 306 Advanced Chinese for Heritage Speakers I

This course is designed for heritage students who have studied at least two years of Chinese (or equivalent) to achieve greater proficiency in the oral and written use of the language through reading, listening, speaking, and writing. Prerequisite: L04 207 (grade of B- or better) or placement by examination.
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 307 Advanced Chinese for Heritage Speakers II

Continuation of Chinese 306. This course is designed for heritage students who have studied at least two years of Chinese (or equivalent) to achieve greater proficiency in the oral and written use of the language through reading, listening, speaking and writing. Prerequisite: L04 306 (grade of B- or better) or placement by examination.
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 3162 Early Modern China

This course examines political, socioeconomic, and intellectual-cultural developments in Chinese society from the middle of the 14th century to 1800. This chronological focus largely corresponds to the last two imperial dynasties, the Ming (1368-1644) and the Qing (1644-1911). Thematically, the course emphasizes such early modern indigenous developments as increasing commercialization, social mobility, and questioning of received cultural values.
Same as L22 History 3162
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L04 Chinese 3163 Historical Landscape and National Identity in Modern China

This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campus, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual, political and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory, and changing over time are an important concern of this course.
Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L04 Chinese 3166 Archaeology of China: Food and People

China is a country with a large population, diverse landscapes, and unique food. This course will explore the origins of Chinese food in the context of the formation of Chinese societies. During the last two decades, the archaeology of China has become a fast moving subject with advances in methods, theories and

changes of key perceptions. In this context, the beginning and spread of food production in China has become one of the key questions in current archaeology. We will focus on the process of domestication of plants and animals in various regions of China during the Holocene. We will explore how those processes relate to other sectors of the Old World, such as those of South and Southwest Asia. This course will pursue answers to the following questions: Why the Chinese ways of living and eating are different from those in the West? How production and consumption in China were shaped by food globalization in prehistory?

L04 Chinese 3167 Economic History of China: From the Silver Age to Reform and Opening, 1500-1990

This seminar explores the economic history of China from the 16th to the 20th century; this time period is the half a millennium during which China became part of the world economy and defined its development in major ways. Over the course of the semester, students will be exposed to the main debates in the field of Chinese economic history while acquiring a strong grasp of the nuts and bolts of how economy functioned and changed from the imperial to the modern times. Situating China within a comparative perspective, we will examine a multitude of debates ranging from the global silver age of the 16th century to the birth of capitalism, the socialist economy, and the PRC's recent involvement in Africa. We will in particular discuss the contradictions that arose out of China's integration into the world economy and the different kinds of economic regimes that existed and continue to exist within China. While this course assumes a basic familiarity with Asian history, students with backgrounds in other world histories and/or social science disciplines should feel comfortable with the course material.

Same as L22 History 3167

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L04 Chinese 3168 A History of Modern China

This course explores the 19th- and 20th-century history of China. Its purpose is to provide students with a historical foundation to understand the momentous changes the country underwent during its traumatic transition from an empire to a nation-state. We start the course at the height of the empire's power in the late 18th century, when the Qing dynasty (1637-1912) conquered vast swathes of lands and people in Inner Asia. We then move on to the Qing's troubled relationship with Western capitalism and imperialism in the 19th century, which challenged the economic, social, and ideological structures of the imperial regime, culminating in the emergence of "China" as a nation-state. By situating China's national history within a global context, the course outlines in detail the transformations that took place in the 20th century, from the rise of communism and fascism to the Second World War to Maoism and cultural revolution. We end the semester with yet another major change that took place in the 1980s, when a revolutionary Maoist ideology was replaced with a technocratic regime, the legacies of which are still with us today.

Same as L22 History 3166

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L04 Chinese 316C Modern China: 1890s to the Present

A survey of China's history from the clash with Western powers in the 1800s to the present day economic revolution. This course examines the background to the 1911 revolution that destroyed the old political order. Then it follows the great cultural and political movements that lead to the Communist victory in 1949. The development of the People's Republic will be examined in detail, from Mao to the global economy.

L04 Chinese 3195 Empire and Ethnicity: Qing Legacies in China and Inner Asia, 1600 to Today

Eschewing traditional narratives of a "closed" Chinese civilization, this course explores the cultural, religious, and ethnic diversity of China and its dynamic interactions with Inner Asia during the early modern period. It questions the myth of a monolithic Chinese culture and uncovers the region's multiple and ethnically entangled past through an in-depth look at the Manchu-led Qing dynasty (1644-1912). This was the last non-Han dynasty of the Imperial Era, and it gave the People's Republic of China its vast Inner Asian territories: Xinjiang, Inner Mongolia, and Tibet. In rethinking the Qing Empire, this course particularly focuses on Tibetan Buddhism and Islam as religious ideologies that linked China with Tibetan, Mongolian, and Turkic-Muslim regions of Inner Asia through the imperial center at Beijing. Specific topics will range from food culture (Halal) to the Qing's expansion into and later colonization of Xinjiang, the reverberations of which persist even today under the Belt and Road Initiative.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L04 Chinese 3211 Contemporary Chinese Popular Culture

With the rise of the Chinese economy and global capitalism, popular culture has proliferated in mainland China in recent years. This course traces the development of Chinese popular and youth culture and society from the 1990s to the present. It also refers back to modern times and ancient Chinese Confucian philosophy for historical background information. The course covers various forms of Chinese popular culture, such as movies, music, television programs, Internet literature, religion, sports, and food. Students observe primary resources and read academic articles to engage in a multiperspective and multimedia view of present-day China in the age of globalization and East Asian regionalization.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L04 Chinese 3352 China's Urban Experience: Shanghai and Beyond

The course studies the history of Chinese cities from the mid-19th century to the late 20th century. It situates the investigation of urban transformation in two contexts: the domestic context of modern China's reform and revolution; and the global context of the international flow of people, products, capitals and ideas. It chooses a local narrative approach and situates the investigation in one of China's largest, complex, and most dynamic and globalized cities — Shanghai. The experience of the city and its people reveals the creative and controversial ways people redefined, reconfigured and reshaped forces such as imperialism, nationalism, consumerism, authoritarianism, liberalism, communism and capitalism. The course also seeks to go beyond the "Shanghai model" by comparing Shanghai with other Chinese cities. It presents a range of the urban experience in modern China.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L04 Chinese 341 Early and Imperial Chinese Literature

An introduction to important genres and themes of Chinese literature through the study of major writers. Brief lectures on the writers' personal, social, intellectual, and historical contexts; most class time will be devoted to student discussions of their masterworks as an avenue for understanding Chinese culture during selected historical periods. Fulfills premodern literature requirement for EALC degrees. All readings will be in English translation.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: HUM, IS EN: H

L04 Chinese 3415 Early Chinese Art: From Human Sacrifice to the Silk Road

How does ancient and medieval Chinese art inspire contemporary artists? This course examines Chinese art, architecture, and material culture from the prehistoric period through the end of the medieval Tang dynasty to demonstrate how the past continues to affect contemporary Chinese art and the art of its future. Topics covered include Neolithic ceramics and jades, the early bronzecasting tradition, the Terracotta Army and its predecessors, early brush arts and Buddhist sites, and the varied exotica of the Silk Road. Each class teaches early and contemporary works side by side to demonstrate how artists today continue to look to the past as they create the art of the future. Prerequisite: One course in Art History at the 100 or 200 level or permission of instructor.

Same as L01 Art-Arch 3415

Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH, HUM BU: HUM, IS EN: H

L04 Chinese 342 Modern and Contemporary Chinese Literature

This course provides an introduction to the major writers and works of Chinese literature from the turn of the 20th century to the present, including fiction, poetry and film. It looks at these works in their relevant literary, sociopolitical, and cultural contexts (including Western influences). Fulfills modern literature requirement for EALC degrees. All readings in English translation.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: ETH, IS EN: H

L04 Chinese 3425 Classical to Contemporary Chinese Art

Surveying Chinese art and architecture from the 10th century through today, this course examines classical and imperial works as the foundation for modern and contemporary art. By engaging with the theoretical issues in art history, we will also pay particular attention to questions of gender, social identity, cultural politics, and government control of art.

Same as L01 Art-Arch 3425

Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM, IS EN: H

L04 Chinese 3426 Modern & Contemporary Chinese Art

This course will explore the ways in which Chinese artists of the 19th, 20th, and 21st centuries have defined modernity and tradition against the complex background of China's history. By examining art works in different media along with other documentary materials, we will also engage with theoretical issues in art history, such as modernity, cultural politics, and government control of art.

Same as L01 Art-Arch 3426

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: AH, GFAH, HUM BU: HUM, IS EN: H

L04 Chinese 350 U.S.-China Relations from 1949 to the Present

The United States and China are the two most important global powers today, and the relationship between them is one of the most comprehensive, complex, and consequential major-power relations in the world. The tangled relationship is at times turbulent, and its future remains uncertain. This course studies the bilateral relationship from the Chinese Civil War to the rise of China as a major political and economic power in the 21st century. It invites students to explore the following questions: What have China and the U.S. done to confront or accommodate each other in global politics? How has foreign policy in both countries balanced the often competing goals of state security, economic stability, domestic political order, and international influence? What are the impacts of a rising China on geopolitics in the Asia-Pacific region and on the U.S.'s global leadership in the 21st century? By drawing on scholarship in political and social history and area studies, this course helps students better understand both the historical context and current developments of U.S.-China relations.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, IS EN: H

L04 Chinese 360 Third-Level Modern Chinese I

Emphasis on improving speaking, listening, reading, and writing skills. Texts include Chinese newspapers and modern literary texts. Open to undergraduates only. Prerequisite: L04 212 (grade of B- or better) or placement by examination. Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 380 Readings in Popular Literature and Culture: Writing Stories in Late Imperial China

Why did stories become popular in late imperial China? How were stories written, and what were people's reading habits in a time full of dynamic social and cultural changes? This class answers these questions by reading stories from several narrative genres. Unlike the classic texts for formal education and the imperial civil service examinations, most of these writings were unconventional narratives for leisure reading, and they became part of the popular literature and culture of the time. Primary readings will include selections from formal and informal histories, vernacular short stories, classical language stories, and literary anecdotes. This class concentrates on examples from the 17th and 18th centuries, and these will be accompanied by a small number of secondary readings. A background in Chinese language or culture is welcome but not required. Prerequisite: Sophomore standing or above or permission of instructor. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L04 Chinese 390 EALC Seminar: East Asian Buddhism

This course traces the expansion of Buddhism from its origins in the Indian subcontinent through China, Korea and Japan, identifying both continuities and local developments as seen in the encounter/clash with preexisting traditions. We will adopt a multidisciplinary approach and explore the history, literature, philosophy, and practice of Buddhism in East Asia. Primary readings (all in English) are drawn from a wide range of genres - canonical scriptures, tale literature, hagiographic narratives, and archeological materials. We will also rely extensively on the rich visual and material heritage of Buddhism, looking at common iconographical motifs, popular deities and their many forms, and the ritual function of Buddhist objects in their respective contexts. This course is primarily for sophomores and juniors with a major or minor in the Department of East Asian Languages & Cultures. Other students may enroll with permission. No prior course work on Buddhism or East Asia is required. Same as L81 EALC 3900
Credit 3 units. A&S IQ: HUM, LCD BU: ETH, HUM, IS EN: H

L04 Chinese 399 Undergraduate Independent Study

Prerequisite: Permission of instructor or department. No more than 6 units may be earned by a student.
Credit variable, maximum 6 units.

L04 Chinese 410 Introduction to Traditional Literary Chinese I

Selected readings in premodern Chinese texts. Recommended for students in fields of specialization where knowledge of literary Chinese is normally expected. Prerequisite: L04 427 (grade of B- or better) or instructor's permission. Credit 3 units. A&S IQ: LCD, LS Arch: HUM Art: HUM BU: HUM, IS EN: H

L04 Chinese 411 Introduction to Literary Chinese II

L04 Chinese 4242 Culture and Politics in the People's Republic of China: New Approaches

This course inquires into the political, ideological, and social frameworks that shaped the cultural production and consumption in the People's Republic of China (PRC). In the realm of literature, film, architecture, and material culture and everyday life, this course pays a close attention to the contestation and negotiation between policy makers, cultural producers, censors, and consumers. Understanding the specific contour of how this process unfolded in China allows us to trace the interplay between culture and politics in the formative years of revolutionary China (1949-1966), high socialism (1966-1978), the reform era (1978-1992), and post-socialist China (1992 to present). The course examines new scholarship in fields of social and cultural history, literary studies, and gender studies; and it explores the ways in which new empirical sources, theoretical frameworks, and research methods reinvestigate and challenge conventional knowledge of the PRC that have been shaped by the rise and fall of Cold War politics, the development of area studies in the U.S., and the evolving U.S.-China relations. Graduate students should be proficient in scholarly Chinese, as they are expected to read scholarly publications and primary materials in Chinese. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L04 Chinese 427 Fourth-Level Modern Chinese I

Readings in advanced texts covering a wide variety of fields in social sciences and humanities. Prerequisite: L04 361 or L04 421 (grade of B- or better) or placement by examination. Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 428 Fourth-Level Modern Chinese II

Readings in advanced texts covering a wide variety of fields in social sciences and humanities. Required of all students desiring subsequent tutorial assistance from the department. Prerequisite: L04 427 (grade of B- or better) or placement by examination. Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 430 Topics in Chinese Media Culture: Charting Identity in the Digital Age

In contemporary society, global computational media have come to shape the new form and function of identity. As the users of these digital technologies, we have been conscripted into systems of compulsory identification ranging from fingerprint scanning and biometric facial recognition to big data documenting and calculating our age, gender, race, nationality, and even health conditions and shopping preferences. These technologies of identification promise to measure a truthful and core identity from the surface of a human body for the purposes of authentication, verification, and tracking in service of a mixture of commercial, state, and military interests. One dire consequence of the proliferation of these technologies of identification is the failure to recognize non-normative, minoritarian groups, and thereby replicating or even amplifying racial hierarchies, gender stereotypes, social division, and global inequality. This course asks what identity is and what function identity serves in the contemporary society in East Asia and on a global scale. Recognizing the changing scope of "Asia" as a vital concept and method, students will read extensively contemporary works in Asian Studies, Asian-American Studies, critical race and gender theory, and media theory that deal with the intersection of digital media, race and gender, and global socio-political transformation. Alongside these readings, students will explore contemporary films, artworks, social media events, and online activism in China, Hong Kong, Taiwan, and beyond that reflect the questions of technologized identity and subjectivity. The class will also go back to western philosophies of technology, cybernetics, and media theories to rethink how the universalized prototype of the human (which is a white man) was constructed in scholars' inquiries into mind and body, the self and the other, and the then-new relationship between human and machine. Prerequisites: junior level or above or permission of instructor.

L04 Chinese 4415 Technology, Empire, and Science in China

How did technology, science, and empire intersect in early modern and modern Chinese history? Was there a unique "Chinese" way of studying nature? How did non-Chinese scientists and engineers contribute to China's knowledge of the world? This course offers a historical and historiographical survey of science and technology studies in China, from the 13th to the 20th century. It particularly examines the global circulation of scientific knowledge in the late imperial period, the place of technology in the empire building of the Qing dynasty (1637-1912), and the violent epistemic encounters between the West and China from the 19th century onward. Throughout the semester, we will explore Confucian scientists as well as Muslim geographers, Jesuit engineers, Manchu anatomies, and Chinese barefoot doctors. Positioning China within a global order, the students will question the premises of modern scientific discourses and try to respond to a seemingly simple question: What does science and technology even mean in a Chinese context?

L04 Chinese 4441 The Forbidden City

Home to 24 emperors of the Ming and Qing dynasties (1368-1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace; its construction in the early Ming; the coded symbolisms of its plan and decoration; the rituals of court; and the lives of its denizens, from emperors (including Pu Yi, the "last emperor") to concubines and from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and a backdrop to major political events, as well as its role in the urban design and contemporary art of 21st-century Beijing. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

L04 Chinese 4489 The Three Emperors: Redefining Chinese Art in the Golden Age

Ruling imperial China during its last Golden Age, the Qing emperors Kangxi, Yongzheng and Qianlong patronized the arts during an unprecedented period of prosperity and international exchange. Many of the works they commissioned are now icons of Chinese culture, but in their time these three Manchus redefined Chinese art with ideas and styles from Baroque Europe, Tibet, Mongolia, and even Islamic Central Asia. This seminar focuses on the ethnically and culturally diverse art, architecture, and material culture patronized by these three emperors to examine how they and their multi-ethnic empire changed the definition of Chinese art during the long 18th century. Prerequisites: Intro to Asian Art (L01 111); or one 300-level course in Asian Art History, History or Literature; or permission of instructor.

L04 Chinese 4510 Urban Culture in Modern China

The narrative of rural crisis and peasant revolution has dominated China's modern history for decades. But there has been a growing interest in China's urban past and present with the increased prominence of cities in China's breathtaking economic development and the opening of municipal archives in post-Mao era. The course aims to introduce students to "conventional wisdoms," new directions, and major debates in the urban history field. Topics include: the urban political economy, the cultural dynamics of modernity, the reconstruction of traditions in the making of modernity, the cultural production and consumption, colonialism and imperialism in the urban setting, nationalism, and reform and revolution. Acknowledging and understanding the nuance and difference in views and interpretations in historical writings (historiography) are essential. The course seeks to develop students' research and analytical skills, such as locating secondary sources, incorporating scholarly interpretations, and developing and sustaining a thesis based on secondary and primary sources in student

research. This is an interdisciplinary seminar designed for advanced undergraduates and graduate students. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L04 Chinese 460 Fifth-Level Modern Chinese I

This course is designed for advanced students wishing to improve their skills in conversation, reading and writing of letters, essays, reports, and other types of compositions in Chinese. The reading material is comprised of a variety of authentic texts, including newspapers, short stories, and essays. This course is conducted entirely in Chinese. Required of all students desiring subsequent tutorial assistance from the Department. Prerequisite: L04 428 or L04 411 (grade of B- or better) or placement by examination or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 461 Fifth-Level Modern Chinese II

This course is designed for advanced students wishing to improve their skills in conversation, reading and writing of letters, essays, reports, and other types of compositions in Chinese. The reading material is comprised of a variety of authentic texts, including newspapers, short stories, and essays. This course is conducted entirely in Chinese. Prerequisite: L04 460 or L04 411 (grade of B- or better) or placement by examination or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L04 Chinese 4631 Business Chinese I

In the present globalization, China has been fertile ground for foreign joint business ventures, and this course focusing specifically on business Chinese attests to that fact. This course aims at teaching Chinese business communication using a series of case studies to involve and challenge the students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts, from resolving contract disputes, to developing a business strategy, to establishing a franchise overseas. The course is designed to simulate real business environments where students interact with Chinese businesspeople in business settings, and are motivated to achieve business goals. Prerequisite: L04 428 (grade of B- or better) or permission of instructor.

Credit 3 units. A&S IQ: LCD EN: H

L04 Chinese 4632 Business Chinese II

This is the continuation of Business Chinese 4631. This course uses a series of case studies to involve and challenge students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts. Prerequisite: L04 4631 (grade of B- or better) or permission of instructor.

Credit 3 units. A&S IQ: LCD EN: H

L04 Chinese 467 The Chinese Theater

This course is a survey of the performance and literary traditions of the Chinese theater from their pre-Tang origins to the present day. The course focuses on three forms: 14th-century zaju plays, 16th- and 17th-century chuanqi plays, and recent films from China, Taiwan, and Hong Kong. Background in either China studies or theater in other cultures recommended. Prerequisite: Junior level or above or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

L04 Chinese 4701 Advanced Chinese Readings: Early Modern Vernacular Chinese Short Stories: Eat, Drink, Man, & Woman

This hybrid Chinese language-literature course is designed to meet the needs of students who have taken at least five years of Chinese language courses (including classical Chinese) and are interested in exploring Chinese language and culture in more depth by studying early modern Chinese vernacular short stories. The stories are selected from the Three Words (Sanyan), the renowned three story collections by Feng Menglong, one of the most accomplished authors of vernacular fiction in the seventeenth-century China. The vernacular language in these stories is grammatically similar to modern Chinese, but is charged with the vocabulary of the time and interspersed with classical Chinese verses and expressions. Studying these stories will allow students to appreciate modern grammar while discerning the development of vernacular Chinese over the centuries. Prerequisite: L04 461 (grade of B- or better) and L04 410 or L04 411.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L04 Chinese 476 Reading Seminar in Chinese Traditional Fiction

Topics reading seminar in Chinese traditional fiction; subject matter varies by semester. Prerequisite: junior level or above or permission of instructor.

L04 Chinese 498 Guided Readings in Chinese

Course normally taken after successful completion of Chinese 428. May be repeated once for credit. Prerequisite: Senior or graduate level or permission of instructor.

Credit variable, maximum 3 units.

Classics

Classics is the study of all aspects of the cultures of the ancient Greek and Roman peoples, including their history, languages, literature, thought, and material culture as well as their reception in later cultures. The department also offers courses in the Coptic language of late ancient Egypt (under "Classics" in the catalog). The Department of Classics offers two options for students interested in studying Greek and Roman antiquity: the Classics major (or minor) and the Ancient Studies major (or minor). The major in Classics focuses on the study of the Latin and/or ancient Greek languages. The major in Ancient Studies is for students who want to explore the whole spectrum of the classical world with little or no work in the ancient languages. Resources on campus that support the study of classics include a substantial library collection of materials related to the ancient world, collections of Greek papyri and art, and the Wulfling Coin Collection, which is one of the largest collections of ancient coins owned by an American university.

Phone: 314-935-5123
Email: classics@wustl.edu
Website: <http://classics.wustl.edu>

Faculty

Endowed Professor

Timothy Moore

John and Penelope Biggs Distinguished Professor of Classics
Director of Graduate Studies
PhD, University of North Carolina

Professor Moore's work concentrates on several areas of classical antiquity, including the comic theater of Greece and Rome, Greek and Roman music, and Roman historiography. Current projects include a database and book on music in Greek and Roman theater and articles on music and poetic rhythm in ancient Rome. He also has interests in the history of theater, especially American musical theater and Japanese Kyogen comedy.

Professor and Chair

Catherine Keane

Department Chair
PhD, University of Pennsylvania

Professor Keane's interests range broadly over Greek and Roman literature and culture, but her research centers on the comic genres and their engagement with moral, social, and literary problems, particularly the Roman verse satirists Lucilius, Horace, Persius, and Juvenal and the epigrammatist Martial.

Associate Professors

William Bubelis

Curator of the Wulfling Coin Collection
PhD, University of Chicago

Professor Bubelis' research in Greek history focuses on the intersection of economy, religion and public institutions. His work utilizes the evidence of inscriptions (epigraphy), coins (numismatics) and other material remains alongside the literary texts of ancient historians, poets, orators and the like. While most of his scholarship has engaged with classical Athens, Professor Bubelis avidly explores the societies of the eastern Mediterranean across antiquity, including Iron Age Cyprus and the Achaemenid Persian Empire to Hellenistic Egypt.

Thomas Keeline

Director of Undergraduate Studies
PhD, Harvard University

Professor Keeline works primarily on Latin literature, the history of classical scholarship and education from antiquity to the present, rhetoric, textual criticism, lexicography and metrics.

Zoe Stamatopoulou

PhD, University of Virginia

Professor Stamatopoulou's research and teaching encompass several aspects of ancient Greek literature and culture, but her work focuses primarily on archaic and classical poetry (Homer, Hesiod, lyric poetry, drama). She is also interested in the symposium, ancient biographies of poets, and the reception of archaic Greece in Imperial Greek literature (especially Plutarch).

Assistant Professors

Nicola Aravecchia

PhD, University of Minnesota

Professor Aravecchia's research interests encompass the art and archaeology of Greco-Roman and Late Antique Egypt. He has taught courses in classical languages, ancient history, and art and archaeology in the United States, Egypt and Australia. His current work focuses on the origins and development of Early Christian architecture in rural Egypt. Since 2005, he has been involved in archaeological projects in the Dakhla Oasis, located in the Western Desert of Upper Egypt.

Ian Hollenbaugh (<https://classics.wustl.edu/people/ian-hollenbaugh/>)

PhD, University of California, Los Angeles

Professor Hollenbaugh's research interests include Indo-European linguistics, Homeric Greek, Old Latin, Vedic Sanskrit, and Germanic languages. He focuses particularly on the tense and aspect systems of Indo-European languages from both diachronic and synchronic perspectives.

Luis Alejandro Salas

PhD, University of Texas

Professor Salas specializes in Greek and Roman medicine, philosophy and intellectual history. He is also interested in Aristotelian psychology. His research focuses on medical and philosophical sectarianism, especially in the work of Galen of Pergamum.

Senior Lecturers

Lance Jenott

PhD, Princeton University

Professor Jenott teaches courses on the New Testament, studies in Christian origins, and Coptic language and literature. His other interests include Second Temple Judaism, Greco-Roman philosophy, classical civilizations, and theories and methods in the study of religion. Dr. Jenott is the author of *The Gospel of Judas: Coptic Text, Translation, and Historical Interpretation of the 'Betrayal's Gospel'*, and he is the co-author of *The Monastic Origins of the Nag Hammadi Codices*. He is currently working on a commentary on the Gospel of Judas for the Hermeneia Series by Fortress Press.

Kathryn Wilson

PhD, University of Pennsylvania

Professor Wilson's research interests focus on the intersection of poetry and science. She is especially interested in Hellenistic literature and the relationship between different intellectual enterprises occurring during that time. She is also interested in the evolution of the genre of didactic poetry.

Lecturer

Rebecca Sears

PhD, University of Michigan

Professor Sears' research interests include ancient music, papyrology, Latin poetry (particularly Ovid's *Metamorphoses*) and ancient magic. She is currently working on a textbook for the University of Michigan Press that will discuss important technical and cultural features of both Greek and Roman music as well as the reception and reconstruction of ancient music. In addition to her love of classical languages and cultures, she is a violinist who has performed in benefit concerts throughout New England.

Professors Emeriti

Carl W. Conrad

PhD, Harvard University

Robert D. Lamberton

PhD, Yale University

George M. Pepe

PhD, Princeton University

Susan I. Rotroff

Jarvis Thurston & Mona Van Duyn Professor Emerita

PhD, Princeton University

Majors

The Major in Classics

Total units required: 24

Required courses:

A minimum of 24 credits, with at least 18 credits in advanced courses, are required. The specific program will be determined by the student and the advisor, in accordance with the student's interests. Courses may be chosen from among Greek, Latin and Classics offerings, but all majors must include in their programs a minimum of 12 advanced credits in Greek or Latin, at least 6 of which must be at the 400 level. Classics 225D may not be counted. Those who are able to enter the program at the advanced level because of previous language study will normally take 15 or more advanced credits in language. Competence in both Greek and Latin — although strongly encouraged and necessary for those planning to go on to graduate study in Classics — is not required. Majors, especially those planning graduate work, should enter the Honors Program if time permits.

Please consult the sections below regarding the required capstone experience (p. 444) and additional information (p. 444).

The Major in Ancient Studies

Total units required: 24

Required courses:

Students will take 24 units drawn from courses in the Department of Classics and related departments. Of these, 18 units must be at the advanced level, and at least 6 of these must be at the 400 level. Greek 102D and Latin 102D or a first-year seminar may be substituted for a 200-level course in translation. In this major, students are encouraged to take at least one course in ancient history and to develop a certain depth in one special field of interest (e.g., literature, art, history, philosophy). Therefore, at least 9 of the 18 advanced units of the major should be taken in one such specific area. Classics 225D may not be counted.

Please consult the sections below regarding the required capstone experience (p. 444) and additional information (p. 444).

Required Capstone Experience

All Classics and Ancient Studies majors are required to have a capstone experience of some kind in which they can pull together everything that they have learned in their Classics courses. Except in unusual cases (e.g., a junior year abroad experience), the capstone experience should occur during the students' senior year. Among the most common capstone experiences are the following:

- A senior honors thesis (two semesters of research and writing concluding in a long paper)
- A one-semester research project
- A Classics study abroad experience
- Special work within a 400-level seminar

Students should consult with their advisor to see what kind of capstone experience will work best for them.

Additional Information

Study Abroad: Study abroad for a semester in Rome or Athens is an option many Classics and Ancient Studies majors select. Washington University is a member of the Intercollegiate Center for Classical Studies (ICCS) consortium. Majors and minors regularly attend the one-semester ICCS "Centro" program in Rome. Others choose to attend a semester at the College Year in Athens (CYA) program. Students interested in these programs should consult Professor Tom Keeline (<https://classics.wustl.edu/people/tom-keeline/>). Some other study abroad programs will also allow students to earn major credit in Classics or Ancient Studies.

Senior Honors: Students who are planning to pursue graduate work should enter the honors program, and other students are encouraged to consider this program as well. To apply, a student must have junior standing, an average of A- or better in courses numbered 300 or higher in Greek and/or Latin (for Classics majors) or in Classics (for Ancient Studies majors), an overall grade-point average of 3.65 or higher, and permission of the chair. A formal application should be submitted in April of the junior year. A thesis of substantial nature and length is prepared and written under the direction of a member of the department, beginning during the fall semester of the senior year. A final draft is submitted to the director no later than February 1, and a final copy is submitted to the full thesis committee before the March break. Credit of 6 units is awarded upon presentation of an acceptable thesis. These credits will be in addition to the 24 credits of the major; those students who complete senior honors will therefore graduate with a total of 30 credits in the major.

Minors

The Minor in Classics

Total units required: 15

Required courses:

Code	Title	Units
Greek 317C & Greek 318C	Introduction to Greek Literature and Introduction to Greek Literature	6
or		
Latin 3171 & Latin 3181	Survey of Latin Literature: The Republic and Survey of Latin Literature: The Empire	6

Elective courses:

Three other advisor-approved courses (9 units) in Greek, Latin or Classics are required. These must include at least one Greek or Latin course at the 300 or 400 level. No more than one course may be at the 200 level, and Classics 225D may not be counted. A first-year seminar may be substituted for the 200-level course.

The Minor in Ancient Studies

Total units required: 15

Required courses:

At least two courses must be chosen from the following list:

Code	Title	Units
Classics 341C	Ancient History: The Roman Republic	3
Classics 342C	Ancient History: The Roman Empire	3
Classics 345C	Greek History: The Dawn of Democracy	3
Classics 346C	Greek History: The Age of Alexander	3

Elective courses:

Students need to complete three other courses (9 units) in the culture of Greece and Rome; the selection must be mutually agreed upon by the department advisor and the student. No more than two courses may be at the 200 level. Classics 225D may not be counted. A first-year seminar may count for one of the two 200-level courses.

L08 Classics 1135 First-Year Seminar: The World of Cleopatra

Cleopatra, the last queen of ancient Egypt, captivated her contemporaries and has fascinated the Western world ever since her famous suicide by asp in 31 BCE. She was a woman of contrasts: Pharaoh of Egypt and Greco-Macedonian queen; seductive woman and shrewd political strategist; a ruthless monarch using every means available to consolidate her position in the face of the encroaching power of the Roman Empire. Through texts and material culture, the seminar seeks to understand Cleopatra in the context both of her native Egypt and of the wider Mediterranean world. We thus examine the traditions of Pharaonic Egypt; the historical events that brought Egypt under the control of the Macedonian Ptolemies (Cleopatra's dynasty); the wider stage of East-West tension and conquest in which Cleopatra struggled to maintain her power; her relationships (political and personal) with famous men of her day (Caesar, Herod, Mark Antony); her capital city of Alexandria, the largest metropolis of its day; Cleopatra's brilliant court and its luxury arts; and finally the many Cleopatras that have populated art and literature of later times. We emerge with a sense of Cleopatra, both as a unique individual and as a product of her time.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Art: CPSC BU: IS EN: H

L08 Classics 114 First-Year Seminar: Ancient Literary Journeys

Recent social histories exploring Greek childhood have emphasized the reconstruction of the ancient child's agency. Such studies have been interested to illuminate the lived experience of children and to apprehend their voices so often silent in the sources. While such inquiry has clearly widened our understanding of ancient children's lives, the present course is designed instead to explore explicitly the representation of children as particularly rich reservoirs of cultural values. Drawing upon a range of art historical and archaeological sources and literary genres, we will examine the ways in which children were presented to mirror back social mores, thus capturing the aspirations of ancient Greek society. As figures of future potential, children continue to offer social historians one of the most striking lenses through which to explore the question of our humanity. The protean answer to this question at once reveals the proximity and vast distance that stands between our modern society and the ancient Greek one.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L08 Classics 115 First-Year Seminar: Engaging the Classical Past in Modern Fiction

This course will explore the persistent — but often camouflaged — influence of classical antiquity on modern genre (popular) fiction. Students will read and discuss both texts from antiquity (e.g., Ovid's *Metamorphoses*, Lucian's *A True History*) and selections from the works of major 20th-century authors drawn from the canon of a specific genre. Although popular fiction embraces a wide range of authors and styles, genres that are particularly engaged with the classical past include science fiction (e.g., Jules Verne, Suzanne Collins), fantasy (e.g., J.R.R. Tolkien, Rick Riordan), horror (e.g., H.P. Lovecraft, Stephen King), mystery (e.g., Elizabeth Peters, Steven Saylor), and adventure (e.g., Clive Cussler, David Gibbins). Discussion of these texts will include theorization about the nature of the genre and its origins as well as specific

examples of allusions and intertexts to ancient Greek and Roman authors, focusing on the characters, artifacts, monsters, themes, legends, and plot devices drawn from Greco-Roman mythology or modern mythology about Classical antiquity.

Course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art:

HUM BU: HUM, IS EN: H

L08 Classics 117 First-Year Seminar: Women in Greek and Roman Comedy

Fall 2021 course topic: Women in Greek and Roman Comedy. Comedies in Greece and Rome were written by men and acted by men. The women we meet in these comedies, then, are always filtered through men and tinged with stereotypes accordingly — they are often depicted as “untrustworthy,” “sex-crazed,” “drunkards.” Even a cunning and powerful woman such as Lysistrata (in Aristophanes' comedy of the same name), who leads a coalition of women to deny sex from their husbands until they end the Peloponnesian War, is a product of a man's imagination and was played onstage by a man in a costume. As fun as it is to read Lysistrata as a feminist hero, there are layers of interpretation that beg to be peeled back. In this course, we will peel back those layers and explore the representation of women on the comic stage by reading a selection of comedies featuring women, some in leading roles and some in smaller ones. Note: This course is for first-year, non-transfer students only.

HUM BU: HUM EN: H

L08 Classics 118 First Year Seminar: The Art of Rhetoric from Cicero to Social Media

In Barack Obama's victory speech after the 2008 election, he said, “It's been a long time coming, but tonight, because of what we did on this day, in this election, at this defining moment, change has come to America.” He did indeed promise change, but in making that promise he relied on rhetorical rules-like the climactic tricolon—that were first formulated in classical antiquity and have been passed down in an unbroken tradition right up to today. In this class we will study the uses and abuses of rhetoric from the ancient world to the present. The course combines a study of rhetorical theory with observation of its practice from Cicero to contemporary advertising, and also includes a significant public speaking component. The meticulous deconstruction of complex texts and ideas in this course will give students a tool for cutting to the heart of the issues that continue to face the modern world, and the participants' own speaking and writing will also benefit. Students will analyze both ancient and modern attempts at persuasion in light of classical rhetorical theory, and they will write and deliver two short speeches on topics of their choice.

HUM BU: HUM

L08 Classics 120 First Year Seminar: The Hero

The tale of the hero has endured as one of the most popular narrative forms since the 3rd millennium BC. From the first recording of the Sumerian Epic of Gilgamesh to the 21st c. cinematic spectacle of Marvel's Avengers, audiences have been transfixed by the travails of the protagonist who attains heroic status. In studying seminal heroes drawn from near eastern and

ancient Greek epic, classical tragedy and history, this course will examine why the hero generates such fascination and how the hero reflects back the most fundamental concerns of human existence.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: HUM

L08 Classics 137 First-Year Seminar: The Emperor Nero: Prince, Monster, Artist

The destructive, scandal-ridden career of the Roman emperor Nero (mid-first century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the "Bad Emperors," and seen as a symbol of the decline of Rome itself — especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the *Life of Nero* by Suetonius (second century CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills.

L08 Classics 188 Beginning Coptic I

This course provides an introduction to the Coptic language in the Sahidic (southern) dialect. Coptic was the vernacular language spoken and written in Egypt during the Roman, Byzantine, and Arab periods (until about 1300 CE) and as such is important for studying the history of premodern Egypt. It preserves some of the oldest known translations of the Bible, many apocryphal and "heretical" books that illustrate the wide diversity of ancient Christianity (e.g., the Gospels of Thomas and Mary), as well as sermons, saints' lives, monastic instructions, and liturgical manuals that still constitute the literary culture of the Coptic Orthodox Church today. In addition, a plethora of "magical" papyri illustrate medical and religious practices; personal letters reveal the lives of everyday people; and troves of business documents (e.g., contracts, wills, governmental petitions, receipts) have proved important for understanding Roman and Byzantine economies. Because Roman Egypt was a highly bilingual society, there are even instances of Classical Greek literature translated into Coptic (e.g., selections of Homer and Plato), and these offer a unique witness to how such texts were received by Egyptians. The goal of this course is to cover 15 of the 20 lessons in the grammar book. The remainder will be covered in the second level of this course.

Credit 4 units. A&S IQ: HUM, LCD BU: HUM EN: H

L08 Classics 189 Beginning Coptic II

After completing the remaining grammar lessons from Beginning Coptic I, we will build skill and confidence as translators by reading selections from a variety of Coptic texts: the Sahidic Gospel of Mark, the hagiographic "Life of John the Monk," selections from the Gospels of Mary and Thomas, and a unique Coptic translation of Plato's "Republic." In our readings from the Bible and Plato, those who read Classical Greek will also have the opportunity to study how ancient translators chose to render the Greek texts into Egyptian, and how, in the process of translation, they changed the meaning of the originals.

Prerequisite: Classics 188 or permission of instructor.

L08 Classics 2011 Classical to Renaissance Literature:

Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's *Iliad* is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare.

L08 Classics 223 Ampersand: The Age of Pericles

This seminar will explore the relationship between the sociopolitical history and cultural development of Athens in the fifth and fourth centuries BC. Students will be encouraged to analyze both archeological and literary evidence throughout the process of democratization, paying particular attention to the Periclean building program, including the sanctuary of Athena on the Acropolis, the Agora, domestic Athenian architecture, and the panhellenic sanctuaries of Delphi and Olympia. Selections from the histories of Herodotus and Thucydides, the plays of Sophocles and Aristophanes, the dialogues of Plato, and Aristotle's "Constitution of Athens" will highlight the functions and limitations of the democratic regime. This course is for first-year, non-transfer students in the Democracy and Myth in Ancient Greece Ampersand program.

L08 Classics 225D Latin and Greek in Current English

An astonishingly large number of English words, especially in areas such as medicine, science and law, are derived from Latin and Greek. This course will provide a study of the impact of Latin and Greek on the English language through study of the Latin and Greek roots, prefixes and suffixes that are most commonly found in English technical and nontechnical vocabulary and the linguistic principles through which these elements have entered the English language.

L08 Classics 228 Theater Culture Studies I: Antiquity to Renaissance

This course is a survey of ancient, medieval and Renaissance theater and performance: in both the West and in the East, as it both reflects and shapes culture. Coverage will include the following areas: ancient Greece, ancient Rome, classical Sanskrit theater, Yuan China, medieval Japan, medieval Europe, Renaissance Italy, and Renaissance England. Both scripted theater and performance practices will be examined through the lenses of dramatic literature, theater history, performance studies, and dramatic theory. A continual emphasis will be on marginal and underrepresented figures, as we will attempt to excavate forgotten histories from the theatrical past.

L08 Classics 232E Myths and Monuments of Antiquity

An introduction to the ancient world (circa 3500 B.C. to A.D. 400) based on masterpieces of art and architecture from Mesopotamia, Egypt, Greece, and the Roman Empire. The monuments are accompanied by a selection of myths and documents representing the cultural life of these ancient societies and constituting their legacy to our modern world.

L08 Classics 234 The Greek World

This course offers an introduction to the society and culture of ancient Greece, the civilization that created Homer, Socrates, and Herodotus, among many others. Using a wide variety of literary, documentary, and material sources, we will focus on one central question: what does it mean to be Greek in antiquity? We will explore how the negotiation of "Greekness" affects cultural values, how it influences the geopolitics of the ancient Mediterranean, how women, slaves, and immigrants fit (or do not fit) into this Greekness, how ancient Greek democracy arises, and how it dies.

L08 Classics 236I Cities and Towns of the Ancient World

This course is an introduction to ancient urbanism in the Mediterranean region, the Near East, and the Indus Valley. The chronological span is wide, ranging from the Neolithic era to the Late Roman/Early Byzantine period. The archaeological evidence of some of the earliest known cities will be presented and discussed, with the aim of understanding the formation process of urban centers and how these shaped and influenced their sociopolitical, economic, and cultural life. Broad issues that will be considered in class concern the origin of urban life and its different manifestations; the relationship between the natural landscape and the built environment and how the former affected the development of the latter; and the ways in which ancient civilizations constructed and used space in order to shape social relations. The course will also highlight the available evidence of monuments and artworks in context as integral parts of the urban landscape of ancient cities and towns. When available, ancient documentary sources will be introduced in order to present a more comprehensive picture of those urban centers and of the communities that created and inhabited them. The readings

assigned for each session (and discussed in class) will also provide a broad sample of primary and secondary sources, the latter consisting of relevant scholarship on the topic of ancient urbanism.

L08 Classics 236C The Roman World

An introduction to the society and culture of the ancient Roman Republic and Empire. The "Roman World" began as a small settlement by the Tiber River and became a huge and diverse empire extending into three continents, with a cultural legacy that has lasted to this day. The course will cover key events over a millennium of Roman political history, but much of our time will be given to study and analysis of Roman concepts of national identity, moral and political thought, social hierarchies and dynamics, family, religion and entertainment. To this end, we will examine a diverse combination of primary sources — literary, documentary and material.

L08 Classics 251 Projecting the Past: Ancient Greece and Rome in Modern Film

Since the earliest days of film, screenwriters and directors have mined the rich history of Ancient Greece and Rome to captivate audiences with tales of heroes and slaves, soldiers and lovers. This course will examine such cinematic representations across a variety of American and European films from the 20th and 21st century. Drawing upon translated selections from ancient Greek and Roman authors, secondary readings and weekly screenings, students will reflect upon the ways in which film adaptations of antiquity both tell us much about Ancient Greece and Rome and reveal as much about our present as they do the past.

L08 Classics 301C Greek Mythology

The myths of ancient Greece are not only inherently interesting, but they are an incomparable starting point for the study of the ancient world, and they have offered numerous images and paradigms to poets, artists and theorists. This course provides an introduction to the major Greek myths, their role in literature and art, their historical and social background, and ancient and modern approaches to their interpretation. Student work will include discussing course material in sections and online, taking two exams covering both the myths themselves and the ancient authors who represent our richest sources, and writing several essays interpreting or comparing ancient literary treatments.

L08 Classics 3051 Orthodoxy and Heresy in Early Christianity

From the time Jesus of Nazareth preached in the rural countryside of Judea, his followers interpreted his words differently and wrote varied accounts of what he said and did. As time passed and as Jesus' movement grew into a world religion — Christianity — disagreement among Christians only continued to increase, leading to the need to define and enforce correct beliefs and practices to create a Christian "orthodoxy" embodied in the now-familiar institutions of creed, canon, and clergy. Yet in the process of creating an orthodoxy, what was left out? Whose voices were suppressed? Through the careful study of ancient texts that were long-ago deemed heretical and virtually lost until the 20th century, this course examines the wide varieties of Christianity in its nascent years and discusses how the framers of orthodoxy defined themselves against these alternatives. L08 Classics 306 Race and Identity in Greco-Roman Antiquity

This seminar will start from one big question: Were the ancient Greeks and Romans white? We will examine this question -- and the questions that spring from it -- from two angles. First, using literary and archaeological evidence and informed by modern critical race theory, we will investigate how people living in the ancient Mediterranean understood difference: between themselves and others as well as among their own citizens. Did they have a concept of race at all? If not, how did they theorize difference? Second, we will study how and why the modern race system in the United States uses antiquity and racializes the premodern past. Students will write several short responses to sources over the semester and complete a research paper on a topic of their choice.

L08 Classics 3130 Sexuality in Early Christianity

What did Jesus of Nazareth and his early followers teach about sexuality in terms of marriage, adultery, divorce, the virtues of procreation and celibacy, same-sex relationships, and erotic desire? How and why did ancient Christians take different stances on these issues, and how do these traditions continue to inform sexual ethics and gender roles today? In this course, we will study these questions by examining key passages from the teachings of Jesus in the Gospels, Paul's letters, writings of early church leaders, martyr propaganda, monastic literature, and apocryphal books deemed heretical. We will also consider the interpretations of contemporary historians of religion informed by recent trends in sexuality and gender theories. Same as L23 Re St 3130

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM
BU: BA, ETH EN: H

L08 Classics 3152 Sex and Gender in Greco-Roman Antiquity

In this course, we will explore how ancient Greeks and Romans thought about gender and sexuality. We will consider questions such as: which traits and behaviors did the Greeks and the Romans associate with masculinity and with femininity? What can we tell from our sources about those who did not fit neatly into this binary? How did ancient Greeks and Romans think about male and female anatomy and psychology? How did the Greeks and the Romans construct sexuality and how did they approach homosexual and heterosexual relationships? How did they think about erotic desire? How did ancient laws and institutions circumscribe the lives of men and women, and how did they contribute to the construction of gender and sexuality? How did class, ethnicity, and age intersect with ideas about gender and sexuality in antiquity? We will read an array of ancient texts in translation, we will consider various theoretical viewpoints, and we will move toward a better understanding of how gender and sexuality were constructed in antiquity. Ultimately, we will reflect on how our exploration of ancient ideas about these issues can help us understand better how we think about them today.

EN: H

L08 Classics 3153 The Women of Greek Tragedy

This course examines the role of women in Athenian drama. Students will read English translations of the works of the three major tragedians — Aeschylus, Sophocles, and Euripides — and their near contemporary, the comedian Aristophanes. Direct engagement with ancient texts will encourage students to develop their own interpretations of and written responses to the political, social, and ethical manipulation that these mythological women were compelled to endure and the subtle ways in which they appear to exercise power themselves. Selected scholarly articles and book chapters will help students to contextualize these ancient dramas in their culture of origin. Because such issues continue to preoccupy both sexes today, students will see how Greek tragedy addresses perennial historical and cultural concerns through the examination of adaptations of Greek tragedies ranging from Seneca in ancient Rome to Spike Lee's *Chi-Raq* and Luis Alfaro's *Mojada: A Medea in Los Angeles*. The final research paper will encourage students to consider how a specific female character from antiquity is transformed for a "modern" dramatic audience.

L08 Classics 3231 Jews and Christians in the Premodern World

In modern times, it is common to think of Judaism and Christianity as two distinct, if historically connected, "religions." Increasingly, however, historians of ancient religions have thought more deeply about the implications of taking Christianity and Judaism in antiquity as more fluid and porous than we tend to think of them. In this upper-division course, we will explore the ways in which the boundaries that early Christians attempted to draw between Christianity and Judaism remained unstable and incomplete. While the various efforts to establish early Christian identity led to the production of a variety of hermeneutical representations of the Jews, these literary representations nevertheless often reflected, to various degrees, engagement with actual historical Jews/Judeans, who shared political, economic, and intellectual worlds with Christians. We will consider how early Christian discourse about Jews and Judaism informed and was informed by intra-Christian disputes and their negotiations of their relationships with the wider Greco-Roman culture. We will explore how Christian efforts to establish both continuity and difference between Judaism played a role in the construction of "orthodoxy" and "heresy," as well as the way in which Christians re-appropriated Jewish texts, rituals and ideas in their efforts to construct a Christian identity. We will also explore how this continued dynamic of difference and continuity continued into the Middle Ages.

L08 Classics 3250 Pompeii: Cultural Mosaic of the Ancient Mediterranean

This course will provide an in-depth survey of artistic, architectural, and archaeological material from the ancient town of Pompeii, a river port of middling size and importance in southern Italy with remains that were remarkably well preserved by the ash and pumice stones of Mt. Vesuvius during the eruption of 79 CE. Starting with an overview of its development -- an Oscan settlement under Greek and Etruscan influence that expanded after the conquest of the Samnite and then Roman armies -- students will explore all aspects of urban life through Pompeii's uniquely rich archaeological record, with a particular focus on the social, cultural, and ethnic diversity that can be difficult to detect and appreciate even in the much larger, wealthier, and more cosmopolitan capitals of the Roman Empire. Over the course of the semester, students will learn various methods for applying different types of material evidence (including wall paintings, sculpture, architecture, furniture, and graffiti) to a series of scholarly questions about key points of conflict and tension within society, such as local attitudes toward foreign cultures, resistance to imperialism, the marginalization of women and slaves, opportunities for social mobility, and religious censorship. By the end of the course, a dynamic and colorful mosaic of Pompeii will have emerged, far removed from the image of a static Roman town supposedly frozen in time. Prerequisite: L01 113 or permission of instructor.

L08 Classics 326 Archaeology of Roman Slavery

Slavery was a fundamental part of the ancient Roman world. In this course, we will survey various ways in which the institution of slavery played a critical role in shaping Roman society. Through an exploration of social, economic, legal, and cultural aspects

of Roman slavery, we will pose questions of what it means to be a slave society, how the ubiquity of forced labor impacted the lives of ancient Romans, and the extent to which we can recover the experiences and subjectivities of enslaved people. Throughout the course, we will confront the interpretive problems posed by biased and/or scarce evidence and by assumptions we may carry as the inheritors of modern slavery. A recurring theme we will explore is the extent to which evidence of slavery and the material traces of enslaved people's lives are visible in the archaeological record. At the end of the term, we will contextualize Roman slavery by comparing it with modern examples and by considering the legacy of ancient slavery in modern visual culture and representations of enslaved people. Prerequisites: Any 100- or 200-level course in art history or archaeology; or permission of instructor.

Same as L01 Art-Arch 326

L08 Classics 3563 Ancient Sport and Spectacle

Ancient sport and spectacle seem both familiar and foreign to us today. We share the Greek obsession with athletic success, and we have revived their Olympic games — and yet the Greeks competed nude and covered in oil and included in their celebration a sacrifice of 100 oxen to Zeus. So too do we recognize the familiar form of the Roman arena, but recoil from the bloody spectacles that it housed. In this class we will examine the world of ancient Greco-Roman sport and spectacle, seeking to better understand both ancient culture and our own. We will consider Greek athletic competition, Roman gladiatorial

combat, chariot racing, and other public performances. We will set these competitions in their social and historical context, considering both their evolution and their remarkable staying power.

Credit 3 units. A&S IQ: HUM BU: ETH EN: H

L08 Classics 3831 Magicians, Healers and Holy Men

Magic is perhaps not one of the first words one associates with Greco-Roman antiquity. Yet for most individuals living in the ancient Mediterranean, including philosophers, businessmen and politicians, magic was a part of everyday life. Casting spells, fashioning voodoo dolls, wearing amulets, ingesting potions, and reading the stars are just some of the activities performed by individuals at every level of society. This course examines Greco-Roman, early Christian and Judaic "magical" practices. Students read spell-books which teach how to read the stars, make people fall in love, bring harm to enemies, lock up success in business, and win fame and the respect of peers. Students also look at what is said, both in antiquity and in contemporary scholarship, about magic and the people who practiced it, which helps illuminate the fascinating relationship between magic, medicine and religion.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L08 Classics 385W Comedy, Ancient and Modern

In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide

people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy.

Credit 3 units.

L08 Classics 408 Sacred Ways and Holy Spaces: Athenian Religion and Topography

From seashore to mountain top, ancient Athens was famous for being a landscape rich with myth and religion. In order to worship their gods with processions, sacrifices, and other acts of devotion, Athenians moved through, across, and within space as defined by such things as sacred roads, monumental gateways and altars, and even places considered so holy that one was forbidden to enter. This course will introduce students to the study of place (topography) and to the methods and evidence by which we can determine where specific buildings and sites were, how they were used, and what they signified. We will explore major sites like the Acropolis as well as a variety of other temples, shrines, and holy sites across urban and rural landscapes alike, each of which structured space in its own way. By examining a wide range of archaeological and textual evidence (c. 800 BC-AD 400), we will develop an integrated understanding of Athenian religious belief and ritual in the context of architecture and space. While this course will concentrate on the topography of architecturally definable religious sites, we will also explore religious practices (e.g., magic, early Christianity) that employed the landscape in fundamentally different ways than other parts of the Athenian religious system.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, IS EN: H

L08 Classics 4230 The Reception of Egypt in the Graeco-Roman World

Ancient Greeks and Romans found Egypt to be an exceptionally enthralling world, in terms not only of its physical features but also of its people, monuments, and traditions. This course will explore how different views of Egypt emerged in the Graeco-Roman world; it will also investigate the possible reasons for the remarkable popularity and allure of Egypt and things Egyptian as reflected in the writings of Greek and Roman authors as well as in the art and architecture of the Mediterranean world in Classical antiquity. In this seminar, we will read primary literary sources (in translation) that focus on the reception of ancient Egypt and, more specifically, its history, religion, and customs. Several of these sources also offer a privileged viewpoint to investigate how the perception of notable Egyptian figures -- chiefly Cleopatra -- was shaped by Rome to suit a specific agenda. In addition to the written sources, we will look at the artistic and archaeological evidence that best showcases the impact of Egypt's legacy on Graeco-Roman traditions. The readings assigned for each class will also provide a broad sample of secondary sources, consisting of some of the most significant scholarship on the image of Egypt in Classical antiquity.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L08 Classics 4235 Rome in Egypt: The Archaeology of an Oasis City

This seminar will focus on the results of the archaeological fieldwork carried out at Trimithis / Amheida, a Graeco-Roman city in Egypt's Western Desert. It will investigate the available documentary and archaeological evidence, including a wealthy house with paintings inspired by Classical themes, a public bath built in the Roman tradition, a rhetorical schoolroom, pyramid-shaped Roman tombs, remains of a temple, and one of the earliest churches discovered in Egypt so far. We will explore how this evidence compares with that from neighboring sites in Egypt's Western Desert as well as in the Nile Valley. The goal is to develop an appreciation and understanding of Romano-Egyptian architecture, Classical and late antique art in Egypt, and Egypt's religious, social, and cultural history. Students will also have the opportunity to familiarize themselves with notions of archaeological methods and practice, as adopted in the context of an Egyptian excavation project. Prerequisites: One course at the 100- or 200-level in Art History, Classics, or Archaeology recommended

Same as L01 Art-Arch 4235

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM BU: IS EN: H

L08 Classics 426 Ancient Athens

Athens was one of the great cities of antiquity. From lavishly decorated marble temples on the Acropolis, to public office buildings and inscriptions in the Agora (civic center), to the houses of the living and the monuments for the dead, the city has left a rich record of her material culture. These buildings and objects, together with an exceptionally large number of literary and historical texts, make it possible to paint a vivid picture of the ancient city. The course concentrates on the physical setting and monuments of Athens, as revealed by both archaeology and texts, and how they functioned within the context of Athenian civic and religious life. Prerequisite: Classics 345C, Classics 350 or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM

L08 Classics 428 The Invention of the Image: From Classical Art History to Modern Visual Studies

The scholarly field of Image or Visual Studies has developed in response to the widespread proliferation of images, both still and moving, in contemporary life. It distinguishes itself from traditional art history by examining visual representations of all types, not only works of high art, and by concentrating on the role those representations play in the formation of culture. Though most of the scholarship produced in this field focuses on the modern world, it depends upon ideas first developed in Mediterranean antiquity. This course has two primary goals. We conduct an historical examination of practices and theories of image making from Near Eastern antiquity to modernity. In so doing, we also carry out an historiographical survey of the major works in Image/Visual Studies, thereby gaining an appreciation for the wide range of methods of inquiry employed in this important field of research. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215); one 300-level course in Art History preferred; or permission of instructor.

Same as L01 Art-Arch 428

Credit 3 units. A&S IQ: HUM Art: AH, GFAH, HUM BU: HUM EN: H

L08 Classics 429 Art and Death in Ancient Rome

Perhaps more than any other phenomenon, death spurred the creation of art in the ancient Roman world. The practice of materially commemorating the deceased — of perpetuating the memory of the dead through the creation of funerary monuments designed to appeal to both intimate familial relations and the public at large — stretched across Roman social boundaries and endured for many centuries. But death also frequently provided the subject matter of art even outside the confines of the funerary realm. The goal of this course will be to explore the complex relationship between art and death in the Roman world. It will range from early Rome to the end of the empire and the changes brought about by widespread conversion to Christianity. In conjunction with historical readings, the course will also engage with theoretical texts in the anthropology and philosophy of death. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.

Same as L01 Art-Arch 429

L08 Classics 4350 Hellenistic Philosophy

The Hellenistic Age, traditionally dated from the death of Alexander and his (Macedonian) Empire at 323 BCE to the birth of Augustus' (Roman) Empire in 31 BCE, gave the West three of its most innovative and influential schools of philosophy: Epicureanism, Skepticism, and Stoicism. This course investigates the central features of their thought. Special attention is paid to the still-relevant debates between the Stoics and Skeptics about the possibility of knowledge, to the disagreements among all three schools about the issues of freedom, responsibility, and determinism, and to their ethical theories. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Study of one or more themes recurring in the traditions of Greek and Roman literature, history, and culture. Topic varies each semester.

Credit 3 units. A&S IQ: HUM EN: H

L08 Classics 4376 Pictorial Illusion in the Ancient Mediterranean

Among the many accomplishments in the history of Greco-Roman art, ancient writers especially valued the development of pictorial illusion. Pictorial illusion refers to the techniques of reproducing or approximating aspects of the visual perception of the material world on a two-dimensional surface. These include foreshortening, the application of highlights, and the indication of multiple points of depth in space relative to the picture plane. The purpose of the course is to explore the material, stylistic, and technical history of illusionistic painting practices in the ancient Mediterranean world from Classical Greece to Late Antique Rome and to seek to understand the cultural and social significance of those practices. In addition to examining specific historical questions in the development of ancient painting, the course will investigate trans-historical connections between vision, visuality, and methods of representation. Prerequisites: Either L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

Same as L01 Art-Arch 4376

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L08 Classics 450W Topics in Classics

Classics courses at the 400 level with enhanced requirements in writing may be taken under this designation as writing-intensive courses. Required: permission of instructor.

Credit 3 units. A&S IQ: HUM, WI EN: H

L08 Classics 451 Plato

An examination of some of Plato's most important dialogues, typically including the *Gorgias*, *Phaedo*, and *Republic*, with the aim of grasping the development of Plato's most influential thoughts in ethics and in metaphysics and epistemology. In order to provide both historical understanding and philosophical evaluation, attention is paid to the context and structure of the dialogues and to the best of recent secondary literature. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Same as L30 Phil 451

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:

HUM EN: H

L08 Classics 452 Aristotle

This course offers a maximally full and detailed introduction to the works of Aristotle. His logic, natural philosophy, psychology, metaphysics, ethics, and political philosophy are discussed, and stress is laid on the interpretive problems facing contemporary philosophers seeking to understand Aristotle's achievement.

Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Same as L30 Phil 452

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L08 Classics 453 The Greek Symposium

This course explores the history, archaeology, material culture, and sociology of the symposium in ancient Greece. While we will focus mainly on the archaic and classical Greek symposium, we will also examine its reception in the Roman world. In this context, we will study art and literature produced for the symposium, as well as representations of the symposium in literature, especially in lyric poetry, drama, and philosophical prose.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:

HUM, IS EN: H

L08 Classics 462 Ancient Greek and Roman Music

Music played a vital role in Ancient Greece and Rome. New resources and perspectives now allow us to appreciate the ancients' music better than ever before. This course addresses the nature of ancient music (instruments, melody and rhythm, modes), ancient attitudes toward music, and its contribution to public and private life. The focus throughout is on our ancient sources, both literary and archaeological.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L08 Classics 4647 Ancient Madness

In this course we will ask what madness meant in Greek and Roman culture. We will find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating and categorizing people treated as mad. While we will concentrate on literary (particularly tragic and epic), philosophical and medical texts, we will also look at visual representations and evidence from ritual and cult. An

important part of our project will involve tracing the afterlife of classical ideas: The history of melancholia will ground this aspect of the course. Finally, we will consider how antiquity informs psychoanalysis (Oedipus, Antigone, Narcissus), and how ancient madness might partake in a critique of contemporary understandings of mental illness.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L08 Classics 465 Topics in the History of Philosophy

Study of individual philosophers or themes from the ancient, medieval, and/or modern periods. Examples: Spinoza, St. Thomas Aquinas, neo-Platonism, universals in ancient and medieval thought, ancient and modern theories of space and time. Prerequisite: 6 units in philosophy or permission of instructor.

Same as L30 Phil 465

Credit 3 units. A&S IQ: HUM EN: H

L08 Classics 476 Money, Exchange, and Power: Economy and Society in the Ancient Mediterranean World

From seaborne trade and banking to slavery and the impact of new technology, the economy of the ancient Mediterranean world constitutes a particularly dynamic field of study. To examine a society's underlying economics is to gain critical insight into those historical phenomena that are themselves the product of multiple, overlapping dimensions of human action and thought. This course engages directly with a fascinating array of primary evidence for economic behaviors, beliefs, structures and institutions among the Romans, Greeks, and their neighbors. We will also explore the methodological challenges and implications of that evidence as well as a variety of modern theoretical approaches. This year our focus is mainly upon developments among the Greeks, ranging from the transformative invention of coinage to the rise of commercial networks centered around religious sanctuaries like Delos. Prerequisites: Classics 341C or 342C or 345C or 346C or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L08 Classics 4763 Olympian Shadows: Macedon and its Neighbors in Antiquity

The home of both Alexander the Great and Aristotle, Macedon was pivotal to the course of ancient Greek and Roman history and yet stood apart as a culturally and politically distinct region. Macedonian dynasts dominated the Hellenistic world and deeply shaped Roman reception of Greek culture, while others profoundly affected the intellectual life of antiquity. We will explore topics ranging from ethnicity, religion, and the nature of kingship to urbanization and Macedon's emergence as a great power until its subsequent transformation at the hands of the conquering Romans. We will pay special attention to Macedon's neighbors, especially Thrace and Illyria, as well as to Macedon's relationships with the Persian Empire and the Greek coastal colonies. Prerequisites: at least one semester of Classics 341C, 342C, 345C, or 346C, or instructor's permission.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L08 Classics 480 Roman Coins and Their Stories

This course will provide insights into everyday life in Rome and its territories through the evidence of the coins minted from the Roman Republic until the collapse of the Western Roman Empire in AD 476 and beyond. We will discuss general numismatics, starting with the history of coins and coinage, and

we will understand how these small objects became an intrinsic part of the Roman way of life and what evidence they provide for daily life in Rome, from ideology to religion and from politics and culture.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L08 Classics 493 Senior Project

For Classics or Ancient Studies majors who wish to fulfill their capstone requirement in Classics through a one-semester research project. A structured research assignment or independent project under the supervision of one of the department's faculty is required. Prerequisites: senior standing and permission of the chair of the department.

Credit 3 units.

L08 Classics 497 Study for Honors

Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. Prerequisite: Overall GPA of 3.65.

Credit 3 units.

L08 Classics 498 Study for Honors

Students interested in pursuing honors should consult the Director of Undergraduate Studies in the Department of Classics. Prerequisite: Overall GPA of 3.65.

Credit 3 units.

Comparative Literature

Comparative Literature examines literature across national, cultural, and linguistic boundaries. The broad perspective of Comparative Literature generates sustained critical thinking about what literature is and does; how literature relates to other fields, including other art forms and kinds of writing; how literary texts and their translations produce meaning; and the ethical valence of literature in a globalized world. Advanced knowledge of at least one foreign language is essential for understanding and appreciating a given literature and culture. Therefore, all comparative literature and comparative arts majors study a foreign language and literature at an advanced level, and they are strongly encouraged to pursue a study abroad experience. Moreover, the study of works in translation — especially those originally written in non-European languages — facilitates cross-cultural comparisons and helps prepare students for a multilingual, pluralistic, and global world. Comparison of literature

to other arts, media and modes of writing develops one's understanding of literature and culture as well as of technologies and aesthetic forms of mediation and transmission of world views, values and critiques.

Comparative Literature and Comparative Arts offer the following to students:

- A high degree of flexibility and individualization in their chosen program
- A rich array of courses spanning national, temporal and medial boundaries organized by genre (e.g., postmodern narrative, comedy, the novel, lyric poetry); cultural issues (e.g., exile, diaspora, cross-cultural encounters); themes (e.g., memory, obsession in the novel, mysticism in poetry); period (Romanticism, the Renaissance); and transnational region (e.g., Middle Eastern literature, African literature)
- Courses that instruct the student in the central practices, approaches, and theories of the discipline, including entry-level courses like World Literature and Introduction to Comparative Arts as well as courses on literature, literary theory, and translation
- Preparation for life in a reverberant, multicultural, and plurilingual world, including critical and analytical thinking skills and cross-cultural understanding

With the help of our major and the semester or year of study abroad that we encourage, some graduates have pursued careers in international affairs, teaching English as a second language abroad, and international humanitarian programs such as the Peace Corps. Other recent graduates have found employment in such areas as the arts, business, media and technology as well as in writing, editing and publishing. In addition, our graduates are well prepared for the challenges of graduate or professional education in a variety of fields.

Comparative Literature and the Arts & Sciences Curriculum

Comparative Literature offers first-year seminars, writing-intensive courses, community-based learning opportunities and various capstone experiences, including directed research, creative projects and internships appropriate to the student's field.

Majors

The Major in Comparative Literature

Total units required: 27

Required courses:

- 27 units of Comparative Literature courses, including the following:
 - Comp Lit 211 World Literature (3 units)
 - Comp Lit 3050 Literary Modernities in Europe and America: Text and Tradition
 - Seven additional courses in Comparative Literature at both the 300 and 400 levels (21 units). With permission of the director of undergraduate studies, the student may substitute up to 6 units of appropriate foreign literature courses at the 300 or 400 level.
- The major also requires the completion of a capstone experience. Students who are double majoring may elect to complete their capstone in the other major.
- Students of Comparative Literature are also expected to have had substantial college-level experience with foreign language study as demonstrated by the completion of either one 400-level foreign language course or two 300-level courses.

The Major in Comparative Arts

Total units required: 27

Required courses:

- 21 units of Comparative Literature courses, including the following:
 - Comp Lit 211 World Literature (3 units)
 - Comp Lit 313E Introduction to Comparative Arts (3 units)
 - Five additional courses in Comparative Arts at both the 300 and 400 levels (15 units), including one course on interrelations between literature and other art forms. With permission of the director of undergraduate studies, the student may substitute up to 6 units of appropriate foreign literature courses at the 300 or 400 level.
- 6 units of advanced study (300 level or above) in theoretical or historical courses in aesthetics, art history, dance, drama, film or music. (Students with minors or majors in one of these fields may elect to substitute 6 units of Comparative Literature.)
- The major also requires the completion of a capstone experience. Students who are double majoring may elect to complete their capstone in the other major.

- Students of Comparative Arts are also expected to have had substantial college-level experience with foreign language study as demonstrated by the completion of either one 400-level foreign language course or two 300-level courses. They are also expected to pursue work in an applied art form — music, fine arts, drama, dance or creative writing — for four semesters. This course work need not be conducted at the 300 or 400 level.

Note: Students should be aware that courses satisfying the major requirements in another department cannot also be counted toward the major requirements of Comparative Literature or Comparative Arts.

Additional Information

Senior Honors: To be considered for honors, a student must have a grade-point average of at least 3.7 by the end of the sixth semester and must be approved by either the Director of Comparative Literature or the Director of Undergraduate Studies to write a Senior Honors thesis. Honors courses (Comp Lit 497 Independent Work for Senior Honors and Comp Lit 498 Independent Work for Senior Honors) supplement the major and do not satisfy any of the above requirements.

Minors

The Minor in Comparative Literature

Total units required: 15

Required courses: 15 units of study, distributed as follows:

- Comp Lit 211 World Literature (3 units)
- Comp Lit 3050 Literary Modernities in Europe and America: Text and Tradition
- Three additional Comparative Literature courses at the 300 or 400 level

Students who minor in Comparative Literature are also expected to have had substantial college-level experience with foreign language study as demonstrated by the completion of either one 400-level foreign language course or two 300-level courses.

The Minor in Comparative Arts

Units required: 15

Required courses: 15 units of study, distributed as follows:

- 6 units of Comparative Literature, including the following:
 - Comp Lit 211 World Literature (3 units)
 - Comp Lit 313E Introduction to Comparative Arts (3 units)
- One more Comparative Literature course at the 300 or 400 level

- 6 units of advanced study (300 level or above) in theoretical or historical courses in music, art history, drama, dance, film or aesthetics. (Students with majors or minors in one of these fields may elect to substitute 6 units of Comparative Literature.)
- Students who minor in Comparative Arts are also expected to have had substantial college-level experience with foreign language study as demonstrated by the completion of either one 400-level foreign language course or two 300-level courses.

L16 Comp Lit 1023 Beethoven in His Time and Ours

Ludwig van Beethoven not only composed some of the most significant works of Western classical music -- he continues to make his mark as the prototypical "troubled genius," symbol for a wide range of political causes, subject of numerous films, and classical music's main representative in American pop culture. We will begin with an exploration of Beethoven's life, music, and historical context and continue by tracing how, after his death, Beethoven became a cultural hero whose image took on a life of its own. Throughout, we will unravel the interaction of music, culture, and mythmaking. No previous musical experience required.

Same as L27 Music 1023

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L16 Comp Lit 1024 Mozart: The Humor, Science, and Politics of Music

Wolfgang Amadeus Mozart is one of the most recognized composers of "classical" music. A child prodigy of astonishing precocity, he has come to symbolize genius for Western culture — a composer whose music embodies superhuman, even Utopian beauty and perfection. In this course, we'll learn that there was more to Mozart. Mozart was a lover of codes and puzzles who delighted in the science of music, a sampler of non-Western music, and a musical humorist whose comedies make provocative statements — ranging from cynical to poignant — about politics, gender and morality. Our focus works will include Mozart's symphonies, piano music, string quartets, and such comedies as *The Magic Flute* and *The Marriage of Figaro*. We'll also explore Mozart's afterlife — how his music has figured in film, literature, and popular culture. This course is open to all undergraduates — no previous musical course work or experience is required.

L16 Comp Lit 115 First-Year Seminar

A variety of topics in comparative literature, designed for first-year students — no special background is required — to be conducive to the investigation and discussion format of a seminar.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L16 Comp Lit 137A First-Year Seminar

The destructive, scandal-ridden career of the Roman emperor Nero (mid-first century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the "Bad Emperors," and seen as a symbol of the decline of Rome itself — especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the *Life of Nero* by Suetonius (second century CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills.

L16 Comp Lit 200C Sanity and Madness

We will consider explicit and implicit models of mental life, motivation, and action in works by authors studied in 201C. We will investigate how concepts related to madness are formulated and regulated in these literary texts and in the societies that produce them, and we will read scholarship from the 19th through 21st centuries that has debated the scale and scope of irrationality in ancient, medieval, and early modern cultures.

Same as L93 IPH 200C

Credit 3 units. A&S: AMP A&S IQ: HUM BU: BA, HUM EN: H

L16 Comp Lit 201A AMP: Classical to Renaissance Literature

Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's *Iliad* is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare.

Same as L93 IPH 201C

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L16 Comp Lit 211 World Literature

This course teaches ways of reading literature across Eastern and Western cultures, introducing students to works of great imaginative power from many different regions of the world. The course focuses on a given historical period, such as the modern period or antiquity (the latter including Near Eastern as well as European texts). Organizing themes may include cultural translation, cross-cultural encounter (e.g., Orientalism), hybridity and displacement.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:
HUM EN: H

L16 Comp Lit 215C Introduction to Comparative Practice I

This course permits the close examination of a particular theme or question studied comparatively, that is, with a cross-cultural focus involving at least two national literatures. Topics are often interdisciplinary; they explore questions pertinent to literary study that also engage history, philosophy and/or the visual arts. Although the majority of works studied are texts, the course frequently pursues comparisons of texts and images (painting, photography, film). Requirements may include frequent short papers, response papers and/or exams.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN:
H

L16 Comp Lit 228B Theatre Culture Studies I: Antiquity to Renaissance

This course is a survey of ancient, medieval and Renaissance theater and performance: in both the West and in the East, as it both reflects and shapes culture. Coverage will include the following areas: ancient Greece, ancient Rome, classical Sanskrit theater, Yuan China, medieval Japan, medieval Europe, Renaissance Italy, and Renaissance England. Both scripted theater and performance practices will be examined through the lenses of dramatic literature, theater history, performance studies, and dramatic theory. A continual emphasis will be on marginal and underrepresented figures, as we will attempt to excavate forgotten histories from the theatrical past.

Same as L15 Drama 228C

Credit 3 units. A&S: AMP A&S IQ: HUM Arch: HUM Art: HUM

L16 Comp Lit 249C Paris: The Left Bank

First-year seminar. Taught in English. From the founding of the Sorbonne in the Middle Ages to the strikes and riots of 1968 and from Abelard and St. Thomas Aquinas to Hemingway and Fitzgerald, Camus and Sartre, Beckett and Ionesco, and beyond, the Rive Gauche — or Left Bank — has been the traditional center of Paris's intellectual creativity and political turmoil. This seminar will explore the area's history and political activism, its artistic legacy, and especially its philosophical and literary contributions to contemporary France and the world. Prerequisite: AP in English, French, or History, or permission of the instructor. Does not substitute for any other French course. Enrollment limited to 15.

Same as L34 French 249C

Credit 3 units. A&S: FYS Art: HUM BU: HUM, IS

L16 Comp Lit 300 Undergraduate Independent Study

Students pursue personalized projects not normally covered in standard courses at this level. Prerequisites: acceptance by an appropriate instructor of a proposed project and permission of the chair of the committee.

Credit 3 units. Art: HUM

L16 Comp Lit 3003 Writing Intensive in Ancient Studies

This is a Writing Intensive course involving the study of selected topics in Classics. Recent topics include The Banquet in Antiquity; The Art of Reading and Writing an Ancient Greek Vase; and Golden Ages, Nostalgia, and the Idealized Past. Same as L08 Classics 3003

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM EN:
H

L16 Comp Lit 301C Greek Mythology

The myths of ancient Greece are not only inherently interesting, but they are an incomparable starting point for the study of the ancient world, and they have offered numerous images and paradigms to poets, artists, and theorists. This course provides an introduction to the major Greek myths, their role in literature and art, their historical and social background, and ancient and modern approaches to their interpretation. Student work will include discussing course material in sections and online, taking two exams covering both the myths themselves and the ancient authors who represent our richest sources, and writing several essays interpreting or comparing ancient literary treatments. 3 units.

Same as L08 Classics 301C

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:

HUM EN: H

L16 Comp Lit 3040 Introduction to Digital Humanities

It is a truism that computers have changed our lives and the way we think and interact. But in fact, systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork will be supplemented by class presentations and a small assigned group project. Same as L93 IPH 312

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM

L16 Comp Lit 3050 Literary Modernities in Europe and America: Text and Tradition

The course examines the various facets of modernity in major works of European, Eurasian, and, sometimes, American literature from the early 17th century to the 1920s, starting with "Don Quixote." We will explore, among other things, the eruption of the novel, the secularization of autobiography, the literary discovery of the city, and the rise of literary and aesthetic criticism that takes literature and art seriously as political and social institutions. In addition to literary works, the course will engage with two or three important models of critical practice (e.g., Wollstonecraft's "Vindication of the Rights of Women";

Marx's "German Ideology"; Freud's "The Interpretation of Dreams"; Eliot's "Tradition and the Individual Talent"; or perhaps that great work of fictionalized literary criticism, Borges' "Pierre Menard, Author of the Quixote").

Same as L93 IPH 3050

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art:

HUM BU: HUM EN: H

L16 Comp Lit 306 Modern Jewish Writers

What is Jewish literature? While we begin with -- and return to -- the traditional question of definitions, we will take an unorthodox approach to the course. Reading beyond Bellow, Ozick and Wiesel, we will look for enlightenment in unexpected places: Egypt, Latin America, and Australia. Recent works by Philip Roth, Andre Aciman, Simone Zelitch and Terri-ann White will be supplemented by guest lectures, film, short stories and significant essays. We will focus on issues of language, memory and place. Background knowledge is not required, though it is warmly welcomed.

L16 Comp Lit 306C Voice, Language and Power: Late Medieval Religious Writing

In the later Middle Ages, there is a flowering throughout Christian Europe of religious writings that offer a new voice in which personal religious experience can be pursued and expressed. Their voices are mainly intended to be communal ones, to be contained within the Church and regulated by it. But in each case the fact that it is a voice may offer a mode of resistance, or of difference. Such writing is often aimed at lay people, sometimes exclusively at women; and sometimes the intended auditors become the authors, and propose a version of religious experience that claims a new and more intimate kind of power for its readers. This course looks at a wide range of such writing in vernacular languages read in translation (English, French and German), including the work of Meister Eckhart, Marguerite Porete, Margery Kempe, Julian of Norwich, Eleanor Hull, the anonymous writer of *The Cloud of Unknowing* and the perhaps pseudonymous William Langland, author of *Piers Plowman*. Whether such writing seeks to be orthodox or conducive to heresy, it presents a challenge to the power of clergy — a challenge that is written in the vernacular language of lay people, rather than clerical Latin, and in doing so offers distinctively new voices for religious experience. The course will also look at ways in which such work might have been influenced, if only oppositionally or at times indirectly, by contact with Muslim and Jewish writing (including Jewish exegesis of the Psalms).

L16 Comp Lit 3071 Caribbean Literature in English

Rum! Fun! Beaches! Sun! This is the image of the Caribbean in America today. This course surveys literature and culture from these islands, looking both at and beyond this tourists' paradise. It aims to introduce students to the region's unmistakably vibrant tradition of multicultural mixture, while keeping an eye on the long history of slavery and rebellion out of which the islands' contemporary situation formed. Along the way we encounter a wide variety of texts, from the earliest writing focused on life in urban slums, to the first novel ever to have a Rastafarian as its hero, to more contemporary considerations of the region's uncertain place in a U.S.-dominated world. Toward the end

of the course, we also look at important films like *The Harder They Come* as well as discussing the most globally famous cultural product of the contemporary Caribbean: reggae music. The course involves readings from multiple genres and covers authors such as C.L.R. James, Derek Walcott, Jean Rhys, V.S. Naipaul, Jamaica Kincaid, and Caryl Phillips.

L16 Comp Lit 307B Literary Modernities in East Asia: The Interplay of Tradition, Modernity, & Empire: Text & Tradition

This course will explore the complex forces at work in the emergence of modern East Asia through a selection of literary texts spanning fiction, poetry and personal narrative. Our readings — by Chinese, Japanese, Korean, and Taiwanese writers and poets — will point to the distinctively different and dramatically shifting circumstances of modern East Asian nations and peoples, as well as to their shared values and aspirations.

L16 Comp Lit 3123 Introduction to Digital Humanities

It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed, and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork will be supplemented by class presentations and a small assigned group project.

L16 Comp Lit 312C Topics in English and American Literature:

Starting with Allan Bloom's *The Closing of the American Mind*, a book that helped re-ignite the Culture Wars, this course will consider the debates and problems that pervaded American culture during the 1990s. From the end of the Cold War to the sexual scandals that rocked Bill Clinton's presidency, from the emergence of the Internet to the rise of grunge and rap, the 1990s were a time of vast change in American culture. It was period when we, as a nation, reconsidered the legacy of the 1960s, the Reagan revolution, and the end of the Cold War, a time of economic expansion and cultural tension. In our consideration of this period, we will take a multidisciplinary approach when tackling a variety of materials-ranging from literary fiction (Philip Roth's *The Human Stain*, Jonathan Franzen's *The Corrections*) and popular films (Spike Lee's *Do the Right Thing* and *The Cohen brothers' The Big Lebowski*) to the music of Nirvana and Public Enemy-in an attempt to come to a better understanding of our recent history. Throughout the semester, we will pursue the vexed cultural, political, and historical questions that Americans faced in the years between the fall of the Berlin Wall and the terrorist attacks of September 11th, 2001, and consider how literary texts imagined this period of American history.

L16 Comp Lit 3132 Romantic Revolutions in European Music and Culture

The early 19th century in Europe witnessed sweeping changes in social, political, and cultural life, but some of the most fascinating happened in music. This course considers intersections between Romantic thinking about music — which inspired an idealistic vision of the art form as a source of quasi-spiritual experience — and other contemporary "revolutions." To what extent was Romantic music a "holy art" that offered a refuge from the world? In what ways was it a worldly participant in larger currents in society and culture? By exploring these questions and more, students develop the skills and framework needed to incorporate works of music into their investigation of enduring issues in history and the humanities. Although this course requires listening and viewing of musical works, it is designed for students with intellectual curiosity but without prior musical background. We also require weekly readings, occasional presentations, three short papers, and spirited class discussion.

L16 Comp Lit 313A Topics in English Literature: Asian American Fictions: Space, Place, & the Makings of Asian America

Called the "Age of Revolution," the Romantic Age of British literature, 1770-1830, witnessed the birth of new lyric forms, the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, over simply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal "Jerusalem." It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we will consider the historical contexts, and the sometimes competing histories of ideas, that shaped the five major British Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron, and John Keats. We will follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts also to be assigned will include Mary Shelley's *Frankenstein* and Byron's *Don Juan*.

L16 Comp Lit 313B Nordic Noir Adaptations

The past decade has seen an unprecedented passion for crime fiction, film and TV originating in the Nordic countries, such as Stieg Larsson's *The Girl with the Dragon Tattoo* and the TV series *The Killing* and *The Bridge*. Before they are distributed in the United States, Scandinavian cultural products undergo a degree of adaptation via tactics ranging from translation to subtitling to the creation of complete remakes. Many of these works are also subject to transmedial adaptation (e.g., from the page to the screen). In this course, we will use Nordic noir as a vibrant case study to consider the theoretical implications of adaptations across media and across cultures. In workshops, students will also gain exposure to the practical side of adaptation. No knowledge of Scandinavian languages is required to enroll.

L16 Comp Lit 3153 The Women of Greek Tragedy

This course examines the role of women in Athenian drama. Students will read English translations of the works of the three major tragedians — Aeschylus, Sophocles, and Euripides — and their near contemporary, the comedian Aristophanes. Direct engagement with ancient texts will encourage students to develop their own interpretations of and written responses to the political, social, and ethical manipulation that these mythological

women were compelled to endure and the subtle ways in which they appear to exercise power themselves. Selected scholarly articles and book chapters will help students to contextualize these ancient dramas in their culture of origin. Because such issues continue to preoccupy both sexes today, students will see how Greek tragedy addresses perennial historical and cultural concerns through the examination of adaptations of Greek tragedies ranging from Seneca in ancient Rome to Spike Lee's *Chi-Raq* and Luis Alfaro's *Mojada: A Medea in Los Angeles*. The final research paper will encourage students to consider how a specific female character from antiquity is transformed for a "modern" dramatic audience.

L16 Comp Lit 331A Topics in Holocaust Studies

This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period — the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children — both those they considered "Aryan" and those they designated "enemies" of the German people, such as Jewish children — an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which

Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. Open to freshmen. Students must enroll in both main section and a discussion section.

L16 Comp Lit 351 A World of Words

This seminar is designed for undergraduate students who are interested in literature, foreign languages, creative writing and translating. In this course, students will enrich their studies in foreign languages, cultures and literatures with creative work. Participants will read and discuss practical criticism, present their own creative projects, and hone their skills as writers, translators and readers. At the conclusion of the course, students will have the choice of presenting a polished work of translation or a piece of original writing. In addition to presenting myriad possibilities for translating into and from English, the course can accommodate creative writers in English, Spanish, French, German, Korean and Chinese. Students who wish to enroll in this course should contact the Program in Comparative Literature for further information. There is a limit of 14 participants for this class.

L16 Comp Lit 3520 Introduction to Postcolonial Literature

At its zenith, the British Empire encompassed almost a quarter of the globe, allowing the diminutive island nation unprecedented economic, military, and political influence upon the rest of the world. This course will introduce some of the foundational responses to this dominance, both literary and theoretical, by the colonized and their descendants. We will examine important critiques of colonialism by theorists such as Frantz Fanon, Aimé Césaire, Edward Said, Homi Bhabha, and Gayatri Spivak, as well as literary works that reflect a postcolonial critique

by authors such as V.S. Naipaul, George Lamming, Doris Lessing, and N'gugi wa Thiong'o. The course will interrogate how literature could be said to help consolidate Empire as well as ways in which it might function as rebellion against imperial power, with a view toward teasing out the problematics of race, gender, language, nationalism and identity that postcolonial texts so urgently confront.

L16 Comp Lit 3552 Introduction to Literary Theory

This course introduces students to some of the most influential theoretical approaches to interpretation applied to English-language literature; to significant conceptual and historical debates about literary and cultural theory; and to the keywords used in these debates. Students will learn how to write and speak about theoretical texts and how to recognize the theoretical assumptions that underlie acts of literary interpretation. Theoretical approaches to be featured may include formalism; Marxism; psychoanalysis; gender and sexuality studies; structuralism and post-structuralism; postcolonial studies; critical race studies; new historicism and cultural materialism; cultural studies; affect theory; neurocognitive approaches; and disability studies. This course fulfills the literary theory requirement for the English major; no substitutions will be permitted. In order to preserve necessary seats for English majors, the course will be enrolled through the wait list.

L16 Comp Lit 3556 Exile in Global French & Francophone Cultures: Senegal, Algeria, & the Caribbean

French is the fifth most spoken language in the world, with an estimated 300 million speakers in 106 countries and territories. It is the only language aside from English to be spoken on five continents, according to the OIF. In the wake of decolonization and the rapid spread of globalization, the French language has been adopted, adapted and transformed in various locales and with widespread cultural implications. This course will aim to explore French culture through the specific case studies of Senegal, Algeria, the Caribbean and Francophone exiles worldwide. We will explore the history, literature, poetry and film of these regions and, in doing so, gain a more nuanced and complex understanding of global French cultures. In this course, we will study a range of works that will provide a window onto the issues of French cultural and national identity in the modern world. We will delve into the role of race, ethnicity, belonging and identity in global French and Francophone societies. Students will gain an understanding of French (post)colonial history and current French politics and culture through novels, poetry and film. Knowledge of French is not required for this class.

L16 Comp Lit 359 Travelers, Tricksters, and Storytellers: Jewish Travel Narratives and Autobiographies

Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman. We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an "other," against which and through which they define a particular sense of self? This course is open to students of varying interests, including Jewish, Islamic, or Religious Studies, medieval and early modern history, European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only.

L16 Comp Lit 369A Reading Sex in Premodern England: Medieval Sexualities

This course introduces students to the literary representation of gender and sexuality in England from the medieval period to the 18th century. To understand a tradition that addressed the intractable problem of human sexuality in terms very different from ours, we will ask certain questions: How does premodern culture imagine gendered identities, sexual difference, and erotic desire? How do various contexts — medical, religious, social, private, and public — inform the literary representation of gender and sexuality? What are the anatomies and economies of the body, the circuits of physical pleasure, and the disciplines of the self that characterize human sexuality? Students will have the opportunity to study romances, saints' lives, mystical writings, diaries, plays, sex guides, novels, and scientific treatises. By learning how to "read sex" in premodern literature, students will acquire a broad cultural and historical understanding of English sexualities before the descent of modern sensibilities.

L16 Comp Lit 376 Reading Across the Disciplines:

Introduction to the Theoretical Humanities

What does theory look like in an age like ours so sharply marked by interdisciplinarity and in which most humanities scholarship crosses disciplines — for instance, combining literature or history with philosophy or critical race studies? In this way all (or almost all) humanities scholars are comparatists in practice if not always in name. The course is designed to introduce this complex and exciting state of affairs to CompLit and English majors, yet any students in a humanities program, or with an interest in the humanities, will fit right in. Our main text is *Futures of Comparative Literature*, ed. Heise (2017), which contains short essays on topics like Queer Reading; Human Rights; Fundamentalism; Untranslatability; Big Data; Environmental Humanities. We will supplement this material with relevant short texts from a variety of fields, including some that cross over into the social sciences.

L16 Comp Lit 385A Comedy, Ancient and Modern

In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy.

L16 Comp Lit 394 Worldwide Translation: Language, Culture, Technology

This course considers the crucial role played by translation across the world today: from new technologies and digital media, to the global demands of professionals working in fields as diverse as literature, law, business, anthropology, and health care. We will begin our exploration of the concept of translation

as a key mechanism of transmission between different languages by looking at works of literature, and film. Students will then examine how different cultures have historically required translation in their encounter with each other, studying how translation constitutes a necessary transcultural bridge both from a colonial and postcolonial point of view in different historical moments and parts of the world. The course also analyzes from practical and real-world perspectives whether concepts such as war, human rights, democracy or various illnesses have the same meaning in different societies by considering the diverse frames of reference used by linguists, lawyers, anthropologists, and medical doctors across the world. Finally, we will focus on translation from a technological perspective by examining various modes of transfer of information required for the functioning of digital tools such as Google Translate, Twitter, Duolingo, or various Iphone applications. Throughout the semester we will also examine a range of creative artworks, and various forms of digital technology and computing (AI, machine translation) related to the theory and practice of translation. Readings will include works by Jorge Luis Borges, Walter Benjamin, Gayatri Spivak, Kwame Anthony Appiah, Susan Basnett, Lawrence Venuti, Emily Apter, Gideon Lewis-Krauss, and Karen Emmerich among others.

L16 Comp Lit 395 Paris and New York: The Art of the City

The cultural icons Paris and New York exert a powerful hold on our imagination. We will explore how the French and Americans define themselves, and each other, through their premiere cities. The themes of integration and isolation, class and race, innovation and tradition, and commemoration and celebration will ground our discussions of writers Zola ("Therese Raquin"), Wharton ("The Age of Innocence"), Proust ("Swann's Way"), Foer ("Extremely Loud and Incredibly Close"), Krauss ("The History of Love"), Truong ("The Book of Salt"), and Gopnik ("Paris to the Moon"); painters Vuillard, Caillebotte, and de Kooning; photographers Brassai, Cartier-Bresson, Doisneau, Ronis, Abbott, Hine, and Stieglitz; and filmmakers Godard ("Breathless"), Allen ("Manhattan," "Midnight in Paris"); Jeunet ("Amelie Poulain"), and Kassovitz ("Hate"). Through our study of public spaces (the Brooklyn Bridge, the Twin Towers, the Eiffel Tower, and the streets themselves), we will consider how each city functions as a site of memory even as it fashions the future.

Credit 3 units.

L16 Comp Lit 4012 Staging Atrocity: Theatre of the Holocaust

Responding to the Holocaust has challenged artists working in every medium. Nowhere are these challenges more extreme than in the theater, where the intimacy of the space, the close proximity of live actors and audience, and the subject matter itself may serve to intensify its effect. We will read a careful selection of modern and contemporary dramas and explore the range of responses. Underneath each weekly topic reverberate the nagging question of whether one can -- or should -- make art from the Holocaust, as well as a serious exploration of the uses and effectiveness of theater to communicate on this subject. We look at the ways in which the Holocaust has been used as a subject to raise moral dilemmas, examine the limits of humanity, elicit doubt or faith, and provide political commentary. We will also discuss the ways in which playwrights have stretched the limits of the theater to meet the challenge of staging the Holocaust. Topics considered include the nationalization and personalization of the Holocaust, the role of the second

generation, issues of audience, and the use of experimental forms and obscenity. The plays on the syllabus are from North America, Israel and Europe. All readings are in English (original or translation).

L16 Comp Lit 411 The Empire Writes Back

Britannia did indeed once rule the waves, controlling an empire that encompassed a quarter of the globe. In the estimation of many, literature was a crucial component of its power. This course will examine the nature of Britain's cultural power, as well as the ways colonial authors answered back through an assertive rewriting of the British canon. We will read classic texts of British literature - Charlotte Brontë's JANE EYRE, E.M. Forster's HOWARD'S END, Joseph Conrad's HEART OF DARKNESS - in tandem with later reworkings of them by authors such as Zadie Smith and Jean Rhys, in order to tease out the implications of literary emendation and adaptation. The course will also look at film versions of these works, as well as some critical theories of revision, hoping to shed light on both the opportunities and the pitfalls of attempting to critique a system of thought within the constraints of that very system.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L16 Comp Lit 4111 Pastoral Literature

This course will open with a survey of the classical tradition in pastoral/bucolic. We will consider questions of genre, intertextuality and ideology, and we will ask how "the lives and loves of herders" became favored ground for literary meditation on issues of surface and depth, reality and illusion, artifice and sincerity. This portion will involve intensive reading in translation of Theocritus, Vergil and Longus. In the second half of the semester, we will consider the survival, adaptation and deformation of ancient pastoral themes, forms and modes of thought in British and American writing from the 19th and 20th centuries. We will read works of Mark Twain, Kenneth Grahame, Thomas Hardy and Tom Stoppard.

L16 Comp Lit 415A Music in the Romantic Era: Aesthetics and Ideologies

This course explores pivotal developments in 19th-century thinking about music's cultural and aesthetic significance -- developments that reverberate well beyond that historical period. Rather than surveying repertoire, we will emphasize in-depth exploration of selected issues and music, reading important contemporary writings and grappling with challenging musical works. Our topics will include discourses about musical interiority, the post-Beethovenian symphony, the Lied tradition, performance aesthetics and the creative agency of the performer, intersections of music and literature, and canon formation and its consequences. Our topics will include, to cite but a few examples, discourses about musical interiority, the post-Beethovenian symphony, the Lied tradition, performance aesthetics and the creative agency of the performer, intersections of music and literature, and canon formation and its consequences.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L16 Comp Lit 4204 Film Theory

This course is an introduction to both classical and contemporary film theory. Beginning with the earliest attempts to treat cinema as a new and unique art form, the course initially reviews the various ways in which film theory attempted to define cinema in terms of its most essential properties. The course then examines more contemporary developments within film theory, more specifically its attempt to incorporate the insights of other critical and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory and postmodernism. Throughout the course, we consider questions regarding the ontology of cinema, its relation to spectators, and the various ways in which its formal properties create meaning. Readings for the course include the major works of Sergei Eisenstein, Andre Bazin, Christian Metz, Laura Mulvey and Fredric Jameson. Required screenings.

L16 Comp Lit 425A Humanities by the Numbers

To what extent can computational techniques that draw on statistical patterns and quantification assist us in literary analysis? Over the semester, we will juxtapose the close reading of historical documents or literary works with the "distant reading" of a large corpus of historical data or literary texts. We will ask how the typically "human" scale of reading that lets us respond to literary texts can be captured on the "inhuman" and massive scales at which computers can count, quantify and categorize texts. While this class will introduce you to basic statistical and computational techniques, no prior experience with technology is required. Prerequisites: two 200-level or one 300-level course in literature or history. This is a topics-type course and the specific documents and works examined will vary from semester to semester. Please refer to semester course listings for current offerings.

Same as L93 IPH 425

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L16 Comp Lit 426 Seminar in Dramatic Theory

This course is an in-depth exploration of core works of dramatic theory from the ancient world to the present, and it will introduce texts that enunciate what theater is, has been, and should be. We will study authors' expressions of theater's role in society, their articulations of and responses to anti-theatrical prejudice, and their negotiations of the contradiction of putting "the real" on stage. Other significant themes include accounting for the aesthetic pleasures of drama and theater; theater as a means of educating the citizen; and the relationship between dramatic form and social and political revolution. Moving chronologically, we begin with foundational documents of the ancient world, including Aristotle's "Poetics," Bharata's "Natyasastra," and Horace's "Ars Poetica." The course then progresses through the Middle Ages, the Neoclassical and Romantic eras, and the explosion of *fin de siècle* avant-gardes. We will also read key texts from beyond the European tradition, including works of dramatic theory written in medieval Japan (Zeami), postcolonial Nigeria (Soyinka), and the millennial, multicultural United States (Parks). Along these same lines, we will also be attuned to transnational exchange and influence, particularly as it appears in the 20th-century theories of Bertolt Brecht, Antonin Artaud, and Konstantin Stanislavsky. Although the course will be focused

on efforts to describe and prescribe theories of drama, dramatic genre, and theatrical pleasure, it will also position play scripts alongside the theoretical treatises that guide or are guided by them.

Credit 3 units. A&S IQ: SSC EN: S

L16 Comp Lit 429 The Commedia Dell'arte

This course explores the history, style and dynamics of the *commedia dell'arte*: an originally Italian type of improvisational theater that has flourished from the time of Shakespeare to the present day. As we study, we will also put this theater on its feet. Students with a background and interest in improvisation are encouraged to take the class. (At the same time, no acting background is required to take the course—just a willingness to try.) We will examine primary and secondary texts regarding the Italian "golden age" of 1570-1625, and we will study the flowering of the *commedia dell'arte* in Paris during the seventeenth century. The influence of the *commedia dell'arte* on Shakespeare and Molière will be examined, and we will experiment with a new body of French scenarios from the time of Molière that have never before been translated into English. Questions of theater and performance history will be examined, as we consider various historical myths regarding this theater in the light of actual primary documents. We'll spend the final part of the course looking at political uses of this form of theater in the twentieth and twenty-first centuries, considering things like the San Francisco Mime Troupe, the radical socialist theater of Dario Fo, and the international Theater Hotel Courage that uses *commedia*-style performance for social change.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L16 Comp Lit 4300 Data Manipulation for the Humanities

The course will present basic data modeling concepts and will focus on their application to data clean-up and organization (text markup, Excel and SQL). Aiming to give humanities students the tools they will need to assemble and manage large data sets relevant to their research, the course will teach fundamental skills in programming relevant to data management (using Python); it will also teach database design and querying (SQL). The course will cover a number of "basics": the difference between word processing files, plain text files, and structured XML; best practices for version control and software "hygiene"; methods for cleaning up data; regular expressions (and similar tools built into most word processors). It will proceed to data modeling: lists (Excel, Python); identifiers/keys and values (Excel, Python, SQL); tables/relations (SQL and/or data frames); joins (problem in Excel, solution in SQL, or data frames); hierarchies (problem in SQL/databases, solution in XML); and network graph structures (nodes and edges in CSV). It will entail basic scripting in Python, concentrating on using scripts to get data from the web, and the mastery of string handling.

Credit 1 unit. EN: H

L16 Comp Lit 4310 Statistics for Humanities Scholars

A survey of statistical ideas and principles. The course will expose students to tools and techniques useful for quantitative research in the humanities, many of which will be addressed more extensively in other courses: tools for text-processing and information extraction, natural language processing techniques, clustering & classification, and graphics. The course will consider how to use qualitative data and media as input for modeling and will address the use of statistics and data visualization in academic and public discourse. By the end of the course students should be able to evaluate statistical

arguments and visualizations in the humanities with appropriate appreciation and skepticism. Details. Core topics include: sampling, experimentation, chance phenomena, distributions, exploration of data, measures of central tendency and variability, and methods of statistical testing and inference. In the early weeks, students will develop some facility in the use of Excel; thereafter, students will learn how to use Python or R for statistical analyses.

Same as L93 IPH 431

Credit 3 units. A&S IQ: HUM, AN EN: H

L16 Comp Lit 432A Programming for Text Analysis

This course will introduce basic programming and text-analysis techniques to humanities students. Beginning with an introduction to programming using the Python programming language, the course will discuss the core concepts required for working with text corpora. We will cover the basics of acquiring data from the web, string manipulation, regular expressions, and the use of programming libraries for text analysis. Later in the course, students will be introduced to larger text corpora. They will learn to calculate simple corpus statistics as well as techniques such as tokenization, chunking, extraction of thematically significant words, stylometrics and authorship attribution. We will end with a brief survey of more advanced text-classification terminology and topics from natural language processing such as stemming, lemmatization, named-entity recognition, and part-of-speech tagging.

L16 Comp Lit 435A Expressionism in the Arts

A close study of expressionism as an international phenomenon in the arts, from the anti-naturalist movements of the 1890s to Hitler's condemnation of expressionism as decadent. The evolution of expressionist theatre from Wedekind to Toller and Kaiser; such composers as Schoenberg and Berg; in the visual arts, such groups as Der blaue Reiter and Die Brücke, such independents as Kokoschka; in cinema, such figures as Pabst, Murnau, Von Sternberg, Lang. Prerequisite: Drama 208E, Drama 336, or permission of instructor.

Same as L15 Drama 435

Credit 3 units. Art: HUM

L16 Comp Lit 436 Seminar in Dramatic Theory

The course begins with Plato's critique of mimesis and Aristotle's defense, as we read *The Poetics* as a response to Plato. We take some of Aristotle's basic concepts, such as mimesis, plot, character and thought, and attempt to apply them to drama up to the present day. We also consider fundamental elements of both the dramatic text and the dramatic production, such as space, time, dialogue, narrative devices and perspective. Brecht's theory of "epic drama" forms the other conceptual pole in the course, opposing Aristotle. Besides these two theorists, other figures include Ben Jonson, Corneille, Dryden, Diderot, Schiller, Hegel, Zola, Artaud and Grotowski. The course, then, has both chronological and thematic axes. Three papers and one oral presentation.

L16 Comp Lit 450E Masterworks of Early Japanese Literature: The Tale of Genji and its Afterlives

An intensive study of one of the central texts of classical Japanese literature. Selection of texts rotate among works including: The Tale of Genji, court diaries, poetry anthologies, Noh drama, The Tale of the Heike, setsuwa collections, and medieval memoirs. In addition to exploring the historical, literary, and cultural significance of the work from its genesis to the present age, students engage in a close reading of the text and an investigation of the primary theoretical issues

and approaches associated with the work both in Japan and abroad. Prior knowledge of early Japanese literature or history is recommended. Texts will be read in English translation. Prerequisite: junior level or above or permission of instructor. Same as L05 Japan 450

Credit 3 units. BU: HUM

L16 Comp Lit 4647 Ancient Madness

In this course we will ask what madness meant in Greek and Roman culture. We will find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating, and categorizing people treated as mad. While we will concentrate on literary (particularly tragic and epic), philosophical, and medical texts, we will also look at visual representations and evidence from ritual and cult. An important part of our project will involve tracing the afterlife of classical ideas: The history of melancholia will ground this aspect of the course. Finally, we will consider how antiquity informs psychoanalysis (Oedipus, Antigone, Narcissus), and how ancient madness might partake in a critique of contemporary understandings of mental illness.

L16 Comp Lit 486 The Business of Books

Book publishing shapes our literary and intellectual landscape in defining ways, yet only with the recent rise of Publishing Studies has the theory and practice of publishing become a serious subject of attention within the academy. This course offers a broad introduction to publishing, with a practical emphasis on contemporary literary publishing. We will explore how publishing communities form in relation to aesthetics, demographics, and technologies, and will consider how ethics and business practices are defined within these communities. On the applied side, we will study editing, contracts, marketing, sales & distribution, infrastructure, and media, and students will write reader's reports, marketing plans, and a final paper analyzing a contemporary publishing project and placing its work in relation to the historical and cultural context, demonstrating how each particular publishing practice is adapted to its own cultural ecosystem. Industry professionals will visit to speak with the class by Zoom, and Professor Riker brings two decades of experience as a book publisher, author, and reviewer. Alongside these other activities, over the course of the semester students will follow the progression of a book published by the nationally acclaimed publishing house Dorothy, a Publishing Project, of which Professor Riker is the publisher.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L16 Comp Lit 493 The Unmaking and Remaking of Europe: The Literature and History of the Great War of 1914-1918

The Great War of 1914-1918 is one of the most momentous events in history. We can approach its broad European import by reading its literatures comparatively. Far wider than the concerns of any one national ideology, the literature of record represents a profound crisis in the European cultural imaginary. A number of critical and interpretive issues will be in play in our readings, which will move through three major phases. We begin with the powerful immediacy of trench poetry (1914-1919), develop into the constructed narratives of the great postwar novels and memoirs (1920-1931), and then turn toward the retrospect of the 1930s, which is also the prospect on the next, now inevitable, war. The authors featured include combatant and civilian writers, names well-known and not so famous: Mann, Apollinaire, Owen, Pound, Cocteau, H.D., Woolf, Maurois, West, Celine, Joyce, Musil, Eliot, Rosenberg, Sassoon, Graves, Hardy, Trakl, Stramm, Lichtenstein, Péguy, Barbusse, Manning, Jünger, Zweig, Brittain, and Kroner. All readings for class will be in English translation. Our secondary literature will provide approaches to specific texts and models of literary and cultural history that represent the longer-range importance of the war.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L16 Comp Lit 494 Seminar: Diverse Topics in Literature

This course may offer a variety of topics. Semester subtitle varies. It has been offered as an in-depth study of the individual through autobiographies; and as a course on visual poetics from antiquity to the present. Consult the department for further details.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L16 Comp Lit 497 Independent Work for Senior Honors

One or more long papers on a topic chosen in conjunction with the adviser and an examination. A committee determines whether the student receives credit only or Honors.

Prerequisites: senior standing and permission of chair of the committee.

Credit 3 units.

L16 Comp Lit 4970 Performance Theory

This course introduces students to contemporary theories of performance, with "performance" understood as both metaphor and event. From a multi-disciplinary perspective, students will consider how cultures produce meanings-and, indeed, perform those meanings-to create and/or disrupt their own social coherence. Theories likely to be studied include: J. L. Austin's speech-act theory and its engagement by John Searle and Jacques Derrida; Victor Turner's analysis of ritual as social process and Richard Schechner's use of it to transform "theater studies" into "performance studies;" Erving Goffman's sociology of the self and its relation to a post-structuralist model of subjectivity; Michael Fried's screed against minimalist art and its relation to Happenings, Body Art, Fluxus, and other mid- to late-20th century examples of "performance art;" and Judith Butler's influential revision of Austin's performative in her theory of queer "performativity."

Same as L15 Drama 497

Credit 3 units. A&S IQ: HUM EN: H

Dance

Students may select dance as a major through the Performing Arts Department (p. 896). This Bachelor of Arts course of study combines intensive studio work in the technique and theory of modern dance, ballet and composition with seminars that examine dance both as a global phenomenon reflecting culturally historic and aesthetic features as well as an area of scientific research with therapeutic applications. The major also

includes a broad range of courses, such as stagecraft, music resources, improvisation, anatomy for dancers, pedagogy, dance therapy, musical theater dance, world dance forms, jazz and tap. Students may also choose to minor in dance or in world music, dance and theater. The interdisciplinary minor in world music, dance and theater encourages students already interested in the performing arts to explore those outside of Euro-American traditions. A certificate program in somatic studies is offered through the University College division of Arts & Sciences.

Students who study dance at Washington University learn from faculty members who have both professional experience and academic degrees. Students also have the opportunity to study with guest artists in residence who teach master classes and set choreography.

In addition, the department offers many opportunities for students to perform and present their work. Washington University Dance Theatre holds annual auditions, and selected students will appear in faculty- and guest artist-choreographed concerts in Edison Theatre. Students particularly interested in performing may audition for the student repertory company Washington University Dance Collective (WUDC). WUDC rehearses and performs throughout the year at area venues as well as on campus. Every spring, student choreographers can audition their work for Student Dance Showcase, which is directed and produced by Washington University dance students. Each year, students have the opportunity to attend the regional American College Dance Conference, where they may take master classes, perform, present choreography and receive feedback from internationally recognized professional dance artists.

Majors

The Major in Dance

Total units required: 34 units, with a minimum of 18 units at the 300 level or above

Studio dance courses at Washington University are an integrated combination of both praxis and the study of the historical, cultural and aesthetic theory of dance as an art form. Although course work is required in all aspects of the dance major, students may individually choose to emphasize their study in one of three areas: dance performance, choreography, or history/theory.

All dance majors must take the following courses (13 units):

Code	Title	Units
Dance 203	Composition I	3
Dance 303	Composition II	3
Dance 212E	Introduction to Theater Production	3
Dance 3101	Dance Improvisation: Spontaneous Composition & Performance Techniques	2
Dance 305Z or Dance 312	Music Resources for Dance Accompaniment Techniques for Dance	2
Total Units		13

Plus 6 units from the following studio technique courses:

Breadth Requirement: The dance major must complete studio dance technique course work in at least two dance genres (e.g., modern, ballet, jazz).

Note: Any of these courses may be taken as electives if they are not taken in fulfillment of the requirement.

Code	Title	Units
Dance 300	Jazz Dance II	2
Dance 301	Theory and Technique of Modern Dance III	2
Dance 3021	Theory and Technique of Modern Dance IV	2
Dance 321	Classical Ballet: Intermediate I	2
Dance 3221	Classical Ballet: Intermediate II	2
Dance 401	Theory and Technique of Modern Dance V	2
Dance 4021	Theory and Technique of Modern Dance VI	2
Dance 403	Jazz III	2
Dance 415	High Intermediate Ballet I	2
Dance 416	High Intermediate Ballet II	2
Dance 4281	Classical Ballet III	2
Dance 4291	Classical Ballet IV	2

Plus 6 units of the following history/theory courses:

Code	Title	Units
Dance 316	Histories of Theatrical and Concert Dance	3
Dance 331	Movement and Meaning: Dance in a Global Context	3
Dance 340	Ballet as Ethnic Dance and Classical Art	3
Dance 342	Critical Thinking in Western Theatrical Dance: Questioning Meets Creative Thinking and Collaboration	3
Dance 363	The Neuroscience of Movement: You Think, So You Can Dance?	3

Dance 426	Performing the Political in American Dance	3
Dance 433	Performing Gender and Sexuality in America	3

Plus 9 units of elective courses:

Students may choose any L29 dance courses at the 200 level or above, including University College dance and somatic studies courses (U31), that have not already been taken in fulfillment of the requirements above.

Dance majors may also choose from the following drama courses:

Code	Title	Units
Drama 304	Makeup for the Stage	2
Drama 3081	Costume Rendering and Design	3
Drama 309	Stage Technology	3
Drama 310	Stage Lighting	3
Drama 361	Stage Management	3
Drama 396	History of Western Costume	3

Additional Information

Study Abroad: Washington University students can pursue dance studies abroad during the academic year at the University of Auckland, New Zealand; the University of Ghana, Legon; and Roehampton University, London. With approval from the dance program, courses at these institutions may fulfill dance major and minor requirements. Courses in other disciplines taught at these institutions may also be accepted by Washington University.

Minors

The Minor in Dance

Total units required: 17 units

Studio-based/technique courses (9 units):

At least 6 of these units must be at the 300 level or above. Students must select from the following list:

Code	Title	Units
Ballet		
Dance 221	Fundamentals of Classical Ballet	2
Dance 222	Fundamentals of Classical Ballet	2
Dance 321	Classical Ballet: Intermediate I	2
Dance 3221	Classical Ballet: Intermediate II	2
Dance 3224	Intermediate Pointe Technique	1
Dance 415	High Intermediate Ballet I	2
Dance 416	High Intermediate Ballet II	2
Dance 4281	Classical Ballet III	2
Dance 4291	Classical Ballet IV	2
Modern		

Dance 106E	Introduction to Dance as a Contemporary Art Form	2
Dance 201E	Theory and Technique of Modern Dance I	2
Dance 202	Theory and Technique of Modern Dance II	2
Dance 240	Afro-Modern Dance (Dunham Technique)	2
Dance 301	Theory and Technique of Modern Dance III	2
Dance 3021	Theory and Technique of Modern Dance IV	2
Dance 3101	Dance Improvisation: Spontaneous Composition & Performance Techniques	2
Dance 311	Modern Dance and the African-American Legacy	2
Dance 401	Theory and Technique of Modern Dance V	2
Dance 4021	Theory and Technique of Modern Dance VI	2
Dance 413	Modern Dance and the African American Legacy II	2
Jazz		
Dance 297	Fundamentals of Jazz Dance	2
Dance 300	Jazz Dance II	2
Dance 403	Jazz III	2
West African		
Dance 343	West African Music and Dance in Context	2

Composition course (3 units):

Code	Title	Units
Dance 203	Composition I	3

History/theory course (3 units):

Students must select from the following list:

Code	Title	Units
Dance 316	Histories of Theatrical and Concert Dance	3
Dance 331	Movement and Meaning: Dance in a Global Context	3
Dance 340	Ballet as Ethnic Dance and Classical Art	3
Dance 342	Critical Thinking in Western Theatrical Dance: Questioning Meets Creative Thinking and Collaboration	3
Dance 363	The Neuroscience of Movement: You Think, So You Can Dance?	3

Dance 426	Performing the Political in American Dance	3
Dance 433	Performing Gender and Sexuality in America	3

Elective courses (2 units): Any additional history/theory course or studio-based/technique course at the 300 level or above may be used to fulfill this requirement.

The Minor in World Music, Dance and Theater

For the world music, dance and theater minor, visit the Performing Arts page (p. 899) of this *Bulletin*.

L29 Dance 106E Introduction to Dance as a Contemporary Art Form

Introduction to dance as a creative art form. Through practical work in the studio, students gain an understanding of the human body as an instrument of expression and of motion as the medium of dance. Technique, analysis and creative work. Not open to majors. May be repeated once for credit.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 107 Ampersand: A Performative Perspective on Chinese Culture and Identity

This course examines the diversified and rich history of Chinese visual and performance cultures from the Chinese mainland, Taiwan, Hong Kong, and throughout the Chinese diaspora. A collaboration between the East Asian Languages and Cultures and Performing Arts departments, this course explores Chinese cultural narratives in relation to how they have been performed — on stage in traditional forms of dance-drama, on screen in film, and as lived in the practice of everyday life — from the late Imperial period to the present. It includes a practice component that introduces the students to movement disciplines such as Tai' Chi and opera, and it allows students to pursue creative assignments such as interview, stage plays, and filmmaking that demonstrate their developing knowledge of historical and contemporary Chinese culture. Building bridges of understanding between the United States and the Republic of China in Taiwan, the course will culminate in a spring break trip to Taiwan. This course is only for first-year, non-transfer students in the Ampersand: Encountering China program.

