Credit 3 units. A&S IQ: LCD BU: IS EN: H

L74 HBRW 390 Topics in Migration and Identity: Genocide and Migration: Flight and Displacement under Nazi Regime

The course examines migration movements that are related to the Nazi genocide in Europe. Grounded in a study of the Nazi project to reshape the European geopolitical map, students explore how the mass movement of people is impacted by geopolitics, political violence, and economical considerations. Class materials address the relationship between identity formation and social exclusion, thus opening up a critical investigation of concepts of citizenship, human rights, and their institutional frameworks (states, international organizations, etc.) more generally. Students work with a variety of sources, including primary sources, scholarly analyses, podcasts, literary works and film to study migrations related to the prehistory, policies and aftermath of the Nazi regime. The class provides insights into issues of expulsion, refuge, forced migration, settlement projects, ethnic cleansing and others, but also demonstrates the global impact and long-term repercussions of political and genocidal violence. Looking at the Nazi regime through the lens of migration shows that the Nazi genocide is embedded in a history of racism, colonialization and mass violence.

L74 HBRW 4011 Fourth-Level Modern Hebrew I

Writing intensive course for the advanced student of Hebrew. We will explore the development of the personal voice in Israeli cinema. Films will be supplemented with articles, reviews, interviews, and fiction as class texts. Graduated writing assignments to help you find your voice in Hebrew. Conducted in Hebrew. PREREQ: Grade of B- or better in L74 322D Third-Level Modern Hebrew II or placement by examination.
Credit 3 units. A&S IQ: HUM, LCD, LS, WI

L74 HBRW 401W Fourth-Level Modern Hebrew I: Seminar in Israeli Culture (Writing Intensive)

This is a writing-intensive course for the advanced student of Hebrew. We will explore the development of the personal voice in Israeli cinema. Films will be supplemented with articles, reviews, interviews, and fiction as class texts. Graduated writing assignments will help students to find their voices in Hebrew. Conducted in Hebrew. Prerequisite: Grade of B- or better in L74 322D or placement by examination.
Credit 3 units. A&S IQ: HUM, LCD, LS, WI EN: H

L74 HBRW 402 Fourth-Level Modern Hebrew II

Students with advanced proficiency maintain and develop reading, speaking, and writing skills. Classes are conducted in Hebrew. Readings focus on key works of Hebrew poetry and fiction from earlier in this century and from contemporary Israel are included; additional readings and discussions address essays and editorials from the current Israeli press, and we will also view films and current news broadcasts produced in Israel. Prerequisite: Grade of B- or better in L74 401W or placement by examination.
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L74 HBRW 405 Diaspora in Jewish and Islamic Experience

Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term "diaspora" -- from the ancient Greek, meaning "dispersion" or "scattering" -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and they continued to be central motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home

in both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

L74 HBRW 4060 Conflict or Convivencia? Muslims, Jews, and Christians in Medieval Spain

This seminar will explore various facets of the coexistence (convivencia) of Muslims, Jews, and Christians in medieval Spain. Its horizon stretches from the Muslim conquest of Iberia (al-Andalus) up to the turn of the 16th century when Spanish Jews and Muslims were equally faced with the choice between exile and conversion to Christianity. Until about 1100, Muslims dominated most of the Iberian Peninsula; from then onward, Christians ruled much and eventually all of what would become modern Spain and Portugal. Through a process known as reconquista (reconquest), Catholic kingdoms acquired large Muslim enclaves. As borders moved, Jewish communities found themselves under varying Muslim or Christian dominion. Interactions between the three religious communities occurred throughout, some characterized by shared creativity and mutual respect, others by rivalry and strife. The course focuses on these cultural encounters, placing them in various historical contexts. It will explore the ambiguities of religious conversion, and the interplay of persecution and toleration. Last not least, the course will address the question of how the memory of medieval Spain's diversity reverberates and is utilized in modern popular and academic discourse. All sources will be read in English translation; however, students are encouraged to make use of their linguistic and cultural expertise acquired in previous classes. This course serves as the capstone seminar for Jewish, Islamic & Near Eastern Studies majors, Arabic majors, and Hebrew majors. Graduate students, minors, and other interested undergrads are likewise welcome.

L74 HBRW 440 Topics in Rabbinic Texts

The course aims to introduce students to independent reading of selected rabbinic texts in the original language. We focus on a number of topics representing the range of rabbinic discussion, including legal, narrative and ethical issues. At the same time, we study the necessary linguistic tools for understanding rabbinic texts. Prerequisites: HBRW 385 or HBRW 401 or instructor's permission.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L74 HBRW 444 The Mystical Tradition in Judaism

What is Jewish "mysticism"? What is its relationship to the category of "religion"? Is Jewish mysticism just one form of a general phenomenon common to a variety of religious traditions or is it a specific interpretation of biblical, rabbinic, and other Jewish traditions? Taking the above questions as a starting point, this course aims at a systematic and historically contextualized analysis of a broad range of Jewish texts that are commonly classified as "mystical." (All primary texts are read in translation.) At the same time, we explore such overarching themes as: the interplay of esoteric exegesis of the Bible and visionary experiences; the place of traditional Jewish law (halakhah) within mystical thought and practice; the role of gender, sexuality, and the body in Jewish mystical speculation and prayer; the relationship between mysticism and messianism; Ashkenazic and Sephardic traditions and their mutual impact on Jewish mysticism; the "absence of women" from Jewish mystical movements; esoteric traditions of an elite vs. mysticism as a communal endeavor; and the tension between innovation and (the claim to) tradition in the history of Jewish mysticism.

Hindi

The Department of Jewish, Islamic, and Middle Eastern Studies offers a minor in South Asian Languages and Cultures. As minors in South Asian Languages and Cultures, students can expect to gain proficiency in Hindi/Urdu languages, study the area's literary and cultural landmarks, and gain familiarity with Indian history and civilizations.

Language Placement: Placement tests are required for all students entering our language programs. Students may be eligible for up to 6 units of back credit based on advanced placement and successful completion of the recommended course. Native speakers are not eligible for back credit; evidence of secondary or postsecondary study of the language is required. Any units received from back credit cannot be counted toward the minor.

Majors

The Department of Jewish, Islamic, and Middle Eastern Studies (JIMES) does not offer a major in this area. Please visit the JIMES (p. 781) page for a list of available majors.

Minors

The Minor in South Asian Studies (Hindi)

The minor in South Asian Studies requires a minimum of 9 units at the 300 level or above and a minimum of 18 total units. The goal of the minor is language proficiency at the 200 level or above in either the Hindi or Urdu language. Students placing into Hindi 202 Intermediate Hindi II, Hindi 251 Second-Year Urdu II, or above must complete two consecutive semesters of language instruction at Washington University to fulfill the language requirement.

Total units required: 18 units, in addition to prerequisites

Language Prerequisites:

- Hindi Language: Hindi 111D Beginning Hindi I and Hindi 112D Beginning Hindi II, by course work or by placement *or*
- Urdu Language: Hindi 150 First-Year Urdu I and Hindi 151 First-Year Urdu II, by course work or by placement

Language Requirements:

Students should choose one primary language for the minor to fulfill the language requirement.

- **Hindi Language:**
 - Hindi 201 Intermediate Hindi I and Hindi 202 Intermediate Hindi II, by course work *or*
 - Hindi 219 Hindi for Heritage Speakers and one additional semester of Hindi language instruction *or*
 - If placed into Hindi 202 Intermediate Hindi II or above, two consecutive semesters of language instruction at Washington University
- **Urdu Language:**

- Hindi 250 Second-Year Urdu I and Hindi 251 Second-Year Urdu II, by course work or
- If placed into Hindi 251 Second-Year Urdu II or above, two consecutive semesters of language instruction at Washington University

Required Foundational Course:

Choose one of the following courses:

- JIMES 210C Introduction to Islamic Civilization
- JIMES 3171 Religion and Culture in South and Southeast Asia

Electives:

- 9 credits of 300- or 400-level L73 Hindi or L75 JIMES courses, distributed as the student wishes

Additional Information

- **Pass/Fail:** No course taken pass/fail can count toward the minor.
- **Grades:** A grade of B- or higher must be earned in each language course in order to advance to the next level.
- **Study Abroad:** Students enrolled in preapproved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their advisor and the director of undergraduate study.
- **Back Credit:** Any earned back credit does not count toward the total number of units for the Language Requirement. All students are required to take at least one year of language instruction at Washington University.

Courses

Visit online course listings to view semester offerings for L73 Hindi (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L73&crslvl=1:4>).

L73 Hindi 111D Beginning Hindi I

This course presents an introduction to the most widely spoken language of South Asia. The aim of this course is for the student to achieve proficiency in spoken comprehension and to acquire the major language skills -- listening, speaking, reading, and writing. A standard text, web-based materials, a reader prepared by the instructor, and audio materials are used, with equal emphasis on both spoken and written Hindi. The language presented in the course is colloquial. The Hindi (Devanagari) script will be taught as part of the same class. No previous knowledge of Hindi is required. Students with some previous Hindi language background must take a placement examination. Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L73 Hindi 112D Beginning Hindi II

Continuation of Beginning Hindi I. This course is devoted to the further development of basic skills -- listening, speaking, reading, and writing -- with a particular emphasis on the acquisition of speaking proficiency. Prerequisite: Grade of B- or better in L73 111D or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L73 Hindi 150 First-Year Urdu I

This course covers all five skills -- reading, writing, listening, speaking, cultural competency -- for beginning students. Starting with the Nastaliq script and simple greetings, we will then cover the basics of Urdu grammar while building vocabulary. The course will be conducted in Urdu.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L73 Hindi 151 First-Year Urdu II

This course is a continuation of the first semester of First-Year Urdu I. It is devoted to the further development of basic skills -- listening, speaking, reading and writing -- with a particular emphasis on the acquisition of speaking proficiency. Training in spoken Urdu emphasizes speaking and listening at normal speed with near native pronunciation and intonation. Prerequisite: Grade of B- or better in L73 150 First-Year Urdu I or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM

L73 Hindi 201 Intermediate Hindi I

Continuation of Beginning Hindi II. This course is designed to further develop skills in speaking and reading comprehension. Emphasis is given especially to communicative skill development (i.e., the use of language in various sociocultural contexts). Prerequisite: Grade of B- or better in L73 112D or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L73 Hindi 202 Intermediate Hindi II

Continuation of Intermediate Hindi I. In this course, special emphasis is given especially to communicative skill development (i.e., the use of language in various sociocultural contexts). It is designed to further develop skills in speaking and reading comprehension. Students engage in multiple activities such as role-playing, debate, and discussion to enhance their spoken language skills. A standard text, web-based materials, a reader prepared by the instructor, and audio and visual materials are used. Prerequisite: Grade of B- or better in L73 201 or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L73 Hindi 210C Introduction to Islamic Civilization

A historical survey of Islamic civilization in global perspective. Chronological coverage of social, political, economic and cultural history will be balanced with focused attention to special topics, which will include: aspects of Islam as religion; science, medicine and technology in Islamic societies; art and architecture; philosophy and theology; interaction between Islamdom and Christendom; Islamic history in the Middle East, South Asia, Southeast Asia, and Central Asia as well as Africa; European colonialism; globalization of Islam and contemporary Islam. Same as L75 JIMES 210C

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, IS EN: H

L73 Hindi 218 Intermediate Hindi I

Continuation of Beginning Hindi II. This course is designed to further develop skills in speaking and reading comprehension. Emphasis is given especially to communicative skill development, that is, use of language in various socio-cultural contexts. PREREQ: Grade of B- or better in L73 112D Beginning Hindi II or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM

L73 Hindi 218A Intermediate Hindi II

Credit 3 units. A&S IQ: LCD, LS

L73 Hindi 219 Hindi for Heritage Speakers

This course will focus on reading and writing for students who already speak Hindi. Starting with the Devanagari script, we will then cover the basics of Hindi grammar. After completing this course, students should take the Hindi placement test to determine their next course in Hindi.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L73 Hindi 250 Second-Year Urdu I

This course is the continuation of the First-Year Urdu II course, and it is devoted to the further development of basic skills -- listening, speaking, reading, and writing -- with a particular emphasis on the acquisition of speaking proficiency. Training in spoken Urdu emphasizes speaking and listening at normal speed with near-native pronunciation and intonation. Prerequisite: Grade of B- or better in L73 151 or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L73 Hindi 251 Second-Year Urdu II

This course is the continuation of the Second-Year Urdu I course, and it is devoted to the further development of basic skills -- listening, speaking, reading, and writing -- with a particular emphasis on the acquisition of speaking proficiency. Training in spoken Urdu emphasizes speaking and listening at normal speed with near-native pronunciation and intonation. Prerequisite: Grade of B- or better in L73 250 or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM

L73 Hindi 299 Undergraduate Independent Study

Prerequisites: Hindi 202 and permission of the instructor and the department chair.

Credit variable, maximum 6 units.

L73 Hindi 301 Third-Level Hindi I

This course is designed to help students gain advanced proficiency in the oral and written use of Hindi through the reading and discussion of short stories, newspaper articles, and other selected materials. Students will engage in discussions and debates based on these readings as well as current topics to improve their spoken and conversational language skills. Group and project-based learning is encouraged to enhance students' critical thinking in Hindi. Prerequisite: Grade of B- or better in L72 202 or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L73 Hindi 302 Third-Level Hindi II

Continuation of Third-Level Hindi I. This course is designed to further enhance students' advanced proficiency in the oral and written use of the Hindi language. Students are exposed to a variety of readings such as short stories and plays by renowned authors, magazine and newspaper articles, and other selected readings and visuals. Students will engage in discussions and debates based on these readings to improve their spoken and conversational language skills. Group and project-based learning is encouraged to enhance students' critical thinking in Hindi. Prerequisite: Grade of B- or better in L73 301 or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L73 Hindi 305 Third-Level Urdu I

This course is a continuation of Second Year Urdu II. It has been designed to help students gain advanced proficiency in the oral and written use of Urdu through the reading and discussion of stories from Urdu books, newspaper articles, topics in advanced grammar, and other selected materials. Prerequisite: Grade of B- or better in L73 251 or L73 232A, or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L73 Hindi 306 Third-Level Urdu II

This course is a continuation of Third-Level Urdu I. It is designed to help students gain advanced proficiency in the oral and written use of Urdu through the reading and discussion of stories from Urdu books and newspaper articles. Topics in advanced grammar and Urdu poetry will also be included. Students will be expected to converse clearly across a wide variety of communicative tasks using diverse language strategies. Prerequisite: Grade of B- or better in L73 305 or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM

L73 Hindi 307 The Writing of the Indian Subcontinent

The Indian Subcontinent has in recent years yielded a number of writers, expatriate or otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed to be an introductory survey of such writing, drawing on select Subcontinental writers. Covering both fiction and nonfiction by several authors including R.K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatje and Romesh Gunsekera, we discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity, and the constraints of gender roles.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM

L73 Hindi 3074 Hinduism & the Hindu Right

We are witnessing a global rise in rightwing politics, and India is no exception. In May 2019, Narendra Modi and his "Hindu Nationalist" party were elected to power for a second term. Observers in the United States and Europe may be stunned by what seems to be a new development, but observers in India have been following the rise of the Hindu Right since the early 1990s. In its wake, the Hindu Right has brought violence against minorities; curbs on free speech; and moves toward second-class citizenship for Indian Muslims. This course will track the

history of the Hindu Right in India from its 19th-century roots to the present. The struggle to come to grips with the Hindu Right is of immediate political relevance. It also raises big questions about the history of religion and the politics of secularism.

Same as L22 History 3074

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS EN: H

L73 Hindi 311 Sacred Architecture of the Indian Subcontinent

The built structure remains a principal visible record of the evolution of a civilization and its culture. Through this interdisciplinary course on culture, design, religion and society, students will be introduced to and gain a deeper insight into the rich diversity of South Asia through the study of the architecture of its significant sacred places. We will take a journey through the Hindu, Jain and Buddhist Temples; the Islamic Mosque; the Sikh Gurudwara; the Zoroastrian Fire Temple; the Jewish Synagogue; and the Christian Church, tracing the evolution of these places of worship from the Indus Valley Civilization to Pre-Colonial times. Through visuals, readings, and discussions, students will learn about the different architectural styles and motifs used in sacred buildings and how they came about. We will explore the inter-relationships between the design elements through the lens of political, social, religious, regional and technological influences and understand the ways in which evolving design principles reflect these influences overtime. This course will be of interest to students of languages and cultures, architecture, archeology, art history, history, preservation, religion, and South Asian culture, among others. Please note: At the end of the semester, students will go on a field trip to experience the diverse sacred architecture in the St. Louis region. No prior knowledge of architecture or the history of this region is required.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L73 Hindi 3171 Religion and Culture in South and Southeast Asia

Although it is now common to differentiate between South and Southeast Asia, historically these regions have often been conceptualized as part of a single geographical area. Known as the "(East) Indies", this area is marked by a rich history of (earlier) Hindu and Buddhist influences, as well as (later) Islamic and Christian influences. The present course will take an in-depth look at the four aforementioned religious traditions, and examine how they have shaped local forms of culture in premodern and modern times. Students will be introduced to host of phenomena in South and Southeast Asian societies, including religious worship, education, law, traditional governance, colonial governance, art, architecture, economic production, kinship, gender, and sexuality. Countries to be studied in the course include India, Pakistan, Sri Lanka, Thailand, Myanmar, Indonesia, Malaysia, the Philippines, and Papua New Guinea.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD BU: ETH, IS

L73 Hindi 3292 Topics in Politics: Modern South Asian Politics

This course focuses on the recent political history and development of South Asia. It begins with a review of the British colonial period and the Independence movement. The remainder of the course examines different political issues in India,

Pakistan, Bangladesh and Sri Lanka. Topics include political mobilization, land reform, law and politics, social movements, religious and caste politics, the rise of religious nationalism, and political control of the economy.

Same as L32 Pol Sci 3292

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS

L73 Hindi 330 Topics in South Asian Literature and Culture

An introduction to major texts of South Asian literature, both traditional and modern, in their cultural context. Specific topics, texts and themes may vary from year to year. The course assumes no previous acquaintance with the material. All readings are in English or English translation.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L73 Hindi 3392 Topics in South Asian Religions

The topic for this course varies. The topic for fall 2017 was Hinduism and the Hindu Right.

L73 Hindi 353 Understanding Indian (Hindi/Urdu) Literature: Through Text and Images (Visual)

This course focuses on the films and cultural traditions of South Asia in general and of India in particular. Students will be introduced to a variety of contemporary literary genres through visuals. Readings and class discussions will be followed by film screenings from the popular Hindi cinema (known as the Bollywood industry in India) to demonstrate how images and visuals influence modern-day cultural traditions. Students will also get a chance to work on films based on literary texts by well-known writers of the subcontinent. These readings and films focus on various social, cultural, political and historical aspects of Indian society. Students will be encouraged to explore these issues in their written assignments as well as in their class discussions.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L73 Hindi 3670 Gurus, Saints, and Scientists: Religion in Modern South Asia

Many long-standing South Asian traditions have been subject to radical reinterpretation, and many new religious movements have arisen, as South Asians have grappled with how to accommodate their traditions of learning and practice to what they have perceived to be the conditions of modern life. In this course we consider some of the factors that have contributed to religious change in South Asia, including British colonialism, sedentarization and globalization, and new discourses of democracy and equality. We consider how new religious organizations were part and parcel with movements for social equality and political recognition; examine the intellectual contributions of major thinkers like Swami Vivekananda, Sayyid Ahmad Khan, and Mohandas Gandhi; and explore how Hindu, Islamic, and other South Asian traditions were recast in the molds of natural science, social science, and world religion.

Credit 3 units. A&S IQ: HUM, LCD BU: ETH EN: H

L73 Hindi 36CA Heroes and Saints in India: Religion, Myth, History

This course provides an introduction to the history of modern India and Pakistan through the voices of the Indian subcontinent's major thinkers. We will spend time in the company of saints, from the "great-souled" Mahatma Gandhi to the Sufi scholar Ashraf 'Ali Thanawi, and we will travel alongside the heroes of peasant politics, women's rights, and struggles for national and social freedom and equality. We will immerse ourselves in the rich narrative heritage of India -- as it has been challenged, reworked, and harnessed for present and future needs -- from the 19th century through the present. Lecture and discussion format; prior knowledge of India or Pakistan not required.

L73 Hindi 38C8 Religion and Politics in South Asia: Writing-Intensive Seminar

The relationship between religion, community and nation is a topic of central concern and contestation in the study of South Asian history. This course will explore alternative positions and debates on such topics as: changing religious identities; understandings of the proper relationship between religion, community, and nation in India and Pakistan; and the violence of Partition (the division of India and Pakistan in 1947). The course will treat India, Pakistan and other South Asian regions in the colonial and postcolonial periods.

L73 Hindi 3921 Secular & Religious: A Global History

Recent years have seen a dramatic rethinking of the past in nearly every corner of the world as scholars revisit fundamental questions about the importance of religion for individuals, societies and politics. Is religion as a personal orientation in decline? Is Europe becoming more secular? Is secularism a European invention? Many scholars now argue that "religion" is a European term that doesn't apply in Asian societies. This course brings together cutting-edge historical scholarship on Europe and Asia in pursuit of a truly global understanding. Countries covered will vary but may include Britain, France, Turkey, China, Japan, India and Pakistan.

L73 Hindi 399 Independent Study

Prerequisite: permission of instructor and the department.

Credit variable, maximum 6 units.

L73 Hindi 39SC Imperialism and Sexuality: India, South Asia and the World: Writing-Intensive Seminar

What is the connection between the appropriation of other people's resources and the obsession with sex? Why is "race" essential to the sexual imperatives of imperialism? How has the nexus between "race," sexuality, and imperial entitlement reproduced itself despite the end of formal colonialism? By studying a variety of colonial documents, memoirs produced by colonized subjects, novels, films and scholarship on imperialism, we will seek to understand the history of imperialism's sexual desires, and its continuation in our world today.

L73 Hindi 499 Independent Study

Prerequisite: permission of instructor and the department.

Credit variable, maximum 6 units.

History

The Department of History engages its students through a study of the past. We are committed to the idea that the most compelling stories are often the most revealing ones. In addition to teaching students the particular skills of historical inquiry, we provide them with tools that serve them beyond their majors and beyond the university.

The discipline of history poses challenging questions about the ways that human beings have made the worlds they live in. There are many approaches to history. Some historians study politics, whether that means political parties or the ways that people who never held public office nonetheless act to shape public life. Others study the lived experience of everyday Americans or the popular culture that reflects how people understand the world around them. Still others are especially interested in the kinds of stories about the past that we tell ourselves, for those stories reveal a great deal about our own society as well as that of a different time. Although it is not true that history repeats itself, it is true that without knowledge of the past we are unable to understand the present.

The Department of History at Washington University offers history majors and minors the opportunity to develop a coherent and challenging program of study. We also encourage all undergraduates to incorporate the discipline of historical thinking into their liberal arts education. In all courses, students are taught the kinds of skills that will help them succeed both in classes at Washington University and in their postgraduate careers. History students learn to read carefully, think critically, research honestly, and present information and ideas clearly and concisely, both verbally and in writing.

The Department of History offers a wide variety of courses, ranging from the ancient world to the present and spanning across Africa, Asia, the Middle East, Europe and the Americas. There are many opportunities for small-group learning and discussion in first-year seminars, sophomore honors colloquia, writing-intensive seminars, and advanced seminars. The history major is structured to be flexible and to encourage students both to pursue established interests and to explore topics, time periods and locales that may be less familiar.

The Department of History prides itself on the individual attention that faculty mentors provide to students. Graduates express great satisfaction with their experience in the major, mentioning in particular the faculty's knowledge of the subject matter, dynamic teaching style, and respect for students.

Some history majors go on to pursue graduate work in the field and become professional historians, but most find that the knowledge and skills they build through history courses fit them for a wide range of careers. Our graduates have attended law or medical school and have pursued careers in government, education, research, business, communications, international agencies, publishing, museums and archives, public advocacy and many other fields.

Majors

The Major in History

Total units required: 28

Requirements	Units
Introductory courses	6
Upper-level courses	18
Capstone experience	4

Introductory Courses

- One introductory survey (100 level)
- One additional introductory course, chosen from any 100- or 200-level course listed in History and taught by history department faculty*

Note: Students may satisfy introductory course requirements using AP credit if they have earned a **score of 5** on the AP European, U.S., or World History examinations.**

- * This course can be an introductory survey, a lecture, or a seminar, and it can be either home-based or cross-listed in History. **Note:** "History department faculty" does *not* include affiliated faculty.
- ** Students will be awarded 3 units of credit per AP exam for a maximum of 6 credits toward the major or minor. A score of 4 on any of these exams may earn 3 units of elective credit but will not be counted toward the major or minor.

Upper-Level Courses

At least 18 300- or 400-level units **plus** a capstone experience (for a minimum of 22 advanced units) must be completed.

Requirements at this level include the following:

- At least one course designated "premodern" and one course designated "modern"
- At least one course from three of the following geographical areas: Africa, East Asia, South Asia, Europe, Latin America, Middle East, or the United States or in transregional history (please refer to note 4 below)
- History 301 Historical Methods (a required methods course for all majors)
- The capstone experience: History majors must, prior to graduation, complete a capstone experience that consists of the following:
 - Successful completion of the senior honors thesis; **or**
 - An advanced seminar; **or**
 - An independent research project with a significant writing component (History 500); **or**
 - Directed fieldwork in the historical or archival profession, with a significant writing component (History 4001/History 4002)

Notes:

1. Students should register under the L22 department code for any courses that will count toward the major or minor.
2. International Baccalaureate: The department recognizes the superior preparation that many students have received in this program; however, no credit is awarded for the International Baccalaureate.
3. The department recognizes that some students take their first history course or develop an interest in majoring in history only during their junior year and then face a dilemma in choosing between required introductory courses and upper-level course work more appropriate to their abilities. Such students, with the recommendation of their advisor in

history, may petition the director of undergraduate studies to permit a designated upper-level course to substitute for one of the introductory courses. In all such cases, the minimum number of units remains 18 in the minor and 28 in the major.

4. All upper-level units must be separate courses that are not double-counted toward a minor or second major. Courses in the major are excluded from the credit/no credit option.
5. If a student chooses to count a transregional course toward the geographical requirement, at least one of the two other geographical areas that the student counts toward the major must cover a region that is not included in the transregional course. For example, a student who has completed courses in U.S. and Latin American history could not count a transregional course that examines the comparative history of the United States and Latin America. However, a student who has taken a transregional course on the United States and Latin America could take a course on either U.S. or Latin American history and would then need to take a course covering an area other than the United States or Latin America to satisfy the third area requirement.
6. Courses taken pass/fail or credit/no credit do not count toward the major or minor.

Additional Information

Fieldwork: History majors are eligible for fieldwork at the Missouri Historical Society or at other museums. Opportunities are also sometimes available in the special collections at Olin Library, with local businesses, and at historical sites.

Study Abroad: The Department of History strongly encourages student participation in the various year and semester abroad programs approved by the College. A maximum of 3 history credits may be applied to the minor, and a maximum of 6 history credits earned may be applied to the major in history. Students must have their courses preapproved by the department's study abroad advisor prior to departure. It is possible to pursue a senior honors thesis after study abroad, but careful planning is required.

Senior Honors: Students who have a strong academic record may work toward Latin Honors. Students graduating with Latin Honors must meet grade-point average requirements and satisfactorily complete History 399 Senior Honors Thesis and Colloquium: Writing-Intensive Seminar while writing a thesis during the senior year.

Awards and Prizes: The Department of History annually awards the following prizes:

- The **Helen and Isaac Izenberg Prize**, for a superior paper written for an Advanced Seminar
- The **Shirley McDonald Wallace Prize**, for an outstanding first-year student enrolled in both semesters of Western Civilization

- The **J. Walter Goldstein Prize**, for an excellent, well-written senior honors thesis
- The **Konig Prize in Law & History**, for the best-written paper addressing the connection between law and history in any history course

Special Opportunities: Undergraduates interested in history are encouraged to join the Undergraduate History Association, which is the local chapter of Phi Alpha Theta (PAT). Led by the ongoing campus PAT members, the chapter usually holds an initial organizing meeting in the fall of each year. The activities of the chapter vary, but they typically include sponsorship of lectures, films, discussions and social events. Although national PAT membership requires 12 completed units of history courses, the local chapter welcomes the participation of all students interested in history. Each year, PAT publishes *The Gateway History Journal*, an anthology of the best student historical writing at Washington University.

Minors

The Minor in History

Total units required: 18

Requirements	Units
Introductory courses	6
Upper-level courses	12

Introductory Courses

- One introductory survey (100 level)
- One additional introductory course, chosen from any 100- or 200-level course listed in History and taught by history department faculty*

Note: Students may satisfy introductory course requirements using AP credit if they have earned a **score of 5** on the AP European, U.S., or World History examinations.**

- * This course can be an introductory survey, a lecture, or a seminar, and it can be either home-based or cross-listed in History. **Note:** "History department faculty" does *not* include affiliated faculty.
- ** Students will be awarded 3 units of credit per AP exam for a maximum of 6 credits toward the major or minor. A score of 4 on any of these exams may earn 3 units of elective credit but will not be counted toward the major or minor.

Upper-Level Courses

12 additional units, 9 of which must be at the 300 or 400 level

Notes:

1. All 18 units must be separate courses not double-counted toward the major or another minor. Courses in the minor may not be taken credit/no credit.
2. The department recognizes that some students take their first history course or develop an interest in declaring a minor in history only during their junior year and then face a dilemma in choosing between required introductory courses and upper-level course work more appropriate to their abilities. Such students, with the recommendation of their advisor in history, may petition the director of undergraduate studies to permit a designated upper-level course to substitute for one of the introductory courses. In all such cases, the minimum number of units in the minor remains 18.

L22 History 101C Western Civilization

This course is a history of Western civilization from 3500 BC to AD 1600. Western civilization may be characterized as one long debate on the holy. In no other civilization did this debate about the limits of the sacred and the profane -- this constant effort at trying to grasp the divine through word and deed -- last continuously for more than 5000 years. To argue over the holy is to argue over the very nature of how to live a life, from the most mundane daily activity to the most sublime act of the imagination. It is to argue over how politics, economics, art, philosophy, literature, and religion are realized in a society. Apart from many types of polytheism, we study the three great world monotheistic religions: Judaism, Christianity, and Islam. We study the ancient cultures of northern Africa and the eastern Mediterranean, the empires of Alexander the Great and imperial Rome, the Christianization of the Roman Empire and the rise of Islam, the early medieval world in the North Sea and the Byzantine Empire in Constantinople, the formation of Latin Christendom and the papal monarchy, the Crusades and the reaction of the Islamic lands, concepts of individuality, the persecution of Jews and heretics, chivalry and peasant servitude, the Mongol Empire, the Black Death and the devastation of the 14th century, the Renaissance in Italy and the Protestant reformation, the hunt for witches and the scientific revolution, and the medieval origins of the African diaspora and the European conquest of the Americas. What defined being human -- and so a man, a woman, or a child -- over five millennia? Fundamental questions of this course include the following: What is "Western civilization"? When do the characteristics defined as "Western" come together as a coherent phenomenon? What, then, is historical truth? This course (through lectures, reading primary sources, discussion sections, and essay writing) gives the student a learned background in almost 5000 years of history. This is an introductory course for the history major and minor.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM, IS EN: H

L22 History 102D Introduction to Modern European History

The history of Europe since 1500 is a remarkable array of contradictions: freedom and fascism; democracy and imperialism; industrialization and Romanticism; international capitalism and fervent nationalism; social change and scientific racism. What produced these developments in European social, economic, and political spheres and how did these different currents diverge and converge? How did European developments affect global actors and vice versa? What are the consequences for our own time of these contradictory aspects of Europe's modernization? Class assignments include textbook and primary source reading (approximately 75 pages/week), discussion participation, two short analytical papers, three in-class exams, and a final cumulative take-home essay. This course satisfies the Introductory Survey requirement for the history major and minor. Note: Discussion section is required. Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM, IS EN: H

L22 History 1119 First-Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities

This course examines the history of racial thinking and the experience of race in Latin America. Topics covered include: concepts of "blood purity" in early modern Spain; the casta system in colonial Spanish America; indigenous and African identities; race, citizenship and nation-building; whitening projects; discourses of mestizaje or "race mixture"; and the intersection of race, gender and class. While the focus of the course will be on the complexities of race in Latin America, a place of enormous ethnic and cultural diversity, we'll also be looking to draw comparisons to the history of race in the U.S. Credit 3 units. BU: HUM, IS

L22 History 1150 First-Year Seminar: The Presidency 101: From Washington to Trump

Is this your first presidential election, or are you a policy wonk? Regardless of your political experience, this course provides an opportunity for students to learn about the American presidency as a contemporary political institution with deep roots in American history. This first-year seminar introduces undergraduates to the presidency by considering the institution in its political and cultural contexts. Using the 2020 election as a point of departure, this course will explore how the current president as well as the aspiring candidates reveal broader trends and new developments in American political history. In addition to introducing students to the study of the presidency, this course will also introduce students to diverse means of studying culture, with assignments that range from political speeches to policy documents to popular media.

Credit 3 units. A&S: FYS A&S IQ: SSC BU: BA, HUM EN: S

L22 History 1500 Silver, Slaves and the State: Globalization in the 18th Century

In this course, students will look at how silver, and also porcelain, tobacco and salt, shaped the early modern world. The course will look at how merchants and adventurers, as well as pilgrims, pirates, migrants and captives, encountered very different facets of that world, and tried to make sense of it. Students will also study how these attempts at exchange, how that process of "making sense," transformed how men and women of the 18th century, around the globe, saw their territories and their fellow humans. This is a world history class. Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L22 History 154 First-Year Seminar: Saints and Society

The topic of this course is saints and society in medieval and early modern Europe. It explores the complex relationships between exceptional holy men and women, the historical settings in which they lived, and the religious and cultural traditions on which they drew. It considers saints as both embodiments of the highest ideals of their societies and radical challenges to ordinary patterns of social existence.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L22 History 156 First-Year Seminar: England in the Age of Shakespeare

This course will examine certain themes central to our understanding of Shakespeare's England, such as monarchy, order, power and the limits on action, national identity, gender and family. Students will read and discuss modern historical scholarship, a range of contemporary sources, and Shakespeare's plays, and the relationship between them.

Credit 3 units. A&S: FYS A&S IQ: HUM BU: HUM, IS EN: H

L22 History 163 Freedom, Citizenship and the Making of American Life

This course offers a broad survey of American history from the era before European settlement of North America to the late 20th century. The course explores the emergence and geographic expansion of the United States and addresses changes in what it meant to be an American during the nation's history. Tracing major changes in the nation's economic structures, politics, social order and culture, the course chronicles, among other issues, changes in the meanings of freedom, citizenship and American identity. Introductory course to the major and minor.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: CPSC, HUM BU: HUM EN: H

L22 History 164 Introduction to World History: The Second World War in World History

This course introduction to World History uses World War II as a lens to examine the methodologies, approaches and sources historians employ to understand and analyze historical periods. The class will explore the global connections and interactions which characterize World History. The emphasis of this course will be on digging into topics traditionally neglected: the impact of the war on race, gender, family and children; daily life; and daily ethical decision making.

Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM BU: HUM, IS EN: H

L22 History 1640 Health and Disease in World History

Health and disease are universal human experiences, yet vary profoundly across time and place. Extending from ancient times to the present, this course surveys that variety from a global perspective. We explore medical traditions from around the world, then examine how these responded to major epidemic diseases such as the Black Death. We study the globalization of disease and the emergence of scientific medicine after 1450, then turn to the interrelated histories of health and disease in the modern era. Throughout, we attend carefully to how the biological aspects of health and disease have shaped world history, while at the same time exploring the powerful mediating role of social, cultural, economic, and political factors — from

religious beliefs and dietary practices to inequality, poverty, empire and war — in determining the myriad ways in which health and disease have been experienced and understood. Introductory course to the major and minor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L22 History 192 First-Year Seminar: African Experiences in the Second World War

Most conventional histories of the Second World War pay scant attention to Africa, thereby creating the misconception that the war had little impact on the peoples of the African continent. This introductory seminar restores the experiences of ordinary African women and men to the larger historical narratives of both Africa and World War II. Combining personal memoirs with official primary sources reveals not only how the global conflict influenced African history but also how Africans helped shape the final outcome and consequences of the war. This course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L22 History 193 First-Year Seminar: Silk Roads and Empires

Did the Silk Road even exist? Coined by a German geographer in the late 19th century, the term "Silk Road" has long been a metaphor for global connectivity. Evoking the image of camels and traders, diplomats and warriors, and missionaries and artists roaming across Eurasia from Chinese cities to Mediterranean shores, the so-called Silk Road has captivated the imagination of historians, novelists, and film makers for decades. This course investigates the fact and fiction of the Silk Road. Over the course of the semester, we will encounter people, texts, and objects that weaved a world wide web before the age of the internet. We will examine Buddhist monks, Muslim scholars, and Mongol rulers who connected disparate regions of the globe before the age of globalization, and we will discuss whether the concept and history of the Silk Road may offer anything novel for us in the 21st century. This course is for first-year, non-transfer students only.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS EN: H

L22 History 200 Doctors and Terrorists: The Fictions of South Asian America

South Asians have always played an integral role in the culture, history and politics of the United States. However, for complex reasons, their presence has either been concealed, or dismissed through dangerous stereotypes, or just as inaccurately, excessively celebrated for proving the generosity of American liberalism and multiculturalism. Racially misrecognized, this large and heterogeneous group has nonetheless shaped American categories of race, sexuality, and citizenship in intriguing and powerful ways. South Asian Americans have reached to fiction, music and popular culture to craft deeply intimate and original assessments of mainstream desires. In doing so they have sought to resist the dictates of whiteness, to question US imperialism, to garner acceptance and mobility, to build solidarity with other U.S. minorities. In this course we learn about the complex history and cultural productions of South Asians in America. How did "South Asia" become a category of identification, and who benefited from that designation? What role have South Asians played in the economic, cultural and global ascendancy of the United States? How do South Asians connect with, and control, their countries of origin? Why do

discourses of sex and intimacy rise to the surface in this history, and what is the significance of story-telling in building the archive and questioning the fiction of South Asian America? Course enrollment is limited to first-year and sophomore students.

L22 History 201A Puzzles and Revolutions: Text and Tradition

One major force in human history has been inquiry into the natural world. Especially after 1550, natural science, by virtue of its role in the development of technology and the improvement of health, has brought about great changes on all scales of human existence, first in Western Europe and then globally. In this course, the changing character of inquiry into the natural world, from antiquity forward, will be the object of study. Does natural science enable us, for example, to study nature as it is in itself, or are culturally-determined perspectives or frameworks inescapable? How is it that natural science has, especially since 1800, proved so useful in the development of technology? How has it impinged on the arts? The requirements will include writing several short papers and brief responses to the readings.

L22 History 2070 Crossing Borders: An Introduction to Institutions and Concepts in Global Studies

This course provides an overview of the emergence of international governing institutions, the ideologies that shaped them, and concepts helpful for understanding them. Identifying the systems that have emerged to govern modern human societies at the national and international levels provides the means to consider how human beings are categorized within those systems, as citizens, subjects, asylum seekers, refugees, and the stateless. We engage a few classic works — including "The Communist Manifesto," "Imagined Communities," and "Orientalism" — and consider how they have transformed knowledge. The goal is for students to gain an empirical grasp of world institutions and a critical vocabulary that will provide the means for an informed engagement with international issues across different world regions and academic approaches.

L22 History 2081 Introduction to Jewish Civilization: History and Identity

The anthropologist Clifford Geertz once famously invoked Max Weber in writing that "man is an animal suspended in webs of significance he himself has spun. I take culture to be those webs." The main goal of this course — designed as an introduction to Jewish history, culture and society — will be to investigate the "webs of significance" produced by Jewish societies and individuals, in a select number of historical periods, both as responses to historical circumstances and as expressions of Jewish identity. Over the course of the semester we will focus on the following historical settings: seventh-century BCE Judah and the Babylonian exile; pre-Islamic Palestine and Babylonia (the period of the Mishnah and the Talmud); Europe in the period of the Crusades; Islamic and Christian Spain; Europe in the 18th and 19th centuries; North America in the 20th century; and the modern State of Israel. For each period we will investigate the social and political conditions of Jewish life; identify the major texts that Jews possessed, studied, and produced; determine the non-Jewish influences on their attitudes and aspirations; and the explore the efforts that Jews made to define what it meant to be part of a Jewish collective.

L22 History 2091 First-Year Seminar: The City in Early Modern Europe

From the city-states of Renaissance Italy to the 18th-century boomtowns of London and Paris, cities functioned as political, economic, and cultural centers, creating unique opportunities and challenges for their diverse inhabitants. Using a wide variety of primary and secondary sources, this course will examine how a variety of individuals — men and women, rich and poor, established citizens and marginal groups — tried to understand and manage life in the city. Their conflicting experiences and expectations created not only social and economic unrest but also a resilient social infrastructure, a tradition of popular participation in politics, and a rich legacy of cultural accomplishment. Topics studied include urban political and economic organization; the creation and use of public spaces; religion as a source of community and conflict; and urban crime and public punishment.

L22 History 2118 First-Year Seminar: Angels, Prostitutes and Chicas Modernas: Women in Latin American History

Women have been active players in the construction of Latin American nations. In the last two decades, leading scholars in the field have taken up the challenge of documenting women's participation. This research explosion has produced fruitful results to allow for the development of specialized courses. This course looks at the nation-building process through the lens of Latin American women. Students will examine the expectations, responsibilities and limitations women confronted in their varied roles from the Wars of Independence to the social revolutions and dictatorial regimes of the 20th century. Besides looking at their political and economic lives, students will explore the changing gender roles and relations within marriage and the family, as well as the changing sexual and maternal mores.

L22 History 2119 First-Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities

What does it mean to identify as mestizo, moreno or mulato? How have Latin American nations dealt with their mixed racial populations and their rich African and indigenous heritages? What does it mean to be black in nations where the official discourse is one of racial hybridity or color blindness? This course examines the history of racial thinking and the experience of race in Latin America. While the focus of the course will be on the complexities of race in Latin America, a place of enormous ethnic and cultural diversity, we will also draw comparisons to the history of race in the U.S.

L22 History 2152 The Theory and Practice of Justice: The American Historical Experience

This introductory course uses historical case studies combined with readings in law, literature, and philosophy to illuminate key episodes where definitions of justice were contested in 19th and 20th century America. Some of the conflicts to be explored include: Cherokee Removal, Civil War era debates over southern secession; whether reparation should be offered to freed people to redress the injustices of racial slavery; the denial of voting rights to women as a case of "taxation without representation"; 20th century controversies over legal bans on racial intermarriage; free speech versus hate speech in the 1960s and 70s; and recent debates over affirmative action and gay marriage. Attendance Required.

L22 History 2157 First-Year Seminar: The Meaning of Pakistan: History, Culture, Art

Pakistan is the second largest Muslim nation and the sixth most populous country in the world. First imagined as an anti-majoritarian and anti-imperial idea, the nation came to be split between East and West Pakistan, with a hostile Indian nation dividing the country. The subsequent emergence of Bangladesh, from within, exposed the complexities of U.S. imperial and Indian power, colonialism, identity, ethnicity, race, nationalism and repression. More recently, the War on Terror has once again exploited the ethnic and cultural conflicts produced by world histories of power and resistance. The events of the past two hundred years have undoubtedly and violently exacerbated the

politicization of social and cultural identities. This course situates Pakistan in the context of pre-colonial social formations, British colonialism, internal colonialism, U.S. imperialism, the Cold War, Soviet interests, Indian regional hegemony and then turns to the powerful and diverse struggles launched by its own citizens against these external forces. How did successive empires construct and politicize social identities, and how did people contest and adapt these? How did caste, gender, race and religion shape empire and anti-imperial histories? Our sources will be historical, ethnographic, and literary. We will cover topics such as colonial fantasies, decolonization, the political uses of social categories of tribe, caste, language and gender, the political economy of militarism, terrorism, "development," activism, diasporic formations, poetry, music and art. The course will deepen our collective understanding of a critical series of developments in world history. Just as crucially, we will build a framework within which to address the stereotypes about Pakistan that dominate popular and media discourses today.

L22 History 2255 First-Year Seminar: The Caribbean and the World

For many, the Caribbean evokes images of an exotic place with beautiful beaches, friendly, happy "natives" and unbridled hedonism. Yet, much more than a distant vacation destination for "first world" consumption, the Caribbean has long been closely intertwined with major events in World History. This course explores the ways in which the Caribbean has been a part of the making of World History, beginning in the 14th century and ending in the contemporary period. Themes covered will include: capitalism and slavery; the Haitian Revolution and its global reverberations; U.S. imperialism in the Caribbean; the impact of Caribbean migration on British culture; Caribbean sports; music and food in a global context; and the contributions of Caribbean thinkers to anti-colonial and anti-imperialist thought and action.

L22 History 2358 First-Year Seminar: Travel and Travelers in the Second British Empire

Empires were, most fundamentally, networks of communication, commerce, governance, and travel held together by force. They are difficult to understand and define because different sorts of people experienced imperial rule differently. This seminar offers a new perspective on the Second British Empire by examining it through the eyes of the people who traveled throughout it as politicians, administrators, soldiers, merchants, missionaries, journalists, artists, and settlers. The course work and assignments involve reading and writing conventional travel accounts, memoirs, and police reports.

L22 History 2443 First-Year Seminar: The Nuremberg Trials and International Justice

This course is an exercise in understanding how professional historians and the general public discover and use the past. The main goals of this course are to understand the many different methods and standards applied to the past; to understand how and why each generation changes the past as it seeks to make it "usable"; and to develop the skills of exposition and argumentation necessary to describe and analyze complex historical issues and to express critical ideas effectively. The subject of this inquiry will be the Nuremberg trials: the

innovations and critiques around the law and politics of the trials themselves as well as the trials' legacies for ideas about international justice in postwar America and the world. Course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM BU: HUM, IS EN: H

L22 History 245 Topics in National Security History

This purpose of this course is to introduce first year students in an intimate setting to major topics in national security policy. For that reason, enrollments will be kept small. The goal is to provide insights for students considering a major in history and perhaps even a career in policy. The course structure will rotate topics (intelligence, war, world orders, etc.) each time it is taught.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L22 History 2561 Urban America

The city is a crucial frame for understanding the nation's cultural, economic, social, political and ecological concerns. This course discusses its importance in shaping American society and considers urban environments as living, breathing, contracting and expanding regions in the landscape. Questions of race, class and gender will be explored in an attempt to understand the current configuration of American cities, and to allow students to engage meaningfully with the continual transformation of urban space. Attention will be paid to the role played by popular imagination in the formation of public policy, civic spatial arrangement, suburban development and urban historical geography.

L22 History 2674 Sophomore Seminar: Slavery and Memory in American Popular Culture

Sophomores receive priority registration. The history of slavery has long created a sense of unease within the consciousness of many Americans. Recognizing this continued reality, this seminar examines how slavery is both remembered and silenced within contemporary popular culture. Although slavery scholarship continues to expand, how do everyday Americans gain access to the history of bondage? Taking an interdisciplinary approach to these intriguing queries, we will examine a range of sources: literature, public history, art/poetry, visual culture, movies and documentaries, as well as contemporary music including reggae and hip-hop. The centerpiece of this course covers North American society, however, in order to offer a critical point of contrast students will be challenged to explore the varied ways slavery is commemorated in others parts of the African diaspora.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, HUM EN: H

L22 History 270 Globalization and its Discontents

Today, the heady promises of globalization appear to have failed us. The notion of global markets and global citizens seems to have remained at best, an ideal. Meanwhile the world's majority has witnessed a staggering decline in education, nutrition, health and even physical mobility. Nowhere have these developments passed unquestioned: from the rise of the so-called Maoist insurgency in India to the Occupy movement in the U.S., people and especially the youth have expressed their outrage in creative and unconventional ways. This course plots the long and necessarily violent history of forging global interconnections.

The lens for our analysis will be India, South Asia and their relationship with the United States. We will approach a range of novels, films and popular cultural artifacts as we build our own understanding of the nature, critique and promise of globalization.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L22 History 2700 Sophomore Seminar: U.S.-China Relations: Perceptions and Realities

The United States and China are the two most important global powers today, and the bilateral relationship is one of the most comprehensive, complex, consequential, and competitive major-power relations in the world. The course aims to examine the attitudes, ideas, and values that have shaped the relationship, from the era of colonial expansion in the 1800s to the rise of China as a major political and economic power in the 21st century. Drawing upon visual images, literature, films, policy statements, and other materials, the course will analyze the patterns of perceptions that have informed and shaped the understanding of realities. This course, which uses an interdisciplinary approach, will include discussions and debates from both American and Chinese perspectives.

L22 History 270A Sophomore Seminar: Globalization and its Descendants

The metanarrative of globalization and global inter-connections privileges the story of markets, growth, and mobility. That story is relentlessly optimistic, and simultaneously, devoid of an understanding of gender, sexual difference or race. In this course, we take a different approach. We discard the more conventional "metrics" of globalization by focusing instead on another equally global story: the manner by which human beings have been gendered and racialized over time. Doing so allows us to revisit globalization through its own deceptions, its interconnected secrets. We confront a different set of questions: how has intimacy shaped global mobility, what is the relationship between caste and MAMAA, between custom and the movement of capital, between "slums" and scale, between outsourcing and incarceration, how does the normative family propel global racial regimes? Most crucially, how and why is the emotional and intimate story of globalization concealed? The seminar class utilizes a wide array of sources, historical documents, scholarly critiques, novels and film and largely considers the longer, global history of India as the case study. Our specific focus will be on the secretive interconnections of slavery, seclusion, settlers, servitude, surrogacy, and scholarship, as we take a deep dive into the disguises, and the more hidden aspects, of globalization.

L22 History 2750 Sophomore Seminar: Beijing: From Imperial Capital to Olympic City

This course examines recent English-language scholarship on Beijing's history and culture. From the early modern period to the contemporary era, Beijing has served as the capital for imperial, early Republican, and revolutionary and post-socialist China. The city thus has been virtually synonymous with governmental power and elite politics. However, recent scholarship has shifted focus from the political perspective to uncovering the social and cultural changes at the grassroots. Notable scholarly works have demonstrated that the modernization impulse and the

move to industrialization served to create the city's modern face. Administrative reforms gave rise to new conceptions and a host of institutions to manage social relief, public services, and legal and punitive institutions. The rise, fall, and subsequent revival of the consumer marketplace impacted cultural production and consumption. Mass (de)mobilization closed old venues while opening new possibilities for residents to understand and participate in politics. The recent English-language scholarship not only delineates forces that shaped the lives of millions of residents of Beijing but also situates their experience in the national and global context of modernization and revolution. L22 History 2802 Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film

This course is an examination of key turning points in Japan from the mid-19th century to the present. It focuses on the important role that bureaucracies, staffed by public servants, have played in shaping the political and social life on the archipelago and in the region. We will engage representations of political and social life in Japan by making use of its rich visual culture by viewing and discussing Japanese films. The assigned films, which will be screened in Japanese with English subtitles, will likely include "The Twilight Samurai," "To Live," and "Shin Godzilla," among others. These films provide representations of how people in Japan have responded to crises, including revolution, war, and natural disasters. Through written and visual materials, students will gain a better understanding of history in Japan, public service, and the utility of film for engaging the past. Film screenings are mandatory.

L22 History 3044 Humors, Pox and Plague: Medieval and Early Modern Medicine

This course examines how people thought about, experienced and managed disease in the medieval and early modern periods. Students will consider developments in learned medicine alongside the activities of a diverse range of practitioners — e.g., surgeons, empirics, quacks, midwives, saints, and local healers — involved in the business of curing a wide range of ailments. Significant attention will be paid to the experiences of patients and the social and cultural significance of disease. Major topics include: the rise and fall of humoral medicine; religious explanations of illness; diseases such as leprosy, syphilis and plague; the rise of anatomy; herbs and pharmaceuticals; the experience of childbirth; and the emergence of identifiably "modern" institutions such as hospitals, the medical profession, and public health. The focus will be on Western Europe but we'll also consider developments in the Islamic world and the Americas.

L22 History 3045 Hot Peace: U.S.-Russia Relations Since the Cold War

This course is an historical analysis of U.S.-Russia relations since the end of the Cold War. Focusing on "reset" diplomacy during the terms of five American and three Russian presidents since 1990, it reveals a familiar historical pattern that begins with high hopes, dialogue, and optimism only to be followed by vast disappointment, standoffs, and pessimism. Despite this dynamic, the course shows how and why the two countries have been able to cooperate at times to make substantial headway on critical issues such as arms control, nonproliferation of WMD, NATO expansion, counterterrorism, and economic and energy development, whereas at other times they have run afoul of major obstacles such as further NATO expansion, missile defense, and democracy and human rights in Russia. The course also examines how many political events created substantial challenges to U.S.-Russia relations, including the Balkan Wars; U.S. wars in Iraq and Afghanistan; Russia's wars in Chechnya, Georgia and Ukraine/Crimea; the "Color Revolutions"; the Arab Spring and subsequent civil wars in Iraq, Syria, Yemen and Libya; the fight against ISIS and other militant Islamists; the threats posed by Iran and North Korea; the rise of China; espionage crises; hybrid wars; cyberattacks; and disinformation campaigns. Two vital questions frame the analysis: (1) Why has it been so difficult for these two great powers to develop a mutually beneficial relationship? (2) What would be required to move beyond the limited partnership to something more productive and sustaining? The course concludes by evaluating "reset" diplomacy and the ongoing attempts to move U.S.-Russia relations beyond a Hot Peace.

L22 History 3056 Material Culture in Modern China

In this course, we will explore change and continuity from late imperial to postsocialist China through an analysis of everyday material culture. Drawing upon material objects, historical texts, ethnographic studies and films, we will investigate values, beliefs and attitudes toward the material world in modern Chinese life. Readings, lectures and discussions will focus on how political, ethnic, regional, religious, and gender identities have been constructed and shaped by the use and production of material artifacts ranging from household goods and tomb objects to built forms and bodily dispositions. Case studies include foot-binding, opium use, fashion, tea culture, fast food consumption, sports and nation building, contemporary art markets, the privatization of housing, and worker discipline in transnational factories. L22 History 3067 Topics in the History of Medicine: History of Madness

Mental health — its diagnosis, social implications and experience — is a central and increasingly visible part of the practice of medicine. This course explores "madness." How have different societies explained and responded to states of mind, behavior and emotion judged to be unreasonable? What role has medicine played in framing understandings about mental disorders and their management? During this course we will engage these questions, charting the shifting experience of mental illness roughly from the Middle Ages to the present. Themes covered include: religious models of madness; humoral medicine and disorders such as melancholy; the premodern madhouse and the emergence of the modern asylum; the history of psychiatry; the insanity defense in the courtroom; patient autobiography; gender, race and mental health.

L22 History 3074 Hinduism & the Hindu Right

We are witnessing a global rise in rightwing politics, and India is no exception. In May 2019, Narendra Modi and his "Hindu Nationalist" party were elected to power for a second term. Observers in the United States and Europe may be stunned by what seems to be a new development, but observers in India have been following the rise of the Hindu Right since the early 1990s. In its wake, the Hindu Right has brought violence against minorities; curbs on free speech; and moves toward second-class citizenship for Indian Muslims. This course will track the history of the Hindu Right in India from its 19th-century roots to the present. The struggle to come to grips with the Hindu Right is of immediate political relevance. It also raises big questions about the history of religion and the politics of secularism.

L22 History 3082 City on a Hill: The Concept and Culture of American Exceptionalism

This course examines the concept, history, and culture of American exceptionalism — the idea that America has been specially chosen, or has a special mission to the world. First, we examine the Puritan sermon that politicians quote when they describe America as a "city on a hill." This sermon has been called the "ur-text" of American literature, the foundational document of American culture; learning and drawing from multiple literary methodologies, we will re-investigate what that sermon means and how it came to tell a story about the Puritan origins of American culture — a thesis our class will reassess with the help of modern critics. In the second part of this class, we will broaden our discussion to consider the wider (and newer) meanings of American exceptionalism, theorizing the concept while looking at the way it has been revitalized, redefined and redeployed in recent years. Finally, the course ends with a careful study of American exceptionalism in modern political rhetoric, starting with JFK and proceeding through Reagan to the current day, ending with an analysis of Donald Trump and the rise of "America First." In the end, students will gain a firm grasp of the long history and continuing significance — the pervasive impact — of this concept in American culture.

L22 History 3091 Poverty and Social Reform in American History

This course explores the history of dominant ideas about the causes of and solutions to poverty in American society. We will investigate changing economic, cultural, and political conditions that gave rise to new populations of impoverished Americans and to the expansion or contraction of poverty rates at various times in American history. However, we will focus primarily on how various social commentators, political activists, and reformers defined poverty, explained its causes, and struggled to ameliorate its effects. The course aims to highlight changes in theories and ideas about the relationship between dependence and independence, personal responsibility and social obligation, and the state and the citizen.

Credit 3 units. A&S IQ: HUM, SD BU: BA EN: H

L22 History 30CC The American School

In this course, we examine the development of American schooling. Our focus is on three general themes: (1) the differing conceptions of schooling held by some American political, social, and cultural thinkers; (2) the changing relationships among schools and other educational institutions, such as the church and the family; and (3) the policy issues and arguments that have shaped the development of schooling in America.

L22 History 313C Islamic History: 600-1200

The cultural, intellectual and political history of the Islamic Middle East, beginning with the prophetic mission of Muhammad and concluding with the Mongol conquests. Topics covered include: the life of Muhammad; the early Muslim conquests; the institution of the caliphate; the translation movement from Greek into Arabic and the emergence of Arabic as a language of learning and artistic expression; the development of new educational, legal and pietistic institutions; changes in agriculture, crafts, commerce and the growth of urban culture; multiculturalism and inter-confessional interaction; and large-scale movements of nomadic peoples.

L22 History 3149 The Late Ottoman Middle East

This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to World War I). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students focus on how everyday people's lived experiences were affected by the increased monetarization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: HUM, IS EN: H

L22 History 314C Islamic History: 1200-1800

An introduction to Islamic politics and societies from the Mongol conquests to the 13th century to the collapse and weakening of the colossal "gunpowder" empires of the Ottomans, Safavids and Mughals in the early 18th century. Broadly speaking, this course covers the Middle Period (1000-1800) of Islamic history, sandwiched between the Early and High Caliphal periods (600-1000) on the one hand and the Modern Period (1800-present) on the other hand. Familiarity with the Early and High Caliphal periods is not assumed. The course is not a "survey" of this period but a series of "windows" that allows students to develop both an in-depth understanding of some key features of Islamic societies and a clear appreciation of the challenges (as well as the rewards!) that await historians of the Middle Period. Particular attention is given to the Mamluk and Ottoman Middle East, Safavid Iran and Mughal India.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM, IS

L22 History 3150 The Middle East in the 20th Century

This course surveys the history of the Middle East since World War I. Major analytical themes include: colonialism; Orientalism; the formation of the regional nation-state system; the formation and political mobilization of new social classes; changing gender relations; the development of new forms of appropriation of economic surplus (oil, urban industry) in the new global economy; the role of religion; the Middle East as an arena of the Cold War; conflict in Israel/Palestine; and new conceptions of identity associated with these developments (Arabism, local patriotism, Islamism).

L22 History 3153 Sex and Gender in Greco Roman Antiquity

In this course, we will explore how ancient Greeks and Romans thought about gender and sexuality. We will consider questions such as: which traits and behaviors did the Greeks and the Romans associate with masculinity and with femininity? What can we tell from our sources about those who did not fit neatly into this binary? How did ancient Greeks and Romans think about male and female anatomy and psychology? How did the Greeks and the Romans construct sexuality and how did they approach homosexual and heterosexual relationships? How did they think about erotic desire? How did ancient laws and institutions circumscribe the lives of men and women, and how did they contribute to the construction of gender and sexuality? How did class, ethnicity, and age intersect with ideas about gender and sexuality in antiquity? We will read an array of ancient texts in translation, we will consider various theoretical viewpoints, and we will move toward a better understanding of how gender and sexuality were constructed in antiquity. Ultimately, we will reflect on how our exploration of ancient ideas about these issues can help us understand better how we think about them today.

L22 History 3162 Early Modern China

This course examines political, socioeconomic and intellectual — cultural developments in Chinese society from the middle of the 14th century to 1800. This chronological focus largely corresponds to the last two imperial dynasties, the Ming (1368-1644) and Qing (1644-1911). Thematically, the course emphasizes such early-modern indigenous developments as increasing commercialization, social mobility and questioning of received cultural values.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L22 History 3163 Historical Landscape and National Identity in Modern China

This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campus, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens, and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual, political, and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local, and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership,

national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory, and changing over time are an important concern of this course.

L22 History 3165 Chinese Diasporas

Five hundred years ago, the Chinese population was concentrated in core areas of China proper. Beginning in the 16th century, significant numbers of Chinese people moved to the frontiers of an expanding China and across its borders: to Japan and Southeast Asia, to the Americas and Australia, and to Africa and Europe. Although Chinese migration certainly existed beforehand, the period from the 16th century to the present day is marked by the emergence of sustained movement of non-state actors and the development of institutions — ranging from native-place associations to tourist agents' websites — that supported this vast circulation of people. Likewise, in many emigrant communities and host societies, Chinese diasporic families adapted to migration as a way of life. This course traces this worldwide circulation of Chinese people over these five centuries.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L22 History 3166 A History of Modern China

This course explores the 19th- and 20th-century history of China. Its purpose is to provide students with a historical foundation to understand the momentous changes the country underwent during its traumatic transition from an empire to a nation-state. We start the course at the height of the empire's power in the late 18th century, when the Qing dynasty (1637-1912) conquered vast swathes of lands and people in Inner Asia. We then move on to the Qing's troubled relationship with Western capitalism and imperialism in the 19th century, which challenged the economic, social, and ideological structures of the imperial regime, culminating in the emergence of "China" as a nation-state. By situating China's national history within a global context, the course outlines in detail the transformations that took place in the 20th century, from the rise of communism and fascism to the Second World War to Maoism and cultural revolution. We end the semester with yet another major change that took place in the 1980s, when a revolutionary Maoist ideology was replaced with a technocratic regime, the legacies of which are still with us today.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L22 History 3167 Economic History of China: From the Silver Age to Reform and Opening, 1500-1990

This seminar explores the economic history of China from the 16th to the 20th century; this time period is the half a millennium during which China became part of the world economy and defined its development in major ways. Over the course of the semester, students will be exposed to the main debates in the field of Chinese economic history while acquiring a strong grasp of the nuts and bolts of how economy functioned and changed from the imperial to the modern times. Situating China within a comparative perspective, we will examine a multitude of debates ranging from the global silver age of the 16th century to the birth of capitalism, the socialist economy, and the PRC's recent involvement in Africa. We will in particular discuss the contradictions that arose out of China's integration into the world economy and the different kinds of economic regimes that

existed and continue to exist within China. While this course assumes a basic familiarity with Asian history, students with backgrounds in other world histories and/or social science disciplines should feel comfortable with the course material.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L22 History 3168 History of Global Capitalism: From Slavery to Neoliberalism

This course introduces the methods, issues, and debates that shape our understanding of economic change and development from the Industrial Revolution to the post-industrial age. Engaging economic theorists from Marx to Smith to Weber and Wallerstein, this course problematizes the notion of rational economic actors and interrogates notions of free trade in an attempt to understand the impact of capitalism on the world. We start the course with a discussion of the "exceptionalism" of Great Britain as the first industrial nation and reconsider the impact of new trade, production, property and monetary/financial regimes that resulted in the so-called "Great Divergence" between China and the West. We then turn to the "late industrializers" of China, Japan, and Mexico in order to investigate the varieties of development, specifically focusing on monetary integration, legal integration and the global impact of the great depression. Continuing into the Bretton Woods Conference and the post-war international monetary systems, we bring the course to a close with the advent of the "post-industrial age." This course is designed both for students specializing in economic history and students in all disciplines interested in historical approaches to political/economic development.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: IS EN: H

L22 History 3169 Cyborgs in History: From Cybernetics to Artificial Intelligence

Who coined the word "cyborg," and why? How did cyborgs become so integral to our imaginative worlds and daily existence? In this course, we will contemplate the intersection between technologies and societies through the lens of cyborgs, a term that is shorthand for "cybernetic organisms." Defying the separation between humans and machines, cyborgs have been critical to sciences, humanities, pop culture, feminism, afrofuturism, and queer studies, among many other fields of inquiry. This course will take a deep dive into the worlds of scientists, scholars, artists, and ordinary people to discover the cultural meanings of cyborgs across time and space. Along the way, we will meet Norbert Wiener, who coined the term "cybernetics"; Donna Haraway, for whom the cyborgs were a revolutionary species; and John C. Lilly, who thought he could speak with dolphins. We will also travel to the USSR to read about a failed internet; to Chile, where cybernetics was a socialist project; and to Japan, to learn about gender and technology in non-Western spaces. By the end of the course, students will have a strong theoretical and historical grasp on the social worlds of cybernetic technologies.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA EN: H

L22 History 316C Modern China: 1890s to the Present

A survey of China's history from the clash with Western powers in the 1800s to the present day economic revolution. This course examines the background to the 1911 revolution that destroyed the old political order. Then it follows the great cultural and political movements that lead to the Communist victory in 1949. The development of the People's Republic will be examined in detail, from Mao to the global economy.

L22 History 3172 Queer Histories

Queer history is a profoundly political project. Scholars and activists use queer histories to assert theories of identity formation, build communities, and advance a vision of the meanings of sexuality in modern life and the place of queer people in national communities. This history of alternative sexual identities is narrated in a variety of settings-the internet as well as the academy, art and film as well as the streets-and draws upon numerous disciplines, including anthropology, geography, sociology, oral history, fiction and memoir, as well as history. This discussion-based course will examine the sites and genres of queer history, with particular attention to moments of contestation and debate about its contours and meanings.

L22 History 3173 Service Learning: Documenting the Queer Past in St. Louis

Around the United States and the world, grassroots LGBTQ history projects investigate the queer past as a means of honoring the courage of those who have come before, creating a sense of community today as well as building an understanding of the exclusions and divisions that shaped these communities and that continue to limit them. In this course, we participate in this national project of history-making by helping to excavate the queer past in the greater St. Louis region. Course readings will focus on the ways that sexual identities and communities in the United States have been shaped by urban settings since the late 19th century, with particular attention to the ways that race, class, and gender have structured queer spaces and communities. In their community service project, students will work with local LGBTQ groups, including the St. Louis LGBT History Project, to research St. Louis's queer past. Each student will also conduct an oral history interview with an LGBTQ community member. Note: This is a community-engaged learning class, which means that it combines classroom learning with outside work at a community organization. In addition to regular class time, there is a service requirement, which necessitates an additional three to five hours per week. Before beginning the community service component, students must complete required training. Prerequisite: Introduction to Women, Gender, and Sexuality Studies; Introduction to Queer Studies; or permission of instructor.

L22 History 3183 The Jews of North Africa

This course examines the colonial and postcolonial experiences of Jews living in North Africa (mainly Algeria, Morocco, Tunisia, Libya and Egypt) in the context of the region's connections with and relationships to the European powers in the 19th and 20th centuries. We will focus on how the intrusion of foreign

powers disrupted and shifted long-standing relationships between Jews and their non-Jewish neighbors, particularly the Muslim populations. We will also explore changes that occurred within the Jewish community as Jews negotiated their place within the new European Imperial system and its subsequent dismantling. Students will have the opportunity to engage with European ideas of "regenerating" North African Jews living under Ottoman Rule, the changing political and social statuses of Jews throughout the French and British regions, the changing relationship between Jews and their non-Jewish neighbors, the rupture caused by both World Wars, and how Jews coped with and responded to the dismantling of European empires and the birth of nation-states in the region, including Israel.

L22 History 3194 Environment and Empire

In this course we study British imperialism from the ground up. At bottom, the British empire was about extracting the wealth contained in the labour and the natural resources of the colonized. How did imperial efforts to maximize productivity and profits impact the ecological balance of forests, pastures and farm lands, rivers and rainfall, animals and humans? We ask, with environmental historians of the U.S., how colonialism marked a watershed of radical ecological change. The course covers examples from Asia to Africa, with a focus on the "jewel in the crown" of the British empire: the Indian subcontinent. We learn how the colonized contributed to the science of environmentalism, and how they forged a distinctive politics of environmentalism built upon local resistance and global vision, inspired by religious traditions and formative thinkers, not least Mahatma Gandhi.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L22 History 3195 Empire and Ethnicity: Qing Legacies in China and Inner Asia, 1600 to Today

Eschewing traditional narratives of a "closed" Chinese civilization, this course explores the cultural, religious, and ethnic diversity of China and its dynamic interactions with Inner Asia during the early modern period. It questions the myth of a monolithic Chinese culture and uncovers the region's multiple and ethnically entangled past through an in-depth look at the Manchu-led Qing dynasty (1644-1912). This was the last non-Han dynasty of the Imperial Era, and it gave the People's Republic of China its vast Inner Asian territories: Xinjiang, Inner Mongolia, and Tibet. In rethinking the Qing Empire, this course

particularly focuses on Tibetan Buddhism and Islam as religious ideologies that linked China with Tibetan, Mongolian, and Turkic-Muslim regions of Inner Asia through the imperial center at Beijing. Specific topics will range from food culture (Halal) to the Qing's expansion into and later colonization of Xinjiang, the reverberations of which persist even today under the Belt and Road Initiative.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS
EN: H

L22 History 320C Japan Since 1868

For some, the word Japan evokes Hello Kitty, animated films, cartoons, and sushi. For others, it makes them think of the Nanjing Atrocity, "comfort women," the Bataan Death March, and problematic textbooks. Still others will think of woodblock prints, tea ceremonies, and cherry blossoms or perhaps of Sony Walkmans and Toyota automobiles. At the same time, still others may have no image of Japan at all. Tracing the story of Japan's transformations -- from a preindustrial peasant society managed by samurai-bureaucrats into an expansionist nation-state and then into its current paradoxical guise of a peaceful nation of culture led by conservative nationalists -- provides the means for deepening our understanding of historical change in one region and for grappling with the methods and aims of the discipline of history.

L22 History 321C Introduction to Colonial Latin America until 1825

This course surveys the history of Latin America from the pre-Columbian civilizations through the Iberian exploration and conquest of the Americas until the Wars of Independence (roughly 1400-1815). Stressing the experiences and cultural contributions of Americans, Europeans and Africans, we consider the following topics through primary written documents, first-hand accounts, and excellent secondary scholarship, as well as through art, music and architecture: Aztec, Maya, Inca and Iberian civilizations; models of conquest in comparative perspective (Spanish, Portuguese and Amerindian); environmental histories; consolidation of colonialism in labor, tributary and judicial systems; race, ethnicity, slavery, caste and class; religion and the Catholic Church and Inquisition; sugar and mining industries, trade and global economies; urban and rural life; the roles of women, gender and sexuality in the colonies. Geographically, we cover Mexico, the Andes, and to a lesser extent, Brazil, the Southwest, Cuba, and the Southern Cone. Premodern, Latin America.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD BU: HUM EN: H

L22 History 3220 Modern Mexico: Land, Politics and Development

This course is designed to provide students with an overview of the political, social, economic and cultural history of Mexico from the era of Independence (roughly 1810) to the present. Lectures outline basic theoretical models for analyzing historical trends and then present a basic chronological historical narrative.

Credit 3 units. A&S IQ: HUM, LCD, SD BU: HUM, IS EN: H

L22 History 322C Modern Latin America

This course aims to present a survey of Latin American history from Independence to the present. Topics to be covered include the Wars of Independence; caudillismo; nationalism; liberalism; slavery and indigenous peoples; urbanization, industrialization and populism; ideas of race & ethnicity; the Mexican and Cuban Revolutions; US intervention; modernity, modernism and modernization; motherhood and citizenship; the Cold War; terror and violence under military dictatorships and popular resistance movements. While the course aims to provide students with an understanding of the region, it will focus primarily on the experiences of Mexico, Cuba, Brazil, Argentina and Central America.

HUM, IS EN: H

L22 History 3262 The Early Medieval World: 200-1000

This course begins with the crisis of the Roman Empire in the third century and the conversion of the Emperor Constantine to Christianity in 312. We will study the so-called "barbarian invasions" of the fourth and fifth centuries and the collapse of the Roman Empire in the West. The Roman Empire in the East (and commonly known as the Byzantine Empire after the seventh century) survived intact, developing a very different style of Christianity than in the lands of the former western empire. Apart from examining Christianization in the deserts of Egypt or the chilly North Sea, we will discuss the phenomenon of Islam in the seventh century (especially after the Prophet Muhammad's death in 632) and the Arab conquests of the eastern Mediterranean and north Africa. In the post-Roman world of the West we will read about the Anglo-Saxons, the Carolingians, and the Vikings. In exploring these topics we will have to think about the relationship of kings to popes, Emperors to patriarchs, of missionaries to pagans, of cities to villages, of the sacred to the profane. Our attention will be directed to things as various as different forms of monasticism, the establishment of frontier communities, the culture of the Arabian peninsula, magic, paganism, military tactics, Romanesque churches, sea travel, manuscript illumination, the architecture of mosques, early medieval philosophy, the changing imagery of Christ, holiness, and violence as a redemptive act.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L22 History 3263 The High Middle Ages: 1000-1500

This course begins with the first millennium in western Europe and ends with the arrival of Europeans in the Americas. We will study, amongst other topics, the relationship of popes to kings, cities to villages, Jews to Christians, vernacular literature to Latin, knights to peasants, the sacred to the profane, as well as different forms of religious life, farming, heresy, the shift from a penitential culture to a confessional one, the crusades and Islam, troubadour poetry, the Mongol Empire, universities, leprosy, the inquisition, Gothic art, the devil, chivalry, manuscript illumination, shoes, definitions of feudalism, environment, trade, scholastic philosophy, female spirituality, witchcraft, sex, the Black Death, food, the Hundred Years War, the renaissance in Italy, African slaves in the Iberian peninsula, and the conquest of New Spain.

L22 History 3266 Scholarship and the Screen: Medieval History and Modern Film

Historical films are surprisingly accurate reflections of modern historiographical trends in the study of the Middle Ages. This course uses films on the Middle Ages, medieval documentary evidence, scholarship from the time the film was released, and current scholarship. It explores the shifts in historical interpretation of the Middle Ages over the past century and engages in debates over what evoking the past means for the scholar and the filmmaker.

Credit 3 units. A&S IQ: HUM BU: HUM, IS EN: H

L22 History 3307 The Politics of Black Criminality and Popular Protest

This course will explore the meanings and perceptions of Black criminality in modern American culture. It will consider issues of rioting and racial violence; movements ranging from hip-hop to Black power; the crucial matter of police brutality; and cultural associations between criminality and Black masculinity. Our work will be informed by an awareness of the historical interactions between African Americans and legal and other systems of authority: in particular, the ambiguous boundaries of legality under slavery, post-emancipation convict leasing, Jim Crow laws, Black gangs, and the functions of illegal acts in the lives of Black citizens. The course will give special attention to the ways that popular thought, imagination, and culture -- and particularly Black thought and culture -- have addressed crime. How does criminality connect to popular forms of protest, resistance, and discussions about inequality and identity?

L22 History 331 19th-Century China: Violence and Transformation

This course traces the history of China over the course of the 19th century, with an emphasis on social and cultural history. This was one of the most tumultuous centuries in Chinese history, during which China faced threats from abroad in the form of Western and Japanese imperialism as well as from within in the form of environmental degradation and rebellions resulting in an unprecedented loss of human life. The 19th century has thus often been portrayed as a period of sharp decline for China. At the same time, we will explore the ways in which the origins of the dynamic society and economy found in China today -- as well as the worldwide influence of overseas Chinese -- can be traced to this century of turmoil.

L22 History 333 The Holocaust: History and Memory of the Nazi Genocide

Origins, causes and significance of the Nazi attempt to destroy European Jewry within the context of European and Jewish history. Related themes: the Holocaust in literature; the psychology of murderers and victims, bystanders and survivors; and contemporary implications of the Holocaust for theology and politics.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Art: HUM BU: ETH, HUM, IS EN: H

L22 History 334C Crusade, Conflict, and Coexistence: Jews in Christian Europe

This course will investigate some of the major themes in the history of the Jews in Europe, from the Middle Ages to the eve of the French Revolution. Jews constituted a classic, nearly continuous minority in the premodern Christian world -- a world that was not known for tolerating dissent. Or was it? One of the main purposes of the course is to investigate the phenomenon of majority/minority relations, to examine the ways in which the Jewish community interacted with and experienced European societies, cultures and politics. We will look at the dynamics of boundary formation and cultural distinctiveness; the limits of religious and social tolerance; the periodic eruption of persecution in its social, political, and religious contexts; and the prospects for Jewish integration into various European societies during the course of the Enlightenment era.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD BU: ETH, HUM, IS EN: H

L22 History 3350 Out of the Shtetl: Jewish Life in Central and Eastern Europe in the 19th and 20th Centuries

"Out of the Shtetl" is a course about tradition and transformation; small towns and urban centers; ethnicity and citizenship; and nations, states, and empires. At its core, this course asks the following questions: What did it mean for the Jews of Central and Eastern Europe to emerge from small market towns and villages to confront modern ethnicities, nations, and empires? What lasting impact did the shtetl experience have on Jewish life in a rapidly changing environment? The focus is on the Jewish historical experience in the countries that make up Central and Eastern Europe (mainly the Bohemian lands, Hungary, Poland, and Russia) from the late 18th century to the fall of the Soviet Union. Among the topics that we will cover are Jews and the nobility in Poland-Lithuania; the multicultural imperial state; Hasidism and its opponents; absolutism and reform in imperial settings; the emergence of modern European nationalisms and their impact on Jewish identity; antisemitism and popular violence; nationalist and radical movements among Jews; war, revolution, and genocide; and the transition from Soviet dominion to democratic states.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L22 History 3352 China's Urban Experience: Shanghai and Beyond

The course studies the history of Chinese cities from the mid-19th century to the late 20th century. It situates the investigation of urban transformation in two contexts: the domestic context of modern China's reform and revolution; and the global context of the international flow of people, products, capitals and ideas. It chooses a local narrative approach and situates the investigation in one of China's largest, complex, and most dynamic and globalized cities -- Shanghai. The experience of the city and its people reveals the creative and controversial ways people redefined, reconfigured and reshaped forces such as imperialism, nationalism, consumerism, authoritarianism, liberalism, communism and capitalism. The course also seeks to go beyond the "Shanghai model" by comparing Shanghai with other Chinese cities. It presents a range of the urban experience in modern China.

L22 History 3354 Vienna, Prague, Budapest: Politics, Culture and Identity in Central Europe

The term Central Europe evokes the names of Freud and Mahler; Kafka and Kundera; Herzl, Lukács, and Konrád. In politics, it evokes images of revolution and counter-revolution, ethnic nationalism, fascism, and communism. Both culture and politics, in fact, were deeply embedded in the structures of empire (in our case, the Habsburg Monarchy) — structures which both balanced and exacerbated ethnic, religious, and social struggles — in modern state formation, and in the emergence of creative and dynamic urban centers, of which Vienna, Budapest, and Prague were the most visible. This course seeks to put all of these elements into play — empire, nation, urban space, religion, and ethnicity — in order to illustrate what it has meant to be modern, creative, European, nationalist, or cosmopolitan since the 19th century. It engages current debates on nationalism and national identity; the viability of empires as supra-national constructs; urbanism and modern culture; the place of Jews in the social and cultural fabric of Central Europe; migration; and authoritarian and violent responses to modernity.

L22 History 335C Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History

This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be or to become modern. To answer this question, we look at two broad trends that took shape toward the end of the 18th century -- the Enlightenment and the formation of the modern state -- and we track changes and developments in Jewish life down to the close of the 20th century, with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time, from innovation to revolution, exclusion to integration, and calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish "emancipation"; acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political and racial antisemitism; mass migration and the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

L22 History 336C History of the Jews in Islamic Lands

This course is a survey of Jewish communities in the Islamic world, their social, cultural, and intellectual life from the rise of Islam to the Imperial Age. Topics include: Muhammad, the Qur'an and the Jews; the legal status of Jews under Islam; the spread of Rabbinic Judaism in the Abbasid empire; the

development of new Jewish identities under Islam (Karaites); Jewish traders and scholars in Fatimid Egypt; the flourishing of Jewish civilization in Muslim Spain (al-Andalus); and Sephardi (Spanish) Jews in the Ottoman empire. On this background, we will look closely at some of the major Jewish philosophical and poetical works originating in Islamic lands. Another important source to be studied will be documents from the Cairo Genizah, reflecting social history, the status of women, and other aspects of daily life.

L22 History 3404 The Creation of Capitalism

This course examines the emergence of commercial, financial, and labor practices prior to the Industrial Revolution at the end of the 18th century. At the same time that students look at how money was made, they will consider contemporary responses to these economic practices, from concerns about usury, market manipulations, and increasing luxury consumption to the promotion of commerce as essential to the prosperity and strength of the nation. The course begins by defining the basic institutions and structures of the medieval Mediterranean, such as banking and credit operations, trading partnerships, and the position of the merchant within Renaissance society. The focus then shifts to merchant capital in an era of centralization, as the Dutch develop their world trade hegemony and the increasingly centralized states support of monopoly companies and mercantilist policies. The course ends by looking at the expanding world of commerce in the era of integration, as European merchants entrench their control of production and trade throughout the globe through their increased social and political importance, the spread of the putting-out system, and the refinement of colonial policies.

L22 History 3414 The World is Not Enough: Europe's Global Empires, 1400-1750

"Non sufficit orbis" (the world is not enough) became the motto for King Philip II of Spain, whose empire touched nearly every part of the globe. Europe's expansion to Africa, Asia and the Americas was a transforming event for world history and for its willing and unwilling participants. This course examines the religious, political, and economic forces driving the overseas expansion of Europe, compares the experience of European sailors, soldiers and merchants in different parts of the world, and analyzes the effect of empire on the colonizers, the colonized, and the balance of world power. Topics covered include: Portuguese and Spanish conquests in the East and West Indies, religious conversion and resistance, trade routes and rivalries, colonial practices and indigenous influence, the establishment of Atlantic slavery, and the rise of the Dutch and English empires.

L22 History 3416 War, Genocide and Gender in Modern Europe

This course explores the way in which gender and gender relations shaped and were shaped by war and genocide in 20th-century Europe. The course approaches the subject from various vantage points, including economic, social and cultural history, and draws on comparisons between different regions. Topics covered will include: new wartime tasks for women; soldiers' treatment of civilians under occupation, including sexual violence; how combatants dealt with fear, injury and the loss of comrades; masculine attributes of soldiers and officers of different nations and in different wartime roles; survival strategies and the relation to expectations with regard to people's (perceived) gender identity; the meanings of patriotism for women and men during war; and gender-specific experiences of genocide.

L22 History 3424 Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World

From child saints to child scholars and from child crusaders to child casualties, the experience of childhood varied widely throughout the European Middle Ages. This course will explore how medieval Jews, Christians, and Muslims developed some parallel and some very much divergent concepts of childhood, childrearing, and the proper cultural roles for children in their respective societies. Our readings will combine primary and secondary sources from multiple perspectives and multiple regions of Europe and the Mediterranean World, including a few weeks on the history and cultural legacy of the so-called Children's Crusade of 1312. We will conclude with a brief survey of medieval childhood and its stereotypes as seen through contemporary children's books and TV shows. This course fulfills the Language & Cultural Diversity requirement for Arts & Sciences.

L22 History 343C Europe in the Age of Reformation

How should people act toward each other, toward political authorities and toward their God? Who decided what was the "right" faith: the individual? the family? the state? Could a community survive religious division? What should states do about individuals or communities who refused to conform in matters of religion? With Martin Luther's challenge to the Roman Catholic Church, the debates over these questions transformed European theology, society and politics. In this class we examine the development of Protestant and Radical theology, the Reformers' relations with established political authorities, the response of the Catholic Church, the development of new social and cultural expectations, the control of marginalized religious groups such as Jews, Muslims and Anabaptists, and the experiment of the New World.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM, IS

L22 History 3450 Modern Germany

This course surveys the political, social, economic and cultural forces that have shaped German history since 1800. After examining the multiplicity of German states that existed in 1800, we identify the key factors that resulted in unification in 1871. We then turn to a study of modern Germany in its various forms, from the Empire through the Weimar Republic and Third Reich, to postwar division and reunification. A major focus is the continuities and discontinuities of German history, particularly with regard to the historical roots of Nazism and attempts to "break with the past" after 1945.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM, IS EN: H

L22 History 3455 Cultural Encounters: China and Eurasia Since the Middle Ages

Eschewing traditional narratives of Chinese civilization, which imply a society closed to the outside world, this course follows current scholarship in situating Chinese history within a broader spatial context. In particular, this course explores cultural encounters between China and other subregions of the Eurasian continent to the north and west of China, from the Tang Dynasty (618-907) to the present. The course begins by analyzing the relationship between nomadic societies on the steppe (and, more generally, "non-state spaces") and settled agricultural societies such as China. We then turn to the influence of two religions imported from central Eurasia: Buddhism and Islam. A related theme is the relationship, in the early modern era, between trade, which tended to erode boundaries, and states, which sought to create boundaries. We will then trace the changing dynamics among commerce, religion, and nation-states in the 20th century. Finally, we return to the role of Buddhism and Islam in the contemporary relationship between China and the various peoples and states across its western frontier.

L22 History 3473 Race, Rights, and Humanity in European History

This course explores discourses of human rights as natural rights in Europe from the Enlightenment to the present. While Europe — and particularly France — has been quick to declare itself the birthplace of human rights, a closer look reveals a broad continuum of conceptions of political, social, and economic rights. The course functions as a kind of survey of Modern European history, touching on the Age of Revolutions, the rise of European overseas empires, international anti-slavery movements, totalitarianism, and postwar development. It focuses on how political, social, and economic rights have always been articulated incompletely, to the benefit of some and to the detriment of others.

L22 History 3481 Revolutionize It!: Second-Wave Feminism and the Struggle for a Radical Movement

In this discussion-based course, we explore the complex, contradictory and profoundly multiracial history of the so-called "second wave" of the feminist movement (1960s-1980s). We will focus on those activists who understood themselves to be radicals and revolutionaries — women's liberationists, women of color (or third-world) feminists, and lesbian-feminists — as they collaborated and collided with each other. Among the questions we will ask are the following: What happens to our understanding of the second wave when we center the activism of African-American, Latinx, indigenous and anti-capitalist feminists? What were the promises and the pitfalls of a politics of "sisterhood"? How did sexual desire and sexual conflict shape both notions of identity and the movement on the ground? We will also consider the legacy of second-wave feminism for the politics of our time, including #MeToo, reproductive freedom, and the struggle for trans liberation. Prerequisite: L77 100B or permission of instructor.

L22 History 3503 U.S.-China Relations from 1949 to the Present

The United States and China are the two most important global powers today, and the relationship between them is one of the most comprehensive, complex, and consequential major-power relations in the world. The tangled relationship is at times turbulent, and its future remains uncertain. This course studies the bilateral relationship from the Chinese Civil War to the rise of China as a major political and economic power in the 21st century. It invites students to explore the following questions: What have China and the U.S. done to confront or accommodate each other in global politics? How has foreign policy in both countries balanced the often competing goals of state security, economic stability, domestic political order, and international influence? What are the impacts of a rising China on geopolitics in the Asia-Pacific region and on the U.S.'s global leadership

in the 21st century? By drawing on scholarship in political and social history and area studies, this course helps students better understand both the historical context and current developments of U.S.-China relations.

L22 History 3548 Gender, Sexuality and Communism in 20th-Century Europe

This upper-division course examines the role of gender and sexuality for the establishment of communist societies in Europe in 20th century. We will explore to what extent societies built on the communist model succeeded with the achievement of gender equality and allowed for sexual relations liberated from religious or economic constraints. Class materials examine how state socialism shaped gender roles and women's and men's lives differently as well as how gays and lesbians struggled against social taboo and state repression. Students analyze the impact of modernization, industrialization, war and other conflicts on concepts of femininity and masculinity as well as on the regulation of sexuality and family relations in several Eastern European countries. We will place these dynamics within the context of broader political and cultural developments, ending with an analysis of the breakdown of socialism in the early 1990s and its impact on gender relations and the freedom of expression. The course provides students with a basic knowledge of the history of Eastern Europe and of left-wing movements active in the area, emphasizing the effects of communist ideas on women, gender equality, and non-normative sexual orientations.

L22 History 3561 Andean History: Culture and Politics

Since pre-Columbian times, the central Andean mountain system, combining highlands, coastal and jungle areas, has been the locus of multiethnic polities. Within this highly variegated geographical and cultural-historical space, emerged

the Inca Empire, the Viceroyalty of Peru — Spain's core South American colony, and the central Andean republics of Ecuador, Peru, and Bolivia. Taking a chronological and thematic approach, this course will examine pre-Columbian Andean societies, Inca rule, Andean transformations under Spanish colonialism, post-independence nation-state formation, state-Indian relations, reform and revolutionary movements, and neoliberal policies and the rise of new social movements and ethnic politics. This course focuses primarily on the development of popular and elite political cultures, and the nature and complexity of local, regional, and national power relations. Same as L97 GS 356

Credit 3 units. A&S IQ: LCD, SSC BU: IS EN: S

L22 History 3563 Ancient Sport and Spectacle

Ancient sport and spectacle seem both familiar and foreign to us today. We share the Greek obsession with athletic success, and we have revived their Olympic games — and yet the Greeks competed nude and covered in oil and included in their celebration a sacrifice of 100 oxen to Zeus. So too do we recognize the familiar form of the Roman arena, but recoil from the bloody spectacles that it housed. In this class we will examine the world of ancient Greco-Roman sport and spectacle, seeking to better understand both ancient culture and our own. We will consider Greek athletic competition, Roman gladiatorial combat, chariot racing, and other public performances. We will set these competitions in their social and historical context, considering both their evolution and their remarkable staying power.