Same as L61 FYP 107

Credit 3 units. A&S: AMP A&S IQ: LCD, SC BU: HUM, IS EN: H

L29 Dance 1080 Encountering Chinese Culture: Performing Tradition, Engendering Transformations

This course examines the development of modern Chinese culture and its dynamic relationship with traditions and renovations. During the past century, China has gone through a series of political, cultural, economic, and technological transformations that constantly reshaped the form and content of Chinese culture. Tracing the drastic changes in Chinese

language, performance and media forms from the late 19th century to contemporary time, this course guides the student through the pivotal moments in modern Chinese history and analyzes their impacts on literature, drama, dance, film and internet culture. What transformative promise did new media and art forms deliver? How do we make sense of the intricate connection between tradition and renovation? The purpose of this course is to foster an understanding of Chinese culture as a dynamic process of formation rather than a static, homogeneous entity. However, instead of seeing this formation as a linear progression with one form or style replacing the other, we will study how past traditions — both ancient and recently constructed ones — are reconfigured in new cultural representations and practices.

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD BU: HUM, IS

L29 Dance 200 Tutorial

Supplementary work at the low intermediate level in ballet and modern dance at times to be determined. Prerequisites: sophomore standing and permission of the Director of Undergraduate Dance Studies. Credit to be determined in each case.

Credit variable, maximum 6 units. A&S IQ: HUM EN: H

L29 Dance 201E Theory and Technique of Modern Dance I

Fundamental theory and techniques of American modern dance. Studio work investigating the expressive potential of human movement and developing individual rhythmic and kinesthetic awareness, coordination, and breadth of movement vocabulary. Related reading and video expand on theory embodied in the class work and give an historical overview of modern dance in the U.S. Attendance at two to three performances required. Prerequisite: some previous dance training or permission of instructor.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 202 Theory and Technique of Modern Dance II

A course for students familiar with the basic concepts and technique of modern dance. Emphasis on expanding individual movement versatility with increasing difficulty of choreographic phrase materials. Related readings and videos, some focused on American postmodern dance. Attendance at two to three performances required. Prerequisite: Dance 201 or permission of the instructor.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 203 Composition I

Finding personal movement and transforming it into dance. Through a series of class projects the formal elements of composition are introduced. Prerequisite: Dance 201 or permission of the instructor; concurrent registration in a technique class required.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L29 Dance 212E Introduction to Theater Production

An introductory study of the major elements involved with mounting a theatrical production. Utilizing guest speakers in both theater arts and theater studies, the course addresses such topics as scenic, costume, lighting and sound design; production management and procedures; and the history and

culture of theatrical space and design. Students are required to serve as a crew member on one departmental production and attend productions of the Edison Theatre Ovarions series and the Performing Arts Department.

Same as L15 Drama 212E

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 213 Improvisation I

This course explores the process and art form of creative, expressive, spontaneous dance making. Students learn to move and respond simultaneously in the moment, developing skills of communication, observation, performance and composition in the language of movement. Open to dancers of all levels. Light reading; in class and out-of-class projects.

Credit 1 unit. Art: HUM

L29 Dance 221 Fundamentals of Classical Ballet

Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on American Ballet Theatre as a repository for classical and modern ballet repertoire of both American and European choreographers. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary. Prerequisite: none.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 222 Fundamentals of Classical Ballet

Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on New York City Ballet as a repository for the choreography of George Balanchine. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 240 Afro-Modern Dance (Dunham Technique)

This course introduces students to Katherine Dunham's dance technique, which combines ballet, modern, and Afro-Caribbean dance. Dunham Technique is one of the most important foundations for jazz dance and also shares characteristics with West African Dance and several modern dance techniques. Some lectures and occasional short readings will supplement this studio-based course so that students can learn more about Katherine Dunham (1909-2006), one of the great pioneers of dance in America. The class is open to all levels, although at least one semester of previous dance experience is required. Repeatable one time for credit in subsequent semester.

Credit 2 units.

L29 Dance 257 Dance Theater Production

Experience in technical production. Required stage work includes two studio dance productions supervised by faculty. Prerequisite: Dance 212E.

Credit 1 unit. A&S IQ: HUM EN: H

L29 Dance 296 Internship

Students may receive up to 3 units of credit for an approved internship with an organization where the primary objective is to obtain professional experience outside the classroom. Students must file a Learning Agreement with the Career Center, a faculty sponsor and the site supervisor. This must be approved by all three constituencies before proceeding. A final written project is agreed upon between the student and faculty sponsor before work begins, and is evaluated by the faculty sponsor at the end of the internship.

Credit variable, maximum 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L29 Dance 297 Fundamentals of Jazz Dance

This course introduces the basic principles and vocabulary of traditional jazz dance as influenced by American social dances and its relationship to the rise in popularity of jazz music. Both are unique to America and are rooted in African-American and European-American culture.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 300 Jazz Dance II

Intermediate to high intermediate work in jazz dance technique, including choreographic phrases emphasizing stylistic clarity and more complex rhythmic structure. Variable content; may be repeated once for credit in a subsequent semester. Preference given to students registering for the first time. Prerequisite: Dance 297 or permission of instructor.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 301 Theory and Technique of Modern Dance III

This course presents technique and related concepts for the intermediate-level student. There is greater emphasis on the student's ability to accurately replicate or individually interpret choreographic material. Related reading, video assignments on contemporary dance developments, and attendance at two to three performances required. Content varies by semester, and this course may be repeated for credit in a subsequent semester. Prerequisite: Dance 202, recommendation of the student's previous Washington University instructor, or permission of instructor.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 302 Theory and Technique of Modern Dance III

Prerequisite: permission of the instructor.

Credit 3 units. BU: HUM

L29 Dance 3021 Theory and Technique of Modern Dance IV

Continuation of Dance 301. The content of this course varies, and the course may be repeated for credit in a subsequent semester. Prerequisite: Dance 301, recommendation of the student's previous Washington University instructor, or permission of instructor.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 303 Composition II

This is a workshop for students with experience in choreography, and it involves the study of approaches to dance composition, with related improvisation problems. Work outside of studio hours is expected. Prerequisites: Dance 203 and permission of instructor; concurrent registration in a technique course is required.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L29 Dance 3033 Music, Sound, and the Body

How do musicians use their bodies when creating music? How do audiences, listeners, and dancers feel music in their bodies and contribute to making sound? This course explores embodied perspectives on making, sensing, and moving to music and sound. Examining theories of the body and the senses as they relate to sound practices, the course draws on scholarship from ethnomusicology, anthropology, sound, dance and performance studies, music cognition and other fields. Case studies include EDM, reggae, and salsa dance; Afro-Brazilian and Buddhist religious practices; and music healing and therapy. Because centering the body means considering lived experience along intersecting axes of difference, course readings and discussions will focus on issues of race, ethnicity, gender, sexuality, and (dis)ability. Students will develop their own ethnographic project, and they will be asked to participate in music-movement workshops throughout the course. However, neither previous dance experience nor normative bodily ability are required. Same as L27 Music 3033

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 305Z Music Resources for Dance

Analysis of Western (Europe, America), world (Africa, India, Indonesia) and global popular musics. Emphasis on rhythm/form, style/genre, instrumentation and function/context. Basic music theory: notation, time signatures, subdivisions and polyrhythms. Major composers for dance (Lully, Tchaikovsky, Debussy, Ravel, Stravinsky, Cage, etc.). Introduction to percussion techniques for dance accompaniment using hand drums, drumset and hand-held instruments. Introduction to basic studio techniques including microphones, recording and editing equipment, and the use of synthesizer and drum machines. Prerequisites: for dance students at the intermediate or advanced level.

Credit 2 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L29 Dance 308 Dance Composition Projects

Choreography juried by dance faculty or supervised choreography on themes assigned by the instructor or formulated by the student and approved by the instructor. Prerequisite: minimum of one semester course work in composition or permission of the instructor.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 309 Composition and Technique II

Continuing work in dance composition supported by two technique classes each week at the level appropriate to the individual student. Work on composition assignments outside of class are expected. Prerequisite: Dance 201, Dance 203 or permission of instructor.

Credit 4 units. A&S IQ: HUM BU: HUM EN: H

L29 Dance 310 Dance Improvisation II

Continuation of Dance 213. Prerequisites: Dance 213 or permission of instructor; concurrent registration in a dance technique course at the 300 level or higher is required. May be repeated once for credit.

Credit 1 unit. A&S IQ: HUM

L29 Dance 3101 Dance Improvisation: Spontaneous Composition & Performance Techniques

Dance improvisation is a cumulative, integrative practice, applying every skill the performer can bring to the spontaneous present in which creative process and performance is simultaneously one and the same. In this course, students learn and create processes for improvising dance/performance art, with an aim toward developing integrated skill in: dance technique, intuitive movement invention, partnered dancing, collaborative process, performance presence/expressivity, and compositional form. Applications include improvising compositions for theatrical stage, site-specific venues, and for camera-based artistic mediums. Meets requirement for dance major. Prerequisite: Students must be qualified at 300 level in any genre of dance technique, or obtain special permission of instructor. This course is optimal for students who have previously taken Dance Composition (L29 203/208/303/309), and/or Contact Improvisation (U31 212), though they are not prerequisites. May be repeated once for credit.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 311 Modern Dance and the African-American Legacy

This course examines the works of several African-American choreographers and their contributions to the field of modern dance in America. These works are considered modern dance classics, and some depict important historical events. Through the medium of dance aided by discussions, videos, and class reading assignments, the choreographers' works are analyzed for form, content, and social relevance. Studio work includes technique to support learning the repertory. Prerequisite: One to two years of training in modern, jazz, or ballet.

Credit 2 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM EN: H

L29 Dance 312 Accompaniment Techniques for Dance

A wide variety of percussion instruments and techniques are studied to determine what makes effective dance accompaniment. The course includes: examples and discussion of dance musics from Western and non-Western cultures; basic notation of rhythm and form; demonstrations of musical styles and discussion of social contexts. Students have opportunities to assist in accompanying modern dance classes. Minimum of two to three hours a week of individual practice and/or listening to recordings expected.

Credit 2 units. A&S IQ: HUM Art: HUM EN: H

L29 Dance 316 Histories of Theatrical and Concert Dance

This course is a survey of dance on the stage. It examines the interrelated histories of ballet, modern, jazz, hip hop, and musical theatre dance, and it discusses how these forms have converged in today's contemporary dance scene. It offers an overview of key artistic movements, both mainstream and avant-garde, while examining selected dances through a combination of formal analysis and a consideration of the social and political contexts that contributed to their meaning. Students will learn how to analyze dance using a variety of sources, such as visual art, photographs, film, and written texts. The classroom format will emphasize discussion. Throughout the course, we will interrogate the categories of "theatrical dance" and "concert dance," seeing how the definitions have changed over time to include or exclude certain types of dancing.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 316E From Romantic to Postmodern Dance

An overview of European and American theatre dance from the early 19th century to the present. Topics include: Isadora Duncan's work as transition and revolution, Orientalism in early modern dance and the Diaghilev Ballets Russes, the "reconstruction" of the dancer's body, gender issues in movement vocabulary, choreographic content and professional working conditions, the emergence of modernism and postmodernism in dance. Seminar format emphasizing discussion of reading and dance videos.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L29 Dance 319 Stage Lighting

This course will place an emphasis in the aesthetic practice of lighting design through the understanding of technology as it relates to time and space. Early on the student will learn how to properly use and apply designer's tools and then through reading, research and experimentation explore the limitless boundaries of color and texture. This will culminate in a stage design in collaboration with directing or dance class. Upon completion of the course, the student will be able to speak eloquently on design theory and be able to move on to further design study in Advanced Lighting Design: L15 410.

Same as L15 Drama 310

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 321 Classical Ballet: Intermediate I

A course designed for those with a solid foundation in the fundamentals of ballet technique. Related reading and video assignments; attendance at one to two ballet performances. Variable content; may be repeated in a subsequent semester. Prerequisites: permission of the instructor and B+ or better in Dance 221 and 222.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 3221 Classical Ballet: Intermediate II

Special emphasis on the development of adagio, allegro and turn sequences. Variable content; may be repeated in a subsequent semester. Prerequisites: permission of instructor and B+ or better in Dance 221 and 222.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 3224 Intermediate Pointe Technique

This course is designed for dancers with a basic foundation and understanding of pointe technique. The focus of the course is the strengthening of the overall presentation of the pointe technique while additionally developing the performance quality of the dancer. Variable content; may be repeated for credit in a subsequent semester. Corequisite registration in Dance 3221, 416 or 4291, and permission of the instructor.

Credit 1 unit. A&S IQ: HUM EN: H

L29 Dance 323 Topics in Theater

Explores a variety of special interest topics in theater. Consult the course listings.

Same as L15 Drama 321

Credit 3 units. A&S IQ: HUM EN: H

L29 Dance 331 Movement and Meaning: Dance in a Global Context

This course introduces students to various approaches to studying dance in a humanities context. We will explore how people create meaning through dance and how dance, in turn, influences social norms, political institutions, aesthetic ideals and cultural practices. As we compare dance forms across the globe, we will also examine issues of race, gender, sexuality and ethnicity, analyzing how dance literally embodies identity. At the same time, we will discover how contemporary unequal power hierarchies bear on our designation of some dance forms as "Western" and others as "world" or "ethnic." Tensions around assessment of authenticity/creativity, adaptation/appropriation, agency/resistance, and cultural hierarchies such as vernacular/modern, shift with social and political hegemony and with the individual's position as insider or outsider relative to ethnic self-identification and traditional forms of expression. The first part of the course introduces the student to different methodological approaches to studying dance. Throughout the semester, the usual process of the course will be discussion of assigned reading and viewing and analyzing together dance videos shown in class. A few dance workshops will be included (for which no previous dance training is necessary). Required work includes a few short assignments, a take-home midterm exam, a project on a topic of student's choice but related to course focus, a 20-minute presentation of student's project/paper, and a final take-home exam.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: CPSC, HUM BU: HUM, IS EN: H

L29 Dance 332 Mind-Body: Integral Practices

The mind and the body are not only connected, they are a fundamental unity, always functioning in a coordinated state. Whether or not we coordinate them well or badly is a choice we make, whether we are conscious of choosing or not. Many so-called "physical" exercises, activities and arts suffer from a lack of adequate skills of sensation, attention, perception and conscious control. Conversely, many so-called "mental" activities lack adequate awareness of the bodily underpinnings of thought. Like a person learning to play a musical instrument, one's ability to coordinate the mental and physical aspects of Self toward one's best personal potential is a skill requiring study of strategies and techniques for good practice in "being well." Such ideas and methods are not "new age," but can be traced back through more than a century in the work of investigators such as F.M. Alexander, progressive educator John Dewey, anthropologist Raymond Dart, and many others. Through direct experience and related readings, this class introduces students to "somatic," or "integral" practices — activities that are inherently more effective at developing the aspects of Self in a coordinated and authentically holistic manner. We then learn to apply our understanding to all kinds of activities, both mental and physical, from chores to exercise, from arts to sports, from hobbies to vocations. Some kind of prior movement training (e.g., athletics, martial arts, dance, etc.) is preferable but not required.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 340 Ballet as Ethnic Dance and Classical Art

This course examines the origins and major developments in ballet theory, technique and production practice, emphasizing their relationship to concepts of ethnicity and classicism. Issues considered include: the influence of classic Greco-Roman theater on the themes, aesthetic ideals and theorization of ballet; analysis of ethnic content not only in thematic material

but in ballet movement vocabulary and training process; the conscious reformulation in the United States of European ballet as an equally American art form; the expansion of Euro-American "classical ballet" in the work of Balanchine and Tudor; the appropriation of ballet by non-Western countries (such as China and Japan) and its impact on native dance genres; typical construction of the ballet dancer's body and movement, including gender definition, in relationship to a specific ethnic community context. Seminar format with lectures, discussion and video materials. Three five- to seven-page papers and final. No prerequisites.

Credit 3 units. A&S IQ: HUM, SD, WI BU: HUM

L29 Dance 342 Critical Thinking in Western Theatrical Dance: Questioning Meets Creative Thinking and Collaboration

This is a course designed to introduce the student to the intersections of creative, collaboration and critical thinking in Western Theatrical Dance. This course begins with a review of the literature on creativity, creative collaboration, the process of creating Western Theatrical Dance, and critical thinking. The course continues as an overview of these issues while presenting the intersection and interaction of these elements, which form the creative collaboration of Western Theatrical Dance. The students read from both texts and articles on creativity, creative collaboration, the process of creating Western Theatrical Dance in the 20th and 21st centuries, and critical thinking.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L29 Dance 343 West African Music and Dance in Context

A West African dance course specifically focused on the Ivorian dance traditions of the Baule, Bete Dan, Lobi, Makinke, and Senufo peoples. The course addresses the relationship between music and dance as well as their social and cultural significance. Study of myths, art, costumes and masks as they relate to various dances and music is also included. A studio course with related reading material.

Credit 2 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM EN: H

L29 Dance 363 The Neuroscience of Movement: You Think, So You Can Dance?

Although humans have expressed themselves through movement throughout time, only recently have neurophysiological investigative techniques allowed us to glimpse the complex neural processes that allow the coordination and integration of thought, action, and perception. This course introduces students to the nascent yet growing field of dance neuroscience. In part one of this course, we explore fundamental concepts of motor control, including how our central nervous system integrates information to allow us to maintain posture and balance, to coordinate our limbs to external rhythms, and to move our bodies gracefully and expressively through space and time. In part two, we explore theoretical frameworks of motor learning as they pertain to movement. We delve into the neuromechanisms underlying common tools that dancers and athletes use to improve motor performance and how dance training induces neuroplasticity in brain structure and function. In part three, we explore the neural underpinnings of aesthetic appreciation while watching dance, including the action observation network and affective responses to art. Required work includes short assignments, a final project and presentation

on a topic of your choice related to the course focus, and a few movement workshops (for which dance training is not required). Prerequisite: introductory course in dance, biology, or neuroscience, or permission from the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L29 Dance 372 Advanced American Musical Theatre

This course will focus on developing the acting, singing and dancing techniques required for performing in musical theater. The student will develop group pieces and will participate in scenes that explore character within a musical theater context. The class will culminate in a workshop performance. Prerequisite: Drama 221 and permission of instructor, by audition. Repeatable one time for credit.

Same as L15 Drama 372

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 384 Digital Media for the Stage

Entertainment technology continues to evolve and push boundaries by taking our imagination and turning it into a version of reality. Digital Media will attempt to explore some of the tools used to bridge the two worlds of thought and sight. We will learn how to think creatively about imagery and how to paint that onto a stage through a different type of light: digital. Using QLab and Green Hippo — two of the most widely used media control systems in the world — we will learn how to deliver thought-provoking illusions of light and texture on the stage.

Same as L15 Drama 384

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 394W Writing For and About the Theater

In this course, students will learn to write for and about the theater, exploring different forms of dramaturgical and scholarly research as well as journalistic and academic writing. To build skills in both critical analysis and synthesis, students will learn how the key elements of the playwright's text (e.g., language, character, plot, setting) work to create meaning within the work of dramatic literature and how theatre-makers use the various "languages" of the stage (e.g., costume/scenic/lighting design, music, acting) to give expression to an overarching interpretation of the play. Because research is essential to this course, students will learn how to access a variety of library resources by working closely with our subject librarians. By the end of the semester, students will have assembled a portfolio consisting of both journalistic and academic performance reviews, a dossier of dramaturgical research, and a research-based scholarly paper. Same as L15 Drama 394W

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

L29 Dance 400 Dance Production Projects

Students may receive credit for work on special dance-related production projects conceived by students and supervised by faculty. Contracts must be signed by the student, faculty supervisor, and the coordinator of Dance 400 before work on the project commences. Students should register for this course after work is completed. Prerequisite: permission of the dance faculty.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 401 Theory and Technique of Modern Dance V

The course emphasis is on versatility in movement vocabulary and on more complex and intensive technical work with discussion of theory inherent in the studio work, related readings, and projects. Variable content: may be repeated for credit in a subsequent semester. Prerequisite: Dance 302 with recommendation of the student's previous 302 instructor or permission of the 401 instructors.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 402 Theory and Techniques of Modern Dance IV

Emphasis on more complex and intensive technical work.

Prerequisite: permission of the instructor.

Credit 3 units.

L29 Dance 4021 Theory and Technique of Modern Dance VI

This course is a continuation of Dance 401 with emphasis on more complex and intensive technical work. Variable content; may be repeated for credit in a subsequent semester. Prerequisite: Dance 401 with recommendation of the student's previous 401 instructor or permission of the 4021 instructors.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 403 Jazz III

Jazz III is primarily a studio course based on traditional jazz with strong elements of ballet technique, hip-hop, Broadway, and street jazz. The main focus of the class will be on increased technical proficiency and development as an expressive performer. The studio work will introduce exercises and movement phrases that challenge the dancer's skill level, and encourage a personal exploration that further enhances the dancer's individual expression and style. Studio work will be supported by individual research on the field of jazz dance. Variable content: may be repeated once for credit. Prerequisites: high-intermediate training in jazz dance technique and permission of the instructor.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 404 Composition IV

The exploration of choreographic problems in small and large ensembles. Prerequisite: completion of Dance 303, senior standing or permission of instructor. Previous or concurrent registration in Dance 401 or 4021 recommended.

Credit variable, maximum 3 units.

L29 Dance 4041 Composition III

The exploration of choreographic problems for small and large ensembles. Prerequisite: senior standing or permission of instructor. Previous or concurrent registration in Dance 401 or 4021 recommended.

Credit variable, maximum 3 units. A&S IQ: HUM

L29 Dance 4052 Music, Sound, and the Body

This course examines theories of the body, embodiment, and the senses as they relate to music and sound practices. Readings draw on scholarship from ethnomusicology, anthropology and geography of the senses, sound studies, dance studies, performance studies, and music cognition. If ethnomusicology is "the study of people making music," this course explores how people make and experience music and sound with their bodies, through the full range of their senses. We will consider questions surrounding the ways in which musicians, audiences,

listeners, and dancers perceive and experience music in their bodies and contribute to the making of sound. By centering the body, we will necessarily consider lived experience along intersecting axes of difference such as race, ethnicity, gender, sexuality, and (dis)ability. Course readings and discussions will therefore focus on the social and political affordances and limitations of body-based practices and their theorization. Case studies will include a broad range of sound-movement practices, from electronic dance music and black social dance to Sufi and Buddhist religious practices, queer taiko drumming, and deaf music-making. Over the course of the semester, students will develop their own project exploring course themes, and they will be asked to participate in music-movement workshops throughout the course. This is an upper-level/graduate-level course, so some knowledge of music and/or dance concepts is assumed, but neither previous music/dance experience nor normative bodily ability are required.

Same as L27 Music 4052

Credit 3 units. A&S IQ: HUM, LCD, SC BU: HUM EN: H

L29 Dance 407 Topics in Dance Techniques

Explores a variety of special interest topics in dance techniques. Consult the course listings for the semester topic.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 413 Modern Dance and the African American Legacy II

This course focuses on works by 2-3 renowned African-American choreographers. The selected choreographers are chosen for their contributions to the field of American modern dance based primarily on their explorations regarding the process and dynamics of building community — the sense of community as experienced through the lens of African-American cultural values and aesthetics as it pertains to the creative process. Therefore, the course focuses on viewing the body as a site for the exchange of ideas concerning humanity. Students investigate these choreographers through learning excerpts of their choreography and choreographing personal responses, as well as through related readings, videos and independent research.

Credit 2 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM EN: H

L29 Dance 414 Advanced Stage Lighting

This course is an advanced continuation of Drama 310 Stage Lighting. Emphasis is placed on cultivating design aesthetics and on the further exploration of controlling light in both laboratory and live settings. Students will dive deeper into color theory, light plot development, and ultimately into advanced lighting console programming. The course objectives will cover a wide range of production styles and performance venues within a series of challenging design projects. Prerequisite: L15 310 or permission of instructor.

Same as L15 Drama 410

Credit 3 units. A&S IQ: HUM EN: H

L29 Dance 415 High Intermediate Ballet I

A course designed as preparation for the advanced level. Emphasis on vocabulary review and individual technique assessment, including placement, movement quality and musicality. Related readings and video assignments; attendance

at and critical analysis of one to two ballet performances.

Variable content; may be repeated in a subsequent semester.

Prerequisites: B+ or better in Dance 221, 222, 321, 322 and/or permission of instructor.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 416 High Intermediate Ballet II

A course designed for the high intermediate dancer in preparation for Dance 4281/429. Emphasis on placement, movement quality and musicality. Related readings and projects supplement the classical vocabulary. Prerequisites: B+ or better in Dance 221, 222, 321, 322 and/or permission of instructor.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 418 Variations in the Ballet

Introduces classical choreography within various ballets.

Prerequisites: Dance 321 or Dance 4281 with some pointe training, and permission of instructor.

Credit 1 unit. A&S IQ: HUM EN: H

L29 Dance 423 Pointe Technique

Designed for dancers with a basic foundation in pointe work. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: concurrent registration in Dance 321 or 4281 and B+ or better in Dance 221, 222, 321, 322 and/or permission of instructor.

Credit 1 unit. A&S IQ: HUM

L29 Dance 424 Pointe Technique

Designed for dancers with a basic foundation in pointe work. Concurrent registration in Dance 322 or 4291 and permission of instructor. Repeatable one time for credit in subsequent semester.

Credit 1 unit. A&S IQ: HUM EN: H

L29 Dance 426 Performing the Political in American Dance

This course is an exploration of the politics of performance and the performance of politics through the lens of American dance in the 20th and 21st centuries. Through readings, screenings, and discussions, we will examine the ways in which American dance developed against and alongside political movements in the United States, particularly ones concerning nationalism, race, gender, and human rights. We will also investigate how the lens of dance and choreography offers an expansive means to conceptualize political questions of citizenship and social protest, broadening our understanding of embodied performance. Guided by several key philosophical texts, this course will focus on the concepts necessary for examining the convergence of performance and politics (e.g., representation, ritual, spectacle, body, mimesis, propaganda) while also paying special attention to the politics of funding and censorship that has governed the creation and presentation of dance in the United States. No dance experience is necessary.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD, WI Art: CPSC BU: BA EN: H

L29 Dance 4281 Classical Ballet III

Designed for dancers with a solid foundation in beginning and intermediate ballet technique. Related reading, research paper/discussion, video assignments; attendance at one to two ballet performances. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: permission of instructor and B+ or better in Dance 3221 and Dance 415 or Dance 416.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 4291 Classical Ballet IV

A course designed for dancers with a solid foundation in beginning and intermediate ballet technique. Variable content; may be repeated for credit in a subsequent semester. Prerequisite: permission of instructor, and B+ or better in 3221 and 415 or 416.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 430 Dance Pedagogy

In this course students will learn methods of instruction, assessment and how to develop dance curriculum for K-12. Students will design classes based on national standards, grade-level expectations and sound dance principles. In the studio they will teach each other sample lessons that they have developed. This class will cover dance competencies required by DESE for beginning teachers of dance. We will pay attention to current trends in arts education. Our discussion will include the diversity of student populations and how to prepare and respond. We will discuss the role of the arts in education and the dance teacher's role as classroom instructor, arts integration instructor, diplomat and arts advocate. Credit may be applied toward the education major and potentially toward state certification. Prerequisite: minimum of two semesters of upper-level course work in dance technique.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 433 Performing Gender and Sexuality in America

This course examines how the performance of gender and sexuality has shaped the social, cultural, and political history of the United States from the early 19th century to the present. Although performance happens in everyday life, we will primarily focus on how the stage has been a potent space for debating issues related to gender and sexuality. This course will put forth the argument that the stage has historically not only reflected broader social concerns but also actively helped to shape those social dynamics. After an introduction to foundational ideas, we will start the semester with minstrelsy, which signals that the performance of gender and sexuality in America is deeply intertwined with race, class, and national belonging. Reading and viewing assignments bring together feminist theory, queer theory, American social history, and performance texts to build robust seminar discussions.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM BU: BA, HUM EN: H

L29 Dance 453 Presence in Performance: Alexander Technique and Mindful Movement for Performing Artists

This course provides group and individual instruction in principles and methods from Alexander Technique and other somatic arts for training mindful, embodied presence in performance. Mindful movement techniques are widely used by professional dancers, actors, and musicians to enhance performance skill and to address/prevent injury and chronic pain. Through a workshop process of guided learning, students

gain awareness of subtle inefficiencies in coordination and balance that cause pain and limit ability. Students gain ability to self-assess and adjust problematic movement patterns to improve freedom and expression. Alexander Technique works at fundamental levels of movement coordination, and its methods are applicable to all performing art genres. Training is tailored to each individual student's needs, skills and goals. This course involves experiential learning supported with related readings, discussion, personal research projects and presentations. Prerequisites: Graduate standing; also open to undergraduate students studying at the 400 level in their discipline with permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L29 Dance 457 Dance Repertory

Concert dance performance practicum. Under the direction of faculty, guest or graduate student choreographers, students rehearse and prepare for performance in a repertory dance concert or the MFA thesis production. Enrollment by audition. Prerequisite: permission of the faculty director of an appropriate production. Concurrent registration in a technique class is required. May be repeated once for credit.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 458 Dance Repertory

Concert dance performance practicum. Under the direction of faculty, guest or graduate student choreographers, students rehearse and prepare for performance in a repertory dance concert or the MFA thesis production. Enrollment by audition. Prerequisite: permission of the faculty director of an appropriate production. Concurrent registration in a technique class is required. May be repeated once for credit.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 479 Fundamentals of Sound Design

Encompassing both creative and technical aspects of sound in the performing arts, the course gives theoretical knowledge of, and practical experience in the following areas: fundamental rules of physics and electronics related to sound, use of standard digital recording studio equipment, "training" of the ear and basic techniques of sound montage. Students are expected to participate in a variety of conceptual and research oriented exercises as well as complete several lab projects. Sound-related work on Performing Arts Department productions may be required. Prerequisite: Drama 212 and permission of instructor. Same as L15 Drama 479

Credit 3 units. A&S IQ: HUM EN: H

L29 Dance 493 Senior Project

Specialized project in a selected area in dance. The student will work individually under the supervision of a faculty member. Submission of student proposal prior to registration. Final self-evaluation essay required. Prerequisite: permission of the coordinator of the Dance Division.

Credit variable, maximum 3 units.

L29 Dance 499 Study for Honors

An honors thesis or performance and thesis project designed by the student, and supervised and assessed by a faculty committee. Prerequisites: senior standing, grade point of 3.65, and 3.65 in dance classes, and permission of the coordinator of the dance division.

Credit variable, maximum 6 units.

L29 Dance 4990 Independent Work

Prerequisite: senior standing and permission of the director of undergraduate dance studies.

Credit variable, maximum 10 units.

Drama

Students may select drama as a major through the Performing Arts Department (p. 896). This major combines the historical, cultural, theoretical and literary study of theater and performance with a full array of theater arts courses, including acting, directing, performance art, design (set, costume, lighting), stage management and playwriting. The Performing Arts Department strongly believes in the mutually beneficial relationship between the study and the practice of theater. A major in drama develops students' knowledge of theater by means of rigorous, immersive studio and lab courses, along with a strong and comprehensive grounding in theater history, dramatic literature, performance studies and dramatic theory.

The three-semester Theater Culture Studies sequence provides an expansive, global study of theater and performance, from prehistory to the 21st century; students take an additional two courses in theater and performance studies. Within the theater arts, students choose courses in acting, directing, playwriting or design. Our theater arts courses are based on a liberal arts model rather than a conservatory model. During the senior year, a capstone experience is required for all drama majors.

We also offer a special study abroad program that can be credited toward the major. Since 1991, we have been holding a national summer program at Shakespeare's Globe in London, which consists of a 3-unit course on acting Shakespeare and a 3-unit course on Shakespeare studies, in addition to several master classes taught by Globe personnel.

Majors

The Major in Drama

Total units required: 36 (12 courses)

Theater Arts (TA) Requirements

- Three required courses:

Code	Title	Units
Drama 212E	Introduction to Theater Production	3
Drama 2401 or FYP 215	Fundamentals of Acting * First-Year Seminar: The Theatre as a Living Art	3
Drama 343	Fundamentals of Directing	3

* This course replaces L15 Drama 240 Acting I: Fundamentals of Acting.

- One introductory design course chosen from the following list:

Code	Title	Units
Drama 3081	Costume Rendering and Design	3
Drama 310	Stage Lighting	3
Drama 311M	Scenic Design	3

- One additional upper-level (300 level or above) elective in TA

Theater and Performance Studies (TPS) Requirements

- Three required courses in the Theater Culture Studies sequence (it is strongly recommended that these courses be taken in order):

Code	Title	Units
Drama 228C	Theater Culture Studies I: Antiquity to Renaissance	3
Drama 229C	Theater Culture Studies II: From Renaissance to Romanticism	3
Drama 365C	Theater Culture Studies III: Melodrama to Modernism	3

- Two upper-level (300 level or above) electives in theater and performance studies–related courses. Students majoring in Drama should develop knowledge of and appreciation for aesthetic forms, intellectual paradigms, and cultural conditions beyond the largely white, Eurocentric approaches that have prevailed in the modern university curriculum. To that end, at least one of these electives must be a course examining drama, theater, and/or performance that emerges from racial and/or ethnic communities whose contributions have been historically underrepresented in the study of drama. Eligible courses for these two electives include classes home-based in the Performing Arts Department as well as approved courses offered through other Arts & Sciences departments.

Two Additional Courses

- One upper-level (300 level or above) course in either TA or TPS
- Every Drama major will complete a 3-credit capstone during their senior year. The capstone requirement may be met by one of the following options:
 1. A one-semester, 3-credit senior project (Drama 493) based in the Performing Arts Department
 2. A two-semester, 6-credit senior honors thesis project (Drama 499) based in the Performing Arts Department, with the goal of receiving Latin honors upon graduation
 3. An additional 400-level class taught by a TPS faculty member in the Performing Arts Department, culminating in a 15-page critical research paper (which may not be part of the general requirements for the course) with an accompanying oral public presentation. The intention to use this course to fulfill the capstone requirement will be made prior to the first day of class in consultation with the instructor.
 4. An additional 400-level class in TA (design, directing, acting, playwriting, dramaturgy) that culminates in a significant artistic project and a critical response. The intention to use this course to fulfill the capstone requirement will be made prior to the first day of class in consultation with the instructor.
 5. A lead performance role* or a lead design position (L15 4990-4993) in a Performing Arts Department faculty- or guest-directed production during the senior year, with a critical post-production response. The project will be evaluated and graded by the director along with, if applicable, the supervising faculty designer. In the case of a guest director, a designated Performing Arts Department faculty evaluator will serve as the instructor of record, working with the guest director on capstone project parameters and assessment.

Eligible roles identified prior to auditions.

Minors

The Minor in Drama

Total units required: 18

Required courses:

- The following course:

Code	Title	Units
Drama 212E	Introduction to Theater Production	3

- 6 units (two courses) from the three Theater Culture Studies courses:

Code	Title	Units
Drama 228C	Theater Culture Studies I: Antiquity to Renaissance	3
Drama 229C	Theater Culture Studies II: From Renaissance to Romanticism	3
Drama 365C	Theater Culture Studies III: Melodrama to Modernism	3

Elective courses:

At least 9 credit units at the 300 level or above. No more than 3 units may be production credits.

The Minor in World Music, Dance and Theater

L15 Drama 107 Ampersand: A Performative Perspective on Chinese Culture and Identity

This course examines the diversified and rich history of Chinese visual and performance cultures from the Chinese mainland, Taiwan, Hong Kong, and throughout the Chinese diaspora. A collaboration between the East Asian Languages and Cultures and Performing Arts departments, this course explores Chinese cultural narratives in relation to how they have been performed — on stage in traditional forms of dance-drama, on screen in film, and as lived in the practice of everyday life — from the late Imperial period to the present. It includes a practice component that introduces the students to movement disciplines such as Tai' Chi and opera, and it allows students to pursue creative assignments such as interview, stage plays, and filmmaking that demonstrate their developing knowledge of historical and contemporary Chinese culture. Building bridges of understanding between the United States and the Republic of China in Taiwan, the course will culminate in a spring break trip to Taiwan. This course is only for first-year, non-transfer students in the Ampersand: Encountering China program.

Same as L61 FYP 107

Credit 3 units. A&S: AMP A&S IQ: LCD, SC BU: HUM, IS EN: H

L15 Drama 1080 Ampersand: A Performative Perspective on Chinese Culture and Identity.

This course examines the development of modern Chinese culture and its dynamic relationship with traditions and renovations. During the past century, China has gone through a series of political, cultural, economic, and technological transformations that constantly reshaped the form and content of Chinese culture. Tracing the drastic changes in Chinese language, performance and media forms from the late 19th century to contemporary time, this course guides the student through the pivotal moments in modern Chinese history and analyzes their impacts on literature, drama, dance, film and internet culture. What transformative promise did new

media and art forms deliver? How do we make sense of the intricate connection between tradition and renovation? The purpose of this course is to foster an understanding of Chinese culture as a dynamic process of formation rather than a static, homogeneous entity. However, instead of seeing this formation as a linear progression with one form or style replacing the other, we will study how past traditions — both ancient and recently constructed ones — are reconfigured in new cultural representations and practices.

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD BU: HUM, IS

L15 Drama 115 First-Year Seminar: What is Art?

Great works of literature, theatre, film, painting, music and dance provide us with new, intriguing — and often surprising! — ways of understanding reality. In this First-Year Seminar, we examine a variety of works in various media, paying close attention to works which have significantly altered or challenged the way we view and interpret reality. In an intimate, seminar setting, we analyze and discuss individual works of art from the Greeks to the present day. The course incorporates attendance at live performances (both on-campus and off), along with Master Classes by artists from the Performing Arts Department. Examining works both classical and the avant-garde, What is Art? forces us to understand and question how art complicates, enriches, disturbs and asks questions — both about ourselves and our world.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: AH, HUM BU: HUM EN: H

L15 Drama 1151 First-Year Seminar:

A variety of topics in comparative literature, designed for first-year students — no special background is required — and to be conducive to the investigation and discussion format of a seminar.

Same as L16 Comp Lit 115

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 1165 First-Year Seminar: On Broadway - Musicals, Race, Place

The Broadway theatres are closed, but pressure to make these stages more racially and ethnically diverse when they re-open is strong. This course looks at the history of the Broadway theatres and the ways this coveted theatrical real estate in midtown Manhattan has played host to white and non-white performers in the signature American theatrical genre: the musical. Using digital and archival research tools, including an abundance of maps, our study stretches from the creation of the Theatre District at the turn of the 20th century to the present. We will examine groundbreaking and all-too-typical shows — from "Show Boat" to "Hamilton" — and look closely for how systemic racism has played out on Broadway stages for Broadway's mostly white audience. We will produce original research and explore digital humanities methods related to questions of racial inequality in commercial popular culture. This course is for first-year, non-transfer students only.

Same as L27 Music 1165

Credit 3 units. A&S: FYS A&S IQ: HUM, SC BU: BA, HUM EN: H

L15 Drama 119 Ampersand: Shakespeare's Globe: All the World's a Stage

Why—more than 400 years later—do we continue to read the works of William Shakespeare? Why do we continue to stage his plays, identify with his characters, and communicate our thoughts in his language? Why do his poems and plays retain their vibrancy and immediacy, even today? This course invites students to answer these questions by inhabiting Shakespeare's language from the inside and out—breathing in the words of his characters with creative and careful study, while moving out to fully engage the text in performance. Reading plays, watching films, listening to monologues, voicing dialogue, physically enacting fight scenes, and even navigating plots with joysticks, students will develop deep appreciation for the writer who is the original GOAT—the greatest of all time. In this two-semester course, we will read and study Shakespeare's plays in their historical context, learning about the original practices used in performance at both the Elizabethan and Jacobean court theatres as well as the public theatres on the South Bank of the Thames. We will also consider them as adaptable playscripts that have been rewritten over the past 400 years, reinterpreted at different times by different actors in different cultures the world over. Students will contribute to this performance repertoire with their own 21st-century interpretations, striding the stage of the reconstructed Globe Theatre in a capstone experience that concludes the course with a summer trip to London. If all the world's a stage, come be a player in it!

Same as L61 FYP 119

Credit 3 units. A&S: AMP A&S IQ: HUM

L15 Drama 120 First-Year Seminar: Race and Performance

What does it mean to "act Black"? What about "acting Jewish"? This course looks at performances of racial and ethnic identity, mostly in the United States and mostly in the 20th century. We will examine novels (e.g., Nella Larsen's "Passing"), plays (e.g., Anna Deavere Smith's "Fires in the Mirror"), and performances of everyday life (e.g., "Cowboys and Indians") to investigate the performance of race in public. Once we begin to explore the social and cultural performance of race, will it all turn out to be "only" an act?

Credit 3 units. A&S: FYS A&S IQ: HUM, SD BU: BA EN: H

L15 Drama 135 First-Year Seminar Ideation: Idea Generation

Ideation exists at all phases of a creative process: brainstorming, idea generation, innovation, prototyping, development and actualization. But Ideation is less like a line and more like a loop from observing to reflecting to making — and back again. It is a rarely understood but essential part of any creative or design process. Through collaboration and conversations with classmates, readings on the topic and group exercises, Ideation is a course that strives to define and demystify what we mean by "creativity," help students identify their creative strengths and weaknesses, encourage artistic experimentation of new ideas, establish methods of design thinking and make it clear that collaboration among varied backgrounds and disciplines is the key to coming up with creative solutions for complex problems. Successful companies such as IDEO led by visionaries in the form of Tim Brown and David Kelley have pioneered the notion of Design Thinking. "Design thinking" is defined as "the ability to combine empathy for the context of a problem, creativity in the generation of insights and solutions, and rationality to analyze and fit solutions to the context." This course encourages students to explore their collaborative talents in new ways that they find apply to virtually any discipline and career path: from A to Z.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM
BU: HUM EN: H

L15 Drama 175 Designing Creativity: Innovation Across Disciplines

From "a-ha!" epiphanies to slow-developing discoveries, the creative process has been employed by innovators and artists in virtually every corner of the globe for centuries. This course will explore the study and practice of the creative process across many disciplines, with input from prominent thinkers and practitioners in the areas of medicine, neuroscience, law, engineering, architecture, human-centered design, business, stage design, and the performing arts. The course will also incorporate the practice of design thinking and creativity techniques via a lab component that will allow students to explore the development of innovative ideas in collaborative teams followed by project presentations to core faculty and classmates. This course is for first-year (non-transfer) students only.

Credit 3 units. A&S IQ: HUM, SC, SD BU: HUM EN: H

L15 Drama 209 Introduction to Costume Construction

This course is a hands-on introduction to the sewing and costume-related skills most useful for creating costumes for theatre productions.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 212E Introduction to Theater Production

An introductory study of the major elements involved with mounting a theatrical production. Utilizing guest speakers in both theater arts and theater studies, the course addresses such topics as scenic, costume, lighting and sound design; production management and procedures; and the history and culture of theatrical space and design. Students are required to serve as a crew member on one departmental production and attend productions of the Edison Theatre Ovations series and the Performing Arts Department.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 214 Public Speaking: Embodied Communication

The ability to speak well and to communicate effectively in the public forum is an essential skill for all students. This course aims to offer a comprehensive and wide-ranging approach to developing the skills of the contemporary speaker. While acknowledging and utilizing traditional approaches to public speaking, this course expands its reach to include applicable techniques from the world of the Performing Arts — especially theater and dance. The course does not intend to train the student as a dancer or actor, but it maintains that the successful speaker would do well to harness some of the transferable skill sets from these disciplines. The speaker, like the performer, must stand before an audience with an objective to communicate something well. Both should be dedicated advocates for the message. They share the common ground of requiring a strong voice for a sure delivery of the material, and an expressive physicality willing to fully embody and serve the message.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 2150 First-Year Seminar: The Theatre as a Living Art

Moving in and out of practice and theory, this FOCUS plan interweaves a traditional introductory acting course with discussions of dramatic theory and visits to rehearsals where directors and actors work to shape the play. Must be taken concurrently with Drama 228C. Course is for first-year, non-transfer students only.

Same as L61 FYP 215

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM
BU: HUM EN: H

L15 Drama 223 Cross-Cultural Women Playwrights

This course provides an introductory survey of the work of African-American, Caribbean-American, Asian-American and Native American women playwrights. We explore the playwrights' strategies for creating work that is by turns beautiful, fascinating, humorous, moving and occasionally terrifying as they chart for contemporary theater the intersection of race and gender in performative terms. Playwrights addressed include Adrienne Kennedy, Ntozake Shange, Suzan-Lori Parks, Anna Deavere Smith, Diana Son, Jessica Hagedorn, Cherie Moraga, Wakako Yamauchi, Migdalia Cruz, Spiderwoman Theatre, Marga Gomez and Velina Hasu Houston.

Credit 3 units. A&S IQ: HUM, SD Art: HUM BU: BA

L15 Drama 227 Playwriting

An introductory course in playwriting. Limited to eight students. Prerequisite: Writing 1 and permission of the instructor.

Same as L13 Writing 224

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 228C Theater Culture Studies I: Antiquity to Renaissance

This course is a survey of ancient, medieval and Renaissance theater and performance: in both the West and in the East, as it both reflects and shapes culture. Coverage will include the following areas: ancient Greece, ancient Rome, classical Sanskrit theater, Yuan China, medieval Japan, medieval Europe, Renaissance Italy, and Renaissance England. Both scripted theater and performance practices will be examined through the lenses of dramatic literature, theater history, performance studies, and dramatic theory. A continual emphasis will be on marginal and underrepresented figures, as we will attempt to excavate forgotten histories from the theatrical past.

Credit 3 units. A&S: AMP A&S IQ: HUM Arch: HUM Art: HUM BU: HUM, IS EN: H

L15 Drama 229C Theater Culture Studies II: From Renaissance to Romanticism

This course provides a survey of theater history from the early 17th through mid-19th centuries, covering plays, theories of drama and acting, and the material conditions of theatre production. We explore events in Asia, the Americas and Europe with particular attention to the Baroque era, Sentimentalism and Romanticism. The central objectives of the course are 1) to teach students to analyze plays in complex and creative ways, and 2) to cultivate understanding of the ways theater and performance practices reflect the philosophical ideas, aesthetic values, and sociopolitical realities of their historical context — even as these practices sustained and challenged such ideas, values and realities.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

L15 Drama 230 Topics in Theater

Explores a variety of special interest topics in theater not included in the Theater Culture Studies sequence. Consult the course listings.

Credit 3 units.

L15 Drama 239 Performance and Culture

What are Lady Gaga and Beyonce doing? How do young men and women in poverty use performance for survival? Why do we create performance and for whom? In this class we apply the vocabulary and concepts of Performance Studies to social and theatrical worlds, understanding performance broadly: from popular culture to everyday life to theatre. To understand performance, we look closely at ethnographies, plays and literature. Subjects span a range of topics: racial impersonation, drag/house balls, celebrity culture, reality television, black-latino theatre, and slam poetry. Key course questions: How does performance inform everyday culture? How does culture inform popular culture and theatrical performance? This course takes seriously the "doing" and the "undoing" of things — as culture shifts, transforms and adjusts as bodies engage in the art of performance.

Credit 3 units. A&S IQ: HUM BU: BA EN: H

L15 Drama 2401 Fundamentals of Acting

This course offers an opportunity to investigate the nature of the theater by way of performance. Students study a variety of theatrical texts in the most direct and experiential way: by acting in them. The course is designed for those who want to understand the interpretive work of the actor. Students are introduced to the practical work of building a character for the stage, and they also gain an understanding of how dramatic texts work both on the page and on the stage. Textual analysis, movement work and vocal production skills are developed using monologues, scene work and exercises. These skills should also provide significant benefits outside of the confines of the class itself, in the professional and personal lives of the students taking this course. No previous training or experience necessary.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 240E Acting I: Fundamentals of Acting

This course offers an opportunity to investigate the nature of the theater by way of performance. Students study a variety of theatrical texts in the most direct and experiential way, by acting in them. The course is designed for those who want to understand the interpretive work of the actor. Students are introduced to the practical work of building a character for the stage, and they also gain an understanding of how dramatic texts work both on the page and on the stage. Textual analysis, movement work and vocal production skills are developed using monologues, scene work and exercises. These skills also provide significant benefits outside the confines of the class itself, in the professional and personal lives of the students taking this class.

L15 Drama 250 Topics in Stage Movement

This is a rotating topics course on movement for actors.

Credit 3 units. A&S IQ: HUM

L15 Drama 2503 Introduction to Performance Art

The focus of this course is on the history, theory and practice of performance art and performance theater. The class engages in exercises that generate text, movement, sound and performance scores. Students create original performances that incorporate contemporary critical concepts. Performance production is supplemented by readings and videos that introduce the history and theory of experimental performance and work by specific performance artists.

Credit 3 units. A&S IQ: HUM BU: HUM

L15 Drama 251 The Art of Storytelling

As one of the oldest forms of human communication, storytelling is part of both mundane interactions and carefully crafted events. Many of us tell stories regularly in informal settings (e.g., when we tell a friend about an encounter we had in the cafeteria) as well as in professional settings (e.g., class or work presentations). But what, exactly, are the elements of a well-told story? How do we identify powerful storytellers? These questions ground this course, where we will explore stories as forms through which to present oneself and explain an event to others. We will study storytelling from two perspectives. First, we will look at stories through rhetorical analysis: we will focus on various examples of storytelling across different genres (ranging from cultural myths, fables, spoken word, speeches, hip-hop, R&B, and rock lyrics) to understand stories as an artistic practice, a teaching method, an identity shaper, and a conductor of history. Second, we will consider stories through embodied

practice: we will perform and present stories in chosen genres to gain firsthand experience in the conventions and forms of the embodiments that complete the act of telling well-crafted stories. At the end of this course, students will have gained theoretical knowledge about storytelling as an art form as well as the practical skills needed to become confident storytellers. Credit 3 units. L15 Drama 256 Contemporary Comedy: Stand-up, Sketch and Improv

The United States is in the midst of a second comedy boom. The first boom, during the 1980s, turned stand-up comedy into a major force in American entertainment, creating stars like Jerry Seinfeld, Eddie Murphy, and Ellen DeGeneres. The second, which is defined in part by new social media, podcasting, and online video, is remaking the way comedians find their voices and their audiences. However, even as young comedians chart new paths through a dynamic media landscape, live performance is still the heart of the modern comedy universe. This class is a detailed survey of the contemporary American comedy scene. Pioneering artists from vaudeville through the 1970s are introduced, the stand-up boom of the 1980s is presented as a formative force in the comedy business, and alt-comedy is discussed as a stylistic watershed. Select modern theories of comedy are read and discussed, although we studiously avoid explaining jokes. Short units on improv and sketch comedy round out the syllabus. Assignments include practical exercises in performing comedy onstage, and students can choose to perform a short original stand-up set for their final assignment.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 257 Dance Theater Production

Experience in technical production. Required stage work includes two studio dance productions supervised by faculty. Prerequisite: Dance 212E.

Same as L29 Dance 257

L15 Drama 271 The American Musical Theater Songbook

From its birth in vaudeville and musical reviews to current future classics such as "Hamilton," American musical theater has produced a voluminous catalogue of material referred to herein as the "American Musical Theater Songbook." Part survey and part performance, this course will focus on the composers, lyricists, performers and subject matter that have been instrumental in defining musical theater and its role in describing a continually evolving human psychology and sociology. The performance aspect of the course will develop students' existing vocal skills and knowledge of style. As both singing and non-singing students are welcome to participate in the course, adjustments for non-singing students will be accommodated so that they may participate fully in the class. The format of the course will be a seminar of student-generated presentations, discussions, and workshop performances. A sampling of shows from which repertoire will be sourced includes the following: early song-and-dance shows ("Girl Crazy," "Anything Goes," "Kiss Me Kate"); Rodgers and Hammerstein ("Oklahoma!," "Carousel," "South Pacific"); Stephen Sondheim ("Gypsy," "Sweeney Todd," "Sunday in the Park With George");

modern era ("West Side Story," "A Chorus Line," "Cabaret," "Hair," "Pippin"); and contemporary ("In the Heights," "Caroline, or Change," "Kinky Boots," "Dear Evan Hansen," "Hamilton"). This course serves as a prerequisite for L15 372.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 295 Portfolio Review

This course is intended as a one-hour credit to meet every Friday for two contact hours. While the main focus of this course is to dedicate time to learning and preparing a solid professional portfolio, résumé and webpage, this class also trains the students how to interact and conduct themselves through the interview process. We review numerous résumés from industry professionals, develop our own, develop both physical and digital portfolios consisting of students' academic and professional work, and culminate in building a strong and evocative webpage. Upon completion, the student has a solid understanding of the theater job market and be ready to face the world.

Credit 1 unit. A&S IQ: HUM EN: H

L15 Drama 296 Internship

Students may receive up to 3 units of credit for an approved internship with an organization where the primary objective is to obtain professional experience outside the classroom. Students must file a Learning Agreement with the Career Center, a faculty sponsor and the site supervisor. This must be approved by all three constituencies before proceeding. A final written project is agreed upon between the student and faculty sponsor before work begins, and is evaluated by the faculty sponsor at the end of the internship.

Credit variable, maximum 3 units.

L15 Drama 300 Production Practicum

Practicum experience in technical theater. Available positions include stage manager; publicist; assistant designer for costumes, scenery or lighting; or crew head of props, sound and makeup design.

Credit variable, maximum 2 units.

L15 Drama 3011 A History of African-American Theater

A survey of African-American theater from post-Civil War "coon" shows and reviews to movements for a national black theater, such as Krigwa, Lafayette and Lincoln, and the Black Arts Movement. Early black theater and minstrels; black theater movement and other ethnic theater movements in America. Critical readings of such plays as Amiri Baraka's *Dutchman*, Lorraine Hansberry's *A Raisin in the Sun*, Langston Hughes and Zora Neale Hurston's *Mulebone*. Also works by August Wilson, Ed Bullins, Charles Fuller, Georgia Douglas Johnson.

Same as L90 AFAS 301

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 304 Makeup for the Stage

A hands-on introduction to the makeup techniques most commonly used for theater productions, including basic corrective, age, changing the shape of the face, and special effects, as well as the designing process. Students will apply makeup to their own faces and are required to purchase the makeup kit specified by the instructor.

Credit 2 units. A&S IQ: HUM EN: H

L15 Drama 3081 Costume Rendering and Design

Costume Rendering and Design is an introduction to the skills required for designing costumes for theater productions. Class topics will include duties and responsibilities of costume designers for theatre, elements and principles of design, research methods, drawing the human figure and clothing, various color media, text analysis and creating costume-related paperwork for plays, communicating character with costume renderings, and the time management required to complete designs in a deadline-based industry.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 309 Stage Technology

Practical study of technical theater procedures and scene shop; production techniques. Course outline includes lectures, demonstrations of equipment, production assignments and research-oriented project work. Prerequisite: Drama 212E or permission of instructor.

Credit 3 units.

L15 Drama 310 Stage Lighting

This course places an emphasis in the aesthetic practice of lighting design through the understanding of technology as it relates to time and space. Early on the student learns how to properly use and apply designer's tools and then through reading, research and experimentation explore the limitless boundaries of color and texture. This culminates in a stage design in collaboration with directing or dance class. Upon completion of the course, the student is able to speak eloquently on design theory and be able to move on to further design study in Drama 410 Advanced Lighting Design.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 311M Scenic Design

An introduction to the process of scenic design, as it relates to aesthetics, dramatic literature, collaboration and production. Projects involve design conceptualization, documentation, graphics and realization.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 314 Voice-Speech Laboratory

Fundamentals of speech for the stage focusing on breath support, resonance, articulation and speech as an expression of an individual's needs. The course includes an introduction to stage dialects. Preference given to majors.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 3153 The Women of Greek Tragedy

This course examines the role of women in Athenian drama. Students will read English translations of the works of the three major tragedians — Aeschylus, Sophocles, and Euripides — and their near contemporary, the comedian Aristophanes. Direct engagement with ancient texts will encourage students to develop their own interpretations of and written responses to the political, social, and ethical manipulation that these mythological women were compelled to endure and the subtle ways in which they appear to exercise power themselves. Selected scholarly articles and book chapters will help students to contextualize these ancient dramas in their culture of origin. Because such

issues continue to preoccupy both sexes today, students will see how Greek tragedy addresses perennial historical and cultural concerns through the examination of adaptations of Greek tragedies ranging from Seneca in ancient Rome to Spike Lee's "Chi-Raq" and Luis Alfaro's "Mojada: A Medea in Los Angeles." The final research paper will encourage students to consider how a specific female character from antiquity is transformed for a "modern" dramatic audience.

Same as L08 Classics 3153

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 3201 Concepts in Theater Architecture and Performance Space

Can a cloakroom or a stairwell become a theater? How do site and placement affect the meaning potential of performance? How does contemporary environmental staging conjure a world different from that of the modern box set, the baroque perspective stage or Shakespeare's Globe? We engage such questions by drawing on theory, history and hands-on creation to examine historical, actual and potential performance spaces. Readings in architectural and dramatic theory, theater history, performance studies and philosophy provide both a critical descriptive vocabulary and a conceptual repertoire for use in creative class assignments — both informing students' investigations of actual theaters or other performance — ready spaces and provoking their creation of experimental performance spaces. Readings cover semiotic, materialist and situationist approaches to space, as well as concepts including site specificity, space vs. place, framing, perspective, miniature, the door, the curtain, the cloakroom and the monument.

Credit 3 units. A&S IQ: HUM EN: H

Rotating topics course.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 3227 Devising, Adaptation, Docudrama

This course explores three ways of theatre-making that have revolutionized the contemporary stage: devising (a collaborative process emphasizing physical techniques to realize ideas), adaptation (the transposition of a narrative from one mode to another), and docudrama (the self-conscious staging of history through the assemblage of documentary records). Beginning with a focus on the current "postdramatic theatre" and the pre-histories of these contemporary practices, we will engage current scholarship on each form, learning the "how" and "why" from contemporary practitioners, while considering the rhetorical structure of each form in relation to the social meanings they generate for their audiences. Divided into three units, the course will combine the study of each method with hands-on practice, and will conclude with a showcase featuring an original performance created by the student collective. A theme (variable by semester) will unite the three sections of the course, helping students see how a single topic can be illuminated in different ways through these three methods of creating performance.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L15 Drama 323 Topics in American Drama

A rotating topics course on various subjects relating to the history and theatrical practice of modern American drama. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 3301 Performing Gender

This course investigates an array of contemporary performances to explore manifestations of and challenges to gender norms in American culture. An initial reading of crucial performance theories by Judith Butler, Jill Dolan and others help set the stage for our examination of a diverse collection of contemporary texts, including plays, solo performances, stand-up and pop culture phenomenon. We raise questions about feminist performance strategies, butch/femme performance, camp, cross-dressing, feminist spectatorship, multimedia performances and the representation of lesbian desire. Prerequisite: any 100-level Women, Gender, and Sexuality Studies course. Credit 3 units. A&S IQ: HUM, SD BU: BA EN: H

L15 Drama 3302 Culture & Identity

This is a topics course that focuses on instances of identity and culture within the American scope. The topic varies by semester; see the Course Listings for a description of the current semester's offering. Same as L98 AMCS 330C. Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: CPSC, HUM BU: BA EN: H

L15 Drama 332 Comedy, Ancient and Modern

In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy. Same as L08 Classics 385W. Credit 3 units. A&S IQ: HUM, LCD, WI Art: CPSC BU: HUM EN: H

L15 Drama 336 Modern Drama

L15 Drama 3361 Modern Drama, 1945 to the Present

Course concentrates on the development of modern drama from 1945 to the present. Focus is on both literary and theatrical techniques as well as the examination of trends in the contemporary theatre from Samuel Beckett through Sam Shepard. Perspective is comparative and international in scope, with particular attention given to women and minority playwrights. Same as L14 E Lit 3361. Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

L15 Drama 338 Physical Theater: An Exploration of Viewpoints and Suzuki Training

In this course students study two very different but complementary styles of movement training. Developed by the Saratoga International Theatre Institute, this method of actor training combines the improvisational exploration of time and space through "Viewpoints" with the rigid structure and physical demands of the Suzuki method. This combined approach is designed to develop heightened awareness and acute focus in the performer. In addition, it fosters greater impulsiveness and freedom in the moment while maintaining discipline and control. Students gain flexibility and strength and enhance their creative potential by balancing these seemingly opposing methods. Prerequisite: Drama 341 Acting II Fundamentals of Movement or Dance 106E Introduction to Dance as a Contemporary Art Form. Credit 3 units.

L15 Drama 340 Topics in Stage Movement

Exploration of a variety of theatrical and movement concepts with emphasis on process rather than product. Concentrates on developing the expressive flexibility of the body and linking the imaginative impulse with physical movement. Preliminary work in relaxation and efficient self-use. Prerequisite: Drama 240E or permission of instructor. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 341 Acting II

Fundamental scene study using texts with emphasis on integration of voice and body and the playing of actions. Students are encouraged to precede this course with Drama 207C. Prerequisite: Drama 240E. Preference given to majors. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 3411 Intermediate Acting: Scene and Character Study

This course expands and develops the work begun in Fundamentals of Acting. The focus is on developing systematic strategies for challenging theatrical texts. Emphasis will be placed on integrating the use of the voice and body as well as the development of character via actions in scene study projects. We will focus on investing fully in the imaginary/given circumstances of the plays we encounter. In addition, students will augment their study of character through audition preparation and monologue techniques. Research and analysis are featured, and students are asked to demonstrate their proficiency in written assignments. Prerequisite: Drama 240E/2401. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 3412 Acting II — Acting Styles in Theory and Practice: Modern

This 5-unit class fulfills both one theater studies and one theater arts requirement for the major. It combines fundamental actor training with dynamic, performance-oriented study of the stylistic foundations of modern acting. Text-based scene study that emphasizes the integration of voice and body and playing of actions is paired with units on contemporary and historical acting styles that give context to modern acting practice. Class units cover practical aesthetics and tactical choices for actors interpreting texts, as well as theories of the body in performance ranging from early modern notions of electric and vital passions, to oratorical gesture, Stanislavski, biomechanics, Brechtian alienation, and postmodern practices including documentary theater and cross-media mimesis. Since it fulfills both the

Acting II requirement and a Theatre Studies requirement for the major, the class incorporates research, writing and critical thinking assignments. However, in keeping with the notion that performance constitutes a type of research outcome, student research projects involve kinetic elements. Acting styles are researched in archival sources and embodied in studio exercises and creative student projects.

Credit 5 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 342 Acting III

Emphasis on characterization while working with a diversity of playwriting styles. Prerequisites: Drama 341, either Drama 207C or 208C, and permission of instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 3422 Acting Styles: Realism to Nonrealism

Credit 3 units.

L15 Drama 343 Fundamentals of Directing

Directing is the most liberal arts of the creative theatre-making areas, drawing analytical, critical thinking, communication, design and actor coaching skills. This course will explore fundamental lessons in some of those areas, including text analysis from a directorial perspective, stage composition, auditions/casting, actor communication, time management and team leadership skills. Major course components will include one extensive script analysis paper and the direction of a scene from a contemporary play. The latter will require outside-of-class rehearsal time. Prerequisites: Drama 212E, Drama 240E/2401, junior or senior standing. Preference given to drama majors. For junior/senior status or grad students only.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 347 Shakespeare Globe Program: Acting

This Acting Shakespeare course is paired with Drama 3472 as part of a four-week summer intensive program held at the Shakespeare's Globe Education Centre in London. This course, as well as the companion Text and History course (Drama 3472), is taught by a Washington University faculty member, and the program also draws heavily on British theater professionals and educators from Globe Education, who teach a set of short courses on movement, voice, textual analysis, historical context, monologue performance and stage combat. Frequent access to the Globe stage allows actors to work in a spatial configuration very similar to that once used by Shakespeare's company itself. The course culminates with performances of scenes and monologues on the Globe stage. Application process must initiate through the Performing Arts Department office.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 3473 Shakespeare and Early Modern Performance

Paired with Drama 347 Shakespeare Globe Program: Acting, this course uses the resources of London and the Globe Theatre as departure points for an examination of Shakespearean performance in its historical and cultural context. We pay close attention to the dramatic text: meter, style, metaphorical language, dramatic composition, rhetoric, genre, etc. We consider such topics as Shakespeare's playing spaces, the actor-audience relationship in the Globe Theatre, acting, movement, original rehearsal practices, the boy actor, costumes, sound, music, props and the culture of the Bankside (bear-baiting, taverns, violence, prostitution, etc.).

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 3491 Media Cultures

This course is an introduction to the interdisciplinary field of cultural and media studies. Through a focus on television and new media, it analyzes current theoretical ideas and debates about culture. Main topics include the relationship between new technologies and everyday life and popular culture; analysis of media messages and images; how media help construct new identities and mark differences between groups; analysis of the globalization of the production and circulation of media culture; the rise of multimedia cultural industries; and the role of the audience. Required screenings.

Same as L53 Film 349

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC BU: BA EN: H

Same as L13 Writing 351

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 361 Stage Management

A practical approach to the study of theater stage management focusing on organizational and communication skills.

Workshops, lectures and discussion; guest speakers and field trips covering the pre-production, rehearsal and performance periods; labor relations/performing arts unions; career opportunities; and supporting the vision of the artistic team.

Prerequisites: Drama 212E and Drama 240E.

Credit 3 units.

L15 Drama 365C Theater Culture Studies III: Melodrama to Modernism

The third in the department's three-course history sequence, TCS III surveys the dramatic literature and cultural history of the modern theater. Beginning with Romanticism's self-conscious break with the past, we'll study the rise of bourgeois melodrama with its intensely emotional rendering of character and spectacular effects. We'll consider how those effects were made possible by advances in industrial stage technology which reproduced the everyday world with unprecedented verisimilitude, and how playwrights responded to those technologies by calling for the theatre to become either a "total work of art" — plunging its spectators into a mythical realm — or a petri dish — analyzing the struggles of the modern individual within their modern milieu. Exploring a range of aesthetic modes — including Realism, Naturalism, Symbolism, Expressionism, the Epic Theatre, and the Theatre of the Absurd — we will read classic plays by modern playwrights to consider how the modern theatre helped its audiences understand as well as adapt to the rapidly changing conditions of the modern world.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

L15 Drama 367 Introduction to Drafting for the Theater

This course provides the student with a basic understanding of all of the various types of technical drawings needed to successfully execute a scenic design. Throughout the course the student masters all the technical and aesthetic skills needed to produce clean and effective draftings for the theater. In order to successfully complete this class, the student is required to purchase a drafting board and related drafting materials.

Credit variable, maximum 3 units.

L15 Drama 368 Black Theater Workshop III

A performance-oriented course that explores the black experience through acting, directing and playwriting. Students develop through classroom improvisation short performance pieces during the semester. They also are required to attend three to five plays. Each student must participate in a final performance which is in lieu of a written final examination.

Credit 3 units. A&S IQ: HUM, SD Art: HUM EN: H

L15 Drama 372 Advanced American Musical Theater

This course focuses on developing the acting, singing and dancing techniques required for performing in musical theater. The student develops group pieces and participates in scenes that explore character within a musical theater context. The class culminates in a workshop performance. Prerequisites: Drama 221 and permission of instructor, by audition. Repeatable one time for credit.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 374 Theories of Modern Drama

What makes modern drama "modern?" How does it differ from the drama of other cultural movements? When does the modern period begin? This course takes up such fundamental questions in order to examine not only the influential plays that have come to define the "canon" of modern drama, but the various theories that have been proposed as a way of understanding them in relation to the history of Western culture. From Friedrich Nietzsche's *The Birth of Tragedy* to Walter Benjamin's thesis on the Trauerspiel to Emile Zola's *Manifesto on Naturalism* in the theater, we start by considering when modern drama begins and what constitutes its defining features. With such provisional definitions in place, we then engage the responses of fellow modernists such as Richard Wagner, William Archer, T.S. Eliot, Bertolt Brecht, Georg Lukacs and Theodor Adorno. We also consider whether so-called postmodern drama has broken with the modern period to introduce something altogether new, and how recent debates concerning interculturalism, the ideology of form and performance invite new ways of understanding the cultural function of modern drama and its legacy in our own historical moment.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L15 Drama 3751 American Culture: Methods & Visions: Home, Bittersweet, Home: Histories of Home and Homeownership

Required course for AMCS majors. Refer to semester listing for current topic. As a Writing Intensive course, this course serves as an occasion for students to think about matters of argument and presentation, and to develop ideas and models for future

research. This course is intended for students at the junior level or higher; it fulfills the "multidisciplinary" (MD) requirement for AMCS minors and the "Methods Seminar" requirements for AMCS majors.

Same as L98 AMCS 375A

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: CPSC, HUM EN: H

L15 Drama 378 Contemporary American Theater

This course is a focused investigation of the aesthetic, political, and urban landscapes of the contemporary American theatre. We will read published and unpublished plays, familiarize ourselves with the country's most important companies, festivals, and institutions, and discuss issues facing the American theatre now. We will explore the role of the arts in urban planning and development, and address the relationship between higher education and arts institutions, paying particular attention to ideas of community engagement and social justice work undertaken by both. Artists to be studied may include Tony Kushner, Suzan-Lori Parks, Caryl Churchill, Branden Jacobs-Jenkins, Lynn Nottage, Young Jean Lee, and Lin-Manuel Miranda. This course will include a mandatory class trip at the end of March to the Humana Festival of New American Plays in Louisville, Kentucky. Students will prepare for this trip by reading the works of featured playwrights and establishing a research project that will be carried out on-site. Findings from the research project will be presented upon the return to St. Louis. Admission to the course is by instructor permission only; an application form will be sent to all registered students at the conclusion of the registration period. In consultation with and with the permission of the instructor, this course may fulfill the Fieldwork requirement for American Culture Studies majors.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

L15 Drama 379 Expressionism in Theater and Film

This course is designed as an advanced introduction to the aesthetic movement of Expressionism as it appeared in Germany and the United States in the media of theater and film. Characterized by stylized settings that "ex-press" the internal spiritual/emotional/psychological state of its central character, Expressionism is usually discussed as a reaction to Realism, given its overt symbolism, telegraphic diction and episodic action. Beginning with a brief general introduction to the movement (including its manifestation in the visual arts), we consider its cultural, political and critical history, while exploring more recent scholarly investigations into the significance of its performance dimensions.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

L15 Drama 384 Digital Media for the Stage

Entertainment technology continues to evolve and push boundaries by taking our imagination and turning it into a version of reality. Digital Media will attempt to explore some of the tools used to bridge the two worlds of thought and sight. We will learn how to think creatively about imagery and how to paint that onto a stage through a different type of light: digital. Using QLab and Green Hippo — two of the most widely used media control systems in the world — we will learn how to deliver thought-provoking illusions of light and texture on the stage.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 387 In Living Color: Performing the Black '90s

From Cross Colours overalls to oversized sweatshirts and boom boxes, the 1990s was loud, colorful, and in your face. But along with the fun of house parties and the growing prominence of hip-hop, Black people in the United States also contended with heightened criminalization and poverty codified through the War on Drugs, welfare reform, police brutality, and divestment from public education. In the midst of insurgency, creativity, and the quiet that undergirded both, we will study the various cultural productions of Black performers and consumers as they navigated the social and political landscapes of the 1990s. Focusing primarily on urban centers, we will study major works growing out of hip-hop, R&B, comedy, television shows, films, and popular literature that attends to the regional differences throughout the nation. In this course, we will use theories from performance and cultural studies to understand the specificities of Blackness, gender, sexuality, religion, and geography in the 1990s.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM BU: BA, HUM EN: H

L15 Drama 390 Immersive Story Studio

What possibilities and pitfalls do immersive practices create for live storytelling? How do the affordances of a digital tool amplify or suppress aspects of a source story? What new insights into familiar stories can we generate with radical adaptation? To engage these questions, this studio seminar blends humanistic scholarship with critical making, theatrical practice, and interdisciplinary, team-based agile development processes. Each two-week "sprint" engages a different immersive, theatricalized context, asking students to envision how the tools utilized therein might illuminate latent aspects of familiar stories. Topics include spatial computing/AR/VR/ XR, immersive theatre, theme parks, and cultural institutions/ museums. Additionally, this course utilizes "critical making" as an epistemology, wherein the site of knowledge creation is the process of devising an object, tool, performance, or installation in conversation with a discipline's critical apparatus. Accordingly, course-long projects will find students selecting and using immersive tools-digital, analog, or both-to radically adapt a familiar story, broadly construed. Importantly, while technological skills are welcome, they are not required. Students are encouraged to envision gloriously and scope effectively as they design a hypothetical or prototyped research project and complementary critical engagement. This course may be repeated for credit for students who wish to design and execute a more robust project.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 394W Writing For and About the Theater

In this course, students will learn to write for and about the theater, exploring different forms of dramaturgical and scholarly research as well as journalistic and academic writing. To build skills in both critical analysis and synthesis, students will learn how the key elements of the playwright's text (e.g., language, character, plot, setting) work to create meaning within the work of dramatic literature and how theatre-makers use the various "languages" of the stage (e.g., costume/scenic/lighting design, music, acting) to give expression to an overarching interpretation of the play. Because research is essential to this course, students will learn how to access a variety of library resources by working closely with our subject librarians. By the end of the semester, students will have assembled a portfolio consisting of both journalistic and academic performance reviews, a dossier of dramaturgical research, and a research-based scholarly paper.

L15 Drama 3950 American Musical Film

Film musicals were crucial to the success of the American film industry from the dawn of sound film in the late 1920s to the demise of the studio system in the late 1950s. This course examines the American film musical from a variety of aesthetic, critical, and historical perspectives, with particular attention to how the genre interacted with popular music and dance and the major political and social trends of the Thirties, Forties, and Fifties. Required screenings.

L15 Drama 396 History of Western Costume

Of particular interest to fashion, history, anthropology, and performing arts majors, this course is an exploration into the clothing worn by predominantly Western cultures from Ancient Greece through the 1890s. Lectures incorporating images of extant garments, sculpture, art, and photographs will inspire discussion regarding the influences on fashion evolution and the cyclical nature of fashion. Assessment is by exam, the first of which is on the fourth class meeting, so this is not a recommended course to "shop." Please note that this course is a prerequisite for History of Western Costume in the 20th Century, which is offered in the spring semester.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC BU: HUM EN: H

L15 Drama 3961 History of Western Costume in the 20th Century

History of Western Costume in the 20th Century is a continuation of the themes explored in Drama 396 (History of Western Costume from Ancient Greece Through the 19th Century). Ideally, students will have already taken Drama 396 before enrolling in this course. This is a fast-moving, lecture-style course that examines objects of human apparel from 1900 through the present and analyzes the causes of fashion evolution throughout the 20th century. Students will explore the influence and aesthetics of major designers, and they will observe and discuss the ways in which contemporary interpretations of the past are modified to comply with contemporary modes and expectations. Assessment is through exams and evaluation of a presentation to the class.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC BU: HUM EN: H

L15 Drama 3975 Wolves of Wall Street: American Business and Popular Culture

America's perceptions about Big Business and the Free Enterprise system have evolved and changed over time from the 1920s to the present. During the 1980s, for example, Oliver Stone's *Wall Street* seemed to endorse the notion that "greed is good." Today, however, the topic of rising income inequality has been connected with the collapse of prestigious Wall Street firms, the "housing bubble," a declining middle class, and widespread fear about the future of "The American Dream."

This new course examines a variety of artistic, ethical and historical perceptions about American Business as depicted in popular culture and the arts over the past hundred years. How have America's foremost artists (among them F. Scott Fitzgerald, Eugene O'Neill, Arthur Miller, Martin Scorsese), dealt with questions of conspicuous consumption, the acquisition of capital for its own sake, and the disparity between rich and poor? We survey several artistic genres and artistic forms, including American tragic works like *The Great Gatsby* and *Death of a Salesman*, to popular musicals such as *How to Succeed in Business without Really Trying* and *The Producers*. Same as L98 AMCS 3975

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 400 Theatrical Rendering for Scenery

An exploration of media and rendering techniques used for presentation of design ideas in scenery. A variety of stage sets, still lifes and figure drawing are rendered during a two-hour studio format with some additional studio time required. Materials are provided by students.

Credit 3 units.

L15 Drama 4001 Computer-Assisted Design for the Theater

This course is an in-depth study of how computers can assist designers in drafting and rendering processes. Primary study is focused on the program Vectorworks. We fully explore the use of this program in development of scenic and lighting design projects from basic line drawings to fully rendered 3D images. Other programs covered are Autocad, Google Sketch Up, AG132, Photoshop CS3 and some lighting design previsualization software. Projects are centered on theatrical applications and based on students' imaginations.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 4011 Staging Atrocity: Theater of the Holocaust

Responding to the Holocaust has challenged artists working in every medium. Nowhere are these challenges more extreme than in the theater, where the intimacy of the space, the close proximity of live actors and audience, and the subject matter itself may serve to intensify its effect. We will read a careful selection of modern and contemporary dramas and explore the range of responses. Underneath each weekly topic reverberate the nagging question of whether one can — or should — make art from the Holocaust, as well as a serious exploration of the uses and effectiveness of theater to communicate on this subject. We look at the ways in which the Holocaust has been used as a subject to raise moral dilemmas, examine the limits of humanity, elicit doubt or faith, and provide political commentary. We will also discuss the ways in which playwrights have stretched the limits of the theater to meet the challenge of staging the Holocaust. Topics considered include the nationalization and personalization of the Holocaust, the role of the second generation, issues of audience, and the use of experimental forms and obscenity. The plays on the syllabus are from North America, Israel and Europe. All readings are in English (original or translation).

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 403 Dramaturgical Workshop

A laboratory course that investigates dramaturgy from four vantage points: New Play Dramaturgy, Institutional Dramaturgy, Dramaturgy of Classics and Dramaturgical Approaches to Nontraditional and Devised Theater. This is a "hands-on" course where student dramaturges not only pursue the study of dramaturgy, but work actively and collaboratively with playwrights, actors and each other. Prerequisite: Drama 343.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM

L15 Drama 4031 Black and White in American Drama

This course addresses the complex issue of race in America through the 19th and 20th centuries as dramatized by American playwrights, black and white. Authors include Countee Cullen, Lillian Hellman, Eugene O'Neill, Jean Toomer, Langston Hughes and Arthur Miller. Prerequisites: junior standing, two 300-level courses or better.

Same as L14 E Lit 403

Credit 3 units. Art: HUM

L15 Drama 404 Topics for Writers: Beckett

Waiting for Godot, *Happy Days*, *Krapp's Last Tape*: These are but three of Samuel Beckett's revolutionary texts for theater. The complete canon of plays are examined for structure and compositional elements. Students undertake exercises in dramatic composition and perform a chamber presentation of *Endgame*. Course is intended for writers with some experience of the dramatic form. Intending students *must* interview with instructor Nov. 12-14.

Same as L14 E Lit 404

Credit 3 units. Art: HUM

L15 Drama 4081 Theater for Social Change

Drawing upon the principles and teachings of Brazilian director Augusto Boal, students explore ways of effecting positive social change in a theatrical context. Students study the aesthetic of Boal's *Theatre of the Oppressed* and learn various games and exercises designed to mine issues of social (in)justice. Using Boal's techniques of "image" and "forum" theater, students then create and perform plays focused on these issues. This public performance is an interactive event offered for and with the university community. No prior performance training or experience is required for this course.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM EN: H

L15 Drama 4082 Advanced Theater for Social Change

This course is a continuation of exploration begun in Drama 4081, Theater for Social Change: a prerequisite for this advanced course. Students expand from exploring their own experience with oppression to facilitating that exploration with others. Students are introduced to the "Joker" system, developed by Brazilian director Augusto Boal. The Joker is the director of a forum theater event. He leads both the exploration and playmaking phases of the process. In preparation for stepping into this role, students read Paulo Freire's *Pedagogy of the Oppressed*, which gives them a foundation in the power and efficacy of collaborative educational techniques. In addition, students read *Theatre for Living*, Canadian director David Diamond's book detailing his application of Boalian techniques in a less overtly oppressive society. Students begin their practical exploration by first working with one another, learning how to lead exercises and games, followed by an exploration of playmaking and the facilitation of an interactive forum theater

event. The course culminates in an outside project in which each student is placed with a St. Louis area school or social organization. The student applies skills they have acquired throughout the semester by serving as the "Joker" of the workshop. In this role, the student leads the entirety of the workshop process with a selected group exploring ways of effecting positive social change in a theatrical context. The student facilitates exercises with the group that mine a chosen area of oppression with which the group is grappling. The student guides playmaking with the group that highlights this area of oppression. The resulting plays are presented then to the larger school or organization community. This culminating event is an interactive forum theater presentation that the student leads as "Joker."

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: CPSC, HUM EN: H

L15 Drama 409 The Modernist Revolution in the Arts

What is/was Modernism? How did this worldwide phenomenon impact the arts in every genre and medium from the turn of the 20th century to the present? Do we still live in the age of Modernism, or should we consider ours a new, Postmodern age? This course examines these and other questions as they relate to the theater, prose, poetry and the visual arts. Our investigation focuses on most of the major literary and artistic movements, including Naturalism, Impressionism, Symbolism, Surrealism and Expressionism. We examine literary manifestoes that help to illuminate the periods under discussion, as well as look at individual works themselves. Central to our approach in the course is an interdisciplinary perspective. Among the luminaries whose work is considered are Ibsen, Strindberg, Chekhov, Hemingway, Dali, Picasso, Stravinsky, Artaud, Kafka and Beckett.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L15 Drama 410 Advanced Stage Lighting

This course is an advanced course and a continuation of Drama 310 Stage Lighting. Emphasis is placed on cultivating design aesthetics and a further exploration of controlling light in a laboratory and live setting. Students will dive deeper into color theory, light plot development, and ultimately into advanced lighting console programming. The course objectives will cover a wide range of production styles and performance venues within a series of challenging design projects. Prerequisite: L15 310 or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 4101 Lighting Technology

Lighting Technology is an extremely hands-on approach to learning how the top industry designers create major shows and concerts with the most state-of-the-art equipment. We spend a considerable amount of time learning how to use and program robotic/moving lights, LED fixtures and video integration for use in drama, dance, musical and concert settings. The student gains intensive training in the use and programming of the ETC Express, ETC Ion and GrandMA 2 Light consoles with a full range of Vari*Lite robotic fixtures. In addition, the student receives training in Isadora, a very powerful video design program. Prerequisites: Drama 212 and Drama 310.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 412 Advanced Practicum in Technical Theater

Independent Study. Intensive practical experience in scenic design building and painting; lighting design and installation; costume design, coordination and construction; makeup; and audio production. Prerequisites: Drama 212E, credits on at least two productions, and permission of staff.

Credit variable, maximum 3 units.

L15 Drama 4121 Advanced Practicum in Technical Theater: Scene Painting

Exploration of the skills and traditions of theatrical scene painting in a laboratory setting. Projects involve color theory, basic surface treatment techniques, representational depiction and advanced problems. Realized paint work on Performing Arts production is part of the course. Prerequisite: permission of instructor.

Credit 3 units. EN: H

L15 Drama 416 Period Style and Design History

Examination of period styles as they relate to theatrical design and history. Study of architecture, furniture and props from Greek to contemporary periods. Prerequisite: Drama 212E.

Credit 3 units. A&S IQ: HUM Art: HUM

L15 Drama 4224 Acting Styles: Realism to Nonrealism

This course builds on skills in character development and scene study, beginning with psychological realism and then shifting into various forms of nonrealism. Through written analysis and performance, students apply acting techniques that address a variety of playwriting styles. Prerequisites: Drama 240E/2401 and Drama 341/3411. The semester begins with a deepening understanding of psychological realism through the exploration of Anton Chekhov's plays. Focus then shifts to nonrealism with Harold Pinter. The second half of the semester is solidly rooted in nonrealism. Students hone their skills by exploring two more scenes from classical and/or contemporary texts. Additionally, in the final scene, students are encouraged to explore applicable considerations of gender-identity, race, and ethnicity in play and character selection. Prerequisites: Drama 2401 Fundamentals of Acting, Drama 3411 Intermediate Acting This course is open exclusively to seniors and graduate students

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 422A Film Stardom, Performance and Fan Culture

This course focuses on the Hollywood star system. We explore stars in relation to celebrity and consumerism, especially how "stardom" is created by a system that seeks to create effects in film viewers whether conceived as audiences, fans or spectators. We examine the performance element of stardom and its relationship to genre, style and changing film technology. Also of concern is how stars and the discursive construction of stardom intersect with gender representation, race, ideology, sexuality, age, disability, nationality and other points of theoretical interest to and historical inquiry in contemporary film studies. While emphasis is placed on mainstream commercial U.S. cinema, students are encouraged to pursue questions beyond this framework within their own research. Required screenings. Same as L53 Film 422

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

**L15 Drama 4234 Performing Knowledge: Arts Integration
Pedagogy in Theory and Practice**

This course invites students interested in the performing arts to apply their talents to the K-12 classroom through a service-learning component that allows them to develop and implement an arts-integrated curriculum grounded in current research in the cognitive sciences. Divided into four units, the course begins with a survey of recent research in cognitive science that traces the effects of arts-related activities on brain development. The second unit builds upon that theoretical grounding, focusing on a model of arts-integrated pedagogy developed through Harvard University's "Project Zero." The third and fourth units are practice-based, with students developing a lesson plan in a core subject area that incorporates the performing arts. Then — in consultation and collaboration with an Interchange artist-in-residence and a master teacher in the St. Louis or Normandy Public Schools — students implement their curriculum in a K-12 classroom, testing its efficacy as well as the theoretical assumptions upon which it is based. This course is open to all students across campus who have a strong interest and/or background in the arts, and who wish to explore opportunities in service learning.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 4261 Performing the Political in American Dance

This course is an exploration of the politics of performance and the performance of politics through the lens of American dance in the 20th and 21st centuries. Through readings, screenings, and discussions, we will examine the ways in which American dance developed against and alongside political movements in the United States, particularly ones concerning nationalism, race, gender, and human rights. We will also investigate how the lens of dance and choreography offers an expansive means to conceptualize political questions of citizenship and social protest, broadening our understanding of embodied performance. Guided by several key philosophical texts, this course will focus on the concepts necessary for examining the convergence of performance and politics (e.g., representation, ritual, spectacle, body, mimesis, propaganda) while also paying special attention to the politics of funding and censorship that has governed the creation and presentation of dance in the United States. No dance experience is necessary.

Same as L29 Dance 426

L15 Drama 435 Expressionism in the Arts

A close study of expressionism as an international phenomenon in the arts, from the anti-naturalist movements of the 1890s to Hitler's condemnation of expressionism as decadent. The evolution of expressionist theater from Wedekind to Toller and Kaiser and such composers as Schoenberg and Berg; in the visual arts, such groups as Der blaue Reiter and Die Brücke, such independents as Kokoschka; in cinema, such figures as Pabst, Murnau, Von Sternberg and Lang. Prerequisite: Drama 208E, Drama 336 or permission of instructor.

Credit 3 units. Art: HUM

L15 Drama 436 Seminar in Comparative Drama

The course begins with Plato's critique of mimesis and Aristotle's defense, as we read *The Poetics* as a response to Plato. We take some of Aristotle's basic concepts, such as mimesis, plot, character and thought, and attempt to apply them to drama up to the present day. We also consider fundamental elements of both the dramatic text and the dramatic production, such as space, time, dialogue, narrative devices and perspective. Brecht's theory of "epic drama" form the other conceptual pole in the course, opposing Aristotle. Besides these two theorists, other figures include Ben Jonson, Corneille, Dryden, Diderot, Schiller, Hegel, Zola, Artaud and Grotowski. The course, then, has both chronological and thematic axes. Three papers and one oral presentation.

Same as L16 Comp Lit 436

Credit 3 units. Art: HUM

L15 Drama 437 Performing Ghosts: Blackness, Performance, and Archival Erasure

Taking ghost as apparition, metaphor, an imaginary, and type of possession, this course focuses on the intersections between performance, affect theory, and archival practice to investigate how scholars and artists contend with the psychic and affective terrors against blackness. Part of these terrors, the course asserts, happened and is happening in the realm of the affective, ephemeral and archival. Moving across theoretical works, literature and theater, our readings differently query: How can performance enable us to recuperate the lives of those violently erased from the archive? How to imagine embodiment for subjects "tracked" by history, such as black folks whose bodies suggest other forms of pathology, like sexual deviancy, mentally "insanity," and other forms of criminalization? How have attachments to ghosts been used as a methodology to stage and reperform blackness in the past and in the present? And lastly, how can we capture embodiment (or enfleshment) without live bodies? By rethinking "liveness," "absence," "loss" and "remains," the readings and discussions will offer performance as a methodological and analytical infrastructure to conduct historical and/or archival research.

Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: CPSC, HUM BU: BA, HUM EN: H

L15 Drama 4370 Music and Performance

In his 1998 book, *Musicking*, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring

the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater and rock. We examine artists whose work blurs the line between "music" and "theater," including George Clinton, Taylor Mac and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome.

Same as L98 AMCS 4370

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L15 Drama 440 Acting IV

Acting IV synthesizes the student's performance training, creative and scholarly writing skills and knowledge of dramatic literature. The advanced acting student is encouraged to develop and articulate his/her own aesthetic convictions. The course includes intensive solo performance projects, including writing and performing original monologues. Also, significant emphasis is placed on preparing the student for the work of professional acting, including workshops on audition monologues, head shots, resumes, and economic issues. In addition, the students become familiar with various American theater cities, the regional theater system and prominent working theater artists. The course closes with a public performance of the original, scripted and audition material developed over the semester.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 4401 The Creative Artist: Empowering the Actor

In this course, the projects are designed to synthesize the student's theatrical training and experience through solo performance as well as ensemble-based critical support. While the course's performance work is explored through an actor's lens, the class is open to all advanced drama students who meet the prerequisites. Students will be encouraged to develop and articulate their own aesthetic convictions through an examination of the creative process, the development of original solo material, the exploration of the theater profession within the current American and international theatrical climate, the development of new audition pieces, small group presentations and an analysis of plays and other reading assignments. The course closes with a public showcase of the original material written and developed over the semester. Prereq: L15 240E/2401 and 341/3411. This course is open only to seniors and graduate students.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 444 Directing II

Further study in the fundamentals of directing. Emphasis on the director's work with actors, designers and a realized metaphorical concept. Prerequisites: Drama 343 and permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 445 Seminar

Rotating upper-level seminar. Senior seminar normally offered each semester and meant to satisfy the 400-level requirement for the drama major.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 4452 Senior Drama Capstone

This course, which is required for seniors completing the drama major, is team-taught by one PAD faculty member in Theater Arts and one in Theater and Performance Studies. In order to remain responsive to each senior class as well as the particular expertise of the faculty pair, the course is built on a flexible curricular model. Components will include an exploration of contemporary theatre literature and theatre-making, individual and ensemble-based activities, research and critical writing projects. A culminating project that synthesizes the semester's study will be part of the course.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L15 Drama 448 The History of Theater Design

Survey course covering the history of the performance space and the scenic design elements contained within that space. The visual elements and theater architecture of each period are examined in relationship to the art and technology of the time.

Prerequisites: Drama 207C or Drama 208C, and Drama 212E.

Credit 3 units. Art: HUM

L15 Drama 449 Seminar in Dramatic Theory

This course is an in-depth exploration of core works of dramatic theory from the ancient world to the present, and it will introduce texts that enunciate what theater is, has been, and should be. We will study authors' expressions of theater's role in society, their articulations of and responses to anti-theatrical prejudice, and their negotiations of the contradiction of putting "the real" on stage. Other significant themes include accounting for the aesthetic pleasures of drama and theater; theater as a means of educating the citizen; and the relationship between dramatic form and social and political revolution. Moving chronologically, we begin with foundational documents of the ancient world, including Aristotle's "Poetics," Bharata's "Natyasastra," and Horace's "Ars Poetica." The course then progresses through the Middle Ages, the Neoclassical and Romantic eras, and the explosion of fin de siècle avant-gardes. We will also read key texts from beyond the European tradition, including works of dramatic theory written in medieval Japan (Zeami), postcolonial Nigeria (Soyinka), and the millennial, multicultural United States (Parks). Along these same lines, we will also be attuned to transnational exchange and influence, particularly as it appears in the 20th-century theories of Bertolt Brecht, Antonin Artaud, and Konstantin Stanislavsky. Although the course will be focused on efforts to describe and prescribe theories of drama, dramatic genre, and theatrical pleasure, it will also position play scripts alongside the theoretical treatises that guide or are guided by them.

Credit 3 units. A&S IQ: SSC EN: S

L15 Drama 450 Advanced Scenic Design

Advanced projects in scenic design including drafting, rendering, model building, and conception. Prerequisite: Drama 311M, or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 451 Topics in Period Style: Baroque Opera and Neoclassical Style

An exploration of the dynamic interplay between high Baroque culture and the perceived style of the ancient Greeks and Romans. Primary sources used are paintings, sculpture and renderings for Baroque operas, as well as rare artifacts which

exist from that time as these sources relate to classical evidence extant in that period. Secondary sources are journal articles and records of fully staged productions of intervening years. Primary interest is retracing the thought processes of the designers of Baroque opera. Focus is on Purcell's *Dido and Aeneas*, looking at the libretto and its relationship to source texts, both ancient and contemporary, and also its place within the cultural history of the theatre. Projects include: in-class presentations and a research paper or fully realized design project.
Credit 3 units. A&S IQ: HUM

L15 Drama 453 American Drama

Topics in American Drama.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L15 Drama 4530 Presence in Performance: Alexander Technique and Mindful Movement for Performing Artists

This course provides group and individual instruction in principles and methods from Alexander Technique and other somatic arts for training mindful, embodied presence in performance. Mindful movement techniques are widely used by professional dancers, actors, and musicians to enhance performance skill and to address/prevent injury and chronic pain. Through a workshop process of guided learning, students gain awareness of subtle inefficiencies in coordination and balance that cause pain and limit ability. Students gain ability to self-assess and adjust problematic movement patterns to improve freedom and expression. Alexander Technique works at fundamental levels of movement coordination, and its methods are applicable to all performing art genres. Training is tailored to each individual student's needs, skills and goals. This course involves experiential learning supported with related readings, discussion, personal research projects and presentations. Prerequisites: Graduate standing; also open to undergraduate students studying at the 400 level in their discipline with permission of instructor.

Same as L29 Dance 453

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 455 Practicum in Arts Management

Assigned work and projects under faculty supervision in Washington University's Edison Theatre or off-campus cooperating institutions. Prerequisite: permission of instructor.
Credit variable, maximum 3 units.

L15 Drama 456 A Madman in the Theater: The History of Insanity on Stage from Sophocles to Shaffer

The image of the madman and the theme of insanity have been extraordinarily captivating to theater artists from the Greeks to the present. In this course we consider some of the most remarkable examples from the classical period, including Sophocles' *Ajax* and Euripides' *Medea* and *The Bacchae*, and the Renaissance (*Hamlet*, *Othello*, *The Spanish Tragedy*, *The Duchess of Malfi*, *Life is a Dream*). We investigate these works both for what they tell us about the image of the madman in the historical period and culture in which they were written as well as in order to closely examine the texts themselves. We also examine plays from the 19th and 20th centuries, including Buchner's *Woyzeck*, O'Neill's *Emperor Jones*, Anouilh's *The Madwoman of Chaillot*, Miller's *Death of a Salesman* and Shaffer's *Equus*. Finally, the course makes

extensive use of the Performing Arts Department's production of Peter Weiss' extraordinary work *Marat/Sade* and incorporate theoretical writings such as Michael Foucault's *Madness and Civilization* into discussions.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

L15 Drama 459 The Filmed Stage Play

Close textual analyses of stage plays and their film adaptations, examining structural parameters such as space, time point of view, spectator position and performance in the two art forms.

Prerequisite: permission of the instructor.

Credit 3 units.

L15 Drama 460 The Creative Impulse

Developed with the director and designer in mind, this course encourages imaginative theater making by developing the student's own sense of creative confidence and ability, by expanding the source options for artistic inspiration, by recognizing and valuing the synergistic properties of transcendent theater making, and by strengthening the collaborative skills essential to the art. The course includes creativity exercises, comprehensive forms of text analysis, exploration of other art forms, cooperative conceptual projects, and field trips to area productions and museums. Students is expected to complete several individual projects, presentations and research papers, as well as intensive small-group projects. Prerequisite: one of the following courses: Drama 307, 310, 311 or 343.

Credit 3 units. A&S IQ: HUM

L15 Drama 465 The Chinese Theater

This course is a survey of the performance and literary traditions of the Chinese theater from their pre-Tang origins to the present day. The course focuses on three forms: 14th-century zaju plays, 16th- and 17th-century chuanqi plays, and recent films from China, Taiwan, and Hong Kong. Background in either China studies or theater in other cultures recommended. Prerequisite: junior level or above or permission of instructor

Same as L04 Chinese 467

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

L15 Drama 469 Topics in Shakespearean Production

This course examines Shakespeare's comedies in performance. Combining scene work and production history, students gain access to the world of the comedies from a hands-on, theoretical and historical perspective. Prerequisites: Drama 395C or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 4691 Shakespeare and Early Modern Performance

Credit 3 units.

L15 Drama 471 Millinery Design and Construction

A hands-on course exploring the major sewing and patterning techniques used to make hats from a variety of materials in a variety of styles. Students will be required to purchase some of their own materials to create several hats over the course of the semester. Prerequisite: Drama 207 or sewing equivalent or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L15 Drama 473 Advanced Playwriting

This course explores the tendencies and relationship between each individual student writer and the page. Exercises dispel any lingering doctrine that presupposes a certain style of writing. A large part of the class centers around collaborations. The writers write scenes as a final project for an acting class, and also work with two professional actors in an extended writing project that culminates in a script-in-hand presentation. The informal moments between collaborations look at the process beyond the first draft — i.e., the playground of language, nonverbal options, and the maintaining of "the work" through rewrites, readings, workshops and productions. Prerequisite: Drama 227.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L15 Drama 474 Acting Theories

This course explores in depth the major theoretical texts on acting and performance theory. Pertinent philosophical texts, dramatic theories, acting systems and methodologies are studied. The survey operates chronologically from early documents on acting (Greek, Roman, Italian Renaissance) through to modern and contemporary documents that inform acting and acting training today (Stanislavsky, Brecht, Grotowski, Meisner, Spolin, Suzuki). Methodologies and practices of select major stage actors are explored as well. In some cases, directing theories that have had major influence on acting theory are examined.

Credit 3 units. A&S IQ: HUM

L15 Drama 479 Fundamentals of Sound Design

Encompassing both creative and technical aspects of sound in the performing arts, the course gives theoretical knowledge of and practical experience in the following areas: fundamental rules of physics and electronics related to sound, use of standard digital recording studio equipment, "training" of the ear, and basic techniques of sound montage. Students are expected to participate in a variety of conceptual and research-oriented exercises as well as complete several lab projects. Sound-related work on Performing Arts Department productions may be required. Prerequisites: Drama 212 and permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 487 Theater Culture Studies Seminar

Rotating upper-level topics course. Topics come from Theater Culture Studies sequence.

Credit 3 units. A&S IQ: HUM, WI

L15 Drama 491 Staging Illness

"Suddenly some force struck him in the chest and side, making it still harder to breathe, and he fell through the hole and there at the bottom was a light." This quotation, from Tolstoi's story "The Death of Ivan Ilych," offers an example of how artists have employed serious or life-threatening diseases as a means of illuminating both physical suffering and spiritual rebirth. Even as it invades the body and isolates us from our fellow man, illness may offer opportunities for spiritual growth and renewal, serving as an apt metaphor for human survival in times of extremis. In her brilliant essay, "Illness as Metaphor" (1978), Susan Sontag takes issue with how illnesses like tuberculosis were misunderstood or even romanticized during the 19th century in works like Dumas's "Camille" and Puccini's "La Boheme." During the AIDS crisis in the 1980s and 1990s, American artists — particularly theatre artists, whose communities were decimated by the disease — were forced to consider how

this global pandemic impacted their lives, especially at a time when the term AIDS was not even mentioned by the President of the United States. In conjunction with the Performing Arts Department's 25th anniversary production of Tony Kushner's extraordinary play, "Angels in America, Part 1, Millennium Approaches," this new course examines how disease has been a focal point of artistic inquiry over the course of centuries. By examining works that are focused on illness throughout history, the seminar offers both a deeper understanding of and context for Kushner's masterpiece and the AIDS crisis, and it considers how illness has always been an important subject for the investigation of what it means to be fully human.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

L15 Drama 493 Senior Project

Specialized study in a selected area in drama. Required of all drama majors not taking Drama 499. Prerequisite: 15 units of advanced work in drama at the 300 or 400 level.

Credit 3 units.

L15 Drama 497 Performance Theory

This course introduces students to contemporary theories of performance, with "performance" understood as both metaphor and event. From a multidisciplinary perspective, students consider how cultures produce meanings — and, indeed, perform those meanings — to create and/or disrupt their own social coherence. Theories likely to be studied include: J.L. Austin's speech-act theory and its engagement by John Searle and Jacques Derrida; Victor Turner's analysis of ritual as social process and Richard Schechner's use of it to transform "theater studies" into "performance studies;" Erving Goffman's sociology of the self and its relation to a post-structuralist model of subjectivity; Michael Fried's screed against minimalist art and its relation to Happenings, Body Art, Fluxus, and other mid- to late-20th century examples of "performance art;" and Judith Butler's influential revision of Austin's performative in her theory of queer "performativity."

Credit 3 units. A&S IQ: HUM EN: H

L15 Drama 498 Special Topics in Playwriting: Art and Activism

Taught by guest teaching artist, Regina Taylor, playwright, director, stage/screen actor, this course will focus on how art can effect change through personal expression. The monumental cultural shift that is in motion throughout the world will be explored through the specific lens of each student's life. Students will write short pieces and one-act plays that will explore where they are at this moment in time. Works in the class may be added to Regina Taylor's black album mixtape. No playwriting experience necessary. Course open only to juniors, seniors and graduate students.

Credit 3 units. BU: HUM

L15 Drama 499 Study for Honors

Prerequisites: senior standing, a cumulative and a major GPA of 3.5, and permission of the chair of the Performing Arts Department.

Credit variable, maximum 6 units.

L15 Drama 4990 Independent Work

Students may contract with a faculty supervisor for credit for their work on theatrical productions or research. Contracts must be signed by the student and the coordinator of Drama 500 before the student's work on the project commences. Credit and grade option to be determined in each case. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.

Credit variable, maximum 6 units.

L15 Drama 4991 Acting

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.

Credit variable, maximum 3 units.

L15 Drama 4992 Directing

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.

Credit variable, maximum 3 units.

L15 Drama 4993 Technical Theater

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.

Credit variable, maximum 3 units.

L15 Drama 4994 Voice, Speech

Independent study.

Credit variable, maximum 3 units.

L15 Drama 4995 Literature, Theory, Criticism

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.

Credit variable, maximum 3 units.

L15 Drama 4996 Race, Memory, and Performance

This course takes as its starting point the vexing questions of history, memory, and identity that activists, scholars, artists, and others have posed in recent years. What is to be done with the commemorative landscape of monuments and memorials? How do we account for the silences and erasures in archival records? How should histories of racial violence be commemorated?

These are questions that have been taken up in many arenas of civic life, including public art, "living history" tourism, museum studies, and urban planning. They have also been taken up by theater artists and performance artists who use their bodies, narrative, historical fact and, sometimes, fiction to bear witness to the past and to imagine new futures. In this course, we will examine the role of theater and performance in constituting and challenging the historically contingent meanings of "race;" we will also explore how performance of history shapes national narratives. Artists to be explored might include Branden Jacobs-Jenkins, Mary Kathryn Nagle, Dread Scott, Quiara Alegria Hudes, Simone Leigh, and Heidi Schreck. Artistic and/or performance experience is not required. Students will have the opportunity to propose their own commemorative projects; together we will explore whether and how performances of the past can do a certain kind of reparative work necessary for a more equitable future.

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM, VC BU: BA, ETH

Earth and Planetary Sciences

For students interested in studying the world beneath their feet or other worlds farther away, the Department of Earth and Planetary Sciences provides the tools for understanding the processes that shape our planet and other bodies within the solar system. Understanding the Earth system is also the key to addressing many environmental challenges, including climate change, water supply and energy issues. Earth, environmental, and planetary scientists are uniquely poised to help solve some of society's most pressing problems. Because planets are complex systems, Earth and planetary sciences is by necessity an interdisciplinary field. It applies biology, chemistry, physics and math to the investigation of topics such as early life on Earth, the structure of the Earth's deep interior, the nature of contaminant transport, and the surfaces of other planetary bodies.

For students who have developed a passion for the basic sciences and who are looking for a way to study these sciences outside of traditional disciplinary boundaries, Earth and planetary sciences is an ideal choice of major. The department offers majors and minors in Earth Science, Environmental Science, and Planetary Science. All programs offer a range of customization that allows students to focus on topics with the greatest relevance to their academic interests and career plans.

All students have the opportunity to participate in faculty research programs, although this is not required. Many of our students take advantage of these varied research opportunities, which provide them with valuable experience for future employment or for graduate school. Each year, several scientific papers and abstracts are co-authored by undergraduates, and undergraduates have presented papers at many national science meetings.

Department Policies for Majors and Minors

Minimum grade performance: A grade of C- is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry and physics. Courses with grades of D may fulfill the college's 120 total hours requirement, but they do not meet the departmental requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for any course required as a prerequisite to enrolling in advanced or sequential courses.

Transfer credits and University College: Course work completed at another college or university must have prior approval of the department to be used to fulfill major requirements. Courses taken at University College normally

may not be substituted for the courses required for an Earth and planetary sciences major. Written consent from the director of undergraduate studies is required for any such substitutions to apply and must be sought before the course is taken.

Graduate-level courses: All Earth and Planetary Sciences graduate courses (i.e., courses numbered 500 and above) are open to advanced undergraduates with permission of the specific course instructor.

Majors

The Department of Earth and Planetary Sciences offers majors in earth science, environmental science, and planetary science. The curriculum is broad, and the requirements are flexible enough to accommodate diverse needs and interests. Many courses present hands-on, problem-oriented experiences, including ample opportunity for fieldwork, laboratory work, and the use of state-of-the-art computational facilities and research instrumentation. All majors are required to complete certain core courses as well as electives and a capstone experience (<https://eps.wustl.edu/capstone-experiences/>) that must be presented at the Spring EPS Undergraduate Research Symposium.

Note: The following requirements apply to students matriculating in Fall 2022 and later. For earlier requirements, please visit our prior Bulletin pages (<https://bulletin.wustl.edu/prior/>) and consult with the department's director of undergraduate studies.

Requirements for All Majors

Required Core Courses

Students pursuing any Earth and Planetary Sciences major must complete the following courses:

Code	Title	Units
EPSc 202	Introduction to Earth, Environmental, and Planetary Science	3
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 2200 or Math 233 or Math 3200	Elementary Probability and Statistics Calculus III Elementary to Intermediate Statistics and Data Analysis	3
Chem 105	Introductory General Chemistry I	3
Physics 191	Physics I	3

Additional Electives

In addition to the disciplinary elective below, which are specific to each major, students must choose three L19 EPSc elective courses at the 300, 400, or 500 level.

Skills Course

Students must complete one of the following:

Code	Title	Units
EnSt 380	Applications in GIS	3
EnSt 364	Field Methods for Environmental Science	3
EPSc XXX	Geospatial Science	3
EPSc 400	Special Topics	3
EPSc 492	Field Camp	var.; max 6
EPSc 496	Undergraduate Field Geology	3

Capstone Experience

Students completing any Earth and Planetary Sciences major must also build a portfolio of their work from projects completed in courses such as EPSc 496 Undergraduate Field Geology, EnSt 405 Sustainability Exchange: Community and University Practicums, EnSt 539 Interdisciplinary Environmental Clinic or EnSt 452 International Climate Negotiation Seminar; internship experiences; or research. All capstones must be presented at the Spring EPS Undergraduate Research Symposium.

The Major in Earth Science

Students must complete all of the requirements listed above for all majors as well as the following:

Disciplinary Requirements

Students complete the following two courses:

Code	Title	Units
EPSc 340	Minerals, Rocks, Resources and the Environment	4
EPSc 353	Earth Forces	4

Disciplinary Electives

Students select five of the following courses:

Code	Title	Units
EPSc 317	Soil Science	3
EPSc 323	Biogeochemistry	3
EPSc 385	Earth History	3
EPSc 386	The Earth's Climate System	3
EPSc 401	Earth Systems Science	3
EPSc 407	Remote Sensing	3
EPSc 409	Surface Processes	3
EPSc 422	Sedimentary Geology	3
EPSc 428	Hydrology	3
EPSc 437	Igneous & Metamorphic Petrology	4
EPSc 441	Introduction to Geochemistry	3

EPSc 452	Introduction to Seismology	3
EPSc 453	Interior of the Earth	3
EPSc 454	Exploration and Environmental Geophysics	4
EPSc 459	Geodynamics	3
EPSc 460	Introduction to Structural Geology	4
EPSc 486	Paleoclimatology	3

The Major in Environmental Science

Students must complete all of the requirements listed above for all majors as well as the following:

Disciplinary Requirements

Students complete the following two courses:

Code	Title	Units
EPSc 340	Minerals, Rocks, Resources and the Environment	4
or EPSc 353	Earth Forces	
EPSc 342	Environmental Systems	3

Disciplinary Electives

Students select five of the following courses:

Code	Title	Units
Biol 381	Introduction to Ecology	3
Econ 451	Environmental Policy	3
or Pol Sci 2010	Introduction to Environmental Policy	
EECE 101	Introduction to Energy, Environmental and Chemical Engineering	3
EPSc 308	Topics in Environmental Sustainability	3
EPSc 317	Soil Science	3
EPSc 323	Biogeochemistry	3
EPSc 386	The Earth's Climate System	3
EPSc 407	Remote Sensing	3
EPSc 409	Surface Processes	3
EPSc 428	Hydrology	3
EPSc 442	Aqueous Geochemistry	3
EPSc 454	Exploration and Environmental Geophysics	4
EPSc 486	Paleoclimatology	3

The Major in Planetary Science

Students must complete all of the requirements listed above for all majors as well as the following:

Disciplinary Requirements

Students complete the following two courses:

Code	Title	Units
EPSc 340	Minerals, Rocks, Resources and the Environment	4
EPSc 353	Earth Forces	4

Disciplinary Electives

Students select five of the following courses:

Code	Title	Units
EPSc XXX	Planetary Mission Design	3
EPSc 401	Earth Systems Science	3
EPSc 407	Remote Sensing	3
EPSc 437	Igneous & Metamorphic Petrology	4
EPSc 441	Introduction to Geochemistry	3
EPSc 459	Geodynamics	3
EPSc 460	Introduction to Structural Geology	4
EPSc 473	Planetary Geology	3
EPSc 474	Planetary Geochemistry	3
EPSc 567	Planetary Materials	3
EPSc 568	Scientific Exploration of the Moon	3
EPSc 570	Planetary Geophysics & Dynamics	3
EPSc 571	Meteorites	3
EPSc 576	Advanced Planetary Geology: Ice Worlds	3

Minors

Requirements for All Minors

Students pursuing any Earth and Planetary Sciences minor must complete the following course:

Code	Title	Units
EPSc 202	Introduction to Earth, Environmental, and Planetary Science	3

The Minor in Earth Science

Students must complete all of the requirements listed above for all minors as well as the following:

Disciplinary Requirements

Students complete the following two courses:

Code	Title	Units
EPSc 340	Minerals, Rocks, Resources and the Environment	4
EPSc 353	Earth Forces	4

Disciplinary Electives

Students select two of the following courses:

Code	Title	Units
EPSc 317	Soil Science	3
EPSc 323	Biogeochemistry	3
EPSc 385	Earth History	3
EPSc 386	The Earth's Climate System	3
EPSc 401	Earth Systems Science	3
EPSc 407	Remote Sensing	3
EPSc 409	Surface Processes	3
EPSc 422	Sedimentary Geology	3
EPSc 428	Hydrology	3
EPSc 437	Igneous & Metamorphic Petrology	4
EPSc 441	Introduction to Geochemistry	3
EPSc 452	Introduction to Seismology	3
EPSc 453	Interior of the Earth	3
EPSc 454	Exploration and Environmental Geophysics	4
EPSc 459	Geodynamics	3
EPSc 460	Introduction to Structural Geology	4
EPSc 486	Paleoclimatology	3

The Minor in Environmental Science

Students must complete all of the requirements listed above for all minors as well as the following:

Disciplinary Requirements

Students complete the following two courses:

Code	Title	Units
EPSc 340	Minerals, Rocks, Resources and the Environment	4
or EPSc 353	Earth Forces	
EPSc 342	Environmental Systems	3

Disciplinary Electives

Students select two of the following courses:

Code	Title	Units
Biol 381	Introduction to Ecology	3
Econ 451	Environmental Policy	3
or Pol Sci 2010	Introduction to Environmental Policy	
EECE 101	Introduction to Energy, Environmental and Chemical Engineering	3
EPSc 308	Topics in Environmental Sustainability	3
EPSc 317	Soil Science	3
EPSc 323	Biogeochemistry	3
EPSc 386	The Earth's Climate System	3
EPSc 407	Remote Sensing	3
EPSc 409	Surface Processes	3

EPSc 428	Hydrology	3
EPSc 442	Aqueous Geochemistry	3
EPSc 454	Exploration and Environmental Geophysics	4
EPSc 486	Paleoclimatology	3

The Minor in Planetary Science

Students must complete all of the requirements listed above for all minors as well as the following:

Disciplinary Requirements

Students complete the following two courses:

Code	Title	Units
EPSc 340	Minerals, Rocks, Resources and the Environment	4
EPSc 353	Earth Forces	4

Disciplinary Electives

Students select two of the following courses:

Code	Title	Units
EPSc XXX	Planetary Mission Design	3
EPSc 401	Earth Systems Science	3
EPSc 407	Remote Sensing	3
EPSc 437	Igneous & Metamorphic Petrology	4
EPSc 441	Introduction to Geochemistry	3
EPSc 459	Geodynamics	3
EPSc 460	Introduction to Structural Geology	4
EPSc 473	Planetary Geology	3
EPSc 474	Planetary Geochemistry	3
EPSc 567	Planetary Materials	3
EPSc 568	Scientific Exploration of the Moon	3
EPSc 570	Planetary Geophysics & Dynamics	3
EPSc 571	Meteorites	3
EPSc 576	Advanced Planetary Geology: Ice Worlds	3

Courses

Visit online course listings to view semester offerings for L19 EPSc (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L19&crslvl=1:4>).

L19 EPSc 103A Oceanography

Emphasis on geological, chemical and physical oceanography. Topics: topography and origin of ocean basins; origin and composition of sea water; effect of compositional variations on biological productivity; dynamics of water movements, including coastal processes.

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 104 First-Year Seminar: Geology in the Field

This course is designed to develop foundational skills in field geology and Earth science while promoting leadership and teamwork. There are no prerequisites, and the class is suitable for students with little or no academic background in Earth science. Students are not required to have extensive outdoor experience, but they must demonstrate enthusiasm for work in challenging environments. Students will receive training in a variety of geological field methods, including field mapping, sampling protocols, section measurement, and structural identification and analysis. This course is field-intensive, with multiple field exercises during class periods and two or three weekend field trips that will involve camping, caving, and backcountry hiking. This course is primarily suited for students who enjoy working outdoors and who intend to major in Earth and Planetary Sciences, Biology, Anthropology, or Archaeology. Course enrollment preference is given to first-year students. Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 105 First-Year Seminar: Habitable Planets

Why does the Earth have water oceans? Where did our atmosphere come from? Is Earth uniquely habitable among solar system bodies? This course is an exploration of the origins of volatiles such as water and carbon on planetary bodies and of the internal features that help to regulate our planet's surface conditions. The importance of magnetic fields, plate tectonics, and climate feedbacks with respect to the origins and sustenance of life on Earth will be discussed. This course is for first-year, non-transfer students only. Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 106 First-Year Opportunity: Exploring the Planets

Each week a different faculty member presents a lecture or laboratory demonstration relating to recent discoveries in geology and the planetary sciences, or about general topics dealing with volcanism, earthquakes, plate tectonics, geological hazards, fossil life, or earth history. Prerequisite: Freshman standing; or sophomore standing with permission of instructor. Credit/No Credit only. Students attend all lectures and write a short summary of each. Priority for enrollment in this course goes to first-year students. Credit 1 unit. A&S: FYO A&S IQ: NSM Art: NSM

L19 EPSc 108A Oceans and the Atmosphere

Basic concepts of the evolution and physical structures of the Earth's oceans and the atmosphere. Dynamic aspects of the oceans (waves, tides, tsunamis) and atmospheric circulation (weather). Role of biological processes (including anthropogenic) in defining the present oceans and atmosphere. Global climate issues discussed in EPSc 111. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 109A Quantitative Reasoning in Environmental Science

Introduction to practical mathematical methods for understanding environmental aspects of our planet, particularly how the environment changes with time through human interactions. Emphasis on intuitive approaches in devising simple

relationships for understanding quantitative outcomes of natural processes. Introduction to basic statistical methods, including hypothesis testing, and how statistics can be applied to environmental problems.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L19 EPSc 111 Introduction to Global Climate Change in the 21st Century

Global climate and global climate change and their impacts on life and civilization. Integrated view of global climate and the diverse forces that can alter global climate. Historical and potential future consequences of global climate change on human life, our industrial civilization, and its sustainability. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 112 First-Year Seminar: Engineering the Climate

Geoengineering, the deliberate manipulation of the Earth's climate, may be part of a solution to the predicted future global warming. Is this advisable, or even possible? Discussions, lectures and readings used to learn how earth's climate works. Examination of some proposals for altering the climate. Past attempts for deliberate human alteration of natural systems discussed and evaluated. Consideration of geoengineering as an ethical issue. Prerequisite: first-year undergraduate status. Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 118A Geology of National Parks

Survey of geologic processes occurring at the Earth's surface and its interior using national parks and monuments as the prime venue for presentation. Volcanism and mountain-building; the work of streams, glaciers and wind; lake and coastline development; stratigraphy and sedimentation; and Earth history. Material presented in a geographic context, with emphasis on landforms and landscape evolution, relating geology to the development and settlement of the U.S. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 131 Natural Disasters

Examination of the effects of natural hazards on landscapes of the Earth in general, as well as on populated areas specifically, through numerous case studies. Social, economic and political consequences of natural disasters. Locations, particularly in the United States, where disasters are likely to occur in the future. Nature of the hazards and what preparations are possible to minimize damage and the number of casualties. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 140 First-Year Seminar: Geology and Human Health

This course explores the connections between human health and geological processes. Key concepts in geology are introduced as well as the pathways through which natural systems affect human health. A series of case studies will be presented, each describing a specific health hazard and its geological origin. The first set of studies will focus on human health effects associated with windborne exposure to harmful materials, including volcanic emissions, asbestos, dust and aerosols, and the products of coal combustion. The course will then use the topic of mercury, which is emitted into the atmosphere and then accumulates in aquatic systems, to transition to water and soil borne pathways of exposure. This will be followed by case studies exploring water availability and

quality, arsenic in groundwater, with a special emphasis on widespread arsenic poisoning in South and Southeast Asia, lead in mining areas and urban soils, and radon and radioactive materials. Students will conduct team risk assessment projects as well as an individual project.

Credit 3 units. A&S: FYS A&S IQ: NSM Arch: NSM BU: SCI

L19 EPSc 145 Land Dynamics: Case Studies of Environmental Sustainability

This course is designed for first- and second-year students and will use lectures, discussions, GIS-related and computational exercises, and field trips to introduce students to a systems approach for identifying, characterizing, and solving issues associated with environmental degradation. The course will focus on three case studies. The first will cover rapid lake drawdown of Mono Lake in northern California due to engineered diversions and subsequent court-ordered recovery to an environmentally sustainable lake level. The second will focus on unresolved consequences associated with channelization and levee development on the lower Missouri River, which put federal agencies in conflict with one another on how to manage the river and its floodplains. The third will cover past and present Pb-Cu-Zn sulfide mining practices in Missouri and attempts to balance the need for these nonrenewable resources while minimizing environmental consequences.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 171A The Solar System

Survey of the planets and satellites of our solar system. Includes results from Apollo manned missions to the Moon and spacecraft missions to the planets and their major satellites. Present ideas about the age, formation and early history of the sun, Earth and meteorites.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 201 Earth and the Environment

Introduction to the study of the Earth as a dynamic, evolving planet. Emphasis on how internal and surface processes combine to shape the environment. Themes: Earth's interior as revealed by seismic waves; Earth history and global tectonics shown by changes to ocean floors, mountain-building, formation of continents, earthquakes and volcanism; climate history and global biogeochemical cycles, influenced by circulation of atmosphere and oceans, ice ages and human activity. Composition and structure of rocks and minerals. Part of the introductory sequence of courses for all Earth and Planetary Sciences and Environmental Studies majors. Three class hours and one two-hour lab a week.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 202 Introduction to Earth, Environmental, and Planetary Science

Introduction to the Earth, its environment, and its place in the solar system. This course is intended to be a starting point for majors in the Department of Earth and Planetary Sciences, or as a standalone course for students from all interests and backgrounds. Themes for this course include Earth's history; the structure and composition of Earth and other planets; the evolution of Earth's surface; natural hazards; climate history; global biogeochemical cycles; and the solar system. No Prerequisites. Students may not take both EPS 202 and EPS 201 for college credit.

Credit 3 units. A&S IQ: NSM, AN BU: SCI

L19 EPSc 219 Energy and the Environment

Examination of the topic of energy from many human-relevant perspectives. Humans use an enormous amount of energy, at the rate of 18 terawatts. Where does this energy come from? How long will it last? What are the consequences? Examination of energy resources and consumption from scientific, social, economic, and political viewpoints. Relationship of energy to concepts such as heat, work, and power. Energy use by society. Energy sources, pros and cons of use, availability now and in the future. Types, abundance, advantages, challenges of renewable energy sources.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 308 Topics in Environmental Sustainability

Mathematical sustainability models; ocean, atmospheric, wetland, agricultural, hydrological, and energy sustainability; depletion of non-renewable resources; effects of pollution, human population, urban environment. Prerequisite: Chem 111A and Chem 112; or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 317 Soil Science

Physical, chemical, and biological processes that occur within soil systems. Types of soils and their formation. Major components of soil, including soil water, minerals, organic matter, and organisms. Soils in wetlands and arid regions. Mapping of soils and their spatial variability. Cycling of nutrients and contaminants in soils. Sustainable use of soils and their role in climate change. Prerequisites: EPS 201 or 202, EPS 323 or Chem 106 (or AP Chem score of 4); or permission of instructor.

Credit 3 units. A&S IQ: NSM

L19 EPSc 319 Physical Oceanography

Ocean circulation, El Niño, dynamical tides, tsunamis, coastal ocean, enclosed seas, paleo-ocean, sedimentation, ice-atmosphere-ocean interaction, biology-carbon cycle. Prerequisites: Chem 112A, Physics 118A, Math 133; or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 323 Biogeochemistry

Basic concepts of how elements cycle among Earth's crust, oceans, and atmosphere, including perturbations due to human activities. Carbon, nitrogen, phosphorus, sulfur, and water cycles. Isotopic tracers. Feedbacks, forcings, and residence times. Redox cycling and thermodynamics. Biogeochemical box models, and changes in biogeochemical cycles over Earth history. Biogeochemistry of greenhouse gases, biogeochemical feedbacks in the climate system. This course is appropriate for EPS students, engineering students, environmental science majors, and other students with interest in the environmental or geological sciences. Prerequisite: EPS 202 or EECE 101.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 340 Minerals, Rocks, Resources and the Environment

This course is designed for undergraduate majors and minors in the Department of Earth and Planetary Sciences to master fundamentals of mineralogy and their context within sedimentary, metamorphic, and igneous rocks, including an introduction to mineral resources and the role of minerals and mineral resources in current environmental issues. The course will

provide fundamentals of mineralogy and crystallography, important mineral groups, and foundations of sedimentary, metamorphic, and igneous rock systems. It will provide an overview and lab demo of the modern analytical methods used in mineralogy. The course includes lecture (three hours per week) and a lab component (two hours per week). Prerequisites: EPS 201, Chem 105, and Chem 106, or permission of instructor. Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 342 Environmental Systems

Introduction to the science of environmental systems and processes. Exploration of key functions of major environmental systems on land, in rivers and lakes, in air, at sea, and in diverse transitional settings at the boundaries between these environments. Evaluation of the ways in which humans alter and are affected by environmental systems. Interspersed throughout the semester will be a review of the major U.S. laws governing human management of environmental systems as well as case studies of environmental disparities in the St. Louis region. Prerequisites: EPS 201 or 202, or permission of the instructor. Credit 3 units. A&S IQ: NSM, AN

L19 EPSc 353 Earth Forces

This course covers basic concepts regarding the forces that act upon the Earth, how geological materials react to these forces, and the time scale over which they respond. Emphasis is on the physical concepts needed to understand the geodynamical behavior of the Earth over a broad range of length and time scales. The application and interpretation of geophysical methods to probe the interior of the Earth are also discussed. Prerequisite: EPSc 201 (may be taken concurrently), Phys 191, or permission of instructor. The course involves three classroom hours and one two-hour laboratory session each week. Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 385 Earth History

Introduction to the concept of "deep time" and the parallel biological evolutionary and environmental changes that have occurred throughout Earth history. Topics include early evolution of life, rise of atmospheric oxygen, global glaciation, mass extinctions. Prerequisite: EPSc 201 or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 386 The Earth's Climate System

This course introduces an integrative view of the Earth's climate system and its coupled components — the atmosphere, the oceans, the cryosphere, the biosphere, and the geosphere — and how they interact with each other. The goal is to provide the physical scientific background that is needed to understand climate variability and climate change, both natural and anthropogenic. Topics include energy balance; the general circulation of the atmosphere and the oceans; the greenhouse effect; modes of variability, such as El Niño; geologic-scale climate change in the geologic past; climate models; climate change detection and attribution; the projection of future climates; and societal impacts. In addition to lectures, students will gain hands-on experience analyzing and interpreting real datasets through inquiry-based "practicum" exercises and in-class discussions. Prerequisite: EPS 201 or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 390 Independent Study

Independent study for undergraduates, to be supervised by a faculty member. Prerequisite: permission of instructor. Credit to be determined.

Credit variable, maximum 3 units. Art: NSM

L19 EPSc 400 Special Topics

The content of this course varies each time it is offered, as announced by the department. With permission of the adviser, this course may be repeated for credit. Prerequisite: permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 401 Earth Systems Science

This is a quantitative introduction to physical and chemical interactions among the atmosphere, oceans and solid earth.

Topics covered include terrestrial atmospheric chemistry, geochemical cycles, inventories, and reservoirs of carbon, nitrogen, and sulfur, and bulk composition of the Earth.

Prerequisite: EPSc 336 or 352 or permission of instructor or the graduate adviser.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 407 Remote Sensing

This course addresses the use of different parts of the electromagnetic spectrum (visible, ultraviolet, infrared, and radio wavelengths) for the interpretation of the physical and chemical characteristics of the surfaces of Earth and other planets.

Digital image systems and data processing are also discussed. Prerequisite: Phys 192 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 408 Earth's Atmosphere and Global Climate

This course discusses the structure and dynamics of Earth's atmosphere. Other topics include basic factors controlling the global climate of Earth; quantitative aspects of remote sensing of the atmosphere, and remote sensing instrumentation. Prerequisites: Math 233 and Phys 191, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 409 Surface Processes

How do landscapes evolve? This course focuses on the physical processes of erosion and deposition that shape Earth and planetary surfaces. Course aims include the following: (1) understanding emergent landscape patterns; (2) reconstructing past conditions using the sedimentary record; and (3) predicting landscape change under climate scenarios. We will review relevant climatic and tectonic processes, and this will be followed by a detailed discussion of rivers and deltas, hillslopes, weathering, glaciers, and coasts. Two one-day field trips are required.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 410 Earth Remote Sensing Methods and Instrumentation

This course addresses the detection of electromagnetic radiation reflected, scattered, or emitted by components of the Earth system. Topics include the spectroscopy of remote sensing, the interpretation of received radiation via radiative transfer

within a context of real measurements, the theory of instruments and detectors, and the comparison of realized equipment to theoretical models. Prerequisite: Phys 192, Chem 106 (or AP Chem score of 4), Math 233, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 422 Sedimentary Geology

Survey introduction to sedimentary processes and materials, including description, formation, and interpretation. Sedimentary materials account for most of the Earth's crust, and much of our understanding of Earth history comes from their examination. Many of our economic resources, such as coal, oil, and natural gas, and many environmental problems, are related to or derive from sediments. Goals: understanding and identifying sediments and processes and using them to interpret stratigraphic, paleoenvironmental, and tectonic information; obtaining the understanding of sedimentology that is relevant to environmental issues; increasing scientific literacy and critical thinking. Prerequisite: EPSc 201 or permission of instructor. Mandatory field trips.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 428 Hydrology

Survey of principles that govern the flow of water in river and groundwater systems in deep geologic environments. Basic equations of fluid flow, dynamics, and the characteristics of drainage basins, rivers, floods, and important aquifers. Exploitation of ground water systems. Prerequisite: EPSc 353; or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 437 Igneous & Metamorphic Petrology

Classification, origin, mineralogy and geological occurrence of major igneous and metamorphic rocks. Laboratory emphasis on identification of rocks and minerals in hand specimens and in thin sections. Prerequisite: EPSc 352 or permission of instructor. Three class hours and one two-hour laboratory a week.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 441 Introduction to Geochemistry

The application of the principles of nuclear and physical chemistry to problems of the composition and differentiation of the Earth is addressed. This course includes an introduction to nucleosynthesis of the elements, stellar evolution, the periodic properties of the elements, chemical bonding and ionic substitution, geochronology and stable isotope geochemistry, and the age and composition of the Earth, Moon, and meteorites. Prerequisites: EPSc 201 and Chem 106 (or AP Chem score of 4), or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 442 Aqueous Geochemistry

Introduction to the geochemistry of natural waters and the processes that alter their composition. Key principles of aqueous geochemistry are introduced and then used to describe the main controls of the chemistry of pristine and polluted soil, surface, and ground water environments. Topics covered include mineral solubility, complexation, acids and bases, carbonate chemistry, rock weathering and clay formation, adsorption and ion exchange, redox reactions, microbial energetics and redox

zonations, the geochemistry of iron, sulfur, trace elements, and radionuclides, and geochemical kinetics. Geochemical modeling will be introduced. Prerequisites: Chem 106 or 112A; EPS 201 or 202 are recommended.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 443 Methods in Biogeochemistry

Lab-based course to provide theoretical understanding of, and practical experience in, biogeochemistry tools and techniques. Topics introduced through lecture and discussion of classic scientific papers. Hands-on experience applying techniques in the laboratory. Research project, based on data collected using these techniques, required. Students develop understanding of tools used for modern and ancient biogeochemistry research. Hands-on experience with sample preparation, operation of gas source mass spectrometers, and data analysis. Prerequisite: EPSc 323 or permission of instructor.

Credit 3 units. A&S IQ: NSM

L19 EPSc 445 Organic Geochemistry

This course presents an introduction to the composition and analysis of organic material in the environment and geological record. It introduces a molecular- to global-level perspective of organic matter cycling, reactivity, and fluxes; the formation and classification of organic matter, its preservation potential, diagenesis, catagenesis, and kerogen formation; coal, petroleum, and gas formation and accumulation; biomarkers in Earth history; genetics and phylogeny of biomarker compounds; an overview of analytical techniques, including both structural and isotopic aspects; oceanographic and paleoenvironmental applications of organic biomarkers; and contaminants and residue analysis. Prerequisites: EPSc 201 and Chem 106, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 446 Stable Isotope Geochemistry

Applications of equilibrium and kinetic isotope fractionation and material balance principles to the distribution of oxygen and hydrogen isotopes in natural systems. Geothermometry and paleotemperatures, mass spectrometry, isotope hydrology and ice cores, fluid-rock interaction, igneous rocks and meteorites. Prerequisites: EPSc 441 and Math 233, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 452 Introduction to Seismology

Introduction to earthquake and exploration seismology. Seismic wave propagation, data analysis and processing, earthquake mechanisms, seismic constraints on the structure of the Earth, relationship of seismicity to plate tectonics. Prerequisites: EPSc 353 and Math 217, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 453 Interior of the Earth

Composition and temperature of Earth's mantle and core, determined by geophysical methods. Inferences about mantle and core dynamics, especially interactions. Current understanding and history of interior in fields of seismology, geomagnetism, mineral physics, geodynamics. Prerequisite: EPSc 353 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 454 Exploration and Environmental Geophysics

Basic geophysical techniques used in exploration and environmental geophysics, emphasizing seismic and electromagnetic methods. Basic theory, field procedures, and interpretation of data. Use of geophysical instruments on field trips, followed by reduction and analysis of acquired data. Prerequisites: EPSc 353, Phys 191, Math 132; or permission of instructor. Two class hours and one two-hour laboratory a week, and approximately four one-day field trips during the semester. Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 459 Geodynamics

Fundamental physical processes necessary to understand plate tectonics and a variety of geological phenomena. Heat flow, gravity, elasticity and flexure, rheology of Earth materials. Prerequisites: EPSc 353, Math 217; or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 460 Introduction to Structural Geology

The landforms that surround us are being modified constantly by tectonic forces. Structural geology provides a framework for investigating, describing, and quantifying these changes. This course provides an introduction to the structures that form at all scales, from millimeter-sized fractures to plate-boundary-scale rifts. Topics include descriptive analysis of microscopic and macroscopic structures, field methods, the physical bases for rock deformation, and global tectonics. Prerequisites: EPSc 352 and EPSc 353, or permission of instructor. Three hours of lecture and one two-hour laboratory session are required each week. Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 473 Planetary Geology

Discussion of the evolution of the terrestrial planets and the outer-planet satellites as evidenced by the geologic records left on the surfaces of these bodies. Focus on major processes affecting planetary surfaces: impact cratering, volcanism, tectonism, and erosion and sedimentation by wind and water. Prerequisites: EPSc 352 and EPSc 353, or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 474 Planetary Geochemistry

A survey of the geochemistry of the planets and their satellites using data from Earth-based, Earth-orbital and spacecraft observations. Prerequisite: EPSc 352 or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L19 EPSc 486 Paleoclimatology

The history of Earth's changing climates and environments on timescales from decades to millions of years. Key concepts in paleoclimatology include: external factors affecting the climate system (e.g., orbital cycles, volcanic eruptions, greenhouse gases); internal feedbacks, such as with monsoons and the El Niño-Southern Oscillation; abrupt versus gradual change; interactions with the biosphere (including hominins/humans); and comparison to present-day climate change. Current controversies in paleoclimate. EPSc-386 or EPSc-586 (or equivalent), or permission from the instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L19 EPSc 490 Independent Study

Independent study for advanced undergraduates or for graduate students, supervised by a faculty member. Prerequisite: permission of instructor. Credit variable, maximum 12 units.

L19 EPSc 492 Field Camp

Practical methods of data collection and interpretation in Earth and Planetary Sciences. Content may include field-based geologic mapping or laboratory-based studies emphasizing particular analytical tools. Prerequisite: permission of major adviser. Credit variable, maximum 6 units. A&S IQ: NSM

L19 EPSc 493 Internship

Internship experience in Earth and Planetary Sciences, providing learning opportunities with future careers and employers. Direct supervision by approved partner, with oversight by Earth and Planetary Sciences faculty. Prerequisite: permission of major adviser. Credit variable, maximum 6 units.

L19 EPSc 494 Study Abroad

Studies related to Earth and Planetary Sciences conducted with external institutions. Prerequisite: permission of Department Study Abroad Coordinator. Credit variable, maximum 6 units.

L19 EPSc 496 Undergraduate Field Geology

Hands-on application of geological field methods, providing an opportunity for students to synthesize classroom knowledge in a field setting. Students will develop the ability to recognize and analyze Earth processes, and deconstruct complex regional geology. Participation in an extended international field trip during spring break is required. Students must be prepared for an intensive, group-oriented experience. Prerequisite: must be an Earth and Planetary Sciences major and have permission of instructors. Enrollment is limited, and students will be selected through a written application. May be repeated for credit, with instructor permission. Juniors and seniors may use to fulfill Capstone experience. Credit 3 units.

L19 EPSc 498 Undergraduate Research Seminar

Provides an opportunity for advanced undergraduates to synthesize many of the diverse subdisciplines of Earth and Planetary Sciences while focusing on a research topic. Subject changes each offering. Each subject is unique and timely, but broad enough to encompass wide-ranging interests among students. Students conduct original research, make written reports of the results, and make oral presentations of their projects in class. Prerequisite: senior standing or permission of instructor. Credit 3 units. A&S IQ: NSM, WI Art: NSM

L19 EPSc 499 Honors Research

Independent work for undergraduate Honors, supervised by a faculty member. Prerequisites: senior standing, eligibility for Honors and permission of instructor. Credit 3 units.

East Asian Languages and Cultures

The Department of East Asian Languages and Cultures (EALC) offers a major and a minor that allow for cross-cultural and interdisciplinary approaches to the study of East Asia. Students can choose either to focus on one of our three linguistic and cultural traditions — Chinese, Japanese, and Korean — or to explore different traditions and societies by taking courses about multiple regions. Our major opens up career opportunities in diplomacy, business, law, journalism, and higher education, in addition to providing preparation for further study in the relevant languages and cultures. The major entails advanced training in the chosen language and a sound background in the respective literature and culture. Students are encouraged to enhance their cultural knowledge by enrolling in relevant courses offered through other departments and programs such as Anthropology, Art History, Film and Media Studies, History, Global Studies, Performing Arts, and Religious Studies.

The major requires the completion of 24 upper-level units. Specific requirements include one 200-level foundational course, at least two years of language study, and two or more courses in the relevant literary tradition. In addition, prime majors are required to fulfill the EALC capstone requirement and to participate in the EALC Senior Symposium.

The minor requires the completion of 18 units, 9 of which must be at the 300 level or above. Specific requirements include the equivalent of one year of language study and two courses in the relevant literary tradition.

Language Placement: Placement tests are required for all students entering our language programs, with the exception of those students who have had no previous exposure to the language and wish to enroll in the first semester of the first year of instruction. Students who test into second-year Chinese/Japanese/Korean and satisfactorily complete (with a grade of B- or better) at least one semester of language study may petition for 3 units of retroactive credit; students who test into the third-year level or above and satisfactorily complete (with a grade of B- or better) at least one semester of language study may petition for 6 units of retroactive credit. Credit is limited to 3 units for those testing into the second-year level and 6 units for those testing into the third-year level or above. Please note that students with native language proficiency as determined by the language section and students who enroll in courses below their placement level are ineligible for retroactive credit units. Students who misrepresent their language proficiency to gain entrance into a course at the elementary or intermediate level will be dropped from that course.

Majors

The Major in East Asian Languages and Cultures

Total units required: 24 upper-level units (300 level or above)

Prerequisites:

- First and second levels of the chosen language: Modern Chinese, Japanese, or Korean (or the equivalent)
- One Civilization course: Chinese 227C Chinese Civilization, Japan 226C Japanese Civilization, or Korean 223C Korean Civilization

Requirements:

Eight courses for a minimum of 24 advanced units (300 level or above), including the following:

1. One 300-level EALC Topics course: EALC Seminar (EALC 3900; topic varies by semester)
2. Two courses focusing on the premodern era: one course to be chosen from Chinese 341 Early and Imperial Chinese Literature, Japan 332C Japanese Literature: Beginnings to 19th Century, or Korean 370 When Tigers Smoke: Songs and Stories from Traditional Korea

3. Two courses focusing on the modern era: one course to be chosen from Chinese 342 Modern and Contemporary Chinese Literature, Japan 333C The Modern Voice in Japanese Literature, or Korean 352 Literature of Modern and Contemporary Korea
4. One approved 400-level Capstone course (prime majors)
5. Senior Capstone Experience (prime majors): Students may satisfy the capstone requirement in one of two ways, both of which require a presentation at the EALC Senior Symposium, which is held in the spring:
 - a. *Successful completion of a senior honors thesis.* This option, which also entitles the student to Latin Honors, requires a minimum of a 3.65 grade-point average. The thesis is researched and written over two semesters, for a total of 6 units; this is in addition to the 24 upper-level units required for the major.
 - b. *Successful completion of the approved 400-level Capstone seminar course (to be taken during the senior year).* This course may be included among the required upper-level courses for the major. The Capstone course must be an EALC home-based course within the student's area of focus. Writing-intensive courses and language courses cannot fulfill the Capstone requirement.

Concentrations:

EALC majors have the option of concentrating their major requirements in one of three East Asia civilizations:

- Concentration in Chinese
- Concentration in Japanese
- Concentration in Korean

Concentrations recognize a student's proficiency in one language or their extensive knowledge of one East Asia civilization. EALC majors may concentrate in a civilization of East Asia by taking (as part of their major requirement) 15 upper-level units (five courses) in one of the three civilizations (Chinese, Japanese, or Korean) and submitting a concentration form to the department. Students may earn a concentration in one civilization. Upper-level language and study abroad courses may be used to complete a concentration. The successful completion of a concentration will appear on the student's transcript after graduation and may be particularly helpful for students interested in graduate or professional school. The concentration form submission deadline is March 1 of the senior year for spring graduates and November 1 of the senior year for fall graduates.

Additional Notes:

- With advisor approval, students may include two courses in a related area offered outside of the department among the 24 advanced units. (For example, a student may take one course in Film and Media Studies or Art History that focuses on East Asia.)

- At least a B- grade in the language courses is required to continue to the next level. Students must also maintain a B- average in all required courses for the major. Those who do not meet this requirement may either repeat the course(s) in question or earn at least a B- in an approved equivalent course or courses (either during the summer or in a study abroad program).
- Courses for the major and minor may not be taken credit/no credit.
- Up to 6 units of credit may be applied toward the major from one semester abroad, and up to 12 units of credit may be applied from two semesters abroad.
- No more than 3 units of independent study may be counted toward the required 24 upper-level units.
- The 300-level EALC Seminar course and the 400-level Capstone course may also fulfill the premodern or modern requirement.

Minors

The Minor in East Asian Languages and Cultures

Total units required: 18 units

Requirements:

- Two semesters of one of the chosen languages: Chinese, Japanese, or Korean
- One Civilization course: Chinese 227C Chinese Civilization, Japan 226C Japanese Civilization, or Korean 223C Korean Civilization
- One 300-level EALC Topics course: EALC Seminar (EALC 3900; topic varies by semester)
- One course focusing on the premodern era to be chosen from Chinese 341 Early and Imperial Chinese Literature, Japan 332C Japanese Literature: Beginnings to 19th Century, or Korean 370 When Tigers Smoke: Songs and Stories from Traditional Korea
- One course focusing on the modern era to be chosen from Chinese 342 Modern and Contemporary Chinese Literature, Japan 333C The Modern Voice in Japanese Literature, or Korean 352 Literature of Modern and Contemporary Korea
- At least 9 units must be from 300-level courses or above

Additional Notes:

- Students must earn at least a B- or above in language courses to continue to the next level. They must also maintain at least a B- average in all courses taken to fulfill the minor requirements. Students who do not meet this requirement may either repeat the course(s) in question or earn at least a B- in an approved equivalent course or courses (either during the summer or in a study abroad program).

- Courses for the minor may not be taken credit/no credit.
- No more than 3 units of transfer or study abroad non-language courses may be applied to the minor.
- The 300-level EALC Seminar course may also fulfill the premodern or modern requirement.

L81 EALC 1070 Ampersand: A Performative Perspective on Chinese Culture and Identity

This course examines the diversified and rich history of Chinese visual and performance cultures from the Chinese mainland, Taiwan, Hong Kong, and throughout the Chinese diaspora. A collaboration between the East Asian Languages and Cultures and Performing Arts departments, this course explores Chinese cultural narratives in relation to how they have been performed -- on stage in traditional forms of dance-drama, on screen in film, and as lived in the practice of everyday life -- from the late Imperial period to the present. It includes a practice component that introduces the students to movement disciplines such as Tai' Chi and opera, and it allows students to pursue creative assignments such as interview, stage plays, and filmmaking that demonstrate their developing knowledge of historical and contemporary Chinese culture. Building bridges of understanding between the United States and the Republic of China in Taiwan, the course will culminate in a spring break trip to Taiwan. This course is only for first-year, non-transfer students in the Ampersand: Encountering China program.

L81 EALC 144 FYS: Collecting Art/Excluding People: The Contradictions of Chinese Art in U.S. Museums

Tomb raiders, curators, archaeologists, politicians, dealers, and collectors all contributed to the arrival of Chinese art in the United States since the late nineteenth century. But at the same time as Chinese objects arrived in great quantities, Chinese people were actively excluded from the U.S. In this course we consider the contradiction between U.S. enthusiasm for collecting Chinese art and negative U.S. responses to Chinese immigrants, from the 1882 Chinese Exclusion Act to contemporary anti-Asian racism. Through the lens of museums, private collections, and public exhibitions, we study what the movement of Chinese art into the United States says about changes in U.S.-China relations from the nineteenth century through today. No prerequisite: enrollment limited to first-year students.

L81 EALC 150 First-Year Seminar: Exploring East Asian Classics

This first-year seminar introduces students to major works of the Chinese, Korean, and Japanese traditions. Although written centuries in the past, these texts still reverberate with meaning today and offer important means to understand the often chaotic and confusing events occurring daily around us. What is the self? What is the relationship between the individual and society? How do we live an ethical life? What is literature and for whom is it intended? In grappling with these questions, we will directly engage with the texts through close reading and in-class discussion. We will, at the same time, also ask broader questions that concern how knowledge is produced, spread, and consumed: what is a canon? Who are the gatekeepers? What does it mean to approach East Asia through a set of "canonical" texts? Among the texts considered this term will be The Analects, Daodejing, Lotus Sutra, Tale of Genji, Tales of the Heike, Tales of Moonlight and Rain, Samguk yusa, and Memoirs of Lady Hyegyong. This course is for first-year, non-transfer students only.

L81 EALC 270 Sophomore Seminar: U.S.-China Relations: Perceptions and Realities

The United States and China are the two most important global powers today, and the bilateral relationship is one of the most comprehensive, complex, consequential, and competitive major-power relations in the world. The course aims to examine the attitudes, ideas, and values that have shaped the relationship, from the era of colonial expansion in the 1800s to the rise of China as a major political and economic power in the 21st century. Drawing upon visual images, literature, films, policy statements, and other materials, the course will analyze the patterns of perceptions that have informed and shaped the understanding of realities. This course, which uses an interdisciplinary approach, will include discussions and debates from both American and Chinese perspectives.

L81 EALC 2980 Undergraduate Internship in East Asian Languages and Cultures

Students receive credit for a faculty-directed and approved internship. Registration requires the completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities (e.g., eight to ten hours a week for thirteen or fourteen weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Credit/no credit only.

Credit variable, maximum 3 units.

L81 EALC 3166 A History of Modern China

This course explores the 19th- and 20th-century history of China. Its purpose is to provide students with a historical foundation to understand the momentous changes the country underwent during its traumatic transition from an empire to a nation-state. We start the course at the height of the empire's power in the late 18th century, when the Qing dynasty (1637-1912) conquered vast swathes of lands and people in Inner Asia. We then move on to the Qing's troubled relationship with Western capitalism and imperialism in the 19th century, which challenged the economic, social, and ideological structures of the imperial regime, culminating in the emergence of "China" as a nation-state. By situating China's national history within a global context, the course outlines in detail the transformations that took place in the 20th century, from the rise of communism and fascism to the Second World War to Maoism and cultural revolution. We end the semester with yet another major change that took place in the 1980s, when a revolutionary Maoist ideology was replaced with a technocratic regime, the legacies of which are still with us today.

L81 EALC 3211 Contemporary Chinese Popular Culture

With the rise of the Chinese economy and global capitalism, popular culture has proliferated in mainland China in recent years. This course traces the development of Chinese popular and youth culture and society from the 1990s to the present. It also refers back to modern times and ancient Chinese Confucian philosophy for historical background information. The course covers various forms of Chinese popular culture, such as movies, music, television programs, Internet literature, religion,

sports, and food. Students observe primary resources and read academic articles to engage in a multiperspective and multimedia view of present-day China in the age of globalization and East Asian regionalization.

L81 EALC 333 The Modern Voice in Japanese Literature

This survey explores the emerging modern voice in Japanese literature, with emphasis on prose fiction. After a brief introduction to earlier centuries, we focus on the short stories and novels of the 20th century. Among the authors considered are Natsume Soseki, Nagai Kafu, Tanizaki Jun'ichiro, and Nobel laureates Kawabata Yasunari and Oe Kenzaburo.

Discussions center on issues of modernity, gender, and literary self-representation. Fulfills modern literature requirement for EALC degrees. No knowledge of Japanese language required. Same as L05 Japan 333C

L81 EALC 340 Writing New Horizons: Explorers, Envoys, and Other Encounters in Korean Travel Narratives

Whether physical or imagined, travel evokes notions of center, periphery, boundary and identity that shape the world we live in. This seminar course uses travelogues as well as literary, visual and cinematic representations of travels relating to Korea to explore how travel, art and imagination together help constitute one's sense of place. The course approaches travel from three angles. First, it examines writings by Korean authors on domestic, interregional, and international travels from premodern to modern times. Such works offer a frame for tracing conceptualizations of self and other through topics including diaspora, refugee crisis, migrant workers, political exile, prisoners of war, and others. The course also looks at stories of travel to Korea by non-Korean authors in order to see how "Korea" was perceived in various times by people outside the country. Lastly, through imagined journeys typically labelled as "sci-fi" or "fantasy", it examines notions of "truthful" and "realistic," and considers the function of the fantastic and storytelling and their relation to the world we live in. For their final project, students will create a map of real or fictional travels

based on material covered in class. Using Digital Humanities tools such as StoryMaps (ArcGIS), Carto, or MyMaps (Google), they will also produce itineraries and narratives to accompany the maps, and present these results online. Necessary technical assistance will be provided by the GIS team at Olin Library throughout the semester. All reading in English. Prior knowledge of Korean language or culture may be helpful but is not required. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS

L81 EALC 341 Early and Imperial Chinese Literature

An introduction to important genres and themes of Chinese literature through the study of major writers. Brief lectures on the writers' personal, social, intellectual, and historical contexts; most class time will be devoted to student discussions of their masterworks as an avenue for understanding Chinese culture during selected historical periods. Fulfills premodern literature requirement for EALC degrees. No prerequisites; all readings will be in English translation.

L81 EALC 346 Japanese Literature in Translation: Mystery Fiction

In this course we explore the tantalizing, thrilling, and sometimes macabre genre of mystery fiction in Japan. Emerging in the late 19th century, largely in response to the disruptions of industrialization, the mystery genre offered writers a way to make sense of a chaotic, unfamiliar world. The genre has also allowed a means of social critique and radical experimentation. We consider the works of Edogawa Rampo, Matsumoto Seicho, Miyabe Miyuki, Kirino Natsuo, and others. All readings in English. No prior knowledge of Japanese required.

L81 EALC 350 U.S.-China Relations from 1949 to the Present

The United States and China are the two most important global powers today, and the relationship between them is one of the most comprehensive, complex, and consequential major-power relations in the world. The tangled relationship is at times turbulent, and its future remains uncertain. This course studies the bilateral relationship from the Chinese Civil War to the rise of China as a major political and economic power in the 21st century. It invites students to explore the following questions: What have China and the U.S. done to confront or accommodate each other in global politics? How has foreign policy in both countries balanced the often competing goals of state security, economic stability, domestic political order, and international influence? What are the impacts of a rising China on geopolitics in the Asia-Pacific region and on the U.S.'s global leadership in the 21st century? By drawing on scholarship in political and social history and area studies, this course helps students better understand both the historical context and current developments of U.S.-China relations.

Same as L04 Chinese 350

L81 EALC 352 Literature of Modern and Contemporary Korea

This undergraduate course surveys the major writers and works of 20th century Korean literature. During the 20th century Korea went through a radical process of modernization. From its colonization by Japan, to its suffering of a civil war within the cold war order, to its growth into a cultural and economic powerhouse, Korea's historical experience is at once unique and typical of that of a third-world nation. By immersing ourselves in the most distinctive literary voices from Korea, we examine how the Korean experience of modernization was filtered through its cultural production. The course pays special attention to the writers' construction of the self and the nation. How do social categories such as ethnicity, class, gender, and race figure in the varying images of the self? And how do these images relate to the literary vision of the nation? Along the way, students observe the prominent ideas, themes, and genres of Korean literature. This class combines lecture with discussion, in which students are strongly encouraged to participate. All literary texts are in English translation and no previous knowledge of Korean is required.

L81 EALC 365 Topics in Modern Japanese Literature: Mirrors and Masks: Gender and Sexuality in Japanese Literature

This course will ask students to consider presentations of gender and sexuality in Japan throughout its literary history, beginning from its oldest and most foundational text, The Kojiki, and working up through modern literature, including pop culture such as manga and anime. Students will be asked to think critically across centuries by juxtaposing the ancient against the modern, and they will also be asked to critically consider terms like "homosexual," "male," "queer," and a plethora of others as they relate to cultures so temporally, spatially, and philosophically removed from contemporary English-speaking context. How do we conceive of gender across time? What about sexuality? What counts as "queer" in a society with differently structured norms and conceptions of gender and sexuality? What are the dangers of fetishizing the Other and who counts as the Other, especially when taken into consideration alongside popular Orientalist views of East Asia? This class and all readings will be conducted in English, but Japanese versions of applicable readings will also be available through the library.

Same as L05 Japan 365

Credit 3 units. A&S IQ: HUM, LCD BU: HUM

L81 EALC 370 When Tigers Smoke: Songs and Stories from Traditional Korea

This course has two purposes: (1) to introduce major works and topics in Korean classical literature and the cultural world in which they were produced and (2) to explore modern reimaginings of these historical works and events and wider context through contemporary literature and film. The former involves a journey through various genres, including foundation myths, songs, biographies, essays, poetry, fiction, memoirs, letters and oral performance, all produced before the 20th century. For a modern perspective, the course turns to films, dramas, cartoons and short stories, which serve as the basis for discussing the modern recreations of historical events, characters, and Korean culture more broadly. In addition to details of the works themselves, topics will include Korea's place in the context of a Sino-centric world order; the significance of two writing systems, hanmun (literary Chinese) and han'gul (Korean vernacular writing); gender and literary practice; and the dynamic relationship between tradition and creativity. No knowledge of Korean history or language is required. All readings in English.

Same as L51 Korean 370

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L81 EALC 3900 EALC Seminar: East Asian Buddhism

This course traces the expansion of Buddhism from its origins in the Indian subcontinent through China, Korea and Japan, identifying both continuities and local developments as seen in the encounter/clash with preexisting traditions. We will adopt a multidisciplinary approach and explore the history, literature, philosophy, and practice of Buddhism in East Asia. Primary readings (all in English) are drawn from a wide range of genres - canonical scriptures, tale literature, hagiographic narratives, and archeological materials. We will also rely extensively on the rich visual and material heritage of Buddhism, looking at common iconographical motifs, popular deities and their many forms, and the ritual function of Buddhist objects in their respective contexts.

This course is primarily for sophomores and juniors with a major or minor in the Department of East Asian Languages & Cultures. Other students may enroll with permission. No prior coursework on Buddhism or East Asia is required.

Credit 3 units. A&S IQ: HUM, LCD BU: ETH, HUM, IS EN: H

L81 EALC 3901 Mao and the World

Was Mao Zedong an uncompromising tyrant who caused the death of millions, or was he a revolutionary leader who was daring enough to imagine an alternative existence? This course is a close investigation of Mao and his world through a global perspective. The students will be exposed to primary sources written by Mao himself, and they will situate Mao within the turbulent decades of China's engagement with Western colonialism, imperialism, and revolutionary thought in the 20th century. Putting Maoism at the center of world history, students will learn the intimate links between China, Southeast Asia, Africa, and North America, and they will examine in detail how Maoism shaped a variety of political and infrastructural transformations around the world, from the Black Panthers to Tanzanian railroads. By the end of the course, students will have a strong grasp of the contradictions that Mao himself faced throughout his life -- contradictions that changed nothing less than the world itself.

L81 EALC 4035 Chinese Politics

China, one of the few remaining communist states in the world, has not only survived, but also become a global political actor of consequence with the fastest growing economy in the world. What explains China's authoritarian resilience? Why has the CCP thrived while other communist regimes have failed? How has the Chinese Communist Party managed to develop markets and yet keep itself in power? What challenges have the 1978 market reforms brought to the CCP regime? How has China been handling thorny issues such as corruption, pollution, instability in multiethnic border regions, Internet usage in the face of technological change, and COVID-19 pandemic? This course will explore these questions in three parts. It will prepare students with the political economic foundation to conduct research and/or analyze policies in contemporary China.

Same as L97 GS 4035

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS

L81 EALC 420 Nature, Technology, and Medicine in Korea

This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary--or what historians dub "early modern" and "modern." Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and fauna, colonial Koreans became biologists, nurses, and "Edisons," and in North and South Korea, new professionals created distinctive--and in some cases, globally-competitive--regimes of knowing, making, and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be "modern" in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to have taken

Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Course also counts as a EALC capstone course. Prerequisite: junior level or above or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH

L81 EALC 4242 Culture and Politics in the People's Republic of China: New Approaches

This course inquires into the political, ideological, and social frameworks that shaped the cultural production and consumption in the People's Republic of China (PRC). In the realm of literature, film, architecture, and material culture and everyday life, this course pays a close attention to the contestation and negotiation between policy makers, cultural producers, censors, and consumers. Understanding the specific contour of how this process unfolded in China allows us to trace the interplay between culture and politics in the formative years of revolutionary China (1949-1966), high socialism (1966-1978), the reform era (1978-1992), and post-socialist China (1992 to present). The course examines new scholarship in fields of social and cultural history, literary studies, and gender studies; and it explores the ways in which new empirical sources, theoretical frameworks, and research methods reinvestigate and challenge conventional knowledge of the PRC that have been shaped by the rise and fall of Cold War politics, the development of area studies in the U.S., and the evolving U.S.-China relations. Graduate students should be proficient in scholarly Chinese, as they are expected to read scholarly publications and primary materials in Chinese. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

Same as L04 Chinese 4242

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L81 EALC 430 Topics in Chinese Media Culture: Charting Identity in the Digital Age

In contemporary society, global computational media have come to shape the new form and function of identity. As the users of these digital technologies, we have been conscripted into systems of compulsory identification ranging from fingerprint scanning and biometric facial recognition to big data documenting and calculating our age, gender, race, nationality, and even health conditions and shopping preferences. These technologies of identification promise to measure a truthful and core identity from the surface of a human body for the purposes of authentication, verification, and tracking in service of a mixture of commercial, state, and military interests. One dire consequence of the proliferation of these technologies of identification is the failure to recognize non-normative, minoritarian groups, and thereby replicating or even amplifying racial hierarchies, gender stereotypes, social division, and global inequality. This course asks what identity is and what function identity serves in the contemporary society in East Asia and on a global scale. Recognizing the changing scope of "Asia" as a vital concept and method, students will read extensively contemporary works in Asian Studies, Asian-American Studies, critical race and gender theory, and media theory that deal with the intersection of digital media, race and gender, and global socio-political transformation. Alongside these readings, students will explore contemporary films, artworks, social media events, and online activism in China, Hong Kong, Taiwan, and beyond that reflect the questions of technologized identity and subjectivity. The class will also go back to western philosophies of technology, cybernetics, and media theories to rethink how

the universalized prototype of the human (which is a white man) was constructed in scholars' inquiries into mind and body, the self and the other, and the then-new relationship between human and machine. Prerequisites: junior level or above or permission of instructor.

Credit 3 units. A&S IQ: LCD BU: IS

L81 EALC 445 Japanese Fiction: Images of Demonic Women (Writing-Intensive Seminar)

The Meiji Period (1868-1912) in Japan was a time of tumultuous change. During the era Japan made sweeping reforms to its government, educational system, and social structures. Meiji men were encouraged to "modernize" along Western lines, while women were expected to serve as "repositories of the past." Most women prized the elegant traditions and saw these as important markers of cultural identity. But not all were willing to completely abdicate their place in the modernizing impulse. This writing intensive course will examine these women's literary works, paying attention to the way they developed strategies to both "serve the nation" and find an outlet for their own creative voice. Works to consider include the short fiction of Higuchi Ichiyo, Shimizu Shikin, and Tamura Toshiko, the poetry of Yosano Akiko, the essays of Kishida Toshiko, and the translations of Wakamatsu Shizuko. All readings are available in English translation and students need not be familiar with Japanese, though background in Japanese Studies, Women's Studies, or literary studies will be helpful. This is a Writing-Intensive Seminar. Prerequisite: junior level or above or permission of instructor.

L81 EALC 4496 Porcelain and Lacquer Abroad: Europe Encounters Asia

From 1500 to 1800, Europeans primarily used exported porcelains and lacquers to engage with China and Japan, which were neither under colonial control, nor easily accessible by travel. Collected first in *kunstkammern* by rulers and nobles as emblems of power, these initially rare, exotic luxuries retained their prestige even as they became more widely available and explicitly gendered. Combining deep object studies with collectors' case studies from across Europe, this course examines how early modern Europeans used porcelains and lacquers to satisfy their curiosity about and material desire for China and Japan. In addition to practical training in essential primary sources such as inventories, it will also introduce theories of luxury and consumption, gift exchange, cross-cultural interaction, material culture, and the global movement of objects. Prerequisites: L01 111 preferred; one art history course or permission of instructor

L81 EALC 450 Masterworks of Early Japanese Literature: The Tale of Genji and its Afterlives

An intensive study of one of the central texts of classical Japanese literature. Selection of texts rotate among works including: The Tale of Genji, court diaries, poetry anthologies, Noh drama, The Tale of the Heike, *setsuwa* collections, and medieval memoirs. In addition to exploring the historical, literary, and cultural significance of the work from its genesis to the present age, students engage in a close reading of the text and an investigation of the primary theoretical issues and approaches associated with the work both in Japan and abroad. Prior knowledge of early Japanese literature or history is recommended. Texts will be read in English translation. Prerequisite: junior level or above or permission of instructor.

Same as L05 Japan 450

Credit 3 units. A&S IQ: HUM, LCD EN: H

L81 EALC 4510 Urban Culture in Modern China

The narrative of rural crisis and peasant revolution has dominated China's modern history for decades. But there has been a growing interest in China's urban past and present with the increased prominence of cities in China's breathtaking economic development and the opening of municipal archives in post-Mao era. The course aims to introduce students to "conventional wisdoms," new directions, and major debates in the urban history field. Topics include: the urban political economy, the cultural dynamics of modernity, the reconstruction of traditions in the making of modernity, the cultural production and consumption, colonialism and imperialism in the urban setting, nationalism, and reform and revolution. Acknowledging and understanding the nuance and difference in views and interpretations in historical writings (historiography) are essential. The course seeks to develop students' research and analytical skills, such as locating secondary sources, incorporating scholarly interpretations, and developing and sustaining a thesis based on secondary and primary sources in student research. This is an interdisciplinary seminar designed for advanced undergraduates and graduate students. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

L81 EALC 455 Topics in Korean Literature and Culture:**Gender in Korean Literature and Film**

This course looks in depth at issues regarding women and gender in Korean literature and film. While it explores literary and cinematic representations of gender, the main goal of the class is to examine literature and film as sites for the very construction of gender. Readings include contemporary literary and theoretical works, as well as historical texts from the Colonial period (1910-1945) and the Choson dynasty (1392-1910), in order to understand women's issues in the context of historical development. Through textual criticism and theoretical readings, some of the questions to be discussed are: What is "feminine" and "masculine" in Korean culture, and how do they change (if they do)? How do these formations and changes relate to literary and cinematic portraits of gender on one hand and to gendered conceptions of literature and cinema on the other? How do socio-historical circumstances affect representations of gender? All readings are in English. Prior course experience in literature, film, or gender studies recommended. Prerequisite: junior level or above or permission of instructor.

UColl: CD

Economics

The Economics program explores the problems of a modern economy and introduces the methodological tools that economists use. It emphasizes the development of analytical models and their application to important economic, social and political issues, such as inflation, unemployment, taxation, inequality, poverty, pollution, government decision-making and regulation. Our faculty, which is made up of leading teacher-scholars, includes specialists in game theory, microeconomics, macroeconomics, industrial organization, monetary economics, financial economics, and public finance.

The study of economics contributes to a broad liberal arts education and helps students develop superior problem-solving skills. It is an excellent course of study to pursue, whether students plan to enter the workforce after graduation or are considering graduate work in law, engineering or the social sciences. Economics also provides exceptional preparation for careers in business, either immediately after graduation or after

completing master's-level graduate work in business (e.g., MBA, MS Finance). In addition to the introductory and intermediate economic theory courses, courses that have particular relevance for business include Econ 335, Econ 413, Econ 4151, Econ 451, Econ 452 and Econ 467. Economics students with business interests typically complete at least one internship to obtain practical business experience, and it is possible to obtain academic credit for that internship. They should also discuss with their advisors the possibility of taking courses such as accounting in the Olin Business School.

In addition to the Economics major, there are two interdisciplinary majors: Economics & Computer Science and Math & Economics. In each major, students complete the core courses in the respective fields, along with a set of electives that are complementary to both fields. Further information is available in the Majors section (p. 518) of this page. As noted previously, students are strongly encouraged to complete at least one internship and to complement their studies with appropriate course work from the Olin Business School.

Majors

The Major in Economics

Total units required: 37 to 39

Required courses:

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	1-3
or Econ 493	Mathematical Economics	
Math 2200	Elementary Probability and Statistics	3
or Math 3200	Elementary to Intermediate Statistics and Data Analysis	
or Math 3211	Statistics for Data Science I	
or ESE 326	Probability and Statistics for Engineering	
or DAT 120	Managerial Statistics I	
& DAT 121	and Managerial Statistics II	
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 4021	Intermediate Macroeconomic Theory	3
Econ 413	Introduction to Econometrics	3
or Econ 413W	Introduction to Econometrics with Writing	

Elective courses:

Four advanced economics electives (12 units), at least two of which must have an Econ 4011 or Econ 4021 prerequisite.

The Major in Economics and Computer Science

The College of Arts & Sciences and the McKelvey School of Engineering have developed a major that allows students interested in both economics and computer science to combine these two complementary disciplines efficiently, without having to pursue them as two separate majors.

Engineering students who declare this major must fulfill the distribution and all other requirements for the BS in Applied Science degree (p. 1280) in the McKelvey School of Engineering. Arts & Sciences students who declare this major

must fulfill the distribution and all other requirements for an AB degree (p. 1098) in addition to the specific requirements listed below. It is possible to earn the Certificate in Financial Economics in conjunction with this major (prime or second), and interested students should consult with Academic Coordinator Dorothy Petersen (dottie@wustl.edu) in the Department of Economics.

Total units required: 54

Required courses:

Code	Title	Units
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 413	Introduction to Econometrics	3
or Econ 413W	Introduction to Econometrics with Writing	
Math 131	Calculus I (AP credit may satisfy this requirement)	3
Math 132	Calculus II (AP credit may satisfy this requirement)	3
Math 233	Calculus III	3
Math 3200	Elementary to Intermediate Statistics and Data Analysis *	3-6
or Math 2200	Elementary Probability and Statistics	
or Math 3211	Statistics for Data Science I	
or ESE 326	Probability and Statistics for Engineering	
or DAT 120	Managerial Statistics I	
& DAT 121	and Managerial Statistics II	
CSE 131	Introduction to Computer Science	3
CSE 240	Logic and Discrete Mathematics	3
or Math 310	Foundations for Higher Mathematics	
or Math 310W	Foundations for Higher Mathematics with Writing	
CSE 247	Data Structures and Algorithms	3
CSE 347	Analysis of Algorithms	3

*Of these options, Math 3200 is the preferred course.

Elective courses:

- Three 3-unit economics electives drawn from any Econ 4011 prerequisite course, including Econ 4021
 - Economics electives of particular relevance include (but are not limited to) Econ 407 Market Design, Econ 4151 Applied Econometrics, Econ 452 Industrial Organization, Econ 467 Game Theory and Econ 484 Computational Macroeconomics.
- Three 3-unit computer science electives drawn from the list below:

Code	Title	Units
CSE 311A	Introduction to Intelligent Agents Using Science Fiction	3
CSE 330S	Rapid Prototype Development and Creative Programming	3
CSE 332S	Object-Oriented Software Development Laboratory	3
CSE 341T	Parallel and Sequential Algorithms	3
CSE 400E	Independent Study	-6
CSE 411A	AI and Society	3
CSE 412A	Introduction to Artificial Intelligence	3
CSE 416A	Analysis of Network Data	3
CSE 417T	Introduction to Machine Learning (*)	3
or ESE 417	Introduction to Machine Learning and Pattern Classification	
CSE 425S	Programming Systems and Languages	3
CSE 427S	Cloud Computing with Big Data Applications	3
CSE 457A	Introduction to Visualization	3
CSE 514A	Data Mining	3
CSE 516A	Multi-Agent Systems	3
CSE 517A	Machine Learning	3
CSE 518A	Human-in-the-Loop Computation	3
CSE 543T	Algorithms for Nonlinear Optimization	3
CSE 557A	Advanced Visualization	3

*Students planning to complete CSE 517 should try to complete CSE 417T as the prerequisite course.

The Major in Mathematics and Economics

Total units required: 57

Required courses:

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 4021	Intermediate Macroeconomic Theory	3
Econ 413	Introduction to Econometrics	3
or Econ 413W	Introduction to Econometrics with Writing	
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Math 309	Matrix Algebra	3
Math 310	Foundations for Higher Mathematics	3

or Math 310W	Foundations for Higher Mathematics with Writing	
Math 3200	Elementary to Intermediate Statistics and Data Analysis	3
or Math 3211	Statistics for Data Science I	
or Math 493	Probability	

Elective courses:

Majors must complete seven electives, with three in each discipline and one from either department.

In Economics:

One of the three electives can be any economics course with Econ 4011 or Econ 4021 as a prerequisite, including from an approved study abroad program. The other two economics electives must come from the following list:

Code	Title	Units
Econ 404	Behavioral Economics and Experimental Economics	3
Econ 407	Market Design	3
Econ 410	Macroeconomics of Inequality	3
Econ 4151	Applied Econometrics	3
Econ 435	Open Economy Macroeconomics	3
Econ 437	The Economics of Financial Intermediation	3
Econ 445	Public Finance	3
Econ 452	Industrial Organization	3
Econ 460	Urban Economics	3
Econ 467	Game Theory	3
Econ 471	Development Economics	3
Econ 477	Topics in Financial Economics	3
Econ 480	Labor Economics	3
Econ 484	Computational Macroeconomics	3

- With instructor permission, students may use any of the following for economics elective credit: Econ 501, Econ 502, Econ 503, Econ 504, Econ 511, or Econ 513.
- Econ 413 may be taken from an approved study abroad program. Consult with Academic Coordinator Dorothy Petersen in the Department of Economics for more information.

In Mathematics:

For Mathematics, the electives can come from the following list:

Code	Title	Units
Math 410	Introduction to Fourier Series and Integrals	3
Math 415	Partial Differential Equations	3
Math 416	Complex Variables	3
Math 4111	Introduction to Analysis	3

Math 4121	Introduction to Lebesgue Integration	3
Math 429	Linear Algebra	3
Math 439	Linear Statistical Models	3
Math 4392	Advanced Linear Statistical Models	3
Math 449	Numerical Applied Mathematics	3
Math 450	Topics in Applied Mathematics	3
Math 456	Topics in Financial Mathematics	3
Math 459	Bayesian Statistics	3
Math 460	Multivariate Statistical Analysis	3
Math 461	Time Series Analysis	3
Math 462	Mathematical Foundations of Big Data	3
Math 475	Statistical Computation	3
Math 493	Probability (if not completed as a "required" course)	3
Math 494	Mathematical Statistics	3
Math 495	Stochastic Processes	3

Advising, Questions, and Further Considerations:

- Students may declare a prime or a second major in Math + Economics via L24 (Math) or L11 (Econ), and that will determine their major advisor.
- It is possible to earn the Certificate in Financial Economics in conjunction with this major (prime or second).
- It is possible to graduate with Latin Honors or with "English" honors. Students should refer to the departments' websites or consult with either Professor Blake Thornton (bthornton@wustl.edu) in the Department of Mathematics and Statistics or Academic Coordinator Dorothy Petersen (dottie@wustl.edu) in the Department of Economics for more information.
- Substitutions for mathematics courses and study abroad approval for mathematics courses will be determined by the Department of Mathematics and Statistics.
- Substitutions for economics courses and study abroad approval will be determined by Academic Coordinator Dorothy Petersen in the Department of Economics.
- Substitutions for CSE 131 are subject to approval by the McKelvey School of Engineering.

The Certificate in Financial Economics

By completing a specialized set of electives, majors (prime or second, including the joint majors) can earn the Certificate in Financial Economics (<https://economics.wustl.edu/certificate-financial-economics-0/>). More information about the Certificate in Financial Economics can be found on the department website.

Additional Information

Majors must complete Econ 4011, Econ 4021, and the Econ 4011/Econ 4021 prerequisite electives in residence during the fall and spring semesters. *Prerequisites:* The prerequisite courses for Econ 4011 are Econ 1011 and Math 132. In addition, Econ 493 or Math 233 must be taken prior to, or concurrently with, enrollment in Econ 4011. The prerequisite courses for Econ 4021 are Econ 1021 and Econ 4011.

An additional approved substitution for the "statistics" requirement of the majors is DAT 120 AND DAT 121. For the Econ+CSE major and the Math+Econ major, Math 3200 is the preferred course choice. Students who are prime in McKelvey (EN) may use ESE 326 for the "statistics" requirement of any of the majors, and no pre-approval is required.

The upper-level units (300- and 400-level courses) required for the major must be independent of other majors or minors (i.e., upper-level coursework required for a major may not be double-counted for another major or a minor in Arts & Sciences).

Senior Honors: Students are invited during the second semester of their junior year to participate in the honors program during their senior year if they meet certain academic requirements.

More information about the majors, the minors, the course offerings, and the honors program can be found in the Economics Undergraduate Guide (<http://economics.wustl.edu/undergraduate/>), available on the department website and from the department. Students are also encouraged to contact Academic Coordinator Dorothy Petersen (dottie@wustl.edu) with any questions.

Minors

The Minor in General Economics

Economics units required: 15

Required courses:

Code	Title	Units
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 4021	Intermediate Macroeconomic Theory	3
Total Units		12

Elective course: One economics elective having at least Econ 1011 and/or Econ 1021 as a prerequisite course

Prerequisites: The prerequisite courses for Econ 4011 are Econ 1011 and Math 132. In addition, Econ 493 or Math 233 must be taken prior to, or concurrently with, enrollment in Econ 4011. The prerequisite courses for Econ 4021 are Econ 1021 and Econ 4011.

The Minor in Applied Microeconomics

Economics units required: 15

Required courses:

Code	Title	Units
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Total Units		9

Elective courses:

- One economics elective having Econ 4011 as a prerequisite course
- One economics elective having at least Econ 1011 and/or Econ 1021 as a prerequisite course

Prerequisites: The prerequisite courses for Econ 4011 are Econ 1011 and Math 132. In addition, Econ 493 or Math 233 must be taken prior to, or concurrently with, enrollment in Econ 4011.

Courses

Visit online course listings to view semester offerings for L11 Econ (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L11&crslvl=1:4>).

L11 Econ 1011 Introduction to Microeconomics

Determination of prices; distribution of national income; theory of production. For a thorough introduction to economics, Econ 1021 also should be taken.

Credit 3 units. A&S IQ: SSC, AN Arch: NSM, SSC Art: NSM, SSC EN: S

L11 Econ 1021 Introduction to Macroeconomics

Business fluctuations: inflation and recession; monetary and fiscal policy; economic development. For a thorough introduction to economics, Econ 1011 also should be taken.

Credit 3 units. A&S IQ: SSC, AN Arch: NSM, SSC Art: NSM, SSC EN: S

L11 Econ 105 The Endgame of Entrepreneurship: Leveraging Capitalism for Good

Historically, profit has been a key driver of human behavior. In this course, students will learn to take advantage of the profit-seeking motive of capitalism while also learning from the mistakes and unintended consequences capitalism has caused throughout history. Students will apply these learnings toward profit-seeking solutions for the United Nations' Sustainable

Development Goals, which are global challenges that call us to work together with boldness and urgency. We will explore how skills from entrepreneurship and venture creation can be used to improve water, climate, education and gender equality globally and here in St. Louis. In interdisciplinary teams, students will learn how to define a problem; listen to customers, competitors and collaborators; create value; measure impact; and communicate their vision. Bold entrepreneurial spirit and skills learned in this course will guide students in their further studies at Washington University and beyond. This course does not count for Economics major/minor elective credit. This course is for first-year (non-transfer) students only.

Same as I60 BEYOND 105

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, ETH EN: S

L11 Econ 208 First-Year Seminar: Economics and Society

Economics and Society is a first-year seminar open to interested students, without prerequisites of any kind. Two to four topics will be chosen for in-depth discussion during the semester. Possible topics include but are not limited to inequality (domestic and international); globalization (pros/cons); "big banks" and their role in financial crises; wars and national security; health and disease; and capitalism and socialism. The seminar seeks to spread economic literacy among tomorrow's opinion leaders, improve their ability to analyze social issues, help them explain their viewpoint to others, and understand different opinions. (The course cannot be used for economics major/minor credit.)

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L11 Econ 296 Undergraduate TA

In this course, an advanced undergraduate can assist a faculty member in the teaching of an undergraduate Economics class. Students can enroll after their selection by a supervising faculty member, which occurs after an application (on the department website) is submitted and reviewed, perhaps in conjunction with an interview with the supervising faculty member. Students can enroll in only one section per semester. Students will be expected, at a minimum, to attend lectures and hold office hours. Specific grading duties will be determined by the supervising faculty member, in accord with Arts & Sciences policies. The typical number of units earned is 2, with the possibility of a maximum of 3, per semester. This course can be repeated for P/F credit. Prerequisite: instructor permission.

Credit variable, maximum 3 units.

L11 Econ 326 American Economic History

Basic theoretical concepts applied to analyze the changing structure and performance of the American economy from colonial times to the present. Prerequisites: Econ 1011 and 1021.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L11 Econ 328 History of Economic Analysis

The purpose of this course is to introduce students to some of the theories and doctrines that constitute the main paradigms from which economists and policy makers approach the world. Rather than focusing on the whole history of economic thinking, we will focus on practical issues, including questions such as the following: What determines the wage of labor? Why is monopoly considered a bad thing? At what level does an interest rate become usury? We will consider how these questions have been framed and answered at different points in time and in different

cultures. Important components of this course are participation in in-class discussion and essays submitted on the practical issues discussed throughout the semester. Prerequisites: Econ 1011 and Econ 1021.

Credit 3 units. A&S IQ: SSC EN: S

L11 Econ 3311 Financial Markets and Analysis

This course is a rigorous introduction to financial markets, financial institutions, and their purpose and functions in the economy. In financial markets, trade is essentially "money now" for "money in the future." As such, financial decisions must often take into account future events, whether those be related to individual stocks, portfolios, or the market as a whole. This course explores the topics related to the level and structure of interest rates and of stock prices, portfolio choice, basic investment theory, and arbitrage pricing theory, among others. Prerequisites: Econ 1011 and Econ 1021.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 335 Money and Banking

Money and the monetary system; money creation by the banking system; central bank functions; monetary theory and economic policy. Prerequisites: Econ 1011 and Econ 1021.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L11 Econ 348 Economic Realities of the American Dream

Exploration of the realities of economic life in the United States and how they correspond to the American Dream. Interdisciplinary perspectives from economics, sociology and other areas of social inquiry. Emphasis on the consistency between empirical data and different concepts of the American Dream. Specific topics to include sources of economic growth and changing living standards, unemployment, impact of globalization on U.S. citizens, economic mobility, poverty and inequality, and social justice. Prerequisites: Econ 1011 and Econ 1021, or consent of the instructors.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L11 Econ 3501 Political Economy

The course introduces students to the field of political economy. The approach is to apply the economic theory and concepts to political actors and behavior. Students are expected to learn: how economic and political forces may shape the incentives and constraint of political actors (e.g., voters and policy makers); the role of institutions in shaping both political behavior and policy outcomes. Prerequisite: Econ 1011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 352 Health Economics

Analysis of consumer demand for health care, medical technology, and the role of health insurance. Emphasis placed on behavior of the physician (whether he acts as an agent for the consumer or on his own behalf); on the use of paramedics, preventive care, outpatient care, and the general market organization of the health industry. The major concern will be the rising cost of health care and appropriate public policy responses. Prerequisite: Econ 1011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L11 Econ 354 The Economics of Criminal Justice

In this course, we will use the theoretical and empirical tools of economics to study the criminal justice system. By constructing models of how arrest/prosecution/conviction/sentencing/etc. decisions are made, we will evaluate these decisions for errors and especially for bias. We will also see how economists test hypotheses about the criminal justice system using the same types of "natural experiments" they use to study markets. Prerequisites: Econ 1011 and Math 2200.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L11 Econ 380 Labor and the Economy

Economic analysis of labor markets. Theory and policy applications of labor supply and labor demand; explanations of wage and income differentials; migration and immigration; discrimination; labor unions; unemployment. Prerequisite: Econ 1011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 4011 Intermediate Microeconomic Theory

Analytic theory of consumer and producer behavior under perfect and imperfect competition. Coverage of demand theory (indifference curves and utility functions) and preferences under uncertainty, including expected utility and risk aversion. Development of general equilibrium under pure exchange, including the concepts of competitive equilibrium and Pareto efficiency. Discussion of the role of time as it pertains to interest rates, discounting and net present value. Analysis of standard monopoly and simple oligopoly problems. Development of noncooperative game theory, including strategic and extensive-form equilibria and Nash and sub-game perfect equilibria. Thorough training in intermediate theory requires both Econ 4011 and Econ 4021. Prerequisites: Econ 1011, Math 132 and concurrent enrollment in, or prior completion of, either Math 233 or Econ 493 (Mathematical Economics).

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 4021 Intermediate Macroeconomic Theory

National income and labor market measurement. Business cycle facts and consideration of alternative explanations for business cycle phenomena. Development of Solow growth model, along with theories of endogenous growth and an examination of reasons for differences in growth rates across countries. General equilibrium description of firms and consumers in labor and product markets. Implementation of monetary and fiscal policy, and exploration of the impact of policy changes on the macroeconomy. Prerequisites: Econ 1021 and Econ 4011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 404 Behavioral Economics and Experimental Economics

Behavioral economics is an effort to incorporate ideas from psychology into economic models of behavior. We will focus on popular experimental anomalies, including the Allais and Rabin paradoxes, ultimatum bargaining, the centipede and public goods contribution games. We will examine the extent to which these are consistent with standard economic theory and how they may contradict it. The primary focus will be a critical examination of psychological theories of nonstandard preferences including loss aversion, probability weighting, reciprocity, fairness and present bias. Theories of incorrect beliefs and systematic biases such as money illusion and procrastination will be covered. Applications to the current economic crisis will also be discussed. The class will include an

introduction to experimental methods in economics, including hands-on experience in the MISSEL laboratory. A sound grounding in economic theory is essential to the course. You must have successfully completed Econ 4011, and should be acquainted with basic optimization theory, expected utility theory, risk aversion, discounting and basic game theory including dominance, Nash equilibrium and subgame perfection. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 407 Market Design

The objective of this course is to study how to design mechanisms to allocate scarce resources and how to create successful marketplaces. We will primarily consider two topics: (1) two-sided matching markets, such as the National Resident Matching Program and the Kidney Exchange for transplants, and (2) auctions used by Google, Facebook, etc. Time permitting, a third topic will be the problem of designing and regulating market "platforms," such as the e-commerce markets run by eBay, Amazon, and Craigslist, and applications marketplaces run by Apple, Google, etc., as well as the electronic financial trading platforms run by the NYSE. Prerequisite: Econ 4011. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 410 Macroeconomics of Inequality

In this course, we study the driving forces of inequality across countries, across time, and across individuals within a country. We will define and measure inequality using standard measures of economic well-being, such as income, wealth, and consumption of market goods, and we will also consider broader measures such as health outcomes. Historical cross-country data, microdata, and specific case studies will be used to evaluate theories of the sources of inequality. Key variables to be evaluated include physical capital investment, education and human capital investment, technological progress, robotization, international trade, and financial markets, among others. Prerequisites: Econ 4011 and Econ 4021. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 411 Optimization and Economic Theory

An introduction to mathematical optimization and its applications within economics. The course is designed for, and should be taken by, all undergraduates considering graduate study in economics, but all interested students are welcome. Prerequisites: Econ 4011 and Math 309 or permission of the instructor. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 413 Introduction to Econometrics

Course provides a basic working knowledge of econometrics. Topics include: translation of economic theory into statistical models, statistical foundations of econometrics, preregression analysis bivariate and multiple regression techniques, hypothesis testing, multicollinearity, specification error, autocorrelation, errors in variables, identification, and simultaneous estimation. Sections 1 & 2 prerequisites: Econ 1011 & 1021 and Math 2200 or equivalent. Section 3 prerequisites: Econ 4011 and Math 2200 or equivalent. The Friday subsection "A" is for Section 03 only. This subsection is a help session, and attendance is not required. *Please note:* Requests for online registration will be wait listed, and students will be enrolled according to Economics major/minor status and student level (e.g., priority to Level 8 Econ majors). Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 413W Introduction to Econometrics with Writing

Econometrics is the development and application of statistical techniques for the measurement of economic phenomena. This course is a student's initial study of econometric theory and practice. Topics include: translation of economic theory into statistical models, statistical foundations of econometrics, preregression analysis bivariate and multiple regression techniques, hypothesis testing, multicollinearity, specification error, autocorrelation, errors in variables, identification, and simultaneous estimation. The three writing assignments and the final paper will provide students an opportunity to formulate an economic model, estimate the model with appropriate data, and interpret the results. This experience will help students understand how econometrics relates to other upper-level economics courses which focus on theoretical models for how the world operates. Econometrics provides a method of testing the validity of these economic models, and the term paper will improve students' writing skills, giving them a chance to write clearly and concisely about technical material. Prerequisites: Econ 4011 and Math 2200 or equivalent. *Please Note:* Requests for online registration will be wait listed, and students will be enrolled according to economics major/minor status and student level (e.g., priority to Level 8 economics majors). Students should also select the "A" subsection. Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC EN: S

L11 Econ 4151 Applied Econometrics

Introduction to econometrics as it is applied in microeconomics. Emphasis is on hands-on implementation of the models covered in the course. Topics related to the analysis of microeconomic data include cross-section and panel data linear models and robust inference; instrumental variables estimation; simultaneous equation models; models for discrete choice; and truncation, censoring and sample selection models. The Friday "A" subsection is an opportunity to get assistance with the STATA-based assignments, via a TA-led help session. Attendance at the subsection is recommended, but not required. Prerequisites: Econ 4011 and Econ 413. Math 309 is recommended. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 4301 Understanding the Financial Crisis

The global financial crisis of 2007-2009 was the most severe since the Great Depression. The goal of the course is to provide tools to analyze key elements of this crisis. We will move from a corporate finance perspective — to understand the behavior of firms and financial institutions — to a macroeconomic perspective — to make this behavior in aggregate outcomes and policy responses. Topics covered include: the U.S. crisis in historical and international perspective; corporate finance of firms and banks in closed and open economy; monetary and fiscal policy intervention; the open economy dimension of the financial crisis; the European Sovereign Debt crisis. Credit 3 units. A&S IQ: SSC Arch: SSC Art: FAAM, SSC EN: S

L11 Econ 432 Economics of Public Policy

This course will cover the logic underlying the economics and politics of public policies concerning issues such as international trade, monetary policy, fiscal policy, market reforms, pollution control, economic inequality and the welfare state more generally. The general question we will address, using specific cases, is that of the role of markets and government in an economy. The course relies heavily on the concepts and methods of microeconomics and macroeconomics. There are many theories of how economic policies work and considerable

debate as to what can be done and what should be done. We will examine the facts (past and present) and then examine the theories and their explanatory power. We will also organize the class into research groups that will address specific economic policies issues. Prerequisite: Econ 4011.
Credit 3 units. A&S IQ: SSC EN: S

L11 Econ 435 Open Economy Macroeconomics

This course begins with a review of international trade theory, of the balance of payment accounts, and their relationship to international borrowing and lending. We then study the asset approach to exchange rates determination, exchange rate behavior in the short and in the long run, and the relationship of exchange rates with prices and output. The course also explores monetary and fiscal policy under both fixed and floating exchange rates, macroeconomic policy coordination and optimum currency areas, international debt problems of developing countries, and their relation to stabilization program. Prerequisite: Econ 4021.
Credit 3 units. A&S IQ: SSC Art: SSC BU: IS EN: S

L11 Econ 437 The Economics of Financial Intermediation

The structure and the role of banks have changed tremendously. The historically-traditional activity of granting loans and collecting deposits has evolved into a much richer and more complex set of financial contracts. The separation between financial asset trading activity and traditional commercial bank activity that was typical of the financial system in the period after the World War II also disappeared. Coincident with the evolution of financial institutions was the development of the asymmetric information model. The role of banks in the economy can be explained with the tools developed in these models of the economics of information, as a microeconomic theory of banking does not exist when information is symmetric and markets are complete. The economics of information literature is also used to explain the evolution of financial institutions and markets, and to understand the consequences of that evolution for economic outcomes (such as economic development and financial crises) and for monetary policy choices (such as central bank interventions, regulations and changes in the payments system). Prerequisite: Econ 4011; Econ 4021 recommended, but not required.
Credit 3 units. A&S IQ: SSC EN: S

L11 Econ 444 Innovation and Intellectual Property: Theory and Practice

Innovation — figuring out better and cheaper ways of satisfying human desires — is the key to improving our well-being. It is not patient saving and accumulation that makes us so much better off than we used to be: capital accumulation is only the conduit through which the innovation juices flow. The question is: What drives it? How come some societies are apparently much more innovative than others? How come we have the impression that most useful inventions took place in the past three centuries? Are there policies that help fostering innovation and others that hurt? The course tries to address these questions. Economists have many theories of innovation, some better than others. We look at the theories, we examine the facts (past and present), then we go back to the theories and reconsider their explanatory power. With this background, we approach the debate about intellectual property, what it is and what it is not good for, whose interests it serves, and whose well-being it thwarts. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 445 Public Finance

The study of fundamental forms of market failure that provide the economic rationale for government action. The first third of the class examines market failure when an economy contains externalities and public goods and the general nature of public policies that address these issues. The second third addresses particular public policies, with a focus on their intended and unintended consequences and their costs. The final third addresses taxation. Topics include the measurement and evaluation of tax burdens, the federal personal income tax, tax evasion and proposals for fundamental tax reform. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Art: SSC

L11 Econ 448W Current Macroeconomic Issues

Review and extension of macroeconomic models from Econ 4021 from a comparative perspective and use of these models to analyze current macroeconomic and policy issues. Topics include recession and recovery; long-term growth; saving and social security; investment; and monetary policy. Multiple writing assignments that emphasize critical analysis of theoretical perspectives and readings applied to current macroeconomic topics. Assignments are revised to improve logical structure, clarity and style. Enrollment limited to 15 students with priority given to senior economics majors. Prerequisite: Econ 4021. Please note: Requests for online registration are wait-listed.
Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC EN: S

L11 Econ 451 Environmental Policy

Course examines the relationship between environmental economics and environmental policy. The course focuses on air pollution, water pollution and hazardous wastes, with some attention given to biodiversity and global climate change. The course examines critically two prescriptions that economics usually endorses: (1) "balancing" of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; and (2) use of market incentives (e.g., prices, taxes or charges) or "property rights" instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, ETH EN: S

L11 Econ 452 Industrial Organization

Theoretical and empirical analysis of the presence and value of competitive forces in the United States economy. Theories of industrial organization and development of criteria for performance of noncompetitive industries. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 460 Urban Economics

Economic function of the city and the role of the city in a national economy. Local decision making; financing of local government expenditures. An analysis of selected urban problems, such as causes and effects of housing market segregation; decay and abandonment, landlord-tenant relations, crime, and urban transport systems. Prerequisite: Econ 4011.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 467 Game Theory

This course covers advanced applications of Game Theory in economics. Topics include expected utility, strategic-form and extensive-form games with perfect information, Bayesian games, infinitely repeated games, dominance, Nash equilibrium and its refinements. We apply these tools to study strategic situations in industrial organization, auctions, bargaining, voting, and signaling games. Prerequisites: Econ 4011 and Math 2200.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 471 Development Economics

This course investigates issues related to the development of the economics of third-world countries. Topics include economic growth, poverty, corruption, and human capital accumulation, with an emphasis on education and health-related policies.

The course provides an in-depth understanding of the role of the state and the impact of specific public policies designed to encourage development. Empirical examples are drawn from Asia, Latin America, and the African subcontinent. Prerequisites: Econ 4011 and Econ 413 or Econ 413W.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 472 Topics in Growth and Development

This course highlights important empirical facts concerning growth and development in various countries at different development stages. Fundamental growth theory is then provided for explaining these facts systematically and for evaluating the consequences of commonly adopted development policies. Topics vary, but may include population; human capital and labor market development; R&D and innovation; finance and growth; modernization and industrial transformation; world income disparities and poverty problems; institutions and political economy issues; environmental and social factors; and international trade and economic integration. Prerequisites: Econ 4011 and Econ 4021.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 4721 Advanced Topics in Modern Economic Growth

This course studies economic theories that explain the observed patterns of economic development across time and space. What explains the growth of the world economy since the Industrial Revolution? Why are the level and the growth rate of per-capita income so different across countries? What explains the decline of manufacturing, and its growth in the early stages of development? What are the determinants of inequality and risk faced by individuals in different countries? Theories featuring the role of investment in physical and human capital, technology, coordination, financial markets, and environmental variables will be presented. Theories will be evaluated using historical data and detailed case studies. This course is designed to complement Econ 472. Prerequisites: Econ 4011.

Credit 3 units. A&S IQ: SSC EN: S

L11 Econ 477 Topics in Financial Economics

Financial economics is a field of economics in which economic principles are applied to the study of financial markets, corporations, banks, and monetary and central bank policies. Of particular importance are the roles of risk, uncertainty, and time in the allocation of resources. Currently, there are two courses in "Topics in Financial Economics": Asset Pricing and Investments.

The former is generally offered in the fall semester; the latter in the spring. Both may be taken for major or minor credit, and both are elements of the Certificate in Financial Economics.

Prerequisites: Econ 4011, Econ 4021, and Econ 413.

Credit 3 units.

L11 Econ 480 Labor Economics

Economic analysis of labor markets. Theory and evidence on supply of and demand for labor, explanation of wage and income differentials; impact of education on human skills and productivity. Prerequisites: Econ 401 and 413.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 483 Economics of Education

The course involves analysis of the economic and social determinants and consequences of education. Because each person's education is an investment in human capital that allows the individual to contribute to society in a productive way, education becomes a crucial determinant of an economy's ability to achieve high growth with high wages, low unemployment and strong social cohesion. This course addresses three essential topics from the wide-ranging field of the economics of education. The first is demand-side oriented and includes: (1) the measurement of the returns to education in the labor market (human capital theory; the central idea of education as human capital investment); and (2) a characterization of the education production function, which relates the various inputs affecting a student's learning (schools, families, peers, neighborhoods, etc.) to measure outputs including labor market success, graduation rates and standardized test scores. The second important topic involves political economy and the supply side: the financing and provision of education. The third part of the course is devoted to the links between education and economic development, including cross-country differences in schooling, returns to schooling and per-capita income. Prerequisites: Econ 4011, Econ 4021 and Econ 413.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 484 Computational Macroeconomics

This course provides a more in depth look into quantitative methods used in contemporary macroeconomic analysis. We will cover numerical methods used in dynamic optimization. In practice, we will apply these methods to solve two major models used in macroeconomic analysis, using both Excel and Matlab. The Neoclassical Growth Model and its variants are used to study aggregate trends and aggregate effects of government policy. The lifecycle model is used to examine questions involving decision-making over the lifecycle. We will learn how to use empirical observations for the purpose of calibrating model parameters and how to conduct policy evaluation in the context of calibrated models. Our policy evaluation will focus on fiscal policy (taxes) and social security issues. Prerequisites: 4011 and 4021.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 490 Independent Work

Prerequisites: senior standing and permission of the supervising faculty member. Consult Academic Coordinator for further details. Note: This course does not count toward the major or minor in economics.

Credit variable, maximum 6 units.

L11 Econ 493 Mathematical Economics

The objective of this course is to develop the mathematical tools necessary for the study of intermediate micro- and macro-economic theory and the advanced electives in economics. The principal focus will be the calculus of multivariate functions (including total and partial differentiation), unconstrained and constrained optimization of multivariate functions, and implicit and inverse function rules. Time permitting, additional topics will be introduced. Economics majors and minors must take this course (or Math 233) prior to, or concurrently with, Econ 4011. Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L11 Econ 4941 Economic Analysis with Excel

This mini course offers students the opportunity to master the advance functionality of Microsoft Excel, and to apply those skills to common economic, statistical, and financial problems. Even those familiar with the basic functioning of Excel may be surprised to learn how little of its full capability most users access. Though basic functions will be covered, our focus will be on leveraging Excel's more advanced functions, analytical tools, reporting templates, and linking features to manage multiple workbooks, manipulate data across files, automate tasks, and produce publication quality charts, tables, and graphs. In addition to providing hands-on experience using Excel's advanced capabilities, the course is designed to serve as a bridge between introductory econometrics and practical work with real-world datasets. The course will be held in the computer classroom so that students can obtain practical experience preparing data, managing workflow, and presenting results. Added emphasis throughout the course will be placed on examples with applications in economics. Prerequisites: prior completion of, or concurrent enrollment in, Econ 413 (or equivalent). Credit 1.5 units.

L11 Econ 497 Research in Economics

Opportunity to work as part of a research project under faculty supervision. Note: This course does not count toward the major or minor in economics. May be repeated for credit. Credit variable, maximum 3 units. A&S IQ: SSC Art: SSC EN: S

L11 Econ 498 Honors Seminar

Advanced application of economic theory to policy problems. This is the first part of the two-course sequence for seniors writing an honors thesis, and it is taken in the fall semester of the senior year. This course may not be used to satisfy major requirements. Prerequisite: invitation into the "Honors in Economics with Thesis" track of the department's Honors Program. Credit 3 units. A&S IQ: SSC EN: S

L11 Econ 499 Study for Honors

Independent reading and research under faculty direction leading to a Senior Honors Thesis. This is the second part of the two-course sequence for seniors writing an honors thesis, and it is taken in the spring semester of the senior year. This course may not be used to satisfy major requirements. Prerequisite: invitation into the "Honors in Economics with Thesis" track of the department's Honors Program. Credit 3 units.

Education

Whether a student's goal is to teach young minds, discover how humans learn, or better understand educational institutions and policies, the Department of Education at Washington University offers students a chance to explore their interests, develop their skills, and begin their journey to a rewarding career through undergraduate programs in Teacher Education and Educational Studies. Our academic programming views the learning pathway as part of a broader transdisciplinary framework of development and well-being. Conditions associated with education and youth development represent a problem space where persistent engagement and planning across political boundaries, health care providers, youth-serving organizations, and educational institutions are critical. We offer a vibrant student-centered community in which faculty and staff are invested in the mentoring and success of students. Many of our classes are smaller and thus allow for meaningful interactions with the education community.

The Department of Education offers undergraduate majors in Teacher Education with elementary, middle school, and secondary specializations. The elementary, middle school, and secondary teacher education programs are designed to produce teachers who take an inquiry-oriented approach to education. Based upon the belief that teaching is a complex normative and changing activity, teacher education is viewed as an on-going, problem-solving process as opposed to a search for the "one right" answer or "one best" way.

The Department of Education also offers an undergraduate major and minor in Educational Studies for persons interested in the study of educational processes and institutions. Students in the Educational Studies program apply the perspectives and methods of a number of disciplines to questions about educational institutions, educational processes, and the social and cultural factors that affect them.

Majors

The Department of Education offers students a choice between two majors: Teacher Education, which allows students to prepare for careers as teachers, and Educational Studies, which allows students to study educational institutions and their sociocultural contexts and processes. Within the Teacher Education major, there are four specializations from which students can choose: Elementary Teacher Education, Middle School Teacher Education, Secondary Teacher Education, and K-12 Teacher Education.

Requirements for Teacher Education majors: Teacher Education majors should seek admission to a teacher preparation program early in their sophomore year. To be eligible, students must pass an entrance examination mandated by the State of Missouri or prove adequate content knowledge

through ACT scores, and they must have a minimum grade-point average of 3.0 in the content area. In addition, students should contact education department advisor Michele Augustin (maugusti@wustl.edu) as early as possible to ensure that they fulfill College of Arts & Sciences, departmental and professional requirements for certification. Upon completion of the program, a satisfactory records check, and the recommendation of the Washington University Department of Education, the Missouri Department of Elementary and Secondary Education issues a teaching certificate if the student has passed the required Missouri certification exams, has a minimum content area GPA of 3.0, and has no grade lower than a B in required fieldwork or education course work.

The Major in Elementary Teacher Education

Total units required: 48

This major prepares students to teach grades 1 through 6 and may be completed within a four-year undergraduate degree. In addition to the Teacher Education major, students must declare a major or minor in a closely related field of study.

- Students are required to complete the following education courses prior to the professional year:

Code	Title	Units
Educ 313B	Education, Childhood, Adolescence, and Society	3
Educ 314	Sociolinguistics, Literacies, Schools, and Communities	3
Educ 4052	Educational Psychology: A Focus on Teaching and Learning	3
Educ 4053	Educational Psychology Lab: A Focus on Teaching and Learning in School Settings	1
Educ 408	Education and Psychology of Exceptional Children	3
Educ 466	Mathematics for Elementary School Teachers	3
Educ 4681	Teaching Reading in the Elementary School	3
Total Units		19

- Students must enroll in the methods block during the spring of the junior year:

Code	Title	Units
Educ 4731	Elementary School Mathematics	3
Educ 4741	Elementary Science: Content, Curriculum and Instruction	2
Educ 470	Language, Learning and Instruction	3
Educ 4751	Elementary Social Studies: Content, Curriculum and Instruction	2

Educ 4771	Arts and Aesthetics: A Means of Communication	3
Educ 4841	Elementary Methods Field Experience	2
Total Units		15

- Students must enroll in the elementary school teaching block during the fall of senior year:

Code	Title	Units
Educ 4831	The Teaching-Learning Process in the Elementary School	3
Educ 4911	Student Teaching in the Elementary School	var.; max 8
Educ 525	Diagnosis and Correction of Reading Disabilities	3

The Major in Middle School Teacher Education

Total units required: 44

This option prepares students to teach in middle school grades 5 through 9. Students must major in a subject field taught at the middle school level (language arts, science, mathematics or social science) or complete concentrations in two or more content areas while maintaining a 3.0 GPA in those subjects. In addition, students are required to complete the following education courses:

- 3 credits in educational foundations:

Code	Title	Units
Educ 301C	The American School	3
or Educ 453B	Sociology of Education	
or Educ 459F	Philosophies of Education	
or Educ 481W	History of Education in the United States	

- All of the following courses prior to the professional year:

Code	Title	Units
Educ 313B	Education, Childhood, Adolescence, and Society	3
Educ 4052	Educational Psychology: A Focus on Teaching and Learning	3
Educ 4053	Educational Psychology Lab: A Focus on Teaching and Learning in School Settings	1
Educ 408	Education and Psychology of Exceptional Children	3
Educ 4843	Field Experience Seminar	3
Educ 4951	Middle School Philosophy and Organization	2

Educ 4952	Middle School Curriculum and Instruction	3
Educ 5253	Instructional Interventions in Reading for Adolescents and English Language Learners	3

- In addition, middle school teacher certification students must enroll in Educ 4000 as well as the course(s) associated with their chosen content area in the fall of their senior year as indicated below:

Code	Title	Units
Educ 4000	Curriculum and Instruction for Secondary Teachers (Grades 5-9, all content areas)	2
Educ 400E	Curriculum and Instruction in Secondary English (Grades 5-9, content area: Language Arts)	1
Educ 4451	Teaching Writing in School Contexts (Grades 5-9, content area: Language Arts)	3
Educ 400S	Curriculum and Instruction in Secondary Science (Grades 5-9, content area: Science)	1
Educ 400M	Curriculum and Instruction in Secondary Mathematics (Grades 5-9, content area: Mathematics)	1
Educ 40SS	Curriculum and Instruction in Secondary Social Science (Grade 5-9, content area: Social Science)	1

- Students must enroll in the middle school teaching block during the spring of their senior year:

Code	Title	Units
Educ 4821	The Teaching-Learning Process in the Secondary School	3
Educ 4922	Student Teaching in Middle Schools	var.; max 8
Educ 5681	Reading in the Content Areas	3

The middle school teacher education option may be completed in conjunction with the secondary major; all requirements for both must be met, including student teaching at both levels. Students who choose middle school certification will student teach during the spring of their senior year while concurrently taking additional education course work, depending on the option selected. Some education course work will be taken concurrently with student teaching, but that course work will vary depending upon the option selected.

The Major in Secondary Teacher Education

Total units required: 36 to 39

This major prepares students to teach in senior high school grades 9 through 12. Students are required to complete a major in a content area and to maintain a 3.0 GPA in that major. In addition, students are required to complete the following education courses:

- 3 credits of educational foundations:

Code	Title	Units
Educ 301C	The American School	3
or Educ 453B	Sociology of Education	
or Educ 459F	Philosophies of Education	
or Educ 481W	History of Education in the United States	

- All of the following courses prior to the professional year:

Code	Title	Units
Educ 313B	Education, Childhood, Adolescence, and Society	3
Educ 4052	Educational Psychology: A Focus on Teaching and Learning	3
Educ 4053	Educational Psychology Lab: A Focus on Teaching and Learning in School Settings	1
Educ 408	Education and Psychology of Exceptional Children	3
Educ 4843	Field Experience Seminar	3
Educ 5253	Instructional Interventions in Reading for Adolescents and English Language Learners	3

- In addition, secondary teacher certification students must enroll in Educ 4000 as well as the course(s) associated with their chosen content area in the fall of their senior year as indicated below:

Code	Title	Units
Educ 4000	Curriculum and Instruction for Secondary Teachers (Grades 9-12, all content areas)	2
Educ 400E	Curriculum and Instruction in Secondary English (Grades 9-12, content area: English)	1
Educ 4451	Teaching Writing in School Contexts (Grades 9-12, content area: English)	3
Educ 400S	Curriculum and Instruction in Secondary Science (Grades 9-12, content areas: Biology, Chemistry, Earth Science, and Physics)	1

Educ 400M	Curriculum and Instruction in Secondary Mathematics (Grades 9-12, content area: Mathematics)	1
Educ 40SS	Curriculum and Instruction in Secondary Social Science (Grades 9-12, content area: Social Science)	1

- Students must enroll in the secondary school teaching block in the spring of their senior year:

Code	Title	Units
Educ 4821	The Teaching-Learning Process in the Secondary School	3
Educ 492	Student Teaching in the Secondary School	var.; max 8
Educ 5681	Reading in the Content Areas	3

The Major in K-12 Teacher Education

Total units required: 36

This major prepares students to teach in grades K-12 in the areas of art, dance, or world languages, including Latin. Students must complete a major in their content area and maintain a 3.0 GPA in that major. In addition, students are required to complete the following education courses:

- 3 credits of educational foundations:

Code	Title	Units
Educ 301C or Educ 453B or Educ 459F or Educ 481W	The American School Sociology of Education Philosophies of Education History of Education in the United States	3

- All of the following courses prior to the professional year:

Code	Title	Units
Educ 313B	Education, Childhood, Adolescence, and Society	3
Educ 4052	Educational Psychology: A Focus on Teaching and Learning	3
Educ 4053	Educational Psychology Lab: A Focus on Teaching and Learning in School Settings	1
Educ 408	Education and Psychology of Exceptional Children	3
Educ 4821	The Teaching-Learning Process in the Secondary School	3
Educ 4843	Field Experience Seminar	3
Educ 5253	Instructional Interventions in Reading for Adolescents and English Language Learners	3

- In addition, teacher certification students intending to teach in grades K-12 must enroll in Educ 4000 as well as the course(s) associated with their chosen content area in the fall of their senior year as indicated below:

Code	Title	Units
Educ 4000	Curriculum and Instruction for Secondary Teachers (Grades K-12, all content areas)	2
Educ 400L	Curriculum and Instruction in World Languages K-12 (Grades K-12, content area: Foreign Language)	1
Educ 400A	Curriculum and Instruction in Art K-12 (Grades K-12, content area: Art)	1
Educ 5007	Instructional Techniques for Art K-12 (Grades K-12, content area: Art)	3
Educ 400D	Curriculum and Instruction in Dance K-12 (Grades K-12, content area: Dance)	1

- Students must enroll in the secondary school teaching block during the spring of their senior year:

Code	Title	Units
Educ 4821	The Teaching-Learning Process in the Secondary School	3
Educ 494	Student Teaching in Grades K-12	var.; max 8
Educ 5681	Reading in the Content Areas	3

The Major in Educational Studies

Total units required: 24

The Educational Studies program examines and applies the historical, social, cultural, psychological and public policy aspects of educational institutions and educational processes as well as the social and cultural factors that affect them. The program provides an entry point into the study of the multidimensional field of education, analysis, the individual and the collective. By becoming familiar with educational research and writing, students in Educational Studies are expected to develop basic inquiry skills as well as a critical understanding of how educational institutions function, how individuals grow and change, and how social groups are shaped by educational processes. These tools should help students develop the ability to integrate and apply systematic knowledge in order to guide personal action and professional development and to understand and possibly transform social and institutional policy.

The Educational Studies program is appropriate for students who want to enhance their understanding of educational policy and of the educational issues that they may encounter in their careers or face as students, citizens and adults. Many educational studies majors pursue graduate or professional

study; however, this major also prepares students to work in educational, nonprofit and government agencies. Students are strongly encouraged to complete a second major, although this is not required.

Required Courses:

Note: The frequencies of the course offerings are designated by the following symbols:

- (+) Offered every semester in recent years;
- (*) Offered at least once a year in recent years; and
- (-) Offered less frequently in recent years.

- Discipline-Based Study (three courses required):

Code	Title	Units
Educ 304	Educational Psychology (+)	3
Educ 434B	Seminar in Black Social Sciences (-)	3
Educ 453B	Sociology of Education (+)	3
Educ 459F	Philosophies of Education (*)	3
Educ 462	Politics of Education (*)	3
Educ 4621	The Political Economy of Urban Education (-)	3
Educ 481W	History of Education in the United States (*)	3

- Individual Processes of Education (one or two courses required):

Code	Title	Units
Educ 4023	Second Language Acquisition and Technology (*)	3
Educ 4052	Educational Psychology: A Focus on Teaching and Learning (+)	3
Educ 4053	Educational Psychology Lab: A Focus on Teaching and Learning in School Settings (+)	1
Educ 4055	Central Topics in Psychological Research on Teaching and Learning (*)	3
Educ 408	Education and Psychology of Exceptional Children (+)	3
Educ 433W	Complex Learning in Education (*)	3
Educ 461B	The Construction and Experience of Black Adolescence (-)	3
Educ 4692	Reading Across Languages and Cultures: Theory, Research, and Practice (*)	3

- Social Context of Education (one or two courses required):

Code	Title	Units
Educ 301C	The American School (+)	3
Educ 303	Gender and Education (-)	3
Educ 313B	Education, Childhood, Adolescence, and Society (+)	3
Educ 314	Sociolinguistics, Literacies, Schools, and Communities (*)	3
Educ 4033	Video Microanalysis: Methods and Tools (-)	3
Educ 4111	Linguistics and Language Learning (*)	3
Educ 4280	History of Urban Schooling in the United States (-)	3
Educ 4288	Higher Education in American Culture (*)	3
Educ 4289	Neighborhoods, Schools and Social Inequality (*)	3
Educ 4511	Race, Ethnicity, and Culture: Critical Qualitative Understandings of Urban Education (-)	3
Educ 4608	The Education of Black Children and Youth in the United States (-)	3
Educ 489	Education and Public Policy in the United States (*)	3

- **Elective Requirement:** In addition to the six courses (18 credits) completed from the areas of Discipline-Based Study, Individual Processes of Education, and Social Context of Education, students must complete one elective course (3 credits), which may be satisfied with any course listed above. Students may also consult with the Director of Educational Studies regarding additional courses offered by or cross-listed in the education department.
- **Capstone Seminar in Educational Studies** Educ 4999: All majors not writing an educational senior honors thesis are required to enroll in the senior seminar (3 credits). Students read and write papers based on readings and the courses taken to complete the major requirements in the program, and they also complete a research project.

Additional Information

Honors Program: Honors in the Department of Education involves both the demonstration of acquired knowledge and a report on an original research project. Students in either major in the department — Teacher Education or Educational Studies — may pursue honors. The appropriateness of honors work in education for a given student is determined by reference to both GPA and faculty recommendation. Students may be eligible for either the College of Arts and Sciences' Latin Honors Program or departmental honors from the Department of Education.

Students interested in Latin honors work should speak with either the Director of Teacher Education or the Director of Educational Studies about eligibility and requirements as early as sophomore year, or, ideally, during the junior year.

Study Abroad: There are six preapproved sites for semester-long study abroad in Teacher Education and Educational Studies:

1. Danish Institute for Study Abroad (DIS) Copenhagen — Child Development and Diversity Program in Copenhagen, Denmark
2. IES Abroad Amsterdam Semester Program in Amsterdam, Netherlands
3. Trinity College Dublin with IES Abroad in Dublin, Ireland
4. University of Auckland with IES Abroad in Auckland, New Zealand
5. WU in Chile at Pontificia Universidad Catolica de Chile (PUC) (**Note:** This program has a Spanish language prerequisite.)
6. University of Sydney in Sydney, Australia

There are also two preapproved sites for summer study abroad:

1. Summer in Scandinavia Danish Institute for Study Abroad (DIS) program in Copenhagen, Denmark, or Stockholm, Sweden
2. The School for International Training (SIT) Study Abroad Africa: Education and Social Change in Durban, South Africa

Title II: Section 207 of Title II of the Higher Education Act mandates that Washington University's Teacher Education programs (or the Department of Education) make public specific Teacher Education performance data on the Department of Education website (<https://education.wustl.edu/teacher-certification/#anchor-group-10213>).

Minors

The Minor in Educational Studies

Units required: 18

Required courses:

Note: The frequencies of the course offerings are designated by the following symbols:

- **Elective Requirements:** In addition to the four courses (12 credits) completed from the areas of Discipline-Based Study, Individual Processes of Education, and Social Context of Education, students must complete two elective courses (6 credits), which may be satisfied with any of the courses listed above. Students may also consult with the Director of Educational Studies regarding additional courses offered by or cross-listed in the education department.

Courses

Visit online course listings to view semester offerings for L12 Educ (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L12&crslvl=1:4>).

L12 Educ 102 First-Year Seminar: Strengths, Weaknesses, Opportunities, and Threats for 21st-Century Education

This first-year seminar will highlight various aspects of critical topics in K-12 education to consider the current strengths, weaknesses, opportunities, and threats in contemporary K-12 education. This will be primarily a discussion-based course covering topics such as (but not limited to) trauma-informed care and school-based mental health, advancing technology, restorative practices, design schools, and equity in education. The course will provide students with an opportunity to observe a classroom at the P-12 grade level(s) with varied and diverse student populations for the purpose of introduction to and analysis of the culture of schooling and classrooms. Enrollment limited to first-year students.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 102A First-Year Seminar: Metacognating Mario -- Learning and Video Games

Although we often associate education with school-based activity, human beings learn in multiple environments beyond the formal classroom. Video games, while often dismissed as frivolous entertainment, provide one such example of a significant experiential learning context: individual players develop skills in the pursuit of goals, collaborate with each other to advance their theorizing about the game's mechanics, and display deep engagement and persistence in the face of frustration despite a lack of extrinsic rewards. Among the questions encountered in this course will be the following: What kind of understanding is built through game play? How might games teach us about ourselves as learners? In what ways might the skills involved in learning to play a game transfer to learning in other contexts? What pedagogical lessons might teachers take from game designers? Throughout the course, readings and activities will promote the rigorous critical analysis of both games and theories of learning.

L12 Educ 102B First-Year Seminar: Improving Student Success Through Psychological Interventions

One of the most exciting transformations in the social sciences in recent years is the finding that brief psychological exercises can improve important student outcomes for months and years, such as raising school achievement and reducing inequality. These interventions help individuals flourish and help our society live up to its ideals. They address critical psychological questions that people have, like the following: Do people like me belong in this school? Can I learn math? When will I ever use what I am learning in class? In this seminar, we will learn about psychological interventions in education; how they work; how they can cause lasting benefits; their intellectual lineage; how they can be used, adapted, and scaled to address contemporary problems; and challenges and mistakes that can arise in doing so. In addition to learning from classic and contemporary research, students will design their very own intervention and workshop others' efforts. When students have completed this seminar, they will more fully understand the psychological aspect of educational problems and how this can be addressed through rigorous research.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 102C First-Year Seminar: Black Lives Matter and Educational Justice for Black Youth

In the wake of the global uprising against racial injustice, this introductory course examines how schools in the United States can create opportunities for Black youth to thrive. We will examine the schooling experiences of Black children and youth amid pervasive anti-blackness, analyze the relevance of educational models for racial justice, and imagine radical ways that P-16 schools might dismantle white supremacy. This course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 200 Topics in Education

An examination and appraisal of major educational issues, drawing on normative frameworks, empirical research, and analytical literature. Seminar format. Topics vary by semester. Prerequisite: sophomore standing.

Credit 3 units. A&S IQ: SSC Art: SSC BU: HUM EN: S

L12 Educ 203A Introduction to Education: Contradictions and Controversies in School Choice

Drawing from social scientific perspectives, this course surveys educational research and policy in contemporary U.S. society. It considers the relationship among controversial policy issues (e.g., school choice, public school closure, urban redevelopment) and education. Finally, it examines the implications of recent changes in education for social inequality, mobility, and group relations.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 203B Introduction to Education: Disability Law, Policy, and Institutional Implications

This seminar is designed to provide students with a working knowledge of the laws and policies governing disabilities and how they impact governmental, social, economic, political, and educational institutions. This introduction to disabilities is provided from a legal perspective and will appeal to self-motivated students interested in learning more about how disability awareness might impact their everyday lives. Topics for discussion include IDEA, ADA, and Section 504 accommodations and how these laws apply to K-12 schools, higher education, immigration, housing, substance abuse, courts, employment, and access to public transit and public accommodations.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 203C Introduction to Education: Social Inequality, Development, & Early Childhood Education

Education begins long before children are introduced to formal schooling, and factors both internal and external to schools influence children's education. An understanding of the social, political, and economic contexts of families and schools is essential to understanding how social factors impact individuals. Race, class, health, and place exert influence on individual achievement and opportunity throughout the life course. This course will examine such factors as they relate to early developmental outcomes, school readiness skills, later academic achievement, and success in schooling. Course readings and activities will examine the influence of families, neighborhoods, the built environment and health on early childhood development and education and will offer corresponding implications for education policy. This course will examine the complex ecosystem of neighborhoods and schooling and will offer students a broad overview of these themes as we critically examine inequality and education in the United States.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 203D Introduction to Education: Immigrants, Refugees, and English Learners in U.S. Schools

What is the distinction between immigrant, refugee, migrant, and newcomer students in schools? How are their needs similar, and how are they different? Although U.S. schools have historically served multilingual children, many have seen an increase in the racial, ethnic, and language backgrounds of the students they designate as English learners (ELs). As such, educators are still coming to understand how to best support this highly diverse group. In addition to clarifying distinctions between EL and student background classifications, this course will examine: federal, state, and local policies impacting immigrant and refugee student integration into schools, how school practices for several kinds of multilingual students vary, and how existing educational structures can better support designated EL students and their families.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 203E Introduction to Education: Myths and Mysteries of Memory

In this course, we will learn about the science of memory and how it relates to education, broadly construed, by taking a tour through the many ways in which memory influences everyday life. We will cover topics like how to learn effectively, individual differences in memory ability, the effect of trauma on memory, why people are susceptible to misinformation, and how collective

memories shape the way we remember history. In the process of learning about these topics and others, we will critically evaluate widely believed myths about memory, try to explain mysteries of memory, and explore the implications for education in formal and informal contexts. By gaining a better understanding of memory and how it works, you will acquire skills and knowledge that you can apply to your education and life more generally.

Credit 3 units. Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 234 Introduction to Speech, Language, and Hearing Sciences

This course provides an introduction to the fields of speech-language pathology, audiology, the education of hearing-impaired children, and speech and hearing sciences. Normal speech and hearing processes as well as communication disorders are discussed. Selected research topics in speech and hearing sciences will also be presented.

Credit 3 units. BU: BA, SCI EN: S

L12 Educ 299 Internship in Education

Students may receive up to 3 units of credit for an approved, faculty-sponsored internship that relates to the study and application of educational research. Credit is determined by the number of hours worked per the College of Arts & Sciences recommendations. Specific requirements -- which include but are not limited to completion of hours, an essay about the student's experience, and/or informational meetings with other faculty about the student's internship experience -- are set by the faculty supervisor in consultation with the supervisor in the organization where the internship work is completed. Students should complete a learning agreement provided by the department. Open to undergraduate majors and minors in the Department of Education only; register for the section assigned to the faculty supervisor. Prerequisites: completion of the Learning Agreement provided by the department and approval of faculty supervisor. Credit variable, maximum 3 units.

L12 Educ 300 Topics in Education

An examination and appraisal of major educational issues, drawing on normative frameworks, empirical research and analytical literature. Seminar format. Topics vary by semester. Prerequisite: sophomore standing.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA

L12 Educ 301C The American School

In this course, we examine the development of American schooling. Our focus is on three general themes: (1) the differing conceptions of schooling held by some American political, social, and cultural thinkers; (2) the changing relationships among schools and other educational institutions, such as the church and the family; and (3) the policy issues and arguments that have shaped the development of schooling in America.

Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

L12 Educ 303 Gender and Education

An examination of educational experiences, practices, and institutions across multiple levels (PK-university) using gender as a critical lens. Key topics include common beliefs, practices, and expectations related to gender in educational spaces, as well as the intersections between gender and other identities that may influence educational experiences and outcomes. Readings are drawn from multiple disciplines, including sociology, history,

psychology, and philosophy. Students should be prepared to analyze their own gendered educational experiences in the context of the scholarship explored in the course, while also listening respectfully and reflecting on the experiences shared by classmates.

Credit 3 units. A&S IQ: SSC, SD Art: SSC BU: BA EN: S

L12 Educ 304 Educational Psychology

This is a course in psychological concepts relevant to education that is organized around four basic issues: (1) how humans think and learn; (2) how children, adolescents, and adults differ in their cognitive and moral development; (3) the sense in which motivation and intention explain why people act as they do; and (4) how such key human characteristics as intelligence, motivation, and academic achievement can be measured. Offered fall and spring semesters.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 313B Education, Childhood, Adolescence, and Society

This course examines the social and developmental experiences of children and adolescents at the national and international level. Readings will focus on the development of children and adolescents from historical, sociological, psychological, and political perspectives. Students will examine how both internal and external forces impact the developmental stages of children and adolescents. Students will investigate the issues that impact children and adults such as poverty, war, media, schooling, and changes in family structure. Students will explore some of the issues surrounding the education of children such as the effects of high quality preschool on the lives of children from low income families and the connection between poverty and educational achievement. Students will focus on the efficacy of the "safety nets" that are intended to address issues such as nutrition, health, violence, and abuse. Throughout the course, students will review and critique national and international public policy that is designed to address the needs of children and their families throughout the educational process.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 314 Sociolinguistics, Literacies, Schools, and Communities

Literacy learning and development within a thriving community require attention to the linguistic, cultural, and economic diversity of students. Within an era of state standardization and accountability, it is imperative to use a systems approach in education that unites homes, schools, and communities. Differentiating instruction to meet the needs of all students, including English language learners and other traditionally marginalized groups of students, is essential. This course will introduce students to sociocultural theories of literacy across settings. It will prepare students to analyze how race, ethnicity, class, gender, and language influence the development of literacy skills. We will develop a multifaceted view of literacy that is embedded within culture and that acknowledges the influences of social institutions and conditions. We will incorporate strategies for individual student needs based on students' backgrounds and prior experiences to deliver differentiated instruction and to teach students to set learning goals. Offered in fall semester only.

Credit 3 units. A&S IQ: HUM, SC, SD Art: HUM BU: BA EN: H

L12 Educ 325 Psychology of Adolescence

This course concentrates on brain, cognitive, and social development during adolescence. This period of development is marked by transition and change. Special topics will include the vulnerability of the adolescent brain and the development of sexual orientation. Prerequisite: Psych 100B.

Same as L33 Psych 325

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 3885 The Mental Health Crisis in Higher Education

During the last decade, college campuses have seen unprecedented increases in the proportion of students suffering from mental health problems. Many institutions have responded by increasing the number of mental health counselors available in student health centers, making the accommodations at disability resource centers more robust, and providing safe spaces for students to process incidents and events that have triggered them. Are such interventions improving the well-being of today's students, or might they actually be further encumbering students' psychological health? This discussion-based course will explore arguments made on all sides of this provocative debate and examine research on the nature of today's college students and what resources and services most contribute to their psychological health and well-being. Enrollment is limited to 15 students. Prerequisite: at least 6 units of advanced home-based psychology courses.

Same as L33 Psych 3885

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 400 Topics in Education

An examination and appraisal of major educational issues, drawing on normative frameworks, empirical research, and analytical literature. Seminar format. Topics vary by semester. Credit 3 units.

L12 Educ 4000 Curriculum and Instruction for Secondary Teachers

This course provides an in-depth look at secondary curricula and instructional practices to equip teacher candidates across a spectrum of disciplines with the knowledge and skill to implement meaningful teaching and learning in their future classrooms. By drawing from educational research in fields such as history, sociology, philosophy, and psychology, students will examine the foundations of their discipline's curriculum, consider avenues for the implementation of culturally responsive pedagogy, and develop a strong understanding of age-appropriate disciplinary thinking. Note: must be taken concurrently with content-specific lab [L12 400A, 400D, 400E, 400L, 400M, 400S, or 40SS].

Credit 2 units. A&S IQ: HUM

L12 Educ 400A Curriculum and Instruction in Art K-12

This course provides hands-on practice for K-12 teacher candidates in art curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Note: must be taken concurrently with L12 4000 and L12 5007.

Credit 1 unit.

L12 Educ 400D Curriculum and Instruction in Dance K-12

This course provides hands-on practice for K-12 teacher candidates in dance curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Note: must be taken concurrently with L12 4000.

Credit 1 unit.

L12 Educ 400E Curriculum and Instruction in Secondary English

This course provides hands-on practice for secondary teacher candidates in English curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Note: must be taken concurrently with L12 4000 and L12 4451.

Credit 1 unit.

L12 Educ 400L Curriculum and Instruction in World Languages K-12

This course provides hands-on practice for K-12 teacher candidates in world language curriculum, including French, German, Japanese, Latin, Mandarin Chinese, Russian, and/or Spanish, regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Note: must be taken concurrently with L12 4000.

Credit 1 unit.

L12 Educ 400M Curriculum and Instruction in Secondary Mathematics

This course provides hands-on practice for secondary teacher candidates in mathematics curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Note: must be taken concurrently with L12 4000.

Credit 1 unit.

L12 Educ 400S Curriculum and Instruction in Secondary Science

This course provides hands-on practice for secondary teacher candidates in science curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Note: must be taken concurrently with L12 4000.

Credit 1 unit.