L22 History 357 All Measures Short of War

This course focuses on the return of great power competition in the 21st century. In particular, it examines the security challenges facing the United States in the form of strategic competition from revisionist states (Russia and China) and hostile threats from rogue regimes (Iran and North Korea). Through a consideration of the strategic, military, political, economic, and intelligence dynamics germane to foreign policy and national security, it will examine the hypothesis that the United States is not likely to go to hot war with any of these four nations but instead resort to what President Roosevelt in another context and time famously called "all measures short of war" — in other words, engaging one another through new technologies such as cyber, artificial intelligence, robotics, big data, hypersonics, biotechnology, and other means that have come to demarcate a hybrid battlefield in an age of hostile competition. As such, the course will assess the recent past, current state, and likely future of American power in the new global security environment.

L22 History 359 Topics in European History: Modern European Women

This course examines the radical transformation in the position and perspective of European women since the 18th century. The primary geographical focus is on Britain, France and Germany. Topics include: changing relations between the sexes; the emergence of mass feminist movements; the rise of the

"new woman"; women and war; and the cultural construction and social organization of gender. We will look at the lives of women as nurses, prostitutes, artists, mothers, hysterics, political activists, consumers and factory hands.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: HUM, IS EN: H

L22 History 3593 The Wheels of Commerce: From the Industrial Revolution to Global Capitalism

This course introduces the methods, issues, and debates that shape our understanding of economic change and development from the Industrial Revolution to the post-industrial age. Engaging economic theorists from Marx to Smith, to Weber and Wallerstein, this course problematizes the notion of rational economic actors and interrogates notions of free trade in an attempt to understand the impact of capitalism on the world. We start the course with a discussion of the "exceptionalism" of Great Britain as the first industrial nation and reconsider the impact of new trade, production, property and monetary/financial regimes that resulted in the so-called "Great Divergence" between China and the West. We then turn to the "late industrializers" of China, Japan, and Mexico in order to investigate the varieties of development, specifically focusing on monetary integration, legal integration and the global impact of the great depression. Continuing into the Bretton Woods Conference and the post-war international monetary systems, we bring the course to a close with the advent of the "post-industrial age." This course is designed both for students specializing in economic history and students in all disciplines interested in historical approaches to political/economic development.

Credit 3 units. A&S IQ: HUM, LCD BU: BA, HUM EN: H

L22 History 3598 The First World War and the Making of Modern Europe

The First World War ushered our age into existence. Its memories still haunt us, and its aftershocks shaped the course of the 20th century. The Russian Revolution, the emergence of new national states, Fascism, Nazism, the Second World War, and the Cold War are all its products. Today, many of the ethnic and national conflicts that triggered war in 1914 have resurfaced. Understanding the First World War, in short, is crucial to understanding our own era.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM, IS EN: H

L22 History 3599 Travelers, Tricksters, and Storytellers: Jewish Travel Narratives and Autobiographies

Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman. We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an "other," against which and through which they define a particular sense of self? This course is open to students of varying interests, including

Jewish, Islamic, or Religious Studies, medieval and early modern history, European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only.

L22 History 35SM Hands on the Past: History, Murder and the Archive

The future depends on the past. This course taps into that understanding by offering an alternative hands-on methods class to encourage undergraduate student engagement with history and archives, both on- and offline. In this particular class, students will be nurtured to more deeply interact with the historical past by exploring gender, race, violence and sexuality through three central questions explored throughout the course: What and how is African-American history conducted? How do we best document the past with students fully at the intellectual table of production and preservation? How do we make history with history? These exciting and diverse interests will be pursued through in-class discussions and course assigned readings, but especially by taking a spring break research project trip across Missouri to various local repositories and the state archives, to activate and fuel the idea of putting hands on the past.

Credit 3 units. A&S IQ: SSC, SD BU: BA, HUM EN: S

L22 History 3600 Beyond Sea, Sunshine and Soca: A History of the Caribbean

This course examines major themes in the history of the Caribbean from the 15th to the 20th century. The first half of the course will focus on the 15th to the 19th century, exploring issues such as indigenous societies, European encounter and conquest, plantation slavery, the resistance of enslaved Africans and emancipation. The remainder of the course focuses on aspects of the cultural, economic, political and social experiences of Caribbean peoples during the 20th century. Major areas of inquiry include the labor rebellions of the 1930s, decolonization, diasporic alliances, Black Power, identity construction and the politics of tourism. While the English-speaking Caribbean constitutes the main focus, references will be made to other areas such as Cuba and Haiti.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L22 History 3603 Renaissance Italy

This course examines the social, cultural, intellectual and political history of late medieval and Renaissance Italy: civic life and urban culture; the crisis of the 14th century; the city-states of Renaissance Italy; the revival of classical antiquity; art and humanism of the Renaissance; culture, politics and society; Machiavelli and Renaissance political thought; the wars of Italy; religious crisis and religious reaction in the 16th century.

L22 History 3608 Science and Society Since 1800

This course surveys selected topics and themes in the history of modern science from 1800 to the present. Emphasis is on the life sciences, with some attention to the physical sciences.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM EN: H

L22 History 3609 Jamaica: A Political History

This course examines the political history of Jamaica from the colonial period to the 1970s. Students will use primary documents (speeches, policy documents, etc.), secondary sources (historical monographs, political biographies, etc.), and film to engage the evolution of Jamaica's government. The course begins by exploring the colonial governmental apparatus with a view to grasping the impact of the British system on the island's current political apparatus. This will allow students to engage important debates concerning the transition from colony to postcolony. Additionally, students will discuss the relationship between the governmental structure and the ever-evolving socio-cultural realities in Jamaica, especially as it pertains to race, class, gender, culture, clientelism, patronage, and national identity.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM, IS EN: H UColl: HSM, HTR

L22 History 361 Topics in History and Technology

The history of computing from mechanical calculating devices to electronic digital computers. This course will examine technical systems in terms of the nexus between technologies and the humans who operate them. Emphasis will be placed on the interconnections between technological and cultural change.

Credit 3 units. BU: HUM

L22 History 3613 Women and Social Movements: Gender and Sexuality in U.S. Social Movements with History

This course examines the history of grassroots activism and political engagement of women in the United States. Looking at social movements organized by women or around issues of gender and sexuality, class texts interrogate women's participation in -- and exclusion from -- political life. Key movements organizing the course units include, among others, the temperance movement, abolitionist movements, the women's suffrage movements, women's labor movements, women's global peace movements, and recent immigration movements. Readings and discussions will pay particular attention to the movements of women of color as well as the critiques of women of color of dominant women's movements. Course materials will analyze how methods of organizing reflect traditional forms of "doing politics," and we will also examine strategies and tactics for defining problems and posing solutions particular to women. Prerequisite: Any 100- or 200-level Women, Gender, and Sexuality Studies course or permission of instructor.

L22 History 3630 Mapping the World of Black Criminality

Ideas concerning the evolution of violence, crime, and criminal behavior have been framed around many different groups.

Yet, what does a typical criminal look like? How does race -- and, more specifically, Blackness -- alter these conversations, inscribing greater fears about criminal behaviors? This course

taps into this reality by examining the varied ways people of African descent have been and continue to be particularly imagined as a distinctly criminal population. Taking a dual approach, students will consider the historical roots of the policing of Black bodies alongside the social history of Black crime while also foregrounding where and how Black females fit into these critical conversations of crime and vice. Employing a panoramic approach, students will examine historical narratives, movies and documentaries, literature, popular culture through poetry and contemporary music, as well as the prison-industrial complex system. Prerequisite: L90 3880 Terror and Violence in the Black Atlantic and/or permission of instructor, which will be based on a student's past experience in courses that explore factors of race and identity. For AFAS majors, this course counts as Area Requirement 2.

L22 History 365 The Birth Crisis of Democracy: The New United States of America, 1776-1850

"Go get yourself some democracy!" Americans have so often preached to other nations, but just how did Americans themselves go about creating the world's largest and most successful democratic republic? How democratic was this violent new nation that reeled from one crisis to another and ultimately to the brink of collapse in its first 75 years? This survey of American history from the creation of the Republic to the eve of the Civil War explores the Revolution and its ambiguous legacies, the starkly paradoxical "marriage" of slavery and freedom, and the creation of much of the America that we know; mass political parties; a powerful presidency; sustained capitalist growth; individualistic creeds; formalized and folkloric racism; heteronormative patriarchal family life; technological innovation; literary experimentation; distinctively American legal, scientific and religious cultures; and the modern movements of labor, feminism, and African-American empowerment. Prerequisite: sophomore standing or permission of the instructor. Modern, U.S.

UColl: HSP, HUS

L22 History 366 The Living American Civil War

This course focuses on the Civil War and Reconstruction as the central drama of American life in the 19th century, and also, the central event of American history itself, to the present day. How do we begin to understand the significance of the killing fields of the American Civil War, its three quarters of a million dead? The bloody conflict, and its causes and consequences, are explored from multiple perspectives: those of individuals such as Lincoln, McClellan, Davis, Grant, Longstreet and Lee, Dix and Tubman, Douglas and Douglass, who made momentous choices of the era; of groups such as the African American freedpeople and the Radical Republicans, whose struggles for freedom and power helped shape the actions of individuals; and of the historians, novelists, filmmakers and social movements that have fought to define the war's legacy for modern America. How is the Civil War both long ended and, at the same time, very much alive and still contested in contemporary America? Modern, U.S. Prerequisite: Sophomore standing or permission of instructor.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

L22 History 3662 Experts, Administrators and Soldiers:

Governance and Development in Postcolonial Africa

Between 1957 and 1975, one African territory after another made the transition from European colony to independent nation-state. Widespread optimism that these "transfers of power" would bring a new era of prosperity and dignity dissipated quickly as the new nations struggled with political instability, military coups, social unrest, and persistent poverty. Consequently many western observers and development specialists are certain that they have become "failed states" requiring foreign assistance to develop properly. This course challenges these assumptions by tracing the origins of African governance and economic development from their imperial origins into the independence era. By exploring nation building, economic planning, and public administration from the perspective of political elites, foreign experts, and ordinary people, the class takes an intimate look at how colonies became nation-states. These new perspectives offer students a historical grounding in international public administration and development by exploring how imperial ideas and concepts continue to influence contemporary social planning and development policy in both Africa and the wider world.

L22 History 3663 Caste: Globalization, Sexuality and Race

Be it sati or enforced widowhood, arranged or love marriage, the rise of national leaders like Indira Gandhi and Kamala Harris, or the obsession with "fair" skin, caste shapes possibilities and perceptions for billions. In this class we combine a historical understanding of the social caste structure with the insights made by those who have worked to annihilate caste. We will re-visit history with the analytic tools provided by the concepts of compulsory endogamy, "surplus woman," and "brahmanical patriarchy," and we will build an understanding of the enduring yet invisible "sexual-caste" complex. As we will see, caste has always relied on sexual difference, its ever-mutating power enabled by the intersectionalities of race, gender and class. We'll learn how caste adapts to every twist in world history, increasingly taking root outside India and South Asia. We will delve into film and memoir, sources that document the incessant injustices of caste and how they have compounded under globalization. The class will research the exchange of concepts between anti-race and anti-caste activists: how caste has shaped the work of prominent anti-racist intellectuals and activists in the United States such as W.E.B. DuBois and Isabel Wilkerson and in turn, the agenda and creativity of groups such as the Dalit Panthers. Finally, the course will build a practical guide to engaging with and interrupting caste in the context of the contemporary global world today. Waitlists controlled by Department; priority given to WGSS majors. Enrollment cap 15. Same as L77 WGSS 366

L22 History 367 America in the Age of Inequality: The Gilded Age and the Progressive Era, 1877-1919

This course explores dramatic changes in American society during the half-century from the Civil War to the end of World War I. We discuss industrialization; mass immigration from Europe, Asia and Latin America; the vast movement of rural people to cities; the fall of Reconstruction and rise of Jim Crow; the expansion of organized labor; birth of American Socialism; and the rise of the American empire in the Caribbean and the

Philippines. The course, in addition, analyzes the many and varied social reform efforts of the turn of the 20th century, from women's suffrage to anti-lynching campaigns; from trust-busting and anti-immigrant crusades to the settlement house movement. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM EN: H

L22 History 3670 The Long Civil Rights Movement

The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically and thematically. It pays special attention to struggles fought in the North, West and Southwest; it seeks to question binaries constructed around "confrontational" and "accommodationist" leaders; it reveals how Latinos, Native Americans and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics.

L22 History 3672 Medicine, Healing and Experimentation in the Contours of Black History

Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, this course examines the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus is extended toward the underpinnings of race and gender in the medical treatment allocated across time and space — the United States, Caribbean and Latin America — to give further insight into the roots of contemporary practice of medicine.

L22 History 36CA Heroes and Saints in India: Religion, Myth, History

This course provides an introduction to the history of modern India and Pakistan through the voices of the Indian subcontinent's major thinkers. We will spend time in the company of saints, from the "great-souled" Mahatma Gandhi to the Sufi scholar Ashraf 'Ali Thanawi, and we will travel alongside the heroes of peasant politics, women's rights, and struggles for national and social freedom and equality. We will immerse ourselves in the rich narrative heritage of India -- as it has been challenged, reworked, and harnessed for present and future needs -- from the 19th century through the present. Lecture and discussion format; prior knowledge of India or Pakistan not required.

L22 History 3744 Law and History: Colonial Era to Reconstruction

This course analyzes the development of American law and the constitutional system from the colonial era through the era of the Civil War and Reconstruction, beginning with a general theoretical background on the study of legal history. The course concludes with an analysis of the role of law in controversies around the commemoration of the Civil War era.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM EN: H

L22 History 3748 Of Dishes, Taste, and Class: History of Food in the Middle East

This course will cover the history of food and drink in the Middle East to help us understand our complex relationship with food and look at our lives from perspectives we intuitively feel or by implication know but rarely critically and explicitly reflect on. Food plays a fundamental role in how humans organize themselves in societies; differentiate socially, culturally, and economically; establish values and norms for religious, cultural, and communal practices; and define identities of race, gender, and class. This course does not intend to spoil, so to speak, what is undeniably one of the most pleasurable human needs and activities; rather, the course seeks to make us aware of the social meaning of food and to reflect on how food shapes who we are as individuals and societies. We will study the history of food and drink in the Middle East across the centuries and up to the present time, but we will be selective in choosing themes, geographic regions, and historical periods to focus on. Students should consult the instructor if they have not taken any courses in the humanities. Enrollment priority is given to seniors and juniors.

L22 History 3751 Women, Gender and Sexuality in Postwar America

We explore the history of the United States since 1945 by focusing on the ways that gender and sexuality have shaped the lives of Americans, particularly the diverse group of women who make up more than half the nation's population. Topics include: domesticity and the culture of the 1950s; gendering the Cold War; the gender politics of racial liberation; the sexual revolution; second-wave feminism and the transformation of American culture; the new right's gender politics; and the impact of new conceptions of sexual and gender identity at century's end. Course texts include scholarly literature, memoirs, novels and film.

L22 History 3770 History of Slavery in the Middle East

This course examines slavery and its abolition in the Middle East and North Africa from 600 C.E. to the 20th Century. It addresses slavery as a discourse and a question of political economy. We begin with an overview of slavery in late antiquity to contextualize the evolution of this practice after the rise of Islam in the region. We then examine how it was practiced, imagined, and studied under major empires, such as the Umayyads, the Abbasids, the Fatimids, the Mamluks, the Ottomans, and the Safavids. In addition to examining the Qur'anic discourse and early Islamic practices of slavery, to monitor change over time we address various forms of household, field, and military slavery as well as the remarkable phenomenon of "slave dynasties" following a chronological order. We discuss, through primary sources, theoretical, religious, and moral debates and positions on slavery, including religious scriptures, prophetic traditions, religious law, and a plethora of narratives from a range of genres. We highlight a distinct theme each week to focus on until we conclude our discussion with the abolition of slavery in the 19th and 20th centuries. Topics of discussion include various forms of male and female slavery, Qur'anic and

prophetic discourse on slavery, legal and moral views on slavery, slavery as represented in religious literature, political, military, and economic structures of slavery, issues of race and gender as well as slave writings to reflect on the experiences of slavery from within. The goal is to enable students to understand the histories of slavery in the Middle East and eventually compare it to that of other regions and cultures, such as European and Atlantic slavery. No second language required.

L22 History 3785 The Second British Empire in World History

Throughout most of the 19th century it appeared that the British Empire was winding down. Most of British North America was now the United States of America, and the remaining West Indian colonies were less valuable after the abolition of slavery. The Indian mutiny and the demise of the Imperial British East India Company raised similar doubts about the worth of Britain's Asian possessions. Yet by 1900 Britain ruled 400 million people and one-quarter of the habitable globe, and most Britons were confident that this new "second" British Empire would rival the Roman Empire by lasting for centuries. This course surveys the sudden rise and equally unexpected collapse of the 20th-century British Empire from the perspective of its subjects.

L22 History 3803 Ancient Greek and Roman Medicine

This course introduces students to the practice and theory of medicine in the ancient Mediterranean, beginning in Egypt and continuing through Greece and Rome. It ends in the Middle Ages. Greco-Roman medicine will be our focus. How was disease understood by practitioners and, as far as can be reconstructed, by laypeople? What form did surgical, pharmacological, and dietetic treatment take? What were the intellectual origins of Greek medicine? The social status of medical practitioners? How was medicine written and in what terms did its practitioners conceive it?

L22 History 3809 Furies and Die-Hards: Women in Rebellion and War

Furies and Die-Hards: Women in Rebellion and War juxtaposes contemporary social science perspectives on women and war with the history and testimonies of Irish women during the Irish revolutionary period (1898-1922), the Irish Civil War (1922-1923), and the Free State. Under English rule from the 12th-century Norman invasions to the establishment of the Irish Free State and the partition of Northern Ireland in 1922, Ireland presents a compelling historical laboratory to deliberate on the relationship between gender and political conflict. Intentionally transdisciplinary, the course draws from across disciplinary discourses and highlights perspectives across race, gender, class, ethnicity, religion, and sexuality. Topics include political organizing, nationalism, rebellion, radicalization, militarism, terrorism, pacifism, and peacebuilding. Rooted in Cynthia Enloe's enduring question of "Where are the women?" and drawing on sociologist Louise Ryan's landmark essay by the same name, we inquire how and why Irish nationalist women, who were integral to building the revolutionary movement, became "Furies" and "Die-hards" in the eyes of their compatriots

when the Free State was established (Bishop Doorley, 1925; President Cosgrave, 1923). Taking advantage of the plethora of archival resources now available through the Irish Decade of Centenaries program, the course incorporates the voices of Irish women through their diaries, military records, letters, interviews, speeches, newspapers, and memoirs.

L22 History 3810 Between Sand and Sea: History, Environment, and Politics in the Arabian Peninsula

Although it is today primarily associated with oil, the Arabian peninsula was for most of its history defined by water: its surrounding seas, its monsoon-driven winds, and its lack of water in its vast and forbidding interior deserts. As home to the major holy cities of Islam and a key source of global oil, the region has played an important role in the Western European and North American imagination. Despite being relatively sparsely populated, the peninsula hosts millions of believers each year on the annual Muslim pilgrimage, and it has been the site of major wars and military occupations by European, American, and other Middle Eastern countries for much of the 20th and 21st centuries. It has been an outpost of the Ottoman Empire, a center of British colonialism and (at Aden) an axis of its global empire, the location of Egypt's "Vietnam" (its long war in Yemen in the 1960s), the Gulf Wars I and II, and the recent wars in Yemen, to name just a few of the major conflicts. Often depicted as unchanging until caught up by the influx of massive oil wealth, this region is frequently characterized as a place of contradictions: home to some of the world's largest skyscrapers and also the most inhospitable and largest sand desert in the world, known as "the Empty Quarter"; the location of crucial American allies and the home of al-Qa'eda founder 'Usama Bin Laden. In this course, we will examine the development of the peninsula historically to understand these contradictory images. We will investigate changes in the following arenas: environment and society; colonial occupation; newly independent states; the demise and development of key economic sectors (pearling; shipping; agriculture; oil; finance; piracy); political regimes; resources such as water, oil, and date palms; the growth of oil extraction infrastructure and its effects on the political regimes and societies in the region; the emergence of new Gulf cities; Islamic law; women's rights; human rights debates; and religious and ethnic minorities.

L22 History 3840 Migration and Modernity in Russia and the (Former) Soviet Union

This course introduces students to a broad history of 19th- and 20th-century Russia and the Soviet Union alongside problems of migration. In this course, students will be introduced to the historical, social, and political dimensions of migration within, to, and from the Russian Empire, the Soviet Union, and its successor states. We will look at the intersection of the movement of people with long-term economic, social and political transformations, but we will also pay attention to crucial events and phenomena of Soviet history that set large-scale migrations in motion. Course materials will, for instance, address mass movements related to modernization and internal colonization, analyze the role of revolutionary change and warfare for forced displacement, and study the implications of geopolitical changes in the aftermath of the breakdown of the USSR for human rights discourses. Alongside this historically grounded overview, the course explores concepts of citizenship, diaspora, nationality policy, gender-specific experiences of

migration, and the ethics and political economy of migration politics, thereby highlighting how current trends in Russian society are indicative of broader discourses on difference and social transformation.

L22 History 3843 Filming the Black Freedom Struggle in St. Louis

This inter-disciplinary course introduces students to the history of the Black freedom struggle in St. Louis and to the complex and multiple ways historic narratives are constructed. We will explore the political, economic and cultural history of St. Louisans who challenged racial segregation in housing and work, fought white mobs in city streets, and battled the destruction of Black communities by federal urban renewal and public housing policies. Students, working with a historian and a filmmaker, will research and make a documentary film on a piece of St. Louis' crucial contribution to the Black Freedom Struggle in America. We bring together documentary filmmaking and history research to draw attention to the multiple narratives (many long-neglected) of African American and urban history, and to the multiple approaches to presenting history.

L22 History 3856 The Sephardic World: 1492 to the Present

This course explores the history and culture of the Sephardic diaspora from the expulsion of Spanish and Portuguese Jewry at the end of the 15th century to the present. We will start with a brief introduction into the history of Iberian Jews prior to 1492, asking how this experience created a distinct subethnic Jewish group: the Sephardim. We will then follow their migratory path to North Africa, Italy, the Ottoman Empire, the Netherlands and the Americas. The questions we will explore include: In what sense did Jews of Iberian heritage form a transnational community? How did they use their religious, cultural, and linguistic ties to advance their commercial interests? How did they transmit and transform aspects of Spanish culture and create a vibrant Ladino literature? How did the Sephardim interact with Ashkenazi, Greek, North African, and other Jewish, Muslim, and Christian communities? How did Jewish emigres from Spain and Portugal become intermediaries between Christian Europe and the Ottoman Empire? What was the role of Sephardim in Europe's transatlantic expansion? How did conversos (converts to Christianity) return to Judaism and continue to grapple with their ambiguous religious identity? How did Ottoman and North African Jews respond to European cultural trends and colonialism and create their own unique forms of modern culture? How did the Holocaust impact Sephardic Jewry? The course will end with a discussion of the Sephardic experience in America and Israel today.

L22 History 3860 Empire in East Asia: Theory and History (Writing Intensive)

This course is an introduction to how historians and anthropologists incorporate theoretical insights into their work. It first "reverse engineers" the main arguments in several insightful books and articles on empire in Asia, and these arguments are informed by a range of theorists. Retaining our theoretical knowledge, we then focus on the more empirical aspects of the Japanese empire in Asia, including settler colonialism,

the colonial economy, representations of colonialism, and the long-term ramifications of empire. We conclude with a general assessment of the history of empire. In these ways, this course seeks to equip students with a knowledge of empire in East Asia in the late 19th and 20th centuries while simultaneously investigating the nature of that knowledge.

L22 History 3900 Mormon History in Global Context

The focus of this seminar is Mormonism, meaning, primarily, the Church of Jesus Christ of Latter-day Saints, which is the largest Mormon body. Mormons in the United States have gone from being one of the most intensely persecuted religious groups in the country's history to the fourth largest religious body in the U.S., with a reputation for patriotism and conservative family values. In addition to introducing who the Mormons are, their beliefs and religious practices, this seminar will explore issues raised by Mormonism's move toward the religious mainstream alongside its continuing distinctiveness. These issues include: What is the religious "mainstream" in the U.S.? How did conflicts over Mormonism during the 19th century, especially the conflict over polygamy, help define the limits of religious tolerance in this country? How have LDS teachings about gender and race, or controversies about whether or not Mormons are Christian, positioned and repositioned Mormons within U.S. society? Same as L57 RelPol 390

L22 History 3961 Comintern: The Communist International's Global Impact

The Communist International was the third of the global left-wing organizations aimed to develop communist organizations around the globe to aid the development of a proletarian revolution. Begun in 1919, hosted in Moscow, and closely tied to the developing USSR, the Comintern hosted seven World Congresses and 13 Enlarged Plenums before Stalin dissolved it in 1943. This course examines the history of the nearly 25 years of the Comintern, paying particular attention to engagement with countries outside of the Soviet sphere. Class texts provide a general historical overview and interrogate central ideological arguments/debates across several countries and political systems. Course materials look at the Comintern's engagement with Fascism and the Spanish Civil War, ideas of Nationalism and Internationalism, and Self-Determination in the

Colonial World. Class units are designed to highlight regional similarities and differences, taking a global approach to the study of Communism. Students gain an understanding of the global political complexities developing after World War I and leading to World War II. Reflecting on the critique of imperialist capitalism offered by the Comintern, students explore liberation struggles and ideological dictatorships around the globe.

L22 History 3977 The Making of the Modern Catholic Church

This course examines the work of three church councils that put their stamp on the Catholic Church at key moments in its history, making it what it is today. The first section is dedicated to the Fourth Lateran Council (1215), which defined the high medieval church as an all-encompassing papal monarchy with broad powers over the lives of all Europeans, Christian and non-Christian alike. In the second section we turn our attention to the Council of Trent (1545-1563), which responded to the threat posed by the Protestant Reformation by reforming the Catholic church, tightening ecclesiastical discipline, improving clerical education, and defining and defending Catholic doctrine. We conclude with a consideration of the largest church council ever, Vatican II (1962-1965), which reformed the liturgy and redefined the church to meet the challenges of the modern, multicultural, postcolonial world.

L22 History 39SC Imperialism and Sexuality: India, South Asia and the World: Writing-Intensive Seminar

What is the connection between the appropriation of other people's resources and the obsession with sex? Why is "race" essential to the sexual imperatives of imperialism? How has the nexus between "race," sexuality and imperial entitlement reproduced itself despite the end of formal colonialism? By studying a variety of colonial documents, memoirs produced by colonized subjects, novels, films and scholarship on imperialism, we seek to understand the history of imperialism's sexual desires and its continuation in our world today.

L22 History 39SM Women and Crime in the Evolution of American History

Crime happens. Property is damaged and stolen, lives are lost, and law, order, and justice evolves. This course taps into that ongoing reality by centering the herstorical evolution of female crime, highlighting women and girls of many kinds across time and spaces of America. It moves across centuries (through to the contemporary period) probing within and far beyond icons to unveil the gendered nature of crime and moreover to empower students to see and trace everyday female criminality that ignited across racial, ethnic, as well as lines of age in the winding path of American history. While men and boys dominate public and even scholarly expectations of crime and carceral conversations for many, students will leave this course with a far more rigorous understanding of the herstories gained by taking serious the types of crimes that women and girls acted out by exploring: robbery, assault, infanticide, larceny, murder, arson, prostitution, serial killers, and drug-related crimes. As well as going further to probe state and federal power through carceral medicine - showing the interior world of female prisoners, physicians, the movement of females into "asylums" and mental state hospitals, incarceration based on "insanity" while going further to examine births, illnesses, and death of women and teens in jails and prisons. Students will be likewise pushed to engage America's timeline of race, gender, and executions that includes women and girls. Racialized and gendered criminality, law enforcement violence, healthcare and deathcare in prisons are critical public health issues that students can better understand the complicated evolutions by deeply probing the herstorical lives of women, girls, and crime through this course. Students will read, learn, dig up the past, and write to ensure a future of herstory and remembrance.

L22 History 39UK Mao and the World

Was Mao Zedong an uncompromising tyrant who caused the death of millions, or was he a revolutionary leader who was daring enough to imagine an alternative existence? This course is a close investigation of Mao and his world through a global perspective. The students will be exposed to primary sources written by Mao himself, and they will situate Mao within the turbulent decades of China's engagement with Western colonialism, imperialism, and revolutionary thought in the 20th century. Putting Maoism at the center of world history, students will learn the intimate links between China, Southeast Asia, Africa, and North America, and they will examine in detail how Maoism shaped a variety of political and infrastructural transformations around the world, from the Black Panthers to

Tanzanian railroads. By the end of the course, students will have a strong grasp of the contradictions that Mao himself faced throughout his life -- contradictions that changed nothing less than the world itself.

L22 History 4040 Senior Seminar: Convivencia or Reconquista? Muslims, Jews and Christians in Medieval Iberia

This seminar will explore various facets of the coexistence (convivencia) of Muslims, Jews, and Christians in medieval Spain. Its horizon stretches from the Muslim conquest of Iberia (al-Andalus) up to the turn of the 16th century when Spanish Jews and Muslims were equally faced with the choice between exile and conversion to Christianity. Until about 1100, Muslims dominated most of the Iberian Peninsula; from then onward, Christians ruled much and eventually all of what would become modern Spain and Portugal. Through a process known as reconquista (reconquest), Catholic kingdoms acquired large Muslim enclaves. As borders moved, Jewish communities found themselves under varying Muslim or Christian dominion. Interactions between the three religious communities occurred throughout, some characterized by shared creativity and mutual respect, others by rivalry and strife. The course focuses on these cultural encounters, placing them in various historical contexts. It will explore the ambiguities of religious conversion, and the interplay of persecution and toleration. Last not least, the course will address the question of how the memory of medieval Spain's diversity reverberates-and is utilized-in modern popular and academic discourse. All sources will be read in English translation; however, students are encouraged to make use of their linguistic and cultural expertise acquired in previous classes. This course serves as the capstone seminar for Jewish, Islamic & Near Eastern Studies majors, Arabic majors, and Hebrew majors. Graduate students, minors, and other interested undergrads are likewise welcome.

ETH, IS EN: H

L22 History 4051 Diaspora in Jewish and Islamic Experience

Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term "diaspora" -- from the ancient Greek, meaning "dispersion" or "scattering" -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and

they continued to be central motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home in both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

L22 History 4080 Nuns

Nuns — women vowed to a shared life of poverty, chastity, and obedience in a cloistered community — were central figures in medieval and early modern religion and society. This course explores life in the convent, with the distinctive culture that developed among communities of women, and the complex relations between the world of the cloister and the world outside the cloister. We look at how female celibacy served social and political, as well as religious, interests. We read works by nuns: both willing and unwilling; and works about nuns: nuns behaving well, and nuns behaving scandalously badly; nuns embracing their heavenly spouse, and nuns putting on plays; nuns possessed by the devil, and nuns managing their possessions; nuns as enraptured visionaries, and nuns grappling with the mundane realities of life in a cloistered community.

L22 History 4154 Decolonization to Globalization: How to End an Empire

The course examines questions of contemporary relevance by revisiting the history of European empire and decolonization in South Asia: Is the United States an empire? Have we deliberately or otherwise supported U.S. empire? Did the history of European empire "train" some people to further American imperial interests throughout the 20th century? Is the empire over? Independence from European colonialism was a victory for some people, although for the majority, the experience of nation-building and the Cold War only sanctioned further inequities. A further setback arrived in the guise of U.S.-centered globalization. The countries of Bangladesh, India, Pakistan, Nepal, and Sri Lanka have grappled differently with the many varieties of 20th-century transnational power. This course studies the histories of decolonization, nation-building, the Cold War, and globalization for those South Asian countries created since the 1940s. By considering the possibility that the U.S. empire is facing a radical collapse, the course delves into new and novel ways by which South Asians have interrogated, accepted, resisted, and possibly overturned the multiple levels of power unleashed upon them since the formal end of European colonialism. Modern, South Asia. Prerequisite: Prior course work in history or permission of instructor.

L22 History 4203 Nature, Technology and Medicine in Korea

This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary-or what historians dub "early modern" and "modern." Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and fauna, colonial Koreans became biologists, nurses, and "Edisons," and in North and South Korea, new professionals created distinctive-and in some cases, globally-competitive-regimes of knowing, making, and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be "modern" in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to have taken Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Course also counts as a EALC capstone course. Prerequisite: junior level or above or permission of instructor.

L22 History 4242 Culture and Politics in the People's Republic of China: New Approaches

This course inquires into the political, ideological, and social frameworks that shaped the cultural production and consumption in the People's Republic of China (PRC). In the realm of literature, film, architecture, and material culture and everyday life, this course pays a close attention to the contestation and negotiation between policy makers, cultural producers, censors, and consumers. Understanding the specific contour of how this process unfolded in China allows us to trace the interplay between culture and politics in the formative years of revolutionary China (1949-1966), high socialism (1966-1978), the reform era (1978-1992), and post-socialist China (1992 to present). The course examines new scholarship in fields of social and cultural history, literary studies, and gender studies; and it explores the ways in which new empirical sources, theoretical frameworks, and research methods reinvestigate and challenge conventional knowledge of the PRC that have been shaped by the rise and fall of Cold War politics, the development of area studies in the U.S., and the evolving U.S.-China relations. Graduate students should be proficient in scholarly Chinese, as they are expected to read scholarly publications and primary materials in Chinese. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

L22 History 4264 Memory for the Future

The year-long Studiobar "Memory for the Future" (M4F) will create spaces and practices of humanities education, practical public history, and collaboration in the spirit of "multidirectional memory." This concept tries to address the interlinked histories and legacies of the Holocaust, slavery, apartheid, and colonialism and create opportunities for dialogue

between communities impacted by and implicated in these forms of violence. Our principal aims are to explore, enrich, and sustain the global and local focus of "reparative memorial practices" in St. Louis. Focusing on commemorative efforts through public memorials, monuments and especially museums, M4F will engage survivors, activists, institutional leaders, and scholars (students and faculty) in the development of educational materials, artistic representations, exhibitions, and other approaches to bringing the past into the present. We strive to support the efforts of local and regional initiatives and venues to end racism, antisemitism, and homophobia and their related violence through innovative and inclusive memory work. Alongside classroom-based instruction focusing on discussing scholarship and acquiring practical, curatorial, and pedagogical skills, students will work with area institutions and initiatives to apply their study of multidirectional memory. This practicum is an integral part of the course and requires students to leave campus and regularly work with one of our partners (The Griot Museum of Black History, George B. Vashon Museum, St. Louis Kaplan Feldman Holocaust Museum, The Mildred Lane Kemper Art Museum, Reparative Justice Coalition of St. Louis, St. Louis Community Remembrance Project). Participants of the Studiolo are expected to attend regular weekly meetings and engage in self-directed and collaborative project work. We are also preparing study trips to regional sites of memory and education. The M4F Studiolo will convene at the Lewis Collaborative, a living-learning-commercial space at the west end of the Delmar Loop. All A&S graduate students and advanced undergraduates are invited to participate. Undergraduate enrollment by permission of the instructors. For History majors, this course fulfills the capstone requirement as an Advanced Seminar. As a year-long course, students are expected to enroll in both the fall and spring sections. L22 History 4288 Higher Education in American Culture

Colleges and universities in the United States have been the sites of both cultural conservation and political and cultural subversion from their founding in the 17th and 18th centuries. They have been integral to both national and regional cultural and economic development, and they have functioned as one component of an increasingly diversified and complex system of education. This course surveys higher education in American history, including the ideas that have contributed to shaping that history, beginning with its origins in European institutional models. We will use primary and secondary readings to critically examine higher education's conflict-ridden institutional transformation, from exclusively serving the elite to increasingly

serving the masses. We will explore the cultural sources of ideas as well as the growth and diversification of institutions, students, and faculty as they changed over time as well as curricular evolutions and revolutions in relation to the larger social and cultural contexts of institutional expansion.

L22 History 4415 Technology, Empire, and Science in China

How did technology, science, and empire intersect in early modern and modern Chinese history? Was there a unique "Chinese" way of studying nature? How did non-Chinese scientists and engineers contribute to China's knowledge of the world? This course offers a historical and historiographical survey of science and technology studies in China, from the 13th to the 20th century. It particularly examines the global circulation of scientific knowledge in the late imperial period, the place of technology in the empire building of the Qing dynasty (1637-1912), and the violent epistemic encounters between the West and China from the 19th century onward. Throughout the semester, we will explore Confucian scientists as well as Muslim geographers, Jesuit engineers, Manchu anatomies, and Chinese barefoot doctors. Positioning China within a global order, the students will question the premises of modern scientific discourses and try to respond to a seemingly simple question: What does science and technology even mean in a Chinese context?

L22 History 4442 The Jewish Experience in Eastern Europe

A study of Jewish culture, society and politics in Poland-Lithuania, Hungary, the Czech lands, Russia, Romania and the Ukraine, from the 16th century through the 20th century. Among the topics covered are: economic, social and political relations in Poland-Lithuania; varieties of Jewish religious culture; Russian and Habsburg imperial policies toward the Jews; nationality struggles and anti-Semitism; Jewish national and revolutionary responses; Jewish experience in war and revolution; the mass destruction of East European Jewish life; and the transition from Cold War to democratic revolution.

Credit 3 units.

L22 History 4444 The Mystical Tradition in Judaism

What is Jewish "mysticism"? What is its relationship to the category of "religion"? Is Jewish mysticism just one form of a general phenomenon common to a variety of religious traditions or is it a specific interpretation of biblical, rabbinic, and other Jewish traditions? Taking the above questions as a starting point, this course aims at a systematic and historically contextualized analysis of a broad range of Jewish texts that are commonly classified as "mystical." (All primary texts are read in translation.) At the same time, we explore such overarching themes as: the interplay of esoteric exegesis of the Bible and visionary experiences; the place of traditional Jewish law (halakha) within mystical thought and practice; the role of gender, sexuality, and the body in Jewish mystical speculation and prayer; the relationship between mysticism and messianism; Ashkenazic and Sephardic traditions and their mutual impact on Jewish mysticism; the "absence of women" from Jewish mystical movements; esoteric traditions of an elite vs. mysticism as a communal endeavor; and the tension between innovation and (the claim to) tradition in the history of Jewish mysticism.

L22 History 4450 Topics in Islam: History of Political Thought

This course aims to study political thought and practice in Islamic history through a close reading of a selection of primary sources in translation (and in their original language, if language proficiency is satisfactory). Particular attention will be given to the historical contexts in which thoughts are espoused and texts written. We plan to examine the development of political concepts and themes as articulated in diverse literary genres (e.g., legal, theological, political) from the eighth through the 13th centuries. We hope to engage various theoretical models to analyze the relationship between politics and religion and to tease out the role of power in determining sociopolitical relations, distinctions, and structures. We hope to have a better grasp on the historicity of ideas presented in timeless categories in political discourse. Advanced knowledge of Arabic preferred but not required.

L22 History 4491 American Unbelief from the Enlightenment to the New Atheism

This seminar examines American secularism, humanism, and atheism from the Enlightenment forward to the present. Topics to be explored include: the tensions between secular and Christian conceptions of the republic, the civil liberties of atheists and nontheists, the battles over religion in the public schools, the culture wars over secular humanism and science, and the contemporary growth of the religiously disaffiliated or religious "nones." The course considers not only the intellectual dimensions of skeptical critiques of religion, but also the underlying politics of secularism (and anti-secularism) in a nation routinely imagined as "under God."

L22 History 4511 Urban Culture in Modern China

The narrative of rural crisis and peasant revolution has dominated China's modern history for decades. But there has been a growing interest in China's urban past and present with the increased prominence of cities in China's breathtaking economic development and the opening of municipal archives in post-Mao era. The course aims to introduce students to "conventional wisdoms," new directions, and major debates in the urban history field. Topics include: the urban political economy, the cultural dynamics of modernity, the reconstruction of traditions in the making of modernity, the cultural production and consumption, colonialism and imperialism in the urban setting, nationalism, and reform and revolution. Acknowledging and understanding the nuance and difference in views and interpretations in historical writings (historiography) are essential. The course seeks to develop students' research and analytical skills, such as locating secondary sources, incorporating scholarly interpretations, and developing and sustaining a thesis based on secondary and primary sources in student research. This is an interdisciplinary seminar designed for advanced undergraduates and graduate students. Prerequisite: Undergraduate students must have taken L04 227C; junior level or above or permission of instructor.

L22 History 4522 Digital and Critical: Frontiers in History

Can digital technologies offer new ways to rethink historical narratives? Is DH the future of the humanities and of history as a profession? Can DH and critical inquiry be brought together? This course explores the history, present, and future of digital humanities (DH) to seek responses to these questions. From its origins in the Cold War to its rise to fame in the 1990s, the digital turn in the humanities has garnered excitement and support as well as critique and even disavowal from historians. In this course, we will examine the debates in the field of DH and learn about new ways in which historians are using digital tools for academic research as well as public outreach and activism. The course will be divided into two parts. The first half of the course will be devoted to understanding the historical growth and the

present status of the field. In the second half, students will be learning basic digital tools to conduct research. The purpose of the course is not to turn historians into coders; it is to understand what codes can do for historians.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM

L22 History 4564 American Pragmatism

This course examines the history of American pragmatism through three of its primary founders, the philosophers Charles Peirce, William James and John Dewey. It considers pragmatism as a response to the experience of uncertainty brought on by modernity and contextualizes it amid late 19th- and early 20th-century thought and politics, namely, scientific methodology, evolutionary theory, the probabilistic revolution, Transcendentalism, the rise of secularism, slavery, Abolitionism and the Civil War. Major essays by each thinker are read as well as three intellectual biographies and one critical survey.

L22 History 4610 Latin American Populism and Neo-Populism

A salient feature of Latin America in the 20th and early 21st centuries has been the recurrence of populism. Mass-based political and social movements animated by nationalist and reformist impulses dominated Latin American politics in the 1920s, 1930s-60s, and 1980s to the present. This course provides a general historical and theoretically informed analysis of the origins, internal dynamics, and outcomes of classical populist and neo-populist governments and parties. Among the notable populist and neo-populist cases to be examined include: Peronism in Argentina, Velasquismo in Ecuador, Cardenismo in Mexico, APRA in Peru, Vargasismo in Brazil, Garcia/Fujimori in Peru, Menen/Kirchner in Argentina, and Hugo Chávez in Venezuela. Issues pertaining to leader-follower relations, populist discourses, citizenship rights, populist gender and racial policies, labor and social reforms, and mass mobilization politics will also be explored.

L22 History 4633 20th-Century Latin American Revolutions

Latin America was arguably one of the most "revolutionary" regions of the world in the 20th century. It registered four "great revolutions": Mexico 1910, Bolivia 1952, Cuba 1959, and Nicaragua 1979. These social revolutions entailed a substantial, violent, and voluntarist struggle for political power and the overthrow of the established political, economic, social, and cultural orders. In the wake of these successful revolutions, new revolutionary institutions of governance were founded, radical structural changes were implemented, and a new revolutionary ethos was adopted. With the exception perhaps of the Bolivian Revolution, these revolutions had a profound impact on Latin American and world politics. The primary aim of this course is to analyze and compare the causes, processes, and outcomes of the Mexican, Cuban, and Nicaraguan revolutions. The course also analyzes late 20th century guerrilla movements in El Salvador and Peru.

L22 History 4681 Topics in Literature and History: The Age of Lincoln -- America in the 1850s

This seminar is an interdisciplinary examination of the culture and politics of America in the critical watershed decade before the Civil War. The course explores how a range of writers — some avowedly "literary," others more decidedly "political" — advanced their versions of America in the larger culture at a time when all things American — democracy, religious destiny, and nationality itself — were becoming profoundly problematic.

Credit 3 units.

L22 History 4689 American Intellectual History to 1865

This course presents an overview of American intellectual history from the early 17th century and the founding of the first English settlements in North America to the mid-19th century and the American Civil War. We investigate how different thinkers responded to and helped shape key events and processes in colonial and early American history, concentrating in particular on developments in religious, political, social, scientific and educational thought. We cover major topics such as: Puritanism, the Enlightenment, Evangelicalism, Romanticism and the inner Civil War. We address concepts central to the formation of the nation's identity including those of the covenant, republicanism, citizenship, equality, freedom, liberty, natural law, transcendentalism, order, reason, progress and democracy.

Credit 3 units. A&S IQ: HUM EN: H

L22 History 469 American Intellectual History Since 1865

This course concentrates on social, cultural, philosophical and political thought since the end of the Civil War, and investigates how American thinkers have responded to the challenge of modernity. After an examination of the end of the old religious order and the revolt against Victorianism, it analyzes the subsequent rise of pragmatism, progressivism, literary modernism, radical liberalism, political realism, protest movements and the New Left, neo-conservatism and the New Right, and the current state of intellectuals in post-9/11 America.

L22 History 4742 Americans and Their Presidents

How have Americans understood what it means to be President of the United States? This seminar uses that question as a point of departure for a multidisciplinary cultural approach to the presidency in the United States, examining the shifting roles of the chief executive from George Washington through George W. Bush. In addition to a consideration of the President's political and policymaking roles, this course examines how the lived experiences of presidents have informed the ways Americans have conceived of public and private life within a broader political culture. In the process, this course uses the presidency as a means to explore topics ranging from electioneering to gender, foreign policy to popular media. Readings are drawn from a broad range of fields.

L22 History 4761 Money, Exchange and Power: Economy and Society in the Ancient Mediterranean World

From seaborne trade and banking to slavery and the impact of new technology, the economy of the ancient Mediterranean world constitutes a particularly dynamic field of study. To examine a society's underlying economics is to gain critical insight into those historical phenomena that are themselves the product of multiple, overlapping dimensions of human action and thought. This course engages directly with a fascinating array of primary evidence for economic behaviors, beliefs, structures, and institutions among the Romans, Greeks, and their neighbors. We will also explore the methodological challenges and implications of that evidence as well as a variety of modern theoretical approaches. This year our focus is mainly upon developments among the Greeks, ranging from the transformative invention of coinage to the rise of commercial networks centered around religious sanctuaries like Delos. Prerequisites: Classics 341C or 342C or 345C or 346C or permission of instructor.

L22 History 4763 Olympian Shadows: Macedon and Its Neighbors in Antiquity

The home of both Alexander the Great and Aristotle, Macedon was pivotal to the course of ancient Greek and Roman history and yet stood apart as a culturally and politically distinct region. Macedonian dynasts dominated the Hellenistic world and deeply shaped Roman reception of Greek culture, while others profoundly affected the intellectual life of antiquity. We will explore topics ranging from ethnicity, religion, and the nature of kingship to urbanization and Macedon's emergence as a great power until its subsequent transformation at the hands of the conquering Romans. We will pay special attention to Macedon's

neighbors, especially Thrace and Illyria, as well as to Macedon's relationships with the Persian Empire and the Greek coastal colonies. Prerequisites: at least one semester of Classics 341C, 342C, 345C, or 346C, or instructor's permission.

L22 History 481W History of Education in the United States

Examines education within the context of American social and intellectual history. Using a broad conception of education in the United States and a variety of readings in American culture and social history, the course focuses on such themes as the variety of institutions involved with education, including family, church, community, work place, and cultural agency; the ways relationships among those institutions have changed over time; the means individuals have used to acquire an education; and the values, ideas, and practices that have shaped American educational policy in different periods of our history. NOTE ABOUT ENROLLMENT: All students will be initially waitlisted. Because this is a writing intensive course, enrollment will most likely be 12-15 students. Enrollment preference will be given to students who are majoring/minoring in Educational Studies, Teacher Education, Applied Linguistics, History, American Culture Studies, and Children's Studies and to students needing to complete their Writing Intensive requirement. Instructor will e-mail students about enrollment.

L22 History 4823 Senior Seminar in Religious Studies

The topic for this seminar differs every year. Previous topics include Religion and Violence; Governing Religion; Saints and Society; and Religion and the Secular: Struggles over Modernity. The seminar is offered every spring semester and is required of all Religious Studies majors, with the exception of those writing an honors thesis. The class is also open, with the permission of the instructor, to other advanced undergraduates with previous coursework in Religious Studies.

L22 History 4841 Core Seminar in East Asian Studies

This course introduces students to some of the major approaches and methodologies scholars have used for studying East Asia in the humanities and social sciences. Together we will discuss the history of Asian Studies and influential scholarship to identify how others have formulated questions about East Asia, and how they have attempted to answer them. This will provide the means for students to orient themselves in the field of East Asian Studies and begin to generate scholarly questions and answers of their own. Open to juniors and seniors majoring or minoring in EAS, EALC, History, Art History, or other East Asia-related fields. Required of MA and MBA/MA students in East Asian Studies, and second year JD/MA students in East Asian Studies. Open to graduate students focusing on East Asia in other disciplines. Undergraduates register for L03 484. Graduates for L03 584.

Same as L03 East Asia 484

L22 History 4842 The Japanese Empire in Asia, 1874-1945

This course examines the expansion of the Japanese Empire in Asia from 1874 to 1945, focusing on Japan's acquisition of neighboring territory and the subsequent building of colonies in Taiwan, Korea and Manchuria. The course explores the concepts of imperialism and colonialism, how they functioned in East Asia, and how they intersect with other major developments in Asia, including ideas of civilization and race, the formation of the nation, and the growth of capitalism.

Credit 3 units.

L22 History 4844 Women and Confucian Culture

This course explores the lives of women in East Asia during a period when both local elites and central states sought to Confucianize society. The course focuses on Ming (1368-1644) and Qing (1644-1911) China, but also examines these issues in two other early-modern East Asian societies: Yi/Choson (1392-1910) Korea and Tokugawa (1600-1868) Japan. Course readings are designed to expose students both to a variety of theoretical approaches and to a wide range of topics, including: women's property rights; the medical construction of gender; technology, power and gender; and state regulations on sexuality.

Credit 3 units.

L22 History 4854 Advanced Seminar: The United States in Afghanistan Since 1979

This course offers a historical examination and analysis of America's involvement in Afghanistan from the Cold War through the present, focusing in particular on the U.S. War in Afghanistan from 2001 onward. Special attention will be given to political, military, diplomatic, and economic dynamics as well as to international relationships, the experience of war, and the subsequent developments upon both American and Afghani societies. Major topics covered include U.S. covert operations against the Soviets in Afghanistan during the 1980s; revolution, civil war, and the rise of the Taliban during the 1990s; 9/11 and the War on Terror; national building and stability measures during the early 2000s and subsequent security threats in the forms of insurgency, warlords, drug gangs, criminal networks, and the al-Qaeda alliance of terrorist organizations; the key roles played by Pakistan, India, Iran, Russia, China, and Central Asian states; the Obama surge and counterinsurgency operations, starting in 2009; the soldier's experience, special forces, and covert operations; prisoners, torture, and human rights abuses; and the end of NATO's mission in 2014 and subsequent developments: the Ghani government, the return of the Taliban, the arrival of ISIS, the peace process, the U.S. drawdown, and the elusive quest for peace and stability in Afghanistan. This is a capstone course open to history majors only.

Credit 3 units. A&S IQ: HUM, LCD

L22 History 487 Topics in American History: Race and Drugs in American History

This course explores the racial construction of the use of legal and illegal substances in American history from the mid-19th century to the present. We will spend time engaging in a historical analysis of the social, economic, and racial dynamics that defined drug addiction in popular imagination, and examine how these factors contributed to discussions about legality, access to substances, one's ability to be rehabilitated, and criminal status. Regarding criminality we will particularly explore sociological and theoretical perspectives of labeling, habitual and occasional offenders, and moral panic in order to understand

how racial minority groups were targeted for different rhetorical, legislative, and economic purposes. One major goal of the course will be to outline the early 20th century beginnings of the war on drugs and connect it to the century-long growth of a militarized police system and prison industrial complex. We will secondly work to understand the role of local and national political actors, law enforcement, and the media in manufacturing and maintaining connections between race, crime and drugs. Ultimately, we will use our study of drugs to contextualize 21st-century issues of police violence, increases in homicide in minority communities, mass incarceration, poverty, segregation, and mass movements of protest.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L22 History 4872 Colonial Cities and the Making of Modernity

Massive urban growth has been a central result of the incorporation of many areas — both central and peripheral — into the global economy in the 19th and 20th centuries. Scholars have long theorized urbanization as a key component of modernity, but they have usually done so by looking at urbanization and modernization from the perspective of the West. This course investigates the character of cities in the colony and then uses these empirical and analytical entry points to examine critically some theories of modernity. The geographical focus of the course is primarily on cities in the Middle East, North Africa and South Asia.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: BA, HUM, IS EN: H

L22 History 4876 Advanced Seminar: Mexican Agriculture: Land, Politics and Development

Access to and ownership of land has been a major issue in Mexican history. Land tenure in economic development has been a constant source of tension and debate since the 18th century. Paradoxically, land tenure has been put forth as both the obstacle and the solution to the country's modernization. Given its centrality in the construction of the modern period, this course examines liberalism, agrarian revolts, the revolution, the green revolution and neoliberalism through the lens of land issues. This course will also explore how these have shaped and have been shaped by indigenous peoples and peasants, from land disentanglement to the fight against GMO maize. Students will evaluate agrarian reforms, agricultural modernization programs, concepts of and transformations of natural resources, food production/consumption and social policies.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

L22 History 4881 Advanced Seminar: Mad: Mental Illness, Power and Resistance in Africa and the Caribbean

This seminar explores the history of mental illness in Africa and the Caribbean during the colonial and postcolonial periods. We will be guided by the following questions: What is mental illness? How do social, cultural and political realities affect how mental illness is defined? Should mental illness always be analyzed within a specific cultural context? How did psychiatry factor into the efforts of European colonizers to maintain social order in their colonies? How have colonized people resisted colonial notions of madness? What is the place of religion in these histories? How did mental institutions change after the end of colonial rule and how was postcolonial Caribbean and African psychiatry harnessed in service of decolonization? The course

will pay special attention to how European colonial powers employed similar understandings of blackness across regions as they formulated ideas concerning the black populations they deemed "mad" across Africa and the Caribbean.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L22 History 4885 Advanced Seminar: Medicine, Disease and Empire

This course examines the history of medicine in connection to the politics of colonialism and empire-building, spanning the 16th century through the 20th century. Topics covered include: epidemic disease outbreaks (e.g., smallpox, cholera, malaria); the role of science and medicine in endorsing the "civilizing missions" of empires; tropical climates and tropical diseases as western constructs; tensions between western medicine and indigenous healing practices and beliefs; ideas of race and racism in science and medicine; modern advancements in sanitation and public health and their implementation overseas; and the historical roots of the modern global health movement.

L22 History 489A Advanced Seminar: Hinduism and the Hindu Right

This course fulfills the history major capstone requirement as an Advanced Seminar.

Credit 3 units.

L22 History 48IB Advanced Seminar: New York, New York: The Empire City from Stuyvesant to Trump

This research seminar engages the long history of greater New York City: from the place Native Americans called Manna-hata to the largest city in the United States and the world political, financial, and cultural capital that it is today. The course explores New York City's ambivalent relationship with America, with the world, and with itself. It focuses on matters of power — how, in different moments of the city's history, it was defined, who held it, and how various groups managed to contest for it; matters of exchange and extraction — political, cultural, and economic; and matters of belonging — whether a city of immigrants, exiles and refugees succeeded in becoming a home for the homeless. It pays close attention to both the micro — the street corner and the political ward; the bridge and the tunnel; the gentrifying neighborhood; the mosaic of the city's foodways; the theater, financial, slaughterhouse, brothel, and other districts — and the macro — the banks and the stock exchange; the port and transit authorities; the instrumentalities of knowledge and cultural production in the city's universities, print media, clubs, and salons; the sports empires; and the political machines, organized crime, grassroots labor and political movements, insurgencies, and undergrounds. Above all, the course will foreground the city's massive and unbearable contradictions, as a city of skyscrapers and of basement dives,

lures, and snares; as a symbol of the future and freedom bound to traumatic, slave, and unfree pasts; as a symbol of modern independence bound to modern interdependence; and as a place of renaissances and ruinations, where the world either comes together or spectacularly falls apart. Sites of potential investigation, in a list that is suggestive rather than exhaustive, range from the African Burial Ground to the 9/11 Memorial and Museum, from Hamilton to Hamilton, from Boss Tweed to Robert Moses, from the Five Points to Chinatown, from Delmonico's to Sylvia's, from Blackwell's Island Lunatic Asylum to Hart Island Potter's Field, from the African Free School to Ocean Hill-Brownsville, from Marcus Garvey to Amadou Diallo, from Billie Holiday to Andy Warhol, from James Baldwin's Harlem to Stonewall, from George Steinbrenner to Jerry Seinfeld, from the Gowanus Canal to Estée Lauder, and, in the spirit of the course title, from Stuyvesant to Trump. Students will engage with the history of New York City via two three-page book reviews, a three-page site analysis, and two five-minute oral reports on assigned readings before conducting their own original research in consultation with the instructor that will culminate in a 15-page final essay. Attendance at all classes and participation in class discussions required. This course fulfills the history major capstone requirement as an Advanced Seminar.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L22 History 4914 Advanced Seminar: Japan in World War II — History and Memory

This course examines the history of World War II in Asia and how it has been remembered in the postwar era. We trace the war, from the first Japanese military attack on China in 1931 through the U.S. atomic bombings of Hiroshima and Nagasaki in 1945. We also examine several postwar controversies concerning how the war has been forgotten and remembered in Japan, in the rest of Asia and in the United States. Goals include grasping the empirical history of the war as a step to becoming familiar with the theories and methods of memory studies in History.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM, IS EN: H

L22 History 4918 Advanced Seminar: Sexuality in the United States

Does sex have a history, and if so, how can we study it? This seminar examines important themes in the history of sexuality: the relationship between sexual ideologies and practices; racial hierarchy and sexuality; the policing of sexuality; construction of sexual identities and communities; and sexual politics at the end of the century. Students also spend time discussing theoretical approaches to the history of sexuality, as well as methodological issues, including problems of source and interpretation.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L22 History 4941 Advanced Seminar: The Inquisition in Europe, Asia, and Latin America, 1200-1700

This seminar will study the history of the Inquisition from its beginnings in southern France in the first half of the 13th century up to the investigations undertaken by Dominicans and Franciscans in 17th-century Mexico and Peru. Along the way the seminar will focus upon other inquisitions in Europe (especially those made in Italy, Spain and Germany), and the hunt for heresy in Goa and the Philippines. This course will read inquisitional manuals (books on how to conduct an inquisition)

and original inquisitional documents (the records of the trials and interrogations). Consequently, the history of heresy and witchcraft, as understood by people in the past and historians in the present, will be discussed.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM

L22 History 4965 Advanced Seminar: Magic, Heresy and Witchcraft in the Medieval World, 350-1550

This seminar will study the history of magic, heresy, and witchcraft in the medieval world. It will begin in the fourth century after the conversion of Constantine the Great and end with the great witchcraft trials of the 15th and 16th centuries. The seminar will read magical treatises, ecclesiastical polemics against vulgar belief, inquisitorial trials, chronicles, and histories, in our attempt to define what was considered the ordinary and the extraordinary, the natural and the supernatural, good and evil, the boundaries of heaven and earth. How do modern historians use medieval documents to evoke the lives of men, women, and children who believed in magic or were accused of heresy? Can this only be done through a form of historical anthropology? What methods do historians use in trying to understand past ideas and practices? What is historical truth then? What is the relationship of supposedly heterodox belief and behavior with religious orthodoxy? How do we define religion? A theme throughout this seminar will be the definition of evil and the powers of the devil. Students will write a short historiographic essay and a long research essay. Pre-modern, Europe. Prerequisite: sophomore standing or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L22 History 4976 Advanced Seminar: The American Trauma: Representing the Civil War in Art, Literature and Politics

This seminar is an interdisciplinary examination of how Americans represented the Civil War during and after the titanic conflict, with special attention given to the period between 1865 and 1915. The course explores how painters, novelists, photographers, sculptors, essayists, journalists, philosophers, historians and filmmakers engaged the problems of constructing narrative and reconstructing national and individual identity out of the physical and psychological wreckage of a war which demanded horrific sacrifice and the destruction of an enemy that could not be readily dissociated from the self.

Credit 3 units. A&S IQ: HUM EN: H

L22 History 497A Global Asias

This course engages a new methodological approach to Asia that expands beyond the spatial concept of the region as a set of political entities occupying a specific part of the world. Global Asias seeks to open up avenues of inquiry to accommodate the study of flows of people, ideas, and practices across Asia and throughout the world. It provides the opportunity to consider Asian communities as they manifest themselves in different places and different ways. We begin with a survey of past attempts to define, understand, and manage Asia, which resulted in an area studies approach. We then engage transnational and interdisciplinary efforts, and we conclude by considering the possibility that Global Asias can challenge and perhaps unsettle the reigning epistemologies that exist today.

L22 History 4981 Advanced Seminar: Historical Perspectives on Human Rights

This course offers a historical perspective on the modern international human rights regime, using materials drawn from diplomatic, legal, political and cultural studies. Successful completion of this seminar involves designing, researching, and writing a 25- to 30-page paper on a historically oriented, human rights-related topic of student's choice.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L22 History 4982 Advanced Seminar: Women and Confucian Culture in Early Modern East Asia

This course explores the lives of women in East Asia during a period when both local elites and central states sought to Confucianize society. We focus on Ming (1368-1644) and Qing (1644-1911) China, but also examine these issues in two other early-modern East Asian societies: Yi/Choson (1329-1910) Korea and Tokugawa (1600-1868) Japan.

Credit 3 units.

L22 History 4983 Advanced Seminar: Renaissance Florence and Venice

Venice was the most famously stable city-state in Renaissance Italy, Florence the most notoriously unstable one. This course explores how those contrasting political environments and experiences shaped social relations and cultural production (and vice versa) in those two cities.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L22 History 4984 Advanced Seminar: The Problem of Freedom: The Age of Democratic Revolution in the Americas

Ever since the improbable alliance of the English pirate and slave trader Sir Francis Drake and the fugitive slave Cimarrons on the Atlantic coast of Panama many centuries ago, the history of freedom in the New World has unfolded in unlikely fits and starts. The course explores two related conjectures: first, that maroon politics (the often short-lived alliances between slaves, quasi-free blacks and white allies), slave rebellion, provincial secession and civil war were the widespread and normative conditions of postcolonial regimes throughout the New World; and second, that the problem of freedom was especially challenging in a New World environment in which freedom was fleeting and tended to decompose. Special attention is given to antislavery insurgencies, interracial politics and alliances in the United States and the perspectives on freedom they produced, but the readings also include materials on debates over freedom in the Caribbean and South America over the course of the long age of democratic revolution, 1760-1888.

Credit 3 units. A&S IQ: HUM, SD EN: H

L22 History 4990 Advanced Seminar: History of the Body

Do bodies have a history? Recent research suggests that they do. Historians have tapped a wide variety of sources - including vital statistics, paintings and photographs, hospital records, and sex manuals - to reconstruct changes in how humans have conceptualized and experienced their own bodies. We will pay particular attention to the intersection of European cultural history and history of medicine since 1500. This course fulfills the History major capstone requirement as an Advanced Seminar.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

L22 History 4993 Advanced Seminar: Women and Religion in Medieval Europe

This course explores the religious experience of women in medieval Europe and attempts a gendered analysis of the Christian Middle Ages. In it, we examine the religious experience of women in a variety of settings — from household to convent. In particular, we try to understand how and why women came to assume public roles of unprecedented prominence in European religious culture between the 12th century and the 16th, even though the institutional church barred them from the priesthood and religious precepts remained a principal source of the ideology of female inferiority.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L22 History 4998 Advanced Seminar: The Crusades

This seminar will study the phenomenon of crusading in medieval Latin Christendom, from the First Crusade proclaimed by Pope Urban II in 1095 to the late crusades of the 14th and 15th centuries. We will particularly focus on crusading in the 12th and 13th centuries, when the ideas and practices of being a martial pilgrim were developed and formalized by the church. The concept of holy war in Latin Christianity and Islam will be examined. We will analyze the Fourth Crusade and the sack of Constantinople in 1204. We will investigate the Albigensian Crusade (1208-1229) into what is now southern France, when Christians were promised salvation for killing other Christians. Topics to be discussed are the Kingdom of Jerusalem and other crusader colonies in the Levant, women on crusade, the poetry of crusading, chivalry, military orders like the Knights Templars and the Hospitallers, and violence as a redemptive act. One historiographic paper and a research essay are required.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L22 History 49CA Advanced Seminar: Religion and the Secular: Struggles Over Modernity

A generation ago, scholars and observers around the world felt assured that modernization would bring the quiet retreat of religion from public life. But the theory of secularization now stands debunked by world events, and a host of questions has been reopened. This course provides students with a forum to think through these issues as they prepare research papers on topics of their own choosing.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L22 History 49DM Advanced Seminar: Meet Me in St. Louis

This seminar uses the 1904 Louisiana Purchase Exposition held in St. Louis as a lens to explore the intersection of exhibitionary culture, nation building and history. In the second half of the 19th century, world's fairs became a fact of life in many parts of the world. By the end of the century, American historian and cultural critic Henry Adams argued there was indeed a "religion of world's fairs." These international expositions, as sites of pilgrimages not only informed people's perception of the world but also were ideal stages for young countries to showcase their achievements, to attract investors and to craft a national identity. Students will examine the rise of exhibitionary culture

and the construction of patriotic histories and national symbols, the manufacturing of racial ideologies and otherness, and how these were all embedded in debates on civilization, modernity and progress.

L22 History 49JK Advanced Seminar: Blood and Sacred Bodies: Ritual Murder and Host Desecration Accusations

This seminar follows the history of the ritual murder and Host desecration accusations from the origins in 12th- and 13th-century Europe to the 20th century. It pays close attention to the social and political functions of the narratives; their symbolic importance in Christianity's salvific drama; attacks on such beliefs from both within and outside the community of the faithful; the suppression and decline of the ritual murder accusation; the integration of Jews into European societies in the 19th century; and the reappearance of the blood libel in the aftermath of emancipation.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L22 History 49KK Advanced Seminar: The U.S. in Afghanistan: Origins, Developments, Consequences

This course offers a historical examination and analysis of America's involvement in Afghanistan from the Cold War through the present, focusing in particular on the US War in Afghanistan from 2001 onward. Special attention will be given to political, military, diplomatic and economic dynamics as well as to international relationships, the experience of war and the subsequent developments upon both American and Afghani societies. Major topics covered include US covert operations against the Soviets in Afghanistan during the 1980s; revolution, civil war and the rise of the Taliban during the 1990s; 9/11 and the War on Terror; national building and stability measures during the early 2000s and subsequent security threats in the form of an insurgency, warlords, drug gangs, criminal networks and the al-Qaeda alliance of terrorist organizations; the key roles played by Pakistan, India, Iran, Russia, China and Central Asian states; the Obama surge and counterinsurgency operations starting in 2009; the soldier's experience, special forces, and covert operations; prisoners, torture and human rights abuses; the end of NATO's mission in 2014 and subsequent developments: the Ghani government, the return of the Taliban, the arrival of ISIS, the peace process, the U.S. drawdown and the elusive quest for peace and stability in Afghanistan. This is a capstone course open to history majors only. This course fulfills the History major capstone requirement as an Advanced Seminar.

Credit 3 units. A&S IQ: HUM, LCD Arch: SSC Art: SSC BU: IS

L22 History 49MB Advanced Seminar: Women and Gender in Modern Caribbean History

This course will highlight women in the "making" of Caribbean history, and it will consider how "men" and "women" were made in the English-speaking Caribbean from emancipation (1838) to the present. We will explore women and gender issues within the context of significant political shifts including the transition from slavery to wage and indentured labor, the labor rebellions

of the 1930s, the rise of labor unions and political parties, anti-colonial activism, decolonization and nationalism. The course will also situate the Caribbean within an international context, paying attention to migration, black internationalism and the Third World movement.

Credit 3 units. A&S IQ: HUM, LCD, SD BU: IS EN: H

L22 History 49MG Advanced Seminar: Planning Global Cities

This team-taught advanced seminar addresses the history and theory of a variety of metropolitan environments from the mid-19th century to the present. Readings move from the 19th-century state-centered urbanism of Paris or Vienna, through the colonial remaking of cities such as Manila or Caracas and their connections to urban reform and the City Beautiful movement in the U.S., then through the rise of planning, zoning, auto-centered cities, federal interventions such as urban renewal, the emergence of the preservation movement and new urbanism.

Credit 3 units.

L22 History 49NR Advanced Seminar: Egypt and the Arab Spring: Middle Eastern Revolution in Historical Perspective

The uprisings of the "Arab Spring" of 2011 captivated global media and observers. The movements brought down established regimes in Tunisia, Libya, Yemen and Egypt. The focus of this course will be to understand the historical background and primary contemporary issues that have shaped Egypt's Arab Spring, and to examine the huge popular effort to document Egypt's revolution. Each student will design, research and write a 25-page paper on a topic of their choice related to the Arab Spring.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L22 History 49PK Advanced Seminar: The Founding Fathers' Government in an Electronic Age

This is a research seminar that examines how Americans sought to translate their notions of government into a realistic set of priorities and a functioning set of public institutions. Extending from 1789 through the 1820s, this course investigates how the federal government came into being, what it did, and who populated the civilian and military rank of American officialdom. This is also a course in digital history. Students create new knowledge through their own contributions to an ongoing digital project that seeks to reconstitute the early federal workforce. In the process, students learn a variety of digital techniques, ranging from encoding languages to electronic systems to software packages.

Credit 3 units. A&S IQ: HUM EN: H

L22 History 49SA Advanced Seminar: Slavery in America: The Politics of Knowledge Production

This course focuses on the long history of chattel slavery in North America, from origins through emancipation, encompassing Black and Indigenous enslavement. The course foregrounds the struggles over power, life, and death that were at the heart of slavery's traumatic and grotesquely violent 250-year career in North America, with attention to hemispheric context. At the same time, it highlights the fiercely contested historical battleground where scholars have argued about how to define American slavery -- as a system or site of labor, production, and reproduction; law, property, and dispossession; racial and gender domination; sexual violation, rape, and incest; psychological terror and social death;

containment and marooning; selfhood and nationality; agency and resistance; anti-colonial and revolutionary liberation; and millennial redemption. Finally, the course engages the "politics of knowledge production" that have produced the slavery "archive," replete with its annihilating silences, repressions, and erasures, and overdetermined "presences." In the end, the course's overarching question is how the politics of slavery -- and of its material experiences, interpretations, and archives -- have shaped the lives and afterlives of slavery and race to the present day. Students will conduct original research on topics related to North American slavery in consultation with the instructor that will culminate in a 12- to 15-page final essay. The course includes attention to the role of slavery in the founding and development of Washington University; research projects that engage the University's slavery "archive" and questions related to enslavement in the history of the University and/or the history of St. Louis are welcome and will be supported by Olin Library Special Collections and other resources. Modern, U.S. Prerequisite: See History headnote.

Credit 3 units. A&S IQ: HUM, SD BU: BA, ETH, HUM EN: H

L22 History 49SC Advanced Seminar: Inventing India

From Christopher Columbus' misguided search for a mythical notion of India, to the Incredible India branding campaign launched by the Indian State's Department of Tourism, to the allure of yoga and true love, the notion of "India" has its own history. In this Advanced Seminar we trace the invention of India -- as a concept -- over time. We will learn how the fabrication of India has proceeded through the centuries, and how the many meanings of "India" coalesce, nimbly side-stepping any popular or professional narrative of Indian history. Mobilizing an array of interdisciplinary tools, we will plot how the fetishization of "India" has itself become a flexible industry, how the management of Indian exceptionalism drives caste expansion. We will study how the process renders certain subject positions and hierarchies as neutral and hegemonic while violently discarding others; how "India" is a product collectively manufactured, circulated, and consumed by a range of people around the world; the very real work of translation in bringing "India" into our everyday lives and imaginaries. This course fulfills the History major capstone requirement as an Advanced Seminar.

Credit 4 units. A&S IQ: HUM, LCD EN: H

L22 History 49TP Advanced Seminar: Whose Nairobi?

Opportunity and Inequality in a 20th-Century African City
Visitors to East Africa often hear the cautionary refrain, "Nairobi is not Kenya." However, over the past century, Kenya's largest city has meant distinctly different things to distinctly different people. Starting as a simple railway camp in the late 19th century and shaped by decades of colonial racial and ethnic segregation, it has grown into a global "mega-city," where Kenyans from every background and every corner of the country interact with an equally diverse cast of foreigners. Focusing on the realities of the day-to-day, this research seminar deploys a wide variety of historical evidence to better understand how ordinary people experienced and were shaped by Nairobi during the long and turbulent 20th century. This seminar's centerpiece is an extensive and original research paper that offers students the opportunity to work with a wide variety of primary sources, including archives, city planning reports, maps, images of the built environment, music, material culture, memoirs, and narrative fiction.

Credit 3 units. A&S IQ: HUM, LCD EN: H

Interdisciplinary Project in the Humanities

The Interdisciplinary Project in the Humanities (IPH) is a rigorous program for highly motivated students whose interests draw them beyond traditional academic categories. The major, which usually leads to a degree with honors, combines an introductory core — a focused study of texts central to the European, American and Asian philosophical, religious and literary traditions — with an area of concentration: an advanced cluster of courses and research tailored to the special interests of each student in the program. For students pursuing concentrations in, for example, American intellectual history, in the European avant-garde in the 20th century, or in Renaissance political thought (to take three among many possible concentrations), the introductory core provides a crucial foundation for advanced interdisciplinary work. The core also provides a useful background for students undertaking comparative concentrations in such topics as encounters between East Asian and Western medical traditions or the literature of mysticism.

All students in the major learn to write and speak clearly and flexibly; they are given broad exposure to a range of canonical texts, and they engage in the historical and formal analysis of those and many other texts; they become skilled at research in at least one foreign language; and they are given considerable experience in creative, independent scholarly inquiry. Their work in the humanities bridges disciplines and fosters in them the two fundamental interpretive skills of contextualization and criticism. Students in the program will be well prepared for a range of graduate programs in the humanities, for professional careers in law and public service, and for the vital work of critical citizenship and life-long intellectual discovery.

Majors

The Major in the Interdisciplinary Project in the Humanities

Total units required: 44

Foundations for the major include four of the Text and Traditions core courses, shown below, which may include a humanities-based Ampersand (<https://artsci.wustl.edu/ampersand-programs/>) first-year program (IPH 201C and IPH 203C taken in the same semester) plus two of the IPH courses in the core.

Code	Title	Units
IPH 201A	Puzzles and Revolutions: Text and Tradition	3
IPH 201B	The Great Economists: Text and Traditions	3
IPH 201C	Ampersand: Classical to Renaissance Literature	3
IPH 203C	Ampersand: Early Political Thought	3
IPH 207C	Modern Political Thought: Text and Traditions	3
IPH 209	Scriptures and Cultural Traditions: Text & Traditions	3
IPH 3050	Literary Modernities in Europe and America: Text and Traditions (IPH 3050 is an updated version of IPH 205C Literary Modernities)	3

IPH 310	The Intellectual History of Sex and Gender: Text and Traditions	3
IPH 320	The Intellectual History of Race and Ethnicity	3

IPH Core

The IPH core consists of four courses drawn from the Text and Traditions program, which may include an Ampersand first-year course sequence. Students begin taking core courses during their first year but generally not later than the spring of the sophomore year.

Students apply to the major during their sophomore year by submitting a portfolio of three previously written essays and a letter of recommendation from a Text and Traditions professor; admission is completed by means of an assessment interview with the IPH Director. Once admitted to the program, each student designs — in consultation with their IPH advisor — a program of advanced course work called the Area of Concentration.

During the spring semester of the sophomore year, students undertake their first sustained research project, the Sophomore Research Tutorial, under the mentorship of a member of the faculty who has agreed to work with them on the topic and who has been approved by their IPH advisor. During their sophomore and junior years, students focus on their Area of Concentration courses and continue to plan their capstone/thesis project.

In the spring semester of the junior year, students take the IPH Theory and Methods Seminar and the IPH Thesis Prospectus Workshop in anticipation of their capstone/thesis project. For their capstone/thesis projects, students work with a faculty member who has agreed to mentor them and two other faculty members who will read their thesis. All mentors and committee members must be approved by the student's IPH advisor. In late February and early March, students seeking honors take written and oral comprehensive exams.

In the fall of the senior year, students take an IPH Interdisciplinary Topics course and the Senior Thesis Tutorial; in the spring, they take the Senior Colloquium. In addition, they complete and present their capstone/thesis projects before the end of March.

Foreign Language Competency

By the fall semester of the senior year, IPH majors must have completed a four-course sequence in a non-native language and take an IPH-administered Language Application Exercise as evidence of their foreign-language competency.

Areas of Concentration

With their IPH faculty advisors, students construct a coherent interdisciplinary sequence of five courses for advanced study. This "area of concentration" must include at least one course in political or cultural history, which will normally be taken between

the third and seventh semesters of the program. Some students will pursue concentrations that reflect the long-standing research interests of a number of faculty in the humanities. Among these latter fully developed concentrations are the tracks in the following areas:

- Renaissance Studies
- Literature and History
- History of Media
- Data Science in the Humanities
- Carceral Studies

Other recent Areas of Concentration have included the following:

- Domesticity and Political Thought
- Religion and 19th-Century Literature
- Jurisprudence
- Madness in Classical Greek Drama
- Rural Chinese Environmentalism
- Central European Nationalism and the Zionist Movement
- Feminist Opera
- Space Law

Required Courses

Required courses for the major are as follows:

Code	Title	Units
Four core Text and Tradition courses		12
IPH 301	Sophomore Research Tutorial	2
IPH 401	IPH Thesis Prospectus Workshop	3
IPH 403	Senior Thesis Tutorial	3
Area of Concentration courses		15
IPH 405	Theory and Methods in the Humanities	3
IPH 450	Interdisciplinary Topics in the Humanities	3
or IPH 470	Interdisciplinary topics: The Idea of the Law: Text & Traditions	
IPH 455	IPH Senior Colloquium: Interdisciplinary Topics in the Humanities	3
Total Units		44

Minors

The Minor in Text and Traditions

Units required: 15

Text and Traditions is a minor open to first-year and sophomore students. In this program, students read, reflect on, and analyze — both orally and in writing — the foundational texts of Western literary, philosophical, scientific, and political culture, with comparative excursions into non-Western texts and traditions.

For students majoring in a science, the Text and Traditions minor provides a firm grounding in the humanities. All courses in the minor fulfill Arts & Sciences distribution requirements. Five courses satisfy the requirements for a minor in Text and Traditions.

Required courses:

Students take five of the following courses (15 units):

Code	Title	Units
IPH 200C	Sanity and Madness in Literature from Ancient Greece to the Renaissance	3
IPH 201A	Puzzles and Revolutions: Text and Tradition	3
IPH 201B	The Great Economists: Text and Traditions	3
IPH 201C	Ampersand: Classical to Renaissance Literature	3
IPH 203C	Ampersand: Early Political Thought	3
IPH 207C	Modern Political Thought: Text and Traditions	3
IPH 209	Scriptures and Cultural Traditions: Text & Traditions	3
IPH 3050	Literary Modernities in Europe and America: Text and Traditions	3
IPH 307	Ampersand: Literary Modernities in East Asia: The Interplay of Tradition, Modernity, & Empire: Text & Tradition	3
IPH 310	The Intellectual History of Sex and Gender: Text and Traditions	3
IPH 320	The Intellectual History of Race and Ethnicity	3

Elective courses:

Students may elect to substitute one of the above Text and Traditions courses with a text-centered course that emphasizes primary sources. Prior consultation and IPH advisor approval are required.

Additional Information

Enrollment is by application through the IPH program. Students must earn a grade of C or better for the course to count toward the minor.

The Minor in Data Science in the Humanities (DASH)

Units required: 15

Any humanities student will feel at home in this minor and in its active research community. No previous experience with computational methods is required; the curriculum equips students with the skills and knowledge necessary to navigate the field of Digital Humanities, and those skills and that knowledge are eminently "transferable." Computational approaches to questions in the humanities are slowly migrating from the methodological fringes of the disciplines of cultural, artistic and historical inquiry; students in the minor will have the opportunity to engage with the emerging future of their fields and to help shape that future.

A student who *does* have previous computational experience — a computer science major, for instance — will also benefit from this minor. By grafting that knowledge to the problems of cultural and historical analysis and working on challenging new projects within unfamiliar fields, computer-savvy students will find themselves becoming more versatile and more attractive to graduate admissions committees and potential employers.

For the minor, students take 6-7 units from the four DASH courses plus at least 3 units of internship (which can be repeated for up to 8 credits). The internship research experience is required and consists of working under the director of a faculty on a project through IPH or the Humanities Digital Workshop. The DASH courses and internship can be supplemented with elective courses in Computational Humanities, Digital Culture and Design, or Computer Science.

DASH Courses

Code	Title	Units
IPH 312	Introduction to Digital Humanities	3
IPH 431	Statistics for Humanities Scholars: Data Science for the Humanities	3
IPH 430	Data Manipulation for the Humanities (1 unit)	1
IPH 432	Programming for Text Analysis (Now 3 units)	3
IPH 399	Internship in Digital Humanities (Can be repeated [up to 8 total credits])	3-8
Electives		3-6

Elective DASH Courses

Students may supplement the DASH requirements with elective courses taken from three categories: Computational Humanities, Digital Culture and Design, or Computer Science. The IPH reaches out to other faculty to identify courses that may be counted as DASH elective courses. DASH minors must reach out to their IPH/DASH advisor for approved elective courses.

Internship Research

The DASH minor is unusual among humanities programs in its focus on hands-on undergraduate research via internship. STEM fields provide relatively straightforward pathways toward research, whereas humanities students sometimes struggle to define what humanities research entails and how to get involved. Research opportunities are built into the DASH minor. DASH requires every student to take at least 3 units of directed research during an internship on a faculty-led project, and students are encouraged to work on more than one project or to advance their skills during another semester or summer. Students may take up to 8 units of internship/research. Lists of projects can be found on the IPH (<https://iph.wustl.edu/research-apprenticeships/>) and Humanities Digital Workshop (<https://hdw.wustl.edu/browse/>) websites.

Every summer, the Humanities Digital Workshop invites applications from students for its summer fellowships (<https://hdw.wustl.edu/fellowships/#primary>). The fellowships pair students with humanities faculty engaged in digital humanities projects for 8 weeks, and past participants have overwhelmingly found this to be a valuable experience.

L93 IPH 150 First-Year Seminar: Topics in Interdisciplinary Inquiry

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM, IS EN: H

L93 IPH 200C Sanity and Madness in Literature from Ancient Greece to the Renaissance

We will consider explicit and implicit models of mental life, motivation, and action in works by authors studied in 201C. We will investigate how concepts related to madness are formulated and regulated in these literary texts and in the societies that produce them, and we will read scholarship from the 19th through 21st centuries that has debated the scale and scope of irrationality in ancient, medieval, and early modern cultures.

Credit 3 units. A&S: AMP A&S IQ: HUM BU: BA, HUM EN: H

L93 IPH 201A Puzzles and Revolutions: Text and Tradition

One major force in human history has been inquiry into the natural world. Especially after 1550, natural science -- by virtue of its role in the development of technology and the improvement of health -- has brought about great changes on all scales of human existence, first in Western Europe and then globally. In this course, the changing character of inquiry into the natural world, from antiquity forward, will be the object of study. Does natural science enable us, for example, to study nature as it is in itself, or are culturally determined perspectives or frameworks

inescapable? How is it that natural science has, especially since 1800, proved so useful in the development of technology? How has it impinged on the arts? The requirements will include writing several short papers and brief responses to the readings.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L93 IPH 201B The Great Economists: Text and Traditions

Examination of the great economic thinkers, the problems they sought to solve, the historically-conditioned assumptions that they bring to their work, and the moral issues they raise. The class will read from the works of Adam Smith, Ricardo, Malthus, Marx, Veblen, Keynes, Schumpeter, Galbraith, and others as well as commentary from Heilbroner. These readings will be paired with selected texts on the social and moral issues of their times.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L93 IPH 201C Ampersand: Classical to Renaissance Literature

Students enrolled in this course engage in close and sustained reading of a set of texts that are indispensable for an understanding of the European literary tradition, texts that continue to offer invaluable insights into humanity and the world around us. Homer's *Iliad* is the foundation of our class. We then go on to trace ways in which later poets and dramatists engage the work of predecessors who inspire and challenge them. Readings move from translations of Greek, Latin and Italian, to poetry and drama composed in English. In addition to Homer, we will read works of Sappho, a Greek tragedian, Plato, Vergil, Ovid, Petrarch, and Shakespeare.

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L93 IPH 203C Ampersand: Early Political Thought

A selected survey of the political and moral thought of Europe from the rise of Athenian democracy to the Renaissance, with emphasis on analysis and discussion of writers such as Thucydides, Plato, Aristotle, St. Augustine, Castiglione, and Machiavelli. The course aims to introduce students to basic texts in the intellectual history of Western Europe, understood both as products of a particular time and place and as self-contained arguments that strive to instruct and persuade. The texts are simultaneously used to chart the careers of such fundamental notions as liberty, virtue, and justice.

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L93 IPH 207C Modern Political Thought: Text and Traditions

What is power? Why are societies divided along lines of race, class, and gender? When did politics become split between the right and the left? Can religion be reconciled with the demands of modern life? Can democracy? These are some of the questions that will be addressed in this survey of modern political thought. Thinkers covered will include Thomas Hobbes, Immanuel Kant, Karl Marx, W.E.B. Du Bois, Hannah Arendt, and Michel Foucault.

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L93 IPH 209 Scriptures and Cultural Traditions: Text & Traditions

When we think of the word "scripture" in antiquity, we might think of the texts that have been compiled in the different holy books that we currently have today. Yet the function of "scriptures" within a community, and the status given to different texts treated as "scriptural," has changed in different times and places. In this course, we will consider texts that would eventually come to be part of the Hebrew Bible, New Testament, and the Qu'ran as well as several of the exegetes and reading communities that shaped their various interpretations. We will explore how non-canonical sources played a role in the formation of the various canons we have today, comparing the authoritative status given to these texts to that given to other works from antiquity, such as the epics of Homer. Special attention will be played to the role of the receiving community in the development of "scripture," and the variety of the contexts in which scripture can function in the construction of and opposition to religious authority.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L93 IPH 211A Digital Humanities: Information Representation, Analysis and Modeling

It is a truism that computers have changed our lives, the way we think, but in fact systematic efforts to apply current technologies to the thinking about history and culture have been rare. This course enables students to consider how these technologies might transform the humanities. Students explore the various ways that ideas and data in the humanities can be represented, analyzed and communicated. Topics include forms of information, modeling and simulation, geospatial (GIS) and temporal representations of data, and ways of creating and using audio and visual information. Readings and classwork are supplemented by small assigned digital projects culminating in a project chosen by the students themselves. Students should be comfortable with using the internet and a word processor. No other special computing skills are required.

Credit 3 units.

L93 IPH 260 From Literature to Opera

Much operatic repertoire is based on classics of literature, from the very first operas of 1598-1600 to the present day. From Literature to Opera will introduce students to the world of opera through a close study of a few select works based on major literary subjects, beginning with the literary works themselves and proceeding to the ways the texts are adapted for the musical stage and then transformed into another genre through their dramatic musical settings. For 2018 the works studied will be Virgil's and Ovid's versions of the Orpheus myth set to music by Claudio Monteverdi in 1607 as one of the earliest operas. Next we will move on to Carlo Goldoni's play, *Don Juan*, which was composed by Mozart as *Don Giovanni* in 1787. Shakespeare will be represented by the ultimate tragedy of words, *Othello*, and Giuseppe Verdi's *Otello* of 1887. The course will conclude with Claude Debussy's *Pelléas et Mélisande* of 1902, based on Maurice Maeterlinck's 1892 symbolist play of the same name. No previous musical experience required. The class will be conducted as a seminar focused on student participation. Each student will also choose an opera based on a literary work as the subject of two 10-page papers. The first, due at midterm, will study the literary source and the way it is adapted as an operatic

text (libretto). The second, due at the end of finals week, will analyze how the libretto is dramatized through the music. One of the important purposes of class discussion will be to develop a usable vocabulary for describing music and its dramatic effects.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L93 IPH 299 Research Internship in the Humanities

Credit variable, maximum 3 units.

L93 IPH 301 Sophomore Research Tutorial

A practical introduction to research in the humanities. Students develop and complete a project in a research area of possible long-term interest.

Credit 2 units. A&S IQ: HUM EN: H

L93 IPH 3050 Literary Modernities in Europe and America: Text and Traditions

The course examines the various facets of modernity in major works of European, Eurasian, and, sometimes, American literature from the early 17th century to the 1920s, starting with "Don Quixote." We will explore, among other things, the eruption of the novel, the secularization of autobiography, the literary discovery of the city, and the rise of literary and aesthetic criticism that takes literature and art seriously as political and social institutions. In addition to literary works, the course will engage with two or three important models of critical practice (e.g., Wollstonecraft's "Vindication of the Rights of Women"; Marx's "German Ideology"; Freud's "The Interpretation of Dreams"; Eliot's "Tradition and the Individual Talent"; or perhaps that great work of fictionalized literary criticism, Borges' "Pierre Menard, Author of the Quixote").

Credit 3 units. A&S: AMP A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L93 IPH 307 Ampersand: Literary Modernities in East Asia: The Interplay of Tradition, Modernity, & Empire: Text & Tradition

This course will explore the complex forces at work in the emergence of modern East Asia through a selection of literary texts spanning fiction, poetry, and personal narrative. Our readings — by Chinese, Japanese, Korean, and Taiwanese writers and poets — will point to the distinctively different and dramatically-shifting circumstances of modern East Asian nations and peoples, as well as to their shared values and aspirations.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L93 IPH 310 The Intellectual History of Sex and Gender: Text and Traditions

When did sexuality begin? Is it safe to assume that gender constructions are universal and timeless? In this course, we will engage with a broad range of readings that serve as primary texts in the history of sexuality and gender. Our aims are threefold: (1) to analyze the literary evidence we have for sexuality and gender identity in Western culture; (2) to survey modern scholarly approaches to those same texts; and (3) to consider the ways in which these modern theoretical frameworks have become the most recent set of primary texts on sexuality and gender.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM
BU: BA EN: H

L93 IPH 312 Introduction to Digital Humanities

It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork will be supplemented by class presentations and a small assigned group project. Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

L93 IPH 3123 Introduction to Digital Humanities

It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course will enable students to consider how these technologies might transform the humanities. We will explore the various ways in which ideas and data in the humanities can be represented, analyzed, and communicated. We will also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. L93 IPH 315 Independent Study in the Interdisciplinary Project in the Humanities

Credit 3 units.