L12 Educ 4014 Urban Education in Multiracial Societies

This course offers students an analysis of the historical development and contemporary contexts of urban education in English-speaking, multiracial societies. It examines legal decisions, relevant policy decisions, and salient economic determinants that inform urban systems of education in Western societies including, but not limited to, the United States, Canada, Great Britain, and South Africa. The course draws on quantitative, qualitative, and comparative data as an empirical foundation to provide a basis for a cross-cultural understanding of the formalized and uniform system of public schooling characteristic of education in urban settings. Given the social and material exigencies that shape urban school systems in contemporary societies, special attention is given in this course to the roles of migration, immigration urbanization, criminal justice, industrialism, de-industrialism, and globalization in shaping educational outcomes for diverse students in the aforementioned settings. Prerequisite: junior standing or permission of instructor.

Credit 3 units. EN: S

L12 Educ 4022 Higher Education Administration for Social Justice & Equity: Achievable or Only Dreamable?

Higher education has long been the subject of much general public interest and discourse. Understanding the complexity of the system, its history, practices, and expertise will help define whether and how campuses can work toward social justice and equity. In this course, students will study the history, policies, and organizational decisions that underly the current state of higher education in America. These perspectives and theories will be studied with an eye toward social justice and understanding possible changes that may lead toward equity on American college campuses. Through engaged discussions around readings and case studies, students will tackle complex social questions, including: how our college campuses became so complex? Why pervasive social issues, such as system racism, sexism, and classism, continue to exist on our campuses? How and when technology and the SAT/ACT began to rule our lives in college? Perhaps even deeper, students will grapple with finding alternate, more socially just, and equitable alternatives to create more equity on our campuses.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L12 Educ 4023 Second Language Acquisition and Technology

This seminar for undergraduate and graduate students will transform research and theory about second-language acquisition into practice while focusing on technology-driven applications. The course fosters professional development as participants formulate critical skills for evaluating, creating, and integrating technology into the language classroom and other language learning contexts, including business, engineering, and law. Course formats include readings, discussions, and demonstrations with technologies. The course counts for the

minor in applied linguistics, the PhD in applied linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors.

Same as L92 APL 4023

Credit 3 units. A&S IQ: SSC

L12 Educ 4033 Video Microanalysis: Methods and Tools

The purpose of this course is to explore video microanalysis as a methodological tool for studying and valuing unconscious aspects of culturally diverse settings. Utilizing social cultural theoretical lens, this type of analysis will reveal fleeting actions, subtle movements, peripheral events, and non-verbal communication that are not easily identified in real time viewing. Specifically we may look at facial expressions, direction of gaze, hand movements, body position, and use of material resources as micro techniques to expand our capacity to explore minute aspects and alternative interpretations of social interactions. Prerequisite: Junior standing or permission of instructor.

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC EN: S

L12 Educ 4036 Children of Immigrants: Identity and Acculturation

This seminar takes an interdisciplinary approach to children of immigrants as an analytical subject. The course texts are in sociology, anthropology, and cultural studies, and a significant number of our case studies focus on 1.5- and second-generation Asian Americans and Latinx. Identity and identity politics are main topics; in addition, the course will critically examine theories on acculturation and assimilation. Our discussions cover a wide range of topics from culture, ethnicity, and race, to bilingualism, education, family, school, ethnic community, and youth culture. Students are required to conduct an individual research project among a selected group of children of immigrants.

L12 Educ 404 Study for Honors

A research program arranged by the student and a faculty member. Prerequisite: recommendation for Honors study.

Credit 3 units. EN: S

L12 Educ 4052 Educational Psychology: A Focus on Teaching and Learning

This course examines psychological concepts and theories such as development, human motivation, and intelligence as applied in the process and practices of teaching and learning. In addition to readings and discussions, students spend three to five hours per week in either a preschool, elementary, or secondary school classroom. This course offers students an informed look at schooling in America, and it is designed for current and prospective teachers and for those simply interested in furthering their understanding of classroom interaction and the fundamental principles of teaching and learning. Students should be able to plan lessons and activities that address their students' prior experiences, multiple intelligences, strengths, and needs to positively impact learning. Educational psychology topics include classroom management as well as understanding the importance of differentiated learning to address individual differences in ability, cultural background, and language. Students should enroll in the lab section. Labs do not meet until after the first class. Prerequisite: Sophomore standing.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 4053 Educational Psychology Lab: A Focus on Teaching and Learning in School Settings

For students interested in Teacher Education, this lab provides direct and indirect experiences with contemporary K-12 educational practice in schools through 30 clock hours of field observation to be completed during the semester. For all other students, this lab provides direct and indirect experiences with contemporary K-12 educational practice through 30 clock hours of field observation to be completed during the semester. Enrollment Note: For students interested in Teacher Education, they must be concurrently enrolled in L12 EDUC 4052 (3 credits); all other students must be concurrently enrolled in or have completed L12 EDUC 4052 (3.0 credits).

Credit 1 unit. A&S IQ: SSC EN: S

L12 Educ 4055 Central Topics in Psychological Research on Teaching and Learning

This course will focus on how theory and research in psychological science and other related disciplines can inform teaching and learning in a variety of educative contexts. Each week, we will delve into research on a new set of issues that all revolve around a particular theme, such as pedagogical methods, motivation, student characteristics, assessment of learning, evaluation of teaching effectiveness, and educational technology. In addition to analyzing theory and research, we will discuss implications for educational practice and policy with an emphasis on designing interventions and fostering innovation.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L12 Educ 407 Curriculum and Instruction in World Languages

This course will address world language curriculum in secondary schools, including French, German, Japanese, Latin, Mandarin Chinese, Russian, and/or Spanish, with emphasis on the selection, organization, and appraisal of materials. We will analyze methods of instruction and evaluation in the teaching of modern foreign languages. Prerequisite: Admission to the teacher education program. Secondary teacher education majors are required to take 3 credit units during the fall semester.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L12 Educ 408 Education and Psychology of Exceptional Children

Learning, psychological, cognitive and social characteristics of exceptional children and youth from gifted to those with disabilities. Study child and adolescent developmental stages and the application to educational settings through data-based decision making using assessment and student data in a critical thinking, problem solving team approach. Current practices of educational strategies, interventions, and modifications to differentiate instruction for individual learning needs are emphasized. Plan lessons and activities that address student's prior experiences, multiple intelligences, strengths, and needs to positively impact learning. Learn specific strategies for classroom management, consultation and collaboration with families, colleagues, and administrators to meet individual needs within a culturally and demographically diverse classroom. Influences of legislation, criteria used to identify children, and awareness of supportive services are explored. Prerequisite: Sophomore standing.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 40SS Curriculum and Instruction in Secondary Social Science

This course provides hands-on practice for secondary teacher candidates in social science curriculum regarding discipline-specific techniques for instruction and assessment. Students will read discipline-specific research on evidence-based practice, learn how to align lessons with curriculum standards, and gain experience via lesson planning and facilitating learning activities for fellow students. Note: must be taken concurrently with L12 4000.

Credit 1 unit.

L12 Educ 4111 Linguistics and Language Learning

This course, taught in English, is a foundation for students who will work with linguistically and culturally diverse people in the USA and around the world, whether this work is in the courtroom, hospital, classroom, office and more. The class will help prepare students for the diverse range of twenty-first century occupations that have language and linguistics at their center, including machine learning and translation studies. The class utilizes a survey format and covers both internal and external factors related to language acquisition and language use, such as language and the brain, language aptitude, age, gender, memory, prior knowledge, and so on. Theoretical and research dimensions of both linguistics and foreign / second language learning are treated. Corresponding implications of the readings focus on action- on making decisions for language policies and debates around the world that are informed by linguistic and language knowledge. The course is required for the minor in applied linguistics, the PhD in Applied Linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors such as Global Studies and Educational Studies. Prerequisite: Ling 170 (recommended but not required).

Same as L92 APL 4111

Credit 3 units. A&S IQ: SSC BU: BA, ETH EN: S

L12 Educ 413 Curriculum and Instruction in Art K-12

This course addresses art curriculum in the public schools, with emphasis on examination of methods and materials for teaching art. Prerequisite: Admission to the teacher education program or approval by the director of teacher education. Offered fall semester.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L12 Educ 414 Curriculum and Instruction in English

This course addresses English curriculum in the secondary school, with emphasis on the selection and organization of materials. An analysis of methods of instruction and evaluation in teaching literature and language is also presented. Prerequisite: Admission to the teacher education program. Secondary teacher education majors are required to take 3 credit units during the year in which student teaching is completed. Offered fall semester.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L12 Educ 415 Curriculum and Instruction in Science

This course presents a variety of investigative approaches to teaching secondary school science curriculum and instructional methods, including the evaluation of curricular materials and the assessment of student performance based on specific

teaching objectives. The course assists with the development of criteria to guide the selection of science activities to achieve specified learning goals in a curriculum. Explicit connections will be made between various science lessons, curricular goals, and both Missouri state and national standards. In addition, the course is designed to develop effective teaching strategies and approaches to curriculum development in science. It addresses components of effective curriculum that are aligned with learning experiences and outcomes using the academic language of the sciences. It incorporates strategies for individual student needs based on diverse backgrounds, prior experiences, and language to deliver differentiated instruction, and it teaches students to set learning goals. Students will develop strategies to engage their students in the methods of inquiry and research, with interdisciplinary approaches where appropriate. They will learn researched-based models of critical thinking and problem solving, including various instructional strategies and technologies that support student engagement in higher-level thinking skills. Students will use formal and informal assessments to design instruction and to improve learning activities, and this will be followed by assessment analysis to determine the effects of class instruction on individual and whole-class learning. They will understand strategies to communicate confidential student data and progress in accordance with ethical and legal protocols. Prerequisite: Admission to the teacher education program or permission of instructor.

Credit 3 units. A&S IQ: NSM Art: NSM

L12 Educ 417 Curriculum and Instruction in Mathematics

This course presents mathematics curriculum in the secondary school, with emphasis on modern developments in the organization of mathematics. An analysis of methods of instruction and evaluation in teaching mathematics is also discussed. Prerequisite: Admission to the teacher education program or permission of instructor. Offered fall semester.

Credit 3 units. A&S IQ: NSM Art: NSM

L12 Educ 418 Curriculum and Instruction in Social Studies

This course discusses the goals of general education in social studies and their relationship to the nature of knowledge in the social sciences. It introduces the nature of thinking and its relationship to pedagogy and teaching materials. Secondary teacher education majors are required to take 3 credit units during the year in which student teaching is completed.

Prerequisite: Admission to the teacher education program or permission of instructor. Offered fall semester.

Credit 3 units. A&S IQ: SSC EN: S

L12 Educ 4280 History of Urban Schooling in the United States

More than ever, schooling in urban areas is researched, and it is at the center of debates for improving U.S. schooling. This course, which is framed by contemporary issues, focuses on the history of urban schooling and policy to deepen our understanding of the contemporary landscape. We will focus on particular cities and their school districts; these may include New York, Boston, Chicago, Detroit, St. Louis, Los Angeles, San Francisco, and Atlanta. In this course, students will develop a strong contextual understanding of the conditions of urban schooling; the history of urban school reform; and the debates over the purposes of urban schools, past and present.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L12 Educ 4288 Higher Education in American Culture

Colleges and universities in the United States have been the sites of both cultural conservation and political and cultural subversion from their founding in the 17th and 18th centuries. They have been integral to both national and regional cultural and economic development, and they have functioned as one component of an increasingly diversified and complex system of education. This course surveys higher education in American history, including the ideas that have contributed to shaping that history, beginning with its origins in European institutional models. We will use primary and secondary readings to critically examine higher education's conflict-ridden institutional transformation, from exclusively serving the elite to increasingly serving the masses. We will explore the cultural sources of ideas as well as the growth and diversification of institutions, students, and faculty as they changed over time as well as curricular evolutions and revolutions in relation to the larger social and cultural contexts of institutional expansion.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

L12 Educ 4289 Neighborhoods, Schools and Social Inequality

A major purpose of the course is to study the research and policy literature related to neighborhoods, schools and the corresponding opportunity structure in urban America. The course is informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis is placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups complement the course foci.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 4302 Cognitive Psychology Applied to Education

This course is intended to cover topics in the cognitive psychology of human memory, conceptual learning, and comprehension with special focus on areas, theory and research that have potential application to education. Thus, the course provides selective coverage of theoretical and empirical work in cognitive psychology that provides potential to inform and improve educational practice. The applicability of these themes is explicitly developed and evaluated through the primary research literature using educationally oriented experimental paradigms. The course is expected to be of interest and benefit to education majors and to psychology majors interested in cognitive psychology and its applications. Prerequisites: junior/senior status, 9 units in Psychology and Psych 100B or junior/senior status, 9 units in Education and Psych 100B. Same as L33 Psych 4302

Credit 3 units. A&S IQ: SSC EN: S

L12 Educ 433 Complex Learning in Education

This course will focus on psychological research and theory pertaining to higher-order learning. Each week, we will delve into a different topic, such as memory, transfer of learning, analogical reasoning, conceptual change, metacognition, and problem solving. Prerequisite: Junior standing or L12 304.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L12 Educ 433W Complex Learning in Education

This course will focus on psychological research and theory pertaining to higher-order learning. Each week, we will delve into a different topic, such as memory, transfer of learning, analogical reasoning, conceptual change, metacognition, and problem solving. Prerequisite: junior standing.

Credit 3 units. A&S IQ: SSC, WI BU: BA EN: S

L12 Educ 4451 Teaching Writing in School Contexts

Writing teachers often know how to write well but less about the teaching of writing. To provide effective instruction in writing, teachers need, first of all, experiences with writing instruction and theoretical knowledge to guide classroom practices. The goals of this course are as follows: to provide opportunities for all teachers of English and language arts, to develop theoretical knowledge and skill as teachers of writing, to connect the practices of research and teaching, to encourage teachers to give their students multiple and varied experiences with writing, to assist teachers in learning to respond to students' writing and assess their progress as writers. Offered Fall semester.

Credit 3 units. A&S IQ: SSC EN: S

L12 Educ 4511 Race, Ethnicity, and Culture: Critical Qualitative Understandings of Urban Education

This course examines educational institutions as spaces where children are asked to comply to the norms, expectations, and values of the culture of power. We will study how forces -- such as de facto segregation, the disproportionate hyper-disciplining of students, punitive school climates, and the devaluing of certain forms of cultural and social capital -- can contribute to cycles of social reproduction among the marginalized. To address such challenges, this course introduces sociocultural theories and critical qualitative inquiry methods as mechanisms by which urban educational institutions can be positively transformed. Specifically, restorative practices, cogenerative dialogues, and participatory/co-researcher models are explored as methods that honor the voices of marginalized stakeholders and lead to catalytic, transformational impact. Leaving this course, students will have an understanding of the inequitable terrain of urban education institutions as well as a repertoire of theories and methods to assist with the conducting of critically grounded, culturally responsive, humane, and transformative research. In addition to lectures, readings, discussions, films, and actual classroom footage, students will conduct a school experience project to practice using the theories and methods introduced in this course. Prerequisite: Junior standing or permission of instructor.

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC BU: BA EN: S

L12 Educ 453B Sociology of Education

This course provides an overview of sociological theory and research on education in contemporary U.S. society. Drawing from sociological perspectives, it covers the implications of schools and schooling for social inequality, mobility, and group relations. It examines major theoretical perspectives on the purpose and social organization of mass education in the United States, and topics related to the organization and function of schools, access to educational resources, and group disparities in school experiences and outcomes.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA, ETH EN: S

L12 Educ 459F Philosophies of Education

An analysis of perennial themes in the philosophy of education, with particular attention to implications arising from the uneven distribution of power in an inequitable society. Significant questions to be examined include: What constitutes a truly democratic form of education? How might our answers change when we approach this question in light of the history of race in the American experience? How should teachers dedicated to a liberatory practice approach both their content and their students? Which theories of knowledge might help us envision new possibilities for teaching and learning? Readings will address both K-12 and higher education spaces while drawing on a diverse range of historical and contemporary thinkers. Seminar format.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L12 Educ 4607 Education of Black Children and Youth

This course provides an overview of the education of Black children and youth in the United States. Covering both pre- and post-Brown eras, students in this course offers a deep examination of the research focused on Black education. The social, political, and historical contexts of education, as essential aspects of American and African-American culture and life, will be placed in the foreground of course inquiries.

Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA, HUM EN: H

L12 Educ 4608 The Education of Black Children and Youth in the United States

This course provides an overview of the education of Black children and youth in the United States. Covering both pre- and post-Brown eras, this course offers a deep examination of the research focused on Black education. The social, political, and historical contexts of education -- as essential aspects of American and African-American culture and life -- will be placed in the foreground of course inquiries.

Credit 3 units. A&S IQ: HUM, SD, WI Art: HUM EN: H

L12 Educ 461B The Construction and Experience of Black Adolescence

This course examines the construct of black adolescence from the general perspectives of anthropology, sociology and psychology. It begins by studying the construct of black adolescence as an "invention" of the social and behavioral sciences. The course then draws upon narrative data, autobiography, literature and multimedia sources authored by black youth to recast black adolescence as a complex social, psychological, cultural and political phenomenon. This course focuses on the meaning-making experiences of urban-dwelling black adolescents and highlights these relations within the contexts of class, gender, sexuality and education.

Same as L90 AFAS 461B

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S UColl: ACS, SSC

L12 Educ 462 Politics of Education

In this course, politics is interpreted broadly to include both formal policy-making processes and any situation in which people have to solve a problem or come to a decision. The purpose of this course is to explore the following processes:

(1) how ideologies and power dynamics influence educational policies and decisions; (2) how educational policies and decisions translate into specific school programs and practices; (3) how specific programs and practices influence pedagogies, especially in the relationships among students, teachers, and knowledge pedagogies; (4) how these pedagogies impact student opportunities and outcomes; and (5) how student outcomes and opportunities reinforce ideologies and power dynamics. This course considers politics across time, space, and individuals, noting how historical, geographical, cultural, social, psychological, political, and economic contexts can shape the politics of education. In addition, as this course considers the relationship between politics and power, we explore how politics can manifest itself in ways that promote exclusion and subjugation or work toward the common good. Finally, after carefully examining the research on inequalities and inefficiencies resulting from the current politics of education, we will transition from problem identification (i.e., "What went wrong?") to problem solution (i.e., "Where do we go from here?").

Credit 3 units. A&S IQ: SSC, SC, SD Art: SSC EN: S

L12 Educ 4621 The Political Economy of Urban Education

Defining a political economy of urban education involves the examination of power and wealth and the manner in which they operate in urban settings. It requires analysis of the larger urban social and economic context and consideration of historical forces that have brought the schools to their present state. In this course, we consider various political and economic factors that have influenced and shaped urban education in the United States, drawing upon the extant literature on urban education and related social science disciplines to characterize and discuss them. A particular focus of this course is on the dynamic interrelationships among the political economy, urban education and social stratification.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L12 Educ 466 Mathematics for Elementary School Teachers

A review of mathematics for grades K-8, at a level beyond its usual presentation in the schools. The purpose of this course is to ensure that teachers have the necessary foundation to teach mathematical concepts and problem solving at the elementary level. Applications of all essential mathematical concepts are presented in abundance, along with methods and strategies for instruction at the elementary level. Restricted to elementary education students, except with approval of the Director of Teacher Education. Prerequisite: two years of high-school mathematics and admission to the Teacher Education program or permission of instructor. Offered Fall semester.

Credit 3 units. A&S IQ: NSM

L12 Educ 4681 Teaching Reading in the Elementary School

This course, emphasizing emergent literacy and children's literature, is the first in a sequence of three courses on teaching reading and writing. The purposes of this course are to survey children's acquisition of oral and written language from an emergent literacy perspective, to focus on methods of teaching beginning reading, to develop uses of children's literature in a reading program. Offered fall semester.

Credit 3 units. A&S IQ: HUM EN: H

L12 Educ 4692 Reading Across Languages and Cultures: Theory, Research, and Practice

The United Nations has declared that literacy is a fundamental human right. This course, which is taught in English, connects to the mission of UNESCO and examines the wide range of theoretical and research issues -- both historical and current -- related to reading and writing across languages and cultures. Literacy acquisition among second-language learners involves a number of variables, including both cognitive and social factors. Topics to be discussed include universal cognitive operations, individual learner differences, text types and literary forms, literacy and social power, and the extent to which reading and writing are interrelated. Students will discuss how to bridge scientific research in the laboratory to practice, and they will be involved in St. Louis community outreach projects with refugees and immigrants at the International Institute, where they will create and implement reading and writing activities driven by theory and empirical investigations. Students will take the theory and research they learn, and they will help meet the local reading and writing needs of a changing population with a variety of backgrounds, values, and educational preparations. The course is required for the minor in applied linguistics, the PhD in applied linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors, such as Global Studies and Educational Studies.

Same as L92 APL 4692

Credit 3 units. A&S IQ: SSC EN: S

L12 Educ 470 Language, Learning and Instruction

This course, which emphasizes children's writing and literacy issues, is the second of three courses in a sequence on teaching reading and writing. The course reviews and elaborates on work from previous courses on children's acquisition of written language; examines approaches to teaching writing; and focuses on work from sociological, feminist, and philosophical perspectives to affirm and criticize aspects of these approaches. Prerequisite: Educ 4681.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L12 Educ 4731 Elementary School Mathematics

This course introduces fundamental concepts, properties, operations, and applications of mathematics related to the systems of whole numbers, integers, rational numbers, and real numbers. Also included are measurement, simple geometry, probability, and logical reasoning. The course is designed to help students develop effective teaching strategies and approaches to curriculum development in mathematics. It addresses components of effective curriculum that are aligned with learning experiences and outcomes using the academic language of mathematics. It incorporates strategies for individual student needs based on diverse backgrounds, prior experiences, and language to deliver differentiated instruction, and it teaches students to set learning goals. Students will develop strategies to engage their students in methods of inquiry and research, with interdisciplinary approaches where appropriate. They will learn research-based models of critical thinking and problem-solving, including various instructional strategies and technologies to support student engagement in higher-level thinking skills. Students will use formal and informal assessments to design instruction and improve learning activities, and these will be followed by assessment analysis to determine the effect of class instruction on individual and whole-class learning. They will

understand strategies to communicate confidential student data and progress in accordance with ethical and legal protocols. Prerequisite: Admission to the teacher education program or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L12 Educ 4741 Elementary Science: Content, Curriculum and Instruction

This course focuses on key concepts appropriate for elementary school science and health instruction. A repertoire of effective teaching strategies and approaches to curriculum development are presented. Prerequisite: Admission to the teacher education program or permission of instructor. Offered spring semester.

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

L12 Educ 4751 Elementary Social Studies: Content, Curriculum and Instruction

Introduction to key concepts in social studies, including economics and geography. Repertoire of effective teaching strategies and approaches to curriculum development in all areas of social studies. Prerequisite: admission to teacher education program or permission of instructor. Offered spring semester.

Credit 2 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L12 Educ 4771 Arts and Aesthetics: A Means of Communication

Methods and materials for integrating the arts and aesthetics into the elementary classroom are discussed. Emphasis is on art, music, and oral communication as well as curricula in movement. Prerequisite: Admission to teacher education program or permission of instructor. Offered spring semester.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM EN: H

L12 Educ 481W History of Education in the United States

Examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy in different periods of our history. NOTE ABOUT ENROLLMENT: All students will be initially waitlisted. Because this is a writing intensive course, enrollment will most likely be 12-15 students. Enrollment preference will be given to students who are majoring/minoring in Educational Studies, Teacher Education, Applied Linguistics, History, American Culture Studies, and Children's Studies and to students needing to complete their Writing Intensive requirement. Instructor will e-mail students about enrollment.

Credit 3 units. A&S IQ: HUM, SC, SD, WI BU: BA, HUM EN: H

L12 Educ 4821 The Teaching-Learning Process in the Secondary School

Secondary teacher education majors are required to take this teacher-learning course during the spring semester in which student teaching is completed. The course focuses on the study, practice, and analysis of generic teaching strategies and skills needed to meet the needs of all students. Topics include

classroom management, lesson planning, instructional and ethical decision making, and strategies for presenting clear explanations, asking effective questions, conducting productive discussions, reaching students with different learning styles/abilities/cultural backgrounds, and using cooperative learning groups. Prerequisite: Admission to the teacher education program. Corequisites: Educ 492 or Educ 494; and Educ 5681. Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC EN: S

L12 Educ 4831 The Teaching-Learning Process in the Elementary School

This course focuses on four broad areas: (1) self-awareness and human relations; (2) instructional and behavioral management strategies; (3) the development of curriculum and the analysis of instruction; and (4) social, political, and legal issues affecting the classroom. Topics include teacher-pupil relationships, assessment of pupil progress, curriculum development, instructional technology, and school organization. Course discussion and study further develop knowledge in a variety of areas that are experienced during student teaching, such as the refinement of pedagogy strategies and skills; the Missouri Educator Evaluation System (MEES) for certification; understanding diverse cultural perspectives of English language learners and how to select appropriate strategies for addressing individual needs in meeting curriculum objectives; incorporating strategies for individual student needs based on diverse backgrounds and prior experiences to deliver differentiated instruction; creating a positive learning environment through effective classroom management using strategies based on research and pedagogically sound techniques; developing reflective practices to improve teaching while understanding the importance of utilizing professional learning opportunities in school districts and professional organizations; understanding the importance of communication, professional relationships, and collaboration with teachers, administrators, families, and the community; and understanding the nature of professional, ethical behavior and the need to adhere to district policies and school procedures. Prerequisite: Admission to the teacher education program. Corequisites: Educ 470 and Educ 4911. Credit 3 units. A&S IQ: SSC, WI EN: S

L12 Educ 4841 Elementary Methods Field Experience

This course involves the application and analysis of specific content area methods and strategies in an elementary school classroom. Prerequisite: Admission to the teacher education program. Elementary teacher education majors are required to take this course during the spring semester before the year in which student teaching is completed. Offered spring semester. Credit 2 units. A&S IQ: SSC Art: SSC EN: S

L12 Educ 4843 Field Experience Seminar

This course guides students through a field experience in a middle or secondary public school. Fifty hours of observation are required for each student; these hours involve observing and documenting classroom environment characteristics, professional teacher behaviors, and student behaviors; working with students individually and/or in small groups; preparing and teaching a lesson; and learning classroom technologies such as SMART Board and digital video recording and editing. Course topics, observation, and discussion include understanding diverse cultural perspectives of English language learners and how to select appropriate strategies for addressing individual needs in meeting curriculum objectives; incorporating strategies for individual student needs based on diverse backgrounds

and prior experiences to deliver differentiated instruction; creating a positive learning environment through effective classroom management using strategies based on research and pedagogically sound techniques; developing reflective practices to improve teaching while understanding the importance of utilizing professional learning opportunities in school districts and professional organizations; and understanding the importance of communication, professional relationships, and collaboration with teachers, administrators, families, and the community as well as the nature of professional, ethical, and legal behavior and the need to adhere to district policies and school procedures. Prerequisite: Admission to the teacher education program. Corequisite: Educ 413, Educ 414, Educ 415, Educ 417, or Educ 418. Credit 3 units. A&S IQ: SSC EN: S

L12 Educ 489 Education and Public Policy in the United States

This course takes a triangulated approach to the field of public policy as it relates to education and social problems. First, the course emphasizes theories of public policy that frame the field of policy studies. Second, the course emphasizes the skills related to the exercise of policy analysis. Third, this course simulates the policymaking context through students' participation in mock congressional testimonies. Educational opportunity, achievement inequality, and social change will be the primary interests that link these course features. Credit 3 units. A&S IQ: SSC Art: SSC EN: S UColl: ACS

L12 Educ 4911 Student Teaching in the Elementary School

This course encompasses a supervised teaching experience as well as group meetings and individual conferences. Emphasis is on the integration of theory/practice and reflections on teaching. Prerequisite: Admission to the teacher education program. Graduate students must register for satisfactory/unsatisfactory grading; undergraduates must register for pass/fail grading. Offered fall semester. Credit variable, maximum 8 units. A&S IQ: SSC EN: S

L12 Educ 492 Student Teaching in the Secondary School

Supervised teaching experience. Group meetings and individual conferences. Emphasis on integration of theory/practice and reflection on teaching through videotape analysis. Prerequisite: admission to teacher education program. Graduate students must register for Satisfactory/Unsatisfactory, and undergraduates must register for Pass/Fail. Secondary teacher education students enroll for 8 credits during the spring semester. Credit variable, maximum 8 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L12 Educ 4922 Student Teaching in Middle Schools

Supervised teaching experience. Group meetings and individual conferences. Prerequisite: admission to teacher education program. Graduate students must register for Satisfactory/Unsatisfactory, and undergraduates must register for Pass/Fail. Middle school teacher education students enroll for 8 credits. Offered spring semester. Credit variable, maximum 8 units. A&S IQ: SSC Art: SSC EN: S

L12 Educ 494 Student Teaching in Grades K-12

This course encompasses a supervised teaching experience as well as group meetings and individual conferences. Prerequisite: Admission to the teacher education program. Credit/no credit only. Offered spring semester.

Credit variable, maximum 8 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L12 Educ 4951 Middle School Philosophy and Organization

This course examines the history, goals, organization and philosophy of middle schools as institutions. Students explore how the characteristics and needs of early adolescents guide the mission, structure and operation of middle schools. Prerequisite: admission to teacher education program.

Credit 2 units. A&S IQ: SSC EN: S

L12 Educ 4952 Middle School Curriculum and Instruction

By building on knowledge of the middle-level child and the ways in which middle schools are organized to meet the needs of middle-level children (covered in Educ 4951), this course explores the learning styles and attributes of middle-school students and examines instructional theory, methods, and materials appropriate to grades 5 through 9. In addition, portions of this course will be devoted to specific content field methodology and subdivided into English/language arts and social studies or science and math. The English/social studies and science/math sessions will be held concurrently, and students will attend the session appropriate to their content majors or minors. Interdisciplinary team teaching will be modeled and featured in these sessions. This course features a required practicum experience. Prerequisite: Admission to the teacher education program.

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L12 Educ 4999 Capstone Seminar in Educational Studies

All majors not writing an Education senior honors thesis are required to enroll in the senior seminar, a reading colloquium. Students read with faculty and write papers based on the readings and the courses taken to complete the major requirements in the program. All honors students are required to attend at least one session of the seminar to present their work, and all graduating Educational Studies majors, including those completing honors work in Educational Studies, are required to attend the final session of the seminar.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

English

Undergraduates who major or minor in English explore literature as readers and writers in small classes that focus on the individual student. With exposure to our wide array of course topics and intellectual approaches, alumni of the English department have succeeded in top-notch graduate programs in English and creative writing as well as in law, business, medicine, journalism and government.

Preparation for the English major begins at the first-year level. In both the fall and spring semesters, first-year seminars of 15 students or fewer are led by distinguished faculty on subjects such as detective fiction, literature and justice, the invention of romantic love, and the cultural history of the American university.

Majors go on to acquire a comprehensive understanding of the history and criticism of literature written in English. Our department's commitment to cross-fertilizing creative and critical literacy is genuine and longstanding. Home to a strong and rigorous MFA program that fosters a close-knit community of talented writers in poetry, fiction, and creative nonfiction, the department offers an undergraduate minor in writing as well as a major with a concentration in creative writing. English students frequently enroll in creative writing workshops or classes in advanced rhetoric, and three such courses may count toward the regular English major.

Majors

The Major in English Literature

Units required: 30

Prerequisites:

Code	Title	Units
E Lit 2151	Literature in English: Early Texts and Contexts	3
E Lit 2152	Literature in English: Modern Texts and Contexts	3

Required credits:

24 units of upper-division (300- and 400-level) work (at least 6 units must be at the 400 level), distributed as follows:

1) Four required courses

- E Lit 3552 Introduction to Literary Theory
- Three historical courses, covering three of the following five historical periods in American, British or Anglophone literature and including at least one course from each of the following two groups:

Group 1

- Medieval
- Early Modern

Group 2

- The 18th Century
- The 19th Century
- The 20th Century and Later

2) Four electives

3) One course centered on either global or minority literatures

For new majors beginning Fall 2021, at least one 300- or 400-level literature course must be taken in one of the following areas:

- *Global literatures* in English, defined as the Anglophone literatures of Africa, the Caribbean, South Asia, and other non-British or non-U.S. territories; or
- *Minority literatures* of the United States or the United Kingdom, which include Anglophone African American, Asian American, Native American, Latinx, and Black British writing.

Each semester, official course listings will designate the courses selected by the English Department Curriculum Committee that may be chosen to meet this requirement. Courses applied to this requirement may also satisfy other English major requirements involving historical range (requirement 2) and the need to complete two 400-level courses (requirement 4).

4) Eight upper-division courses in all (including two 400-level courses)

- All courses must be taken for letter grades.
- The student must receive a grade of C or better in all courses.
- Only one cross-listed course not home-based in English may be counted toward the 24 units required. The two required 400-level courses must be home-based in English.
- A maximum of 6 units from University College and/or Summer School courses may count toward the major. These selections require English department approval.
- Study abroad students are expected to complete the 200-level prerequisite courses and at least two upper-level courses in English literature before going abroad.
- 3 units of 300- or 400-level courses in the literature of a language other than English may be counted toward the English major.
- Before the end of their junior year, majors are encouraged to consult with advisors regarding the fulfillment of major requirements.

5) Portfolio capstone

All majors are required to complete a portfolio capstone project, for which the student provides a 200-level paper, a 400-level paper, and a brief essay (two to three pages) that reflects on the student's overall learning experience in the major.

Concentration in Creative Writing

There is the option of completing an English major with a creative writing concentration. To do so, students must take five creative writing courses, including at least three upper-division courses. Students will specialize in one particular genre — poetry, fiction or creative nonfiction — and ultimately take a three-course sequence (200-, 300- and 400-level courses) in that genre while taking at least one course outside of the chosen genre. The concentration will not change the current requirement structure in the English major and thus requires 6 additional credit units to complete as compared with a regular English major. For more information, please consult the description of the major (<https://english.wustl.edu/english-major/>) on the English department website.

Additional Information

Senior Honors: Students must have achieved a 3.65 grade-point average in English and a 3.65 GPA overall to apply for honors in English during the spring of the junior year. Students must successfully complete the required courses for the English major. Students must take L14 E Lit 5001 Honors Thesis Tutorial in both the fall and spring semesters of the senior year as well as E Lit 3991 Senior Research Seminar I and E Lit 3992 Senior Research Seminar II in the fall and spring, respectively, of the senior year.

Study Abroad: Seven affiliate programs in England, Ireland and Scotland are open for well-prepared students: King's College, London (KCL); University College, London (UCL); University of Sussex; Oxford Program for Undergraduate Studies (OPUS); Keble College at Oxford; Trinity College, Dublin; and University of Edinburgh. Students who are interested in studying abroad must apply and participate before their senior year.

Transfer Units: Students must provide transcripts of their previous work to receive approval from the director of undergraduate studies.

Minors

The Minor in English

Total units required: 15

Required courses:

Code	Title	Units
E Lit 2151	Literature in English: Early Texts and Contexts	3
E Lit 2152	Literature in English: Modern Texts and Contexts	3

Elective courses: Three upper-division (300- or 400-level) electives. These courses should be home-based in the Department of English.

Students are expected to take courses for letter grades and to receive a grade of C or better in each.

The Minor in Writing

The writing minor is fulfilled by completing 15 units of writing courses, no more than 6 units of which can be taken at the 200 level. At least one of the five courses selected must be Writing 311 Exposition or Writing 312 Argumentation.

With department approval, up to 6 units of journalism courses in writing or editing offered by University College can be counted toward the minor. An off-campus internship (Writing 298 Journalism: Communications Internship) oriented toward writing may also be counted toward the minor. Regardless of level, at least 9 units counted toward the minor must be completed in regular courses home-based in writing.

For undergraduate scholars in the Howard Nemerov Program, two semesters of the 200-level Nemerov seminar (GeSt 211 Howard Nemerov Seminar I) may count as 3 units of 200-level work toward the writing minor. Two semesters of the 300-level Nemerov seminar may count as 3 units of 300-level work toward the writing minor. A maximum of 6 Howard Nemerov units may count toward the writing minor.

Students who wish to take a writing minor in addition to an English major are advised to take English and American literature courses (L14 E Lit) exclusively for the major and writing courses (L13) exclusively for the minor. (Please note: 100-level L13 classes do not normally count toward the writing minor.) Students who wish to combine writing with their English major are encouraged to consider an English major with a concentration in creative writing (p. 545).

L14 E Lit 100 First-Year Seminar: The Literary Life

This class approaches literature from many angles: the creative to the scholarly, the personal to the ethical, the edifying to the entertaining. At the heart of our study will be a survey of literary "values" such as invention, emotion, style, subversion, beauty, humor—those fundamental reasons readers come to literature in the first place. Through readings and discussion, we will consider

the great variety of ways literature expresses these values, and will explore them ourselves via creative assignments. Along the way, we will learn about literary life today through discussions with nationally renowned writers who will visit the class, and through units on literary scholarship, book reviewing, and magazine and book publishing. In the midst of it all, you will write and workshop your own stories, poems, and non-fiction works. Course enrollment preference is given to first-year students. Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 115A First Year Seminar

A variety of topics in comparative literature, designed for first-year students — no special background is required — and to be conducive to the investigation and discussion format of a seminar.

Same as L16 Comp Lit 115

L14 E Lit 161A Morality and Markets

What does it look like to live a moral life in today's market system? We know all too well what it does not look like. The news is filled with moral failures of leaders and executives at top firms. We like to believe that we would behave differently, but what kinds of pressures inform our moral choices? What pulls us, what pushes us, and what persuades us to act one way rather than another? These are the questions that a course combining business and literature can address in unique ways; the world of fiction helps us to examine the ethical dilemmas of the market we inhabit every day. In this course, we use great books, classics of film and modern television, and the tools of modern psychology and business strategy to think critically about what is entailed in living a moral life in the midst of the modern market. This course is for first-year (non-transfer) students only. Same as I60 BEYOND 161

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L14 E Lit 201C Classical to Renaissance Literature: Text and Traditions

Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's Iliad is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin, and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare.

Same as L93 IPH 201C

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 2151 Literature in English: Early Texts and Contexts

How did what we now call English literature emerge? How did such literary activity reflect the world, and how did the world shape this writing? How can literature help us understand the history of art, race, religious identity and sectarian conflict, nations and empires, gender, sexuality, and class? We will address these questions by studying the early history of literature in English, from the Middle Ages through the late 18th century, as well as the tools, vocabularies, and critical practices of contemporary literary studies. We will learn about the material forms of English literature (manuscript, print, and performance traditions) as well as major poetry and prose forms (e.g., sonnet, epic, blank verse, romance, letter, slave narrative). In addition to Geoffrey Chaucer, William Shakespeare, John Milton, and Ignatius Sancho or Olaudah Equiano, the syllabus may include authors and texts such as "Beowulf," "Sir Gawain and the Green Knight," Julian of Norwich, Edmund Spenser, Margaret Cavendish, Aphra Behn, Daniel Defoe, and Eliza Haywood. Note: This course satisfies one of the two 200-level requirements for the English major.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 2152 Literature in English: Modern Texts and Contexts

What is modern English literature, and how do we tell its story? Is it a succession of literary movements from romanticism to realism to modernism and beyond? Is it a canon of classic texts to survey? Is it a sustained critique of that canon's exclusions, a recentering of the marginalized authors whose works reveal previously obscured accounts of modernity? It is, in fact, all of the above. In this course, we will introduce students to the central themes, forms, and forces that have shaped the history of English-language literature from the late 18th century to the present, as well as to the tools, vocabularies, and critical practices of contemporary literary studies. Throughout, we will examine the norms and assumptions of literary history, including those based in race, ethnicity, class, gender, and sexuality. Students will encounter fiction, poetry, drama, and creative nonfiction from Britain and the United States, along with African, Caribbean, or other global literatures in English. Authors studied may include William Wordsworth, Phillis Wheatley, Jane Austen, Charlotte Brontë, Frederick Douglass, Oscar Wilde, T.S. Eliot, Virginia Woolf, Claude McKay, Samuel Beckett, James Baldwin, Wole Soyinka, Toni Morrison, Ngugi wa Thiong'o, and Zadie Smith. Note: This course satisfies one of the two 200-level requirements for the English major.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 224 Publishing: History and Contexts

This course offers a broad introduction to book publishing, with the goal of establishing an understanding the larger issues facing publishing today, as well as the historical and cultural contexts that informs these issues. We will look at both multiple types of book publishing, with a general emphasis on contemporary Anglophone trade publishing, and will have frequent class visits (via Zoom) by professionals from different sectors of the publishing community. This course will count for one of the core requirements of the forthcoming Publishing Concentration.

Credit 3 units. A&S IQ: HUM

L14 E Lit 250 Sophomore Seminar

Topic will vary by semester.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 257 The Art of Poetry

An introduction to the critical vocabulary necessary for the study and evaluation of poetry; provides a basic understanding of prosody, poetic forms and figurative language, and the historical periods in which poetry has been written.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 258 Art of the Novel

In this course we read novels drawn from several literary traditions and a number of distinctive narrative modes. Among the questions we consider are those addressing the nature of narrative form, and the literary and stylistic choices made in order to express such things as character and consciousness, society and history, and the relation between the fictive and the real. There are two papers and several short writing assignments.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 299 Research Assistantship

For students assisting English faculty members with their research. Students must provide a description of their assistantship and secure permission of the director of undergraduate studies. At the end of the semester, the student must submit a four-page essay describing the work done during the assistantship, along with any documents or work produced. In addition, a written evaluation by the faculty member they assisted is required. Up to 3 units acceptable toward the English major. Only for declared English majors. Must be taken pass/fail. Credit variable, maximum 3 units.

L14 E Lit 300 Independent Study

Credit 3 units.

L14 E Lit 302 The Great American Novel

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 302W Writing Modern War

The 20th century, as Graham Greene observed, was a century "in which there would never be a peace." This writing-intensive course examines the ways in which modern writers have tried to describe warfare and its impact on both combatants and those on the homefront.

Credit 3 units.

L14 E Lit 303W Strangers and Savages, Aliens and Outcasts

This writing-intensive course focuses on a literary tradition united by its representation of passionate hatred and intolerance.

Credit 3 units.

L14 E Lit 304W Craft of Fiction: Historical Fiction

This writing-intensive course is a literature/creative writing hybrid course in which a number of contemporary historical fictions (meaning, fictions set in periods prior to the authors' births, and sometimes incorporating real historical events or figures) are covered.

Credit 3 units. EN: H

L14 E Lit 305 Literature and Consent

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L14 E Lit 305W Fabricating Lives

The premise of this writing-intensive course is that autobiography is not a straightforward narrative of the past but a conscious shaping of life into a meaningful design.

Credit 3 units.

L14 E Lit 306 Old English Literature: Beowulf

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L14 E Lit 3065 Voice, Language and Power: Late Medieval Religious Writing

In the later Middle Ages, there is a flowering throughout Christian Europe of religious writings that offer a new voice in which personal religious experience can be pursued and expressed. Their voices are mainly intended to be communal ones, to be contained within the Church and regulated by it. But in each case the fact that it is a voice may offer a mode of resistance, or of difference. Such writing is often aimed at lay people, sometimes exclusively at women; and sometimes the intended auditors become the authors, and propose a version of religious experience that claims a new and more intimate kind of power for its readers. This course looks at a wide range of such writing in vernacular languages read in translation (English, French and German), including the work of Meister Eckhart, Marguerite Porete, Margery Kempe, Julian of Norwich, Eleanor Hull, the anonymous writer of *The Cloud of Unknowing* and the perhaps pseudonymous William Langland, author of *Piers Plowman*. Whether such writing seeks to be orthodox or conducive to heresy, it presents a challenge to the power of clergy — a challenge that is written in the vernacular language of lay people, rather than clerical Latin, and in doing so offers distinctively new voices for religious experience. The course will also look at ways in which such work might have been influenced, if only oppositionally or at times indirectly, by contact with Muslim and Jewish writing (including Jewish exegesis of the Psalms). Same as L23 Re St 3065

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L14 E Lit 307 The Writing of the Indian Subcontinent

The Indian subcontinent has in recent years yielded a number of writers, expatriate or otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed as an introductory survey of such writing, drawing on select subcontinental writers. Covering both fiction and nonfiction by several authors, including R.K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatje and Romesh Gunsekera, we discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM

L14 E Lit 3071 Caribbean Literature in English

Rum! Fun! Beaches! Sun! This is the image of the Caribbean in America today. This course surveys literature and culture from these islands, looking both at and beyond this tourists' paradise. It aims to introduce students to the region's unmistakably vibrant tradition of multicultural mixture, while keeping an eye on the long history of slavery and rebellion out of which the islands' contemporary situation formed. Along the way we encounter a wide variety of texts, from the earliest writing focused on life in urban slums, to the first novel ever to have a Rastafarian as its hero, to more contemporary considerations of the region's uncertain place in a U.S.-dominated world. Toward the end of the course, we also look at important films such as *The Harder They Come* as well as discuss the most globally famous cultural product of the contemporary Caribbean: reggae music. The course involves readings from multiple genres and covers authors such as C.L.R. James, Derek Walcott, Jean Rhys, V.S. Naipaul, Jamaica Kincaid and Caryl Phillips.

L14 E Lit 3075 The American Radical Novel: Literature Versus Inequality

This course is intended to help students reckon knowledgeably, imaginatively, and articulately with our era of escalating social inequality, this course is a writing-intensive study of representative American radical novels stretching from the 19th-century abolitionism of Harriet Beecher Stowe's "Uncle Tom's Cabin" to the 21st-century dystopianism of Gary Shteyngart's "Super Sad True Love Story." Its main goals are (1) to introduce students to the long history and current significance of efforts to pit American literature against American inequality; and (2) to improve the quality of advanced student writing in the related fields of American Culture Studies and English literature. The first goal is pursued through close analysis of both radical novels and the contemporary political documents that inform them, juxtaposing such texts as Upton Sinclair's "The Jungle" and Karl Marx's "Communist Manifesto," Alice Walker's "Meridian" and Martin Luther King Jr.'s "Nonviolence and Racial Justice." The second goal is pursued through the hands-on analysis of successful rhetorical strategies sampled from The Hodges Harbrace Handbook, and, more importantly, from the scholarly writings of students themselves. L14 E Lit 3081 City on a Hill: The Concept and Culture of American Exceptionalism

This course examines the concept, history, and culture of American exceptionalism — the idea that America has been specially chosen, or has a special mission to the world. First, we examine the Puritan sermon that politicians quote when they describe America as a "city on a hill." This sermon has been called the "ur-text" of American literature, the foundational document of American culture; learning and drawing from multiple literary methodologies, we will re-investigate what that sermon means and how it came to tell a story about the Puritan origins of American culture — a thesis our class will reassess with the help of modern critics. In the second part of this class, we will broaden our discussion to consider the wider (and newer) meanings of American exceptionalism, theorizing the concept while looking at the way it has been revitalized, redefined and redeployed in recent years. Finally, the course ends with a careful study of American exceptionalism in modern political rhetoric, starting with JFK and proceeding through Reagan to the current day, ending with an analysis of Donald Trump and the rise of "America First." In the end, students will gain a firm grasp of the long history and continuing significance — the pervasive impact — of this concept in American culture. Same as L98 AMCS 3081

L14 E Lit 312 Introduction to Digital Humanities

It is a truism that computers have changed our lives and the way we think and interact. But in fact, systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork will be supplemented by class presentations and a small assigned group project. Same as L93 IPH 312

**L14 E Lit 312W Topics in English and American Literature:
End of the Century: American Culture in the 1990s**

Starting with Allan Bloom's *The Closing of the American Mind*, a book that helped re-ignite the Culture Wars, this course will consider the debates and problems that pervaded American culture during the 1990s. From the end of the Cold War to the sexual scandals that rocked Bill Clinton's presidency, from the emergence of the Internet to the rise of grunge and rap, the 1990s were a time of vast change in American culture. It was a period when we, as a nation, reconsidered the legacy of the 1960s, the Reagan revolution, and the end of the Cold War, a time of economic expansion and cultural tension. In our consideration of this period, we will take a multidisciplinary approach when tackling a variety of materials—ranging from literary fiction (Philip Roth's *The Human Stain*, Jonathan Franzen's *The Corrections*) and popular films (Spike Lee's *Do the Right Thing* and The Cohen brothers' *The Big Lebowski*) to the music of Nirvana and Public Enemy—in an attempt to come to a better understanding of our recent history. Throughout the semester, we will pursue the vexed cultural, political, and historical questions that Americans faced in the years between the fall of the Berlin Wall and the terrorist attacks of September 11th, 2001, and consider how literary texts imagined this period of American history.

L14 E Lit 313 Topics in English and American Literature

Called the "Age of Revolution," the Romantic Age of British literature, 1770-1830, witnessed the birth of new lyric forms, the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, oversimply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal "Jerusalem." It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we consider the historical contexts, and the sometimes competing histories of ideas, that shaped the five major British Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron, and John Keats. We follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts also assigned include Mary Shelley's *Frankenstein* and Byron's *Don Juan*.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 313W Bots, Drones, and Cyborgs: Being Human in the Age of Intelligent Machines

We live in a world where not only our access to information, but our social interactions, and bodily autonomy are increasingly mediated by- surveilled, analyzed, facilitated, enhanced- by technology. This course will ask what it means to be human in an age of intelligent machines. What happens to our notions of individuality, autonomy, and political subjecthood when domains or categories once thought exclusively to be the preserve of humanity- language, emotion, complex information processing (playing chess, or driving cars, for example)- are increasingly threatened, replicated, and extended by technology? We will cover a range of science fiction texts including Karel Capek's play Rossum's Universal Robots, Isaac Asimov's I, Robot, Phillip K. Dick's Do Androids Dream of Electric Sheep, and William Gibson's Neuromancer along with works of speculative fiction such as Aldous Huxley's Brave New World and Margaret Atwood's Oryx and Crake, and Kazuo Ishiguro's Klara and the Sun along with films such as Blade Runner and The Matrix. We'll juxtapose these cultural representations of artificial intelligence with emerging philosophical and scientific discussions to ask to what extent the fundamental ways AI continues to redefine the boundaries of the "human" as a category.

L14 E Lit 3192 Interdisciplinary Studies in the Humanities, 20th Century: The European Avant-Garde

The first half of the 20th century witnessed the emergence of artistic movements characterized by revolt against tradition, emphasis on radical experimentation and redefinition of the art work. This course familiarizes students with the avant-garde's main currents: Italian Futurism, English Vorticism, Russian Constructivism, "stateless" Dadaism and French Surrealism. We ask ourselves how to define the avant-garde, how it is related to modernity and whether its aesthetic is necessarily political. Texts include *Futurist Manifestos*, Cendrars' *Trans-Siberian Prose*, Stein's *Tender Buttons*, Breton's *Nadja*. We also examine artworks such as Duchamp's "Large Glass" and films such as Buñuel's *Un Chien Andalou*.

L14 E Lit 3227 Devising, Adaptation and Docudrama

This course explores three ways of theatre-making that have revolutionized the contemporary stage: devising (a collaborative process emphasizing physical techniques to realize ideas), adaptation (the transposition of a narrative from one mode to another), and docudrama (the self-conscious staging of history through the assemblage of documentary records). Beginning with a focus on the current "postdramatic theatre" and the pre-histories of these contemporary practices, we will engage current scholarship on each form, learning the "how" and "why" from contemporary practitioners, while considering the rhetorical

structure of each form in relation to the social meanings they generate for their audiences. Divided into three units, the course will combine the study of each method with hands-on practice, and will conclude with a showcase featuring an original performance created by the student collective. A theme (variable by semester) will unite the three sections of the course, helping students see how a single topic can be illuminated in different ways through these three methods of creating performance.

L14 E Lit 344W Writing About Performance

In this writing-intensive course, students develop critical strategies for writing about theatre and other performance events, in the present and in a range of historical periods.

Credit 3 units. BU: HUM

L14 E Lit 3451 Topics in American Literature

Emerging in American films most forcefully during the 1940s, film noir is a cycle of films associated with a distinctive visual style and a cynical worldview. In this course, we explore the sexual politics of film noir as a distinctive vision of American sexual relations every bit as identifiable as the form's stylized lighting and circuitous storytelling. We explore how and why sexual paranoia and perversion seem to animate this genre and why

these movies continue to influence "neo-noir" filmmaking into the 21st century, even as film noir's representation of gender and sexuality is inseparable from its literary antecedents, most notably, the so-called "hard-boiled" school of writing. We read examples from this literature by Dashiell Hammett, James Cain, Raymond Chandler and Cornell Woolrich, and discuss these novels and short stories in the context of other artistic and cultural influences on gendered power relations and film noir. We also explore the relationship of these films to censorship and to changing post-World War II cultural values. Films screened in complete prints or in excerpts include many of the following: *The Maltese Falcon*, *Double Indemnity*, *Murder My Sweet*, *Phantom Lady*, *Strangers on a Train*, *The Big Sleep*, *The Killers*, *Mildred Pierce*, *The High Wall*, *Sudden Fear*, *The Big Combo*, *Laura*, *The Glass Key*, *The Big Heat*, *Kiss Me Deadly*, *The Crimson Kimono*, *Touch of Evil*, *Alphaville*, *Chinatown*, *Taxi Driver*, *Devil in a Blue Dress*, *The Bad Lieutenant* and *Memento*. Required screenings.

L14 E Lit 3520 Introduction to Postcolonial Literature

At its zenith, the British Empire encompassed almost a quarter of the globe, allowing the diminutive island nation unprecedented economic, military, and political influence upon the rest of the world. This course will introduce some of the foundational responses to this dominance, both literary and theoretical, by the colonized and their descendants. We will examine important critiques of colonialism by theorists such as Frantz Fanon, Aimé Césaire, Edward Said, Homi Bhabha, and Gayatri Spivak, as well as literary works that reflect a postcolonial critique by authors such as V.S. Naipaul, George Lamming, Doris Lessing, and N'gugi wa Thiong'o. The course will interrogate how literature could be said to help consolidate Empire as well as ways in which it might function as rebellion against imperial power, with a view toward teasing out the problematics of race, gender, language, nationalism and identity that postcolonial texts so urgently confront.

L14 E Lit 3525 Topics in Literature: The Practice of Diaspora: Literatures of Race, Power, and Cultural Crossings

This course takes a transnational and comparative approach to geographies, literatures, and cultures of Africa and the Black diaspora. We will consider the intersection and overlap between a variety of Black diasporic cultures and literatures in places such as Ghana, the United Kingdom, South Africa, Indonesia, Germany, and Barbados. By doing so, we'll begin to gesture towards what Brent Hayes Edwards has called "the practice of diaspora." One part of this course is both a survey of Black diasporic literature and an introduction to ongoing debates about what constitutes Black diasporic literature. We will study a variety of literary genres and ask how formal and stylistic conventions, as well as shifting sociohistorical and sociopolitical circumstances, have shaped conceptions of Black diasporic literature. The second part will encourage us to think generatively about how we might use the concept and practice of diaspora as an organizing model for Black literary production on a global scale. Assignments will include a group curated glossary of key terms and an annotated bibliography. We will also work in teams to produce diasporic digital storytelling projects as part of the final. This course may fulfill the global or minority literatures requirement for students who declare an English major in the fall 2021 semester and beyond.

Credit 3 units. A&S IQ: HUM BU: IS EN: H

L14 E Lit 3582 Black Literature: Race, Class and Writing in the United States and the Caribbean, 1900-1950

Study of the differences in literary tradition arising from the divergent social, racial and educational milieux of the United States and the West Indies.

Credit 3 units. BU: BA, HUM

L14 E Lit 359 Scribbling Women: 19th-Century American Women Writers

In 1855, Nathaniel Hawthorne wrote to his publisher, William Tichnor, that "America is now wholly given over to a damned mob of scribbling women and I should have no chance of success while the public taste is occupied with their trash." In this class, we examine works of those scribbling women of the 19th century. We read one of the best-selling novels of the century, one that created a scandal and ruined the author's literary reputation, along with others that have garnered more attention in our time than their own. In addition to focusing on these women writers, we also explore questions about the canon and American literature: What makes literature "good"? What constitutes American literature? How does an author get in the canon and stay there? Finally, in this writing intensive course, there are frequent writing assignments and a strong emphasis on the essential writing process of drafting and revising.

L14 E Lit 363C Theatre Culture Studies III

The third in the department's three-course history sequence, TCS III surveys the dramatic literature and cultural history of the modern theater. Beginning with Romanticism's self-conscious break with the past, we'll study the rise of bourgeois melodrama with its intensely emotional rendering of character and spectacular effects. We'll consider how those effects were made possible by advances in industrial stage technology which reproduced the everyday world with unprecedented verisimilitude, and how playwrights responded to those technologies by calling for the theatre to become either a "total work of art" — plunging its spectators into a mythical realm — or a petri dish — analyzing the struggles of the modern individual within their modern milieu. Exploring a range of aesthetic modes — including Realism, Naturalism, Symbolism, Expressionism, the Epic Theatre, and the Theatre of the Absurd — we will read classic plays by modern playwrights to consider how the modern theatre helped its audiences understand as well as adapt to the rapidly changing conditions of the modern world.

L14 E Lit 365 The Bible as Literature

The Bible is one book among many; the Bible is a book like no other; the Bible is not one book but many. The course will debate such positions and the different histories and practices of reading they involve. We shall read extensively in English translations of the Bible, both Jewish and Christian, with emphasis on literary form and ideas. We shall look at the Bible's material forms, and the history of its interpretation and translation. The aim is not to adjudicate its meaning but to explore what over time it has been taken to mean, attempting to locate within the book the potential for different interpretations. The course requires, and should foster, attentive reading, vigorous yet courteous argument, and respect for the readings of others.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L14 E Lit 367 Religious Themes in Contemporary Literature

The use by selected 20th-century writers of religious themes and symbols. Close analysis of the literary techniques by which religious concepts and images are developed and differing insights of writers representing a broad spectrum of contemporary attitudes toward religious issues.

Credit 3 units. A&S IQ: HUM Art: HUM BU: ETH

L14 E Lit 368 The Development of American Romantic Thought: Enlightenment Confidence to Postmodern Questioning

We examine the revolutionary shift in human sensibility commonly known as "Romanticism" by tracing its development in America from the "Fireside Poets" (Bryant, Longfellow) and Transcendentalism (Emerson, Whitman) to anticipations of Modernism and Postmodernism (Henry Adams, Louis Sullivan, Charles Ives). Fulfills the 19th century and American literature requirements for the English major.

Credit 3 units.

L14 E Lit 369 Reading Sex in Premodern England

This course introduces students to the literary representation of gender and sexuality in England from the medieval period to the 18th century. To understand a tradition that addressed the intractable problem of human sexuality in terms very different from ours, we ask: how does premodern culture imagine gendered identities, sexual difference, and erotic desire? How do various contexts — medical, religious, social, private, public — inform the literary representation of gender and sexuality? What are the anatomies and economies of the body, the circuits of physical pleasure, and the disciplines of the self that characterize human sexuality? Students have the opportunity to study romances, saints' lives, mystical writings, diaries, plays, sex guides, novels and scientific treatises. By learning how to "read sex" in premodern literature, students acquire a broad cultural and historical understanding of English sexualities before the descent of modern sensibilities.

Credit 3 units. A&S IQ: HUM, SD BU: HUM EN: H

L14 E Lit 370 The Age of Victoria

Works of fiction, poetry, journalism, children's literature, political cartoons, book illustrations, genre paintings and photographs. The course aims to give a sense of the age in all its diversity and peculiarity, as well as to concentrate on a few central issues and developments in 19th-century British society: e.g., industrialism,

materialism, feminism, liberalism, the rise of the social sciences. Readings include works by Tennyson, Matthew Arnold, Lewis Carroll, Dickens, George Eliot, John Stuart Mill, Trollope, Oscar Wilde and Edmund Gosse.

Credit 3 units. Art: HUM BU: HUM

L14 E Lit 371 The Age of Chaucer

Study of the ways in which literature and history interplay between 1340 and 1400. Literary texts include writings by Chaucer, Langland, the Pearl Poet and anonymous composers of songs, dream visions, romances, satires, debates and low stories; attempts to move from these to theoretical and over into historical texts, alienating where necessary and translating where possible.

Credit 3 units. Art: HUM BU: HUM

L14 E Lit 372 The Renaissance

Major texts of the European Renaissance examined to set English literary achievement in a continental context. Among authors studied: Petrarch, Castiglione, Erasmus, More, Luther, Wyatt, Rabelais, Montaigne, Shakespeare, Spenser, Jonson, Milton. Prerequisite: 6 units of literature, junior standing or permission of instructor.

L14 E Lit 3731 Writing and the Representation of Pain

Writing-intensive course on the representation of pain at every level, from private suffering to public policy. Course reader consists of examples of or extracts from a diversity of materials: the *Bible* and *Ovid*, medieval religious lyric, saints' lives, visions of hell and damnation, descriptions of visionary illness; Freud's *Anna O*, Kafka's *In the Penal Colony*, Wilde's *The Nightingale* and *the Rose*, Woolf's *On Being Ill*, Artaud and the Theater of Cruelty; autobiographical and other writings by Susan Sontag and Inga Clendinnen; theory by Bataille, Deleuze, Dollimore and Elizabeth Grosz; work on pain by Leder, Morris, Rey and others; poetry by Anne Sexton, Sylvia Plath, Gwen Harwood, Alan Jenkins and others. We also read Elaine Scarry's *The Body in Pain* and two recent novels: Andrew Miller's *Ingenious Pain* and Manil Suri's *The Death of Vishnu*.

Credit 3 units. BU: HUM

L14 E Lit 374W Epistolary Literature in the 18th Century: Other Peoples' Letters

In this writing-intensive course, we examine the attraction the letter held for authors and readers alike, taking into consideration the advantages and the disadvantages of the form, its role in the development of the early novel, and current theories of epistolary writing.

L14 E Lit 376A Reading Across the Disciplines: Introduction to the Theoretical Humanities

What does theory look like in an age like ours so sharply marked by interdisciplinarity and in which most humanities scholarship crosses disciplines-- for instance, combining literature or history with philosophy or critical race studies? In this way all (or almost all) humanities scholars are comparatists in practice if not always in name. The course is designed to introduce this complex and exciting state of affairs to CompLit and English majors, yet any students in a humanities program, or with an interest in the humanities, will fit right in. Our main text is *Futures of Comparative Literature*, ed. Heise (2017), which contains short essays on topics like Queer Reading; Human Rights; Fundamentalism; Untranslatability; Big Data; Environmental Humanities. We will supplement this material with relevant short texts from a variety of fields, including some that cross over into the social sciences.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 381 Banned Books

Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago a Russian student was exiled to Siberia for possessing a copy of Emerson's *Essays*; today, school boards in the United States regularly call for the removal of *Huckleberry Finn* and *The Catcher in the Rye* from classrooms and library shelves. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. The course explores these issues by looking closely at several American and translated European texts that have been challenged on moral, sociopolitical, or religious grounds to determine what some readers have found

so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin, Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments.

Credit 3 units. A&S IQ: HUM Art: HUM BU: ETH

L14 E Lit 3831 Topics in African-American Poetry

Beginning with the year in which Gwendolyn Brooks became the first African American to win the Pulitzer Prize, we will examine the tradition of African-American poetry and the ways in which that tradition is constantly revising itself and being revised from the outside. We will focus in particular on the pressures of expectation — in terms of such identity markers as race, gender and sexuality — and how those pressures uniquely and increasingly affect African-American poetry today.

L14 E Lit 385W Comedy, Ancient and Modern

In this course we will examine the nature of dramatic comedy and its role in society. We will read, discuss and write about comedies from ancient Greece and Rome and from various modern nations, paying particular attention to the following questions: Do comic plays reinforce or challenge the preconceptions of their audiences? How have comic playwrights responded to issues such as class, gender, religion, and politics? Why does comedy have such power both to unite and to divide people? This course has an extensive writing component, so much of our time will be spent writing about the comedies we will read, revising what we have written, and discussing how best to write about comedy.

Credit 3 units. A&S IQ: HUM, LCD, WI Art: CPSC BU: HUM EN: H

L14 E Lit 386A Topics in African-American Literature: Rebels, Sherioes and Race Men

In this seminar-for we are fortunate to be an elite group this term--we will focus on the first century of African American prose writers. In genre terms that means we will largely, but not exclusively, read autobiographies and novels. Phillis Wheatley, Frederick Douglass, and Harriet Jacobs are now familiar names in U.S. literature surveys, but others are not yet household names, and in fact may never be. We will survey a core group of texts, available at the WUSTL bookstore, but also supplement our readings with materials placed on BlackBoard, via online databases (e.g., materials accessible digitally from the Schomburg Division of the New York Public Library). For AFAS majors, this course counts as Area Requirement 1.

L14 E Lit 387 African-American Literature: Early Writers to the Harlem Renaissance

Credit 3 units. A&S IQ: HUM, SD BU: HUM

L14 E Lit 388 African-American Literature: African-American Writers Since the Harlem Renaissance

African-American literature in the 20th and 21st centuries grows from the Harlem Renaissance into a world-shaping institution. Guggenheim, Pulitzer, and Nobel prize winners; card-carrying Communists, rock-ribbed Republicans, and Black Power nationalists; Broadway playwrights, Book-of-the-Month Club novelists, and even a U.S. President are among the many whose fictions and memoirs we will study, with special attention given to the intimate links between Black writing and Black music. The syllabus will thus feature authors ranging from poet Alice Dunbar Nelson (born 1875) to satirist Colson Whitehead (born 1969), with more than a dozen stops in between. Written assignments may include two papers and two exams. No prerequisites, but related courses such as E Lit 215 and/or AFAS 208 are suggested. Satisfies the American literature requirement in English and/or one 300-level elective requirement in AFAS.

Credit 3 units. A&S IQ: HUM, SC, SD BU: HUM EN: H

L14 E Lit 3881 Black Women Writers

When someone says black woman writer, you may well think of Nobel Prize winner Toni Morrison. But not long ago, to be a black woman writer meant to be considered an aberration. When Thomas Jefferson wrote that Phillis Wheatley's poems were "beneath the dignity of criticism," he could hardly have imagined entire Modern Language Association sessions built around her verse, but such is now the case. In this class we will survey the range of Anglophone African-American women authors. Writers likely to be covered include Phillis Wheatley, Harriet Wilson, Nella Larsen, Lorraine Hansberry, Octavia Butler, and Rita Dove, among others. Be prepared to read, explore, discuss and debate the specific impact of race and gender on American literature.

L14 E Lit 388C African-American Literature: African-American Writers Since the Harlem Renaissance

African-American literature in the 20th and 21st centuries grew from a renaissance in Harlem into a world-shaping institution. Public enemies and Nobel prize winners; card-carrying Communists, rock-ribbed Republicans, and Black Power nationalists; Broadway playwrights, Book-of-the-Month Club novelists, and a duly elected U.S. president are among the authors we will study with special attention to the intimate link between black writing and black music. Aiming at chronological and stylistic breadth, the syllabus will begin with poet Alice Dunbar Nelson (born 1875) and end with novelist Colson Whitehead (born 1969), with an array of better-known names -- W. E. B. Du Bois, Langston Hughes, Claude McKay, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, Ralph Ellison, James Baldwin, Gwendolyn Brooks, Amiri Baraka, Alice Walker, and Toni Morrison -- coming in between. Assignments will consist of two papers, one presentation, and one exam.

There are no prerequisites, but related courses such as E Lit 2151, E Lit 2152 and/or AFAS 255 are suggested. This course satisfies the Twentieth Century requirement in English and/or the one 300-level elective requirement in AFAS.

L14 E Lit 392W The Rise of the American Short Story

The course focuses on several short stories by six different authors in this order — Hawthorne: "My Kinsman," "Major Molineux," "The Birthmark," "Young Goodman Brown," "Artist of the Beautiful." Poe: "The Black Cat," "The Facts in the Case of M. Valdemar," "The Tell Tale Heart," "The Fall of the House of Usher." James: "The Jolly Corner," "The Figure in the Carpet," "The Real Thing." Crane: "The Upturned Face," "The Open Boat," "The Blue Hotel." Anderson: "Winesburg, Ohio." Hemingway: "Indian Camp," "A Clean Well-Lighted Place," "In Another Country," "Now I Lay Me." Faulkner: "A Rose for Emily," "The Evening Sun," "Pantaloons in Black." There are two brief papers two to three pages; two introductory paragraphs; two four- to six-page papers; and one paper covering an entire author. There is one rewrite in each category.

L14 E Lit 394W Writing For and About the Theater

In this course, students will learn to write for and about the theater, exploring different forms of dramaturgical and scholarly research as well as journalistic and academic writing. To build skills in both critical analysis and synthesis, students will learn how the key elements of the playwright's text (e.g., language, character, plot, setting) work to create meaning within the work of dramatic literature and how theatre-makers use the various "languages" of the stage (e.g., costume/scenic/lighting design, music, acting) to give expression to an overarching interpretation of the play. Because research is essential to this course, students will learn how to access a variety of library resources by working closely with our subject librarians. By the end of the semester, students will have assembled a portfolio consisting of both journalistic and academic performance reviews, a dossier of dramaturgical research, and a research-based scholarly paper.

L14 E Lit 395 Shakespeare

Credit 3 units.

L14 E Lit 3951 Shakespeare's Sonnets: Framing the Sequence

We will begin by exploring ways of reading a small number of individual sonnets, proceeding thereafter to think about patterns of meaning in language and image across broader groupings and the sequence as a whole. We will investigate the influence of earlier sonnet tradition, especially Petrarch's sonnets, and the relationship of the poems to modes of sexuality and selfhood. Finally, we will ask how some of Shakespeare's most creative readers — including Wilde, Booth, and Vendler — have responded to the challenges of the sonnets. Students will work on writing their own commentary on a group of poems.

L14 E Lit 3975 Wolves of Wall Street: American Business and Popular Culture

America's perceptions about Big Business and the Free Enterprise system have evolved and changed over time from the 1920s to the present. During the 1980s, for example, Oliver Stone's *Wall Street* seemed to endorse the notion that "greed is good." Today, however, the topic of rising income inequality has been connected with the collapse of prestigious Wall Street firms, the "housing bubble," a declining middle class, and widespread fear about the future of "The American Dream." This course examines a variety of artistic, ethical and historical perceptions about American Business as depicted in popular culture and the arts over the past hundred years. How have America's foremost artists (among them F. Scott Fitzgerald, Eugene O'Neill, Arthur Miller, Martin Scorsese), dealt with questions of conspicuous consumption, the acquisition of capital for its own sake, and the disparity between rich and poor? We survey several artistic genres and artistic forms, including American tragic works like *The Great Gatsby* and *Death of a Salesman*, to popular musicals such as *How to Succeed in Business without Really Trying* and *The Producers*.

L14 E Lit 399 Senior Research Seminar

This course is tailored to the needs of students who are pursuing honors in English in their senior year. It develops students' ability to gauge how different approaches affect the research and the outcome of a project in literary studies. It guides them in their research by analyzing and discussing research design, the construction of an archive, and the assessment and use of sources. Assignments include annotated bibliographies, summaries of the critical debate on student topics, abstract writing, research presentations, as well as drafts and final versions of chapters or essays. We workshop many of these assignments in the classroom and practice peer review. The seminar stretches over two semesters, ending before spring break, when honors work is due in the college. It is required for students who pursue honors by course work and by thesis.

L14 E Lit 402 Introduction to Graduate Studies I: Research

This course seeks to prepare students for successful doctoral study in English literature. We will examine the history of our discipline and its institutions, including shifting definitions of our objects of study and the histories of exclusion and inclusion that accompany these shifts. We will also consider issues of canonicity, especially as they relate to empire building both within and outside the academy. We will survey critical methodologies and consider what is at stake in the objects we read and the ways we choose to read them. Finally, we will introduce challenges to the traditional organizing frameworks of humanism and national literature. Focused on the academic discipline of literary study, we will also consider the new ways in which the English PhD is preparing students for multiple roles and careers both in and beyond academia.

L14 E Lit 403 Black and White in American Drama

This course addresses the complex issue of race in America through the 19th and 20th centuries as dramatized by American playwrights, black and white. Authors include Countee Cullen, Lillian Hellman, Eugene O'Neill, Jean Toomer, Langston Hughes and Arthur Miller. Prerequisites: junior standing, two 300-level courses or better.

Credit 3 units. Art: HUM

L14 E Lit 404 Topics for Writers: Beckett

Waiting for Godot, Happy Days, Krapp's Last Tape: these are but three of Samuel Beckett's revolutionary texts for theater. The complete canon of plays is examined for structure and compositional elements. Students undertake exercises in dramatic composition and perform a chamber presentation of *Endgame*. Course is intended for writers with some experience of the dramatic form. Intending students must interview with instructor in November.

Credit 3 units. Art: HUM

L14 E Lit 405 Living Influences: Poets and the Poets Who've Shaped Them

This course examines a number of very contemporary collections of poetry (e.g., from first-book writers such as Karen Volkman and Greg Williamson, to more established writers such as Carl Phillips and Frank Bidart) to discover how generations of writers speak to and through one another. The course considers the nature and possible anxieties of writerly influence and how traditional and/or canonical writers' voices, verse, and vision have shaped a number of poets writing today. This class requires at least a basic knowledge of poetry in English up to the 1950s as we move freely among writers such as Ben Jonson, George Herbert, Gerard Manly Hopkins and Emily Dickinson, as well as Pound, Eliot, Lowell and Plath.

Early English literature from *Beowulf* and Anglo-Saxon poetry, in translation, through major works in Middle English of the 14th and 15th centuries, exclusive of Chaucer.

Credit 3 units. Art: HUM

L14 E Lit 4111 Interdisciplinary Studies in the Humanities

This course will open with a survey of the classical tradition in pastoral/bucolic. We will consider questions of genre, intertextuality and ideology, and we will ask how "the lives and loves of herders" became favored ground for literary meditation on issues of surface and depth, reality and illusion, artifice and sincerity. This portion will involve intensive reading in translation of Theocritus, Vergil and Longus. In the second half of the semester, we will consider the survival, adaptation and deformation of ancient pastoral themes, forms and modes of thought in British and American writing from the 19th and 20th centuries. We will read works of Mark Twain, Kenneth Grahame, Thomas Hardy and Tom Stoppard.

L14 E Lit 4172 Roman Remains: Traces of Classical Rome in Modern British Literature

This course will examine the use of the Roman textual and material inheritance in poets, novelists and critics of the late 19th and 20th centuries working in Britain, and will ask how modernity addresses the claims of the classical tradition. We will place Thomas Hardy's *Poems of 1912-13* next to Vergil's *Aeneid*, then survey Hardy's relationship to the visible remainders of Rome and the people it conquered — roads, barrows, forts — in the landscape of Dorset. After examining the representation of the Celtic hill-fort in fiction, and the legacy of Vergilian representations of the countryside in poetry, we will consider representations of Rome in light of modern imperialism (Joseph Conrad's *Heart of Darkness* and Ezra Pound's "Homage to Sextus Propertius") and examine the place of Vergil in T.S. Eliot's critical and poetic practice.

L14 E Lit 4204 Film Theory

This course is an introduction to both classical and contemporary film theory. Beginning with the earliest attempts to treat cinema as a new and unique art form, the course initially reviews the various ways in which film theory attempted to define cinema in terms of its most essential properties. The course then examines more contemporary developments within film theory, more specifically its attempt to incorporate the insights of other critical and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory and postmodernism. Throughout the course, we consider questions regarding the ontology of cinema, its relation to spectators, and the various ways in which its formal properties create meaning. Readings for the course include the major works of Sergei Eisenstein, Andre Bazin, Christian Metz, Laura Mulvey and Fredric Jameson. Required screenings.

L14 E Lit 424 Topics in American Literature II: Modernisms in America

This course offers an advanced introduction to both the literature and the concept of modernism, the "ism" used to mark the experimental verve of early 20th-century writing and to grasp its ties to modernity or the modern social world. As the course title suggests, we devote most of our time to the career of modernism in the United States, a place imagined as both the modernist nation par excellence and the desert modernism escaped to be born. Three groups of primary texts — early modernist experiments, 1920s modernist landmarks and Great Depression revisions — illuminate the grand ambitions of eccentric literary forms and sequestered avant-garde movements; the public disputes and buried alliances between "high" expatriate and Harlem Renaissance modernisms; and the influential Depression-era reinterpretation of modernism as reactionary self-indulgence. The syllabus features fiction, poetry and drama by old and new literary celebrities: Djuna Barnes, John Dos Passos, T.S. Eliot, F. Scott Fitzgerald, Mike Gold, Ernest Hemingway, Nella Larsen, Meridel LeSueur, Claude McKay, Clifford Odets, Tillie Olsen, Ezra Pound, Jean Toomer and Richard Wright. A shorter list of critical essays highlights

modernism's tendency to theorize itself while introducing 21st-century perspectives from the "New Modernist Studies." Satisfies the American literature requirement. For undergraduates, junior or senior standing is required.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L14 E Lit 425 Early American Literature: American Modernisms

This seminar offers an advanced introduction to both the literature and the concept of modernism, the "ism" used to mark the experimental verve of early 20th-century writing and to grasp its ties to modernity, or the modern social world. As the course title suggests, we devote most of our time to the career of modernism in the United States, a place imagined as both the modernist nation par excellence and the desert modernism escaped to be born. Three groups of primary texts — early modernist experiments, 1920s modernist landmarks, and Great Depression revisions — illuminate the grand ambitions of eccentric literary forms and self-sequestered avant-garde movements; the public disputes and buried alliances between "high" expatriate and Harlem Renaissance modernisms; and the influential Depression-era reinterpretation of modernism as reactionary self-indulgence. The syllabus features fiction, poetry and drama by old and new literary celebrities: Djuna Barnes, John DosPassos, T.S. Eliot, F. Scott Fitzgerald, Mike Gold, Ernest Hemingway, Ella Larsen, Meridel LeSueur, Claude McKay, Clifford Odets, Tillie Olsen, Ezra Pound, Jean Toomer and Richard Wright. A shorter list of critical essays highlights modernism's tendency to theorize itself while introducing 21st-century perspectives from the "New Modernist Studies."

Credit 3 units. A&S IQ: HUM, SD Art: HUM

L14 E Lit 425C Humanities by the Numbers

To what extent can computational techniques that draw on statistical patterns and quantification assist us in literary analysis? Over the semester, we juxtapose the close reading of historical documents or literary works with the "distant reading" of a large corpus of historical data or literary texts. We ask how the typically "human" scale of reading that lets us respond to literary texts can be captured on the "inhuman" and massive scales at which computers can count, quantify and categorize texts. While this class introduces students to basic statistical and computational techniques, no prior experience with technology is required. Prerequisites: two 200-level or one 300-level course in literature or history. This is a topics-type course and the specific documents and works examined vary from semester to semester. Please consult semester course listings for current offerings.

Literature of the mid-19th century with attention to social and intellectual backgrounds and the sources of the transcendentalist movement.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L14 E Lit 426C Imagining the City: Crime and Commerce in Early Modern London

The astonishing demographic and economic growth of early modern London, and the rapid increase in spatial and social mobility that accompanied this growth, seemed to haringer, in the eyes of many contemporaries, a society in crisis and perhaps on the brink of collapse. As increasing numbers of vagrants or masterless men flocked to the metropolis and a growing number of people — apprentices, domestic labor, street vendors, etc. — lived on the fringes of legitimacy and at risk of lapsing into vagrancy, policing early modern London provided unique challenges for authorities. At the same time, the very notion of the social — a shared space of kinship and community — could often seem to be under threat as an emerging market and a burgeoning commodity culture reshaped the traditional underpinnings of social and economic transactions. Yet, late Tudor and early Stuart London remained by far England's most prosperous metropolis — its primary market, home to a burgeoning print culture and nourishing theater — and emerged, eventually, as the epicenter of a global economy. This course considers the topographic, social and institutional configuration of early modern London and the ways in which these were reimagined and negotiated in the literature of the period. Drawing on the drama of the period and a wide array of pamphlet literature, we discuss how civic institutions handled the growing influx of the poor and adapted to the increasing power of an emerging bourgeoisie who asserted themselves in unprecedented ways. In addition, we consider secondary sources ranging from maps, theories of urban space and social and economic historiography as well as digital archives and computational techniques that allow us to "scale up" our thinking about early modern London to a vast corpus of texts and documents.

Credit 3 units. A&S IQ: HUM EN: H

L14 E Lit 427 American Literature: The Rise of Realism to World War I

The maturing of American literature from the regional origins of realistic fiction just prior to the Civil War through the early naturalist novel and the beginnings of modern American poetry. Credit 3 units. Art: HUM

L14 E Lit 428 Modernism and Postmodernism

Readings in early sources of 20th-century developments, followed by a selective survey of literary discourse from the 1920s through the 1990s in the United States. Prerequisites: junior standing and 6 units of literature or graduate standing. Credit 3 units. Art: HUM

L14 E Lit 4282 English Modernist Fiction

The first half of the 20th century produced some of English fiction's greatest individual achievements, linked by writers' attempts to represent, through narrative experiments, a world in which many certainties about self and society were dissolving. Attentive reading of 10 novels or short story collections; study of the historical and cultural contexts to which these writers were responding. Among writers considered: E.M. Forster, Virginia Woolf, D.H. Lawrence, Rebecca West, Joseph Conrad, Katherine Mansfield and Ford Madox Ford. Credit 3 units.

L14 E Lit 429 American Fiction Since 1945

Credit 3 units. A&S IQ: HUM Art: HUM

L14 E Lit 431 English Drama, Exclusive of Shakespeare, to 1642

Studies of selected major plays against a background of change and tradition in English drama from its beginnings to the closing of the theaters. Credit 3 units. Art: HUM

L14 E Lit 4312 Early Drama

This unit is concerned with English and European drama and spectacle from late Roman theater onward: primarily in England, but with comparative material from France and Italy. The chronological span of the course ends at about 1600; the working assumption is that there is no clean break between "medieval" and "Renaissance" drama, but that the theaters and scripts of the late 16th century should be understood as developing out of, as well as departing from, earlier theatrical traditions and practices. Credit 3 units. Art: HUM

L14 E Lit 432 Topics in Renaissance Drama

A study of Elizabethan and Jacobean theatrical culture — the plays, players, playwrights and audiences of public theaters, private theaters and banqueting halls. Study includes the plays of Lyly, Kyd, Marlowe, Jonson, Chapman, Ford, Beaumont, Fletcher, Marston, Middleton, Webster and Shakespeare. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 4323 Reading in the Renaissance: Literature and Media in Early Modern England

Examination of reading practices among original audiences for Wyatt, Sidney, Shakespeare, Donne, Jonson, Herrick, Marvell, Rochester, and Dryden and application to our understanding and experience of early modern texts.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 432A Programming for Text Analysis

This course will introduce basic programming and text-analysis techniques to humanities students. Beginning with an introduction to programming using the Python programming language, the course will discuss the core concepts required for working with text corpora. We will cover the basics of acquiring data from the web, string manipulation, regular expressions, and the use of programming libraries for text analysis. Later in the course, students will be introduced to larger text corpora. They will learn to calculate simple corpus statistics as well as techniques such as tokenization, chunking, extraction of thematically significant words, stylometrics and authorship attribution. We will end with a brief survey of more advanced text-classification terminology and topics from natural language processing such as stemming, lemmatization, named-entity recognition, and part-of-speech tagging. Same as L93 IPH 432

L14 E Lit 434 Topics in English and American Drama

Varies from semester to semester.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L14 E Lit 435 Childhood and Society: The Formation of Children's Literature

An intensive examination of some of the major works that have shaped the canon and conception of children's literature in the English-speaking world. Among the authors studied are George MacDonald, Mark Twain, Kenneth Grahame, L. Frank Baum, Lewis Carroll, Robert Louis Stevenson, Rudyard Kipling and others. If time permits at the end of the course, we examine some works that appeared in the *Brownies' Book*, the children's publication of the NAACP that appeared in 1920 and 1921, edited by W.E.B. Du Bois and Jessie Fauset, a significant attempt to create a literature for children of color.

Credit 3 units. Art: HUM

L14 E Lit 436 Craft of Fiction: Dialogue

A literature/creative writing hybrid course, we concentrate on the element of dialogue in fiction. We focus on 20th-century novels and stories that use dialogue in radical ways or place conversational dynamics at the center of their projects, probably including works by Don DeLillo, Henry Green, Grace Paley and Philip Roth. We consider the architecture of conversations — the evasions and hidden agendas; the art of the well-made monologue; how speech is shaped by varieties of linguistic capital; and secrets as a narrative device, extending into issues of conspiracy and paranoia. Because this is a craft rather than a traditional literature course, we approach the texts as creative writers (although experience as such is not required), considering what they have to say through a primary emphasis on the means they develop to say it, and we put the craft into practice: assignments include both a critical paper and a short story using radical elements of dialogue. We also make room

for some consideration of the dynamics of actual conversations, outside of fiction, through a reading of some conversational analysts and speech-act theorists, and through some real-world experiments.

Credit 3 units. Art: HUM

L14 E Lit 4655 The Pre-History of Blogging: Social Media of the Enlightenment

This course will explore the ways in which the Enlightenment — in France, England, Germany and the U.S. — was shaped by the emergence of new literary forms, media and technologies of communication. Like our blogs, Facebook and email, the 18th century had its new social media — newspapers and literary journals, letters that surged through the national postal systems — as well as new social institutions — salons and coffeehouses — that served as forums for public debate. We will examine these novelties in order to investigate the often ambivalent heritage of the Enlightenment: the use of media to exchange knowledge and express dissent; the use of media for surveillance and state control.

L14 E Lit 486 The Business of Books

Book publishing shapes our literary and intellectual landscape in defining ways, yet only with the recent rise of Publishing Studies has the theory and practice of publishing become a serious subject of attention within the academy. This course offers a broad introduction to publishing, with a practical emphasis on contemporary literary publishing. We will explore how publishing communities form in relation to aesthetics, demographics, and technologies, and will consider how ethics and business practices are defined within these communities. On the applied side, we will study editing, contracts, marketing, sales & distribution, infrastructure, and media, and students

will write reader's reports, marketing plans, and a final paper analyzing a contemporary publishing project and placing its work in relation to the historical and cultural context, demonstrating how each particular publishing practice is adapted to its own cultural ecosystem. Industry professionals will visit to speak with the class by Zoom, and Professor Riker brings two decades of experience as a book publisher, author, and reviewer. Alongside these other activities, over the course of the semester students will follow the progression of a book published by the nationally acclaimed publishing house Dorothy, a Publishing Project, of which Professor Riker is the publisher.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L14 E Lit 493 Spenser

Readings in the *Faerie Queene* and *Shepherd's Calendar*, with attention to Spenser's deliberate fashioning of a literary career.

Credit 3 units. Art: HUM

L14 E Lit 4930 The Unmaking and Remaking of Europe: The Literature and History of the European War of 1914-1918

The Great War of 1914-1918 is one of the most momentous events in history. We can approach its broad European import by reading its literatures comparatively. Far wider than the concerns of any one national ideology, the literature of record represents a profound crisis in the European cultural imaginary. A number of critical and interpretive issues will be in play in our readings, which will move through three major phases. We begin with the powerful immediacy of trench poetry (1914-1919), develop into the constructed narratives of the great postwar novels and memoirs (1920-1931), and then turn toward the retrospect of the 1930s, which is also the prospect on the next, now inevitable, war. The authors featured include combatant and civilian writers, names well-known and not so famous: Mann, Apollinaire, Owen, Pound, Cocteau, H.D., Woolf, Maurois, West, Celine, Joyce, Musil, Eliot, Rosenberg, Sassoon, Graves, Hardy, Trakl, Stramm, Lichtenstein, Péguy, Barbusse, Manning, Jünger, Zweig, Brittain, and Kroner. All readings for class will be in English translation. Our secondary literature will provide approaches to specific texts and models of literary and cultural history that represent the longer-range importance of the war. Same as L16 Comp Lit 493

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L14 E Lit 494 Milton

Major poems and prose works in relation to literary and intellectual currents of the 17th century.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L14 E Lit 494C Seminar: Translating Gertrude Stein

This course may offer a variety of topics. Semester sub-title will vary. In Fall 2008, it was offered as an in depth study of the individual through autobiographies. At other times before, it has been offered as a course on visual poetics from antiquity to the present. See department for further details.

Same as L16 Comp Lit 494

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L14 E Lit 4951 Seminar: The 19th-Century European Novel

L14 E Lit 496 Shakespeare Advanced Course

A study of Shakespeare's career as a dramatist, with intensive work on particular plays in the light of critical traditions. Prerequisite: E Lit 395C or permission of instructor. Credit 3 units. A&S IQ: HUM Art: HUM

L14 E Lit 4968 Digital Methods in Literary Analysis: Shakespeare by the Numbers

This course explores how emerging digital techniques can help us read literary texts in new ways. We read a set of Shakespeare plays closely but also work with a large corpus of plays by Shakespeare and his contemporaries as we cover basic text-mining and visualization techniques and use simple statistical and quantitative approaches to think about questions of genre and style. We ask how the typically "human" scale of reading that lets us respond to these texts can be captured on their massive scales at which computers can count, quantify and categorize. What nuance is lost in this translation between "close" and "distant" readings and what insights are gained? Credit 3 units. A&S IQ: HUM EN: H

L14 E Lit 4969 Shakespeare in Production

This course examines Shakespeare's comedies in performance. Combining scene work and production history, students gain access to the world of the comedies from both a hands-on, theoretical and historical perspective. Prerequisites: Drama 395C or permission of instructor. Same as L15 Drama 469. Credit 3 units. A&S IQ: HUM EN: H

L14 E Lit 4976 Advanced Seminar in Literature

This seminar is an interdisciplinary examination of how Americans represented the Civil War during and after the titanic conflict, with special attention given to the period between 1865 and 1915. The course explores how painters, novelists, photographers, sculptors, essayists, journalists, philosophers, historians, and filmmakers engaged the problems of constructing narrative and reconstructing national and individual identity out of the physical and psychological wreckage of a war which demanded horrific sacrifice and the destruction of an enemy that could not be readily dissociated from the self. Same as L22 History 4976. Credit 3 units. A&S IQ: HUM EN: H

L14 E Lit 498 The Spenser Lab

This course involves graduate and undergraduate students in the ongoing work of the Spenser Project, an interinstitutional effort to produce a traditional print edition of the *Complete Works of Edmund Spenser*. Credit 3 units. A&S IQ: HUM EN: H

L14 E Lit 498A Special Topics in Playwriting: Art and Activism

Taught by guest teaching artist, Regina Taylor, playwright, director, stage/screen actor, this course will focus on how art can effect change through personal expression. The monumental cultural shift that is in motion throughout the world will be explored through the specific lens of each student's life. Students will write short pieces and one-act plays that will explore where

they are at this moment in time. Works in the class may be added to Regina Taylor's black album mixtape. No playwriting experience necessary. Course open only to juniors, seniors and graduate students.

Same as L15 Drama 498
Credit 3 units. BU: HUM

L14 E Lit 498W The Spenser Lab

In this writing-intensive course, the students are given a variety of writing tasks: writing commentaries, introductions, software manuals, grant proposals, software requirements and design documents (SRDDs).

Credit 4 units. A&S IQ: HUM, WI EN: H

Environmental Studies

Environmental Studies offers one major and two minors. The Environmental Analysis major (<https://enst.wustl.edu/academic-requirements/>) creates a framework to integrate environmental courses and places a strong emphasis on critical thinking and general analytical and problem-solving skills. We offer an explicit focus on the application of those skills to analyze and design solutions to contemporary environmental challenges. The curriculum for this major is integrated and interdisciplinary, drawing from many disciplines across Arts & Sciences and the university as a whole. The major thus captures the strengths of the traditional academic departments and incorporates the interdisciplinary innovation necessary to explore fully the multiple issues and questions posed by the study of the environment. Our curriculum is sequenced and scaffolded so that students encounter concepts at increasing levels of depth, analysis, and real-world application. We offer opportunities for students with different disciplinary interests to repeatedly encounter one another and to engage in reflection with peers throughout, especially during our fourth-year reflection seminar.

The Interdisciplinary Environmental Analysis minor (<https://enst.wustl.edu/academic-requirements/#anchor-group-9814>) prepares students to tackle real-world environmental challenges by providing more robust opportunities for interdisciplinary knowledge and skill development. In particular, the minor is structured to provide students with opportunities to strengthen their critical analysis and problem-solving skills through participation in team-based learning experiences and, where possible, by engaging in real-world issues.

The Environmental Studies minor (<https://enst.wustl.edu/academic-requirements/#anchor-group-9799>) includes core course work in biology, earth science, and political science. Students may choose upper-level elective courses in a variety of natural and social science disciplines. Please visit the Environmental Studies website (<http://enst.wustl.edu/>) for more information.

Students can also choose from among three environmental majors in the following academic departments: Biology, Earth and Planetary Sciences, and Political Science. For more information about these related majors, please visit the following *Bulletin* pages:

- Environmental Biology (p. 376)
- Environmental Earth Sciences (p. 499)
- Environmental Policy (p. 941)

Majors

The Major in Environmental Analysis

The Environmental Analysis major is a flexible, 49-credit program that focuses on developing critical skills and competencies in interdisciplinary environmental problem solving. It is ideal for students seeking interdisciplinary training focused on the environment and sustainability, and it is designed to stand alone or to complement another primary major.

Total units required: 49

Required courses (28 units):

- Choose three of the following (9 units):

Code	Title	Units
Biol 2950	Introduction to Environmental Biology	3
EnSt 101	Earth's Future: Causes and Consequences of Global Climate Change (I60 course) *	3
EnSt 102	To Sustainability and Beyond: People, Planet, Prosperity *	3
EnSt 105	Sustainability in Business	3
EnSt 111	Environmental Racism and the Health of Everyone *	3
EnSt 215	Introduction to Environmental Humanities	3
EnSt 250	One Health: Linking the Health of Humans, Animals, and the Environment	3
EPSc 201	Earth and the Environment **	4
EPSc 202	Introduction to Earth, Environmental, and Planetary Science **	3
Pol Sci 2010	Introduction to Environmental Policy	3

- * Open to first-year students only. Per college rules for Beyond Boundaries courses, students are allowed to take one per semester; thus, students may count two toward the major.
- ** Students may count EPSc 201 or EPSc 202 toward the major.

- Required core courses in analysis and communication (12 units); choose four of the following:

Code	Title	Units
Drama 214	Public Speaking: Embodied Communication	3
EnSt 315	Fallout: Analyzing Texts and Narratives of the Nuclear Era	3
EnSt 316	Beyond the Evidence	3
EnSt 350W	Writing Skills for Environmental Professionals	3
EnSt 357	Multiparty Environmental Decision Making	3
EnSt 364	Field Methods for Environmental Science	3
EnSt 380	Applications in GIS	3
EnSt 415W	Writing Home: Creating Cultural Guides for Environmental Site Workers	3
EnSt 481	Advanced GIS	3
Math 2200	Elementary Probability and Statistics	3
Math 3200	Elementary to Intermediate Statistics and Data Analysis	3

Note: Students may count a fifth analysis and communication course toward the depth electives.

- Required course in social identity and environment (3 units); choose one of the following:

Code	Title	Units
EnSt 111	Environmental Racism and the Health of Everyone	3
GeSt 232	Intergroup Dialogue: Race/Ethnicity	3
SOC 2010	The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S.	3
SOC 2110	Social Inequality in America	3
SOC 3212	The Social Construction of Race	3
SOC 2520	Inequality By Design: Understanding Racial/Ethnic Health Disparities	3

- Required interdisciplinary environmental capstone course (3 units); choose one of the following:

Code	Title	Units
EnSt 405	Sustainability Exchange: Community and University Practicums	3
EnSt 407	RESET - Renewable Energy Policy, Engineering and Business	3
EnSt 452	International Climate Negotiation Seminar	var.; max 6
EnSt 539	Interdisciplinary Environmental Clinic	var.; max 6
EnSt 498	Senior Honors Research	3

Note: Due to the intensity of these project-based course, students may only take one per semester. Students may count a second capstone course toward the depth electives.

- Fourth-year reflection seminar (1 unit):

Code	Title	Units
EnSt 492	Environmental Studies Fourth-Year Reflection Seminar	1

Note: The purpose of this seminar is to create a written narrative portfolio that synthesizes, integrates, and reflects on the student's learning across the courses and experiences of the major. Reflection will occur through personal writing and discussion with peers in the course.

Elective Courses (21 units):

Students will choose depth and breadth elective courses from the three categories below: Social Sciences, Humanities and Arts, and Natural Science. Students must choose seven elective courses, with at least four courses from one category and at least one course in each of the other two categories. This means that students can choose a 5/1/1 combination or a 4/2/1 combination from the elective categories.

The following flexibility is allowed regarding substitutions:

- Students may count a fifth analysis and communication course toward the depth electives.
- Students may count a second capstone course toward the depth electives.
- Students may request one course substitution outside of the electives listed below to take advantage of unique one-time or rarely offered courses.

To complete any major, the College of Arts & Sciences requires that students must complete no fewer than 18 units of courses numbered 300 or above within the major with a grade of C- or better. There is no double counting of advanced (300- and 400-level) courses between two majors or between a major and a minor. This "no double-counting rule" also applies to students who are double majoring across schools.

- Social sciences electives:

Code	Title	Units
AMCS 299	The Study of Cities and Metropolitan America	3
Anthro 360	Placemaking St. Louis	3
Anthro 3608	Caribbean Island Vulnerabilities: Puerto Rico	3
Anthro 361	Culture and Environment	3
Anthro 3613	Follow the Thing: Global Commodities & Environment	3
Econ 451	Environmental Policy	3
EnSt 251	Metropolitan Environment	3
EnSt 255	Systems Thinking	3
EnSt 310	Ecological Economics	3
EnSt 316	Beyond the Evidence	3
EnSt 340	Energy Governance in Israel and the Middle East	3
EnSt 341	International Energy Politics	3
EnSt 346	Environmental Justice	3
EnSt 347	Sustainable Cities	3
EnSt 461	Intro to Environmental Law	3
EnSt 481	Advanced GIS	3
MGT 401M	Sustainable Development and Conservation Through Entrepreneurial Collaboration: Madagascar	3

MGT 402	Ethical Issues in Managerial Decision Making	1.5
MGT 460L	Introduction to Social Entrepreneurship	3
MGT 460M	Business of Social Impact	1.5
MPH 5002	Epidemiology *	3
MPH 5323	TPS: Climate Change and Public Health *	3
Pol Sci 363	Quantitative Political Methodology	3
Pol Sci 389	Power, Justice and the City	3
Pol Sci 495	Research Design and Methods	3
SOC 3350	Poverty and the New American City	3
SOC 3510	Sick Society: Social Determinants of Health and Health Disparities in the United States	3
SOC 4810	Global Structures and Problems	3

* Students should request permission from the instructor to enroll in these courses.

- Environmental humanities electives:

Code	Title	Units
AFAS 3075	Recipes for Respect: Black Foodways in the United States	3
Comp Lit 4111	Pastoral Literature	3
Drama 351	Intro to Playwriting	3
EnSt 315	Fallout: Analyzing Texts and Narratives of the Nuclear Era	3
EnSt 415W	Writing Home: Creating Cultural Guides for Environmental Site Workers	3
History 3194	Environment and Empire	3
IPH 431	Statistics for Humanities Scholars: Data Science for the Humanities	3
Phil 235F	Introduction to Environmental Ethics	3
Writing 309	Writing the Natural World	3

- Natural science electives:

Code	Title	Units
Anthro 3053	Nomadic Strategies and Extreme Ecologies	3
Anthro 4285	Environmental Archaeology	3
Anthro 4803	Advanced GIS Modeling and Landscape Analysis	3
Biol 3220	Woody Plants of Missouri	3
Biol 349	Microbiology	4
Biol 373W	Laboratory on the Evolution of Animal Behavior (Writing Intensive)	3

Biol 381	Introduction to Ecology	3
Biol 3900	Science for Agriculture and Environmental Policy	3
Biol 419	Community Ecology	3
Biol 4193	Experimental Ecology Laboratory	4
Biol 4195	Disease Ecology	4
EnSt 364	Field Methods for Environmental Science	3
EnSt 365	Applied Conservation Biology	3
EnSt 375	Urban Ecology	3
EnSt 481	Advanced GIS	3
EPSc 219	Energy and the Environment	3
EPSc 323	Biogeochemistry	3
EPSc 336	Minerals and Rocks in the Environment	3
EPSc 340	Minerals, Rocks, Resources and the Environment	4
EPSc 385	Earth History	3
EPSc 386	The Earth's Climate System	3
EPSc 413	Introduction to Soil Science	3
EPSc 428	Hydrology	3
EPSc 454	Exploration and Environmental Geophysics	4
LAND 551A	Landscape Ecology	3

Related Majors

Students interested in studying the environment can also choose from relevant majors in the departments of Biology, Earth and Planetary Sciences, and Political Science.

Please visit the following *Bulletin* pages for more information about these majors:

- Earth and Planetary Sciences (p. 499)
- Environmental Biology (p. 378)
- Environmental Policy (p. 942)

Minors

The Minor in Interdisciplinary Environmental Analysis

This minor was developed to prepare students to tackle real-world environmental challenges by providing more robust opportunities for interdisciplinary knowledge and skill development. The minor is structured to provide students with opportunities to strengthen their critical analysis and problem-solving skills through participation in team-based, experiential, often community-engaged learning around "wicked" real-world problems. Most courses do not have prerequisites. Courses that appear as options in multiple sections may only be taken for credit toward one section of the minor.

Total units required: 18

Required courses (students choose three of the following; 9 units):

Code	Title	Units
EnSt 315	Fallout: Analyzing Texts and Narratives of the Nuclear Era	3
EnSt 316	Beyond the Evidence	3
EnSt 350W	Writing Skills for Environmental Professionals	3
EnSt 357	Multipart Environmental Decision Making	3
EnSt 364	Field Methods for Environmental Science	3
EnSt 380	Applications in GIS	3
EnSt 415W	Writing Home: Creating Cultural Guides for Environmental Site Workers	3

One interdisciplinary environmental capstone course (3 units):

Code	Title	Units
EnSt 405	Sustainability Exchange: Community and University Practicums	3
EnSt 407	RESET - Renewable Energy Policy, Engineering and Business	3
EnSt 452	International Climate Negotiation Seminar	var.; max 6
EnSt 539	Interdisciplinary Environmental Clinic	var.; max 6

One advanced elective in natural science (3 units)

(prerequisites: EnSt 481 [EnSt 380]; EPSc 454 [EPSc 201]):

Code	Title	Units
Biol 3900	Science for Agriculture and Environmental Policy	3
EnSt 364	Field Methods for Environmental Science	3
EnSt 365	Applied Conservation Biology	3
EnSt 481	Advanced GIS	3
EPSc 386	The Earth's Climate System	3
EPSc 454	Exploration and Environmental Geophysics	4

One advanced elective in social science and humanities

(3 units) (prerequisites: Econ 451 [Econ 1011]; EnSt 481 [EnSt 380]):

Code	Title	Units
Econ 451	Environmental Policy	3
EnSt 310	Ecological Economics	3
EnSt 315	Fallout: Analyzing Texts and Narratives of the Nuclear Era	3
EnSt 316	Beyond the Evidence	3
EnSt 340	Energy Governance in Israel and the Middle East	3
EnSt 341	International Energy Politics	3
EnSt 346	Environmental Justice	3
EnSt 347	Sustainable Cities	3
EnSt 415W	Writing Home: Creating Cultural Guides for Environmental Site Workers	3
EnSt 461	Intro to Environmental Law	3
EnSt 481	Advanced GIS	3
History 3194	Environment and Empire	3
Approved for students who entered Spring 2020 or before:		
Pol Sci 340	Topics	3
Pol Sci 3752	Topics in American Politics	3
Pol Sci 4043	Public Policy Analysis, Assessment and Practical Wisdom	3

The Minor in Environmental Studies (For Students Starting Fall 2021 or After)

Total unit required: 18

Required core introductory courses (students choose two of the following; 6 units):

Code	Title	Units
Biol 2950	Introduction to Environmental Biology	3
EnSt 105	Sustainability in Business	3
EnSt 110	Environmental Issues	3
EnSt 111	Environmental Racism and the Health of Everyone	3
EnSt 215	Introduction to Environmental Humanities	3
EnSt 250	One Health: Linking the Health of Humans, Animals, and the Environment	3
EPSc 201	Earth and the Environment *	4
EPSc 202	Introduction to Earth, Environmental, and Planetary Science *	3
EPSc 219	Energy and the Environment *	3
Pol Sci 2010	Introduction to Environmental Policy	3

* Students can take only one of the following: EPSc 201, EPSc 202, or EPSc 219.

One elective in analysis and communication (3 units):

Code	Title	Units
Anthro 4803	Advanced GIS Modeling and Landscape Analysis	3
EnSt 316	Beyond the Evidence	3
EnSt 350W	Writing Skills for Environmental Professionals	3
EnSt 357	Multiparty Environmental Decision Making	3
EnSt 380	Applications in GIS	3
EnSt 405	Sustainability Exchange: Community and University Practicums	3
EnSt 407	RESET - Renewable Energy Policy, Engineering and Business	3
EnSt 452	International Climate Negotiation Seminar	var.; max 6
EnSt 481	Advanced GIS	3
EnSt 539	Interdisciplinary Environmental Clinic	var.; max 6

One elective in environmental humanities (3 units):

Code	Title	Units
AFAS 3075	Recipes for Respect: Black Foodways in the United States	3

EnSt 316	Beyond the Evidence	3
EnSt 405	Sustainability Exchange: Community and University Practicums	3
History 3194	Environment and Empire	3

Other preapproved substitutions:

Courses that are offered less frequently or that have more prerequisites but that are preapproved substitutions for these requirement categories include the following:

Advanced science electives

Code	Title	Units
EPSc 429	Environmental Hydrogeology	3
EPSc 444	Environmental Geochemistry	3
EPSc 484	Paleoenvironmental Reconstruction	3

Advanced political science or law electives

Code	Title	Units
Econ 451	Environmental Policy	3
EnSt 407	RESET - Renewable Energy Policy, Engineering and Business	3
EnSt 452	International Climate Negotiation Seminar	var.; max 6

Advanced anthropology or ethics electives

Code	Title	Units
Anthro 3612	Population and Society	3
Anthro 379	Archaeology and Climate Change	3

Courses

Visit online course listings to view semester offerings for L82 EnSt (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L82&crslvl=1:4>).

L82 EnSt 101 Earth's Future: Causes and Consequences of Global Climate Change

Earth's Future: Causes and Consequences of Global Climate Change examines the following: 1) the physical basis for climate change; 2) how climates are changing and how we know and assess that climates are changing; and 3) the effects of climate change on natural and human systems. The course is team-taught and will involve participation by scholars across the university with expertise in specific subjects. This is a broad introductory course for first-year students, and it presumes no special subject matter knowledge on the part of the student. This course is for first-year (non-transfer) students only.

Same as I60 BEYOND 101

Credit 3 units. A&S: FYBB A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L82 EnSt 102 To Sustainability and Beyond: People, Planet, Prosperity

This course combines interdisciplinary instruction with applied project work. Students will be introduced to global concepts in sustainability and examine how they relate to specific issues in the greater St. Louis community, learning what it means to be civic-minded stewards of social and ecological systems. In addition, students will work on developing the critical "soft skills" needed for success on the job, such as effective communication techniques, project management, and leadership. Students will emerge from the course with a systems-level understanding of sustainability, a working knowledge of the fundamentals of community engagement, and an appreciation for values-based civic stewardship. Experience in this course will prepare students for applied project-based work in other courses or internships, regardless of academic discipline. This course is for first-year (non-transfer) students only.

Same as I60 BEYOND 140

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC EN: S

L82 EnSt 105 Sustainability in Business

In today's complex business environment, organizations are constantly challenged to develop innovative policies and processes that ensure profitability. Some leaders believe that the sole purpose of business is to maximize shareholder wealth and that fiscal sustainability is not compatible with environmental responsibility. In reality, ecological and economic performance need not — and should not — be mutually exclusive. Fortunately, the outmoded mindset of "profit-at-any-cost" is beginning to shift as organizations recognize the importance of adopting balanced business practices that promote social equity and environmental prosperity without sacrificing financial stability. Organizations that embed sustainability into their corporate strategies increase operational efficiency by using resources more responsibly and minimizing waste. In an increasingly crowded and competitive marketplace, sustainability has become a source of competitive advantage through which an organization can have a positive impact not only on the financial "bottom line" but also on the environment and society. In this course, we explore key concepts and issues driving sustainability in business. We also examine core sustainability principles, frameworks, and tools that companies can use to better understand and work within the natural systems that enable their existence and sustain their operations. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L82 EnSt 110 Environmental Issues

This course examines the science behind current environmental issues, with emphasis on ecology and conservation. Students will gain an understanding about the consequences of the way that humans currently interact with the natural environment and potential solutions that would allow long-term sustainability of the Earth. Topics will include: human population growth, ecosystem structure and diversity, types and origin of pollution, global climate change, energy resources and use, challenges to feeding the world, and the interaction between the environment and human health. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L82 EnSt 111 Environmental Racism and the Health of Everyone

Environmental inequalities threaten the health and well-being of low-income communities and communities of color who are increasingly on the frontlines in the fight against climate change, air and water pollution, food security, and many other urgent environmental problems. Like many urban areas, the St. Louis region faces egregious social, environmental and health disparities. In this course, we critically examine the role of racism and other structural policy inequalities that produce unequal environments and how those unequal environments contribute to public health disparities in St. Louis and beyond. We explore the use of public health data, policy options, and case studies that allow for evidence-based solutions to environmental racism and improved population health. This course that combines small group sessions, case studies and speakers working on environmental justice in the St. Louis region. We provide students with interdisciplinary perspectives and methods, challenging them to address racism and environmental policy through a population health lens. Student learning will be assessed through case studies, reflections, online assignments, and exams. This course is for first-year (non-transfer) students only. Students who are not first year students will be unenrolled from this course.

Same as I60 BEYOND 115

Credit 3 units. A&S IQ: SSC EN: S

L82 EnSt 115 Introduction to Conservation Biology

This course is introductory level and appropriate for both non-science majors as well as potential science majors who may be investigating their interests. Conservation Biology will focus on biodiversity, its preservation and current threats, as well as obstacles to its preservation for the future. We will examine the different levels of biodiversity present in nature as well as highlighting its importance, and why it matters to the human population. In studying Conservation Biology, students will also learn key concepts from related fields such as evolution and ecology that are necessary to understand concepts and concerns. Course topics include species and ecosystem management, restoration, strategies to combat threats, and past successes and failures relating to biodiversity conservation. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L82 EnSt 121 Ampersand: Pathfinder — A Sense of Place: Discovering Missouri's Natural Heritage

This is the first course in the Pathfinder program, and it will introduce students to their new home for the next four years. This interdisciplinary course will cover Missouri geology, climate, archaeology, and native megafauna. We will explore many of the habitats found in Missouri (prairie, forest, glade, and stream) and the biology of our diverse plant and animal wildlife (arthropods, mollusks, fish, salamanders, lizards, birds, and mammals). This will provide a foundation that will inform the study of ecology, policy and management in other courses. In addition to weekly lectures and discussions, students in this course will visit sites across the state during three weekend camping trips and two one-day trips. Attendance on field trips is an essential component of the course. Course enrollment is open only to students admitted into the Pathfinder Fellowship program.

Same as L61 FYP 121

Credit 3 units. A&S: AMP A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L82 EnSt 122 Ampersand: Pathfinder — A Sense of Place: Discovering the Environment of St. Louis

Students will go exploring in and around St. Louis. They will learn about the St. Louis backyard and their "home" for the next four years. Through field trips, readings, and discussion, students will see firsthand what challenges face the environment and the people who live here. They will learn how to examine multiple perspectives, how to think critically, and how to approach problems from an interdisciplinary and holistic approach. They will also learn why it is important to know a community at the local level to affect change on any level: state, national, or international. In addition to weekly readings and discussions, this course includes several field trips.

Same as L61 FYP 122

Credit 3 units. A&S: AMP A&S IQ: NSM BU: SCI

L82 EnSt 181 Ampersand: Pathfinder — Environmental Seminar

This course is a survey of pressing environmental issues (both local and global) as well as an introduction to the breadth of environmental work occurring on campus. Credit/no credit only. Same as L61 FYP 181P

Credit 1 unit. A&S: AMP

L82 EnSt 201 Earth and the Environment

Introduction to the study of the Earth as a dynamic, evolving planet. Emphasis on how internal and surface processes combine to shape the environment. Themes: Earth's interior as revealed by seismic waves; Earth history and global tectonics shown by changes to ocean floors, mountain-building, formation of continents, earthquakes and volcanism; climate history and global biogeochemical cycles, influenced by circulation of atmosphere and oceans, ice ages and human activity. Composition and structure of rocks and minerals. Part of the introductory sequence of courses for all Earth and planetary sciences and environmental studies majors. Three class hours and one two-hour lab a week.

L82 EnSt 215 Introduction to Environmental Humanities

In this environmental humanities seminar we will consider texts illustrating how American citizens evolved in their perceptions, use, and expectations of the natural world during the nineteenth and early twentieth centuries, especially but not limited to the practice of agriculture. We will also consider how practices of agriculture were inextricably tied to oppression and misuse not only of land but of people. How did the mandatory short-term goals of health and economic security sought so eagerly by citizens, and supported by evolving technologies, foreshadow the unintended consequences of long-term environmental damage that would contribute to climate change, and historic trauma that marginalized communities still live with today?

How can we understand this using a critical and hopeful lens? Considering contemporary writings on our perception of "environmentalism" will help us nuance our analysis. Topics will include: agrarian democracy; settlement of the Great Plains by immigrant farmers; the Dust Bowl; fragmentation of the Sioux ecosystem. If COVID guidelines permit, students will have the opportunity to visit the Tyson Research Center, Washington University's field laboratory in west St. Louis County. Tyson's mission is to provide a living landscape for environmental research and education as a component of Washington University's International Center for Energy, Environment and Sustainability (InCEES). As a class we will meet with faculty researchers (from both science and the humanities) and hear about their work on ecosystem sustainability, that is, thinking long-term for human and environmental health. Throughout the course we will use texts such as: government reports, history, literature, environmental policy and autobiography. This course is for first-year students and sophomore students only.

L82 EnSt 250 One Health: Linking the Health of Humans, Animals, and the Environment

This course provides an introduction to One Health, a collaborative effort of multiple disciplines — working locally, nationally, and globally — to attain optimal health for people, animals, and the environment. The student will learn about the challenges threatening environmental, animal, and human health. More importantly, they will learn about the transdisciplinary/holistic/One Health approach, which is necessary if we are to develop the solutions to these challenges. To address the loss of biodiversity, climate change, and environmental pollutants, students will participate in project-based learning modules to understand the how and why of these challenges as well as the mechanisms available to study current threats to conservation and public health. Class lessons will consist of lectures, clicker-based discussions, and case-study discussions. Assignments will include regular readings, quizzes, three exams, the creation of one infographic to convey a concept to a lay audience, and one short final reflection essay. This course will be limited to first- and second-year students.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L82 EnSt 251 Metropolitan Environment

Understanding the forces shaping urban growth and change is increasingly important for addressing environmental issues. The United Nations projects up to 3/4ths of the world's population will live in urban areas by the end of the century. Urbanization rates now outpace population growth rates in many parts of the world. Changes within the metropolitan environment will have profound impacts on people and planet. This course provides an interdisciplinary overview of the metropolitan growth and change, paying particular attention to the role of planning, politics, and policy. Class time will be devoted to lectures, case studies, group activities and discussion. Student learning will be assessed through exams, online assignments, and a research paper on an environmental issues in a city of student's choice.

Credit 3 units. A&S IQ: SSC

L82 EnSt 255 Systems Thinking

Our complex world is bound together by multiple overlapping systems. Social systems interact with physical and biological systems. Societies and individuals, ecosystems and species, interact in ways that influence each other. Systems thinking is the ability to see the relationships and patterns within and across systems, as well as the underlying structures which shape those relationships and patterns. This course provides an introduction into systems thinking for sustainability. We will explore the key features of systems and students will learn the basics of the systems thinking lens which they will be able to use for addressing sustainability in an ever-changing world. Class time will be devoted to lectures, case studies, group activities and discussions.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA

L82 EnSt 290 Sophomore Seminar in Sustainability and the Environment

This course will provide an opportunity for students to evaluate and explore potential paths in environmental studies, and learn presentation skills to carry forward in their careers. Students will also get the opportunity to get out of the classroom and participate in environmental field trips and activities.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L82 EnSt 2950 Introduction to Environmental Biology

Introduction to Environmental Biology is designed to teach important principles of environmental biology and general science literacy skills. We cover the foundational biological principles and contemporary issues within four main topics: human population growth, transfer of energy and carbon in the ecosystem, biodiversity, and food production. We focus on the biological principles involved as we examine these topics in the context of some contentious and confusing issues related to environmental biology in everyday life. The science literacy skills that you master in this course will help you address the issues you face in your everyday life regarding scientific and pseudoscientific claims about the environment and society and will form the foundation for your development as a critical consumer of science information in the media. This course is required for all environmental biology majors and environmental studies minors. We recommend you take this course in your first- or second-year if possible. If your interests align and your schedule allows, we recommend co-enrolling in ENST 215: Introduction to Environmental Humanities.

Same as L41 Biol 2950

L82 EnSt 306B Africa: Peoples and Cultures

An anthropological survey of Africa from the classic ethnographies to contemporary studies of development. Emphasis on the numerous social and economic changes African peoples have experienced from precolonial times to the present.

Same as L48 Anthro 306B

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: HUM, IS

L82 EnSt 310 Ecological Economics

Our planet is finite but our economic theories and practices assume that our economy can grow forever. The paradoxical pursuit of infinite growth on a finite planet has real-world consequences: from climate change to increasing income inequality to stagnant and declining quality of life for most of us to the ongoing mass extinction of species that are not economically useful to us, but whose loss simplifies ecosystems to the point of collapse. If these trends continue we will face some very difficult times ecologically and socio-politically. One alternative to infinite-planet economic theory is Ecological Economics, which can be described as economics as if the laws of thermodynamics are true and apply to us. Alone among disciplines with any aspiration to analytic rigor, the field of economics has remained unaffected by the thermodynamic revolution that transformed such fields as biology, chemistry, physics, even history in the late 19th and early 20th centuries. This failure to take physical law into account is one great source of our society's environmental (and social and political) problems. Ecological economics thus represents the continuation of the thermodynamic revolution begun in the 1880s. This course is designed to give you an appropriate grounding in the fundamental assumptions, the conceptual novelties, and the distinctive tools of analysis that comprise this emergent school of economic theory, while placing this theorizing in historical (and ecological) context. We'll pay particular attention to how the precepts and practice of Ecological Economics illuminate the largest challenge facing humans today, the necessity of developing an ecologically sustainable society, one that is sized to the limits of our finite planet.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L82 EnSt 315 Fallout: Analyzing Texts and Narratives of the Nuclear Era

In this environmental humanities course we will compare and integrate diverse texts and narratives through which Americans have developed a complex relationship to nuclear technology. Nuclear technology has long been developed, used and debated. Capable of both healing and harm, it challenges our notions of risk versus benefit at every level. It is also poised to potentially play a significant environmental role in climate mitigation by delivering large amounts of nearly carbon-free energy. Using texts such as literary nonfiction, history, environmental anthropology, natural history and public health, we will explore aspects of the Manhattan Project, the Chernobyl Nuclear Reactor accident, the presence of fear in the public perception of nuclear technology, and debates regarding the current and future use of nuclear energy. Two or three Saturday field site visits will be required, one to Weldon Springs Interpretive Center.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L82 EnSt 316 Beyond the Evidence

Why, when all evidence points to the growing threats of climate change, is it so difficult to create movement toward addressing this issue? Why, when we have so much evidence that vaccines reduce illness and death and are extremely safe, do individuals still choose not to vaccinate their children? What if I told you that the scientific evidence does not matter? Over the last few decades, neither better education, nor guilt, nor fear has worked to produce change on important environmental and public health issues. In this course, we will explore the different factors that contribute to the reasons why scientific evidence does not matter for the individual choices we make or policies we support. We will especially consider how values, beliefs, emotions, and identity shape how we process information and make decisions. We will examine how we might talk to one another in a way that might shift thinking or behavior as well as how we can create evidence-based policy. We will explore themes of worldview, cognitive linguistics and framing, cognitive dissonance, risk perception, empathy, habit changes, bumbles in messaging, and difficult dialoguing through the examples of climate change and vaccination. Course activities will consist of regular reading, some online research, reflective journaling at home, and engaging in conversation during class. This course is designed to target upper-level students in environmental majors and pre-health studies.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L82 EnSt 3194 Environment and Empire

In this course we study British imperialism from the ground up. At bottom, the British empire was about extracting the wealth contained in the labour and the natural resources of the colonized. How did imperial efforts to maximize productivity and profits impact the ecological balance of forests, pastures, and farm lands, rivers and rainfall, animals and humans? We'll ask, with environmental historians of the U.S., how colonialism marked a watershed of radical ecological change. The course will cover examples from Asia to Africa, with a focus on the "jewel in the crown" of the British empire: the Indian subcontinent. We'll learn how the colonized contributed to the

science of environmentalism, and how they forged a distinctive politics of environmentalism built upon local resistance and global vision, inspired by religious traditions and formative thinkers, not least Mahatma Gandhi.

Same as L22 History 3194

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L82 EnSt 320 Pathfinder: Environmental Modernism

As committed environmentalists, one of our greatest fears is that not enough people take climate change seriously. To ward off that fear, we assess the state of the world in the most dramatically pessimistic ways to indicate the seriousness of our situation and our personal commitment to "environmentalism." Highlighting (much less admiring) human progress in areas where solid evidence of its flourishing exists, seems blasphemous, dismissive of evident, copious human suffering and natural systems abuse. However, the absence of acknowledging human progress reinforces social fear and a sense of danger. The resulting panic leads to a preferencing of solutions which appear "in harmony with nature," limiting our understanding and trust of viable alternative solutions using our best social, economic and technological powers. As antidote to this cycle, in this course we will explore the precepts of environmental modernism, the reconciliation of environmental preservation with human development.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L82 EnSt 323 Biogeochemistry

Basic concepts of how elements cycle among Earth's crust, oceans, and atmosphere, including perturbations due to human activities. Carbon, nitrogen, phosphorus, sulfur, and water cycles. Isotopic tracers. Feedbacks, forcings, and residence times. Redox cycling and thermodynamics. Biogeochemical box models, and changes in biogeochemical cycles over Earth history. Biogeochemistry of greenhouse gases, biogeochemical feedbacks in the climate system. This course is appropriate for EPS students, engineering students, environmental science majors, and other students with interest in the environmental or geological sciences. Prerequisite: EPS 202 or EECE 101.

Same as L19 EPSc 323

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L82 EnSt 346 Environmental Justice

Environmental quality varies widely across race, class, gender and other forms of social difference. This course explores how and why these differences exist. It provides an overview of the history and foundations of the environmental justice movement in the United States while covering classic environmental justice issues, such as toxic waste and pollution, along with more recent issues, such as food access, urban green space, transportation and climate change. Environmental justice concerns in St. Louis are featured as part of the course. Class time will be devoted to lectures, case studies, group activities and discussions. Student learning will be assessed through exams, reflection, online assignments, a policy brief on an environmental justice issue and a group presentation.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: CPSC, SSC BU: BA EN: S

L82 EnSt 347 Sustainable Cities

Urbanization is one of the most significant forces shaping today's environment. More than half of the world's population now lives in urban, rather than rural, areas. This migration has profound consequences for people and the planet, connecting a sustainable future to the developments in cities around the world. Many cities are already advancing sustainable policies and practices in all areas of urban systems and services - green infrastructure, renewable energy, waste management and climate mitigation. This course explores the impact of the rise of cities in an interconnected world and the efforts to sustainably address environmental issues in urban settings. This course pays particular attention to the role of planning, politics and policy. Class time will be devoted to lectures, case studies, group activities and discussion. Student learning will be assessed through exams, online assignments, and a research paper on an environmental issue in a city of the student's choice.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L82 EnSt 350W Writing Skills for Environmental Professionals

This course is for students interested in climate change, sustainability, and the environment. Who are you writing for? Why are you writing? What format makes sense? These are key questions we will ask in this course as we discuss intentionally building effective written communications. Students will explore building blocks of written communication -- such as audience, purpose, format, and angle of vision -- as they examine current relevant publications, such as the National Climate Assessment or an IPCC report. Readings are intended to highlight these building blocks, and students will engage with them through workshops and reflective writing. Major assignments include a proposal letter of intent and a proposal. For the proposal, students will select a climate-related topic of interest and, using their building blocks, create an effectively constructed proposal to persuade an imaginary foundation to support their idea. Preference given to majors in Environmental Analysis.

Credit 3 units. A&S IQ: NSM, WI BU: SCI

L82 EnSt 357 Multiparty Environmental Decision Making

This course aims to provide students with the opportunity to develop and apply problem-solving skills in the context of environmental challenges. Students will learn basic frameworks of decision-making through readings and role-play. Through the role-play, students will grapple with the perspectives of multiple stakeholders, the interplay of science and policy, and the ambiguity and uncertainty inherent in decision-making processes.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L82 EnSt 361 Culture and Environment

An introduction to the ecology of human culture, especially how "traditional" cultural ecosystems are organized and how they change with population density. Topics include foragers, extensive and intensive farming, industrial agriculture, the ecology of conflict, and problems in sustainability.

Same as L48 Anthro 361

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: ETH EN: S

L82 EnSt 3615 Environmental Anthropology

This course will provide students with a working knowledge of how the study of humans across space and time has fundamentally impacted the way we understand the idea of nature, the environment and what it means to be human. The

course will ground students in both historical and cutting-edge anthropological theories with units on subsistence, transformative nature, imagining wilds in the Anthropocene and pluralizing environmentalisms.

Same as L48 Anthro 3615

Credit 3 units. A&S IQ: SSC Arch: SSC Art: CPSC, SSC BU: BA

L82 EnSt 364 Field Methods for Environmental Science

This course provides a broad survey of practical and applied methods for environmental field work for site assessments, ecological studies, conservation land management, habitat monitoring, and ecological restoration. A primary focus will be sources and techniques for obtaining and interpreting field data across a range of abiotic, organismal and system/community parameters, with emphasis on hands-on field experience providing students with direct knowledge highlighting the advantages and limitations of various methods. In the process, students will learn about multiple taxonomic and organismal groups and natural community types, and the relationships among these and the physical environment in functional natural systems. Course topics include theory and practice of methods for sampling biotic and abiotic resources, including vegetation, fauna, aquatic systems, stream geomorphology, and soils, as well as using these data for assessments, habitat monitoring, land management decisions, and developing ecological restorations. Students will gain familiarity with responding to issues driving applied environmental science and related fields today, including data quality, sampling design, field techniques, viability and threat analyses, and incorporating field data into multi-scale conservation planning and design work. The course consists of instructor presentations, guest lectures, readings and written response papers, student projects and presentations, classroom discussions, and extensive field exercises and hands-on training. Class logistics: one lecture (1.5 hours) and one lab (5 hours) per week, plus 2-3 all day Saturday field trips (see policy on absences for back-up plan regarding field trips).

Credit 3 units. A&S IQ: NSM BU: SCI

L82 EnSt 365 Applied Conservation Biology

A hands-on introduction to the concepts of conservation biology and applied conservation practice, including designing and implementing conservation projects. Readings, lectures, classroom exercises, and field projects will immerse students in all aspects of conservation in the contemporary landscape, and the tools and techniques needed for successful and sustainable conservation outcomes. Three Saturday field trips required. Prerequisite: A biology/ecology course or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L82 EnSt 374 Social Landscapes in Global View

From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as "landscapes." This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We

cover various urban landscapes, rural landscapes, nomadic landscapes (and others) and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 BCE to 2009 CE and we cover all the continents. This course also traces the intellectual history of the study of landscape as a social phenomenon and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world and trace the global currents of your social landscape!

L82 EnSt 375 Urban Ecology

Urban Ecology is a field of study within ecology that focuses on the urban environment as an ecosystem and attempts to understand how humans and nature can better coexist in these highly modified environments. The ultimate goal is to aid efforts for more sustainable cities through better urban planning and practices. It is a multidisciplinary study including topics from ecology, evolution and conservation biology, as well as architecture, economics and business. The class format will include both lectures and discussions.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L82 EnSt 380 Applications in GIS

This introductory course in Geographic Information Systems (GIS) is designed to provide you with the knowledge, skills, and confidence to be an independent user of GIS. The course will use the latest version of ESRI ArcGIS. The course is taught using a combination of lectures, demonstrations, and hands-on, interactive tutorials in the classroom. You will also explore the scientific literature to understand how GIS is being used by various disciplines to address spatial questions. The course takes a multidisciplinary approach that is focused on learning the tools of GIS versus working with data from a particular field. The goal is to establish a solid foundation you can use to address spatial questions that interest you, your mentor, or your employee. The first weeks of the course will provide a broad view of how you can display and query spatial data and produce map products. The remainder of the course will explore the power of GIS with a focus on applying spatial analytical tools to address questions and solve problems. As the semester develops, more tools will be added to your GIS toolbox so that you can complete a final independent project that integrates materials learned during the course with those spatial analyses that interest you the most. Students will have the choice of using a prepared final project, a provided data set, or designing an individualized final project using their own or other available data.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L82 EnSt 381 Introduction to Ecology

This course explores the central theories and principles in ecology and evolution and the use of these principles to study and predict human-induced environmental changes. It emphasizes understanding species interactions and population dynamics in biological communities as well as the relationships between communities and their environment. It regularly touches on applications of these principles, such as ecological responses to global climate change, consequences of habitat fragmentation, disease ecology, and conservation medicine.

Principles of experimental design, quantitative data analysis and interpretation, and mathematical models are critical to the field of ecology, and these are also emphasized throughout the course. Class meetings will include lectures, class activities, computer simulation labs, and smaller group discussions to familiarize students with peer-reviewed journals, scientific writing, and current issues in ecology. Assignments include regular homework reading, occasional problem sets, participation in tutorials/discussions, and a small term paper. Prerequisite: Biol 2970 or Biol 2950, or permission of instructor.

Same as L41 Biol 381

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L82 EnSt 390 Independent Study

Independent study for undergraduates, supervised by a faculty member. Prerequisite: permission of instructor.

Credit variable, maximum 6 units.

L82 EnSt 3900 Science for Agriculture and Environmental Policy

Government policies at the local, state, and national levels determine and regulate activities that range from local farmers markets to U.S. membership in the Paris Climate Agreement. Science can and should play a critical role in developing policy. This course focuses on the biological science behind policies for climate change and agricultural practice as well as the role of various organizations in providing science for policy. Now is a particularly interesting time for science-based policy with the election of a new U.S. President and the elevation of the President's science advisor to Cabinet level. This course is divided into three parts. First, we review how policy is developed and how various agencies and actors affect policy. The next section looks at biological topics that have policy implications. These case studies are presented by expert speakers who have had experience in various science-related roles in the federal government, foundations, professional associations, advisory organizations, and scientific publications. Finally, students conduct individual research projects on a science topic that affects current legislative efforts, either state or national. Students investigate the basic science of their chosen topic and how this could affect proposed legislation. As part of the research project, students give a class presentation, lead a class discussion, and write a term paper on the foundational biological science. The goals of this course are as follows: (1) to develop an understanding of how science is used to develop policy by examining case studies presented by experts; and (2) to critique a proposed science-based policy either at the state or federal level.

Same as L41 Biol 3900

L82 EnSt 392 Directed Fieldwork in Environmental Studies

Fieldwork carried out under the direction or supervision of an instructor in the Program. Permission of an instructor and of the chair of the program is required.

Credit variable, maximum 6 units.

L82 EnSt 405 Sustainability Exchange: Community and University Practicums

The Sustainability Exchange engages interdisciplinary teams of students to tackle real-world energy, environmental, and sustainability problems through an experiential form of education. Students participate in projects with on- or off-campus clients developed with and guided by faculty advisors from across the University. Teams deliver to their clients an end-product that explores "wicked" problems requiring innovative methods and solutions. Past projects have included investigating soil impacts of de-icing practices on campus, collecting data on inequitable trash collection in neighborhoods, working with St. Louis City's building division to make buildings more energy efficient, developing an understanding of how buildings impact birds on campus, and analyzing the performance and viability of sustainable investments. Upcoming projects are still being finalized and may include mitigating plastic pollution in the Mississippi, creating and publishing an illustrated book on the social, cultural, and ecological importance of Forest Park, and assisting with the planning and development of a rain-scaping proposal for a St. Louis City neighborhood. Team-based projects are complemented by seminars that explore problem solving strategies and methodologies drawn from a wide range of creative practices, including design, engineering, and science, as well as contemporary topics in energy, environment, and sustainability. Students will draw on these topics to influence their projects. The course is designed primarily for undergraduates, with preference given to seniors. Same as I50 INTER D 405

Credit 3 units. A&S IQ: SSC Arch: SSC Art: CPSC, SSC EN: S

L82 EnSt 406 Urban Ecosystem Principles Integration

In today's world, your discipline has grand challenges whose solutions often lay in other realms. How will you train yourself to leverage the interdisciplinary partnerships required to innovatively solve and evolve in a rapidly changing world? The mission of this interdisciplinary course is to "Advance the interrelationships of ecological and human systems toward creating a healthy, resilient, and biodiverse urban environment," and bring together experts and students in ecology, urban design, architecture/landscape architecture, economics, social work and engineering, drawing from inside and outside the Washington University community. Building from our knowledge of ecosystem principles and function, a diverse group of leaders in their fields provides lectures, readings and student project leadership to understand and test Healthy Urban Ecosystems Principles among human and ecological (nonhuman) systems and the range of sociopolitical processes entailed with their implementation. Class content is developed by Washington University leaders in their disciplines as well as external organizations such as the Missouri Botanical Garden, the Field Museum in Chicago and others. This course builds upon a 1-unit fall seminar (not a prerequisite) that introduces challenges and solutions to achieving healthy urban ecosystems, and provides students an opportunity to more deeply engage and manipulate the interrelationships of symbiotic urban systems, and apply those concepts in multidisciplinary project applications. Projects leverage student-defined challenges in the evolving laboratory of urban St. Louis using Healthy Urban Ecosystems Principles to develop multidisciplinary integrated solutions to challenges encountered in urban areas such as climate change and resilience, security of ecosystem services, social inequity, economic strife, and community vitality. Students present their work in a public forum at semester's end. CET (<https://gephardt.institute.wustl.edu/for-faculty-and-staff/community-engaged-teaching/>) course.

L82 EnSt 407 RESET - Renewable Energy Policy, Engineering and Business

RESET will provide students with an in-depth understanding of the policy, engineering, and business factors that are shaping the growing renewable energy industry as well as the opportunities and challenges in the decades ahead for decarbonizing the electric grid. From 2015 to 2017, the number of U.S. states producing grid electricity from 20% or more renewable energy sources (excluding hydropower) increased from seven to eleven. The IPCC's Fall 2018 Special Report on 1.5 degrees of warming concluded that approximately 45% reductions in global emissions will be required by 2030 to limit warming to 1.5 degrees Celsius. With this new science-based target in mind, how quickly can the United States and the world accelerate the transition to renewable energy? What technical problems will need to be addressed? What is the current and future role of policy? What are the economic implications? RESET is an interdisciplinary course comprised of classroom lectures from faculty and industry professionals; group discussions; field trips to solar, wind, and fossil fuel power plants; and a final applied team-based project to propose a new major solar photovoltaic project. RESET is structured to provide students with an understanding of the large-scale issues influencing renewable energy deployment as well as the real-world factors that are necessary for designing, financing, and building new wind and solar projects.

L82 EnSt 415W Writing Home: Creating Cultural Guides for Environmental Site Workers

Each of you comes from a different cultural landscape, each with its own demographic, racial, religious, linguistic, economic profile, with endless other attributes meaningful to your community, an awareness of which is integral to its sense of being respected by outsiders. A unique natural landscape contains your community and what lies within it binds your community together. All of your home communities have a different sense of what kind of landscape constitutes safety and health. Whatever your cultural landscape, sharing the unique nature of your community with global citizen experts is integral

to the success of applied environmental solutions to climate change. Towards the attainment of that success, join this guided, writing intensive class to identify and reflect upon the cultural attributes that constitute your community, and how those are reflected in its landscape requirements. Identify, assess, and prioritize those sensitivities deemed most important by you for others to understand. By semester's end, write a cultural guide for environmental site workers, leading them to a better awareness of how best to help and move through your world. Revisions and resubmission of writing work will be emphasized, as well as camaraderie and mutual interest in each other's landscapes.

Credit 3 units. A&S IQ: HUM, WI BU: ETH

L82 EnSt 419 Community Ecology

Community ecology is an interdisciplinary field that bridges concepts in biodiversity science, biogeography, evolution and conservation. This course provides an introduction to the study of pattern and process in ecological communities, with an emphasis on theoretical, statistical and experimental approaches. Topics include ecological and evolutionary processes that create and maintain patterns of biodiversity; biodiversity and ecosystem function; island biogeography, metacommunity dynamics, niche and neutral theory; species interactions (competition, predation, food webs); species coexistence; and environmental change. The class format includes lectures, discussions, and computer labs focused on the analysis, modeling, and presentation of ecological data using the statistical program R. Prerequisite: Bio 2970, Bio 381 (recommended), or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L82 EnSt 4193 Experimental Ecology Laboratory

The goal of this course is to provide skills in the design, interpretation, and written presentation of ecological and evolutionary experiments, with emphasis on sampling methodology, hypothesis testing, and data analysis. A key objective of this course is to familiarize students with the importance of statistics and experimental design as unified tool, rather than two separate processes. We will practice how to abstract theories, hypotheses, and predictions, mathematically; how to contrast them with data; and how to interpret the results. The course does not seek to be exhaustive of all experimental designs or statistical techniques, nor intensive in any given one. Rather, its focus is on providing the tools and concepts for the critical evaluation, choice, interpretation, and further independent learning of the experimental and statistical tools needed for research. Practical analysis of data will be taught in program R, but no prior knowledge is required. During the course, students will plan and execute their own ecological studies, within the limitations of the current pandemic. This is a writing-intensive course, and grades are based on written assignments, including final projects and in-class participation. This course fulfills the upper-level laboratory requirement for the biology major. Prerequisites: Permission of instructor and at least one of the following: Biol 3501, Biol 372, Biol 381, Biol 419, or Biol 472. Enrollment is limited to 10 students.

Same as L41 Biol 4193

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L82 EnSt 426 Topics in American Politics

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests. Prerequisite: L32 101B.

Same as L32 Pol Sci 426
Credit 3 units. A&S IQ: SSC, SD Art: SSC EN: S

L82 EnSt 428 Hydrology

Survey of principles that govern the flow of water in river and groundwater systems in deep geologic environments. Basic equations of fluid flow, dynamics, and the characteristics of drainage basins, rivers, floods, and important aquifers. Exploitation of ground water systems. Prerequisite: EPSc 353; or permission of instructor.

Same as L19 EPSc 428

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L82 EnSt 432 Environmental Mineralogy

Topics connected with environmental mineralogy, some selected by students. Topics may include: mineral dust such as asbestos, containment materials for nuclear waste disposal, environmental ramifications of the processing and use of phosphate fertilizers, lead in the environment, acid mine drainage, microbial mediation of sulfide oxidation, minerals in the human body, weathering of building materials, materials engineering, and engineering of materials for more effective recycling. Three class hours and one two-hour laboratory a week. Participation in discussions, term paper, two field trips required. Most readings from primary sources. Prerequisite: EPSc 352 or permission of instructor.

Same as L19 EPSc 430

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L82 EnSt 444 Environmental Geochemistry

This course is an introduction to the geochemistry of natural waters and the processes that alter their composition. Topics include key principles of aqueous geochemistry and their application to describe the main controls on the chemistry of pristine and polluted soil, surface, and ground water environments; acids and bases; mineral solubility; carbonate chemistry; chemical speciation; redox reactions; adsorption and ion exchange; and the speciation, mobility, and toxicity of metals. Prerequisites: EPSc 201 and Chem 106 (or AP Chem score of 4), or permission of instructor.

Same as L19 EPSc 444

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L82 EnSt 451 Environmental Policy

This course examines the relationship between environmental economics and environmental policy. The course focuses on air pollution, water pollution, and hazardous wastes, with some attention given to biodiversity and global climate change. The course examines critically two prescriptions that economics usually endorses: (1) "balancing" of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; (2) use of market incentives (e.g., prices, taxes or charges) or "property rights" instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011.

Same as L11 Econ 451

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, ETH EN: S

L82 EnSt 452 International Climate Negotiation Seminar

This variable credit course (all students will register for 3 credits) is designed to prepare students to attend and observe annual meetings associated with the United Nations Framework Convention on Climate Change (UNFCCC) as a delegate of

Washington University. The course and meetings provide student delegates with a unique educational experience to observe the development of international climate policy through interdisciplinary negotiations and interactions inside the negotiating space. Students see the interaction between climate policy, science and technology as they identify and analyze policy decisions across the international climate regime. The COP 27 meeting will be held in Sharm el-Sheikh, Egypt, from November 7-18, 2022. The Subsidiary Body meetings will be in Bonn, Germany, in spring of 2023 and are generally held in late May or early June. The number of students who can attend meetings is limited by the United Nations. We will do our best to have course participants attend either the COP or Subsidiary Body meetings. Students attend one week. Enrollment is limited. Indicate your interest by placing yourself on the waitlist (registering for 3 credits) and completing an application. All students will be placed on the waitlist upon registration and students will be selected to enroll from the waitlist after all the applications are reviewed. The application will be open in early March and will be available on the Climate Change Program website at www.climatechange.wustl.edu. Application review will begin April 22, and enrollment decisions will be made by May 2. Participation in the course is possible without traveling to the meetings. The cost of meeting attendance is partially covered by the Climate Change Program, and need-based support is available. More information on cost is included on the application page. Prerequisite: Junior standing. The course is currently scheduled for Wednesdays from 4:00-6:50. Contact the instructor with questions at martin@wustl.edu.

Credit variable, maximum 6 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L82 EnSt 461 Intro to Environmental Law

Survey of the most prominent federal laws designed to control pollution and protect human health and the environment. Examines laws applicable to environmental impact statements, biodiversity, air pollution, water pollution, and hazardous waste. Discusses the role of state law and cooperative federalism, as well as the roles of the courts, the legislature, and the administrative state in protecting the environment.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L82 EnSt 481 Advanced GIS

This course is designed to move beyond tools and skills learned in Applications in GIS (EnSt 380/580). Classes will feature hands-on exercises selected to help students master advanced GIS analysis tools and techniques, while providing experience in the planning and execution of real-world projects. Primary emphasis will be on applying fundamental GIS concepts, performing spatial analysis, developing proficiency with core ArcGIS software (e.g., Network Analyst extension), resolution of problems, and efficient delivery of results. Readings from books and scientific literature will introduce key concepts and provide real-world examples that will be reinforced in the hands-on exercises, assignments and projects. As the semester develops, students will gain a variety of new tools and techniques that will allow them to complete a final independent project that integrates the material learned during the course.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L82 EnSt 492 Environmental Studies Fourth-Year Reflection Seminar

Over the course of their time at Washington University, students will have taken a depth and breadth of course work toward their major in Environmental Analysis. This major course work has likely been supplemented by course work in other departments and programs of study. The purpose of this course is for students to reflect on and synthesize their learning from across these years and to make connections among things they have learned and experienced in other arenas of their lives. The purpose of this is to create a written narrative portfolio that synthesizes, integrates, and reflects on learning across courses and experience in the major. Reflection will occur through personal writing and discussion with peers in the course as students build their portfolios over the course of the semester. Credit 1 unit.

L82 EnSt 498 Senior Honors Research

Independent research for undergraduate honors, to be supervised by a faculty member. Prerequisites: senior standing, eligibility for honors, and permission of instructor. Credit 3 units.

L82 EnSt 4980 Undergraduate Research Seminar

Provides an opportunity for advanced undergraduates to synthesize many of the diverse subdisciplines of Earth and Planetary Sciences while focusing on a research topic. Subject changes each offering. Each subject is unique and timely, but broad enough to encompass wide-ranging interests among students. Students conduct original research, make written reports of the results, and make oral presentations of their projects in class. Prerequisite: senior standing or permission of instructor.

Same as L19 EPSc 498

Credit 3 units. A&S IQ: NSM, WI Art: NSM

L82 EnSt 499 Senior Honors

Independent work for undergraduate Honors, to be supervised by a faculty member. Prerequisites, senior standing, eligibility for Honors, and permission of instructor. Credit 3 units.

Film and Media Studies

During the 21st century, as our national and global cultures become increasingly dominated by the visual in ubiquitous modes of technology-based communication, the need to become critical viewers — knowledgeable in the history of the most popular art forms of our time and possessing the analytical skills to understand and interpret mass media — is acute.

To address this need, the major in Film and Media Studies requires the rigorous study of history and aesthetics so that students come to understand the creative force of moving image texts, whether digital, electronic or filmic. Courses examine the place of these texts in culture and how their production of meaning relates to industrial and business practices as well as to other artistic endeavors. By complementing the critical studies undergraduate curriculum in Film and Media Studies, courses in production and screenwriting provide — through

acts of creation and collaboration — an understanding of the aesthetic and ethical choices that artists confront when working with moving image-based media. Such practical experience integrates theoretical and historical awareness to further enhance students' understanding of the ways in which visual culture makes meaning with established and emergent technologies in contemporary society. This major will benefit any student interested in gaining an intellectual perspective on the relationship between art and technology, culture and industry, and history and theory. This major trains students in rigorous analytical thinking and provides them with research skills and historical knowledge that will assist them in becoming effective participants in the mediated culture of the 21st century.

The program of Film and Media Studies' academic mission is focused on the intellectual and professional development of students, but our faculty regard educating the larger Washington University and St. Louis communities about our field of study to be another important element of our work. To that end, we are committed to sponsoring events — including film festivals, academic lectures and symposia — that further the discussion of and intellectual engagement with all forms of moving image media.

Majors

The Major in Film and Media Studies

Total units required: 30

Required courses:

Code	Title	Units
Film 220	Introduction to Film Studies	3
Film 225	Making Movies	3
or Film 352	Introduction to Screenwriting	
Film 330	History of American Cinema	3
Film 340	History of World Cinema	3
Film 350	History of Electronic Media	3
Film 420	Film Theory	3
Total Units		18

Elective courses:

In addition to these required courses, students must take 12 credits in advanced electives (300 level or higher). All students must take one 3-credit elective that focuses on a national cinema other than that of the United States. In addition, all students must take one 3-credit critical studies elective at the 400 level or above. A 400-level elective in a national cinema may satisfy both of these elective requirements, but a total of 12 units in electives is still required. Electives in critical studies may be drawn from courses on individual directors, specific genres, limited historical periods, individual crafts (e.g., acting) and so on. Students with an interest in production may count two production and/or screenwriting courses toward the major within these 12 elective units.

Concentration in Film and Media Production

Total units required: 36

The concentration in film and media production provides majors in Film and Media Studies with the opportunity to enhance their skills in and knowledge of various forms of moving image media creative production. A student concentrator in film and media production must complete both Film 225 Making Movies and Film 352 Introduction to Screenwriting as core production classes in addition to the same 15 units of core critical studies course work required of regular Film and Media Studies majors, thus making for 21 credit units in the concentration's required core. The student would also complete 15 credit units of electives consisting of the following:

1. One 3-credit critical studies course in a national or regional (non-U.S.) cinema at the 300 or 400 level (required of all majors)
2. One 3-credit critical studies course at the 400 level (screenwriting or production does not count toward this requirement)
3. 9 units total credit or three 3-credit electives in digital or film production or screenwriting (3 credits may be for courses at the 200 level or above; 6 credits must be for courses at the 300 level or above)

Courses taken in overseas study are eligible to be used to satisfy the C category for up to a total of 6 credit unit with permission of the Film and Media Studies overseas advisor. Courses offered by another academic department or school at Washington University may be accepted in the C category for up to 6 credit units with the prior permission of the student's Film and Media Studies advisor. A minimum of C- must be earned for any course to count toward the 36 credit units required for the film and media production concentration.

Additional Information

Senior Honors (Film 499) is intended for majors pursuing honors in Film and Media Studies. In order to enroll for this course, students must apply in advance for honors, possess a minimum cumulative grade-point average of 3.65, and be approved by a faculty committee.

Minors

The Minor in Film and Media Studies

Total units required: 15

Required courses:

Code	Title	Units
Film 220	Introduction to Film Studies	3
Film 330	History of American Cinema	3
Film 340	History of World Cinema	3
Film 350	History of Electronic Media	3
Total Units		12

Elective courses:

In addition to the required courses, students must also take a 3-credit advanced elective course (300 level or above) to complete the minor.

The Minor in Global Film and Media Studies

Total units required: 15

Required courses:

Code	Title	Units
Film 220	Introduction to Film Studies (offered every fall)	3
Film 340	History of World Cinema (offered every fall)	3
Total Units		6

Elective courses:

- A. Two courses (3 credits each) at the 300 or 400 level dealing with national or regional cinemas, such as the following:

Code	Title	Units
Film 320	British Cinema: A History	3
Film 3211	Contemporary Chinese Popular Culture	3
Film 323	The Cinema of Eastern Europe in the Cold War Era	3
Film 325	French Film Culture	3
Film 328	History of German Cinema	3
Film 329	Italian Neorealism	3
Film 349	Media Cultures	3
Film 376	French New Wave	3
Film 4300	Topics in Chinese Media Culture: Charting Identity in the Digital Age	3
Film 431	Renegades and Radicals: The Japanese New Wave	3
Film 443	Memory, Tears and Longing: East Asian Melodrama Film	3
Film 444	Topics in Chinese Language Cinema	3
Film 479	(In)Visible Media: Connection and Crisis in Contemporary Japan	3

- B. One course (3 credits) at the 300 level or higher that analyzes film or moving image media from different countries or parts of the world. Options in this category include the following:

Code	Title	Units
Film 319	Documentary Film and Media	3
Film 341	Transnational Cinema(s): Film Flows in a Changing World	3
Film 342	Introduction to Video Game Studies	3
Film 366	Women and Film	3
Film 368	Contemporary Women Directors	3
Film 371	Making War	3
Film 419	Theories of Mass Media	3
Film 423	Histories of Media Convergence	3
Film 432	Global Art Cinema	3
Film 443	Memory, Tears and Longing: East Asian Melodrama Film	3
Film 465	Theory and Practice of Experimental Film	3
Film 475	Screening the Holocaust	3
Film 478	Topics in Transmedia Franchises	3
Film 485	Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000	3
Film 507	The 007 Saga: James Bond and The Modern Media Franchise	3

Note: With the permission of the director of undergraduate studies, one course (3 credits) on media/film taken in another department or program at the 300 or 400 level may count toward the global media studies minor. Students should consult with their Film and Media Studies advisor or the Film and Media Studies director of undergraduate studies before enrolling in a course offered outside of the program that they hope to count toward this minor.

Additional Information

Elective courses change every academic year, so please visit the Program in Film and Media Studies website (<https://fms.wustl.edu/>) for current course listings.

Internships and independent study do not count toward any Film and Media Studies minor.

Courses

Visit online course listings to view semester offerings for L53 Film (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L53&crslvl=1:4>).

L53 Film 110 First-Year Seminar: Science Fiction Literature & Film: A Contrast in Hyper-imaginative Media

This course presents a historical overview of the forms that racial and ethnic representations have taken in American television. The course attempts to chart changes in public perception of racial and ethnic difference in the context of sweeping cultural and social transformations. The course examines notions of medium and ponders the implications for these identities of the contemporary practice of "narrowcasting." Required screenings. Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Art: HUM BU: BA EN: H

L53 Film 112 First-Year Seminar: Race and Ethnicity in American Cinema

From the early documentary roots of cinema through the Civil Rights movement and to the recent democratization of the means of media production, questions of race and ethnicity have proved crucial both to the content of American films and also to the perspective from which they are made. This class looks at the representation of historical moments from the Civil War to Hurricane Katrina, the production of cinematic stereotypes as well as their appropriation for subversive purposes, and the gradual evolution of multiculturalism as a central factor in the stories told and the telling of stories on the American screen. Students use film texts to develop a critical understanding of one of the most important issues in American history. Required screenings.

Credit 3 units. A&S: FYS A&S IQ: HUM, SD Art: HUM BU: BA EN: H

L53 Film 114 First-Year Seminar: Superhero Media

This course will examine the superhero as American myth and media industry commodity. We will consider historical, cultural, and industrial aspects of the superhero genre across comic books, films, television series, and video games. Focusing on multiple media allows us to examine an array of medium-specific and cross-media issues (e.g., how criticism of superhero films as "not cinema" reflects a legacy of comics being perceived as juvenile). Our study will encompass a number of critical frameworks, including myth, adaptation, gender, race, and transmedia storytelling. Each course unit will focus on how different media have presented one or more superhero franchises (e.g., Superman, Batman, Black Panther, Captain Marvel, Watchmen). Required screenings. Enrollment limited to first-year students.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

L53 Film 115 First-Year Seminar:

This course explores the complex relationship between moving images and ideas of the real in both movies and television. It explores theories of representation, surveillance, authenticity, truth and realism in this context. From the earliest "actuality" films to the recent phenomenon of reality television programming, it asks if screen images capture what is "really" happening in front of the camera or if conventions of representation, genre and narrative mediate the reality of these images. More significantly, it inquires into why such questions matter. At issue is the role that moving images on both the big and the small screen have in our understanding of the world as it is and ourselves as we experience it.

Credit 3 units. A&S: FYS A&S IQ: SSC BU: HUM EN: S

L53 Film 116 First-Year Seminar: Cult TV: Critical Approaches to Fans and Fictions

What do such disparate television series as *Dr. Who*, *Star Trek*, *The Avengers*, *Monty Python's Flying Circus*, *The X-Files*, *Buffy the Vampire Slayer*, *Xena: Warrior Princess* and *Sealab 2021* have in common? They all attract loyal audiences, stimulate "subcultural" sensibilities, lend themselves to "textual poaching," and thus qualify as examples of "Cult TV," a term that has become increasingly salient within critical studies of the medium. In this course we explore the subject of cult television from a variety of social, cultural and thematic perspectives, so that by the end of the semester students have gained a deeper understanding of its historical importance as a barometer of both popular and oppositional tastes. We examine how these and other examples of genre-based network and cable programming complicate distinctions between lowbrow and highbrow tastes while sustaining worldwide "interpretative communities" years after their original air dates. Students also examine the importance of syndication, home video technologies, ancillary markets, publishing and the internet in the construction of fan cultures. Required screenings.

Credit 3 units. A&S: FYS A&S IQ: HUM EN: H

L53 Film 117 First-Year Seminar: Asians in American Film

This course surveys the history of Asian representations in American cinema from the silent period to the contemporary era. Throughout the semester we focus on images of Chinese, Japanese, Koreans, Filipinos and Vietnamese that have become most ingrained in American popular culture over the past century, from Fu Manchu and Madame Butterfly stereotypes popular during the classical studio era to more recent reconfigurations of racialized imagery in Jackie Chan and Jet Li films. We also examine selected works by Asian-American independent writer-directors; films and videos such as *Chan is Missing*, *History and Memory*, and *Better Luck Tomorrow* that challenge the stereotypes and normative tropes of "Orientalism" still permeating mainstream media. Students are asked to frame textual analyses of key films (such as *The Cheat*, *Daughter of Shanghai*, *Battle Hymn*, *Flower Drum Song*, and *Enter the Dragon*) within various political, social, cultural and industrial contexts (e.g., anti-Asiatic immigration and labor policies; U.S. foreign policies; the practice of "yellowface"; censorship codes; wars in East and Southeast Asia; anti-miscegenation laws; grassroots campaigns to stem the tide of stereotypes and hate-crimes; etc.).

Credit 3 units. A&S: FYS BU: HUM, IS EN: H

L53 Film 118 First-Year Seminar: Mr. Kiss Kiss Bang Bang: James Bond in Film, Literature and Popular Culture

Originally a character in Cold War spy literature, James Bond has emerged as an international pop culture phenomenon. In this course, we explore the evolution of James Bond from Ian Fleming to the "spy" parodies in international cinema. We read several of Fleming's novels and short stories, including *Casino Royale* (1953), *Octopussy* (1966) and *The Property of a Lady* (1967), and discuss these texts in light of post-war spy literature. We screen numerous Bond films, and compare and contrast James Bond the literary and cinematic character, how Bond emerged as a franchise hero through the vision of producers Harry Saltzman and Albert "Cubby" Broccoli, and critical aspects of the film franchise, including its storytelling roots in Hollywood serials, its use of gadgets and special effects, and the role of stardom in their marketing (Sean Connery, Ursula Andress, Roger Moore, Madonna, Pierce Brosnan and Daniel Craig). Finally, we explore the re-envisioning of Bond in various

media and art forms in global popular culture, including music, DC and Marvel Comics, games, children's television and in Asian cinema (Stephen Chow's 1994 *From Beijing with Love*). Required screenings.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 119 First-Year Seminar: Anime as Popular Culture

In the contemporary media landscape, film, television, games, publishing, and merchandizing are increasingly connected and help distribute cultural products across the globe. Japanese animation is one of the earliest and most successful examples of this powerful strategy. This course examines the global franchising industry of Japanese anime to explore basic questions about media and popular culture: How do we define a medium? How do consumer practices shape media and popular culture? What is the impact of globalization on media, and global media on national culture? Our investigations of Japan "cool" and its avid consumer cultures cover: animation aesthetics and technology; media convergence; anime fan cultures; science-fiction and remaking the body, history, and identity through global media. No prerequisites. Enrollment limited to 15 college freshmen. In addition to class meetings, there is a mandatory weekly scheduled screening.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: IS EN: H

L53 Film 120 First-Year Seminar: Horror Across Media

In spite of -- and because of -- its propensity for terrifying readers and viewers, horror has proven to be one of the most resilient and popular genres across all forms of media. Why are audiences attracted to a genre that causes fear, revulsion, and distress? This course will consider the cultural, philosophical, and generic dimensions of horror and explore how it operates across an array of media platforms: film, literature, television, comics, and video games. We will read two literary masters of the genre, H.P. Lovecraft and Stephen King, and we will screen some of the most successful horror films of the last 50 years. We will also study horror through a variety of critical frameworks, including gender, stardom, special effects, transnationality, adaptation, transmedia storytelling, and interactivity. The course will culminate in two extended case studies. In the first, we will compare and contrast literary, filmic, and televisual adaptations of "The Shining." In the second, we will consider "The Walking Dead" as a franchise that spreads its narrative across comics, multiple television programs, and video games. Required screenings. Enrollment limited to first-year students.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 121 First-Year Seminar: Youth Culture and Visual Media

Since the advent of cinema through the recent development of online social networking, visual media in the United States and around the world have been identified with a market of youthful consumers and producers. This course looks at the development of youth culture in the United States and its unique relationship to visual media, including film, television, comic books, video games and the internet, in the 20th and 21st centuries. We examine youth culture as a social phenomenon generated by the young, a means of representing the experience of being youthful, and as part of the ongoing debates over the effects of media on the young. As alternately mass culture, popular

culture, counter culture and participatory culture, youth culture holds a privileged place in the history of American visual media and continues to influence production and innovation within the media marketplace.

Credit 3 units. A&S: FYS A&S IQ: HUM BU: BA EN: H

L53 Film 200 Special Projects

This course is intended for freshmen and sophomores who wish to register for internships. Students must receive program approval prior to beginning the internship. Please consult the program guidelines governing internships.

Credit variable, maximum 3 units.

L53 Film 220 Introduction to Film Studies

How do film images create meaning? What are the tools the film artist uses to create images? This course introduces students to basic techniques of film production and formal methodologies for analyzing film art. Students learn the essential components of film language — staging, camera placement, camera movement, editing, lighting, special effects, film stock, lenses — to heighten perceptual skills in viewing films and increase critical understanding of the ways films function as visual discourse. The course is foundational for the major in film and media studies. Required screenings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 225 Making Movies

This course introduces the core concepts and skills for producing dramatic narrative film and video, building on the Hollywood paradigm. No previous technical experience is required, but students should have taken or be concurrently enrolled in Film 220. This course teaches students how films are put together to tell stories, negotiating between the possibilities of cinematic language and the practicalities of working with machines and other people. In order to develop an understanding of filmic narration, students learn the basics of camera operation, lighting, digital video editing, sound design and recording, casting and directing actors, visual composition and art direction, and production planning and organization. These concepts are put into practice through a series of exercises culminating in a creative, narrative short digital video. This course fulfills the prerequisite for 300- and 400-level video and film production courses in Film and Media Studies and the production requirement in the FMS major. Admission by wait-list only. Prerequisite: Film 220.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 305 Music and Masculinity in the Movies of Martin Scorsese

This course considers the work of American filmmaker Martin Scorsese, with close attention to (1) how Scorsese uses music (and sound) to construct intense cinematic worlds and (2) how his film characters and plots represent various sorts of white American men. The consistent collision between Scorsese's interest in music as a driver of film style and content and his penchant for male-centered, frequently violent narratives makes him an ideal central figure for our study of white American masculinities at the movies over the last five decades. Films to be studied include *Mean Streets*, *Taxi Driver*, *Raging Bull*, *Goodfellas*, *Cape Fear*, *The Departed*, *Shutter Island*, and *The Wolf of Wall Street*. Required screenings.

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: HUM
EN: H

L53 Film 310 Video Production

An advanced course exploring the creative and technical aspects of video production. Students sharpen their knowledge of cameras, directing, lighting, sound recording, nonlinear systems and narrative structures. In addition to acquiring a theoretical understanding of the production process, students gain practical experience by producing, outside of class time, a short project reflecting their visual and conceptual maturity. Prerequisite: Film 230 Moving Images and Sound or permission of the instructor. Credit 3 units. A&S IQ: HUM BU: BA EN: H

L53 Film 311 Documentary Production

In parallel with an overview of various documentary genres, ranging from the personal, the poetic, the agitprop and cinema vérité, this course offers students the opportunity to produce a short documentary piece on the topic of their choosing. Aesthetic and ethical issues are explored by considering the overall methodology in terms of subjectivity, content, structure and the possible usage of music and/or voice-over. For the sake of completing the project in time, it is recommended that students be familiar with the subject matter of their investigation before taking the course. Prerequisite: Film 230 Moving Images and Sound or permission of the instructor. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L53 Film 319 Documentary Film and Media

From movie screens to cell phones, moving images that "document" life have never been more ubiquitous. What do these images tell us about the relationship between representation and reality? How have film and media makers used moving images to represent major cultural, political, and social upheavals as well as communicated an understanding of everyday life? To answer these questions, this course will survey the rich, vibrant legacy of documentary filmmaking as well as demonstrate its ongoing artistic and cultural relevance to newer media. We will examine key modes of documentary film while contextualizing the historical development of these forms within aesthetic, industrial, and political factors. We will also consider ethical issues in filmic representation, especially in relation to the ethnographic tradition. In addition to studying the work of documentary pioneers, we will explore contemporary activist documentaries, as well as new industrial developments such as the serialized online documentary. Required screenings. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

L53 Film 320 British Cinema: A History

British cinema has gotten a bad rap. French film director François Truffaut once declared that cinema and Britain were incompatible terms since "the English countryside, the subdued way of life, the stolid routine—are anti-dramatic. . . [even] the weather itself is anti-cinematic." Yet British films proudly rank among some of the most acclaimed and beloved in film history: *Monty Python and the Holy Grail*, *A Hard Day's Night*, *Lawrence of Arabia*, *The Third Man*, *Zulu*, *The Ladykillers*, *A Night to Remember*, *Trainspotting*, *The King's Speech*, and the James Bond franchise. Admittedly, British cinema has had its ups and downs, never quite knowing whether to position itself as a distinctive national cinema or as a rival to Hollywood. This uncertainty has fostered a rich diversity and complexity that this course will emphasize in a survey approach. We will give equal attention to the work of high-profile directors like Alfred

Hitchcock and Michael Powell and to important "genres" in which the British seem to excel — like black comedy, imperialist adventure, "kitchen sink" drama, documentary, and the so-called "heritage" films that paved the way for television's *Downton Abbey*. Required Screenings.

Credit 3 units. A&S IQ: HUM BU: IS EN: H

L53 Film 321 Contemporary Chinese Popular Culture

With the rise of the Chinese economy and global capitalism, popular culture has proliferated in mainland China in recent years. This course traces the development of Chinese popular and youth culture and society from the 1990s to the present. It also refers back to modern times and ancient Chinese Confucian philosophy for historical background information. The course covers various forms of Chinese popular culture, such as movies, music, television programs, Internet literature, religion, sports, and food. Students observe primary resources and read academic articles to engage in a multiperspective and multimedia view of present-day China in the age of globalization and East Asian regionalization.

L53 Film 322 Contemporary East Asian Cinema

This course focuses on films made in Japan, Mainland China, Taiwan, Hong Kong and South Korea over the past three decades. Students examine how the global/local geopolitics specific to the post-Cold War period, the passing of authoritarian regimes, the boom and bust of the Asian economy, and international film festivals have influenced the shaping of New East Asian cinemas across borders. Required screenings.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L53 Film 323 The Cinema of Eastern Europe in the Cold War Era

This course has two objectives. On the one hand, we watch masterpieces of European cinema, awarded at international festivals and directed by legendary names such as Milos Forman, Emir Kusturica and Andrzej Wajda, and focus on their artistic genius. On the other hand, we study the way in which the confrontational politics of the Cold War inform these films, with a special focus on the perplexing predicament of a divided and antagonized Europe. The readings for this class emphasize our dual exploration. We work with texts dealing with both film history and its aesthetics and with broader analyses of the intellectual and political landscape of the Cold War context. Required screenings.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L53 Film 324 History of Chinese Cinemas: 1930s-1990s

This course offers an overview of Chinese cinemas, including those of Mainland China, Hong Kong and Taiwan, over the 20th century. We study major trends such as the left-wing filmmaking in the 1930s, the Maoist revolutionary narratives, Taiwanese healthy realism, the New Cinemas of the three regions, and contemporary transnational productions. Major topics include urban modernity, gender formation, national and transnational cinemas within specific historical contexts. All films come with English subtitles. Required screenings.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L53 Film 325 French Film Culture

Called "the seventh art," film has a long tradition of serious popular appreciation and academic study in France. This course offers an overview of French cinema, including the origins of film (Lumière brothers, Méliès), the inventive silent period (which created such avant-garde classics as *Un chien andalou*), the poetic realism of the '30s, the difficulties of the war years, the post-war emphasis on historical/nationalist themes in the "tradition of quality" films, the French New Wave's attempt to create a more "cinematic" style, the effects of the political turmoil of May '68 on film culture, the "art house" reception of French films in the United States, and the broader appeal of recent hypervisual ("cinéma du look") films, such as *La Femme Nikita* and *Amélie*. While the primary focus of the course is on French cinema, we also discuss the reciprocal influences between American and French film culture, both in terms of formal influences on filmmaking and theoretical approaches to film studies. French film terms are introduced but no prior knowledge of the language is expected. Required screenings. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L53 Film 326 Samurai, Rebels and Bandits: The Japanese Period Film

Tales of heroism, crime, revolt and political intrigue. Bloody battles, betrayal, madness and flashing swords. This is the world of jidaigeki eiga, the Japanese period film. In this course, we analyze the complex (and often flamboyant) narrative, visual and thematic structures of films about the age of the samurai. We discuss jidaigeki representations of violence and masculinity, self-sacrifice and rebellion, and the invention of tradition as well as critical uses of history. In addition to the historical content of the films, we study the historical contexts that shaped jidaigeki film production and discuss relevant transformations in Japanese cinema and society. Period films have been shaped by and exert strong influences on Japanese theater, oral storytelling, popular literature, comics, and international film culture, all of which are helpful for understanding the films. As we track changes in jidaigeki style and subject matter, the course introduces theories for interpreting narrative structure, genre repetition and innovation, intertextuality, and representations of "the past." All readings are in English. No knowledge of Japanese required. No prerequisites. Required screenings. Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L53 Film 328 History of German Cinema

This course explores the major developments of German cinema throughout the 20th century. More specifically, this course engages with issues relating to German film culture's negotiation of popular filmmaking and art cinema, of Hollywood conventions and European avant-garde sensibilities. Topics include the political functions of German film during the Weimar, the Nazi, the postwar, and the postwar eras; the influence of American mass culture on German film; the role of German émigrés in the classical Hollywood studio system; and the place of German cinema in present-day Europe and in our contemporary age of globalization. Special attention is given to the role of German cinema in building and questioning national identity, to the ways in which German feature films over the past hundred years have used or challenged mainstream conventions to recall the national past and envision alternative futures. Films by directors such as Murnau, Lang, Fassbinder, Herzog, Tykwer and many others. All readings and discussions in English. May not be taken for German major or minor credit. Required screenings.

Credit 3 units. BU: IS EN: H

L53 Film 329 Italian Neorealism

This course explores the visual language of one of the most influential film movements of the 20th century. We concentrate on the origins of neorealism in Italian post-war cinema and history, and focus on the works of filmmakers such as Roberto Rossellini, Vittorio De Sica and Luchino Visconti. We also consider the longer-term influence of the movement both in Italy and elsewhere. Throughout this course, we reflect on the possibilities of mimesis in cinema, on the social and political engagement of neorealist film, and on the factors that caused its decline. Credit 3 units. A&S IQ: HUM BU: IS EN: H

L53 Film 330 History of American Cinema

This course traces the history of the American cinema from the earliest screenings in vaudeville theaters through the birth of the feature film to movies in the age of video. The course examines both the contributions of individual filmmakers as well as the determining contexts of modes of production, distribution and exhibition. The course aims to provide an understanding of the continuing evolution of the American cinema, in its internal development, in its incorporation of new technologies, and in its responses to other national cinemas. Required screenings. Credit 3 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM BU: HUM EN: H

L53 Film 331 The New Hollywood Cinema

This course examines the history of film culture and the film industry in the United States since the end of the classical Hollywood studio system. It pays special attention to the period of auteur-centered filmmaking in the 1970s. During this time, the end of the production code, the financial crisis of the industry, the unparalleled influence of European New Wave and Art films, and the introduction of the first generation of film school graduates (the so-called "movie brats") all combined amidst the tumultuous cultural politics of such movements as the counterculture, civil rights and second-wave feminism to form a film-historical moment often called the Hollywood Renaissance. This brief period was soon followed by a newly reinvigorated Hollywood industry focused on the high-concept blockbuster. Such rapid transformations in the practice and nature of American film not only continue to influence commercial filmmaking today but also continue to shape our understanding of the role of authorship, genre and ideology within Hollywood. The course considers films of the New Hollywood in the context of tensions between radicalism and populism, progressivism and nihilism, entertainment and ideology, artistic and commercial success. Required screenings. Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

L53 Film 333 Making Movies II: Intermediate Narrative Filmmaking

In Making Movies II, students advance their skills in filmmaking through a series of exercises and individual short films culminating in a final narrative project shot in high definition digital video and edited in Adobe CC and Premiere Pro. With faculty guidance, and working in groups, students collaborate in producing a narrative film that is a minimum of 10 minutes in length, following three-act structure and involving elements of motivation, conflict, and resolution. In addition to this structured approach to content, students are encouraged to achieve a unified aesthetic approach to picture and soundtrack that

reinforces/enhances the meaning of their final projects. The course develops student skills through lectures, demonstrations, in-class screening of excerpts and critiques. Topics covered include idea development, preproduction planning, directing actors, composition, lighting, and editing. Students are required to assist other students in their productions and attend all classes. 3 credits. Admission by waitlist only. Prerequisites: Film 220 and Film 225 or Film 230.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 336 Cinema and Ireland

Like many other Anglophone and Francophone countries, Ireland only even started to develop a robust national cinema in the 1970s. As in, for instance, Australia and New Zealand, growth had previously been blocked by the dominance of local screens by films from, on the one hand, the overbearing "imperial" power, Britain, and, on the other, Hollywood, center of an even stronger cultural imperialism. Increased national self-assertion coincided with the weakening of the grip of those two cinemas in the post-classical period. A major focus of the class is on some of the key works of the filmmakers who established themselves in the 1980s, notably Neil Jordan and Jim Sheridan. But, as the title indicates — not simply Irish Cinema — it deals with more than this. Like Ireland itself, Irish cinema is deeply marked by, and preoccupied with, the political and cultural struggles of the past, and recent cinema is illuminated by seeing it in the context of earlier films: Hollywood and British versions of Ireland, whether shot on location or in the studio, as well as the isolated earlier landmarks of an indigenous Irish cinema. We also look at the rich topic of the representation of Irish immigrants in Hollywood films. Required screenings.

Credit 3 units. A&S IQ: LCD BU: IS EN: H

L53 Film 337 Retro Game Design

Before they became "retro," games played on platforms of the 1970s and 1980s were just games. But early game-console hardware was designed with very particular ideas of what made a game a game, and under extreme constraints of cost and technical viability. Creators designed for these constraints, and their work then influenced the design of later hardware and software. This is a course about the history, design, and technology of one retro game console, the 1977 Atari Video Computer System (also known as the Atari VCS or the Atari 2600). The first popular home console, the Atari VCS is a truly weird computer: It "boasts" 128 bytes of RAM, no video buffer, and a custom graphics and sound chip designed to interface with then-universal cathode ray tube televisions. Against all odds, creators made fun and successful games within these extreme constraints. Just as an artist benefits from learning the fundamentals of their craft, so a game designer or developer can benefit from returning to these early and crude hardware platforms. In this course, students will learn the technical and creative history of the Atari, and they will also learn the fundamentals of programming its unfamiliar hardware. Students will carry out programming exercises, mostly in the assembly language instructions required to operate this unusual computer. They will then make their own games for the Atari, which will be able to run on the actual, 45-year-old hardware.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC BU: HUM

L53 Film 340 History of World Cinema

The course surveys the history of cinema as it developed in nations other than the United States. Beginning with the initially dominant film-producing nations of Western Europe, this course considers the development of various national cinemas in Europe, Asia and Third World countries. The course seeks to develop an understanding of each individual film both as an expression of a national culture as well as a possible response to international movements in other art forms. Throughout, the course considers how various national cinemas sought ways of dealing with the pervasiveness of Hollywood films, developing their own distinctive styles, which could in turn influence American cinema itself. Priority given to majors. Required screenings.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L53 Film 341 Transnational Cinema(s): Film Flows in a Changing World

Across a century of extreme nationalism, Cold War imperialism and increased globalization, moving image culture remains deeply tied to the evolution of global economics, shifting notions of local identity, and human migration. Recent changes in the dynamic of international economics and cultural flow have led to new critical approaches that reassess international cinema as being constructed by relationships that transcend national borders. This course examines multiple ways in which cinema works "transnationally," focusing on recent theories of modernism, globalization and borderless cultures. Exploring a range of contexts from American domination of the early international market, to the recent evolution of Chinese blockbuster action films, to contemporary Palestinian video art, this course looks at the way in which material developments, narrative and aesthetic conventions, and film professionals have circulated over the past century. We also look at how new technologies of production, distribution and exhibition challenge traditional notions of cultural borders. Required screenings and in-class textual analysis are used to complement industrial studies of how transnational flows have come to define contemporary audiovisual media practices. Required screenings.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L53 Film 342 Introduction to Video Game Studies

This course will introduce students to multiple facets of video games as an art form, as a business, and as a part of American popular culture. The course will begin with a broad establishment of game studies and an investigation of the uniqueness of video games as a medium. Subsequent weeks will introduce different approaches to studying video games — including historical, industrial, technological, cultural, theoretical, and aesthetic — drawn from a variety of sources. Weekly lab sections will provide the opportunity for screenings — including documentaries, news reports, television episodes, web series, and feature films — and video game play. Students will complete a final research project on a video game of their choice and present on their projects in class. Required lab.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC BU: HUM EN: H

L53 Film 344 Children's Television

How does contemporary television imagine children? How does the industry speak to them, with what aims, and using what types of representational strategies and modes of address? In turn, how do young people respond, both as viewers and, with

the advent and increasing accessibility of new technologies, as media producers? This seminar will address these and other related questions while introducing students to the study of children's television in cultural and critical media studies. Throughout, we will address the theoretical question suggested by the course's title, a reference to the work of literary scholar Jacqueline Rose: Is children's television possible? Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 345 Sexual Politics in Film Noir and Hard-Boiled Literature

Emerging in American films most forcefully during the 1940s, film noir is a cycle of films associated with a distinctive visual style and a cynical worldview. In this course, we explore the sexual politics of film noir as a distinctive vision of American sexual relations every bit as identifiable as the form's stylized lighting and circuitous storytelling. We explore how and why sexual paranoia and perversion seem to animate this genre and why these movies continue to influence "neo-noir" filmmaking into the 21st century, even as film noir's representation of gender and sexuality is inseparable from its literary antecedents, most notably, the so-called "hard-boiled" school of writing. We read examples from this literature by Dashiell Hammett, James Cain, Raymond Chandler and Cornell Woolrich, and discuss these novels and short stories in the context of other artistic and cultural influences on gendered power relations and film noir. We also explore the relationship of these films to censorship and to changing post-World War II cultural values. Films screened in complete prints or in excerpts likely include many of the following: *The Maltese Falcon*, *Double Indemnity*, *Murder My Sweet*, *Phantom Lady*, *Strangers on a Train*, *The Big Sleep*, *The Killers*, *Mildred Pierce*, *The High Wall*, *Sudden Fear*, *The Big Combo*, *Laura*, *The Glass Key*, *The Big Heat*, *Kiss Me Deadly*, *The Crimson Kimono*, *Touch of Evil*, *Alphaville*, *Chinatown*, *Taxi Driver*, *Devil in a Blue Dress*, *The Bad Lieutenant* and *Memento*. Required screenings.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L53 Film 346 From Golden Age to Wasteland: U.S. Television in the 1950s and 1960s

How did television become the dominant news and entertainment medium of the second half of the 20th century? How did the medium come to define itself and American identities in the post-WW II era? In an era where various social movements began to lay claim to the cultural center, why did "mad men" eventually give way to magical women and fantastic families? This course examines the cultural, industrial and aesthetic changes in U.S. television broadcasting during a time that was crucial to defining its relationship to the public as well as to Hollywood, the government, critics and American commerce. The class explores the relationships and shifts that made television the U.S.'s most popular consensus medium but one that also would profit by the expression of alternative tastes, politics and identities. Required screenings.

Credit 3 units. A&S IQ: HUM EN: H

L53 Film 349 Media Cultures

This course is an introduction to the interdisciplinary field of cultural and media studies. Through a focus on television and new media, it analyzes current theoretical ideas and debates about culture. Main topics include the relationship between new technologies and everyday life and popular culture; analysis of

media messages and images; how media help construct new identities and mark differences between groups; analysis of the globalization of the production and circulation of media culture; the rise of multimedia cultural industries; and the role of the audience. Required screenings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

L53 Film 350 History of Electronic Media

This course traces the history of electronic media as they have become the dominant source for entertainment and information in contemporary culture, starting with over-the-air broadcasting of radio and television through to cable and the "narrowcasting" achieved by digital technologies. While some attention is paid to other national industries, the chief focus of the course is on electronic media in the United States to determine, in part, the transformative role they have played in the cultural life of the nation. The course explores the relationship of the electronic media industries to the American film industry, determining how their interactions with the film industry helped mutually shape the productions of both film and electronic media. Required screenings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 352 Introduction to Screenwriting

Writers explore the various elements, structures and styles used in crafting a motion picture screenplay. They experience this process as they conceive, develop and execute the first act of a feature-length script. Writers create a screenplay story, present an outline for class discussion and analysis, then craft Act One. Writers are encouraged to consult with the instructor at various stages: concept, outline, character and scene development, and dialogue execution. While the students fashion their screenwriting independently, the class also explores the general elements of theme, genre and voice. A more specific examination of mechanics, the nuts-and-bolts of story construction, plotting, pacing, etc. follows to support the ongoing writing process. In-class exercises aid the writer in sharpening skills and discovering new approaches to form and content. Writers' work is shared and discussed regularly in class. Screening of film scenes and sequences provides students with concrete examples of how dramatic screenwriting evolves once it leaves the writer's hands.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 353 Writing Episodic Television

This class focuses on all the factors that go into preparing and writing an episode for a network TV series (dramas only). Students begin with a "pitch" (verbally or in short outline form) for an idea for a show currently on a network schedule. Once the "pitch" is accepted, the student then completes a "beat sheet," and ultimately a spec script that can run from 62 to 75 pages. Two drafts of the script are required. During the course of this process, students also learn how to research their narrative premises by contacting legal, medical and law enforcement experts in order to guarantee the accuracy of their scripts. In addition to learning the actual writing process, students are expected to watch several television shows and to read books, scripts and industry trade papers as they pertain to the craft and business of television writing. Finally, students also meet agents,

producers, directors and other television industry professionals in order to gain their insights into the scriptwriting process and to gain a more global view of the steps involved in bringing their ideas to the screen.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 356 Television Culture and Cult TV: Critical Approaches to Fandom

Why do television series inspire passionate involvement on the part of some viewers? What are the differences among being a viewer, an audience member, and a fan? How can we make scholarly sense of cultural practices such as learning to speak Klingon or building a "repli-car" of the General Lee? Studies of fandom have attempted to answer such questions and continue to explore issues that are crucial to understanding contemporary television culture. The phenomenon of "Cult TV" offers fertile ground for examining the complex dynamics at play among fans, popular culture, the institutions of American media, and individual programs. In its exploration of cult television and fans, this course engages with key issues in contemporary media such as the proliferation of new media technologies and the repurposing of existing media forms, the permeable boundaries between high and low or mass and oppositional culture, and the fragmentation and concentration of media markets. The class combines close textual analysis with studies of fan practices to examine a variety of television programs, from canonical cult texts such as *Star Trek* and *Doctor Who* to "quality" fan favorites such as *Designing Women* and *Cagney & Lacey* to contemporary cult/quality hybrids such as *Lost* and *Heroes*. In mapping out this cultural territory, we develop a set of critical perspectives on audience identities and activities and examine the continuing and conflicted imagination of fans by media producers, distributors, regulators and critics. Required screenings. Prerequisite: Film 220 or Film 350, or consent of instructor.

Credit 3 units. A&S IQ: HUM Art: HUM BU: BA EN: H

L53 Film 357 Quality Television and the "Primetime Novel"

Over the past four decades, the cultural status of television in the United States has been reconfigured and complicated with changes in industrial structures, audience formations, regulatory presumptions and production techniques and strategies. This course examines these interrelated forces, particularly as they have fostered a set of programs and practices often hailed as "Quality Television." The class surveys the institutional paradigms that gave rise to particular generations of programming celebrated as "quality" and analyze the systems of distinction and cultural value that make the label socially and industrially salient. We critically investigate the role of audiences and the conceptions of viewer choice at play in these developments. In addition, the course analyzes the textual features that have come to signify narrative complexity and aesthetic sophistication. We examine foundational historical examples of this phenomenon from *The Mary Tyler Moore Show* to *Hill Street Blues* and *Cagney & Lacey* to *Northern Exposure* as well as more contemporary broadcast and cable fiction such as *Lost*, *The Wire* and *Mad Men*. In addition, students are expected to watch a complete series, chosen in consultation with the instructor, as part of their final research project. Required screenings. Prerequisite: Film 220 or Film 350, or consent of instructor.

Credit 3 units. A&S IQ: HUM BU: ETH EN: H

L53 Film 358 Combat Movie Music and Sound after Vietnam

This course considers the Hollywood combat movie genre after the Vietnam War (post 1975) by listening closely to how these always noisy films use music and sound effects to tell stories of American manhood and militarism. Centering on an elite group of prestige films — action movies with a message for adult audiences — the course examines 35 years of Hollywood representations of World War II, the Vietnam War, the Gulf War and post-9/11 wars against terrorism. Close analysis of how combat film directors and composers have used music and sound in conjunction with the cinematic image are set within a larger context of ancillary texts (source materials, soundtrack recordings, published and unpublished scripts), media folios (press kits, reviews, editorials, newspaper and magazine stories and interviews), and scholarly writing from across the disciplines. Films screened include *Apocalypse Now*, *Platoon*, *Hamburger Hill*, *Courage Under Fire*, *Saving Private Ryan*, *The Thin Red Line*, *We Were Soldiers*, *Flags of our Fathers*, *The Hurt Locker* and *Act of Valor*, as well as pre-1975 combat films starring John Wayne. The ability to read music is not required. Required screenings. Prerequisite: none.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L53 Film 359 The American Musical Film

Film musicals were crucial to the success of the American film industry from the dawn of sound film in the late 1920s to the demise of the studio system in the late 1950s. This course examines the American film musical from a variety of aesthetic, critical and historical perspectives, with particular attention to how the genre interacted with popular music and dance and the major political and social trends of the 1930s, '40s and '50s. Required screenings.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L53 Film 360 The History of the Film Score

This course looks at the role of music in Hollywood films from the beginning of the sound era to the present. Larger themes include the importance of technology, industry structures shaping the nature of scores, notable film music composers, the relationship between music, gender and genre, music's role in the adaptation of literary texts to film, the power of directors to shape the content of film scores, and the importance of popular music as a driving economic and aesthetic force in film music history. Films screened include *From Here to Eternity*, *Stagecoach*, *High Noon*, *The Night of the Hunter*, *Butch Cassidy and the Sundance Kid*, *Born on the Fourth of July*, *Casino*, *Jarhead* and *The Social Network*. Required screenings.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

L53 Film 361 Film Sound

Although film critics and theorists tend to think of cinema as a "visual art," this shorthand description of the medium overlooks the importance of film sound in cinematic storytelling. This course is intended to provide a general overview of the way in which film theorists have treated the issue of sound in the cinema. Among the issues addressed in the course are: the contribution sound technology and practice make to film form; the various possible formal relationships between sound and image; the effects of sound technologies on notions of realism and verisimilitude; the importance of sound to particular genres, such as the horror film; and lastly, the role of sound in film

spectatorship. The course also showcases the work of the most important sound stylists in film history, such as Fritz Lang, Orson Welles, Alfred Hitchcock, Robert Altman and David Lynch. Required screenings. Credit 3 units.

L53 Film 363 Video Post-Production

While post-production of the soundtrack has been around for years, post-production of the "visual track" has increasingly become a major phase in the video and movie-making process. It often allows filmmakers to enhance existing footage with potentially dazzling results. As in all our production courses, we are concerned with developing strong content. The focus is not on special effects per se, but rather on how they may be used to enhance the message. Students find a nonprofit organization of vital importance in need of exposure and produce a Public Service Announcement to be broadcast. Key post-production software such as Commotion, AfterEffects and Motion are explored throughout the semester. Prerequisite: Film 230 Moving Images and Sound or consent of instructor. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L53 Film 3644 "Look Here, Karen": The Politics of Black Digital Resistance to White Femininity

In this course, we will explore the ways in which Black online publics use resistance strategies, such as mimetic imagery and racial humor, to call attention to white femininity and its deployment of the police against African Americans. We will trace the relationship between the police state and white femininity through the historical lens of 'innocence' and protection of the U.S. nation as well as the similarities and differences of Black online publics' responses in relation to past resistance strategies. What does it mean to be a 'typical' Karen in Internet culture? What are the aesthetic boundaries of Karens? And, what do digital platforms afford to Black users who make Karens visible? While paying attention to race, gender and class, this course offers students the skills to be able to collect and analyze online data, such as 'Karen' memes, in order to make critical arguments and observations that are grounded in historical accuracy. Same as L90 AFAS 3644 Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: BA

L53 Film 366 Women and Film

The aim of this course is primarily to familiarize students with the work of prominent women directors over the course of the 20th century, from commercial blockbusters to the radical avant-garde. Approaching the films in chronological order, we consider the specific historical and cultural context of each filmmaker's work. In addition we discuss the films in relation to specific gender and feminist issues such as the status of women's film genres, representations of men and women on screen, and the gender politics of film production. Required screenings. Credit 3 units. A&S IQ: HUM, SD BU: HUM EN: H

L53 Film 368 Contemporary Women Directors

Despite recent media attention to the gender gap in Hollywood, women still account for less than 10% of all directors, and only five women have ever been nominated for the Best Director Oscar. However, these abysmal statistics do not reflect the reality that female directors are producing some of the most innovative and exciting films of the 21st century. This course is intended to provide a general overview of the remarkable contributions of women directors to contemporary cinema

(1990 to present). First, we will turn our attention to women in the commercial industry, examining topics such as female authorship, popular genres, and the gender politics of production cultures in Hollywood. Then, we will survey women directors working outside of the system in documentary, independent, and experimental filmmaking modes. Finally, we will adopt a transnational perspective to investigate the contributions of women directors to world cinema, contextualizing the films of "women cinéastes" from countries such as Hong Kong, Argentina, and Iran in relation to their national cinemas and international film festival networks. In addition, we will discuss the films of women directors in terms of feminist and gender issues and as texts that clarify critical issues in film analysis, interpretation, and criticism. Required screenings. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 370 American Horrors

Horror movies. Fright films. Scream marathons. Blood and gore fests. Why should we want to look at movies that aim to frighten us? What is the attraction of repulsion? Is there an aesthetics of ugliness? Except for some early prestigious literary adaptations such as *Dr. Jekyll and Mr. Hyde*, the horror film began as a low-class genre, a notch above exploitation movies. In the 1970s and 1980s, it became the dominant commercial genre by offering increasingly graphic images of violence and mayhem. The horror film had arrived: lavish budgets, big stars and dazzling special effects in mainstream major studio films competed with low-budget, no frills productions that helped establish artistically ambitious and quirky filmmakers such as George Romero and David Cronenberg. By a chronological survey of the American horror film, this course explores how differing notions of what is terrifying reflect changing cultural values and norms. Throughout, we consider the difficult questions raised by horror's simple aim of scaring its audience. In addition to weekly screenings, work for the course includes analytical and theoretical essays on the horror film. Written analyses of films with a close attention to visual style is required. Prerequisite: Film 220. Required screenings. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L53 Film 371 Making War

This course examines the cinematic representation of war. Using World War II as a case study, students examine a series of combat pictures, documentaries and "home front" films from the 1940s to the present. Several key questions guide the class discussion: How do war films respond to and shape the political worlds in which they are produced? How do these films confront the aftermath of war and the soldier's homecoming? Where is the line between the home front and the front line? More broadly, what does it mean to portray the violence and suffering that war inevitably brings? At the close of the semester, students partake in an in-class symposium presenting their research on the cinematic treatment of other conflicts, from the Civil War to the "War on Terror." Films include: *The Boat*, *Saving Private Ryan*, *The Thin Red Line*, *Why We Fight* and *Mrs. Miniver*. Readings include works by Susan Sontag, Kaja Silverman and W.G. Sebald. Required screenings. Credit 3 units. A&S IQ: HUM BU: BA EN: H

L53 Film 376 French New Wave

French cinema from 1958 to 1968 offered La Nouvelle Vague or The New Wave, one of the most innovative, influential and critically discussed movements in film history. The New Wave marked a major turning point in the relationship between film, thought and politics in France, as well as a unique bridge between art cinema and pop culture. Speaking for more than just the youth generation of its own country, it had a major influence on new approaches in subsequent European, American and Asian cinemas. This course offers a detailed look at the social values, artistic motivations and aesthetic experiments embodied in the French New Wave through the films of Jean-Luc Godard, Agnès Varda, François Truffaut, Alain Resnais, Claude Chabrol, Eric Rohmer and others, positioning their work within the larger social, political and cultural environment of this period. As many of these directors collaborated as filmmakers and also were active as film critics and theorists, this class provides a unique insight into the overlapping between visual theory and practice, film and other media, culture and society. Weekly screening required.

Credit 3 units. A&S IQ: HUM BU: IS EN: H

L53 Film 379 Expressionism in Theater and Film

This course is designed as an advanced introduction to the aesthetic movement of Expressionism as it appeared in Germany and the United States in the media of theater and film. Characterized by stylized settings that "ex-press" the internal spiritual/emotional/psychological state of its central character, Expressionism is usually discussed as a reaction to Realism, given its overt symbolism, telegraphic diction, and episodic action. Beginning with a brief general introduction to the movement (including its manifestation in the visual arts), we will consider its cultural, political, and critical history, while exploring more recent scholarly investigations into the significance of its performance dimensions.

Same as L15 Drama 379

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

L53 Film 419 Theories of Mass Media

This course explores theories of the mass media with an emphasis on television as well as its convergences with other media and computer technologies. It starts by examining theories that posit the media as instruments of societal maintenance or transformation and then examines the ways in which various theorists have refined or rejected elements of these theories in a quest for both specificity and complexity. In particular, the course examines media and cultural studies' attempts to synthesize critical paradigms ranging from political economy to semiotics to feminism. The course concludes with an examination of the challenges and opportunities posed to theorizations of the mass media by contemporary circumstances such as media conglomeration, niche marketing and microcasting, and global flows of information, capital and people. Required screenings.

Credit 3 units. A&S IQ: HUM BU: BA EN: H

L53 Film 420 Film Theory

This course is an introduction to both classical and contemporary film theory. Beginning with the earliest attempts to treat cinema as a new and unique art form, the course initially reviews the various ways in which film theory attempted to define cinema in terms of its most essential properties. The course then examines more contemporary developments within film theory, more specifically its attempt to incorporate the insights of other critical

and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory and postmodernism. Throughout the course, we consider questions regarding the ontology of cinema, its relation to spectators, and the various ways in which its formal properties create meaning. Readings for the course include the major works of Sergei Eisenstein, Andre Bazin, Christian Metz, Laura Mulvey and Fredric Jameson. Required screenings.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM EN: H

L53 Film 421 Film Historiography

This course is a seminar on the writing of film history for advanced students. Through an engagement with the historiographical writings of scholars, such as Dominic LaCapra, Hayden White and Michel Foucault, students gain an understanding of various genres of film historical writing, an appreciation for the kinds of research that film historians do, and a familiarity with the ways in which film historians delimit their field of study, form research questions and develop hypotheses. In addition to reading and classroom discussions, students are expected to write a fairly lengthy paper (17 to 20 pages) that involves original historical research and the close examination of trade press, professional journals, fan magazines and news articles. As preparatory assignments leading up to the final project, students also prepare project descriptions, bibliographies and outlines that are shared and discussed in a workshop format.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L53 Film 422 Film Stardom, Performance and Fan Culture

This course focuses the Hollywood star system. We explore stars in relation to celebrity and consumerism, especially how "stardom" is created by a system that seeks to create effects in film viewers whether conceived as audiences, fans or spectators. We examine the performance element of stardom and its relationship to genre, style and changing film technology. Also of concern is how stars and the discursive construction of stardom intersect with gender representation, race, ideology, sexuality, age, disability, nationality and other points of theoretical interest to and historical inquiry in contemporary film studies. While emphasis is placed on mainstream commercial U.S. cinema, students are encouraged to pursue questions beyond this framework within their own research. Required screenings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

L53 Film 423 Histories of Media Convergence

Entertainment and communications forms combine and blend, and they have done so across millennia. However, the phenomenon of media convergence has taken on a special salience over the last one-and-a-half-centuries, as exemplified by the growing intermixture of film, radio, television, gaming and the internet. In particular, critics, consumers, politicians and producers used convergence as structuring principle in understanding, regulating and planning for the future of media culture. This course engages with contemporary worries and enthusiasms about convergence by considering the specific conditions in which the phenomenon has been understood and practiced. Tracing a historical arc through the 20th century, we first examine convergences of radio and film, film and music publishing, television and film exhibition, and disparate corporate entities as basis for understanding more recent media combinations. Building on that foundation, the majority of the course consists of case studies of media convergence since 1980, considering it in terms of industry, technology, regulation and audiences. These case studies also provide students

with a survey of and inquiry into questions of historiographic theory and method. Note: This course satisfies the history and historiography requirement for the FMS Graduate Certificate. Required screenings.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L53 Film 424 Broadcasting Equality: Radio, Television, and Social Change in Postwar America

The period between World War II and the 1970s was one of profound cultural, political, and demographic shifts that brought the problems of ethno-religious and racial prejudice to the forefront of U.S. national consciousness. Religious leaders, secular social activists, media industry professionals, and African-American civil rights leaders often worked together to combat intolerance, bigotry and inequality. What did these activists achieve in their attempts to deploy U.S. broadcast media in what they sometimes referred to as "propaganda against prejudice"? How did this activism relate to the institutions of broadcast media, including governmental agencies, national networks and local broadcasters? What was television and radio's impact on the Civil Rights Movement of the 1950s and 1960s? In addressing these questions, we will consider a wide range of media: public service programming as well as commercially produced series, specials, network news and documentaries produced between the 1940s and the 1970s. Programs considered will include *New World A-Coming*, *Amos 'n' Andy*, *American Bandstand*, *NBC White Papers: Sit In*, *Sanford and Son*, *Eyes on the Prize*, and *Soul Train*, among many others. Required screenings.

Credit 3 units. A&S IQ: HUM, SC, SD EN: H

L53 Film 429 Mass Culture and Modern Media: Fantasylands: Cinema, Spectatorship, and the Spatial Imagination

This course provides an introduction to cultural theories that are pertinent to the study of cinema, mass culture, and modernity. Rotating topics will highlight different aspects of cinema's relationship to popular culture, urbanism, modern technology, capitalism, and mass media. Students will encounter key theorists for understanding modern life and subjectivity, such as Marx, Freud, Foucault, Benjamin, and Raymond Williams. In addition, the course introduces core readings in the history and cultural theory of early cinema, which may include work by Miriam Hansen, Anne Friedberg, Tom Gunning, Charles Musser, Giuliana Bruno, Jacqueline Stewart, and others. Topics may include cinema and modernity, cinema and mass culture, cinema and leisure, cinema and urbanism, and cinema and consumer culture.

Credit 3 units. A&S IQ: HUM Art: CPSC BU: HUM EN: H

L53 Film 430 Clown Princes

"Dying is easy, comedy is hard," runs an old theatrical adage. Nevertheless, some of the most popular actors in American film have chosen the hard path by typecasting themselves in comedy, playing repeated variations on the same character. "Comedian comedy," representing films that showcase the distinctive skills of great clown-actors, is the central concern of this course. We analyze how individual comedians rework performance traditions through the distinctive concerns of their time and culture to create idiosyncratic comic personae. We look at films starring Charles Chaplin, Buster Keaton, Harold

Lloyd, Laurel and Hardy, the Marx Brothers, Jack Benny, Peter Sellers, Jim Carrey and Eddie Murphy. Work for the course requires reading in comic theory and analytical essays. Required screenings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L53 Film 4300 Topics in Chinese Media Culture: Charting Identity in the Digital Age

In contemporary society, global computational media have come to shape the new form and function of identity. As the users of these digital technologies, we have been conscripted into systems of compulsory identification ranging from fingerprint scanning and biometric facial recognition to big data documenting and calculating our age, gender, race, nationality, and even health conditions and shopping preferences. These technologies of identification promise to measure a truthful and core identity from the surface of a human body for the purposes of authentication, verification, and tracking in service of a mixture of commercial, state, and military interests. One dire consequence of the proliferation of these technologies of identification is the failure to recognize non-normative, minoritarian groups, and thereby replicating or even amplifying racial hierarchies, gender stereotypes, social division, and global inequality. This course asks what identity is and what function identity serves in the contemporary society in East Asia and on a global scale. Recognizing the changing scope of "Asia" as a vital concept and method, students will read extensively contemporary works in Asian Studies, Asian-American Studies, critical race and gender theory, and media theory that deal with the intersection of digital media, race and gender, and global socio-political transformation. Alongside these readings, students will explore contemporary films, artworks, social media events, and online activism in China, Hong Kong, Taiwan, and beyond that reflect the questions of technologized identity and subjectivity. The class will also go back to western philosophies of technology, cybernetics, and media theories to rethink how the universalized prototype of the human (which is a white man) was constructed in scholars' inquiries into mind and body, the self and the other, and the then-new relationship between human and machine. Prerequisites: junior level or above or permission of instructor.

Same as L81 EALC 430

Credit 3 units. A&S IQ: LCD BU: IS

L53 Film 431 Renegades and Radicals: The Japanese New Wave

In 1960, the major studio Shochiku promoted a new crop of directors as the "Japanese New Wave" in response to declining theater attendance, a booming youth culture, and the international success of the French Nouvelle Vague. This course provides an introduction to those iconoclastic filmmakers, who went on to break with major studios and revolutionize oppositional filmmaking in Japan. We analyze the challenging politics and aesthetics of these confrontational films for what they tell us about Japan's modern history and cinema. The films provoke as well as entertain, providing trenchant (sometimes absurd) commentaries on postwar Japanese society and its transformations. Themes include: the legacy of WWII and Japanese imperialism; the student movement; juvenile delinquency; sexual liberation; and Tokyo subcultures. Directors include: Oshima Nagisa, Shinoda Masahiro, Terayama Shuji, Masumura Yasuzo, Suzuki Seijun, Matsumoto Toshio and others. No knowledge of Japanese necessary. Required screenings.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:
HUM, IS EN: H

L53 Film 432 Global Art Cinema

How do art films tell stories? The dominant storytelling genre of the contemporary festival circuit, the art film has since World War II combined "realist" and "modernist" impulses. Influenced by Italian neorealism, art films grant priority to characters from working class, sexual and other exploited and imperiled minorities. Drawing on the fine arts, literature and music, art films also experiment with modernist themes and formal principles, such as subjectivity, duration serial structure, denotative ambiguity and reflexivity. This course explores art cinema from a variety of national contexts, analyzing storytelling techniques and themes that challenge the "economical" and diverting forms associated with mainstream commercial filmmaking. Required screenings.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS
EN: H

L53 Film 443 Memory, Tears and Longing: East Asian Melodrama Film

Excessive emotion, unreasonable sacrifice, hidden truth, untimely knowledge, and forbidden desire — the power of melodrama and its moving representations have fueled the popularity of hundreds, if not thousands, of books, plays and films. Melodrama has variously been defined as a genre, a logic, an effect and a mode, applied to diverse media, divergent cultural traditions, and different historical contexts. The course provides a survey of East Asian melodrama films — as well as films that challenge conventional definitions of melodrama — by pairing Japanese-, Korean-, and Chinese-language productions with key critical texts in melodrama studies. We see classics such as *Tokyo Story*, *Two Stage Sisters*, and *The Housemaid*. We examine melodrama's complex ties to modernity, tradition and cultural transformation in East Asia; special emphasis is placed on representations of the family, historical change, gender and sexuality. In addition to historical background and film studies concepts, we also consider a range of approaches for thinking about the aesthetics and politics of emotion. No prerequisites. No prior knowledge of East Asian culture or language necessary. Mandatory weekly scheduled screening.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L53 Film 444 Topics in Chinese Language Cinema

Variable topics associated with the shaping of Chinese-language cinema, whether originating from the PRC, Hong Kong or Taiwan. This course may take up themes, directors, film genres, special subjects (such as independent film), formal elements (such as cinematography or sound) or issues (the relationship of film to literature, specific cultural movements or political events). Required screenings.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L53 Film 450 American Film Genres

By close examination of three or four specific types of film narratives, this course explores how genre has functioned in the Hollywood mode of production. Students gain an understanding of genre both as a critical construct as well as a form created by practical economic concerns, a means of creating extratextual communication between film artist/producers and audience/consumers. Genres for study are chosen from the Western, the gangster film, the horror movie, the musical, screwball comedy,

science fiction, the family melodrama, the woman's film and others. In addition to film showings, there are readings in genre theory as well as genre analyses of individual films. Required screenings.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L53 Film 451 American Television Genres

Questions of genre are central to any exploration of television's texts, whether they are being analyzed as craft, commerce or cultural phenomenon. Genre has been used by critics and historians to ascribe "social functions" to groups of programs and to diagnose cultural preoccupations, while genre has been used industrially to manage expectations among audiences, advertisers, programmers, producers and creative professionals. Investigating genres ranging from the soap opera to the Western, workplace situation comedies to sports, and game shows to cop shows, this course explores the role of genre in the production, distribution and reception of American television. Students gain a critical understanding of genre theory and key arguments about the form and function of television texts; they develop a set of tools for analysis of televisual narrative and style; the social uses and meanings of genre; the institutional practices and presumptions of the American television industry; and the persistence of textual forms and audience formations in the face of structural changes such as deregulation, media convergence and globalization. Required screenings.

Credit 3 units. A&S IQ: HUM BU: BA EN: H

L53 Film 452 Advanced Screenwriting

This course is intended for students who already have taken Film 352 Introduction to Screenwriting. Building on past writing experiences, students explore the demands of writing feature-length screenplays, adaptations and experimental forms. Particular attention is paid to the task of rewriting.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L53 Film 453 Experimental Design for Immersive Media

The term "metaverse" (originally coined by novelist Neal Stephenson) has recently come into vogue to describe a loose constellation of emerging technologies related to immersive media—particularly virtual, augmented, and mixed reality. In this course, we will explore new forms of creative practice enabled by this ecosystem. Students will analyze a variety of immersive experiences, ranging from 360 films and animations to interactive room scale experiences to multisensory installations, to understand the creative opportunities and challenges offered by these media. Students will then develop their own creative proposals and prototype an XR experience using a combination of 360 camera systems, digital production software, head-mounted displays, and physical and spatial computing elements.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM, VC

L53 Film 454 American Film Melodrama and the Gothic

American film melodrama has been considered both the genre of suffering protagonists, incredible coincidences and weeping spectators as well as a mode of action, suspense and in-the-nick-of-time rescues. In this course, we examine American film melodrama as a dialectic of sentiment and sensation that draws heavily on Gothic tropes of terror, live burial and haunted internal states. We trace the origins of film melodrama and the cinematic Gothic to their literary antecedents, the horrors of the French Revolution, and classical and sensational stage melodramas of

the 19th century. In addition to the 1940s Gothic woman's film cycle, we excavate the Gothic in the maternal melodrama, the suspense thriller, film noir, domestic melodrama, the slasher film and the supernatural horror film. Required screenings.

Credit 3 units. A&S IQ: HUM EN: H

L53 Film 456 Soundtrack Studies: Music, Voices, Noise

This course considers the interaction of film, sound and music from the silent era to the present by screening representative films from around the world and exploring current directions in scholarship from the disciplines of film studies and musicology. Topics include: historical and critical understandings of the sound track, major film sound theorists (such as Michel Chion), technological shifts (such as synchronized sound, Dolby and digital surround sound), the uses of Richard Wagner (both his music and his ideas), the relationship between a film genre (noir) and sound and music and the relationship between a musical genre (opera) and film, and the juxtaposition of popular and classical, Western and non-Western musical styles in art cinema. Screened films include Meek's *Cutoff*, *Blow Out*, *Days of Heaven*, *Sous le toits de Paris*, *Love Me Tonight*, *Casablanca*, *Alien*, *Apocalypse Now*, *La cérémonie*, *Le Cercle rouge*, *The Pillow Book*, *The Scent of Green Papaya*, and *The Bourne Ultimatum*. The course is in seminar format. Readings from recent scholarly work on film sound and music inform class discussions of the screened films. Close analysis of how music, sound and image interact in film making and the film experience lies at the heart of the course. The ability to read music is not required. A primary goal of the course is the development of specific listening skills that are useful when working in this area. Targeted writing assignments ask students to write about film sound and music from a variety of critical and historical perspectives. Prerequisites: graduate status or completion of Film 360 The History of the Film Score, or AMCS 360 or Music 328 and permission of the instructor. Required screenings.

Credit 3 units. A&S IQ: HUM EN: H

L53 Film 457 Soundtrack Studies: Music, Voices, Noise

This course considers American popular music as represented in audiovisual media from 1926 to the present. The relationship between the popular music industry (a commercial sphere oriented primarily toward the selling of sheet music and audio recordings) and audiovisual technologies (various screens and formats encountered in changing social and commercial contexts) will be explored along two complementary tracks: popular music performers as presented in performance-centered media and popular music as a narrative topic or resource in feature films. Three related analytical frames will shape our discussions: industrial and technological history (the material conditions for the making and distribution of popular music and moving images); the question of "liveness" in recorded audiovisual media; aesthetics of various popular music styles as translated into audiovisual forms and contexts. The course is in seminar format. The ability to read music is not required but students with music reading or transcription skills will be encouraged to draw upon these tools. Prerequisites: graduate status or completion of a 300-level FMS or Music course and permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 458 Major Film Directors

What does the film director do? In the earliest movies, film directors modeled themselves on their theatrical counterparts: they chiefly focused on how to stage an action in a confined space for a stationary camera that represented an ideal member of the audience. As the camera began to be used to direct audience attention, first through cutting, then through actual movement, the film director evolved from a stager of events to a narrator. By analyzing the work of one or more major film directors, this course explores the art of film direction. We learn how film directors may use the camera to narrate a scene, to provide their own distinctive view of the actions playing out on the movie screen. May be repeated for credit with permission of the instructor. Required screenings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 460 Taboo: Contesting Race, Sexuality and Violence in American Cinema

Pushing the envelope or going too far? What is the boundary between films that challenge us and films that offend us? This is a course about films that crossed that boundary, most often by presenting images of race, sexuality and violence, images that could attract audiences as much as they offended moral guardians and courted legal sanctions. Because they were denied the First Amendment protection of free speech by a 1915 Supreme Court decision, movies more than any prior art form were repeatedly subject to various attempts at regulating content by government at federal, state and even municipal levels. Trying to stave off government control, Hollywood instituted forms of self-regulation, first in a rigid regime of censorship and subsequently in the ratings system still in use. Because taboo content often means commercial success, Hollywood could nonetheless produce films that pushed the envelope and occasionally crossed over into more transgressive territory. While control of content is a top-down attempt to impose moral norms and standards of behavior on a diverse audience, it also reflects changing standards of acceptable public discourse. That topics once barred from dramatic representation by the Production Code — miscegenation, homosexuality and "lower forms of sexuality," abortion, drug addiction — could eventually find a place in American movies speaks to changes in the culture at large. In trying to understand these cultural changes, this course explores films that challenged taboos, defied censorship and caused outrage, ranging from films in the early 20th century that brought on the first attempts to control film content through to films released under the ratings system, which has exerted subtler forms of control. Required screenings.

Credit 3 units. A&S IQ: HUM, SC, SD Art: CPSC EN: H

L53 Film 465 Theory and Practice of Experimental Film

Filmmaker Stan Brakhage famously wrote the following: "Imagine an eye unrul'd by man-made laws of perspective, an eye unprejudiced by compositional logic, an eye which does not respond to the name of everything but which must know each object encountered in life through an adventure of perception." In this course, we will embark upon our own adventures of perception, examining and producing works of art that challenge our preconceptions of what cinema is or can be. From city symphonies to pop collages, portraiture to handcrafted animation, and ethnography to gender studies, we will explore the multifaceted and transformative avant-garde cinema through the work of its greatest practitioners, contextualize films in relation to aesthetic aspirations (e.g., formalism, opposition, reflexivity, transcendence) and movements in art and

cultural theory (e.g., Dadaism, Abstract Expressionism, Pop, Performance Art, Minimalism), and acquire the digital production skills needed to make our own experimental videos. Each week, we will mix the classic with the contemporary to demonstrate the ongoing vitality of — and make our own contributions to — this often misunderstood cinematic tradition. Required screenings. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 475 Screening the Holocaust

This course surveys the history of Holocaust representation on film, examining a wide range of documentary and fictional works from 1945 to the present day. Discussions consider a number of key questions, including: What challenges does the Holocaust pose to cinematic representation, and how have filmmakers grappled with them? How have directors worked within and against notions of the Holocaust as unrepresentable, and how have they confronted the challenge of its association with a limited set of highly iconic images? What are the more general ethical and political dimensions of representing the Holocaust onscreen — its victims as well as its perpetrators, the systematic genocidal violence that characterized it, and the sheer absence of so many dead? We also probe the changing significance of cinematic representation of the Holocaust, exploring the medium's increasingly memorial function for audiences ever further removed from the historical moment of its occurrence. Screenings may include *The Last Stage*; *Distant Journey*; *Night and Fog*; *Judgment at Nuremberg*; *Shoah*; *Europa, Europa*; *Schindler's List*; *Train of Life*; *The Specialist*; *Photographer*; *A Film Unfinished*. Critical readings by figures such as Giorgio Agamben, Jean Amery, Shoshana Felman, Geoffrey Hartman, Marianne Hirsch, Sidra Israhi, Dominick LaCapra, Alison Landsberg, Berel Lang, Michael Rothberg, and James Young. Required screenings.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L53 Film 478 Topics in Transmedia Franchises

This variable topics course for advanced undergraduate and graduate students is an interdisciplinary seminar on transmedia franchises. In particular, it is recommended for those seeking to understand transmedia storytelling as an artistic, industrial, and cultural practice. As such, this course will bring into conversation various methodologies and perspectives, including film and media scholarship as well as other fields of study in the humanities and social sciences. The goal of this interdisciplinary approach is to illuminate how transmedia franchises have developed since the early 20th century to become the dominant product of the American — and, increasingly, global — cultural industries. Foci of this course may include such topics as individual franchises; global transmedia history; the franchise strategies of individual cultural industries (e.g., the Japanese media mix); or representation within franchise texts, production cultures, and fan communities. This course serves as a capstone for Film & Media Studies majors. Weekly or bi-weekly screenings or hands-on media labs are required.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM

L53 Film 479 (In)Visible Media: Connection and Crisis in Contemporary Japan

This variable topics course is an interdisciplinary seminar on film/media designed for advanced undergraduate and graduate students. In particular, it is recommended for those seeking to understand film/media as a lived experience that takes place within cultural frameworks. As such, this course will bring into

conversation various methodologies and perspectives, including film/media scholarship, as well as ones drawn from other fields of study in the humanities, sciences, or social sciences. The goal of this interdisciplinary approach is to illuminate how film/media both elicits and represents human response. The foci of this course may include such topics as violence and film/media, the body and film/media, the cognitive impact of film/media viewing, the relationship of environment to experiencing film/media, or the relationship of culturally specific events or trends to film/media production and reception. This course serves as a capstone for Film & Media Studies majors. Weekly or biweekly screenings or hands-on media labs required.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L53 Film 485 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000

This seminar examines film and modern art within the framework of "Orientalism." Reading foundational texts by Said, and incorporating theory and historical discourse concerned with race, nationalism and colonialism, we explore artistic practice in European photography, painting and decorative arts from 1850 to recent times and European and Hollywood film. We study how power and desire have been inscribed in Western visual culture across the bodies of nations and peoples through conventions such as the harem, the odalisque, the desert and the mysteries of ancient Egypt. To that end, we look at artists such as Delacroix, Ingres, Gérôme, Beardsley and Matisse and screen films such as *The Sheik*, *The Mummy*, *Salome*, *Cleopatra*, *Pepe le Moko*, *Naked Lunch*, *Shanghai Gesture*, *Thief of Baghdad*, *Princess Tam Tam* and *The Sheltering Sky*. Subjects include the representation of gender, sexuality, desire, race and identity as well as the cultural impact of stereotype and "exotic" spectacle. Students study methods of visual analysis in film studies and art history. All students must attend film screenings.

Credit 3 units. A&S IQ: HUM, LCD, SD EN: H

L53 Film 495 Special Projects

This course is intended for juniors and seniors who wish to register for internships. Students must receive program approval prior to beginning the internship. Please consult the program guidelines governing internships.

Credit variable, maximum 3 units.

L53 Film 499 Study for Honors

This course is intended for majors pursuing honors in Film and Media Studies. In order to enroll for this course, students must apply in advance for honors and be approved by a faculty committee. Please consult the Program guidelines for application deadlines and other requirements.

Credit 3 units.

L53 Film 500 Independent Study

This course is intended for students who wish to pursue areas of study not available within the standard curriculum. In order to enroll for this course, students must have a faculty advisor and submit a contract outlining the work for the course to the Film and Media Studies office. Please consult the Program guidelines governing independent study work. Opportunities for Independent Study are available to all undergraduate and graduate students working toward a degree in Arts and Sciences. Registration in an Independent Study requires sponsorship by a faculty member and approval of the Program

Director. An Independent Study Proposal form can be obtained from the Film and Media Studies Office. All proposals for Film 500 have to be submitted to the FMS main office no later than November 1 for spring semester enrollment and April 1 for Film 500 to be taken in the fall semester. Approval is not automatic. Credit variable, maximum 3 units.

L53 Film 501 Advanced Moving Image Analysis and Criticism

This course will explore the analytical tools that have served as the foundation for cinematic and televisual academic criticism. The variety of texts, visual and aural, that comprise moving image production will be considered with the aim of determining how textual strategies structure perception. The aim of the course is two-fold: to have students develop analytical skills for dealing with film and video texts, but also to see how these have been deployed in a multiplicity of approaches/applications offered by academic film criticism. There will be regular screenings to provide the material for analysis, as well as readings to offer a variety of critical models. **REQUIRED SCREENINGS:** Thursdays at 7:00 p.m.
Credit 3 units.

L53 Film 505 Travel in Space: Contemporary Cinemas of Taiwan, Hong Kong, and China

The recent phase of intensive urbanization, industrialization, and globalization in Chinese regions has also mobilized multi-directional flows of migrants, tourists, workers and entrepreneurs across geographical boundaries. Moving through space, the voyagers offer changing perspectives to the cinematic mapping of socio-political relationships, histories, and cultures that constitute the identities of places. This course explores contemporary Chinese-language films that imagine trajectories between distant spaces as well as the experiences of "new comers" in "foreign" places. We will examine the current wave of travel films in Taiwan, the representation of drifters in Chinese urban films, as well as the imagination of migration in Hong Kong cinema. We will also explore theories that draw connections between movement, space, and cinema. **REQUIRED SCREENINGS:** TBA
Credit 3 units.

L53 Film 507 The 007 Saga: James Bond and The Modern Media Franchise

What is a franchise, and what approaches have scholars used to study the franchise as a modern cultural and commercial form? This course explores the phenomenon of the modern media franchise in light of the "007 saga": the stories of James Bond as they have proliferated in various media since the 1950s, including the Ian Fleming novels, television, comics, film, games, and young adult and fan fiction (including slash fiction). The 007 saga presents an opportunity to re-examine available ways of conceiving the franchise, from transmedia storytelling to media mixing, and it emphasizes the importance of scholarly models that can account for a decentralized creative labor. Throughout the history of Bond fiction, authorized and unauthorized writers have generated what now amounts to a threaded storytelling experience with pleasures that overlap with -- but are distinct from -- those of centrally planned media phenomena, like the Marvel Cinematic Universe. Note: Admission by waitlist only. Graduate students and advanced undergraduate majors in Film and Media Studies will have priority. Required screenings.
Credit 3 units.

L53 Film 510 Graduate Practicum in Film & Media Studies

The practicum in Film & Media Studies seeks to make our graduate students more competitive in the job market. It consists of professional experience that brings to bear academic knowledge and skills associated with the graduate study of moving image media (film, television, digital). The practicum may take a number of forms, but in every case, the experience must be planned in a way that contributes to the student's professional development. It might consist of work curating films for a screening or mini-festival accompanied by screening notes or other activities that enhance the academic value of the event. The student might organize a reading group or a scholarly symposium or lecture series to further the understanding of a particular aspect of the moving image on campus. The practicum may also consist of archival, or curatorial work in forms of the moving image at an archive, museum, or other non-profit organization (such as the St. Louis International Film Festival). The student might also pursue a film/media-centered oral history project or develop a film/media-centered blog or engage in other forms of writing that have a public presence. Students may initiate other projects, but any practicum requires a faculty mentor and in circumstances in which there is a collaborating organization, a letter of endorsement of the practicum from the student's on-site supervisor. Every student presents a written proposal/plan for any practicum to the DGS and to the faculty mentor/advisor. Both faculty must give permission to the plan and determine the appropriate number of credit hours (variable 1 to 3). Students may sign up for the practicum more than once to satisfy the 3 credits required in this area for the FMS master's degree; however, only one practicum should be pursued in a given semester. If there is a site supervisor, she/he must provide a letter upon completion of the practicum detailing the student's work and its quality. The student must provide a brief narrative (2 to 5 pages) detailing how the practicum served as a learning experience. The faculty advisor will award the grade for the practicum.

Credit variable, maximum 3 units.

French

French is one of the top five languages spoken around the world today, spanning the continents of Europe, Africa, Asia, and the Americas along with the Mediterranean and Caribbean regions. The French major and minor offer preparation in language, literature, culture and film as well as opportunities for study abroad. Our undergraduate program features a rich variety of courses for students interested in studying French in relationship to philosophy and politics, the sciences and the arts, sports and technology. Our summer, semester and year-long study abroad programs in Nice, Toulouse, Paris and Dakar enable students to deepen their understanding and appreciation of French culture by taking courses in the French university system, living with French families, shadowing doctors in French hospitals, holding internships in French businesses, and traveling extensively. Such experiences are the perfect preparation for careers in international business, global health, international medicine, international law, and international relations or diplomacy.

We also provide our students with a range of linguistic, analytical and theoretical tools necessary for a comprehensive understanding and appreciation of French and Francophone literature and culture to prepare them for a variety of careers or further study. French majors who plan to apply to professional schools or to pursue graduate studies in literature, philosophy, history, art history, music, film, anthropology or other related fields are strongly encouraged to pursue independent research during their senior year. Writing a senior honors thesis provides students with a unique opportunity to combine the study of French language, literature and culture with their other interests and to work closely with a member of our faculty. Our faculty takes an active interest in our students, providing support and encouragement throughout their studies in order to prepare them to become dynamic, conscientious and informed members of today's global community.

We are pleased to offer our students an ongoing series of guest lectures, films, exhibits, and performances by scholars, authors, and artists of international repute under the auspices of our French cultural center, French ConneXiones, recognized as a Centre d'Excellence by the French Embassy. We also host a weekly Francophone table and an annual Francophone week, all of which contribute to the intellectually dynamic and personally rewarding social environment of our section. We regularly host colloquia that attract scholars from St. Louis and around the world.

Please visit our department website to learn more about our new French for the Medical Professions track, which offers courses that are cross-listed with Medical Humanities and Global Health.

Majors

The Major in French

Total units required: 30 (27 for second majors)

Required courses for students matriculating Fall 2021* and later:

Code	Title	Units
French 307D	Cultural Expression	3
French 320s-340s	One "In-Perspective" course	3
French 360 or 361	One "Thinking-It-Through" course	3
French 370s-390s	One "In-Depth" course	3
French 4xx	Two 400-level seminars	6

* French 204D no longer counts toward the major. Students pursuing the major earn the remainder of their credits by taking our rich 300- and 400-level elective offerings in French and Francophone literature, language, culture, and related disciplines in the arts and sciences. Majors may count one course taken abroad toward the satisfaction of their Thinking-It-Through or In-Depth requirement.

Total units required for students matriculating prior to Fall 2021*: 21

Required courses for students matriculating prior to Fall 2021:**

Code	Title	Units
French 307D	Cultural Expression	3
French 308D	Introduction to Literary and Cultural Analysis	3
French 325	French Literature I: Dramatic Voices: Poets and Playwrights	3
French 326	French Literature II: Narrative Voices: Fiction and Nonfiction	3
French 411 or French 4131	Intensive Writing in French: Timely Topics Advanced French and Translation	3
French 4xx	Upper-level seminar before the Revolution (Medieval, Renaissance, 17th- or 18th-century)	3
French 4xx	Upper-level seminar after the Revolution (19th- or 20th-century or Francophone)	3
Total Units		21

* Students who take French 204D (or, prior to Fall 2019, French 201D) may count it as one course toward the major (out of nine for the second or ten for the prime). Students also may count one 3-credit course toward the major that is taught in English by a member of the French faculty, either within or beyond the bounds of the department at Washington University. This course must be at the 300 level or above and does not replace the requirements in French.

** Students who matriculate prior to Fall 2021 have the option of switching to the new major requirements if they prefer, with permission of the director of undergraduate studies in French.

Additional Information

Courses taken credit/no credit do not count toward the major. Students must maintain an average of B- or higher, and they are expected to maintain a B average or better in all French courses. Both 400-level courses required for the major must be taken at Washington University. All primary majors must complete a capstone experience by achieving a B+ or better in one of the 400-level seminars.

Study Abroad: French majors are encouraged to participate in a study abroad program. Summer programs are available in Paris, Nice, and Senegal, and semester abroad programs are available in Toulouse and Paris. Up to 6 credits from each program can count toward the major. **Students should complete an In-Perspective course prior to going abroad to Nice, Toulouse, or Paris.**

Please refer to the French home page (<https://rll.wustl.edu/french/>) for more information about French study abroad programs and for our new **French for the Medical Professions track**.

Writing Intensive (WI) Courses: Students wishing to satisfy the university Writing Intensive requirement within their French major may do so by taking either French 411 Intensive Writing in French: Timely Topics or French 4131 Advanced French and Translation. These Writing Intensive courses are not required for the major and do not replace the major requirements.

Senior Honors: Students who have maintained at least a minimum cumulative grade-point average of 3.65 through the end of the junior year are encouraged to work toward Latin honors (cum laude, magna cum laude, summa cum laude). To qualify for Latin honors in the major by thesis, a student must complete special literary research and prepare and orally defend an honors thesis, which is judged by an honors faculty committee. To qualify for Latin honors by course work, a student must complete four literature courses at the 400 level (including two in literature before 1800) and present two critical essays written for those courses to be judged by an honors faculty committee. Recommendations for Honors are based on performance and the quality of the thesis or critical essays, plus the student's cumulative GPA.

Transfer Credits: 21 of the 30 units required for the major must be taken in residence. Courses not taken at Washington University may count toward the major only with departmental permission.

Minors

The Minor in French

Total units required for students matriculating Fall 2021 and later: 18

Required courses for students matriculating Fall 2021* and later:

Code	Title	Units
French 307D	Cultural Expression	3
French 320s-340s	One "In-Perspective" course	3
French 370s-390s	One "In-Depth" course	3

* Fr 204D no longer counts toward the minor. Students pursuing the minor earn the remainder of their credits by taking our rich 300- and 400-level elective offerings in French and Francophone literature, language, culture, and related disciplines in the arts and sciences. Units earned from study abroad will be transferred as elective credit.

Total units required for students matriculating prior to Fall 2021*: 21

Required courses for students matriculating prior to Fall 2021:**

Code	Title	Units
French 307D	Cultural Expression	3
French 308D	Introduction to Literary and Cultural Analysis	3
French 325 or French 326	French Literature I: Dramatic Voices: Poets and Playwrights French Literature II: Narrative Voices: Fiction and Nonfiction	3

* Students who take French 204D (or, prior to Fall 2019, French 201D) may count it as one course toward the minor (out of seven). Students may also count one 3-credit course toward the minor that is taught in English by a member of the French faculty, either within or beyond the bounds of the department at Washington University. This course does not replace the requirements in French.

** Students who matriculate prior to Fall 2021 have the option of switching to the new minor requirements if they prefer, with permission of the director of undergraduate studies in French.

Additional Information

Courses taken credit/no credit do not count toward the minor. Students must complete courses taken for the minor with a grade of B- or higher, and they are expected to maintain a B average or better in all French courses.

Study Abroad: French minors are encouraged to participate in a study abroad program. Summer programs are available in Paris, Nice, and Senegal, and semester abroad programs are available in Toulouse and Paris. Up to 6 credits from each program can count toward the minor. **Students should complete an In-Perspective course prior to going abroad to Nice, Toulouse, or Paris.**

Please refer to the French home page (<https://rll.wustl.edu/french/>) for more information about French study abroad programs and for our new **French for the Medical Professions track**.

Courses

Visit online course listings to view semester offerings for L34 French (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L34&crslvl=1:4>).

Undergraduate French courses include the following categories:

- Cultural Expression (French 307D)

This course enables students to reinforce and refine their French written and oral expression while exploring culturally rich contexts and addressing socially relevant questions. Emphasis is placed on concrete and creative description and narration. Prerequisite: L34 French 204 or equivalent.

Current topic: *Les Banlieues*. This term refers to the outer ring of the urban space in the French cityscape, and it is frequently associated with immigration, unemployment, violence, and lawlessness. However, because of its position on the margins of mainstream culture, it is also a space of creativity and dynamism. Through the exploration of various media representing the artistic production of the *banlieues* — from novels and films to rap music and slam poetry — this course offers students an opportunity to interrogate and expand their notion of French cultural expression.