L93 IPH 3191 The European Avant-Garde: Interdisciplinary Studies in the Humanities, 20th Century

The first half of the 20th century witnessed the emergence of artistic movements characterized by revolt against tradition, emphasis on radical experimentation and redefinition of the art work. This course familiarizes students with the avant-garde's main currents: Italian Futurism, English Vorticism, Russian Constructivism, "stateless" Dadaism and French Surrealism. We ask ourselves how to define the avant-garde, how it is related to modernity and whether its aesthetic is necessarily political. Texts include *Futurist Manifestos*, Cendrars' *Trans-Siberian Prose*, Stein's *Tender Buttons*, Breton's *Nadja*. We also examine artworks such as Duchamp's "Large Glass" and films such as Buñuel's *Un Chien Andalou*.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L93 IPH 320 The Intellectual History of Race and Ethnicity

This course is designed to introduce students to a wide range of historical ideas, contexts, and texts that have shaped our understandings of race and ethnicity. We will examine the ways in which our definitions and categories of race and ethnicity have helped us to construct (and continuously reinvent) our sense of who counts as human, what counts as human

behavior, the possibilities of artistic expression, the terms of political engagement, and our critical and analytical frameworks. Students should be prepared to do quite a bit of reading of some very challenging yet rewarding texts.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, ETH, HUM

L93 IPH 3311 Laughter from Joubert to Bataille:

Interdisciplinary Studies in the Humanities

In this course we will trace a tradition of writing on laughter. While we will read texts that might explain laughter by way of comedy or humor, we will be interested in laughter itself. What does the body in laughter look like? How does laughter sound? Where, when and how does laughter happen? What is laughter's relation to language, to song, to thought? What kind of communities does laughter form? We will read texts by Joubert, Erasmus, Hobbes, Descartes, Chesterfield, Kant, Bergson, Freud, Bataille, Sarraute, and Ellison. We will listen to music like Louis Armstrong's "Laughin' Louie" and we will watch films like *Laughing Gas*, *The Man Who Laughs* and *A Question of Silence*. Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L93 IPH 332 Visual Culture

In this interdisciplinary course, we explore this long history of vision and visual representation from antiquity to the present so as to shed light on how people at different moments have understood vision, have seen their own seeing and have encoded this seeing in different artifacts and media. More specifically, we explore the role of the visual in the historical production of subjectivity and collectivity; the political, religious and ideological uses and abuses of vision; the relation of images to words and stories; the implication of sight in competing systems of truth, enlightenment and scientific progress; and the function of seeing within different media of art, entertainment and virtualization — from ancient cave painting, medieval icons and early modern church designs to modernist paintings and motion pictures.

Credit 3 units. A&S IQ: HUM BU: ETH EN: H

L93 IPH 3451 Histories of Intelligence: Topics in Science and Society

The use of data, computing, and quantitative methods has become central to politics, economics, and daily life. This course uses the concept of "intelligence" to survey the history of technoscientific efforts to understand and represent the intersections of minds, machines, and society. The course title has a deliberate double meaning; it is about both the people who seek to study and measure humans and their knowledge capacities as well as the knowledge or information that is increasingly collected, measured, and automated by machines. Organized topically and chronologically, this discussion-based seminar will examine the changing meanings and significance of intelligence, their impact on politics and social organization, and the questions raised about the relationship between specific technologies and specific models of human reasoning. We will consider these questions from diverse perspectives, including race, gender, class, ability, and materiality from the 19th century to the present. Topics covered include histories of artificial intelligence, racial dynamics, meritocracy, informational labor, state secrecy, and the self as data.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM

L93 IPH 3473 Race, Rights, and Humanity in European History

This course explores discourses of human rights as natural rights in Europe from the Enlightenment to the present. While Europe -- and particularly France -- has been quick to declare itself the birthplace of human rights, a closer look reveals a broad continuum of conceptions of political, social, and economic rights. The course functions as a kind of survey of Modern European history, touching on the Age of Revolutions, the rise of European overseas empires, international anti-slavery movements, totalitarianism, and postwar development. It focuses on how political, social, and economic rights have always been articulated incompletely, to the benefit of some and to the detriment of others.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS

L93 IPH 3587 From Genghis Khan to the Taliban: War and Peace in Central Asia

From romantic invocations of the Silk Road and isolated nomads to medieval barbarisms of the Taliban, Western media and popular culture often portray Central Asia as a region out of step with time. However, Central Asia has long been a center for culture, innovation, and political power, and it has a history that is hard to reconcile with popular images of a place stuck in the past. This course, which is intended for advanced undergraduate and graduate students, traces the transformation of Central Asia from Genghis Khan's 13th-century conquests to the present, covering the territories of former Soviet Central Asia, Western China (Xinjiang), and Afghanistan. Although the course covers nearly 1000 years, the primary emphasis is on the imperial schemes and transformations of the past 300 years. All readings will be in English, and no prior knowledge in Central Asian history is expected or required.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L93 IPH 3951 Shakespeare's Sonnets: Framing the Sequence

We will begin by exploring ways of reading a small number of individual sonnets, proceeding thereafter to think about patterns of meaning in language and image across broader groupings and the sequence as a whole. We will investigate the influence of earlier sonnet tradition, especially Petrarch's sonnets, and the relationship of the poems to modes of sexuality and selfhood. Finally, we will ask how some of Shakespeare's most creative readers — including Wilde, Booth, and Vendler — have responded to the challenges of the sonnets. Students will work on writing their own commentary on a group of poems.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L93 IPH 399 Internship in Digital Humanities

A practicum in digital humanities. Students will work on one or more faculty research projects sponsored by the Humanities Digital Workshop. While we will try to assign students to projects that align with their research interests, we will also aim for assignments that will help students extend their skills.

Credit variable, maximum 6 units.

L93 IPH 401 IPH Thesis Prospectus Workshop

Students assist each other in developing viable thesis topics, compiling bibliographies, and preparing research plans. Students give formal and informal oral presentations of their proposed topics. Prospectuses and, if possible, drafts of first chapters are peer-edited.

L93 IPH 403 Senior Thesis Tutorial

Credit 3 units.

L93 IPH 405 Theory and Methods in the Humanities

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L93 IPH 4052 Citizenship: Historical, Cross-Cultural, and Interdisciplinary Perspectives

Although some have posited that citizenship may become obsolete in an increasingly globalizing and interconnected world, citizenship has never been more relevant. Discussions of migration, statelessness, naturalization policies, borders, and so many other contemporary topics hinge on questions of citizenship. In this course, we will be taking an interdisciplinary approach to the study of citizenship, drawing on a wide range of work from historians, social scientists, journalists, and writers. This is an interdisciplinary and transnational course intended for advanced undergraduate and graduate students. Examples will draw from around the world and from a variety of disciplines. Assigned materials include the work of historians, anthropologists, political scientists, sociologists, and journalists as well as novels, films, and audio and visual sources.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA EN: H

L93 IPH 4111 Pastoral Literature: Interdisciplinary Studies in the Humanities, Antiquity

This course will open with a survey of the classical tradition in pastoral/bucolic. We will consider questions of genre, intertextuality and ideology, and we will ask how "the lives and loves of herders" became favored ground for literary meditation on issues of surface and depth, reality and illusion, artifice and sincerity. This portion will involve intensive reading in translation of Theocritus, Vergil and Longus. In the second half of the semester, we will consider the survival, adaptation and deformation of ancient pastoral themes, forms and modes of thought in British and American writing from the 19th and 20th centuries. We will read works of Mark Twain, Kenneth Grahame, Thomas Hardy and Tom Stoppard.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L93 IPH 4171 Roman Remains: Traces of Classical Rome in Modern British Literature

This course will examine the use of the Roman textual and material inheritance in poets, novelists and critics of the late 19th and 20th centuries working in Britain, and will ask how modernity addresses the claims of the classical tradition. We will place Thomas Hardy's *Poems of 1912-13* next to Vergil's *Aeneid*, then survey Hardy's relationship to the visible remainders of Rome and the people it conquered — roads, barrows, forts — in the landscape of Dorset. After examining the representation of the Celtic hill-fort in fiction, and the legacy of Vergilian representations of the countryside in poetry, we will consider

representations of Rome in light of modern imperialism (Joseph Conrad's *Heart of Darkness* and Ezra Pound's "Homage to Sextus Propertius") and examine the place of Vergil in T.S. Eliot's critical and poetic practice.

Credit 3 units. A&S IQ: HUM EN: H

L93 IPH 425 Humanities by the Numbers: Essential Readings in Digital Humanities

To what extent can computational techniques that draw on statistical patterns and quantification assist us in literary analysis? Over the semester, we juxtapose the close reading of historical documents or literary works with the "distant reading" of a large corpus of historical data or literary texts. We ask how the typically "human" scale of reading that lets us respond to literary texts can be captured on the "inhuman" and massive scales at which computers can count, quantify and categorize texts. While this class introduces students to basic statistical and computational techniques, no prior experience with technology is required. Prerequisites: two 200-level or one 300-level course in literature or history. This is a topics-type course and the specific documents and works examined vary from semester to semester. Consult semester course listings for current offerings.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L93 IPH 426 Imagining the City: Crime and Commerce in Early Modern London

The astonishing demographic and economic growth of early modern London, and the rapid increase in spatial and social mobility that accompanied this growth seemed to harbinger, in the eyes of many contemporaries, a society in crisis and perhaps on the brink of collapse. As increasing numbers of vagrants or masterless men flocked to the metropolis and a growing number of people — apprentices, domestic labor, street vendors, etc. — lived on the fringes of legitimacy and at risk of lapsing into vagrancy, policing early modern London provided unique challenges for authorities. At the same time, the very notion of the social — a shared space of kinship and community — could often seem to be under threat as an emerging market and a burgeoning commodity culture reshaped the traditional underpinnings of social and economic transactions. Yet, late Tudor and early Stuart London remained by far England's most prosperous metropolis, its primary market, home to a burgeoning print culture and nourishing theater and emerged, eventually, as the epicenter of a global economy. This course considers the topographic, social and institutional configuration of early modern London and the ways in which these were reimagined and negotiated in the literature of the period. Drawing on the drama of the period and a wide array of pamphlet literature, we discuss how civic institutions handled the growing influx of the poor and adapted to the increasing power of an emerging bourgeoisie who asserted themselves in unprecedented ways. In addition we consider secondary sources ranging from maps, theories of urban space and social and economic historiography as well as digital archives and computational techniques that allow us to "scale up" our thinking about early modern London to a vast corpus of texts and documents.

Credit 3 units. A&S IQ: HUM EN: H

L93 IPH 427 Technology and Feminist Practice: Gender Violence Prevention Tools

How can we best use technology, and the tools and insights of the Digital Humanities in particular, to promote effective approaches to addressing gender-based violence? What are the most effective ways to bridge the innovations of the research

university with the everyday work of practitioners seeking to prevent violence or intervene in its aftermath? What are the ethics involved in constructing tools for public and professional use? Which interests should govern the choices in content, design and dissemination of information? This course will introduce students to the strategies and challenges of devising technological tools for violence prevention for use beyond the classroom. Class readings and discussions will be supplemented by hands-on project work with Washington University's Gender Violence Database and lab sessions that focus on skill-building in digital project construction. Prerequisite: For undergraduate students, L77 393 01 or previous work experience with the Gender Violence Database. Graduate students by permission of instructor.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA, ETH EN: H

L93 IPH 430 Data Manipulation for the Humanities

The course will present basic data modeling concepts and will focus on their application to data clean-up and organization (text markup, Excel and SQL). Aiming to give humanities students the tools they will need to assemble and manage large data sets relevant to their research, the course will teach fundamental skills in programming relevant to data management (using Python); it will also teach database design and querying (SQL). The course will cover a number of "basics": the difference between word processing files, plain text files, and structured XML; best practices for version control and software "hygiene"; methods for cleaning up data; regular expressions (and similar tools built into most word processors). It will proceed to data modeling: lists (Excel, Python); identifiers/keys and values (Excel, Python, SQL); tables/relations (SQL and/or data frames); joins (problem in Excel, solution in SQL, or data frames); hierarchies (problem in SQL/databases, solution in XML); and network graph structures (nodes and edges in CSV). It will entail basic scripting in Python, concentrating on using scripts to get data from the web, and the mastery of string handling.

Credit 1 unit. EN: H

L93 IPH 431 Statistics for Humanities Scholars: Data Science for the Humanities

A survey of statistical ideas and principles. The course will expose students to tools and techniques useful for quantitative research in the humanities, many of which will be addressed more extensively in other courses: tools for text-processing and information extraction, natural language processing techniques, clustering & classification, and graphics. The course will consider how to use qualitative data and media as input for modeling and will address the use of statistics and data visualization in academic and public discourse. By the end of the course, students should be able to evaluate statistical arguments and visualizations in the humanities with appropriate appreciation and skepticism. Details. Core topics include: sampling, experimentation, chance phenomena, distributions, exploration of data, measures of central tendency and variability, and methods of statistical testing and inference. In the early weeks, students will develop some facility in the use of Excel; thereafter, students will learn how to use Python or R for statistical analyses.

Credit 3 units. A&S IQ: HUM, AN EN: H

L93 IPH 432 Programming for Text Analysis

This course will introduce basic programming and text-analysis techniques to humanities students. Beginning with an introduction to programming using the Python programming language, the course will discuss the core concepts required for working with text corpora. We will cover the basics of acquiring data from the web, string manipulation, regular expressions, and the use of programming libraries for text analysis. Later in the course, students will be introduced to larger text corpora. They will learn to calculate simple corpus statistics as well as techniques such as tokenization, chunking, extraction of thematically significant words, stylometrics and authorship attribution. We will end with a brief survey of more advanced text-classification terminology and topics from natural language processing such as stemming, lemmatization, named-entity recognition, and part-of-speech tagging.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L93 IPH 435 Practicum in Digital Humanities: Enslavement in St. Louis

This is a variable topics course, and content will change from semester to semester.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L93 IPH 440 The Ethics, Politics, and Law of Big Data

This course will explore the phenomenon of "big data" -- the use of very large datasets that make new predictive algorithms and other advanced data analytics possible -- and provide students with an opportunity to think critically about the applications of new information technologies and to develop an awareness of their ethical and political context. We will begin by addressing the philosophical question of what, if anything, is special about big data -- what makes today's digital data ecosystems different from the ways in which scholars, governments, and businesses have used data and statistics for centuries. We will then examine questions about the ethics, politics, and law of contemporary information technology. Topics will include the moral philosophy of privacy; the theoretical foundations of American and European privacy law pertaining to big data; the ethics of using predictive algorithms in criminal sentencing and marketing; the ethical considerations that bear on academic research using "big data"; and differences and similarities between the ways in which computer code ("West Coast Code") and laws ("East Coast Code") regulate conduct. Readings will include excerpts from Ian Hacking's "The Taming of Chance"; Safiya Umoja Noble's "Algorithms of Oppression"; Cathy O'Neil's "Weapons of Math Destruction"; Evgeny Morozov's "To Save Everything, Click Here"; and Frank Pasquale's "The Black Box Society." Assignments for the course will include both academic papers and practical exercises, such as drafting a mock privacy policy for a tech company accumulating large quantities of personal data about its consumers.

L93 IPH 465 The Pre-History of Blogging: Social Media of the Enlightenment

This course will explore the ways in which the Enlightenment — in France, England, Germany and the U.S. — was shaped by the emergence of new literary forms, media and technologies of communication. Like our blogs, Facebook and email, the 18th century had its new social media — newspapers and literary journals, letters that surged through the national postal systems — as well as new social institutions — salons and coffeehouses — that served as forums for public debate. We will examine these novelties in order to investigate the often ambivalent heritage of the Enlightenment: the use of media to exchange knowledge and express dissent; the use of media for surveillance and state control.

Credit 3 units. A&S IQ: HUM EN: H

L93 IPH 470 Interdisciplinary topics: The Idea of the Law: Text & Traditions

Various interdisciplinary topics are explored that may include around the humanities, social sciences and data sciences.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L93 IPH 494 Milton and the Trials of Conscience: Poetry, Poetics, and Polemics

Major poems and prose works in relation to literary and intellectual currents of the 17th century.

Same as L14 E Lit 494

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L93 IPH 498 The Spenser Lab

This course involves graduate and undergraduate students in the ongoing work of the Spenser Project, an inter-institutional effort to produce a traditional print edition of the Complete Works of Edmund Spenser.

Same as L14 E Lit 498

Credit 3 units. A&S IQ: HUM EN: H

L93 IPH 498W The Spenser Lab

In this Writing Intensive course, the students will be given a variety of writing tasks: writing commentaries, introductions, software manuals, grant proposals, software requirements, and design documents (SRDDs).

Same as L14 E Lit 498W

Credit 4 units. A&S IQ: HUM, WI EN: H

Italian

The Italian program boasts an exceptionally dynamic and caring faculty expert in a range of established and cutting-edge subjects, including migration studies, medical humanities, Medieval and Renaissance literature, film studies, queer studies, museum studies, and the *Slow Food* movement. Our

small class sizes, interactive and proficiency-based language courses, and popular culture courses draw students from the School of Engineering, Olin Business School, the Sam Fox School of Design and Visual Arts, and all major disciplines in Arts & Sciences, from biology to history and from literature to economics. Not only do our students achieve a high level of proficiency in Italian language with practical application for living and working in Italy, but we also offer extensive preparation in Italian literature, film, and culture, as well as opportunities for travel and study abroad. We offer semester- and year-long study abroad at our affiliate program in Padua, where students immerse themselves in Italian culture and perfect their Italian by living with an Italian family and attending varying levels of small-group language, literature, and culture classes with American students at the Centro as well as by taking courses directly at the University of Padua. The Italian program extends beyond the courses we teach. We also offer ongoing series of lectures, films, and artistic performances in addition to student-organized social activities, all of which contribute to the intellectually dynamic and personally rewarding social environment of our section.

As one of the top four European economies, Italy is a leader in design, fashion, travel and tourism, the automotive industry, information technology, media and communications, engineering, pharmaceutical production, food and wine, and textiles. The study of Italian in our program will prepare students for work in these sectors and for careers in international business; diplomacy, international government, and law; academia; the fine arts; and education. *Benvenuti a tutti!*

Majors

The Major in Italian

Total units required: 27 units (24 for second majors). * Of these 27 units, three may be taken outside of Italian (L36) with the approval of the major advisor.

* Students may count Ital 201D Intermediate Italian in the Everyday World, Level III toward the major.

Required courses (in Italian):

Students may count one of the following:

Code	Title	Units
Ital 247	First-Year Seminar: Italy's Invention of the Modern Museum	3
Ital 248	First-Year Seminar: Italian Literary Culture: Identity, Subjectivity, Audience	3
Ital 249	Refracted Light: How Others View Italy	3

Students are required to complete one of the following courses (3 units):

Code	Title	Units
Ital 307D	Advanced Italian in the Everyday World	3
Ital 309	Transmedia Italian Culture: Stories, Interpretation, Performance	3

Students are required to complete one of the following courses (3 units):

Code	Title	Units
Ital 323C	Italian Literature 1: Genre and Gender in Italy, 1200-1600	3
Ital 324C	Italian Literature II: The Making of Modern Italy, Texts and Contexts	3
Ital 327	History of the Italian Language	3

Students must complete two of the following 400-level seminars (6 units):

Code	Title	Units
Ital 408	Disease, Madness, and Death Italian Style	3
Ital 428	The New Sicilian School	3
Ital 432	Divergent Voices: Italian Women Writers	3
Ital 437	Caffe, Cadavers, Comedy and Castrati: Italy in the Age of the Grand Tour	3
Ital 456	Romance Philology	3
Ital 462	Prose Writers of the 16th Century	3
Ital 473	Machiavelli and Guicciardini	3
Ital 481	Dante	3
Ital 483	Boccaccio: Decameron	3
Ital 485	Ariosto: Orlando Furioso	3
Ital 491	Postmodernism	3
Ital 492	The Italian Detective Novel	3

Additional Information

Students must maintain an average of B- or better, and they must maintain a B or better in Italian. Courses taken credit/no credit do not count toward the Italian major.

Study Abroad: Students are strongly encouraged to participate in a study abroad program (<https://rl.wustl.edu/study-abroad-opportunities/>). We offer a semester abroad program at our affiliate program with Boston University's Centro in Padua. This program is considered in residence.

Senior Honors: Students are encouraged to work toward Latin honors (cum laude, magna cum laude and summa cum laude). To qualify for Latin honors in the major by thesis, a student must complete special literary research and prepare and orally defend an honors thesis, which is judged by an honors faculty committee. To qualify for Latin honors by course work, a student must enroll in Ital 4951 (Senior Honors, fall of the senior year) and Ital 495 (Senior Honors, spring of the senior year). Recommendations for honors are based on performance and the quality of the thesis, plus the student's cumulative grade-point average. (Please refer to the departmental guidelines (<https://rl.wustl.edu/degree-details-and-requirements/#anchor-group-9618>) for more information about Latin honors.)

Transfer Credits: A minimum of 18 of the 27 units required for the major must be taken in residence. Courses not taken at Washington University may count toward the major only with departmental permission.

Minors

The Minor in Italian

Total units required: 18*

* Students may count Ital 201D Intermediate Italian in the Everyday World, Level III toward the minor.

Required courses (in Italian):

Students may count one of the following:

Code	Title	Units
Ital 247	First-Year Seminar: Italy's Invention of the Modern Museum	3
Ital 248	First-Year Seminar: Italian Literary Culture: Identity, Subjectivity, Audience	3
Ital 249	Refracted Light: How Others View Italy	3

Students are required to complete one of the following courses (3 units):

Code	Title	Units
Ital 307D	Advanced Italian in the Everyday World	3
Ital 309	Transmedia Italian Culture: Stories, Interpretation, Performance	3

Students are required to complete one of the following courses (3 units):

Code	Title	Units
Ital 323C	Italian Literature 1: Genre and Gender in Italy, 1200-1600	3
Ital 324C	Italian Literature II: The Making of Modern Italy, Texts and Contexts	3
Ital 327	History of the Italian Language	3

Elective courses:

Code	Title	Units
Ital 301	Oral Communication I	3
Ital 319	Advanced Conversational Italian	3
Ital 3221	Topics: The Jewish Experience in Italy	3
Ital 3224	Topics: From Basilisks to Botticelli: The Birth, Development and Politics of Museums in Italy	3
Ital 332	Topics in Film Studies: Italian Cinema	3
Ital 334	Topics in Italian Cinema	3
Ital 350	Topics: Global Italy: Race, Gender, Migration and Citizenship	3
Ital 408	Disease, Madness, and Death Italian Style	3
Ital 428	The New Sicilian School	3
Ital 430	Divergent Voices: Italian Women Writers	3
Ital 433	Literature of the Italian Enlightenment	3
Ital 437	Caffe, Cadavers, Comedy and Castrati: Italy in the Age of the Grand Tour	3
Ital 473	Machiavelli and Guicciardini	3
Ital 481	Dante	3
Ital 483	Boccaccio: Decameron	3
Ital 485	Ariosto: Orlando Furioso	3
Ital 491	Postmodernism	3
Ital 492	The Italian Detective Novel	3

Additional Information

Students must maintain an average of B- or better, and they must maintain a B or better in Italian. Courses taken credit/no credit do not count toward the Italian major.

Students are strongly encouraged to participate in a study abroad program. Please refer to the Italian page on the Romance Languages and Literatures home page (<http://rl.wustl.edu/italian/>) for more information about Italian study abroad programs.

Courses

Visit online course listings to view semester offerings for L36 Ital (<https://courses.wustl.edu/CourseInfo.aspx?scl=L&dept=L36&crslvl=1:4>).

L36 Ital 1015 Introductory Italian for Visual Arts

Students learn methods of effective communication, the rapid acquisition of spoken ability, and a working vocabulary for the visual arts: drawing, painting, sculpture, architecture, photography, the museum, and so on. Students will also learn beginning reading and writing skills.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L36 Ital 101D Elementary Italian in the Everyday World, Level I

This course stresses the rapid acquisition of spoken ability, with attention to the development of reading, writing, and listening skills through contextualized learning and engagement with culturally authentic materials. Designed for students with no prior knowledge of Italian or minimal experience in another Romance language.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L36 Ital 102D Elementary Italian in the Everyday World, Level II

Continuation of Ital 101D. This sequence stresses effective communication and the rapid acquisition of spoken ability with increased attention to the development of reading, writing, and listening skills. Prerequisite: Ital 101D or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L36 Ital 106D Accelerated Elementary Italian in the Everyday World, Level I

This course is designed especially for students with previous language study. It moves at an accelerated pace toward the acquisition of spoken ability, with attention to the development of reading, writing and listening skills through contextualized learning and engagement with culturally authentic materials.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L36 Ital 107D Accelerated Elementary Italian II

Continuation of Italian 106D. Designed for students whose previous study of French or Spanish enables them to grasp the principles and rules of Italian grammar more efficiently. Emphasis on all four language skills: speaking, listening, reading, writing. Prerequisite: Italian 106D or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: HUM

L36 Ital 201D Intermediate Italian in the Everyday World, Level III

This course aims for students to achieve intermediate proficiency in speaking, listening, reading, and writing. Focus is placed on vocabulary building and increased facility with Italian grammar through interactive exercises and the use of authentic materials, such as readings and videos. Regular compositions and exams as well as a final exam. Prerequisite: Ital 102D or higher.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L36 Ital 215 Conversation/Culture

This course examines popular culture through a focus on what is said and performed. The course consists of thematic units focusing on everyday occurrences and themes that mark the Italian experience, such as conversation in the Italian bar; poignant views of life expressed in films and other media; daily experiences depicted in poems and songs; public and private politics; the role of the meal in real life, art and literature. As students advance through each thematic module, they develop a creative project in which they put into practice (by a skit/presentation/text/art work) what they have learned. Prerequisite: Ital 102D or the equivalent.

Credit 3 units. A&S IQ: LCD BU: HUM

L36 Ital 216 Conversation

A continuation of Ital 215, this course emphasizes the development of speaking skills in Italian through study of aspects of contemporary Italian culture in particular art, music, film and politics.

Credit 2 units. BU: HUM

L36 Ital 247 First-Year Seminar: Italy's Invention of the Modern Museum

This course traces the development in Italy of what we know as the modern museum. Unfolding chronologically from the Renaissance to the current day, the course will examine the origins and rise of art, natural history, science, and national museums across the peninsula from Rome to Venice, Florence to Naples. We will study the establishment of the early public art museums epitomized by the Vatican Museums, the Uffizi Gallery, and the Capitoline Museums. We will examine the impact on national and cultural identity of Fascist propaganda museums instituted under Mussolini's regime, and we will conclude with an examination of extraordinary new museums in Italy, such as the interactive MUSME (Museum of Medicine) in Padua, and the MEIS (National Italian Judaism and Shoah Museum) in Ferrara. Art Curators, and Museum directors will visit our course.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: IS

L36 Ital 248 First-Year Seminar: Italian Literary Culture: Identity, Subjectivity, Audience

In this course we'll sample eight centuries of Italian literary culture by reading some of its greatest works. While familiarizing ourselves with key Italian authors (and some outliers); we'll also work to clarify our thinking about three problems: (1) identity (How does each work express an idea of "italianness"? What other elements of identity, such as gender or religion, are in play? Why do authors sometimes conceal their true identities by using a nom de plume?); (2) subjectivity (How does the author or narrator establish their place in the world?); (3) audience (For whom does the author write? Is the author's audience the same as the narrator's? How do authors make their writings available to others?). Authors studied include Boccaccio, Petrarch, Vasari, Galilei, Collodi, Ginzburg, Ferrante. Three short papers. Class conducted in English with readings in English.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH

L36 Ital 249 Refracted Light: How Others View Italy

Throughout the centuries Italy has both enjoyed and suffered the fascinated gaze of foreigners, who have written about it, painted it, made music and films about it. Drawing principally on prose writings from the 18th to the 20th centuries, in such varied genres as the short story, the novel, the mystery novel, travel writing and the memoir, this course examines the images of Italy that non-Italians project. Beyond learning about Italy, students consider their own "idea" of Italy, examine their own frame of reference and cultural biases, interrogate a variety of stereotypes, and ponder how well one can truly understand a place as an outsider or reader. Authors studied include Stendhal, Dickens, James, Forster and Mann, as well as such contemporary writers as Michael Dibdin and Shirley Hazzard. Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: HUM

L36 Ital 280 Sex in Italian Culture and Media

Credit 3 units. A&S IQ: HUM, LCD

L36 Ital 2991 Undergraduate Independent Study

Prerequisite: Ital 201D and permission of the department. No more than 6 units may be earned by a student.

Credit 3 units. A&S IQ: HUM EN: H

L36 Ital 301 Oral Communication I

Designed to offer students an opportunity to practice and refine their conversational skills while expanding their practical vocabulary. Wide variety of topics for discussion; brief oral reports. Regular homework assignments with emphasis on web-based research and learning. Prerequisite: Ital 201D.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L36 Ital 307D Advanced Italian in the Everyday World

This course aims at reinforcing and developing advanced grammar structures and writing abilities through the study of a variety of media centered around the theme of humor. Have you ever laughed . . . in Italian? Materials include literary excerpts, short stories, film, television clips, and songs. Our focus will be on grammar and syntax as the bases to understanding contemporary Italian humor. This course is essential for the further study of Italian language and literature; it must be taken before or concurrently with Ital 323C and Ital 324C. Prerequisite: Ital 201D or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L36 Ital 308D Grammar and Composition II

A continuation of Italian 307D, this course features advanced lessons in Italian syntax and vocabulary and an introduction to the analysis of poetry and theatrical texts, with the goal of improving both reading and writing in Italian. The basis of our work is a series of readings having a common theme, desire requited and unrequited. We think about what poets desire, how they give verbal expression to it, and how the success or failure of their pursuit informs their writing. Likewise we look at how playwrights exploit this theme as a plot device. Readings include poetry by Petrarch, Michelangelo, Tasso and Montale, as well as two comedies. Grammar exams and regular composition assignments; final exam. Essential for further study of Italian language and literature, this course must be taken concurrently with Italian 323C or 324C. Prerequisite: Ital 307D or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L36 Ital 309 Transmedia Italian Culture: Stories, Interpretation, Performance

This course examines contemporary Italian culture through a variety of genres and media, which may include short stories, graphic novels, blogs, zines, essays, news articles, podcasts, film, music, and so on. Strong emphasis will be placed on writing. Throughout the course, students will produce their own analyses of key questions defining Italian culture through the production of multimedia pieces that combine writing with such interpretive vehicles as film, music, and digital photography. This course is in Italian, and it aims to expand students' writing and analytical skills in Italian as well as their cultural competence. No final.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS

L36 Ital 310 Advanced Italian Grammar in Padua

This advanced Italian grammar course is taught every year in the Boston University program in Padua, Italy, with which Washington University is affiliated. The course allows students to further their mastery of Italian grammar and syntax, in order to achieve a level of full satisfaction of comprehension and active communication. Readings include newspaper articles and literary essays; students write brief compositions while taking weekly tests. Open only to Washington University students enrolled in the Padua, Italy, program with Boston University.

Credit 4 units. BU: HUM

L36 Ital 311 Introduction to Contemporary Italy

This course is taught every year in the Boston University program in Padua, Italy, with which Washington University is affiliated. The course focuses on refining students' ability to express themselves in Italian while presenting an overview of the history and society of contemporary Italy. Readings include works by authors who are particularly significant to Italian literature of the 20th century, as well as an array of other materials. Open only to Washington University students enrolled in the Padua, Italy, program with Boston University.

Credit 4 units.

L36 Ital 319 Advanced Conversational Italian

Designed to offer students with strong proficiency in Italian an opportunity to practice and refine their conversational skills through the study, rehearsal and performance of theatrical scenes or an Italian comedy from the repertoire of such chief literary figures as Machiavelli, Goldoni, Pirandello, Natalia Ginzburg and Dario Fo. Prerequisite: Ital 215 or placement by examination.

Credit 3 units. A&S IQ: LCD BU: HUM

L36 Ital 321 Independent Study

Credit variable, maximum 3 units.

L36 Ital 322 Topics

This course examines contemporary Italian culture through a variety of genres and media, which may include short stories, graphic novels, blogs, zines, essays, news articles, podcasts, film, music, and so on. Strong emphasis will be placed on writing. Throughout the course, students will produce their own analyses of key questions defining Italian culture through the production of multimedia pieces that combine writing with such interpretive vehicles as film, music, and digital photography.

Essential for further study of Italian language and literature, this course may be taken concurrently with Italian 307D, 323C or 324C. Prerequisite: Ital 201D or permission of instructor. In Italian.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L36 Ital 3221 Topics: The Jewish Experience in Italy

This course will examine the social and political history of the Jews of Italy from the period of Italian unification through the end of World War II. We will look through two different prisms: first, the constant of Jews' minority status in a Catholic country at a time when Church doctrine was hostile to them, and second, their changing status during significant moments in the brief history of the Italian monarchy. Under the latter rubric, we will study the rehabilitation of the Jews under liberal political philosophies, their problematic relationship with Fascism, and finally the arrival of the Holocaust in Italy and efforts to defend Jews against Nazi genocide. We will approach these topics wherever possible through primary texts, including essays, memoirs and novels. Reading knowledge of Italian is not required. Readings in English; some readings in Italian for Italian majors. Discussion in English. Prerequisite for Italian majors: Ital 307D; no prerequisite for students in other majors. Three five-page papers. Please note: The Ital 5221 cross-listing course is for graduate students only.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM, IS EN: H

L36 Ital 3224 Topics: From Basilisks to Botticelli: The Birth, Development and Politics of Museums in Italy

This course investigates the rise and cultural authority of museums in Italy from the Renaissance to the 20th century. The course unfolds chronologically, beginning with the distant precursors and etymological roots of the museum in ancient Alexandria and Rome. We trace the origins of the museum in the art collection and patronage that surged during the Renaissance, including the 16th- and 17th-century Curiosity Cabinet with its fossils, mythical basilisks, gems and weapons and church displays of religious and classical art. We will study the establishment during the Enlightenment in Italy of the first public art museums epitomized by the Vatican Museums, the Uffizi Gallery and the Capitoline Museums. We will conclude by examining the impact on national and cultural identity of Fascist propaganda museums instituted under Mussolini's regime. No prerequisites.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L36 Ital 323C Italian Literature 1: Genre and Gender in Italy, 1200-1600

This course traces the evolution of narrative and lyric genres in Italy from the late Middle Ages through the Renaissance, with a particular focus on men as writing subjects and the women they constitute as objects. We will focus on such topics as how male poets formed lyric communities, the conflicting dynamics of love and misogyny, and the notions of the real and the ideal in the representation of women. We will also look at how women writers both adapted to and wrote back at the dominant discourses of their time. Authors studied include Dante, Petrarch, Boccaccio, Lorenzo il Magnifico, Lucrezia Tornabuoni, Castiglione, and Veronica Franco. Prerequisite: Ital 201D. Previous or concurrent enrollment in Ital 307D or Ital 308D recommended.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L36 Ital 323W Italian Literature I — Writing-Intensive Seminar

Introductory survey of Italian literature from its beginnings in the Middle Ages through the late Renaissance. Analysis of the predominant genres: lyric, religious narrative, novella, treatise, chivalric epic. This is a writing-intensive version of the previously offered course Ital 323C. Prerequisite: Ital 201D. Previous or concurrent enrollment in Ital 307D or 308D recommended. Credit 3 units. A&S IQ: HUM, LCD, LS, WI BU: IS EN: H

L36 Ital 324C Italian Literature II: The Making of Modern Italy, Texts and Contexts

This course examines key political, social, cultural, and religious aspects of Italian life, from Galileo's condemnation in 1633 through the Risorgimento, Fascism, and the birth of the modern Republic up to the increasingly multicultural Italy of today. The overarching theme of this course is the pervading question of Italian identity, or *italianita*. We will study a variety of male and female native born and immigrant authors, visual artists, and cultural critics. Prerequisite: Italian 201D. Previous or concurrent enrollment in Ital 307D or Ital 308D recommended.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: IS EN: H

L36 Ital 327 History of the Italian Language

In this course we trace the evolution of Italian from its very earliest written manifestations to its increasing internationalization in the 20th and 21st centuries. We study the natural evolution of Italian up until the 16th century; its codification as a literary language during the 16th century; the debates over the institution of a national language that coincided with the unification of Italy in the 19th century; the recovery of dialects as literary languages in the 20th century; and the more recent incorporation of words and phrases originating outside of Italy. Along the way we come to understand the reasons why we study a particular form of Italian in school, and we consider the implications of these choices not only for our own learning but for Italian literature and its sense of nationhood.

Credit 3 units. A&S IQ: HUM, LCD, LS BU: IS EN: H

L36 Ital 332 Topics in Film Studies: Italian Cinema

This course studies the influence of film on Italian culture. We will consider the trajectory of Italian film from its origins to the present day. Specific areas of discussion may include cinema as a revolutionary aesthetic; mass culture versus high art; neorealism; literary adaptation; and cinema as political resistance and vehicle for social justice. The course will also work collaboratively with the Italian Film Fest of Saint Louis in the development of materials, class discussion, and student engagement. Two to three hours of film viewing plus three class hours are required per week. Taught in English.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: IS EN: H

L36 Ital 334 Topics in Italian Cinema

A companion to Ital 332, this course focuses on a select topic in the history of Italian cinema, such as the work of a single director or a significant cinematic movement. Course conducted in English. Italian majors read in Italian, others in English translation. Prerequisite for Italian majors: Ital 307D. Prerequisite for nonmajors: Ital 332, Film 220, or permission of instructor.

Credit 3 units. BU: IS

L36 Ital 350 Topics: Global Italy: Race, Gender, Migration and Citizenship

Traditionally represented as a land of emigrants and exiles from the south, 21st-century Italy has become the destination of many immigrants and a place of encounter of different cultures and races. In "Cara Italia" [Dear Italy], a rap hymn by the famous artist Ghali, Italy is both a dear and a contested space of belonging where many children of migrants feel both at home and out of place. Exploring the cultural and historical roots of this feeling, the course asks the following: What does it mean to culturally belong? Why are certain people denied the status of Italian citizens? What does it mean to be Black in Italy? How are interracial younger generations reshaping Italy and Italian-ness? This course is an introduction to cultural productions at the intersection of migration, race, gender, and citizenship in contemporary Italy. In the course, students will critically engage a variety of issues such as the relation between Italian colonialism and recent migration, border politics and civic mobilization, gender struggles and networking, xenophobia and racism, and social protests and activism. Although African migration and Italians of Afro-descent are at the core of the course, students will also explore representations by/of other migrant communities such as the Asian and the Albanian ones. The course will be conducted in English, and screenings will be in the original language with English subtitles.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: HUM, IS EN: H

L36 Ital 404 Senior Independent Study in Italian

Prerequisites: senior status; Ital 307D, 308D, 323C, 324C; and permission of instructor.
Credit 3 units.

L36 Ital 408 Disease, Madness, and Death Italian Style

Italian literary history teems with representations of illness, insanity, and death. From the ghastly 1348 plague that frames Boccaccio's "Decameron" to the midday madness of errant Renaissance knights and from 16th-century tales of poisoning and 19th-century Pirandellian madmen to the contemporary scourge of mafia killings, disease, madness, and death are dominant facts of reality, points of view, symbols, and cultural characteristics of Italian poetry and prose. This course undertakes a pathology of these tropes in Italian literary history and seeks to understand their meaning for the changing Italian cultural identity across time and the Italian peninsula. Students will read primary literary texts and view excerpts from films alongside the study of articles focused on the cultural history of medicine, religion, and criminal justice. Taught in English. No final.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: BA, IS EN: H

L36 Ital 428 The New Sicilian School

The unification of Italy in the mid-19th century led to the creation of a new "Sicilian School," the first since that of the court poets associated with Frederick II in the 13th century. These new Sicilian writers have given us many narrative masterpieces, focusing on common concerns such as the island's identity over two millennia and the impact of Italian nationalism; the rise of bourgeois culture and the decline of indigenous patriarchal structures; the rule of law and the role of the Mafia; and the politics of language. Authors studied include Verga, Pirandello, Vittorini, Brancati, Tomasi di Lampedusa and Sciascia. Course taught in Italian or English.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L36 Ital 430 Divergent Voices: Italian Women Writers

This course engages the fictional and political works of Italian women writers from the 17th century to the present day. We will read one of the acclaimed Neapolitan novels of Elena Ferrante, who is considered by many to be the most important Italian fiction writer of her generation. We will examine a cloistered Venetian nun's defiant 1654 indictment of the misogynist society that forced her into the convent. We will confront the reality of a woman writer who in 1901 was compelled to choose between her child and her literary career. Among other contemporary writers, we will study the humorous and radical feminist one-acts of playwright Franca Rame. Taught in English. No final.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD EN: H

L36 Ital 432 Divergent Voices: Italian Women Writers

This course examines select novels, poetry and political writings by such noted authors as Sibilla Aleramo, Dacia Maraini, Luisa Muraro and Anna Banti. Special attention is paid to the historical, political and cultural contexts that influenced authors and their work. Textual and critical analysis focuses on such issues as historical revisionism in women's writing, female subjectivity and the origins and development of contemporary Italian feminist thought and practice. Taught in English.

Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM

L36 Ital 433 Literature of the Italian Enlightenment

This course aims to explore the spectrum of intellectual and literary discourse of the Italian Enlightenment by examining a wide array of texts and genres. Readings include selections from Enlightenment and popular periodicals, scientific tracts on human anatomy, women's fashion magazines, the reformed theater of Carlo Goldoni, as well as Arcadian poetry, and literary criticism. We study the rise and characteristics of "coffee culture" during this age. We pay special attention to the "woman question," which stood at the center of 18th-century Italian intellectual discourse, and which was critical to the contemporary drive to define the enlightened nation-state. The class is conducted as a workshop in which students and instructor collaborate in the realization of course goals. Readings in Italian or English; discussion in English. Prerequisite: Ital 323C or Ital 324C.

Credit 3 units. Art: HUM

L36 Ital 437 Caffè, Cadavers, Comedy and Castrati: Italy in the Age of the Grand Tour

Taught in English. With French libertine philosopher the Marquis de Sade, German novelist Johann Wolfgang von Goethe, Romantic poet Lord Byron and other illustrious travelers of high birth and good fortune who sought finishing enrichment by making their Grand Tour to Italy from the mid-18th through the early 19th centuries, we explore the richness and variety of Italian life and culture as depicted by both Grand Tourists as well as their Italian interlocutors. Chief among our destinations are Venice, Bologna, Florence and Rome. Attractions typical of the early modern Tour circumscribe our journey. Coffee houses first appeared in the 18th century and, in ways strikingly similar to their function today, became the real and symbolic centers of social, intellectual and civil exchange. We explore 18th-century coffee culture through comedies and Enlightenment and popular journals that took them as their theme, as well as through a study of the coffee houses themselves, a number of which are still in existence. Theaters, concert halls, gaming houses, literary

and scientific academies, galleries, churches and universities are part of the standardized itinerary we follow. During the period, anatomy and physiology attained new legitimacy as crucial scientific disciplines and we visit both the anatomical theater at the University of Bologna, where the annual Carnival dissection took place, as well as the first museum of anatomy and obstetrics founded in the Bolognese Institute of Sciences in 1742 by Pope Benedict XIV. We visit archeological excavation sites, in particular Pompeii, first unearthed in 1748. Fashion, an obsessive preoccupation of the day, also is a point of interest in our travels. Through primary and recently published secondary sources we also encounter the remarkable authority of Italian women unmatched anywhere else in Europe at the time. Prerequisite: at least one 300-level literature course. Readings in Italian or English.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:

HUM EN: H

L36 Ital 456 Romance Philology

Study of the evolution of the major Romance languages from their common Latin origins. Knowledge of classical Latin not required, but acquaintance with phonetics of at least one Romance language extremely helpful. Conducted in English. Prerequisites: French 325 and French 326 or one of these courses and the equivalent Washington University transfer literature course from Toulouse or Paris. One-hour preceptorial for undergraduates.

Same as L34 French 456

Credit 3 units.

L36 Ital 462 Prose Writers of the 16th Century

With the triumph of the vernacular in 16th-century Italy, the peninsula bore witness not just to an outpouring of poetic works but to the arrival of some of the most important prose works in the Italian canon prior to the advent of the novel. In this course we'll conduct close readings of two treatises, Machiavelli's *Prince* and Castiglione's *Book of the Courtier*. We'll study these works for their linguistic and rhetorical features as well as their historical context and ideological content. We'll also consult some secondary readings to help us understand the place of each in the political and cultural landscape of Renaissance Italy. Readings in Italian or English; discussion in English.

Credit 3 units.

L36 Ital 473 Machiavelli and Guicciardini

The development of modern political science in 16th-century Italy. We address questions of both theory and methodology in Machiavelli's and Guicciardini's political visions. We also pay close attention to the Florentine context of their work, as well as to the influence of historical examples, both classical and contemporary, in the development of their analyses. Finally, we ask how the examples they set, and the theories they promulgate, can have resonance in addressing political questions in our own age. Readings in Italian or English; discussion in English.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L36 Ital 481 Dante

This course features an in-depth approach to Dante's "Inferno," the first, and in many ways the most famous, of the three parts of the "Divina Commedia." We'll study the structure of the poem as well as the structure of Dante's Hell, his verse form and use of the vernacular, his notion of sin and punishment and its relation to the theological traditions of which he is an

heir. Because so much of the poem is rooted in and extends Dante's autobiography — literary, sentimental, and political — we'll also read two other important texts by him, his early "Vita nuova" (New Life) and his political treatise, "Monarchy." Reading knowledge of Italian helpful but not required. Course conducted in English.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L36 Ital 483 Boccaccio: Decameron

The unrivaled master of late medieval Italian prose, Boccaccio is also a strikingly modern author whose works address such questions as the relationship between literature and history; God and man; storyteller and audience; gender, language and power; literature and truth. With these and other concerns in mind, we read his masterpiece, the *Decameron*, a collection of 100 tales set in the Black Plague of 1348. We then contrast it to his late *Corbaccio*, ostensibly a misogynist novel but a text that finally resists such a flattening judgment. Readings in Italian or English; discussion in English. Prerequisite: 3 units of literature.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L36 Ital 485 Ariosto: Orlando Furioso

A close reading of this Renaissance masterpiece with attention to questions of structure and sources, the themes of love and madness, the representation of court life. Readings in Italian or English; discussion in English.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM, IS

L36 Ital 491 Postmodernism

This course explores the complex significance of Italian Postmodernism through an examination of the theoretical arguments and literary works that have shaped the cultural and political debate of the past 50 years. Students study, among others, the critical theories of "open work" (Umberto Eco), "literature as lie" (Manganelli), and "weak thought" (Gianni Vattimo) that developed from the neo-avant-garde movement of the 1960s. Analysis focuses on the novels of four authors who have had a defining influence on Italian postmodern thought and narrative forms: Carlo Emilio Gadda, Italo Calvino, Luigi Malerba and Umberto Eco. Course conducted in English; Italian majors read in Italian, others in English translation. Prerequisite for Italian majors: Ital 307D or permission of instructor.

Credit 3 units.

L36 Ital 492 The Italian Detective Novel

The detective novel has an unusual and exceptionally brief history in Italy. Only within the past 35 years has an Italian version or, more precisely, subversion of the genre emerged and come to dominate the Italian literary scene. Prominent Italian writers such as Italo Calvino, Umberto Eco, Leonardo Sciascia and Luigi Malerba have deconstructed the conventions of the detective novel in order to portray the disorder and arbitrary meaning of the postmodern world. This course explores the history of the "anti-detective" novel in Italy and the philosophical and political questions the genre evokes. Readings in Italian and English. Conducted in English.

Credit 3 units. Art: HUM

L36 Ital 495 Senior Honors

Prerequisites: senior standing, at least one course at the 400 level, and acceptance into the Honors program.

Credit 3 units.

Japanese

The Department of East Asian Languages and Cultures (EALC) offers a major and minor in East Asian Languages and Cultures that allows cross-cultural and interdisciplinary approaches to the study of East Asia. Students can choose either to focus in one of our three linguistic and cultural traditions — Chinese, Japanese, and Korean — or to explore different traditions and societies by taking courses in multiple regions. Our major opens up career opportunities in diplomacy, business, law, journalism, and higher education, in addition to providing preparation for further study in the relevant languages and cultures. The major entails advanced training in the chosen language and a sound background in the respective literature and culture. Students are encouraged to enhance their cultural knowledge by enrolling in relevant courses offered through other departments and programs such as Anthropology, Art History, Film and Media Studies, History, Global Studies, Performing Arts, and Religious Studies.

For information about the major, please visit the EALC Majors page (p. 508).

For information about the minor, please visit the EALC Minors page (p. 509).

Language Placement: Placement tests are required for all students entering our language programs, with the exception of those students who have had no previous knowledge of the language and are planning to enroll during the first semester of the first year of instruction. Students who test into second-year Japanese and satisfactorily complete (with a grade of B- or better) at least one semester of language study may petition for 3 units of retroactive credit; students who test into third year or above and satisfactorily complete (with a grade of B- or better) at least one semester of language study may petition for 6 units of retroactive credit. Credit is limited to 3 units for those testing into second year and 6 units for those testing into third year or above. Please note that students with native language proficiency as determined by the Japanese language section, as well as students who enroll in courses below their placement level, are ineligible for retroactive credit units. Students who misrepresent their language proficiency so as to gain entrance to a course at the elementary or intermediate level will be dropped from that course.

L05 Japan 103D First-Level Modern Japanese I

An introduction to spoken Japanese following a systematic study of grammatical structures presented in context. Emphasis is on developing skills in oral communication through performance. Students with some previous Japanese language background must take the placement examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L05 Japan 104D First-Level Modern Japanese II

Continuation of Japan 103D. An introduction to spoken Japanese following a systematic study of grammatical structures presented in context. Emphasis is on developing skills in oral communication through performance. Prerequisite: L05 103D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L05 Japan 150 First-Year Seminar: Exploring East Asian Classics

This first-year seminar introduces students to major works of the Chinese, Korean, and Japanese traditions. Although written centuries in the past, these texts still reverberate with meaning today and offer important means to understand the often chaotic and confusing events occurring daily around us. What is the self? What is the relationship between the individual and society? How do we live an ethical life? What is literature and for whom is it intended? In grappling with these questions, we will directly engage with the texts through close reading and in-class discussion. We will, at the same time, also ask broader questions that concern how knowledge is produced, spread, and consumed: what is a canon? Who are the gatekeepers? What does it mean to approach East Asia through a set of "canonical" texts? Among the texts considered this term will be The Analects, Daojing, Lotus Sutra, Tale of Genji, Tales of the Heike, Tales of Moonlight and Rain, Samguk yusa, and Memoirs of Lady Hyegyong. This course is for first-year, non-transfer students only.

Same as L04 Chinese 150

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: BA EN: H

L05 Japan 213 Second-Level Modern Japanese I

Continued development of communication skills with special emphasis on speaking. Students develop reading/writing skills with an additional 300 kanji during the year. Prerequisite: L05 104D (grade of B- or better) or placement by examination. Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L05 Japan 214 Second-Level Modern Japanese II

Continuation of Japan 213. Continued development of communication skills with special emphasis on speaking. Students develop reading/writing skills with an additional 300 kanji during the year. Prerequisite: L05 213 (grade of B- or better) or placement by examination. Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L05 Japan 221 Topics in Japanese Literature and Culture

A topics course on Japanese literature and culture. Subject matter varies by semester; consult current semester listings for topic. Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L05 Japan 226C Japanese Civilization

The development of Japanese culture from antiquity to the present: an overview of Japanese cultural history, focusing on the interplay of crucial aspects of contemporary Japanese society and Japanese social psychology. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L05 Japan 280 Sophomore Seminar: The Public Servant and Other Heroes: A History of Japan through Film

This course is an examination of key turning points in Japan from the mid-19th century to the present. It focuses on the important role that bureaucracies, staffed by public servants, have played in shaping the political and social life on the archipelago and in the region. We will engage representations of political and social life in Japan by making use of its rich visual culture by viewing and discussing Japanese films. The assigned films, which will be screened in Japanese with English subtitles, will likely include *The Twilight Samurai*, *To Live*, and *Shin Godzilla*, among others. These films provide representations of how people in Japan have responded to crises, including revolution, war, and natural disasters. Through written and visual materials, students will gain a better understanding of history in Japan, public service, and the utility of film for engaging the past. Film screenings are mandatory. Same as L97 GS 280. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS

L05 Japan 294 Images of East Asia

A variety of topics offered individually which reflect the images of East Asian cultures. Same as L03 East Asia 294. Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L05 Japan 2980 Undergraduate Internship in Japanese

Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work.

Credit should correspond to actual time spent in work activities (e.g., eight to ten hours a week for thirteen or fourteen weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Credit/no credit only.

Credit variable, maximum 3 units.

L05 Japan 299 Independent Study

Prerequisite: Japan 213 and permission of the department. Credit variable, maximum 6 units.

L05 Japan 320C Japan Since 1868

For some, the word Japan evokes Hello Kitty, animated films, cartoons, and sushi. For others, it makes them think of the Nanjing Atrocity, "comfort women," the Bataan Death March, and problematic textbooks. Still others will think of woodblock prints, tea ceremonies, and cherry blossoms or perhaps of Sony Walkmans and Toyota automobiles. At the same time, still others may have no image of Japan at all. Tracing the story of Japan's transformations — from a preindustrial peasant society managed by samurai-bureaucrats into an expansionist nation-state and then into its current paradoxical guise of a peaceful nation of culture led by conservative nationalists — provides the means for deepening our understandings of historical change in one region and grappling with the methods and aims of the discipline of history.

Same as L22 History 320C

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L05 Japan 324 A User's Guide to Japanese Poetry

This course introduces the art and craft of Japanese poetry, one of the world's great literary traditions. Exploring the many styles of traditional verse — the poetic diary, linked verse, haiku and others — and their historical contexts, we gain insights into Japanese aesthetics and study the unique conventions of Japanese poetic production that have evolved over a span of some 1500 years. The course also incorporates a "haiku workshop," where we engage in group-centered poetry writing and critiquing. No prior knowledge of Japanese is required. Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L05 Japan 326 Samurai, Rebels and Bandits: The Japanese Period Film

Tales of heroism, crime, revolt and political intrigue. Bloody battles, betrayal, madness and flashing swords. This is the world of jidaigeki eiga, the Japanese period film. In this course, we analyze the complex (and often flamboyant) narrative, visual and thematic structures of films about the age of the samurai. We discuss jidaigeki representations of violence and masculinity, self-sacrifice and rebellion, and the invention of tradition as well as critical uses of history. In addition to the historical content of the films, we study the historical contexts that shaped jidaigeki film production and discuss relevant transformations in Japanese cinema and society. Period films have been shaped by and exert strong influences on Japanese theater, oral storytelling, popular literature, comics, and international film culture, all of which are helpful for understanding the films. As we track changes in jidaigeki style and subject matter, the course introduces theories for interpreting narrative structure, genre repetition and innovation, intertextuality, and representations of "the past." All readings are in English. No knowledge of Japanese required. No prerequisites. Required screenings Tuesdays at 7 p.m. Same as L53 Film 326

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L05 Japan 332C Japanese Literature: Beginnings to 19th Century

This survey of Japanese literature covers antiquity to the early 19th century. Emphasis on the ideological and cultural contexts for the emergence of a variety of traditions, including poetry, diaries, narrative, and theater. Fulfills premodern literature requirement for EALC degrees. No knowledge of Japanese language is required. Sophomore standing and above recommended.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L05 Japan 333C The Modern Voice in Japanese Literature

This survey explores the emerging modern voice in Japanese literature, with emphasis on prose fiction. After a brief introduction to earlier centuries, we focus on the short stories and novels of the 20th century. Among the authors considered are Natsume Soseki, Nagai Kafu, Tanizaki Jun'ichiro, and Nobel laureates Kawabata Yasunari and Oe Kenzaburo. Discussions center on issues of modernity, gender, and literary self-representation. Fulfills modern literature requirement for EALC degrees. No knowledge of Japanese language required. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L05 Japan 336 The Floating World in Japanese Literature

This survey of Japanese literature covers the 17th to the 19th century. Primary focus is on the Genroku era (1688-1703), which witnessed the growth of lively urban centers and the emergence of a robust literary voice. Emphasis on the ideological and cultural contexts for the development of a variety of new innovations in the genres of poetry (haiku), theater (kabuki and bunraku) and prose (kana zoshi). Recommended for both Japanese and Chinese majors. No knowledge of Japanese language is required. Sophomore standing and above recommended.

Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM

L05 Japan 3412 Japanese Art

Surveying the arts of Japan from prehistory to present, this course focuses especially on early modern, modern and contemporary art. Emphasizing painting, sculpture, architecture and print culture, the course also explores the tea ceremony, fashion, calligraphy, garden design and ceramics. Major course themes include collectors and collecting, relationships between artists and patrons, the role of political and military culture or art, contact with China, artistic responses to the West, and the effects of gender and social status on art.

Same as L01 Art-Arch 3412

Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM, IS EN: H

L05 Japan 346 Japanese Literature in Translation: Mystery Fiction

In this course we explore the tantalizing, thrilling, and sometimes macabre genre of mystery fiction in Japan. Emerging in the late 19th century, largely in response to the disruptions of industrialization, the mystery genre offered writers a way to make sense of a chaotic, unfamiliar world. The genre has also

allowed a means of social critique and radical experimentation. We consider the works of Edogawa Rampo, Matsumoto Seicho, Miyabe Miyuki, Kirino Natsuo, and others. All readings in English. No prior knowledge of Japanese required.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: IS EN: H UColl: CD

L05 Japan 3482 The Floating World of Japanese Prints

The relationship between Japanese printmaking and popular culture from 1600 to 1900. Woodblock and copperplate printmaking techniques, key masters, kabuki drama, pleasure quarters, fiction, travel, modernization will be explored. Prerequisite: L01 111, Intro to Asian Art, or background in printmaking or Japanese culture.

Same as L01 Art-Arch 3482

Credit 3 units. A&S IQ: HUM, LCD Art: AH, GFAH BU: HUM EN: H

L05 Japan 365 Topics in Modern Japanese Literature: Mirrors and Masks: Gender and Sexuality in Japanese Literature

This course will ask students to consider presentations of gender and sexuality in Japan throughout its literary history, beginning from its oldest and most foundational text, The Kojiki, and working up through modern literature, including pop culture such as manga and anime. Students will be asked to think critically across centuries by juxtaposing the ancient against the modern, and they will also be asked to critically consider terms like "homosexual," "male," "queer," and a plethora of others as they relate to cultures so temporally, spatially, and philosophically removed from contemporary English-speaking context. How do we conceive of gender across time? What about sexuality? What counts as "queer" in a society with differently structured norms and conceptions of gender and sexuality? What are the dangers of fetishizing the Other and who counts as the Other, especially when taken into consideration alongside popular Orientalist views of East Asia? This class and all readings will be conducted in English, but Japanese versions of applicable readings will also be available through the library.

Credit 3 units. A&S IQ: HUM, LCD BU: HUM

L05 Japan 390 EALC Seminar: East Asian Buddhism

This course traces the expansion of Buddhism from its origins in the Indian subcontinent through China, Korea and Japan, identifying both continuities and local developments as seen in the encounter/clash with preexisting traditions. We will adopt a multidisciplinary approach and explore the history, literature, philosophy, and practice of Buddhism in East Asia. Primary readings (all in English) are drawn from a wide range of genres - canonical scriptures, tale literature, hagiographic narratives, and archeological materials. We will also rely extensively on the rich visual and material heritage of Buddhism, looking at common iconographical motifs, popular deities and their many forms, and the ritual function of Buddhist objects in their respective contexts. This course is primarily for sophomores and juniors with a major or minor in the Department of East Asian Languages & Cultures. Other students may enroll with permission. No prior course work on Buddhism or East Asia is required.

Same as L81 EALC 3900

Credit 3 units. A&S IQ: HUM, LCD BU: ETH, HUM, IS EN: H

L05 Japan 412 Third-Level Modern Japanese I

Emphasis on further development of speaking, listening, reading, and writing skills. Prerequisite: L05 214 (grade of B- or better) or placement by examination. Credit: 4 units for undergraduate students, 3 units for graduate students.

Credit variable, maximum 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L05 Japan 413 Third-Level Modern Japanese II

Continuation of Japan 412. Emphasis on further development of speaking, listening, reading, and writing skills. Prerequisite: L05 412 (grade of B- or better) or placement by examination. Credit: 4 units for undergraduate students, 3 units for graduate students.

Credit variable, maximum 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L05 Japan 431 Renegades and Radicals: The Japanese New Wave

In 1960, the major studio Shochiku promoted a new crop of directors as the "Japanese New Wave" in response to declining theater attendance, a booming youth culture, and the international success of the French Nouvelle Vague. This course provides an introduction to those iconoclastic filmmakers, who went on to break with major studios and revolutionize oppositional filmmaking in Japan. We analyze the challenging politics and aesthetics of these confrontational films for what they tell us about Japan's modern history and cinema. The films provoke as well as entertain, providing trenchant (sometimes absurd) commentaries on postwar Japanese society and its transformations. Themes include: the legacy of WWII and Japanese imperialism; the student movement; juvenile delinquency; sexual liberation; and Tokyo subcultures. Directors include: Oshima Nagisa, Shinoda Masahiro, Terayama Shuji, Masumura Yasuzo, Suzuki Seijun, Matsumoto Toshio, and others. No knowledge of Japanese necessary. Mandatory weekly screening: Tuesdays at 7 p.m.

Same as L53 Film 431

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L05 Japan 443 Memory, Tears and Longing: East Asian Melodrama Film

Excessive emotion, unreasonable sacrifice, hidden truth, untimely knowledge, and forbidden desire — the power of melodrama and its moving representations have fueled the popularity of hundreds, if not thousands, of books, plays and films. Melodrama has variously been defined as a genre, a logic, an affect, and a mode, applied to diverse media, divergent cultural traditions, and different historical contexts. The course provides a survey of East Asian melodrama films — as well as films that challenge conventional definitions of melodrama — by pairing Japanese, Korean, and Chinese-language productions with key critical texts in melodrama studies. We will see classics such as *Tokyo Story*, *Two Stage Sisters*, and *The Housemaid*. We will examine melodrama's complex ties to modernity, tradition, and cultural transformation in East Asia; special emphasis will be placed on representations of the family, historical change, gender and sexuality. In addition to historical background and film studies concepts, we will also consider a range of approaches for thinking about the aesthetics and politics of emotion. No prerequisites. No prior knowledge of East Asian culture or language necessary. Mandatory weekly scheduled screening.

Same as L53 Film 443

Credit 3 units. A&S IQ: HUM, LCD EN: H

L05 Japan 445 Japanese Fiction: Meiji Women Writers (Writing-Intensive Seminar)

The Meiji Period (1868-1912) in Japan was a time of tumultuous change. During the era Japan made sweeping reforms to its government, educational system, and social structures. Meiji men were encouraged to "modernize" along Western lines, while women were expected to serve as "repositories of the past." Most women prized the elegant traditions and saw these as important markers of cultural identity. But not all were willing to completely abdicate their place in the modernizing impulse. This writing intensive course will examine these women's literary works, paying attention to the way they developed strategies to both "serve the nation" and find an outlet for their own creative voice. Works to consider include the short fiction of Higuchi Ichiyo, Shimizu Shikin, and Tamura Toshiko, the poetry of Yosano Akiko, the essays of Kishida Toshiko, and the translations of Wakamatsu Shizuko. All readings are available in English translation, and students need not be familiar with Japanese, although background in Japanese studies, women's studies, or literary studies will be helpful. This is a Writing-Intensive Seminar. Prerequisite: Junior level or above or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM EN: H

L05 Japan 4451 Topics in Modern Japanese Literature

A topics course on modern Japanese literature; subject matter varies by semester. Prerequisite: Junior level or above or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L05 Japan 446 The Japanese Theater

An investigation, using English materials, of the major developments and forms of the Japanese theater, from Noh and its antecedents to the rise of a modern drama. In this course we are less concerned with the performative aspects of theatrical arts (though these will be introduced via videos) than with the ways in which dramatic texts influenced and borrowed from the literary tradition. Readings from major theatrical texts, secondary studies on Japanese theater, and literary sources. Prerequisite: junior level or above or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD, SD Art: HUM EN: H

L05 Japan 448 Japanese Poetry

A comprehensive survey of Japanese poetry from the 8th century to the present day. Topics include the development of the great tradition of court poetry in the Heian period (ca. 800-1200) and its full flowering during the medieval period (ca. 1200-1600), the influence of the Zen aesthetic, the emergence of linked verse and haiku, and the transformation of the classical tradition with the advent of the modern era. All works will be read in English translation, although knowledge of Japanese will be useful. Graduate students and Japanese majors will be expected to read original materials extensively. Prerequisite: Junior level or above or permission of instructor.

Credit 3 units. Art: HUM

L05 Japan 4482 Japanese Prints: Courtesans, Actors and Travelers

Woodblock prints of the 18th and 19th centuries and their relationship to literature and popular culture. Topics include the life of the pleasure quarters, sexuality and the "erotic," parody, kabuki theater, and the representation of women. Prerequisite: 3 units in Japanese painting, or permission of instructor. Same as L01 Art-Arch 4482
Credit 3 units. A&S IQ: HUM Art: AH, HUM EN: H

L05 Japan 449 Modern Japanese Women Writers: Writing-Intensive Seminar

Japanese women have been scripted by Western (male) imagination as gentle, self-effacing creatures. From their (re)emergence in the late 19th century to their dominance in the late 20th, Japanese women writers have presented an image of their countrywomen as anything but demure. Struggling to define their voices against ever-shifting expectations and social contexts, the women they create in their fiction are valiant, if not at times violent. This course examines the various manifestations of the female image in female-authored modern Japanese fiction. Writers to be considered are Higuchi Ichiyo, Hirabayashi Taiko, Uno Chiyo, Enchi Fumiko, Yamada Eimi, and others. A selection of novels and shorter fiction will be available in English translation, and students need not be familiar with Japanese. Prior course work in literature/women's studies may be helpful. This is a Writing-Intensive Seminar. Prerequisite: Junior level or above or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD, SD, WI EN: H

L05 Japan 4491 Modern Japanese Women Writers

Japanese women have been scripted by Western (male) imagination as gentle, self-effacing creatures. From their (re)emergence in the late 19th century to their dominance in the late 20th, Japanese women writers have presented an image of their countrywomen as anything but demure. Struggling to define their voices against ever-shifting expectations and social contexts, the women they create in their fiction are valiant, if not at times violent. This course examines the various manifestations of the female image in female-authored modern Japanese fiction. Writers considered are Higuchi Ichiyo, Hirabayashi Taiko, Uno Chiyo, Enchi Fumiko, Yamada Eimi, and others. A selection of novels and shorter fiction are available in English translation, and students need not be familiar with Japanese. Prior course work in literature/women's studies may be helpful. Prerequisite: Junior level or above or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD, SD EN: H

L05 Japan 450 Masterworks of Early Japanese Literature: The Tale of Genji and its Afterlives

An intensive study of one of the central texts of classical Japanese literature. Selection of texts rotate among works including: The Tale of Genji, court diaries, poetry anthologies, Noh drama, The Tale of the Heike, setsuwa collections, and medieval memoirs. In addition to exploring the historical, literary, and cultural significance of the work from its genesis to the present age, students engage in a close reading of the text and an investigation of the primary theoretical issues and approaches associated with the work both in Japan and abroad. Prior knowledge of early Japanese literature or history is recommended. Texts will be read in English translation. Prerequisite: Junior level or above or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD EN: H

L05 Japan 458 Fourth-Level Modern Japanese I

Mastery of more sophisticated skills in spoken and written Japanese. Newspaper articles, editorials, essays, short stories, and so on, are selected for readings and discussions in accordance with the interests and needs of participating students. Prerequisite: L05 413 (grade of B- or better) or placement by examination.
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L05 Japan 459 Fourth-Level Modern Japanese II

Continuation of Japan 458. Mastery of more sophisticated skills in both spoken and written Japanese. Newspaper articles, editorials, essays, short stories, and so on, are selected for readings and discussions in accordance with the interests and needs of participating students. Required of all students desiring subsequent tutorial assistance from the department. Prerequisite: L05 458 (grade of B- or better) or placement by examination.
Credit variable, maximum 3 units. A&S IQ: LCD, LS EN: H

L05 Japan 460 Premodern Japanese I

Readings in classical literary texts using materials from standard modern annotated editions. Kambun introduced in second semester. Prerequisites or Corequisites: L05 412 and L05 413.
Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L05 Japan 461 Premodern Japanese II

A continuation of Japan 460. Readings in classical literary texts using materials from standard modern annotated editions as well as the introduction of skills necessary for reading original texts, including kambun and hentaigana. Prerequisite: L05 413 (or concurrent registration) or L05 460.
Credit 3 units. A&S IQ: LCD, LS EN: H

L05 Japan 464 Japanese Textual Analysis

This course introduces the advanced student of Japanese to a variety of prose narratives in the modern language. Readings, which include literary texts and topical essays on aspects of Japanese society and culture, reflect the needs and interests of the enrolled students. Focus is on close reading and syntactic analysis of the selected texts. Regular translation exercises gauge the mastery of grammar, syntax, and idiomatic usages. All readings are in Japanese, with class discussion conducted predominantly in English. A final translation project, to be chosen by the student in consultation with the instructor, is required. Prerequisite: Permission of instructor.
Credit 3 units. A&S IQ: LCD EN: H

L05 Japan 471 Topics in Japanese Culture

A topics course on Japanese culture; topics vary by semester. Same as L03 East Asia 471
Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L05 Japan 486 Independent Work for Senior Honors

This course is taken in the fall semester. Prerequisites: senior standing, eligibility for honors, and permission of the department.
Credit 3 units.

L05 Japan 487 Independent Work for Senior Honors

This course is taken in the spring semester. Prerequisites: senior standing, eligibility for honors, and permission of the department.

Credit 3 units.

L05 Japan 491 Topics in Japanese Literature & History:

A topics course on Japanese literature and history. Subject matter varies by semester; consult current semester listings for topic. Prerequisite: junior level or above or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L05 Japan 4911 Modern Japan and the Invention of Tradition

A discourse of "uniqueness" has been a prominent feature of Japanese culture in the 20th century, both before and after the Pacific War. This course explores the domain of nativist expression in modern Japan. While focusing on literary texts by writers such as Kawabata and Tanizaki, we also consider a range of artistic, cinematic, and cultural production. Considerable attention is paid to "Nihonjinron," an important — and best-selling — genre of "Japanese uniqueness" writing. Our goal is to make sense of the complex intersection of traditionalism and modernism in 20th-century Japan, and to consider the larger question of modern nationhood and the construction of national identity.

Same as L03 East Asia 4911

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:

HUM, IS EN: H

L05 Japan 499 Guided Readings in Japanese

Course usually taken after successful completion of Japan 459. May be repeated once. Prerequisite: Senior or graduate level or permission of instructor.

Credit variable, maximum 3 units.

Jewish, Islamic, and Middle Eastern Studies

Jewish, Islamic, and Middle Eastern Studies is an academic department, unique in North America, in which Jewish studies, Islamic studies, and Middle Eastern studies are integrated. It is an interdisciplinary department that motivates students to explore the historical experience; the literary, religious, and cultural expression; and the political and material life of Jewish, Islamic, and Middle Eastern civilizations. Whether students favor the study of language, literature, religion, history, or politics, they will find in our courses a way to deepen their appreciation and understanding of these complex and diverse societies and cultures. Students will also be inspired to explore the interaction of Jews and Muslims with neighboring societies and cultures in the Middle East, Europe, North Africa, and other parts of the world.

Our majors and minors have gone on to do many things after graduation. Many have entered professional schools in such fields as law, government, journalism, international affairs, education, the rabbinate or ministry, and communal or social work. Others have gone on to do graduate work in either Jewish, Islamic, or Middle Eastern studies or related disciplines. Still others have combined their interest in Jewish,

Islamic, and Middle Eastern Studies with careers in business, medicine, or scientific research. All have found the major to be an intellectually and emotionally rewarding experience and an important component of their overall development.

The goals of the department are as follows:

1. Convey an appreciation for the complexities, depth, diversity, and cultural richness of Jewish and Islamic civilizations in their historical context, from antiquity to the present.
2. Explore the interaction of Jewish, Islamic, and other Middle Eastern societies and cultures with neighboring peoples both within and outside the Middle East.
3. Encourage the mastery of the primary languages and literatures in which Jews and Muslims have expressed their cultures.
4. Prepare students for graduate or professional studies in these or related fields.

Majors

The Major in Jewish, Islamic, and Middle Eastern Studies

Total units required: 24 advanced, in addition to prerequisites

Students who wish to major in Jewish, Islamic, and Middle Eastern Studies will select one of two tracks: **Comparative Jewish and Islamic Studies** or **Modern Middle Eastern Studies**.

Prerequisites for Both Tracks

- 100- and 200-level language (Arabic or Hebrew), by course work or by placement. (A student who skips the first four semesters of Arabic courses by placement must successfully complete Arab 3075 Third-Level Arabic I. A student who skips the first four semesters of Hebrew courses by placement must successfully complete HBRW 320D Third-Level Modern Hebrew I or HBRW 384 Introduction to Biblical Hebrew. Students who complete the third-level language course with a grade of B- or better will receive 6 units of back credit.)
- JIMES 210C Introduction to Islamic Civilization and JIMES 208F Introduction to Jewish Civilization: History and Identity. (Students with substantial prior course work may substitute an additional upper-level course with permission of their advisor and the director of undergraduate studies.)

Comparative Jewish and Islamic Studies Track Requirements

- At least 3 credits in 300- and 400-level Jewish studies or Hebrew literature courses
- At least 3 credits in 300- and 400-level Islamic studies or Arabic literature courses
- 15 credits in 300- and 400-level JIMES courses, distributed as the student wishes
- 3 credits in the departmental capstone course to be taken during the senior year. (Students may take this course during their junior year with permission of their advisor and the director of undergraduate studies.)

Modern Middle Eastern Studies Track Requirements

- 15 credits in 300- and 400-level JIMES courses, distributed as the student wishes
- 3 to 6 credits in 300- and 400-level courses that are pertinent to the modern Middle East that may be home-based outside of the department (i.e., home-based in Anthropology, History, International and Area Studies, Political Science, Religious Studies, and so on)
- At least 3 credits in 300- and 400-level premodern Middle Eastern studies courses
- 3 credits in the departmental capstone course to be taken during the senior year. (Students may take this course during their junior year with permission of their advisor and the director of undergraduate studies.)

Additional Information

Students enrolled in preapproved Washington University study abroad programs during the regular academic semester can earn a maximum of 9 credits subject to review by their advisor and the director of undergraduate studies. Summer programs and transfer courses can be granted as many as 6 credits subject to review by the student's advisor and the director of undergraduate studies. A limit of 9 credits in total can be applied to the major, whether the credits are earned in study abroad or summer programs or via transfer credit. For more information about preapproved study abroad programs, please visit the Jewish, Islamic, and Middle Eastern Studies Study Abroad Programs website (<https://jimes.wustl.edu/studyabroad/>).

Students must maintain an average of B in all courses for the major. A grade of B- or higher must be earned in each language course in order to advance to the next level.

No course taken pass/fail can count toward the prerequisites or the major.

A student may request credit for courses taken outside of the department (other than those that are cross-listed) by seeking the permission of the director of undergraduate studies and the department chair.

To be eligible to write a senior thesis, a student must maintain a grade-point average of 3.65 through the sixth semester. Senior thesis writers should sign up for an appropriate 3-credit course during both the fall and spring semesters. (The 6 credits from these courses can be applied to the primary area of study.)

Minors

For information about the minor in Arabic, please visit the Arabic (p. 330) page of this *Bulletin*.

For information about the minor in Hebrew, please visit the Hebrew (p. 707) page of this *Bulletin*.

For information about the minor in South Asian Studies (Hindi), please visit the Hindi (p. 713) page of this *Bulletin*.

The Minor in Jewish, Islamic, and Middle Eastern Studies

The minor in Jewish, Islamic, and Middle Eastern studies requires a minimum of 9 units at the 300 level or above and a minimum of 18 total units. Students who wish to minor in Jewish, Islamic, and Middle Eastern studies will select one of two tracks: the **Comparative Jewish and Islamic Studies Track** or the **Middle Eastern Studies Track**.

Total units required: 18

Comparative Jewish and Islamic Studies Track Requirements

Required Foundational Course:

Choose one of the following courses:

- JIMES 210C Introduction to Islamic Civilization
- JIMES 208F Introduction to Jewish Civilization: History and Identity

Electives:

- 6 credits in 300- or 400-level Islamic studies or Arabic language and literature courses (under L49 Arabic or L75 JIMES)
- 6 credits in 300- or 400-level Jewish studies or Hebrew language and literature courses (under L74 Hebrew or L75 JIMES)
- 3 credits of JIMES courses at any level (L75 JIMES courses only; this does not include language courses)

Middle Eastern Studies Track Requirements

Required Foundational Course:

Choose one of the following courses:

- JIMES 210C Introduction to Islamic Civilization
- JIMES 208F Introduction to Jewish Civilization: History and Identity

Electives:

- 3 credits at any level in Middle Eastern Studies courses (L75 JIMES)
- 12 credits of 300- or 400-level Middle Eastern Studies courses (L75 JIMES)

Additional Information

- **Study Abroad:** Students enrolled in preapproved Washington University study abroad programs during the regular academic semester, in summer programs, and in transfer courses can earn a maximum of 3 units subject to review by their advisor and the director of undergraduate study.
- **Grades:** A grade of B- or higher must be earned in each language course in order to advance to the next level.
- **Pass/Fail:** No course taken pass/fail can count toward the minor.
- **Courses Taught Outside of JIMES:** A student may request credit for courses taken outside of the department (other than those that are cross-listed) by seeking the permission of the director of undergraduate studies and the department chair.

L75 JIMES 105D Beginning Modern Hebrew I

For the student with no knowledge of Hebrew. Students with background in Hebrew are required to take the placement exam. Foundation for modern conversational Hebrew. Skills for writing and speaking introduced.

Same as L74 HBRW 105D

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 106D Beginning Modern Hebrew II

Foundation for modern conversational Hebrew. Skills for writing and speaking introduced. PREREQ: Grade of B- or better in L74 105D Beginning Modern Hebrew I or placement by examination. Same as L74 HBRW 106D

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 107D Beginning Arabic I

Introduction to modern Arabic; concentrates on rapidly developing basic skills in reading, writing, speaking, and understanding. Students with previous Arabic language background must take a placement examination. Same as L49 Arab 107D

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 108 Modern Hebrew for Arabic Speakers

Same as L74 HBRW 108

Credit 3 units. A&S IQ: LCD, LS BU: HUM

L75 JIMES 108D Beginning Arabic II

Continuation of Beginning Arabic I. Emphasis on enhancing skills in reading, writing, speaking, and aural comprehension of modern Arabic. PREREQ: Grade of B- or better in L49 107D Beginning Arabic I or placement by examination. Same as L49 Arab 108D
Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 111D Beginning Hindi I

An introduction to the most widely spoken language of South Asia. The aim of this course is to achieve proficiency in spoken comprehension, and to enable the student to acquire the major language skills--listening, speaking, reading, and writing. A standard text, web-based materials, a reader prepared by the instructor, as well as audio materials are used, with equal emphasis on both spoken and written Hindi. The language presented in the course is colloquial. The Hindi (Devanagari) script will be taught as part of the same class. Please note: There are no prerequisites (no previous knowledge of Hindi is required). Students with some previous Hindi language background must take a placement examination. Same as L73 Hindi 111D
Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 112D Beginning Hindi II

Continuation of Beginning Hindi I. This course is devoted to the further development of basic skills -- listening, speaking, reading, and writing -- with a particular emphasis on the acquisition of speaking proficiency. Prerequisite: Grade of B- or better in L73 111D or placement by examination. Same as L73 Hindi 112D
Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 150 First-Year Urdu I

This course covers all five skills -- reading, writing, listening, speaking, cultural competency -- for beginning students. Starting with the Nastaliq script and simple greetings, we will then cover the basics of Urdu grammar while building vocabulary. The course will be conducted in Urdu. Same as L73 Hindi 150
Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 151 First-Year Urdu II

This course is a continuation of the first semester of First-Year Urdu I. It is devoted to the further development of basic skills -- listening, speaking, reading and writing -- with a particular emphasis on the acquisition of speaking proficiency. Training in spoken Urdu emphasizes speaking and listening at normal speed with near native pronunciation and intonation. Prerequisite: Grade of B- or better in L73 150 First-Year Urdu I or placement by examination. Same as L73 Hindi 151
Credit 5 units. A&S IQ: LCD, LS BU: HUM

L75 JIMES 1771 First-Year Seminar: The Exodus in the Jewish Experience

This course will investigate how the Exodus has been, and continues to be, a crucial source of identity for both Jews and Judaism. We will explore how the Exodus has functioned as the primary model from which Jews have created historical self-

understanding and theological meaning. We will investigate how and why this story continues to be vital to Jews throughout the unfolding of the Jewish experience. How does the Exodus remain pertinent? How has the Exodus been re-imagined multiple times throughout the history of Judaism? Why has the Passover celebration been transformed radically in different Jewish communities? We will analyze many types of expression: historical sources, liturgy, art, commentaries, theology, literature, film, mysticism, and music.
Credit 3 units. A&S IQ: HUM BU: IS EN: H

L75 JIMES 179 First-Year Seminar: Midrash: The Imaginative Interpretation of Biblical Texts

The aim of this course is to introduce students to Midrash, the highly fascinating literature of Rabbinic Biblical interpretation. Among the topics to be studied are: How did the classical Rabbis read the Bible? What is the relationship between the plain meaning of the Biblical text and the polyphone interpretations of Midrash? How can numerous, at times even contradictory interpretations of the same verse coexist? What is the function of imaginative narratives, parables, and folklore in Midrash? Initially the Midrashic logic may seem elusive from the viewpoint of a modern Western reader, in turn its creative thinking will prove to be smart, playful, at times even slippery, and yet substantial. Addressing the literary, historical, and cultural context in which Rabbinic Midrash developed, we will get to know a variety of Midrashic collections and styles covering a time span from late antiquity to the Middle Ages. All primary sources will be read in translation. Throughout the semester we will devote time to discussing practical questions such as how to use the Library's catalogue and (electronic) reference sources, as well as techniques for structuring and writing students' essays.
Credit 3 units. A&S: FYS A&S IQ: HUM BU: ETH EN: H

L75 JIMES 180 First-Year Seminar: Jewcy: Jewish Culture in the 21st Century

This course will examine cultural expressions of American Jewish identity within an ethnographic context. We will analyze processes of assimilation, Americanization, and innovation, as well as Jewish contributions to popular American culture and entertainment, from Irving Berlin to Madonna, and the 'The Joys of Yiddish' to 'jewlicious.com.' Moving from tradition to modernity, pluralism and transdenominationalism and back to tradition (sometimes with a vengeance) we explore challenges to Jewish identity and creative responses through the cultural lens. Course is for first-year, non-transfer students only.
Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM BU: BA EN: H

L75 JIMES 188 Beginning Coptic I

This course provides an introduction to the Coptic language in the Sahidic (southern) dialect. Coptic was the vernacular language spoken and written in Egypt during the Roman, Byzantine, and Arab periods (until about 1300 CE) and as such is important for studying the history of premodern Egypt. It preserves some of the oldest known translations of the Bible, many apocryphal and "heretical" books that illustrate the wide diversity of ancient Christianity (e.g., the Gospels of Thomas and Mary), as well as sermons, saints' lives, monastic instructions, and liturgical manuals that still constitute the literary culture of the Coptic Orthodox Church today. In addition, a plethora of "magical" papyri illustrate medical and religious practices; personal letters reveal the lives of everyday people; and troves of business documents (e.g., contracts, wills, governmental

petitions, receipts) have proved important for understanding Roman and Byzantine economies. Because Roman Egypt was a highly bilingual society, there are even instances of Classical Greek literature translated into Coptic (e.g., selections of Homer and Plato), and these offer a unique witness to how such texts were received by Egyptians. The goal of this course is to cover 15 of the 20 lessons in the grammar book. The remainder will be covered in the second level of this course.

Same as L08 Classics 188

Credit 4 units. A&S IQ: HUM, LCD BU: HUM EN: H

L75 JIMES 189 Beginning Coptic II

After completing the remaining grammar lessons from Beginning Coptic I, we will build skill and confidence as translators by reading selections from a variety of Coptic texts: the Sahidic Gospel of Mark, the hagiographic "Life of John the Monk," selections from the Gospels of Mary and Thomas, and a unique Coptic translation of Plato's "Republic." In our readings from the Bible and Plato, those who read Classical Greek will also have the opportunity to study how ancient translators chose to render the Greek texts into Egyptian, and how, in the process of translation, they changed the meaning of the originals.

Prerequisite: Classics 188 or permission of instructor.

Same as L08 Classics 189

Credit 4 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:

L75 JIMES 200 Internship

For students with at least one course in Jewish and Near Eastern Studies who wish to do an internship. Prerequisite: permission of the director of the program. A "learning agreement" must be submitted and approved prior to beginning internship work.

Credit variable, maximum 3 units.

L75 JIMES 200A Doctors and Terrorists: The Fictions of South Asian America

South Asians have always played an integral role in the culture, history and politics of the United States. However, for complex reasons, their presence has either been concealed, or dismissed through dangerous stereotypes, or just as inaccurately, excessively celebrated for proving the generosity of American liberalism and multiculturalism. Racially misrecognized, this large and heterogeneous group has nonetheless shaped American categories of race, sexuality, and citizenship in intriguing and powerful ways. South Asian Americans have reached to fiction, music and popular culture to craft deeply intimate and original assessments of mainstream desires. In doing so they have sought to resist the dictates of whiteness, to question US imperialism, to garner acceptance and mobility, to build solidarity with other US minorities. In this course we learn about the complex history and cultural productions of South Asians in America. How did "South Asia" become a category of identification, and who benefitted from that designation? What role have South Asians played in the economic, cultural and global ascendancy of the United States? How do South Asians connect with, and control, their countries of origin? Why do discourses of sex and intimacy rise to the surface in this history, and what is the significance of story-telling in building the archive and questioning the fiction of South Asian America? Course enrollment is limited to first-year and sophomore students.

L75 JIMES 201 Intermediate Hindi I

Continuation of Beginning Hindi II. This course is designed to further develop skills in speaking and reading comprehension. Emphasis is given especially to communicative skill development, which involves the use of language in various sociocultural contexts. Prerequisite: Grade of B- or better in L73 112D or placement by examination.

Same as L73 Hindi 201

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 202 Intermediate Hindi II

Continuation of Intermediate Hindi I. In this course, special emphasis is given especially to communicative skill development, which involves the use of language in various sociocultural contexts. It is designed to further develop skills in speaking and reading comprehension. Students engage in multiple activities such as role-playing, debate, and discussion to enhance their spoken language skills. A standard text, web-based materials, a reader prepared by the instructor, and audio and visual materials are used. Prerequisite: Grade of B- or better in L73 201 or placement by examination.

Same as L73 Hindi 202

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 207D Intermediate Arabic I

This course involves the study of the grammar of literary Arabic, the reading of annotated classical and modern prose texts, elementary composition, and practice in speaking and comprehending modern Arabic. Prerequisite: Grade of B- or better in L49 108D or placement by examination.

Same as L49 Arab 207D

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 208D Intermediate Arabic II

Continuation of Intermediate Arabic I. Topics include the study of the grammar of literary Arabic, the reading of annotated classical and modern prose texts, elementary composition, and practice in speaking and comprehending modern Arabic. Prerequisite: Grade of B- or better in L49 207D or placement by examination.

Same as L49 Arab 208D

L75 JIMES 208F Introduction to Jewish Civilization: History and Identity

The anthropologist Clifford Geertz once famously invoked Max Weber in writing that "man is an animal suspended in webs of significance he himself has spun. I take culture to be those webs." The main goal of this course—designed as an introduction to Jewish history, culture, and society—will be to investigate the "webs of significance" produced by Jewish societies and individuals, in a select number of historical periods, both as responses to historical circumstances and as expressions of Jewish identity. Over the course of the semester we will focus on the following historical settings: 7th century BCE Judah and the Babylonian exile; pre-Islamic Palestine and Babylonia (the period of the Mishnah and the Talmud); Europe in the period of the Crusades; Islamic and Christian Spain; Europe in the 18th and 19th centuries; North America in the 20th century; and the modern State of Israel. For each period we will investigate the social and political conditions of Jewish life; identify the major

texts that Jews possessed, studied, and produced; determine the non-Jewish influences on their attitudes and aspirations; and the explore the efforts that Jews made to define what it meant to be part of a Jewish collective.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, IS EN: H

L75 JIMES 2091 Scriptures and Cultural Traditions

When we think of the word "scripture" in antiquity, we might think of the texts that have been compiled in the different holy books that we currently have today. Yet the function of "scriptures" within a community, and the status given to different texts treated as "scriptural," has changed in different times and places. In this course, we will consider texts that would eventually come to be part of the Hebrew Bible, New Testament, and the Qu'ran as well as several of the exegetes and reading communities that shaped their various interpretations. We will explore how non-canonical sources played a role in the formation of the various canons we have today, comparing the authoritative status given to these texts to that given to other works from antiquity, such as the epics of Homer. Special attention will be played to the role of the receiving community in the development of "scripture," and the variety of the contexts in which scripture can function in the construction of and opposition to religious authority.