- In-Perspective Courses (L34 French 320s-340s)

These courses are designed to complement and complete the written and oral linguistic competence acquired in French 307D Cultural Expression. Students study topics of contemporary interest in the Francophone world from a cross-cultural, multimedia, interdisciplinary perspective. Emphasis is placed on analytical and persuasive writing. Prerequisite: French 307D.

- Thinking-It-Through I (French 360) and Thinking-It-Through II (French 361)

These courses provide students with the long view of a contemporary issue: exploring how cross-cultural perspectives from the French and Francophone world, past and present, can help us think creatively about the most pressing problems we face today. The subject — which is of social, cultural, and/or political interest — will change each semester. Beginning with a watershed moment in history, students will consider how the topic in question

evolved over time by interpreting related forms of cultural representation and expression in order to develop an informed critical perspective on a matter of current debate. Prerequisite: In-Perspective course.

- In-Depth Courses (L34 French 370s-390s)

These courses build upon the strong foundation students have acquired in In-Perspective courses. Students have the opportunity to take the plunge and explore a topic in the professor's area of expertise, learning to situate the subject in its historical and cultural context and to moderate their own views with respect to those of other cultural critics. Prerequisite: In-Perspective course.

L34 French 1011 Essential French I Workshop

Application of the curriculum presented in French 101D. Pass/fail only. Grade dependent on attendance and participation. Students must be enrolled concurrently in French 101D. Credit 1 unit. EN: H

L34 French 101D French Level I: Essential French I

This course immerses students in the French language and Francophone culture from around the world, focusing on rapid acquisition of spoken and written French as well as listening and reading comprehension. Songs, games, skits, videos, chats, and debates provide a rich cultural context for the themes of the course, including identity, self, and family; school and university life; French cafe culture; and travel. Interactive web-based practice at home helps students prepare to apply their knowledge in the classroom. By the end of the semester, students are able to present on real or imaginary journeys in French-speaking countries. While not required, it is strongly recommended that students also enroll in French 1011, a one-credit, pass-fail practice culture class.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L34 French 1021 Essential French II Workshop

Application of the curriculum presented in French 102D. Pass/fail only. Grade dependent on attendance and participation. Credit 1 unit. EN: H

L34 French 102D French Level II: Essential French II

This course encourages students to continue their exploration of French and Francophone language and culture through intensive and interactive activities that help solidify their acquisition of oral and written communication skills. Songs, games, skits, videos, chats, and debates provide a rich cultural context for the themes of the course, including living quarters, neighborhoods, and cities; technology and social media; shopping and commerce; French food culture; and nature and the environment. While not required, it is strongly recommended that students enroll in French 1021, a one-credit, pass-fail culture class. Prerequisite: French 101D or equivalent. (Recommended for students with two or three years of high school French [7th and 8th grades together count as 1 year].)

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L34 French 1051 Advanced Elementary French Practice Session

Application of the curriculum presented in French 102D or French 105D. For students with two to four years of high school French. Pass/fail only. Grade dependent on attendance and participation.

Credit 1 unit. A&S IQ: LCD EN: H

L34 French 1052 Advanced Elementary French Workshop

Working vocabulary for the Institute taught to emphasize real-life situations abroad. Only for students who have completed French 102D and 105D and who plan to attend French Summer Language Institute. Credit/no credit.

Credit 1 unit. A&S IQ: LCD EN: H

L34 French 201D French Level III: Intermediate French

An intermediate review course with multiple goals: independent and accurate oral and written communication; comprehension of a variety of French and Francophone materials; review of grammar functions; communicative activities. Prerequisite: French 102D or the equivalent (usually recommended for students with four years of high school French [seventh and eighth grades count as one year]).

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L34 French 202 French Level III at the Summer Institute

This Summer Institute course focuses on the major features of French 201D. Students improve speaking, writing and reading skills in French by combining study of grammatical forms with exercises designed to mirror many experiences they encounter while in France. The location abroad and contact with French host families and other French people facilitate the student's learning experience. Students enrolled in this course also take French 353 and are prepared to enroll in French 307D upon their return to St. Louis. Open only to students attending the Summer Institute in France. Prerequisite: French 102D or 105D.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L34 French 203D Intermediate French I

This redesigned interactive course explores the richness and diversity of the Francophone world and important contemporary issues such as social justice, inequalities, and the influence of media on society. Using an innovative approach based on lived experience, students will strengthen their abilities and accuracy in speech and writing, and they will considerably expand their vocabulary. Multimedia activities include films, readings, songs, virtual museum tours, and group projects. Prerequisite: French 102D or equivalent. This course is usually recommended for students with three years of high school French (seventh and eighth grade classes together count as one year).

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L34 French 204D Intermediate French II

In this second semester of the intermediate language sequence, students deepen their knowledge of the Francophone world and refine their oral and written expression, preparing them for the 300-level language, literature, and culture courses. Through discussion of films, radio, television, newspaper articles, and a novel, students broach controversial topics including family values, the business world, art and entertainment, science and

technology, and the environment. Prerequisite: French 203D or equivalent. This course is usually recommended for students with approximately four years of high school French (seventh and eighth grade classes together count as one year).

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L34 French 214 Medical French

In this introductory course to the "Français Professionnel de la Santé" track (French for Medical Professionals), students will be exposed to medical terminology and practices as well as to health-related issues in France and the Francophone world (Quebec, Haiti, West and North Africa). Using an interactive approach based on real life situations, students will learn to perform various medical tasks such as writing a prescription, advising a patient, or presenting a humanitarian project to potential donors. Medical vocabulary and pre-professional oral and written expression will be enhanced throughout the course. Students will acquire the necessary tools to perform their tasks, preparing them for further coursework in the FPS track, the Diplôme de français professionnel de la santé, and the France for the Pre-Med study abroad program in Nice. Prereq: Fr 203D or equivalent (this class can replace Fr 204D).

Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H

L34 French 215 Conversation, Culture, Communication I: Pop Culture

The course examines popular culture through a focus on what is said and performed, viewed especially but not exclusively through French film. Five thematic units focus on everyday occurrences and themes that mark both French and Francophone experience: the intersection of French History with the lives of ordinary people; the role of the French family in modern life; the motto of the French Revolution and how it applies today; the notions of community and the individual in modern French and Francophone society; the role of the French in the world at large. Active student participation is required; student is required to do at least two oral presentations on the films we see, and in some of the versions, to make their own film. An optional film-viewing is scheduled from 2 to 4 p.m. Fridays. Prerequisite: French 201D or the equivalent; may be taken before or after French 216.

Credit 3 units. A&S IQ: LCD BU: ETH

L34 French 216 Conversation, Culture, Communication 2: French Culture Through French Film

This course enables students to pursue your exploration of French culture through French film. Though not a history of French cinema, it introduces some of France's most celebrated actors and directors. We focus on excerpts that illustrate important life themes, including childhood, coming of age, existential crises, the search for happiness, the need for laughter, the threat of crime and violence, the complexities of love, and attitudes toward death. Students are asked to contrast their expectations of how such themes are to be treated with the way in which the French choose to portray them. Students write film reviews as though they were, alternately, an American or a French critic. As a final project, they write their own screenplay and imagine how it might be filmed in France. By the end of the course, they will have begun to view French culture with a French eye. Prerequisite: French 201D or the equivalent. May be taken before or after French 215.

Credit 3 units. A&S IQ: LCD BU: ETH EN: H

L34 French 247 First-Year Seminar

This small-group seminar is devoted to the reading and study of other texts -- such as films, paintings, and so on -- as well as discussion and writing. Topics vary but have an interdisciplinary focus. Prerequisite: AP in English, French, or History, or permission of instructor. This course is taught in English and does not substitute for any other French course.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: HUM EN: H

L34 French 249C First-Year Seminar on Paris: The Left Bank

First-year seminar. Taught in English. From the founding of the Sorbonne in the Middle Ages to the strikes and riots of 1968 and from Abelard and St. Thomas Aquinas to Hemingway and Fitzgerald, Camus and Sartre, Beckett and Ionesco, and beyond, the Rive Gauche — or Left Bank — has been the traditional center of Paris's intellectual creativity and political turmoil. This seminar will explore the area's history and political activism, its artistic legacy, and especially its philosophical and literary contributions to contemporary France and the world. Prerequisite: AP in English, French, or History, or permission of the instructor. Does not substitute for any other French course. Enrollment limited to 15.

Credit 3 units. A&S: FYS Art: HUM BU: HUM, IS

L34 French 250C Voyages and Discoveries: French Masterpieces

Taught in English. Novels and short stories about voyages and discoveries — real and symbolic — where young people confront themselves and crises in their lives. A discussion course with short writing assignments and viewing of films of several works studied. Masterpieces selected from writers such as Voltaire, Balzac, Flaubert, Maupassant, Gide, Colette, Camus, Sartre, Duras and Ernaux, among others. No French background required; students who have completed the English Composition requirement are welcome.

Credit 3 units. Art: HUM BU: HUM

L34 French 257 From Champagne to Champlain: French Culture in North America

Taught in English. Following Champlain's founding in 1604 of the first French settlement in Nova Scotia (formerly Acadia), the French began to build what they hoped would be a vast empire, from Quebec to the Gulf of Mexico. Over the next 200 years, French culture and language spread throughout North America and could well have been the dominant one in this country had history moved in different directions. This course examines the history, literature, religion, architecture, music and cuisine of the vast territory known as "New France." Through use of conventional textual documents, as well as films, slides, CDs and field trips to Missouri historical sites, it exposes the student to the continuing richness of French culture all around us. Drawing on local resources (e.g., Fort de Chartres, Cahokia Courthouse and Sainte Genevieve), students learn about many fundamental connections between America and France. Topics include early explorations, Jesuit missions, literary representations of the New World, colonial architecture, the French and Indian War, the Louisiana Purchase, Cajun and Mississippian culture.

Credit 3 units. BU: ETH

L34 French 299 Undergraduate Independent Study

Prerequisites: French 201D and permission of the director of undergraduate study.

Credit variable, maximum 3 units.

L34 French 307D Cultural Expression

This course enables students to reinforce and refine their French written and oral expression while exploring culturally-rich contexts and addressing socially-relevant questions. Students develop linguistic mastery, expand their vocabulary, and improve their communication skills through themed readings, films, and interactive activities. Prerequisites: French 204 or the equivalent. (Usually recommended for students with 5 years of high school French [7th and 8th grades count as 1 year]).

Credit 3 units. A&S IQ: LCD, LS Arch: HUM Art: HUM BU: HUM, IS EN: H

L34 French 308D Introduction to Literary and Cultural Analysis

As the continuation of French 307D, this course emphasizes the improvement of writing skills through the analysis of a broad array of cultural and literary texts. This course introduces students to some of the most defining customs, ideas, and values of the French and Francophone traditions. Each semester, a specific theme orients the readings, films, and artworks studied and provides a context for class discussions and student papers. This course should be taken before French 325 or French 326. Prerequisite: French 307D or equivalent.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L34 French 310A An Intellectual History of Sex and Gender: Text and Tradition

When did sexuality begin? Is it safe to assume that gender constructions are universal and timeless? In this course, we will engage with a broad range of readings that serve as primary texts in the history of sexuality and gender. Our aims are threefold: (1) to analyze the literary evidence we have for sexuality and gender identity in Western culture; (2) to survey modern scholarly approaches to those same texts; and (3) to consider the ways in which these modern theoretical frameworks have become the most recent set of primary texts on sexuality and gender.

Same as L93 IPH 310

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L34 French 318D Preparation for Year in France

Designed to prepare students for the experience of studying abroad (for either a year or a semester via programs sponsored or approved by Washington University), this course emphasizes improved oral discussion and writing skills through readings, papers, and active class participation. The course provides an introduction to the techniques of "explication de text," "commentaire compose," and "dissertation litteraire." The course will discuss various aspects of modern French society as well as topics related to the student's experience abroad, such as the university system, the French family, French social mores, and so on. This course may replace French 308D for candidates attending semester- and year-abroad programs in a French-speaking country. It is required for students planning to study in Toulouse and Paris and recommended for other programs in France. Students who return from JYA in France are not eligible to take this class.

Credit 3 units. A&S IQ: LCD, LS BU: IS EN: H

L34 French 320 Advanced Conversation: The Art of French Cooking

This class explores both historically and experientially the fine arts of French cooking. Students will investigate food culture from various perspectives, including recipes from the chefs of kings, famed literary homages, excerpts from contemporary writers, films, and cooking shows. They will present online food blogs or videos sharing their attempts to master an aspect of the historical, regional, or contemporary food culture we have studied; cooking is optional, but creativity is a plus. Topics to be explored include Terroir; the slow food movements; La table d'hôte; the role of the café and the market in French and Francophone cooking; and reflections on our own national food cultures. Students will gain the necessary vocabulary and cultural knowledge to be able to converse about cuisine with ease with people from any Francophone country, preferably over a long meal. Prereq: Fr 307D.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L34 French 321 Topics I: In Perspective

Focusing on topics of cultural and social importance, this course offers students the opportunity to learn about defining moments in the French tradition. The specific topic of the course varies from semester to semester and may include works from different disciplines, such as art, film, gender studies, history, literature, music, philosophy, politics, science. Prerequisite: French 307D. Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: ETH EN: H

L34 French 322 Topics II: In-Perspective: Contagions

Metaphors of contagion are ubiquitous in contemporary culture. In this course we will explore the mechanisms of social and microbial transmission as seen in literature, memes, film/video, comics, and other cultural materials. What makes a meme or a video "go viral"? Who is "untouchable" and why? Is laughter really "infectious"? In what ways have notions of contagion and disease been essential to the development of French and Francophone culture, from the Black Death to Covid and beyond? What new cultural forms will emerge from present and future pandemics? This course counts towards the French for Medical Professionals track. Prerequisite: French 307D. Credit 3 units. A&S IQ: LCD, LS BU: ETH EN: H

L34 French 325 French Literature I: Dramatic Voices: Poets and Playwrights

An interpretation of cultural, philosophical and aesthetic issues as presented in influential works of French poetry and drama from the Middle Ages to the present. May be taken before or after French 326. Prerequisite: French 308D or French 318D. Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

L34 French 3252 French out of France: Introduction to Francophone Literatures

An introduction to some of the "other" literatures in French: the literary traditions and cultural contexts of Francophone countries in North and sub-Saharan Africa and the Caribbean. Vibrant and productive cultures around the world have interacted with the French language and its literature to produce highly diverse texts of their own. We study some of them, focusing on issues like cultural adaptation, colonialism and "civilizing missions," and the responses to them. We also consider the varying meanings of the term "Francophone," from conservative to liberal, and

think about its implications for the study of French literature as a whole. Finally, we examine the ways in which contemporary mainland France has been irrevocably transformed by the Francophone presence. Works by Kourouma, Césaire, Kateb and Lopes. Prerequisite: French 307D.

Credit 3 units. BU: IS

L34 French 326 French Literature II: Narrative Voices: Fiction and Nonfiction

An investigation of cultural, philosophical, and aesthetic issues as presented in influential works of French prose from the Middle Ages to the present. May be taken before or after French 325. Prerequisite: French 308D or French 318D. Sec 09 Prosaic Greatness. The title of this course emphasizes both the artistic value of certain major prose texts in French and the everyday facets of knowledge about French culture they convey. From the Middle Ages to the present, influential writers like Montaigne, Pascal, Sand, Flaubert, and Gide have demonstrated how important political, philosophic, literary, and artistic concepts have been skillfully passed down from one generation to another through a masterful usage of French prose. By looking closely at the aesthetic and social questions raised by works such as theirs, which are so characteristic of their times, students come to appreciate better the evolution of French prose and its true place within the general history of France.

L34 French 350 Undergraduate Seminar in French Literature and Culture

An exploration of a variety of cultural icons, objects, myths and traditions that define the French experience throughout the centuries. Topics vary. Prerequisite: French 308. Credit 3 units. Art: HUM BU: HUM

L34 French 3501 Special Topics in French Culture

Credit 3 units. BU: IS

L34 French 352 French Institute Project

Students investigate an important aspect of French life by conducting interviews with French natives and by observing them at work. Supplementing this direct experience with further research, students prepare a presentation on their selected topic for the Institute participants and for their French hosts. Open only to students enrolled in the French Summer Institute. Credit 2 units.

L34 French 353 Project Plus

This Summer Institute course combines (1) a course that examines French culture as it is represented in the evocative history of French châteaux, the arts and contemporary lifestyle; (2) the student's project; and (3) the student's experiences as part of the community abroad (excursions, visits, group discussions). In class students gain background for appreciating the primary sites of the Institute: in the Loire Valley, Paris and Brittany. The classroom experience is discussion-oriented, with small writing assignments and readings. The project is an individual research program that students conduct with a French native on a particular aspect of French culture. In the past students have dealt with serious topics such as the deportation of the Jewish community in Amboise during World War II; with less grave subjects such as the work of a local wine grower or goat cheese producer, and the culinary repertoire of French and

American families; and current topics concerning the political situation in Europe and the euro. Following weekly conferences with the teaching staff, students present a formal report on their experiences to an audience comprising other members of the group and the students' host families. Students at the Institute are expected to speak French in all group settings. Assignments in this course are level-appropriate (students enrolled in French 385 complete longer papers and projects than those enrolled in French 202; expectations for conversations are likewise adjusted accordingly). Required of all students attending the Summer Institute in France.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L34 French 355 North American Francophone Literature in Translation

Taught in English. The world of French language and literature is not restricted to France alone. It includes several other countries and former colonies whose cultural traditions and productions have grown in global significance as the West has increasingly understood and reacted to its own prejudices and exclusions. This course, the first in a three-semester sequence, focuses on the literature of our closest French-speaking neighbors: French Canadians, Acadians (from Nova Scotia, New Brunswick and northern Maine) and Louisiana Cajuns. That French is the main language of all these groups results, of course, from the early colonial history of North America. Representative writers of these different French-speaking groups, including Antonine Maillet, Gerald Leblanc, Zachary Richard, Philippe Hemon, Michel Tremblay and Marie-Claire Blais, are studied closely in their historical, literary and cultural contexts.

Credit 3 units.

L34 French 360 Thinking-It-Through I

Thinking-It-Through courses provide students with long views of contemporary issues. Cross-cultural perspectives from the French and Francophone world, past and present, help us to think creatively about the most pressing problems we face today. The subject — which is of social, cultural, and/or political interest — will change each semester. Beginning with a watershed moment in history, students will consider how the topic in question evolved over time by interpreting related forms of cultural representation and expression in order to develop an informed critical perspective on current debates. Prerequisite: French 308.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L34 French 361 Thinking-It-Through II

Thinking-It-Through courses provide students with long views of contemporary issues. Cross-cultural perspectives from the French and Francophone world, past and present, help us to think creatively about the most pressing problems we face today. The subject -- which is of social, cultural, and/or political interest -- will change each semester. Beginning with a watershed moment in history, students will consider how the topic in question evolved over time by interpreting related forms of cultural representation and expression in order to develop an informed critical perspective on current debates. L34 French 370 French Social History

Studying *L'Histoire des Mentalités*, this course explores how the concept of sickness, the perception of medicine, the role of the doctor, etc., evolved throughout the centuries. Texts are supplemented by a series of lectures offered by doctors in different specialties. Students complete a project on one area of related research. Open only to students enrolled in the Nice Pre-Med Summer Program.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: BA EN: H

L34 French 3701 In-Depth: Paris, Capitol of Modernity: A Digital 19th Century

The French assert that the world learned to be modern in 19th-century Paris. Even though this is not entirely true, the Paris we observe today owes a great deal to 19th-century interventions in the city's physical fabric. Our ideas about modernity are informed by the ways in which the French learned to observe and describe the radical changes in their capitol. This course will examine maps, guidebooks, urban descriptions, and fiction to see how Paris changed in the century that brought us urban modernity, including anonymity, city crowds, cycles of boom and bust, high-scale public works, energy and anomie. It will also introduce students to some of the tools for digital scholarship and the presentation of academic work to non-academic audiences. Students will collaborate in the creation of a textual database on Paris monuments, and learn to present their research on urban sites via ArcGIS's Story Maps. Prerequisite: French 308 or In-Perspective.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L34 French 3702 In-Depth: Subtexts and Subterfuges

What persuades us that we understand a situation -- that we know the players, their intentions, and the effects of their actions? Do we rely on a parent's, lover's, or leader's moral authority or on our own sense of justice? Are we motivated by the coherence of their proposals or by our own emotional needs? All of the above? How, then, do we sort through layers of argument to detect ulterior motives and censored thoughts? Our class will focus on subtexts: hidden meanings, innuendo, ambiguity, veiled hints, omissions, and outright lies. We will consider how storytelling works to elicit particular responses in personal and commercial ads, travel brochures, cookbooks, political speeches, and street art. Tales of seduction by Perrault ("Puss in Boots"), Laclos ("Dangerous Liaisons" [excerpts]), and Proust ("Swann in Love" [excerpts]) along with Haneke's film of suspense and surveillance ("Hidden") will focus our attention on techniques of camouflage and detection. The subtexts in these works will inform our own (thriller?) subplot of contemporary life: a creative project to top off the semester. Prerequisite: French 308.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA EN: H

L34 French 3703 In-Depth: A Passion for Things

Imagine a collection of prized objects. What motivates a collector to acquire and display them? How do these objects allow us to understand the past as it defines our own heritage and that of others, what we choose to preserve or erase? These questions ground our study of the pleasures of collecting. A passion for things can be empowering, but it can also signal exploitation. What happens when the desire to possess extends to a person--when a person becomes the thing possessed? The passion to possess implies the power to dispossess, to take from others the

property, privileges, and promises that were theirs. We will focus on three sites of power in which collections figure prominently: the court of Louis XIV at Versailles; the museums, department stores, and world's fairs of 19th-century Paris; and the world of objects in 20th-century poetry and photographs. The class will examine objects that speak to the relations between men and women; kings and subjects; humans and nature; ideas of freedom and efforts to suppress it. Authors and artists include Perrault, Lafayette, Duras, Baudelaire, Zola, Ponge, Vuillard, Caillebotte, Cartier-Bresson, and others. Prereq: In-Perspective or Fr 308.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L34 French 375 In Depth: Medical Narratives, Narrative Medicine

Narrative medicine is an approach grounded in the recognition that patients live and communicate their embodied experiences as stories. This approach underscores the need for medical practitioners to cultivate skills of observation, analysis, storytelling, and cultural competency -- skills that are traditionally developed in humanities coursework. In this course, students will hone their competencies in observation, close reading, and written and oral expression in French through readings of medical narratives. Texts will include Jean-Dominique Bauby, "Le Scaphandre et le Papillon"; Molière, "Le Medecin Malgre Lui"; Michel de Montaigne, "De L'Experience"; Marguerite Duras, "La Douleur"; and excerpts from works by René Descartes, Honoré de Balzac, Émile Zola, Olivia Rosenthal, and Philippe Lançon. Whether considering works of art, patient testimonials, or classic works of literature, we will observe carefully, describe and understand what we see, tell stories, and attend to the details of the stories that others tell. Prerequisite: French 308 or In-Perspective.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L34 French 375C Biography of a City: Paris

This class has a dual focus: to trace the political and cultural history of Paris throughout the ages since its founding; to highlight Paris as a theme or topos in works of art and in the popular imagination. Thus, we examine both Paris' role as an important historical center as well as its function as a vital cultural symbol. Guest speakers from the departments of Romance Languages, Art History, History, Music, Philosophy and others. Course taught entirely in English.

Credit 3 units. Art: HUM BU: IS

L34 French 376C Cinema and Society: Radical Cinema

Since the earliest experimental films of the Lumière brothers and Georges Méliès, French cinema has often found itself at the forefront of "radical" artistic and social thought. We will explore the many ways in which French and Francophone films have grappled with tensions between the status quo and radical change, whether by asking audiences to rethink how stories can be told, by questioning the meaning of realism, fantasy and representation, or by insisting that society, class, race or gender will be fundamentally reassessed. We will consider how French and Francophone films have shaped our ideas and expectations about what "cinema" is today. Films will include a range of works from the first years of cinema to the present day,

by cinematographers such as Dulac, Renoir, Carné, Rohmer, Cantet, the Dardenne brothers, Bunuel, Godard, Carrere, Resnais, Truffaut, Varda, Ayouch, and others. Taught in French. Prerequisite: French 308 or In-Perspective.

Credit 3 units. A&S IQ: LCD, LS Art: CPSC BU: IS EN: H

L34 French 383C Literature and Society: Ailing Body/Ailing Mind in French Autobiographical Writings

Illness and suffering have inspired a great variety of literary texts from the Middle Ages to the modern era. This course considers works ranging from Montaigne's influential *Essais* through contemporary novels that focus on autobiographical writings in which the author gives a personal account of their own direct experience with illness. Open only to students enrolled in the Nice Pre-Med program.

Credit 3 units. A&S IQ: HUM Art: HUM BU: IS EN: H

L34 French 385 Cultural Differences

By examining how the French perceive Americans and how the Americans perceive the French, students interrogate stereotypes, biases and differences in values, behaviors and beliefs between the two cultures. The class also examines the misunderstandings that occur as a result of these differences. Students also look within the American culture and within the French culture to evaluate how minorities and marginal groups exist within them. Texts include works by contemporary authors whose different professions (journalist, anthropologist, novelist, etc.) offer different perspectives on the questions of cultural difference. Open only to students enrolled in the Summer Institute in France. Prerequisite: French 307D.

L34 French 395 Paris and New York: The Art of the City

The cultural icons Paris and New York exert a powerful hold on our imagination. We will explore how the French and Americans define themselves, and each other, through their premiere cities. The themes of integration and isolation, class and race, innovation and tradition, and commemoration and celebration will ground our discussions of writers Zola ("Therese Raquin"), Wharton ("The Age of Innocence"), Proust ("Swann's Way"), Foer ("Extremely Loud and Incredibly Close"), Krauss ("The History of Love"), Truong ("The Book of Salt"), and Gopnik ("Paris to the Moon"); painters Vuillard, Caillebotte, and de Kooning; photographers Brassai, Cartier-Bresson, Doisneau, Ronis, Abbott, Hine, and Stieglitz; and filmmakers Godard

("Breathless"), Allen ("Manhattan," "Midnight in Paris"); Jeunet ("Amélie Poulain"), and Kassovitz ("Hate"). Through our study of public spaces (the Brooklyn Bridge, the Twin Towers, the Eiffel Tower, and the streets themselves), we will consider how each city functions as a site of memory even as it fashions the future. Same as L16 Comp Lit 395
Credit 3 units.

L34 French 400 Intensive Translation for Graduate Students I

The first part of a two-semester course sequence in reading and translating French. For graduate students in the humanities, social and natural sciences. Nongraduate students may enroll with permission of the department. Must be followed by French 401.

Credit 3 units. A&S IQ: LCD EN: H

L34 French 401 Intensive Translation for Graduate Students II

Continuation of French 400. For graduate students in the humanities, social and natural sciences. Prerequisite: French 400; credit for French 400 is contingent on completion of French 401.

Credit 3 units. A&S IQ: LCD EN: H

L34 French 4013 Second-Language Acquisition and Technology

This seminar for undergraduate and graduate students will transform research and theory about second-language acquisition into practice while focusing on technology-driven applications. The course fosters professional development as participants formulate critical skills for evaluating, creating, and integrating technology into the language classroom and other language learning contexts, including business, engineering, and law. Course formats include readings, discussions, and demonstrations with technologies. The course counts for the minor in applied linguistics, the PhD in applied linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors.

Same as L92 APL 4023

Credit 3 units. A&S IQ: SSC

L34 French 411 Intensive Writing in French: Timely Topics

This course enables advanced students to refine and develop their writing skills and to develop specialized vocabularies based on current issues in the Francophone world chosen in light of their interests (e.g., global health, international relations, anthropology, political science). Students will analyze the rhetorical strategies used in contemporary cultural debate and write creative, persuasive, and analytical compositions that prepare them to apply for internships and pursue careers in international medicine, business, law, diplomacy, and the arts. Students will complete a series of short papers, each with required revisions. Meets the Writing Intensive course requirement. Prerequisite: Fr 307D, Fr 308D, or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS, WI EN: H

L34 French 4131 Advanced French and Translation

This course fosters an in-depth knowledge of the French language and accuracy in its use. It employs a comparative approach (linguistic and cultural) initiating students into the art of translation from English to French and from French to English and sensitizing them to the problem of cultural transfer. Students will acquire practical training, cultivating skills advantageous in the workplace by drawing on a wide variety of documents to develop translation strategies. Genres include fiction, autobiography, journalism, advertising, and correspondence spanning different eras, regions, and registers. Prerequisite: French 308 and In-Perspective.

Credit 3 units. A&S IQ: LCD, LS, WI EN: H

L34 French 413B Linguistics and Language Learning

This course, taught in English, is a foundation for students who will work with linguistically and culturally diverse people in the USA and around the world, whether this work is in the courtroom, hospital, classroom, office and more. The class will help prepare students for the diverse range of twenty-first century occupations that have language and linguistics at their center, including machine learning and translation studies. The class utilizes a survey format and covers both internal and external factors related to language acquisition and language use, such as language and the brain, language aptitude, age, gender, memory, prior knowledge, and so on. Theoretical and research dimensions of both linguistics and foreign / second language learning are treated. Corresponding implications of the readings focus on action- on making decisions for language policies and debates around the world that are informed by linguistic and language knowledge. The course is required for the minor in applied linguistics, the PhD in Applied Linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors such as Global Studies and Educational Studies. Prerequisite: Ling 170 (recommended but not required).

Same as L92 APL 4111

L34 French 415 The 19th-Century Novel: From Realism to Naturalism to Huysmans

In this seminar we read some of the great realist novels of the 19th century, by the four masters of the genre: Balzac, Stendhal, Flaubert, Zola. We also examine Huysmans' *A Rebours*, which was written in reaction to the excesses of Realism. We determine what characterizes the realist novel and how it has evolved from Balzac to Zola. We consider its theoretical orientation, but we also focus on the major themes it addresses: the organization of French society throughout the 19th century, Paris vs. the province, love, money, ambition, dreams, material success, decadence, etc. Prerequisites: French 325 and 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L34 French 416 Renaissance Poetics

An examination of key authors and themes in various genres of the period. Prerequisite: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates.

Credit 3 units. Art: HUM

L34 French 4161 Special Topics in 19th-Century Literature

Prerequisite: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. Art: HUM

L34 French 417 Poetry and Prose of the Renaissance: Gender, Love, and Sexuality in the Renaissance

A major writer, an early sympathizer of the reform movement, and a generous patron of the arts and sciences, Marguerite de Navarre (1492-1549), King Francis I's sister, has continued to intrigue readers throughout the ages. Her correspondence, short stories, plays, dialogues and religious poems have been edited and translated into several languages. However, her best known work today remains the *Heptameron*, her collection of novellas. This course will focus primarily on the *Heptameron* in the context of the querelle des femmes, a centuries-long literary debate over the nature and status of women. It proposes a close study of the text with special emphasis on gender issues. Close attention will be paid to early modern understandings of sex and gender and the extent to which devisants and characters in the stories conform to or defy the predominant gender stereotypes; gender relations; the dynamics of love and marriage; attitudes toward sexuality, gender and sexuality, and sexual aggression and violence. Prerequisites: French 325 or French 326, or one of these courses and the equivalent WU transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L34 French 4171 Travel Abroad in Early Modern Times

This course addresses such questions as national identity; international relations; migration, cultural differences and integration; cultural interactions and influences. It concerns more specifically the important role humanism played in the spectacular development of vernacular languages and traveling abroad in Early Modern times. It is organized around the following themes: (1) Humanism, nationalism and the growing interest in the vernacular; (2) Humanism and the ongoing project of translation (*translatio studii*); (3) Humanism and travel abroad; (4) views on foreign cultures and one's own after returning home; (5) "La France" (including at least one session on Lyons and another on Italian artists living in France); and integration and conflicts. Readings include major authors (Rabelais, Montaigne, Marguerite de Navarre, Du Bellay) as well as lesser-known figures (Pasquier, Lery, Thevet), diaries and travelogues. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units.

L34 French 4172 Travel in the Renaissance and the Literature of Discovery

Improved modes of transportation under King Francis I facilitated travel in the Renaissance. Men and women were able to view famous cultural monuments on their continent and explore parts of the world where no one had ventured before, returning home with vivid tales of distant lands and exotic peoples. With the advent of the printing press, such fascinating stories were made available to a wider audience. This course examines this literature of discovery, paying special attention to the multiple

genres that flourished at the time (historical narratives, diaries, correspondences, travelogues, elegiac poetry, adventure novels) as well as the historical and cultural contexts of these works.

Other questions addressed include national identity and cultural differences, cultural interactions and influences, international relations, the impact of humanism, and the concept of curiositas. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L34 French 4173 Renaissance Poetry and Visual Arts

During the Renaissance, poetry in France manifested a close relationship to the visual arts, sharing expressive means as well as ends. This course considers the main poetic and philosophical currents of the Renaissance with special emphasis on formal innovation. Poets studied include Clément Marot, Louise Labé, Maurice Scève, Pierre de Ronsard, Joachim Du Bellay, etc. The visual arts, mainly paintings from the 15th to the early 17th century, serve to elucidate poetic images, mythological references and philosophical concepts, and hopefully stimulate reflection on the relationship between the verbal and the visual. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units.

L34 French 417B Literature of the 16th Century

Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L34 French 4181 Humanism in Crisis: Marguerite de Navarre

The second half of the French 16th century was a time of profound upheaval in politics and religion, as well as of economic and social unrest. The very nature of reason and knowledge, their place and reliability were in serious question. These various "crises" culminated in what is known today as "the collapse of French Humanism." This course focuses on two writers of the mid-century, Marguerite de Navarre and Montaigne, and the solutions that they offered. Special attention is given to the forms of expression adopted by these writers in order to reflect the newly discovered complexity of their world. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. Art: HUM

L34 French 4182 Humanism in Early Modern France: From Rabelais to Montaigne

This course focuses on major aspects of Humanism as exemplified by two of the greatest writers of the 16th century: François Rabelais and Michel de Montaigne. Humanism designates the great intellectual movement of the Renaissance. Initially focused on the recovery of ancient authors and a renewed confidence in man's ability to grasp higher meanings, Humanism became a dynamic cultural program that influenced every aspect of 16th-century intellectual life. As the political and religious turmoil of the Reformation spread, however, Humanist assumptions (the very nature of reason and knowledge, their

place and reliability) were in turn questioned. This "crisis" culminated in what is known today as "the collapse of French Humanism." We examine the importance of Humanism by focusing on the themes of education, self-inquiry, religion, gender roles, marriage, travel, health and medicine. We pay special attention to the forms of expression that Rabelais and Montaigne adopt to reflect the newly discovered complexity of their world. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. Credit 3 units.

L34 French 419 Feminist Literary and Cultural Theory

This course provides a historical overview of feminist literary and cultural theories since the 1960s and 70s, acquainting students with a diversity of voices within contemporary feminism and gender studies. Readings will include works of French feminism, Foucault's History of Sexuality, feminist responses to Foucault, queer (LGBTQ+) theory, postcolonial and decolonial feminism, feminist disability theory, and writings by US feminists of color (African-American, Asian-American, Latina, Native-American). The reading list will be updated each year to reflect new developments in the discipline. We will approach these readings from an intersectional and interdisciplinary perspective, considering their dialogue with broader sociopolitical, cultural, and philosophical currents. By the end of the course, students are expected to have gained a basic knowledge of the major debates in feminist literary and cultural studies in the last 50 years, as well as the ability to draw on the repertoire of readings to identify and frame research questions in their areas of specialization. The class will be largely interactive, requiring active participation and collaborative effort on the part of the students. Students will be encouraged to make relevant connections between the class readings, everyday social and political issues, and their own research interests. NOTE: This course is in the core curriculum for the Women, Gender, and Sexuality Studies graduate certificate. Prerequisite: advanced course work in WGSS or in literary theory (300 level and above) or permission of the instructor.

Same as L77 WGSS 419

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM EN: H

L34 French 4191 The French Islands: From Code Noir to Condé

The French have been dreaming about the tropics ever since transatlantic trade became possible in the 16th century, and literature in French has reflected these dreams ever since. Closer to our own period, writers from the French Caribbean have written themselves into the French canon, winning prestigious literary prizes. This course links these two phenomena by studying literature from and about the tropics from the 18th century to the present. In our readings, we attempt to see the ways in which the literature from and about France's island possessions has contributed to the forming of cultural and political relations between France and the islands, but also among the islands and within the Americas. Almost all texts available in English for students not majoring in French; main seminar session taught in English with weekly undergraduate preceptorial in French. Prerequisite: French 325 and French 326. One-hour preceptorial for required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L34 French 4192 Dark Humor: Francophone Literature from West Africa

In 1960, most of the French colonies in Africa gained independence in a largely peaceful transfer of power. Since then, this development has been viewed alternatively as the triumph of self-determination, and as a hollow act undermined by neo-colonial French ministries, multinational companies, and corrupt governments. Media today commonly adopt a highly pessimistic tone when speaking of these phenomena, but literature from West Africa provides alternative ways of looking at the region, which today includes over 140 million French speakers. Reading authors such as Kourouma, Kane, Tansi, Tchicaya, and Lopes, we will consider the ways that literature enters into dialogue with political discourses represented both as tragedy and as farce. The main seminar (section 01) is taught in English; undergraduates also register for a weekly discussion (section A) conducted in French. Prerequisites: For undergraduates, French 325, French 326, Thinking-It-Through, or In-Depth; for graduates not in French, reading knowledge of the language.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L34 French 4201 The Novel in the Feminine (Le Roman au Feminin)

Informed through feminist criticism (Beauvoir, Cixous, Kristeva), this course examines the deconstruction of the novel as a traditional genre by 20th-century women writers such as Colette, Nathalie Sarraute, Marguerite Duras, Marguerite Yourcenar, Annie Ernaux and Mariama Bâ. We place special emphasis on the representation of the writing woman in the text itself and on the issue of "écriture féminine" in its sociocultural context. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates.

Credit 3 units. Art: HUM

L34 French 4202 Ingenues and Libertines: Writing the Feminine in 19th-Century French Prose

Informed by a close reading of theoretical texts dealing with the paradoxes of "la femme auteur" (the woman author), as Balzac coined it, this seminar explores the many ways of writing the feminine in the margins of 19th-century French fiction. Opposing "dames de cour" (ladies of the court) and "femmes de tête" (women of the mind), we focus on the representation of women as "voleuses de langue" (tongue snatchers) in the works of Mme de Staël, Claire de Duras, George Sand and Marie d'Agoult, among others. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates.

Credit 3 units. Art: HUM

L34 French 421 The 20th-Century Novel

In this seminar we examine the evolution of the French novel in the 20th century. We closely read five great novels, by Proust, Gide, Céline, Robbe-Grillet and Ernaux. We determine what characterizes the 20th-century French novel and how it has evolved from Proust to Ernaux. We consider its technical aspects but also focus on the major themes it addresses: love, art, memory, time, death and the general problem of the human condition. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L34 French 4211 The Novel of the 1930s: The Human Condition and the Meaning of Life

Most French novelists of the 1930s were no longer satisfied simply to entertain their readers, to bring formal innovations to their writing, to depict society or to represent human consciousness. Economic transformations, technological advances and the unspeakable horrors of World War I challenged traditional beliefs. Authors therefore dedicated themselves to examining the human condition and the meaning of life. In this seminar we read five major novels of the period by Saint-Exupéry, Mauriac, Malraux, Céline and Sartre. We determine how each author approaches the fundamental questions of human existence and what, if any, answers he provides. Prerequisites: French 325 and French 326 (or for students who have completed the Paris Business Program, completion of either course). One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L34 French 422 French Theater from 1800 to the Present

We study selected plays of Hugo, Musset, Feydeau, Jarry, Claudel, Giraudoux, Anouilh, with particular attention to Romanticism, Symbolism, Existentialism and absurdist drama. Close attention is paid to the sociopolitical, philosophical and aesthetic contexts within which these plays were written, performed and received by the public. Videos of selected scenes also are shown and serve as points of departure for several classroom discussions, as do various influential critical theories about the nature and structure of modern French theater. Prerequisites: French 325 and French 326. One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM

L34 French 4221 Topics in French Literature: The Voyage of Self-Discovery

In our modern interconnected society, it is not always easy for young people to define who they really are or to discover and fulfill their potential, but it is encouraged and facilitated through education, travels, social contacts, and even technology. However, this was not always so. In earlier times, individuals were often constrained by the prevalent social and moral values of their worlds and had a much harder time discovering their persona or fulfilling their needs and aspirations. This seminar explores the issues of self-discovery, initiation, and self-realization in the modern novel, including Balzac's *Eugenie Grandet*, Stendhal's *Le Rouge et le Noir*, Flaubert's *Madame Bovary*, Mauriac's *Therese Desqueyroux*, and Philippe Grambert's *Un Secret*. Prerequisite: French 308.

Credit 3 units. Arch: HUM Art: HUM BU: IS

L34 French 423 Contemporary Theater

Readings, analysis and discussion of French theater from Sartre to the present. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. Art: HUM

L34 French 4231 Visualizing 19th-Century Poetry

At the very end of the 19th century and the beginning of the 20th, Mallarmé and Apollinaire begin to compose seemingly original works that create a host of simultaneous and different meanings through a heightened use of what can be called the "concrete aspects" of the texts themselves: their layout on the page; the imagery they present; even the shape of the particular words and stanzas they employ. But a close reading of earlier 19th-century literature (mostly poetry) composed by various Romantic, Parnassian and Symbolist authors (Victor Hugo, Théophile Gautier, Mari Kryszinska, Marceline Desbordes-Valmore, Charles Baudelaire, Arthur Rimbaud and Paul Verlaine) reveals that experimentation in the visualization (as opposed to "mere" reading or writing) of a literary work was already under way. The latter coincided with the evolution of sculpture, photography and, later on, cinema. This course is designed to introduce students to both the production and reception of such works, and to examine their multiple historical and aesthetic causes and effects. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L34 French 424 19th- and 20th-Century Poetry

Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L34 French 425 19th-Century Poetry

Reading and analysis of poetry of the three major 19th-century schools: romantic, parnassian, symbolist. Emphasis on textual explication. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM

L34 French 426 Avant-Garde Poetry of the 20th Century

Study of French avant-garde poetic movement of the early 20th century, with emphasis on Futurism, Cubism, Dadaism and Surrealism. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. Art: HUM

L34 French 427 Literature of the 17th Century I

Undergraduates only register for this section. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM

L34 French 4271 French Classical Theater

A study of works by Corneille, Molière and Racine. We consider how the theater contributes to the rise of absolutism in France in the 17th century. The depiction of kings and the role of primogeniture; the function of sacrifice; the marginalization of women; the glorification of Ancient Rome; Orientalism; tensions

between family and state; and the rise of the bourgeoisie in these plays suggest how the dramas played out on stage mirror the historic spectacle of the court over the course of the century as it develops an increasingly centralized authority culminating in the image of an all-powerful Louis XIV. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. Credit 3 units. A&S IQ: HUM, LCD Art: HUM

L34 French 428 Literature of the 17th Century II

This seminar examines critical points of intersection in the 17th century. All connections engage texts as well as images. We will explore the expansion of knowledge as reflected in the mapping of bodies (anatomy), cities, and countries; humans in relation to animals; commerce and the rise of the bourgeoisie that challenges the privileges of the aristocracy; the splendors of nature and culture as manifest in the magnificent Versailles gardens, the tulip craze, and landscape painting; the lure of the exotic as part of everyday experience; and links between art and science. These topics will allow us to situate classical France in relation to the periods that precede and that follow it: the Renaissance and the Enlightenment. We will view the French monarchy in relation to both Italy, whose art provided much inspiration, and Holland, where the prosperity of merchants supported an art market that included Vermeer, de Hooch, and other celebrated Golden Age painters, all who are so unlike the artists who flourished under Louis XIV. Works will include Corneille's "Horace" and "Surenna"; Racine's "Berenice" and "Phedre"; Descartes's "Discours de la Methode"; La Bruyère's "Caracteres"; Lafayette's "Princesse de Cleves"; Pascal's "Pensees"; Graffigny's "Lettres d'Une Peruvienne"; extracts from the "Encyclopedie"; art by Le Brun, Poussin, Patel, Bernini, Vermeer and his contemporaries, and Boucher; anatomical drawings by Vesalius; as well as maps and cityscapes. Prerequisites: French 325C and French 326C. One-hour preceptorial required for undergraduates. Credit 3 units. A&S IQ: LCD Art: HUM EN: H

L34 French 4281 Order in the Court: Classical Struggles During the Reign of Louis XIV

Beginning with a study of Versailles, we examine the spectacular dimensions of artistic production under Louis XIV, including architecture, visual arts and landscapes, in addition to literature. The recent historical novel *L'allée du Roi*, which details the romance between the king and his mistress and then second wife Mme. de Maintenon, and the *Memoires of Saint-Simon* help to set the stage for us to appreciate the intrigues at court. Situating the king at the head of a hierarchical and orderly court structure, we examine some of the less harmonious elements of court-dominated life offered in representations by Corneille (*Surenna*), Molière (*Les Femmes Savantes*), Racine (*Mithridate*, *Phedre*), La Rochefoucauld, La Bruyère, La Fontaine, Mme. de Sévigné, Pascal. We consider the ways in which the court assures its power through primogeniture, the right of the eldest born son to inherit power, as well as through strict codes of etiquette and the generosity of the crown to its loyal and productive followers. We examine how these factors are insufficient to protect the monarchy against the contravening forces of political ambition, family struggles, the emerging role of women, religious faith and the devastating effects of war and disease. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units.

L34 French 431 Literature of the 18th Century I

Prerequisite: French 325 or 326. One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L34 French 4311 Voices of Dissent: Enlightenment Principle and Social Protest

The 18th century saw a rise in overtly moralizing texts, on the one hand, and unapologetically immoralist philosophies on the other. We focus on texts that avoid these extremes, allowing multiple voices to be heard. With the aid of excerpts from Genette, Bakhtine, Todorov and Barthes, we identify the voices of dissent in several 18th-century genres, including satire, the tale, the novella, the philosophical dialogue, theater, autobiography and the epistolary novel. By reading authors such as Voltaire, Montesquieu, Prévost, Diderot, Cazotte, Rousseau, Beaumarchais and Charrière, students come to appreciate a third tendency in 18th-century texts that is crucial to our understanding of the Enlightenment: the tendency to validate conflicting perspectives. We consider whether a moral can be derived from a text that consistently questions the voice of authority. We analyze the implications of such questioning in the years before the Revolution. Finally, we consider the extent to which the overzealous censorship laws of the period may have obliged authors to couch socially controversial ideas in narrative forms that seem to deny their own assertions. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One hour preceptorial required for undergraduates.

Credit 3 units.

L34 French 4321 Art, Revolution and Society

This course examines major 18th-century aesthetic treatises and literary texts that explore solutions for aesthetic quandaries. Authors include d'Alembert (*Preface a l'Encyclopedie*), Rousseau (*Discours sur les Sciences et les Arts*, *Lettre a d'Alembert*), Diderot (*Entretiens sur le Fils Naturel*, *Le Paradoxe du Comedien*, *Le Neveu de Rameau*), Cazotte (*Le Diable Amoureux*), Beaumarchais (*Le Barbier de Seville*, *Le Mariage de Figaro*), Staël (*De la Litterature*, *Corinne*). These works allow us to study some of the major insights into the aesthetics of music, painting and the performing arts with an eye to how these aesthetic "revolutions" expanded the scope and influenced the form of the French language and literary texts. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates. Credit 3 units. A&S IQ: HUM, LCD EN: H

L34 French 4331 Women of Letters

We investigate the representation of women in 18th-century texts. Why did the novel and epistolary fiction become so closely associated with women as writers, heroines and readers in the course of the century? Why were women considered exemplary and yet, at the same time, a threat? The 18th century saw the last of the salons led by women well-versed in philosophy, literature, art and politics. It saw the reinforcement of the opposition between the public and the private sphere. Woman was the incarnation of the ideal of liberty and yet excluded from the "rights of man." Rousseau praised women's role as nurturers and peacemakers but cast into doubt their capacity for genius.

Literary texts that feature women became a sparring ground for two of the century's major literary trends: Sensibilité and Libertinage, for a woman's sensitivity was thought to contain the seeds of virtue and licentiousness. We investigate philosophical discourses on the senses and emotions and political discourses on republican responsibility. We read these texts in conjunction with the literary works of men and women authors, including Prévost, Marivaux, Graffigny, Riccoboni, Diderot, Rousseau, Charrière, Laclose, Sade and Staël. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One hour preceptorial required for undergraduates. Credit 3 units. Art: HUM

L34 French 4341 Enlightenment Energy: Comedy, Eroticism and the Grotesque

In this course we examine works in which the comic, the erotic and the grotesque — base urges that 18th-century audiences deplored yet found entertaining — made inroads into the literature of the time. The Enlightenment was highly suspicious of impulses and intuitions that challenged or escaped the bounds of virtue, sentiment and reason. French philosophers debated whether genius lay in the supreme mastery or the spontaneous creation of art, whether talent was inborn or could be acquired through practice. Reading texts that span the long 18th century, by authors such as Molière, Marivaux, Crébillon fils, Voltaire, Diderot, Restif de la Bretonne, Beaumarchais, Sade and Hugo, we investigate how the satirical, the bawdy and the profane served as the wellspring of Enlightenment inspiration, giving rise to visions of an ideal society. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for required for undergraduates. Credit 3 units.

L34 French 4351 Philosophical Fictions

The French Enlightenment witnessed a veritable explosion of short fiction, including philosophical, oriental, moral and libertine tales bearing such self-conscious titles as *A Thousand and One Follies* and *This is Not a Tale*. Though written by the literary elite and not considered children's literature, the genre enjoyed widespread popular appeal and had the power to shape mentalities. Often satirical in tone, these tales served to convey and question contemporary political, philosophical, scientific, religious and moral trends. They inspired some of the most vivid illustrations of the day and were often circulated as part of the literary underground. We read works by Crébillon fils, Voltaire, Diderot, Cazotte, Charrière, Sade and Staël alongside excerpts from French cultural history on 18th-century mentalities, salons and print culture. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. Credit 3 units. A&S IQ: HUM, LCD EN: H

L34 French 436 Romanticism

This course studies pre-Romantic themes in the works of Madame de Staël and Chateaubriand and of their evolution in the poems of Lamartine, Musset and Vigny, the theater of Victor Hugo, and the novels of George Sand and Victor Hugo. Emphasis is placed on the emergence of a "littérature du moi" (literature of the self), the redefinition of the place of the artist in society after "la bataille romantique," and the stylistic

innovations that lead to "modernism." Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. Credit 3 units. Art: HUM

L34 French 4391 Classicism/A-Classicism

Among the hallmarks of 17th century, French classicism celebrated reason, order, balance and a power often associated with the great achievements of Ancient Greece and Rome. Reason, however, coexisted with dreams and madness; order encountered threats both political and sexual; disharmony persisted despite longings for justice; and depictions of Antiquity flourished alongside those of the Orient, the exotic other world of the East. The course explores these "a-classicisms," or countervailing forces, by studying the challenges that ground the struggles and seductions in dramas by Corneille, Molière and Racine as well as in the novels of Madame de Lafayette. We read Graffigny's *Lettres d'une Peruvienne*, Prévost's *Manon Lescaut*, Laclos' *Liaisons Dangereuses* to understand classicism retrospectively, through the "a-classicism" of the 18th century's treatment of identity, alienation, desire and societal tensions. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for required for undergraduates. Credit 3 units.

L34 French 4392 Commemorating the King

The court of Louis XIV at Versailles was remarkable for its grandeur, its consolidation of power and its celebration of the Sun King. Arguably, all aspects of court life were regulated by the crown and all things produced — whether wars or monuments; art or science; novels or histories — were tributes to the king. All reflected a certain "ideology of commemoration," that is, an implicit or explicit validation of the monarch's privilege and prestige, both for his contemporaries and for posterity. We explore how authors (including Louis XIV, La Bruyère, La Rochefoucauld, Perrault, La Fontaine), artists (Lebrun, Rigaud, Poussin, Félibien) and historiographers/memorialists (Racine, Saint Simon) support the ambitions of the crown through their works. Modern critics Elias, Marin, Burke and Merlin guide our research into the activities of the royal family, the ideology of absolutism and the role of art in affirming the power of Versailles as we continue to memorialize it through surviving texts, monuments and images. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for required for undergraduates. Credit 3 units.

L34 French 440 Parnassian and Symbolist Literature

This course offers an examination of key writers and texts of the Parnassian and Symbolist schools of the 19th century. Readings include poetry, drama and prose. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for required for undergraduates. Credit 3 units. Art: HUM

L34 French 441 From Symbolism to Surrealism

This course presents a survey of major French dramatic works from the late 1800s to the mid-20th century, including both innovative plays and theoretical treatises by celebrated writers such as Maeterlinck, Villiers de l'Isle-Adam, Jarry, Apollinaire, Breton, Vitrac and Artaud. It examines how in running contrary to other important movements of their general time period (e.g., Romanticism, Realism, Naturalism) these works constitute major examples of what will come to be widely known as Modernism. Attention will also be paid to the ways in which these types of plays gave rise to later forms of theater, like those found in Existentialism and the Théâtre de l'Absurde. Prerequisite: French 325 or Fr 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. Credit 3 units. A&S IQ: HUM Art: HUM

L34 French 443 Contemporary Francophone Literature

A general survey of Francophone literature. This course examines representative texts of Quebec, "Acadia," Africa and West Indies. Authors to include Antonine Maillet, Louis Hémon, Michel Tremblay, Gérard Leblanc, Anne Hébert, Maryse Condé, along with the influential poets of "négritude," Senghor and Césaire. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates. Credit 3 units. A&S IQ: HUM, LCD Art: HUM

L34 French 444 Modern Francophone Poetry

The first half of this course consists of close readings of the founders of Négritude: Césaire, Senghor and Damas. While the political and historical impact of these poets is discussed in some depth, we analyze their poetry primarily in terms of its aesthetic value and concerns. We study American influences such as jazz and the poetry of the Harlem Renaissance along with French influences. The second half of this course focuses on the contemporary poetic scene in Africa and the Caribbean. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. Credit 3 units. Art: HUM

L34 French 447 The Medieval Literary Arts

How do medieval French writers understand the structures and functions of the human body? What kinds of bodies are considered disabled? Are womanhood, childhood and old age construed as disabilities? In this course we read texts of varied genre — farces, saints' lives, fabliaux, poems, romances, journals and chronicles — as we consider how, if at all, disability exists as a social or literary construct in the Middle Ages. Texts include Philippe de Beaumanoir's *Manekine*, Courtebarbe's *Trois Aveugles de Compiègne*, Guillaume de Machaut's *Voir Dit* and the farce *Le Garçon et l'Aveugle*; excerpts from Jean de Meun's *Roman de la Rose*, from the *Ovide Moralisé* and from Christine de Pizan's *Mutacion de Fortune*; and poems by Rutebeuf, Deschamps and Molinet, as well as critical and theoretical texts from the emerging discipline of disability studies. Texts are available in modern French; no prior study of Old French language is necessary. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L34 French 448 From Arthur to the Grail

Conducted in English. A broad survey of the Arthurian legend: its origins; its elaboration in French, English and other medieval literatures; and its expression in modern literature (especially English and American) and in the visual arts, film and music. All readings available in English. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. Credit 3 units. Art: HUM BU: HUM

L34 French 450 Women and the Medieval French Literary Tradition

The Middle Ages constitute a beginning — a period when new languages and literatures came into being, along with Romanesque book — illumination and stained glass, Gothic cathedrals, Gregorian chant, Troubadour song, Crusades for the Holy Land and quests for the Holy Grail. Medieval French Literature is therefore a new literature, defining itself against antique models and its own rich multilingual, highly visual and oral culture. This course provides an overview of this diverse and fascinating French literary tradition while focusing on the status of women in the literary production of the Middle Ages. Particular attention is given to women's role in the creation of texts as authors and patrons. We also examine how gender roles are constructed and challenged through the literary representation of female characters. Readings include examples from major genres: Marie de France's *Lais*, Chrétien de Troyes' *Lancelot*, Rutebeuf's *Vie de Sainte Elysabel*, the anonymous *Aucassin et Nicolette*, as well as *Fabliaux*, poetry of the Trouvères and Trobairitz, excerpts of the *Roman de la Rose*, and works by Christine de Pizan. All readings and discussions are in modern French. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for required for undergraduates. Credit 3 units. Art: HUM

L34 French 451 French Literature of the Middle Ages I

French literature from the beginning to 1250. The course emphasizes chansons de geste, courtly romance and lyric, and early drama. Most works read in modern French. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L34 French 452 French Literature of the Middle Ages II: I, Object

In this seminar we will explore the significance of objects and objectification in medieval French literature. What happens when people are treated as "love objects" in lyric poetry, or when inanimate objects take on human properties in comical or allegorical texts? How do the "transactions" of fictional wills and legacies bind one human subject to another? We will approach these questions through a number of theoretical perspectives, including psychoanalytic, poststructuralist, posthuman, and thing theory. Texts include poems of the troubadours and trouvères, fabliaux, the *Roman de la Rose*, René d'Anjou's *Livre du cuer d'amours espris*, and Villon's *Testament*. Texts will be read

in modern French; no prior study of Old French language is necessary. Prerequisite: French 325 or 326 or the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. Credit 3 units. A&S IQ: HUM, LCD Art: HUM

L34 French 453 History of the French Language

Study of phonetic and morphological evolution of the French language with side glances at historical events that shaped this development. No previous knowledge of Latin necessary. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. Credit 3 units.

L34 French 4550 Intersectional Identities in Medieval France

Were medieval French identities "intersectional"? What cultural evidence is there -- in literature, theatrical performance, the visual arts, and the artifacts of everyday life -- for such identity categories as "race," "sexuality," or "disability"? In this course, we will investigate medieval French imaginaries of the racialized, gendered, classed, and abled/disabled body, seeking to do the following: (1) understand the systems of power and privilege that undergirded medieval identities; (2) critique the contemporary perception of medieval Europe as an all-"white," male-dominated space; and (3) explore how contemporary critical identity studies can deepen our comprehension of medieval culture and how medieval materials can offer new insights into contemporary identity formations. This course will be taught in English, with a weekly discussion section in French for undergraduates enrolling for French credit. Prerequisite: French 325, French 326, Thinking-It-Through, or In-Depth.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA EN: H

L34 French 456 Romance Philology

Study of the evolution of the major Romance languages from their common Latin origins. Knowledge of classical Latin not required, but acquaintance with phonetics of at least one Romance language extremely helpful. Conducted in English. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates. Credit 3 units.

L34 French 458 Nature, Landscape and Travel in the Middle Ages

Through an examination of the concept of nature in the Middle Ages, the course analyzes the importance of the presence or absence of landscapes in medieval literature, including chansons de geste, courtly romances, *Roman de la Rose*, accounts of travel and pilgrimages, poetry and theater. We examine the movements of medieval men and women from one place to another; their concepts of the relation between the nature and culture; their emotions when confronting nature; the various means they use to describe space and travel; the function of nature and landscapes within individual works. Each text is situated within the general framework of the history of the language and the literature of the period. The thematic focus of the course is informed through theological, philosophical and anthropological perspectives essential to an appreciation of all

medieval texts. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates. Credit 3 units.

L34 French 4581 Sacrifice and Service: Masculinity and the Medieval French Literary Tradition

The Middle Ages constitute a beginning: a period when new languages and literatures — along with Gothic cathedrals, Troubadour song, Romanesque art, Crusades for the Holy Land and quests for the Holy Grail — come into being. By focusing on the notion of service, we study how medieval society establishes a hierarchy of power that encompasses religious, feudal and courtly relationships. Particular attention is given to the construction and testing of gender roles. What are men and women asked to sacrifice? Whom and what are they supposed to serve? How do the concepts of honor and heroism motivate the service of knights and heroines to their king and God? Texts include: *La Chanson de Roland*, *La Queste du Saint-Graal*, *La Vie de Saint Alexis*, *Le Jeu d'Adam*, Béroul's and Thomas' versions of *Le Roman de Tristan*, Chrétien de Troyes' *Le Chevalier au Lion ou Yvain*, Rutebeuf's *Miracle de Théophile* and Christine de Pizan's famous poem on Jeanne d'Arc. All readings in modern French. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for required for undergraduates. Credit 3 units.

L34 French 459 Writing North Africa

Ever since the conquest of Algiers in 1830, the French have been fascinated by writing from and about North Africa. Beginning with 19th-century French travel narratives about Algeria, colonial-era writing defined ideas of the "exotic." As Algeria, Morocco, and Tunisia gained independence from France in the mid-20th century, North African authors often wrote their own postcolonial literature in the language of their former colonizer. These authors and their contemporary descendants continue to create and challenge the ideas of postcolonial francophone literature today. The main seminar sessions are taught in English, with additional required weekly undergraduate discussions (section A) in French. This seminar satisfies the post-Revolution requirement for French majors. Prerequisite: French 325 or French 326. One-hour preceptorial required for undergraduates. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L34 French 460 Topics in European History IV

A detailed look at the contributions of major French theorists such as Beauvoir, Cixous, Irigaray, Kristeva and the interpretation of French feminism in America. We study French feminist theory with an eye to psychoanalysis; maternity as metaphor and experience; women and language and/or Marxist-feminist theory; and aesthetics. Conducted in French. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates. Credit 3 units.

L34 French 461 Topics in French Literature and History

How genre affects both the production of a given literary text and its perception by the reader. Representative texts from different centuries and movements. Prerequisites: French 325C and 326C (or, for students who have completed the Paris Business Program, completion of either course). One-hour preceptorial for undergraduates only.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L34 French 466 Second Language Acquisition

There are many ways in which a second language can be learned: from infancy as the child of bilingual parents, or later through formal instruction, immersion in a new culture, or in a particular work or social situation. This class is an inquiry into the processes by which acquisition occurs. Topics include the nature of language learning within the scope of other types of human learning; the relationship between first and second language acquisition; the role of linguistic, cognitive, and sociocultural factors; insights gained from analyzing learners' errors; key concepts such as interlanguage and communicative competence; bilingualism; the optimal age for second language acquisition; and a critical appraisal of different theories of second language acquisition. Both theoretical and instructional implications of second language acquisition research are considered. This course can be used toward certification in TESOL and is a required course for the Graduate Certificate in Language Instruction. Prerequisite: Ling 170D or equivalent is recommended, especially for undergraduates, but is not required.

Same as L44 Ling 466

Credit 3 units. A&S IQ: HUM EN: H

L34 French 469 Reading and Writing in a Second Language

In the past decade the process of becoming literate in a second language has received considerable attention by researchers and instructors. This course, taught in English, extends issues in L2 literacy beyond pedagogy by examining the wide range of theoretical and research issues, both historical and current. Literacy acquisition among second language learners involves a number of variables including both cognitive and social factors. Topics discussed in class include: individual learner differences; the extent to which reading and writing are interrelated; text types and literary forms; literacy and social power; and universal cognitive operations. Students discuss how to bridge research and practice, and they create activities that are included in a reading and writing portfolio. Course counts toward the Graduate Certificate in Language Instruction.

Credit 3 units. A&S IQ: LCD

L34 French 470 Suffering and Self-Expression in Early Modern French Literature

How did early modern people cope with disease, suffering and death? With the advancement of medical science, in particular with Ambroise Paré, who saw it as his mission to ease his patients' pain, a new sensitivity toward man's suffering began to develop. Working within the historical and scientific context of the time, this course examines old and emerging attitudes toward man's suffering with special emphasis on the relationship between suffering and artistic expression. Topics discussed include: suffering as part of the human condition; suffering and faith; suffering and early modern medicine; medicine and religion; gendered views of illness; disease/suffering as a vehicle of relief and self-expression; literary treatment of suffering and disease, including melancholia, depression, suicide, kidney

stone, mourning, aging, etc.; images of the ailing body and the ailing mind in early modern texts; disease as a theme and a metaphor. Various genres are covered (fiction, poetry, drama, essay, travelogue). Authors likely include Maurice Scève, Helisenne de Crenne, Louise Labé, Joachim Du Bellay, Pierre de Ronsard, Marguerite de Navarre, Jean-Baptiste Chassignet, Gabrielle de Coignard and Michel de Montaigne. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates only.

Credit 3 units. Art: HUM

L34 French 481 Sartre and Existentialism

This course studies French existentialism in light of recent intellectual developments, especially postmodernism; detailed study of Sartre's major literary and critical works. Conducted in French, nonmajors may do written work in English. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. Art: HUM

L34 French 482 Avant-Garde, Postmodern and Modernity

We study the history and evolution of an avant-garde in French literature, possible definitions of the postmodern, description of the different areas of modernity. Readings both theoretical and literary. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. Art: HUM

L34 French 483 Gender and Genre

A sampling of the diverse contributions made by French women to literary history, this course examines what prompted women to write in the 16th century; what they wrote about; which genres they chose; how these women were viewed by their contemporaries; etc. Prerequisites: French 325 or 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM EN: H

L34 French 492 Contemporary French Literary Criticism

The first half of the course deals with works of Roland Barthes; the second examines relationship of philosophy to literature and explores how the ideas of Foucault, Lacan, Derrida, Deleuze, Girard and Baudrillard can be applied to the study of literary texts. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. Art: HUM

L34 French 493 Selected French Writers

Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates.

Credit 3 units. Art: HUM

L34 French 495 Honors

To be considered for graduation with Honors, students must: (1) participate satisfactorily in two 400-level literature courses and (2) enroll in French 495 and submit an Honors Thesis approved by the department at least two months before graduation. Prerequisite: 3.0 grade point average. Qualified students should consult the department. Credit 3 units.

L34 French 4951 Honors

To be considered for graduation with Honors, students must: (1) participate satisfactorily in two 400-level literature courses and (2) enroll in French 495 and submit an Honors Thesis approved by the department at least two months before graduation. Prerequisite: 3.0 grade point average. Qualified students should consult the department. Pass/fail. Credit 3 units. EN: H

Germanic Languages and Literatures

Germanic Languages and Literatures offers a diverse and challenging program of study in the language, literature and culture of the German-speaking countries. In this program, students engage in intensive study of the German language and explore German literature and culture, from the Middle Ages to the present. They also have the opportunity to learn business German and to study the politics and culture of contemporary Germany.

Our six-semester language core curriculum aims to provide students with the linguistic and cultural skills needed to communicate effectively in a German language environment. Beginning (100-level) courses combine intensive interactive classroom activities with at-home preparation and reinforcement activities (following a “flipped-classroom” approach) to enable students to rapidly acquire the basics of German vocabulary and grammar. Intermediate (200-level) courses are designed to expand and deepen students’ understanding of German society and culture while furthering the development of speaking, writing, listening, and reading skills. Both 100- and 200-level courses work toward the completion of large chapter projects, which prepare students to communicate in various modalities in real-life scenarios. In advanced (300-level) language courses, students refine their core skills and acquire new knowledge of complex grammatical structures, and they improve their ability to express sophisticated ideas orally and in writing.

In Washington University's German program, students take courses from internationally recognized faculty members who are leaders in their fields and who have been recognized for their expertise in undergraduate teaching. Faculty areas of interest include medieval through 21st-century literature, history, film and media, translation, German-Jewish studies, music and sound studies, narrative theory, second-language acquisition and

gender studies. All German classes are small, thus facilitating lively faculty-student interaction. Our collection of contemporary German literature, housed in Olin Library, is the largest in North America and attracts many visiting scholars to our campus.

Students of German can choose among several study abroad programs, and they can take advantage of an array of cocurricular activities, including film series, the national German honor society Delta Phi Alpha, lectures by guest speakers, and readings by visiting authors. Many German students also elect to share their interest in German with the next generation of students by assisting with our annual German Day, which is hosted for high school students from Missouri and Illinois.

A degree in German prepares students for a wide range of future pursuits, including graduate study in such fields as German studies, language education, comparative literature and art history. Students frequently combine a degree in German with another major in the college and, upon graduation, earn advanced degrees in law, medicine, economics, business, engineering, environmental studies, and international and area studies. Our graduates pursue work in diverse fields, from academia to international banking and from diplomacy to publishing.

Majors

The Major in Germanic Languages and Literatures

Total units required: 25

Required courses:

German 340C and its 1-unit discussion section German 340D or German 341 and its 1-unit discussion section German 341D or German 342 and its 1-unit discussion section German 342D and the senior assessment (undertaken in conjunction with a 400-level seminar) are required for all majors. German 340C/German 340D or German 341/341D or German 342/342D are required for admission to all 400-level courses except German 402, German 403D, German 404 and German 408D. Admission to 400-level courses (except German 402, German 403D, German 404 and German 408D) without the completion of German 340C or German 341 or German 342 is by departmental permission only.

Elective courses:

Students interested in studying German may declare German as their major or second major. Majors and second majors are required to complete 25 credit units of upper-level courses (202D and higher), at least 12 of which are on the 400 level. If students begin German at Washington University and follow the regular sequence of courses (German 101D–German 102D–German 201D), they will be ready to begin the German major after three semesters. With the exception of German 340C or German 341 or German 342, only courses taught in German will count toward the major. Students who wish to receive honors in German are required to write an honors thesis and must register for German 497/German 498 (with departmental permission) in addition to the 25 credits required for the major (for a total of 31 credit units). All majors and second majors are required to participate in the senior assessment interview in the final semester of their senior year.

Applications for admission to the honors program must be submitted by the first week of classes in the student's final year of study.

Note: For both majors and minors, at least half of the courses at the 300 level and above must have been acquired either in residence at Washington University or in overseas programs affiliated with Washington University.

Additional Information

Study abroad: German majors or minors are encouraged to participate in one of our overseas study programs. The German department sponsors a semester and a year abroad at the University of Tübingen, Germany. To participate in the Tübingen program, students must complete German 202D (for the semester program), German 301D (for the year program), or

their equivalent by the time the program begins. Upon returning to campus, German majors are required to take at least one 400-level course (other than German 497–German 498) during their senior year.

Washington University sponsors a summer program in Göttingen, Germany. Students who have taken at least one semester of German may be eligible for this intensive language program. Students interested in business are encouraged to apply for the Webster University international business internship or for the business internship in Koblenz, Germany, which is arranged by Washington University's Olin Business School.

Departmental Distinction in German and Latin Honors in German: Students who wish to be eligible for distinction in German must undertake a project in German during their final year at Washington University. There are three ways to achieve honors in German: (1) honors by course work and portfolio; (2) honors by creative project; or (3) honors by thesis. Students receiving distinction in German may additionally qualify for Latin honors in German. By May 15 of the junior year, these students choose a project or portfolio with the help of a faculty advisor from the department, enroll in the appropriate course work during the senior year, and submit completed projects immediately following spring break of the senior year.

Minors

The Minor in Germanic Languages and Literatures

Total units required: 16

Required courses: Students who intend to minor in German must complete 16 upper-level (202D and higher) credit courses taught in German. With the exception of German 340C or German 341 or German 342, only courses taught in German will count toward the minor. At least 3 of these units must be at the 400 level.

Note: For both majors and minors, at least half of the courses at the 300 level and above must have been acquired either in residence at Washington University or in overseas programs affiliated with Washington University.

We strongly recommend that minors take German 340C German Literature and the Modern Era with discussion section **or** German 341 German Thought and the Modern Era with discussion section **or** German 342 German Literature and the Pre-Modern Era with discussion section, because these courses serve as a prerequisite for all 400-level courses except German 402, German 403D, German 404 and German 408D. Any credits obtained at the 300 or 400 level during the summer institute program in Göttingen may count toward the minor.

Courses

Visit online course listings to view semester offerings for L21 German (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L21&crslvl=1:4>).

L21 German 101D Basic German: Core Course I

Introductory program; no previous German required. Students will develop their competence in listening, speaking, reading, and writing German by means of interpersonal, interpretive and presentational communicative practice. This first course serves as an introduction to German grammar and culture; goals range from developing the communicative skills necessary to find an apartment to being able to read modern German poetry. Students will learn how to apply their knowledge of basic cases and tenses in order to hold a conversation or write a letter describing their interests, family, goals, routines, etc., and to discover personal information about others. Students who complete this course successfully should enter German 102D. Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L21 German 102D Basic German: Core Course II

Continuation of German 100D or 101D. In preparation for more advanced academic study in German, this second course will further introduce students to fundamental German grammar, culture and history. It is comprised of a combination of situational lessons and tasks which will challenge their critical thinking abilities. Students in 102D will familiarize themselves with the language necessary to understand and give directions, apply for a job, and speak with a doctor; students will also read more advanced content such as Grimm's fairy tales and a text from Franz Kafka. Prerequisite: German 100D, 101D, the equivalent, or placement by examination. Students who complete this course successfully should enter German 201D. Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L21 German 201D Intermediate German: Core Course III

Continuation of German 102D. This course is designed to expand and deepen students' understanding of modern German society and culture and to help them improve their skills in all four key areas of foreign-language learning: reading, speaking, listening and writing. All class discussions and assignments will be in German in order to provide students with an opportunity to expand their active and passive vocabulary and gain confidence in their ability to communicate in the language. Prerequisite: German 102D, the equivalent, or placement by examination. Students who complete this course successfully should enroll in German 202D. Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H

L21 German 202D Intermediate German: Core Course IV

Continuation of German 201D. In preparation for study at the advanced level, this fourth-semester course will continue the four-skills based approach of 201D, focusing on a range of cultural topics relevant to the German-speaking lands, including diversity in modern German society, the media, local and national politics, and transatlantic relations. The course also includes additional review of grammatical structures that will enable you to express yourself more fluently and idiomatically in German. All class discussion and assignments will be in German, in order to provide you with an opportunity to expand your active and passive vocabulary and gain confidence in your

ability to communicate in the language. Prerequisite: German 201D, the equivalent, or placement by examination. Students who complete this course successfully should enroll in German 301D.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L21 German 301D Advanced German: Core Course V

This course involves the discussion of literary and non-literary texts in combination with an intensive grammar review. It also presents a systematic introduction to the expressive functions of German, with an emphasis on spoken and written communication. In addition to the regular class meetings, students should sign up for a twice-weekly subsection. Prerequisite: German 202D and German 210D or equivalents, or placement by examination. Students who complete this course successfully should enter German 302D.

Credit 3 units. A&S IQ: LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

L21 German 302D Advanced German: Core Course VI

Continuation of Ger 301D. Refinement and expansion of German communication skills (speaking, listening, writing, reading), deepening understanding of German grammatical structures, acquisition of more sophisticated and varied vocabulary, introduction to stylistics through discussion, and analysis of literary and nonliterary texts. In addition to the regular class meetings, students should sign up for a twice-weekly subsection. Prerequisite: Ger 301D or equivalent, or placement by examination. Students completing this course successfully may enter 400-level courses. Note that German 340C/340D, German 341/341D, and German 342/342D are prerequisites for most 400-level courses.

Credit 4 units. A&S IQ: LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

L21 German 313 Conversational German

Practice in speaking and vocabulary development in cultural contexts. Prerequisite: German 210D, equivalent, or placement by examination. May be repeated for credit.

Credit 1 unit. A&S IQ: LCD EN: H

L21 German 331 Topics in Holocaust Studies: Children in the Shadow of the Swastika

This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period — the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children — both those they considered "Aryan" and those they designated "enemies" of the German people, such as Jewish children — an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by

Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. *Open to freshmen. Students must enroll in both main section and a discussion section.*

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L21 German 340C German Literature and the Modern Era

Introduction in English to German writers from 1750 to the present. Discussion focuses on questions like the role of outsiders in society, the human psyche, technology, war, gender, the individual and mass culture, modern and postmodern sensibilities as they are posed in predominantly literary texts and in relation to the changing political and cultural faces of Germany over the past 250 years. Readings include works in translation by some of the most influential figures of the German tradition, such as Goethe, Nietzsche, Freud, Kafka, Thomas Mann, Brecht, and Christa Wolf. Open to first-year students, non-majors and majors. Admission to 400-level courses (except 402, 403D, 404, and 408D) is contingent on completion of this course or 341/341D. The main course is conducted in English, so this will only qualify for major or minor credit when taken in conjunction with one-hour discussion section in German (L21 340D).

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, IS EN: H

L21 German 340D German Literature and the Modern Era

This course must be taken concurrently with 340C for major/minor credit. The discussion section provides an introduction to critical German vocabulary and is open to students with prior knowledge of German (210D or equivalent, or placement by examination.)

Credit 1 unit.

L21 German 341 German Thought and the Modern Era

In this introduction to the intellectual history of the German-speaking world from roughly 1750 to the present, we will read English translations of works by some of the most influential figures in the German tradition, including Kant, Hegel, Marx, Nietzsche, Freud, Adorno, Heidegger, Arendt, Habermas, and others. Our discussions will focus on topics such as secularization, what it means to be modern, the possibility of progress, the role of art and culture in social life, the critique of mass society, and the interpretation of the Nazi past. We will consider the arguments of these thinkers both on their own terms and against the backdrop of the historical contexts in which they were written. Open to first-year students, non-majors and majors. Admission to 400-level courses (except 402, 403D, 404, and 408D) is contingent on completion of this course or 340C/340D. The main course is conducted in English, so this will only qualify for major or minor credit when taken in conjunction with one-hour discussion section in German (L21 341D).

Credit 3 units. A&S IQ: HUM BU: ETH EN: H

L21 German 341D German Thought and the Modern Era

This course must be taken concurrently with 341 for major/minor credit. The discussion section provides an introduction to critical German vocabulary and is open to students with prior knowledge of German (210D or equivalent, or placement by examination.)

Credit 1 unit.

L21 German 342 German Literature and the Premodern Era

In this introduction to the literary and intellectual history of the German-speaking world from roughly 800 C.E. to the 17th century, we will read English translations of some of the most influential authors and works in the medieval and early modern German tradition, including the "Heroic Age" (e.g., "Nibelungenlied"), the classical period of the 12th and 13th centuries (e.g., Walther von der Vogelweide, Wolfram von Eschenbach, Gottfried von Straßburg), late-medieval philosophy and mysticism (e.g., Mechthild von Magdeburg, Meister Eckhart), and early modern humanism and the Reformation (e.g., Martin Luther). Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the German and European literary tradition; these are texts that continue to offer invaluable insights into humanity and the world around us. Our discussions will focus on concepts such as heroism, chivalry, and courtly love and on questions regarding the relationship between the individual and society, the role of religion in society, and the emergence of modern mass media (e.g., the Gutenberg revolution). We will consider the texts both on their own terms and against the backdrop of the historical contexts in which they were written. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L21 German 342D German Literature and the Premodern Era

This course must be taken concurrently with L21 342 for major or minor credit. The discussion section provides an introduction to critical German vocabulary and is open to students with prior knowledge of German. Prerequisite: L21 210D or equivalent, or placement by examination. Credit 1 unit. BU: HUM

L21 German 402 Advanced Grammar and Style Lab

Take your German skills to the next level! This 1-unit lab is designed for advanced students seeking to master the finer points of German grammar and style through targeted exercises and discussion. Students will learn to construct sophisticated, elegant, and accurate sentences, with the goal of improving their effectiveness as writers and speakers of German. A rotating weekly focus will cover such topics as: complex sentence structures; advanced passive and subjunctive forms; idiomatic prepositional and verb phrases; and infinitive constructions. Prerequisite: German 302 or the equivalent. Credit 1 unit.

L21 German 403D Advanced Vocabulary and Usage

This one-unit workshop is designed for advanced undergraduate students wishing develop advanced communication skills by improving their grasp of German vocabulary and usage. Over the course of the semester, students will discuss a wide variety of texts related to German art, philosophy, literature and contemporary culture, focusing on specific aspects of the language that pose challenges for non-native speakers. Assignments (not to exceed 1.5 hours per week) will include short written responses and exercises aimed to help students speak and write more elegantly and idiomatically. Prerequisite: German 302 or the equivalent or permission of the Director of Undergraduate Studies. Credit 1 unit.

L21 German 404 Germany Today

This course is an introduction to the history, politics, and culture of contemporary Germany from 1945 to the present. Topics include the cultural construction of identity in post-unified Germany; European integration and the post-wall economy; the German constitution, electoral system, and current elections; current debates and controversies; political parties and leading political figures; the role of literature, film, music, the visual arts, media, and popular culture; and the role of universities. Discussions, readings, and papers in German. This course is required for candidates who are planning to attend the overseas program in Tübingen, Germany. Prerequisite: German 302D (may be taken concurrently with German 404), or permission of the director of undergraduate studies. Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: IS EN: H

L21 German 408D German as a Language of Business

This course introduces students to concepts and issues relevant to German business and economics and helps them to develop the language skills necessary to succeed in the German business world. We concentrate on the basic elements of the German economic system, looking at Germany as a site of production and exchange, the legal structure of German firms, the relations between labor and management, and strategies for product development and marketing in national and international contexts. Students also are introduced to specific German business practices, including forms of communication, management styles and general corporate culture. Students learn business vocabulary, writing skills for business correspondence, oral presentation techniques, and reading and comprehension strategies for German newspapers and news reports. All discussions, readings and assignments are in German. Prerequisite: German 302D. Credit 3 units. A&S IQ: LCD, LS BU: IS EN: H

L21 German 4100 German Literature and Culture, 1150-1750

This course involves the exploration of medieval and early modern literature and culture within sociohistorical contexts. Genres and themes vary and may include visual culture; representation; the development of fictionality and historical writing; questions of race, gender, and class; courtly culture; law; magic and marvels; and medical and scientific epistemologies. Readings may include such genres as the heroic epic, drama, "Minnesang," the courtly novel, the Arthurian epic, fables, the novella, religious or devotional literature, witch tracts, pamphlets, political writings, the "Volksbuch," the picaresque novel, and the essay. Discussion, readings, and papers are in German. Prerequisites: German 302D and German 340C/340D or German 341/341D or German 342/342D. Credit 3 units. A&S IQ: HUM, LCD, LS, WI BU: HUM, IS EN: H

L21 German 4101 German Literature and Culture, 1750-1830

This course explores the literature and culture of the Enlightenment, Storm and Stress, Weimar Classicism, and Romanticism within sociohistorical contexts. Genres and themes vary and may include the representation of history, absolutism and rebellion, the formation of bourgeois society, questions of national identity, aesthetics, gender, romantic love, and the fantastic. Readings and discussions include texts by authors such as Lessing, Goethe, Schiller, Kant, Novalis, Gündert, and

the Brothers Grimm, Kleist, E.T.A. Hoffmann, Eichendorff, and Bettina von Arnim. Discussion, readings, and papers are in German. Prerequisites: German 302D and German 340C/340D or German 341/341D or German 342/342D.

Credit 3 units. A&S IQ: HUM, LCD, LS, WI Art: HUM

L21 German 4102 German Literature and Culture, 1830-1914

This course presents an exploration of 19th-century literature and culture within sociohistorical contexts. Genres and themes vary and may include the representation of history, liberalism and restoration, nationalism, industrialization, colonialism, class, race and gender conflicts, materialism, secularization, and fin-de-siècle. Readings and discussions include texts by authors such as Büchner, Heine, Marx, Storm, Keller, Meyer, Fontane, Droste-Hülshoff, Nietzsche, Ebner-Eschenbach, Schnitzler, and Rilke. Discussions, readings, and papers are in German. Prerequisites: German 302D and German 340C/340D or German 341/341D or German 342/342D.

Credit 3 units. A&S IQ: HUM, LCD, LS, WI Art: HUM EN: H

L21 German 4103 German Literature and Culture, 1914 to the Present

This course is an exploration of modern and contemporary literature within sociohistorical contexts. Genres and themes vary and may include the representation of history, the crisis of modernity, the two World Wars, the Weimar Republic, the Third Reich, generational conflicts, the women's movement, and postmodern society. Readings and discussions of texts include authors such as Wedekind, Freud, Mann, Kafka, Brecht, Seghers, Böll, Bachmann, Grass, and Wolf. Discussions, readings, and papers are in German. Prerequisites: German 302D and German 340C/340D or German 341/341D or German 342/342D.

Credit 3 units. A&S IQ: HUM, LCD, LS, WI Art: HUM BU: HUM EN: H

L21 German 4104 Studies in Genre

This course explores the definition, style, form, and content that characterize a specific genre. It will investigate the social, cultural, political, and economic forces that lead to the formation and transformation of a particular genre. Students will examine generic differences and the effectiveness of a given genre in articulating the concerns of a writer or period. Topics and periods vary from semester to semester. Discussions, readings, and papers are in German; some theoretical readings are in English. Prerequisites: German 302D and German 340C/340D or German 341/341D or German 342/342D.

Credit 3 units. A&S IQ: HUM, LCD, LS, WI Art: HUM EN: H

L21 German 4105 Topics in German Studies

This course focuses on particular cultural forms such as literature, film, historiography, social institutions, philosophy, and the arts or on relationships between them. The course examines how cultural meanings are produced, interpreted, and employed. Topics vary and may include national identity, anti-semitism, cultural diversity, the construction of values, questions of tradition, the magical, the erotic, symbolic narrative, and the city. The course may address issues across a narrow or broad time frame. Discussions, readings, and papers are in German. Prerequisites: German 302D and German 340C/340D or German 341/341D or German 342/342D.

Credit 3 units. A&S IQ: HUM, LCD, LS, WI Arch: HUM Art: HUM EN: H

L21 German 4106 Studies in Gender

This course investigates the constructions of gender in literary and other texts as well as their sociohistorical contexts. Particular attention will be paid to the gendered conditions of writing and reading, engendering of the subject, and indicators of gender. Topics and periods vary from semester to semester and include gender and genre, education, religion, politics, cultural and state institutions, science, sexuality, and human reproduction. Discussions, readings, and papers are in German; some theoretical readings are in English. This course may be repeated with different content. Prerequisites: German 302D and German 340C/340D or German 341/341D or German 342/342D.

Credit 3 units. A&S IQ: HUM, LCD, LS, SD, WI EN: H

L21 German 432 Undergrad Seminar: What Dreams May Come: Explorations of the Psyche in Viennese Modernism

This course investigates the relationship of the burgeoning field of psychoanalysis to modernist art and literature in Vienna at the beginning of the 20th century. Examining literary texts and artworks alongside theories of dreams and the unconscious by thinkers such as Ernst Mach and Sigmund Freud, we will analyze the ways that visual artists, composers, and poets sought to divulge the inner workings of the psyche. Our discussion will focus on key questions: What forms and what visual, aural, and verbal languages were developed to represent subjective experience? How did theories of memory and trauma and ideas about gendered psyches shape the depiction of individual agency in these works? What can these works tell us about the larger societal forces at play in this cultural moment? Readings will include the drama, poetry, and novellas of Arthur Schnitzler and Hugo von Hofmannsthal; musical works by Mahler and Schoenberg; and the visual art of Gustav Klimt, Helene Funke, and Oskar Kokoschka. Readings and discussion in German. Prerequisites: German 302D; German 340C/340D, German 341/341D, or German 342/342D.

Credit 3 units. A&S IQ: HUM EN: H

L21 German 4381 Contemporary German Literature

Taught by the Max Kade writer and critic in residence, the course deals with the most recent trends and developments in contemporary German literature, including its multicultural, feminist, and postcolonial aspects. In all, the writer and critic will deal with approximately eight literary texts during the semester. The writers generally include a work of their own and give an idea of their personal poetics. Admission for undergraduate senior German majors is allowed only with permission of the Director of Graduate Studies.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L21 German 453 Theories of Literary and Cultural Analysis: Narrative Theory — A Critical and Analytical Toolbox

This seminar familiarizes advanced undergraduate and graduate students with concepts and methodologies that are foundational for research in the humanities. Our discussions will be organized around a range of conceptual categories that have constituted the focus of scholarly reflection in the past few decades, such as text, genre, image, medium, discourse, discipline, subjectivity, gender, race, culture, politics, and history. Our consideration of these categories will also require us to examine key currents in recent literary theory and cultural criticism, including (post)structuralism, psychoanalysis, Marxist theory, feminism and gender theory, postcolonial studies, cognitive science, book history, visual studies, and media theory. Although

this seminar does not aim to offer an intellectual history, seminar members will acquire a sense of some of the key trends in cultural theory since 1945 as well as an awareness of the limits and possibilities that characterize each of them. The course also includes an introduction to the tools of scholarly research. Readings and discussions are in English. Prerequisite: Undergraduates may only take this course with permission of the director of graduate studies.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L21 German 457 Introduction to Linguistics and the Structure of German

This course is an introduction to the structure of the German language and to linguistic theory: phonology, morphology, syntax, and semantics, as well as semiotic, pragmatic, and sociolinguistic theories. Prerequisite: Undergraduates may only take this course with permission of the director of graduate studies.

Credit 3 units. A&S IQ: LCD EN: H

L21 German 490 Undergraduate Topics in German Film: Introduction to German Cinema

In this undergraduate course, we will watch and discuss some of the great highlights of German film history. The course will provide students with a visual and linguistic foundation for discussing German film from the early days of cinema to the present. To cover such an extensive time span and range of cinematographic output, we will view representative works from various periods, genres, and authors that deal with a wide variety of themes. Class discussions will address the social and cultural significance of cinematic production in 20th- and 21st-century German culture as well as historical moments in German culture that are viewed through film. Certain themes will reoccur throughout the semester, including gender, the city, technology, violence, and social crisis. This course will also help students to improve their reading, writing, listening and speaking proficiency in German. Classroom discussions and readings will be entirely in German. The films will have English subtitles. This class will accommodate a range of levels of German proficiency. The reading and writing assignments will be adjusted accordingly. All instruction and all discussion will be in German. Note: There will be required weekly screenings. Prerequisite: successful completion of German 302D AND German 340C/340D OR German 341/341D OR German 342/342D or permission of the Director of Undergraduate Studies.

Credit 3 units. Art: AH BU: HUM

L21 German 493 The Task of the Translator

This course offers an introduction to the theory and practice of translation, and it consists of three main components. First, students will have the opportunity to translate a wide range of fictional and nonfictional texts from a variety of genres (short stories, philosophy, journalism, academic prose). The focus will be on translation from German to English, but we will also translate from English to German. Next, we will read selections from key works on the theory of translation, from Martin Luther's 16th-century treatise on his Bible translation to 20th-century essays by philosophers like Walter Benjamin. Finally, we will read and discuss excerpts from some of the most celebrated literary and philosophical translations of the past 200 years, including German translations of authors ranging from Shakespeare to J.K. Rowling as well as English translations of authors such as Goethe and Kafka. This course aims to give

students a sense of the challenges and rewards of translation as well as a deeper understanding of the relationship between language, thought, and culture. Prerequisites: German 302D and German 340C/340D or German 341/341D or German 342/342D. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L21 German 497 Independent Work for Senior Honors

Research for an Honors thesis, on a topic chosen in conjunction with the advisor. Emphasis on independent study and writing. Open to students with previous course work in German at the 400 level, an overall 3.0 grade point average, and at least a B + average in advanced work in German. Prerequisites: senior standing and permission of the undergraduate advisor. Credit 3 units.

L21 German 498 Independent Work for Senior Honors

Continuation of German 497. Completion of thesis. Quality of the thesis determines whether the student receives credit only or Honors in German. Prerequisite: German 497. Credit 3 units.

Global Studies

Students in Global Studies develop a broad understanding of the world while exploring the diversity and richness of other cultures. The complex relationship between globalization and local differences is a hallmark of the contemporary era. Globalization increases the movement of people, goods, capital, technology, and ideas throughout the globe. At the same time, strong attachments to local languages, cultures, and societies remain. Global Studies students seek to understand globalization and the relationship between the global and the local.

The Global Studies major is unique, emphasizing the interdisciplinary study of the cultural, economic, ecological, historical, social, and political processes that contribute to interdependence or globalization. Global Studies courses span the humanities and social sciences, and they encourage both contemporary and historical points of view. In addition, Global Studies challenges students to master a modern language and to understand the cultural contexts in which the language is spoken. It encourages the exploration of contemporary foreign affairs through speakers, conferences, and faculty panels, and it provides an introduction to international careers. Global Studies also provides robust support for foreign study and independent research. Through this approach, students explore the effect of global and local factors on historical events, current affairs, and public policy. They develop analytical skills, cross-cultural awareness and sensitivity, proficiency in another language, and overall abilities to be productive and ethical global citizens.

There are six concentrations available to Global Studies majors:

- (1) Global Studies with a concentration in development; (2)
- Global Studies with a concentration in Eurasian studies; (3)
- Global Studies with a concentration in European studies; (4)
- Global Studies with a concentration in global Asias; (5) Global
- Studies with a concentration in global cultural studies; and (6)
- Global Studies with a concentration in international affairs.

Majors

The Major in Global Studies

There are six concentrations available to Global Studies majors. Please visit the following pages for more information about their requirements:

- Concentration in development (p. 678)
- Concentration in Eurasian studies (p. 682)
- Concentration in European studies (p. 686)
- Concentration in global Asias (p. 689)
- Concentration in global cultural studies (p. 695)
- Concentration in international affairs (p. 698)

Total units required: 36 graded credits plus four semesters of any modern language

Required courses:

- These depend on the concentration.

Elective courses:

- Depending on the concentration, two to four introductory courses (3 credits each, at the 100 or 200 level) are required.
- Depending on the concentration, eight to ten upper-level courses (3 credits each, at the 300 or 400 level) are required.

General Requirements:

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

For more detailed information about the general requirements, please see the Global Studies FAQs page (<https://ias.wustl.edu/faq/>) on the department website.

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 300 or 400 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, University College, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit (<https://artsci.wustl.edu/resources/policies-procedures/#anchor-group-2886>) form with Arts & Sciences to take the course for "general credit" and then petition (<https://ias.wustl.edu/ias-course-petition/>) to have the course count toward their Global Studies major.

Latin Honors

- Students must confidently expect to graduate with an overall grade-point average of 3.65 or higher to qualify for Latin Honors.
- Students should enroll in GS 485 Preparation for Global Studies Honors Thesis during the fall of senior year and in GS 486 Global Studies Senior Honors Thesis during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

- All Global Studies majors must satisfy a language requirement that entails the successful completion of four semesters of one modern language appropriate to their concentration. For some students, this may mean the first four semesters of a language; for others who place

into advanced language classes — and with approval from Global Studies language faculty — this may include literature, culture, oral communication, and linguistic courses in the target language, once such students complete the basic language sequence.

- Students are encouraged to study more than one language at Washington University, but they must satisfy their Global Studies language requirement by demonstrating competence in at least one language through the fourth semester. Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili. Students should consult the course listings (<https://acadinfo.wustl.edu/Courselistings/Courses.aspx?Mode=ILE>) for details about the language sequences. (On the "A&S IQ" tab, click on "Courses," and then toggle "Area Requirement" to "LS Language & Cultural Diversity-Language" and click "Search" to see a list of available language courses.)

With the permission of the major advisor, advanced literature and culture courses taught in the native language may be used to satisfy the Global Studies language requirement **and** may count as advanced elective credit as long as these courses are cross-listed with or approved for study abroad credit for the student's Global Studies concentration **and** provided the courses are not being counted toward any other degree.

Special note for Spanish learners: The following Spanish courses are **not** part of the regular sequence that are permitted to count toward the four semesters of language: Span 223 Intermediate Spanish Conversation and Culture, Span 351 Business Spanish, Span 353 Medical Spanish, and Span 355 Spanish for the Social Sciences. Some students might find these courses valuable for other reasons. For questions about this, students should consult with their major advisor.

Students With Prior Language Experience

Native speakers of a modern language: Students must satisfy the four-semester Global Studies language requirement in another language appropriate to their concentration.

Heritage speakers who do not have a native level of fluency: Students must seek appropriate placement by the coordinator of the language program and complete the four-semester Global Studies language requirement.

Transfer students who have taken language courses: A transfer student may receive credit for the courses as part of the four-semester Global Studies language requirement only if a placement exam is taken upon arrival at Washington University in the given language and the department/program determines that the student may progress to the next highest level of language instruction.

Students who take a language course at another

institution (whether in the United States or abroad): A student may receive credit for the course as part of the four-semester Global Studies language requirement only if (1) the credit is transferred back as Washington University credit; and (2) the student takes a placement exam in the given language upon their return to Washington University and the department/program determines that the student may progress to the next highest level of language instruction.

Minors

The Global Studies program does not offer a minor.

Courses

Visit online course listings to view semester offerings for L97 GS (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L97&crslvl=1:4>).

L97 GS 1020 Introduction to Modern European History

The history of Europe since 1500 is a remarkable array of contradictions: freedom and fascism; democracy and imperialism; industrialization and Romanticism; international capitalism and fervent nationalism; social change and scientific racism. What produced these developments in European social, economic, and political spheres and how did these different currents diverge and converge? How did European developments affect global actors and vice versa? What are the consequences for our own time of these contradictory aspects of Europe's modernization? Class assignments include textbook and primary source reading (c. 75 pages/week), discussion participation, 2 short analytical papers, 3 in-class exams, and a final cumulative take-home essay. This course satisfies the Introductory Survey requirement for the history major and minor. **DISCUSSION SECTION IS REQUIRED.**

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM, IS EN: H

L97 GS 103B First-Year Seminar: International Public Affairs

We live in a complex, fast-paced world. Technological advances and economic interdependence bring us closer together, even as globalization creates new challenges that cannot be solved by one country alone. In this class we will examine the forces that affect competition and cooperation in a globalized world. Students will engage with influential social science literature on these topics, participate in classroom discussion, and take part in classroom activities, such as debates and policy-making simulations, to build a deeper understanding of these theories. In addition, students will work on semester-long policy projects to build practical skills in problem solving, team building, and communication. Course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC BU: BA, IS EN: S

L97 GS 111 First-Year Seminar: The Vietnam Wars

US-centric historical narratives of the Vietnam War obscure the perspectives and lived experiences of the Vietnamese. The social, ethnic, and religious diversity, and the political and gender-related complexities of the Vietnamese are typically neglected. By focusing almost exclusively on Vietnam, US narratives of the war also tend to gloss over the wider regional dimensions of the conflict. In the interest of redressing this imbalance, this course examines the outlook, values, agency, and experiences of northern and southern Vietnamese, as well as rural and urban Cambodians and Laotians. Drawing on a wide range of primary and secondary sources it provides a macro and micro level historical analysis of Vietnam, Cambodia, and Laos from the premodern era until the present. In so doing, it explores the early sociocultural foundations of ancient Southeast Asian civilizations, the impact of Chinese and French colonialism, and Japanese occupation, the rise of Indochinese nationalist and communist revolutionary movements, the process of decolonization, the impact of US military intervention, the rise and fall of the Khmer Rouge, postwar political and economic developments, and the memories and multiple meanings of the Vietnam Wars for Southeast Asians. Course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: LCD, SSC BU: BA, IS EN: S

L97 GS 116 Ampersand: Geographies of Globalization and Development

This course provides an overview to the geographies of globalization and development in the world today. We begin by engaging with a variety of theoretical perspectives, definitions, and debates in order to establish the foundations upon which students can conceptualize and understand existing patterns of inequality, social injustice and environmental conflicts. In order to further highlight the different ways in which development and globalization interventions are experienced and contested, in the second half of the course we will focus our considerations towards specific contemporary issues at the forefront of globalization and development debates, including migration and refugees, urbanization, sustainable development, tourism, and alter-globalization social movements. This course is restricted to first-year students in the Global Citizenship Program. Same as L61 FYP 116

Credit 3 units. A&S: AMP A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: HUM, IS EN: S

L97 GS 124 First-Year Sem: Bridging London: An interdisciplinary Exploration of One of the World's Great Cities

This course provides a multi-disciplinary perspective on the past, present, and future of London. Topics include the historic roots of the city, the development of the British urban system, transportation and the shaping of the city; social, political, and economic dynamics of the Greater London Area; urban growth, decline, and revitalization; suburbanization; and the challenges facing the city in the 21st Century.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: IS

L97 GS 127 Migration in the Global World: Stories

The expression "Stories of Migration" has a variety of meanings. A "story" is a narrative that has a beginning, middle, and an end; an account of imaginary or real people and events told for entertainment, a report of an item of news in a newspaper,

magazine, or broadcast; or an account of past events in someone's life or in the development of something. A story also can be a way to make sense of the world, and, as we will discuss throughout the semester, a tool to change the world. This course is based on the premise that in order to shape the future of migration in the global context, it is imperative to understand how stories of migration emerge, are told, passed on, shared, translated, disseminated, collected, challenged, and retold. For these purposes we will examine a wide range of stories of migration from the past decade. We will experiment with both low-tech and high-tech media in order to come up with different ways to showcase stories of migration, and to assess the actual repercussions that these stories of migration have. While we will address migration in the global context, we will focus on three regions: the US Mexican border, the Mediterranean, and St. Louis. We will study immigrant communities in these different locations and analyze a variety of narrative forms and structures in order to discern the impact that stories of migration have both locally and globally. Course materials include novels, memoirs, journalism, essays, short stories, graphic novels, radio programs, film, and performance pieces.

Credit 3 units. A&S IQ: HUM EN: H

L97 GS 135 First-Year Seminar: Chinatown: Migration, Identity, and Space

"Chinatown," as a cultural symbol and a spatial entity, links various topics and studies in this course. Our survey starts with a historical and geographical glimpse of five Chinatowns in the U.S. through the real-life stories of their residents. This is followed by an in-depth study of Chinese restaurants and food in a global diasporic context using texts, images, and films that reveal how Chinese cuisine is inherited in and adapted to each local culture and society. The seminar culminates in discussions of Chinese migration and settlement, of representations of identity, and of cultural and spatial constructions in particular historical and social contexts. It will also examine the impact of the Covid-19 pandemic on Chinatowns in the US and elsewhere. The assignments include surveys of Chinese businesses and a debate on whether or not Olive Blvd constitutes a Chinatown in St. Louis.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L97 GS 140 East Asia in the World

This course covers the geopolitical history of twentieth-century East Asia, from its colonial constellation through its transformation into cold war nation-states. We then use an interdisciplinary approach to investigate contemporary problems accompanying the emergence of regional economies and institutions. We grapple with the question of when people in East Asia -- China, Taiwan, the Koreas, and Japan -- act as a members of a transnational region and when they act in ideological, national, or local terms. We evaluate different disciplinary approaches in order to understand the combination of knowledge and skills necessary for drawing meaningful research conclusions. In reading articles produced by a range of scholars and institutions, the course is also an introduction to the politics of the production of knowledge about East Asia. We then apply our knowledge to a real-world conflict and give team presentations on our proposed solutions. This course is restricted to first-year students in the Global Citizenship Program.

Credit 3 units. A&S: FYS A&S IQ: HUM EN: H

L97 GS 144 FYS: Collecting Art/Excluding People: The Contradictions of Chinese Art in U.S. Museums

Tomb raiders, curators, archaeologists, politicians, dealers, and collectors all contributed to the arrival of Chinese art in the United States since the late nineteenth century. But at the same time as Chinese objects arrived in great quantities, Chinese people were actively excluded from the U.S. In this course we consider the contradiction between U.S. enthusiasm for collecting Chinese art and negative U.S. responses to Chinese immigrants, from the 1882 Chinese Exclusion Act to contemporary anti-Asian racism. Through the lens of museums, private collections, and public exhibitions, we study what the movement of Chinese art into the United States says about changes in U.S.-China relations from the nineteenth century through today. No prerequisite: enrollment limited to first-year students.

Same as L01 Art-Arch 144

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: AH, HUM BU: BA, HUM EN: H

L97 GS 1500 Silver, Slaves, and the State: Globalization in the 18th Century

In this course, students will look at how silver, and also porcelain, tobacco and salt, shaped the early modern world. The course will look at how merchants and adventurers, as well as pilgrims, pirates, migrants, and captives, encountered very different facets of that world, and tried to make sense of it. Students will also study how these attempts at exchange, how that process of "making sense," transformed how men and women of the 18th century, around the globe, saw their territories and their fellow humans. This is a world history class. Same as L22 History 1500

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L97 GS 1503 Workshop for the Global Citizenship Program

This yearlong workshop, which is restricted to and required of participants in the Global Citizenship Program (GCP), is a companion to the core GCP fall course. During the first semester, students will analyze their own identities and biases as a basis for learning about other identities, cultures, and worldviews. We will then explore the topics of solidarity, charity, agency, and empowerment in order to better understand how we can contribute to ethical and lasting change as global citizens. This work will prepare students for their second-semester community-based learning project in which they partner with a local organization to develop a project together. Contingent on COVID, second semester will also include a Spring Break travel portion.

Same as L61 FYP 1503

Credit 1 unit. A&S: AMP

L97 GS 1504 Workshop for the Global Citizenship Program

This workshop, which is restricted to and required of participants in the Global Citizenship Program, is a continuation of the Fall L61 FYP 1503 workshop. Using the skills we developed first semester, we will explore tangible ways to practice global citizenship and foster solidarity in the "real world" outside the classroom. Students will partner with a local organization to develop a collaborative community-based learning project. An optional trip during Spring Break will provide further opportunities for hands-on learning and interaction with organizations and people involved in the themes of the course.

Same as L61 FYP 1504

Credit 1 unit. A&S: AMP

L97 GS 155 First-Year Seminar: Mapping the World: Introduction to Human Geography

What is human geography and why is it important? This course addresses these questions by introducing students to the fundamentals of the discipline of human geography. A geographic perspective emphasizes the spatial aspects of a variety of human and natural phenomena. This course first provides a broad understanding of the major concepts of human geography, including place, space, scale and landscape. It then utilizes these concepts to explore the distribution, diffusion and interaction of social and cultural processes across local, regional, national and global scales. Topics include language, religion, migration, population, natural resources, economic development, agriculture, and urbanization. In addition to providing a general understanding of geographic concepts, this course seeks to engender a greater appreciation of the importance of geographic perspectives in an increasingly interconnected and globalized world. No prerequisites. NOT AVAILABLE TO STUDENTS WHO ARE ENROLLED IN OR WHO HAVE TAKEN L61 116. Course is for first-year, non-transfer students only.

L97 GS 160 World Politics and the Global Economy

Globalization, the accelerating rate of interaction between people of different countries, creates a qualitative shift in the relationship between nations, communities and economies. Conflict and war is one form of international interaction. Movement of capital, goods, services, production, information, disease, environmental degradation, and people across national boundaries are other forms of international interactions. This course introduces major approaches, questions, and controversies in the study of global political-economic relations. In a small group seminar we will examine the building blocks of world politics, the sources of international conflict and cooperation, and the globalization of material and social relations. This course is restricted to first-year students in the Global Citizenship Program.

L97 GS 164 Introduction to World History: The Second World War in World History

This course introduction to World History uses World War II as a lens to examine the methodologies, approaches and sources historians employ to understand and analyze historical periods. The class will explore the global connections and interactions which characterize World History. The emphasis of this course will be on digging into topics traditionally neglected: the impact of the war on race, gender, family and children; daily life; and daily ethical decision making.

L97 GS 1640 Health and Disease in World History

Health and disease are universal human experiences, yet vary profoundly across time and place. Extending from ancient times to the present, this course surveys that variety from a global perspective. We will explore medical traditions from around the world, then examine how these responded to major epidemic diseases such as the Black Death. We will study the globalization of disease and the emergence of scientific medicine after 1450, then turn to the interrelated histories of health and

disease in the modern era. Throughout, we will attend carefully to how the biological aspects of health and disease have shaped world history, while at the same time exploring the powerful mediating role of social, cultural, economic, and political factors--from religious beliefs and dietary practices to inequality, poverty, empire, and war--in determining the myriad ways in which health and disease have been experienced and understood. Introductory course to the major and minor.

L97 GS 165D Latin America: Nation, Ethnicity and Social Conflict

This class is an interdisciplinary introduction to the academic study of modern and contemporary Latin America. The course focuses on main issues in Latin American politics, history and culture, both in the continent at large and in the specific regions and sub-regions within it. The class will particularly explore topics such as nation creation, national identity, modes of citizenry, the role of race, ethnicity, gender and class in the region's historical development, as well as social and political conflicts, which have defined the region over the centuries.

This course is suggested before taking any other upper-level courses on Latin America or going abroad to other countries, and required for all Latin American Studies majors and minors. Through the course, students gain basic bibliographic knowledge and experience with research tools for a comparative study of Latin American politics society and culture. Prereq. None.

L97 GS 207 Crossing Borders: An Introduction to Institutions and Concepts in Global Studies

This course provides an overview of the emergence of international governing institutions, the ideologies that shaped them, and concepts helpful for understanding them. Identifying the systems that have emerged to govern modern human societies at the national and international levels provides the means to consider how human beings are categorized within those systems, as citizens, subjects, asylum seekers, refugees, and the stateless. We engage a few classic works -- including "The Communist Manifesto," "Imagined Communities," and "Orientalism" -- and consider how they have transformed knowledge. The goal is for students to gain an empirical grasp of world institutions and a critical vocabulary that will provide the means for an informed engagement with international issues across different world regions and academic approaches.

L97 GS 208 Introduction to Jewish Civilization: History and Identity

The anthropologist Clifford Geertz once famously invoked Max Weber in writing that "man is an animal suspended in webs of significance he himself has spun. I take culture to be those webs." The main goal of this course--designed as an introduction to Jewish history, culture, and society--will be to investigate the "webs of significance" produced by Jewish societies and individuals, in a select number of historical periods, both as responses to historical circumstances and as expressions of Jewish identity. Over the course of the semester we will focus

on the following historical settings: 7th century BCE Judah and the Babylonian exile; pre-Islamic Palestine and Babylonia (the period of the Mishnah and the Talmud); Europe in the period of the Crusades; Islamic and Christian Spain; Europe in the 18th and 19th centuries; North America in the 20th century; and the modern State of Israel. For each period we will investigate the social and political conditions of Jewish life; identify the major texts that Jews possessed, studied, and produced; determine the non-Jewish influences on their attitudes and aspirations; and the explore the efforts that Jews made to define what it meant to be part of a Jewish collective.

L97 GS 2242 Ampersand: Comparative Refugee Resettlement and Integration

This Course will continue our investigation of the Dynamics of Migration in the MENA and African countries primarily and re-orient the discussions towards a/the much-overlooked cause of migration: Colonialism. To achieve genuine refugee/ Migrant oriented reform policies, the Global North needs to reconcile with its colonial past. Towards this end, we will highlight how the history of Migration is deeply entangled with colonialism. Our readings-based discussions will focus on analyzing how colonial logics continue to shape the dynamics of migration

as well as fuel the growing Xenophobia and Anti-migration rhetoric in the Global North towards intercontinental human mobility. To understand the enduring legacies of colonialism on the contemporary politics of migration, our discussions will argue the premise that colonial histories should be central to migration studies today for there to be real reform in refugee, asylum, and migrant policies. We will explore a wide range of inspiring and challenging perspectives on migration and learn what postcolonial and decolonial scholarships can offer us studying international migration today. We will address these areas through our weekly readings of Migration Studies and Colonialism as a primary source; we will also survey a selection of articles as a secondary source. To supplement the readings, we will watch short documentaries addressing the topic as well as hear from activists, journalists, and specialists in the field. Course is for first-year, non-transfer students only.

L97 GS 229 Modern European History: Migrations, Nation States, Identities

Politicians in several European countries recently declared the failure of multiculturalism, emphasizing immigration as the cause of social and political conflict. These statements deny that the European continent as a whole has been shaped by various forms of migration, ranging from Teutonic and Slavic settlement migration in the first ten centuries A.D., and rural-to-urban migration and religious expulsions in the Middle Ages, to recent guest worker programs and immigration from former colonies. Encounters between different cultures, religions, and forms of social organization are a staple of European societies' development. The course will begin with a brief overview of significant population movements since the Early Modern Era and then focus on important mass movements since the French Revolution. Course units study the nexus between migration and modernization, people's movement and the nation-state, empire and citizenship, and economic and social development. The class also poses the questions: Why are some migrations remembered and others not? Why do we know what we know about migration and migrant experiences? How do notions of 'otherness' and 'diversity' come to be central points of contention within current discourses in Europe? How do race, class, and

gender interact in shaping the experience and perception of immigrants? Primary sources, autobiographical narratives, scholarly analyses and a range of visual material including films and maps are the basis for class lectures and individual and group work assignments, helping students to develop critical thinking and effective oral and written communication skills. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L97 GS 244 Introduction to European Studies

This course provides an introduction to the study of contemporary Europe through an historical examination of the moments of crisis, and their political and cultural aftermath, that shaped modern Europe and continue to define it today. These crises will include: the revolutions of 1848, the advent of 19th-century nationalisms, the Great War, the Spanish Civil War, the rise and defeat of state fascism, the Cold War, the formation of the EEC and Union, May 1968, and the return of right-wing politics. After the study of these traditions, the final portion of the semester will consider contemporary Europe since 1991, considering such subjects as Green politics, internal migration and immigration, and the culture of the European Union. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L97 GS 2700 Sophomore Seminar: U.S.-China Relations: Perceptions and Realities

The United States and China are the two most important global powers today, and the bilateral relationship is one of the most comprehensive, complex, consequential, and competitive major-power relations in the world. The course aims to examine the attitudes, ideas, and values that have shaped the relationship, from the era of colonial expansion in the 1800s to the rise of China as a major political and economic power in the 21st century. Drawing upon visual images, literature, films, policy statements, and other materials, the course will analyze the patterns of perceptions that have informed and shaped the understanding of realities. This course, which uses an interdisciplinary approach, will include discussions and debates from both American and Chinese perspectives. Same as L04 Chinese 270 Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L97 GS 280 Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film

This course is an examination of key turning points in Japan from the mid-19th century to the present. It focuses on the important role that bureaucracies, staffed by public servants, have played in shaping the political and social life on the archipelago and in the region. We will engage representations of political and social life in Japan by making use of its rich visual culture by viewing and discussing Japanese films. The assigned films, which will be screened in Japanese with English subtitles, will likely include "The Twilight Samurai," "To Live," and "Shin Godzilla," among others. These films provide representations of how people in Japan have responded to crises, including revolution, war, and natural disasters. Through written and visual materials, students will gain a better understanding of history in Japan, public service, and the utility of film for engaging the past. Film screenings are mandatory. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS

L97 GS 3005 Research Design in Global Studies

How does one develop a research project? From developing questions to laying the framework for the project, the goal of this course is for students to understand key conceptual foundations of research design. This course explores conceptualization, theory, research design, and strategies for framing questions and understanding the tools needed to build a project. This is neither a statistics course nor a qualitative methods course, although students are highly encouraged to take disciplinary-based methods courses. This course will help students navigate the path from academic curiosities to research design. Good research questions are important to academics, of course, but this course will help students develop skills that are useful in settings beyond the academy. This course has as its aim that, upon completion, students will have a better understanding of the skill set needed to answer the kinds of questions that are most interesting to them and to prepare them for future projects, whether these will be answered in a thesis or in a future professional career. Along the way, we will explore some basic techniques for collecting, interpreting, and analyzing data. We will pay attention to both the theoretical approaches to different types of research and focus on some practical techniques of data collection, such as identifying key informants, selecting respondents, developing field notes, conducting interviews, analyzing data, writing, and presenting findings. Credit 3 units. A&S IQ: SSC EN: S

L97 GS 3006 Global Health and Language

Long before COVID-19, scholars across the globe postulated that language in health care is one of the most significant, and yet underexplored, social determinants of health in underserved linguistic diverse communities. This new course attempts to harmonize work across the disciplines of Global Public Health and Applied Linguistics by analyzing studies that examine language acquisition and language use across contexts with populations that experience serious health disparities- immigrants, refugees, indigenous peoples, racial and ethnic minority groups- and the course offers corresponding implications for health equity. Broadly speaking, this course addresses global health literacy issues, in both spoken and written communications, and its relationship to public health. As part of the seminar, students will apply the theory and research they learn to help meet the local language health needs of a changing population of refugees and immigrants in St. Louis community. Credit 3 units. A&S IQ: LCD, SSC, SC Arch: SSC Art: SSC BU: BA, ETH, IS

L97 GS 301 Historical Methods: Transregional History

This is a small-group reading course in which students are introduced to the skills essential to the historian's craft. Emphasis will be on acquiring research skills, learning to read historical works critically, and learning to use primary and secondary sources to make a persuasive and original argument. See Course Listings for current topics. Required for history majors. Preference given to History majors; other interested students welcome. Same as L22 History 301T Credit 3 units. L97 GS 3024 International Institutions

This course surveys in an historically and theoretically informed fashion the role of various international institutions in international relations. It addresses the fundamental question of the contribution of international institutions to world order. The course first traces the historical evolution of international organizations before turning to international institutions since World War II. It then focuses on the following: the most important regional international organization, the European Union; the most important international organizations dealing with the issues of peace and security, the United Nations and NATO; and the major international economic institutions, the WTO, the IMF, and the World Bank. Prerequisite: L32 103B.