L75 JIMES 2157 First-Year Seminar: The Meaning of Pakistan: History, Culture, Art

Pakistan is the second largest Muslim nation and the sixth most populous country in the world. First imagined as an anti-majoritarian and anti-imperial idea, the nation came to be split between East and West Pakistan, with a hostile Indian nation dividing the country. The subsequent emergence of Bangladesh, from within, exposed the complexities of U.S. imperial and Indian power, colonialism, identity, ethnicity, race, nationalism and repression. More recently, the War on Terror has once again exploited the ethnic and cultural conflicts produced by world histories of power and resistance. The events of the past two hundred years have undoubtedly and violently exacerbated the politicization of social and cultural identities. This course situates Pakistan in the context of pre-colonial social formations, British colonialism, internal colonialism, U.S. imperialism, the Cold War, Soviet interests, Indian regional hegemony and then turns to the powerful and diverse struggles launched by its own citizens against these external forces. How did successive empires construct and politicize social identities, and how did people contest and adapt these? How did caste, gender, race and religion shape empire and anti-imperial histories? Our sources will be historical, ethnographic, and literary. We will cover topics such as colonial fantasies, decolonization, the political uses of social categories of tribe, caste, language and gender, the political economy of militarism, terrorism, "development," activism, diasporic formations, poetry, music and art. The course will deepen our collective understanding of a critical series of developments in world history. Just as crucially, we will build a framework within which to address the stereotypes about Pakistan that dominate popular and media discourses today.

L75 JIMES 240 Representations of the Holocaust in Literature and Film

As the Holocaust recedes into the historical past, our knowledge of the event becomes increasingly dominated by literary and cinematic representations of it. This course focuses on such depictions of the Holocaust in literature and film and raises a number of provocative questions: What does it mean to represent the horror of the Holocaust? Can one effectively depict the event in realistic terms, or do unrealistic representations work better? What happens to the history of the Holocaust when it becomes the subject of a fictional text? Who is authorized to speak for the victims? Are representations of perpetrators appropriate? What types of representations will help us to

remember the Holocaust in the 21st century? We will grapple with these challenging questions by examining both literary texts by American, European and Israeli authors from a range of genres, including survivor memoirs, fictional narratives, a graphic novel, drama and poetry, and a number of films that depict the Holocaust.

Credit 3 units. A&S IQ: HUM BU: BA, HUM EN: H

L75 JIMES 2400 Jewish Political Thought

This course uses the concepts of political theory to explore the diverse Jewish political tradition. While this tradition includes writing from and about the three historical periods of Jewish self-rule (including the modern state of Israel), most of the Jewish political tradition comes from the understanding of politics as viewed from outsiders to mainstream communities. Additionally, Jewish political thought can be found through a Jewish community's self-understanding based on its interpretation of Jewish text and law by which it bound itself. Because we span over 2,000 years of recorded history, we will not attempt to discern a single "Jewish political thought" but rather look at JPT through the lens of familiar concepts of political theory. The fundamental questions we will explore are the relationship of the Jewish tradition to concepts such as authority, law, consent, sovereignty, and justice. We will ask how the Jewish tradition views government and the relationship between the authority of God and the authority of temporal powers. We will explore these questions through a range of materials that include both primary and secondary literature.

L75 JIMES 2401 First-Year Seminar: Sex and the Bible

What does the Bible say about sex and sexual desire? Gender and gender identity? Bodies and bodily pleasure? This class critically examines sex, gender, and sexuality as they are constructed in the Bible. We will consider biblical ideas of sexuality and desire, laws regulating sex and the body, homoeroticism and homosexuality, trans representation, the portrayal of women, and queer characters and moments in the Bible. We will also explore how key biblical texts about gender and sexuality (Adam and Eve, Sodom and Gomorrah, the Whore of Babylon, etc) have been interpreted over time. Our methods of interpretation will include feminist, womanist, postcolonial, queer, and trans reading strategies; biblical texts will come from both the Hebrew Bible and the New Testament. This class is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD, SC BU: BA, ETH EN: H

L75 JIMES 250 Zionism

Zionism is often thought of as a commitment to the principle that the Jewish People, as a distinct "people," has a right to self-determination in its own historical land of the biblical Palestine. Yet the history of the term and the set of ideologies show a much more complex understanding. In this course we trace the emergence of a number of different "Zionisms" that would lead to the creation of the modern state of Israel. And we explore how the political principles at the core of these ideologies have fared in the 65 years since the founding of the modern Jewish state. The course is at its heart applied political theory: a case study

of the way that ideas emerge from historical events, take on a life of their own, and then shape real outcomes in the world. The readings will weave together history, philosophy, literature and government.

L75 JIMES 263 Democracies & Dictatorships in the Middle East

What makes a country a democracy? A dictatorship? How do we know? In this course, we take a comparative approach toward the regimes of the Middle East and North Africa in order to critically examine the history, politics, religions, demographics, and economies of different case studies. Students will learn to identify key characteristics of contemporary governments of prominent Middle Eastern countries, the extent to which they can be called democratic, and the different degrees and nuances of authoritarianism. With the 2011 Arab Spring and its aftermath in mind, students will also explore academic debates over why regimes do, or do not, respond to popular pressure for change as they continually adapt and upgrade their capacities to remain in power.

Credit 3 units. A&S IQ: HUM, LCD

L75 JIMES 285 Islam in America

Muslims have long been an embedded part of American culture since their forced arrival through the Transatlantic slave trade and later waves of immigration throughout the 18th-21st centuries from various regions. In this course, we attend to the history of Islam in the U.S. and analyze the heterogeneity of American Muslim experiences across race, ethnicity, and gender. We consider how American Muslims both shape and are shaped by U.S. society as autonomous religious actors and as a marginalized outgroup.

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

L75 JIMES 288 Muslims in the Media and Popular Culture

In the post 9/11 context of the United States, Muslims have been a constant presence in news media, typically cast in a negative light as political others who are backwards, threatening, and inherently prone to violence. This pattern has long been replicated in films in which Muslims serve as static and dehumanized perpetrators of violence and/or as symbols of a backwards and depraved culture, antithetical to U.S. values and interests. In recent years, however, Muslims have become increasingly visible in the entertainment industry as protagonists and producers of their own media, including G. Willow Wilson's "Ms. Marvel," Hulu's "Ramy," and Netflix's "Man Like Mobeen." This course explores a selection of recent media projects created by Muslim writers, actors, musicians, and comedians. We will be pairing films, television shows, music, and comics with scholarship on Islam and religion in the media to analyze Muslim representation and storytelling in contemporary popular culture. We will evaluate these works on their own terms, noting the ways in which gender and racial hierarchies dictate who gets to represent American Muslims while also assessing how these new media both disrupt and further reify Muslims' construction as religious and political outsiders.

Same as L57 RelPol 288

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, ETH

L75 JIMES 290 Islamophobia & U.S. Politics

The presence of Muslim minorities in the West is increasingly divisive as political leaders appeal to voters' fear of the 'Other' to promote Islamophobic agendas that reshape immigration and asylum policies and redefine Western identity as Christian. Politicians further exploit the rise of extremist groups like ISIS to justify anti-Muslim rhetoric and critique multiculturalism, claiming that Islam and the West are inherently antithetical. In this course we examine the phenomenon of Islamophobia as a form of anti-Muslim racism that parallels hostility towards other religious and racial minorities in the US. We explore how while the post-9/11 context gave way to an increase in incidents of anti-Muslim violence, contemporary manifestations of Islamophobia are deeply rooted in state level anti-black racism from the early twentieth century, as well as in anti-Muslim attitudes that date back to the colonial period. By examining academic literature, political speeches, and news media sources, we situate Islamophobia within its historical context and also analyze how US anxieties about Islam and Muslims are not only gendered and racialized, but also exist across the political spectrum.

L75 JIMES 300 Introduction to the Hebrew Bible/Old Testament

The Hebrew Bible is the foundational text of Judaism and Christianity. It is a complex compilation of materials, reflecting great diversity in ideology, literary expression, social and political circumstances, and theology. In this course, we shall read a significant amount of the Bible in English translation. We shall study the various approaches that have been taken by scholars in trying to understand the Bible in its historical context. We shall also study how the Bible was traditionally interpreted by Jews and Christians during the last two thousand years.

L75 JIMES 3070 The Writing of the Indian Subcontinent

The Indian Sub-continent has in recent years yielded a number of writers, expatriate of otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed to be an introductory survey of such writing, drawing on select Sub-continental writers. Covering both fiction and non-fiction by several authors including R. K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatje and Romesh Gunsekera, we will discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles.

L75 JIMES 3073 The Global War on Terrorism

This course presents an historical assessment of the Global War on Terrorism (GWOT) from the perspective of its major participants: militant Sunni Islamist jihadists, especially the Al-Qaeda network, and the nation states that oppose them, particularly the United States and its allies. The course then concludes by analyzing the current state and future of Islamist jihad and the GWOT.

L75 JIMES 3074 Hinduism & the Hindu Right

We are witnessing a global rise in rightwing politics, and India is no exception. In May 2019, Narendra Modi and his "Hindu Nationalist" party were elected to power for a second term. Observers in the United States and Europe may be stunned by what seems to be a new development, but observers in India have been following the rise of the Hindu Right since the early 1990s. In its wake, the Hindu Right has brought violence against minorities; curbs on free speech; and moves toward second-class citizenship for Indian Muslims. This course will track the history of the Hindu Right in India from its 19th-century roots to the present. The struggle to come to grips with the Hindu Right is of immediate political relevance. It also raises big questions about the history of religion and the politics of secularism.

L75 JIMES 3082 From the Temple to the Talmud: The Emergence of Rabbinic Judaism

This course offers a survey of the historical, literary, social, and conceptual development of Rabbinic Judaism from its emergence in late antiquity to the early Middle Ages. The goal of the course is to study Rabbinic Judaism as a dynamic phenomenon -- as a constantly developing religious system. Among the topics to be explored are: How did Judaism evolve from a sacrificial cult to a text-based religion? How did the "Rabbis" emerge as a movement after the destruction of the Second Temple and how could they replace the old priestly elite? How did Rabbinic Judaism develop in its two centers of origin, Palestine (the Land of Israel) and Babylonia (Iraq), to become the dominant form of Judaism under the rule of Islam? How did Jewish ritual and liturgy develop under Rabbinic influence? How were the Rabbis organized and was there diversity within the group? What was the Rabbis' view of women, how did they perceive non-Rabbinic Jews and non-Jews? As Rabbinic Literature is used as the main source to answer these questions, the course provides an introduction to the Mishnah, the Palestinian and Babylonian Talmuds, and the Midrash-collections -- a literature that defines the character of Judaism down to our own times. All texts are read in translation.

L75 JIMES 3101 The Problem of Evil: The Holocaust and Other Horrors

The question of how God can allow evil to occur to the righteous or innocent people has been a perennial dilemma in religion and philosophy. We study the classic statement of the problem in the biblical book of Job, the ancient Near Eastern literature on which Job is based, and traditional Jewish and Christian interpretation of Job. We study the major approaches to the problem of evil in Western philosophical and religious thought.

L75 JIMES 3110 Sacred Architecture of the Indian Subcontinent

The built structure remains a principal visible record of the evolution of a civilization and its culture. Through this interdisciplinary course on culture, design, religion and society, students will be introduced to and gain a deeper insight into the rich diversity of South Asia through the study of the architecture of its significant sacred places. We will take a journey through the Hindu, Jain and Buddhist Temples; the Islamic Mosque; the Sikh Gurudwara; the Zoroastrian Fire Temple; the Jewish Synagogue; and the Christian Church, tracing the evolution of these places of worship from the Indus Valley Civilization to Pre-Colonial times. Through visuals, readings, and discussions, students will learn about the different architectural styles and motifs used in sacred buildings and how they came about. We will explore the inter-relationships between the design elements through the lens of political, social, religious, regional and technological influences and understand the ways in which evolving design principles reflect these influences overtime. This course will be of interest to students of languages and cultures, architecture, archeology, art history, history, preservation, religion, and South Asian culture, among others. Please note: At the end of the semester, students will go on a field trip to experience the diverse sacred architecture in the St. Louis region. No prior knowledge of architecture or the history of this region is required.

L75 JIMES 312 Introduction to the History and Cultures of Turkey

Since ancient times, the Anatolian Peninsula, the land surrounded by the Black Sea, the Aegean and the Mediterranean Seas, has been a home and a passageway to a multitude of diverse peoples. This course is intended to offer an overview of Turkey, its history, peoples, cultures, socio-economic, and political structures and institutions within the context of modern and contemporary global trends since the 19th century through the prism of long duree developments and processes. As an introductory and preparatory course, it aims primarily at familiarizing students with scholarly themes, questions, and problems which will aid those who wish to further delve into studying the deep and complex fabric of the Turkish society, culture, and history.

Credit 3 units. A&S IQ: HUM BU: IS EN: H

L75 JIMES 3120 South Asian Religious Traditions

In this course we will learn the basic vocabulary (conceptual, ritual, visual) needed to become conversant with the various religious traditions that are important to personal, social, and political life on the Indian subcontinent and beyond. We will first encounter each tradition through narrative, with the support of visual media. We will then explore how contemporary adherents make these traditions meaningful for themselves -- in their everyday lives, in their struggles for social change, and in their political statements and contestations. Students will also become familiar with the analytical categories and methodologies that make up the basic toolkit of the religion scholar. Prior knowledge of India or Pakistan is not required. First year students are welcome to enroll in this course.

L75 JIMES 3122 From Country to Heavy Metal: Ancient Civilizations of the Old World

This course will explore the archaeology of Europe, the Near East, and Central Asia from approximately 10,000 years ago to classical times (ending before Ancient Greece). This prehistoric epoch saw major developments among various civilizations of the Old World, such as the introduction of agriculture, animal domestication, the growth of cities, and technological developments such as pottery, metallurgy, and horse-riding. A major focus will be the trajectory of cultural innovations of regional populations through time, and the complexity of their social, political, and ritual practices. We will also investigate the variation in human adaptive strategies to various environmental and social contexts, from hunter/gatherers to early Neolithic farmers, to the interactions between nomadic populations and larger scale, urban societies in the Bronze and Iron Ages.

L75 JIMES 3140 Global Circuits: Religion, Race, Empire

This seminar explores how American entanglements of race and religion shape and are part of larger global processes. Over the course of the semester, we will investigate these entanglements through conceptual, historical, and ethnographic questions about and insights into the remapping of religious traditions and communal experiences onto imperial terrain. We will examine

this through a range of problem spaces, including colonial rule and racial hierarchies; religious difference and migration; the racialization of religion; diaspora and empire; persecution and power; and global geographies of the War on Terror. This course is not an exhaustive account of the enmeshment of race and religion in the United States or globally. Rather, this course aims to critically unpack formations of religion and race and their contemporary mediation by American geopolitics.

L75 JIMES 3149 The Late Ottoman Middle East

This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to the First World War). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students will focus on how everyday people's lived experiences were affected by the increased monetization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity.

L75 JIMES 314C Islamic History: 1200-1800

An introduction to Islamic politics and societies from the Mongol conquests to the 13th century to the collapse and weakening of the colossal "gunpowder" empires of the Ottomans, Safavids and Mughals in the early 18th century. Broadly speaking, this course covers the Middle Period (1000-1800) of Islamic history, sandwiched between the Early and High Caliphal Periods (600-1000) on the one hand and the Modern Period (1800-present) on the other hand. Familiarity with the Early and High Caliphal periods is not assumed. The course will not be a "survey" of this period but a series of "windows" that will allow you to develop both an in-depth understanding of some key features of Islamic societies and a clear appreciation of the challenges (as well as the rewards!) that await historians of the Middle Period. Particular attention is given to the Mamluk and Ottoman Middle East, Safavid Iran and Mughal India.

L75 JIMES 3160 Beauty & Aesthetics In Islam: Islamicate Literature, Material Art, & Architecture

This course provides an introduction to beauty and aesthetics in Muslim societies from across the world. The course focuses on Islamicate literature (e.g., poetry, narrative, biography), material art (e.g., textiles, ceramics, decorated manuscripts), and architecture (e.g., palaces, built gardens, mosques, mausoleums). Some attention is also given to performing arts (e.g., dance, music, plays, puppetry). Various types of material will be considered, ranging from religious to non-religious. Material will be drawn from across the Muslim world, including the Middle East, Sub-Saharan Africa, Central Asia, South Asia, and Southeast Asia. Although the course is primarily concerned with the premodern period, it will also consider the impact of modernity on Muslim literature, art, and architecture.

L75 JIMES 3171 Religion and Culture in South and Southeast Asia

Although it is now common to differentiate between South and Southeast Asia, historically these regions have often been conceptualized as part of a single geographical area. Known as the "(East) Indies", this area is marked by a rich history of (earlier) Hindu and Buddhist influences, as well as (later) Islamic and Christian influences. The present course will take an in-depth look at the four aforementioned religious traditions, and examine how they have shaped local forms of culture in premodern and modern times. Students will be introduced to host of phenomena in South and Southeast Asian societies, including religious worship, education, law, traditional governance, colonial governance, art, architecture, economic production, kinship, gender, and sexuality. Countries to be studied in the course include India, Pakistan, Sri Lanka, Thailand, Myanmar, Indonesia, Malaysia, the Philippines, and Papua New Guinea.

L75 JIMES 3183 The Jews of North Africa

This course examines the colonial and postcolonial experiences of Jews living in North Africa (mainly Algeria, Morocco, Tunisia, Libya and Egypt) in the context of the region's connections with and relationships to the European powers in the 19th and 20th centuries. We will focus on how the intrusion of foreign powers disrupted and shifted long-standing relationships between Jews and their non-Jewish neighbors, particularly the Muslim populations. We will also explore changes that occurred within the Jewish community as Jews negotiated their place within the new European Imperial system and its subsequent dismantling. Students will have the opportunity to engage with European ideas of "regenerating" North African Jews living under Ottoman Rule, the changing political and social statuses of Jews throughout the French and British regions, the changing relationship between Jews and their non-Jewish neighbors, the rupture caused by both World Wars, and how Jews coped with and responded to the dismantling of European empires and the birth of nation-states in the region, including Israel.

L75 JIMES 3192 Modern South Asia

This course will cover the history of the Indian sub-continent in the 19th and 20th centuries. We shall look closely at a number of issues including colonialism in India; anti-colonial movements; the experiences of women; the interplay between religion and national identity; and popular culture in modern India. Political and social history will be emphasized equally.

Same as L22 History 3192

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L75 JIMES 3194 Environment and Empire

In this course we study British imperialism from the ground up. At bottom, the British empire was about extracting the wealth contained in the labour and the natural resources of the colonized. How did imperial efforts to maximize productivity and profits impact the ecological balance of forests, pastures, and farm lands, rivers and rainfall, animals and humans? We'll ask, with environmental historians of the U.S., how colonialism marked a watershed of radical ecological change. The course will cover examples from Asia to Africa, with a focus on the "jewel in the crown" of the British empire: the Indian subcontinent. We'll learn how the colonized contributed to the science of environmentalism, and how they forged a distinctive politics of environmentalism built upon local resistance and global vision, inspired by religious traditions and formative thinkers, not least Mahatma Gandhi.

L75 JIMES 3211 Conversational Hebrew

Designed to focus on and strengthen oral proficiency, we will explore a variety of different topics together based on our common interests - not limited to current affairs, space travel and exploration, advances in medical technology, climate change, pandemic preparedness, economic inequality, and the future of work. With each topic, we will learn relevant vocabulary and structures and apply them in small group discussions, individual presentations, simulated interviews, and classroom debates. Students will also listen to different Israeli news reports and

documentaries in order to learn how to present at a formal level. The course is designed to simulate a variety of real-life situations, which require the balance of both rehearsal as well as improvisation. By learning Hebrew in different contexts, students will be exposed to a wide range of vocabulary and will be prepared to use the language in a variety of situations. The language of instruction is Hebrew only. PREREQ: Grade of B- or better in L74 214D Intermediate Modern Hebrew II or placement by examination. Please note: L75 5211 is intended for graduate students only.

L75 JIMES 3221 Topics: The Jewish Experience in Italy

This course will examine the social and political history of the Jews of Italy from the period of Italian unification through the end of the Second World War. We will look through two different prisms: first, the constant of Jews' minority status in a Catholic country at a time when Church doctrine was hostile to them and second, their changing status during significant moments in the brief history of the Italian monarchy. Under the latter rubric we will study the rehabilitation of the Jews under liberal political philosophies, their problematic relationship with Fascism, and finally the arrival of the Holocaust in Italy and efforts to defend Jews against Nazi genocide. We will approach these topics wherever possible through primary texts, including essays, memoirs, and novels. Reading knowledge of Italian is not required. Readings in English; some readings in Italian for Italian majors. Discussion in English. Prerequisite for Italian majors: Italian 307D; no prerequisite for students in other majors. Three five-page papers. Note: L75 5221 is intended for graduate students only.

Same as L36 Ital 3221

L75 JIMES 3230 Jews & Christians in the Premodern World

In modern times, it is common to think of Judaism and Christianity as two distinct, if historically connected, "religions." Increasingly, however, historians of ancient religions have thought more deeply about the implications of taking Christianity and Judaism in antiquity as more fluid and porous than we tend to think of them. In this upper division course, we will explore the ways in which the boundaries that early Christians attempted to draw between Christianity and Judaism remained unstable and incomplete. While the various efforts to establish early Christian identity led to the production of a variety of hermeneutical representations of the Judaeoi, these literary representations nevertheless often reflected, to various degrees, engagement with actual historical Jews/Judeans, who shared political, economic, and intellectual worlds with Christians. We

will consider how early Christian discourse about Jews and Judaism informed and was informed by intra-Christian disputes and their negotiations of their relationships with the wider Greco-Roman culture. We will explore how Christian efforts to establish both continuity and difference between Judaism played a role in the construction of 'orthodoxy' and 'heresy,' as well as the way in which Christians re-appropriated Jewish texts, rituals, and ideas in their efforts to construct a Christian identity. We will also explore how this continued dynamic of difference and continuity continued into the Middle Ages.

Credit 3 units. A&S IQ: HUM, LCD BU: ETH EN: H

L75 JIMES 3232 Religion & Nationalism in the Middle East & South Asia

How does religion shape national identity? How and why do some religious traditions become intertwined with the identities of national communities, often at the expense of others? In this course we explore how Islam, Judaism, Hinduism, and Christianity have interacted with modern nationalism to shape the nation-states of the Middle East and South Asia in profound ways. Throughout the course, we examine a range of case studies to compare and contrast, for example, the complex interaction between religion and nationalism in the creation of Pakistan and Israel in 1947 and 1948 as Muslim and Jewish national homes, the rise of the Hindu Right in India, religion and race in Iran, or the significance of Christianity and Islam for Palestinians and Iraqis. As we do so, we investigate how national movements have selectively and creatively engaged religious traditions over time in order to redefine communal boundaries, narrate new histories, exclude minorities, and reread sacred texts to draw the borders of their national homelands, which have often overlapped at great cost.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: ETH, IS

L75 JIMES 3250 Introduction to Arabic Literature

A survey of the major genres and themes in Arabic literature from the pre-Islamic era to the modern period. Texts will include pre-Islamic, classical and Sufi poetry, as well as popular tales and critical prose from the Umayyad and Abbasid empires and Andalusia. The modern sections of the course will interrogate political commitment in Arabic literature and introduce students to feminist and magical realist novels from North Africa and the Levant. All readings will be in English translation. Please note: L75 525 is intended for graduate students only.

L75 JIMES 3293 Religion and Society

We will take a broad and practice-oriented view of 'religion', including uttering spells, sacrificing to a god, healing through spirit possession, as well as praying and reciting scripture. We will consider religious practices in small-scale societies as well as those characteristic of forms of Judaism, Islam, Christianity, and other broadly-based religions. We give special attention to the ways religions shape politics, law, war, as well as everyday life in modern societies.

Same as L48 Anthro 3293

Credit 3 units. A&S IQ: SSC Art: SSC BU: ETH EN: S

L75 JIMES 331 Topics in Holocaust Studies: Children in the Shadow of the Swastika

This course will approach the history, culture and literature of Nazism, World War II and the Holocaust by focusing on one particular aspect of the period-the experience of children. Children as a whole were drastically affected by the policies of the Nazi regime and the war it conducted in Europe, yet different groups of children experienced the period in radically different ways, depending on who they were and where they lived. By reading key texts written for and about children, we will first take a look at how the Nazis made children-both those they considered "Aryan" and those they designated "enemies" of the German people, such as Jewish children - an important focus of their politics. We will then examine literary texts and films that depict different aspects of the experience of European children during this period: daily life in the Nazi state, the trials of war and bombardment in Germany and the experience of expulsion from the East and defeat, the increasingly restrictive sphere in which Jewish children were allowed to live, the particular difficulties children faced in the Holocaust, and the experience of children in the immediate postwar period. Readings include texts by Ruth Klüger, Harry Mulisch, Imre Kertész, Miriam Katin, David Grossman and others. Course conducted entirely in English. Open to first-year students. Students must enroll in both the main section and a discussion section.

L75 JIMES 3341 Religion, Race, and Migration: Borders of Difference?

This seminar is an experiment in studying the intersections of religion, race, and migration through the idea of difference. We discuss how particular understandings of religion, race, and migration inform contemporary scholarship and shape national and international legal and governmental practices. Specifically, this course explores how difference-of community, body, and place-produces conditions of possibility. Over the semester, we will investigate various borders of difference, using binaries

to guide our analysis. We will examine this through a range of problem spaces including: religion/secularism; race/ethnicity/sect; terrorist/citizen; and refugee/migrant. Ultimately, this course aims to critically unpack the relations of power by which people, places, and ideas are differentially constructed, maintained, and transformed

Same as L57 RelPol 334

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: BA, ETH

L75 JIMES 334C Crusade, Conflict, and Coexistence: The Jews in Christian Europe

This course will investigate some of the major themes in the history of the Jews in Europe, from the Middle Ages to the eve of the French Revolution. Jews constituted a classic, nearly continuous minority in the premodern Christian world—a world that was not known for tolerating dissent. Or was it? One of the main purposes of the course is to investigate the phenomenon of majority/minority relations, to examine the ways in which the Jewish community interacted with and experienced European societies, cultures, and politics. We will look at the dynamics of boundary formation and cultural distinctiveness; the limits of religious and social tolerance; the periodic eruption of persecution in its social, political, and religious contexts; and the prospects for Jewish integration into various European societies during the course of the Enlightenment era.

Same as L22 History 334C

Credit 3 units. A&S IQ: HUM, LCD, SC, SD BU: ETH, HUM, IS EN: H

L75 JIMES 335C Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History

This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be—or to become—modern. To answer this question, we look at two broad trends that took shape toward the end of the eighteenth century—the Enlightenment and the formation of the modern state—and we track changes and developments in Jewish life down to the close of the twentieth century with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time—from innovation to revolution, exclusion to integration, calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish "emancipation;" acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political and racial antisemitism; mass migration and the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

L75 JIMES 3411 Children and Childhood in World Religions

This course will investigate the roles children play in some of the world's major religious traditions and how those traditions construct their concepts of childhood. From child disciples to child martyrs, from the miraculous childhoods of religious founders to the rites marking childhood's end, and from divine commandments involving fertility to those mandating celibacy, we will explore a wide range of different religions' teachings about children and childhood. We will combine primary and secondary sources including written texts, movies/video, and web-based content in order to learn more about the complex relationships between children and the religious traditions of Judaism, Christianity, Islam, Hinduism, Buddhism, and Confucianism.

L75 JIMES 3421 Childhood, Culture, and Religion in Medieval Europe

From child saints to child scholars and from child crusaders to child casualties, the experience of childhood varied widely throughout the European Middle Ages. This course will explore how medieval Jews, Christians, and Muslims developed some parallel and some very much divergent concepts of childhood, childrearing, and the proper cultural roles for children in their respective societies. Our readings will combine primary and secondary sources from multiple perspectives and multiple regions of Europe and the Mediterranean World, including a few weeks on the history and cultural legacy of the so-called Children's Crusade of 1312. We will conclude with a brief survey

of medieval childhood and its stereotypes as seen through contemporary children's books and TV shows. This course fulfills the Language & Cultural Diversity requirement for Arts & Sciences.

L75 JIMES 345 Mesopotamian Mythology: Stories from Ancient Iraq

In this course we will read, explore, and interpret various ancient myths originating from the fertile crescent, especially ancient Iraq, between the years 2500 and 400 BCE. The Epic of Gilgamesh, the Enuma Elish, myths of the goddess Ishtar as well as various flood and creation accounts will be among those we read. Cultural background information will be examined to situate each myth in its ancient context. Various theories of interpreting myth will also be explored in order to appreciate the power and the many uses of these multivalent stories. Several basic questions will underlie all that we do throughout the semester: What is myth?, How should we understand the conceptualization of the category "myth" (in other words, How does myth work?), and Does myth still play a role in our own modern cultures?

Credit 3 units. BU: HUM

L75 JIMES 346 Islamic Law

This course will present a general overview of Islamic law and an introduction to the study of religious legal authority, which values consensus. It will then explore the formation of the major schools of law. Next, it will debate the notions of "ijtihad" and "taqlid" and discuss how open and independent legal decisions have been in the Islamic world. It will also trace the transmission of legal knowledge in religious institutions across time and place by focusing on medieval Muslim societies and by closely examining the education of a modern-day Ayatollah. Note: L75 546 is intended for graduate students only.

L75 JIMES 349 Yiddishkayt: Yiddish Literature in English Translation

This course will trace the emergence, development, flourish, and near-decline of Yiddish literature, beginning with some of the earliest writings to appear in Yiddish in the late middle ages and early modern period, continuing with 19th-century attempts to establish a modern Yiddish literature and the 20th-century emergence of both a classical canon and a literary avant-garde, and ending with post-Holocaust attempts to retain a Yiddish literary culture in the near absence of Yiddish-speaking communities. Focusing on the role of Yiddish as the "national" language of Ashkenaz, the course will examine the ways in which Yiddish literature has responded to the social conditions of European Jewish life, exploring among others the relationship between Yiddish and the non-Jewish cultures in which it existed, the tensions between secular trends versus religious tradition, life in the shtetl and in the metropolis, immigration from the old world to the new, and Yiddish literary responses to the Holocaust.

L75 JIMES 351 Muhammad: His Life and Legacy

This course intends to examine the life and representations of the Prophet Muhammad from the perspective of multiple spiritual sensibilities as articulated in various literary genres from medieval to modern periods. The course is divided roughly into two parts. One part deals with the history of Muhammad and the related historiographical questions. The second part deals with the representations of Muhammad in juristic, theological, Sufi, etc. literature. Because of the availability of primary sources in English translation, there will be a healthy dose of primary source reading and analysis throughout the semester. Those students with advanced Arabic (and Persian and Turkish) skills will be encouraged to engage sources in their original language.

Credit 3 units. A&S IQ: HUM, LCD, SC BU: ETH EN: H

L75 JIMES 353 Understanding Indian Literature through Visual Media

This course focuses on the films and cultural traditions of South Asia in general and of India in particular. Students will be introduced to a variety of contemporary literary genres through visuals. Readings and class discussions will be followed by film screenings from the popular Hindi cinema (known as the Bollywood industry in India) to demonstrate how images and visuals influence modern-day cultural traditions. Students will also get a chance to work on films based on literary texts by well-known writers of the subcontinent. These readings and films focus on various social, cultural, political and historical aspects of Indian society. Students will be encouraged to explore these issues in their written assignments as well as in their class discussions.

L75 JIMES 354 Anthropological and Sociological Study of Muslim Societies

This course introduces students to anthropological and sociological scholarship on Muslim societies. Attention will be given to the broad theoretical and methodological issues which orient such scholarship. These issues include the nature of Muslim religious and cultural traditions, the nature of modernization and rationalization in Muslim societies, and the nature of sociopolitical relations between "Islam" and the "West." The course explores the preceding issues through a series of ethnographic and historical case studies, with a special focus on Muslim communities in the Middle East, Southeast Asia, and Europe. Case studies address a range of specific

topics, including religious knowledge and authority, capitalism and economic modernization, religion and politics, gender and sexuality, as well as migration and globalization. Please note: L75 554 is intended for graduate students only.

L75 JIMES 3581 Musica Ebraica: Jewish Identities in Western Music from 1600 to the 21st Century

The course explores Western music from the 17th century to the 21st century through the prism of musical works that were written by Jews and for Jews and of musical compositions reflecting their composers' identifying themselves as Jews. Jewish art music from these periods will be examined against the background of musical development in general, the social, political, and religious context of the composers, and written reflections about Jewish music. Examples of Jewish art music will be analyzed through different approaches in order to determine the cultural interrelationships between Jews and non-Jews, Jewish cultural autonomy, and the perception of Jewishness in music.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L75 JIMES 3582 Music in Jewish Culture and Society

The common term 'Jewish Music' raises numerous questions that emanate from the difficulty to define 'Jewish' identity of any given music. This course will deal with various approaches to the definition of Jewish music, perceived as a cultural and sociological component in the Jewish communities throughout the Diaspora. We will survey the functions in which music is performed in traditional Jewish communities, especially Jewish liturgy, and the substantial vicissitudes in these musics after the European Enlightenment, European colonialism in north-Africa, and in the Mediterranean. We will study the background and the different characteristics of selected Jewish communities - Ashkenazic, Sephardic, Italian, Yemenite, and others - as well as instrumental music, questions of gender, and the relationship between music and text." A secondary goal of this course will be the study of the bibliography and discography of Jewish musics.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L75 JIMES 3583 The Soundtrack of Israeli History

This course explores connections between Israeli history, nationality, and culture, and between Israeli art music. Such an encounter between reveals the reflection of, and responses to, local social developments in various historic and constitutive moments in Israeli history such as: the fifth Aliya (wave of immigration) in the 1930s, the statehood years, the waning of nationalistic sentiments in the late 1950s, the aftermath of Israeli wars, the negotiation between Israeli and Jewish

identities, and even artistic expressions of postmodernity within the Israeli context. These histories will be surveyed through historical studies as well as through their musics and against the background of developments in 20th century music.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L75 JIMES 3585 Islam, Music, Muslim Media

How do Muslim individuals and communities understand and negotiate the relationship between sound and spirituality? How does Islamic philosophy challenge Western definitions of music? How do music and cultural practices reflect and shape diverse Muslim identities and political struggles? To what extent can we speak of an "Islamic world," musical or otherwise? In this course, we investigate Islamic musics and musical practices in the lives and experiences of Muslims throughout the world. We approach our study of Muslim musical practices with the understanding that the social, cultural, and political contexts where music is created, disseminated, and consumed inform the sounds of the music and its various--and often conflicting--interpretations and meanings. We will engage with a variety of academic, musical, and media texts to develop interdisciplinary analyses about Islam, music, sound experience, and Muslim subjectivities. Issues of nationalism and transnationalism, class, race and ethnicity, gender and sexualities, colonialism and postcolonialism, history and memory will remain central to our exploration of spirituality and religion in Muslim musical and cultural practices.

L75 JIMES 359 Travelers, Tricksters, and Storytellers:

Jewish Travel Narratives and Autobiographies

Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman. We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an "other," against which and through which they define a particular sense of self? This course is open to students of varying interests, including Jewish, Islamic, or Religious Studies, medieval and early modern history, European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only.

L75 JIMES 3602 Borders, Checkpoints, and the Frontiers of Literature

Borders are some of the most strange, dangerous, and changeable places in the world. They help define not only where we are, but also who we are. This course will read literature from and about border regions around the world: the Mexican-American frontera, the Indian and Pakistani Partition line, the German Iron Curtain, the African colonial borders, and the Israeli-Palestinian divisions. Even if we live far from any international boundary, the notion of the border shapes our thinking about the world. Literature is a place where borders are vividly imagined, marked, and debated in ways that both affect preexisting frontiers and help draw new ones on the ground. We will read all texts in English.

L75 JIMES 366 The Sephardic Experience: 1492 to the Present

This course explores the history and culture of the Sephardic diaspora from the expulsion of Spanish and Portuguese Jewry at the end of the 15th century to the present. We will start with a brief introduction into the history of Iberian Jews prior to 1492, asking how this experience created a distinct subethnic Jewish group: the Sephardim. We will then follow their migratory path to North Africa, Italy, the Ottoman Empire, the Netherlands, and the

Americas. The questions we will explore include: in what sense did Jews of Iberian heritage form a transnational community? How did they use their religious, cultural, and linguistic ties to advance their commercial interests? How did they transmit and transform aspects of Spanish culture and create a vibrant Ladino literature? How did the Sephardim interact with Ashkenazi, Greek, North African, and other Jewish, Muslim, and Christian communities? How did Jewish emigres from Spain and Portugal become intermediaries between Christian Europe and the Ottoman Empire? What was the role of Sephardim in Europe's transatlantic expansion? How did conversos (converts to Christianity) return to Judaism and continue to grapple with their ambiguous religious identity? How did Ottoman and North African Jews respond to European cultural trends and colonialism and create their own unique forms of modern culture? How did the Holocaust impact Sephardic Jewry? The course will end with a discussion of the Sephardic experience in America and Israel today.

L75 JIMES 3660 Caste: Sexuality, Race, and Globalization

Be it sati or enforced widowhood, arranged or love marriage, the rise of national leaders like Indira Gandhi and Kamala Harris, or the obsession with "fair" skin, caste shapes possibilities and perceptions for billions. In this class we combine a historical understanding of the social caste structure with the insights made by those who have worked to annihilate caste. We will re-visit history with the analytic tools provided by the concepts of compulsory endogamy, "surplus woman," and "brahmanical patriarchy," and we will build an understanding of the enduring yet invisible "sexual-caste" complex. As we will see, caste has always relied on sexual difference, its ever-mutating power enabled by the intersectionalities of race, gender and class. We'll learn how caste adapts to every twist in world history, increasingly taking root outside India and South Asia. We will delve into film and memoir, sources that document the incessant injustices of caste and how they have compounded under globalization. The class will research the exchange of concepts between anti-race and anti-caste activists: how caste has shaped the work of prominent anti-racist intellectuals and activists in the United States such as W.E.B. DuBois and Isabel Wilkerson and in turn, the agenda and creativity of groups such as the Dalit Panthers. Finally, the course will build a practical guide to engaging with and interrupting caste in the context of the contemporary global world today. Waitlists controlled by Department; priority given to WGSS majors. Enrollment cap 15. Same as L77 WGSS 366

L75 JIMES 3670 Gurus, Saints, and Scientists: Religion in Modern South Asia

Many long-standing South Asian traditions have been subject to radical reinterpretation, and many new religious movements have arisen, as South Asians have grappled with how to accommodate their traditions of learning and practice to what they have perceived to be the conditions of modern life. In this course we consider some of the factors that have contributed to religious change in South Asia, including British colonialism, sedentarization and globalization, and new discourses of democracy and equality. We consider how new religious organizations were part and parcel with movements for social equality and political recognition; examine the intellectual

contributions of major thinkers like Swami Vivekananda, Sayyid Ahmad Khan, and Mohandas Gandhi; and explore how Hindu, Islamic, and other South Asian traditions were recast in the molds of natural science, social science, and world religion.

L75 JIMES 374 Of Dishes, Taste, and Class: History of Food in the Middle East

This course will cover the history of food and drink in the Middle East to help us understand our complex relation with food and look at our lives from perspectives we intuitively feel or by implication know, but rarely critically and explicitly reflect on. Food plays a fundamental role in how humans organize themselves in societies, differentiate socially, culturally, and economically, establish values and norms for religious, cultural, and communal practices, and define identities of race, gender, and class. This course does not intend to spoil, so to speak, this undeniably one of the most pleasurable human needs and activities, but rather to make you aware of the social meaning of food and reflect on how food shapes who we are as individuals and societies. We will study the history of food and drink in the Middle East across the centuries until the present time, but be

selective in choosing themes, geographic regions, and historical periods to focus on. Please consult the instructor if you have not taken any course in the humanities. Enrollment priority given to seniors and juniors.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: BA, IS EN: H UColl: CD

L75 JIMES 3751 In the Beginning: Creation Myths of the Biblical World

This course will study myths and epic literature from the Bible, ancient Egypt, the ancient Near East and ancient Greece about the birth of the gods, the creation of the world and of humanity, and the establishment of societies. These masterpieces of ancient literature recount the deeds of gods and heroes and humanity's eternal struggle to come to terms with the world, supernatural powers, love, lust, and death. This course will examine how each culture borrows traditions and recasts them in a distinct idiom. The course will further examine different approaches to mythology and to the study of ancient cultures and the Bible.

L75 JIMES 377 History of Slavery in the Middle East

This course examines slavery and its abolition in the Middle East and North Africa from 600 C.E. to the 20th century. It addresses slavery as a discourse and a question of political economy.

We begin with an overview of slavery in late antiquity to contextualize the evolution of this practice after the rise of Islam in the region. We then examine how it was practiced, imagined, and studied under major empires, such as the Umayyads, the Abbasids, the Fatimids, the Mamluks, the Ottomans, and the Safavids. In addition to examining the Qur'anic discourse and early Islamic practices of slavery, to monitor change over time we address various forms of household, field, and military slavery as well as the remarkable phenomenon of "slave dynasties" following a chronological order. We discuss, through primary sources, theoretical, religious, and moral debates and positions on slavery, including religious scriptures, prophetic traditions, religious law, and a plethora of narratives from a range of genres. We highlight a distinct theme each week to focus on until we conclude our discussion with the abolition of slavery in the 19th and 20th centuries. Topics of discussion include various forms of male and female slavery, Qur'anic and prophetic discourse on slavery, legal and moral views on slavery, slavery as represented in religious literature, political, military, and economic structures of slavery, issues of race and gender as well as slave writings to reflect on the experiences of slavery

from within. The goal is to enable students to understand the histories of slavery in the Middle East and eventually compare it to that of other regions and cultures, such as European and Atlantic slavery. No second language required.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, IS EN: H

L75 JIMES 3810 Between Sand and Sea: History, Environment, and Politics in the Arabian Peninsula

Although it is today primarily associated with oil, the Arabian peninsula was for most of its history defined by water: its surrounding seas, its monsoon-driven winds, and its lack of water in its vast and forbidding interior deserts. As home to the major holy cities of Islam and a key source of global oil, the region has played an important role in the Western European and North American imagination. Despite being relatively sparsely populated, the peninsula hosts millions of believers each year on the annual Muslim pilgrimage, and it has been the site of major wars and military occupations by European, American, and other Middle Eastern countries for much of the 20th and 21st centuries. It has been an outpost of the Ottoman Empire, a center of British colonialism and (at Aden) an axis of its global empire, the location of Egypt's "Vietnam" (its long war in Yemen in the 1960s), the Gulf Wars I and II, and the recent wars in Yemen, to name just a few of the major conflicts. Often depicted as unchanging until caught up by the influx of massive oil wealth, this region is frequently characterized as a place of contradictions: home to some of the world's largest skyscrapers and also the most inhospitable and largest sand desert in the world, known as "the Empty Quarter"; the location of crucial American allies and the home of al-Qa'eda founder `Usama Bin Laden. In this course, we will examine the development of the peninsula historically to understand these contradictory images. We will investigate changes in the following arenas: environment and society; colonial occupation; newly independent states; the demise and development of key economic sectors (pearling; shipping; agriculture; oil; finance; piracy); political regimes; resources such as water, oil, and date palms; the growth of oil extraction infrastructure and its effects on the political regimes and societies in the region; the emergence of new Gulf cities; Islamic law; women's rights; human rights debates; and religious and ethnic minorities.

L75 JIMES 382 The History and Politics of Middle East Studies: Producing Expert Knowledge

How do we know Muslim women need gender equality? How do we know minorities in the Middle East suffer from religious persecution, and that religious freedom is the solution? How do we know promoting human rights is a universal good? How do we know development aid improves the lives of Palestinian or Syrian refugees? Why do we need so many US military bases in the Arab Gulf? In this class, we consider the history and politics behind the answers to these kinds of questions. To do so, we examine the field of Middle East Studies in the United States, historically and today, and its role in the production of expert knowledge about the region. After learning foundational theories around knowledge production, we consider the history of US foreign policy and analyze how certain theories of the Middle East became common sense notions at the expense of other possibilities. We then investigate the history and politics of universal concepts and their promotion in the region such as human rights, gender equality, and religious freedom.

L75 JIMES 3900 Topics in Migration and Identity

The course examines migration movements that are related to the Nazi genocide in Europe. Grounded in a study of the Nazi project to reshape the European geopolitical map, students explore how the mass movement of people is impacted by geopolitics, political violence, and economical considerations. Class materials address the relationship between identity formation and social exclusion, thus opening up a critical investigation of concepts of citizenship, human rights, and their institutional frameworks (states, international organizations etc.) more generally. Students will work with a variety of sources, including primary sources, scholarly analyses, podcasts, literary works, and film to study migrations related to the prehistory, policies, and aftermath of the Nazi regime. The class provides insights into issues of expulsion, refuge, forced migration, settlement projects, ethnic cleansing and others, but also demonstrates the global impact and long-term repercussions of political and genocidal violence. Looking at the Nazi regime through the lens of migration shows that the Nazi genocide is embedded in a history of racism, colonialization, and mass violence.

L75 JIMES 3921 Secular & Religious: A Global History

Recent years have seen a dramatic rethinking of the past in nearly every corner of the world as scholars revisit fundamental questions about the importance of religion for individuals, societies and politics. Is religion as a personal orientation in decline? Is Europe becoming more secular? Is secularism a European invention? Many scholars now argue that "religion" is a European term that doesn't apply in Asian societies. This course brings together cutting-edge historical scholarship on Europe and Asia in pursuit of a truly global understanding. Countries covered will vary, but may include Britain, France, Turkey, China, Japan, India and Pakistan.

L75 JIMES 396 Islamic Philosophy, Mysticism, and Theology

How does an individual achieve access to knowledge and access to God? To what extent is such access dependent upon scripture? To what extent is such access dependent upon reason? Are there forms of truth and experience that only reveal themselves through mysticism? Questions of this sort are central to the interrelated disciplines of Islamic philosophy, Islamic theology, and Islamic mysticism (i.e., Sufism). This course examines how these three disciplines have shaped various aspects of social life within premodern Muslim communities.

L75 JIMES 39SC Imperialism and Sexuality: India, South Asia, and the World: Writing-Intensive Seminar

What is the connection between the appropriation of other people's resources and the obsession with sex? Why is 'race' essential to the sexual imperatives of imperialism? How has the nexus between 'race,' sexuality, and imperial entitlement reproduced itself despite the end of formal colonialism? By studying a variety of colonial documents, memoirs produced by colonized subjects, novels, films and scholarship on imperialism, we will seek to understand the history of imperialism's sexual desires, and its continuation in our world today.

L75 JIMES 4011 Staging Atrocity: Theater of the Holocaust

Responding to the Holocaust has challenged artists working in every medium. Nowhere are these challenges more extreme than in the theater, where the intimacy of the space, the close proximity of live actors and audience, and the subject matter itself may serve to intensify its effect. We will read a careful selection of modern and contemporary dramas and explore the range of responses. Underneath each weekly topic reverberate the nagging question of whether one can -- or should -- make art from the Holocaust, as well as a serious exploration of the uses and effectiveness of theater to communicate on this subject. We look at the ways in which the Holocaust has been used as a subject to raise moral dilemmas, examine the limits of humanity, elicit doubt or faith, and provide political commentary. We will also discuss the ways in which playwrights have stretched the limits of the theater to meet the challenge of staging the Holocaust. Topics considered include the nationalization and personalization of the Holocaust, the role of the second generation, issues of audience, and the use of experimental forms and obscenity. The plays on the syllabus are from North America, Israel and Europe. All readings are in English (original or translation).

L75 JIMES 4020 Jerusalem, the Holy City

An examination of the role that Jerusalem has played in three religious traditions — Judaism, Christianity, and Islam — through a study of archaeology, history, literature, politics, and theology from antiquity to contemporary times. A senior seminar in Jewish, Islamic, and Middle Eastern Studies. During winter break, the class will go to Jerusalem as part of the course. Student portion of travel costs TBA. Students unable to make the trip will receive a reduction to 4 units of course credit. Preference given to seniors majoring in Jewish, Islamic, and Middle Eastern Studies. Others may enroll with instructor's permission.
Credit 5 units. EN: H

L75 JIMES 402D Fourth-Level Modern Hebrew II

Students with advanced proficiency maintain and develop reading, speaking, and writing skills. Class conducted in Hebrew. Readings focus on key works of Hebrew poetry and fiction from earlier in this century and from contemporary Israel; additional reading and discussion of essays and editorials from current Israeli press, viewing of films and current news broadcasts produced in Israel. PREREQ: Grade of B- or better in L74 401W Fourth-Level Modern Hebrew I or placement by examination. Same as L74 HBRW 402

L75 JIMES 405 Diaspora in Jewish and Islamic Experience

Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term "diaspora" -- from the ancient Greek, meaning "dispersion" or "scattering" -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and they continued to be central motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home in both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

L75 JIMES 4060 Conflict or Convivencia? Muslims, Jews, and Christians in Medieval Spain

This seminar will explore various facets of the coexistence (convivencia) of Muslims, Jews, and Christians in medieval Spain. Its horizon stretches from the Muslim conquest of Iberia (al-Andalus) up to the turn of the 16th century when Spanish Jews and Muslims were equally faced with the choice between exile and conversion to Christianity. Until about 1100, Muslims dominated most of the Iberian Peninsula; from then onward, Christians ruled much and eventually all of what would become modern Spain and Portugal. Through a process known as reconquista (reconquest), Catholic kingdoms acquired large Muslim enclaves. As borders moved, Jewish communities found themselves under varying Muslim or Christian dominion. Interactions between the three religious communities occurred throughout, some characterized by shared creativity and mutual respect, others by rivalry and strife. The course focuses on these cultural encounters, placing them in various historical contexts. It will explore the ambiguities of religious conversion, and the interplay of persecution and toleration. Last not least, the course will address the question of how the memory of medieval Spain's diversity reverberates-and is utilized-in modern popular and academic discourse. All sources will be read in English translation; however, students are encouraged to make use of their linguistic and cultural expertise acquired in previous classes. This course serves as the capstone seminar for Jewish, Islamic & Middle Eastern Studies majors, Arabic majors, and Hebrew majors. Graduate students, minors, and other interested undergrads are likewise welcome.

L75 JIMES 4081 Fourth-Level Arabic: Classical Literature

This class provides an overview of pre-modern Arabic-Islamic thought (i.e., Islamicate intellectual traditions expressed in the Arabic language). Topics to be covered include Pre-Islamic Poetry, Quran, Hadith, Islamic Law, Sufism, Philosophy, Natural Science, and Social Thought. Students will be introduced to these topics through focused reading and discussion of Classical Arabic texts by key thinkers like al-abari, Ibn al-jar, Ibn Qudama, al-Ghazali, Ibn Sina, Ibn Rushd, and Ibn Khaldun. In addition to reading Classical Arabic texts, students will be given select exercises designed to strengthen their grammar, expand their vocabulary, and build their translation. PREREQ: Grade of B- or better in L49 308D Advanced Arabic I or L49 3085 Third-Level Arabic II or placement by examination.

L75 JIMES 409 Beyond Geography: The Meaning of Place in the Near East

This course considers the importance of place in the Middle East with particular reference to Jewish and Islamic traditions. Topics to cover include the creation of holy sites, the concept of sacred space, the practice of pilgrimages, and the tropes of exile and return. Texts will range from analytical essays to novels, memoirs, and films by authors such as Edward Said, Naguib Mahfouz, Taher Ben Jelloun, Elif Shafak, A. B. Yehoshua, Shulamit Hareven, and Hanan Al-Shaykh. Requirements include participation, short assignments, and a seminar paper. This course fulfills the capstone requirement for students majoring in Jewish, Islamic, and Middle Eastern Studies, but it is open to advanced undergraduates and graduate students. Prerequisites: coursework in JIMES and senior standing or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L75 JIMES 4154 Decolonization to Globalization: How to End an Empire

The course examines questions of contemporary relevance by revisiting the history of European empire and decolonization in South Asia: Is the United States an empire? Have we deliberately or otherwise supported U.S. empire? Did the history of European empire "train" some people to further American imperial interests over the 20th century? Is the empire over? Independence from European colonialism was a victory for some people, although for the majority, the experience of nation-building and the Cold War only sanctioned further

inequities. A further setback arrived in the guise of U.S.-centered globalization. The countries of Bangladesh, India, Pakistan, Nepal, and Sri Lanka have grappled differently with the many varieties of 20th-century transnational power. This course studies the histories of decolonization, nation building, the Cold War, and globalization for those South Asian countries created since the 1940s. By considering the possibility that the U.S. empire is facing a radical collapse, the course delves into new and novel ways by which South Asians have interrogated, accepted, resisted, and possibly overturned the multiple levels of power unleashed upon them since the formal end of European colonialism. Modern, South Asia. Prerequisite: Prior course work in history or permission of instructor.

L75 JIMES 435 Sabbath Politics: Rest and Refusal in Religion and Politics

The Jewish Sabbath arrives every week to disrupt ordinary life with a wholly different way of living, abstaining from some activities in divinely commanded rest. Is this different way of life strictly a break from the ordinary, or also a guide to it-and to how it might require disruption, reformation, and repair? Sabbath traditions have inspired radical political action including movements against debt, income inequality, environmental destruction, and racial injustice. This course will consider the ways that 20th and 21st century American Jews have practiced Shabbat and thought about its significance in political life. Students will read a range of Jewish texts including Abraham Joshua Heschel's classic 1951 book *The Sabbath*, and consider them in relation to movements of contemporary radical politics that have been inspired by Sabbath traditions, including Strike Debt, reparations for African-Americans, and agonistic democratic politics.

L75 JIMES 4357 The Holocaust in the Sephardic World

The course provides students with a comprehensive understanding of the Holocaust, of its impact on the Sephardic world, of present-day debates on the "globalization" of the Holocaust, and of the ways in which these debates influence contemporary conflicts between Jews, Muslims and Christians in Southern Europe and North Africa. We will turn to the history of these conflicts, and study the Sephardic diaspora by focusing on the consequences that the 1492 expulsion had within the Iberian Peninsula, in Europe, and in the Mediterranean world. We will study Sephardic communities in Europe and North Africa and their interactions with Christians and Muslims before World War II. Once we have examined the history of the Holocaust and its impact on the Sephardic world in a more general sense, our readings will focus on the different effects of the Holocaust's "long reach" into Southeastern Europe, the Balkans, and North Africa, paying close attention to interactions among Jews, local communities, and the Nazi invaders. Finally, we will address the memory of the Sephardic experience of the Holocaust, and the role of Holocaust commemoration in different parts of the world. We will approach these topics through historiographies, memoirs, novels, maps, poetry, and film.

L75 JIMES 442 Empire and Memory: Approaches to Islamic Historiography (ca. 800-1250)

The subject of this course is an in-depth study of medieval Arabic historiography from the 8th through the 13th centuries, when the Mongols run over the remnants of the Abbasid caliphate, established their own rule over Eurasia, and thereby sparked new questions about the past. After the initial survey of medieval Islamic history as background, we will focus on the development of historiographical writing in its socio-political context and examine one by one the most major historiographical traditions and philosophies from the 8th through the 13th centuries: prophetic traditions, belles-lettres, annals, biographical dictionaries, and genealogical literature.

Credit 3 units. A&S IQ: HUM EN: H

L75 JIMES 444 The Mystical Tradition in Judaism

What is Jewish "mysticism"? What is its relationship to the category of "religion"? Is Jewish mysticism just one form of a general phenomenon common to a variety of religious traditions or is it a specific interpretation of biblical, rabbinic, and other Jewish traditions? Taking the above questions as a starting point, this course aims at a systematic and historically contextualized analysis of a broad range of Jewish texts that are commonly classified as "mystical". (All primary texts are read in translation.) At the same time, we explore such overarching themes as: the interplay of esoteric exegesis of the Bible and visionary experiences; the place of traditional Jewish law

(halakhah) within mystical thought and practice; the role of gender, sexuality, and the body in Jewish mystical speculation and prayer; the relationship between mysticism and messianism; Ashkenazic and Sephardic traditions and their mutual impact on Jewish mysticism; the "absence of women" from Jewish mystical movements; esoteric traditions of an elite vs. mysticism as a communal endeavor; and the tension between innovation and (the claim to) tradition in the history of Jewish mysticism.

L75 JIMES 445 Topics in Islam

This course aims to study political thought and practice in Islamic history through a close reading of a selection of primary sources in translation (and in their original language, if language proficiency is satisfactory). Particular attention will be given to the historical contexts in which thoughts are espoused and texts written. We plan to examine the development of political concepts and themes as articulated in diverse literary genres (e.g., legal, theological, political) from the eighth through the 13th centuries. We hope to engage various theoretical models to analyze the relationship between politics and religion and to tease out the role of power in determining sociopolitical relations, distinctions, and structures. We hope to have a better grasp on the historicity of ideas presented in timeless categories in political discourse. Advanced knowledge of Arabic preferred but not required.

L75 JIMES 475 Screening the Holocaust

This course surveys the history of Holocaust representation on film, examining a wide range of documentary and fictional works from 1945 to the present day. Discussions will consider a number of key questions, including: What challenges does the Holocaust pose to cinematic representation, and how have filmmakers grappled with them? How have directors worked within and against notions of the Holocaust as unrepresentable, and how have they confronted the challenge of its association with a limited set of highly iconic images? What are the more general ethical and political dimensions of representing the Holocaust onscreen -- its victims as well as its perpetrators, the systematic genocidal violence that characterized it, and the sheer absence of so many dead? We will also probe the changing significance of cinematic representation of the Holocaust, exploring the medium's increasingly memorial function for audiences ever further removed from the historical moment of its occurrence. Screenings may include *The Last Stage*; *Distant Journey*; *Night and Fog*; *Judgment at Nuremberg*; *Shoah*; *Europa, Europa*; *Schindler's List*; *Train of Life*; *The Specialist*; *Photographer*; *A Film Unfinished*. Critical readings by figures such as Giorgio Agamben, Jean Amery, Shoshana Felman, Geoffrey Hartman, Marianne Hirsch, Sidra Israhi, Dominick LaCapra, Alison Landsberg, Berel Lang, Michael Rothberg, and James Young. Required screenings.

L75 JIMES 4872 Colonial Cities and the Making of Modernity

Massive urban growth has been a central result of the incorporation of many areas -- both central and peripheral -- into the global economy in the 19th and 20th centuries. Scholars have long theorized urbanization as a key component of modernity, but they have usually done so by looking at urbanization and modernization from the perspective of the

West. This course will investigate the character of cities in the colony and then use these empirical and analytical entry points to examine critically some theories of modernity. The geographical focus of the course will be primarily on cities in the Middle East, North Africa, and South Asia.

L75 JIMES 49SC Advanced Seminar: Incredible India?

From Christopher Columbus' misguided search for a mythical notion of India, to the Incredible India branding campaign launched by the Indian State's Department of Tourism, to the allure of yoga and true love, the notion of "India" has its own history. In this Advanced Seminar we trace the invention of India - as a concept - over time. We'll learn how the fabrication of India has proceeded through the centuries, and how the many

meanings of "India" coalesce, nimbly side-stepping any popular or professional narrative of Indian history. Mobilizing an array of interdisciplinary tools, we will plot how the fetishization of "India" has itself become a flexible industry, how the management of Indian exceptionalism drives caste expansion. We'll study how the process renders certain subject positions and hierarchies as neutral and hegemonic while violently discarding others; how "India" is a product collectively manufactured, circulated, and consumed by a range of people around the world; the very real work of translation in bringing "India" into our everyday lives and imaginaries. This course fulfills the History major capstone requirement as an Advanced Seminar.

L75 JIMES 500 Independent Work in Jewish, Islamic and Middle Eastern Studies

Prerequisites: Senior standing and permission of the chair of the Jewish, Islamic, and Middle Eastern Studies program.
Credit variable, maximum 6 units.

L75 JIMES 5001 Introduction to the Hebrew Bible/Old Testament

The Hebrew Bible is the foundational text of Judaism and Christianity. It is a complex compilation of materials, reflecting great diversity in ideology, literary expression, social and political circumstances, and theology. In this course, we shall read a significant amount of the Bible in English translation. We shall study the various approaches that have been taken by scholars in trying to understand the Bible in its historical context. We shall also study how the Bible was traditionally interpreted by Jews and Christians during the last two thousand years.
Same as L23 Re St 300
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM EN: H

L75 JIMES 5006 Modern Jewish Writers

What is Jewish literature? While we begin with -- and return to -- the traditional question of definitions, we will take an unorthodox approach to the course. Reading beyond Bellow, Ozick and Wiesel, we will look for enlightenment in unexpected places: Egypt, Latin America, and Australia. Recent works by Philip Roth, Andre Aciman, Simone Zelitch and Terri-ann White will be supplemented by guest lectures, film, short stories and significant essays. We will focus on issues of language, memory and place. Background knowledge is not required, though it is warmly welcomed.
Same as L16 Comp Lit 306
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L75 JIMES 5012 Biblical Law and the Origins of Western Justice

This course will explore how law developed from the earliest periods of human history and how religious ideas and social institutions shaped law. The course will also illuminate how biblical law was influenced by earlier cultures and how the ancient Israelites reshaped the law they inherited. It will further analyze the impact of biblical law on Western culture and will investigate how the law dealt with those of different social classes and ethnic groups, and we will probe how women were treated by the law.

Credit 3 units. A&S IQ: HUM, LCD BU: ETH, HUM EN: H

L75 JIMES 501C The Jews in the Ancient World

We will trace Israelite and Jewish history from its beginnings in the biblical period (circa 1200 BCE) through the rise of rabbinic Judaism and Christianity until the birth of Islam (circa 620 CE). We will explore how Israel emerged as a distinct people and why the rise of the imperial powers transformed the political, social, and religious institutions of ancient Israel. We will illuminate why the religion of the Bible developed into rabbinic Judaism and Christianity and how rabbinic literature and institutions were created.

Same as L75 JIMES 301C

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: BA, HUM

L75 JIMES 501M Historical Methods-Middle Eastern History

This is a small-group reading course in which students are introduced to the skills essential to the historian's craft. Emphasis will be on acquiring research skills, learning to read historical works critically, and learning to use primary and secondary sources to make a persuasive and original argument. See Course Listings for current topics. Required for history majors. Preference given to History majors; other interested students welcome.

L75 JIMES 5035 Antisemitism: History, Causes, Consequences

Why do people hate other people? Why have religion, race, gender, ethnicity and so on led to sectarian violence with terrifying regularity throughout history? Focused on antisemitism from Biblical times to today, this class will grapple with those questions. Please note: L75 5035 is intended for graduate students only.

L75 JIMES 5075 Third-Level Arabic I

This course is a continuation of Intermediate Arabic II. Competence in reading, writing, speaking, listening and culture is developed through intensive exposure to classical and modern standard Arabic in its written and audiovisual forms. Prerequisite: Grade of B- or better in L49 208D or placement by examination. Note: L75 5075 is intended for graduate students only.

Same as L49 Arab 3075

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 5085 Third-Level Arabic II

This course is a continuation of Third-Level Arabic I. The continued integration of language development will occur through reading, writing, speaking, and listening activities centered around advanced authentic material. This semester will prove critical for making the transition from modern Arabic to classical Arabic, including Qur'anic Arabic. There will also be focus on the continued development of colloquial Arabic. Prerequisite: Grade of B- or better in L49 3075 or placement by examination. Note: L75 5085 is intended for graduate students only.

L75 JIMES 5149 The Late Ottoman Middle East

This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to the First World War). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students will focus on how everyday people's lived experiences were affected by the increased monetarization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity.

Same as L22 History 3149

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: HUM, IS EN: H

L75 JIMES 5150 The Middle East in the 20th Century

This course surveys the history of the Middle East since World War I. Major analytical themes include: colonialism; Orientalism; the formation of the regional nation-state system; the formation and political mobilization of new social classes; changing gender relations; the development of new forms of appropriation of economic surplus (oil, urban industry) in the new global economy; the role of religion; the Middle East as an arena of the Cold War; conflict in Israel/Palestine; and new conceptions of identity associated with these developments (Arabism, local patriotism, Islamism).

L75 JIMES 5171 Religion and Culture in South and Southeast Asia

Although it is now common to differentiate between South and Southeast Asia, historically these regions have often been conceptualized as part of a single geographical area. Known as the "(East) Indies", this area is marked by a rich history of (earlier) Hindu and Buddhist influences, as well as (later) Islamic and Christian influences. The present course will take an in-depth look at the four aforementioned religious traditions, and examine how they have shaped local forms of culture in premodern and modern times. Students will be introduced to host of phenomena in South and Southeast Asian societies, including religious worship, education, law, traditional governance, colonial governance, art, architecture, economic production, kinship, gender, and sexuality. Countries to be studied in the course include India, Pakistan, Sri Lanka, Thailand, Myanmar, Indonesia, Malaysia, the Philippines, and Papua New Guinea.

L75 JIMES 5183 The Jews of North Africa

This course examines the colonial and postcolonial experiences of Jews living in North Africa (mainly Algeria, Morocco, Tunisia, Libya and Egypt) in the context of the region's connections with and relationships to the European powers in the 19th and 20th centuries. We will focus on how the intrusion of foreign powers disrupted and shifted long-standing relationships between Jews and their non-Jewish neighbors, particularly the Muslim populations. We will also explore changes that occurred within the Jewish community as Jews negotiated their place within the new European Imperial system and its subsequent dismantling. Students will have the opportunity to engage with European ideas of "regenerating" North African Jews living under Ottoman Rule, the changing political and social statuses of Jews throughout the French and British regions, the changing relationship between Jews and their non-Jewish neighbors, the rupture caused by both World Wars, and how Jews coped with and responded to the dismantling of European empires and the birth of nation-states in the region, including Israel.

L75 JIMES 520 Third-Level Modern Hebrew I

This course is designed to improve students' proficiency in the oral and written use of modern Hebrew through the reading and discussion of short stories, Israeli newspaper articles, and other selected materials. Students will also have an opportunity to discuss, in Hebrew, current events and public issues related to contemporary Israeli society. Prerequisite: Grade of B- or better in L74 214D or placement by examination. Note: L75 520 is intended for graduate students only.

Same as L74 HBRW 320D

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L75 JIMES 5211 Conversational Hebrew

Designed to focus on and strengthen oral proficiency, we will explore a variety of different topics together based on our common interests - not limited to current affairs, space travel and exploration, advances in medical technology, climate change, pandemic preparedness, economic inequality, and the future of work. With each topic, we will learn relevant vocabulary and structures and apply them in small group discussions, individual presentations, simulated interviews, and classroom debates. Students will also listen to different Israeli news reports and documentaries in order to learn how to present at a formal level. The course is designed to simulate a variety of real-life situations, which require the balance of both rehearsal as well as improvisation. By learning Hebrew in different contexts, students will be exposed to a wide range of vocabulary and will be prepared to use the language in a variety of situations. The language of instruction is Hebrew only. PREREQ: Grade of B- or better in L74 214D Intermediate Modern Hebrew II or placement by examination. Please note: L75 5211 is intended for graduate students only.

Same as L74 HBRW 3211

Credit 3 units. A&S IQ: LCD, LS BU: HUM

L75 JIMES 5221 Topics: The Jewish Experience in Italy

This course will examine the social and political history of the Jews of Italy from the period of Italian unification through the end of the Second World War. We will look through two different prisms: first, the constant of Jews' minority status in a Catholic country at a time when Church doctrine was hostile to them and second, their changing status during significant moments in the brief history of the Italian monarchy. Under the latter rubric we will study the rehabilitation of the Jews under liberal political philosophies, their problematic relationship with Fascism, and finally the arrival of the Holocaust in Italy and efforts to defend Jews against Nazi genocide. We will approach these topics wherever possible through primary texts, including essays, memoirs, and novels. Reading knowledge of Italian is not required. Readings in English; some readings in Italian for Italian majors. Discussion in English. Prerequisite for Italian majors: Italian 307D; no prerequisite for students in other majors. Three five-page papers. Note: The L75 5221 cross-listing course is for graduate students only.

Same as L36 Ital 3221

L75 JIMES 5273 Introduction to Israel Studies

An exploration of Israel in the Jewish experience from antiquity to modernity and in the history and culture of the Middle East. Special attention will be paid to the modern state of Israel and current issues in its politics, economy, and society. L75 5273 is intended for graduate students only.

Same as L75 JIMES 3273

Credit 3 units. A&S IQ: HUM BU: IS EN: H

L75 JIMES 5312 Norms, Networks, and Repertoires: The Anthropology of Institutions

We live our lives in social institutions: schools, courts, offices, hospitals, churches, and so forth, each one shaped by norms or rules, in which people form networks and draw on their repertoires for social action. Anthropologists and sociologists study institutions through ethnography, the close study of everyday interactions, albeit also incorporating approaches from politics and economics, and largely shaped by the traditions of social pragmatism. We explore the theoretical and empirical dimensions of an ethnographic and pragmatist approach through readings of Goffman, Foucault, and Bourdieu, and of more recent analyses of schools, courtrooms, immigration police, science laboratories, art, and other institutions.

L75 JIMES 5314 Islamic History: 1200-1800

An introduction to Islamic polities and societies from the Mongol conquests to the 13th century to the collapse and weakening of the colossal "gunpowder" empires of the Ottomans, Safavids and Mughals in the early 18th century. Broadly speaking, this course covers the Middle Period (1000-1800) of Islamic history, sandwiched between the Early and High Caliphal Periods (600-1000) on the one hand and the Modern Period (1800-present) on the other hand. Familiarity with the Early and High Caliphal periods is not assumed. The course will not be a "survey" of this period but a series of "windows" that will allow you to develop both an in-depth understanding of some key features of Islamic societies and a clear appreciation of the challenges (as well as the rewards!) that await historians of the Middle Period. Particular attention is given to the Mamluk and Ottoman Middle East, Safavid Iran and Mughal India.

L75 JIMES 5334 Crusade, Disputation, and Coexistence: Jews in Christian Europe

This course will investigate some of the major themes in the history of the Jews in Europe, from the Middle Ages to the eve of the French Revolution. Jews constituted a classic, nearly continuous minority in the premodern Christian world—a world that was not known for tolerating dissent. Or was it? One of the main purposes of the course is to investigate the phenomenon of majority/minority relations, to examine the ways in which the Jewish community interacted with and experienced European societies, cultures, and politics. We will look at the dynamics of boundary formation and cultural distinctiveness; the limits of religious and social tolerance; the periodic eruption of persecution in its social, political, and religious contexts; and the prospects for Jewish integration into various European societies during the course of the Enlightenment era.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD BU: ETH, HUM, IS EN: H

L75 JIMES 535C Becoming "Modern": Emancipation, Antisemitism, and Nationalism in Modern Jewish History

This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be-or to become-modern. To answer this question, we look at two broad trends that took shape toward the end of the eighteenth century—the Enlightenment and the formation of the modern state—and we track changes and developments in Jewish life down to the close of the twentieth century with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time—from innovation to revolution, exclusion to integration, calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish "emancipation;" acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political and racial antisemitism; mass migration and the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

L75 JIMES 536 History of the Jews in Islamic Lands

This course is a survey of Jewish communities in the Islamic world, their social, cultural, and intellectual life from the rise of Islam to the Imperial Age. Topics include: Muhammad, the Qur'an and the Jews; the legal status of Jews under Islam; the spread of Rabbinic Judaism in the Abbasid empire; the development of new Jewish identities under Islam (Karaites); Jewish traders and scholars in Fatimid Egypt; the flourishing of Jewish civilization in Muslim Spain (al-Andalus); and Sephardi (Spanish) Jews in the Ottoman empire. On this background, we will look closely at some of the major Jewish philosophical and poetical works originating in Islamic lands. Another important source to be studied will be documents from the Cairo Genizah, reflecting social history, the status of women, and other aspects of daily life.

L75 JIMES 545 Mesopotamian Mythology: Stories from Ancient Iraq

In this course we will read, explore, and interpret various ancient myths originating from the fertile crescent, especially ancient Iraq, between the years 2500 and 400 BCE. The Epic of Gilgamesh, the Enuma Elish, myths of the goddess Ishtar as well as various flood and creation accounts will be among those we read. Cultural background information will be examined to situate each myth in its ancient context. Various theories of interpreting myth will also be explored in order to appreciate the power and the many uses of these multivalent stories. Several basic

questions will underlie all that we do throughout the semester: What is myth?, How should we understand the conceptualization of the category "myth" (in other words, How does myth work?), and Does myth still play a role in our own modern cultures?
Same as L75 JIMES 345
Credit 3 units. BU: HUM

L75 JIMES 546 Islamic Law

This course will present a general overview of Islamic law and an introduction to the study of religious legal authority, which values consensus. It will then explore the formation of the major schools of law. Next, it will debate the notions of "ijtihad" and "taqlid" and discuss how open and independent legal decisions have been in the Islamic world. It will also trace the transmission of legal knowledge in religious institutions across time and place by focusing on medieval Muslim societies and by closely examining the education of a modern-day Ayatollah. Note: L75 546 is intended for graduate students only.
Same as L75 JIMES 346
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L75 JIMES 549 Yiddishkayt: Yiddish Literature in English Translation

This course will trace the emergence, development, flourish, and near-decline of Yiddish literature, beginning with some of the earliest writings to appear in Yiddish in the late middle ages and early modern period, continuing with 19th-century attempts to establish a modern Yiddish literature and the 20th-century emergence of both a classical canon and a literary avant-garde, and ending with post-Holocaust attempts to retain a Yiddish literary culture in the near absence of Yiddish-speaking communities. Focusing on the role of Yiddish as the "national" language of Ashkenaz, the course will examine the ways in which Yiddish literature has responded to the social conditions of European Jewish life, exploring among others the relationship between Yiddish and the non-Jewish cultures in which it existed, the tensions between secular trends versus religious tradition, life in the shtetl and in the metropolis, immigration from the old world to the new, and Yiddish literary responses to the Holocaust.
Same as L75 JIMES 349
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: IS EN: H

L75 JIMES 550 Israeli Culture and Society

An examination of critical issues in contemporary Israeli culture and society, such as ethnicity, speech, humor, religious identity, and the Arab population, using readings in English translation from a variety of disciplines: folklore, literary criticism, political science, sociology, psychology, anthropology. Prerequisite: sophomore standing, or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: HUM, IS EN: H

L75 JIMES 5510 Muhammad: His Life and Legacy

This course intends to examine the life and representations of the Prophet Muhammad from the perspective of multiple spiritual sensibilities as articulated in various literary genres from medieval to modern periods. The course is divided roughly into two parts. One part deals with the history of Muhammad and the related historiographical questions. The second part deals with the representations of Muhammad in juristic, theological,

Sufi, etc. literature. Because of the availability of primary sources in English translation, there will be a healthy dose of primary source reading and analysis throughout the semester. Those students with advanced Arabic (and Persian and Turkish) skills will be encouraged to engage sources in their original language.
Same as L75 JIMES 351
Credit 3 units. A&S IQ: HUM, LCD, SC BU: ETH EN: H

L75 JIMES 554 Anthropological and Sociological Study of Muslim Societies

This course introduces students to anthropological and sociological scholarship on Muslim societies. Attention will be given to the broad theoretical and methodological issues which orient such scholarship. These issues include the nature of Muslim religious and cultural traditions, the nature of modernization and rationalization in Muslim societies, and the nature of sociopolitical relations between "Islam" and the "West." The course explores the preceding issues through a series of ethnographic and historical case studies, with a special focus on Muslim communities in the Middle East, Southeast Asia, and Europe. Case studies address a range of specific topics, including religious knowledge and authority, capitalism and economic modernization, religion and politics, gender and sexuality, as well as migration and globalization. Please note: L75 554 is intended for graduate students only.

L75 JIMES 556 Research Seminar for M.A. Students in Jewish, Islamic, and Middle Eastern Studies

This course is meant to support graduate students as they write and revise their M.A. papers for defense in the spring. Central to the undertaking is serious editorial response to others' ongoing research and writing, and the refining effort of revision. Each paper will be work-shopped at least once during the semester. Students will develop their peer-review skills while making progress on their own research. Three credits. Permission of instructor.
Credit 3 units.

L75 JIMES 5581 Musica Ebraica: Jewish Identities in Western Music from 1600 to the 21st century

The course explores Western music from the 17th century to the 21st century through the prism of musical works that were written by Jews and for Jews and of musical compositions reflecting their composers' identifying themselves as Jews. Jewish art music from these periods will be examined against the background of musical development in general, the social, political, and religious context of the composers, and written reflections about Jewish music. Examples of Jewish art music will be analyzed through different approaches in order to determine the cultural interrelationships between Jews and non-Jews, Jewish cultural autonomy, and the perception of Jewishness in music.
Same as L75 JIMES 3581
Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L75 JIMES 5582 Music in Jewish Culture and Society

The common term 'Jewish Music' raises numerous questions that emanate from the difficulty to define 'Jewish' identity of any given music. This course will deal with various approaches to the definition of Jewish music, perceived as a cultural and

sociological component in the Jewish communities throughout the Diaspora. We will survey the functions in which music is performed in traditional Jewish communities, especially Jewish liturgy, and the substantial vicissitudes in these musics after the European Enlightenment, European colonialism in north-Africa, and in the Mediterranean. We will study the background and the different characteristics of selected Jewish communities - Ashkenazic, Sephardic, Italian, Yemenite, and others - as well as instrumental music, questions of gender, and the relationship between music and text." A secondary goal of this course will be the study of the bibliography and discography of Jewish musics. Same as L75 JIMES 3582

Credit 3 units. A&S IQ: HUM, LCD EN: H

L75 JIMES 5583 The Soundtrack of Israeli History

This course explores connections between Israeli history, nationality, and culture, and between Israeli art music. Such an encounter between reveals the reflection of, and responses to, local social developments in various historic and constitutive moments in Israeli history such as: the fifth Aliya (wave of immigration) in the 1930s, the statehood years, the waning of nationalistic sentiments in the late 1950s, the aftermath of Israeli wars, the negotiation between Israeli and Jewish identities, and even artistic expressions of postmodernity within the Israeli context. These histories will be surveyed through historical studies as well as through their musics and against the background of developments in 20th century music.

L75 JIMES 559 Travelers, Tricksters, and Storytellers:

Jewish Travel Narratives and Autobiographies, 1100-1800

Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman. We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an "other," against which and through which they define a particular sense of self? This course is open to students of varying interests, including Jewish, Islamic, or Religious Studies, medieval and early modern history, European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only.

Same as L75 JIMES 359

L75 JIMES 566 The Sephardic Experience: 1492 to the Present

This course explores the history and culture of the Sephardic diaspora from the expulsion of Spanish and Portuguese Jewry at the end of the 15th century to the present. We will start with a brief introduction into the history of Iberian Jews prior to 1492, asking how this experience created a distinct subethnic Jewish group: the Sephardim. We will then follow their migratory path to North Africa, Italy, the Ottoman Empire, the Netherlands, and the Americas. The questions we will explore include: in what sense did Jews of Iberian heritage form a transnational community? How did they use their religious, cultural, and linguistic ties to advance their commercial interests? How did they transmit and transform aspects of Spanish culture and create a vibrant Ladino literature? How did the Sephardim interact with Ashkenazi, Greek, North African, and other Jewish, Muslim, and Christian communities? How did Jewish emigres from Spain and Portugal become intermediaries between Christian Europe and the Ottoman Empire? What was the role of Sephardim in Europe's transatlantic expansion? How did conversos (converts to Christianity) return to Judaism and continue to grapple with their ambiguous religious identity? How did Ottoman and North African Jews respond to European cultural trends and colonialism and create their own unique forms of modern culture? How did the Holocaust impact Sephardic Jewry? The course will end with a discussion of the Sephardic experience in America and Israel today.

Same as L75 JIMES 366

L75 JIMES 56CA Heroes and Saints in India: Religion, Myth, History

This course provides an introduction to the history of modern India and Pakistan through the voices of the Indian subcontinent's major thinkers. We will spend time in the company of saints, from the "great-souled" Mahatma Gandhi to the Sufi scholar Ashraf 'Ali Thanawi, and we will travel alongside the heroes of peasant politics, women's rights, and struggles for national and social freedom and equality. We will immerse ourselves in the rich narrative heritage of India -- as it has been

challenged, reworked, and harnessed for present and future needs -- from the 19th century through the present. Lecture and discussion format; prior knowledge of India or Pakistan not required.

L75 JIMES 577 History of Slavery in the Middle East

This course examines slavery and its abolition in the Middle East and North Africa from 600 C.E. to the 20th Century. It addresses slavery as a discourse and a question of political economy.

We begin with an overview of slavery in late antiquity to contextualize the evolution of this practice after the rise of Islam in the region. We then examine how it was practiced, imagined, and studied under major empires, such as the Umayyads, the Abbasids, the Fatimids, the Mamluks, the Ottomans, and the Safavids. In addition to examining the Qur'anic discourse and early Islamic practices of slavery, to monitor change over time we address various forms of household, field, and military slavery as well as the remarkable phenomenon of "slave dynasties" following a chronological order. We discuss, through primary sources, theoretical, religious, and moral debates and positions on slavery, including religious scriptures, prophetic traditions, religious law, and a plethora of narratives from a range of genres. We highlight a distinct theme each week to focus on until we conclude our discussion with the abolition of slavery in the 19th and 20th centuries. Topics of discussion include various forms of male and female slavery, Qur'anic and prophetic discourse on slavery, legal and moral views on slavery, slavery as represented in religious literature, political, military, and economic structures of slavery, issues of race and gender as well as slave writings to reflect on the experiences of slavery from within. The goal is to enable students to understand the histories of slavery in the Middle East and eventually compare it to that of other regions and cultures, such as European and Atlantic slavery. No second language required.

L75 JIMES 5810 Between Sand and Sea: History, Environment, and Politics in the Arabian Peninsula

Although it is today primarily associated with oil, the Arabian peninsula was for most of its history defined by water: its surrounding seas, its monsoon-driven winds, and its lack of water in its vast and forbidding interior deserts. As home to the major holy cities of Islam and a key source of global oil, the region has played an important role in the Western European and North American imagination. Despite being relatively sparsely populated, the peninsula hosts millions of believers each year on the annual Muslim pilgrimage, and it has been the site of major wars and military occupations by European, American, and other Middle Eastern countries for much of the 20th and 21st centuries. It has been an outpost of the Ottoman Empire, a center of British colonialism and (at Aden) an axis of its global empire, the location of Egypt's "Vietnam" (its long war

in Yemen in the 1960s), the Gulf Wars I and II, and the recent wars in Yemen, to name just a few of the major conflicts. Often depicted as unchanging until caught up by the influx of massive oil wealth, this region is frequently characterized as a place of contradictions: home to some of the world's largest skyscrapers and also the most inhospitable and largest sand desert in the world, known as "the Empty Quarter"; the location of crucial American allies and the home of al-Qaeda founder `Usama Bin Laden. In this course, we will examine the development of the peninsula historically to understand these contradictory images. We will investigate changes in the following arenas: environment and society; colonial occupation; newly independent states; the demise and development of key economic sectors (pearling; shipping; agriculture; oil; finance; piracy); political regimes; resources such as water, oil, and date palms; the growth of oil extraction infrastructure and its effects on the political regimes and societies in the region; the emergence of new Gulf cities; Islamic law; women's rights; human rights debates; and religious and ethnic minorities.

Korean

The Department of East Asian Languages and Cultures (EALC) offers a major and minor in East Asian Languages and Cultures that allows cross-cultural and interdisciplinary approaches to the study of East Asia. Students can choose either to focus in one of our three linguistic and cultural traditions — Chinese, Japanese, and Korean — or to explore different traditions and societies by taking courses in multiple regions. Our major opens up career opportunities in diplomacy, business, law, journalism, and higher education, in addition to providing preparation for further study in the relevant languages and cultures. The major entails advanced training in the chosen language and a sound background in the respective literature and culture. Students are encouraged to enhance their cultural knowledge by enrolling in relevant courses offered through other departments and programs such as Anthropology, Art History, Film and Media Studies, History, Global Studies, Performing Arts, and Religious Studies.

For information about the major, please visit the EALC Majors page (p. 508).

For information about the minor, please visit the EALC Minors page (p. 509).

Language Placement: Placement tests are required for all students entering our language programs, with the exception of those students who have had no previous exposure to the language and wish to enroll in the first semester of the first year of instruction. Students who test into second-year Korean and satisfactorily complete (with a grade of B- or better) at least one semester of language study may petition for 3 units of retroactive credit; students who test into third year or above and satisfactorily complete (with a grade of B- or better) at least one semester of language study may petition for 6 units of retroactive credit. Credit is limited to 3 units for those testing into second year and 6 units for those testing into the third year or above. Please note that students with native language proficiency as determined by the Korean language section, as well as students who enroll in courses below their placement level, are ineligible for retroactive credit units. Students who misrepresent their language proficiency so as to gain entrance into a course at the elementary or intermediate level will be dropped from that course.

L51 Korean 107 Basic Korean I

Basic Korean I is a slower-paced class that covers half of the content of First-Level Modern Korean I (L51 117D). This course is designed for students who are interested in learning Korean language but who cannot commit the time required for the regular 5-credit class. The course emphasizes the acquisition of all four areas of language function — listening, speaking, reading, and writing — as well as intercultural competence. After completing Basic Korean I in the spring semester, students can enroll in Basic Korean II in the fall semester. Upon completion of Basic Korean II, students can join First-Level Modern Korean II (L51 118) in the spring semester. Basic Korean I and Basic Korean II do not fulfill the language sequence requirement. Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L51 Korean 108 Basic Korean II

Basic Korean II is the second course in the slower-paced Basic Korean language curriculum sequence that will cover the content of the second half of First level modern Korean 1 (L51 117D). This course is designed for students who are interested in learning the Korean language but cannot commit the time for the regular five-credit class, Korean 117D. This course will use the same textbook and learning materials that are used for the First level modern Korean 1 (L51 117D) class. The course emphasizes the acquisition of all areas of language function: listening, speaking, reading, and writing as well as intercultural competence. Upon completion of Basic Korean II, students can join the First level modern Korean 2 (L51 118) in the spring semester. Basic Korean 1 and Basic Korean 2 do not fulfill the language sequence requirement, nor the two-semester language requirement for the EALC minor. Prerequisite: L51 107 (grade of B- or better) or placement by examination. Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L51 Korean 117D First-Level Modern Korean I

This course is an introduction to the modern spoken and written language of Korea, providing acquisition of the fundamentals of grammar, morphology, and oral communication skills. Note: students with some previous Korean language background must take the placement examination. Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L51 Korean 118D First-Level Modern Korean II

This course places emphasis upon the understanding, speaking, reading, and writing of Korean. Continuation of the acquisition of the fundamentals of grammar and morphology. Prerequisite: L51 117D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L51 Korean 150 First-Year Seminar: Exploring East Asian Classics

This first-year seminar introduces students to major works of the Chinese, Korean, and Japanese traditions. Although written centuries in the past, these texts still reverberate with meaning today and offer important means to understand the often chaotic and confusing events occurring daily around us. What is the self? What is the relationship between the individual and society? How do we live an ethical life? What is literature and for whom is it intended? In grappling with these questions, we will directly engage with the texts through close reading and in-class discussion. We will, at the same time, also ask broader questions that concern how knowledge is produced, spread, and consumed: what is a canon? Who are the gatekeepers? What does it mean to approach East Asia through a set of "canonical" texts? Among the texts considered this term will be The Analects, Daodejing, Lotus Sutra, Tale of Genji, Tales of the Heike, Tales of Moonlight and Rain, Samguk yusa, and Memoirs of Lady Hyegyong. This course is for first-year, non-transfer students only.

Same as L04 Chinese 150

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: BA EN: H

L51 Korean 217 Second-Level Modern Korean I

This is the second year course in standard modern Korean. Emphasis is placed upon speaking, reading, and writing of modern Korean. Prerequisite: L51 118D (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L51 Korean 218 Second-Level Modern Korean II

This is the continuation of the second year course in standard modern Korean. Prerequisite: L51 217 (grade of B- or better) or placement by examination.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L51 Korean 223C Korean Civilization

This course is a comprehensive introduction to the study of Korea. Following a historical survey, the course examines key cultural themes and social institutions and explores aspects of Korea's relationship with its East Asian neighbors. Attention is also be paid to contemporary issues, social problems, and cultural trends.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: IS EN: H

L51 Korean 298 Korean Undergraduate Teaching Assistants

In this course undergraduate students with native or near native proficiency in Korean assist in the first, second, and third level modern Korean language classes by serving as one-on-one session tutor, lab drill and practice session tutor, or discussion leader under close supervision of the faculty. Students can only enroll in the class with permission from the faculty member. Interested student must contact Heayoung Chen (hchun@wustl.edu) for information.

Credit 1 unit.

L51 Korean 2980 Undergraduate Internship in Korean

Students receive credit for a faculty-directed and approved internship. Registration requires the completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities (e.g., eight to 10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours). Credit/no credit only. Credit variable, maximum 3 units.

L51 Korean 299 Independent Study

Prerequisite: Permission of instructor.

Credit variable, maximum 6 units.