L97 GS 3030 Daoist Traditions

This course offers an introduction to the history, practices, and worldviews that define the Daoist traditions. Through both secondary scholarship and primary texts, we consider the history of Daoism in reference to the continuities and discontinuities of formative concepts, social norms, and religious practices. Our inquiry into this history centers on consideration of the social forces that have driven the development of Daoism from the 2nd century to the modern day. Special consideration is given to specific Daoist groups and their textual and practical traditions: the Celestial Masters (Tianshi), Great Clarity (Taiqing), Upper Clarity (Shangqing), Numinous Treasure (Lingbao), and Complete Perfection (Quanzhen). Throughout the semester we also reflect on certain topics and themes concerning Daoist traditions. These include constructions of identity and community, material culture, the construction of sacred space, and cultivation techniques.

L97 GS 3040 International Law and Politics

What is international law? Does it really constrain governments? If so, how? In this course, we will examine these questions through a mixture of political science and legal theories.

Students will become familiar with the major theories in both disciplines and be introduced to the basic tenets of public international law. Students will also develop basic skills in legal research by reading and briefing cases from international tribunals and through an international law moot court simulation. Enrollment priority given to Global Studies majors.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

L97 GS 3042 Making Sex and Gender: Understanding the History of the Body

This course provides an overview of the history of the body from antiquity to modern times using an interdisciplinary approach. By exploring selections from medical texts, literature, fashion, art, accounts of "new world" exploration, legal records, self-help books and contemporary media representations of human bodies, we will consider the changing historical perception of the body. The intersection of gender, race and class will factor significantly in our discussions of how the body has been construed historically and how it is currently being constructed in contemporary American culture. This course will also provide an introduction to feminist/gender methodologies that apply to understanding the history of the body. This course is not open to students who have taken L77 204. Prerequisite: Any -100 or -200 level Women, Gender, and Sexuality Studies course or permission of instructor.

Same as L77 WGSS 3041

L97 GS 3043 Survey of Brazilian Culture: Race, Nation and Society

This course will introduce students to Brazilian culture from the colonial period to the present through literature, art, music, film and other cultural forms. The course gives a historical overview of Brazilian culture and society, exploring major sociohistorical and artistic moments from the colonial, imperial, and republican periods, and their "legacies" or influences on Brazilian society. Students will learn about the Amerindian, European, and African influences of Brazilian culture through the study of representative texts and cultural practices. The course also illustrates Brazil's place within Latin America and the world. The course will seek to deconstruct and expand preconceived notions of Brazil, such as Lusotropicalism and racial democracy. Classes will combine lectures by the instructor, student presentations, collective debates and cooperative learning, and will entail the use of required bibliography and audiovisual materials. Prereq. None. Same as L45 LatAm 304

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: IS EN: H

L97 GS 3045 Hot Peace: U.S.-Russia Relations Since the Cold War

This course is an historical analysis of U.S.-Russia relations since the end of the Cold War. Focusing on "reset" diplomacy during the terms of five American and three Russian presidents since 1990, it reveals a familiar historical pattern that begins with high hopes, dialogue, and optimism only to be followed by vast disappointment, standoffs, and pessimism. Despite this dynamic, the course shows how and why the two countries

have been able to cooperate at times to make substantial headway on critical issues such as arms control, nonproliferation of WMD, NATO expansion, counterterrorism, and economic and energy development, whereas at other times they have run afoul of major obstacles such as further NATO expansion, missile defense, and democracy and human rights in Russia. The course also examines how many political events created substantial challenges to U.S.-Russia relations, including the Balkan Wars; U.S. wars in Iraq and Afghanistan; Russia's wars in Chechnya, Georgia and Ukraine/Crimea; the "Color Revolutions"; the Arab Spring and subsequent civil wars in Iraq, Syria, Yemen and Libya; the fight against ISIS and other militant Islamists; the threats posed by Iran and North Korea; the rise of China; espionage crises; hybrid wars; cyberattacks; and disinformation campaigns. Two vital questions frame the analysis: (1) Why has it been so difficult for these two great powers to develop a mutually beneficial relationship? (2) What would be required to move beyond the limited partnership to something more productive and sustaining? The course concludes by evaluating "reset" diplomacy and the ongoing attempts to move U.S.-Russia relations beyond a Hot Peace. Same as L22 History 3045

L97 GS 3055 Contemporary Chinese Culture and Society

This course provides an introduction to emerging trends in Chinese culture and society. We will explore processes of change and continuity in the People's Republic, examining the complexity of social issues and the dynamics of cultural unity and diversity. While we will focus on the post-Mao reform era (1978 to the present), we will consider how contemporary developments draw upon the legacies of the Maoist revolution as well as the pre-socialist past. The course provides an overview of anthropological approaches to the study of contemporary China, introducing students to key concepts, theories, and frameworks integral to the analysis of Chinese culture and society. Readings, lectures, and discussions will highlight not only macro-level processes of social change and continuity but also the everyday experiences of individuals involved in these processes. We will pay particular attention to issues of family life, institutional culture, migration, religion, ethnicity, gender, consumption, and globalization.

L97 GS 3057 Topics on Africa

Nearly fifty percent of Africa's population now lives in urban areas. By 2050 this number is expected to triple to 1.23 billion or what will then be sixty percent of the continent's total population. This urban growth is happening alongside rapid economic expansion, technological innovations, and-in some cities-

political insurrection. Many of these developments are taking place in peripheral urban areas that lack formal planning, basic infrastructure, and security. Yet, as many theorists point out, the very lack of cohesive planning and stable infrastructure in urban Africa has produced flexible spaces where novel forms of dwelling, work, and leisure are possible. Many residents, often by necessity, rearrange their built environments to make the city function beyond the limits of its original design. In the process, urban dwellers produce new built spaces, aesthetics, and economic practices, calling into question assumptions about what a city is and how it works. What are the implications of Africa's urban revolution for both the people who inhabit these cities and the world at large? How will Africa's urban future shape what some theorists are calling "the African century?" What can contemporary cities across the continent tell us about the future of urban life everywhere? In this seminar, we will explore these questions by surveying a variety of case studies and topics from across the African continent. The purpose in focusing on Africa in general is not to homogenize an incredibly diverse continent, but to make connections across a variety of different contexts in order to explore conceptual debates and assemble a theoretical tool-kit that is useful for grappling with themes that are simultaneously abstract and concrete. For AFAS majors, this course counts as Area Requirement 4.

Same as L90 AFAS 305C

L97 GS 305M Survey of Mexican Cultures

This course provides an interdisciplinary introduction to the study of Mexico, with a particular focus on the 20th and the 21st century. The class will cover the main historical and cultural processes of Mexico in this period: The Mexican Revolution; the consolidation of a one-party political system; the construction of Mexican national identity and the arrival of neoliberalism. The course also focuses on the main aspects of Mexico's relationship to the United States: the Free Trade Agreement, the history of Mexican migration and the Drug War. From this framework, the course touches upon questions of race (particularly the politics of racial mixture), modernization, construction of social identities and the unique nature of governance in Mexico, due to the single-party regime. It also touches on Mexico's specificities and particularities due to the uniqueness of situation as the southern neighbor of the United States. PreReq: None.

L97 GS 307 The Writing of the Indian Subcontinent

The Indian Sub-continent has in recent years yielded a number of writers, expatriate or otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed to be an introductory survey of such writing, drawing on select Sub-continental writers. Covering both fiction and non-fiction by several authors including R. K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatje and Romesh Gunsekera, we will discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles.

L97 GS 3074 Hinduism & the Hindu Right

We are witnessing a global rise in rightwing politics, and India is no exception. In May 2019, Narendra Modi and his "Hindu Nationalist" party were elected to power for a second term. Observers in the United States and Europe may be stunned by what seems to be a new development, but observers in India have been following the rise of the Hindu Right since the early 1990s. In its wake, the Hindu Right has brought violence against minorities; curbs on free speech; and moves toward second-class citizenship for Indian Muslims. This course will track the history of the Hindu Right in India from its 19th-century roots to the present. The struggle to come to grips with the Hindu Right is of immediate political relevance. It also raises big questions about the history of religion and the politics of secularism.

Same as L22 History 3074

L97 GS 3098 African Art in Context: Patronage, Globalisms and Inventiveness

This course offers an introduction to principal visual arts from Africa, pre-historic to contemporary. It explores traditions-based and contemporary arts made by African artists from across the continent in conjunction with their various contexts of creation, use, understanding, and social history. Theoretical perspectives on the collection, appropriation, and exhibition of African arts in Europe and North America will be examined. Coursework will be complemented by visits as a group or independent assignments at the Saint Louis Museum, the Pulitzer Arts Foundation, and possibly a local private collection.

L97 GS 311 Buddhist Traditions

This course examines the historical development of Buddhism from its origins in South Asia in the 6th to 5th century BCE, through the transmission of the teachings and practices to East Asia, Southeast Asia, and Tibet, to contemporary transformations of the tradition in the modern West. In the first third of the course, we focus on the biographical and ritual expressions of the historical Buddha's life story, the foundational teachings attributed to the Buddha, and the formation and development of the Buddhist community. In the second third, we examine the rise of the Mahayana, the development of the Mahayana pantheon and rituals, and the spread of Mahayana in East Asia. In the final third, we explore the Theravada tradition in Sri Lanka and Thailand, then Tantric Buddhism in India, Tibet, and East Asia. We close the course with an overview of Buddhism in the modern West.

L97 GS 3120 South Asian Religious Traditions

In this course we will learn the basic vocabulary (conceptual, ritual, visual) needed to become conversant with the various religious traditions that are important to personal, social, and political life on the Indian subcontinent and beyond. We will first encounter each tradition through narrative, with the support of visual media. We will then explore how contemporary adherents make these traditions meaningful for themselves -- in their everyday lives, in their struggles for social change, and in their political statements and contestations. Students will also become familiar with the analytical categories and methodologies that make up the basic toolkit of the religion scholar. Prior knowledge of India or Pakistan is not required. First year students are welcome to enroll in this course.

L97 GS 3130 Topics in English and American Literature

Called the "Age of Revolution," the Romantic Age of British literature, 1770-1830, witnessed the birth of new lyric forms, the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, over simply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal "Jerusalem. It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we will consider the historical contexts, and the sometimes competing histories of ideas, that shaped the five major British Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron, and John Keats. We will follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts also to be assigned will include Mary Shelley's *Frankenstein* and Byron's *Don Juan*.

L97 GS 3133 Hello, Hello Brazil! Popular Culture, Media, and the Making of a Nation

Our image of Brazil has been deeply shaped by its cultural production, from Tom Jobim and Vinicius de Moraes' ever-popular "Girl from Ipanema" to the spectacular mega-production of Carnival in Rio and from the Afro-Brazilian martial art of capoeira to the international stardom of pop artists like Anitta. This course is an introduction to popular culture in contemporary

Brazil. Students will approach the theme through theoretical works that seek to define popular culture, understanding it as a hybrid form of expression that troubles the line between the "traditional" and the mass-produced. This course will examine how the circulation of sounds and images manifests and shapes Brazilian culture historically and in the present. We will also interrogate the different ways in which culture is produced and received, how it circulates in symbolic markets, and how it comes to be both consumed by diverse audiences and utilized in often unexpected ways. The course will cover topics such as the Tropicalia movement, Afro-centric Carnival blocos, street art such as graffiti, baile funk, forró, favela protest theater, telenovelas (soap operas), the popularization of samba, soccer and the World Cup, and Carnival. Students will use an interdisciplinary lens to approach popular culture in Brazil through music lyrics, TV and film, cultural performances, and graphic novels. These materials will form the basis of our class discussions and written assignments. The course will be taught in English. Prerequisite: L45 165D, L45 304, or another course on Latin America suggested.

L97 GS 3149 The Late Ottoman Middle East

This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to the First World War). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students will focus on how everyday people's lived experiences were affected by the increased monetarization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity.

L97 GS 314B International Politics

Globalization, the accelerating rate of interaction between people of different countries, creates a qualitative shift in the relationship between nation-states and national economies. Conflict and war is one form of international interaction. Movement of capital, goods, services, production, information, disease, environmental degradation, and people across national boundaries are other forms of international interactions. This course introduces major approaches, questions, and controversies in the study of global political-economic relations. In a small group seminar we will examine the building blocks of world politics, the sources of international conflict and cooperation, and the globalization of material and social relations.

Credit 3 units. BU: IS

L97 GS 3150 The Middle East in the 20th Century

This course surveys the history of the Middle East since World War I. Major analytical themes include: colonialism; Orientalism; the formation of the regional nation-state system; the formation and political mobilization of new social classes; changing gender relations; the development of new forms of appropriation of economic surplus (oil, urban industry) in the new global economy; the role of religion; the Middle East as an arena of the Cold War; conflict in Israel/Palestine; and new conceptions of identity associated with these developments (Arabism, local patriotism, Islamism).

L97 GS 3163 Early Modern China

This course examines political, socio-economic, and intellectual-cultural developments in Chinese society from the middle of the fourteenth century to 1800. This chronological focus largely corresponds to the last two imperial dynasties, the Ming (1368-1644) and Qing (1644-1911). Thematically, the course emphasizes such early modern indigenous developments as increasing commercialization, social mobility, and questioning of received cultural values.

L97 GS 3165 Chinese Diasporas

Five hundred years ago, the Chinese population was concentrated in core areas of China proper. Beginning in the 16th century, significant numbers of Chinese people moved to the frontiers of an expanding China and across its borders: to Japan and Southeast Asia, to the Americas and Australia, and to Africa and Europe. Although Chinese migration certainly existed beforehand, the period from the 16th century to the present day is marked by the emergence of sustained movement of non-state actors and the development of institutions -- ranging from native-place associations to tourist agents' websites -- that supported this vast circulation of people. Likewise, in many emigrant communities and host societies, Chinese diasporic families adapted to migration as a way of life. This course traces this worldwide circulation of Chinese people over these five centuries.

L97 GS 3168 Historical Landscape and National Identity in Modern China

This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campus, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens, and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual, political, and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local, and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory, and changing over time are an important concern of this course.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L97 GS 3169 A History of Modern China

This course explores the 19th- and 20th-century history of China. Its purpose is to provide students with a historical foundation to understand the momentous changes the country underwent during its traumatic transition from an empire to a nation-state. We start the course at the height of the empire's power in the late 18th century, when the Qing dynasty (1637-1912) conquered vast swathes of lands and people in Inner Asia. We then move on to the Qing's troubled relationship with Western capitalism and imperialism in the 19th century, which challenged the economic, social, and ideological structures of the imperial regime, culminating in the emergence of "China" as a nation-state. By situating China's national history within a global context, the course outlines in detail the transformations that took place in the 20th century, from the rise of communism and fascism to the Second World War to Maoism and cultural revolution. We end the semester with yet another major change that took place in the 1980s, when a revolutionary Maoist ideology was replaced with a technocratic regime, the legacies of which are still with us today.

L97 GS 316K Cyborgs in History: From Cybernetics to Artificial Intelligence

Who coined the word "cyborg," and why? How did cyborgs become so integral to our imaginative worlds and daily existence? In this course, we will contemplate the intersection between technologies and societies through the lens of cyborgs, a term that is shorthand for "cybernetic organisms." Defying the separation between humans and machines, cyborgs have been critical to sciences, humanities, pop culture, feminism, afrofuturism, and queer studies, among many other fields of inquiry. This course will take a deep dive into the worlds of scientists, scholars, artists, and ordinary people to discover the cultural meanings of cyborgs across time and space. Along the way, we will meet Norbert Wiener, who coined the term "cybernetics"; Donna Haraway, for whom the cyborgs were a revolutionary species; and John C. Lilly, who thought he could speak with dolphins. We will also travel to the USSR to read about a failed internet; to Chile, where cybernetics was a socialist project; and to Japan, to learn about gender and technology in non-Western spaces. By the end of the course, students will have a strong theoretical and historical grasp on the social worlds of cybernetic technologies.

L97 GS 316R Economic History of China: From the Silver Age to Reform and Opening, 1500-1990

This seminar explores the economic history of China from the 16th to the 20th century; this time period is the half a millennium during which China became part of the world economy and defined its development in major ways. Over the course of the semester, students will be exposed to the main debates in the field of Chinese economic history while acquiring a strong grasp of the nuts and bolts of how economy functioned and changed from the imperial to the modern times. Situating China within a comparative perspective, we will examine a multitude of debates ranging from the global silver age of the 16th century to the birth of capitalism, the socialist economy, and the PRC's recent involvement in Africa. We will in particular discuss the contradictions that arose out of China's integration into the world economy and the different kinds of economic regimes that existed and continue to exist within China. While this course assumes a basic familiarity with Asian history, students with backgrounds in other world histories and/or social science disciplines should feel comfortable with the course material.

L97 GS 318 Learning to Use GIS in Development, Area Studies and International Affairs

In this course you will be introduced to the concept of spatial thinking, which will help you determine why and when to use GIS to address a spatial problem relevant to Global Studies. The course will be organized into four sections based on 1) area studies, focused on demographic inquiry; 2) development, focused on site selection; 3) global cultural studies, focused on data creation and editing; and 4) international affairs, focused on digital elevation, density and basic spatial statistics. The class will explore some tools available for visualizing and analyzing data, but our main tool will be ArcGIS. The aim of this course is that you learn concepts and develop a skillset that you can apply to other projects.

Credit 3 units. A&S IQ: NSM, AN BU: IS, SCI

L97 GS 3181 Gender, Sexuality and Power in Brazil

This course examines the nexus of gender, sexuality, and power in Brazil through an interdisciplinary lens. We will aim to understand how varying understandings of gender and sexuality have impacted the development of Brazilian society in history and continue to shape contemporary society and politics. We will pay special attention to the ways in which the intersections of race, gender, sexuality, class, ethnicity, and so on impact people's lived experiences and how heteronormativity and homophobia shape current politics. We will take an intersectional feminist approach to analyze topics such as slavery in colonial Brazil, national aspirations to modernity, authoritarian repression and "moral panics," domestic labor, motherhood, sex tourism, Brazilian feminisms, and LGBTQ+ activism. Scholarly work from various fields of study -- with an emphasis on gender studies, history, and anthropology -- will be supplemented by documentaries, film, podcasts, and other media. This is a Writing Intensive and a Social Contrasts class in the IQ curriculum. Prerequisite: L45 165D, or two courses on Latin American or Women and Gender Studies, or permission of instructor.

L97 GS 3194 Environment and Empire

In this course we study British imperialism from the ground up. At bottom, the British empire was about extracting the wealth contained in the labour and the natural resources of the colonized. How did imperial efforts to maximize productivity and profits impact the ecological balance of forests, pastures, and farm lands, rivers and rainfall, animals and humans? We'll ask, with environmental historians of the U.S., how colonialism marked a watershed of radical ecological change. The course will cover examples from Asia to Africa, with a focus on the "jewel in the crown" of the British empire: the Indian subcontinent. We'll learn how the colonized contributed to the science of environmentalism, and how they forged a distinctive politics of environmentalism built upon local resistance and global vision, inspired by religious traditions and formative thinkers, not least Mahatma Gandhi.

L97 GS 320 British Cinema: A History

British cinema has gotten a bad rap. French film director François Truffaut once declared that cinema and Britain were incompatible terms since "the English countryside, the subdued way of life, the stolid routine-are anti-dramatic. . . [even] the weather itself is anti-cinematic." Yet British films proudly rank among some of the most acclaimed and beloved in film history: Monty Python and the Holy Grail, A Hard Day's Night, Lawrence

of Arabia, The Third Man, Zulu, The Ladykillers, A Night to Remember, Trainspotting, The King's Speech, and the James Bond franchise. Admittedly, British cinema has had its ups and downs, never quite knowing whether to position itself as a distinctive national cinema or as a rival to Hollywood. This uncertainty has fostered a rich diversity and complexity that this course will emphasize in a survey approach. We will give equal attention to the work of high-profile directors like Alfred Hitchcock and Michael Powell and to important "genres" in which the British seem to excel--like black comedy, imperialist adventure, "kitchen sink" drama, documentary, and the so-called "heritage" films that paved the way for television's Downton Abbey. Required Screenings.

L97 GS 3214 Contemporary Chinese Popular Culture

With the rise of the Chinese economy and global capitalism, popular culture has proliferated in mainland China in recent years. This course traces the development of Chinese popular and youth culture and society from the 1990s to the present. It also refers back to modern times and ancient Chinese Confucian philosophy for historical background information. The course covers various forms of Chinese popular culture, such as movies, music, television programs, Internet literature, religion, sports, and food. Students observe primary resources and read academic articles to engage in a multiperspective and multimedia view of present-day China in the age of globalization and East Asian regionalization.

L97 GS 321C Introduction to Colonial Latin America until 1825

This course surveys the history of Latin America from the pre-Columbian civilizations through the Iberian exploration and conquest of the Americas until the Wars of Independence (roughly 1400-1815). Stressing the experiences and cultural contributions of Americans, Europeans, and Africans, we consider the following topics through primary written documents, first-hand accounts, and excellent secondary scholarship, as well as through art, music, and architecture: Aztec, Maya, Inca, and Iberian civilizations; models of conquest in comparative perspective (Spanish, Portuguese, and Amerindian); environmental histories; consolidation of colonialism in labor, tributary, and judicial systems; race, ethnicity, slavery, caste, and class; religion and the Catholic Church and Inquisition; sugar and mining industries, trade, and global economies; urban and rural

life; the roles of women, gender, and sexuality in the colonies. Geographically, we will cover Mexico, the Andes, and to a lesser extent, Brazil, the Southwest, Cuba, and the Southern Cone. Pre-modern, Latin America.

L97 GS 3224 Topics in Italian: Basilisks to Botticelli: The Birth, Development and Politics of Museums in Italy

This course investigates the rise and cultural authority of museums in Italy from the Renaissance to the twentieth century. The course unfolds chronologically, beginning with the distant precursors and etymological roots of the museum in ancient Alexandria and Rome. We trace the origins of the museum in the art collection and patronage that surged during the Renaissance, including the sixteenth- and seventeenth-century Curiosity Cabinet with its fossils, mythical basilisks, gems and weapons and church displays of religious and classical art. We will study the establishment during the Enlightenment in Italy of the first public art museums epitomized by the Vatican Museums, the Uffizi Gallery and the Capitoline Museums. We will conclude by examining the impact on national and cultural identity of Fascist propaganda museums instituted under Mussolini's regime. No prerequisites.

L97 GS 324C Japan Since 1868

For some, the word Japan evokes Hello Kitty, animated films, cartoons, and sushi. For others, it makes them think of the Nanjing Atrocity, "comfort women," the Bataan Death March, and problematic textbooks. Still others will think of woodblock prints, tea ceremonies, and cherry blossoms or perhaps of Sony Walkmans and Toyota automobiles. At the same time, still others may have no image of Japan at all. Tracing the story of Japan's transformations - from a preindustrial peasant society managed by samurai-bureaucrats into an expansionist nation-state and then into its current paradoxical guise of a peaceful nation of culture led by conservative nationalists - provides the means for deepening our understandings of historical change in one region and grappling with the methods and aims of the discipline of history.

L97 GS 3250 French Film Culture

Called "the seventh art," film has a long tradition of serious popular appreciation and academic study in France. This course will offer an overview of French cinema, including the origins of film (Lumière brothers, Méliès), the inventive silent period (which created such avant-garde classics as *Un chien andalou*), the poetic realism of the 30s, the difficulties of the war years, the post-war emphasis on historical/nationalist themes in the "tradition of quality" films, the French New Wave's attempt to create a more "cinematic" style, the effects of the political turmoil of May '68 on film culture, the "art house" reception of French films in the US, and the broader appeal of recent hyper-visual ("cinéma du look") films, such as *La Femme Nikita* and *Amélie*. While the primary focus of the course will be on French cinema, we will also discuss the reciprocal influences between American and French film culture, both in terms of formal influences on filmmaking and theoretical approaches to film studies. French film terms will be introduced but no prior knowledge of the language is expected. REQUIRED SCREENING: [day, time].

L97 GS 3265 Samurai, Rebels, and Bandits: The Japanese Period Film

Tales of heroism, crime, revolt, and political intrigue. Bloody battles, betrayal, madness, and flashing swords. This is the world of jidaigeki eiga, the Japanese period film. In this course, we will analyze the complex (and often flamboyant) narrative, visual, and thematic structures of films about the age of the samurai. We will discuss jidaigeki representations of violence and masculinity, self-sacrifice and rebellion, and the invention of tradition as well as critical uses of history. In addition to the historical content of the films, we will study the historical contexts that shaped jidaigeki film production and discuss relevant transformations in Japanese cinema and society. Period films have been shaped by and exert strong influences on Japanese theater, oral storytelling, popular literature, comics, and international film culture, all of which are helpful for understanding the films. As we track changes in jidaigeki style and subject matter, the course will introduce theories for interpreting narrative structure, genre repetition and innovation, intertextuality, and representations of "the past." All readings will be in English. No knowledge of Japanese required. No prerequisites. Required Screenings Tuesdays @ 7 pm. Same as L53 Film 326

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L97 GS 3270 Humans and Others in Latin America: Natures, Cultures, Environments

What does it mean to inhabit the world with other beings? How are we to cultivate life -- both human and nonhuman -- in toxic environments? What does it mean to be human, and what would it mean to decenter humanity? This course addresses these questions through an exploration of "more-than-human" worlds in Latin America. Students will examine a variety of Latin American thought and practices through the interdisciplinary lens of environmental humanities and social sciences, unsettling presumed boundaries between human and nonhuman, real and imaginary, native and culture. We will engage primarily with ethnographic and other scholarly texts, which will be supplemented by short works of fiction, documentary film, podcasts, and works of art. In the first part of this course, students will be challenged to think about what defines the limits of the human and engage with the concept of "more-than-human" worlds. We will then examine the dark side of such worlds, namely, the ways in which extractive capitalism and environmental destruction demonstrate the permeability of bodies and comprise a kind of "slow violence" against the most vulnerable communities. In the next unit, students will consider Black and Indigenous ecological knowledge and these communities' struggles to care for their lifeways and the environments that sustain them. In our final section, we will explore multispecies entanglements through Indigenous cosmologies and the nexus of science, history, and art. Students will complete several assignments throughout the semester that have been designed to make them think imaginatively and critically about the course themes, including weekly reading responses and in-class discussion facilitation. The final assignment for this course is a creative independent research project where students will synthesize what they learned over the course of the semester and extend it through independent research. Prerequisite: L45 165D or permission of instructor. Same as L45 LatAm 327

L97 GS 3283 Introduction to Global Health

This course provides a general introduction to the field of public health. It examines the philosophy, history, organization, functions, activities, and results of public health research and practice. Case studies include infectious and chronic diseases, mental health, maternal and reproductive health, food safety and nutrition, environmental health, and global public health. Students are encouraged to look at health issues from a systemic and population level perspective, and to think critically about health systems and problems, especially health disparities and health care delivery to diverse populations. No background in anthropology or public health is required.

L97 GS 3291 History of German Cinema

This course explores the major developments of German cinema throughout the twentieth century. More specifically, this course will engage with issues relating to German film culture's negotiation of popular filmmaking and art cinema, of Hollywood conventions and European avant-garde sensibilities. Topics will include the political functions of German film during the Weimar, the Nazi, the postwar, and the postwall eras; the influence of American mass culture on German film; the role of German émigrés in the classical Hollywood studio system; and the place of German cinema in present-day Europe and in our contemporary age of globalization. Special attention will be given to the role of German cinema in building and questioning national identity, to the ways in which German feature films over the past hundred years have used or challenged mainstream conventions to recall the national past and envision alternative futures. Films by directors such as Murnau, Lang, Fassbinder, Herzog, Tykwer and many others. All readings and discussions in English. May not be taken for German major or minor credit. Required screenings.

L97 GS 3318 Topics in Holocaust Studies: Children in the Shadow of the Swastika

This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period-the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children-both those they considered "Aryan" and those they designated "enemies" of the German people, such as Jewish children - an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. OPEN TO FRESHMEN. STUDENTS MUST ENROLL IN BOTH MAIN SECTION AND A DISCUSSION SECTION.

L97 GS 3324 Russian Theater, Drama and Performance: From Swan Lake to Punk Prayer

This course explores performance in Russia from the wandering minstrels of medieval times to protest art of the present day. Genres include tragedy and comedy (Griboedov, Pushkin Gogol), drama (Ostrovsky, Turgenev, Chekhov), experimental theater (Stanislavsky, Evreinov, Meyerhold), ballet (Imperial, Soviet, Ballets Russes), opera (Tchaikovsky, Mussorgsky, Shostakovich), and performance art (Futurists, Pussy Riot, Pavlensky). We also consider performativity in rituals, public events, and everyday life. Our discussions center on the analysis of short and full-length plays, critical theory, specific productions and performers, and the role that performance has played in shaping Russian culture. All readings are in English translation. No prerequisites.

L97 GS 3350 Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History

This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be-or to become-modern. To answer this question, we look at two broad trends that took shape toward the end of the eighteenth century--the Enlightenment and the formation of the modern state--and we track changes and developments in Jewish life down to the close of the twentieth century with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time--from innovation to revolution, exclusion to integration, calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish "emancipation;" acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political and racial antisemitism; mass migration and the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

L97 GS 3354 The Ancient Maya: Archaeology and History

This course focuses on the ancient Maya civilization because there are many exciting new breakthroughs in the study of the Maya. The Olmec civilization and the civilization of Teotihuacan in the Valley of Mexico will be considered as they related to the rise and development of the Maya civilization. The ancient Maya were the only Pre-Columbian civilization to leave us a written record that we can use to understand their politics, religion, and history. This course is about Maya ancient history and Maya glyphic texts, combined with the images of Maya life from their many forms of art. The combination of glyphic texts, art, and archaeology now can provide a uniquely detailed reconstruction of ancient history in a New World civilization.

L97 GS 3357 China's Urban Experience: Shanghai and Beyond

The course studies the history of Chinese cities from the mid-19th century to the late 20th century. It situates the investigation of urban transformation in two contexts: the domestic context of modern China's reform and revolution and the global context of the international flow of people, products, capitals, and ideas. It chooses a local narrative approach and situates the investigation in one of China's largest, complex, and most dynamic and globalized cities - Shanghai. The experience of the city and its people reveals the creative and controversial

ways people redefined, reconfigured, and reshaped forces such as imperialism, nationalism, consumerism, authoritarianism, liberalism, communism, and capitalism. The course also seeks to go beyond the "Shanghai model" by comparing Shanghai with other Chinese cities. It presents a range of the urban experience in modern China.

L97 GS 3358 Vienna, Prague, Budapest: Politics, Culture, and Identity in Central Europe

The term Central Europe evokes the names of Freud and Mahler; Kafka and Kundera; Herzl, Lukács, and Konrád. In politics, it evokes images of revolution and counter-revolution, ethnic nationalism, fascism, and communism. Both culture and politics, in fact, were deeply embedded in the structures of empire (in our case, the Habsburg Monarchy)--structures which both balanced and exacerbated ethnic, religious, and social struggles--in modern state formation, and in the emergence of creative and dynamic urban centers, of which Vienna, Budapest, and Prague were the most visible. This course seeks to put all of these elements into play--empire, nation, urban space, religion, and ethnicity--in order to illustrate what it has meant to be modern, creative, European, nationalist, or cosmopolitan since the 19th century. It engages current debates on nationalism and national identity; the viability of empires as supra-national constructs; urbanism and modern culture; the place of Jews in the social and cultural fabric of Central Europe; migration; and authoritarian and violent responses to modernity.

L97 GS 3373 Law and Culture

We live in an age when social policy is increasingly displaced into the realm of law, when justice and equality are matters of courtroom debate rather than public discussion. Legal language has become a key resource in all kinds of struggles over livelihood and ways of life. In this course, we study the cultural dimensions of law and law's changing relationship to state power, the global economy, social movements, and everyday life. We approach law as a system of rules, obligations, and procedures, but also a cultural practice, moral regime, and disciplinary technique. How are relationships between legal, political, and economic realms structured and with what consequences? How does law provide tools for both social struggle and social control? What does anthropology contribute to research on these issues? In exploring these questions, we combine readings from classical legal anthropology with recent ethnographic work from around the globe.

L97 GS 3400 History of World Cinema

The course surveys the history of cinema as it developed in nations other than the United States. Beginning with the initially dominant film producing nations of Western Europe, this course will consider the development of various national cinemas in Europe, Asia, and third world countries. The course will seek to develop an understanding of each individual film both as an expression of a national culture as well as a possible response to international movements in other art forms. Throughout, the course will consider how various national cinemas sought ways of dealing with the pervasiveness of Hollywood films, developing their own distinctive styles, which could in turn influence American cinema itself. Priority given to majors. REQUIRED SCREENING: [day, time].

L97 GS 3402 German Literature and the Modern Era

Introduction in English to German writers from 1750 to the present. Discussion focuses on questions like the role of outsiders in society, the human psyche, technology, war, gender, the individual and mass culture, modern and postmodern sensibilities as they are posed in predominantly literary texts and in relation to the changing political and cultural faces of Germany over the past 250 years. Readings include works in translation by some of the most influential figures of the German tradition, such as Goethe, Nietzsche, Freud, Kafka, Thomas Mann, Brecht, and Christa Wolf. Open to first-year students, non-majors and majors. Admission to 400-level courses (except 402, 403D, 404, and 408D) is contingent on completion of this course or 341/341D. The main course is conducted in English, so this will only qualify for major or minor credit when taken in conjunction with one-hour discussion section in German (L21 340D).

Same as L21 German 340C

L97 GS 3404 The Creation of Capitalism

This course examines the emergence of commercial, financial, and labor practices prior to the Industrial Revolution at the end of the eighteenth century. At the same time that students look at how money was made, they will consider contemporary responses to these economic practices, from concerns about usury, market manipulations, and increasing luxury consumption to the promotion of commerce as essential to the prosperity and strength of the nation. The course begins by defining the basic institutions and structures of the medieval Mediterranean, such as banking and credit operations, trading partnerships, and the position of the merchant within Renaissance society. The focus then shifts to merchant capital in an era of centralization, as the Dutch develop their world trade hegemony and the increasingly centralized states support of monopoly companies and mercantilist policies. The course ends by looking at the expanding world of commerce in the era of integration, as European merchants entrench their control of production and trade throughout the globe through their increased social and political importance, the spread of the putting-out system, and the refinement of colonial policies.

L97 GS 3405 Writing New Horizons: Explorers, Envoys, and Other Encounters in Korean Travel Narratives

Whether physical or imagined, travel evokes notions of center, periphery, boundary and identity that shape the world we live in. This seminar course uses travelogues as well as literary, visual and cinematic representations of travels relating to Korea to explore how travel, art and imagination together help constitute one's sense of place. The course approaches travel from three angles. First, it examines writings by Korean authors on domestic, interregional, and international travels from premodern to modern times. Such works offer a frame for tracing conceptualizations of self and other through topics including diaspora, refugee crisis, migrant workers, political exile, prisoners of war, and others. The course also looks at stories of travel to Korea by non-Korean authors in order to see how "Korea" was perceived in various times by people outside the country. Lastly, through imagined journeys typically labelled as "sci-fi" or "fantasy", it examines notions of "truthful" and "realistic," and considers the function of the fantastic and storytelling and their relation to the world we live in. For their final project, students will create a map of real or fictional travels based on material covered in class. Using Digital Humanities tools such as StoryMaps (ArcGIS), Carto, or MyMaps (Google), they will also produce itineraries and narratives to accompany the maps, and present these results online. Necessary technical assistance will be provided by the GIS team at Olin Library throughout the semester. All reading in English. Prior knowledge of Korean language or culture may be helpful but is not required. Same as L81 EALC 340

L97 GS 3414 Transnational Cinema(s): Film Flows in a Changing World

Across a century of extreme nationalism, Cold War imperialism, and increased globalization, moving image culture remains deeply tied to the evolution of global economics, shifting notions of local identity, and human migration. Recent changes in the dynamic of international economics and cultural flow have led to new critical approaches that reassess international cinema as being constructed by relationships that transcend national borders. This course examines multiple ways in which cinema works "transnationally", focusing on recent theories of modernism, globalization, and borderless cultures. Exploring a range of contexts from American domination of the early international market, to the recent evolution of Chinese blockbuster action films, to contemporary Palestinian video art, this course looks at the way in which material developments, narrative and aesthetic conventions, and film professionals have circulated over the past century. We will also look at how new technologies of production, distribution, and exhibition challenge traditional notions of cultural borders. Required screenings

and in-class textual analysis will be used to complement industrial studies of how transnational flows have come to define contemporary audio-visual media practices. Required Screenings.

Same as L53 Film 341

L97 GS 3415 Early Chinese Art: From Human Sacrifice to the Silk Road

How does ancient and medieval Chinese art inspire contemporary artists? This course examines Chinese art, architecture, and material culture from the prehistoric period through the end of the medieval Tang dynasty to demonstrate how the past continues to affect contemporary Chinese art and the art of its future. Topics covered include Neolithic ceramics and jades, the early bronzecasting tradition, the Terracotta Army and its predecessors, early brush arts and Buddhist sites, and the varied exotica of the Silk Road. Each class teaches early and contemporary works side by side to demonstrate how artists today continue to look to the past as they create the art of the future. Prerequisite: One course in Art History at the 100 or 200 level or permission of instructor.

L97 GS 3416 German Thought and the Modern Era

In this introduction to the intellectual history of the German-speaking world from roughly 1750 to the present, we will read English translations of works by some of the most influential figures in the German tradition, including Kant, Hegel, Marx, Nietzsche, Freud, Adorno, Heidegger, Arendt, Habermas, and others. Our discussions will focus on topics such as secularization, what it means to be modern, the possibility of progress, the role of art and culture in social life, the critique of mass society, and the interpretation of the Nazi past. We will consider the arguments of these thinkers both on their own terms and against the backdrop of the historical contexts in which they were written. Open to first-year students, non-majors and majors. Admission to 400-level courses (except 402, 403D, 404, and 408D) is contingent on completion of this course or 340C/340D. The main course is conducted in English, so this will only qualify for major or minor credit when taken in conjunction with one-hour discussion section in German (L21 341D).

L97 GS 3417 Literary and Cultural Studies in Spanish

This course is an introduction to cultural and literary analysis within Iberian and Latin American cultures. The course will be covering a wide variety of materials that span different countries, historical periods, and various cultural and literary forms. The main objective of the course is to introduce students to key historical, geographical and political aspects of these cultures, while at the same time applying different approaches of cultural analysis. The course is structured upon key central concepts as they are particularly related to the cultures of the Iberian Peninsula and Latin America, such as Nation, Colonialism / Postcolonialism; Modernity and Postmodernity; Popular & Visual Media; Gender, Race, Migration and Social Class. The course combines the reading of literary texts, films and other

cultural forms, with the examination of introductory critical works related to the key concepts that will be explored throughout the semester. Prereq: Spanish 308E or concurrent enrollment in 303. Taught in Spanish.

L97 GS 3421 Iberian Literatures and Cultures

Which are the cultures that shape what Spain is today? This course explores the diversity of the Iberian Peninsula through its literatures and cultures. As part of both the Mediterranean and Western Europe, the Iberian Peninsula has been shaped through a dynamic of conflict and negotiation between various cultures, languages, and religions. Students will engage themes such as internal colonization, imperialism, multiculturalism, regional identities, nation formation, migration, media and popular culture, modernization, and gender and race relations, as they

relate to our understanding of the country today. Focuses may include but are not limited to the following: multiculturalism of the Middle Ages, the Muslim and Jewish presence in Spain, identity narratives and power relations, stage and performance traditions, as well as authors and artists like Cervantes, Galdós, García Lorca, Picasso, Almodóvar. Prereq: Spanish 308E or concurrent enrollment in 303. Taught in Spanish.

L97 GS 3424 The World Is Not Enough: Europe's Global Empires, 1400-1750

"Non sufficit orbis" (the world is not enough) became the motto for King Philip II of Spain, whose empire touched nearly every part of the globe. Europe's expansion to Africa, Asia, and the Americas was a transforming event for world history and for its willing and unwilling participants. This course examines the religious, political, and economic forces driving the overseas expansion of Europe, compares the experience of European sailors, soldiers, and merchants in different parts of the world, and analyzes the effect of empire on the colonizers, the colonized, and the balance of world power. Topics covered include: Portuguese and Spanish conquests in the East and West Indies, religious conversion and resistance, trade routes and rivalries, colonial practices and indigenous influence, the establishment of Atlantic slavery, and the rise of the Dutch and English empires.

L97 GS 3442 Chinese Painting, Then and Now

Tracing the unbroken history of Chinese painting from the 1st through 21st centuries, we explore the full evolution of its traditions and innovations through representative works, artists, genres, and critical issues. From its ancient origins to its current practice, we will cover topics such as classical landscapes by scholar painters, the effects of Western contact on modern painting, the contemporary iconography of power and dissent, and theoretical issues such as authenticity, gender, and global art history. Prerequisites: Intro to Asian Art (L01 111) or one course in East Asian Studies recommended.

L97 GS 3455 Cultural Encounters: China and Eurasia Since the Middle Ages

Eschewing traditional narratives of Chinese civilization, which imply a society closed to the outside world, this course follows current scholarship in situating Chinese history within a broader spatial context. In particular, this course explores cultural encounters between China and other subregions of the Eurasian continent to the north and west of China, from the Tang Dynasty (618-907) to the present. The course begins by analyzing the relationship between nomadic societies on the steppe (and, more generally, "non-state spaces") and settled agricultural societies such as China. We then turn to the influence of two religions imported from central Eurasia: Buddhism and Islam. A related theme is the relationship, in the early modern era, between trade, which tended to erode boundaries, and states, which sought to create boundaries. We will then trace the changing dynamics among commerce, religion, and nation-states in the 20th century. Finally, we return to the role of Buddhism and Islam in the contemporary relationship between China and the various peoples and states across its western frontier.

L97 GS 3465 Japanese Literature in Translation II

In this course we explore the tantalizing, thrilling, and sometimes macabre genre of mystery fiction in Japan. Emerging in the late 19th century, largely in response to the disruptions of industrialization, the mystery genre offered writers a way to make sense of a chaotic, unfamiliar world. The genre has also allowed a means of social critique and radical experimentation. We consider the works of Edogawa Rampo, Matsumoto Seicho, Miyabe Miyuki, Kirino Natsuo, and others. All readings in English. No prior knowledge of Japanese required.

L97 GS 3500 The 19th-Century Russian Novel (WI)

The 19th-century "realistic" novel elevated Russian literature to world literary significance. In this course we do close readings of three major Russian novels: Alexander Pushkin's *Eugene Onegin*, Fyodor Dostoevsky's *Crime and Punishment*, and Lev Tolstoy's *Anna Karenina*. While we consider a variety of formal and thematic concerns, special emphasis is placed on the social context and on questions of Russian cultural identity. Readings and discussions are supplemented by critical articles and film. This is a Writing Intensive course: workshops are required. All readings are in English translation. No prerequisites.

L97 GS 3502 Special Topics in Italian Literature and Culture

Traditionally represented as a land of emigrants and exiles from the south, 21st-century Italy has become the destination of many immigrants and a place of encounter of different cultures and races. In "Cara Italia" [Dear Italy], a rap hymn by the famous artist Ghali, Italy is both a dear and a contested space of belonging where many children of migrants feel both at home and out of place. Exploring the cultural and historical roots of this feeling, the course asks the following: What does it mean to culturally belong? Why are certain people denied the status of Italian citizens? What does it mean to be Black in Italy? How are interracial younger generations reshaping Italy and Italian-ness? This course is an introduction to cultural productions at the intersection of migration, race, gender, and citizenship in contemporary Italy. In the course, students will critically engage a variety of issues such as the relation between Italian colonialism and recent migration, border politics and civic mobilization, gender struggles and networking, xenophobia and racism, and social protests and activism. Although African migration and Italians of Afro-descent are at the core of the course, students will also explore representations by/of other migrant communities such as the Asian and the Albanian ones. The course will be conducted in English, and screenings will be in the original language with English subtitles.

L97 GS 3503 U.S.-China Relations from 1949 to the Present

The United States and China are the two most important global powers today, and the relationship between them is one of the most comprehensive, complex, and consequential major-power relations in the world. The tangled relationship is at times turbulent, and its future remains uncertain. This course studies the bilateral relationship from the Chinese Civil War to the rise of China as a major political and economic power in the 21st century. It invites students to explore the following questions: What have China and the U.S. done to confront or accommodate

each other in global politics? How has foreign policy in both countries balanced the often competing goals of state security, economic stability, domestic political order, and international influence? What are the impacts of a rising China on geopolitics in the Asia-Pacific region and on the U.S.'s global leadership in the 21st century? By drawing on scholarship in political and social history and area studies, this course helps students better understand both the historical context and current developments of U.S.-China relations.

L97 GS 3510 Muhammad: His Life and Legacy

This course intends to examine the life and representations of the Prophet Muhammad from the perspective of multiple spiritual sensibilities as articulated in various literary genres from medieval to modern periods. The course is divided roughly into two parts. One part deals with the history of Muhammad and the related historiographical questions. The second part deals with the representations of Muhammad in juristic, theological, Sufi, etc. literature. Because of the availability of primary sources in English translation, there will be a healthy dose of primary source reading and analysis throughout the semester. Those students with advanced Arabic (and Persian and Turkish) skills will be encouraged to engage sources in their original language.

L97 GS 3512 "Model Minority": The Asian American Experience

This course explores the Asian-American experience revolving around the concept of the "model minority." It investigates the historical origins of this idea and reconsiders this concept in sociopolitical discourses as well as in everyday Asian-American lives. Through multidisciplinary inquiries, this course provides a lens into the complexity and heterogeneity of Asian Americans. It situates Asian-American experiences in the broader American -- and, at times, transnational, ethnoracial and sociopolitical -- context. The texts and discussions cover a wide range of topics and pressing issues, such as identity, race, and (pan-)ethnicity; culture and religion; gender and sexuality; masculinity and femininity; and notions of invisibility and marginalization.

L97 GS 3520 Literature of Modern and Contemporary Korea

This undergraduate course surveys the major writers and works of 20th century Korean literature. During the 20th century Korea went through a radical process of modernization. From its colonization by Japan, to its suffering of a civil war within the cold war order, to its growth into a cultural and economic powerhouse, Korea's historical experience is at once unique and typical of that of a third-world nation. By immersing ourselves in the most distinctive literary voices from Korea, we examine how the Korean experience of modernization was filtered through its cultural production. The course pays special attention to the writers' construction of the self and the nation. How do social categories such as ethnicity, class, gender, and race figure in the varying images of the self? And how do these images relate to the literary vision of the nation? Along the way, students observe the prominent ideas, themes, and genres of Korean literature.

This class combines lecture with discussion, in which students are strongly encouraged to participate. All literary texts are in English translation and no previous knowledge of Korean is required.

L97 GS 3521 Introduction to Postcolonial Literature

At its zenith, the British Empire encompassed almost a quarter of the globe, allowing the diminutive island nation unprecedented economic, military, and political influence upon the rest of the world. This course will introduce some of the foundational responses to this dominance, both literary and theoretical, by the colonized and their descendants. We will examine important critiques of colonialism by theorists such as Frantz Fanon, Aimé Césaire, Edward Said, Homi Bhabha, and Gayatri Spivak, as well as literary works that reflect a postcolonial critique by authors such as V.S. Naipaul, George Lamming, Doris Lessing, and N'gugi wa Thiong'o. The course will interrogate how literature could be said to help consolidate Empire as well as ways in which it might function as rebellion against imperial power, with a view toward teasing out the problematics of race, gender, language, nationalism, and identity that postcolonial texts so urgently confront.

L97 GS 353 Global Energy and the American Dream

This lecture course explores the historical, cultural, and political relationship between America and global energy, focusing on oil, coal, natural gas, biofuels, and alternatives. Through case studies at home and abroad, we examine how cultural, environmental, economic, and geopolitical processes are entangled with changing patterns of energy-related resource extraction, production, distribution, and use. America's changing position as global consumer and dreamer is linked to increasingly violent contests over energy abroad while our fuel-dependent dreams of boundless (oil) power give way to uncertainties and new possibilities of nation, nature, and the future. Assuming that technology and markets alone will not save us, what might a culturally, politically, and socially-minded inquiry contribute to understanding the past and future of global energy and the American dream?

L97 GS 3530 Understanding Indian Literature Through Visual Media

This course focuses on the films and cultural traditions of South Asia in general and of India in particular. Students will be introduced to a variety of contemporary literary genres through visuals. Readings and class discussions will be followed by film screenings from the popular Hindi cinema (known as the Bollywood industry in India) to demonstrate how images and

visuals influence modern-day cultural traditions. Students will also get a chance to work on films based on literary texts by well-known writers of the subcontinent. These readings and films focus on various social, cultural, political and historical aspects of Indian society. Students will be encouraged to explore these issues in their written assignments as well as in their class discussions.

L97 GS 3544 The Anthropological and Sociological Study of Muslim Societies

This course introduces students to anthropological and sociological scholarship on Muslim societies. Attention will be given to the broad theoretical and methodological issues which orient such scholarship. These issues include the nature of Muslim religious and cultural traditions, the nature of modernization and rationalization in Muslim societies, and the nature of sociopolitical relations between "Islam" and the "West." The course explores the preceding issues through a series of ethnographic and historical case studies, with a special focus on Muslim communities in the Middle East, Southeast Asia, and Europe. Case studies address a range of specific topics, including religious knowledge and authority, capitalism and economic modernization, religion and politics, gender and sexuality, as well as migration and globalization. Please note: L75 554 is intended for graduate students only.

L97 GS 3548 Gender, Sexuality and Communism in 20th-Century Europe

This upper-division course examines the role of gender and sexuality for the establishment of communist societies in Europe in 20th century. We will explore to what extent societies built on the communist model succeeded with the achievement of gender equality and allowed for sexual relations liberated from religious or economic constraints. Class materials examine how state socialism shaped gender roles and women's and men's lives differently as well as how gays and lesbians struggled against social taboo and state repression. Students analyze the impact of modernization, industrialization, war and other conflicts on concepts of femininity and masculinity as well as on the regulation of sexuality and family relations in several Eastern European countries. We will place these dynamics within the context of broader political and cultural developments, ending with an analysis of the breakdown of socialism in the early 1990s and its impact on gender relations and the freedom of expression. The course provides students with a basic knowledge of the history of Eastern Europe and of left-wing movements active in the area, emphasizing the effects of communist ideas on women, gender equality, and non-normative sexual orientations.

L97 GS 3556 Exile in Global French & Francophone

Cultures: Senegal, Algeria, & the Caribbean

French is the fifth most spoken language in the world, with an estimated 300 million speakers in 106 countries and territories. It is the only language aside from English to be spoken on five continents, according to the OIF. In the wake of decolonization and the rapid spread of globalization, the French language has been adopted, adapted and transformed in various locales and with widespread cultural implications. This course will aim to explore French culture through the specific case studies of Senegal, Algeria, the Caribbean and Francophone exiles worldwide. We will explore the history, literature, poetry and film of these regions and, in doing so, gain a more nuanced and complex understanding of global French cultures. In this course, we will study a range of works that will provide a window onto the issues of French cultural and national identity in the modern world. We will delve into the role of race, ethnicity, belonging and identity in global French and Francophone societies. Students will gain an understanding of French (post)colonial history and current French politics and culture through novels, poetry and film. Knowledge of French is not required for this class.

L97 GS 356 Andean History: Culture and Politics

Since pre-Columbian times, the central Andean mountain system, combining highlands, coastal and jungle areas, has been the locus of multiethnic polities. Within this highly variegated geographical and cultural-historical space, emerged the Inca Empire, the Viceroyalty of Peru - Spain's core South American colony, and the central Andean republics of Ecuador, Peru, and Bolivia. Taking a chronological and thematic

approach, this course will examine pre-Columbian Andean societies, Inca rule, Andean transformations under Spanish colonialism, post-independence nation-state formation, state-Indian relations, reform and revolutionary movements, and neoliberal policies and the rise of new social movements and ethnic politics. This course focuses primarily on the development of popular and elite political cultures, and the nature and complexity of local, regional, and national power relations.

Credit 3 units. A&S IQ: LCD, SSC BU: IS EN: S

L97 GS 3570 All Measures Short of War

This course focuses on the return of great power competition in the 21st century. In particular, it examines the security challenges facing the United States in the form of strategic competition from revisionist states (Russia and China) and hostile threats from rogue regimes (Iran and North Korea). Through a consideration of the strategic, military, political, economic, and intelligence dynamics germane to foreign policy and national security, it will examine the hypothesis that the United States is not likely to go to hot war with any of these four nations but instead resort to what President Roosevelt in another context and time famously called "all measures short of war" -- in other words, engaging one another through new technologies such as cyber, artificial intelligence, robotics, big data, hypersonics, biotechnology, and other means that have come to demarcate a hybrid battlefield in an age of hostile competition. As such, the course will assess the recent past, current state, and likely future of American power in the new global security environment.

L97 GS 3575 U.S. Foreign Policy: Theory and Practice

In this course, we will focus on the procedures and institutions that shape U.S. foreign policy decisions. This is neither a course on international relations theory nor a history of U.S. foreign policy. Rather, this course examines the domestic politics surrounding U.S. foreign policy decisions. How do public opinion, electoral politics, and interest groups shape foreign policy? Which branch controls foreign policy -- the president, Congress, the courts? Or is it ultimately the foreign affairs bureaucracy that pulls the strings? We will examine these topics through reading and writing assignments, class discussions, and simulations to promote deeper understanding and to build practical skills.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L97 GS 3594 The Wheels of Commerce: From the Industrial Revolution to Global Capitalism

This course introduces the methods, issues, and debates that shape our understanding of economic change and development from the Industrial Revolution to the post-industrial age. Engaging economic theorists from Marx to Smith, to Weber and Wallerstein, this course problematizes the notion of rational economic actors and interrogates notions of free trade in an attempt to understand the impact of capitalism on the world. We start the course with a discussion of the "exceptionalism" of Great Britain as the first industrial nation and reconsider the impact of new trade, production, property and monetary/financial regimes that resulted in the so-called "Great Divergence" between China and the West. We then turn to the "late industrializers" of China, Japan, and Mexico in order to investigate the varieties of development, specifically focusing on monetary integration, legal integration and the

global impact of the great depression. Continuing into the Bretton Woods Conference and the post-war international monetary systems, we bring the course to a close with the advent of the "post-industrial age." This course is designed both for students specializing in economic history and students in all disciplines interested in historical approaches to political/economic development.

L97 GS 3602 Borders, Checkpoints, and the Frontiers of Literature

Borders are some of the most strange, dangerous, and changeable places in the world. They help define not only where we are, but also who we are. This course will read literature from and about border regions around the world: the Mexican-American frontera, the Indian and Pakistani Partition line, the German Iron Curtain, the African colonial borders, and the Israeli-Palestinian divisions. Even if we live far from any international boundary, the notion of the border shapes our thinking about the world. Literature is a place where borders are vividly imagined, marked, and debated in ways that both affect preexisting frontiers and help draw new ones on the ground. We will read all texts in English.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L97 GS 361 Culture and Environment

An introduction to the ecology of human culture, especially how "traditional" cultural ecosystems are organized and how they change with population density. Topics include foragers, extensive and intensive farming, industrial agriculture, the ecology of conflict, and problems in sustainability.

L97 GS 364 Anarchism: History, Theory, and Praxis

This course analyzes the origins, historical trajectories, and influence of anarchism from its classical period (1860s - 1930s) until the present. It examines the major personalities, complex ideas, vexing controversies, and diverse movements associated with anarcho-collectivism, anarcho-communism, individualist anarchism, anarcho-syndicalism, anarchist feminism, green anarchism, lifestyle anarchism, and poststructuralist anarchism. In doing so, it explores traditional anarchist concerns with state power, authority, social inequality, capitalism, nationalism, imperialism, and militarism. It also analyzes anarchism's conception of individual and collective liberation, mutual aid, workers' organization, internationalism, direct democracy, education, women's emancipation, sexual freedom, and social ecology. Special attention will be given to past and contemporary globalizing processes and their relation to the dissemination and reception of anarchism in the global South.

L97 GS 365 Theatre Culture Studies III: Melodrama to Modernism

The third in the department's three-course history sequence, TCS III surveys the dramatic literature and cultural history of the modern theater. Beginning with Romanticism's self-conscious break with the past, we'll study the rise of bourgeois melodrama with its intensely emotional rendering of character and spectacular effects. We'll consider how those effects were made possible by advances in industrial stage technology which reproduced the everyday world with unprecedented verisimilitude, and how playwrights responded to those technologies by calling for the theatre to become either a "total work of art"--plunging its spectators into a mythical realm--or a petri dish--analyzing the struggles of the modern individual within his or her modern milieu. Exploring a range of aesthetic modes--including Realism, Naturalism, Symbolism, Expressionism, the Epic Theatre, and the Theatre of the Absurd--we will read classic plays by modern playwrights to consider how the modern theatre helped its audiences understand as well as adapt to the rapidly changing conditions of the modern world.

L97 GS 3651 Topics in Modern Japanese Literature: Mirrors and Masks: Gender and Sexuality in Japanese Literature

This course will ask students to consider presentations of gender and sexuality in Japan throughout its literary history, beginning from its oldest and most foundational text, The Kojiki, and working up through modern literature, including pop culture such as manga and anime. Students will be asked to think critically across centuries by juxtaposing the ancient against the modern, and they will also be asked to critically consider terms like "homosexual," "male," "queer," and a plethora of others as they relate to cultures so temporally, spatially, and philosophically removed from contemporary English-speaking context. How do we conceive of gender across time? What about sexuality? What counts as "queer" in a society with differently structured norms and conceptions of gender and sexuality? What are the dangers of fetishizing the Other and who counts as the Other, especially when taken into consideration alongside popular Orientalist views of East Asia? This class and all readings will be conducted in English, but Japanese versions of applicable readings will also be available through the library.

Same as L05 Japan 365

Credit 3 units. A&S IQ: HUM, LCD BU: HUM

L97 GS 366 Women and Film

The aim of this course is primarily to familiarize students with the work of prominent women directors over the course of the twentieth century, from commercial blockbusters to the radical avant-garde. Approaching the films in chronological order, we will consider the specific historical and cultural context of each filmmaker's work. In addition we will be discussing the films in relation to specific gender and feminist issues such as the status of women's film genres, representations of men and women on screen and the gender politics of film production. Required screenings.

L97 GS 3660 Caste: Sexuality, Race and Globalization

Be it sati or enforced widowhood, arranged or love marriage, the rise of national leaders like Indira Gandhi and Kamala Harris, or the obsession with "fair" skin, caste shapes possibilities and perceptions for billions. In this class we combine a historical understanding of the social caste structure with the insights made by those who have worked to annihilate caste. We will re-visit history with the analytic tools provided by the concepts of compulsory endogamy, "surplus woman," and "brahmanical patriarchy," and we will build an understanding of the enduring yet invisible "sexual-caste" complex. As we will see, caste has always relied on sexual difference, its ever-mutating power enabled by the intersectionalities of race, gender and class. We'll learn how caste adapts to every twist in world history, increasingly taking root outside India and South Asia. We will delve into film and memoir, sources that document the incessant injustices of caste and how they have compounded under globalization. The class will research the exchange of concepts between anti-race and anti-caste activists: how caste has shaped the work of prominent anti-racist intellectuals and activists in the United States such as W.E.B. DuBois and Isabel Wilkerson and in turn, the agenda and creativity of groups such as the Dalit Panthers. Finally, the course will build a practical guide to engaging with and interrupting caste in the context of the contemporary global world today. Waitlists controlled by Department; priority given to WGSS majors. Enrollment cap 15. Same as L77 WGSS 366

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, IS

L97 GS 3662 Experts, Administrators, and Soldiers:

Governance and Development in Post-Colonial Africa

Between 1957 and 1975, one African territory after another made the transition from European colony to independent nation state. Widespread optimism that these "transfers of power" would bring a new era of prosperity and dignity dissipated quickly as the new nations struggled with political instability, military coups, social unrest, and persistent poverty. Consequently many western observers and development specialists are certain that they have become "failed states" requiring foreign assistance to develop properly. This course challenges these assumptions by tracing the origins of African governance and economic development from their imperial origins into the independence era. By exploring nation-building, economic planning, and public administration from the perspective of political elites, foreign experts, and ordinary people the class takes an intimate look at how colonies became nation states. These new perspectives offer students a historical grounding in international public administration and development by exploring how imperial ideas and concepts continue to influence contemporary social planning and development policy in both Africa and the wider world.

L97 GS 3670 Gurus, Saints, and Scientists: Religion in Modern South Asia

Many long-standing South Asian traditions have been subject to radical reinterpretation, and many new religious movements have arisen, as South Asians have grappled with how to accommodate their traditions of learning and practice to what they have perceived to be the conditions of modern life. In this course we consider some of the factors that have contributed to religious change in South Asia, including British colonialism, sedentarization and globalization, and new discourses of democracy and equality. We consider how new religious organizations were part and parcel with movements for social equality and political recognition; examine the intellectual contributions of major thinkers like Swami Vivekananda, Sayyid Ahmad Khan, and Mohandas Gandhi; and explore how Hindu, Islamic, and other South Asian traditions were recast in the molds of natural science, social science, and world religion.

L97 GS 3672 Medicine, Healing and Experimentation in the Contours of Black History

Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, this course examines the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus will be extended

towards the underpinnings of race and gender in the medical treatment allocated across time and space--the U.S., Caribbean, and Latin America--to give further insight into the roots of contemporary practice of medicine.

L97 GS 3680 The Cold War, 1945-1991

This course presents an assessment of the Cold War from the perspective of its major participants. Topics include: the origins of the Cold War in Europe and Asia; the Korean War; the Stalin regime; McCarthyism and the Red Scare; the nuclear arms race; the conflict over Berlin; Cold War film and literature; superpower rivalry in Guatemala, Cuba, Vietnam, Africa, and the Middle East; the rise and fall of détente; the Reagan years and the impact of Gorbachev; the East European Revolutions; and the end of the Cold War.

L97 GS 3682 The U.S. War in Iraq, 2003-2011

This course presents a historical assessment of the United States' eight year war in Iraq from its inception on March 20, 2003, to the withdrawal of all combat troops on December 15, 2011. Topics to be covered include: the Bush Administration's decision to make Iraq part of the "War on Terror" and the subsequent plan of attack; the combat operations; losing the victory; sectarian violence; torture; the insurgency; battling Al-Qaeda in Iraq; reassessment; the surge; the drawdown; and the end of the war. The course will conclude with an assessment of the war's effectiveness regarding the Global War on Terrorism and U.S. policy in the Middle East.

L97 GS 36CA Heroes and Saints in India: Religion, Myth, History

This course provides an introduction to the history of modern India and Pakistan through the voices of the Indian subcontinent's major thinkers. We will spend time in the company of saints, from the "great-souled" Mahatma Gandhi to the Sufi scholar Ashraf 'Ali Thanawi, and we will travel alongside the heroes of peasant politics, women's rights, and struggles for national and social freedom and equality. We will immerse ourselves in the rich narrative heritage of India -- as it has been

challenged, reworked, and harnessed for present and future needs -- from the 19th century through the present. Lecture and discussion format; prior knowledge of India or Pakistan not required.

L97 GS 374 Russian Literature at the Borders: Multiculturalism and Ethnic Conflict

In this course we explore Russian literary works (from the nineteenth century to the present day) that address issues of multiculturalism and ethnic conflict. The course is structured as a virtual tour of culturally significant places. Our readings take us to Ukraine/Belarus, the Caucasus, Siberia, and Central Asia. Some of the topics we discuss include national narratives and metaphor, authority and rebellion, migration and mobility, empire, orientalism, religious identities, gender roles, memory, and the poetics of place. Materials include poetry, drama, novels, short stories, critical articles, and oral history.

L97 GS 3740 Of Dishes, Taste, and Class: History of Food in the Middle East

This course will cover the history of food and drink in the Middle East to help us understand our complex relation with food and look at our lives from perspectives we intuitively feel or by implication know, but rarely critically and explicitly reflect on. Food plays a fundamental role in how humans organize themselves in societies, differentiate socially, culturally, and economically, establish values and norms for religious, cultural, and communal practices, and define identities of race, gender, and class. This course does not intend to spoil, so to speak, this undeniably one of the most pleasurable human needs and activities, but rather to make you aware of the social meaning of food and reflect on how food shapes who we are as individuals and societies. We will study the history of food and drink in the Middle East across the centuries until the present time, but be selective in choosing themes, geographic regions, and historical periods to focus on. Please consult the instructor if you have not taken any course in the humanities. Enrollment priority given to seniors and juniors.

L97 GS 3750 Topics in Russian Literature and Culture (WI)

The words "Russian Literature" might conjure up long, sprawling, "loose and baggy monsters." However, the short story is arguably the most significant genre in the Russian literary tradition. In this course we do close readings of some of the greatest Russian short stories, mostly from the 19th and 20th centuries. Authors might include Pushkin, Lermontov, Gogol, Dostoevsky, Tolstoy, Turgenev, Chekhov, Gippius, Teffi, Tsvetaeva, Platonov, Bunin, Nabokov, and others. Some of the questions we explore: Is a short story (rasskaz) just a shorter piece of fiction or does it aim to do something very different from a novel? How did the Russians develop-and maybe change-the genre? In what ways are these stories connected to the place and time in which they were written? We will read one or two short stories a week. This is a Writing Intensive course. No knowledge of Russian is required. All readings are in English translation.

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM BU: IS EN: H

L97 GS 376 International Economics

Explores consequences of economic integration from various perspectives in international trade: Ricardian, Heckscher-Ohlin, and the New International Trade Theories. Topics include patterns of trade, protectionism, international factor movements, balance of payments, exchange-rate determination, international policy coordination, the international capital market, multinational and international investments, and patterns of international business. Prerequisites: Econ 103B and Econ 104B, or permission of instructor.

Credit 3 units. A&S IQ: SSC BU: IS

L97 GS 3762 Cinema and Society

Since the earliest experimental films of the Lumière brothers and Georges Méliès, French cinema has often found itself at the forefront of "radical" artistic and social thought. We will explore the many ways in which French and Francophone films have grappled with tensions between the status quo and radical change, whether by asking audiences to rethink how stories can be told, by questioning the meaning of realism, fantasy and representation, or by insisting that society, class, race or gender will be fundamentally reassessed. We will consider how French and Francophone films have shaped our ideas and expectations about what "cinema" is today. Films will include a range of works from the first years of cinema to the present day, by cinematographers such as Dulac, Renoir, Carné, Rohmer, Cantet, the Dardenne brothers, Bunuel, Godard, Carrere, Resnais, Truffaut, Varda, Ayouch, and others. Taught in French. Prereq: In-Perspective or Fr 308.

L97 GS 3764 Reading Across the Disciplines: Introduction to the Theoretical Humanities

What does theory look like in an age like ours so sharply marked by interdisciplinarity and in which most humanities scholarship crosses disciplines-- for instance, combining literature or history with philosophy or critical race studies? In this way all (or almost all) humanities scholars are comparatists in practice if not always in name. The course is designed to introduce this complex and exciting state of affairs to CompLit and English majors, yet any students in a humanities program, or with an interest in the humanities, will fit right in. Our main text is *Futures of Comparative Literature*, ed. Heise (2017), which contains short essays on topics like Queer Reading; Human Rights; Fundamentalism; Untranslatability; Big Data; Environmental Humanities. We will supplement this material with relevant short texts from a variety of fields, including some that cross over into the social sciences.

L97 GS 3770 History of Slavery in the Middle East

This course examines slavery and its abolition in the Middle East and North Africa from 600 C.E. to the 20th Century. It addresses slavery as a discourse and a question of political economy.

We begin with an overview of slavery in late antiquity to contextualize the evolution of this practice after the rise of Islam in the region. We then examine how it was practiced, imagined, and studied under major empires, such as the Umayyads, the Abbasids, the Fatimids, the Mamluks, the Ottomans, and the Safavids. In addition to examining the Qur'anic discourse and early Islamic practices of slavery, to monitor change over time we address various forms of household, field, and military slavery as well as the remarkable phenomenon of "slave dynasties" following a chronological order. We discuss, through primary sources, theoretical, religious, and moral debates and positions on slavery, including religious scriptures, prophetic traditions, religious law, and a plethora of narratives from a range of genres. We highlight a distinct theme each week to focus on until we conclude our discussion with the abolition of slavery in the 19th and 20th centuries. Topics of discussion include various forms of male and female slavery, Qur'anic and prophetic discourse on slavery, legal and moral views on slavery,

slavery as represented in religious literature, political, military, and economic structures of slavery, issues of race and gender as well as slave writings to reflect on the experiences of slavery from within. The goal is to enable students to understand the histories of slavery in the Middle East and eventually compare it to that of other regions and cultures, such as European and Atlantic slavery. No second language required.

L97 GS 3775 Ancient Eurasia and the New Silk Roads

This course will explore the rise of civilization in the broad region of Eurasia, spanning from the eastern edges of Europe to the western edges of China. The focus of the course is the unique trajectory of civilization that is made evident in the region of Central Eurasia from roughly 6000 BC to the historical era (ca. AD 250). In addition to this ancient focus, the course aims to relate many of the most historically durable characteristics of the region to contemporary developments of the past two or three centuries. Fundamentally, this course asks us to reconceptualize the notion of "civilization" from the perspective of societies whose dominant forms of organization defied typical classifications such as "states" or "empires" and, instead, shaped a wholly different social order over the past 5000 years or more. This class provides a well-rounded experience of the geography, social organization, and social interconnections of one of the most essential and pivotal regions in world history and contemporary political discourse.

L97 GS 3784 The Modernist Project: Art in Europe and the United States, 1905-1980

This course surveys major tendencies in painting and sculpture, from Fauvism in France and Expressionism in Germany to the beginnings of Postmodernism in photo-based work in the United States. About two thirds of the course will treat European art, and about one third will treat American art. Photography, architecture, and work in other forms will be considered selectively when pertinent to the individual class topics. Within the lecture topics, emphasis is on avant-garde innovation; the tension in modernist art between idealism and critique; reaction by artists to current events; the relationship between art and linguistics, philosophy, literature, economics, and science; the role of geopolitics in art production; the intersections of art and society; the role of mass culture; issues of race and gender in

the production and reception of art; and the challenge to the concept of authorship and creativity posed by Postmodernism at the end of this period. Prerequisite: One course in Art History at the 100 or 200 level.

L97 GS 3810 Between Sand and Sea: History, Environment, and Politics in the Arabian Peninsula

Although it is today primarily associated with oil, the Arabian peninsula was for most of its history defined by water: its surrounding seas, its monsoon-driven winds, and its lack of water in its vast and forbidding interior deserts. As home to the major holy cities of Islam and a key source of global oil, the region has played an important role in the Western European and North American imagination. Despite being relatively sparsely populated, the peninsula hosts millions of believers each year on the annual Muslim pilgrimage, and it has been the site of major wars and military occupations by European, American, and other Middle Eastern countries for much of the 20th and 21st centuries. It has been an outpost of the Ottoman Empire, a center of British colonialism and (at Aden) an axis of its global empire, the location of Egypt's "Vietnam" (its long war in Yemen in the 1960s), the Gulf Wars I and II, and the recent wars in Yemen, to name just a few of the major conflicts. Often depicted as unchanging until caught up by the influx of massive oil wealth, this region is frequently characterized as a place of contradictions: home to some of the world's largest skyscrapers and also the most inhospitable and largest sand desert in the world, known as "the Empty Quarter"; the location of crucial American allies and the home of al-Qa'eda founder Usama Bin Laden. In this course, we will examine the development of the peninsula historically to understand these contradictory images. We will investigate changes in the following arenas: environment and society; colonial occupation; newly independent states; the demise and development of key economic sectors (pearling; shipping; agriculture; oil; finance; piracy); political regimes; resources such as water, oil, and date palms; the growth of oil extraction infrastructure and its effects on the political regimes and societies in the region; the emergence of new Gulf cities; Islamic law; women's rights; human rights debates; and religious and ethnic minorities.

L97 GS 3822 From McDonald's to K-pop: New Movements in East Asia

This course introduces contemporary East Asian cultures and societies from transregional and transnational perspectives through the lens of consumer and popular cultures. We employ McDonald's as the first case study to look into East Asian responses to Western cultural products and ideas. For K-pop, we examine its emergence and transregional receptions and impact across different regions in East Asia as well as in the U.S. Beginning with these two subjects, our investigation extends to other examples of transregional cultural phenomena such as J-pop, Hello Kitty, e-commerce, and western holidays in East Asia. While focusing on transnational cultural movements originating in or being adapted to the East Asian context, our discussions also reflect on key topics in the study of East Asian cultures such as "face," filial piety, and social networks.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L97 GS 3824 Film and Revolution in Latin America

This class is a Writing Intensive course focused on the study of the way in which four landmark Latin American revolutions (The Independence Wars, The Mexican Revolution, The Cuban Revolution and The Bolivarian Revolution) are represented in cinema. Each one of these revolutions will constitute a unit of study, and students will be expected to work with historical texts, films and works of film theory and criticism for each one of them. The course will engage in subjects such as the difference between fiction and nonfiction films when representing history; the politics that underlie specific representations; the way in which cinema questions and revises ideas developed by historians; and the uses of film in creating popular views of history in Latin America. Students will develop a research project comparing two revolutionary processes over the semester. Prereq: L45 165D (Latin America: Nation, Ethnicity and Social Conflict) for LAS majors. Otherwise none. Same as L45 LatAm 3824

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: IS EN: H

L97 GS 3838 Modern Art in Fin-de-Siecle Europe, 1880-1907

This course examines artistic production at the turn of the century in France, Belgium, England, and Scandinavia. Beginning with the reevaluation of impressionism and naturalism in France, we examine Neo-Impressionism (Seurat and Signac) and Symbolism (Moreau, Van Gogh, Gauguin, the Nabis, Rodin, and Munch), as well as later careers of Impressionists (Cassatt, Monet, Degas, and Renoir). We will consider cross-national currents of Symbolism in Belgium and Scandinavia; the Aesthetic Movement in Britain; the rise of expressionist painting in French art (particularly with the Fauvism of Matisse and Derain), and the juncture of modernist primitivism and abstraction in early Cubism (Picasso). Prerequisite: L01 113 or permission of instructor.

L97 GS 384 Migration and Modernity in Russia and the (Former) Soviet Union

This course introduces students to a broad history of 19th- and 20th-century Russia and the Soviet Union alongside problems of migration. In this course, students will be introduced to the historical, social, and political dimensions of migration within, to, and from the Russian Empire, the Soviet Union, and its successor states. We will look at the intersection of the movement of people with long-term economic, social and political transformations, but we will also pay attention to crucial events and phenomena of Soviet history that set large-scale migrations in motion. Course materials will, for instance, address mass movements related to modernization and internal colonization, analyze the role of revolutionary change and warfare for forced displacement, and study the implications of geopolitical changes in the aftermath of the breakdown of the USSR for human rights discourses. Alongside this historically grounded overview, the course explores concepts of citizenship, diaspora, nationality policy, gender-specific experiences of migration, and the ethics and political economy of migration politics, thereby highlighting how current trends in Russian society are indicative of broader discourses on difference and social transformation.

Credit 3 units. A&S IQ: HUM, LCD, SD EN: H

L97 GS 386 Empire in East Asia: Theory and History (WI)

An introduction to how historians and anthropologists incorporate theoretical insights into their work, this course first "reverse engineers" the main arguments in several insightful books and articles on empire in Asia, arguments which are informed by a range of theorists. Retaining our theoretical knowledge, we then focus on the more empirical aspects of the Japanese empire in Asia, including settler colonialism, the colonial economy, representations of colonialism and the long-term ramifications of empire. We conclude with a general assessment of the history of empire. In these ways, this course seeks to equip students with a knowledge of empire in East Asia in the late 19th and 20th centuries while simultaneously investigating the nature of that knowledge.

Credit 3 units. A&S IQ: HUM, LCD, WI BU: IS EN: H

L97 GS 3866 Interrogating "Crime and Punishment"

Whether read as psychological thriller, spiritual journey, or social polemic, Dostoevsky's 1866 novel CRIME AND PUNISHMENT has inspired diverse artistic responses around the world. From the nineteenth century to the present day, writers and filmmakers have revisited (and often subverted) questions that Dostoevsky's novel poses: What internal and external forces cause someone to "step over" into crime? What are the implications of a confession? To what extent can the legal system provide a just punishment? Are forgiveness and redemption possible, or even relevant? What role does grace--or luck--play in the entire process? This course begins with our close reading of Dostoevsky's novel and then moves on to short stories, novels, literary essays, and movies that engage in dialogue with the Russian predecessor. A central concern of our intertextual approach is to explore the interplay between specific socio-historical contexts and universal questions. All readings are in English. No prerequisites.

L97 GS 3875 Rejecting Reason: Dada and Surrealism in Europe and the United States

In this multimedia interdisciplinary course, we will consider the history, theory, and practice of Dada and Surrealism, from its Symbolist and Expressionist roots at the end of the 19th century and the beginning of the 20th century through its late expressions in the beat culture and pop art of the 1950s and 1960s. Dada's emergence in Zürich and New York in the midst of World War I set the tone for its stress on irrationality as an oppositional strategy. Surrealist research into the domain of the unconscious continued this extreme challenge to dominant culture but in a revolutionary spirit that proposed new possibilities for personal and collective liberation. The international character of the movements -- with substantial cross-transmission between Europe and the United States -- will be emphasized. Prerequisites: L01 113, Intro to Western Art; L01 215, Intro to Modern Art; or permission of instructor.

Same as L01 Art-Arch 3875

L97 GS 389 Furies and Die-Hards: Women in Rebellion and War

Furies and Die-Hards: Women in Rebellion and War juxtaposes contemporary social science perspectives on women and war with the history and testimonies of Irish women during the Irish revolutionary period (1898-1922), the Irish Civil War (1922-1923), and the Free State. Under English rule from the 12th-century Norman invasions to the establishment of the Irish Free State and the partition of Northern Ireland in 1922, Ireland presents a compelling historical laboratory to deliberate on the relationship between gender and political conflict. Intentionally transdisciplinary, the course draws from across disciplinary discourses and highlights perspectives across race, gender, class, ethnicity, religion, and sexuality. Topics include political organizing, nationalism, rebellion, radicalization, militarism, terrorism, pacifism, and peacebuilding. Rooted in Cynthia Enloe's enduring question of "Where are the women?" and drawing on sociologist Louise Ryan's landmark essay by the same name, we inquire how and why Irish nationalist women,

who were integral to building the revolutionary movement, became "Furies" and "Die-hards" in the eyes of their compatriots when the Free State was established (Bishop Doorley, 1925; President Cosgrave, 1923). Taking advantage of the plethora of archival resources now available through the Irish Decade of Centenaries program, the course incorporates the voices of Irish women through their diaries, military records, letters, interviews, speeches, newspapers, and memoirs.

Credit 3 units. A&S IQ: HUM, LCD, SC BU: BA, IS

L97 GS 3891 East Asia Since 1945: From Empire to Cold War

This course examines the historical forces behind the transformation of East Asia from war-torn territory under Japanese military and colonial control into distinct nations ordered by Cold War politics. We begin with the 1945 dismantling of the Japanese empire and continue with the emergence of the People's Republic of China, the Republic of China (Taiwan), the two Koreas, and Vietnam, all of which resulted from major conflicts in "post-war" Asia. We will conclude with a look at East Asia in the post-Cold War era.

Same as L22 History 3891

Credit 3 units. EN: H

L97 GS 3892 Modern Sculpture: Canova to Koons

This course will survey sculpture in Europe and the United States from about 1800 to the present, with an emphasis on the period from 1890 to 1980. A rapid traverse of Neoclassicism, Realism, and the rage for statuary during the later 19th century will take us to the work of Rodin and to a more systematic exploration of developments in the sculpture of the 20th century. Particular emphasis will also be placed upon the work of Brancusi, Picasso, Matisse, Duchamp, Giacometti, Oppenheim, David Smith, Serra, Morris, Judd, Hesse, and Bourgeois. An important theme running through the course as a whole -- from an age of nationalism and manufacturing to our own time of networks and information -- is the changing definition of sculpture itself within its social and political context. We will also explore various new artistic practices (e.g., video, performance, installations, body art) and interrogate their relationship to sculptural tradition and innovation. Prerequisite: L01 113, L01 215, or permission of instructor.

L97 GS 390 Topics in Migration and Identity

The course examines migration movements that are related to the Nazi genocide in Europe. Grounded in a study of the Nazi project to reshape the European geopolitical map, students explore how the mass movement of people is impacted by geopolitics, political violence, and economical considerations. Class materials address the relationship between identity formation and social exclusion, thus opening up a critical investigation of concepts of citizenship, human rights, and their institutional frameworks (states, international organizations etc.) more generally. Students will work with a variety of sources, including primary sources, scholarly analyses, podcasts, literary works, and film to study migrations related to the prehistory, policies, and aftermath of the Nazi regime. The class provides insights into issues of expulsion, refuge, forced migration, settlement projects, ethnic cleansing and others, but also demonstrates the global impact and long-term repercussions

of political and genocidal violence. Looking at the Nazi regime through the lens of migration shows that the Nazi genocide is embedded in a history of racism, colonialization, and mass violence.

Credit 3 units. A&S IQ: HUM BU: IS EN: H

L97 GS 3900 EALC Seminar

This course traces the expansion of Buddhism from its origins in the Indian subcontinent through China, Korea and Japan, identifying both continuities and local developments as seen in the encounter/clash with preexisting traditions. We will adopt a multidisciplinary approach and explore the history, literature, philosophy, and practice of Buddhism in East Asia. Primary readings (all in English) are drawn from a wide range of genres - canonical scriptures, tale literature, hagiographic narratives, and archeological materials. We will also rely extensively on the rich visual and material heritage of Buddhism, looking at common iconographical motifs, popular deities and their many forms, and the ritual function of Buddhist objects in their respective contexts. This course is primarily for sophomores and juniors with a major or minor in the Department of East Asian Languages & Cultures. Other students may enroll with permission. No prior coursework on Buddhism or East Asia is required.

L97 GS 3921 Imperialism and Sexuality: India, South Asia and the World (Writing-Intensive Seminar)

What is the connection between the appropriation of other people's resources and the obsession with sex? Why is 'race' essential to the sexual imperatives of imperialism? How has the nexus between 'race,' sexuality, and imperial entitlement reproduced itself despite the end of formal colonialism? By studying a variety of colonial documents, memoirs produced by colonized subjects, novels, films and scholarship on imperialism, we will seek to understand the history of imperialism's sexual desires, and its continuation in our world today.

L97 GS 3922 Secular and Religious: A Global History

Recent years have seen a dramatic rethinking of the past in nearly every corner of the world as scholars revisit fundamental questions about the importance of religion for individuals, societies and politics. Is religion as a personal orientation in decline? Is Europe becoming more secular? Is secularism a European invention? Many scholars now argue that "religion" is a European term that doesn't apply in Asian societies. This course brings together cutting-edge historical scholarship on Europe and Asia in pursuit of a truly global understanding. Countries covered will vary, but may include Britain, France, Turkey, China, Japan, India and Pakistan.

L97 GS 3941 Worldwide Translation: Language, Culture, Technology

This course considers the crucial role played by translation across the world today: from new technologies and digital media, to the global demands of professionals working in fields as diverse as literature, law, business, anthropology, and health care. We will begin our exploration of the concept of translation as a key mechanism of transmission between different languages by looking at works of literature, and film. Students will then examine how different cultures have historically required translation in their encounter with each other, studying how translation constitutes a necessary transcultural bridge both from a colonial and postcolonial point of view in different historical moments and parts of the world. The course also analyzes from practical and real-world perspectives whether concepts such as war, human rights, democracy or various illnesses have the same meaning in different societies by considering the diverse frames of reference used by linguists, lawyers, anthropologists, and medical doctors across the world. Finally, we will focus on translation from a technological perspective by examining various modes of transfer of information required for the functioning of digital tools such as Google Translate, Twitter, Duolingo, or various Iphone applications. Throughout the semester we will also examine a range of creative artworks, and various forms of digital technology and computing (AI, machine translation) related to the theory and practice of translation. Readings will include works by Jorge Luis Borges, Walter Benjamin, Gayatri Spivak, Kwame Anthony Appiah, Susan Basnett, Lawrence Venuti, Emily Apter, Gideon Lewis-Krauss, and Karen Emmerich among others. Prerequisite: None.

L97 GS 395C African Civilization: 1800 to the Present

Beginning with social and economic changes in 19th Century Africa, this course is an in-depth investigation of the intellectual and material culture of colonialism. It is also concerned with the survival of pre-colonial values and institutions, and examines the process of African resistance and adaptation to social change. The survey concludes with the consequences of decolonization and an exploration of the roots of the major problems facing modern Africa.

L97 GS 396 Comintern: The Communist International's Global Impact

The Communist International was the third of the global left-wing organizations aimed to develop communist organizations around the globe to aid the development of a proletarian revolution. Begun in 1919, hosted in Moscow, and closely tied to the developing USSR, the Comintern hosted seven World Congresses and thirteen Enlarged Plenums before Stalin dissolved it in 1943. This course examines the history of the nearly 25 years of the Comintern, paying particular attention to engagement with countries outside of the Soviet sphere. Class texts provide a general historical overview and interrogate central ideological arguments/debates across several countries and political systems. Course materials look at the Comintern's engagement with Fascism and the Spanish Civil War, ideas of Nationalism and Internationalism, and Self-Determination in the Colonial World. Class units are designed to highlight regional

similarities and differences, taking a global approach to the study of Communism. Students will gain an understanding of the global political complexities developing after World War I and leading to World War II. Reflecting on the critique of imperialist capitalism offered by the Comintern, students explore liberation struggles and ideological dictatorships around the globe.

L97 GS 400 Independent Study

Prerequisite: junior or senior standing. CONTACT MRS. TONI LOOMIS FOR APPROPRIATE SECTION NUMBER AND CORRESPONDING FACULTY. The student works directly with a Global Studies faculty member (mentor) to establish a research project and expectations for the outcome of the semester (readings; paper; etc.). Approvals of the mentor and the student's major advisor are required before enrolling in the course. Only one independent study can count as a 400 level elective towards the Global Studies major.

Credit variable, maximum 3 units.

L97 GS 4001 Urban Education in Multiracial Societies

This course offers students an analysis of the historical development and contemporary contexts of urban education in English-speaking, multiracial societies. It examines legal decisions, relevant policy decisions, and salient economic determinants that inform urban systems of education in Western societies including, but not limited to, the United States, Canada, Great Britain, and South Africa. The course draws on quantitative, qualitative, and comparative data as an empirical foundation to provide a basis for a cross-cultural understanding of the formalized and uniform system of public schooling characteristic of education in urban settings. Given the social and material exigencies that shape urban school systems in contemporary societies, special attention is given in this course to the roles of migration, immigration urbanization, criminal justice, industrialism, de-industrialism, and globalization in shaping educational outcomes for diverse students in the aforementioned settings. Prerequisite: Junior standing or permission of instructor.

L97 GS 4005 Directed Research in Global Studies

Students in Directed Research will be part of the Global Studies Undergraduate Research Assistant Team. Research assistants learn valuable skills and gain practical experience by working on Global Studies-affiliated faculty research projects. All Global Studies students are encouraged to apply, but the program will be especially beneficial for sophomores and juniors. Students meet for weekly workshops that introduce multidisciplinary research perspectives, skills, and resources. Students will be matched with a faculty research project and devote five hours of research work per week to the project. Students must complete a separate application and be approved by the instructor to enroll.

Credit 3 units.

L97 GS 4011 Popular Culture and Consumption in Modern China

This writing-intensive seminar explores transformations in popular culture and everyday life in Chinese society since 1949 through an analytical focus on political economy and material culture. Drawing upon ethnographic texts, films, and material artifacts, we will investigate how the forces of state control and global capitalism converge to shape consumer

desires and everyday habits in contemporary China. Case studies include eating habits, fashion standards, housing trends, entertainment, sports, and counterfeit goods. Prerequisite: previous course in China studies (anthropology, economics, history, literature, philosophy, or political science) required. Enrollment by instructor approval only.

L97 GS 402 The Meaning of National Security in the 21st Century

The 21st century has brought with it new challenges to national security. Standard assumptions about nations and the borders that separate them have been brought into question, and one of the results of this is that the very meaning of national security is undergoing change. Instead of threats to security coming from outside national boundaries, they now often exist within and across borders. This course focuses on contemporary ideas about these issues. It includes a brief overview of current discussions of national security, but it is primarily devoted to examining the conceptual resources we have for making sense of national security in a new world.

L97 GS 4021 Transnational Reproductive Health Issues: Meanings, Technologies, Practices

This course covers recent scholarship on gender and reproductive health, including such issues as reproduction and the disciplinary power of the state, contested reproductive relations within families and communities, and the implications of global flows of biotechnology, population, and information for reproductive strategies at the local level. We will also explore how transnational migration and globalization have shaped reproductive health, the diverse meanings associated with reproductive processes, and decisions concerning reproduction. Reproduction will serve as a focus to illuminate the cultural politics of gender, power, and sexuality.

L97 GS 4034 Culture, Illness and Healing in Asia

This course examines the place of health, illness, and healing in Asian societies. We will explore how people experience, narrate, and respond to illness and other forms of suffering - including political violence, extreme poverty, and health inequalities. In lectures and discussions we will discuss major changes that medicine and public health are undergoing and how those changes affect the training of practitioners, health care policy, clinical practice and ethics. The course will familiarize students with key concepts and approaches in medical anthropology by considering case studies from a number of social settings including China, India, Indonesia, Japan, Korea, Taiwan, Tibet, Thailand, Vietnam and Asian immigrants in the United States. We will also investigate the sociocultural dimensions of illness and the medicalization of social problems in Asia, examining how gender, ethnicity, socioeconomic status, disability and other forms of social difference affect medical knowledge and disease outcomes. This course is intended for anthropology majors, students considering careers in medicine and public health, and others interested in learning how anthropology can help us understand human suffering and formulate more effective interventions.

L97 GS 4035 Chinese Politics

China, one of the few remaining communist states in the world, has not only survived, but also become a global political actor of consequence with the fastest growing economy in the world. What explains China's authoritarian resilience? Why has the CCP thrived while other communist regimes have failed? How has the Chinese Communist Party managed to develop markets and yet keep itself in power? What challenges have the 1978 market reforms brought to the CCP regime? How has China been handling thorny issues such as corruption, pollution, instability in multiethnic border regions, Internet usage in the face of technological change, and COVID-19 pandemic? This course will explore these questions in three parts. It will prepare students with the political economic foundation to conduct research and/or analyze policies in contemporary China.

L97 GS 4036 Children of Immigrants: Identity and Acculturation

This seminar takes an interdisciplinary approach to children of immigrants as an analytical subject. The course texts are in sociology, anthropology, and cultural studies, and a significant number of our case studies focus on 1.5- and second-generation Asian Americans and Latinx. Identity and identity politics are main topics; in addition, the course will critically examine theories on acculturation and assimilation. Our discussions cover a wide range of topics from culture, ethnicity, and race, to bilingualism, education, family, school, ethnic community, and youth culture. Students are required to conduct an individual research project among a selected group of children of immigrants.

L97 GS 4050 Diaspora in Jewish and Islamic Experience

Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term "diaspora" -- from the ancient Greek, meaning "dispersion" or "scattering" -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and they continued to be central motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home in both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

L97 GS 4081 Disease, Madness, and Death Italian Style

Italian literary history teems with representations of illness, insanity, and death. From the ghastly 1348 plague that frames Boccaccio's Decameron to the midday madness of errant Renaissance knights, from 16th-century tales of poisoning and 19th-century Pirandellian madmen to the contemporary scourge of mafia killings, disease, madness and death are dominant facts of reality, points of view, symbols, and cultural characteristics of Italian poetry and prose. This course undertakes a pathology of these tropes in Italian literary history and seeks to understand their meaning for the changing Italian cultural identity across time and the Italian peninsula. We will read primary literary texts and view excerpts from films alongside articles focused on the cultural history of medicine, religion, and criminal justice. Taught in English. No Final.

L97 GS 4107 Latin America and the Rise of the Global South

The rise of the global south - and the reordering of global geopolitics, economics and cultural imaginaries - is characterized by progressive change and intense conflict. Economic growth coincides with the impacts of global warming, the assault on natural resources, the rise of new consumers and the entrenchment of deep inequalities. We also see the emergence of cultural and political formations that range from the horrific to the inspiring. Latin America is a central node of the new global south. Here history takes unpredictable turns in the face of declining U.S. hegemony, the economic growth of Brazil, legacies of militarism and political violence, a feverish attack on nature, resurgent economic nationalism, and defiant "anti-globalization" movements. Through close reading of contemporary ethnographies of Latin America we explore emergent cultural and political-economic processes in the region, we consider south-south articulations (theoretical, cultural, political-economic) between Latin America, China, Africa, and India, and we reflect on the changing role, meaning, and relationships of the United States in the region.

Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L97 GS 4113 Linguistics and Language Learning

This course, taught in English, is a foundation for students who will work with linguistically and culturally diverse people in the USA and around the world, whether this work is in the courtroom, hospital, classroom, office and more. The class will help prepare students for the diverse range of twenty-first century occupations that have language and linguistics at their center, including machine learning and translation studies. The class utilizes a survey format and covers both internal and external factors related to language acquisition and language use, such as language and the brain, language aptitude, age, gender, memory, prior knowledge, etc. Theoretical and research dimensions of both linguistics and foreign / second language learning are treated. Corresponding implications of the readings focus on action- on making decisions for language policies and debates around the world that are informed by linguistic and language knowledge. The course is required for the minor in applied linguistics, the PhD in Applied Linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors such as Global Studies and Educational Studies. Prereq: Ling 170 is recommended but not required.

Credit 3 units. A&S IQ: SSC BU: BA, ETH EN: S

L97 GS 4134 The AIDS Epidemic: Inequalities, Ethnography, and Ethics

In the year 2000, HIV became the world's leading infectious cause of adult death. In the next 10 years, AIDS killed more people than all wars of the 20th century combined. As the global epidemic rages on, our greatest enemy in combating HIV/AIDS is not knowledge or resources but rather global inequalities and the conceptual frameworks with which we understand health, human interaction, and sexuality. This course emphasizes the ethnographic approach for the cultural analysis of responses to HIV/AIDS. Students will explore the relationships among local communities, wider historical and economic processes, and theoretical approaches to disease, the body, ethnicity/race, gender, sexuality, risk, addiction, power, and culture. Other topics covered include the cultural construction of AIDS and risk, government responses to HIV/AIDS, origin and transmission debates, ethics and responsibilities, drug testing and marketing, the making of the AIDS industry and "risk" categories, prevention and education strategies, interactions between biomedicine and alternative healing systems, and medical advances and hopes.

L97 GS 4141 International Relations

Globalization, the accelerating rate of interaction between people of different countries, creates a qualitative shift in the relationship between nation-states and national economies. Conflict and war is one form of international interaction. Movement of capital, goods, services, production, information, disease, environmental degradation, and people across national boundaries are other forms of international interactions. This course introduces major approaches, questions, and controversies in the study of international relations. We will explore seminal literature at the core of modern international relations theory. We will examine the building blocks of world politics, the sources of international conflict and cooperation, and the globalization of material and social relations.

L97 GS 4150 The 19th Century French Novel: from Realism to Naturalism to Huysmans

In this seminar we will read some of the great realist novels of the nineteenth century, by the four masters of the genre: Balzac, Stendhal, Flaubert, Zola. We will also examine Huysmans's *A REBOURS*, which was written in reaction to the excesses of Realism. We will determine what characterizes the realist novel and how it has evolved from Balzac to Zola. We will consider its theoretical orientation, but we will also focus on the major themes it addresses: the organization of French society throughout the nineteenth century, Paris vs. the province, love, money, ambition, dreams, material success, decadence, etc. Prereq: Fr 325 and 326 or one of these courses and the equivalent WU transfer literature course from Toulouse or Paris. One-hour preceptorial required for undergraduates. 3 units.
Same as L34 French 415
Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L97 GS 4154 Decolonization to Globalization: How to End an Empire

The course examines questions of contemporary relevance by revisiting the history of European empire and decolonization in South Asia: Is the US an Empire? Have we deliberately or otherwise supported US Empire? Did the history of European

empire "train" some people to further American imperial interests over the twentieth century? Is the Empire over? Independence from European colonialism was a victory for some people, although for the majority, the experience of nation-building and the Cold War only sanctioned further inequities. A further setback arrived in the guise of US centered Globalization. The countries of Bangladesh, India, Pakistan, Nepal and Sri-Lanka have grappled differently with the many varieties of twentieth century transnational power. This course studies the histories of decolonization, nation-building, the Cold War and Globalization for those South Asian countries created since the 1940s. By considering the possibility that the US Empire is facing a radical collapse, the course delves into new and novel ways by which South Asians have interrogated, accepted, resisted and possibly overturned the multiple levels of power unleashed upon them since the formal end of European colonialism. Modern, South Asia. PREREQUISITE: Prior coursework in history or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: HUM, IS EN: H

L97 GS 4180 Sexuality and Gender in East Asian Religions

In this course we will explore the role of women in the religious traditions of China, Japan and Korea, with a focus on Buddhism, Daoism, Shamanism, Shinto and the so-called "New Religions." We will begin by considering the images of women (whether mythical or historical) in traditional religious scriptures and historical or literary texts. We will then focus on what we know of the actual experience and practice of various types of religious women - nuns and abbesses, shamans and mediums, hermits and recluses, and ordinary laywomen - both historically and in more recent times. Class materials will include literary and religious texts, historical and ethnological studies, biographies and memoirs, and occasional videos and films. Prerequisites: This class will be conducted as a seminar, with minimal lectures, substantial reading and writing, and lots of class discussion. For this reason, students who are not either upper-level undergraduates or graduate students, or who have little or no background in East Asian religion or culture, will need to obtain the instructor's permission before enrolling.

L97 GS 4191 The French Islands: From Code Noir to Conde

The French have been dreaming about the tropics ever since transatlantic trade became possible in the sixteenth century, and literature in French has reflected these dreams ever since. Closer to our own period, writers from the French Caribbean have written themselves into the French canon, winning prestigious literary prizes. This course will link these two phenomena by studying literature from and about the tropics from the 18th century to the present. In our readings, we will attempt to see the ways in which the literature from and about France's island possessions has contributed to the forming of cultural and political relations between France and the islands, but also among the islands and within the Americas. Almost all texts available in English for students not majoring in French; main seminar session taught in English with weekly undergraduate preceptorial in French. Prereq: Fr 325 and Fr 326. One-hour preceptorial for required for undergraduates.

Same as L34 French 4191

Credit 3 units. A&S IQ: HUM, LCD EN: H

L97 GS 4192 Tragedy and Farce in African Francophone Literature

In 1960, most of the French colonies in Africa gained independence in a largely peaceful transfer of power. Since then, this development has been viewed alternatively as the triumph of self-determination, and as a hollow act undermined by neo-colonial French ministries, multinational companies, and corrupt governments. Media today commonly adopt a highly pessimistic tone when speaking of these phenomena, but literature from West Africa provides alternative ways of looking at the region, which today includes over 140 million French speakers. Reading authors such as Kourouma, Kane, Tansi, Tchicaya, and Lopes, we will consider the ways that literature enters into dialogue with political discourses represented both as tragedy and as farce. The main seminar (section 01) is taught in English; undergraduates also register for a weekly discussion (section A) conducted in French. Prereq: for undergraduates, Fr 325, 326, Thinking-It-Through, or In-Depth; for graduates not in French, reading knowledge of the language.

L97 GS 4200 Nature, Technology, and Medicine in Korea

This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary-or what historians dub "early modern" and "modern." Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and fauna, colonial Koreans became biologists, nurses, and "Edisons," and in North and South Korea, new professionals created distinctive-and in some cases, globally-competitive-regimes of knowing, making, and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be "modern" in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to have taken Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Course also counts as a EALC capstone course. Prerequisite: junior level or above or permission of instructor.

L97 GS 4201 International Relations of Latin America

This course examines Latin American foreign relations in the world from the 1820s to the present with a primary emphasis on the period since 1945. Focusing on inter-state and transnational relations, it seeks to historically contextualize and analyze long term patterns and trends between Latin American states and between Latin America and the United States, Europe, and the global South. Given Latin America's shared experience with imperialism and more recently with neo-imperialism, special attention will be paid to the ways Latin America has sought to manage and/or resist foreign domination, especially U.S. hegemonic pretensions. To this end it will analyze patterns of inter-American conflict and cooperation. When, why, and under what conditions Latin America articulated an independent foreign policy, forged anti-imperialist blocs, embraced U.S. sponsored

diplomatic efforts and military alliances, and pursued Latin American unity and solidarity will be closely examined. To better understand the continuities, discontinuities, contradictions, and complexities of Latin American foreign policy, this course will also assess the influence of changing regional and national political cultures from both a theoretical and a historical perspective. In doing so, it explores how elite culture, the balance of domestic social forces, ideological and economic development, and shared cultural identities and meanings informed national political cultures and how these in turn shaped Latin American foreign policies.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L97 GS 4215 Anthropology of Food

The rising interest in food research crosscuts various academic disciplines. This seminar focuses on aspects of food of particular interest in anthropology. The first 2/3 of the course is reading intensive and discussion-intensive. Each student will write short review/response papers for major readings. For the final third, we will still be reading and discussing, but the reading load will be lighter (and we will have a field trip) as students devote more time to their research paper. The research paper will be a major effort on a topic discussed with and approved by the professor. In most cases it will have to deal with cultural and historical aspects of a food, set of foods, form of consumption or aspect of food production. Papers will be critiqued, assigned a provisional grade, revised and resubmitted.

L97 GS 422 Europe, Questions of Identity and Unity

Nation states and their cultures have been changed by globalization. Within this process, continentalisation has played an important role. The European Union is only half a century old, but continental unity has been discussed and demanded by European writers and thinkers for hundreds of years. We will read essays on Europe (its identity, its cultural diversity and its cultural roots, contemporary problems, and future goals) by writers like Coleridge, Madame de Staël, Novalis, Chateaubriand, Heine, Nerval, Hugo, Thomas Mann, Ernst Jünger, T.S. Eliot, Klaus Mann, de Madariaga, Kundera, Enzensberger, Frischmuth, and Drakulic; we will discuss studies re-inventing Europe by philosophers like the Abbé de Saint-Pierre, Kant, Hegel, Nietzsche, and Ortega y Gasset; we will deal with the mythological figure of Europa and her resurrections in the world of art; we will study the Nazarene painters of the early 19th century in Rome and will discuss portraits of Bonaparte by French painters of the time. ComplLit students will meet with the instructor for an additional two hours per month.

Credit 3 units. A&S IQ: HUM, LCD BU: BA EN: H

L97 GS 4232 Contemporary Issues in Latin America

How do the institutional designs of contemporary democratic governments help us understand the nature and quality of representation? We will concentrate on variations in the powers granted presidents by constitutions as well as the institutional determinants of whether executives are likely to find support for their policies in the legislature. In addition, we will explore how incentives established by electoral laws influence the priorities of members of congress. Given all these variations in democratic institutional design, can voters go to the polls with the confidence that politicians will implement the economic policies for which their parties have long stood or which they promised in their campaigns?

L97 GS 4245 Culture and Politics in the People's Republic of China: New Approaches

This course inquires into the political, ideological, and social frameworks that shaped the cultural production and consumption in the People's Republic of China (PRC). In the realm of literature, film, architecture, and material culture and everyday life, this course pays a close attention to the contestation and negotiation between policy makers, cultural producers, censors, and consumers. Understanding the specific contour of how this process unfolded in China allows us to trace the interplay between culture and politics in the formative years of revolutionary China (1949-1966), high socialism (1966-1978), the reform era (1978-1992), and post-socialist China (1992 to present). The course examines new scholarship in fields of social and cultural history, literary studies, and gender studies; and it explores the ways in which new empirical sources, theoretical frameworks, and research methods reinvestigate and challenge conventional knowledge of the PRC that have been shaped by the rise and fall of Cold War politics, the development of area studies in the U.S., and the evolving U.S.-China relations. Graduate students should be proficient in scholarly Chinese, as they are expected to read scholarly publications and primary materials in Chinese. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

Same as L04 Chinese 4242

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L97 GS 4246 State Failure, State Success and Development

Why do some nations develop while others languish? This course takes an interdisciplinary approach to examining the role governments play in development and economic outcomes. Knee-jerk ideologues from all parts of the political spectrum make competing arguments, most of which are overly simplistic and ignore good social science. Some argue that state involvement in the economy hinders economic activity and development, while others argue for greater state involvement. Such arguments are often poorly informed by systematic rigorous research. We will look at some of the competing arguments about governments in failed and successful states and compare those arguments to the empirical world, or data. In so doing we will recognize that how governments affect development and economic outcomes in society is neither straightforward nor consistent with any of the simplistic ideological screeds that often dominate public discourse.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L97 GS 4253 Researching Fertility, Mortality, and Migration

Students will undertake research projects centering on the most fundamental demographic processes -- fertility, mortality, and migration. The first section covers basic demographic methodology so that students understand how population data is generated and demographic statistics analyzed. Course readings will then include seminal theoretical insights by anthropologists on demographic processes. Meanwhile, students

will work toward the completion of a term paper in which they are expected to undertake some original research on a topic of their choice (e.g., new reproductive technologies; cross-cultural adoption; ethnicity and migration). Each assignment in this course will be a component of the final term paper. Prerequisite: L48-3612 (Population and Society) or permission of instructor. Same as L48 Anthro 4253
Credit 3 units. A&S IQ: LCD, SSC, WI Art: SSC EN: S

L97 GS 4264 Memory for the Future

The year-long Studiolo "Memory for the Future" (M4F) will create spaces and practices of humanities education, practical public history, and collaboration in the spirit of "multidirectional memory." This concept tries to address the interlinked histories and legacies of the Holocaust, slavery, apartheid, and colonialism and create opportunities for dialogue between communities impacted by and implicated in these forms of violence. Our principal aims are to explore, enrich, and sustain the global and local focus of "reparative memorial practices" in St. Louis. Focusing on commemorative efforts through public memorials, monuments and especially museums, M4F will engage survivors, activists, institutional leaders, and scholars (students and faculty) in the development of educational materials, artistic representations, exhibitions, and other approaches to bringing the past into the present. We strive to support the efforts of local and regional initiatives and venues to end racism, antisemitism, and homophobia and their related violence through innovative and inclusive memory work. Alongside classroom-based instruction focusing on discussing scholarship and acquiring practical, curatorial, and pedagogical skills, students will work with area institutions and initiatives to apply their study of multidirectional memory. This practicum is an integral part of the course and requires students to leave campus and regularly work with one of our partners (The Griot Museum of Black History, George B. Vashon Museum, St. Louis Kaplan Feldman Holocaust Museum, The Mildred Lane Kemper Art Museum, Reparative Justice Coalition of St. Louis, St. Louis Community Remembrance Project). Participants of the Studiolo are expected to attend regular weekly meetings and engage in self-directed and collaborative project work. We are also preparing study trips to regional sites of memory and education. The M4F Studiolo will convene at the Lewis Collaborative, a living-learning-commercial space at the west end of the Delmar Loop. All A&S graduate students and advanced undergraduates are invited to participate. Undergraduate enrollment by permission of the instructors. For History majors, this course fulfills the capstone requirement as an Advanced Seminar. As a year-long course, students are expected to enroll in both the fall and spring sections. For more information, please consult <https://www.m4f.community/>

L97 GS 4284 The New Sicilian School

The unification of Italy in the mid-19th century led to the creation of a new "Sicilian School," the first since that of the court poets associated with Frederick II in the 13th century. These new Sicilian writers have given us many narrative masterpieces, focusing on common concerns such as the island's identity over two millennia and the impact of Italian nationalism; the rise of bourgeois culture and the decline of indigenous patriarchal structures; the rule of law and the role of the Mafia; and the politics of language. Authors studied include Verga, Pirandello, Vittorini, Brancati, Tomasi di Lampedusa and Sciascia. Course taught in Italian or English.

L97 GS 4290 Equity, Merit and Social Change: Higher Education Policy in International Comparison

Colleges and universities have long been sites for state development and political expression. Over the past decade, we have seen major protests focused on university campuses that draw attention to legacies of exclusion and oppression, economic accessibility, and decolonializing curricula. With the rise of neoliberal economic policies, universities are increasingly engaged in global competition. At the same, debates about who should go to college, for what purpose, and the social benefit of higher education are very old ones. This course places policy around racial and ethnic diversity and economic mobility in international comparison through the development of sustained case studies. The first half of the course is dedicated to developing concepts and questions, often through a focus on the United States. The latter section delves deeply into case studies and developing tools for making cross-national comparisons.
Credit 3 units. A&S IQ: SSC EN: S

L97 GS 4302 Divergent Voices: Italian Women Writers

This course engages the fictional and political works of Italian women writers from the seventeenth century to the present day. We will read one of the acclaimed Neapolitan novels of Elena Ferrante, who is considered by many to be the most important Italian fiction writer of her generation. We will examine a cloistered Venetian nun's defiant 1654 indictment of the misogynist society that forced her into the convent. We will confront the reality of a woman writer who in 1901 was compelled to choose between her child and her literary career. Among other contemporary writers, we will study the humorous and radical feminist one-acts of playwright Franca Rame. Taught in English. No Final.

Same as L36 Ital 430

Credit 3 units. A&S IQ: HUM, LCD, SC, SD EN: H

L97 GS 4311 Renegades and Radicals: The Japanese New Wave

In 1960, the major studio Shochiku promoted a new crop of directors as the "Japanese New Wave" in response to declining theater attendance, a booming youth culture, and the international success of the French Nouvelle Vague. This course provides an introduction to those iconoclastic filmmakers, who went on to break with major studios and revolutionize oppositional filmmaking in Japan. We will analyze the challenging politics and aesthetics of these confrontational films for what they tell us about Japan's modern history and cinema.

The films provoke as well as entertain, providing trenchant (sometimes absurd) commentaries on postwar Japanese society and its transformations. Themes include: the legacy of WWII and Japanese imperialism; the student movement; juvenile delinquency; sexual liberation; and Tokyo subcultures. Directors include: Oshima Nagisa, Shinoda Masahiro, Terayama Shuji, Masumura Yasuzo, Suzuki Seijun, Matsumoto Toshio, and others. No knowledge of Japanese necessary. Credit 3 units. Mandatory weekly screening: Tuesdays @ 7 pm.

Same as L53 Film 431

L97 GS 4324 Divergent Voices: Italian Women Writers

This course will examine select novels, poetry, and political writings by such noted authors as Sibilla Aleramo, Dacia Maraini, Luisa Muraro, and Anna Banti. Special attention will be paid to the historical, political, and cultural contexts that influenced authors and their work. Textual and critical analysis will focus on such issues as historical revisionism in women's writing, female subjectivity, and the origins and development of contemporary Italian feminist thought and practice. Taught in English.

Same as L36 Ital 432

Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM

L97 GS 4325 Global Art Cinema

How do art films tell stories? The dominant storytelling genre of the contemporary festival circuit, the art film has since World War Two combined "realist" and "modernist" impulses. Influenced by Italian neorealism, art films grant priority to characters from working class, sexual, and other exploited and imperiled minorities. Drawing on the fine arts, literature and music, art films also experiment with modernist themes and formal principles, such as subjectivity, duration, serial structure, denotative ambiguity and reflexivity. This course explores art cinema from

a variety of national contexts, analyzing storytelling techniques and themes that challenge the "economical" and diverting forms associated with mainstream commercial filmmaking. Required Screenings.