L51 Korean 340 Writing New Horizons: Explorers, Envoys, and Other Encounters in Korean Travel Narratives

Whether physical or imagined, travel evokes notions of center, periphery, boundary and identity that shape the world we live in. This seminar course uses travelogues as well as literary, visual and cinematic representations of travels relating to Korea to explore how travel, art and imagination together help constitute one's sense of place. The course approaches travel from three angles. First, it examines writings by Korean authors on domestic, interregional, and international travels from premodern to modern times. Such works offer a frame for tracing conceptualizations of self and other through topics including diaspora, refugee crisis, migrant workers, political exile, prisoners of war, and others. The course also looks at stories of travel to Korea by non-Korean authors in order to see how "Korea" was perceived in various times by people outside the country. Lastly, through imagined journeys typically labelled as "sci-fi" or "fantasy", it examines notions of "truthful" and "realistic," and considers the function of the fantastic and storytelling and their relation to the world we live in. For their final project, students will create a map of real or fictional travels based on material covered in class. Using Digital Humanities tools such as StoryMaps (ArcGIS), Carto, or MyMaps (Google), they will also produce itineraries and narratives to accompany the maps, and present these results online. Necessary technical assistance will be provided by the GIS team at Olin Library throughout the semester. All reading in English. Prior knowledge of Korean language or culture may be helpful but is not required. Same as L81 EALC 340

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS

L51 Korean 352 Literature of Modern and Contemporary Korea

This undergraduate course surveys the major writers and works of 20th century Korean literature. During the 20th century Korea went through a radical process of modernization. From its colonization by Japan, to its suffering of a civil war within the cold war order, to its growth into a cultural and economic powerhouse, Korea's historical experience is at once unique and typical of that of a third-world nation. By immersing ourselves in the most distinctive literary voices from Korea, we examine how the Korean experience of modernization was filtered through its cultural production. The course pays special attention to the writers' construction of the self and the nation. How do social categories such as ethnicity, class, gender, and race figure in the varying images of the self? And how do these images relate to the literary vision of the nation? Along the way, students observe

the prominent ideas, themes, and genres of Korean literature. This class combines lecture with discussion, in which students are strongly encouraged to participate. All literary texts are in English translation and no previous knowledge of Korean is required.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: ETH, IS EN: H

L51 Korean 370 When Tigers Smoke: Songs and Stories from Traditional Korea

This course has two purposes: (1) to introduce major works and topics in Korean classical literature and the cultural world in which they were produced and (2) to explore modern reimaginings of these historical works and events and wider context through contemporary literature and film. The former involves a journey through various genres, including foundation myths, songs, biographies, essays, poetry, fiction, memoirs, letters and oral performance, all produced before the 20th century. For a modern perspective, the course turns to films, dramas, cartoons and short stories, which serve as the basis for discussing the modern recreations of historical events, characters, and Korean culture more broadly. In addition to details of the works themselves, topics will include Korea's place in the context of a Sino-centric world order; the significance of two writing systems, hanmun (literary Chinese) and han'gul (Korean vernacular writing); gender and literary practice; and the dynamic relationship between tradition and creativity. No knowledge of Korean history or language is required. All readings in English.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L51 Korean 390 EALC Seminar: East Asian Buddhism

This course traces the expansion of Buddhism from its origins in the Indian subcontinent through China, Korea and Japan, identifying both continuities and local developments as seen in the encounter/clash with preexisting traditions. We will adopt a multidisciplinary approach and explore the history, literature, philosophy, and practice of Buddhism in East Asia. Primary readings (all in English) are drawn from a wide range of genres -- canonical scriptures, tale literature, hagiographic narratives, and archeological materials. We will also rely extensively on the rich visual and material heritage of Buddhism, looking at common iconographical motifs, popular deities and their many forms, and the ritual function of Buddhist objects in their respective contexts. This course is primarily for sophomores and juniors with a major or minor in the Department of East Asian Languages & Cultures. Other students may enroll with permission. No prior course work on Buddhism or East Asia is required.

L51 Korean 417 Third-Level Modern Korean I

This is the third-year course in standard modern Korean.

Emphasis is placed upon reading and writing of modern Korean.

Prerequisite: L51 218 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L51 Korean 418 Third-Level Modern Korean II

This is the continuation of the third-year course in standard modern Korean. Emphasis is placed upon reading and writing.

Prerequisite: L51 417 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L51 Korean 420 Nature, Technology, and Medicine in Korea

This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary-or what historians dub "early modern" and "modern." Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and fauna, colonial Koreans became biologists, nurses, and "Edisons," and in North and South Korea, new professionals created distinctive-and in some cases, globally-competitive-regimes of knowing, making, and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be "modern" in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to have taken Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Course also counts as a EALC capstone course. Prerequisite: junior level or above or permission of instructor.

Same as L81 EALC 420

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:

ETH

L51 Korean 427 Fourth-Level Modern Korean I

This is the fourth-year course in standard modern Korean (advanced level). Emphasis is placed on developing proficiency in all four areas of language skills (speaking, listening, reading, and writing) beyond the intermediate level. Prerequisite: L51 418 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: IS EN: H

L51 Korean 428 Fourth-Level Modern Korean II

This is the continuation of the fourth-year course in standard modern Korean. Emphasis is placed upon the further development of speaking, listening, reading, and writing, beyond the intermediate level. Prerequisite: L51 427 (grade of B- or better) or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L51 Korean 437 Contemporary Korean I: From Everyday Life to Professional Life

This is an advanced to high-advanced level Korean course in standard modern Korean. Emphasis is placed on developing an advanced level of reading proficiency in Korean and writing ability in Korean for an academic or professional purpose.

Prerequisite: L51 428 (grade of B- or better) or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: IS EN: H

L51 Korean 438 Contemporary Korean II

This is the continuation of Korean 437. It is an advanced to high-advanced level Korean course in standard modern Korean. Emphasis is placed on developing an advanced level of reading proficiency in Korean and writing ability in Korean for an academic or professional purpose. Prerequisite: L51 428 (grade of B- or better) or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L51 Korean 455 Topics in Korean Literature and Culture: Gender in Korean Literature and Film

This course looks in depth at issues regarding women and gender in Korean literature and film. While it explores literary and cinematic representations of gender, the main goal of the class is to examine literature and film as sites for the very construction of gender. Readings include contemporary literary and theoretical works, as well as historical texts from the Colonial period (1910-1945) and the Choson dynasty (1392-1910), in order to understand women's issues in the context of historical development. Through textual criticism and theoretical readings, some of the questions to be discussed are: What is "feminine" and "masculine" in Korean culture, and how do they change (if they do)? How do these formations and changes relate to literary and cinematic portraits of gender on one hand and to gendered conceptions of literature and cinema on the other? How do socio-historical circumstances affect representations of gender? All readings are in English. Prior course experience in literature, film, or gender studies recommended. Prerequisite: Junior level or above or permission of instructor.

Credit 3 units. A&S IQ: LCD EN: H

L51 Korean 495 Guided Readings in Korean

This course is normally be taken after successful completion of Korean 418 or by instructor's permission. May be repeated once. Prerequisite: Permission of instructor.

Credit 2 units.

L51 Korean 497 Guided Readings in Korean

This course is normally be taken after successful completion of Korean 418, or by instructor's permission. May be repeated once. Prerequisite: Permission of instructor.

Credit variable, maximum 3 units. EN: H

Latin

The Department of Classics offers courses in Latin to allow students to pursue deeper study of Roman history, literature, and culture. After two semesters mastering the grammar, students are able to read authors such as Caesar, Ovid, Catullus, and Cicero. Students who have studied Latin in high school may take a placement exam to begin their studies in more advanced

courses. Advanced courses in Latin explore many types of texts, including poetry of various kinds, drama, history, biography, letters, and novels. Students have the opportunity to do their own research and to assist with faculty members' research projects.

The Department of Classics also offers a variety of courses in Greek and Roman history, literature, archaeology and culture to build students' broader knowledge of the ancient Mediterranean world. Resources on campus that support the study of Latin and the Romans include the Wulfinf Coin Collection, which is one of the largest collections of ancient coins owned by an American university; rare books and papyri in Olin library; and works of art in the Kemper Museum.

Additional Information

Study Abroad: Washington University is associated with both the Intercollegiate Center for Classical Studies (https://sa.wustl.edu/?FuseAction=Programs.ViewProgram&Program_ID=10117) (a.k.a. "The Centro") in Rome and the College Year in Athens program (https://sa.wustl.edu/?FuseAction=Programs.ViewProgram&Program_ID=10112). Certain other study abroad programs also allow students to earn credit in Latin. Students interested in these programs should contact Professor Cathy Keane (<https://classics.wustl.edu/people/cathy-keane/>).

Phone: 314-935-5123
Email: classics@wustl.edu
Website: <http://classics.wustl.edu>

Faculty

For a list of faculty who teach Latin, please visit the Department of Classics faculty page (p. 442).

Majors

Students interested in Latin should explore either the major in Classics (p. 443) or the major in Ancient Studies (p. 443) offered through the Department of Classics (p. 442).

Minors

Students interested in Latin should explore either the minor in Classics (p. 444) or the minor in Ancient Studies (p. 444) offered through the Department of Classics (p. 442).

Courses

Visit online course listings to view semester offerings for L10 Latin (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L10&crslvl=1:4>).

L10 Latin 101D Beginning Latin I

An introduction to Latin, the language of Ancient Rome and the European Middle Ages and Renaissance, and the most important source of English medical and scientific terms. Beginning with the foundations of Latin grammar, students work toward developing reading knowledge with the goal of reading literary texts. Students who have already begun their study of Latin should consult the chair of the department.
Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L10 Latin 102D Beginning Latin II

Continuation and completion of the program begun in Latin 101D. Prerequisite: Latin 101D or equivalent or permission of instructor.
Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L10 Latin 301 Introduction to Latin Literature I

Review of Latin grammar and syntax and development of reading skills and translation techniques through short readings from original texts in prose and poetry such as Caesar and Ovid. Prerequisites: Latin 102D or Latin 190D, placement by examination, or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

L10 Latin 3161 Introduction to Latin Literature II: Elementary Prose and Poetry

Appreciation of literary forms through study of selected elementary literary texts in Latin prose and poetry. Prerequisite: Latin 301, placement by examination or permission of the instructor.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

L10 Latin 3171 Survey of Latin Literature: The Republic

A sampling of the major literary achievements of the last two centuries of the Roman Republic, including prose and verse authors. Readings are typically drawn from Catullus, Lucretius, Caesar, and Cicero. There will be regular, selective grammar review and discussion of translation strategies. Prerequisite: Latin 102D or Latin 190D with a grade of B+ or better, or Latin 301 and Latin 3161, or placement by examination.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

L10 Latin 3181 Survey of Latin Literature: The Empire

Readings in the verse and prose literature of the Roman Empire, particularly its first two centuries, with targeted grammar review and stylistic analysis. Readings may be drawn from Vergil, Livy, Suetonius, or other appropriate authors. Prerequisite: Latin 102D with a grade of B+ or better, or Latin 301, or Latin 3161, or placement by examination.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: HUM EN: H

L10 Latin 370 Topics in Latin Literature

Study in selected problems, eras or generic sequences; specific topic for each semester in course listings. May be repeated for credit for study of different topics. Prerequisites: Latin 318C or permission of instructor.
Credit 3 units. A&S IQ: HUM BU: HUM

L10 Latin 400 Independent Study

Credit 3 units. EN: H

L10 Latin 415 Cicero

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

L10 Latin 416 Seneca

The tragedies of Seneca are fascinating works in themselves and have had a profound influence on modern theatre and literature. In this class we will read one or more plays of Seneca in Latin as well as scholarly works on the tragedies. Among the topics discussed will be the tradition of tragedy in Rome, questions of performance, and Seneca's responses to the politics and philosophy of his age. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

L10 Latin 4161 Seneca: Philosopher and Friend

Seneca the Younger was a philosopher, politician, playwright and propagandist; he rose from the province of Spain to become tutor and adviser to Nero, only to fall from favor and commit suicide at the emperor's command. We will study Seneca's life and works, focusing on the *Epistulae Morales* and select philosophical treatises. We will pay special attention to issues of language and style, cultural and historical context, and ideological and philosophical content. Prerequisites: Latin 3171 and Latin 3181 (or equivalent) and sophomore standing or above.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

L10 Latin 4215 Plautus

Readings from the comedies of Plautus. Discussion of play production in Republican Rome, reception and interpretation. The advanced-level Latin reading load is supplemented by secondary readings, quizzes and short reports. Prerequisites: Latin 3171 and Latin 3181 (or equivalent) and sophomore standing or above.
Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN: H

L10 Latin 422 Lucretius

In this course, we will read selections from Lucretius' epic-didactic poem ON THE NATURE OF THINGS. The poem explains the basic tenets of Epicurean philosophy with a focus on the physical structure of the universe, the nature of the soul, and why we shouldn't fear death. There are many things in Lucretius that feel scientific in a modern sense, such as atomism and the absence of the gods. In fact, he has been accused of inspiring the Scientific Enlightenment, a charge we will acquit him of in this class. Special attention will be given to how Lucretius uses myth and poetry, the influence of earlier Roman epic poets such as Ennius, and his relationship with earlier Greek sources. No prior knowledge of Epicureanism or any philosophy is necessary; Lucretius will be happy to explain everything to you. PREREQUISITES: LATIN 3171 and LATIN 3181 (OR EQUIVALENT) AND SOPHOMORE STANDING OR ABOVE.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU:
HUM EN: H

L10 Latin 431 Vergil: The Aeneid

We will read books 2 and 3 of the Aeneid, in which Aeneas relates the fall of Troy and the strange series of events that leads him to Carthage and Dido. In addition to close analysis of Vergil's poetic practice in the context of the poem as a whole, we will consider ways in which he engages his epic forebear Homer. Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM BU: HUM EN: H

L10 Latin 432 Horace

This course examines Roman poetry that illuminates ancient and still-influential ideas about the functions of literature. Horace's monumental "Ars Poetica" and his other literary-critical works will be the major texts. These works convey the complexity of contemporary debates about literature's role in society and history and about the merits of various genres (epic, tragedy, comedy, satire, epigram). Readings in secondary sources will help to fill out the picture of Horace's career and of the climate of literary production in early Imperial Rome.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU:
HUM EN: H

L10 Latin 433 Ovid

In this course, we will read selections from the monumental and multifaceted "Metamorphoses of Ovid," which was composed before the poet's exile from Rome in 8 CE. Supplementary readings from Ovid's elegiac verse will give us a fuller picture of the poet's career and cultural context. Substantial daily Latin readings will be supplemented with practice of scansion, additional readings from related ancient works, and readings from modern scholarship on the poem. There will be regular translation quizzes, a final exam, student presentations, and a final research and writing project. Prerequisites: Latin 3171, Latin 3181 (or equivalent), and sophomore standing or above.

Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H

L10 Latin 441 Roman Satire

This course focuses on the genre of hexameter satire represented by the Roman poets Lucilius, Horace, Persius, and Juvenal (second century BCE - second century CE). The Roman professor Quintilian called satire "entirely Roman" (tota nostra), and our readings will allow us to explore the meaning of this claim for satire's authors and readers. We will read a large sampling of satiric verse in the original Latin, practice reading the dactylic hexameter, and observe and discuss differences between the poets' styles and themes. We'll also read and discuss scholarship on the genre's formal characteristics and influences, its origins in Republican literary culture, and its development in the Imperial period.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN:
H

L10 Latin 444 Latin Prose Composition

Readings in select authors coupled with Latin composition, primarily in prose but occasionally in verse, with attention to grammatical and idiomatic accuracy as well as elegance of style.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN:
H

L10 Latin 465 Silver Latin Epic: Lucan

Lucan's epic poem about the civil war between Caesar and Pompey, written under Nero, investigates themes of individuality, citizenship, morality, and historical inevitability in Roman history. We will read selections from the poem, focusing on Lucan's literary models and poetic style; his treatment of the past and of historical figures like Caesar, Pompey and Cato; and Lucan's place in the political, philosophical and literary world of Neronian Rome. Prerequisites: Latin 3171 and Latin 3181 (or equivalent) and sophomore standing or above.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU:
IS EN: H

L10 Latin 471 Elegiac Poetry

Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM EN: H

L10 Latin 493 Readings in Latin Prose: Apuleius

A survey of the major genres of Latin prose, history, oratory and philosophy. Authors may include Caesar, Cicero, Seneca, Tacitus. Aim is to develop reading facility and understanding.

Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM EN: H

L10 Latin 494 Topics in Latin Literature

This course involves the study of selected problems, eras, or generic sequences; the specific topic for each semester can be found in the Course Listings. The course may be repeated for credit for the study of different topics.

Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM EN: H

L10 Latin 496 Tacitus

Tacitus, the great historian and orator of the late first and early second centuries CE, is one of our best sources for the early history of the Roman Empire. With his concise style and scathing political insight, Tacitus' writings influenced later authors from Ammianus Marcellinus to Macchiavelli. We will read selections from Tacitus' historical works, paying particular attention to: prose style; genre, rhetoric and historiography; and Tacitus' critique of the Principate. Prerequisites: Latin 3171 and Latin 3181 (or equivalent) and sophomore standing or above.

Credit 3 units. A&S IQ: HUM, LCD, LS Art: HUM EN: H

L10 Latin 4961 Topics in Empire Latin

May be repeated for credit for study of different topics.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM EN:
H

L10 Latin 4963 Martial

Martial, the prolific first-century Latin poet, left behind 15 books of poetry. Martial's epigrams can be witty, sincere, caustic, and often quite sexually explicit. In this course, we will read a selection of Martial's epigrams in Latin, and we will discuss various themes related to Martial's work, such as gender and sexuality, ancient conceptions of authorship and publishing, flattery, invective, and the many personae Martial adopts. We will also pay close attention to Martial's language and style, and we will discuss where Martial fits into the wider social and historical context.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L10 Latin 497 Honors Course I

Students interested in pursuing honors should consult the director of undergraduate studies in the Department of Classics.
Prerequisite: overall GPA of 3.65.

Credit 3 units. A&S IQ: HUM EN: H

L10 Latin 498 Honors Course II

Students interested in pursuing honors should consult the director of undergraduate studies in the Department of Classics.
Prerequisite: overall GPA of 3.65.

Credit 3 units. A&S IQ: HUM EN: H

Latin American Studies

Latin American Studies (LAS) is a gateway to the region and its cultures, politics and history. The major in LAS can be studied on its own, providing knowledge about a region valuable for employers across different fields and industries. Focusing on Latin America allows students to engage with one of the most fascinating historical trajectories in the world; to explore diverse cultures where the traditional and the modern are always negotiating; and to participate in vibrant business, intellectual and political scenes. Latin America is a region at the forefront of policy reform, embedded in the complex networks of global economics, development, social engagement and cultural expression. Because of the region's importance, the LAS major provides key skills for today's jobs.

A major or minor in LAS is also an excellent complement to any other major program. Latin America is the location of major U.S. trade partners, and Latin American immigrants constitute the largest segment of market growth in the United States, including in the major economic markets of Boston, California, New York, Chicago, Texas and Florida. This makes the LAS major a great companion to a business degree. In this world, business majors and MBA graduates with an LAS background have a comparative advantage in the world market, as large corporations seek executives with a better understanding of the region's complex social, cultural and economic issues.

Pre-medical students and public health majors will find value in the fact that the growing Latino population and the diverse Latin American peoples are two major topics in the health care field. Majors in global studies, political science, economics and other social sciences can complete their studies by becoming experts in one of the most economically and politically complex regions in the world; Latin America is a true policy laboratory. Scientists of all disciplines work in the region's spectacular biodiversity. LAS students can attend study abroad programs across the region, earn credit, and explore any field of study.

Latin America offers an increasing number of study abroad and fellowship opportunities. At Washington University, we have in place in-house programs in Chile, Mexico and Ecuador, with other countries forthcoming. Some of our students apply to other programs and fellowships with environmental, political and social organizations in the region. NGOs and institutions such as

Fullbright, Comexus, the Ford Foundation, Human Rights Watch, and Greenpeace have a strong presence in Latin America, and students with a Latin American background have a wide array of fellowship and internship opportunities available to them.

Given these reasons and more, Washington University students are more encouraged to look into LAS with each passing day. In the job market, in the academic field, and in the world at large, Latin America is the way to go! LAS alumni have gone on to work in the coffee industry, at the Center for International Policy, and at other nonprofit think tanks; they have also pursued graduate degrees in such fields as international relations and public policy.

Majors

The Major in Latin American Studies

The major in LAS allows undergraduate students to pursue an in-depth study of Latin America across diverse disciplines, theoretical approaches and historical periods. Through regular courses, seminars and additional activities such as film series,

programs abroad, lectures, and the like, students will explore the processes that resulted in the integration of the so-called New World and Western civilizations, from the discovery of America to the present. An essential aspect of this major is the focus on economic, social and political dynamics corresponding to intercultural relations developed between indigenous cultures, Creole societies, and European and North American nations.

This aspect of the major stresses the study of social change, migration, social movements, multiculturalism, inequality, violence and social justice, and it combines regional analysis with critical interdisciplinary approaches. The program of study combines the analysis of urban environments; issues of education, gender, language and ethnicity; and modernization and border studies. It emphasizes transatlantic approaches as well as the study of topics related to autochthonous cultures in their conflictive interaction with Western traditions, systems of domination, values and economic/political projects.

Focusing on Latin America allows students to engage with a fascinating historical trajectory that promotes a multifaceted reflection on colonialism, diversity issues, economic development and international relations. The major has been designed to provide students with a historical background that will be instrumental both in itself, as an exciting field of specialization, and in combination with their pursuit of other fields of inquiry, such as international relations, business, globalization, and the like. Latin America is a region embedded in the complex networks of global economics, development, social engagement and cultural innovation.

The LAS major offers a sound, updated and competitive approach to the study of the region, both in its specificity and in its connections to the world, through the study of Latin America's processes of internationalization and its changing position in global scenarios. This major has also been designed to further contribute to the university mission of improving engagement with race, ethnicity and diversity.

Credit Requirements

The major in LAS requires students to complete 30 credits. At least 24 units must be at the 300 level or higher, and at least 9 units must be at the 400 level. All credits must be exclusive to the major and may not be double counted, unless the College of Arts & Sciences regulations state otherwise. Credits must be fulfilled as follows:

- 3 units for the successful completion of LatAm 165D Latin America: Nation, Ethnicity and Social Conflict, offered annually. LatAm 165C can also fulfill this requirement.
- 3 units for the successful completion of an elective introductory class at the 100, 200 or 300 level. Classes that fulfill this requirement must meet the approval of the director of undergraduate studies (DUS). This requirement may also be fulfilled with an approved course abroad or with a 300-level elective approved by the DUS.

- 3 units in history or politics at the 300 level or higher. Courses may come from relevant offerings in the departments of History or Political Science, the Global Studies program, or study abroad. Courses must be cross-listed with LatAm (L45) or approved by the DUS. Existing examples of courses include but are not limited to the following:
 - **Political Science:** LatAm 326B Latin American Politics (offered annually); LatAm 4231 Contemporary Issues in Latin America (every two years)
 - **History:** LatAm 321C Introduction to Colonial Latin America until 1825 (annually); LatAm 322C Modern Latin America (annually); LatAm 3220 Modern Mexico (every two to three years)
 - **Global Studies:** LatAm 356 Andean History: Culture and Politics (annually); LatAm 4201 International Relations of Latin America (annually); LatAm 4661 Populism and Neopopulism in Latin America (annually); LatAm 4660 Geographies of Development in Latin America: Critical Perspectives and Contemporary Challenges (annually)
- 3 units in literary or cultural studies at the 300 level or higher. These may include courses offered by the departments of Romance Languages and Literatures, Art History, and Archaeology; LAS home-based courses; and study abroad. Courses include but are not limited to LatAm 343 Latin American Literatures and Cultures (every semester); LatAm 331 Hispanic Art/Arte Hispano (annually); LatAm 3800 Survey of Hispanic Cultures; LatAm 4500 Seminar on Hispanic Cultures; LatAm 381 Mexican Visual Culture; and LatAm 3824 Film and Revolution in Latin America.
- 3 units in anthropology or pre-Columbian cultures at the 300 level or higher. These courses may come from offerings in the anthropology department or study abroad. These include LatAm 3351 The Ancient Maya: Archaeology and History (annually); LatAm 3092 Indigenous Peoples and Movements in Latin America (annually); LatAm 3093 Anthropology of Modern Latin America; and Anthro 3093 Anthropology of Modern Latin America.
- 9 units of elective credit at the 300 level or higher. At least 3 of these units must be fulfilled at the 400 level. 3 units of elective credit may be fulfilled through an honors thesis (LatAm 486) or a special project (LatAm 425).
- 6 units of a Latin American seminar. Seminar courses are 400-level classes designed as such that are taught by core LAS faculty on theoretical issues related to the region. These include LatAm 461 Latin American Cultural Studies: Critical and Theoretical Approaches; LatAm 457 Gender and Modernity in Latin America; LatAm 463 Seminar on Urban Cultures in Latin America; LatAm 464 Nation and Desire in Latin America; and LatAm 483 Bodily Injuries: Violence, Gender and Representation in Latin America.

Capstone. Prime majors in LAS must fulfill their capstone requirement by writing an honors thesis (if the student meets the College of Arts & Sciences requirements to do so), writing a Latin American research paper (LatAm 425), or completing the two LAS seminar courses with a grade of B+ or better.

Language requirement. LAS requires all majors to complete a language requirement in Spanish or Portuguese. The Spanish requirement may be fulfilled by the completion of Span 302, Span 3021 or certification as a native speaker by the Spanish DUS.

The Portuguese requirement may be fulfilled as follows:

- Successful completion of Reading and Conversation II: Intermediate Portuguese (Portug 220) with a grade of B- or higher
- Native or heritage speaker status, as determined by the DUS in LAS or Spanish
- Successful completion of a program abroad, conducted in Portuguese, with a minimum of 3 credit units in the target language

Study Abroad

All majors in Latin American Studies must complete at least a study abroad experience in Latin America. This requirement may be fulfilled by the completion of a summer or semester program in the region approved by the Office of Overseas Programs.

Students who attend study abroad programs may request credit for appropriate courses at the 300 level, with approval from the DUS. A maximum of 9 credits for one semester (or equivalent) of study abroad or of 12 credits for more than one semester is allowed. LatAm 165D and 400-level credit must be completed in residence at Washington University.

Students unable to attend a study abroad program may complete an additional 3 units of 300-level elective credit instead.

Minors

The Minor in Latin American Studies

The minor in LAS allows undergraduate students pursuing other major programs to complement their existing curriculum with a study of Latin America across diverse disciplines and of the way in which the region engages with the Western world — to which it belongs — at large. The minor in LAS is conceived as an option for students across a variety of disciplines in the social sciences, the humanities, the sciences, the pre-med program, and business and engineering to add knowledge about Latin America to their professional portfolio. The vast relations that the United States has with Latin America in all fields make

the minor in LAS the source of valuable skills for our existing population. It also allows students in other major programs to access discussions of socioeconomic and ethnic diversity in one of the regions central to those debates in the world.

Credit Requirements

The minor in Latin American Studies requires students to complete 18 credits. At least 15 units must be at the 300 level or higher, and at least 3 units must be at the 400 level. All credits must be exclusive to the minor and may not be double counted, unless the College of Arts & Sciences regulations state otherwise. The requirements for the minor mirror some of the requirements for the major. Credits must be fulfilled as follows:

- 3 units for the successful completion of LatAm 165D Latin America: Nation, Ethnicity and Social Conflict, offered annually. LatAm 165C can also fulfill this requirement.
- 3 units in history or politics at the 300 level or higher. Courses may come from relevant offerings in the departments of History or Political Science, the Global Studies program, or study abroad.
- 3 units in literary or cultural studies at the 300 level or higher. These may include courses offered by the departments of Romance Languages and Literatures, Art History, and Archaeology; LAS home-based courses; and study abroad.
- 3 units in anthropology or pre-Columbian cultures at the 300 level or higher. These courses may come from offerings in the anthropology department or study abroad.
- 3 units of elective credit at the 300 level or higher.
- 3 units of a Latin American seminar. Seminar courses are 400-level classes designed as such that are taught by core LAS faculty on theoretical issues related to the region.

Language requirement. LAS requires all majors to complete a language requirement in Spanish or Portuguese. The Spanish requirement may be fulfilled by the completion of Span 302, Span 3021 or certification as a native speaker by the Spanish DUS.

The Portuguese requirement may be fulfilled as follows:

- Successful completion of Portug 215 Reading and Conversation I with a grade of B- or higher
- Native or heritage speaker status, as determined by the DUS in LAS or Spanish
- Successful completion of a program abroad, conducted in Portuguese, with a minimum of 3 credit units in the target language

Study Abroad

All minors in LAS are strongly encouraged (but not required) to pursue a study abroad program in the region. Students who attend study abroad programs may request credit for appropriate courses at the 300 level, with approval from the DUS. A maximum of 6 credits is allowed. LatAm 165D and the seminar requirement must be completed in residence at Washington University.

Courses

Visit online course listings to view semester offerings for L45 LatAm (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L45&crslvl=1:4>).

L45 LatAm 165D Latin America: Nation, Ethnicity and Social Conflict

This class is an interdisciplinary introduction to the academic study of modern and contemporary Latin America. The course focuses on main issues in Latin American politics, history and culture, both in the continent at large and in the specific regions and subregions within it. The class will particularly explore topics such as nation creation, national identity, modes of citizenry, the role of race, ethnicity, gender and class in the region's historical development, as well as social and political conflicts, which have defined the region over the centuries. This course is suggested before taking any other upper-level courses on Latin America or going abroad to other countries, and required for all Latin American Studies majors and minors. Through the course, students gain basic bibliographic knowledge and experience with research tools for a comparative study of Latin American politics society and culture. Prerequisites: none.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: IS EN: H

L45 LatAm 170 First-Year Seminar: Bodies in Brazil: Race, Representation and Nation

This course will examine the cultural expressions of the body in Brazil from an interdisciplinary perspective. We will examine how ideas about bodies -- both individual bodies and the "body of the nation" -- have mattered in Brazil's history and been expressed through art, literature, and film. We will also analyze how the body features in cultural forms, from Carnival to capoeira, from the "Globeleza" competition to the sensual politics of Anitta and Pablo Vittar, and from indigenous body decoration to disability arts. Moving from the formation of national identity to contemporary culture, we will explore the multiple ways in which bodies are made to matter in Brazil. Rather than proceed in pure chronological order, this course will move dynamically between the past and the present, between different scales of time and space, and between cultural forms and everyday practices. Our materials span disciplines such as cultural studies, anthropology, sociology, and history, offering a broad array of angles from which to understand the significance of bodies in Brazil. We will address a wide range of topics, including slavery and national formation, modernist reimaginings of the social body, gender and sexuality, Brazilian Carnival, violence and incarceration, urban space, indigenous peoples, capoeira, hunger, religion, and the political significance of contemporary Brazilian pop stars.

Credit 3 units. A&S: FYS

L45 LatAm 2118 First-Year Seminar: Angels, Prostitutes and Chicas Modernas: Women in Latin American History

Women have been active players in the construction of Latin American nations. In the last two decades, leading scholars in the field have taken up the challenge of documenting women's participation. This research explosion has produced fruitful results to allow for the development of specialized courses. This course looks at the nation building process through the lens of Latin American women. Students will examine the expectations, responsibilities and limitations women confronted in their varied roles from the Wars of Independence to the social revolutions and dictatorial regimes of the 20th century. Besides looking at their political and economic lives, students will explore the changing gender roles and relations within marriage and the family, as well as the changing sexual and maternal mores. Same as L22 History 2118

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: HUM, IS EN: H

L45 LatAm 2119 First-Year Seminar: Race and Ethnicity in Latin America: Myths, Realities and Identities

What does it mean to identify as mestizo, moreno, or mulato? How have Latin American nations dealt with their mixed racial populations and their rich African and indigenous heritages? What does it mean to be black in nations where the official discourse is one of racial hybridity or color blindness? This course examines the history of racial thinking and the experience of race in Latin America. While the focus of the course will be on the complexities of race in Latin America, a place of enormous ethnic and cultural diversity, we will also draw comparisons to the history of race in the U.S.

Same as L22 History 2119

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM, IS EN: H

L45 LatAm 301L Historical Methods: Latin American History

This is a small-group reading course in which students are introduced to the skills essential to the historian's craft. Emphasis will be on acquiring research skills, learning to read historical works critically, and learning to use primary and secondary sources to make a persuasive and original argument. See Course Listings for current topics. Required for history majors. Preference given to History majors; other interested students welcome.

Same as L22 History 301L

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L45 LatAm 3021 Music of the African Diaspora

This course explores musical cross-fertilization between the African continent and South America, the Caribbean, and Europe. Beginning with traditional musics from selected regions of the African continent, the course examines the cultural and musical implications of transnational musical flows on peoples of the African diaspora and their multicultural audiences.

Same as L27 Music 3021

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L45 LatAm 304 Survey of Brazilian Cultures: Race, Nation and Society

This course will introduce students to Brazilian culture from the colonial period to the present through literature, art, music, film and other cultural forms. The course gives a historical overview of Brazilian culture and society, exploring major sociohistorical and artistic moments from the colonial, imperial, and republican periods and their "legacies" or influences on Brazilian society. Students will learn about the Amerindian, European, and African influences of Brazilian culture through the study of representative texts and cultural practices. The course also illustrates Brazil's place within Latin America and the world. The course will seek to deconstruct and expand preconceived notions of Brazil, such as Lusotropicalism and racial democracy. Classes will combine lectures by the instructor, student presentations, collective debates, and cooperative learning, and they will involve the use of required bibliography and audiovisual materials.

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: IS
EN: H

L45 LatAm 305 Survey of Mexican Cultures

This course provides an interdisciplinary introduction to the study of Mexico, with a particular focus on the 20th and the 21st century. The class will cover the main historical and cultural processes of Mexico in this period: The Mexican Revolution; the consolidation of a one-party political system; the construction of Mexican national identity and the arrival of neoliberalism. The course also focuses on the main aspects of Mexico's relationship to the United States: the Free Trade Agreement, the history of Mexican migration and the Drug War. From this framework, the course touches upon questions of race (particularly the politics of racial mixture), modernization, construction of social identities and the unique nature of governance in Mexico, due to the single-party regime. It also touches on Mexico's specificities and particularities due to the uniqueness of situation as the southern neighbor of the United States. Prerequisites: none.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS
EN: H

L45 LatAm 3092 Indigenous Peoples and Movements in Latin America

This course focuses on the contemporary lives and political struggles of Indigenous Peoples in Latin America, with specific focus on Ecuador, Peru, and Bolivia. Through course lectures, ethnographic texts, and four in-depth case studies, we explore how the politics of Indigeneity articulate with political and economic processes including (neo)colonialism, global capitalism, state transformation and social movement struggle. Themes include: demands for territory and autonomy; environmentalism and natural resource exploitation; gender and economic inequality; race, racism and political violence; language and education; and the complexities of building multicultural or "plurinational" democracies.

Same as L48 Anthro 3092

L45 LatAm 3093 Anthropology of Modern Latin America

A survey of current issues in the anthropological study of culture, politics, and change across contemporary Latin American and the Caribbean. Topics include machismo and feminismo, the drug war, race and mestizaje, yuppies and revolutionaries, ethnic movements, pop culture, violence, multinational business, and

the cultural politics of U.S.-Latin American relations. Attention will be given to the ways that anthropology is used to understand complex cultural and social processes in a region thoroughly shaped by globalization.

L45 LatAm 3095 The Incas and Their Ancestors: The Archaeology of the Ancient Andes

From the hyper-arid desert of the Pacific Coast to the high-mountain plateaus of the Andes more than 12,000 feet above sea level to the lush forested Amazonian lowlands, Western South America presents one of the most diverse natural and cultural environments in the world and one of the few places where social complexity first developed. Beginning with the earliest human occupations in the region more than 12,000 years ago, this course examines how domestication, urbanization, the rise of early states, and major technological inventions changed life in the Andes from small village societies to the largest territorial polity of the Americas: the Inca Empire. Students will become familiar with the major debates in the field of Andean archaeology. Together, we will examine archaeological evidence (e.g., architecture, art, ceramics, metals, textiles, plant and animal remains), from the context of everyday life (e.g., households, food production, craft production) to the rituals and ceremonies (e.g., offerings, tombs) that took place in domestic and public spaces. We will also touch on the role of Andean archaeology in the context of national politics and heritage sustainability.

L45 LatAm 310C Ancient Civilizations of the New World

An examination of the Inca empire in Peru, and the Maya and Aztec empires in Mexico, through the inquiry into the roots, development, form, and evolutionary history of pre-Columbian civilization in each region from its earliest times to the rise of the classic kingdoms. Examples of respective artistic accomplishments are presented and discussed.

L45 LatAm 313 Hello, Hello Brazil! Popular Culture, Media, and the Making of a Nation

Our image of Brazil has been deeply shaped by its cultural production, from Tom Jobim and Vinicius de Moraes' ever-popular "Girl from Ipanema" to the spectacular mega-production of Carnival in Rio and from the Afro-Brazilian martial art of capoeira to the international stardom of pop artists like Anitta. This course is an introduction to popular culture in contemporary Brazil. Students will approach the theme through theoretical works that seek to define popular culture, understanding it as a hybrid form of expression that troubles the line between the "traditional" and the mass-produced. This course will examine how the circulation of sounds and images manifests and shapes Brazilian culture historically and in the present. We will also interrogate the different ways in which culture is produced and received, how it circulates in symbolic markets, and how it comes to be both consumed by diverse audiences and utilized in often unexpected ways. The course will cover topics such as the Tropicalia movement, Afro-centric Carnival blocos, street art such as graffiti, baile funk, forró, favela protest

theater, telenovelas (soap operas), the popularization of samba, soccer and the World Cup, and Carnival. Students will use an interdisciplinary lens to approach popular culture in Brazil through music lyrics, TV and film, cultural performances, and graphic novels. These materials will form the basis of our class discussions and written assignments. The course will be taught in English. Prerequisite: L45 165D, L45 304, or another course on Latin America suggested.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS EN: H

L45 LatAm 318 Gender, Sexuality and Power in Brazil

This course examines the nexus of gender, sexuality, and power in Brazil through an interdisciplinary lens. We will aim to understand how varying understandings of gender and sexuality have impacted the development of Brazilian society in history and continue to shape contemporary society and politics. We will pay special attention to the ways in which the intersections of race, gender, sexuality, class, ethnicity, and so on impact people's lived experiences and how heteronormativity and homophobia shape current politics. We will take an intersectional feminist approach to analyze topics such as slavery in colonial Brazil, national aspirations to modernity, authoritarian repression and "moral panics," domestic labor, motherhood, sex tourism, Brazilian feminisms, and LGBTQ+ activism. Scholarly work from various fields of study -- with an emphasis on gender studies, history, and anthropology -- will be supplemented by documentaries, film, podcasts, and other media. This is a Writing Intensive and a Social Contrasts class in the IQ curriculum. Prerequisite: L45 165D, or two courses on Latin American or Women and Gender Studies, or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD, SC, WI Arch: HUM Art: HUM BU: BA, IS

L45 LatAm 319 The Body in Brazil: Race, Representation, Ontologies

This course is an introduction to various ways of understanding, representing, and performing the body in Brazil. Course materials will draw on insights from anthropology, the medical humanities, and science and technology studies in order to approach the body not just as biological material but also in its social, cultural, and spiritual dimensions. We will cover topics such as the importance of race and ethnicity since the time of colonization, sexualized media representations of gendered bodies, how some bodies are cast as disposable or "out of place" in contexts of social inequality, indigenous ways of viewing the body in relation to the natural and spiritual world, the politics of disability and access, and constructions of the "body politic" in the formation of national identity through ideas such as "antropofagia" (cultural cannibalism). Throughout, we will pay particular attention to how race, gender, sexuality, and disability shape the lived experiences of Brazilians. Topics will include the impact of slavery in the construction of the body in Brazil, the role played by race in the construction of discourses of corporality, and the development of beauty stereotypes and practices such as the medical industry of plastic surgery, among others. Students will analyze visual materials, ethnographies, historical texts, and internet sources in dialogue with critical theories from the social sciences and humanities, assessing how the body "matters" in a variety of ways that reflect Brazil's cultural diversity while also starkly highlighting its persistent racialized and gendered social inequities. These materials will form the basis of our class discussions and written assignments. The course will be taught in English. Prerequisite: L45 165D, L45 304, or another course on Latin America suggested.

L45 LatAm 321C Introduction to Colonial Latin America until 1825

This course surveys the history of Latin America from the pre-Columbian civilizations through the Iberian exploration and conquest of the Americas until the Wars of Independence (roughly 1400–1815). Stressing the experiences and cultural contributions of Americans, Europeans and Africans, we consider the following topics through primary written documents, firsthand accounts, and excellent secondary scholarship, as well as through art, music and architecture: Aztec, Maya, Inca and Iberian civilizations; models of conquest in comparative perspective (Spanish, Portuguese and Amerindian); environmental histories; consolidation of colonialism in labor, tributary and judicial systems; race, ethnicity, slavery, caste and class; religion and the Catholic Church and Inquisition; sugar and mining industries, trade and global economies; urban and rural life; the roles of women, gender and sexuality in the colonies. Geographically, we cover Mexico, the Andes and, to a lesser extent, Brazil, the Southwest, Cuba, and the Southern Cone. Premodern, Latin America.

L45 LatAm 3220 Modern Mexico

This course is designed to provide students with an overview of the political, social, economic and cultural history of Mexico from the era of Independence (roughly 1810) to the present. Lectures outline basic theoretical models for analyzing historical trends and then present a basic chronological historical narrative. Same as L22 History 3220

Credit 3 units. A&S IQ: HUM, LCD, SD BU: HUM, IS EN: H

L45 LatAm 322C Modern Latin America

This course aims to present a survey of Latin American history from Independence to the present. Topics to be covered include the Wars of Independence; caudillismo; nationalism; liberalism; slavery and indigenous peoples; urbanization, industrialization and populism; ideas of race & ethnicity; the Mexican and Cuban Revolutions; US intervention; modernity, modernism and modernization; motherhood and citizenship; the Cold War; terror and violence under military dictatorships and popular resistance movements. While the course aims to provide students with an understanding of the region, it will focus primarily on the experiences of Mexico, Cuba, Brazil, Argentina and Central America.

L45 LatAm 325 Cultures of Health in Latin America

This course is a survey of the cultural and political-economic aspects of health, illness, and embodied difference in Latin America. We will approach these themes from an interdisciplinary perspective with an emphasis on anthropology and history, exploring how local, national, regional, and global factors affect health and healthcare and how people experience and respond to them. Topics will include interactions between traditional healing practices and biomedicine; the lasting impacts of eugenic sciences on contemporary ideas about race and disability; the unequal impacts of epidemic disease; Indigenous cosmologies and healing systems; the politics of access to healthcare; the cultural and political specificities of reproductive

health; and the intersections of race, gender, ethnicity, class, and bodily capacities in the pursuit of well-being. This course is designed for students of all levels interested in health and/or Latin American cultures. It will be taught in English.

L45 LatAm 326B Latin American Politics

This course is an introduction to the politics in Latin America, focusing on the trend toward the establishment of democracy. We examine the impact of political culture, economic development, and the legacy of authoritarian regimes on contemporary politics. The course also reviews many of the most pressing challenges confronting governments Latin American governments: the role of the military in politics, the reform of political institutions, threats from radical guerrillas and drug traffickers, debt and economic restructuring, and relations with the United States. Country studies focus on Argentina, Brazil, Chile, Peru, Mexico, and Nicaragua. Prerequisites: 100-level introductory course in Political Science or its equivalent in History or IAS.

L45 LatAm 327 Humans and Others in Latin America: Natures, Cultures, Environments

What does it mean to inhabit the world with other beings? How are we to cultivate life -- both human and nonhuman -- in toxic environments? What does it mean to be human, and what would it mean to decenter humanity? This course addresses these questions through an exploration of "more-than-human" worlds in Latin America. Students will examine a variety of Latin American thought and practices through the interdisciplinary lens of environmental humanities and social sciences, unsettling presumed boundaries between human and nonhuman, real and imaginary, native and culture. We will engage primarily with ethnographic and other scholarly texts, which will be supplemented by short works of fiction, documentary film, podcasts, and works of art. In the first part of this course, students will be challenged to think about what defines the limits of the human and engage with the concept of "more-than-human" worlds. We will then examine the dark side of such worlds, namely, the ways in which extractive capitalism and environmental destruction demonstrate the permeability of bodies and comprise a kind of "slow violence" against the most vulnerable communities. In the next unit, students will consider Black and Indigenous ecological knowledge and these communities' struggles to care for their lifeways and the environments that sustain them. In our final section, we will explore multispecies entanglements through Indigenous cosmologies and the nexus of science, history, and art. Students will complete several assignments throughout the semester that have been designed to make them think imaginatively and critically about the course themes, including weekly reading responses and in-class discussion facilitation. The final assignment for this course is a creative independent research project where students will synthesize what they learned over the course of the semester and extend it through independent research. Prerequisite: L45 165D or permission of instructor.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, ETH, IS

L45 LatAm 331 Hispanic Art/Arte Hispano

This course focuses on the most important movements, artistic expressions and its representatives of the art history of Latin America and Spain. From the Pre-Columbian art of the Mayas, Aztecs and Incas, to the syncretism of postcolonial Latin American art, the Mexican Muralism and the self-reconstruction portraits of Mexican artist Frida Kahlo to the Chicano Art in the United States. From the Medieval paintings of religious Spain, to the criticism of the Spanish nobility by Diego Velazquez, the Spanish Civil War of "Guernica" by Pablo Picasso, to the Surrealism of Salvador Dalí and Antonio Gaudi. The students will visit the St. Louis and the Kemper Art Museums. Prerequisite: Span 303 or Span 308E. In Spanish.

L45 LatAm 3351 The Ancient Maya: Archaeology and History

This course focuses on the ancient Maya civilization because there are many exciting new breakthroughs in the study of the Maya. The Olmec civilization and the civilization of Teotihuacan in the Valley of Mexico are considered as they related to the rise and development of the Maya civilization. The ancient Maya were the only Pre-Columbian civilization to leave us a written record that we can use to understand their politics, religion and history. This course is about Maya ancient history and Maya glyphic texts, combined with the images of Maya life from their many forms of art. The combination of glyphic texts, art and archaeology now can provide a uniquely detailed reconstruction of ancient history in a New World civilization.

L45 LatAm 3354 Ancient Mesoamerica

Mesoamerica encompasses the Pre-Columbian complex societies of Mexico and upper Central America, including Guatemala, Belize, and parts of Honduras and El Salvador. It was an agrarian world of great and enduring cities, far-flung trade networks, transcendent religions, kingdoms and empires. This survey lecture course begins with the pioneering hunters and gatherers, reviews the establishment of farming communities and the first Olmec Formative states, the flowering of highland Mexican Classic Period Teotihuacan and other great cities like Tajin in Veracruz, the dynasties of the lowland Maya and summarizes with the Aztec Empire and the period of the Spanish Conquest. The course touches on the many and diverse other cultures that contributed to this vibrant world.

L45 LatAm 356 Andean History: Culture and Politics

Since pre-Columbian times, the central Andean mountain system, combining highlands, coastal and jungle areas, has been the locus of multiethnic polities. Within this highly variegated geographical and cultural-historical space, emerged the Inca Empire, the Viceroyalty of Peru — Spain's core South American colony, and the central Andean republics of Ecuador, Peru and Bolivia. Taking a chronological and thematic approach, this course examines pre-Columbian Andean societies, Inca rule, Andean transformations under Spanish colonialism, post-independence nation-state formation, state-Indian relations, reform and revolutionary movements, and neo-liberal policies and the rise of new social movements and ethnic politics. This course focuses primarily on the development of popular and elite political cultures, and the nature and complexity of local, regional and national power relations.

Credit 3 units. A&S IQ: LCD, SSC BU: IS EN: S

L45 LatAm 364 Anarchism: History, Theory, and Praxis

This course analyzes the origins, historical trajectories, and influence of anarchism from its classical period (1860s-1930s) until the present. It examines the major personalities, complex ideas, vexing controversies, and diverse movements associated with anarcho-collectivism, anarcho-communism, individualist anarchism, anarcho-syndicalism, anarchist feminism, green anarchism, lifestyle anarchism, and poststructuralist anarchism. In doing so, it explores traditional anarchist concerns with state power, authority, social inequality, capitalism, nationalism, imperialism and militarism. It also analyzes anarchism's conception of individual and collective liberation, mutual aid, workers' organization, internationalism, direct democracy, education, women's emancipation, sexual freedom and social ecology. Special attention will be given to past and contemporary globalizing processes and their relation to the dissemination and reception of anarchism in the global South.

L45 LatAm 3824 Film and Revolution in Latin America

This class is a Writing Intensive course focused on the study of the way in which four landmark Latin American revolutions (The Independence Wars, The Mexican Revolution, The Cuban Revolution and The Bolivarian Revolution) are represented in cinema. Each one of these revolutions will constitute a unit of study, and students will be expected to work with historical texts, films and works of film theory and criticism for each one of them. The course will engage in subjects such as the difference between fiction and nonfiction films when representing history; the politics that underlie specific representations; the way in which cinema questions and revises ideas developed by historians; and the uses of film in creating popular views of history in Latin America. Students will develop a research project comparing two revolutionary processes over the semester.

L45 LatAm 4107 Latin America and the Rise of the Global South

The rise of the global south — and the reordering of global geopolitics, economics and cultural imaginaries — is characterized by progressive change and intense conflict. Economic growth coincides with the impacts of global warming, the assault on natural resources, the rise of new consumers and the entrenchment of deep inequalities. We also see the emergence of cultural and political formations that range from the horrific to the inspiring. Latin America is a central node of the new global south. Here history takes unpredictable turns in the face of declining U.S. hegemony, the economic growth of Brazil, legacies of militarism and political violence, a feverish attack on nature, resurgent economic nationalism, and defiant "anti-globalization" movements. Through close reading of contemporary ethnographies of Latin America we explore emergent cultural and political-economic processes in the region, we consider south-south articulations (theoretical, cultural, political-economic) between Latin America, China, Africa and India, and we reflect on the changing role, meaning and relationships of the United States in the region.

Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L45 LatAm 4201 International Relations of Latin America

This course examines Latin American foreign relations in the world from the 1820s to the present with a primary emphasis on the period since 1945. Focusing on inter-state and transnational relations, it seeks to historically contextualize and analyze long term patterns and trends between Latin American states and between Latin America and the United States, Europe, and the global South. Given Latin America's shared experience with imperialism and more recently with neo-imperialism, special attention will be paid to the ways Latin America has sought to manage and/or resist foreign domination, especially U.S. hegemonic pretensions. To this end it will analyze patterns of inter-American conflict and cooperation. When, why, and under

what conditions Latin America articulated an independent foreign policy, forged anti-imperialist blocs, embraced U.S. sponsored diplomatic efforts and military alliances, and pursued Latin American unity and solidarity will be closely examined. To better understand the continuities, discontinuities, contradictions, and complexities of Latin American foreign policy, this course will also assess the influence of changing regional and national political cultures from both a theoretical and a historical perspective. In doing so, it explores how elite culture, the balance of domestic social forces, ideological and economic development, and shared cultural identities and meanings informed national political cultures and how these in turn shaped Latin American foreign policies.

Same as L97 GS 4201

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L45 LatAm 4231 Contemporary Issues in Latin America

How do the institutional designs of contemporary democratic governments help us understand the nature and quality of representation? We concentrate on variations in the powers granted presidents by constitutions as well as the institutional determinants of whether executives are likely to find support for their policies in the legislature. In addition, we explore how incentives established by electoral laws influence the priorities of members of congress. Given all these variations in democratic institutional design, can voters go to the polls with the confidence that politicians will implement the economic policies for which their parties have long stood or which they promised in their campaigns?

L45 LatAm 4515 Migration and Health

This course explores the complex relationship between migration and health. Topics include the immigrant health paradox; social determinants of health; access to health care; cultural competence in health care; and immigration enforcement and health. This seminar will be taught as an upper-level course intended for advanced sociology majors, advanced sociology minors, and graduate students. Prerequisite: Successful completion of an introductory sociology course or permission of instructor.

Same as L40 SOC 4515

Credit 3 units. A&S IQ: SSC, SC BU: BA

L45 LatAm 4517 Anthropology and Development

What is "development"? Economic progress for all? A slow and gradual "improvement" in the human condition? Helping people with "projects"? Westernization? Modernization? The sorting out of bodies that are useful and can be put to work from those less useful bodies that must be contained, imprisoned or killed? The militarized accumulation of capital? The commodification of labor? The exhaustion of nature? In this advanced seminar we will consider how anthropologists — as writers, analysts and theorists — have engaged the theories, meanings, practices and consequences of (sometimes externally directed) economic and political change. We focus on issues of the contemporary moment: oil; urban poverty and inequality (sex work, migration, water, debt, and cash transfer programs); and cultures of

militarism. The course is designed to provide a graduate-level introduction to theory and ethnography based on intensive reading, discussion, critique and writing, with revision. It is open to advanced undergraduates and fulfills writing-intensive (WI) requirements, as well as capstone requirements for some majors.

L45 LatAm 457 Gender and Modernity in Latin America

The purpose of this course is to introduce students to the particular forms modernity assumes in Latin American countries and to the ways in which national cultures, identity politics, and gender issues interweave during the 20th century. The course will discuss three particular articulations of this topic: (1) gender and the national question in Argentina: Eva Peron; (2) gender and visual arts: Frida Kahlo; and (3) gender and ethnicity: Rigoberta Menchu. Through these iconic figures, students will be introduced to the specific features that characterized three very different but representative cultural scenarios in Latin America. In each case, the context for the emergence of these highly influential public figures will be studied from historical, social, and cultural perspectives. In order to explore the cultural and political significance of Eva Peron, Frida Kahlo, and Rigoberta Menchu, the course will utilize literary texts (e.g., speeches, letters, diaries), visual materials (e.g., photography, films, paintings), and critical bibliography.

L45 LatAm 461 Latin American Cultural Studies: Critical and Theoretical Approaches

The goal of the course is to provide students with critical and theoretical tools that could be used for the analysis of Latin American cultural history from a transdisciplinary perspective, from colonial times to the present. Some of the concepts to be discussed in class are: colonialism and coloniality, national culture, dependency theory, cultural antropofagia, lettered city, miscegenation, heterogeneity, hybridity, transculturation, peripheral modernity, media and mediation, postmodernity, postcoloniality, and collective memory.

Credit 3 units. A&S IQ: HUM EN: H

L45 LatAm 4611 Latin American Populism and Neo-populism

A salient feature of Latin America in the 20th and early 21st centuries has been the recurrence of populism. Mass-based political and social movements animated by nationalist and reformist impulses dominated Latin American politics in the 1920s, 1930s–60s, and 1980s to the present. This course provides a general historical and theoretically informed analysis of the origins, internal dynamics, and outcomes of classical populist and neo-populist governments and parties. Among the notable populist and neo-populist cases examined include: Peronism in Argentina, Velasquismo in Ecuador, Cardenismo in Mexico, APRA in Peru, Vargasismo in Brazil, Garcia/Fujimori in Peru, Menen/Kirchners in Argentina, and Hugo Chávez

in Venezuela. Issues pertaining to leader-follower relations, populist discourses, citizenship rights, populist gender and racial policies, labor and social reforms, and mass mobilization politics also are explored.

Same as L97 GS 4611

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L45 LatAm 462 Latin America and the West

From the perspective of postcolonial theory, the course covers different aspects related to Latin America's cultural history, from the Discovery to the present. Some of the issues discussed in class are: the colonial encounter; Baroque culture and the emergence of Creole societies in the "New World," the connections between Enlightenment and nationalism, as well as the interweaving of "coloniality" and modernity. Prerequisite: Survey of Latin American Culture or an advanced-level course on Latin America.

Credit 3 units. A&S IQ: HUM EN: H

L45 LatAm 4622 Labor and Labor Movements in Global History

Focusing on the period from mid-19th century (industrial revolution) until the present neoliberal capitalist era, this course analyzes working class formation, organization, collective action, and politics on a worldwide scale. It seeks to explore the connections between historical and contemporary workers' movements in the global North and global South, eschewing national perspectives and global/local dichotomies. Special attention is given to Latin American workers and labor movements. In particular, it examines the influence of immigration, the role of export workers, the impact of radical ideologies, the development of labor relations systems, the nature of informal work, and recent struggles for workers' control. The principal aim of this course is to introduce students to the key topics and themes pertaining to global labor history. These themes are varied and complex and range from workers' struggles.

Credit 3 units. A&S IQ: LCD, SSC, SC, SD Arch: SSC Art: SSC EN: S

L45 LatAm 463 Seminar on Urban Cultures in Latin America

The course focuses on the key role urban development and urban cultures have had in Latin America, with particular emphasis on contemporary times. The goal of the course is to discuss the connections between the formation and expansion of cities, the definitions of citizenship, and the role of modernity in the development of "high" and "popular" cultures within different historical and geocultural contexts. Particular attention is paid to the issues of race, class and gender. The course, which uses an interdisciplinary and comparative approach, also focuses on the phenomena of marginality, cultural resistance, nationalism and consumerism as well as on the role played by the media in contemporary Latin American societies. Some of the cultural expressions analyzed in the course are music (rock, pop, rap), sports, film and video. Prerequisite: IAS 165C Survey of Latin American Culture.

Credit 3 units. A&S IQ: HUM EN: H

L45 LatAm 4630 Modernity, Culture and the State in Mexico

This course is an advanced seminar on the process of the cultural, ideological and institutional modernization of Mexico. Drawing on readings from fields such as history, cultural anthropology, political sociology and cultural theory, the course

discusses the shaping of various forms of social subjectivity and cultural ideology that sustained the formation and development of the state. The course also engages with the identities and processes that led both to the formation of structures of citizenship and to the contestation of state power. This course is structured chronologically, following the development of three interrelated processes unfolding between 1810 and the present: (1) the creation of state institutions and ideology and their evolution in relationship to events such as the liberal Reforma of the 1850s and the Mexican Revolution; (2) the cultural and social implication of processes of capitalist development, modernization and globalization; and (3) the ways in which Mexico's histories of sociocultural difference led to political and cultural insurgencies and rebellions. This course fulfills the seminar requirement for Latin American Studies majors. Prerequisite: L45 165D, L45 305, any other 300-level course with significant focus on Mexico, or permission of instructor.

Credit 3 units. A&S IQ: HUM, LCD BU: ETH, IS EN: H

L45 LatAm 4631 The Binational Condition. The Mexico-US Relationship in Mexican History and Culture.

From the 19th century onwards, the relationship between Mexico and the United States has been defined by intense tensions and contradictions. Closely intertwined by geopolitical engagement and integrations, mutual migration flows, and rich cultural exchange, both countries belong to a binational system with few equivalents around the world, which defines the lives of people living across North America. And yet, few people in the United States have access to a clear and rigorous understanding of the Southern neighbor, often leading to conflict at the political and social levels. This class explores this historically, from the early frictions caused by territory and slavery to the binational conditions of the present. The class emphasizes the Mexican perspective of the relationship, often erased in discussions from the U.S. From this perspective, the course will engage critical moments in the history of the relationships, such as the underground railroad to the South, the Mexican American War, the Guadalupe Hidalgo treaty, and the Cold War. The class will also discuss the ways in which Mexico has influenced the United States culturally, from the impact of Mexican post-Revolutionary art in the New Deal to the rise of film directors like Alfonso Cuarón and Guillermo del Toro. Finally, the class will lay out the ways in which Mexicans and scholars of Mexican studies think about questions such as regional development, the border, immigration, and the Drug War. Prereq. L45 165D or prior coursework on Global Studies, Latin American Studies or American Studies. The course covers the seminar requirement for majors and minors in Latin American Studies.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, IS

L45 LatAm 4633 20th-Century Latin American Revolutions

Latin America was arguably one of the most "revolutionary" regions of the world in the 20th century. It registered four "great revolutions": Mexico 1910, Bolivia 1952, Cuba 1959, and Nicaragua 1979. These social revolutions entailed a substantial, violent, and voluntarist struggle for political power and the overthrow of the established political, economic, social, and cultural orders. In the wake of these successful revolutions, new revolutionary institutions of governance were founded, radical structural changes were implemented, and a new revolutionary ethos was adopted. With the exception perhaps of the Bolivian Revolution, these revolutions had a profound impact on Latin American and world politics. The primary aim of this course is to

analyze and compare the causes, processes, and outcomes of the Mexican, Cuban, and Nicaraguan revolutions. The course also analyzes late 20th-century guerrilla movements in El Salvador and Peru.

Same as L97 GS 4633

Credit 3 units. A&S IQ: LCD, SSC, SC, SD Arch: SSC Art: SSC EN: S

L45 LatAm 464 Nation and Desire in Latin America

The purpose of this course is to analyze the process of nation formation in Latin America from the imaginaries of the "Creole nation" to the first half of the 20th century. Class discussion encompasses the study of theories on nation formation and nationalism as well as textual representations of national projects, such as Simon Bolivar's letters and discourses, selections from *Facundo*, *Civilization and Barbarism* by Domingo F. Sarmiento; selected texts by Andres Bello, Alfonso Reyes, et al; *Ariel*, by J.E. Rodo; Pedro Henriquez Urena's *Seis ensayos en busca de nuestra expresion*; Jose Vasconcelos' *La raza cosmica*; José Carlos Mariategui's *Siete ensayos de interpretacion de la realidad peruana*; and José Martí's "Nuestra América" and other essays. Some of the main topics discussed are the leading role of Creole elites in the consolidation of national cultures, the marginalization of women as well as indigenous and Afro-Hispanic populations, and the role of nationalism in the shaping of modern societies. Colonialism, Occidentalism, liberalism, positivism, nationalism and modernity are some of the concepts that are explored both theoretically and in their particular discursive usages. Finally, the concept of nation(alism) is studied as a political/rhetorical device and as the resulting expression of agency, interest and desire, in peripheral societies.

Credit 3 units. A&S IQ: HUM EN: H

L45 LatAm 465 Cities, Race and Development in Latin America

This course offers a multidisciplinary approach to the study of the Latin American city: its history, development and inherent economic, social, cultural, ethnic and political tensions. Lectures, readings and class debates will explore interactions between the materiality and structure of Latin American modern cities and the social and cultural phenomena related to urban life in multicultural societies. Particular attention will be devoted to the effects of internal/external migration, and to the development of public spaces and sites of memory. Patterns of social segregation, marginalization, inequality and the like, will be analyzed in order to elaborate on the contemporary challenges of the city in a globalized yet traditional world. In addition to the analysis of living, institutional and commercial spaces, the course will cover social dynamics that break the discipline of the city through different forms of transgression, including crime, informal housing and underground movements. The goal of the course is to expose students to historical and social developments as exemplified in a variety of urban environments, and to encourage reflection on issues of social justice related to the living conditions of rural, disadvantaged and indigenous populations. The course will be conducted in English. Mandatory readings will be in English. Additional readings in Spanish will be required for those students fluent in the language. Prerequisites: none.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: BA, IS EN: H

L45 LatAm 4650 Latin American Subcultures

This course has been planned as an introduction to the interconnections between "high" culture, popular culture, and mass culture, with particular emphasis on the formation of urban subcultures in contemporary Latin America. The topic of subculture and counterculture will be analyzed, taking into consideration the influence of factors of class, race, and gender in the construction of alternative cultural identities. Some of the connections to be studied are between political power and cultural resistance, affect, violence, symbolic value, hegemony and marginality. Distinctions will be made between culture, subcultures, traditions, and lifestyles as well as between multiculturalism and interculturality. While the first part of the course will introduce critical concepts, theories, and methodologies, the second half will focus on specific articulations between cultural practices and the domains of belief, sexuality, violence, and social media, including uses of music, video, and films. Students will prepare a final paper on a Latin American subculture of their choice and analyze it using the critical and theoretical tools discussed in class. Prerequisite: L45 165D. This course fulfills the seminar requirement for Latin American Studies majors and minors.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, IS EN: H

L45 LatAm 466 Popular Culture and the Representation of Youth in Latin America

The objective of this course is to introduce students to different aspects related to the representation of youth in Latin America, particularly through the depiction this sector receives in the realm of popular culture. The course will focus on the relationship between youth and social/political conflict and on the literary and cinematic representation of juvenile sectors in cultural production in different Latin American countries. The roles of music, melodrama and the media will be studied in connection to the construction of subjectivity and collective identity. The course will also analyze the involvement of juvenile sectors in narco-culture, gangs, maras, and the like, as well as the impact of violence, fear, and social inequality in early life. The analysis of films, literary texts, critical studies and cultural practices will be approached through a combination of biopolitical analysis and the analysis of representational strategies utilized in the elaboration of symbolic materials. This course fulfills the seminar requirement for Latin American Studies majors and minors. Prerequisite: LatAm 165D or another Latin American Studies course.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L45 LatAm 4660 Geographies of Development in Latin America: Critical Perspectives and Contemporary Challenges

This course provides an overview to the geographies of development throughout Latin America. We begin by examining a variety of theoretical perspectives, definitions and critiques of "development." We highlight the uneven processes of development at multiple, overlapping scales and the power imbalances inherent in much of development discourse. In the second half of the course we focus our considerations toward specific contemporary trends and development issues, utilizing case studies drawn primarily from Latin America. These themes include sustainability, NGOs, social movements, social capital, security and conflict, identity, ethnicity and

gender issues, participatory development, and micro-credit and conditional cash transfers. Students acquire the critical theoretical tools to develop their own perspectives on how development geographies play out in Latin America.

Same as L97 GS 4660

Credit 3 units. A&S IQ: LCD, SSC, SC, SD Arch: SSC Art: SSC
EN: S

L45 LatAm 4662 Central American Geographies of Violence

This course provides an in-depth examination of the geographies of violence in Central America. As a region frequently characterized as endemically prone to violence, it is vital to analyze and contextualize the violence. Approaching violence in Central America from a geographic perspective involves not only locating and "placing" the violence but also thinking relationally about the multiple overlapping scales of activity, both within and beyond the region. The course is divided into three parts. In the first section of the course, we begin with an overview of the foundations for understanding violence in Central America. In addition to covering the physical and human geography of the region, we also delve into various ways of defining violence, with a particular emphasis on how geographers conceptualize violence. In the second section, we delve into various theoretical approaches for understanding the nature of multiple types of violence and draw from historical and contemporary events in Central America. In the third section of the course, we take a closer look at specific case studies in the region, covering topics such as genocide, alcoholism, immigration, gangs, and drug trafficking. Prerequisite: sophomore standing or above.

Same as L97 GS 4662

Credit 3 units. A&S IQ: LCD, SC, SD EN: H

L45 LatAm 467 Constructing the (Racial) Other: From the Colonial Caste System to U.S. Latinos

The goal of this course is to introduce students to categories and concepts related to the questions of race and ethnicity in Latin America, from colonial times to the present. The course also covers U.S. Latinos as a population of Latin American descent that presents particular characteristics connected to the issues of migration, identity politics, reterritorialization, and cultural hybridity. Based on the theoretical and critical study of problems related to colonialism, social classification, miscegenation, whiteness, discrimination, and the like, representative literary and visual materials will be discussed to illustrate the connections between race, social roles, domestic/public spaces, work, democracy and modernization. The issue of race will be analyzed in its multiple articulations to the themes of nationalism, interculturalism, migration, and symbolic representation. This course covers the seminar requirement for Latin American Studies majors. Prerequisite: L45 165D, one other class in Latin American studies, or one class on race studies.

Credit 3 units. A&S IQ: HUM, SC, SD EN: H

L45 LatAm 4691 Citizenship in the Hot Seat. Migration and Borders in Latin America

This course is an introduction to concepts, interpretations, and debates related to different forms of human mobilization across borders, particularly in contemporary Latin America. However, class discussions will expand to other scenarios in order to contextualize the experience and characteristics of migration today. Some of the notions to be analyzed in connection to this topic are freedom of movement, citizenship, inequality, the labor market, borders, territoriality, and national security. Borders will

be studied as material constructions (i.e., walls, wire fences, technological surveillance, funnel systems, and strategies of deterrence) and as conceptual/symbolic representations. In addition to migratory movements, other phenomena such as diaspora, exile, and forced displacements will also be introduced as they have developed in Latin America. Cultural and psychological aspects related to migratory experiences -- such as the role of memory and affect, individual and collective trauma, social effects of deportation, stereotyping, the role of race and gender, and so on -- will also be considered, as they constitute integral aspects of migratory studies. The course will be conducted in English as a combination of lectures, student presentations, and collective discussions of assigned readings. Fulfills the seminar requirement for Latin American Studies majors and minors. Prerequisite: L45 165D.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, IS

L45 LatAm 483 Bodily Injuries: Violence, Gender and Representation in Latin America

The course focuses on the definitions, uses and "languages" of violence in Latin America, particularly during the last decades of the 20th century and the beginning of the 21st century. Students are introduced to philosophical, ethical and political issues related to the existence of "structural" violence and to the problems connected to the symbolic representation of this phenomenon in literature, fictional/documentary films, and visual arts. One of the course's objectives is to problematize the conceptualization of violence and to promote critical thinking about its emergence, significance and effects on local/global societies. Some of the topics analyzed are the body in its multiple manifestations (the body politic, the social body, the individual body, the treatment of the corpse, etc.), the narrativization of violence (violence as discourse, documentation and fictional elaborations, violence and the media, violence and ideology, etc.), violence and the city, citizenry and otherness, bio-politics, etc. Finally, violence is presented in different contexts and associated to different activities (ordinary crime, narco-cultures, maras, political movements, domestic environments) and different situations (e.g., violence in rural areas, violence in the borderlands, violence and migration). In all cases the course calls for a reflection on the interrelations between private/public spheres, gender politics, ideological/aesthetic values, and individual/institutional levels. The role of memory and emotions is emphasized as a crucial element for the construction/mobilization of subjectivity and for the elaboration of agendas that challenge the State's monopoly of legitimate violence and propose alternative and often perverse forms of association and mobilization at the margins of institutional configurations.

This is the second course in the sequence for Latin American Studies thesis writers. Enrollment requires completion of LatAm 485 and permission from LASP and the undergraduate director.

Credit 3 units.

L45 LatAm 4876 Advanced Seminar: Mexican Agriculture: Land, Politics and Development

Access to and ownership of land has been a major issue in Mexican history. Land tenure in economic development has been a constant source of tension and debate since the 18th century. Paradoxically, land tenure has been put forth as both the obstacle and the solution to the country's modernization. Given its centrality in the construction of the modern period, this course examines liberalism, agrarian revolts, the revolution, the green revolution and neoliberalism through the lens of land issues. This course will also explore how these have shaped and have been shaped by indigenous peoples and peasants, from land disentanglement to the fight against GMO maize. Students will evaluate agrarian reforms, agricultural modernization programs, concepts of and transformations of natural resources, food production/consumption and social policies.

Same as L22 History 4876

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM EN: H

L45 LatAm 4885 Advanced Seminar: Medicine, Disease and Empire

This course examines the history of medicine in connection with the politics of colonialism and empire building from the 16th century through the 20th century. Topics covered include epidemic disease outbreaks (e.g., smallpox, cholera, malaria); the role of science and medicine in endorsing the "civilizing missions" of empires; tropical climates and tropical diseases as Western constructs; tensions between Western medicine and indigenous healing practices and beliefs; ideas of race and racism in science and medicine; modern advancements in sanitation and public health and their implementation overseas; and the historical roots of the modern global health movement.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L45 LatAm 4926 Contemporary Art of the US-Mexico Border and Beyond

The question of the materiality of borders has attained new urgency with the resurgence of nationalist and anti-globalist movements. Calls for a "big, beautiful wall" on the U.S.-Mexico border are but one striking example of this phenomenon. A wall, a fence, a line, or a zone may focus attention on a narrow space, but it does so at the expense of broader narratives of structural inequality, the lingering violence of colonialism, and the rapid scale of climate change. The simplicity of a barrier is a particularly damaging fiction, one that avoids examinations of the larger forces that divide us. This upper-level and graduate seminar will delve into the history of "border art" as a category — whether public art, sculpture, installation, new media, or performance — using the U.S.-Mexico border as an extended in-depth case study. Analysis will not be limited to this region, as the course encourages a comparative approach that places disparate regions into dialogue with each other. In addition, we will also consider the issue of divides and borders locally, within the St. Louis area and its suburbs. Prerequisites: Intro to Western Art or Intro to Modern Art, plus one 300-level course in Art History.

Legal Studies

The Legal Studies minor is an interdisciplinary program that allows students to study the role of law and legal institutions in society.

Students who minor in Legal Studies learn about law in courses from anthropology, economics, history, philosophy, political science and other disciplines. The curriculum emphasizes the forces that shape law and the ways that peoples of different cultures and from different historical periods have used and interpreted the law.

Because Legal Studies is interdisciplinary in nature and offers a variety of courses, each student can design a course of study that addresses their individual needs and interests.

Students may choose to take advantage of internships available in law and government. Legal Studies is an excellent pre-law program. It also prepares students well for other graduate study, as well as for careers in academia, business, politics or social services.

Phone: 314-935-4200

Majors

There is no major available in Legal Studies. Students interested in undergraduate, preprofessional preparation for the study of law should contact the pre-law advisor (<http://artsci.wustl.edu/resources/prelaw-advising/>) in the College of Arts & Sciences, who is available to help plan a course of study and prepare a strategy for students applying for admission to law school.

Minors

The Minor in Legal Studies

Total units required: 18

The minor in legal studies requires six courses (18 graded units), at least three of which must be upper-division (300- or 400-level) courses. Two of the six courses may be drawn from the student's major, but, as in all College of Arts & Sciences programs, they can not be double-counted (i.e., applied to both the major and the minor). The six courses also must be distributed across three of four thematic subject areas. For details, please visit the Legal Studies website (<https://legalstudies.wustl.edu/>) or consult the Director of Legal Studies.

Courses

The following is a list of courses that have been offered in Legal Studies in recent years. Note that some of these courses are not currently offered and that some new courses may also count toward the minor. For a current list of courses in Legal Studies, please visit the Legal Studies website (<https://legalstudies.wustl.edu/>) or contact the Director of Legal Studies.

Visit online course listings to view semester offerings for L84 Lw St (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L84&crslvl=1:4>).

L84 Lw St 105G Logic and Critical Analysis

Introduction to the elementary tools of logic required for constructing and critically evaluating arguments and the claims they support. Topics include: the nature of an argument; argument structure; how arguments can fail both in structure and

in content; formal and informal fallacies; propositional logic and predicate calculus; and critical analysis of rhetorical strategies for presenting arguments. Students will be encouraged to develop critical reasoning skills that can be widely applied.

L84 Lw St 120A Religious Freedom in America

The intersection of religion and law in American society has sparked some of the fiercest cultural engagements in recent memory: Should a for-profit religious corporation have a right not to fund birth control for its employees? Can a public college expel campus religious groups whose membership is not open to all students? May a Muslim in prison grow a beard for religious reasons? Should a cake baker or a florist be permitted to refuse services for a gay wedding? Can a church hire and fire its ministers for any reason? These current debates and the issues that frame them are interwoven in the American story. This course introduces students to the major texts and historical arguments underlying that story. Drawing from the respective expertise of the instructors, the course will expose students to a variety of scholarly methods related to the issue: legal history and case law, intellectual history and canonical texts, social history and narrative accounts, and political philosophy and contemporary analyses. This course is for first-year (non-transfer) students only.

Same as I60 BEYOND 120

L84 Lw St 126 Ampersand: Law and Society

This course considers the basic aspects of the American legal system: its foundations, processes, institutions and rights. We will also study some specific substantive areas of the law. The course consists of two 90-minute Socratic lectures per week. Upon completion of this course, students should have a basic knowledge of the American legal system, which is an important part of a general education. The hope is that such knowledge will enable students to better understand and assess current legal events and to develop an increased interest in those events. This course should also enable students to consider law as a future area of study and career. Interested students may continue their study in the spring semester with an optional 1-credit seminar focusing on contemporary Supreme Court cases. Course is for first-year students in the Law and Society Program only.

L84 Lw St 207 Crossing Borders: An Introduction to Institutions and Concepts in Global Studies

This course provides an overview of the emergence of international governing institutions, the ideologies that shaped them, and concepts helpful for understanding them. Identifying the systems that have emerged to govern modern human societies at the national and international levels provides the means to consider how human beings are categorized within those systems, as citizens, subjects, asylum seekers, refugees, and the stateless. We engage a few classic works — including "The Communist Manifesto," "Imagined Communities," and "Orientalism" — and consider how they have transformed

knowledge. The goal is for students to gain an empirical grasp of world institutions and a critical vocabulary that will provide the means for an informed engagement with international issues across different world regions and academic approaches.

Same as L97 GS 207

Same as L61 FYP 221

Credit 3 units. A&S: AMP A&S IQ: SSC Art: SSC BU: BA, HUM EN: S

L84 Lw St 225 Religion and Politics in American History

The United States has been imagined, by turns, as a deeply Christian nation and a thoroughly secular republic. These competing visions of the nation have created conflict throughout American history and have made the relationship between religion and politics quite contentious. Are there shared national symbols and ideals that have held the country together? Is there a discernible "civil religion" in American public life—a shared faith in freedom, democratic citizenship, and patriotic sacrifice? Or, is there instead a set of competing, irreconcilable visions—say, a white Christian nationalism versus a pluralistic cosmopolitanism? This course examines such issues through a range of speeches and addresses by such generative figures as George Washington, Thomas Jefferson, Frederick Douglass, Abraham Lincoln, Elizabeth Cady Stanton, Franklin Delano Roosevelt, John F. Kennedy, Martin Luther King Jr., Ronald Reagan, Barack Obama, and John McCain. Through

sustained discussion of their canonical speeches, as well as other monuments, rites, and declarations that have hallowed the nation, the class explores what ideals Americans have held sacred.

Same as L57 RelPol 225

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L84 Lw St 233F Biomedical Ethics

A critical examination, in the light of contemporary moral disagreements and traditional ethical theories, of some of the moral issues arising out of medical practice and experimentation in our society. Issues that might be discussed include euthanasia, genetic engineering, organ transplants, medical malpractice, the allocation of medical resources, and the rights of the patient.

Same as L30 Phil 233F

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L84 Lw St 235F Introduction to Environmental Ethics

A general survey of current issues in environmental ethics, focusing on problems such as the obligation to future generations, protection of endangered species, animal rights, problems of energy and pollution, wilderness, global justice and business obligations. Students also learn some ethical and political theory.

Same as L30 Phil 235F

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L84 Lw St 2443 First-Year Seminar: The Nuremberg Trials and International Justice

This course is an exercise in understanding how professional historians and the general public discover and use the past. The main goals of this course are to understand the many different methods and standards applied to the past; to understand how and why each generation changes the past as it seeks to make it "usable"; and to develop the skills of exposition and argumentation necessary to describe and analyze complex historical issues and to express critical ideas effectively.

The subject of this inquiry will be the Nuremberg trials: the innovations and critiques around the law and politics of the trials themselves as well as the trials' legacies with regard to ideas about international justice in postwar America and the world. Course is for first-year, non-transfer students only.

Same as L22 History 2443

Credit 3 units. A&S: FYS A&S IQ: HUM BU: HUM, IS EN: H

L84 Lw St 251 Juvenile Justice in the Black Experience

This course examines the sociolegal past, present, and future of American juvenile justice, with a focus on the Black American experience. The course is organized in three parts. Part I surveys the late 19th- and early 20th-century development of the "parental state," including its institutional centerpiece (the juvenile court), its principle legal subjects ("dependents" and "delinquents"), and how these took shape alongside the contemporaneous rise of American Apartheid. Part II examines several key changes and challenges in contemporary juvenile justice, including the transformation of this institution in the wake of the Civil Rights Movement and the endurance of racialized juvenile social control in the post-Civil Rights period. Finally,

Part III considers possible futures of youth justice in the United States and beyond as well as practical strategies for achieving equal protection within and beyond the law. For AFAS majors, this course counts as Area Requirement 2.

Same as L90 AFAS 251

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L84 Lw St 260 Game Theory in Science and Culture

Introduces the major intellectual insights of game theory in a nontechnical fashion, and examines the influence game theory has had on geopolitics, social philosophy, psychology, art and the humanities. In addition to covering the basic machinery of the theory, the class: participates in numerous illustrative classroom games; examines game theory in film, literature and literary criticism; sees how game theory has contributed to social theory; and learns about the background of game theory and its history and perception as a hoped-for tool in the Cold War. Grades based on problems, short essays, two short-essay exams, and participation.

L84 Lw St 263 Linguistics for Legal Purposes

This course exposes students to an array of legal matters in which forensic linguistic science can play a key role. It simultaneously introduces them to linguistic concepts, theories, and methods that can be differentially applied for a combination of forensic and legal purposes. Topics include trademark disputes, defamation suits, civil litigation, authorship identification, and linguistic evaluations of testimony presented during murder trials. Assignments will include the formulation of affidavits and the production of legal opinions derived from diverse linguistic analyses.

Same as L44 Ling 263

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L84 Lw St 299 Undergraduate Internship in Legal Studies

Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities, e.g., 8-10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours. Students may not receive credit for work done for pay but are encouraged to obtain written evaluations about such work for the student's academic advisor and career placement file.

Credit variable, maximum 3 units.

L84 Lw St 3001 Social Theory

An overview of major theoretical frameworks used by sociologists to understand social behavior and group patterns. This course explores classical theories, including those developed by Marx, Weber, and Durkheim, along with contemporary perspectives such as functionalist, interactionist, and conflict theories. Class discussions and writing assignments emphasize students' application of theory to understand current social experiences and structures. The course has no specific prerequisites, but students should be prepared for intensive

study of challenging ideas and the application of these ideas in new contexts relevant to modern society. All Sociology majors and minors must complete this core course to fulfill degree requirements.

Same as L40 SOC 3001

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L84 Lw St 3012 Biblical Law and the Origins of Western Justice

This course will explore how law developed from the earliest periods of human history and how religious ideas and social institutions shaped law. The course will also illuminate how biblical law was influenced by earlier cultures and how the ancient Israelites reshaped the law they inherited. It will further analyze the impact of biblical law on Western culture and will investigate how the law dealt with those of different social classes and ethnic groups, and we will probe how women were treated by the law.

Same as L75 JIMES 3012

Credit 3 units. A&S IQ: HUM, LCD BU: ETH, HUM EN: H

L84 Lw St 301U Historical Methods: United States History

This is a small-group reading course in which students are introduced to the skills essential to the historian's craft. Emphasis will be on acquiring research skills, learning to read historical works critically, and learning to use primary and secondary sources to make a persuasive and original argument. Required for history majors. Preference given to History majors; other interested students welcome.

Same as L22 History 301U

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L84 Lw St 3040 International Law and Politics

What is international law? Does it really constrain governments? If so, how? In this course, we will examine these questions through a mixture of political science and legal theories.

Students will become familiar with the major theories in both disciplines and be introduced to the basic tenets of public international law. Students will also develop basic skills in legal research by reading and briefing cases from international tribunals and through an international law moot court simulation. Enrollment priority given to Global Studies majors.

Same as L97 GS 3040

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

L84 Lw St 312 Argumentation

This advanced writing course examines the strategies of argumentation, exploring such elements of argument as the enthymeme, the three appeals, claim types and fallacies. Prerequisites: Writing 1 (Writing 100) and junior standing. A note for students and advisors: when registering refer to WebSTAC for updated information on section times and available seats.

Same as L13 Writing 312

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

L84 Lw St 314W Topics in Composition

An advanced writing course focusing on selected topics related to writing. Topics chosen by department/instructor. Consult section description for details about specific class emphases. (Note: In some cases, this course may be cross-listed with other programs/departments and may satisfy the writing-intensive requirement.) Prerequisites: CWP 100 College Writing 1 and junior standing.

Same as L13 Writing 314

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM EN: H

L84 Lw St 315 Introduction to Social Psychology

Social psychology is the scientific study of how people think, feel, and act in social situations. This course will cover topics such as the self, conformity, aggression & altruism, prejudice & stereotyping, romantic relationships, person perception, persuasion, and applications to health and law. Prerequisite: Psych 100B.

Same as L33 Psych 315

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L84 Lw St 3255 The Development of the American Constitution

The U.S. Constitution has been so long maintained because it has adapted to new circumstances. Contrary to common mythology, this adaptation goes far beyond formal amendment and court interpretation. But past performance is no guarantee of future results. The course examines the processes through which American constitutional democracy has developed, considers its successes and failures, and assesses some of its most pressing challenges. In doing so the course treats topics such as: the Electoral College; the justice system; executive powers in war and peace; Congress versus the president; regulation and taxation; civil rights and Reconstructions; amendment politics; and constitutional rhetoric and beliefs.

Same as L32 Pol Sci 3255

Same as L32 Pol Sci 332S

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L84 Lw St 335S Poverty and the New American City

An exploration of structural changes that are transforming the American urban landscape, especially for low-income populations. The course begins with a review of classic theories of urban poverty and consider their relevance in the modern context. Students will then analyze key political, economic, demographic, and geographic shifts in how urban poverty is organized and reproduced, including gentrification, immigration, social policy reform, and the credit crisis. Special attention will be devoted to exploring the social and political implications of changing urban policy approaches, as well as the "suburbanization" of poverty. The course will conclude by discussing how urban poverty interfaces with broader social structures, including law, markets, and the state. Prerequisite: successful completion of an introductory Sociology course or consent of the instructor.

Same as L40 SOC 3350

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L84 Lw St 3373 Law and Culture

We live in an age when social policy is increasingly displaced into the realm of law, when justice and equality are matters of courtroom debate rather than public discussion. Legal language has become a key resource in all kinds of struggles over livelihood and ways of life. In this course, we study the cultural dimensions of law and law's changing relationship to state power, the global economy, social movements, and everyday life. We approach law as a system of rules, obligations, and procedures, but also a cultural practice, moral regime, and disciplinary technique. How are relationships between legal, political, and economic realms structured and with what consequences? How does law provide tools for both social struggle and social control? What does anthropology contribute to research on these issues? In exploring these questions, we combine readings from classical legal anthropology with recent ethnographic work from around the globe.

Same as L48 Anthro 3373

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: ETH EN: S

L84 Lw St 340 Topics: Environmental Justice

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Same as L32 Pol Sci 340

Credit 3 units. A&S IQ: SSC Arch: SSC Art: CPSC, SSC BU: BA EN: S

L84 Lw St 340F Social and Political Philosophy

Study of certain fundamental issues concerning government, society, and culture. For example: what are the nature and limits of legitimate political authority? Are ordinary human beings capable of governing themselves justly? Do citizens have a duty to obey the state? If so, to what extent, if at all, is that duty grounded in consent or contract? Should the state limit or regulate the personal relationships of citizens, such as marriage, family, and sexuality? How should social institutions rectify a history of political or social injustice against oppressed groups? Readings from historical and contemporary sources. Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Same as L30 Phil 340F

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

L84 Lw St 3431 Constitutional Law: Institutional Powers and Constraints

Introduction to constitutional law and practice in the United States. Emphasis on the role of the U.S. Supreme Court as an interpreter of the Constitution.

Same as L32 Pol Sci 3431

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L84 Lw St 344 Courts and Civil Liberties

This course focuses on constitutional law principles in the Bill of Rights, and examines how Supreme Court decisions influence these principles in everyday life. We explore how the courts, and particularly the Supreme Court, have interpreted these rights in light of changing times and emerging issues. Topics include the First Amendment; free exercise of religion and the establishment clause; freedom of speech, assembly and association; freedom of the press; the Fourth Amendment and the rights of those accused and convicted of crimes; the right to privacy, including reproductive freedom and the right to die; equal protection and civil rights, including race, gender, sexual orientation; immigrants' rights and voting rights; and civil liberties after September 11. Recommended for the Liberal Arts and Business (LAB) Certificate.

Same as L32 Pol Sci 344

L84 Lw St 3441 Defendant's Rights

This course explores the operations of the American criminal justice system. Substantial emphasis on the constitutional rights accorded to the criminally accused. Readings consist primarily, but not exclusively, of Supreme Court cases.

Same as L32 Pol Sci 3441

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA, ETH EN: S

L84 Lw St 345 Issues in Applied Ethics

Advanced study of a selected topic in applied ethics. Abstract ethical theories and methods are brought to bear on the moral problems that arise in an area of social and professional practice such as medicine, business, law, journalism, engineering, or scientific and humanistic research. Possible topics include:

reproductive healthcare and policy, the just distribution of medical resources, the social responsibilities of corporations, accountability in the media and public office, and the ethics of research on or affecting human subjects. Prerequisites: one course at the 100 or 200-level in applied ethics; or permission of the instructor.

Same as L30 Phil 345F

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN:

H

L84 Lw St 3450 The Legislative Process

Structure and behavioral patterns of American legislative bodies. Primary emphasis on the U.S. Congress, with attention to state legislatures for comparative purposes. Representation, internal patterns of influence, and policy-making processes. Prerequisite: junior standing.

Same as L32 Pol Sci 345

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L84 Lw St 346 Philosophy of Law

This course will first focus on the philosophical foundations of law, examining both the relationship between law and rules, as well as the types of legal reasoning. Second, the course will focus on philosophical issues that arise in the key substantive areas of law: contracts, torts, property, criminal law, and constitutional law, as well in specialized areas such as family and employment law. The course will end with a brief discussion of several problems in legal ethics. Prerequisites: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP.

Same as L30 Phil 346

UColl: PSA, PSC

L84 Lw St 346J Islamic Law

This course will present a general overview of Islamic law and an introduction to the study of religious legal authority, which values consensus. It will then explore the formation of the major schools of law. Next, it will debate the notions of "ijtihad" and "taqlid" and discuss how open and independent legal decisions have been in the Islamic world. It will also trace the transmission of legal knowledge in religious institutions across time and place by focusing on medieval Muslim societies and by closely examining the education of a modern-day Ayatollah. Note: L75 546 is intended for graduate students only.

L84 Lw St 347 Environmental Justice

Environmental quality varies widely across race, class, gender and other forms of social difference. This course explores how and why these differences exist. It provides an overview of the history and foundations of the environmental justice movement in the United States while covering classic environmental justice

issues, such as toxic waste and pollution, along with more recent issues, such as food access, urban green space, transportation and climate change. Environmental justice concerns in St. Louis are featured as part of the course. Class time will be devoted to lectures, case studies, group activities and discussions. Student learning will be assessed through exams, reflection, online assignments, a policy brief on an environmental justice issue and a group presentation.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: CPSC, SSC BU: BA EN: S

L84 Lw St 3507 Legal Conflict in Modern American Society

Thousands of lawsuits are filed daily in the state and federal courts of the United States. The disputes underlying those lawsuits are as messy and complex as the human, commercial, cultural and political dynamics that trigger them, and the legal processes for resolving those disputes are expensive, time-consuming and, for most citizens, seemingly impenetrable. At the same time, law and legal conflict permeate public discourse in the United States to a degree that is unique in the world, even among the community of long-established democracies. The overarching objective of the course is to prepare our undergraduate students to participate constructively in that discourse by providing them with a conceptual framework for understanding both the conduct and resolution of legal conflict by American legal institutions, and the evolution of — and values underlying — the substantive law American courts apply to those conflicts. This is, at core, a course in the kind of legal or litigation "literacy" that should be expected of the graduates of first-tier American universities. Some of the legal controversies that are used to help develop that "literacy" include those surrounding the permissible use of lethal force in self-defense, the constitutionality of affirmative action in university admissions, contracts that are unconscionably one-sided, sexual harassment in the workplace, the duty of landlords to prevent criminal assaults on their tenants, groundwater pollution alleged to cause pediatric cancers, and warrantless searches of cellphone locator data by police.

L84 Lw St 3561 Women and the Law

This course explores how social constructions of gender, race, class, and sexuality have shaped traditional legal reasoning and American legal concepts, including women's legal rights. We will begin by placing our current legal framework, and its gender, race, sexuality, and other societal assumptions, in an historical and Constitutional context. We will then examine many of the questions raised by feminist theory, feminist jurisprudence, and other critical perspectives. For example, is the legal subject gendered male, and, if so, how can advocates (for women and men) use the law to gain greater equality? What paradoxes have emerged in areas such as employment discrimination, family law, or reproductive rights, as women and others have sought liberal equality? What is the equality/difference debate about and why is it important for feminists? How do intersectionality and various schools of feminist thought affect our concepts of discrimination, equality, and justice? The course is thematic, but we will spend time on key cases that have influenced law and policy, examining how they affect the everyday lives of women. Over the years, this course has attracted WGSS students and pre-law students. This course is taught by law students under the supervision of a member of the School of Law faculty.

Same as L77 WGSS 3561

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S UColl: ML, SSC

L84 Lw St 358 Law, Politics, and Society

This course is an introduction to the functions of law and the legal system in American society. The course material will stress the realities of the operation of the legal system (in contrast to legal mythology) as well as the continuous interaction and feedback between the legal and political systems. There are four specific objectives of this course: (1) to introduce students to legal concepts and legal theories; (2) to analyze the operation of the appellate courts, with particular emphasis on the U.S. Supreme Court; (3) to analyze the operation of American trial courts, especially juries and the criminal courts; and (4) to examine the linkages between culture and law.

Same as L32 Pol Sci 358

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L84 Lw St 364 Anarchism: History, Theory and Praxis

This course analyzes the origins, historical trajectories, and influence of anarchism from its classical period (1860s - 1930s) until the present. It examines the major personalities, complex ideas, vexing controversies, and diverse movements associated with anarcho-collectivism, anarcho-communism, individualist anarchism, anarcho-syndicalism, anarchist feminism, green anarchism, lifestyle anarchism, and poststructuralist anarchism. In doing so, it explores traditional anarchist concerns with state power, authority, social inequality, capitalism, nationalism, imperialism, and militarism. It also analyzes anarchism's conception of individual and collective liberation, mutual aid, workers' organization, internationalism, direct democracy, education, women's emancipation, sexual freedom, and social ecology. Special attention will be given to past and contemporary globalizing processes and their relation to the dissemination and reception of anarchism in the global South.

Same as L97 GS 364

L84 Lw St 3670 The Long Civil Rights Movement

The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically and thematically. It pays special attention to struggles fought in the North, West and Southwest; it seeks to question binaries constructed around "confrontational" and "accommodationist" leaders; it reveals how Latinos, Native Americans, and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics.

L84 Lw St 3866 Interrogating "Crime and Punishment"

Whether read as psychological thriller, spiritual journey, or social polemic, Dostoevsky's 1866 novel *Crime and Punishment* has inspired diverse artistic responses around the world. From the 19th century to the present day, writers and filmmakers have revisited (and often subverted) questions that Dostoevsky's novel poses: What internal and external forces cause someone to "step over" into crime? What are the implications of a confession? To what extent can the legal system provide a just punishment? Are forgiveness and redemption possible, or even relevant? What role does grace — or luck — play in the entire process? This course begins with our close reading of Dostoevsky's novel and then moves on to short stories, novels, literary essays and movies that engage in dialogue with the

Russian predecessor. A central concern of our intertextual approach is to explore the interplay between specific socio-historical contexts and universal questions. All readings are in English. No prerequisites.

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: BA EN: H

L84 Lw St 389 Power, Justice and the City

This course examines normative theoretical questions of power and justice through the lens of the contemporary city, with a particular focus on American urban life. It explores urban political economic problems, questions of racial hierarchy and racial injustice in the modern metropolis, and the normative and practical dilemmas posed by "privatism" in cities and their suburbs. In addition, the course devotes considerable attention to honing students' writing skills, through class assignments that stress rewriting and revising, and also through four in-class writing workshops devoted to formulating a thesis and making an argument, revising and rewriting, writing with style, and peer consultation.

L84 Lw St 391 History of Political Thought I: Justice, Virtue and the Soul

This course offers a critical introduction to the main issues and debates in western political theory, including but not limited to the topics of justice, legitimacy, equality, democracy, liberty, sovereignty, and the role of history in the political and social world. This course is designed to be the first in a three-semester sequence on the history of political thought, and

students are encouraged, but not required, to take the courses in chronological sequence. The first semester begins with ancient Greek political thought, and follows its development up to the early 16th century.

Same as L32 Pol Sci 391

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S UColl: ML

L84 Lw St 392 History of Political Thought II: Legitimacy, Equality, and the Social Contract

Government is often justified as legitimate on the grounds that it is based on the consent of the governed. In History of Political Thought II, "Legitimacy, Equality, and the Social Contract," we examine the origins of this view, focusing our attention on canonical works in the social contract tradition, by Thomas Hobbes (1588-1679), John Locke (1632-1704), Jean-Jacques Rousseau (1712-1778), David Hume (1711-1776), and Immanuel Kant (1724-1804). This course is the second in a three-semester sequence on the history of political thought. Students are encouraged but not required to take all three courses. Prerequisite: One previous course in political theory or political philosophy.

Same as L32 Pol Sci 392

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L84 Lw St 393 History of Political Thought III: Liberty, Democracy and Revolution

How, if at all, should the political institutions of the modern state express and secure the liberty and equality of citizens? What is the political significance of private property? Is world history to be understood as progress toward one best form of government — capitalist democracy, perhaps, or communism? What forces drive history? We address these and other timeless political questions through close reading and rigorous analysis of classic texts in the history of Western political thought. Authors studied include Kant, Hegel, Marx, Tocqueville, John Stuart Mill, and Nietzsche. Prerequisite: one previous course in political theory or political philosophy. The course is the third in a three-semester sequence on the history of political thought, and students are encouraged but not required to take the courses in chronological sequence.

Same as L32 Pol Sci 393

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L84 Lw St 399 Topics in Politics: American Judicial Politics

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Same as L32 Pol Sci 399

Credit 3 units. A&S IQ: SSC BU: BA, ETH EN: S

L84 Lw St 4002 Directed Fieldwork in Legal Research

A fieldwork project in empirical and/or archival legal research under the direction of a member of the Washington University faculty. The fieldwork may be planned and undertaken individually or as part of a formal project. Permission of supervising faculty member and director of the program is required.

Credit variable, maximum 6 units. EN: H

L84 Lw St 4013 Negotiating Major Legislation in Congress

This course examines the outcomes of the legislative process in the United States. The first third of the course examines key concepts and major determinants of the negotiation process: majority rule instability, agenda control, political parties, the amendment process and the uncovered set. The rest of the course examines the negotiations that led to some of the most significant legislation in the past 100 years, from the Federal Reserve Act of 1913 through the Voting Rights Act of 1965 to the immigration bill of 2006. Along with other assignments, each student writes several drafts of a major research project on a major piece of legislation. Each research project examines the amendments offered, the strategic intentions of the amendments' sponsors, the agenda process and the role of party. Prerequisite: Pol Sci 101B.

Same as L32 Pol Sci 4013

Credit 3 units. A&S IQ: SSC, WI EN: S

L84 Lw St 4030 Political Theory of Education

This course explores issues of authority, legitimacy, citizenship, freedom and equality through contemporary readings in the political theory of education. What is to be done when parents, citizens, and educational experts make conflicting judgments about the proper education of children? When should the state defer to parental judgments and what are the grounds for legitimately refusing to do so? How should public schools aim to equip their students for the responsibilities of citizenship in a diverse liberal democratic state? What do the concepts of equality and equality of opportunity mean in the context of education, and (how) should governments pursue these values through education policy? We explore these issues through contemporary works of political theory as well as through considering a number of important U.S. court cases, including those dealing with the schooling of children from minority religious and cultural groups, affirmative action in university admissions, and school desegregation plans. Prerequisite: one previous course in political theory or political philosophy.

Same as L32 Pol Sci 4030

Credit 3 units. A&S IQ: SSC BU: ETH EN: S

L84 Lw St 4070 Global Justice

This course examines contemporary debates and controversies regarding global justice. Seminar discussions are arranged around significant issues in the current literature. For example: What (if anything) do we owe to the distant needy? Do we have special obligations to our compatriots? Do political borders have normative significance? And so on. This course is of interest not only to political theorists, but also students in other fields interested in social justice or international relations generally.

Same as L32 Pol Sci 4070

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L84 Lw St 4080 Voting Rights

This course will study legal concepts of voting rights and election law that impact the ability of citizens to access and participate in the democratic process. It will include the opportunity for students to directly engage in observing, monitoring, or advancing the right to vote during the 2008 elections. Election law changes rapidly and is the subject of legal and political dispute in a number of areas that will affect the franchise during the 2008 elections. This course will examine federal constitutional and statutory law governing the right of suffrage and assess current controversies in these areas. While there is no specific "right to vote" explicitly stated in the U.S. Constitution,

over time, it has been amended or interpreted to protect the right of franchise from being abridged based on race, gender, property ownership, age and other qualifications. Legislative enactments have also established rights with respect to voting. Each extension of voting rights has been a product of and resulted in social and political change. This course will examine the interplay of law and politics in the right to vote. The course will begin with the study of constitutional foundations, statutory protections and case law. We will then apply these principles to current issues in voting rights, including voter registration, voter identification, provisional ballots, voting machines, access for people with disabilities, felony disenfranchisement, voter suppression and voter fraud. Students will apply this knowledge to voting rights during the 2008 elections through hands-on involvement in voter education, monitoring or advocacy. The course will conclude with an assessment of the current issues in light of observations made by students during the 2008 elections, with an eye toward the advancement of election law and full enfranchisement in the future. The course involves the study of fundamental Supreme Court cases, interactive discussion of contemporary debates, and review of current litigation and legislative proposals. The course will be supplemented by occasional guest visits by election officials, lawyers, legislators, voting rights advocates or others.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L84 Lw St 425A Law, Religion, and Politics

What is the role of religious argument in politics and law? What kinds of arguments are advanced, and how do they differ from one another? Are some of these arguments more acceptable than others in a liberal democracy? This course will explore these questions through the work of legal scholars, theologians and political theorists. Our topics include the nature of violence and coercion in the law, constraints on public reason, the relationship between religion and government, and the nature of religious practice and tradition.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH EN: H

L84 Lw St 429 Feminist Political Theory

This course asks how feminist thinkers from various political and intellectual traditions critique, adopt and transform political theories of justice, citizenship, property and the state. To uncover how different feminist theories have been adopted in the struggle for political transformation and social justice, we will pursue two main lines of inquiry. The first asks how feminist thinkers from various traditions critique and engage the history of political thought within the social contract tradition. We will ask, in particular, how gender, race, slavery, colonialism and empire shape conceptions of citizenship and property. We will also examine transnational feminist critiques of the public/private division in the Western political theory canon as it impacts the role of women and the social construction of women's bodies. During the second half of the semester, we will ask how various transnational social movements have engaged and adopted feminist theories in efforts to resist state violence, colonialism, labor exploitation and resource extraction. In following these lines of inquiry we will draw from postcolonial, decolonial, liberal, Black, radical, Marxist and Chicana feminist perspectives. Part of our goal will be to uncover how various feminist theories treat the relationship between politics and embodied experience, how gendered conceptions of family life affect notions of political

power and how ideas about sexuality and sexual conquest intersect with empire-building. Majors and minors in WGSS receive first priority. Other students will be admitted as course enrollment allows.

Same as L77 WGSS 429

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L84 Lw St 440 Religion, Politics, and the University

This course explores in depth current issues related to pluralism, difference, and belonging in matters pertaining to religion and other important issues, with a particular focus on how these play out in the university context. The instructors, John Inazu and Eboo Patel, are two of the leading national commentators on these issues. Prerequisite: Students enrolling in this class must submit a brief statement of interest (<http://law.wustl.edu/COURSES/INAZU/seminar1/summaries/>) to Professor John Inazu.

Same as L57 RelPol 440

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L84 Lw St 4400 Advanced Social and Political Philosophy

A selective investigation of one or two advanced topics in the philosophical understanding of society, government and culture. Readings may include both historical and contemporary materials. Possible topics include: liberalism, socialism, communitarianism, citizenship, nationalism, cosmopolitanism, social contract theory, anarchism, and the rights of cultural minorities. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Same as L30 Phil 4400

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L84 Lw St 4402 Topics in Political and Social Theory: Constitutionalism

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Same as L32 Pol Sci 4402

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L84 Lw St 461A Intro to Environmental Law

Survey of the most prominent federal laws designed to control pollution and protect human health and the environment. Examines laws applicable to environmental impact statements, biodiversity, air pollution, water pollution, and hazardous waste. Discusses the role of state law and cooperative federalism, as well as the roles of the courts, the legislature, and the administrative state in protecting the environment.

Same as L82 EnSt 461

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L84 Lw St 4646 Democracy: Theory And Practice

What does it mean to govern democratically? Why value democratic government? What role, if any, should notions of rights, representation, and deliberation play in theorizing about and empirical research into problems of democratic governance? What lessons can we learn about democracy from scholars writing in the traditions of feminist theory and critical race theory? What is the relation between democracy and knowledge? Should democracy extend beyond the boundaries that define the nation-state? Should (some aspects of) the economy be democratized?

During the fall of 2018, we will have the opportunity to ask these and related questions in the context of the U.S. midterm election. We will engage in debates about contemporary democratic theory while we follow developments in the campaigns leading up to the November election.

Same as L32 Pol Sci 4646

Credit 3 units. A&S IQ: SSC EN: S

L84 Lw St 470 Interdisciplinary Topics: The Idea of the Law: Text & Traditions

Various interdisciplinary topics are explored that may include around the humanities, social sciences and data sciences.

Same as L93 IPH 470

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L84 Lw St 472 Social Theory and Anthropology

A seminar on social theory and its ethnographic implications. Course combines major works of modern social theory, including Marx, Weber, and Durkheim, with current work by contemporary anthropologists, such as Clifford Geertz, Eric Wolf, Marshall Sahlins, and Fredrik Barth, and ethnographers from related disciplines, such as Pierre Bourdieu and Paul Willis. Prerequisite: previous anthropology course work or permission of instructor.

Same as L48 Anthro 472

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC EN: S

L84 Lw St 487 Topics in American History: Race and Drugs in American History

This course explores the racial construction of the use of legal and illegal substances in American history from the mid-19th century to the present. We will spend time engaging in a historical analysis of the social, economic, and racial dynamics that defined drug addiction in popular imagination, and examine how these factors contributed to discussions about legality, access to substances, one's ability to be rehabilitated, and criminal status. Regarding criminality we will particularly explore sociological and theoretical perspectives of labeling, habitual and occasional offenders, and moral panic in order to understand how racial minority groups were targeted for different rhetorical, legislative, and economic purposes. One major goal of the course will be to outline the early 20th century beginnings of the war on drugs and connect it to the century long growth of a militarized police system and prison industrial complex. We will secondly work to understand the role of local and national political actors, law enforcement, and the media in manufacturing and maintaining connections between race, crime and drugs. Ultimately, we will use our study of drugs to contextualize 21st century issues of police violence, increases in homicide in minority communities, mass incarceration, poverty, segregation, and mass movements of protest.

Same as L22 History 487

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L84 Lw St 4981 Advanced Seminar: Historical Perspectives on Human Rights

This course offers a historical perspective on the modern international human rights regime, using materials drawn from diplomatic, legal, political, and cultural studies. Successful completion of this seminar involves designing, researching and writing a 25-30 page paper on a historically-oriented, human-rights-related topic of student's choice.

Same as L22 History 4981

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

Linguistics

At Washington University, the Linguistics program offers an undergraduate major and minor. The core of the Linguistics program focuses on the study of how languages are structured. Students examine how words are built from sounds, how sentences are built from words, and how all of this structure manages to communicate meaning. With a good understanding of these formal properties, students can pursue other questions about language. How does language change over time? Do diverse languages have more in common than meets the eye? What functions does language play in society? What is its relation to thought? What are its biological and psychological underpinnings? And just how do children manage to acquire language so well in the first place?

Linguistics takes a scientific approach to the study of language and develops skills in data analysis and scientific experimental methods. Linguistics students may or may not speak many languages, but they definitely will learn how to collect and analyze data about languages in an effort to answer these questions.

Majors

The Major in Linguistics

Total units required: 30 units, at least 24 of which must be from courses at the 300 level or higher

Required courses: 18 units

Code	Title	Units
Ling 170D	Introduction to Linguistics	3
Ling 309	Syntactic Analysis	3
Ling 311	Introduction to Semantics	3
Ling 312	Phonetics	3
Ling 313	Phonological Analysis	3
Ling 317	Introduction to Computational Linguistics	3
Total Units		18

Elective courses: 12 units

Students select 12 units from the courses listed below. At least 9 units must be at the 300 level or higher. At most 6 units may be drawn from Ling 499, Ling 500, and cross-listed courses that are not home-based in the Linguistics program.

Code	Title	Units
Ling 148	First-Year Seminar: The Linguistics of Constructed Languages	3
Ling 225D	Latin and Greek in Current English	3
Ling 258	Methods in Linguistic Research	3
Ling 263	Linguistics for Legal Purposes	3
Ling 315	Morphology	3
Ling 320	Historical and Comparative Linguistics	3
Ling 339	Introduction to Sociolinguistics	3
Ling 340	Linguistic Pragmatics	3
Ling 341	Linguistic Diversity in the United States	3
Psych 358	Language Acquisition	3
Ling 396	Linguistics Seminar	3
Ling 396W	Linguistics Seminar: Writing Intensive	3
Ling 408	Psychology of Language	3
Ling 427	Computation and Learnability in Linguistic Theory	3
Ling 466	Second Language Acquisition	3
Ling 495	Senior Seminar in Linguistics: Metrical Stress Theory	3
Ling 499	Independent Work For Senior Honors	3-6
Ling 500	Independent Study	1-6

Under certain circumstances, students may count toward their major a limited number of relevant courses not listed here. Such circumstances include study abroad and preparation for a specialized capstone. A specific plan of study must be worked out in advance with the director of the Linguistics program.

Language requirement: Majors should normally have foreign language competency equivalent to one year of study at the college level. Classes taken to fulfill this requirement do not normally count toward the 30 total units required for the major.

Additional Information

Capstone: Primary majors must complete a capstone project. This will normally be done during the senior year while taking Ling 320, Ling 495, Ling 499, or Ling 500. Students wishing to count Ling 500 for their capstone need to have their independent studies approved in advance by the director of the Linguistics program.

Senior Honors: Students with a university grade-point average of 3.65 or higher and a linguistics GPA of 3.65 or higher at the end of their junior year may apply to enter the honors program by submitting a proposal for a senior thesis. If admitted into the program, the student registers for 3 units of Ling 499 during each semester of the senior year. The student must complete the thesis and pass an oral defense by the middle of March of the senior year.

Minors

The Minor in Linguistics

Total units required: 15 units, at least 9 of which must be from courses at the 300 level or higher

Required course: 3 units

Code	Title	Units
Ling 170D	Introduction to Linguistics	3

Elective courses: 12 units

At least 6 units must come from the following list:

Code	Title	Units
Ling 309	Syntactic Analysis	3
Ling 311	Introduction to Semantics	3
Ling 312	Phonetics	3
Ling 313	Phonological Analysis	3
Ling 317	Introduction to Computational Linguistics	3

The remaining elective units may be drawn from any course acceptable as an elective for the major.

Courses

L44 Ling 148 First-Year Seminar: The Linguistics of Constructed Languages

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: HUM Art: HUM BU: HUM EN: S

L44 Ling 170D Introduction to Linguistics

Language is one of the fundamental capacities of the human species, and there are many interesting and meaningful ways in which it can be studied. This course explores the core components of linguistic theory: speech sounds (phonetics and phonology), word formation (morphology), sentence structure (syntax) and meaning (semantics). It also provides an overview of interdisciplinary ideas and research on how language is acquired and processed, its relation to the mind-brain and to society, and the question of whether the essential properties of language can be replicated outside the human mind (specifically, in chimpanzees or computer programs).

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, HUM EN: S

L44 Ling 225D Latin and Greek in Current English

An astonishingly large number of English words, especially in areas such as medicine, science, and law, are derived from Latin and Greek. This course will provide a study of the impact of Latin and Greek on the English language through study of the Latin and Greek roots, prefixes, and suffixes that are most commonly found in English technical and non-technical vocabulary and the linguistic principles through which these elements have entered the English language.

Same as L08 Classics 225D

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L44 Ling 258 Methods in Linguistic Research

This course will introduce students to a range of formal, computational, and experimental tools for conducting linguistic research. Students will learn about different types of linguistic data, experimental design, and statistical techniques in the context of research in general linguistics, psycholinguistics and sociolinguistics. This course aims to make students more capable readers of linguistic research (and scientific research more generally) and to provide them with hands-on experience in employing linguistic research methods. The course will also serve as an introduction to R for statistical computing. The class is intended for freshman and sophomore students who are considering advanced study in the linguistics program. Prerequisite: Ling 170D.

Credit 3 units. A&S IQ: SSC, AN EN: S

L44 Ling 263 Linguistics for Legal Purposes

This course exposes students to an array of legal matters in which forensic linguistic science can play a key role. It simultaneously introduces them to linguistic concepts, theories, and methods that can be differentially applied for a combination of forensic and legal purposes. Topics include trademark disputes, defamation suits, civil litigation, authorship identification, and linguistic evaluations of testimony presented during murder trials. Assignments will include the formulation of affidavits and the production of legal opinions derived from diverse linguistic analyses.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L44 Ling 301G Symbolic Logic

In the first half of the course, we will be studying some features of truth-functional and first-order classical logics, including studying the model theory and metatheory for first-order logic in much greater depth than in Phil 100. In the second half of the course, we will go on to study three different styles of proof-system: tableaux, axiomatic, and natural deduction. This course

continues on where Phil 100 leaves off. It is recommended for students who have already taken that introductory course or for students who already have a strong background in mathematics. Priority given to majors in philosophy and PNP.

Same as L30 Phil 301G

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: HUM

L44 Ling 306G Philosophy of Language

A survey of major philosophical problems concerning meaning, reference, and truth as they have been addressed within the analytic tradition. Readings that represent diverse positions on these focal issues will be selected from the work of leading philosophers in the field, for example: Frege, Russell, Wittgenstein, Davidson, Quine, Kripke, and Putnam. Students are encouraged to engage critically the ideas and arguments presented, and to develop and defend their own views on the core topics. Prerequisite: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP.

Same as L30 Phil 306G

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L44 Ling 309 Syntactic Analysis

The ability to produce and understand an infinite number of sentences is perhaps the most fascinating aspect of the human language faculty. Syntax is the study of how the brain organizes sentences from smaller phrases and words. This course explores syntactic analysis from several perspectives within generative linguistics, focusing primarily on the Government and Binding framework but also introducing Minimalist and Optimality Theoretic approaches. Topics discussed include phrase structure, transformations, case theory, thematic roles and anaphora. Assignments help students learn to construct and compare analyses of syntactic problems in English and other languages. Prerequisite: Ling 170D or 440, or permission of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L44 Ling 311 Introduction to Semantics

Semantics is the branch of linguistics that studies how speakers assign meaning to words, sentences and larger units of discourse. We combine perspectives from both linguistics and philosophy to explore a variety of topics including polysemy, compositionality, quantification, anaphora, definite descriptions, attitude reports, presupposition and implicature. Prerequisite: Ling 170D or Phil 301G or permission of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L44 Ling 312 Phonetics

Phonetics is the study of the sounds of the languages of the world. The primary goal of the course is to learn how speech sounds are produced, so that the student can describe them in articulatory terms, write them out in a standard notational system, and produce them accurately. Other topics include a basic introduction to the acoustics of speech and the use of personal computers to display, analyze and synthesize human speech. The course should prove useful to students desiring a deeper understanding of one of the fundamental underpinnings

of linguistics, but also has practical applications in such fields as foreign language learning and the appreciation and acquisition of new dialects and accents. Prerequisite: Ling 170D or permission of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L44 Ling 313 Phonological Analysis

There are several important abilities involved in the use of human language, one of these being the ability to organize speech sounds. The system that the brain uses to accomplish this task is the subject matter of phonology. This course explores phonology from several perspectives within generative linguistics, including both traditional rule-based and current Optimality Theoretic approaches. Topics discussed include phonological features, lexical phonology, prosodic morphology, tone and metrical stress. Assignments help students learn to analyze phonological problems in a variety of languages and to evaluate the consequences of using different analytic approaches. Prerequisite: Ling 170D or 440, or permission of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L44 Ling 315 Morphology

Concepts covered: morphemic analysis and investigation of morphological processes. Additional topics may include relationship of morphology to language-typology and to syntax. Prerequisite: Ling 170D, or permission of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L44 Ling 317 Introduction to Computational Linguistics

Use of computers to analyze, understand and generate human language. Emphasis on appreciating practical applications such as text analysis; search and creation of dictionaries and corpora; information retrieval; machine translation; and speech interfaces. Survey of rule-based and statistical techniques. Students acquire programming skills appropriate for solving small- to medium-scale problems in linguistics and text processing, using a language such as Python. Students have regular programming assignments and complete a semester project. No previous knowledge of programming required. Prerequisites: Ling 170D or permission of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L44 Ling 320 Historical and Comparative Linguistics

Historical linguistics focuses on how languages change over time. Comparative linguistics focuses on their similarities and differences. In this course we trace some of the differences and changes in sound (phonetics and phonology), word formation (morphology), sentence structure (syntax) and meaning (semantics). Topics include linguistic universals; the structural and genetic classification of languages; the techniques of reconstructing proto-languages; and the causes of language change. Examples from Indo-European languages (for example, Greek, English and Spanish) and from Native American languages (for example, Quechua and Mayan) are emphasized. Prerequisite: Ling 170D.

Credit 3 units. A&S IQ: LCD, SSC Art: HUM BU: HUM EN: S

L44 Ling 339 Introduction to Sociolinguistics

Studies of language in social context are presented, including research related to diglossia, bilingualism, pidginization, creolization and dialectology. Discourse analyses and conversational analyses of face-to-face conversation are examined in methodological and analytical terms. Beyond assigned readings, critical discourse analyses, the ethnography of speaking, the sociology of language, and accommodation theory are also considered. Students are required to develop a course project related to one or more studies of language in use. Experimental studies of sociophonetics and sociohistorical linguistics are presented during lectures to demonstrate advanced interdisciplinary research with potential educational and legal relevance. Prerequisite: Ling 170D.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: HUM EN: S

L44 Ling 340 Linguistic Pragmatics

Discourse analysis and pragmatics are the subfields of linguistics that investigate language as it is used in real-life contexts.

The focus of this course is on the following question: What do people do with language, and how do they do it? One goal is to demonstrate how the results of such investigations are relevant for a number of concrete problems in human communication. Some of the more specific questions we will explore are as follows: What distinguishes discourse analysis and pragmatics from each other? What is their relation to the other branches of linguistics? How can the two fields contribute to the establishment of a paradigm for interdisciplinary and intercultural studies? Prerequisite: Ling 170D or permission of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L44 Ling 341 Linguistic Diversity in the United States

Linguistic diversity has always existed within the United States, and this course begins with a survey of many of the indigenous Native American languages that existed prior to European colonization. The emphasis of this course is linguistic research, as we examine diverse studies of language across the nation with respect to regional differences, racial and ethnic differences, historical differences, and differences in education and economic status. American bilingualism is explored, as are many of the dialects that have evolved in different parts of the nation. Students study a range of sophisticated linguistic analyses of language diversity in different parts of the United States at different points in the nation's history. The culmination of the course explores practical linguistic applications in legal and educational contexts. Prerequisites: Ling 170D and some familiarity with elementary statistics.

Credit 3 units. A&S IQ: SSC, SC, SD BU: BA EN: S

L44 Ling 3701 Introduction to Hispanic Linguistics

An introduction to the scientific study of the Spanish language, this course focuses on each of the major linguistic subsystems, including the sound system (phonetics and phonology), word formation (morphology), formation of phrases and sentences (syntax), and the use of the language to convey meaning (semantics and pragmatics). At each level of analysis, selected comparisons are made between Spanish and English and between Spanish and other languages. The course also examines different historical, regional and social varieties of Spanish and situations of Spanish in contact with other languages.

Same as L38 Span 370

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L44 Ling 390 Linguistics Service Learning I

Because language is fundamental to human communication, differences in language can present particularly difficult barriers to learning. Taking classes in a language that is not your native language, for example, presents special challenges both to students and their teachers. For speakers of nonstandard dialects, taking classes in a standard dialect presents subtler — and in some ways, even more difficult — challenges. This course provides students with a concrete understanding of the practical difficulties arising from linguistic differences and helps them discover ways in which these difficulties can be addressed. In particular, students are expected to devote two hours per week tutoring local K-12 students and to keep a journal focusing on their experiences from a linguistic perspective. Students will be expected to attend weekly meetings with faculty and community partners to relate challenges that they have encountered and to discuss possible solutions. Students will also receive training on how to better understand and serve under-sourced and diverse populations. Prerequisite: at least two 300-level courses in Linguistics or permission of the instructors.

Credit 3 units. A&S IQ: SSC BU: HUM EN: S

L44 Ling 391 Linguistics Service Learning II

Linguistics Service Learning II meets with Linguistics Service Learning I, but it requires completion of additional written assignments. Prerequisite: Ling 390.

Credit 3 units. A&S IQ: SSC BU: HUM EN: S

L44 Ling 396 Linguistics Seminar

Readings on a selected topic in theoretical linguistics with an emphasis on discussion, presentation and writing. Prerequisite: varies with topic.

Credit 3 units. A&S IQ: SSC EN: S

L44 Ling 396W Linguistics Seminar: Writing Intensive

Readings on a selected topic in theoretical linguistics, with an emphasis on discussion, presentation, and writing. Prerequisite: varies with topic.

Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC BU: HUM EN: S

L44 Ling 408 Psychology of Language

This course surveys current research and theory in psycholinguistics, covering the biological bases, cognitive bases and learning of language. We consider studies of normal children and adults, the performance of individuals with various types of language disorders, and computer simulations of language processes. Topics range from the perception and production of speech sounds to the management of conversations. Each student carries out an original research project on some aspect of psycholinguistics. Prerequisites: Ling 170D and Psych 100B. Same as L33 Psych 433

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L44 Ling 427 Computation and Learnability in Linguistic Theory

This course introduces the advanced linguistics or computer science student to the fields of learnability and computation as they apply to the study of linguistic theories and natural language. Topics covered include the formal language hierarchy,

including the subregular languages; issues in the learnability of phonology, morphology, and syntax; and algorithms specific to constraint-based linguistic grammars. Prerequisites: either CS 130 or Ling 317 and at least one of the following: Ling 309, Ling 311, Ling 313, or Ling 315.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L44 Ling 466 Second Language Acquisition

There are many ways in which a second language can be learned: from infancy as the child of bilingual parents, or later through formal instruction, immersion in a new culture, or in a particular work or social situation. This class is an inquiry into the processes by which acquisition occurs. Topics include the nature of language learning within the scope of other types of human learning; the relationship between first- and second-language acquisition; the role of linguistic, cognitive and sociocultural factors; insights gained from analyzing learners' errors; key concepts such as interlanguage and communicative competence; bilingualism; the optimal age for second-language acquisition; and a critical appraisal of different theories of second-language acquisition. Both theoretical and instructional implications of second-language acquisition research are considered. This course can be used toward certification in TESOL and is a required course for the Graduate Certificate in Language Instruction. Prerequisite: Ling 170D or equivalent is recommended, especially for undergraduates, but is not required.

Credit 3 units. A&S IQ: HUM EN: H

L44 Ling 4691 Second Language Reading and Writing: Theory, Research and Practice

This course, taught in English, extends issues in second language literacy beyond pedagogy by examining the wide range of theoretical and research issues, both historical and current. Literacy acquisition among second language learners involves a number of variables including both cognitive and social factors. Topics discussed in class include literacy and social power, universal cognitive operations, individual learner differences, text types and literary forms, and the extent to which reading and writing are interrelated. Students discuss how to bridge research and practice, and they create reading and writing activities driven by theory and empirical investigations. This course is a required course for the undergraduate minor in applied linguistics and an elective for the Graduate Certificate in Language Instruction. Same as L38 Span 4691

Credit 3 units. A&S IQ: SSC EN: S

L44 Ling 478 Topics in Linguistics

Meets with designated linguistics course, but with additional writing and research required for graduate credit and certification.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L44 Ling 495 Senior Seminar in Linguistics: Metrical Stress Theory

The Senior Seminar affords students an opportunity to integrate the various fields of linguistics. Readings, discussions and presentations let students address issues that combine the content and the research methods of areas such as phonetics, phonology, morphology, syntax, diachrony and semantics. Students have individual projects within the scope of the semester's particular topic, but the class as a whole helps in choosing, developing and refining the treatment. This course

fulfills the requirement for a senior capstone for primary majors in linguistics. It is the normal option for students who wish to take the capstone as a regular class rather than as sponsored independent study.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L44 Ling 499 Independent Work For Senior Honors

Prerequisites: senior standing and permission of the Linguistics program.

Credit variable, maximum 6 units.

Mathematics and Statistics

Mathematics has always held a central position in the liberal arts, and over time it has also come to play an important role in more and more aspects of our lives. Mathematical analysis and modeling are involved in many areas far beyond the traditional association of mathematics with the physical sciences and engineering. This fact is reflected in the diversity of the students who study at least some mathematics during their time at Washington University — students who recognize the importance of quantitative skills in a world that becomes more and more technological.

Students major in mathematics for many reasons. Some are planning academic careers in mathematics or statistics that involve teaching or research. Others plan to work as actuaries or at other jobs in industry or government. Some plan careers in secondary education. Many majors do not intend to become "mathematicians" at all but simply realize that quantitative training is a valuable asset in many kinds of careers; often, work in mathematics or statistics is meant to complement their study in other areas. Still other majors just view mathematics as an interesting concentration in their liberal arts education, even though they plan to enter professional fields such as medicine or law.

The Mathematics and Statistics program gives majors and minors a broad introduction to the subject. Majors choose among several tracks to complete their study; these tracks add different emphases to their programs and reflect individual interests or professional goals. Majors are encouraged to complete additional work (perhaps even a minor or a second major) in other related areas.

Majors

Requirements for All Majors

Total units required: 12 units

- The three-course calculus sequence (9 units)* and an introductory computer science course (3 units)**:

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
CSE 131	Introduction to Computer Science	3
Total Units		12

- * AP credit can be applied, and students who have completed Math 203 Honors Mathematics I and Math 204 Honors Mathematics II will have this requirement waived.

** This course may be waived after consultation with the director of undergraduate studies of the Department of Computer Science & Engineering.

The Major in Mathematical Sciences

Total units required: 24 units of upper-level courses, including the following:

Code	Title	Units
Math 309	Matrix Algebra	3
Math 310	Foundations for Higher Mathematics	3
or Math 310W	Foundations for Higher Mathematics with Writing	
Math 3200	Elementary to Intermediate Statistics and Data Analysis	3

- One of the following full-year 400-level sequences*:

Code	Title	Units
Math 4111 & Math 4121	Introduction to Analysis and Introduction to Lebesgue Integration	6
Math 4171 & Math 4181	Topology I and Topology II	6
Math 429 & Math 430	Linear Algebra and Modern Algebra	6
Math 449 & Math 450	Numerical Applied Mathematics and Topics in Applied Mathematics	6
Math 494 & Math 439	Mathematical Statistics and Linear Statistical Models	6

* Students whose primary major is secondary education may fulfill this requirement by taking Math 302 Elementary Geometry from an Advanced Point of View and Math 331 Algebraic Systems.

- At least one course from the following list (that has not already been used to fulfill any of the previous requirements listed):

Code	Title	Units
Math 370	Introduction to Combinatorics	3
Math 371	Graph Theory	3
Math 410	Introduction to Fourier Series and Integrals	3
Math 4111	Introduction to Analysis	3
Math 415	Partial Differential Equations	3
Math 416	Complex Variables	3
Math 4171	Topology I	3
Math 429	Linear Algebra	3

Math 434	Survival Analysis	3
Math 4351	Number Theory and Cryptography	3
Math 439	Linear Statistical Models	3
Math 449	Numerical Applied Mathematics	3

The Major in Mathematics

Total units required: 30 units of upper-level courses, including the following:

Code	Title	Units
Math 310	Foundations for Higher Mathematics	3
Math 4111	Introduction to Analysis	3
Math 4121	Introduction to Lebesgue Integration	3
Math 429	Linear Algebra	3
Math 430	Modern Algebra	3
Math 416	Complex Variables	3
Math 4171	Topology I	3
At least one of the following:		
Math 407	An Introduction to Differential Geometry	3
Math 415	Partial Differential Equations	3
Math 4181	Topology II	3
Math 4351	Number Theory and Cryptography	3

The Major in Applied Mathematics

Total units required: 30 units of upper-level courses, including the following:

Code	Title	Units
Math 310	Foundations for Higher Mathematics	3
Math 4111	Introduction to Analysis	3
Math 4121	Introduction to Lebesgue Integration	3
Math 429	Linear Algebra	3
Math 449	Numerical Applied Mathematics	3
Math 450	Topics in Applied Mathematics	3
At least two of the following:		
Math 410	Introduction to Fourier Series and Integrals	3
Math 415	Partial Differential Equations	3
Math 416	Complex Variables	3
Math 4351	Number Theory and Cryptography	3

The Major in Statistics

Total units required: 30 units of upper-level courses, including the following:

Code	Title	Units
Math 309	Matrix Algebra	3
Math 3200	Elementary to Intermediate Statistics and Data Analysis	3
Math 493	Probability	3
Math 494	Mathematical Statistics	3
Math 439	Linear Statistical Models	3
Math 459	Bayesian Statistics	3
or Math 475	Statistical Computation	

- At least two probability or statistics courses at the 400 level or above

The Major in Mathematics and Computer Science

The McKelvey School of Engineering and the College of Arts & Sciences developed a new major that efficiently captures the intersection of the complementary studies of computer science and math.

McKelvey Engineering students who declare this major must fulfill the core course requirements listed below and all other requirements for the Applied Science degree (p. 1280) in the McKelvey School of Engineering. They must also complete Engr 310 Technical Writing and 8 units of courses designated as NSM (Natural Sciences & Math) from Anthropology (L48 Anthro), Biology and Biomedical Sciences (L41 Biol), Chemistry (L07 Chem), Earth and Planetary Sciences (L19 EPSc), Physics (L31 Physics) or Environmental Studies (L82 EnSt).

Arts & Sciences students who declare this major must fulfill the distribution requirements and all other requirements for an AB degree (p. 1098) in addition to the specific requirements listed below.

Core Course Requirements

Code	Title	Units
CSE 131	Introduction to Computer Science	3
CSE 247	Data Structures and Algorithms	3
Math 131	Calculus I (AP credit may satisfy this requirement)	3
Math 132	Calculus II (AP credit may satisfy this requirement)	3
Math 233	Calculus III	3
Math 310	Foundations for Higher Mathematics	3
or Math 310W	Foundations for Higher Mathematics with Writing	
or CSE 240	Logic and Discrete Mathematics	
Math 309	Matrix Algebra	3

Math 3200	Elementary to Intermediate Statistics and Data Analysis	3
or ESE 326	Probability and Statistics for Engineering	
CSE 347	Analysis of Algorithms	3
Total Units		27

Electives

Eight upper-level courses from Math or Computer Science & Engineering can be chosen from the approved list, with the following caveats:

- At least three courses must be taken from CSE and at least three course must be taken from Math.
- Up to two preapproved courses from outside both departments can be selected.
- CSE 400 Independent Study or CSE 400E Independent Study may be taken for a maximum of 3 units and must be approved by a CS+Math review committee.

List of Approved Electives

Computer Science & Engineering

Code	Title	Units
CSE 217A	Introduction to Data Science	3
CSE 341T	Parallel and Sequential Algorithms	3
CSE 411A	AI and Society	3
CSE 412A	Introduction to Artificial Intelligence	3
CSE 416A	Analysis of Network Data	3
CSE 417T	Introduction to Machine Learning	3
CSE 427S	Cloud Computing with Big Data Applications	3
CSE 442T	Introduction to Cryptography	3
CSE 447T	Introduction to Formal Languages and Automata	3
CSE 468T	Introduction to Quantum Computing	3
CSE 513T	Theory of Artificial Intelligence and Machine Learning	3
CSE 514A	Data Mining	3
CSE 515T	Bayesian Methods in Machine Learning	3
CSE 516A	Multi-Agent Systems	3
CSE 517A	Machine Learning	3
CSE 518A	Human-in-the-Loop Computation	3
CSE 533T	Coding and Information Theory for Data Science	3
CSE 534A	Large-Scale Optimization for Data Science	3
CSE 541T	Advanced Algorithms	3
CSE 543T	Algorithms for Nonlinear Optimization	3

CSE 544T	Special Topics in Computer Science Theory	3
CSE 546T	Computational Geometry	3
CSE 554A	Geometric Computing for Biomedicine	3
CSE 555T	Adversarial AI	3
CSE 559A	Computer Vision	3
CSE 581T	Approximation Algorithms	3
CSE 584A	Algorithms for Biosequence Comparison	3
CSE 587A	Algorithms for Computational Biology	3

Mathematics and Statistics

Code	Title	Units
Math 350	Dynamical Systems and Chaos	3
Math 370	Introduction to Combinatorics	3
Math 371	Graph Theory	3
Math 4111	Introduction to Analysis	3
Math 4121	Introduction to Lebesgue Integration	3
Math 4171	Topology I	3
Math 420	Experimental Design	3
Math 429	Linear Algebra	3
Math 430	Modern Algebra	3
Math 434	Survival Analysis	3
Math 4351	Number Theory and Cryptography	3
Math 439	Linear Statistical Models	3
Math 449	Numerical Applied Mathematics	3
Math 450	Topics in Applied Mathematics	3
Math 456	Topics in Financial Mathematics	3
Math 459	Bayesian Statistics	3
Math 460	Multivariate Statistical Analysis	3
Math 4601	Statistical Learning	3
Math 461	Time Series Analysis	3
Math 462	Mathematical Foundations of Big Data	3
Math 470	Analytic Combinatorics	3
Math 475	Statistical Computation	3
Math 493	Probability	3
Math 494	Mathematical Statistics	3
Math 495	Stochastic Processes	3

Electrical & Systems Engineering

Code	Title	Units
ESE 4031	Optimization for Engineered Planning, Decisions and Operations	3
ESE 415	Optimization	3
ESE 417	Introduction to Machine Learning and Pattern Classification	3

ESE 427	Financial Mathematics	3
ESE 429	Basic Principles of Quantum Optics and Quantum Information	3
ESE 520	Probability and Stochastic Processes	3

Economics

Code	Title	Units
Econ 4151	Applied Econometrics	3
Econ 467	Game Theory	3

Biology and Biomedical Sciences

Code	Title	Units
Biol 5657	Biological Neural Computation	3

Biomedical Engineering

Code	Title	Units
BME 470	Mathematics of Imaging Science	3

The Major in Mathematics and Economics

Required courses:

Code	Title	Units
Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 4021	Intermediate Macroeconomic Theory	3
Econ 413	Introduction to Econometrics	3
or Econ 413W	Introduction to Econometrics with Writing	
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Math 309	Matrix Algebra	3
Math 3200	Elementary to Intermediate Statistics and Data Analysis	3
or Math 493	Probability	
Math 310	Foundations for Higher Mathematics	3
Total Units		33

Elective courses:

Majors must complete seven electives, with three in each discipline and one from either department.

In Economics:

One of the three electives can be any economics course with Econ 4011 or Econ 4021 as a prerequisite, including from an approved study abroad program. The other two economics electives must come from the following list:

Code	Title	Units
Econ 404	Behavioral Economics and Experimental Economics	3
Econ 407	Market Design	3
Econ 410	Macroeconomics of Inequality	3
Econ 4151	Applied Econometrics	3
Econ 429	Decision Under Risk and Time	3
Econ 435	Open Economy Macroeconomics	3
Econ 437	The Economics of Financial Intermediation	3
Econ 452	Industrial Organization	3
Econ 460	Urban Economics	3
Econ 467	Game Theory	3
Econ 471	Development Economics	3
Econ 477	Topics in Financial Economics	3
Econ 480	Labor Economics	3
Econ 484	Computational Macroeconomics	3

- With instructor permission, students may use any of the following for economics elective credit: Econ 501, Econ 502, Econ 503, Econ 504, Econ 511, or Econ 513.
- Econ 413 may be taken from an approved study abroad program. Consult with Academic Coordinator Dorothy Petersen in the Department of Economics for more information.

In Mathematics:

For Mathematics, the electives can come from the following list:

Code	Title	Units
Math 410	Introduction to Fourier Series and Integrals	3
Math 415	Partial Differential Equations	3
Math 416	Complex Variables	3
Math 4111	Introduction to Analysis	3
Math 4121	Introduction to Lebesgue Integration	3
Math 429	Linear Algebra	3
Math 439	Linear Statistical Models	3
Math 4392	Advanced Linear Statistical Models	3
Math 449	Numerical Applied Mathematics	3
Math 450	Topics in Applied Mathematics	3
Math 456	Topics in Financial Mathematics	3
Math 459	Bayesian Statistics	3
Math 460	Multivariate Statistical Analysis	3
Math 461	Time Series Analysis	3
Math 462	Mathematical Foundations of Big Data	3

Math 475	Statistical Computation	3
Math 493	Probability	3
Math 494	Mathematical Statistics	3
Math 495	Stochastic Processes	3

Advising, Questions, and Further Considerations:

- Students may declare a prime or a second major in Math + Economics via L24 (Math) or L11 (Econ), and that will determine their major advisor.
- It is possible to earn the Certificate in Financial Economics in conjunction with this major (prime or second).
- It is possible to graduate with Latin Honors or with “English” honors. Students should refer to the departments’ websites or consult with either Professor Blake Thornton (bthornton@wustl.edu) in the Department of Mathematics and Statistics or Academic Coordinator Dorothy Petersen (dottie@wustl.edu) in the Department of Economics for more information.
- Substitutions for mathematics courses and study abroad approval for mathematics courses will be determined by the Department of Mathematics and Statistics.
- Substitutions for economics courses and study abroad approval will be determined by Academic Coordinator Dorothy Petersen in the Department of Economics.
- Substitutions for CSE 131 are subject to approval by the McKelvey School of Engineering.

The Bachelor of Science in Data Science

The McKelvey School of Engineering and the College of Arts & Sciences developed a new major that efficiently captures the intersection of mathematics and statistics with computer science for data science. The Bachelor of Science in Data Science (BSDS) will give students the formal foundation needed to understand the applicability and consequences of the various approaches to analyzing data with a focus on statistical modeling and machine learning.

McKelvey Engineering students who declare this major must fulfill the core course requirements listed below and all other requirements for the Applied Science degree (p. 1280) in the McKelvey School of Engineering. They must also complete Engr 310 Technical Writing and 8 units of courses designated as NSM (Natural Sciences & Math) from Anthropology (L48 Anthro), Biology and Biomedical Sciences (L41 Biol), Chemistry (L07 Chem), Earth and Planetary Sciences (L19 EPSc), Physics (L31 Physics) or Environmental Studies (L82 EnSt).

Arts & Sciences students who declare this major must fulfill the distribution requirements and all other requirements for an AB degree (p. 1098) in addition to the specific requirements listed below.

Data Science Core Requirements (CR)

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Math 309	Matrix Algebra	3
Math 3211	Statistics for Data Science I	3
Math 4211	Statistics for Data Science II	3
Math 439	Linear Statistical Models	3
CSE 131	Introduction to Computer Science	3
CSE 247	Data Structures and Algorithms	3
CSE 217A	Introduction to Data Science	3
CSE 314A	Data Manipulation and Management	3
CSE 417T	Introduction to Machine Learning (or Math 4601 Statistical Learning)	3
Total Units		36

Data Science Technical Electives

Four courses from Mathematics & Statistics or Computer Science & Engineering can be chosen from an approved list, with the following caveats:

- At least one course from Mathematics & Statistics (at the 400 level or above)
- At least one course from CSE (ending in S, T, M, or A)
- At most one course at the 200 level

List of Approved Data Science Technical Electives

Computer Science and Engineering

Code	Title	Units
CSE 237S	Programming Tools and Techniques	3
CSE 256A	Introduction to Human-Centered Design	3
CSE 311A	Introduction to Intelligent Agents Using Science Fiction	3
CSE 347	Analysis of Algorithms	3
CSE 359A	Signals, Data and Equity (Cannot be double-counted in EPR)	3
CSE 411A	AI and Society (Cannot be double-counted in EPR)	3
CSE 412A	Introduction to Artificial Intelligence	3
CSE 416A	Analysis of Network Data	3
CSE 417T	Introduction to Machine Learning (Cannot be double-counted in CR)	3

CSE 427S	Cloud Computing with Big Data Applications	3
CSE 435S	Database Management Systems	3
CSE 457A	Introduction to Visualization	3
CSE 514A	Data Mining	3
CSE 515T	Bayesian Methods in Machine Learning	3
CSE 517A	Machine Learning	3
CSE 518A	Human-in-the-Loop Computation	3
CSE 534A	Large-Scale Optimization for Data Science	3
CSE 543T	Algorithms for Nonlinear Optimization	3
CSE 559A	Computer Vision	3

Mathematics and Statistics

Code	Title	Units
Math 322	Biostatistics	3
Math 420	Experimental Design	3
Math 434	Survival Analysis	3
Math 4392	Advanced Linear Statistical Models	3
Math 449	Numerical Applied Mathematics	3
Math 450	Topics in Applied Mathematics	3
Math 456	Topics in Financial Mathematics	3
Math 459	Bayesian Statistics	3
Math 460	Multivariate Statistical Analysis	3
Math 461	Time Series Analysis	3
Math 4601	Statistical Learning (Cannot be double-counted in CR)	3
Math 462	Mathematical Foundations of Big Data	3
Math 475	Statistical Computation	3
Math 493	Probability	3
Math 494	Mathematical Statistics	3
Math 495	Stochastic Processes	3
Math 5047	Geometry/Topology III: Differential Geometry	3
Math 5061	Theory of Statistics I	3
Math 5062	Theory of Statistics II	3
Math 5071	Linear Statistical Models Grad	3
Math 5072	Advanced Linear Models II	3

Electrical and Systems Engineering

Code	Title	Units
ESE 4031	Optimization for Engineered Planning, Decisions and Operations	3
ESE 415	Optimization	3
ESE 427	Financial Mathematics	3

Energy, Environmental & Chemical Engineering

Code	Title	Units
EECE 202	Computational Modeling in Energy, Environmental and Chemical Engineering	3

Linguistics

Code	Title	Units
Ling 317	Introduction to Computational Linguistics	3

Ethics and Professional Responsibility Requirement (EPR)

- 3 units of courses from the following list:

List of EPR Course Options

Code	Title	Units
Engr 4501	Engineering Ethics and Sustainability	1
Engr 4502	Engineering Leadership and Team Building	1
Engr 4503	Conflict Management and Negotiation	1
Engr 450F	Engineers in the Community (Engineering Ethics, Leadership and Conflict Management)	3
Engr 520P	Presentation Skills for Scientists and Engineers	2
CSE 359A	Signals, Data and Equity (Cannot be double-counted as an Elective)	3
CSE 411A	AI and Society (Cannot be double-counted as an Elective)	3
MSB 512	Ethics in Biostatistics and Data Science	2

Practicum Requirement

- 3 units of an **approved comprehensive data science project or experience**. A practicum must be approved by the committee of data science faculty.
- The practicum experience should be completed during the next-to-last semester of study (i.e., the first semester of senior year). It is important that practicum plans be submitted for review prior to starting the project or course work to ensure the proposed work is sufficient for the objectives of the practicum. After-the-fact approvals are possible but not guaranteed.

- Appropriate practicum work is possible via Independent Study (CSE 400E or Math 400) or via project-focused classes, including (but not limited to) CSE 437S Software Engineering Workshop and CSE 454A Software Engineering for External Clients. Students should contact course instructors in advance to identify the degree of agency the student will have over project selection and requirements.
- Contact Maria Sanchez (smaria@wustl.edu) in the CSE department office or the Math department office to initiate the approval process.

Notes to All Majors in Mathematics and Statistics

1. Students who entered Washington University **before fall 2020** should visit the Prior Bulletins (<http://bulletin.wustl.edu/prior/>) section of this *Bulletin* to view the major requirements that were in place for the appropriate year of matriculation.
2. Upper-level mathematics courses are those with course numbers that begin with a "3" or higher (e.g., Math 3200). Lower-level courses do not count toward upper-level mathematics requirements, even if they are cross-listed as an upper-level course in another department or program. For example, if Math 2200 were cross-listed by another department as 3XXX, then registering for that 3XXX course would not satisfy an upper-level mathematics requirement.
3. All required courses (both lower- and upper-level courses) must be completed with a grade of C- or better.
4. Math 318 and Math 308 cannot both be used to fulfill major requirements.
5. Courses transferred from other accredited colleges and universities with department approval can be counted, with the following caveats:
 - a. Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
 - b. At least half the upper-level units required in a major must be earned at Washington University or in a Washington University-approved overseas study program.
 - c. Courses from University College cannot be used to fulfill major requirements.
6. At most 3 units of independent study or research work can count toward the major requirements.
7. No **upper-level** course used to satisfy a major requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
8. Certain approved substitutions are found on the Department of Mathematics and Statistics webpage (<https://math.wustl.edu/major-and-minor-details/>). However, in all cases, at most one substitution can be used that involves a course not home-based in the department.

9. A student may declare at most one major or minor in any department. This includes joint majors such as Math+CS and Math+Econ.
10. At most 3 units from a different department at WashU can count toward the major requirements.

Additional Information

Additional Requirements

- All mathematics majors must take Math 131 Calculus I, Math 132 Calculus II, and Math 233 Calculus III. There are other ways to fulfill this requirement, including AP credit and Math 203 Honors Mathematics I-Math 204 Honors Mathematics II. Some students may obtain a waiver if they took similar courses before coming to Washington University.
- All required courses must be completed with a letter grade of C- or better.
- University College courses cannot be counted toward major requirements.
- No double-counting of upper-level courses with other majors or minors is allowed.
- At most 3 units for independent study or research work can count toward the major requirements.
- At most 3 units from a different department at Washington University can count toward the major requirements.
- Courses transferred from other accredited colleges and universities can be counted toward a major or minor with departmental approval.
- At least half of the upper-level credits required in a mathematics major or minor program must be fulfilled by Department of Mathematics and Statistics courses taken at Washington University or in Washington University–approved overseas study programs.
- A student cannot declare more than one major or minor in the department.

Course Substitutions

At most one approved substitution can be made using a course not home-based in the Department of Mathematics and Statistics. Please note the policy that at most one course from a different department at Washington University can count toward a major or minor.

- ESE 326 can be taken in place of Math 3200. ESE 326 and Math 3200 cannot both count toward a major or minor.
- Any course from another department that is cross-listed as a mathematics L24 course can count as an upper-level elective. Examples include L24 501C, L24 440C, and L24 403C. Such L24 courses always end with a "C."

- The following courses can count as upper-level mathematics electives:
 - L30 Phil 401, Phil 403, and Phil 404
 - Econ 4151 (this course can count as a statistics elective)
 - ESE 319, ESE 403, and E35 ESE 411

Courses in Probability and Statistics

The major and minor in statistics require electives in probability and statistics. Below is the list of allowed such courses:

- Math 3200 Elementary to Intermediate Statistics and Data Analysis
- Math 322 Biostatistics
- Math 420 Experimental Design
- Math 434 Survival Analysis
- Math 439 Linear Statistical Models
- Math 4392 Advanced Linear Statistical Models
- Math 459 Bayesian Statistics
- Math 460 Multivariate Statistical Analysis
- Math 461 Time Series Analysis
- Math 462 Mathematical Foundations of Big Data
- Math 475 Statistical Computation
- Math 493 Probability
- Math 494 Mathematical Statistics
- Math 495 Stochastic Processes
- Math 496: Topics In Statistics

Distinctions in Mathematical Sciences, Mathematics, Applied Mathematics and Statistics

Distinction

- Complete at least 33 units of upper-level mathematics and/or statistics courses.
- The GPA for these 33 upper-level units must be at least 3.7. If more than 33 units are taken for a letter grade, then the courses with the lowest grades can be omitted when computing GPA for this purpose.
- Complete at least five courses, each with a B or better, at level 400+.
- All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis.

Highest Distinction

- Complete at least five courses, each with a grade of B+ or better, at the 400 level or higher.
- Complete one of the two paths described below:
 - **Graduate Qualifier Path:** Graduate qualifier courses in mathematics and statistics are two-semester sequences that start in the fall. In mathematics, a two-semester graduate qualifier sequence has a qualifier exam at the end of each semester. In statistics, a two-semester sequence has a qualifier exam only at the end of the sequence in spring.

Students must complete and pass one of the following:

- a. Two semesters of qualifier courses* and their corresponding exams in mathematics (These courses can involve a single year-long sequence or be the first semesters of two different sequences.)
 - b. One full-year qualifier course sequence* and its corresponding exam in statistics
- **Course Work Path:**
 1. Complete at least 42 units of upper-level mathematics and/or statistics courses. The GPA for these 42 upper-level units must be at least 3.7. If more than 42 units are taken for a letter grade, then the courses with the lowest grades can be omitted when computing GPA for this purpose.
 2. Complete at least nine total courses at the 400 level or above, all with a B+ or better. These can include the five courses taken for distinction. All of these courses must be classroom courses (not independent study or study for honors), and they must all be taken for a letter grade.

* These qualifier courses can count toward the additional course requirements for Distinction.

Distinctions in Mathematics and Computer Science

Distinction

- For Distinction in Mathematics and Computer Science, a student must take an additional two electives, for a total of 10 electives.
- The student's GPA in the 10 electives must be at least 3.7. If the student takes additional courses that satisfy these requirements, then the courses with the lowest grades may be omitted when calculating GPA for this purpose.

- The student must complete at least four courses from the list of approved courses, each with a grade of B or better. These courses can be in either department (i.e., Mathematics and Statistics or Computer Science & Engineering). The list of courses will be maintained by both departments. Current approved courses include the following:
 - Math 4111, Math 4351, Math 429, Math 439, Math 4392, Math 449, Math 450, Math 456, Math 459, Math 461, Math 475, Math 494, Math 470, Math 4111, Math 4121, Math 4171, Math 4181
 - CSE 411A, CSE 416A, CSE 417T, CSE 427S, CSE 442T, CSE 447T, CSE 468T, CSE 511A, CSE 513T, CSE 514A, CSE 515T, CSE 516A, CSE 517A, CSE 518A, CSE 541T, CSE 543T, CSE 544T, CSE 546T, CSE 554A, CSE 581T, CSE 587A

High Distinction

- Complete all requirements for Distinction.
- Complete an honors thesis in either department (Mathematics and Statistics or Computer Science & Engineering).

Highest Distinction

- Complete the requirements for High Distinction.
- Complete one of the two options described below:
 - **Qual Option:** Complete two semesters of graduate course work and qualifier exams in the Department of Mathematics and Statistics, as described above for Highest Distinction for mathematics and statistics majors.
 - **Course Option:** Complete three additional electives, for a total of 13. As with Distinction, the student's GPA in the 13 electives must be at least 3.7, and additional courses beyond 13 can be disregarded when calculating the GPA. The 13 electives must include at least eight courses selected from the list under Distinction, each with a grade of B+ or better. At least two of these eight courses must be from each department (Mathematics and Statistics and Computer Science & Engineering).

Latin Honors

At the time of graduation, the Department of Mathematics and Statistics will recommend that a candidate receive Latin Honors (cum laude, magna cum laude, or summa cum laude) if that student has completed the department's requirements for High Distinction or Highest Distinction in Mathematics, each of which requires an Honors Thesis. The College of Arts & Sciences will then approve the recommendation if the student's final cumulative overall GPA is at least 3.65 (subject to change by the College).

The Honors Thesis

Arts & Sciences mathematics and statistics majors who want to be candidates for Latin Honors, High Distinction, or Highest Distinction must complete an honors thesis. Writing an honors thesis involves a considerable amount of independent work, reading, creating mathematics, writing a paper that meets acceptable professional standards, and making an oral presentation of results.

Types of Projects

An honors thesis can take three forms:

1. A thesis that presents significant work by the student on one or more nontrivial mathematics problems.
2. A project in mathematical or applied statistics that involves an in-depth analysis of a large data set. To do an honors thesis involving data analysis, it is usually necessary to have completed Math 3200-Math 493-Math 494 by the end of the junior year and to have the ability to work with statistical software such as SAS, R, or Python.
3. A substantial expository paper that follows independent study on an advanced topic under the guidance of a department faculty member. Such a report would involve the careful presentation of ideas and the synthesis of materials from several sources.

Process and Suggested Timeline

Junior Year, Spring Semester:

1. Talk with a faculty advisor about possible projects.
2. Complete the Honors Proposal Form and submit it to Blake Thornton.

Senior Year:

1. By the end of January, provide the advisor with a draft abstract and outline of the paper.
2. By the end of February, submit a rough draft, including an abstract, to the advisor.
3. The student and the advisor should agree on a date that the writing will be complete and on a date and time for the oral presentation in mid-March (the deadline is March 31).

Departmental Prizes

Each year, the department considers graduating majors for three departmental prizes. Recipients are recognized at an annual awards ceremony in April, where they each receive a certificate and a set of honors cords to be worn as part of the academic dress at Commencement. Awards are noted on the student's permanent university record.

Ross Middlemiss Prize

The Ross Middlemiss Prize is awarded to a graduating math major with an outstanding record. The award was established by former Professor Ross Middlemiss, who taught at Washington University for 40 years. From 1936 through the 1960s, Middlemiss authored several books, including a widely popular calculus text that was used in University College courses until the late 1970s.

Putnam Exam Prize

The Putnam Exam Prize is awarded to a graduating senior who has participated regularly in the Putnam Exam Competition and done exceptionally well throughout their time at Washington University.

Martin Silverstein Award

The Martin Silverstein Award was established in memory of Professor Martin Silverstein, who, until his death in 2004, was a pioneer in work at the interface of probability theory and harmonic analysis. Each year, the department considers for this award students in any major track, but especially those with strengths in probability or statistics.

Brian Blank Award

The Brian Blank Award was established in memory of Professor Brian Blank, who passed away in 2018. Each year, the Department of Mathematics and Statistics selects for this prize distinguished junior(s) majoring in mathematics and statistics.

Minors

The Minor in Mathematics

Units required: 27

Required courses:

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Math 309 or Math 429	Matrix Algebra Linear Algebra	3
Math 310	Foundations for Higher Mathematics (or any 400-level course with Math 310 as a prerequisite)	3
Three additional upper-level electives (any 300- or 400-level course in the Department of Mathematics & Statistics)		9
Total Units		27

The Minor in Statistics

Units required: 27

Required courses:

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Math 309 or Math 429	Matrix Algebra Linear Algebra	3
Math 3200 or Math 494	Elementary to Intermediate Statistics and Data Analysis Mathematical Statistics	3
Three upper-level statistics electives chosen from the list below		9
Total Units		27

Statistics electives:

Code	Title	Units
Math 3200	Elementary to Intermediate Statistics and Data Analysis	3
Math 322	Biostatistics	3
Math 420	Experimental Design	3
Math 434	Survival Analysis	3
Math 439	Linear Statistical Models	3
Math 4392	Advanced Linear Statistical Models	3
Math 459	Bayesian Statistics	3
Math 460	Multivariate Statistical Analysis	3
Math 461	Time Series Analysis	3
Math 462	Mathematical Foundations of Big Data	3
Math 475	Statistical Computation	3
Math 493	Probability	3
Math 494	Mathematical Statistics	3
Math 495	Stochastic Processes	3
Math 496	Topics in Statistics	3

Additional Information

- Students who entered Washington University **before fall 2015** should visit the Prior Bulletins (<http://bulletin.wustl.edu/prior/>) section of this *Bulletin* to view the minor requirements that were in place for the appropriate year of matriculation. These requirements can also be found from the department's undergraduate webpage (<https://math.wustl.edu/major-and-minor-details/>).
- All required courses (both lower- and upper-level courses) must be completed with a letter grade of C- or better.
- Math 318 and Math 308 cannot both be used to fulfill minor requirements.

- Courses transferred from other accredited colleges and universities with department approval can be counted, with the following caveats:
 - Courses transferred from a two-year college (e.g., a community college) cannot be used to satisfy upper-level requirements.
 - At least 6 of the upper-level units required in a minor must be earned at Washington University or in a Washington University–approved overseas study program.
 - Courses from University College cannot be used to fulfill minor requirements.
- No upper-level course used to satisfy a minor requirement can be counted toward the requirements of any other major or minor (i.e., no double-counting of courses).
- At most one approved upper-level course from another department may be used for the upper-level courses for the minor. Approved substitutions can be found on the Department of Mathematics and Statistics webpage (<https://math.wustl.edu/major-and-minor-details/>).

Courses

Visit online course listings to view semester offerings for L24 Math (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L24&crslvl=1:4>).

L24 Math 100 Foundations for Calculus

A limited enrollment class for students planning to take calculus but who need additional precalculus preparation. The course aims to build both the technical skills and the conceptual understanding needed to succeed in calculus. Course emphasizes links between the graphical, numeric and algebraic viewpoints. A variety of approaches are used to present the material. Prerequisites: two years of high school algebra and a course in geometry (or the equivalent). Credit 3 units. A&S IQ: NSM

L24 Math 1011 Introduction to Statistics

Basic concepts of statistics. Data collection (sampling, designing experiments), data organization (tables, graphs, frequency distributions, numerical summarization of data), statistical inference (elementary probability and hypothesis testing). Prerequisite: two years of high school algebra. Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 109 Mathematics and Music

An elementary introduction to the connections between mathematics and musical sound. Review of integers, ratios, prime numbers, functions, rationality, exponents, logarithms, trigonometry. Review of scales, clefs, key signatures, intervals, time signatures. Frequency and pitch. The connection between intervals and logarithms. Tuning and temperament, just intonation. Scales and modular arithmetic. The mathematics of harmony; the sound of the low prime numbers and their roles in harmony. Harmonics, partials and overtones. Numerical

integration and basic Fourier analysis. The nature of complex tones. Analysis of instrument sounds. Human vowels and formants. Prerequisites: two years of high school algebra, and trigonometry.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 131 Calculus I

Derivatives of algebraic, trigonometric and transcendental functions, techniques of differentiation, Mean Value Theorem, applications of the derivative. The definite integral and Fundamental Theorem of Calculus. Areas. Simpler integration techniques. Prerequisites: high-school algebra and precalculus, including trigonometry.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 131E Calculus I Extended

Math 131E covers the same content as Math 131 but includes the additional review of precalculus concepts integrated throughout the semester. It is aimed at students whose precalculus skills are not yet fully developed. By the end of this course, students should be ready to enroll in Math 132.

Credit 4 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 132 Calculus II

Continuation of Math 131. A brief review of the definite integral and Fundamental Theorem of Calculus. Techniques of integration, applications of the integral, sequences and series, Taylor polynomials and series, and some material on differential equations. Prerequisite: Math 131 or a B or better in a one-year high school calculus course, or permission of the department.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 139A Real Mathematical Applications: Solving Problems with Calculus I

The purpose of this course is to show how mathematics can solve real-world problems and how calculus dramatically expands the range of problems that can be tackled. Each class will be devoted to the analysis of some problems, which may include dimensional analysis, the mathematics of convoys, Fibonacci numbers, fractals, linear regression, Euclid's algorithm, Stein's algorithm, network capacities, Braess's paradox, Galton's approach to surnames, how genes spread through populations, and the SIR model of infectious diseases. The first few classes will not use differentiation. Course enrollment preference is given to first-year students. Corequisite: Math 131.

Credit 1 unit. A&S: FYO Arch: NSM Art: NSM

L24 Math 203 Honors Mathematics I

This is the first half of a one-year calculus sequence for first year students with a strong interest in mathematics with an emphasis on rigor and proofs. The course begins at the beginning but assumes the students have already studied the material from a more "mechanical" view. Students who complete both semesters will have completed the material Calc III and other topics that may let them move through the upper-level math curriculum more quickly. Sets, functions, real numbers, and methods of proof. The Riemann-Darboux integral, limits and continuity, differentiation, and the fundamental theorems of calculus. Sequences and series of real numbers and of functions. Vector spaces and linear maps. Prerequisite: Score of 5 on the AP Calculus Exam, BC version, or the equivalent.

Credit 4 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 204 Honors Mathematics II

Matrices, linear systems, and determinants. Eigenvalues and eigenvectors, diagonalization, and the spectral theorem. Scalar and vector fields, differential and integral calculus of several variables, and the fundamental theorems of Green, Gauss, and Stokes. Restricted to first year students who have completed Math 203 in the fall semester. Math 204 can replace Math 233 in major/minor requirements.

Credit 4 units. A&S IQ: NSM, AN Art: NSM

L24 Math 217 Differential Equations

Introduction to ordinary differential equations: first-order equations, linear equations, systems of equations, series solutions, Laplace transform methods, numerical solutions. Prerequisite: Math 233 (or Math 233 concurrently).

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 220 Finite Mathematics

Topics from discrete mathematics will be explored with an emphasis on problem-solving and methods of proofs. Modules on counting; combinatorial tools; binomial coefficients and Pascal's triangle; Fibonacci numbers; combinatorial probability; integers, divisors and primes; and graphs will be covered as well as additional topics as time permits. Addressed mainly to college freshmen and sophomores; it would also be suitable to advanced high school students with an interest in mathematics. Prerequisites: A good understanding of high school mathematics.

Credit 3 units. A&S IQ: NSM, AN Art: NSM

L24 Math 2200 Elementary Probability and Statistics

An elementary introduction to statistical concepts, reasoning and data analysis. Topics include statistical summaries and graphical presentations of data, discrete and continuous random variables, the logic of statistical inference, design of research studies, point and interval estimation, hypothesis testing, and linear regression. Students will learn a critical approach to reading statistical analyses reported in the media, and how to correctly interpret the outputs of common statistical routines for fitting models to data and testing hypotheses. A major objective of the course is to gain familiarity with basic R commands to implement common data analysis procedures. Students intending to pursue a major or minor in mathematics or wishing to take 400-level or above statistics courses should instead take Math 3200. Prerequisite: Math 131.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 233 Calculus III

Multivariable calculus. Topics include differential and integral calculus of functions of two or three variables: vectors and curves in space, partial derivatives, multiple integrals, line integrals, vector calculus at least through Green's Theorem. Prerequisite: Math 132 or a score of 4-5 on the Advanced Placement Calculus Exam (BC version).

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 2331 Calculus III Enhanced

An enriched treatment of the topics of Math 233, designed for students with a strong background in differential and integral calculus and serious interest in mathematics. Not offered concurrently with Math 201. Students with credit for 2331 cannot also receive credit for 233 or 201. Prerequisite: score of 5 on Advanced Placement calculus BC, or permission of instructor. Credit 4 units. A&S IQ: NSM Art: NSM

L24 Math 302 Elementary Geometry from an Advanced Point of View

A rigorous modern treatment of Euclidean geometry and an introduction to non-Euclidean geometry. Prerequisite: Math 310 or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 308 Mathematics for the Physical Sciences

Continuation of Math 233 emphasizing topics of interest in the physical sciences. Topics in multivariable and vector calculus (div, grad, curl); line, surface integrals and connections to electromagnetism; Fourier series and integrals; boundary value problems (diffusion and wave equations); additional topics if time permits. Students may not receive credit toward a math major or minor for both Math 308 and Math 318. Prerequisite: Math 233 and 217, or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L24 Math 309 Matrix Algebra

An introductory course in linear algebra that focuses on Euclidean n -space, matrices and related computations. Topics include: systems of linear equations, row reduction, matrix operations, determinants, linear independence, dimension, rank, change of basis, diagonalization, eigenvalues, eigenvectors, orthogonality, symmetric matrices, least square approximation, quadratic forms. Introduction to abstract vector spaces. Prerequisite: Math 132. Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 310 Foundations for Higher Mathematics

Introduction to the rigorous techniques used in more advanced mathematics. Topics include postpositional logic, use of quantifiers, set theory, methods of proof and disproof (counterexamples), foundations of mathematics. Use of these tools in the construction of number systems and in other areas such as elementary number theory, combinatorial arguments and elementary proofs in analysis. Prerequisite: Math 233. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 310W Foundations for Higher Mathematics with Writing

This course introduces the rigorous techniques used in more advanced mathematics. Topics include basic logic, set theory, methods of proof and counterexamples, foundations of mathematics, construction of number systems, counting methods, combinatorial arguments and elementary analysis. At least three papers will be required, with at least one revision. Prerequisite: Math 233. Credit 3 units. A&S IQ: NSM, WI

L24 Math 312 Differential Equations and Dynamical Systems

Qualitative theory of ordinary differential equations. Picard's existence and uniqueness theorem, the phase plane, Poincaré-Bendixon theory, stationary points, attractors and repellers, graphical methods. Physical applications, including chaos, are indicated. Prerequisite: Math 217. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 318 Introduction to Calculus of Several Variables

Selected topics for functions of several variables involving some matrix algebra and presented at a level of rigor intermediate between that of Calculus III and higher-level analysis courses. Students may not receive credit toward a mathematics major or minor for both Math 308 and 318. Prerequisites: Math 233 and Math 309. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 3200 Elementary to Intermediate Statistics and Data Analysis

An introduction to probability and statistics. Major topics include elementary probability, special distributions, experimental design, exploratory data analysis, estimation of mean and proportion, hypothesis testing and confidence, regression, and analysis of variance. Emphasis is placed on development of statistical reasoning, basic analytic skills, and critical thinking in empirical research studies. The use of the statistical software R is integrated into lectures and weekly assignments. Required for students pursuing a major or minor in mathematics or wishing to take 400-level or above statistics courses. Prerequisite: Math 132. Though Math 233 is not essential, it is recommended. Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 3211 Statistics for Data Science I

Credit 3 units. A&S IQ: NSM, AN

L24 Math 322 Biostatistics

A second course in elementary statistics with applications to life sciences and medicine. Review of basic statistics using biological and medical examples. New topics include incidence and prevalence, medical diagnosis, sensitivity and specificity, Bayes' rule, decision making, maximum likelihood, logistic regression, ROC curves and survival analysis. Prerequisites: Math 3200, or a strong performance in Math 2200 and permission of the instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 331 Algebraic Systems

Polynomials, binomial expansions, factoring, rings (integers and polynomials), unique factorization, and other topics relevant to the high school curriculum. Designed for future secondary school teachers and other students looking for a course in algebra at a less abstract level than Math 430. Prerequisite: Math 310 or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 350 Topics in Applied Mathematics

Topics change with each offering of the course. Past topics have included "Mathematics and Multimedia," "The Mathematics and Chemistry of Reaction-Diffusion Systems", "Mathematical Biology," and "Simulation Analysis of Random Processes" and "Introduction to Monte Carlo Methods." Prerequisites will vary, but always include at least Math 233, Math 309 and basic programming skills in some language.

Credit 3 units. A&S IQ: NSM Art: NSM

L24 Math 370 Introduction to Combinatorics

Basics of enumeration (combinations, permutations and enumeration of functions between finite sets), generating functions; the inclusion-exclusion principle, partition theory and introductory graph theory. As time permits, additional topics may include Ramsey's Theorem, probabilistic methods in combinatorics and algebraic methods in combinatorics. Prerequisites: Math 132, 309 and 310, or permission of the instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L24 Math 371 Graph Theory

Introduction to graph theory including the basic definitions and theorems and some more advanced topics that drive much current research in graph theory: Ramsey's Theorem, random graph theory and, if time permits, Szemerédi's regularity lemma. Graphs are studied as abstract objects; however, graph theory is also of interest to applied mathematicians because graphs are natural models for networks (social, electric). Prerequisite: Math 310 or a roughly equivalent course, or permission of instructor. Students should know what a proof is and how to produce one. Some informal understanding of probability is helpful, but students need not have taken a probability course.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 407 An Introduction to Differential Geometry

A study of properties of curves and surfaces in 3-dimensional Euclidean space. The course is essentially a modern recounting of a seminal paper of Gauss. Prerequisites: Math 233, Math 309, Math 310.

Credit 3 units. A&S IQ: NSM

L24 Math 410 Introduction to Fourier Series and Integrals

The basic theory of Fourier series and Fourier integrals including different types of convergence are introduced, along with their applications to certain differential equations. Prerequisites: Math 233, Math 309, and Math 310.

Credit 3 units. A&S IQ: NSM

L24 Math 4111 Introduction to Analysis

The real number system and the least upper-bound property; metric spaces (completeness, compactness and connectedness); continuous functions (in \mathbb{R}^n ; on compact spaces; on connected spaces); $C(X)$ (pointwise and uniform convergence; Weierstrass approximation theorem); differentiation (mean value theorem; Taylor's theorem); the contraction mapping theorem; the inverse and implicit function theorems. Prerequisite: Math 310 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 4121 Introduction to Lebesgue Integration

Riemann integration; measurable functions; measures; Lebesgue measure; the Lebesgue integral; integrable functions; L^p spaces; modes of convergence; decomposition of measures; product measures. Prerequisite: Math 4111 or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 415 Partial Differential Equations

This course presents an introduction to the theory of PDEs, with applications to selected classical problems in physics and engineering. Other topics include linear and quasilinear first-order equations, the derivation of some of the classical PDEs of physics, and standard solution techniques for boundary and initial value problems. Preliminary topics such as orthogonal functions, Fourier series, and variational methods are introduced as needed. Prerequisites: Math 217, Math 309, and Math 310, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 416 Complex Variables

Topics include analytic functions, elementary functions and their properties, line integrals, the Cauchy integral formula, power series, residues, poles, and conformal mapping and applications. Prerequisites: Math 310 plus Math 318 or Math 4111, or permission of instructor.

Credit 3 units. A&S IQ: NSM Art: NSM

L24 Math 4171 Topology I

An introduction to the most important ideas of topology. Course includes necessary ideas from set theory, topological spaces, subspaces, products and quotients, compactness and connectedness. Some time is also devoted to the particular case of metric spaces (including topics such as separability, completeness, completions, the Baire Category Theorem, and equivalents of compactness in metric spaces). Prerequisite: Math 310 or permission of instructor.

Credit 3 units. A&S IQ: NSM

L24 Math 4181 Topology II

A continuation of Math 4171 featuring more advanced topics in topology. The content may vary with each offering. Prerequisite: Math 4171, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 420 Experimental Design

A first course in the design and analysis of experiments, from the point of view of regression. Factorial, randomized block, split-plot, Latin square, and similar design. Prerequisite: CSE 131 or 200, Math 3200, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 4211 Statistics for Data Science II

This builds on the foundation from the first course (SDS I) and further develops the theory of statistical hypotheses testing. It also covers advanced computer intensive statistical methods, such as the Bootstrap, that will make extensive use of R. The emphasis of the course is to expose students to modern statistical modeling tools beyond linear models that allow for

flexible and tractable interaction among response variables and covariates/feature sets. Statistical modeling and analysis of real datasets is a key component of the course. Prerequisites: SDS I and Math 439 (Concurrent enrollment in Math 439 is fine). Credit 3 units. A&S IQ: NSM, AN

L24 Math 429 Linear Algebra

This course is an introduction to the linear algebra of finite-dimensional vector spaces. It includes systems of equations, matrices, determinants, inner product spaces, and spectral theory. Prerequisite: Math 310 or permission of instructor. Math 309 is not an explicit prerequisite, but students should already be familiar with such basic topics from matrix theory as matrix operations, linear systems, row reduction, and Gaussian elimination. (Material on these topics in early chapters of the text will be covered very quickly.) Credit 3 units. A&S IQ: NSM Art: NSM

L24 Math 430 Modern Algebra

This course introduces groups, rings, and fields as well as permutation groups, group and ring homomorphisms, field extensions, and connections with linear algebra. Prerequisites: Math 310 and Math 429, or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 434 Survival Analysis

Life table analysis and testing, mortality and failure rates, Kaplan-Meier or product-limit estimators, hypothesis testing and estimation in the presence of random arrivals and departures, and the Cox proportional hazards model. Techniques of survival analysis are used in medical research, industrial planning and the insurance industry. Prerequisites: CSE 131 or 200, Math 309 and 3200, or permission of the instructor. Credit 3 units. A&S IQ: NSM Art: NSM

L24 Math 4351 Number Theory and Cryptography

The course covers many of the basics of elementary number theory, providing a base from which to approach modern algebra, algebraic number theory and analytic number theory. It also introduces one of the most important real-world applications of mathematics, namely the use of number theory and algebraic geometry in public key cryptography. Topics from number theory involve divisibility (Euclidean algorithm, primes, Fundamental Theorem of Arithmetic), congruences (modular arithmetic, Chinese Remainder Theorem, primality testing and factorization). Topics from cryptography include RSA encryption, Diffie-Hellman key exchange and elliptic curve cryptography. Topics about algebraic numbers may be included if time permits. Prerequisites: Math 233, 309 and 310 (or permission of instructor). Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 436 Algebraic Geometry

This course provides an introduction to affine and projective algebraic varieties, the Zariski topology, regular and rational mappings, simple and singular points, divisors and differential forms, genus, and the Riemann-Roch theorem. Prerequisites: Math 310, Math 429, and Math 430, or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 439 Linear Statistical Models

Theory and practice of linear regression, analysis of variance (ANOVA) and their extensions, including testing, estimation, confidence interval procedures, modeling, regression diagnostics and plots, polynomial regression, collinearity and confounding, model selection, geometry of least squares, etc. The theory will be approached mainly from the frequentist perspective, and use of the computer (mostly R) to analyze data will be emphasized. Prerequisite: CSE 131 or 200, Math 3200 and a course in linear algebra (such as Math 309 or 429), or permission of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 4392 Advanced Linear Statistical Models

Review of basic linear models relevant for the course; generalized linear models including logistic and Poisson regression (heterogeneous variance structure, quasiliikelihood); linear mixed-effects models (estimation of variance components, maximum likelihood estimation, restricted maximum likelihood, generalized estimating equations), generalized linear mixed-effects models for discrete data, models for longitudinal data, optional multivariate models as time permits. The computer software R will be used for examples and homework problems. Implementation in SAS will be mentioned for several specialized models. Prerequisites: Math 439 and a course in linear algebra (such as Math 309 or 429), or consent of instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 444 The Mathematics of Quantum Theory

An introduction to the mathematical foundations of quantum theory aimed at advanced undergraduate/beginning graduate students in Mathematics and Engineering, although students from other disciplines are equally welcome to attend. Topics include: the mathematical postulates of quantum theory and simple physical systems, spectral theory of self-adjoint operators, rudiments of Lie groups, Lie algebras and unitary group representations, elements of quantum probability and quantum information theory. Prerequisites: Linear algebra at the level of Math 429 or equivalent, multivariate calculus at the level of Math 318, and basic probability theory at the undergraduate level such as Math 493 or instructor's permission. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 449 Numerical Applied Mathematics

Computer arithmetic, error propagation, condition number and stability; mathematical modeling, approximation and convergence; roots of functions; calculus of finite differences; implicit and explicit methods for initial value and boundary value problems; numerical integration; numerical solution of linear systems, matrix equations and eigensystems; Fourier transforms; optimization. Various software packages may be introduced and used. Prerequisites: CSE 200 or CSE 131 (or other computer background with permission of the instructor); Math 217 and Math 309. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 450 Topics in Applied Mathematics

Topic may vary with each offering of the course. Prerequisites: CSE 131 (or 200) and Math 449, or permission of the instructor. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 456 Topics in Financial Mathematics

An introduction to the principles and methods of financial mathematics, with a focus on discrete-time stochastic models. Topics include no-arbitrage pricing of financial derivatives, risk-neutral probability measures, the Cox-Ross-Rubenstein and Black-Scholes-Merton options pricing models, and implied volatility. Prerequisites: Math 233, Math 3200, Math 310 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 459 Bayesian Statistics

Introduces the Bayesian approach to statistical inference for data analysis in a variety of applications. Topics include: comparison of Bayesian and frequentist methods, Bayesian model specification, choice of priors, computational methods such as rejection sampling, and stochastic simulation (Markov chain Monte Carlo), empirical Bayes method, hands-on Bayesian data analysis using appropriate software. Prerequisites: Math 493 and either Math 3200 or 494; or permission of the instructor. Some programming experience such as CSE 131 is also helpful (consult with the instructor).

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 460 Multivariate Statistical Analysis

A modern course in multivariate statistics. Elements of classical multivariate analysis as needed, including multivariate normal and Wishart distributions. Clustering; principal component analysis. Model selection and evaluation; prediction error; variable selection; stepwise regression; regularized regression. Cross-validation. Classification; linear discriminant analysis. Tree-based methods. Time permitting, optional topics may include nonparametric density estimation, multivariate regression, support vector machines, and random forests. Prerequisite: multivariable calculus (Math 233), linear or matrix algebra (Math 429 or Math 309), multivariable-calculus-based probability and mathematical statistics (Math 493, Math 494) and linear models (Math 439). Prior knowledge of R at the level introduced in Math 439 is assumed.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 461 Time Series Analysis

Time series data types; autocorrelation; stationarity and nonstationarity; autoregressive moving average models; model selection methods; bootstrap confidence intervals; trend and seasonality; forecasting; nonlinear time series; filtering and smoothing; autoregressive conditional heteroscedasticity models; multivariate time series; vector autoregression; frequency domain; spectral density; state-space models; Kalman filter. Emphasis on real-world applications and data analysis using statistical software. Prerequisites: Math 493 and either Math 3200 or 494; or permission of the instructor. Some programming experience may also be helpful (consult with the instructor).

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 462 Mathematical Foundations of Big Data

Mathematical foundations of data science. Core topics include: probability in high dimensions; curses and blessings of dimensionality; concentration of measure; matrix concentration inequalities. Essentials of random matrix theory. Randomized numerical linear algebra. Data clustering. Depending on time and interests, additional topics will be chosen from: compressive sensing; efficient acquisition of data; sparsity; low-rank matrix recovery. Divide, conquer and combine methods. Elements

of topological data analysis; point cloud; Cech complex; persistent homology. Selected aspects of high-dimensional computational geometry and dimension reduction; embeddings; Johnson-Lindenstrauss; sketching; random projections. Diffusion maps; manifold learning; intrinsic geometry of massive data sets. Optimization and stochastic gradient descent. Random graphs and complex networks. Combinatorial group testing. Prerequisite: multivariable calculus (Math 233), linear or matrix algebra (Math 429 or 309), and multivariable-calculus-based probability and mathematical statistics (Math 493-494). Prior familiarity with analysis, topology, and geometry is strongly recommended. A willingness to learn new mathematics as needed is essential.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 475 Statistical Computation

Introduction to modern computational statistics. Pseudo-random number generators; inverse transform and rejection sampling. Monte Carlo approximation. Nonparametric bootstrap procedures for bias and variance estimation; bootstrap confidence intervals. Markov chain Monte Carlo methods; Gibbs and Metropolis-Hastings sampling; tuning and convergence diagnostics. Cross-validation. Time permitting, optional topics include numerical analysis in R, density estimation, permutation tests, subsampling, and graphical models. Prior knowledge of R at the level used in Math 494 is required. Prerequisite: Math 233, 309, 493, 494 (not concurrently); acquaintance with fundamentals of programming in R.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 493 Probability

This course involves mathematical theory and the application of probability at the advanced undergraduate level; it is a calculus-based introduction to probability theory. Topics include the computational basics of probability theory, combinatorial methods, conditional probability including Bayes' theorem, random variables and distributions, expectations and moments, the classical distributions, and the central limit theorem. Prerequisite: Math 233 or permission of instructor. Math 310 is recommended but not required.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 494 Mathematical Statistics

This course introduces the theory of estimation, minimum variance and unbiased estimators, maximum likelihood theory, Bayesian estimation, prior and posterior distributions, confidence intervals for general estimators, standard estimators and distributions such as the Student's t-distribution and F-distribution from a more advanced viewpoint, hypothesis testing, the Neymann-Pearson Lemma (about best possible tests), linear models, and other topics as time permits. Prerequisites: CSE 131 or CSE 200, Math 3200 and Math 493, or permission of instructor. Math 310 is recommended but not required.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L24 Math 495 Stochastic Processes

The content of this course varies with each offering of the course. Past offerings have included such topics as random walks, Markov chains, Gaussian processes, empirical processes, Markov jump processes, and a short introduction to martingales, Brownian motion, and stochastic integrals. Prerequisites: Math 233 and Math 493, or permission of instructor. Math 310 is recommended but not required.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

**L24 Math 4971 Topics in Mathematics: Stochastic
Differential Equations**

Credit 3 units.

Medical Humanities

The minor in medical humanities draws on courses from a variety of departments and programs, including art history, classics, history, languages and literature, music, philosophy, and gender and sexuality studies. The minor is housed in the Washington University Center for the Humanities.

The minor approaches health, disease and medical care as culturally embedded human experiences that vary across time and place. In addition to exploring health, disease and medical care as core human experiences, the program of study is designed to provide a solid grounding in the textual-historical approach essential to all humanities scholarship. The minor combines disciplinary diversity with thematic unity to engage students with a set of tightly related "big" topics and issues. These include the contested meanings of health and disease; the ethical dimensions of medicine; illness narratives; debates over health and development; the role of medicine in war, empire and nation building; the relationship between religion and medicine; exchange and friction between biomedicine and other healing traditions; and the burden of disease as it relates to gender, race and class.

Medical Humanities aspires to instill the values shared by all humanities disciplines: to appreciate multiple worlds and viewpoints, to communicate clearly and gracefully, and to read and think critically. Students will emerge from the minor able to apply the insights and critical methods of literature, philosophy, history and the arts to subjects often left solely to the natural and social sciences. Its goal is to demonstrate the enduring relevance of humanistic inquiry to understanding a basic realm of human experience.

Majors

Medical humanities is an interdepartmental minor; Washington University does not offer an independent major in medical humanities.