L97 GS 4330 Literature of the Italian Enlightenment

This course aims to explore the spectrum of intellectual and literary discourse of the Italian Enlightenment by examining a wide array of texts and genres. Readings will include selections from Enlightenment and popular periodicals, scientific tracts on human anatomy, women's fashion magazines, the reformed theater of Carlo Goldoni, as well as Arcadian poetry, and literary criticism. We will study the rise and characteristics of "coffee culture" during this age. We will pay special attention to the "woman question," which stood at the center of eighteenth-century Italian intellectual discourse, and which was critical to the contemporary drive to define the enlightened nation-state. The class will be conducted as a workshop in which students and instructor collaborate in the realization of course goals. Readings in Italian or English; discussion in English. Prereq. Ital 323C or Ital 324C.

L97 GS 4350 War and Peace

What happens when wars end? This course examines social experiences around violent conflict and its aftermath. How does the portrayal and memory of war shape future possibilities, whether in terms of social policy or ideas about civic inclusion? How does martial conflict shape social policies? We examine war and the social experiences of those adjacent to geopolitical conflict through the experiences of survivors, policy makers, soldiers and families, and international relief agencies. Our emphasis is in understanding the social implications of war. What are the social consequences of martial conflict? How is war represented to those not directly involved? How is war and its aftermath witnessed? How is its commemoration and remembrance constitutive for future action?

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L97 GS 4352 Open Economy Macroeconomics

This course will begin with a review of international trade theory, of the balance of payment accounts and their relationship to international borrowing and lending. We will then study the asset approach to exchange rates determination, exchange rate behavior in the short and in the long run, and the relationship of exchange rates with prices and output. The course will also explore monetary and fiscal policy under both fixed and floating exchange rates, macroeconomic policy coordination and optimum currency areas, international debt problems of developing countries and their relation to stabilization program. Prerequisite: Econ 4021.

Same as L11 Econ 435

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

L97 GS 4357 The Holocaust in the Sephardic World

The course provides students with a comprehensive understanding of the Holocaust, of its impact on the Sephardic world, of present-day debates on the "globalization" of the Holocaust, and of the ways in which these debates influence contemporary conflicts between Jews, Muslims and Christians in Southern Europe and North Africa. We will turn to the history of these conflicts, and study the Sephardic diaspora by focusing on the consequences that the 1492 expulsion had within the Iberian Peninsula, in Europe, and in the Mediterranean world. We will study Sephardic communities in Europe and North Africa and their interactions with Christians and Muslims before World War II. Once we have examined the history of the Holocaust and its impact on the Sephardic world in a more general sense, our readings will focus on the different effects of the Holocaust's "long reach" into Southeastern Europe, the Balkans, and North Africa, paying close attention to interactions among Jews, local communities, and the Nazi invaders. Finally, we will address the memory of the Sephardic experience of the Holocaust, and the role of Holocaust commemoration in different parts of the world. We will approach these topics through historiographies, memoirs, novels, maps, poetry, and film.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM EN: H

L97 GS 4371 Caffè, Cadavers, Comedy, and Castrati: Italy and the Age of the Grand Tour

Taught in English. With French libertine philosopher the Marquis de Sade, German novelist Johann Wolfgang von Goethe, Romantic poet Lord Byron, and other illustrious travelers of high birth and good fortune who sought finishing enrichment by making their Grand Tour to Italy from the mid-eighteenth through the early nineteenth centuries, we will explore the richness and variety of Italian life and culture as depicted by both Grand Tourists as well as their Italian interlocutors. Chief among our destinations will be Venice, Bologna, Florence and Rome. Attractions typical of the early modern Tour will circumscribe our journey. Coffee houses first appeared in the eighteenth century and, in ways strikingly similar to their function today, became the real and symbolic centers of social, intellectual and civil exchange. We will explore eighteenth-century coffee culture through comedies and Enlightenment and popular journals that took them as their theme, as well as through a study of the coffee houses themselves, a number of which are still in existence. Theaters, concert halls, gaming houses, literary and scientific academies, galleries, churches, and universities will be part of the standardized itinerary we will follow. During the period, anatomy and physiology attained new legitimacy as crucial scientific disciplines and we will visit both the anatomical theater at the University of Bologna, where the annual Carnival dissection took place, as well as the first museum of anatomy and obstetrics founded in the Bolognese Institute of Sciences in 1742 by Pope Benedict XIV. We will visit archeological excavation sites, in particular Pompeii, first unearthed in 1748. Fashion, an obsessive preoccupation of the day, will also be a point of interest in our travels. Through primary and recently published secondary sources we will also encounter the remarkable authority of Italian women unmatched anywhere else in Europe at the time. Prereq: at least one 300-level literature course. Readings in Italian or English.

L97 GS 4392 Capitalism and Culture

Capitalism is perhaps the most important historical and social phenomenon in the modern world. In tribal settings and major cities alike its complex impacts are evident. Through rich case studies of how capitalism touches down in diverse cultures, this course provides an introduction to anthropological perspectives on the economy and economic development. Themes covered include the history of capitalism and globalization, the cultural meanings of class and taste, the relationship between capitalism and popular culture, major artistic responses to capitalism, social movements such as environmentalism, and the field of international development. No background in anthropology or economics is required.

Same as L48 Anthro 4392

Credit 3 units. A&S IQ: LCD, SSC, SD Art: SSC EN: S

L97 GS 4410 Borders and Belonging: Citizens, Immigrants, Refugees

This course examines ideas, policies, and practices around migration and inclusion in global comparison. We will focus heavily on key issues for inclusion, including access to the labor market, housing, education, language policy, and political rights. Throughout the course, we examine the role of INGOs, states, and municipal organizations in resettlement and inclusion. Students will have the chance to develop a project focused on a case of their choosing and hone writing skills for applied research settings.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, IS EN: S

L97 GS 4414 Gender Analysis for International Affairs

Although for generations gender was ignored in theory and practice, it is a central but too often obscured dimension of the policy and practice of international affairs, relations, and development. In this transdisciplinary course, students take gender seriously as an analytical category and examine how masculinities, femininities, gender identities, and sexualities shape the construction, implementation, and outcomes of global governance, politics, economics, and interventions. By traversing both macro and micro levels, this course exposes students to diverse voices from around the world, which they utilize to conduct gender analyses of case studies relevant to their interests. Throughout, we will be mindful of (1) how gender functions in tandem with sexuality, class, race, religion, and ethnicity (intersectionality); and (2) how multidimensional identities morph historically, regionally, and culturally. The student builds a gender analysis toolkit and practices what Cynthia Enloe describes as "feminist curiosity," exploring the relationship between gender and power in various aspects of international affairs.

Credit 3 units. A&S IQ: LCD, SSC, SC Arch: SSC Art: SSC BU: BA, IS EN: S

L97 GS 4415 Technology, Empire, and Science in China

How did technology, science, and empire intersect in early modern and modern Chinese history? Was there a unique "Chinese" way of studying nature? How did non-Chinese scientists and engineers contribute to China's knowledge of the world? This course offers a historical and historiographical survey of science and technology studies in China, from the 13th to the 20th century. It particularly examines the global circulation of scientific knowledge in the late imperial period, the place of technology in the empire building of the Qing dynasty (1637-1912), and the violent epistemic encounters between the West and China from the 19th century onward. Throughout the semester, we will explore Confucian scientists as well as Muslim geographers, Jesuit engineers, Manchu anatomies, and Chinese barefoot doctors. Positioning China within a global order, the students will question the premises of modern scientific discourses and try to respond to a seemingly simple question: What does science and technology even mean in a Chinese context?

Same as L22 History 4415

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L97 GS 4435 Memory, Tears, and Longing: East Asian Melodrama Film

Excessive emotion, unreasonable sacrifice, hidden truth, untimely knowledge, and forbidden desire—the power of melodrama and its moving representations have fueled the popularity of hundreds, if not thousands, of books, plays, and films. Melodrama has variously been defined as a genre, a logic, an affect, and a mode, applied to diverse media, divergent cultural traditions, and different historical contexts. The course provides a survey of East Asian melodrama films—as well as films that challenge conventional definitions of melodrama—by pairing Japanese, Korean, and Chinese-language productions with key critical texts in melodrama studies. We will see classics such as *Tokyo Story*, *Two Stage Sisters*, and *The Housemaid*. We will examine melodrama's complex ties to modernity, tradition, and cultural transformation in East Asia; special emphasis will be placed on representations of the family, historical change, gender, and sexuality. In addition to historical background and film studies concepts, we will also consider a range of approaches for thinking about the aesthetics and politics of emotion. No prerequisites. No prior knowledge of East Asian culture or language necessary. Mandatory weekly scheduled screening.

L97 GS 4441 The Forbidden City

Home to 24 emperors of the Ming and Qing dynasties (1368-1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace; its construction in the early Ming; the coded symbolisms of its plan and decoration; the rituals of court; and the lives of its denizens, from emperors (including Pu Yi, the "last emperor") to concubines and from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and a backdrop to major political events, as well as its role in the urban design and contemporary art of 21st-century Beijing. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred. Same as L01 Art-Arch 444

L97 GS 4450 Japanese Fiction: Meiji Women Writers (Writing-Intensive Seminar)

The Meiji Period (1868-1912) in Japan was a time of tumultuous change. During the era Japan made sweeping reforms to its government, educational system, and social structures. Meiji men were encouraged to "modernize" along Western lines, while women were expected to serve as "repositories of the past." Most women prized the elegant traditions and saw these as important markers of cultural identity. But not all were willing to completely abdicate their place in the modernizing impulse. This writing intensive course will examine these women's literary works, paying attention to the way they developed strategies to both "serve the nation" and find an outlet for their own creative voice. Works to consider include the short fiction of Higuchi Ichiyo, Shimizu Shikin, and Tamura Toshiko, the poetry of Yosano Akiko, the essays of Kishida Toshiko, and the translations of Wakamatsu Shizuko. All readings are available in English translation and students need not be familiar with Japanese, though background in Japanese Studies, Women's Studies, or literary studies will be helpful. This is a Writing-Intensive Seminar. Prerequisite: junior level or above or permission of instructor.

L97 GS 4451 Contemporary Politics in India

This seminar will examine current topics and controversies in contemporary Indian politics. The course will have three main foci: the links between politics and economic liberalization over the last two decades; the links between ascriptive identities such as religion, caste and gender and contemporary political

processes, including ethnic and gender quotas; and the changes in party politics at the national and state levels that have accompanied the decline of Congress party dominance. Specific topics include the role of caste and religion in contemporary politics; the rise of state parties and its effects on federal relations; the effects of economic reform and globalization on economy and society; urbanization and migration flows; the rise of modern Hindu nationalism; and the links between collective violence and electoral politics.

L97 GS 4453 Topics in Islam

This course aims to study political thought and practice in Islamic history through a close reading of a selection of primary sources in translation (and in their original language, if language proficiency is satisfactory). Particular attention will be given to the historical contexts in which thoughts are espoused and texts written. We plan to examine the development of political concepts and themes as articulated in diverse literary genres (e.g., legal, theological, political) from the eighth through the 13th centuries. We hope to engage various theoretical models to analyze the relationship between politics and religion and to tease out the role of power in determining sociopolitical relations, distinctions, and structures. We hope to have a better grasp on the historicity of ideas presented in timeless categories in political discourse. Advanced knowledge of Arabic preferred but not required.

L97 GS 448 Japanese Poetry

A comprehensive survey of Japanese poetry from the 8th century to the present day. Topics include the development of the great tradition of court poetry in the Heian period (ca. 800-1200) and its full flowering during the medieval period (ca. 1200-1600), the influence of the Zen aesthetic, the emergence of linked verse and haiku, and the transformation of the classical

tradition with the advent of the modern era. All works will be read in English translation, although knowledge of Japanese will be useful. Graduate students and Japanese majors will be expected to read original materials extensively. Prerequisite: junior level or above or permission of instructor.

Same as L05 Japan 448

Credit 3 units. Art: HUM

L97 GS 4481 Writing Culture

Different ways of writing about people, culture, and society in past and present times. Readings include anthropological works as well as works of fiction that represent people and the times, places, and circumstances in which they live. Students conduct and write about their own ethnographical observations.

Same as L48 Anthro 4481

L97 GS 4490 Modern Japanese Women Writers (WI)

Japanese women have been scripted by Western (male) imagination as gentle, self-effacing creatures. From their (re)emergence in the late 19th century to their dominance in the late 20th, Japanese women writers have presented an image of their countrywomen as anything but demure. Struggling to define their voices against ever-shifting expectations and social contexts, the women they create in their fiction are valiant, if not at times violent. This course examines the various manifestations of the female image in female-authored modern Japanese fiction. Writers to be considered are Higuchi Ichiyo, Hirabayashi Taiko, Uno Chiyo, Enchi Fumiko, Yamada Eimi, and others. A selection of novels and shorter fiction will be available in English translation, and students need not be familiar with Japanese. Prior coursework in literature/women's studies may be helpful. This is a Writing Intensive course. Prerequisite: junior level or above or permission of instructor.

Same as L05 Japan 449

L97 GS 4492 The Irish Literary Revival

The class will study major writings by Oscar Wilde, W. B. Yeats, J. M. Synge, James Joyce, & Flann O'Brien within the contexts of the language movement, colonialism, cultural nationalism, the socialist movement and the 1913 Lockout, the Easter Rising and the War for Independence, the Civil War, the founding of the Irish Free State, the Partition, and the Irish Theocracy. Wilde's notions of the primacy of art with regard to politics and their elaboration by W. I. Thompson and Declan Kiberd will be an organizing principle in the course. The class will see two films, offer oral reports, and write papers.

Same as L14 E Lit 4492

Credit 3 units.

L97 GS 4496 East, Meet West: Asia Encounters Europe

This seminar, which is grounded in cross-cultural aesthetics, examines East Asian visual responses to European art and science from the 16th through 19th centuries. The same Western ideas and works that were first introduced by Jesuit missionaries, that were continued by merchants, and that culminated with colonial enterprises left very different impressions on China and Japan. An introduction to cross-cultural aesthetics from both Western and East Asian perspectives lays the theoretical foundation to engage these works of art before the course proceeds thematically through time to cover painting, cartography, woodblock prints, ceramics, and photography within transregional and transcultural contexts. One upper-level course in Art History is recommended but not required before taking this course.

Same as L01 Art-Arch 4494

Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

L97 GS 4510 Environmental Policy

Course will examine the relationship between environmental economics and environmental policy. The course will focus on air pollution, water pollution, and hazardous wastes, with some attention given to biodiversity and global climate change. The course will examine critically two prescriptions that economics usually endorses: (1) "balancing" of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; (2) use of market incentives (e.g., prices, taxes, or charges) or "property rights" instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011.

Same as L11 Econ 451

L97 GS 4511 Urban Culture in Modern China

The narrative of rural crisis and peasant revolution has dominated China's modern history for decades. But there has been a growing interest in China's urban past and present with the increased prominence of cities in China's breathtaking economic development and the opening of municipal archives

in post-Mao era. The course aims to introduce students to "conventional wisdoms," new directions, and major debates in the urban history field. Topics include: the urban political economy, the cultural dynamics of modernity, the reconstruction of traditions in the making of modernity, the cultural production and consumption, colonialism and imperialism in the urban setting, nationalism, and reform and revolution. Acknowledging and understanding the nuance and difference in views and interpretations in historical writings (historiography) are essential. The course seeks to develop students' research and analytical skills, such as locating secondary sources, incorporating scholarly interpretations, and developing and sustaining a thesis based on secondary and primary sources in student research. This is an interdisciplinary seminar designed for advanced undergraduates and graduate students. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

L97 GS 4517 Anthropology and Development

What is 'development'? Economic progress for all? A slow and gradual 'improvement' in the human condition? Helping people with 'projects'? Westernization? Modernization? The sorting out of bodies that are useful and can be put to work from those less useful bodies that must be contained, imprisoned, or killed? The militarized accumulation of capital? The commodification of labor? The exhaustion of nature? In this advanced seminar we will consider how anthropologists - as writers, analysts, and theorists - have engaged the theories, meanings, practices, and consequences of (sometimes externally directed) economic and political change. We focus on issues of the contemporary moment: oil; urban poverty and inequality (sex work, migration, water, debt, and cash transfer programs); and cultures of militarism. The course is designed to provide a graduate-level introduction to theory and ethnography based on intensive reading, discussion, critique, and writing, with revision. It is open to advanced undergraduates and fulfills writing-intensive (WI) requirements, as well as capstone requirements for some majors.

L97 GS 4520 International Climate Negotiation Seminar

This variable credit course (all students will register for 3 CREDITS) is designed to prepare students to attend and observe annual meetings associated with the United Nations Framework Convention on Climate Change (UNFCCC) as a delegate of Washington University. The course and meetings provide student delegates with a unique educational experience to observe the development of international climate policy through interdisciplinary negotiations and interactions inside the negotiating space. Students see the interaction between climate policy, science and technology as they identify and analyze policy decisions across the international climate regime. The COP 27 meeting will be held in Sharm el-Sheikh, Egypt from November 7-18, 2022. The Subsidiary Body meetings will be in Bonn, Germany in spring of 2023 and are generally held in late May or early June. The number of students who can attend meetings is limited by the United Nations. We will do our best to have course participants attend either the COP or Subsidiary Body meetings. Students attend one week. Enrollment is limited. Indicate your interest by placing yourself on the waitlist

(registering for 3 credits) and completing an application. All students will be placed on the waitlist upon registration and students will be selected to enroll from the waitlist after all the applications are reviewed. The application will be open in early March and will be available on the Climate Change Program website at www.climatechange.wustl.edu. Application review will begin April 22 and enrollment decisions will be made by Monday May 2. Participation in the course is possible without traveling to the meetings. The cost of meeting attendance is partially covered by the Climate Change Program and need based support is available. More information on cost is included on the application page. Pre-requisite: junior standing. The course is currently scheduled for Wednesday 4:00 - 6:50. Contact the instructor with questions at martin@wustl.edu.

L97 GS 455 Topics in Korean Literature and Culture: Gender in Korean Literature and Film

This course looks in depth at issues regarding women and gender in Korean literature and film. While it explores literary and cinematic representations of gender, the main goal of the class is to examine literature and film as sites for the very construction of gender. Readings include contemporary literary and theoretical works, as well as historical texts from the Colonial period (1910-1945) and the Choson dynasty (1392-1910), in order to understand women's issues in the context of historical development. Through textual criticism and theoretical readings, some of the questions to be discussed are: What is "feminine" and "masculine" in Korean culture, and how do they change (if they do)? How do these formations and changes relate to literary and cinematic portraits of gender on one hand and to gendered conceptions of literature and cinema on the other? How do socio-historical circumstances affect representations of gender? All readings are in English. Prior course experience in literature, film, or gender studies recommended. Prerequisite: junior level or above or permission of instructor.

L97 GS 457 Gender and Modernity in Latin America

The purpose of this course is to introduce students to the particular forms modernity assumes in Latin American countries and to the ways in which national cultures, identity politics, and gender issues interweave during the 20th-century. The course will discuss three particular articulation of this topic: 1) Gender and the national question in Argentina: Eva Peron; 2) Gender and Visual Arts: Frida Kahlo; and 3) Gender and Ethnicity: Rigoberta Menchu. Through these iconic figures students will be introduced to the specific features that characterized three very different but representative cultural scenarios in Latin America. In each case, the context for the emergence of these highly influential public figures will be studied from historical, social and cultural perspectives. In order to explore the cultural and political

significance of Eva Peron, Frida Kahlo and Rigoberta Menchu, the course will utilize literary texts (speeches, letters, diaries, etc.), visual materials (photography, films, and paintings) and critical bibliography.

L97 GS 4582 Major Film Directors

What does the film director do? In the earliest movies, film directors modeled themselves on their theatrical counterparts: they chiefly focused on how to stage an action in a confined space for a stationary camera that represented an ideal member of the audience. As the camera began to be used to direct audience attention, first through cutting, then through actual movement, the film director evolved from a stager of events to a narrator. By analyzing the work of one or more major film directors, this course will explore the art of film direction. We will learn how film directors may use the camera to narrate a scene, to provide their own distinctive view of the actions playing out on the movie screen. May be repeated for credit with permission of the instructor. REQUIRED SCREENING: [day, time].

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L97 GS 4590 Writing North Africa

Ever since the conquest of Algiers in 1830, the French have been fascinated by writing from and about North Africa. Beginning with nineteenth-century French travel narratives about Algeria, colonial-era writing defined ideas of the "exotic." As Algeria, Morocco, and Tunisia gained independence from France in the mid-twentieth century, North African authors often wrote their own postcolonial literature in the language of their former colonizer. These authors and their contemporary descendants continue to create and challenge the ideas of postcolonial francophone literature today. The main seminar sessions are taught in English, with additional required weekly undergraduate discussions (section A) in French. This seminar satisfies the post-Revolution requirement for French majors. Prereq: Fr 325 or 326. One-hour preceptorial required for undergraduates. Same as L34 French 459

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L97 GS 4611 Latin American Populism and Neo-Populism

A salient feature of Latin America in the 20th and early 21st centuries has been the recurrence of populism. Mass-based political and social movements animated by nationalist and reformist impulses dominated Latin American politics in the 1920s, 1930s-60s, and 1980s to the present. This course provides a general historical and theoretically informed analysis of the origins, internal dynamics, and outcomes of classical populist and neo-populist governments and parties. Among the notable populist and neo-populist cases to be examined include: Peronism in Argentina, Velasquismo in Ecuador, Cardenismo in Mexico, APRA in Peru, Vargasismo in Brazil, Garcia/Fujimori in Peru, Menen/Kirchners in Argentina, and Hugo Chávez in Venezuela. Issues pertaining to leader-follower relations, populist discourses, citizenship rights, populist gender and racial policies, labor and social reforms, and mass mobilization politics will also be explored.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L97 GS 4615 Caricature: The Culture and Politics of Satire

This course examines the golden age of caricature. Beginning with the prints of William Hogarth, we will look at the caricatural traditions in France and England from the late 18th century through the early 20th century. Special emphasis will be placed on visual satire as a vehicle for social and political critique; on theories of humor (particularly Baudelaire and Bakhtin); and on the development of a mass market for this imagery. Other figures to be discussed include Rowlandson, Cruikshank, Daumier, Gavarni, Philippon, and Gil. We will take advantage of a major collection of French caricature in the Mildred Lane Kemper Art Museum at Washington University as well as collections available for study in Olin Library and at the Saint Louis Art Museum. Prerequisites: L01 113, L01 215, or a 300-level course in modern European history or literature; or permission of instructor.

Same as L01 Art-Arch 4615

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L97 GS 4622 Labor and Labor Movements in Global History

Focusing on the period from mid-19th century (industrial revolution) until the present neoliberal capitalist era, this course analyzes working class formation, organization, collective action, and politics on a worldwide scale. It seeks to explore the connections between historical and contemporary workers' movements in the global North and global South, eschewing national perspectives and global/local dichotomies. Special attention will be given to Latin American workers and labor movements. In particular, it will examine the influence of immigration, the role of export workers, the impact of radical ideologies, the development of labor relations systems, the nature of informal work, and recent struggles for workers' control. The principal aim of this course is to introduce students to the key topics and themes pertaining to global labor history. These themes are varied and complex and range from workers' struggles.

Credit 3 units. A&S IQ: LCD, SSC, SC, SD Arch: SSC Art: SSC EN: S

L97 GS 4630 Modernity, Culture and the State in Mexico

This course is an advanced seminar on the process of the cultural, ideological and institutional modernization of Mexico. Drawing on readings from fields such as history, cultural anthropology, political sociology and cultural theory, the course discusses the shaping of various forms of social subjectivity and cultural ideology that sustained the formation and development of the state. The course also engages with the identities and processes that led both to the formation of structures of citizenship and to the contestation of state power. This course is structured chronologically, following the development of three interrelated processes unfolding between 1810 and the present: (1) the creation of state institutions and ideology and their evolution in relationship to events such as the liberal Reforma of the 1850s and the Mexican Revolution; (2) the cultural and social implication of processes of capitalist development, modernization and globalization; and (3) the ways in which Mexico's histories of sociocultural difference led to political and cultural insurgencies and rebellions. This course fulfills the seminar requirement for Latin American Studies majors. Prerequisite: L45 165D, L45 305, any other 300-level course with significant focus on Mexico, or permission of instructor.

L97 GS 4631 The Binational Condition. The Mexico-US Relationship in Mexican History and Culture

From the 19th century onwards, the relationship between Mexico and the United States has been defined by intense tensions and contradictions. Closely intertwined by geopolitical engagement and integrations, mutual migration flows, and rich cultural exchange, both countries belong to a binational system with few equivalents around the world, which defines the lives of people living across North America. And yet, few people in the United States have access to a clear and rigorous understanding of the Southern neighbor, often leading to conflict at the political and social levels. This class explores this historically, from the early frictions caused by territory and slavery to the binational conditions of the present. The class emphasizes the Mexican perspective of the relationship, often erased in discussions from the U.S. From this perspective, the course will engage critical moments in the history of the relationships, such as the underground railroad to the South, the Mexican American War, the Guadalupe Hidalgo treaty, and the Cold War. The class will also discuss the ways in which Mexico has influenced the United States culturally, from the impact of Mexican post-Revolutionary art in the New Deal to the rise of film directors like Alfonso Cuarón and Guillermo del Toro. Finally, the class will lay out the ways in which Mexicans and scholars of Mexican studies think about questions such as regional development, the border, immigration, and the Drug War. Prereq. L45 165D or prior coursework on Global Studies, Latin American Studies or American Studies. The course covers the seminar requirement for majors and minors in Latin American Studies.

Same as L45 LatAm 4631

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, IS

L97 GS 4633 20th-Century Latin American Revolutions

Latin America was arguably one of the most "revolutionary" regions of the world in the 20th century. It registered four "great revolutions": Mexico 1910, Bolivia 1952, Cuba 1959, and Nicaragua 1979. These social revolutions entailed a substantial, violent, and voluntarist struggle for political power and the overthrow of the established political, economic, social, and cultural orders. In the wake of these successful revolutions, new revolutionary institutions of governance were founded, radical structural changes were implemented, and a new revolutionary ethos was adopted. With the exception perhaps of the Bolivian Revolution, these revolutions had a profound impact on Latin American and world politics. The primary aim of this course is to analyze and compare the causes, processes, and outcomes of the Mexican, Cuban, and Nicaraguan revolutions. The course also analyzes late 20th century guerrilla movements in El Salvador and Peru.

Credit 3 units. A&S IQ: LCD, SSC, SC, SD Arch: SSC Art: SSC EN: S

L97 GS 4641 Japanese Textual Analysis

This course introduces the advanced student of Japanese to a variety of prose narratives in the modern language. Readings, which include literary texts and topical essays on aspects of Japanese society and culture, reflect the needs and interests of the enrolled students. Focus is on close reading and syntactic analysis of the selected texts. Regular translation exercises gauge the mastery of grammar, syntax, and idiomatic usages.

All readings are in Japanese, with class discussion conducted predominantly in English. A final translation project, to be chosen by the student in consultation with the instructor, is required. Prerequisite: permission of instructor.
Same as L05 Japan 464
Credit 3 units. A&S IQ: LCD EN: H

L97 GS 4650 Cities, Race and Development in Latin America

This course offers a multi-disciplinary approach to the study of the Latin American city: its history, development and inherent economic, social, cultural, ethnic, and political tensions. Lectures, readings, and class debates will explore interactions between the materiality and structure of Latin American modern cities and the social and cultural phenomena related to urban life in multicultural societies. Particular attention will be devoted to the effects of internal/external migration, and to the development of public spaces and sites of memory. Patterns of social segregation, marginalization, inequality, and the like, will be analyzed in order to elaborate on the contemporary challenges of the city in a globalized yet traditional world. In addition to the analysis of living, institutional, and commercial spaces, the course will cover social dynamics that break the discipline of the city through different forms of transgression, including crime, informal housing, and underground movements. The goal of the course is to expose students to historical and social developments as exemplified in a variety of urban environments, and to encourage reflection on issues of social justice related to the living conditions of rural, disadvantaged, and indigenous populations. The course will be conducted in English. Mandatory readings will be in English. Additional readings in Spanish will be required for those students fluent in the language. Prereq. None. Same as L45 LatAm 465
Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: BA, IS EN: H

L97 GS 4652 Latin American Subcultures

This course has been planned as an introduction to the interconnections between "high" culture, popular culture, and mass culture, with particular emphasis on the formation of urban subcultures in contemporary Latin America. The topic of subculture and counterculture will be analyzed, taking into consideration the influence of factors of class, race, and gender in the construction of alternative cultural identities. Some of the connections to be studied are between political power and cultural resistance, affect, violence, symbolic value, hegemony and marginality. Distinctions will be made between culture, subcultures, traditions, and lifestyles as well as between multiculturalism and interculturality. While the first part of the course will introduce critical concepts, theories, and methodologies, the second half will focus on specific articulations between cultural practices and the domains of belief, sexuality, violence, and social media, including uses of music, video, and films. Students will prepare a final paper on a Latin American subculture of their choice and analyze it using the critical and theoretical tools discussed in class. Prerequisite: L45 165D. This course fulfills the seminar requirement for Latin American Studies majors and minors.
Same as L45 LatAm 4650
Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, IS EN: H

L97 GS 4660 Geographies of Development in Latin America:**Critical Perspectives and Contemporary Challenges**

This course provides an overview to the geographies of development throughout Latin America. We will begin by examining a variety of theoretical perspectives, definitions and critiques of 'development'. We will highlight the uneven processes of development at multiple, overlapping scales and the power imbalances inherent in much of development discourse. In the second half of the course we will focus our considerations towards specific contemporary trends and development issues, utilizing case studies drawn primarily from Latin America. These themes will include sustainability, NGOs, social movements, social capital, security and conflict, identity, ethnicity and gender issues, participatory development, and micro-credit and conditional cash transfers. Students will acquire the critical theoretical tools to develop their own perspectives on how development geographies play out in Latin America.

Credit 3 units. A&S IQ: LCD, SSC, SC, SD Arch: SSC Art: SSC EN: S

L97 GS 4662 Central American Geographies of Violence

This course provides an in-depth examination of the geographies of violence in Central America. As a region frequently characterized as endemically prone to violence, it is vital to analyze and contextualize the violence. Approaching violence in Central America from a geographic perspective involves not only locating and "placing" the violence, but also thinking relationally about the multiple, overlapping scales of activity, both within and beyond the region. The course is divided into three parts. In the first section of the course we begin with an overview of the foundations for understanding violence in Central America. In addition to covering the physical and human geography of the region we also delve into various ways of defining violence, with a particular emphasis on how geographers conceptualize violence. In the second section, we delve into various theoretical approaches for understanding the nature of multiple types of violence and draw from historical and contemporary events in Central America. In the third section of the course we take a closer look at specific case studies in the region, covering topics such as genocide, alcoholism, immigration, gangs and drug-trafficking. Sophomore standing or above.

Credit 3 units. A&S IQ: LCD, SC, SD EN: H

L97 GS 4664 Popular Culture and the Representation of Youth in Latin America

The objective of this course is to introduce students to different aspects related to the representation of youth in Latin America, particularly through the depiction this sector receives in the realm of popular culture. The course will focus on the relationship between youth and social/political conflict and on the literary and cinematic representation of juvenile sectors in cultural production in different Latin American countries. The roles of music, melodrama and the media will be studied in connection to the construction of subjectivity and collective identity. The course will also analyze the involvement of juvenile sectors in narco-culture, gangs, maras, and the like, as well as the impact of violence, fear, and social inequality in early life. The analysis of films, literary texts, critical studies and cultural practices will be approached through a combination of biopolitical analysis and the analysis of representational strategies utilized in the elaboration of symbolic materials. This course fulfills the seminar requirement for Latin American Studies majors and minors. Prerequisite: LatAm 165D or another Latin American Studies course.

L97 GS 4692 Reading Across Languages and Cultures: Theory, Research and Practice

The United Nations has declared that literacy is a fundamental human right. This course, which is taught in English, connects to the mission of UNESCO and examines the wide range of theoretical and research issues -- both historical and current -- related to reading and writing across languages and cultures. Literacy acquisition among second-language learners involves a number of variables, including both cognitive and social factors. Topics to be discussed include universal cognitive operations, individual learner differences, text types and literary forms, literacy and social power, and the extent to which reading and writing are interrelated. Students will discuss how to bridge scientific research in the laboratory to practice, and they will be involved in St. Louis community outreach projects with refugees and immigrants at the International Institute, where they will create and implement reading and writing activities driven by theory and empirical investigations. Students will take the theory and research they learn, and they will help meet the local reading and writing needs of a changing population with a variety of backgrounds, values, and educational preparations. The course is required for the minor in applied linguistics, the PhD in applied linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors, such as Global Studies and Educational Studies.

L97 GS 4712 Topics in Religious Studies: Gender and Religion in China

In this course, we explore the images, roles, and experience of women in Chinese religions: Confucianism, Daoism, Buddhism, and so-called "popular" religion. Topics discussed include: gender concepts, norms, and roles in each religious tradition; notions of femininity and attitudes towards the female body; biographies of women in Confucian, Daoist, and Buddhist literature; female goddesses and deities; and the place of the Buddhist and Daoist nun and laywoman in Chinese society. All readings are in English or in English translation. Prerequisite: Senior/Graduate Standing. Students with no previous background in Chinese religion, literature or culture need to obtain instructor's permission before enrolling.

L97 GS 4731 Global Political Economy

This course will borrow on the insights of international relations scholarship and economic theory to develop a broad understanding of international economic relations. Specifically, this course attempts to address the following two sets of questions: 1) How do global economic relations fit into the broader category of international relations? How do the existing theories in international relations (liberalism, realism, and Marxism) help us understand international economic relations between nation-states? 2) What are the effects of these international economic forces (trade, finance, and multinational production) on domestic governments and societies?

L97 GS 474 National Narratives and Collective Memory

This course examines how national narratives shape the ideas of nation-states about themselves and others. It considers cultural, psychological, and political aspects of narratives used to interpret the past and understand the present. In addition to reviewing conceptual foundations from the humanities and social sciences, particular national narratives are considered as case studies.

L97 GS 4750 Screening the Holocaust

This course surveys the history of Holocaust representation on film, examining a wide range of documentary and fictional works from 1945 to the present day. Discussions will consider a number of key questions, including: What challenges does the Holocaust pose to cinematic representation, and how have filmmakers grappled with them? How have directors worked within and against notions of the Holocaust as unrepresentable, and how have they confronted the challenge of its association with a limited set of highly iconic images? What are the more general ethical and political dimensions of representing the Holocaust onscreen -- its victims as well as its perpetrators, the systematic genocidal violence that characterized it, and the sheer absence of so many dead? We will also probe the changing significance of cinematic representation of the Holocaust, exploring the medium's increasingly memorial function for audiences ever further removed from the historical moment of its occurrence. Screenings may include *The Last Stage*; *Distant Journey*; *Night and Fog*; *Judgment at Nuremberg*; *Shoah*; *Europa, Europa*; *Schindler's List*; *Train of Life*; *The Specialist*; *Photographer*; *A Film Unfinished*. Critical readings by figures such as Giorgio Agamben, Jean Amery, Shoshana Felman, Geoffrey Hartman, Marianne Hirsch, Sidra Israhi, Dominick LaCapra, Alison Landsberg, Berel Lang, Michael Rothberg, and James Young. Required screenings Thursdays @4pm.

L97 GS 4761 Politics of Global Finance

Global finance underwent stunning transformations over the past thirty years. The changes contribute to interdependence, challenge national sovereignty, alter state-society relations, affect economic development, and influence the distribution of wealth and power in the global political economy. The seminar examines the political economy of monetary relations, the globalization of capital markets, and their effects upon domestic and international affairs.

L97 GS 4762 Money, Exchange and Power: Economy and Society in the Ancient Mediterranean World

From seaborne trade and banking to slavery and the impact of new technology, the economy of the ancient Mediterranean world constitutes a particularly dynamic field of study. To examine a society's underlying economics is to gain critical insight into those historical phenomena that are themselves the product of multiple, overlapping dimensions of human action and thought. This course engages directly with a fascinating array of primary evidence for economic behaviors, beliefs, structures, and institutions among the Romans, Greeks, and their neighbors. We will also explore the methodological challenges and implications of that evidence as well as a variety of modern theoretical approaches. This year our focus is mainly upon developments among the Greeks, ranging from the transformative invention of coinage to the rise of commercial networks centered around religious sanctuaries like Delos. PREREQ: CLA 341C OR 342C OR 345C OR 346C OR PERMISSION OF INSTRUCTOR.

L97 GS 4771 Native and Cosmopolitan Modernisms:**American and European Art between the Two World Wars**

This seminar focuses on two contrasting currents within American and European modernism between the two world wars: native and cosmopolitan. Alternating between the United States and France, the content of this course begins in the years before World War I and concludes with the rise of virulent forms of cultural nationalism during the late 1930s. We consider the subjects, personalities, aesthetic strategies, and political and social investments associated with these alternative modernisms, which are linked to a search for roots on the one hand and to a desire for forms of spatial and social mobility on the other. By comparing the "homegrown" and expatriate experiences, we will consider divergent attitudes toward identity, gender, nation, time, and nature, analyzing these two fundamental responses to modernity in relation to one another. Prerequisites: L01 113 or L01 215, or permission of instructor. One 300-level course in Art History preferred.

L97 GS 4810 Global Structures and Problems

This course examines social problems around the world and their relationship to globalization - that is, the increasing connectedness of social and economic life across borders. Students will investigate a range of these problems - such as environmental degradation, labor exploitation, human rights abuses, ethnic conflict, poverty, and inequality - and these issues' links to both personal experiences and larger social structures. The course is premised on the idea that to understand current global social problems, one must understand the evolution of markets, states, civil society and social movements, gender hierarchies, ethnic categories, and global governance over the past century.

L97 GS 4816 Art and Culture in Fin-de-Siecle Europe

This course presents an examination of painting, photography, and the decorative arts in France during the period between the two World's Fairs of 1889 and 1900. Artistic movements include Symbolism (Van Gogh, Gauguin, and Redon), later Impressionism (Monet and Morisot), Neo-Impressionism (Seurat and Signac), and Art Nouveau. Thematics include urban leisure and cafe culture, the agrarian ideal, the promises and threats of science and technology, the lure of the primitive, and the impact of nationalism and feminism on the arts. Prerequisites: L01 215 and any 300-level course in 19th-century art, literature, or history; or permission of instructor.

Same as L01 Art-Arch 4816

Credit 3 units. Art: AH

L97 GS 4820 War, Migration, and Human Rights

In this course we will explore the recent history of displacement and human rights; this includes the origins of laws that still govern the lives of refugees and asylum seekers. While migration has been a constant in history, we will center our inquiries on more recent events, beginning in the 1930s and up to the present day. We will pay close attention to several conflicts that led not only to global displacements, but that also raised important questions about human rights. These conflicts include, but are not limited to: the Spanish Civil War, World War II, and the Vietnam War. While most of our more contemporary sources will involve migration to the United States from Latin America, we will also address the present flow of people across visible and invisible borders in other parts of the world. We will work our way through complex arguments about extremely contentious and timely topics and make use of primary sources and secondary literature, fiction, memoirs, film and other media. The last section of the class will center on different research and writing methods.

L97 GS 484 Core Seminar in East Asian Studies

This course introduces students to some of the major approaches and methodologies scholars have used for studying East Asia in the humanities and social sciences. Together we will discuss the history of Asian Studies and influential scholarship to identify how others have formulated questions about East Asia, and how they have attempted to answer them. This will provide the means for students to orient themselves in the field of East Asian Studies and begin to generate scholarly questions and answers of their own. Open to juniors and seniors majoring

or minoring in EAS, EALC, History, Art History, or other East Asia-related fields. Required of MA and MBA/MA students in East Asian Studies, and second year JD/MA students in East Asian Studies. Open to graduate students focusing on East Asia in other disciplines. Undergraduates register for L03 484. Graduates for L03 584.

L97 GS 485 Preparation for Global Studies Honors Thesis

Required for GS senior thesis writers, this course addresses the methods and mechanics of research and writing in GS, concurrently with independent work with the thesis advisor. The seminar provides structure, guidance, and response to your work. Students will already have identified a thesis topic; in the seminar, they will identify a research question and develop a thesis proposal. In workshop format, students will examine one another's research questions, hypotheses, and methods of analysis. In additional sessions, students will learn the basics of several models of electronically assisted research, and they will develop and refine presentation skills through the presentations of their proposals and results at various stages of progress. Prerequisites: 1) a GPA of 3.65 at the time of application to the thesis program; 2) the identification of a thesis advisor; and 3) the approval of the GS Honors Program Director. Attendance is required.

L97 GS 4854 Gauguin in Polynesia: the Late Career

This seminar focuses on the late career of Paul Gauguin, in Tahiti and the Marquesas. This course examines closely the colonial context of fin-de-siecle French Polynesia, Gauguin's response to indigenous culture, his ongoing interests in European currents of theosophy and anarchism, the development of his primitivist style in response to the French avant-garde, and Gauguin's legacy to modern art and culture in the early twentieth century. Readings will range from primary texts (literature and journals read by the artist, his letters, his satirical articles and caricatures produced for a Tahitian newspaper, his treatises on religion), to post-colonial theory and recent critiques of primitivism. French reading skills are useful, but not required for the course. We will visit the St. Louis Art Museum to view both the Oceanic collection, and prints and paintings by Gauguin. PRE-REQUISITE: AT LEAST ONE UPPER-LEVEL COURSE IN MODERN ART HISTORY, OR PERMISSION OF THE INSTRUCTOR.

L97 GS 4856 French Art and Politics in the Belle Epoque

This interdisciplinary seminar addresses the rich intersection of politics, fine arts and visual culture in modern France from the Franco-Prussian War (1870) to the First World War (1914). We will study the political trends, historical events, and cultural conditions of the era, and their direct influence on the production and reception of a wide range of visual arts, ranging from official paintings and monuments to popular culture such as tourist and documentary photography, commercial posters and political caricature. We also examine the question of what it meant in the Belle Epoque to be an avant-garde artist, and how such artists expressed political sentiment in their work. Prerequisites: permission of instructor.

L97 GS 4859 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000

This seminar examines film and modern art within the framework of "Orientalism" Reading foundational texts by Said, and incorporating theory and historical discourse concerned with race, nationalism, and colonialism, we explore artistic practice in European photography, painting, and decorative arts from 1850 to recent times and European and Hollywood Film. We study how power and desire have been inscribed in western visual culture across the bodies of nations and peoples through conventions such as the harem, the odalisque, the desert, and the mysteries of ancient Egypt. To that end, we will look at artists such as Delacroix, Ingres, Gérôme, Beardsley, and Matisse and will screen films such as *The Sheik*, *The Mummy*, *Salome*, *Cleopatra*, *Pepe le Moko*, *Naked Lunch*, *Shanghai Gesture*, *Thief of Bagdad*, *Princess Tam Tam*, and *The Sheltering Sky*. Subjects include the representation of gender, sexuality, desire, race, and identity as well as the cultural impact of stereotype and "exotic" spectacle. Students will study methods of visual analysis in film studies and art history. All students must attend film screenings. 3 credits

L97 GS 4861 Gauguin Then and Now: Art, Myth, and Controversy

This course is an examination of the art and career of Paul Gauguin (1848-1903) and the artistic, social, and political milieu of colonialism in which he worked in France, Polynesia, and the Caribbean. Topics include avant-garde Impressionist and Symbolist cultures, the power of the art market/dealer system, the artist's writings (in translation), French colonial culture and pervasive myths of island paradise, and the pressing critiques offered today by postcolonial and feminist theory. The final third of the course will focus on the varied global reception of his work in the 20th and 21st centuries as well as controversies surrounding his art, writings, and legacies, particularly among contemporary Pacific Islander artists and artists of color. We will consult local museum collections as possible and perhaps take a class trip to Chicago to see essential collections. Prerequisite: L01 215 or any 300-level course in art history, or permission of instructor.

L97 GS 4867 The Impressionist Landscape: Style, Place and Global Legacies 1870-1920

We will consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism, but soon expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. We will examine the place of individual perception, the physiology of sight, and theories of the natural in the development of the Impressionist landscape, through the consideration of style, genre, artistic theory, and these artists' investment in particular sites. Furthermore, the social, commercial and critical networks that supported the movement will be analyzed. Particular attention will be given to Monet, and a special exhibition of his water lily paintings on view at the St Louis Art Museum. Other key artists include Degas, Morisot, Renoir, and Cassatt. We will also discuss the relationship of the Impressionist landscape to the development of modernist

abstraction, and the aesthetic and nationalist motivations for its appropriation across the globe. Prerequisite: Introduction to Western Art; Introduction to Modern Art, or permission of instructor.

Same as L01 Art-Arch 4867

L97 GS 4869 Reading War and Peace

What is it like to enter into a fictional world for a semester? In this course we read Leo Tolstoy's *War and Peace* in its entirety. Set during the Napoleonic wars (1805-1812), *War and Peace* takes the reader on a panoramic journey from the battlefield to the hay field, from the war room to the ballroom. It is a vivid portrayal of 19th-century Russian society as well as a penetrating examination of the causes and consequences of violence and the nature of love and family dynamics. In our discussions, we explore philosophies of history, issues of social injustice and gender inequality, the psychology of human suffering and joy, questions of literary form and genre, and the very experience of reading a long work of fiction. We begin with a selection of Tolstoy's early works that laid the foundation for *War and Peace* and conclude with a few of Tolstoy's late works that had an enormous influence on, among others, Mahatma Gandhi. Primary texts are supplemented with literary theory and film. All readings are in English.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

L97 GS 4872 Colonial Cities and the Making of Modernity

Massive urban growth has been a central result of the incorporation of many areas--both central and peripheral--into the global economy in the 19th and 20th centuries. Scholars have long theorized urbanization as a key component of modernity, but they have usually done so by looking at urbanization and modernization from the perspective of the West. This course will investigate the character of cities in the colony and then use these empirical and analytical entry points to examine critically some theories of modernity. The geographical focus of the course will be primarily on cities in the Middle East, North Africa, and South Asia.

L97 GS 4876 Advanced Seminar in History: Mexican Agriculture: Land, Politics and Development

Access to and ownership of land has been a major issue in Mexican history. Land tenure in economic development has been a constant source of tension and debate since the 18th century. Paradoxically, land tenure has been put forth as both the obstacle and the solution to the country's modernization. Given its centrality in the construction of the modern period, this course examines liberalism, agrarian revolts, the revolution, the green revolution and neoliberalism through the lens of land issues. This course will also explore how these have shaped and have been shaped by indigenous peoples and peasants, from land disentanglement to the fight against GMO maize. Students will evaluate agrarian reforms, agricultural modernization programs, concepts of and transformations of natural resources, food production/consumption and social policies.

L97 GS 4879 Marking History: Painting and Sculpture After World War II in the U.S., France and Germany

This seminar focuses on the aesthetic, cultural, and philosophical reactions to the devastating events surrounding World War II and its later reception. We consider artistic developments within a network of international exchange -- biennials as well as gallery and museum exhibitions -- in which France, Germany, and the United States participated equally within a field of visually similar aesthetic responses to a seismic shift in historical consciousness. What distinctive artistic languages emerged after the war to express transformations in historical consciousness and in older ideas about an unfettered subjectivity? In what ways did concepts of trauma with which we live today reshape collective memory and leave their trace on painting and sculpture? Looking at abstraction and semi-abstract works in painting and sculpture, we analyze the works of Jackson Pollock, Willem de Kooning, Alberto Giacometti and Jean Dubuffet, Wols, K.O. Götz, Emil Schuhmacher, and Hans Hartung. Students with reading skills in German or French are encouraged. Prerequisite: L01 215 or permission of instructor. Same as L01 Art-Arch 4879

L97 GS 4912 Modern Japan and the Invention of Tradition

A discourse of "uniqueness" has been a prominent feature of Japanese culture in the 20th century, both before and after the Pacific War. This course explores the domain of nativist expression in modern Japan. While focusing on literary texts by writers such as Kawabata and Tanizaki, we also consider a range of artistic, cinematic, and cultural production. Considerable attention is paid to 'Nihonjinron,' an important--and best-selling--genre of "Japanese uniqueness" writing. Our goal is to make sense of the complex intersection of traditionalism and modernism in 20th century Japan, and to consider the larger question of modern nationhood and the construction of national identity.

L97 GS 4918 Postmodernism

This course explores the complex significance of Italian Postmodernism through an examination of the theoretical arguments and literary works that have shaped the cultural and political debate of the past fifty years. Students will study, among others, the critical theories of "open work" (Umberto Eco), "literature as lie" (Manganelli), and "weak thought" (Gianni Vattimo) that developed from the neo-avant-garde movement of the 1960s. Analysis will focus on the novels of four authors who have had a defining influence on Italian postmodern thought and narrative forms: Carlo Emilio Gadda, Italo Calvino, Luigi Malerba, and Umberto Eco. Course conducted in English; Italian majors read in Italian, others in English translation. Prereq for Italian majors: Ital 307D, or permission of instructor.

Same as L36 Ital 491

Credit 3 units.

L97 GS 4920 The Italian Detective Novel

The detective novel has an unusual and exceptionally brief history in Italy. Only within the past 35 years has an Italian version or, more precisely, subversion of the genre emerged and come to dominate the Italian literary scene. Prominent Italian writers such as Italo Calvino, Umberto Eco, Leonardo Sciascia, and Luigi Malerba have deconstructed the conventions of the detective novel in order to portray the disorder and arbitrary meaning of the postmodern world. This course will explore the history of the "anti-detective" novel in Italy, and the philosophical and political questions the genre evokes. Readings in Italian and English. Conducted in English.

Same as L36 Ital 492

L97 GS 4936 The Unmaking and Remaking of Europe: The Literature and History of the Great War of 1914-1918

The Great War of 1914-1918 is one of the most momentous events in history. We can approach its broad European import by reading its literatures comparatively. Far wider than the concerns of any one national ideology, the literature of record represents a profound crisis in the European cultural imaginary. A number of critical and interpretive issues will be in play in our readings, which will move through three major phases. We begin with the powerful immediacy of trench poetry (1914-1919), develop into the constructed narratives of the great postwar novels and memoirs (1920-1931), and then turn toward the retrospect of the 1930s, which is also the prospect on the next, now inevitable, war. The authors featured include combatant and civilian writers, names well-known and not so famous: Mann, Apollinaire, Owen, Pound, Cocteau, H.D., Woolf, Maurois, West, Celine, Joyce, Musil, Eliot, Rosenberg, Sassoon, Graves, Hardy, Trakl, Stramm, Lichtenstein, Péguy, Barbusse, Manning, Jünger, Zweig, Brittain, and Kroner. All readings for class will be in English translation. Our secondary literature will provide approaches to specific texts and models of literary and cultural history that represent the longer-range importance of the war. Same as L16 Comp Lit 493

L97 GS 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories

This seminar examines the theory and the cultural history of the collecting of art objects and artifacts from a range of cultures and periods, and it considers how and why both individuals and institutions create collections. What social and psychological factors drive this passion? What are the various cultural, political, and aesthetic priorities that have driven this practice historically? How is cultural patrimony defined, and how do law, the art market, and cross-cultural ethics impact the placement, study, and display of a culture's material heritage? We will build the seminar around the history of collecting in America, with a focus on Midwestern examples and particularly important case studies in St. Louis. We will consider, for example, the significant local collections built by Joseph and Emily Rauh Pulitzer (modern art) and Morton May (modern and Oceanic art), as well as the histories of both modern European and non-Western collections now owned by St. Louis-area museums. This course will be complemented by various local field trips, including to the Saint Louis Art Museum, the Pulitzer Arts Foundation, the Mildred Lane Kemper Art Museum, and Cahokia Mounds State Historic Site. Prerequisites: L01 113; L01 215; or permission of instructor. One 300-level course in Art History preferred. Same as L01 Art-Arch 4975

Credit 3 units. A&S IQ: HUM Art: AH EN: H

L97 GS 4976 Global Asias

This course engages a new methodological approach to Asia that expands beyond the spatial concept of the region as a set of political entities occupying a specific part of the world. Global Asias seeks to open up avenues of inquiry to accommodate the study of flows of people, ideas, and practices across Asia and throughout the world. It provides the opportunity to consider Asian communities as they manifest themselves in different places and different ways. We begin with a survey of past attempts to define, understand, and manage Asia, which resulted in an area studies approach. We then engage transnational and interdisciplinary efforts, and we conclude by considering the possibility that Global Asias can challenge and perhaps unseat the reigning epistemologies that exist today.

L97 GS 498 Guided Readings in Chinese

Course normally taken after successful completion of Chi 428. May be repeated once for credit. Prerequisite: senior or graduate level or permission of instructor.

Same as L04 Chinese 498

Credit variable, maximum 3 units.

L97 GS 4981 Advanced Seminar in History: Historical Perspectives on Human Rights and Globalization

This course offers a historical perspective on the modern international human rights regime, using materials drawn from diplomatic, legal, political, and cultural studies. Successful completion of this seminar involves designing, researching, and writing a 25-30 page paper on a historically-oriented, human-rights-related topic of your choice.

Same as L22 History 4981

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L97 GS 4982 Advanced Seminar in History: Women and Confucian Culture in Early Modern East Asia

This course explores the lives of women in East Asia during a period when both local elites and central states sought to Confucianize society. We will focus on Ming (1368-1644) and Qing (1644-1911) China, but will also examine these issues in two other early modern East Asian societies: Yi/Choson (1329-1910) Korea and Tokugawa (1600-1868) Japan.

Same as L22 History 4982

Credit 3 units.

L97 GS 499 Guided Readings in Japanese

Prerequisites: senior or graduate level or permission of the instructor. Course usually taken after successful completion of Japan 459. May be repeated once.

Same as L05 Japan 499

Credit variable, maximum 3 units.

L97 GS 4995 Advanced Seminar in History: Incredible India!

From Christopher Columbus' misguided search for a mythical notion of India, to the Incredible India branding campaign launched by the Indian State's Department of Tourism, to the allure of yoga and true love, the notion of "India" has its own history. In this Advanced Seminar we trace the invention of India - as a concept - over time. We'll learn how the fabrication of India has proceeded through the centuries, and how the many meanings of "India" coalesce, nimbly side-stepping any popular or professional narrative of Indian history. Mobilizing an array of interdisciplinary tools, we will plot how the fetishization of "India" has itself become a flexible industry, how the management of Indian exceptionalism drives caste expansion. We'll study how the process renders certain subject positions and hierarchies as neutral and hegemonic while violently discarding others; how "India" is a product collectively manufactured, circulated, and consumed by a range of people around the world; the very real work of translation in bringing "India" into our everyday lives and imaginaries. This course fulfills the History major capstone requirement as an Advanced Seminar.

Same as L22 History 49SC

Credit 4 units. A&S IQ: HUM, LCD EN: H

L97 GS 49CA Advanced Seminar in History: Religion and the Secular: Struggles over Modernity

A generation ago, scholars and observers around the world felt assured that modernization would bring the quiet retreat of religion from public life. But the theory of secularization now stands debunked by world events, and a host of questions has been reopened. This course provides students with a forum to think through these issues as they prepare research papers on topics of their own choosing.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L97 GS 49MG Advanced Seminar in History: Planning Global Cities

This team-taught advanced seminar will address the history and theory of a variety of metropolitan environments from the mid-nineteenth century to the present. Readings will move from the nineteenth century state-centered urbanism of Paris or Vienna, through the colonial remaking of cities like Manila or Caracas

and their connections to urban reform and the City Beautiful movement in the U.S., then through the rise of planning, zoning, auto-centered cities, federal interventions like urban renewal, the emergence of the preservation movement and new urbanism. Same as L22 History 49MG
Credit 3 units.

L97 GS 49NR Advanced Sem in History: Egypt & the Arab Spring: Middle Eastern Revolution in Historical Perspective

The uprisings of the "Arab Spring" of 2011 captivated global media and observers. The movements brought down established regimes in Tunisia, Libya, Yemen, and Egypt. The focus of this course will be to understand the historical background and primary contemporary issues that have shaped Egypt's Arab Spring, and to examine the huge popular effort to document Egypt's revolution. Each student will design, research, and write a 25-page paper on a topic of his/her choice related to the Arab Spring.

Credit 3 units. A&S IQ: HUM, LCD EN: H

Concentration in Development

The Major in Global Studies — Concentration in Development

All societies change over time, sometimes for better and sometimes for worse. In this concentration, students explore different conceptions of development and consider why some societies develop while others languish. What accounts for disparities in longevity, wealth, and access to food and health care? How can we explain differences in extreme poverty, malnutrition, and treatable disease? Students consider how societies move from being heavily rural to having higher levels of urbanization. What explains differences in political, civil, and economic liberties? What accounts for differences in gender rights and opportunities? What are the implications of climate change and environmental distress?

Concentration objectives: The Global Studies concentration in development offers an interdisciplinary approach to examine why some societies develop politically, socially, and economically while others languish. Students can explore disparities in wealth, political freedoms, gender rights, urbanization, access to basic resources like food and health care, environmental conditions, and social justice.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.

- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of course work:

- 3 units of Research Methods course work (any level)
- 6 units of introductory course work (100-200 level) from two different academic disciplines
- 9 units of advanced course work from the Core Courses list (300-400 level)
- 15 units of advanced course work (300-400 level)
- 3 units of additional course work (any level)

Africa, East Asia, Europe, Latin America, the Middle East, South Asia and North America are considered world areas for the development concentration. A student must complete two courses in one of these world areas and one course in another world area.

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or world area). Some of these requirements may be completed while abroad (<https://ias.wustl.edu/study-abroad/>).

Introductory courses (choose two from this list, for a total of 6 units):

Code	Title	Units
AFAS 178	First-Year Seminar: Imagining and Creating Africa: Youth, Culture, and Change	3
AFAS 255	Introduction to Africana Studies	3
AMCS 250	Topics in Asian American Studies: Intro to Asian American & Pacific Islander Studies	3
Anthro 132	First-Year Seminar: Past Tense, Future Imperfect: The Rise and Fall of Societies & Global Civilization	3
Anthro 160B	Introduction to Cultural Anthropology	3
BEYOND 160	Gender, Youth, and Global Health	3
Biol 2950	Introduction to Environmental Biology	3
Chinese 227C	Chinese Civilization	3
Chinese 270	Sophomore Seminar: U.S.-China Relations: Perceptions and Realities	3
EPSc 111	Introduction to Global Climate Change in the 21st Century	3

EPSc 116A	Resources of the Earth	3
EPSc 201	Earth and the Environment	4
EPSc 219	Energy and the Environment	3
EPSc 221A	Human Uses of the Earth	3

GS 155	First-Year Seminar: Mapping the World: Introduction to Human Geography	3
GS 160	World Politics and the Global Economy	3
GS 207	Crossing Borders: An Introduction to Institutions and Concepts in Global Studies	3
GS 229	Modern European History: Migrations, Nation States, Identities	3
GS 244	Introduction to European Studies	3
History 102C	Western Civilization II	3
History 102D	Introduction to Modern European History	3
History 1500	Silver, Slaves and the State: Globalization in the 18th Century	3
History 164	Introduction to World History: The Second World War in World History	3

History 1640	Health and Disease in World History	3
History 2093	Mobilizing Shame: Violence, the Media and International Intervention	3
History 2119	First-Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities	3
History 2157	First-Year Seminar: The Meaning of Pakistan: History, Culture, Art	3
History 2171	Who Died and Made Them Kings? People, Politics and Power in the Atlantic World	3
History 2356	From St. Louis to Shanghai: Cities and Citizens in Global Urban History	3
History 270	Globalization and its Discontents	3
IPH 207C	Modern Political Thought: Text and Traditions	3
Japan 226C	Japanese Civilization	3
JIMES 210C	Introduction to Islamic Civilization	3
Korean 223C	Korean Civilization	3
LatAm 165D	Latin America: Nation, Ethnicity and Social Conflict	3
Math 1011	Introduction to Statistics	3
Math 2200	Elementary Probability and Statistics	3
MEC 290	Microeconomics	3
MEC 292	Global Economy	3
Phil 100G	Logic and Critical Analysis	3
Phil 131F	Present Moral Problems	3
Phil 233F	Biomedical Ethics	3
Phil 235F	Introduction to Environmental Ethics	3
Physics 171A	Physics and Society	3
Pol Sci 102B	Introduction to Comparative Politics	3
Pol Sci 103B	International Politics	3
Pol Sci 106	Introduction to Political Theory	3
Pol Sci 2010	Introduction to Environmental Policy	3
RelPol 290	Islamophobia & U.S. Politics	3
SOC 106	Social Problems and Social Issues	3
SOC 2010	The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S.	3
SOC 2030	Social Movements	3
SOC 2110	Social Inequality in America	3
URST 101	First-Year Seminar: Introduction to Urban Studies	3
WGSS 100B	Introduction to Women, Gender, and Sexuality Studies	3
WGSS 206	Sexuality and the State: Introduction to Sexuality Studies	3

Core courses (choose three from this list, for a total of 9 units):

Code	Title	Units
Anthro 3206	Global Gender Issues	3
Anthro 3283	Introduction to Global Health	3
Anthro 3391	Economies as Cultural Systems	3
Anthro 3612	Population and Society	3
Anthro 3874	International Public Health	3
Anthro 4022	Transnational Reproductive Health Issues: Meanings, Technologies, Practices	3
Econ 451	Environmental Policy	3
GS 3040	International Law and Politics	3
GS 314B	International Politics	3
GS 328B	Gateway to Development	3
GS 3575	U.S. Foreign Policy: Theory and Practice	3
GS 376	International Economics	3
GS 402	The Meaning of National Security in the 21st Century	3
GS 4141	International Relations	3
GS 4246	State Failure, State Success and Development	3
GS 4622	Labor and Labor Movements in Global History	3
GS 4761	Politics of Global Finance	3

Pol Sci 4271	Topics in Politics:	3
Pol Sci 495	Research Design and Methods	3
Psych 300	Introduction to Psychological Statistics	3
SOC 3050	Statistics for Sociology	3

Advanced courses: Choose five courses from current, relevant, internationally focused course offerings in the following departments.* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage (<http://ias.wustl.edu/development/>) and master course list for the full list of options.

- African and African-American Studies
- Anthropology
- Applied Linguistics
- Arabic
- Architecture
- Art History
- Biology and Biomedical Sciences
- Chinese
- Classics
- Comparative Literature
- Earth and Planetary Sciences
- East Asian Languages and Cultures
- Economics
- Education
- Environmental Studies
- Film and Media Studies
- Finance (Business School)
- German
- Global Studies
- History
- Interdisciplinary Studies
- Italian
- Jewish, Islamic, and Middle Eastern Studies
- Korean
- Latin American Studies
- Management (Business School)

- Philosophy
- Political Science
- Psychological and Brain Sciences
- Religion and Politics
- Religious Studies
- Russian
- Social Administration (Social Work)
- Sociology
- Spanish
- University College — International Affairs; International Studies; Nonprofit Management; Sustainability
- Women, Gender, and Sexuality Studies

* Students may submit a request to add a course by following the instructions for the Petition Process (<https://ias.wustl.edu/ias-course-petition/>).

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 300 or 400 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, University College, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit (<https://artsci.wustl.edu/resources/policies-procedures/#anchor-group-2886>) form with Arts & Sciences to take the course for "general credit" and then petition (<https://ias.wustl.edu/ias-course-petition/>) to have the course count toward their Global Studies major.

Latin Honors

- Students must confidently expect to graduate with an overall grade-point average of 3.65 or higher to qualify for Latin Honors.
- Students should enroll in GS 485 Preparation for Global Studies Honors Thesis during the fall of senior year and in GS 486 Global Studies Senior Honors Thesis during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

- All Global Studies majors must satisfy a language requirement that entails the successful completion of four semesters of one modern language appropriate to their concentration. For some students, this may mean the first four semesters of a language; for others who place into advanced language classes — and with approval from Global Studies language faculty — this may include literature, culture, oral communication, and linguistic courses in the target language, once such students complete the basic language sequence.
- Students are encouraged to study more than one language at Washington University, but they must satisfy their Global Studies language requirement by demonstrating competence in at least one language through the fourth semester. Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili. Students should consult the course listings (<https://acadinfo.wustl.edu/Courselistings/Courses.aspx?Mode=ILE>) for details about the language sequences. (On the "A&S IQ" tab, click on "Courses," and then toggle "Area Requirement" to "LS Language & Cultural Diversity-Language" and click "Search" to see a list of available language courses.)

With the permission of the major advisor, advanced literature and culture courses taught in the native language may be used to satisfy the Global Studies language requirement **and** may count as advanced elective credit as long as these courses are cross-listed with or approved for study abroad credit for the student's Global Studies concentration **and** provided the courses are not being counted toward any other degree.

Special note for Spanish learners: The following Spanish courses are **not** part of the regular sequence that are permitted to count toward the four semesters of language: Span 223 Intermediate Spanish Conversation and Culture, Span 351 Business Spanish, Span 353 Medical Spanish, and Span 355 Spanish for the Social Sciences. Some students might find these courses valuable for other reasons. For questions about this, students should consult with their major advisor.

Students With Prior Language Experience

Native speakers of a modern language: Students must satisfy the four-semester Global Studies language requirement in another language appropriate to their concentration.

Heritage speakers who do not have a native level of fluency: Students must seek appropriate placement by the coordinator of the language program and complete the four-semester Global Studies language requirement.

Transfer students who have taken language courses: A transfer student may receive credit for the courses as part of the four-semester Global Studies language requirement only if a placement exam is taken upon arrival at Washington University in the given language and the department/program determines that the student may progress to the next highest level of language instruction.

Students who take a language course at another institution (whether in the United States or abroad): A student may receive credit for the course as part of the four-semester Global Studies language requirement only if (1) the credit is transferred back as Washington University credit; and (2) the student takes a placement exam in the given language upon their return to Washington University and the department/program determines that the student may progress to the next highest level of language instruction.

Concentration in Eurasian Studies

The Major in Global Studies — Concentration in Eurasian Studies: New Silk Roads

This concentration focuses on the social, cultural, and economic interconnections among the peoples of Eurasia. We define Eurasia as the vast landmass stretching east to west from China to Europe and north to south from Siberia into the Caucasus, the Crimean Peninsula, Central Asia, and the Himalayas. Ancient trade routes that crisscrossed the interior spaces of Europe and Asia, known collectively as the Silk Road, served as a globalizing thoroughfare for the movement of peoples, cultural practices, religious values, and commodities. Recent infrastructural improvements in these areas — as well as international economic, environmental, and political concerns — have once again opened up transnational economic networks and cross-cultural exchange along these "new silk roads."

For this concentration, students draw from a variety of disciplines to study not only specific geographical regions but also vital intersections and interrelationships among regions and peoples.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of course work:

- 3 to 6 units of introductory course work (100-200 level)
- 30 to 33 units of advanced Eurasian studies course work (300-400 level) dealing with three different regions (e.g., Eastern, Western, and Central Eurasia) or with a transregional focus
- Students must fulfill the standard Global Studies language requirement (<https://ias.wustl.edu/ias-major-requirements/#secondary>) with Arabic, Chinese, Hebrew, Hindi, Persian, Russian or another Eurasian language as determined in consultation with their Global Studies advisor.

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or regional). Some of these requirements may be completed while abroad (<https://ias.wustl.edu/study-abroad/>).

Advanced courses: Choose 10 or 11 courses from current, relevant, internationally focused course offerings in the following areas of study.* All courses must be approved by the student's Global Studies advisor in order to count for the major.

* Students may submit a request to add a course by following the instructions for the Petition Process (<https://ias.wustl.edu/ias-course-petition/>).

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 300 or 400 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, University College, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit (<https://artsci.wustl.edu/resources/policies-procedures/#anchor-group-2886>) form with Arts & Sciences to take the course for "general credit" and then petition (<https://ias.wustl.edu/ias-course-petition/>) to have the course count toward their Global Studies major.

Latin Honors

- Students must confidently expect to graduate with an overall grade-point average of 3.65 or higher to qualify for Latin Honors.
- Students should enroll in GS 485 Preparation for Global Studies Honors Thesis during the fall of senior year and in GS 486 Global Studies Senior Honors Thesis during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

- All Global Studies majors must satisfy a language requirement that entails the successful completion of four semesters of one modern language appropriate to their concentration. For some students, this may mean the first four semesters of a language; for others who place into advanced language classes — and with approval from Global Studies language faculty — this may include literature, culture, oral communication, and linguistic courses in the target language, once such students complete the basic language sequence.
- Students are encouraged to study more than one language at Washington University, but they must satisfy their Global Studies language requirement by demonstrating competence in at least one language through the fourth semester. Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili. Students should consult the course listings (<https://acadinfo.wustl.edu/Courselistings/Courses.aspx?Mode=ILE>) for details about the language sequences. (On the "A&S IQ" tab, click on "Courses," and then toggle "Area Requirement" to "LS Language & Cultural Diversity-Language" and click "Search" to see a list of available language courses.)

With the permission of the major advisor, advanced literature and culture courses taught in the native language may be used to satisfy the Global Studies language requirement **and** may count as advanced elective credit as long as these courses are cross-listed with or approved for study abroad credit for the student's Global Studies concentration **and** provided the courses are not being counted toward any other degree.

Special note for Spanish learners: The following Spanish courses are **not** part of the regular sequence that are permitted to count toward the four semesters of language: Span 223 Intermediate Spanish Conversation and Culture, Span 351 Business Spanish, Span 353 Medical Spanish, and Span 355 Spanish for the Social Sciences. Some students might find these courses valuable for other reasons. For questions about this, students should consult with their major advisor.

Students With Prior Language Experience

Native speakers of a modern language: Students must satisfy the four-semester Global Studies language requirement in another language appropriate to their concentration.

Heritage speakers who do not have a native level of fluency: Students must seek appropriate placement by the coordinator of the language program and complete the four-semester Global Studies language requirement.

Transfer students who have taken language courses: A transfer student may receive credit for the courses as part of the four-semester Global Studies language requirement only if a placement exam is taken upon arrival at Washington University in the given language and the department/program determines that the student may progress to the next highest level of language instruction.

Students who take a language course at another institution (whether in the United States or abroad): A student may receive credit for the course as part of the four-semester Global Studies language requirement only if (1) the credit is transferred back as Washington University credit; and (2) the student takes a placement exam in the given language upon their return to Washington University and the department/program determines that the student may progress to the next highest level of language instruction.

Concentration in European Studies

The Major in Global Studies — Concentration in European Studies

This concentration focuses on the new Europe and its historical and cultural contexts, attempting to understand the European contribution to world politics and cultural exchange. It involves the study of both traditional and new European cultural products (e.g., literature, film, visual art, electronic media) as well as of European institutions and contexts. This concentration will educate students interested in understanding Europe for its own sake but also help them to discover the ways in which the continent connects with other parts of the world. The concentration is committed to interdisciplinary approaches, and students may take courses in the traditional language-and-literature disciplines as well as in anthropology, art history, economics, film, history, music, philosophy, and political science.

The concentration defines the geography of modern Europe to include the Atlantic world as well as its Eurasian and Mediterranean neighbors.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of course work:

- 3 units of introductory course work (100 or 200 level)
- 3 units of European history course work (300 level or above from history department offerings on Europe [from 1750 forward])
- 3 units of non-European world area course work (any level)
- 27 units of advanced European studies course work (300-400 level; at least one course must focus on gender, race, or class)
- Students must fulfill the standard Global Studies language requirement (<https://ias.wustl.edu/ias-major-requirements/#secondary>) with a European language consistent with their study abroad location (e.g., French, German, Italian, Portuguese, Spanish).

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary; race, gender, class; or world area). Some of these requirements may be completed while abroad (<https://ias.wustl.edu/study-abroad/>).

Introductory course work (choose one from this list, for a total of 3 units):

Code	Title	Units
GS 207	Crossing Borders: An Introduction to Institutions and Concepts in Global Studies	3
GS 244	Introduction to European Studies	3
History 102C	Western Civilization II	3
History 102D	Introduction to Modern European History	3
History 229	Modern European History: Migrations, Nation States, Identities	3

Non-European area course work (3 units):

We consider world areas to be Africa, East Asia, Latin America, the Middle East, and South Asia. Courses that may be used to satisfy this requirement may include advanced area-specific courses or the following lower-level courses:

Code	Title	Units
AFAS 209B	African Studies: An Introduction	3
AFAS 2230	The African Diaspora: Black Internationalism Across Time and Space	3
AMCS 250	Topics in Asian American Studies: Introduction to Asian American and Pacific Islander Studies	3
Art-Arch 111	Introduction to Asian Art	3
East Asia 227C	Chinese Civilization	3
GS 135	First-Year Seminar: Chinatown: Migration, Identity, and Space	3
GS 140	East Asia in the World	3
GS 280	Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film	3
History 2157	First-Year Seminar: The Meaning of Pakistan: History, Culture, Art	3
History 2171	Who Died and Made Them Kings? People, Politics and Power in the Atlantic World	3
Japan 226C	Japanese Civilization	3
JIMES 208F	Introduction to Jewish Civilization: History and Identity	3
JIMES 210C	Introduction to Islamic Civilization	3
Korean 223C	Korean Civilization	3
LatAm 165D	Latin America: Nation, Ethnicity and Social Conflict	3

Advanced course work: Students choose nine courses from current European-focused course offerings in the following departments.* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage (<http://ias.wustl.edu/european-studies/>) and master course list for the full list of options.

- African and African-American Studies
- Anthropology
- Applied Linguistics
- Art History
- Classics
- Drama
- Economics
- Education
- Film and Media Studies

- Global Studies
- History
- Interdisciplinary Project in the Humanities
- Jewish, Islamic and Middle Eastern Studies
- Languages and Literatures
- Music
- Philosophy
- Political Science
- Sociology
- Women, Gender, and Sexuality Studies

* Students may submit a request to add a course by following the instructions for the Petition Process (<https://ias.wustl.edu/ias-course-petition/>).

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 300 or 400 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, University College, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit (<https://artsci.wustl.edu/resources/policies-procedures/#anchor-group-2886>) form with Arts & Sciences to take the course for "general credit" and then petition (<https://ias.wustl.edu/ias-course-petition/>) to have the course count toward their Global Studies major.

Latin Honors

- Students must confidently expect to graduate with an overall grade-point average of 3.65 or higher to qualify for Latin Honors.
- Students should enroll in GS 485 Preparation for Global Studies Honors Thesis during the fall of senior year and in GS 486 Global Studies Senior Honors Thesis during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

- All Global Studies majors must satisfy a language requirement that entails the successful completion of four semesters of one modern language appropriate to their concentration. For some students, this may mean the first four semesters of a language; for others who place into advanced language classes — and with approval from Global Studies language faculty — this may include literature, culture, oral communication, and linguistic courses in the target language, once such students complete the basic language sequence.
- Students are encouraged to study more than one language at Washington University, but they must satisfy their Global Studies language requirement by demonstrating competence in at least one language through the fourth semester. Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili. Students should consult the course listings (<https://acadinfo.wustl.edu/Courselistings/Courses.aspx?Mode=ILE>) for details about the language sequences. (On the "A&S IQ" tab, click on "Courses," and then toggle "Area Requirement" to "LS Language & Cultural Diversity-Language" and click "Search" to see a list of available language courses.)

With the permission of the major advisor, advanced literature and culture courses taught in the native language may be used to satisfy the Global Studies language requirement **and** may count as advanced elective credit as long as these courses are cross-listed with or approved for study abroad credit for the student's Global Studies concentration **and** provided the courses are not being counted toward any other degree.

Special note for Spanish learners: The following Spanish courses are **not** part of the regular sequence that are permitted to count toward the four semesters of language: Span 223 Intermediate Spanish Conversation and Culture, Span 351 Business Spanish, Span 353 Medical Spanish, and Span 355 Spanish for the Social Sciences. Some students might find these courses valuable for other reasons. For questions about this, students should consult with their major advisor.

Students With Prior Language Experience

Native speakers of a modern language: Students must satisfy the four-semester Global Studies language requirement in another language appropriate to their concentration.

Heritage speakers who do not have a native level of fluency: Students must seek appropriate placement by the coordinator of the language program and complete the four-semester Global Studies language requirement.

Transfer students who have taken language courses: A transfer student may receive credit for the courses as part of the four-semester Global Studies language requirement only if a placement exam is taken upon arrival at Washington University in the given language and the department/program determines that the student may progress to the next highest level of language instruction.

Students who take a language course at another institution (whether in the United States or abroad): A student may receive credit for the course as part of the four-semester Global Studies language requirement only if (1) the credit is transferred back as Washington University credit; and (2) the student takes a placement exam in the given language upon their return to Washington University and the department/program determines that the student may progress to the next highest level of language instruction.

Concentration in Global Asia

The Major in Global Studies — Concentration in Global Asia

"Global Asia" provides the means for students to study Asia transnationally and transculturally, thereby expanding the geographic concept of the region beyond a set of political entities occupying a specific world region. East Asia, South Asia, Southeast Asia, Central Asia, and the Asian diaspora are all part of this concentration, with the goal of recognizing that the flows of people, objects, ideas, and practices of Asia have spread across the region and around the globe. Drawing on a range of approaches, the Global Asia concentration provides the means to study "Asia" in its many manifestations — in the past and in the present — in our world today.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.

- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of course work:

- 3 units of introductory course work (100-200 level)
- 6 units of multiethnic, diaspora, transnational, or transregional Asia-related course work (at least 3 units at the 300-400 level)
- 24 units of advanced Global Asia course work (300-400 level; at least one course must focus on premodern Asia [pre-1850])
- 3 units of core course work: GS 4976 Global Asia
- East Asia, North Asia, South Asia, Southeast Asia, Central Asia, and the Asian diaspora are the relevant areas for the Global Asia concentration. A student must complete one course in at least three of these areas or with a transregional focus.
- Students must fulfill the standard Global Studies language requirement (<https://ias.wustl.edu/ias-major-requirements/#secondary>) with Arabic, Chinese, Hindi, Japanese, Korean, or Urdu. Russian may be considered upon petition if a student is a native speaker of one of the listed languages or has tested into the fourth year of one of the listed languages.

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or regional). Some of these requirements may be completed while abroad (<https://ias.wustl.edu/study-abroad/>).

Introductory courses (choose one from this list, for a total of 3 units):

Code	Title	Units
Art-Arch 111	Introduction to Asian Art	3

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 300 or 400 level is required.

- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, University College, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit (<https://artsci.wustl.edu/resources/policies-procedures/#anchor-group-2886>) form with Arts & Sciences to take the course for "general credit" and then petition (<https://ias.wustl.edu/ias-course-petition/>) to have the course count toward their Global Studies major.

Latin Honors

- Students must confidently expect to graduate with an overall grade-point average of 3.65 or higher to qualify for Latin Honors.
- Students should enroll in GS 485 Preparation for Global Studies Honors Thesis during the fall of senior year and in GS 486 Global Studies Senior Honors Thesis during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

- All Global Studies majors must satisfy a language requirement that entails the successful completion of four semesters of one modern language appropriate to their concentration. For some students, this may mean the first four semesters of a language; for others who place into advanced language classes — and with approval from Global Studies language faculty — this may include literature, culture, oral communication, and linguistic courses in the target language, once such students complete the basic language sequence.
- Students are encouraged to study more than one language at Washington University, but they must satisfy their Global Studies language requirement by demonstrating competence in at least one language through the fourth semester. Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili. Students should consult the course listings (<https://acadinfo.wustl.edu/Courselistings/Courses.aspx?Mode=ILE>) for details about the language sequences.

(On the "A&S IQ" tab, click on "Courses," and then toggle "Area Requirement" to "LS Language & Cultural Diversity-Language" and click "Search" to see a list of available language courses.)

With the permission of the major advisor, advanced literature and culture courses taught in the native language may be used to satisfy the Global Studies language requirement **and** may count as advanced elective credit as long as these courses are cross-listed with or approved for study abroad credit for the student's Global Studies concentration **and** provided the courses are not being counted toward any other degree.

Special note for Spanish learners: The following Spanish courses are **not** part of the regular sequence that are permitted to count toward the four semesters of language: Span 223 Intermediate Spanish Conversation and Culture, Span 351 Business Spanish, Span 353 Medical Spanish, and Span 355 Spanish for the Social Sciences. Some students might find these courses valuable for other reasons. For questions about this, students should consult with their major advisor.

Students With Prior Language Experience

Native speakers of a modern language: Students must satisfy the four-semester Global Studies language requirement in another language appropriate to their concentration.

Heritage speakers who do not have a native level of fluency: Students must seek appropriate placement by the coordinator of the language program and complete the four-semester Global Studies language requirement.

Transfer students who have taken language courses: A transfer student may receive credit for the courses as part of the four-semester Global Studies language requirement only if a placement exam is taken upon arrival at Washington University in the given language and the department/program determines that the student may progress to the next highest level of language instruction.

Students who take a language course at another institution (whether in the United States or abroad): A student may receive credit for the course as part of the four-semester Global Studies language requirement only if (1) the credit is transferred back as Washington University credit; and (2) the student takes a placement exam in the given language upon their return to Washington University and the department/program determines that the student may progress to the next highest level of language instruction.

Concentration in Global Cultural Studies

The Major in Global Studies — Concentration in Global Cultural Studies

The concentration in Global Cultural Studies focuses on the practical and theoretical issues arising from cross-cultural encounters around the world. Students will study these by both examining conventional cultural products (e.g., literature, film, visual art, new media) and investigating their broader political and social contexts. This concentration addresses compelling issues of cultural interchange for students interested in cultures for their own sake as well as in careers in NGOs and international business and law. This concentration is committed to interdisciplinary approaches to contemporary problems. Students may take courses in the language and literature disciplines as well as in anthropology, art history, film, history, music, religious studies, and women, gender, and sexuality studies.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.
- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of course work:

- 6 units of disciplinary introductions and methods course work (from two different disciplines; 100-200 level)
- 6 units of world area course work (any level)
- 24 units of advanced course work (at least one course must focus on gender, race, or class) (300-400 level)

Africa, East Asia, Europe, Latin America, the Middle East, South Asia and North America are considered world areas for the Global Cultural Studies concentration. A student must complete two courses in one of these world areas and one course in another world area.

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary; gender, race, class; or world area). Some of these requirements may be completed while abroad (<https://ias.wustl.edu/study-abroad/>).

Disciplinary introductions and methods courses (choose two from this list,* for a total of 6 units):

Code	Title	Units
AFAS 255	Introduction to Africana Studies	3
Anthro 160B	Introduction to Cultural Anthropology	3

With the permission of the major advisor, advanced literature and culture courses taught in the native language may be used to satisfy the Global Studies language requirement **and** may count as advanced elective credit as long as these courses are cross-listed with or approved for study abroad credit for the student's Global Studies concentration **and** provided the courses are not being counted toward any other degree.

Special note for Spanish learners: The following Spanish courses are **not** part of the regular sequence that are permitted to count toward the four semesters of language: Span 223 Intermediate Spanish Conversation and Culture, Span 351 Business Spanish, Span 353 Medical Spanish, and Span 355 Spanish for the Social Sciences. Some students might find these courses valuable for other reasons. For questions about this, students should consult with their major advisor.

Students With Prior Language Experience

Native speakers of a modern language: Students must satisfy the four-semester Global Studies language requirement in another language appropriate to their concentration.

Heritage speakers who do not have a native level of fluency: Students must seek appropriate placement by the coordinator of the language program and complete the four-semester Global Studies language requirement.

Transfer students who have taken language courses: A transfer student may receive credit for the courses as part of the four-semester Global Studies language requirement only if a placement exam is taken upon arrival at Washington University in the given language and the department/program determines that the student may progress to the next highest level of language instruction.

Students who take a language course at another

institution (whether in the United States or abroad): A student may receive credit for the course as part of the four-semester Global Studies language requirement only if (1) the credit is transferred back as Washington University credit; and (2) the student takes a placement exam in the given language upon their return to Washington University and the department/program determines that the student may progress to the next highest level of language instruction.

Concentration in International Affairs

The Major in Global Studies — Concentration in International Affairs

Why do states, nations, and societies cooperate, compromise, and fight? Living and working in our rapidly changing global arena presents great opportunities to advance the human condition, improve political and civil liberties, recast bargains between governments and their societies, transform social welfare, and advance the boundaries of knowledge and scientific exploration. Yet, this same context presents great risks as people fear loss of identity, worry about economic subordination and loss to those beyond their borders, encounter the export of environmental degradation, and confront potential decline in personal and social autonomy. Students can explore the heightened economic, political, social, cultural, and environmental interdependence that generates prospects for cooperation; at the same time, this interdependence involves serious challenges, which create the possibility for conflict but also for compromise.

Concentration objectives: The concentration in International Affairs offers an interdisciplinary approach to understanding relations between societies. It provides opportunities to examine complex global issues and processes from multiple perspectives and to help understand the fundamental processes of cooperation, compromise, and conflict in the global arena. The program provides students with knowledge and skills for understanding and working with difficult international and cross-cultural problems that states, societies, and communities face.

General Requirements

One semester of language must be completed before declaring the major.

- Students must complete a minimum of 36 units in Global Studies, including at least three courses focused on a world area.
- Students must complete at least 24 units at the 300 level or above, including courses across a minimum of three academic disciplines.

- Students must complete at least 6 units at the 400 level, no more than 3 of which may be directed research or independent study.
- In addition to the 36 units, students must complete a four-semester sequence of courses in one modern language appropriate to their concentration.

These requirements may be fulfilled only with college-level course work undertaken during a student's undergraduate enrollment. Courses must be taken for a grade, and a student must receive a grade of C+ or higher in all courses.

This concentration requires 36 units of course work:

- 3 units of Research Methods course work (any level)
- 6 units of introductory course work (100-200 level) from two different academic disciplines
- 9 units of advanced course work from the Core Courses list (300-400 level)
- 15 units of advanced course work (300-400 level)
- 3 units of additional course work (any level)

Africa, East Asia, Europe, Latin America, the Middle East, South Asia and North America are considered world areas for the International Affairs concentration. A student must complete two courses in one of these world areas and one course in another world area.

Note: A single course may satisfy more than one of the distribution requirements (i.e., disciplinary or world area). Some of these requirements may be completed while abroad (<https://ias.wustl.edu/study-abroad/>).

Advanced courses: Choose five courses from current, relevant, internationally focused course offerings in the following departments.* All courses must be approved by the student's Global Studies advisor in order to count for the major. Visit the concentration webpage (<http://ias.wustl.edu/international-affairs/>) and master course list for the full list of options.

- African and African-American Studies
- Anthropology
- Applied Linguistics
- Arabic
- Architecture
- Art History
- Biology and Biomedical Sciences
- Chinese
- Classics
- Comparative Literature
- Earth and Planetary Science
- East Asian Languages and Cultures
- Economics
- Education
- Environmental Studies
- Film and Media Studies
- Finance (Olin Business School)
- German
- Global Studies
- History
- Italian
- Jewish, Islamic and Middle Eastern Cultures
- Korean
- Latin American Studies
- Management (Olin Business School)
- Philosophy

- Political Science
- Psychological and Brain Sciences
- Religion and Politics
- Religious Studies
- Russian
- Sociology
- Spanish
- University College — Geographic Information Systems; International Affairs; International Studies; Sustainability
- Women, Gender, and Sexuality Studies

* Students may submit a request to add a course by following the instructions for the Petition Process (<https://ias.wustl.edu/ias-course-petition/>).

Additional Requirements and Information

Study Abroad

- We strongly encourage students to study abroad. For those who do not study abroad and receive credit toward the Global Studies General Requirements, an additional 3-unit course at the 300 or 400 level is required.
- We strongly prefer students to select a study abroad location and regional specialization consistent with their chosen language of study (e.g., if a student wishes to study in Latin America, they must satisfy their language requirement with either Portuguese or Spanish).
- Students may receive a maximum of 6 credits from a single semester, 12 credits from a year, or 3 credits from a summer term of study abroad.
- Students may apply no more than 12 total credits to the Global Studies major from study abroad, University College, summer school at other U.S. universities, or any combination thereof.
- To receive credit for a summer course completed at another institution, a student should fill out the Approval for Non-WashU Course Credit (<https://artsci.wustl.edu/resources/policies-procedures/#anchor-group-2886>) form with Arts & Sciences to take the course for "general credit" and then petition (<https://ias.wustl.edu/ias-course-petition/>) to have the course count toward their Global Studies major.

Latin Honors

- Students must confidently expect to graduate with an overall grade-point average of 3.65 or higher to qualify for Latin Honors.
- Students should enroll in GS 485 Preparation for Global Studies Honors Thesis during the fall of senior year and in GS 486 Global Studies Senior Honors Thesis during the spring of senior year (under the corresponding section number of the faculty member overseeing the student's thesis).

Language Requirement

- All Global Studies majors must satisfy a language requirement that entails the successful completion of four semesters of one modern language appropriate to their concentration. For some students, this may mean the first four semesters of a language; for others who place into advanced language classes — and with approval from Global Studies language faculty — this may include literature, culture, oral communication, and linguistic courses in the target language, once such students complete the basic language sequence.
- Students are encouraged to study more than one language at Washington University, but they must satisfy their Global Studies language requirement by demonstrating competence in at least one language through the fourth semester. Available modern languages include Arabic, Chinese, French, German, Hebrew, Hindi, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and Swahili. Students should consult the course listings (<https://acadinfo.wustl.edu/Courselistings/Courses.aspx?Mode=ILE>) for details about the language sequences. (On the "A&S IQ" tab, click on "Courses," and then toggle "Area Requirement" to "LS Language & Cultural Diversity-Language" and click "Search" to see a list of available language courses.)

With the permission of the major advisor, advanced literature and culture courses taught in the native language may be used to satisfy the Global Studies language requirement **and** may count as advanced elective credit as long as these courses are cross-listed with or approved for study abroad credit for the student's Global Studies concentration **and** provided the courses are not being counted toward any other degree.

Special note for Spanish learners: The following Spanish courses are **not** part of the regular sequence that are permitted to count toward the four semesters of language: Span 223 Intermediate Spanish Conversation and Culture, Span 351 Business Spanish, Span 353 Medical Spanish, and Span 355 Spanish for the Social Sciences. Some students might find these courses valuable for other reasons. For questions about this, students should consult with their major advisor.

Students With Prior Language Experience

Native speakers of a modern language: Students must satisfy the four-semester Global Studies language requirement in another language appropriate to their concentration.

Heritage speakers who do not have a native level of fluency: Students must seek appropriate placement by the coordinator of the language program and complete the four-semester Global Studies language requirement.

Transfer students who have taken language courses: A transfer student may receive credit for the courses as part of the four-semester Global Studies language requirement only if a placement exam is taken upon arrival at Washington University in the given language and the department/program determines that the student may progress to the next highest level of language instruction.

Students who take a language course at another institution (whether in the United States or abroad): A student may receive credit for the course as part of the four-semester Global Studies language requirement only if (1) the credit is transferred back as Washington University credit; and (2) the student takes a placement exam in the given language upon their return to Washington University and the department/program determines that the student may progress to the next highest level of language instruction.

Greek

The Department of Classics offers courses in ancient Greek to allow students to pursue deeper study of Greek history, literature and culture. Students may choose between two beginning Greek tracks that will allow them, within four semesters, to master the grammar and to read Plato and Homer. Thereafter, students have the opportunity to study numerous Greek authors and texts, including poetry, drama, history, novels, the New Testament and inscriptions. They also have the opportunity to do their own research and to assist with faculty members' research projects. The Department of Classics offers a variety of courses in Greek and Roman history, literature, archaeology and culture to build students' broader knowledge of the ancient Mediterranean world. Resources on campus that support the study of ancient Greek and the Greeks include collections of Greek papyri and art and the Wulffing Coin Collection, which is one of the largest collections of ancient coins owned by an American university.

Additional Information

Study Abroad: Washington University is associated with both the Intercollegiate Center for Classical Studies (https://sa.wustl.edu/?FuseAction=Programs.ViewProgram&Program_ID=10117) (a.k.a. "The Centro") in Rome and the College Year in Athens program (https://sa.wustl.edu/?FuseAction=Programs.ViewProgram&Program_ID=10112).

Interested students should contact Professor Cathy Keane (<https://classics.wustl.edu/people/cathy-keane/>). Some other study abroad programs also allow students to obtain credit in Greek.

Phone: 314-935-5123

Faculty

For a list of faculty who teach Greek, please visit the Department of Classics faculty page (p. 442).

Majors

Students interested in Greek should explore either the major in Classics (p. 443) or the major in Ancient Studies (p. 443) offered through the Department of Classics (p. 442).

Minors

Students interested in Greek should explore either the minor in Classics (p. 444) or the minor in Ancient Studies (p. 444) offered through the Department of Classics (p. 442).

Courses

Visit online course listings to view semester offerings for L09 Greek (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L09&crslvl=1:4>).

L09 Greek 101D Beginning Greek I

An introduction to Classical Greek (Attic), which will prepare the student to read texts in Greek history, philosophy, and medicine as well as the New Testament. This course builds the foundations for readings in Greek tragedy, comedy, and lyric poetry. Our goal will be to develop reading knowledge as rapidly and efficiently as possible. By the end of the year the student should be reading continuous Greek prose.

Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L09 Greek 102D Beginning Greek II

Continuation of the program begun in Greek 101D. Students will complete their initial study of Classical Greek grammar and will begin reading selections from ancient Greek authors. Prerequisite: Greek 101D or permission of the instructor.

Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L09 Greek 190D Intensive Beginning Greek I

An intensive study of Attic Greek.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L09 Greek 210 Intensive Beginning Greek II

Completion of work begun in Greek 190D followed by readings in original Greek poetry and prose. Successful completion of Greek 210 will allow the student to proceed directly to Greek 318C.

Prerequisite: Greek 190D or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L09 Greek 317C Introduction to Greek Literature

Introduction to Attic prose through the reading of Plato's *Apology* and related texts. Prerequisite: Greek 102D or placement by examination.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

L09 Greek 318C Introduction to Greek Literature

Introduction to epic poetry through the reading of selections from Homer's *Iliad* and *Odyssey*. Prerequisite: Greek 210, Greek 316C or Greek 317C.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

L09 Greek 400 Independent Study

Credit 3 units. A&S IQ: HUM EN: H

L09 Greek 416 Hesiod

In this course, we will read substantial passages from the works attributed to Hesiod, an archaic period Greek poet whose style and subject matter are often contrasted to Homer, and whose influence on Greek literary culture was second only to Homer's. Hesiod's two major poems - *Theogony* and *Works and Days* - form important evidence for the Greek rhapsodic tradition, and the mythological content and compressed styles of these mini-epics strongly influenced later Hellenistic Greek and Roman poets. Through discussion of readings from recent scholarship, we will consider topics including the authorship and dating of the Hesiodic corpus, Hesiod's Near-Eastern influences, oral poetics, mythography, genre studies, and narratology. Preparation of substantial Greek reading assignments will be supplemented with frequent practice of scansion (both written and oral) and the parallel development of sight translation skills. Students will be responsible for the development of a portfolio consisting of written translations, creative and interpretive mini-projects, a commentary, and an original research project.

Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H

L09 Greek 421 Sophocles

In this course, we will read closely two plays by Sophocles: "Oedipus Rex" and "Trachinian Women."

Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM EN: H

L09 Greek 422 Euripides

The tragedies of Euripides are among the most powerful dramas ever produced. In this class we will read one or more plays of Euripides in Greek as well as scholarly works on the tragedies. Among the topics discussed will be language and style, meter and music, mythological and historical backgrounds, elements of performance, and Euripides' influence in the modern world. Prerequisites: Greek 318C or permission of the instructor and sophomore standing or above.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

L09 Greek 423 Aeschylus

This course will focus on Aeschylus' *Seven Against Thebes* and on *Prometheus Bound*; in addition, we will look at a few fragmentary plays. Readings will include relevant secondary literature.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

L09 Greek 431 Thucydides

Credit 3 units. A&S IQ: HUM

L09 Greek 432 The Attic Orators

More than mere prose, Attic oratory consists of a rich body of literature in which style was paramount to its persuasive aims, and provides vital evidence for Athenian culture, politics, mores, institutions, thought and history. This course will survey a representative — and important — sample of forensic, epideictic, and symbouleutic speeches from classical Athenian oratory, and will give special attention to the social, legal and political context of these speeches. In addition, the class will focus on improving students' command of syntax, vocabulary and idiom as the basis for further development as well as the study of different orators and their style.

Credit 3 units. A&S IQ: HUM, LCD, LS EN: H

L09 Greek 437 Topics in Greek Poetry

Reading in Greek and discussion of one or more texts by one or more ancient Greek poets. May be repeated for credit for study of different texts.

Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM EN: H

L09 Greek 438W Topics in Greek Literature

Advanced Greek seminars with enhanced writing requirements may be taken under this designation as writing-intensive courses. Required: permission of instructor.

Credit 3 units. A&S IQ: HUM

L09 Greek 439 The Greek Novel

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L09 Greek 440 Lucian

Lucian's *True Histories* is neither true, nor a history, but it is often called the first science fiction novel. Lucian's voice is one of the most distinctive in antiquity: wry, sarcastic, and too clever by half. He feels distinctly modern but is steeped in the literary tradition before him. In this class, we will read his *True Histories* and several other of his works, with a focus on his questions about truth and fiction, and his engagement with other genres of writing, including historiography, epic, philosophy and rhetoric. We also read about the first journey to the moon.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L09 Greek 445 Greek Prose Composition

The tradition of writing in Attic Greek stretches from classical antiquity to the present. In this course, students will become connoisseurs of that tradition and enter into it themselves. In the process, they will become better Hellenists. Each week, students will review points of Greek grammar, compose Greek sentences illustrating those points, read and analyze the style of a Greek passage, and write an original Greek composition of their own device. We will focus not only on grammatical and idiomatic accuracy but also on elegance of style. In this course, students will develop a more nuanced understanding of the Attic Greek language in all its many-splendored glory. They will thereby

increase their ability to read ancient Greek with depth, ease, and pleasure. Prerequisite: Greek 317C and Greek 318C or equivalent and sophomore standing or higher. Note: This course is required for MA and PhD students in Classics.

Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H

L09 Greek 451 Plato

This course will focus on a set of Plato's dialogues known as his Early Dialogues. We will read two and perhaps three of the Euthyphro, Protagoras, and Meno in Greek. We will accompany these readings with a relatively small sample of secondary scholarship in English that aims at contextualizing the dialogues in the broader scope of Plato's work. Our aim will be to gain familiarity with Plato as a prose author as well as a philosophical thinker.

Credit 3 units. A&S IQ: HUM EN: H

L09 Greek 460 There Be Dragons: Greek Encounters with the Unknown in History and Legend

How did ancient Greeks imagine their world, both in terms of geography and ethnography? What did they know — or think they knew — about foreign cultures and faraway lands such as India, Persia, Africa, and the distant north? How have their representations of foreigners influenced European conceptions of the self and others, even into our own time? This course examines these questions by focusing primarily on two foundational authors: first, Herodotus, the "father of history," who provides a wealth of information about ancient geography and the customs and lifestyles of non-Greek peoples; and second, Apollonius of Rhodes, whose epic poem "The Argonautica" tells the legendary tale of Jason and the Argonauts' search for the Golden Fleece. We will read extensive passages of these books in ancient Greek and, we will read and discuss additional passages in English translation, along with modern scholarship and atlases with historical and modern maps.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L09 Greek 471 Galen's "On Prognosis": A Social History of Medicine in Second-Century Rome

Galen of Pergamum was a Greek physician, philosopher, and intellectual active throughout most of the second century CE. He was also a voracious reader and writer of Greek literature; his surviving work far exceeds the extant output of any other Greek author before the third century CE. In this course, we will be reading Galen's treatise "On Prognosis," in which he recounts his career in the city of Rome, from his arrival in the early 160s through his tenure as an imperial physician to at least the emperors Marcus Aurelius and Commodus. While ostensibly a medical account, "On Prognosis" has little to say on technical medical issues. Rather, Galen's story is a carefully constructed professional autobiography that pivots from searing denunciations of Roman life to tense public performances of medical expertise and finally to intimate case histories of Rome's rich and powerful. The text presents us a fascinating window through which to examine not only the social practice of elite medicine in Rome of the second century but also the complicated experience of a Greek intellectual navigating the corridors of the Imperial court. Course goals include improving accuracy and speed in reading Greek prose, acquiring greater familiarity with intellectual discourse of the Imperial Period, and training in methods of research and writing.

Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM, IS EN: H

L09 Greek 497 Study for Honors

Students interested in pursuing honors should consult the director of undergraduate studies in the Department of Classics.
Prerequisite: overall GPA of 3.65.
Credit 3 units. A&S IQ: HUM EN: H

L09 Greek 499 Study for Honors

Students interested in pursuing honors should consult the director of undergraduate studies in the Department of Classics.
Prerequisite: overall GPA of 3.65.
Credit 3 units. A&S IQ: HUM EN: H

Hebrew

The Department of Jewish, Islamic, and Middle Eastern Studies offers a major and a minor in Hebrew. As majors in Hebrew, students can expect to gain proficiency in the language, study the area's literary and cultural landmarks, and gain familiarity with Jewish and Middle Eastern history and civilizations.

Language Placement: Placement tests are required for all students entering our language programs. Students may be eligible for up to 6 units of back credit based on advanced placement and successful completion of the recommended course. Native speakers are not eligible for back credit; evidence of secondary or postsecondary study of the language is required. Any units received from back credit cannot be counted toward the major or minor.

Majors

The Major in Hebrew

Units required: 24 advanced, in addition to prerequisites

Prerequisites:

- 100- and 200-level Hebrew, by course work or by placement. (A student who skips the first four semesters of language courses by placement must successfully complete HBRW 320D Third-Level Modern Hebrew I or HBRW 384 Introduction to Biblical Hebrew. Students who complete the third-level language course with a grade of B- or better will receive 6 units of back credit.)
- JIMES 210C Introduction to Islamic Civilization and JIMES 208F Introduction to Jewish Civilization: History and Identity. (Students with substantial prior course work may substitute an additional upper-level course with permission of their advisor and the director of undergraduate studies.)

Requirements:

- 12 credits in 300- and 400-level language courses
- 6 credits in other 300- and 400-level JIMES courses, distributed as the student wishes
- At least 3 credits at the 300- and 400-level courses in a JIMES culture other than that of the selected language tradition
- 3 credits in a departmental capstone course to be taken during the senior year. (Students may take this course during their junior year with permission of their advisor and the director of undergraduate studies.)

Additional Information

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester can earn a maximum of 9 credits subject to review by their advisor and the director of undergraduate studies. Summer programs and transfer courses can be granted as many as 6 credits subject to review by the student's advisor and the director of

undergraduate studies. A limit of 9 credits in total can be applied to the major, whether the credits are earned in study abroad or summer programs or via transfer credit. For more information about preapproved study abroad programs, please visit the Jewish, Islamic, and Middle Eastern Studies Study Abroad Programs website (<https://jimes.wustl.edu/studyabroad/>).

Students must maintain an average of B in all courses for the major. A grade of B- or higher must be earned in each language course in order to advance to the next level.

No course taken pass/fail can count toward the prerequisites or the major.

A student may request credit for courses taken outside of the department (other than those that are cross-listed) by seeking the permission of the director of undergraduate studies and the department chair.

To be eligible to write a senior thesis, a student must maintain a grade-point average of 3.65 through the sixth semester. Senior thesis writers should sign up for an appropriate 3-credit course during both the fall and spring semesters. (The 6 credits from these courses can be applied to the primary area of study.)

Minors

The Minor in Hebrew

The minor in Hebrew requires a minimum of 9 units at the 300 level or above and a minimum of 18 total units. The goal of the minor is language proficiency at the 200 level or above. Students placing into HBRW 214D Intermediate Modern Hebrew II or above must complete two consecutive semesters of language instruction at Washington University to fulfill the language requirement.

Units required: 18 units, in addition to prerequisites

Language Prerequisites:

- HBRW 105D Beginning Modern Hebrew I and HBRW 106D Beginning Modern Hebrew II, by course work or by placement

Language Requirements:

- HBRW 213D Intermediate Modern Hebrew I and HBRW 214D Intermediate Modern Hebrew II, by course work *or*
- If placed into HBRW 214D Intermediate Modern Hebrew II or above, two consecutive semesters of language instructions at Washington University

Required Foundational Course:

Choose one of the following courses:

- JIMES 210C Introduction to Islamic Civilization
- JIMES 208F Introduction to Jewish Civilization: History and Identity

Electives:

- 9 credits of 300- or 400-level L74 Hebrew or L75 JIMES courses, distributed as the student wishes

Additional Information

- **Pass/Fail:** No course taken pass/fail can count toward the minor.
- **Grades:** A grade of B- or higher must be earned in each language course in order to advance to the next level.
- **Study Abroad:** Students enrolled in preapproved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their advisor and the director of undergraduate study.
- **Back Credit:** Any earned back credit does not count toward the total number of units for the Language Requirement. All students are required to take at least one year of language instruction at Washington University.

Courses

Visit online course listings to view semester offerings for L74 HBRW (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L74&crslvl=1:4>).

L74 HBRW 105D Beginning Modern Hebrew I

This course is for the student with no knowledge of Hebrew. Students with a background in Hebrew are required to take the placement exam. This course provides the foundation for modern conversational Hebrew, and skills for writing and speaking are introduced.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L74 HBRW 106D Beginning Modern Hebrew II

This course provides the foundation for modern conversational Hebrew, and skills for writing and speaking are introduced. Prerequisite: Grade of B- or better in L74 105D or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L74 HBRW 108 Modern Hebrew for Arabic Speakers

Credit 3 units. A&S IQ: LCD, LS BU: HUM

L74 HBRW 179 First-Year Seminar: Midrash: The Imaginative Interpretation of Biblical Texts

The aim of this course is to introduce students to Midrash, the highly fascinating literature of rabbinic biblical interpretation. Among the topics studied are: How did the classical rabbis read the Bible? What is the relationship between the plain meaning of the biblical text and the polyphone interpretations of Midrash? How can numerous, at times even contradictory, interpretations of the same verse coexist? What is the function of imaginative narratives, parables and folklore in Midrash? Initially the Midrashic logic may seem elusive from the viewpoint of a modern Western reader; in turn its creative thinking proves to be smart, playful, at times even slippery, and yet

substantial. Addressing the literary, historical and cultural context in which rabbinic Midrash developed, we get to know a variety of Midrashic collections and styles covering a time span from late antiquity to the Middle Ages. All primary sources are read in translation. Throughout the semester we devote time to discussing practical questions such as how to use the library's catalogue and (electronic) reference sources, as well as techniques for structuring and writing students' essays.
Same as L75 JIMES 179
Credit 3 units. A&S IQ: HUM BU: ETH EN: H

L74 HBRW 208F Introduction to Jewish Civilization: History and Identity

The anthropologist Clifford Geertz once famously invoked Max Weber in writing that "man is an animal suspended in webs of significance he himself has spun. I take culture to be those webs." The main goal of this course — designed as an introduction to Jewish history, culture and society — is to investigate the "webs of significance" produced by Jewish societies and individuals, in a select number of historical periods, both as responses to historical circumstances and as expressions of Jewish identity. Over the course of the semester we focus on the following historical settings: seventh-century BCE Judah and the Babylonian exile; pre-Islamic Palestine and Babylonia (the period of the Mishnah and the Talmud); Europe in the period of the Crusades; Islamic and Christian Spain; Europe in the 18th and 19th centuries; North America in the 20th century; and the modern State of Israel. For each period, we investigate the social and political conditions of Jewish life; identify the major texts that Jews possessed, studied and produced; determine the non-Jewish influences on their attitudes and aspirations; and explore the efforts that Jews made to define what it meant to be part of a Jewish collective.
Same as L75 JIMES 208F
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, IS EN: H

L74 HBRW 210C Introduction to Islamic Civilization

A historical survey of Islamic civilization in global perspective. Chronological coverage of social, political, economic and cultural history will be balanced with focused attention to special topics, which will include: aspects of Islam as religion; science, medicine and technology in Islamic societies; art and architecture; philosophy and theology; interaction between Islamdom and Christendom; Islamic history in the Middle East, South Asia, Southeast Asia, and Central Asia as well as Africa; European colonialism; globalization of Islam and contemporary Islam.

L74 HBRW 213D Intermediate Modern Hebrew I

This course involves reading and discussion on the intermediate level of selected topics pertaining to contemporary Israel. Review and further study of Hebrew grammar and the development of conversational skills are emphasized. Prerequisite: Grade of B- or better in L74 106D or placement by examination.
Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L74 HBRW 214D Intermediate Modern Hebrew II

This course involves intermediate modern Hebrew reading and the discussion of modern Hebrew fiction. It will focus on the development of language skills in special drill sessions. Conducted in Hebrew. Prerequisite: Grade of B- or better in L74 213D or placement by examination.
Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L74 HBRW 300 Introduction to the Hebrew Bible/Old Testament

The Hebrew Bible is the foundational text of Judaism and Christianity. It is a complex compilation of materials, reflecting great diversity in ideology, literary expression, social and political circumstances, and theology. In this course, we shall read a significant amount of the Bible in English translation. We shall study the various approaches that have been taken by scholars in trying to understand the Bible in its historical context. We shall also study how the Bible was traditionally interpreted by Jews and Christians during the last two thousand years.

L74 HBRW 301C Kings, Priests, Prophets and Rabbis: The Jews in the Ancient World

We trace Israelite and Jewish history from its beginnings in the biblical period (circa 1200 BCE) through the rise of rabbinic Judaism and Christianity until the birth of Islam (circa 620 CE). We explore how Israel emerged as a distinct people and why the rise of the imperial powers transformed the political, social and religious institutions of ancient Israel. We illuminate why the religion of the Bible developed into rabbinic Judaism and Christianity and how rabbinic literature and institutions were created.

L74 HBRW 3082 From the Temple to the Talmud: The Emergence of Rabbinic Judaism

This course offers a survey of the historical, literary, social, and conceptual development of Rabbinic Judaism from its emergence in late antiquity to the early Middle Ages. The goal of the course is to study Rabbinic Judaism as a dynamic phenomenon — as a constantly developing religious system. Among the topics explored are: How did Judaism evolve from a sacrificial cult to a text-based religion? How did the "Rabbis" emerge as a movement after the destruction of the Second Temple and how could they replace the old priestly elite? How did Rabbinic Judaism develop in its two centers of origin, Palestine (the Land of Israel) and Babylonia (Iraq), to become the dominant form of Judaism under the rule of Islam? How did Jewish ritual and liturgy develop under Rabbinic influence? How were the Rabbis organized and was there diversity within the group? What was the Rabbis' view of women; how did they perceive non-Rabbinic Jews and non-Jews? As Rabbinic Literature is used as the main source to answer these questions, the course provides an introduction to the Mishnah, the Palestinian and Babylonian Talmuds, and the Midrash-collections — a literature that defines the character of Judaism down to our own times. All texts are read in translation.

L74 HBRW 320D Third-Level Modern Hebrew I

This course is designed to improve proficiency in the oral and written use of modern Hebrew through the reading and discussion of short stories, Israeli newspaper articles, and other selected materials. Students will also have an opportunity to discuss, in Hebrew, current events and public issues related to contemporary Israeli society. Prerequisite: Grade of B- or better in L74 214D or placement by examination. Note: L75 520 is intended for graduate students only.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L74 HBRW 3211 Conversational Hebrew

Designed to focus on and strengthen oral proficiency, we will explore a variety of different topics together based on our common interests - not limited to current affairs, space travel and exploration, advances in medical technology, climate change, pandemic preparedness, economic inequality, and the future of work. With each topic, we will learn relevant vocabulary and structures and apply them in small group discussions, individual presentations, simulated interviews, and classroom debates. Students will also listen to different Israeli news reports and documentaries in order to learn how to present at a formal level. The course is designed to simulate a variety of real-life situations, which require the balance of both rehearsal as well as improvisation. By learning Hebrew in different contexts, students will be exposed to a wide range of vocabulary and will be prepared to use the language in a variety of situations. The language of instruction is Hebrew only. PREREQ: Grade of B- or better in L74 214D Intermediate Modern Hebrew II or placement by examination. Please note: L75 5211 is intended for graduate students only.

Credit 3 units. A&S IQ: LCD, LS BU: HUM

L74 HBRW 322D Third-Level Modern Hebrew II

Designed to develop communicative skills, this course provides opportunities for students to practice the art of speaking and writing correctly, clearly, and effectively. The course includes reading and discussion of selected short stories from modern Hebrew literature as well as articles from current Hebrew newspapers. Class discussions deal with literary topics as well as contemporary social and political issues related to life and institutions in Israel. Prerequisite: Grade of B- or better in L74 320D or placement by examination. Note: L75 522D is intended for graduate students only.

L74 HBRW 335C Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History

This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be or to become modern. To answer this question, we look at two broad trends that took shape toward the end of the 18th century -- the Enlightenment and the formation of the modern state -- and we track changes and developments in Jewish life down to the close of the 20th century, with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time, from innovation to revolution, exclusion to integration, and calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish "emancipation"; acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political and racial antisemitism; mass migration and

the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

L74 HBRW 349 Yiddishkayt: Yiddish Literature in English Translation

This course traces the emergence, development, flourish and near-decline of Yiddish literature, beginning with some of the earliest writings to appear in Yiddish in the late Middle Ages and early modern period, continuing with 19th-century attempts to establish a modern Yiddish literature and the 20th-century emergence of both a classical canon and a literary avant-garde, and ending with post-Holocaust attempts to retain a Yiddish literary culture in the near absence of Yiddish-speaking communities. Focusing on the role of Yiddish as the "national" language of Ashkenaz, the course examines the ways in which Yiddish literature has responded to the social conditions of European Jewish life, exploring among others the relationship between Yiddish and the non-Jewish cultures in which it existed, the tensions between secular trends versus religious tradition, life in the shtetl and in the metropolis, immigration from the old world to the new, and Yiddish literary responses to the Holocaust.

L74 HBRW 359 Travelers, Tricksters, and Storytellers:**Jewish Travel Narratives and Autobiographies**

Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman. We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as

the following: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an "other," against which and through which they define a particular sense of self? This course is open to students of varying interests, including Jewish, Islamic, or Religious Studies, medieval and early modern history, and European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only. Same as L75 JIMES 359