Minors

The Minor in Medical Humanities

Total units required: 18

At least one gateway course (3 units) is required for the minor. These include the following:

Code	Title	Units
History 1640	Health and Disease in World History	3
MedH 130	The Art of Medicine	3
MedH 151	First-Year Seminar: Stories of Medicine	3
MedH 233F	Biomedical Ethics	3

An additional 15 units of Medical Humanities courses are required to complete the minor: At least 12 of these units must be core courses, designated by the "CFH MH" attribute, whereas the remaining 3 credits can come from either the core or affiliate lists shown below. At least 9 units of core courses must be at the 300 level or above. Core courses include the gateway courses, as well as the following:

Code	Title	Units
MedH 214	Medical French	3
MedH 247	First-Year Seminar: Global Health in the Francophone World	3
MedH 248	Religion, Health, and Wellness in Modern America	3
MedH 3001	Philosophy of Medicine	3
MedH 301R	Historical Methods — European History (when offered as "The Black Death and the Plague in Europe")	3

MedH 3031	Music and Healing	3
MedH 3033	Religion and Healing	3
MedH 3041	Making Sex and Gender: Understanding the History of the Body	3
MedH 3044	Humors, Pox, and Plague: Medieval and Early Modern Medicine	3
MedH 3067	Current Topics in the History of Medicine	3
MedH 307	Writing and Medicine	3
MedH 310	From Hysteria to Hysterectomy: Women's Health Care in America	3
MedH 3141	The Racial and Sexual Politics of Public Health	3
MedH 316	Contemporary Women's Health	3
MedH 353	Medical Spanish	3
MedH 360	Trans* Studies	3
MedH 366	Art and the Mind-Brain	3
MedH 3672	Medicine, Healing and Experimentation in the Contours of Black History	3
MedH 375	Medical Narratives, Narrative Medicine	3
MedH 3801	Ancient Greek and Roman Medicine	3
MedH 385	What is Medical Humanities?	3
MedH 391W	Literature and Medicine	3
MedH 39SM	Women and Crime in the Evolution of American History	3
MedH 399	Independent Work in Medical Humanities	-3
MedH 408	Disease, Madness, and Death Italian Style	3
MedH 414	Gender, Religion, Medicine, and Science	3
MedH 418	Sexuality and Gender in East Asian Religions (when offered as "The Body in Daoism")	3
MedH 420	Nature, Technology, and Medicine in Korea	3
MedH 4601	Historical Racial Violence: Legacies & Reckonings	3
MedH 4647	Ancient Madness	3
MedH 468	Topics in French Literature: Disability Studies, Before "Disability"	3
MedH 471	Galen's "On Prognosis": A Social History of Medicine in Second-Century Rome	3
MedH 474	Frankenstein: Origins and Afterlives	3

MedH 4881	Advanced Seminar: Mad: Mental Illness, Power and Resistance in Africa and the Caribbean	3
MedH 4885	Advanced Seminar: Medicine, Disease, and Empire	3
MedH 491	Staging Illness	3
MedH 4990	Advanced Seminar: History of the Body	3
History 49CJ	Advanced Seminar: Medicine on the Frontiers	3
MedH 495	PNP Seminar (when offered as "Mental Health & Mental Illness: Philosophical Questions")	3

Core courses must also be drawn from at least two of seven different disciplinary categories: Classics & Art History; History; Languages/Literature/Culture; Medicine, Race and Ethnicity; Performing Arts & Music; Philosophy & Religious Studies; and Women, Gender, and Sexuality Studies. (The interdisciplinary "What is Medical Humanities?" course [MedH 385] can count toward any of these disciplinary categories.) Core courses may require additional prerequisites within their home departments or programs.

Up to 3 units of affiliate courses from complementary disciplines in the sciences and social sciences (designated by the "CFH MHA" attribute) may be applied to the minor. These include but are not limited to the following:

Code	Title	Units
Anthro 3283	Introduction to Global Health	3
Anthro 3310	Health, Healing and Ethics: Introduction to Medical Anthropology	3
Anthro 3620	Anthropological Perspectives on the Fetus	3
Anthro 3626	Adventures in Nosology: The Nature and Meaning of Disease	3
Anthro 4033	Culture, Illness and Healing in Asia	3
LatAm 325	Cultures of Health in Latin America	3
Psych 399	Living, Dying, and Death: A Biopsychosocial Approach to Understanding the End of Life	3
SOC 2510	Sociological Approaches to American Health Care	3
SOC 2520	Inequality By Design: Understanding Racial/Ethnic Health Disparities	3
SOC 4511	Sick Society: Social Determinants of Health and Health Disparities in the United States	3

Additional Information

While our gateway and core courses are generally listed under the L85 MedH designation, the most up-to-date list of medical humanities courses and medical humanities affiliate courses can be found by searching Washington University Course Listings for the "CFH MH" and "CFH MHA" attributes or by consulting the course requirements (<https://humanities.wustl.edu/medical-humanities-minor-requirements/>) online.

Courses

For a comprehensive overview of Medical Humanities courses in any given semester, please search the course listings (<https://acadinfo.wustl.edu/Courselists/Semester/Search.aspx>) for the CFH MH (Medical Humanities) and CFH MHA (Medical Humanities: Affiliate) attributes. Courses offered from other Washington University schools (including University College) do not appear in the L85 listing, and neither do our affiliate courses.

Visit online course listings to view semester offerings for L85 MedH (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L85&crslvl=1:4>).

L85 MedH 130 The Art of Medicine

This interdisciplinary, cross-school course at the intersection of history, visual culture and the visual arts includes a roster of notable speakers and offers students a singular encounter with western medicine from ancient times to the present day. In tandem with the history of medicine, the course examines the capacity of the arts to frame medical practice and to raise questions and influence perceptions, both positively and negatively, of medical advancements. This course is for first-year (non-transfer) students only.

Same as I60 BEYOND 130

Credit 3 units. A&S: FYBB A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L85 MedH 1640 Health and Disease in World History

Health and disease are universal human experiences, yet vary profoundly across time and place. Extending from ancient times to the present, this course surveys that variety from a global perspective. We will explore medical traditions from around the world, then examine how these responded to major epidemic diseases such as the Black Death. We will study the globalization of disease and the emergence of scientific medicine after 1450, then turn to the interrelated histories of health and disease in the modern era. Throughout, we will attend carefully to how the biological aspects of health and disease have shaped world history, while at the same time exploring the powerful mediating role of social, cultural, economic, and political factors — from religious beliefs and dietary practices to inequality, poverty, empire, and war — in determining the myriad ways in which health and disease have been experienced and understood. Introductory course to the major and minor.

L85 MedH 214 Medical French

In this introductory course to the "Français Professionnel de la Santé" track (French for Medical Professionals), students will be exposed to medical terminology and practices as well as to health-related issues in France and the Francophone world (Québec, Haiti, West and North Africa). Using an interactive approach based on real life situations, students will learn to perform various medical tasks such as writing a prescription, advising a patient, or presenting a humanitarian project to potential donors. Medical vocabulary and pre-professional oral and written expression will be enhanced throughout the course. Students will acquire the necessary tools to perform their tasks, preparing them for further coursework in the FPS track, the Diplôme de français professionnel de la santé, and the France for the Pre-Med study abroad program in Nice. Prereq: Fr 203D or equivalent (this class can replace Fr 204D).

Same as L34 French 214

Credit 3 units. A&S IQ: HUM, LCD, LS BU: HUM EN: H

L85 MedH 233F Biomedical Ethics

A critical examination, in the light of contemporary moral disagreements and traditional ethical theories, of some of the moral issues arising out of medical practice and experimentation in our society. Issues that might be discussed include euthanasia, genetic engineering, organ transplants, medical malpractice, the allocation of medical resources, and the rights of the patient.

Same as L30 Phil 233F

L85 MedH 247 First-Year Seminar: Global Health in the Francophone World

Taught in English. This small-group seminar is devoted to the reading and study of other texts, such as films, paintings, and so on, as well as discussion and writing. Topics vary but have an interdisciplinary focus. Prerequisite: AP in English, French, or History, or permission of instructor. Does not substitute for any other French course.

Same as L34 French 247

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD BU: HUM EN: H

L85 MedH 248 Religion, Health, and Wellness in Modern America

Religion, Health, and Wellness in Modern America will examine changing conceptions of health and wellness in America from the late nineteenth-century to the present. With media, artifacts, and literature drawn from the histories of medicine, religion, and capitalism, this class will cover the proliferation of alternative health regimens, the rise of the medical establishment, claims of divine healing, and the impact of market forces on wellness cultures. Course topics include the raced and gendered dynamics of care, socioeconomic status, technological innovation and media, the role of nature, health activism and radical self-care, and New Age spirituality and mental health. Special attention will be paid to how the politics of the body and its regulation intersect with religious and consumer practices in the modern wellness industry

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM EN: H

L85 MedH 3001 Philosophy of Medicine

Philosophy of Medicine is an investigation into what doctors know and how they know it. This course will investigate the following questions: What is disease? What is health? How do we classify disease? What counts as good evidence and good evidential reasoning in medicine? Is medicine a science? If so, what makes it distinctive as a science? What kinds of evidential roles do case studies play in medicine? How should we measure and compare outcomes in clinical trials and in systematic reviews? What is the appropriate relationship between medicine and the basic sciences or between medicine and the public health sciences (e.g., epidemiology, biostatistics, economics, behavioral science)? What role, if any, should private industry (e.g., the pharmaceutical industry, the health insurance industry) play in shaping the practice of medicine? How should we define and measure "effectiveness" in medicine? Do values inform decision making about health policy, and, if so, how? The overall goal of the course is to develop a reasoned, reflective approach to research and practice in medicine through the critical analysis of texts and case studies in the history of medicine. Students do not need a background in philosophy to take this course. This course is intended to be of special interest to pre-health professionals and to philosophy and science majors. For graduate students in philosophy, this course satisfies the seminar requirement. Extra assignments will be provided to satisfy graduate course work; students should consult the instructor for details.

L85 MedH 301R Historical Methods — European History

This is a small-group reading course in which students are introduced to the skills essential to the historian's craft. Emphasis will be on acquiring research skills, learning to read historical works critically, and learning to use primary and secondary sources to make a persuasive and original argument. See Course Listings for current topics. Required for history majors. Preference given to History majors; other interested students welcome.

L85 MedH 3031 Music and Healing

In this course, we broadly consider issues of music and healing, drawing from the fields of medical ethnomusicology, medical anthropology, music therapy, and psychology. Our case studies are multi-sited, as we interrogate musical healings and healing music from diverse global and historical perspectives. We approach our study of musical practices with the understanding that the social, cultural and political contexts where "music" and "healing" are themselves created inform the sounds of the music and its various — and often conflicting — interpretations and meanings. We read a variety of academic literature and use media texts and listening examples to develop interdisciplinary and cross-cultural analyses of music and healing. Issues of national consciousness, postcolonialism, gender, sexuality, race, ethnicity, class, religion, dis/ability and the role of history/memory remain central to our explorations of music and healing.

Same as L27 Music 3031

Credit 3 units. A&S IQ: LCD BU: BA EN: H

L85 MedH 3033 Religion and Healing

This course explores the relationship between religion and healing through historical and comparative study of Christian, Jewish and other religious traditions. We will examine how specific religious worldviews influence conceptions of the body and associated healing practices, how states of health and disease are identified and invested with religious significance, and how religious thought contributed to and coexisted alongside the growth of modern Western medicine. While much of the course will draw on specific case studies, students will be encouraged to pursue their own interests in the area of religion and healing through final projects.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:

ETH EN: H

L85 MedH 3041 Making Sex and Gender: Understanding the History of the Body

This course provides an overview of the history of the body from antiquity to modern times using an interdisciplinary approach. By exploring selections from medical texts, literature, fashion, art, accounts of "new world" exploration, legal records, self-help books and contemporary media representations of human bodies, we will consider the changing historical perception of the body. The intersection of gender, race and class will factor significantly in our discussions of how the body has been construed historically and how it is currently being constructed in contemporary American culture. This course will also provide an introduction to feminist/gender methodologies that apply to understanding the history of the body. This course is not open to students who have taken L77 204. Prerequisite: Any -100 or -200 level Women, Gender, and Sexuality Studies course or permission of instructor.

L85 MedH 3044 Humors, Pox, and Plague: Medieval and Early Modern Medicine

This course examines how people thought about, experienced and managed disease in the medieval and early modern periods. Students will consider developments in learned medicine alongside the activities of a diverse range of practitioners — e.g., surgeons, empirics, quacks, midwives, saints, and local healers — involved in the business of curing a wide range of ailments. Significant attention will be paid to the experiences of patients and the social and cultural significance of disease. Major topics include: the rise and fall of humoral medicine; religious explanations of illness; diseases such as leprosy, syphilis and plague; the rise of anatomy; herbs and pharmaceuticals; the experience of childbirth; and the emergence of identifiably "modern" institutions such as hospitals, the medical profession, and public health. The focus will be on Western Europe but we'll also consider developments in the Islamic world and the Americas.

H

L85 MedH 3067 Current Topics in the History of Medicine

Mental health — its diagnosis, social implications, and experience — is a central and increasingly visible part of the practice of medicine. This course explores "madness." How have different societies explained and responded to states of mind, behavior, and emotion judged to be unreasonable? What role has medicine played in framing understandings about mental disorders and their management? During this course we will engage these questions, charting the shifting experience of mental illness roughly from the Middle Ages to the present. Themes covered include: religious models of madness; humoral medicine and disorders such as melancholy; the pre-modern madhouse and the emergence of the modern asylum; the history of psychiatry; the insanity defense in the courtroom; patient autobiography; gender, race, and mental health.

L85 MedH 310 From Hysteria to Hysterectomy: Women's Health Care in America

This course examines issues surrounding women's health care in America. While the scope is broad, the major emphasis will be on the 19th and 20th centuries. Through an examination of popular writing, scientific/medical writing, letters, diaries and fiction, we will look at the changing perceptions and conceptions of women's bodies and health in America.

L85 MedH 3141 The Racial and Sexual Politics of Public Health

Race and sexuality have long been concerns of public health. From hygienic campaigns against Mexican immigrants in early-1900s California to the 1991 quarantine of Haitian refugees with HIV at Guantanamo Bay, race and sexuality have proven crucial to how society identifies health and, by extension, determines who is fit to be a citizen. This interdisciplinary course interrogates the intersections of race, sexuality, and medicine, discussing how each domain has been constitutive of the other in the American context. Via feminist and queer theorizing, we will examine the political and economic factors under which diseases, illnesses, and health campaigns have impacted racial and sexual minorities over the last two centuries. An orienting question for the course is the following: How has the state wielded public health as a regulatory site to legitimize perceived racial differences and to regulate ostensible sexual deviations? Through primary and secondary sources, we will likewise explore the various forms of "health activism" undertaken by these very same targeted populations. Themes to be addressed will include the medicalization of racial and sexual difference; activism both in and against health institutions; and the roles of race, class, gender, sexuality, and disability in contemporary health issues. Case studies include the Tuskegee syphilis experiment; the sterilization of black, Mexican, Puerto Rican, and Native American women; the medicalization of homosexuality during the Cold War; and the role of mass incarceration in the diffusion of HIV. At a moment in time when

access to health continues to be shaped by categories of social difference, understanding the role of public health in the normalization and subversion of racial and sexual hierarchies in the West is more pertinent than ever.

L85 MedH 316 Contemporary Women's Health

We identify and study a broad range of health issues that are either unique to women or of special importance to women. The roles that women play as both providers and consumers of health care in the United States will be examined. The interface of gender, race, and class and their impact on an individual's access to and experience in the health care system will be central concerns. Topics are wide-ranging and include discussions of breast cancer, mental health, cardiovascular disease in women, women and eating (from anorexia to obesity), reproductive issues (from menstruation to fertility to menopause), as well as the politics of women's health, gender differences in health status, the effect of employment on health, the history of women's health research.

L85 MedH 360 Trans* Studies

Trans* Studies is an interdisciplinary course that was previously named Transgender Studies. The new course title represents the development of the field and the identity in U.S. culture. In this course students engage with the following questions: When and why did the category gender emerge? What is the relationship between sex, sexuality and gender? How have the fields of medicine and psychology dealt with gender? How have approaches to "gender dysphoria" changed over time? Why is LGBT grouped together as a social movement? What are the advantages and disadvantages of this grouping? What are the legal obstacles faced by people who resist normative gender categories? What legal obstacles are faced by people who transition from one sex to another? To what extent do U.S. citizens have autonomy over defining their gender or sex? How are trans people represented in fiction? What does it mean to apply transgender theory to interpret fictional accounts of trans? Any of the following are suitable (but not required) courses to take before enrolling in this class: WGSS 100B, WGSS 105, WGSS 205 or WGSS 3091.

L85 MedH 363 Mapping the World of "Black Criminality"

Ideas concerning the evolution of violence, crime, and criminal behavior have been framed around many different groups. Yet, what does a typical criminal look like? How does race - more specifically blackness - alter these conversations, inscribing greater fears about criminal behaviors? This course taps into this reality examining the varied ways people of African descent have been and continue to be particularly imagined as a distinctly criminal population. Taking a dual approach, students will consider the historical roots of the policing of black bodies alongside the social history of black crime while also foregrounding where and how black females fit into these critical conversations of crime and vice. Employing a panoramic approach, students will examine historical narratives, movies and documentaries, literature, popular culture through poetry and contemporary music, as well as the prison industrial complex system. The prerequisite for the course is L90 3880(Terror and Violence in the Black Atlantic) and/or permission from the instructor, which will be determined based on a student's past experience in courses that explore factors of race and identity. For AFAS majors, this course counts as Area Requirement 2.

L85 MedH 366 Art and the Mind-Brain

In recent years, there has been a growing interest in the bearing of cognitive science on the perception and understanding of art. This interest has roots in tradition: historically, art, aesthetics, and vision science have often been linked. But the growth of knowledge in cognitive science has opened up new opportunities for understanding art and addressing philosophical questions. The converse is also true. The production, perception, and understanding of art are human capacities that can shed light on the workings of the mind and brain. This course considers questions such as: What is art? How do pictures represent? Does art express emotion? Why does art have a history? Prerequisites: one course in Philosophy at the 100 or 200-level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

L85 MedH 3672 Medicine, Healing and Experimentation in the Contours of Black History

Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, this course examines the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus is extended toward the underpinnings of race and gender in the medical treatment allocated across time and space — the United States, Caribbean and Latin America — to give further insight into the roots of contemporary practice of medicine.

L85 MedH 375 Medical Narratives, Narrative Medicine

Narrative medicine is an approach grounded in the recognition that patients live and communicate their embodied experiences as stories. This approach underscores the need for medical practitioners to cultivate skills of observation, analysis, storytelling, and cultural competency -- skills that are traditionally developed in humanities coursework. In this course, students will hone their competencies in observation, close reading, and written and oral expression in French through readings of medical narratives. Texts will include Jean-Dominique Bauby, "Le Scaphandre et le Papillon"; Molière, "Le Medecin Malgre Lui"; Michel de Montaigne, "De L'Experience"; Marguerite Duras, "La Douleur"; and excerpts from works by René Descartes, Honoré de Balzac, Émile Zola, Olivia Rosenthal, and Philippe Lançon. Whether considering works of art, patient testimonials, or classic works of literature, we will observe carefully, describe and understand what we see, tell stories, and attend to the details of the stories that others tell. Prerequisite: French 308 or In-Perspective.

L85 MedH 3801 Ancient Greek and Roman Medicine

This course introduces students to the practice and theory of medicine in the ancient Mediterranean, beginning in Egypt and continuing through Greece and Rome. It ends in the Middle Ages. Greco-Roman medicine will be our focus. How was disease understood by practitioners and, as far as can be reconstructed, by laypeople? What form did surgical, pharmacological, and dietetic treatment take? What were the intellectual origins of Greek medicine? The social status of medical practitioners? How was medicine written and in what terms did its practitioners conceive it?

IS EN: H

L85 MedH 385 What is Medical Humanities?

What is medical humanities? What are its core questions and methods? When and how did the field emerge? To whom does it matter and why? These questions will ground our exploration of recent work in medical humanities. We begin with readings chosen by the instructor to illuminate various humanistic methods (e.g., historical, literary, philosophical) and their approach to recurrent topics and problems in the field (e.g., the doctor-patient relationship, illness as experience, the social construction of disease, health inequality, medicalization). In the second part of the course, students will be guided in co-writing and co-teaching the rest of the syllabus. Students will finish the class able to provide their own definition of medical humanities and to explain the field's origins and concerns as well as why and to whom the field matters. Enrollment preference will be given to students who have already declared the minor in medical humanities.

L85 MedH 399 Independent Work in Medical Humanities

This designation can be used for independent studies and reading courses in medical humanities. It requires prior approval from the director of the medical humanities minor.

Credit variable, maximum 3 units.

L85 MedH 39SM Women and Crime in the Evolution of American History

Crime happens. Property is damaged and stolen, lives are lost, and law, order, and justice evolves. This course taps into that ongoing reality by centering the herstorical evolution of female crime, highlighting women and girls of many kinds across time and spaces of America. It moves across centuries (through to the contemporary period) probing within and far beyond icons to unveil the gendered nature of crime and moreover to empower students to see and trace everyday female criminality that ignited across racial, ethnic, as well as lines of age in the winding path of American history. While men and boys dominate public and even scholarly expectations of crime and carceral conversations for many, students will leave this course with a far more rigorous understanding of the herstories gained by taking serious the types of crimes that women and girls acted out by exploring: robbery, assault, infanticide, larceny, murder, arson, prostitution, serial killers, and drug-related crimes. As well as going further to probe state and federal power through carceral medicine - showing the interior world of female prisoners, physicians, the movement of females into "asylums" and mental state hospitals, incarceration based on "insanity" while going further to examine births, illnesses, and death of women and teens in jails and prisons. Students will be likewise pushed to engage America's timeline of race, gender, and executions that includes women and girls. Racialized and gendered criminality, law enforcement violence, healthcare and deathcare in prisons are critical public health issues that students can better understand the complicated evolutions by deeply probing the herstorical lives of women, girls, and crime through this course. Students will read, learn, dig up the past, and write to ensure a future of herstory and remembrance.

L85 MedH 408 Disease, Madness, and Death Italian Style

Italian literary history teems with representations of illness, insanity, and death. From the ghastly 1348 plague that frames Boccaccio's "Decameron" to the midday madness of errant Renaissance knights and from 16th-century tales of poisoning and 19th-century Pirandellian madmen to the contemporary scourge of mafia killings, disease, madness, and death are dominant facts of reality, points of view, symbols, and cultural characteristics of Italian poetry and prose. This course undertakes a pathology of these tropes in Italian literary history and seeks to understand their meaning for the changing Italian

cultural identity across time and the Italian peninsula. We will read primary literary texts and view excerpts from films alongside articles focused on the cultural history of medicine, religion, and criminal justice. Taught in English. No final.

BA, IS EN: H

L85 MedH 414 Gender, Religion, Medicine, and Science

Have you ever wondered why some topics are argued using religion as a guide, while others may approach the topic from what is perceived as a strictly scientific point of view? This course explores how and why gender and sexuality tend to be at the center of debates that pit Medicine and Science against Religion. Using feminist and queer scholarship, this course explores five hundred years of rhetorical strategies related to defining, or regulating, gender and sexuality. We will consider how much debates have changed from sixteenth-century Europe to 21st century United States by asking when, why and how either Medicine & Science or Religion influenced social thought and laws. Finally, we will consider how, and if, contemporary debates on vaccines are either part of the long history of debating bodily autonomy (as is the case with the other topics addressed in class), or if the conflict between religion, medicine and science in the modern era is new and distinctly different from past rhetorical strategies. Prerequisite: Introduction to Women, Gender and Sexuality Studies

Same as L77 WGSS 414

Credit 3 units. A&S IQ: HUM, SD BU: ETH, IS EN: H

L85 MedH 418 Sexuality and Gender in East Asian Religions

In this course we will explore the role of women in the religious traditions of China, Japan and Korea, with a focus on Buddhism, Daoism, Shamanism, Shinto and the so-called "New Religions." We will begin by considering the images of women (whether mythical or historical) in traditional religious scriptures and historical or literary texts. We will then focus on what we know of the actual experience and practice of various types of religious women — nuns and abbesses, shamans and mediums, hermits and recluses, and ordinary laywomen — both historically and in more recent times. Class materials will include literary and religious texts, historical and ethnological studies, biographies and memoirs, and occasional videos and films. Prerequisites: This class will be conducted as a seminar, with minimal lectures, substantial reading and writing, and lots of class discussion. For this reason, students who are not either upper-level undergraduates or graduate students, or who have little or no background in East Asian religion or culture, will need to obtain the instructor's permission before enrolling.

L85 MedH 420 Nature, Technology, and Medicine in Korea

This course examines the cultural history of modern Korea with a focus on science, technology, and medicine. From about 1500 to the present, a number of hugely consequential things happened in Korea that have been called revolutionary-or what historians dub "early modern" and "modern." Confucian kings planned large-scale projects that changed nature, rustic scholars made inventories of flora and fauna, colonial Koreans became biologists, nurses, and "Edisons," and in North and South Korea, new professionals created distinctive-and in some cases, globally-competitive-regimes of knowing, making,

and healing. Students will interrogate these developments as an opportunity to revisit the history of modernity, which has been told predominantly from the perspective of the West. What does it mean to be "modern" in Korea? How did that modernity intersect with Korean science, technology, and medicine? Students will find and articulate their own answers by writing the final research paper. Recommended to have taken Korean Civilization or equivalent course that provides basic working knowledge of Korean history. Course also counts as a EALC capstone course. Prerequisite: junior level or above or permission of instructor.

Same as L81 EALC 420

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU:

ETH

L85 MedH 423 Philosophy of Biological Science

This course examines a number of theoretical, conceptual, and methodological issues that arise in the attempts of biologists to explain living systems. One sort of problem concerns the relation between biology (and biological descriptions and explanations) and physics and chemistry. Biological phenomena have often seemed very different from ordinary physical phenomena in being teleological or goal oriented. Vitalists, accordingly, resisted the attempt to invoke physics and chemistry in the attempt to explain biological phenomena. But recently biology has come more and more to draw upon physics and chemistry; we will examine the conceptual frameworks that underlie these efforts. Another sort of problem concerns the adaptiveness of living organisms. Charles Darwin offered one naturalistic explanation of this feature, an explanation that was further developed in this century as the synthetic theory of evolution. A number of controversial issues have arisen within this context of adaptation, and the range of levels at which selection can occur. The ubiquity of evolution, moreover, has been challenged in recent years, as a number of non-selectionist explanations have recently been put forward. We will consider the arguments for the synthetic theory and these alternatives.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L85 MedH 4601 Historical Racial Violence: Legacies & Reckonings

There is growing awareness of the legacies of historical racial violence in the United States and a related increase in reckoning efforts. Area histories of enslavement, lynching, and other racial terror and dispossession relate to inequality, conflict, and violence in the same places today. These 'haunting legacies' include heart disease and other health disparity, homicide rates, white supremacist mobilization, and corporal punishment in schools. Meanwhile, many communities and institutions are moving to acknowledge and address legacies of historical racial violence in various ways. This course combines seminar-style readings and writing on legacies of racial violence with a practicum component, where individual students or groups of students will conceptualize and develop interventions intended to clarify and disrupt legacies of racial violence, facilitating contemporary reckoning. The practicum will explore and support a broad range of interventive efforts, including public policy measures, original research projects, archival development, commemorative efforts, and a related array of mediums, including visual art, design, film, digital projects, and other creative approaches.

BA EN: S

L85 MedH 4647 Ancient Madness

In this course we will ask what madness meant in Greek and Roman culture. We will find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating, and categorizing people treated as mad. While we will concentrate on literary (particularly tragic and epic), philosophical, and medical texts, we will also look at visual representations and evidence from ritual and cult. An important part of our project will involve tracing the afterlife of classical ideas: the history of melancholia will ground this aspect of the course. Finally, we will consider how antiquity informs psychoanalysis (Oedipus, Antigone, Narcissus), and how ancient madness might partake in a critique of contemporary understandings of mental illness.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L85 MedH 471 Galen's "On Prognosis": A Social History of Medicine in Second-Century Rome

Galen of Pergamum was a Greek physician, philosopher, and intellectual active throughout most of the second century CE. He was also a voracious reader and writer of Greek literature; his surviving work far exceeds the extant output of any other Greek author before the third century CE. In this course, we will be reading Galen's treatise "On Prognosis," in which he recounts his career in the city of Rome, from his arrival in the early 160s through his tenure as an imperial physician to at least the emperors Marcus Aurelius and Commodus. While ostensibly a medical account, "On Prognosis" has little to say on technical medical issues. Rather, Galen's story is a carefully constructed professional autobiography that pivots from searing denunciations of Roman life to tense public performances of medical expertise and finally to intimate case histories of Rome's rich and powerful. The text presents us a fascinating window through which to examine not only the social practice of elite medicine in Rome of the second century but also the complicated experience of a Greek intellectual navigating the corridors of the Imperial court. Course goals include improving accuracy and speed in reading Greek prose, acquiring greater familiarity with intellectual discourse of the Imperial Period, and training in methods of research and writing.

L85 MedH 4881 Advanced Seminar: Mad: Mental Illness, Power and Resistance in Africa and the Caribbean

This seminar explores the history of mental illness in Africa and the Caribbean during the colonial and post-colonial periods. We will be guided by the following questions: What is mental illness? How do social, cultural and political realities affect how mental illness is defined? Should mental illness always be analyzed within a specific cultural context? How did psychiatry factor into the efforts of European colonizers to maintain social order in their colonies? How have colonized people resisted colonial notions of madness? What is the place of religion in these histories? How did mental institutions change after the end of colonial rule and how was post-colonial Caribbean and African psychiatry harnessed in service of decolonization? The course

will pay special attention to how European colonial powers employed similar understandings of blackness across regions as they formulated ideas concerning the black populations they deemed "mad" across Africa and the Caribbean.

Same as L22 History 4881

Credit 3 units. A&S IQ: HUM, LCD EN: H

L85 MedH 4885 Advanced Seminar: Medicine, Disease, and Empire

This course examines the history of medicine in connection to the politics of colonialism and empire-building, spanning the 16th century through the 20th century. Topics covered include: epidemic disease outbreaks (e.g., smallpox, cholera, malaria); the role of science and medicine in endorsing the "civilizing missions" of empires; tropical climates and tropical diseases as western constructs; tensions between western medicine and indigenous healing practices and beliefs; ideas of race and racism in science and medicine; modern advancements in sanitation and public health and their implementation overseas; and the historical roots of the modern global health movement.

L85 MedH 491 Staging Illness

"Suddenly some force struck him in the chest and side, making it still harder to breathe, and he fell through the hole and there at the bottom was a light." This quotation, from Tolstoy's story "The Death of Ivan Ilych," offers an example of how artists have employed serious or life-threatening diseases as a means of illuminating both physical suffering and spiritual rebirth. Even as it invades the body and isolates us from our fellow man, illness may offer opportunities for spiritual growth and renewal, serving as an apt metaphor for human survival in times of extremis. In her brilliant essay, "Illness as Metaphor" (1978), Susan Sontag takes issue with how illnesses like tuberculosis were misunderstood or even romanticized during the 19th century in works like Dumas's "Camille" and Puccini's "La Boheme." During the AIDS crisis in the 1980s and 1990s, American artists — particularly theatre artists, whose communities were decimated by the disease — were forced to consider how this global pandemic impacted their lives, especially at a time when the term AIDS was not even mentioned by the President of the United States. In conjunction with the Performing Arts Department's 25th anniversary production of Tony Kushner's extraordinary play, "Angels in America, Part 1, Millennium Approaches," this new course examines how disease has been a focal point of artistic inquiry over the course of centuries. By examining works that are focused on illness throughout history, the seminar offers both a deeper understanding of and context for Kushner's masterpiece and the AIDS crisis, and it considers how illness has always been an important subject for the investigation of what it means to be fully human.

Medicine & Society

The Medicine & Society Program is an exciting opportunity for undergraduate students in Arts & Sciences who are interested in exploring the interface of culture, behavior and health from a social science perspective. The program addresses the important social and cultural foundations of health and illness in human societies, with a specific emphasis on service and research opportunities. The program is supported by a grant from the Danforth Foundation and administered through the Department of Anthropology.

Eligibility

The Medicine & Society Program is a four-year program designed for matriculating first-year students. Upon acceptance to Washington University in the spring, students may apply online for admission to the program by indicating their interest in Medicine & Society. A description of the program and how to apply online is in *Getting Started*, a brochure sent to students in mid-May.

Admission to this program is highly competitive. Academic credentials, aptitude and interest in a health-related career, and personal statements all will be considered when selecting up to 20 participants to join the entering cohort. The program will particularly appeal to students with a long-term commitment to careers in the health professions and related areas.

Curriculum

The Medicine & Society Program has its intellectual and programmatic roots in the field of medical anthropology, which is broadly defined as the study of human health and illness across culture, time and space. Medical anthropologists examine the role of culture and society in the shaping of illness experiences. Foci of inquiry may include such issues as traditional health beliefs and practices; cultural clashes between traditional medicine and biomedicine; political and economic foundations of health disparities; alternative and complementary medicine;

social and behavioral factors that affect disease rates; and public health responses to emerging health problems. These topics all share a focus on community as a primary area of inquiry and population as a primary unit of analysis.

Requirements

Once admitted to the program, students must complete the following:

- First-year Medicine & Society seminar
- Community health internship or service-learning activity
- A major or minor in anthropology or the global health and environment track of anthropology
- A junior/senior seminar addressing contemporary issues in Medicine & Society
- Senior capstone or honors thesis

Students who are accepted into the Medicine & Society Program are enrolled in a year-long first-year seminar on culture, health and society in the Department of Anthropology. This seminar provides the academic foundation for future community health work in St. Louis. Beginning as early as the sophomore year, students identify and select a community health site for internship placement or service-learning activities. The internship/service-learning opportunity provides students with a location for focusing their interest and involvement in community health and allows them to participate in the work of the host organization. During the junior and senior years, students have the opportunity to intensify their academic and service activities at the internship or service-learning site, which may culminate in a senior honors thesis or a capstone project based on original research and investigation. Students in the Medicine & Society Program are encouraged to graduate with honors, based on their independent research and academic achievement.

This course of study provides an excellent foundation for future graduate work in medicine, public health or any of the allied health professions, such as nursing or physical and occupational therapy. Students who complete the program will also be highly competitive for admission to other professional schools, such as law, business or social work.

Personnel

The Medicine & Society Program is directed by Dr. Anna Jacobsen, a sociocultural anthropologist who works on issues pertaining to religion and morality as they influence perspectives and understandings of personhood and health. Previous research has focused on these processes as they have unfolded in Somali refugee communities in Kenya and Northern Europe. Her work has expanded to include the ways vaccine confidence has been informed by moral and religious ideologies in Somali communities around North America and how understandings

of death and dying have been broadly influenced by the same.

Students also have full access to other faculty in anthropology and related disciplines who offer courses of relevance and interest.

Lecturer
PhD, Washington University
(Anthropology)

Majors

The Medicine & Society Program is not a major/minor program; it is a four-year program that is available by application only.

Current students who are interested in the Medicine & Society curriculum are advised to investigate a major (p. 284) or minor in anthropology (p. 285) with a focus on medical anthropology or the optional global health and environment track (p. 284) of the anthropology major or minor.

Minors

The Medicine & Society Program is not a major/minor program; it is a four-year program that is available by application only.

Current students who are interested in the Medicine & Society curriculum are advised to investigate a major (p. 284) or minor in anthropology (p. 285) with a focus on medical anthropology or the optional global health and environment track (p. 284) of the anthropology major or minor.

Courses

Please refer to the requirements in the Medicine & Society Overview (p. 873) section, where required courses are listed. Please visit the Anthropology page (p. 286) for specific course information.

Medieval and Renaissance Studies

Interested students may pursue a minor in Medieval and Renaissance studies or a major in Renaissance studies under the auspices of the Interdisciplinary Project in the Humanities (IPH). The major offers students the opportunity to gain a broad understanding of the early modern world — the seedbed of modern Western civilization — through the integrated study

of Renaissance literature, history, philosophy, art history and music. (A full description of the requirements for completing the Renaissance studies track in the IPH may be found in the general listing for the IPH (p. 757).)

Courses are drawn from a wide range of departments. This allows students to develop their own course of study, to select areas of concentration that are of particular personal interest, and to work closely with faculty from different areas. Students study the themes and social issues of the period through art, history, literature and popular culture. Topics examined include the rise of urban life, the flowering of vernacular languages and new literary genres, the growing emphasis on education, the reconception of pictorial representation and architectural space, the expression and subversion of power in politics and culture, and the transformation of religious doctrines and institutions.

Majors

Students seeking a major concentration in Medieval or Renaissance Studies are advised to pursue it under the aegis of either the Interdisciplinary Project in the Humanities (p. 757) or one of the other departments or programs in the humanities. They should achieve foreign language competency in French, Spanish, German, Italian, Latin, Arabic or Greek, and they are strongly urged to pursue their studies across several departments and programs.

Minors

The Minor in Medieval and Renaissance Studies

Total units required: 18

The minor in Western Medieval Studies and the minor in Renaissance Studies have the same structure. Students must complete two years of college-level language study in Spanish, French, Italian, Latin, German, Arabic or Greek, and they are encouraged to continue their foreign-language study further. They are expected to take six additional courses; three should come from the following list:

Code	Title	Units
Art-Arch 113	History of Western Art, Architecture & Design	3
History 101C	Western Civilization	3
IPH 201C	Ampersand: Classical to Renaissance Literature	3
IPH 203C	Ampersand: Early Political Thought	3
IPH 209	Scriptures and Cultural Traditions: Text & Traditions	3

Students interested in pursuing the minor in Medieval and Renaissance Studies should contact the offices of the Interdisciplinary Project in the Humanities (<http://iph.wustl.edu/>).

Additional Information

Students must also take three courses in either Medieval or Renaissance Studies (depending on the concentration chosen) from at least two different departments or programs. Students will select these three courses in consultation with their minor advisor: Michael Sherberg (<https://rll.wustl.edu/people/michael-sherberg/>) for Western Medieval Studies or Joseph Loewenstein (<https://english.wustl.edu/people/joe-loewenstein/>) for Renaissance Studies.

Courses

Please visit the list of courses offered by the Interdisciplinary Project in the Humanities (p. 761).

Music

The Department of Music offers a music program of exceptional quality and diversity. In this varied course of study — where music is approached as a liberal and fine art rather than as an isolated, separate subject — students may pursue practical and creative music making or study musical traditions and individual works. Music courses are open to all students in the university.

We offer students the opportunity to develop performance skills in voice or instruments through private instruction or through participation in small or large ensembles. Private music lessons with our prominent faculty, including members of the St. Louis Symphony Orchestra, are available in voice, piano, organ, guitar, and all orchestral and jazz instruments.

Music majors can explore critical issues of tradition, individual composers, compositional craft, aesthetic interpretation, and music's social and cultural significance through a wide range of courses, from introductory classes to highly specialized seminars. Instruction is available in jazz, popular music, world musics, the history and literature of Western music, ethnomusicology, music theory and analysis, musical composition, and electronic music. All performance and creative and academic endeavors in music are supported by a thorough grounding in musicianship and keyboard skills.

Music majors may take advantage of study abroad programs in music in Italy, England and France. Summer research projects under faculty direction are also available.

Several options are available for students interested in music: the Bachelor of Arts degree with a major in music, the Bachelor of Music degree, a minor in music, and a minor in jazz studies. Students may take the AB degree in combination with a major in another field or as their primary major in a broad liberal arts education. Majoring in music can prepare students well for graduate work and for a variety of musical careers and other professions.

Performance Opportunities

Ensembles: The department sponsors numerous performing ensembles that draw members from the university and the surrounding community. Students must audition for admission to the ensembles. All ensembles are available for graded credit, for credit/no credit, or off roster. Ensembles give one or more public performances each semester. Students who are enrolled for credit in one of the department's ensembles may be entitled to a scholarship that covers a portion of the fee for music lessons.

Vocal Ensembles: Concert Choir

Instrumental Ensembles: Jazz Band, Chamber String Ensembles, Symphony Orchestra, Wind Ensemble, Jazz Combos

Lessons: Students may take lessons in voice, piano, organ, guitar, and all orchestral and jazz instruments in the appropriate course sequences. A separate fee is charged for private instruction. Music majors and minors receive a scholarship to cover all or a portion of the fee, respectively. If students enroll for credit in one of the department's ensembles, they are entitled to a scholarship for a portion of the fee for each semester in which they are enrolled. In addition, the department has a limited number of partial scholarships that are based on need and merit.

Majors

Becoming a Music Major: Students who plan to declare a major in music should consult with the department as early as possible. Students interested in pursuing a music major should begin the appropriate course sequences in music theory, music history, keyboard skills and musicianship. All music majors must complete a senior capstone, which could take the form of a thesis, recital, lecture-demonstration, composition portfolio or 400-level course.

The Bachelor of Arts in Music Major

Total units required: 45

Code	Title	Units
Music 121C & Music 122C or Music 121J & Music 122J	Classical Theory I and Classical Theory II Jazz Theory I and Jazz Theory II	6
Music 221C	Classical Theory III	3
Music 321T	Music Theory IV: Topics in Music Theory	3
Music 3012	Music History II: The Invention of Classical Music, 1700-1850	3
Music 3014	Ethnomusicology	3

Choose two of the following three courses:		6
Music 3011	Music History I: Music in Europe from the Earliest Notation to 1700	
Music 3015	American Popular Music and Media	
Music 3017	Music History III: Classical Music in Flux, 1850 to the Present	
Music 2231	Musicianship I (should be taken concurrently with Music 221C)	1
Music 2241	Musicianship III (should be taken concurrently with Music 321T)	1
Two semesters of Keyboard Skills; course placement determined by piano faculty		2
Performance courses: private lessons, small ensembles, and/or large ensembles		4
Also required:		
Music 4992	Senior Capstone: Performance, Composition, or Theory (or Music 4993 or Music 4994)	3
or an approved 400-level Music course		
Lower-level elective units (courses, lessons, and/or ensembles)		7
Upper-level elective units (courses, lessons, and/or ensembles)		3
Total Units		45

The Bachelor of Music Major

Total units required: 74-78

Declaration of this major must be approved by the department before the end of a student's sophomore year. In addition to the required courses, majors must complete a minimum of 12 to 30 units in advanced courses, depending on the area of concentration. Students may earn the BMus degree with concentration in performance, composition, music theory, or music history and culture, or they may pursue a general program that combines two or more of these areas.

Each concentration requires a major senior capstone, such as a thesis, recital, lecture-demonstration or composition portfolio. All majors must also pass a keyboard proficiency examination.

Required courses:

Code	Title	Units
Music 121C & Music 122C or Music 121J & Music 122J	Classical Theory I and Classical Theory II Jazz Theory I and Jazz Theory II	6
Music 221C	Classical Theory III	3
Music 321T	Music Theory IV: Topics in Music Theory	3
Music 2231	Musicianship I (should be taken concurrently with Music 221C)	1

Music 2241	Musicianship III (should be taken concurrently with Music 321T)	1
Music 3231	Advanced Musicianship	3
Music 3011	Music History I: Music in Europe from the Earliest Notation to 1700	3
Music 3012	Music History II: The Invention of Classical Music, 1700-1850	3
Music 3017	Music History III: Classical Music in Flux, 1850 to the Present	3
1 unit of keyboard skills per semester as necessary to complete Music 2242		1-4
Music 4991	Senior Project: Musicology or Analysis	3
or Music 4992	Senior Capstone: Performance, Composition, or Theory	
or Music 4993	Senior Honors Capstone: Musicology or Analysis	
or Music 4994	Honors Project: Performance, Composition or Theory	

Lesson and Ensemble Requirements: In addition to the courses listed above, BMus students must also register for music lessons and at least one ensemble every semester once the major has been declared. Students with a performance emphasis must take at least 2 units of music lessons per semester; all others must take at least 1 unit per semester.

Elective courses: Each of the five BMus concentrations includes additional requirements, as follows:

Performance Emphasis:

Code	Title	Units
Upper-level music history elective (other than Music 3011, Music 3012, and Music 3017)		3
Music 424	Analysis II	3
400- or 500-level music theory elective		3
Music 439	Diction I (Vocal performance majors only)	3
Junior half-recital		0
Total Units		12

Theory Emphasis:

Code	Title	Units
Music 424	Analysis II	3
400- or 500-level electives		12
Upper-level music history elective (other than Music 3011, Music 3012, and Music 3017)		3

Music 401 & Music 402	Elementary Technique of Electronic Music: Synth Lab and Advanced Techniques in Electronic Music: Studio Songwriting	6
or Music 429 & Music 430	Composition and Composition	
Total Units		24

Composition Emphasis:

Code	Title	Units
Upper-level music composition (Music 429, Music 430; repeatable)		12
Upper-level music history elective (other than Music 3011, Music 3012, and Music 3017)		3
Music 424	Analysis II	3
400- or 500-level music theory electives		6
Music 401 & Music 402	Elementary Technique of Electronic Music: Synth Lab and Advanced Techniques in Electronic Music: Studio Songwriting	6
Total Units		30

History and Culture Emphasis:

Code	Title	Units
Upper-level music history electives (other than Music 3011, Music 3012, and Music 3017)		15
Music 424	Analysis II	3
400- or 500-level music theory electives		6
Total Units		24

General Emphasis:

Code	Title	Units
Upper-level music history electives (other than Music 3011, Music 3012, and Music 3017)		6
Music 424	Analysis II	3
400- or 500-level music theory electives		6
Elective units		9
Total Units		24

Senior Honors: Music majors are encouraged to work toward Latin Honors. To qualify, students must have an outstanding academic record and satisfactorily complete a senior honors capstone project, including an oral examination with a faculty committee. Project proposals are due at the end of the junior year.

Minors

The Minor in Music — General Studies

Units required: 18

Required courses:

Code	Title	Units
Music 121C & Music 122C	Classical Theory I and Classical Theory II	6
or Music 121J & Music 122J	Jazz Theory I and Jazz Theory II	
One of the following courses:		
Music 3011	Music History I: Music in Europe from the Earliest Notation to 1700	3
or Music 3012	Music History II: The Invention of Classical Music, 1700-1850	
or Music 3014	Ethnomusicology	
or Music 3015	American Popular Music and Media	
or Music 3017	Music History III: Classical Music in Flux, 1850 to the Present	
Lower-level electives		3
Upper-level electives		6
Total Units		18

Additional Information

Special scholarships are available for lessons and ensembles.

Students whose interests are not served by these requirements may apply to the department chair with an alternative proposal.

The Minor in Jazz Studies

Units required: 18

Required courses:

Code	Title	Units
Music 121J & Music 122J	Jazz Theory I and Jazz Theory II	6
Music 105	History of Jazz	3
Music 3023	Jazz in American Culture	3
Music 3091	Jazz Improvisation I	3
One of the following courses:		
Music 3015	American Popular Music and Media	3
or Music 3017	Music History III: Classical Music in Flux, 1850 to the Present	
or Music 3021	Music of the African Diaspora	
or Music 3235	Compositional Craft in Film Scores and Musical Theatre	
or Music 3236	Music Arranging for the Multi-Genre Artist	

or Music 3237	The Art of Popular Song: From Folk and Musical Theatre to Rock and Contemporary A Capella	
or upper-level applied music in jazz		
Total Units		18

Additional Information

Other upper-level credits in music or kindred studies (e.g., African and African-American Studies) may be approved at the discretion of the department chair.

Courses

Visit online course listings to view semester offerings for L27 Music (<https://courses.wustl.edu/CourseInfo.aspx?scl=L&dept=L27&crslvl=1:4>).

L27 Music 100B Brass Lessons: Pre-registration

Credit variable, maximum 2 units.

L27 Music 100D Percussion Lessons: Pre-registration

Credit variable, maximum 2 units.

L27 Music 100G Guitar Lessons: Pre-registration

Guitar lessons are comprised of multiple tracks of study including classical, popular music, and jazz guitar. Students are placed in a study of their choice, or upon advice of the guitar faculty. Classical guitar is the study of art music as composed for the classical nylon-string instrument over centuries of traditions. Popular guitar studies include music styles such as blues, rock, folk and country, while the jazz guitar track suits well students interested in jazz music and who are engaged in the jazz studies program. Each area of study is designated by differentiated curricula and syllabi available to each student. Bass Guitar lessons are administered similarly with studies in all forms of popular music and jazz. Half-hour lessons are 1.0 unit and hour lessons are 2.0 units, no other units will be accepted. Once you have registered for this course please sign up for a placement appointment through the department's website, you will be transferred to the appropriate course and section number following this appointment. See department website for lesson fees.

Credit variable, maximum 2 units.

L27 Music 100P Piano Lessons: Pre-registration

Credit variable, maximum 2 units.

L27 Music 100S Strings Lessons: Pre-registration

Credit variable, maximum 2 units.

L27 Music 100V Voice Lessons: Pre-registration

Credit variable, maximum 2 units.

L27 Music 100W Woodwinds Lessons: Pre-registration

Credit variable, maximum 2 units.

L27 Music 1010 Topics in Music

Credit 3 units.

L27 Music 101E Introductory Survey of Western Music I

A survey of "art" music in Western culture from the Middle Ages to the mid-18th century. Emphasis in the first term is on sacred and secular music of the church, court and middle-class society in its historical and cultural context. Regular listening and writing assignments are designed to develop the capacity to hear perceptively and write critically about the music studied. No prior knowledge of musical notation required. This course is not recommended for music minors or majors. For a one-semester course covering Western classical and popular music and music from other cultures, refer to Music 114E.

Credit 3 units. A&S IQ: HUM BU: HUM

L27 Music 1021 Musics of the World

This course provides an introduction to the field of ethnomusicology as well as a survey of selected musics from around the world. We will investigate not only musical sound itself but how music interacts with other cultural domains, such as religion/cosmology, politics, economics, and social structure. The course will use case studies from regions around world (such as Indonesia, India, the Middle East, Sub-Saharan Africa, and Latin America) to illustrate the conceptual problems and methodologies raised by the cross-cultural study of music, as well as acquaint you with the rich variety of music around the globe.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L27 Music 1022 Popular Music in American Culture

American popular music from 1800s to the present, with emphasis on technology, social and political contexts, and popular music as a realm of interracial encounter. Musics covered include early jazz, classic blues, swing, classic pop, rock and roll, soul, disco, hip hop and the changing relationship between popular music, film, and television.

Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 1023 Beethoven in His Time and Ours

Ludwig van Beethoven composed some of the most significant works of Western classical music, and he continues to make his mark as the prototypical "troubled genius" and as a symbol for a wide range of political causes, the subject of numerous films, and classical music's main representative in American pop culture. We begin with an exploration of Beethoven's life, music, and historical context, and we continue by tracing how, after his death, Beethoven became a cultural hero whose image took on a life of its own. Throughout, we unravel the interaction of music, culture, and mythmaking. No previous musical experience required.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 1024 Mozart: The Humor, Science and Politics of Music

Wolfgang Amadeus Mozart is one of the most recognized composers of "classical" music. A child prodigy of astonishing precocity, he has come to symbolize genius for Western culture — a composer whose music embodies superhuman, even

utopian beauty and perfection. In this course, we learn that there was more to Mozart. Mozart was a lover of codes and puzzles who delighted in the science of music, a sampler of non-Western music, and a musical humorist whose comedies make provocative statements — ranging from cynical to poignant — about politics, gender and morality. Our focus works include Mozart's symphonies, piano music, string quartets, and such comedies as *The Magic Flute* and *The Marriage of Figaro*. We also explore Mozart's afterlife — how his music has figured in film, literature and popular culture. This course is open to all undergraduates. No previous musical course work or experience is required.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 1026 First-Year Seminar: You Never Heard Such Sounds in Your Life: American Avant-Garde Music

This first-year seminar introduces students to the fascinating history of avant-garde music making in the United States. A series of case studies will address a number of important avant-garde musicians and schools of thought spanning the early 20th century to the present. In exploring avant-garde music, students will encounter new ways of thinking about art's place in the world and broaden their notions of music itself. No previous training in music is required. Course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 1027 First-Year Seminar: Sound On: Listening in/ to Digital Culture and Music

What does 21st-century life sound like? The aim of this course is to interrogate, denaturalize, and critique familiar experiences and technologies of contemporary listening: from earbuds and mobile devices to streaming services and social media to the ambient music of capitalism and the (mediated) persistence of live performance. Readings in musicology, sound studies, and media theory will be examined alongside students' contemporary lived musical experience. Musical and sonic exercises in close, situated listening as well as examinations of distracted, ubiquitous listening will form some of the primary materials of the course. Analyses of both readings and activities will result in the production of a collaborative weekly digital newsletter as well as culminating projects by individual students. This course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM BU: HUM EN: H

L27 Music 102E Introductory Survey of Western Music II

A survey of "art" music in Western culture from the middle of the 18th century to the present. Music of composers from Haydn and Mozart to George Crumb and John Cage are studied in its historical and cultural context. Regular listening and writing assignments are designed to develop the capacity to hear perceptively and write critically about the music studied. No prior knowledge of musical notation required. This course is not recommended for music minors or majors.

Credit 3 units. A&S IQ: HUM BU: HUM

L27 Music 103E Theory I: Introduction to Music Theory

Vocabularies and skills basic to music theory introduced through concentrated work in notation, the development of specific compositional skills, and musical analysis. Concepts of musical structure and aesthetic experience are explored through the

study of music from three periods of the western tradition: medieval liturgical chant, music of the Classical period, and music of the early 20th century. Ability to read musical notation required. Keyboard skills desirable. Music 103E is the entry-level course for all music minors and majors.
Credit 3 units. A&S IQ: HUM BU: HUM

L27 Music 104E Music Theory II

A systematic introduction to the basic principles of tonality as manifested in western European music of the 18th and early 19th centuries. Topics include pitch, time, line and linear elaboration, counterpoint, harmony, phrase, form and chromaticism. The principles are explored through both musical composition and interpretation of musical art works. Prerequisite: Music 103E.
Credit 3 units. A&S IQ: HUM BU: HUM

L27 Music 105 History of Jazz

History of jazz to the present, including its African elements.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 107 Listening Laboratory

Optional analytical listening sessions to supplement Music 101E and 102E respectively. Taped listening assignments. Required of music majors and of students in the first-year seminar section. Concurrent registration in Music 101E or 102E is required.
Credit 1 unit. A&S IQ: HUM

L27 Music 109 Ragtime

A history of ragtime music: survey of composers and performers. Emphasis on St. Louis and the music of Scott Joplin. University College students should register for U24 109 Section 02.
Credit 2 units. A&S IQ: HUM BU: HUM

L27 Music 1091 Jazz Theory I

Jazz Theory I introduces the jazz music language as a preparation for the study of improvisation. The course study consists of basic music theory including music-reading skills and notation, scales, intervals and triads. An introduction to extended tertian chords as derived from the 21 modes of the major, melodic and harmonic minor scales forms the basis of the jazz harmonic language. The study of chord progression and chord substitution, song form and the blues prepares the student for a detailed study of the modern jazz language.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 1092 Jazz Theory II

Jazz Theory II outlines the harmonic, rhythmic and improvisational practices from the Bebop period of the late 1940s to the jazz music of the present day. Discussions include intermediate to advanced chord substitution, quartal and bitonal harmony, modal improvisation, pentatonic scales and polyrhythmic drumming, concentrating on the work the major improvisers of the 1950s to 1970s. Prerequisite: Music 1091.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 109M Mathematics and Music

An elementary introduction to the connections between mathematics and musical sound. Review of integers, ratios, prime numbers, functions, rationality, exponents, logarithms, trigonometry. Review of scales, clefs, key signatures, intervals,

time signatures. Frequency and pitch. The connection between intervals and logarithms. Tuning and temperament, just intonation. Scales and modular arithmetic. The mathematics of harmony; the sound of the low prime numbers and their roles in harmony. Harmonics, partials and overtones. Numerical integration and basic Fourier analysis. The nature of complex tones. Analysis of instrument sounds. Human vowels and formants. Prerequisites: two years of high school algebra, and trigonometry.

Same as L24 Math 109

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L27 Music 110G Study in Guitar

Students taking guitar off-roster/not for credit.

L27 Music 110P Study in Piano

Students taking piano not for credit/off-roster.

L27 Music 110S Study in Strings

Students taking strings not for credit.

L27 Music 110V Study in Voice

Students taking voice not for credit.

L27 Music 110W Study in Woodwinds

Students taking woodwinds not for credit.

L27 Music 113 Fundamentals of Music

This course provides a broad overview of music fundamentals designed to enhance the student's experience of music as well as provide a foundation for further study in music theory. Students become acquainted with the basic vocabulary and building blocks of music: intervals, rhythms, scales, triads, chords and harmony.

Credit 2 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 114E Exploring Music: Legendary Performers: Virtuosos, Divas & Rockstars

Every generation boasts a handful of musicians that stand out from the crowd-remarkable performers that achieve legendary status, command the highest fees, and set the standard against which all others are measured. But how far back can we trace this phenomenon? And what does it take to become a musical superstar? In this class, we will address these and other questions. Focusing on legendary performers from a wide array of musical traditions spanning history and the globe, we will learn to think and write about music and performance. Introduction to fundamental musical concepts will also enhance students' listening experience and provide them with a foundation for further study. Barring any restrictions due to the COVID-19 pandemic, the class will attend live performances, including a concert by the Saint Louis Symphony Orchestra at Powell Hall. No previous musical background required.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 115 Reading Music

Elements of music notation for those with little or no music-reading skill. Designed to develop a basic acquaintance with the principles of notation for students enrolled in introductory courses, applied music and ensembles as well as those with a general interest in learning to read music.

Credit 1 unit.

L27 Music 1161 First-Year Seminar: Writing About Music

This course explores the various ways in which writers from the 18th century to the present discuss music. Issues include respect for a tried and true musical "canon," music as an imitative vs. absolute art form, and a focus on performing virtuosity/spectacle vs. musical content. In addition to reading what previous authors have written, students write on a regular basis about examples from classical, popular and non-Western music and critique each others' work. Ability to read music is not required.

Credit 3 units. A&S: FYS A&S IQ: HUM BU: HUM

L27 Music 1162 First-Year Seminar: Bruce Springsteen's USA

This course examines the career and work of Bruce Springsteen as songwriter, singer, rock musician, pop star, and public figure. Conducted in seminar format, the primary course materials are Springsteen's recordings and videos, as well as the many interviews he has given. Selections from the vast body of popular and academic scholarship on Springsteen also informs class discussions. The course is limited to freshmen.

Credit 3 units. A&S: FYS A&S IQ: HUM BU: HUM EN: H

L27 Music 1163 First-Year Seminar: Youth in Revolt: Popular Music as Protest

When is popular music also protest music? In this course we will listen to music linked to the mid-century Civil Rights Movement, the Vietnam War, Black Power, the wars in Iraq, Occupy Wall Street, and the recent confrontations between protestors and the police. While exploring genres such as rock, soul, pop, punk, hip-hop and grunge, we will ask how popular musics might express or embody various forms of protest in American life. Selections from contemporaneous testimonials, alternative presses, interviews, and popular and academic writing will also inform our discussions.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 1164 Love Songs and Laptops: Rediscovering Medieval Music in the Digital Age

Using our laptops as portals into the past, students will gain first-hand experience as historical detectives. In this seminar, we will explore the world of medieval love — from the chivalrous and courtly to the bodily and obscene — as represented in books of songs from the 15th century. Scrumptiously decorated and preserved, five interrelated songbooks from central France, known as the "Loire Valley Chansonnières" contain the majority of love songs from this period. Working from digitized versions of the songbooks, online editions, and modern audio recordings, we will address the following questions: What do the songbooks tell us about the culture in which they were created? How do the graphic decorations that frame each song interact with its music and lyrics? Lastly, by contextualizing these digital sources with respect to the growing interest in the interface between the humanities and digital technology, we will discuss what we can gain from these developments and what — if anything — we stand to lose. Ability to read music not required.

Credit 3 units. A&S: FYS A&S IQ: HUM EN: H

L27 Music 1165 First-Year Seminar: On Broadway - Musicals, Race, Place

The Broadway theatres are closed, but pressure to make these stages more racially and ethnically diverse when they re-open is strong. This course looks at the history of the Broadway theatres and the ways this coveted theatrical real estate in midtown Manhattan has played host to white and non-white performers in the signature American theatrical genre: the musical. Using digital and archival research tools, including an abundance of maps, our study stretches from the creation of the Theatre District at the turn of the 20th century to the present. We will examine groundbreaking and all-too-typical shows — from "Show Boat" to "Hamilton" — and look closely for how systemic racism has played out on Broadway stages for Broadway's mostly white audience. We will produce original research and explore digital humanities methods related to questions of racial inequality in commercial popular culture. This course is for first-year, non-transfer students only.

Credit 3 units. A&S: FYS A&S IQ: HUM, SC BU: BA, HUM EN: H

L27 Music 117 Women and Music: From Bingen to Beyonce

An examination of women in music from the twelfth-century nun Hildegard of Bingen to Beyonce. The course will consider significant women composers and performers, as well as music-making within women's institutions. Ability to read music not required.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 119 Guitar Class I

Jazz Guitar Class I introduces the fundamentals of music as a preparation for the study of jazz proper, guiding the student to the development of an operational musical language on the instrument. This performance practice class consists of basic music theory realized on the guitar including major and minor diatonic and pentatonic scales, triads in all positions and inversions, seventh chords and an introduction to extended tertian chords. As well, music reading, rhythmic skills and basic performance techniques are emphasized. The course culminates in the reading of jazz lead-sheets where students play the melody in all positions of the key and also play the harmony from chord symbols. *Note:* If a class does not have three students enrolled at the end of the drop/add period, it will be cancelled. Pending studio space, enrolled students may then opt to take private lessons for the remainder of the semester, and the private lesson fee will be prorated accordingly.

Credit 1 unit.

L27 Music 120 Guitar Class II

Jazz Guitar Class II reinforces the materials of Music 119 including scales and triads in all positions, while introducing new materials including 9th, 11th, 13th and altered chords. An introduction to improvisation, this course stresses making music in real time through the embellishment of melody, the study of arpeggio, the modes of the major scale and idiomatic devices of the jazz language. The course stresses the development of strong rhythmic skills while furthering a proper technique. Jazz Guitar II culminates in the reading of jazz lead-sheets where the student improvises in fundamental ways. *Note:* If a class does not have three students enrolled at the end of the drop/add period, it will be cancelled. Pending studio space, enrolled students may then opt to take private lessons for the remainder of the semester, and the private lesson fee will be prorated accordingly.

Credit 1 unit.

L27 Music 121C Classical Theory I

Introduction to vocabularies and skills basic to music theory through concentrated work in notation, the development of specific compositional skills, and musical analysis. Concepts of musical structure and aesthetic experience are explored through the study of music from the Western classical tradition. Ability to read musical notation required. Keyboard skills desirable. Students who register for Music 121C are required to register for one of the subsections.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 121J Jazz Theory I

Introduction to the jazz music language as a preparation for the study of improvisation. The course of study consists of basic music theory including music-reading skills and notation, scales, intervals and triads. An introduction to extended tertian chords as derived from the 21 modes of the major, melodic and harmonic minor scales forms the basis of the jazz harmonic language. The study of chord progression and chord substitution, song form, and the blues prepares the student for a detailed study of the modern jazz language. Students who register for Music 121J are required to register for one of the subsections.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 122C Classical Theory II

A review of diatonic harmony and followed by a study of chromatic harmony and issues of tonality and form. Topics include tonicization and modulation, chromatic voice-leading, modal mixture, altered and extended chords, modulation to foreign keys, and elaboration of diatonic sequences. Work involves written and class-related exercises, analysis of 18th- and 19th-century works, and model composition. Students who register for Music 122C are required to register for one of the subsections. Prerequisite: Music 121C.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 122J Jazz Theory II

A study of the harmonic, rhythmic, and improvisational practices from the Bebop period of the late 1940s to the jazz music of the present day. Discussions include intermediate to advanced chord substitution, quartal and bitonal harmony, modal improvisation, pentatonic scales, and polyrhythmic drumming, concentrating on the major improvisors of the 1950s-1970s. Students who register for Music 122J are required to register for one of the subsections. Prerequisite: Music 121J.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 123 Keyboard Skills I

An introduction to basic techniques of keyboard harmony using intervals, scales and root position chords. Transposition and sight-reading skills developed. Prerequisite: permission of instructor for nonmajors. One and one-half class hours a week. Credit 1 unit.

L27 Music 124 Keyboard Skills II

An introduction to basic techniques of keyboard harmony using intervals, scales and root position chords. Transposition and sight-reading skills developed. Prerequisite: permission of instructor for nonmajors. One and one-half class hours a week. Credit 1 unit.

L27 Music 128 Selected Area for Special Study

In-depth study in areas of special interest.

Credit 3 units. BU: HUM

L27 Music 129 Composition Workshop

An introductory course in contemporary music composition, with a 30-minute private lesson and weekly master class.

Credit 2 units.

L27 Music 130 Composition Workshop

An introductory course in contemporary music composition, with a 30-minute private lesson and weekly master class.

Credit 2 units.

L27 Music 1313 Digital Audio and Multitracking: An Introduction to Electronic Music

This course is an exploration of the foundational techniques of electronic music through hands-on, project-based learning. Our primary goal will be to learn to be creative in the recording studio. To that end, we will build proficiency in audio manipulations, recording and production techniques, sampling, MIDI sequencing, and signal processing. We will learn to use a variety of technical tools, chief among them the digital audio workstation, the microphone, and WashU's unique collection of analog synthesizers. Along the way, we will train our ears to recognize subtle qualities of recorded sound, and we will learn to compose with audio as an expressive medium. All genres and musical backgrounds welcome.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 151G Introductory Guitar

Credit variable, maximum 2 units.

L27 Music 151P Introductory Piano

Credit variable, maximum 2 units.

L27 Music 151S Introductory Strings

Credit variable, maximum 2 units.

L27 Music 151V Introductory Voice

Credit variable, maximum 2 units.

L27 Music 151W Introductory Winds and Percussion

Credit variable, maximum 2 units.

L27 Music 155 Class Guitar

Credit 1 unit.

L27 Music 159 Piano Class

Intended for students with little to no formal musical training. An introduction to keyboard fundamentals through the study of note reading, intervals, technique and repertoire. Students may self-enroll or be placed by audition. There is a \$150 lab fee for the course. *Note:* If a class does not have three students enrolled at the end of the drop/add period, it will be cancelled. Pending studio space, enrolled students may then opt to take private lessons for the remainder of the semester, and the fee is prorated accordingly.

Credit 1 unit.

L27 Music 160 Piano Class

Continuation of L27 159. *Note:* If a class does not have three students enrolled at the end of the drop/add period, it will be cancelled. Pending studio space, enrolled students may then opt to take private lessons for the remainder of the semester, and the fee will be prorated accordingly. Prerequisite: L27 159 or permission of instructor.

Credit 1 unit.

L27 Music 177C Voice Class: Fundamentals of Singing**Technique**

Voice Class teaches basic techniques of bel canto vocal production that apply to singing solo repertoire and singing in choral ensembles. Basic techniques include breathing in singing, resonance, articulation and registration. Study of the International Phonetic Alphabet, very basic skills for reading music and vocal health issues also are included. *Note:* If a class does not have three students enrolled at the end of the drop/add period, it will be cancelled. Pending studio space, enrolled students may then opt to take private lessons for the remainder of the semester, and the private lesson fee will be prorated accordingly.

Credit 1 unit.

L27 Music 178C Voice Class II: Fundamentals of Singing**Technique**

Voice Class teaches basic techniques of bel canto vocal production that apply to singing solo repertoire and singing in choral ensembles. Basic techniques include breathing in singing, resonance, articulation and registration. Study of the International Phonetic Alphabet in English and Italian, skills for reading music, in-depth study in musical interpretation, and acting skills. More advanced work in poetic analysis and line reading. Prerequisite: Music 177C or approval by instructor by audition. *Note:* If a class does not have three students enrolled at the end of the drop/add period, it will be cancelled. Pending studio space, enrolled students may then opt to take private lessons for the remainder of the semester, and the private lesson fee will be prorated accordingly.

Credit 1 unit.

L27 Music 221 Music Theory III

Concentrated study of the principles of tonal counterpoint and their application to the interpretation of Bach keyboard suites. Class work includes both writing and analysis. Prerequisite: Music 104E.

Credit 3 units. A&S IQ: HUM

L27 Music 2211 Opera Projects

Students may contract with a faculty supervisor for credit for work on opera productions or research. Contracts must be signed by the student and the faculty supervisor before the work can commence. Prerequisite: permission of the instructor.

Credit variable, maximum 2 units.

L27 Music 2212 Opera Projects

Students may contract with a faculty supervisor for credit for work on opera productions or research. Contracts must be signed by the student and the faculty supervisor before the work can commence. Prerequisite: permission of the instructor.

Credit variable, maximum 2 units.

L27 Music 2213 Singers Performance Workshop: Broadway and Musical Theater

This course develops performance skills for young singers in musical theatre that will help them prepare music for rehearsal, performance, and audition. The semester's work includes musical, vocal, and diction coaching as well as research and dramatic analysis. The course will culminate in the preparation and performance of both solo and ensemble pieces. Prerequisite: Audition and permission of instructor.

Credit 1 unit. A&S IQ: HUM EN: H

L27 Music 221C Classical Theory III

A synthesis of the knowledge gained in Theory I-II as it applies to the detailed analysis of 18th-, 19th-, and selected 20th-century works (Bach through Bartok). Prerequisite: Music 122C or 122J. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 222 Music Theory IV

Continuation of Music 221 with study of 18th- and 19th-century harmonic, textural and structural procedures (Bach through Brahms). Prerequisite: Music 221. Credit 3 units. A&S IQ: HUM

L27 Music 2231 Musicianship I

Basic ear training, sight singing and dictation skills. Three hours a week. Prerequisite: Music 104E. Credit 1 unit.

L27 Music 2232 Keyboard Skills III

Intermediate skills in score reading as well as the introduction of inversions, figured bass and improvising melodies. Prerequisites: Music 1242 and permission of instructor for nonmajors. One and one-half class hours a week. Credit 1 unit.

L27 Music 2241 Musicianship III

Continuation of Music 2231. Intermediate-level ear training, sight singing and dictation skills. Prerequisite: Music 2231. Two and one-half class hours a week. Credit 1 unit.

L27 Music 2242 Keyboard Skills IV

Intermediate skills in score reading as well as the introduction of inversions, figured bass and improvising melodies. Prerequisite: permission of instructor for nonmajors. Concurrent registration in Music 2231 and 2241 required of all music majors. One and one-half class hours a week. Credit 1 unit.

L27 Music 227 Selected Area for Special Study

In-depth study in areas of special interest. Prerequisite: permission of instructor. Credit 3 units.

L27 Music 228 Selected Area for Special Study

In-depth study in areas of special interest. Prerequisite: permission of instructor. Credit 3 units. A&S IQ: HUM EN: H

L27 Music 230 Composition

An intermediate course in contemporary music composition, with a 30-minute private lesson and weekly master class. Prerequisite: Music 229 or permission of instructor. Credit 2 units.

L27 Music 231C Small Chamber Ensembles

Students interested in performance of chamber music are organized into various ensembles and assigned a coach. A public chamber music concert is given once each semester. May be repeated for credit. Prerequisite: permission of the instructor. Consult course listings for more information. Credit variable, maximum 1 units.

L27 Music 232W Wind Ensemble

A group of select woodwind and brass players who form brass and woodwind choirs and smaller ensembles such as quintets and quartets. The weekly rehearsals are coached. The ensembles perform on student recitals and at various campus functions. Credit variable, maximum 1 units.

L27 Music 233 Jazz Band

Study of the literature of big band jazz. Concerts presented each semester. May be repeated for credit. Prerequisite: admission by audition. Two and one-half rehearsal hours a week. Credit variable, maximum 1 units.

L27 Music 234S Symphony Orchestra

Performance and reading of works for orchestra. May be repeated for credit. Prerequisite: admission by audition. Two and one-half class hours a week including sectionals. Credit variable, maximum 1 units.

L27 Music 235F Flute Choir

Weekly two-hour rehearsals of flute ensemble literature of many styles, Bach to bop. Developing skills of tone production, technique, intonation, sight reading and musicianship. One performance per semester required. Prerequisite: admission by audition. Special fee applicable. Credit variable, maximum 1 units.

L27 Music 236J Jazz Combo

Students are placed in small combos for regular, weekly coaching. May be repeated for credit. Prerequisite: permission of department. Credit variable, maximum 1 units.

L27 Music 237 Concert Choir

Concert Choir takes an academic and artistic approach to the study and performance of choral literature from a variety of historic and modern sources. May be repeated for credit. Please see the department's website for audition dates. Credit variable, maximum 2 units.

L27 Music 238 Chamber Choir

Study and performance of advanced repertoire for small vocal ensemble from Renaissance to the present. May be repeated for credit. Prerequisites: audition and consent of instructor. Credit variable, maximum 1 units.

L27 Music 270G Jazz Guitar

Credit variable, maximum 2 units.

L27 Music 270J Jazz Brass

Credit variable, maximum 3 units.

L27 Music 270P Jazz Piano

Credit variable, maximum 2 units.

L27 Music 270S Jazz Strings

Credit variable, maximum 2 units.

L27 Music 270V Jazz Voice

Credit variable, maximum 2 units.

L27 Music 270W Jazz Winds and Percussion

Credit variable, maximum 2 units.

L27 Music 275G Guitar

Credit variable, maximum 2 units.

L27 Music 275O Organ

Credit variable, maximum 2 units.

L27 Music 275P Piano

Credit variable, maximum 2 units.

L27 Music 275S Strings

Credit variable, maximum 2 units.

L27 Music 275V Voice

Credit variable, maximum 2 units.

L27 Music 275W Winds and Percussion

Credit variable, maximum 2 units.

L27 Music 295 Independent Study

Supervised independent study in areas in which there are no current course offerings. Student must submit to the department chair an outline of the work to be covered, the number of credit hours requested for the work, and the name of the instructor who will be asked to supervise the work. Class hours variable, depending on credit.

Credit variable, maximum 3 units.

L27 Music 296 Independent Study

Supervised independent study in areas in which there are no current course offerings. Student must submit to the department chair an outline of the work to be covered, the number of credit hours requested for the work, and the name of the instructor who will be asked to supervise the work. Class hours variable, depending on credit.

Credit variable, maximum 3 units.

L27 Music 298 Directed Internship

Students receive credit for a faculty-directed and approved internship, usually with a music professional or musical organization. The primary objective of the internship is to obtain professional experience outside of the classroom. Students obtain a Learning Agreement from the Career Center and have it signed by the Career Center, the faculty sponsor, and the site supervisor, if appropriate. A final written project is to be agreed upon before work begins, and this will be evaluated by

the faculty sponsor at the end of the internship. Credit should correspond to actual time spent in work activities (e.g., 8 to 10 hours per week for 13 or 14 weeks to receive 3 units of credit, or 1 or 2 credits for fewer hours worked). Refer to current semester listings for faculty selections in this course.

Credit variable, maximum 3 units.

L27 Music 299 Performance Project

Students may contract with a faculty supervisor for credit for work on musical performance projects or research on musical performance. Contracts must be signed by the student, the faculty supervisor and the department chair before the student's work on the project commences. Consult department for faculty selections in this course.

Credit variable, maximum 3 units.

L27 Music 3011 Music History I: Music in Europe from the Earliest Notation to 1700

This course presents a study of music history and literature from the Middle Ages to 1700. Composers treated include Machaut, Dufay, Josquin, Palestrina, Monteverdi, Vivaldi, Handel, and Bach. Prerequisite: Music 121 or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 3012 Music History II: The Invention of Classical Music, 1700-1850

This course is a historical and critical exploration of "classical music." During our focus period -- the long 18th and 19th centuries -- musicians and audiences invented what we now know as the culture of classical music, creating some of its canonic musical works and developing its core institutions and belief systems. In this course, we will work inside and beyond the score. We will engage in intensive listening and analysis, from songs to symphonies. We will also consider broader cultural issues, particularly the following: How did the culture of classical music reflect the social ambitions of privileged musicians and listeners? What and who got marginalized within this culture, and how can we discover more inclusive, diverse histories of classical music? Prerequisite: Music 3011 or Music 104E.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 3014 Ethnomusicology

This course provides an introduction to the field of ethnomusicology, defined broadly as "the study of music in- or as-culture" or "the study of people making music." We will explore the varied ethnographic, anthropological, historical, and music-analytical approaches that ethnomusicologists have employed to explain the vital role of music-making in diverse human societies. We will seek to understand the social significance of a variety of musical practices, drawing on ethnomusicological scholarship to address music's performance, circulation, and reception. Case studies from around the world will demonstrate the multiple ways that sound shapes-and is shaped by-issues of cultural practice and representation, ideologies of authenticity, intersectional identities, cultural memory, ideas and structures of tradition, colonialism and post-colonialism, transnationalism and globalization. Our case studies will introduce students to a number of important musical genres and traditions, including (in the order in which they appear in the class): Mbira (Zimbabwe), Andean Kena music (Peru), Jazz

(U.S.), Samba (Brazil), Gamelan (Java), Funk (U.S.), Egyptian musics, Ottoman-Turkish classical music, Karnatic Music (South India), Gisaeng music (Korea), Ngoma (South Africa), Agbekor (Ghana), Hip Hop (U.S.), and Noise (Japan).

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L27 Music 3015 American Popular Music and Media

This course considers the history of American popular music as delivered by successive mass media platforms in the industrial and post-industrial eras: from mass-produced sheet music in the mid nineteenth century to digital music and video on the internet. Historical contextualization and in depth analysis of musical scores and various kinds of audio recordings and audiovisual texts will be at the center of the course. Topics to be considered include: the history of sound recording technologies and formats; the role of electronic mass media structures (radio, film, television, the internet); urbanization, national commercial music centers (New York, Hollywood, Nashville), and the importance of regional sounds in a national context; the formation and transformation of select genres (rock, country, various black musics); legal frameworks relating to music as a commodity (copyright, sampling); the impact of visual media on music dissemination, performance, and meanings; and how recorded media of all kinds have transformed the act of listening. Issues of race, gender, sexuality, personal, and national identity will be considered across the course.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 3017 Music History III: Classical Music in Flux, 1850 to the Present

This course is a study of music history and literature from 1850 to the present. Composers treated include Mahler, Debussy, Stravinsky, Schoenberg, Bartok, Copland, Shostakovich, Cage, Reich, and Gubaidulina. Prerequisite: L27 3012 or L27 122C.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 3020 Music of the Caribbean

Wanna get away? This and other tourism slogans depend on a popular conception of regions such as the Caribbean as distant and desirable, simple places out of sync with the modern world. This course critiques constructions of the Caribbean through engaging ethnomusicological literature representing the diversity of the region. It is a topical appraisal of Caribbean music, emphasizing history and memory, tourism, and cultural influence. The chosen readings are not meant to represent the entire region; rather, they are intended to prompt ideas and questions about regional discourses.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 3021 Music of the African Diaspora

This course explores musical cross-fertilization between the African continent and South America, the Caribbean and Europe. Beginning with traditional musics from selected regions of the African continent, the course examines the cultural and musical implications of transnational musical flows on peoples of the African diaspora and their multicultural audiences.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L27 Music 3022 Native American Musical Traditions of the Western United States

Exploration of music and its historical and contemporary contexts among Native American cultures of the Southwest and the Northern Plains, chiefly Navajo and Lakota, but with some considerations of Pueblo, Shoshone and other nations. Examinations of intertribal pow-wow movements, crossover musics, European appropriation and refashioning of Native American culture in Hollywood and elsewhere.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM

L27 Music 3023 Jazz in American Culture

This course will address the role of jazz within the context of twentieth-century African American and American cultural history, with particular emphasis on the ways in which jazz has shaped, and has been shaped by, ideas about race, gender, economics, and politics. We will make use of recordings and primary sources from the 1910s to the present in order to address the relationship between jazz performances and critical and historical thinking about jazz. This course is not a survey, and students should already be familiar with basic jazz history.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 3024 From Cage to Glass and Beyond

Explores the various directions composers took in the second half of the 20th century, including "chance" music of John Cage, minimalism of Philip Glass and postmodernism. Includes concert attendance. Prerequisite: Ability to read music is advisable but not required.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 3025 Women of Music

Popular music and art music around the world, from the perspective of women. The roles of women as creators, performers, sponsors and consumers. The representation of women in music and how it relates to cultures of the past and present.

Credit 3 units. A&S IQ: HUM, SD EN: H

L27 Music 3027 Close Harmony: A Cappella Musical Traditions

An examination of ensemble music for unaccompanied voices. Although it focuses on the Western art tradition (e.g., Renaissance sacred and secular polyphony), it also addresses genres of "world music" (Yankton Sioux choral peyote songs, Makwayera singing of Zimbabwe) and less "high style," more popular unaccompanied vocal textures (e.g., shape-note, barbershop, spirituals, the Comedian Harmonists, male gospel quartets, doowop). Study of the historical and cultural contexts of the various musical types balances examination of representative musical works. Prerequisite: the ability to read music, permission of instructor; Music 103 is highly recommended, but not required.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 3028 Music of the 1960s

The music of the 1960s played a significant and widely noted role in an era of global political and social upheaval. This course surveys a broad range of music produced during the decade, spanning the world but with emphasis on Anglo-American

popular music. While a music course traditionally deals with a single genre such as "world music," classical or jazz, this course analyzes several genres together to show how each influenced the others and how all were informed by broader social and cultural concerns. The course thus both familiarizes students with diverse musical traditions and introduces them to a new way of thinking about music and culture. Topics discussed include the transnational music industry; the contested concept of "folk" and "traditional" music; music and political protest; music and migration; and music's relation to ethnic and class identity. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 3029 Game of Thrones, Game of Tones: Medieval Music in the Age of HBO

Credit 3 units. A&S IQ: HUM, LCD BU: HUM EN: H

L27 Music 3030 Love Songs and Laptops: Rediscovering Medieval Music in the Digital Age

Using our laptops as portals into the past, students will gain first-hand experience as historical detectives. In this course, we will explore the world of medieval love — from the chivalrous and courtly to the bodily and obscene — as represented in books of songs from the 15th century. Scrumptiously decorated and preserved, five interrelated songbooks from central France, known as the "Loire Valley Chansonniers" contain the majority of love songs from this period. Working from digitized versions of the songbooks, online editions, and modern audio recordings, we will address the following questions: What do the songbooks tell us about the culture in which they were created? How do the graphic decorations that frame each song interact with its music and lyrics? Lastly, by contextualizing these digital sources with respect to the growing interest in the interface between the humanities and digital technology, we will discuss what we can gain from these developments and what — if anything — we stand to lose. (Ability to read music not required.)

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 3031 Music and Healing

In this course, we broadly consider issues of music and healing, drawing from the fields of medical ethnomusicology, medical anthropology, music therapy, and psychology. Our case studies are multi-sited, as we interrogate musical healings and healing music from diverse global and historical perspectives. We approach our study of musical practices with the understanding that the social, cultural and political contexts where "music" and "healing" are themselves created inform the sounds of the music and its various — and often conflicting — interpretations and meanings. We read a variety of academic literature and use media texts and listening examples to develop interdisciplinary and cross-cultural analyses of music and healing. Issues of national consciousness, postcolonialism, gender, sexuality, race, ethnicity, class, religion, dis/ability and the role of history/memory remain central to our explorations of music and healing.

Credit 3 units. A&S IQ: LCD BU: BA EN: H

L27 Music 3032 The Science of Singing

This course presents an introductory look at the physiology and acoustics of singing. Topics we will study include how the voice works in general and the different ways individual singers use their voices; how understanding this science can improve one's singing; how to maintain vocal health; how the voice changes across the life span; and psychological aspects of performing. The ability to read music is not required for this course.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L27 Music 3033 Music, Sound, and the Body

How do musicians use their bodies when creating music? How do audiences, listeners, and dancers feel music in their bodies and contribute to making sound? This course explores embodied perspectives on making, sensing, and moving to music and sound. Examining theories of the body and the senses as they relate to sound practices, the course draws on scholarship from ethnomusicology, anthropology, sound, dance and performance studies, music cognition and other fields. Case studies include EDM, reggae, and salsa dance; Afro-Brazilian and Buddhist religious practices; and music healing and therapy. Because centering the body means considering lived experience along intersecting axes of difference, course readings and discussions will focus on issues of race, ethnicity, gender, sexuality, and (dis)ability. Students will develop their own ethnographic project, and they will be asked to participate in music-movement workshops throughout the course. However, neither previous dance experience nor normative bodily ability are required.

L27 Music 305 Selected Area for Special Study

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 3050 Music and Masculinity in the Movies of Martin Scorsese

This course considers the work of American filmmaker Martin Scorsese, with close attention to (1) how Scorsese uses music (and sound) to construct intense cinematic worlds and (2) how his film characters and plots represent various sorts of white American men. The consistent collision between Scorsese's interest in music as a driver of film style and content and his penchant for male-centered, frequently violent narratives makes him an ideal central figure for our study of white American masculinities at the movies over the last five decades. Films to be studied include "Mean Streets," "Taxi Driver," "Raging Bull," "Goodfellas," "Cape Fear," "The Departed," "Shutter Island," and "The Wolf of Wall Street." Required screenings.

Same as L53 Film 305

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 3051 Text and Music

How do composers respond to the structure and meaning of text? Can spoken language become musical sound? Can musical sounds become textual signifiers? The course explores these questions by examining a broad range of texted music: Gregorian chant, Japanese Noh drama, English madrigals, Bach cantatas, 19th-century German lieder, operas by Mozart and Wagner, American musical theater, high modernist works by Schoenberg, Stockhausen, Berio and Lansky, as well as popular music. Some knowledge of music theory is required, and

familiarity with German is helpful, though all texts are provided with English translations. A lot of listening and reading, several short and analytical assignments, three essays. Prerequisite: one year of music theory or permission of instructor.

Credit 3 units.

L27 Music 3091 Jazz Improvisation I

An introduction to improvising music in the jazz tradition, including diatonic and chromatic harmony, extended chords, modes, and jazz scales. Exercises in basic aspects of the blues and in the styles of bebop and modern jazz. Prerequisite: Music 121J or permission of instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 3112 Choral Music Before 1800

A study of choral music of the Western world, from the medieval period through the 18th century, examining both the repertoire itself and the evolution of the chorus. Topics include the development of various choral forms, the role of choral music in sacred and secular settings, the changing nature of choirs over the centuries, and the hallmarks of choral style and performance practice in the Medieval, Renaissance, Baroque and Classical periods. Choral music for small and large forces, both for voices alone and with accompaniment, are surveyed. Works from each period are examined from textual, analytical and cultural perspectives. Composers studied include Palestrina, Monteverdi, Handel, J. S. Bach, Mozart and Haydn, as well as lesser-known contemporaries. Prerequisite: Ability to read music is helpful, but not required.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 3113 Choral Music from Beethoven to the Present

A study of choral music of the Western world from the time of Beethoven to the present, examining both the repertoire itself and the evolution of the choral instrument. Topics include the development of various choral forms, the role of choral music in sacred and secular settings, the changing nature of choirs over the centuries, and the hallmarks of choral style and performance practice in the late Classical, Romantic, and Contemporary periods. Choral music for small and large forces, both for voices alone and with accompaniment, are surveyed. Works from each period are examined from textual, analytical and cultural perspectives. Composers studied include masters such as Beethoven, Schubert, Brahms, Britten, Stravinsky, as well as well-established present-day composers such as Lauridsen, Larsen and Whitacre. Prerequisites: Ability to read music is helpful, but not required.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 3132 Romantic Revolutions in European Music and Culture

The early 19th century in Europe witnessed sweeping changes in social, political and cultural life, but some of the most fascinating happened in music. This course considers intersections between Romantic thinking about music — which inspired an idealistic vision of the art form as a source of quasi-spiritual experience — and other contemporary "revolutions." To what extent was Romantic music a "holy art" that offered a refuge from the world? In what ways was it a worldly participant in larger currents in society and culture? By exploring these questions and more, students develop the skills and framework needed to incorporate works of music into their investigation of enduring issues in history and the humanities. Although this course requires listening and viewing of musical works, it

is designed for students with intellectual curiosity but without prior musical background. We also require weekly readings, occasional presentations, three short papers and spirited class discussion.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 313E Introduction to Comparative Arts

Intro to Comparative Arts is an interdisciplinary, multimedia course that explores the relationship among the arts in a given period. In their written work, students will venture beyond the course material, alternately assuming the roles of artist, critic, and consumer. Students will attend (virtual and/or in-person) performances and exhibits. Ability to read music is not required. Same as L16 Comp Lit 313E

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 315 Selected Areas for Special Study I

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 317 Selected Area for Special Study

In-depth study in areas of special interest.

Credit 3 units.

L27 Music 320 The American Musical Film

Film musicals were crucial to the success of the American film industry from the dawn of sound film in the late 1920s to the demise of the studio system in the late 1950s. This course examines the American film musical from a variety of aesthetic, critical and historical perspectives, with particular attention to how the genre interacted with popular music and dance and the major political and social trends of the Thirties, Forties and Fifties. Required screenings.

Same as L53 Film 359

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 321T Music Theory IV: Topics in Music Theory

Credit 3 units. BU: HUM

L27 Music 3221 Music Cognition

An introduction to modern research on music perception and cognition. The course covers four main topics: the perception of key, the psychoacoustics of dissonance, the relationship between attention and musical meter, and the process by which melodies establish, fulfill, and deny expectations. Students read and discuss research from both cognitive science and music theory, in addition to completing several projects.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: HUM

L27 Music 3223 Computational Models of Music Theory and Cognition

We will study computational models that simulate the perception of several aspects of music: phase structure, meter, melody, key, harmony, counterpoint, and texture. In addition to reading about and discussing these models, students will work with them directly by running them on their own. We will also spend some class time on perceptual experiments related to the models we study. Although the course will focus on models of perception, emphasis will be placed on ones that are also pertinent to music theory, and these connections will be discussed.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN:
H

L27 Music 3231 Advanced Musicianship

Individualized instruction in advanced ear training, sight singing and dictation skills. Prerequisite: Music 2241.

Credit 3 units. BU: HUM

L27 Music 3232 Keyboard Skills V

Advanced skills in score reading, figured bass and improvisation, as well as drills, including seventh chords and modulation.

Prerequisite: Music 2242. One and one-half class hours a week.
Credit 1 unit.

L27 Music 3235 Compositional Craft in Film Scores and Musical Theatre

This course examines compositional techniques and aesthetics in two forms of popular music: film/television scores and musical theatre. Popular songs and other musical works associated with film, television, and musicals are analyzed from multiple perspectives, giving students insight into the sonic, visual, and dramatic techniques employed by major composers. Students engage with the material in rigorous yet practical ways, from analytical projects to deep-listening exercises. This approach emphasizes sonic experience and situated musicianship as the primary means of accessing complex concepts from music theory.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 3236 Music Arranging for the Multi-Genre Artist

This course examines the practice of music arranging for numerous applications, including ensembles in jazz, rock, pop, a cappella, classical music, new music, and new media. Students analyze musical scores for small and large groups and compose arrangements in a variety of genres. Also learned are instrumentation, vocal ranges, basic orchestration, idiomatic instrumental techniques, chord voicings, and textures, all in the context of specific styles and genres. Overall, the course provides an introduction to industry-standard techniques of music arranging.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN:
H

L27 Music 3237 The Art of Popular Song: From Folk and Musical Theatre to Rock and Contemporary A Capella

This course explores the art of songwriting through the lens of American popular music. Students examine landmark songs from multiple eras and create their own original songs in a variety of styles from the precursors of American music to folk, rock, pop, rhythm and blues, Broadway, and a cappella. The course materials include applied popular music theory while examining the musical languages of each genre. Through composing and arranging, listening and analysis, students gain insight into the sonic structure and cultural significance of popular music. The course also responds to students' individual interests and performance backgrounds, offering opportunities to write music for vocal ensembles, singer-songwriter formats, bands and electronic media. Traditional composition and contemporary production practices are examined in detail as students learn to critically listen and find their personal musical styles.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN:
H

L27 Music 3238 Towards a New Music

Towards a New Music addresses the numerous possibilities for emerging music, including future musics in a reimagined world of the nature of music itself. In our study, music is situated as part of a web of metapatterns that explain the structure and nature of musical materials, the actions in composition and improvisation, and musical phenomena. Students are placed on a listener's journey of discovery to find the nature of music through philosophy, cognitive science, mathematics, biology, architecture and the structure of sound itself. Music theory topics both simple and advanced are discussed in ways appropriate for the novice as well as the advanced student. The course functions as a music theory and music literature study through the lens of the humanities. The course embraces both culture and nature, seeking out the grand-scale patterns that help explain the qualities of our musical endeavor. The course begins with the archetypal patterns of space, both structural/formal and relational, and then turns to the concepts that infuse the workings of time: a virtual sonic reality of space and time and the mind of music, revealed in thought-provoking and new contexts.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 325 Instrumentation and Orchestration

A study of the principles of instrumentation and orchestration. In-class assignments will aid in the understanding of the capabilities and limitations of the orchestral instruments. Analysis of orchestral scores will provide insight into efficient and creative use of the orchestra. Prerequisite: Music 121C or permission of the instructor.

Credit 3 units.

L27 Music 326 Orchestration

A practicum in writing for orchestra and groups of orchestral instruments. Prerequisite: Music 325.

Credit 3 units.

L27 Music 3271 Analysis and Performance

This course develops music-analysis skills useful to performers, focusing on topics such as form, phrase structure, texture, orchestration, style identification as a stage, and ear training. Students will analyze pieces they are working on in lessons and ensembles and periodically perform these pieces in class. Prerequisite: Music 122C or 122J, as well as concurrent enrollment in lessons or an ensemble.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 328 History of the Film Score

This course looks at the role of music in Hollywood films from the beginning of the sound era to the present. Larger themes include the importance of technology, industry structures shaping the nature of scores, notable film music composers, the relationship between music, gender and genre, music's role in the adaptation of literary texts to film, the power of directors to shape the content of film scores, and the importance of popular music as a driving economic and aesthetic force in film music history. Films screened include *From Here to Eternity*, *Stagecoach*, *High Noon*, *The Night of the Hunter*, *Butch Cassidy and the Sundance Kid*, *Born on the Fourth of July*, *Casino*, *Jarhead* and *The Social Network*. Required screenings.

Same as L53 Film 360

Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: CPSC, HUM BU: BA EN: H

L27 Music 3313 Interactivity and DSP: Laptop Music

This course is a project-based exploration of interactive "laptop music" using the Max/MSP programming environment. (Laptop not required; we have class desktops that will work, too.) It will cover the composition of interactive computer music as well as the theory and application of MIDI, synthesis, and digital signal processing. We will learn through weekly programming exercises, readings and tutorials, and engagement with scores, recordings, and software. For Midterm and Final Projects, students will design digital instruments and compose interactive pieces for the class to play as an ad hoc "laptop ensemble." Both pieces will be planned in advance and workshopped in class throughout the semester. Prerequisite: Permission of instructor. Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 334 Symphony Orchestra

This is a course for a select ensemble of about 75 players that performs a repertoire from the baroque to the modern periods in four public concerts a year. Collegiate member, American Symphony Orchestra League. May be repeated for credit. Prerequisite: Admission by audition. Four rehearsal hours a week.

Credit 1 unit.

L27 Music 339 Introduction to Conducting I

Fundamentals of conducting, including the study of transposing instruments and practice in score reading. Prerequisite: permission of instructor.

Credit 2 units.

L27 Music 340 Introduction to Conducting II

Fundamentals of conducting, including the study of transposing instruments and practice in score reading. Prerequisite: permission of instructor.

Credit 2 units.

L27 Music 3431 West African Music and Dance in Context

A West African dance course specifically focused on the Ivorian dance traditions of the Baule, Bete Dan, Lobi, Makinke, and Senufo peoples. The course addresses the relationship between music and dance as well as their social and cultural significance. Study of myths, art, costumes and masks as they relate to various dances and music is also included. A studio course with related reading material.

Same as L29 Dance 343

Credit 2 units. A&S IQ: HUM Arch: HUM Art: CPSC, HUM EN: H

L27 Music 3581 Musica Ebraica: Jewish Identities in Western Music from 1600 to the 21st Century

The course explores Western music from the 17th century to the 21st century through the prism of musical works that were written by Jews and for Jews and of musical compositions reflecting their composers' identifying themselves as Jews. Jewish art music from these periods will be examined against the background of musical development in general, the social, political, and religious context of the composers, and written reflections about Jewish music. Examples of Jewish art music will be analyzed through different approaches in order to determine the cultural interrelationships between Jews and non-Jews, Jewish cultural autonomy, and the perception of Jewishness in music.

Same as L75 JIMES 3581

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L27 Music 3582 Music in Jewish Culture and Society

The common term "Jewish Music" raises numerous questions that emanate from the difficulty to define "Jewish" identity of any given music. This course deals with various approaches to the definition of Jewish music, perceived as a cultural and sociological component in the Jewish communities throughout the diaspora. We survey the functions in which music is performed in traditional Jewish communities, especially Jewish liturgy, and the substantial vicissitudes in these musics after the European Enlightenment, European colonialism in north-Africa, and in the Mediterranean. We study the background and the different characteristics of selected Jewish communities — Ashkenazic, Sephardic, Italian, Yemenite, and others — as well as instrumental music, questions of gender, and the relationship between music and text. A secondary goal of this course is the study of the bibliography and discography of Jewish musics.

Same as L75 JIMES 3582

Credit 3 units. A&S IQ: HUM, LCD EN: H

L27 Music 3583 The Soundtrack of Israeli History

This course explores connections between Israeli history, nationality and culture, and between Israeli art music. Such an encounter between reveals the reflection of, and responses to, local social developments in various historic and constitutive moments in Israeli history such as: the fifth Aliya (wave of immigration) in the 1930s, the statehood years, the waning of nationalistic sentiments in the late 1950s, the aftermath of Israeli wars, the negotiation between Israeli and Jewish identities, and even artistic expressions of postmodernity within the Israeli context. These histories are surveyed through historical studies as well as through their musics and against the background of developments in 20th-century music.

Same as L75 JIMES 3583

Credit 3 units. A&S IQ: HUM, LCD EN: H

L27 Music 3585 Islam, Music, Muslim Media

How do Muslim individuals and communities understand and negotiate the relationship between sound and spirituality? How does Islamic philosophy challenge Western definitions of music? How do music and cultural practices reflect and shape diverse Muslim identities and political struggles? To what extent can we speak of an "Islamic world," musical or otherwise? In this course, we investigate Islamic musics and musical practices in the lives and experiences of Muslims throughout the world. We approach our study of Muslim musical practices with the understanding that the social, cultural and political contexts where music is created, disseminated and consumed inform the sounds of the music and its various — and often conflicting — interpretations and meanings. We engage with a variety of academic, musical and media texts to develop interdisciplinary analyses about Islam, music, sound experience and Muslim subjectivities. Issues of nationalism and transnationalism, class, race and ethnicity, gender and sexualities, colonialism and postcolonialism, history and memory remain central to our exploration of spirituality and religion in Muslim musical and cultural practices.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L27 Music 3586 Combat Movie Music and Sound After Vietnam

This course considers the Hollywood combat movie genre after the Vietnam War (post 1975) by listening closely to how these always noisy films use music and sound effects to tell stories of American manhood and militarism. Centering on an elite group of prestige films — action movies with a message for adult audiences — the course examines thirty-five years of Hollywood representations of World War II, the Vietnam War, the Gulf War, and post-9/11 wars against terrorism. Close analysis of how combat film directors and composers have used music and sound in conjunction with the cinematic image are set within a larger context of ancillary texts (source materials, soundtrack recordings, published and unpublished scripts), media folios (press kits, reviews, editorials, newspaper and magazine stories and interviews), and scholarly writing from across the disciplines. Films screened include *Apocalypse Now*, *Platoon*, *Hamburger Hill*, *Courage Under Fire*, *Saving Private Ryan*, *The Thin Red Line*, *We Were Soldiers*, *Flags of our Fathers*, *The Hurt Locker*, and *Act of Valor*, as well as pre-1975 combat films starring John Wayne. The ability to read music is not required. Required screenings. Prerequisites: none.

L27 Music 3951 Independent Study

Supervised independent study in areas in which there are no current course offerings. Student must submit to the department chair an outline of the work to be covered, the number of credit hours requested for the work, and the name of the instructor who will be asked to supervise the work. Class hours variable, depending on credit. Consult department for faculty selections in this course.

Credit variable, maximum 3 units.

L27 Music 3961 Independent Study

Supervised independent study in areas in which there are no current course offerings. Student must submit to the department chair an outline of the work to be covered, the number of credit hours requested for the work, and the name of the instructor who will be asked to supervise the work. Class hours variable, depending on credit. Consult department for faculty selection.

Credit variable, maximum 3 units.

L27 Music 400 Independent Study

Credit 3 units.

L27 Music 401 Elementary Technique of Electronic Music: Synth Lab

Individual and small group instruction in "classical" procedures and relevant electronic technology. Prerequisite: open to music majors; to others by permission of instructor. Credit contingent upon completion of Music 402.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 402 Advanced Techniques in Electronic Music: Studio Songwriting

How does the act of recording and manipulating sound change the way we write songs? How can the tones and moods of a recording interact with notes and rhythms and words? We will look for answers through experiments in composition, collaboration, and critical listening. Topics will include

beatmaking, sound collage, vocal manipulations, sampling, and virtual spaces. Formal training is not required, although we will engage (and learn) basic music theory concepts. Prerequisite: Permission of instructor.

Credit 3 units. EN: H

L27 Music 4052 Music, Sound, and the Body

This course examines theories of the body, embodiment, and the senses as they relate to music and sound practices. Readings draw on scholarship from ethnomusicology, anthropology and geography of the senses, sound studies, dance studies, performance studies, and music cognition. If ethnomusicology is "the study of people making music," this course explores how people make and experience music and sound with their bodies, through the full range of their senses. We will consider questions surrounding the ways in which musicians, audiences, listeners, and dancers perceive and experience music in their bodies and contribute to the making of sound. By centering the body, we will necessarily consider lived experience along intersecting axes of difference such as race, ethnicity, gender, sexuality, and (dis)ability. Course readings and discussions will therefore focus on the social and political affordances and limitations of body-based practices and their theorization. Case studies will include a broad range of sound-movement practices, from electronic dance music and black social dance to Sufi and Buddhist religious practices, queer taiko drumming, and deaf music-making. Over the course of the semester, students will develop their own project exploring course themes, and they will be asked to participate in music-movement workshops throughout the course. This is an upper-level/graduate-level course, so some knowledge of music and/or dance concepts is assumed, but neither previous music/dance experience nor normative bodily ability are required.

Credit 3 units. A&S IQ: HUM, LCD, SC BU: HUM EN: H

L27 Music 411 Music of the Medieval Period

An intensive survey of Western monophonic and polyphonic music from the beginnings of Christian chant to ca. 1450.

Prerequisites: Music 3011 or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 412 Music of the Renaissance Period

A survey of music literature from ca. 1450 to ca. 1600.

Prerequisite: Music 3011 or permission of instructor.

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 413 Music in the Baroque Era

An intensive survey of the primary musical forms and styles in 17th-century Italy, France, Germany and England. Prerequisite: Music 3012 or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 4131 Music in the 18th Century

Musical activity in Europe during the 18th century is the subject of this course, which brings the high baroque, galant and classical eras into a single narrative. Patronage, publishing, star performers and highly specific musical publics were central to the music-making across the century. How these forces shaped the professional and creative lives of major 18th-century composers is a principal theme of the course. A broad range of 18th-century instrumental and vocal music is surveyed, including works by Corelli, F. Couperin, Vivaldi, Rameau, Telemann, Handel, Hasse, Haydn, Mozart, D. Scarlatti

and several members of the Bach family. Extensive listening assignments and score analysis are supplemented by readings drawn from recent scholarship and examination of 18th-century music publishing and other period sources in facsimile.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 414 Music of the Classic Period

An intensive survey of music literature from ca. 1750 to ca. 1830 with attention to the music of Haydn, Mozart, Beethoven and some of their predecessors. Prerequisite: Music 3012 or permission of instructor.

Credit 3 units.

L27 Music 415 Music in the Romantic Era: Aesthetics and Ideologies

This course explores pivotal developments in 19th-century thinking about music's cultural and aesthetic significance -- developments that reverberate well beyond that historical period. Rather than surveying repertoire, we will emphasize in-depth exploration of selected issues and music, reading important contemporary writings and grappling with challenging musical works. Our topics will include discourses about musical interiority, the post-Beethovenian symphony, the Lied tradition, performance aesthetics and the creative agency of the performer, intersections of music and literature, and canon formation and its consequences. Our topics will include, to cite but a few examples, discourses about musical interiority, the post-Beethovenian symphony, the Lied tradition, performance aesthetics and the creative agency of the performer, intersections of music and literature, and canon formation and its consequences.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L27 Music 416 Contemporary Music

Survey of musical styles from the end of the 19th century to the Postmodernism of the 1980s. Developments in music considered in context of intellectual history of the century with specific attention to parallels with literature and visual arts. Readings from a variety of sources and extensive listening assignments. Prerequisite: Music 3013 or permission of instructor.

Credit 3 units. A&S IQ: HUM

L27 Music 4161 Divas, Monsters, Material Girls: Women in Music Videos

The stark black and white of Madonna's "Vogue" and the pinks and sparkles of "Material Girl." The lavish cinematic spectacle of Lady Gaga's "Telephone" and the thinkpiece-launching intertextuality of Ariana Grande's "thank u next." The explosive surprise releases of Beyoncé's "BEYONCÉ" and "Lemonade" visual albums. Since MTV's advent in 1981, hit music videos have made a number of pop songs inextricable from the iconic imagery of their videos; ubiquitous digital devices and the rise of YouTube have only increased pop music's audiovisuality. Looking at and listening to female pop icons raises fraught questions of agency, representation, race, sexuality/sexualization, bodies, commodification, and capital. In this course, students will gain a vocabulary for talking about both the audio and visual parameters of music videos, and they will use this vocabulary to engage with critical frameworks for examining meaning, circulation, and reception in contemporary music videos. Assignments across the course will allow students to experiment with a range of writing and media genres, from critical close readings, micro-reception histories, mock (or real) thinkpieces, podcast episodes, and video essays.

L27 Music 4221 Introduction to the Analysis of 20th-Century Music

An introduction to theory and analysis of music from the 20th-century repertoire. In-class analysis and individual assignments emphasize aural understanding and tools for modeling pitch structures in post-tonal and 12-tone works. In the latter portion of the course focus turns toward works in which pitch structures play a smaller role. Prerequisite: Music 222 (for undergraduates) or Music 423 (for graduates).

Credit 3 units. A&S IQ: HUM

L27 Music 423 Analysis I

A study of structural principles underlying music of all periods: motivic usage, melodic shape, varieties of texture and structure with an emphasis on fugue, variation forms and proportional forms such as rondo and sonata-allegro. Prerequisite: graduate standing or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 4232 Graduate Keyboard Skills

Graduate Keyboard Skills prepares students to take the Keyboard Skills exam.

L27 Music 424 Analysis II

Continuation of Mus 423, concentrating on approaches to larger and more complex works of classically tonal music, including 18th-century symphonies and string quartets, late works by Beethoven, chamber music and symphonies of Brahms and symphonies of Mahler. Prerequisite: Mus 423 or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L27 Music 425 Counterpoint I

Concentrated independent study in 16th-century contrapuntal composition. Prerequisite: Music 222.

Credit 3 units.

L27 Music 426 Counterpoint II

Concentrated independent study in 18th-century contrapuntal composition. Prerequisite: Music 222.

Credit 3 units.

L27 Music 427 Selected Areas for Special Study

In-depth study in areas of special interest. Prerequisite: senior standing, graduate standing or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 428 The Solo Song of Brahms

In-depth study in areas of special interest. Prerequisite: senior standing, graduate standing or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 4281 The Italian Madrigal

The most important musical genre of the late Renaissance, the madrigal, intersects with poetry, theater and the visual arts, and thus, constitutes an ideal point of entry to early modern Italy. This course explores the stylistic development of the madrigal

from its origins in the early 16th century to its demise some hundred years later. The course is structured around close readings of madrigals by Verdelot, Arcadelt, Willaert, Rore, Wert, Marenzio, Luzzaschi, Fontanelli, Gesualdo and Monteverdi. Secondary readings focus on the relation between words and music; the construction of subjectivity; concepts of mode; theories of chromaticism; and performance practice, framed in the context of 16th-century society and culture. Prerequisite: Music 3011, graduate standing or permission of instructor. Credit 3 units. A&S IQ: HUM EN: H

L27 Music 4282 The "Crossover" Tradition in Anglo-American Music Theater

The musical stage in the United States and Britain has remained a vital artistic and commercial arena over the past 100 years despite the emergence of mass media formats such as film and television. Audiences continue to clamor for stage stories where actors sing or singers act, and composers, writers, producers and directors have created a stunning variety of musical theater styles to meet the demand. This course surveys important English-language operas, operettas and singer-centered musicals from the turn of the 20th century to the start of the 21st with an emphasis on "crossover" works that blur the lines between opera and the commercial musical stage. All the works included in the course continue to be performed today, forming a core repertoire of music theater works in English that emphasize singers and singing. The overlapping, ever-changing spheres of the opera house and Broadway and West End theaters provide the geography of the course, which is peopled by performers, creators and audiences. In-class analysis of 14 works focuses on how the singing voice has been used as an expressive vehicle and how theater singers have adapted to an age of amplification and recording. Works studied include *Carousel*, *Sweeney Todd*, *The Phantom of the Opera*, *Show Boat*, *Candide*, *Street Scene*, *The Pirates of Penzance*, *The Light in the Piazza*, *My Fair Lady*, *Albert Herring*, *Porgy and Bess*, *The Most Happy Fella*, *Margaret Garner* and *The Student Prince*. In-class singing is encouraged as a means to get inside the musical and dramatic values of these works. Prerequisites: ability to read music, and graduate or upper-division standing.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 429 Composition

Concentrated independent work in composition and a weekly master class for experienced composers. Prerequisite: Music 330 or permission of instructor.

Credit variable, maximum 3 units.

L27 Music 430 Composition

Concentrated independent work in composition and a weekly master class for experienced composers. Prerequisite: Music 429 or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 4311 Black Experimental Music

Founded on the South Side of Chicago in 1965, the Association for the Advancement of Creative Musicians (AACM) united dozens of African American artists who were interested in experimental approaches to composition and improvisation. Their creative work, often described as black experimental music, would transform black-identified musical styles like jazz as well as white-identified styles of experimental concert music from which African Americans were often excluded-until the AACM intervened. In this course, we will investigate the

Association's history by reading and discussing a wide range of texts about the organization, including books and articles written by AACM members themselves. We will also examine a number of important recordings and musical scores created by AACM artists, including Muhal Richard Abrams, Fred Anderson, Anthony Braxton, Joseph Jarman, George Lewis, Nicole Mitchell, Roscoe Mitchell, and Wadada Leo Smith.

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: HUM EN: H

L27 Music 4370 Music and Performance

In his 1998 book, *Musicking*, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography, and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater, and rock. We examine artists whose work blurs the line between "music" and "theater," including George Clinton, Taylor Mac, and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome.

Same as L98 AMCS 4370

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L27 Music 439 Diction I

Principles of Italian, French, and German pronunciation covered in an interrelated approach; application of these principles to songs. Prerequisite: permission of instructor.

Credit 3 units. A&S IQ: HUM

L27 Music 4530 Presence in Performance: Alexander Technique and Mindful Movement for Performing Artists

This course provides group and individual instruction in principles and methods from Alexander Technique and other somatic arts for training mindful, embodied presence in performance. Mindful movement techniques are widely used by professional dancers, actors, and musicians to enhance performance skill and to address/prevent injury and chronic pain. Through a workshop process of guided learning, students gain awareness of subtle inefficiencies in coordination and balance that cause pain and limit ability. Students gain ability to self-assess and adjust problematic movement patterns to improve freedom and expression. Alexander Technique works at fundamental levels of movement coordination, and its methods are applicable to all performing art genres. Training is tailored to each individual student's needs, skills and goals. This course involves experiential learning supported with related readings, discussion, personal research projects and presentations. Prerequisites: Graduate standing; also open to undergraduate students studying at the 400 level in their discipline with permission of instructor.

Same as L29 Dance 453

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 4539 Advanced Conducting I

Advanced training in conducting skills, including opportunities to conduct ensembles on campus. Prerequisite: graduate standing or permission of instructor.

Credit 2 units. A&S IQ: HUM

L27 Music 4540 Advanced Conducting II

Advanced training in conducting skills, including opportunities to conduct ensembles on campus. Prerequisite: graduate standing or permission of instructor.

Credit 3 units.

L27 Music 4561 Soundtrack Studies: Music, Voices, Noise

This course considers the interaction of film, sound and music from the silent era to the present by screening representative films from around the world and exploring current directions in scholarship from the disciplines of film studies and musicology. Topics include: historical and critical understandings of the sound track, major film sound theorists (such as Michel Chion), technological shifts (such as synchronized sound, Dolby and digital surround sound), the uses of Richard Wagner (both his music and his ideas), the relationship between a film genre (noir) and sound and music and the relationship between a musical genre (opera) and film, and the juxtaposition of popular and classical, Western and non-Western musical styles in art cinema. Films screened include *Meek's Cutoff*, *Blow Out*, *Days of Heaven*, *Sous le toits de Paris*, *Love Me Tonight*, *Casablanca*, *Alien*, *Apocalypse Now*, *La cérémonie*, *Le Cercle rouge*, *The Pillow Book*, *The Scent of Green Papaya*, and *The Bourne Ultimatum*. The course is in seminar format. Readings from recent scholarly work on film sound and music inform class discussions of the screened films. Close analysis of how music, sound and image interact in film making and the film experience lies at the heart of the course. The ability to read music is not required. A primary goal of the course is the development of specific listening skills that are useful when working in this area. Targeted writing assignments ask students to write about film sound and music from a variety of critical and historical perspectives. Prerequisites: graduate status or completion of Film 360 The History of the Film Score, or AMCS 360 or Music 328 and permission of the instructor. Required screenings. Same as L53 Film 456

Credit 3 units. A&S IQ: HUM EN: H

L27 Music 4571 Soundtrack Studies: Music, Voices, Noise

This course considers American popular music as represented in audiovisual media from 1926 to the present. The relationship between the popular music industry (a commercial sphere oriented primarily toward the selling of sheet music and audio recordings) and audiovisual technologies (various screens and formats encountered in changing social and commercial contexts) will be explored along two complementary tracks: popular music performers as presented in performance-centered media and popular music as a narrative topic or resource in feature films. Three related analytical frames will shape our discussions: industrial and technological history (the material conditions for the making and distribution of popular music and moving images); the question of "liveness" in recorded audiovisual media; and the aesthetics of various popular music styles as translated into audiovisual forms and contexts. The course is in seminar format. The ability to read music is not

required, but students with music reading or transcription skills will be encouraged to draw upon these tools. Prerequisite: Graduate status or completion of a 300-level FMS or Music course and permission of instructor.

Credit 3 units. EN: H

Performing Arts

Performing Arts at Washington University comprise dance (p. 897) and drama (p. 897).

Dance

Students may select dance (p. 468) as a major through the Performing Arts Department. This course of study combines intensive studio work in the technique and theory of modern dance, ballet and composition with seminars that examine dance as a global phenomenon containing forms that reflect culturally specific historical, aesthetic and ethnological features.

The program also includes a broad range of courses such as stagecraft, music resources, improvisation, anatomy for dancers, pedagogy, dance therapy, musical theater dance, world dance forms, jazz and tap. In addition, students may choose to minor in dance or in world music, dance and theater. The interdisciplinary minor in world music, dance and theater encourages students already interested in the performing arts to explore those outside of Euro-American traditions. A certificate program in somatic studies is offered through the University College division of Arts & Sciences.

The senior capstone experience is framed in consultation with Performing Arts faculty. In April, prior to registration for the fall semester, dance majors discuss the capstone requirement with their advisors. The dance capstone requirement can be satisfied by a senior honors thesis or a senior dance project. The format may range from a research paper or a written analysis of the student's dance development to a project emphasizing movement expression (e.g., the creation of a video résumé, a performance or a choreographic project). In all cases, dance capstones have a written component.

Those who study dance at Washington University learn from faculty members who have both professional experience and academic degrees. Students also have the opportunity to study with guest artists-in-residence who teach master classes and set choreography.

Students may audition for the Washington University Dance Theatre, which holds annual auditions for students. Selected students will appear in faculty- and guest artist-choreographed concerts in Edison Theatre. Dance students particularly interested in performance may audition for the student repertory company, Washington University Dance Collective (WUDC). WUDC rehearses and performs throughout the year at area venues and on campus. Students may also participate in departmental drama productions as well as student-directed work in choreography and theater. Each year, students have the opportunity to attend the regional American College Dance Conference to adjudicate work, perform, and take master classes.

Dance students may pursue study abroad at the University of Auckland, New Zealand; University of Ghana, Legon; and Roehampton University, London. With approval from the Dance program, courses at these institutions may fulfill dance major and minor requirements. Courses in other disciplines taught at these institutions may also be accepted by Washington University.

Drama

The drama (p. 479) major combines rigorous training in theater and performance studies (world theater history, performance theory, and dramatic criticism) with theater production, including courses in playwriting, acting, directing, devising, design (i.e., set, costume, lighting, and sound), and experimental digital performance.

In this program, which analyzes theater and performance as forms of cultural expression, students can take a wide variety of courses covering the history of world theater in comparative relation. Ranging from the ritual practices that emerged into the dramas of Ancient Greece to the post-dramatic explorations of habituated movements we make in everyday life, performance is studied as a corporeal practice and material embodiment of cultural meanings. By understanding performance as both an artistic practice and a sociological phenomenon, students learn to think critically about the complex ways that cultures make meanings in the forms and practices of embodied movement.

In small, individualized classes (capped at a maximum of 16 students and characterized by a high number of weekly contact hours), professionally and academically trained faculty lead students in practice and discussion, helping them make connections between the study of theater as a liberal art and the application of skills in production. In acting, the department offers four courses that cover scene and character study, acting styles, and solo performance work. A two-course directing sequence issues into a public showing of student-directed work, and some students have chosen to direct a fully designed production as their Senior Honors thesis. Recent graduates of the acting and directing sequence have been placed in prestigious MFA programs, in internships and jobs in regional American theaters, and in various professional schools and graduate programs. Our nationally recognized program in design and technical theater offers students a varied selection of costume, scene, lighting and sound design courses. A highly successful playwriting program, enriched by the annual A.E. Hotchner Playwriting Competition and workshops run by leading American dramaturgs, has produced playwrights whose work is now being performed in nationally recognized venues such as Chicago's Steppenwolf Theater, as well as film and television.

The culture of performance is abundantly rich at Washington University. A wide array of student theater ensembles and improvisation groups provides many opportunities for student-generated performance on campus.

Since 1991, the Performing Arts Department and the Globe Education Program have collaborated in the teaching of Shakespeare's plays. In either a two-semester first-year seminar or a four-week intensive summer program, students can explore the textual meanings, historical contexts, and cultural significance of Shakespeare's plays both as literature and in performance. Working with Performing Arts faculty as well as Globe personnel, students learn to bring Shakespeare's plays

to life in master classes that teach them how to voice his poetry, realize his characters, and perform stage combat. Both course options offer students a summer study abroad opportunity to visit Shakespeare's birthplace in Stratford-upon-Avon and the reconstructed Globe Theater in London, culminating in their own performance on the Globe stage.

Minors

The Minor in World Music, Dance and Theater

Required units: 17 to 19

Required courses:

Code	Title	Units
Music 1021	Musics of the World	3
Dance 331	Movement and Meaning: Dance in a Global Context	3

One to two of the following courses (3-5 units):

Code	Title	Units
AFAS 301	A History of African-American Theater	3
Chinese 467	The Chinese Theater	3
Drama 223	Cross-Cultural Women Playwrights	3
Dance 343	West African Music and Dance in Context	2
Japan 446	The Japanese Theater	3

Elective courses (8 units):

Code	Title	Units
Drama 368	Black Theater Workshop III	3
Music 3021	Music of the African Diaspora	3
Music 3022	Native American Musical Traditions of the Western United States	3
Dance 305Z	Music Resources for Dance	2
Dance 340	Ballet as Ethnic Dance and Classical Art	3
Dance 343	West African Music and Dance in Context	2

Additional electives available in University College (U31):

Code	Title	Units
Dance 235	Dance Doorway to India	2
Dance 328	Dance of West Africa: Intermediate	2
Dance 335	Bharata Natyam as Movement Narrative	1

Additional Information

This is an interdisciplinary minor that draws on the distinctive methodologies and training inherent in several disciplines. This minor encourages the student already interested in the performing arts to explore those outside Euro-American traditions. However, students majoring in fields such as anthropology, political science, psychology, education, comparative literature, history and foreign languages may find this minor a useful complement to their primary discipline.

Philosophy

Philosophy tackles central questions in human life, such as the following: *What counts as human knowledge? How should I live? What is truth? How is the mind related to the body? What is a just society?* These difficult but fundamental questions are rigorously explored in philosophy and worked through by drawing on the historical tradition and utilizing careful reasoning. Because philosophers have shaped many of the central ideas on which Western civilization is based, the study of philosophy plays a vital role in a well-rounded liberal arts education.

Philosophy courses at Washington University provide opportunities to gain deeper knowledge of the history of philosophy, from the work of the ancient philosophers Plato and Aristotle through key thinkers such as Descartes and Kant to the present. Students can study the interface between philosophy and other disciplines (e.g., psychology, environmental studies, women's studies, law, political science); they can also examine the methods of inquiry and the underlying conceptual

frameworks of scientific work itself. Courses in logic equip students to think and argue clearly and rigorously, while courses in analytic philosophy allow for the exploration of fundamental questions about knowledge and metaphysics. The department offers a variety of courses in ethics, where students can consider different theoretical approaches to current political, social, medical and environmental problems.

Majors

The Major in Philosophy

Total units required: 27; at least 6 units must be at the 400 level, and an additional 15 units must be at the 300 level or above.

Majors are encouraged to take more than this minimum number of courses, especially if they are considering graduate work in philosophy. Majors and minors are encouraged to fulfill the writing-intensive requirement by taking Phil 390 Philosophical Writing. All majors are required to complete a capstone experience in philosophy: either an honors thesis (Phil 499) or the philosophy capstone course (Phil 3991). Majors who are planning to do graduate work in philosophy should attain at least reading proficiency in German, Greek, Latin or French.

Required courses:

Majors must complete at least one core course in each of the three areas below. Students who do not take Phil 390 will be required to take one additional core course. The core courses, by area, are as follows:

Contemporary/Analytic Philosophy:

Code	Title	Units
Phil 301G	Symbolic Logic	3
Phil 306G	Philosophy of Language	3
Phil 3113	Theory of Knowledge	3
Phil 315	Philosophy of Mind	3
Phil 321G	Philosophy of Science	3
Phil 3481	Introduction to Metaphysics	3
Phil 361	Philosophy of Emotions	3

History of Philosophy:

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 357C	Kant and 19th-Century Philosophy	3
Phil 358	Conceptual Foundations of Modern Science	3

Value Theory:

Code	Title	Units
Phil 331F	Classical Ethical Theories	3
Phil 339F	Philosophy of the Arts	3
Phil 340F	Social and Political Philosophy	3
Phil 345F	Issues in Applied Ethics	3
Phil 346	Philosophy of Law	3
Phil 361	Philosophy of Emotions	3

On occasion, it may be appropriate to substitute a 400-level course in one of these areas for a 300-level core course; individual petitions for substitutions will be considered by the director of undergraduate studies. Generally, for a course to count either as "core" or as partly satisfying the requirement for 6 units at the 400 level, it must be home-based in Philosophy. At most, 3 units of credit in Phil 499 or Phil 500 can be counted toward the required 6 units of 400-level course work.

Optional tracks: The department offers the following three special tracks through the major: the philosophy research track, the law and policy track, and the philosophy of science track. For more information about these tracks, please visit the Department of Philosophy website (<https://philosophy.wustl.edu/major-and-minor-requirements/>).

Philosophy Research Track

The philosophy research track is especially recommended for students who plan to pursue graduate studies and an advanced degree in philosophy, which is a must for anyone interested in a career as a university or college philosophy teacher. It will give the student a broad background in philosophy, which is a competitive advantage when applying to graduate programs in the field.

Requirements:

- At least 36 units total
- Phil 100G Logic and Critical Analysis
- One 100-level class in addition to Phil 100G Logic and Critical Analysis, preferably Phil 120F Problems in Philosophy or Phil 125C Great Philosophers
- **In Contemporary/Analytic:**

Code	Title	Units
Phil 301G	Symbolic Logic	3
Phil 3113	Theory of Knowledge	3
or Phil 3481	Introduction to Metaphysics	
Phil 306G	Philosophy of Language	3
or Phil 315	Philosophy of Mind	
or Phil 321G	Philosophy of Science	
or Phil 361	Philosophy of Emotions	
Total Units		9

- **In History:** Any two core courses (a 400-level History course may be substituted for a second 300-level course):

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 357C	Kant and 19th-Century Philosophy	3
Phil 358	Conceptual Foundations of Modern Science	3

- **In Value Theory** (Phil 4310 or Phil 4315 can satisfy a 400-level requirement):

Code	Title	Units
Phil 331F	Classical Ethical Theories	3
Phil 4310	Metaethics	3
or Phil 4315	Normative Ethical Theory	
or Phil 361	Philosophy of Emotions	
Total Units		6

- Phil 390 Philosophical Writing or another core course
- Phil 3991 Philosophy Capstone Course or Phil 499 Study for Honors
- At least 30 units at the 300 level or above (including core courses)*
- At least 6 of those 30 units at the 400 level**
- Courses taken pass/fail **cannot** count toward the major.

Law and Policy Track

This track is especially recommended for students who intend to pursue a career in law or public policy. The track involves taking certain specific courses for the major (and possibly a few extra courses) that will provide the student with additional preparation and a competitive edge when applying to law school, postgraduate programs in public policy, and related jobs.

Requirements:

- At least 27 units total
- Phil 100G Logic and Critical Analysis or Phil 301G Symbolic Logic
- Strongly recommended: a 100-level class in addition to Phil 100G Logic and Critical Analysis
- One core course in **Contemporary/Analytic** and one core course in **History**

Contemporary/Analytic Courses:

Code	Title	Units
Phil 301G	Symbolic Logic	3
Phil 306G	Philosophy of Language	3
Phil 3113	Theory of Knowledge	3
Phil 315	Philosophy of Mind	3
Phil 321G	Philosophy of Science	3
Phil 3481	Introduction to Metaphysics	3
Phil 361	Philosophy of Emotions	3

History Courses:

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 357C	Kant and 19th-Century Philosophy	3
Phil 358	Conceptual Foundations of Modern Science	3

- Phil 340F Social and Political Philosophy and Phil 346 Philosophy of Law
- Strongly recommended: at least one other **Value Theory** course:

Code	Title	Units
Phil 340F	Social and Political Philosophy	3
Phil 346	Philosophy of Law	3
or Phil 361	Philosophy of Emotions	

- Strongly recommended: at least one 200-level course
- Phil 390 Philosophical Writing or another core course
- Phil 3991 Philosophy Capstone Course or Phil 499 Study for Honors
- At least 21 units at the 300 level or above (including core courses)*
- At least 6 of those 21 units at the 400 level**
- Courses taken pass/fail **cannot** count toward the major.

Philosophy of Science Track

The philosophy of science track is available only as a second major in combination with work in one or more of the sciences. It is intended for those students with a scientific background who have an interest in pursuing philosophical issues relating to the natural and physical sciences.

Requirements:

- At least 27 units total
- **In Contemporary/Analytic:**

Code	Title	Units
Phil 301G	Symbolic Logic	3
Phil 321G	Philosophy of Science	3
Total Units		6

- **In History:** Any one of the core courses listed below:

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 358	Conceptual Foundations of Modern Science	3

- **In Advanced Philosophy of Science:**

Code	Title	Units
Phil 4210	Topics in Advanced Philosophy of Science	3

- Any three of the supplementary courses listed below, which must include Phil 390 Philosophical Writing if the writing-intensive requirement is to be fulfilled in Philosophy
- Phil 3991 Philosophy Capstone Course or Phil 499 Study for Honors
- At least 27 units at the 300 level or above (including core courses)*
- At least 6 of those 27 units at the 400 level**
- Courses taken pass/fail **cannot** count toward the major.

Supplementary Courses:

General Philosophy Courses:

Code	Title	Units
Phil 390	Philosophical Writing	3
Phil 426	Theories of Concepts	3

Logic and Method Courses:

Code	Title	Units
Phil 403	Mathematical Logic I	3
Phil 404	Mathematical Logic II	3
Phil 405	Philosophical Logic	3
Phil 4051	Philosophy of Logic	3

Epistemology and Metaphysics Courses:

Code	Title	Units
Phil 3113	Theory of Knowledge	3
Phil 3481	Introduction to Metaphysics	3
Phil 4141	Advanced Epistemology	3
Phil 4142	Advanced Metaphysics	3
Phil 4332	Cognition and Computation	3

Life and Science Courses:

Code	Title	Units
Phil 3001	Philosophy of Medicine	3
Phil 4212	Philosophy of Neuroscience	3
Phil 423	Philosophy of Biological Science	3

Mind and Science Courses:

Code	Title	Units
Phil 315	Philosophy of Mind	3
Phil 418	Current Controversies in Cognitive Science	3
Phil 419	Philosophy of Psychology	3
Phil 4212	Philosophy of Neuroscience	3
PNP 495	PNP Seminar (with approval of topic)	3

* At least 27 units of the required upper-level courses must be completed with a minimum of a C-.

** Three of these credits (one course) must not be from Honors Thesis or Independent Study.

Additional Information

Senior Honors: Eligible majors are encouraged to work toward Senior Honors. To qualify, students must have the agreement of a faculty member to serve as thesis advisor. In addition, at the end of their junior year, they must have an overall grade-point average of at least 3.65. For important additional information regarding Senior Honors, consult our Undergraduate Honors webpage (<https://philosophy.wustl.edu/undergraduate-honors/>).

The Writing-Intensive Seminar: Majors are encouraged to fulfill their writing-intensive requirement by taking Phil 390, which is specially designated as writing intensive. It is typically taken during the junior year, and it is limited to 15 students. Significant attention is devoted to conceiving, researching, writing, revising, critiquing and presenting philosophical essays. A philosophy major who does not take a philosophy writing-intensive seminar must take a fourth core course from any of the three core areas. Priority is given to philosophy majors and minors who have not yet completed their writing-intensive requirement.

Capstone Experience: All philosophy majors are required to complete a capstone experience either by writing an honors thesis or by taking Phil 3991 Philosophy Capstone Course.

Please be aware that the capstone course is offered only in the spring semester, so students will need to plan their

class schedules accordingly if they decide not to write an honors thesis. To qualify to write an honors thesis, at the end of their junior year, students must have a GPA of at least 3.5 in the major, a GPA of at least 3.5 in advanced philosophy courses, and an overall GPA of at least 3.65. Alternatively, majors should sign up for Phil 3991 (a 3-credit course), which will draw together a variety of different philosophical areas. Only philosophy majors of senior standing may take this course; preference is given to students not pursuing honors.

Study Abroad: Students can pursue the philosophy major while studying abroad. The department has special study abroad arrangements with University College, London; King's College, London; Trinity College, Dublin (Ireland); Sussex University (U.K.); Utrecht University (the Netherlands); and the University of Auckland (New Zealand). Information about study abroad and about specific overseas programs is available from the departmental website (<https://philosophy.wustl.edu/study-abroad/>) and the study abroad advisor.

Minors

The Minor in Philosophy

Total units required: 18

Required courses:

Philosophy minors are required to complete at least 12 units at the 300 level or above, which must include at least one course in each of the following three core areas:

Contemporary/Analytic Philosophy:

Code	Title	Units
Phil 301G	Symbolic Logic	3
Phil 306G	Philosophy of Language	3
Phil 3113	Theory of Knowledge	3
Phil 315	Philosophy of Mind	3
Phil 321G	Philosophy of Science	3
Phil 3481	Introduction to Metaphysics	3
Phil 361	Philosophy of Emotions	3

History of Philosophy:

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 357C	Kant and 19th-Century Philosophy	3
Phil 358	Conceptual Foundations of Modern Science	3

Value Theory:

Code	Title	Units
Phil 331F	Classical Ethical Theories	3
Phil 339F	Philosophy of the Arts	3
Phil 340F	Social and Political Philosophy	3
Phil 345F	Issues in Applied Ethics	3
Phil 346	Philosophy of Law	3
Phil 361	Philosophy of Emotions	3

Additional Information

Minors are encouraged to take the writing-intensive course Phil 390 Philosophical Writing. A philosophy minor must receive a grade of C- or higher in each course. Many philosophy courses can also be taken as part of a minor in history, philosophy of science, or legal studies.

The Minor in Philosophy of Science

Total units required: 18

Required courses:

Code	Title	Units
Phil 301G	Symbolic Logic	3
Phil 321G	Philosophy of Science	3
Phil 4210	Topics in Advanced Philosophy of Science	3
Total Units		9

Elective courses:

At least one of the following three courses:

Code	Title	Units
Phil 347C	Ancient Philosophy	3
Phil 349C	Descartes to Hume	3
Phil 358	Conceptual Foundations of Modern Science	3

At least two courses from the following list:

Code	Title	Units
Phil 3001	Philosophy of Medicine	3
Phil 3113	Theory of Knowledge	3
Phil 315	Philosophy of Mind	3
Phil 3481	Introduction to Metaphysics	3
Phil 390	Philosophical Writing	3
Phil 403	Mathematical Logic I	3
Phil 404	Mathematical Logic II	3
Phil 405	Philosophical Logic	3
Phil 4051	Philosophy of Logic	3
Phil 4141	Advanced Epistemology	3
Phil 4142	Advanced Metaphysics	3

Phil 418	Current Controversies in Cognitive Science	3
Phil 419	Philosophy of Psychology	3
Phil 4212	Philosophy of Neuroscience	3
Phil 423	Philosophy of Biological Science	3
Phil 426	Theories of Concepts	3
Phil 4332	Cognition and Computation	3
PNP 495	PNP Seminar (with approval of topic)	3

Courses

Visit online course listings to view semester offerings for L30 Phil (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L30&crslvl=1:4>).

L30 Phil 100G Logic and Critical Analysis

Introduction to the elementary tools of logic required for constructing and critically evaluating arguments and the claims they support. Topics include: the nature of an argument; argument structure; how arguments can fail both in structure and in content; formal and informal fallacies; propositional logic and predicate calculus; and critical analysis of rhetorical strategies for presenting arguments. Students will be encouraged to develop critical reasoning skills that can be widely applied.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: HUM

L30 Phil 102 Introduction to Scientific Reasoning

This course analyzes scientists' reasoning strategies. Case studies from the history of astronomy, epidemiology, molecular biology, and neuroscience provide a basis for understanding of the character of scientific theories and the means by which they are evaluated. Special attention is given to the construction and evaluation of statistical and causal hypotheses, including experimental design, and to the use of scientific knowledge in public policy decision-making. Students acquire basic skills in critical thinking and scientific reasoning and an introductory understanding of issues in the philosophy of science.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L30 Phil 1061 Introduction to Political Theory

This course offers an undergraduate level introduction to the field of political theory. We will focus on three major themes—social justice, power and freedom, and democracy—reading some canonical texts, such as Bentham's *Introduction to the Principles of Morals and Legislation* and Marx's *Capital*, but emphasizing contemporary works, such as those of John Rawls, Michael Walzer, Michel Foucault, and Robert Dahl.

Same as L32 Pol Sci 106

Credit 3 units. A&S IQ: SSC Art: FAAM BU: BA EN: S

L30 Phil 120F Problems in Philosophy

Introduction to philosophical methods and concepts through an investigation of major issues in Western philosophy such as: what counts as knowledge; truth and belief; the existence of God; the mind-body problem; materialism and idealism; moral theory and concepts of justice. A range of historical and contemporary views on these issues is considered. The aim of the course is to prepare students to think and write about philosophical problems on their own.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 125C Great Philosophers

In this course we focus on some of the most important texts in the history of Western philosophy in order to discuss a wide range of central philosophical problems. We typically consider, for example, the existence of God, the justification of claims to knowledge, and the requirements of a good human life, including the demands of morality. Among the philosophers most likely studied are Plato, Aristotle, Descartes, Hume, Kant, Marx, Nietzsche and Wittgenstein. Our goal is not just to appreciate the genius of some great philosophers but also to grapple with the current philosophical problems they have bequeathed to us.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 131F Present Moral Problems

An investigation of a range of contemporary moral issues and controversies that draws on philosophical ethics and culturewide moral considerations. Topics may include: racism, world hunger, war and terrorism, the distribution of income and wealth, gender discrimination, pornography, lesbian and gay rights, abortion, euthanasia, and capital punishment. The aim of the course is to present diverse points of view regarding these topics and to provide conceptual and theoretical tools that enable the student to make headway in thinking carefully and critically about the issues.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 202A Puzzles and Revolutions: Text and Tradition

One major force in human history has been inquiry into the natural world. Especially after 1550, natural science, by virtue of its role in the development of technology and the improvement of health, has brought about great changes on all scales of human existence, first in Western Europe and then globally. In this course, the changing character of inquiry into the natural world, from antiquity forward, will be the object of study. Does natural science enable us, for example, to study nature as it is in itself, or are culturally-determined perspectives or frameworks inescapable? How is it that natural science has, especially since 1800, proved so useful in the development of technology? How has it impinged on the arts? The requirements will include writing several short papers and brief responses to the readings.

Same as L93 IPH 201a

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L30 Phil 233F Biomedical Ethics

A critical examination, in the light of contemporary moral disagreements and traditional ethical theories, of some of the moral issues arising out of medical practice and experimentation in our society. Issues that might be discussed include euthanasia, genetic engineering, organ transplants, medical malpractice, the allocation of medical resources, and the rights of the patient.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 234F Business Ethics

Study of the nature and justification of economic systems, business organizations, and business practices. Focus on contemporary business and the ideology it embodies. Discussion of moral problems arising in business includes both the analysis of structural factors that cause them and the evaluation of courses of action that might resolve them.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 235F Introduction to Environmental Ethics

A general survey of current issues in environmental ethics, focusing on problems such as the obligation to future generations, protection of endangered species, animal rights, problems of energy and pollution, wilderness, global justice, and business obligations. Students also learn some ethical and political theory.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 237F Introduction to Aesthetics

Study of characteristic problems in aesthetics and the philosophy of art, e.g., the nature of aesthetic entities, of aesthetic experience, and of individual differences in the various arts. Primary emphasis on solutions various theories offer to these problems.

Credit 3 units. A&S IQ: HUM Art: AH BU: HUM

L30 Phil 239 Topics in Philosophy and Environment

Philosophical questions are central to study of the environment. Such questions span many philosophical fields including metaethics, value theory, applied ethics, aesthetics, political philosophy and philosophy of science. Given such a diversity of important questions, this course focuses on a different intersection of philosophy and environment each time it runs. It aims to develop students' understanding of the complex philosophical claims and problems that lie behind environmental values, practices and policies. Examples of topics considered are: wilderness, food and agriculture, and animals.

Credit 3 units. A&S IQ: HUM EN: H

L30 Phil 297 Undergraduate Independent Study

Prerequisite: permission of the department.
Credit variable, maximum 6 units.

L30 Phil 299 Internship in Philosophy

Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement, which the student obtains from the Career Center and which must be filled out and signed by the Career Center, the site supervisor and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities, e.g., eight to 10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours.

Credit variable, maximum 3 units.

L30 Phil 3001 Philosophy of Medicine

Philosophy of Medicine is an investigation into what doctors know and how they know it. This course will investigate the following questions: What is disease? What is health? How do we classify disease? What counts as good evidence and good evidential reasoning in medicine? Is medicine a science?

If so, what makes it distinctive as a science? What kinds of evidential roles do case studies play in medicine? How should we measure and compare outcomes in clinical trials and in systematic reviews? What is the appropriate relationship between medicine and the basic sciences or between medicine and the public health sciences (e.g., epidemiology, biostatistics, economics, behavioral science)? What role, if any, should private industry (e.g., the pharmaceutical industry, the health insurance industry) play in shaping the practice of medicine? How should we define and measure "effectiveness" in medicine? Do values inform decision making about health policy, and, if so, how? The overall goal of the course is to develop a reasoned, reflective approach to research and practice in medicine through the critical analysis of texts and case studies in the history of medicine. Students do not need a background in philosophy to take this course. This course is intended to be of special interest to pre-health professionals and to philosophy and science majors. For graduate students in philosophy, this course satisfies the seminar requirement. Extra assignments will be provided to satisfy graduate course work; students should consult the instructor for details.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 301G Symbolic Logic

In the first half of the course, we will be studying some features of truth-functional and first-order classical logics, including studying the model theory and metatheory for first-order logic in much greater depth than in Phil 100. In the second half of the course, we will go on to study three different styles of proof-system: tableaux, axiomatic, and natural deduction. This course continues on where Philosophy 100: An Introduction to Logic and Critical Analysis leaves off. It is recommended for students who have already taken that introductory course or for students who already have a strong background in mathematics. Priority given to majors in philosophy and PNP.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: HUM

L30 Phil 306G Philosophy of Language

A survey of major philosophical problems concerning meaning, reference and truth as they have been addressed within the analytic tradition. Readings that represent diverse positions on these focal issues will be selected from the work of leading philosophers in the field, for example: Frege, Russell, Wittgenstein, Davidson, Quine, Kripke, and Putnam. Students are encouraged to engage critically the ideas and arguments presented, and to develop and defend their own views on the core topics. Prerequisites: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L30 Phil 308 Introduction to Semantics

Semantics is the branch of linguistics which studies how speakers assign meaning to words, sentences, and larger units of discourse. We combine perspectives from both linguistics and philosophy to explore a variety of topics including polysemy, compositionality, quantification, anaphora, definite descriptions, attitude reports, presupposition and implicature. Prerequisite: Ling 170D or Phil 301G or permission of instructor.

Same as L44 Ling 311

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L30 Phil 309 Topics in the Wilderness

Philosophical questions are central to study of the environment. Such questions span many philosophical fields including metaethics, value theory, applied ethics, aesthetics, political philosophy and philosophy of science. Given such a diversity of important questions, this course focuses on a different intersection of philosophy and environment each time it runs. It aims to develop students' understanding of the complex philosophical claims and problems that lie behind environmental values, practices and policies. Examples of topics considered are: wilderness, food and agriculture, and animals.

Credit 3 units. A&S IQ: HUM BU: ETH

L30 Phil 3090 Chinese Thought: What is a Good Life?

This course offers an introduction to Chinese thought through a study of thinkers from arguably one of the most vibrant periods of religious-philosophical discourse in China. We will examine early classical texts from the Daoist, Confucian, Mohist, and Legalist traditions, and we will follow arguments in which the thinkers expand upon, dispute, and respond to each other in regard to questions that are still important to us today. We will explore issues such as notions of the self, conceptions of the greater cosmos, the role of rituals, ideas about human nature, and the subjects of freedom and duty. Motivating the course will be the underlying question, "What is the good life?"

Same as L23 Re St 3090

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L30 Phil 3113 Theory of Knowledge

This course presents an introduction to epistemology, which is concerned with questions about knowledge, belief, evidence, and intellectual conduct and character. The course focuses on selected issues in epistemology, with the aim of providing a survey of contemporary work. Possible topics include the nature of knowledge and justification, probability, epistemic norms of assertion and action, philosophical skepticism, the value of knowledge, disagreement, intellectual virtue, and epistemic injustice. Prerequisite: One course in philosophy at the 100 or 200 level, or permission of instructor. Priority given to majors in philosophy and philosophy-neuroscience-psychology.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN:

H

L30 Phil 315 Philosophy of Mind

An introduction to philosophical analyses of the nature of mind, especially those developed by contemporary philosophers. The focus will be on questions such as the following: What is a mind? How does it relate to a person's brain? How does it relate to a person's body and the external world? Can a mind exist in a very different kind of body (e.g., a computer or a robot)? Does thinking require a language-like code? If so, can nonlinguistic species think? What is it to have a mental image or to experience pain? Prerequisite: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN:

H

L30 Phil 316 Mind and Morals

This course explores a number of issues at the intersection of ethics and cognitive science. Possible topics include: Are we rational? Do we know our own thoughts and motivations? Can one believe that one ought to do something without being motivated to do it? Do emotions impair or enhance our ability to reason? How do moral beliefs develop through childhood? Are traits such as intelligence and character unchangeable, and what implications follow if they are (or are not)? Does retaining my identity over time require having the same mind, and, if so, am I the same person now as I was as a child? Are nonhuman animals worthy of moral consideration? If brain activity is determined by causal laws, can we have free will? Prerequisites: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 321G Philosophy of Science

Pivotal concepts common to empirical sciences are examined and clarified. These include: explanation, confirmation, prediction, systematization, empirical significance, and the relationship of all these concepts to the structure of scientific theory. Examples may be drawn from both contemporary and historical science, including the social, biological and physical sciences. Students with a background in science are particularly encouraged to consider this course. Priority given to majors in philosophy and PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN:

H

L30 Phil 327 Philosophy of Religion

This course focuses on debates concerning the existence of God as well as on special issues that arise within religion generally and also on some that arise within specific religious traditions. Topics include: the rationality of religious belief, the problem of evil, the coherence of theism, and the freedom-foreknowledge problem.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN:

H

L30 Phil 331F Classical Ethical Theories

Intensive readings of great works in the history of ethics, especially by Plato, Aristotle, Hume, Kant, and Mill. Topics may include: the sources of moral knowledge, the nature of practical moral judgment, the moral role of emotion and desire, weakness of will, moral autonomy, and the universality of moral norms. Prerequisites: one course in Philosophy at the 100 or 200 level, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH,

HUM EN: H

L30 Phil 339F Philosophy of the Arts

An examination both of general issues that apply to all types of art and of issues specific to particular art forms. For example, what is art? What are the central artistic values: beauty, truth, emotional expressiveness, representational power, or something else? Does art have a moral or political function? How can we account for the history of art and for different artistic styles? In regard to selected forms, there are important questions concerning how pictures represent, whether music and dance are forms of "language," and the nature of literary interpretation.

Some consideration is given to the relation of psychology and theories of the mind to art. Prerequisites: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP. Credit 3 units. A&S IQ: HUM Art: HUM BU: ETH EN: H

L30 Phil 340F Social and Political Philosophy

Study of certain fundamental issues concerning government, society and culture. For example: What are the nature and limits of legitimate political authority? Are ordinary human beings capable of governing themselves justly? Do citizens have a duty to obey the state? If so, to what extent, if at all, is that duty grounded in consent or contract? Should the state limit or regulate the personal relationships of citizens, such as marriage, family and sexuality? How should social institutions rectify a history of political or social injustice against oppressed groups? Readings from historical and contemporary sources. Prerequisite: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

L30 Phil 345F Issues in Applied Ethics

Advanced study of a selected topic in applied ethics. Abstract ethical theories and methods are brought to bear on the moral problems that arise in an area of social and professional practice such as medicine, business, law, journalism, engineering, or scientific and humanistic research. Possible topics include: reproductive health care and policy, the just distribution of medical resources, the social responsibilities of corporations, accountability in the media and public office, and the ethics of research on or affecting human subjects. Prerequisites: one course at the 100 or 200 level in applied ethics; or permission of the instructor. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 346 Philosophy of Law

This course will first focus on the philosophical foundations of law, examining both the relationship between law and rules, as well as the types of legal reasoning. Second, the course will focus on philosophical issues that arise in the key substantive areas of law: contracts, torts, property, criminal law and constitutional law, as well in specialized areas such as family and employment law. The course will end with a brief discussion of several problems in legal ethics. Prerequisite: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 347C Ancient Philosophy

An examination of the high-water marks of philosophy in ancient Greece and Rome, focusing primarily on Plato and Aristotle. A wide range of philosophical problems is discussed, including the nature of the good life, the justification of knowledge, and the ultimate nature of mind and world. Attention is paid to how these problems unfolded in their historical context and to how the ancient treatments of them compare to contemporary efforts. Prerequisites: one course in Philosophy at the 100 or 200 level, or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 348I Introduction to Metaphysics

This course is an introduction to central debates of contemporary analytic metaphysics. Metaphysics is concerned with the nature of the most general kinds of things and the relationship between these things. We will discuss the nature of and relationship between properties, material objects, persons, time, space, and modality. Prerequisite: one course in Philosophy at the 100 or 200 level or permission of the instructor. Priority given to majors in philosophy and PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L30 Phil 349C Descartes to Hume

An examination of major philosophical systems and problems in Modern Philosophy as presented in the original writings of the 17th and 18th centuries. Topics may include rationalism and empiricism, idealism, materialism, and skepticism, with readings selected from the continental rationalists, Descartes, Spinoza, and Leibniz, and from the British empiricists, Locke, Berkeley, and Hume. Central problems include the mind-body problem, representationalism, and transcendentalism. Prerequisites: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP. Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L30 Phil 351 History of Western Philosophy: Modern

This course offers a survey of the history of 17th and 18th century Western (European) Philosophy, with a focus on the nature and limits of knowledge. Topics include skepticism, the mind-body relationship, the existence of God, the problem of induction, the distinction between primary and secondary qualities, personal identity, causation, and a priori versus a posteriori knowledge. We examine the canonical texts of Descartes, Locke, Berkeley, Hume, and Kant. Credit 3 units. BU: ETH

L30 Phil 357C Kant and 19th-Century Philosophy

Examination of Kant and 19th-century philosophy. We will discuss Kant's "Copernican Turn" in metaphysics and epistemology, as well as his moral philosophy, and we will study works of selected 19th-century philosophers such as those of Hegel, Marx, Mill, and Nietzsche. Prerequisite: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L30 Phil 358 Conceptual Foundations of Modern Science

Where does modern science come from? This course examines the winding paths by which the dominant scientific world-views of the 20th century became established. We will discuss a variety of broad themes: scientific method or methods, revolutionary science, the relationship between science and society, and the aims of science. This course is not intended to be a comprehensive survey of the history of science. Instead, we will focus upon a few key figures -- Galileo, Newton, Darwin -- and we will read both primary and secondary literature on their significance to these broad themes. Prerequisite: One course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in Philosophy & PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L30 Phil 361 Philosophy of Emotions

Emotions like fear, joy, disgust, sadness and love are central to how we engage with each other and understand the world around us. But what can we say about what emotions are, how they function, and when they are valuable? This course will draw on research in philosophy as well as the social and cognitive sciences. The aim will be to develop a rich combination of conceptual, empirical, and phenomenological resources and bring them to bear on central questions about the nature and significance of emotions.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

L30 Phil 366 Art and the Mind-Brain

In recent years, there has been a growing interest in the bearing of cognitive science on the perception and understanding of art. This interest has roots in tradition: historically, art, aesthetics, and vision science have often been linked. But the growth of knowledge in cognitive science has opened up new opportunities for understanding art and addressing philosophical questions. The converse is also true. The production, perception, and understanding of art are human capacities that can shed light on the workings of the mind and brain. This course considers questions such as the following: What is art? How do pictures represent? Does art express emotion? Why does art have a history? Prerequisites: one course in Philosophy at the 100 or 200 level or permission of the instructor. Priority given to majors in philosophy and PNP.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L30 Phil 375 Existentialism

The philosophical systems of selected philosophers such as Kierkegaard, Nietzsche and Sartre are examined to determine their historical origins, their ontological and epistemological ramifications, and their relationships to contemporary philosophy. Prerequisite: one course in Philosophy at the 100 or 200 level or permission of the instructor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L30 Phil 3801 Ancient Greek and Roman Medicine

This course introduces students to the practice and theory of medicine in the ancient Mediterranean, beginning in Egypt and continuing through Greece and Rome. It ends in the Middle Ages. Greco-Roman medicine will be our focus. How was disease understood by practitioners and, as far as can be reconstructed, by laypeople? What form did surgical, pharmacological, and dietetic treatment take? What were the intellectual origins of Greek medicine? The social status of medical practitioners? How was medicine written and in what terms did its practitioners conceive it?

Same as L08 Classics 3801

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: IS EN: H

L30 Phil 390 Philosophical Writing

This seminar has a different topic of central philosophical importance each semester. Significant attention also is devoted to conceiving, researching, writing, revising, critiquing and presenting philosophical essays. Limited to 15 students. Priority is given to philosophy majors and minors who have not yet completed their writing-intensive requirement.

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM EN: H

L30 Phil 397 Undergraduate Independent Study

Credit variable, maximum 6 units.

L30 Phil 3991 Philosophy Capstone Course

This course focuses either on classic writings from the past century or on contemporary writings that address a major philosophical concern, such as "the meaning of life" or "the concept of self." In either case, the course draws together a variety of philosophical specializations. Must be taken by all philosophy majors who are not writing an honors project. Work for the course typically consists of one written project, one oral presentation, and one commentary on another student's oral presentation. Prerequisites: senior standing and major in philosophy; preference given to those majors not pursuing Honors.

Credit 3 units. A&S IQ: HUM EN: H

L30 Phil 403 Mathematical Logic I

A first course in mathematical logic, an introduction to both proof theory and model theory. The structure and properties of first-order logic are studied in detail, with attention to such notions as axiomatic theory, proof, model, completeness, compactness and decidability. Prerequisite: Phil 301G or equivalent or a background in mathematics.

Credit 3 units. A&S IQ: HUM Art: HUM BU: HUM

L30 Phil 4030 Topics in East Asian Religion & Thought: Tools & Methods in East Asian Religions & Philosophies

Topics in East Asian Religions is a course for advanced undergraduate and graduate students on specific themes and methodological issues in East Asian religions.

Same as L23 Re St 403

Credit 3 units. A&S IQ: HUM, LCD EN: H

L30 Phil 404 Mathematical Logic II

Godel's Incompleteness Theorem: its proof, its consequences, its reverberations. Prerequisite: Phil 403 or a strong background in mathematics.

Credit 3 units. A&S IQ: HUM Art: HUM

L30 Phil 405 Philosophical Logic

What the philosophy student needs to know of logic, its techniques and its use as a tool in philosophical analysis. Some attention to the history of the subject and to its metatheory.

Prerequisite: previous exposure to formal logic, or permission of instructor.

Credit 3 units.

L30 Phil 4051 Philosophy of Logic

This course surveys some important issues in the philosophy of logic. We begin with basic foundational issues in classical logic, including the relation of logic to psychological reasoning and Tarski's definition of logical consequence, and gradually go on to consider the motivations and status of well-known extensions (sometimes regarded as "neo-classical" logics) such as modal logics and second-order logic. In the last weeks of the course, we examine some outright challengers, including intuitionistic and paraconsistent logics. After evaluating the arguments for and against these challenges, we examine one recent, controversial view—logical pluralism—which suggests that we might not need to choose among the rival systems. Many of the readings for this course are classics of contemporary philosophy, and the subject is likely to be of especial interest to students who have interests in logic, and in the philosophy and foundations of mathematics and language. Some of the important ideas in the course presuppose at least a basic acquaintance with formal logic, and hence either Phil 100 or Phil 301 (or permission of the instructor) are prerequisites.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L30 Phil 4061 Topics in the Philosophy of Language

Focus on the work of a single philosopher of language such as Carnap, Chomsky, Foucault, or Kripke, or on a central topic such as the theory of reference, the theory of meaning, or the problem of cross-cultural translation. Prerequisite: one course in epistemology, philosophy of language, or analytic philosophy, or permission of instructor.

Credit 3 units. BU: HUM

L30 Phil 4065 Advanced Philosophy of Language

An advanced-level treatment of basic topics in the philosophy of language as this discipline is understood in the analytic tradition. The main positions and the problems they pose are surveyed; focal themes include meaning, reference and truth. The aim of the course is to help students develop effective expository techniques and to provide them with the necessary conceptual resources to analyze and criticize different theoretical views. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L30 Phil 4070 Global Justice

This course examines contemporary debates and controversies regarding global justice. Seminar discussions are arranged around significant issues in the current literature. For example: What (if anything) do we owe to the distant needy? Do we have special obligations to our compatriots? Do political borders have normative significance? And so on. This course will be of interest not only to political theorists, but also students in other fields interested in social justice or international relations generally. Same as L32 Pol Sci 4070

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L30 Phil 409 Formal Methods for Philosophy

This course is an advanced course exploring formal methods in both logic and confirmation theory. It begins with an introduction to metatheory, which is explored in more depth in the 403-404 sequence on Mathematical Logic, addressing the basic metatheory for logic in addition to alternatives to standard first-order logic. The second part of the course focuses on modal

and other intensional logics. The final part of the course focuses on non-monotonic logics, focusing especially on Bayesian confirmation theory and decision theory. Prerequisite: 6 units of philosophy or permission of the instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L30 Phil 410 Theories of Perception

A consideration of recent work in philosophy and cognitive science on the nature of perception and its contribution to thought, knowledge and behavior. Special attention is paid to two questions: To what extent can perceptual experience be changed through learning? In what sense do perceptual states have content? The relation of these issues to more general theories of mental content, to the possibility of objective and theory-neutral observation in science, and to the directness or indirectness of perception are discussed. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of instructor.

Credit 3 units.

L30 Phil 4141 Advanced Epistemology

An advanced survey of selected issues in contemporary epistemology. Careful attention will be given to one or more specific epistemological topics, such as skepticism, certainty, coherence, perception, induction, virtue epistemology, testimony, formal epistemology, the nature and value of understanding, or epistemic normativity. Prerequisite: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L30 Phil 4142 Advanced Metaphysics

Through readings from both classical and contemporary sources, a single traditional metaphysical concern is made the subject of careful and detailed analytic attention. Possible topics include such concepts as substance, category, cause, identity, reality and possibility, and such positions as metaphysical realism, idealism, materialism, relativism and irrealism. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L30 Phil 418 Current Controversies in Cognitive Science

An advanced survey of current debates in cognitive science with an emphasis on the philosophical issues raised by these debates. Topics may include: evolutionary psychology; innateness and neural plasticity; perception and action; consciousness; connectionism; robotics; embodied cognition; moral reason; emergence and artificial life; concepts and content; animal cognition. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Same as L64 PNP 418

Credit 3 units. A&S IQ: HUM EN: H

L30 Phil 419 Philosophy of Psychology

An investigation of the philosophical presuppositions and implications of various traditions in psychology, including behaviorism, Gestalt and cognitivism, with a special emphasis on the development of the information processing approach of contemporary cognitivism. The conception of psychological phenomena, data and explanation central to each of these traditions are examined, and typical topics include the debates between propositional and imagistic models of representation,

different accounts of concepts and categorization, and the relation of psychology to ethics. Prerequisites: one previous course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM

L30 Phil 4210 Topics in Advanced Philosophy of Science

This course varies in topics related to philosophy of science from semester to semester. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L30 Phil 4212 Philosophy of Neuroscience

This course focuses on the historical roots of neuroscience as well as its contemporary developments. Topics include: (1) the nature of explanatory strategies in neuroscience; (2) the relation between neuroscience research and higher-level disciplines such as psychology; and (3) the epistemology of the investigatory tools of neuroscience. Prerequisites: one previous course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM

L30 Phil 423 Philosophy of Biological Science

This course examines a number of theoretical, conceptual, and methodological issues that arise in the attempts of biologists to explain living systems. One sort of problem concerns the relation between biology (and biological descriptions and explanations) and physics and chemistry. Biological phenomena have often seemed very different from ordinary physical phenomena in being teleological or goal oriented. Vitalists, accordingly, resisted the attempt to invoke physics and chemistry in the attempt to explain biological phenomena. But recently biology has come more and more to draw upon physics and chemistry; we will examine the conceptual frameworks that underlie these efforts. Another sort of problem concerns the adaptiveness of living organisms. Charles Darwin offered one naturalistic explanation of this feature, an explanation that was further developed in this century as the synthetic theory of evolution. A number of controversial issues have arisen within this context of adaptation, and the range of levels at which selection can occur. The ubiquity of evolution, moreover, has been challenged in recent years, as a number of non-selectionist explanations have recently been put forward. We will consider the arguments for the synthetic theory and these alternatives.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L30 Phil 426 Theories of Concepts

Concepts are the building blocks of thought. They are implicated in just about every cognitive task. Beyond that, there is little consensus. What information do concepts encode? How are they acquired? How are they combined to form thoughts? How are they related to perception and imagery? Each of these questions has been answered in numerous ways. In this course, we explore competing theories of concepts that have been proposed by philosophers, psychologists and other cognitive scientists. No prior acquaintance with these issues is required. Prerequisite: one previous course in Philosophy at the 300 level, graduate standing or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM

L30 Phil 430 Topics in Ethics

Selected advanced topics in ethics. Prerequisite: 6 units of philosophy, or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L30 Phil 4310 Metaethics

Ethics asks questions about right and wrong, good and bad, virtue and vice. Metaethics asks questions about ethics, including questions about whether we have any reason to do the right thing or to be virtuous, questions about whether it is possible to know the answer to ethical questions, and questions about what we mean by such ethical terms as "right" and "wrong" or "good and "bad." Influential metaethical views include relativism (on which ethical judgments are only true or false relative to an individual or culture) and moral skepticism (on which ethical knowledge is impossible). This course will introduce metaethics through an examination of selected texts and questions. Prerequisites: One previous course in philosophy at the 300 level, graduate standing, or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L30 Phil 4315 Normative Ethical Theory

An exploration of the three major normative ethical theories debated by philosophers in the last hundred years: Kantian ethics, utilitarianism, and virtue theory. Authors covered in the course may include: Henry Sidgwick, R. M. Hare, R.B. Brandt, John Rawls, Bernard Williams, Philippa Foot, Thomas Nagel, Christine Korsgaard, Michael Slote, and Barbara Herman. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L30 Phil 4320 British Moralists

An investigation of the work of the great British moral philosophers of the 17th-19th centuries, especially Hobbes, Hume, and Mill. Other figures may include Reid, Butler, Hutcheson, Bentham, and Sidgwick. In considering these philosophers, we explore the relations between normative ethics, moral psychology, and political philosophy, and may include a discussion of legal, social and economic philosophies as well. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L30 Phil 4331 Topics in the Philosophy of Feminism

This course addresses selected advanced topics in feminist philosophy.

Credit 3 units.

L30 Phil 4332 Cognition and Computation

This course introduces students to some of the key frameworks for thinking about the mind in computational terms. We will be looking at some basic topics in the theory of computation, in addition to considering philosophical issues raised by computational models of cognitive processes. This course is required for graduate students in the PNP PhD program. Prerequisites: at least two 400-level PNP courses cross-listed in Philosophy.

Same as L64 PNP 4332

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L30 Phil 438 Aesthetics

A careful consideration of selected issues regarding the experience of visual art, architecture, music or literature, as well as of the power or beauty of nature, people and artifacts. For example, is there a special form of aesthetic experience or aesthetic attitude? In what do aesthetic power and beauty consist? Are they different in art and nature? Do the artists' intentions matter? Some central concerns are: how do visual art and literary texts have "meaning," what role do the viewer's or reader's interpretations play, and how might recent work in cognitive science and social theory shed light on these issues? Prerequisites: one course in Philosophy at the 300 level, graduate standing or permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L30 Phil 4400 Advanced Social and Political Philosophy

A selective investigation of one or two advanced topics in the philosophical understanding of society, government and culture. Readings may include both historical and contemporary materials. Possible topics include: liberalism, socialism, communitarianism, citizenship, nationalism, cosmopolitanism, social contract theory, anarchism and the rights of cultural minorities. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L30 Phil 451 Plato

An examination of some of Plato's most important dialogues, typically including *Gorgias*, *Phaedo*, and *The Republic*, with the aim of grasping the development of Plato's most influential thoughts in ethics and in metaphysics and epistemology. In order to provide both historical understanding and philosophical evaluation, attention is paid to the context and structure of the dialogues and to the best of recent secondary literature. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.
Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L30 Phil 452 Aristotle

This course offers a maximally full and detailed introduction to the works of Aristotle. His logic, natural philosophy, psychology, metaphysics, ethics and political philosophy are discussed, and stress is laid on the interpretive problems facing contemporary philosophers seeking to understand Aristotle's achievement. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L30 Phil 4530 Hellenistic Philosophy

The Hellenistic Age, traditionally dated from the death of Alexander and his (Macedonian) Empire at 323 BCE to the birth of Augustus' (Roman) Empire in 31 BCE, gave the West three of its most innovative and influential schools of philosophy: Epicureanism, Skepticism and Stoicism. This course investigates the central features of their thought. Special attention is paid to the still-relevant debates between the Stoics and Skeptics about the possibility of knowledge, to the disagreements among all three schools about the issues of freedom, responsibility and determinism, and to their ethical theories. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.
Credit 3 units. A&S IQ: HUM, LCD Art: HUM EN: H

L30 Phil 4550 Continental Rationalism

A rationalist is a philosopher for whom at least one certain truth is inborn or comes from reason rather than from empirical or sensory experience. The major systemic writings of Descartes, Spinoza and Leibniz are examined with a focus on the question: does the epistemology determine the ontology of these philosophical systems or vice versa? The lines of development connecting these philosophers are traced, and such enduring problems as the relation of mind to body are examined. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.
Credit 3 units. A&S IQ: HUM Art: HUM

L30 Phil 4551 17th & 18th Century British Philosophy

17th and 18th century British philosophy introduced a profound shift in how philosophers and scientists understood themselves, the natural world, society, politics, and culture. The new, Newtonian science altered their sense of the place of humans in the natural world and the scope of what could be studied scientifically. Social, political, and economic changes motivated new conceptions of human nature, culture, and society. And because Britain was an Empire, the theories developed in the 17th and 18th centuries on this island remain embedded in the way many people and cultures understand themselves and the natural world to this day. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.
A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L30 Phil 4570 Kant's Critique of Pure Reason

An in-depth investigation of Kant's *Critique of Pure Reason*, one of the most important books in the history of Western philosophy. Some supplementary readings from other philosophers are used to situate Kant's work in a systematic and historical context, to present some "Kantian" positions in current philosophy, and to bring in some important contrasting views and criticisms. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L30 Phil 4575 Kant's Moral Theory

An in-depth examination of Kant's practical philosophy: his moral and political theory. Readings include the *Critique of Practical Reason*, parts of the *Metaphysics of Morals*, *Perpetual Peace* and other writings. Supplementary readings are used to situate Kant's work in its systematic and historical context, to provide orientation in the world of Kant scholarship, and to introduce important contrasting views and criticisms. We also discuss recent reformulations of Kantian themes in the works of contemporary philosophers. Prerequisite: one course in Philosophy at the 300 level, graduate standing or permission of the instructor.
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L30 Phil 464 Advanced Continental Philosophy

A study of selected texts by such major figures of 20th-century continental philosophy as Husserl, Heidegger, Merleau-Ponty, Sartre, de Beauvoir, Levinas, Habermas, Foucault, Derrida and Irigaray. Such topics as phenomenology, hermeneutics, existentialism, critical theory, structuralism and post-structuralism are investigated. Prerequisite: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM Art: HUM

L30 Phil 465 Topics in the History of Philosophy

Study of individual philosophers or themes from the ancient, medieval, and/or modern periods. Examples: Spinoza, St. Thomas Aquinas, neo-Platonism, universals in ancient and medieval thought, ancient and modern theories of space and time. Prerequisite: 6 units in philosophy or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L30 Phil 480 History of Analytic Philosophy

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L30 Phil 497 Undergraduate Independent Study

Prerequisite: permission of the department.

Credit variable, maximum 6 units.

L30 Phil 499 Study for Honors

Prerequisites: Visit the Honors Thesis webpage (<http://philosophy.artsci.wustl.edu/undergraduate/honors-thesis-philosophy/>).

Credit 3 units.

Philosophy-Neuroscience-Psychology

Philosophy-Neuroscience-Psychology (PNP) is an interdisciplinary program that provides an opportunity to examine the mind from multiple perspectives. Students who choose to major in PNP will learn to bring some of the newest findings in science to bear on some of the oldest questions in philosophy; they will also see new questions emerge and learn to pursue those as well. They will consider questions like the following: Is the mind-brain a single entity, or does having a mind involve something over and above the activity of a brain? What assumptions are made by cognitive psychologists when they divide mental activity into separate processes and use response times or other measures of task performance to describe those processes? What assumptions are made by neuroscientists when they use imaging techniques to determine where in the brain a cognitive process is carried out? What are we to make of Chomsky's claim that language is an innate mental organ designed to generate an infinite number of sentences? PNP majors will seek answers to questions such as these in courses offered by PNP and PNP's affiliated departments.

Majors

The Major in Philosophy-Neuroscience-Psychology

I. Core Undergraduate Requirements for PNP

All majors, regardless of track, complete an entry sequence and core requirements:

a. Entry Sequence

Students choose one of the following two sequences:

PNP Sequence

Code	Title	Units
PNP 200	Introduction to Cognitive Science	3
PNP 201	Inquiry in the Cognitive Sciences	3-4
or Psych 301	Experimental Psychology	

Mind, Brain, Behavior Sequence (MBB) Sequence

Code	Title	Units
FYP 120A	Amp: Intro to Study of the Mind-Brain: Psychological, Biological, & Philosophical Perspectives	3
FYP 122	Ampersand: Pathfinder — A Sense of Place: Discovering the Environment of St. Louis	3
or PNP 200	Introduction to Cognitive Science	

b. Core Philosophy Requirements

Prerequisite:

Code	Title	Units
Phil 100G	Logic and Critical Analysis	3
or Phil 102	Introduction to Scientific Reasoning	
or Phil 120F	Problems in Philosophy	
or Phil 125C	Great Philosophers	

Upper Division Requirements:

Majors must take two courses at the 300 or 400 level:

- One must be either PNP 306 Philosophy of Language or PNP 315 Philosophy of Mind.
- One must be chosen from the following list:

Code	Title	Units
Music 3221	Music Cognition	3
Phil 3001	Philosophy of Medicine	3
Phil 339F	Philosophy of the Arts	3
Phil 3481	Introduction to Metaphysics	3
Phil 349C	Descartes to Hume	3

Phil 361	Philosophy of Emotions	3
Phil 366	Art and the Mind-Brain	3
Phil 390	Philosophical Writing (upon approval of subject matter, consult PNP office for each semester)	3
Phil 403	Mathematical Logic I	3
Phil 404	Mathematical Logic II	3
Phil 405	Philosophical Logic	3
Phil 4051	Philosophy of Logic	3
Phil 4061	Topics in the Philosophy of Language	3
Phil 410	Theories of Perception	3
Phil 4212	Philosophy of Neuroscience	3
Phil 423	Philosophy of Biological Science	3
PNP 301	Symbolic Logic	3
PNP 306	Philosophy of Language	3
PNP 315	Philosophy of Mind	3
PNP 316	Mind and Morals	3
PNP 321	Philosophy of Science	3
PNP 3581	Conceptual Foundations of Modern Science	3
PNP 4065	Advanced Philosophy of Language	3
PNP 4141	Advanced Epistemology	3
PNP 4142	Advanced Metaphysics	3
PNP 418	Current Controversies in Cognitive Science	3
PNP 419	Philosophy of Psychology	3
PNP 4210	Topics in Advanced Philosophy of Science: Scientific Explanation	3
PNP 426	Theories of Concepts	3
PNP 4332	Cognition and Computation	3
PNP 495	PNP Seminar	3
PNP 496	PNP Seminar	3

c. Core Psychological & Brain Sciences Requirements

Prerequisite:

Code	Title	Units
Psych 100B	Introduction to Psychology	3

Upper Division Requirements:

Majors must take two courses at the 300 or 400 level:

- Unless the student has completed FYP 120A with a grade of B- or higher, they must take PNP 360 Cognitive Psychology or PNP 408 Psychology of Language
- One must be chosen from the following list:

Code	Title	Units
PNP 3151	Introduction to Social Psychology	3
PNP 3211	Developmental Psychology	3
PNP 330	Sensation and Perception	3
PNP 3401	Biological Psychology	3
PNP 3451	Genes, Environment, and Human Behavior	3
PNP 3531	Psychology of Personality	3
PNP 3541	Abnormal Psychology	3
PNP 360	Cognitive Psychology	3
PNP 361	Psychology of Learning	3
PNP 362	The Biological Basis of Human Behavior	3
PNP 380	Human Learning and Memory	3
PNP 408	Psychology of Language	3
PNP 4302	Cognitive Psychology Applied to Education	3
PNP 495	PNP Seminar	3
Psych 300	Introduction to Psychological Statistics	3
Psych 301	Experimental Psychology	4
Psych 326	Introduction to the Psychology of Aging	3
Psych 357	Introduction to Clinical Psychology	3
Psych 358	Language Acquisition	3
Psych 374	Drugs, Brain, and Behavior	3
Psych 396	Psychological Dynamics of Empathy	3
Psych 4046	Developmental Neuropsychology (Writing Intensive)	3
Psych 4182	Perception, Thought and Action	3
Psych 4301	Contemporary Topics in Cognitive Development	3
Psych 4352	Reading and Reading Development (Writing Intensive)	3
Psych 4512	Neurobiology of Learning & Memory	3
Psych 4625	Autobiographical Memory	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 4651	History and Modern Systems of Psychology	3
Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior	3

II. Track-Specific Requirements

a. Courses Required for the Cognitive Neuroscience (CN) Track

Prerequisites:

Code	Title	Units
Biol 2960 or Psych 3401	Principles of Biology I *	3-4
Biol 3058	Physiological Control Systems (recommended, not required)	2

* Permission of the instructor may be required before registering for Psych 3401.

Upper Division Requirements:

Students must take the following two courses:

Code	Title	Units
Biol 3411	Principles of the Nervous System	3
Psych 3604	Cognitive Neuroscience	3

b. Courses Required for the Language, Cognition and Culture (LCC) Track

Prerequisites:

Code	Title	Units
Anthro 170D	Introduction to Linguistics	3
Anthro 150A	Introduction to Human Evolution	3

Upper Division Requirements:

Majors must take two courses at the 300 or 400 level, chosen from the following list:

Code	Title	Units
Anthro 3383	Cognition and Culture	3
Anthro 3386	Language, Culture and Society	3
Ling 312	Phonetics	3
Ling 339	Introduction to Sociolinguistics	3
Ling 341	Linguistic Diversity in the United States	3
PNP 301	Symbolic Logic	3
PNP 306	Philosophy of Language	3
PNP 309	Syntactic Analysis	3
PNP 3111	Introduction to Semantics	3
PNP 313	Phonological Analysis	3
PNP 3171	Introduction to Computational Linguistics	3
PNP 320	Historical and Comparative Linguistics	3
PNP 362	The Biological Basis of Human Behavior	3

PNP 3662	Primate Biology	3
PNP 3701	Introduction to Hispanic Linguistics	3
PNP 396	Linguistics Seminar: Pragmatics in Second Language Learning	3
PNP 406	Primate Ecology and Social Structure	3
PNP 4065	Advanced Philosophy of Language	3
PNP 408	Psychology of Language	3
PNP 4122	Language and Gender	3
PNP 4192	Primate Cognition	3
PNP 466	Second Language Acquisition	3
PNP 467	Grammar and Vocabulary Acquisition	3
Psych 358	Language Acquisition	3
Psych 4099	Human Evolutionary Psychology	3
Psych 4352	Reading and Reading Development (Writing Intensive)	3
Psych 4631	Introduction to Computational Cognitive Science	3
Span 3202	Debating Cultures: How Spanish Works	3
Span 413	Linguistics and Language Learning	3
Span 416	Introduction to Hispanic Linguistics	3
Span 469	Reading and Writing in a Second Language	3

III. Capstone

The capstone is required for honors students and first majors; it is recommended for second majors. It consists of one of the following:

- A PNP honors project (PNP 499, 6 units; requires PNP honors form to be filled out and approved by honors coordinator)
- The 2-unit PNP Reading Class plus PNP 495 or PNP 496
- The PNP Reading Class (formerly PNP Book Club) plus 3 advanced units of independent study (PNP 500). The independent study details (<https://pnp.wustl.edu/independent-study/>) are available on the PNP website.

Minors

The Minor in Philosophy-Neuroscience-Psychology

Total units required: 15 units, 9 of which must be at the 300 level or above

Required courses:

- A 6-unit introductory sequence:

Code	Title	Units
PNP 200 & PNP 201	Introduction to Cognitive Science and Inquiry in the Cognitive Sciences	6
--or--		
FYP 120A & FYP 122A	Amp: Intro to Study of the Mind- Brain: Psychological, Biological, & Philosophical Perspectives and Ampersand: Introduction to the Study of the Mind Brain II	6

- 3 units of Philosophy:

Code	Title	Units
PNP 306 or Phil 306G	Philosophy of Language Philosophy of Language	3
--or--		
PNP 315 or Phil 315	Philosophy of Mind Philosophy of Mind	3

- 3 units of Neuroscience:

Code	Title	Units
PNP 3411 or Biol 3411	Principles of the Nervous System Principles of the Nervous System	3
--or--		
Psych 3604	Cognitive Neuroscience	3

- 3 units of Psychology:

Code	Title	Units
PNP 360 or Psych 360	Cognitive Psychology Cognitive Psychology	3
--or--		
PNP 408	Psychology of Language	3

Additional Information

Psych 100B is the prerequisite for all psychological & brain science courses at the 300 level and above. Note that no more than 6 units counted toward a minor in PNP may be transferred or earned abroad.

Courses

Visit online course listings to view semester offerings for L64 PNP (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L64&crslvl=1:4>).

L64 PNP 200 Introduction to Cognitive Science

We seek to understand the mind-brain by integrating findings from several of the cognitive sciences, including philosophy, psychology, neuroscience, linguistics, anthropology and artificial intelligence. This course considers multiple perspectives on such topics as mental imagery, concepts, rationality, consciousness,

emotion, language, thought, memory, attention and machine intelligence. Prerequisite: completion of at least one of the following courses: Psych 100B, Phil 120F, Phil 125C, Biol 296A, MBB 120A or Ling 170D.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L64 PNP 201 Inquiry in the Cognitive Sciences

Understanding the mind-brain involves orchestrating a variety of conceptual tools and modes of inquiry from the cognitive sciences. This course offers a hands-on introduction to a variety of research tactics used in the behavioral and biological sciences and emphasizes the advantages of combining them. For example, neuroimaging can enhance the interpretation of experiments by cognitive psychologists and modeling can be used to simulate and understand the effects of brain lesions. Prerequisite: completion of at least one of the following courses: Psych 100B, Phil 120F, Phil 125C, Biol 296A, MBB 120 or Ling 170D.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L64 PNP 301 Symbolic Logic

During the first half of the course, we will be studying some features of truth-functional and first-order classical logics, including studying the model theory and metatheory for first-order logic in much greater depth than in Phil 100. During the second half of the course, we will go on to study three different styles of proof-system: tableaux, axiomatic, and natural deduction. This course continues on where Phil 100 leaves off. It is recommended for students who have already taken that introductory course or for students who already have a strong background in mathematics. Priority given to majors in philosophy and PNP.

Same as L30 Phil 301G

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: HUM

L64 PNP 306 Philosophy of Language

A survey of major philosophical problems concerning meaning, reference, and truth as they have been addressed within the analytic tradition. Readings that represent diverse positions on these focal issues will be selected from the work of leading philosophers in the field, for example: Frege, Russell, Wittgenstein, Davidson, Quine, Kripke, and Putnam. Students are encouraged to engage critically the ideas and arguments presented, and to develop and defend their own views on the core topics. Prerequisites: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP.

Same as L30 Phil 306G

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L64 PNP 309 Syntactic Analysis

The ability to produce and understand an infinite number of sentences is perhaps the most fascinating aspect of the human language faculty. Syntax is the study of how the brain organizes sentences from smaller phrases and words. This course explores syntactic analysis from several perspectives within generative linguistics, focusing primarily on the Government and Binding framework but also introducing Minimalist and Optimality Theoretic approaches. Topics include phrase structure, transformations, case theory, thematic roles and anaphora. Assignments help students learn to construct and compare analyses of syntactic problems in English and other languages. Prerequisite: Ling 170D or permission of instructor.

Same as L44 Ling 309

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L64 PNP 3111 Introduction to Semantics

Semantics is the branch of linguistics which studies how speakers assign meaning to words, sentences, and larger units of discourse. We combine perspectives from both linguistics and philosophy to explore a variety of topics including polysemy, compositionality, quantification, anaphora, definite descriptions, attitude reports, presupposition and implicature. Prerequisite: Ling 170D or Phil 301G or permission of instructor.

Same as L44 Ling 311

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L64 PNP 313 Phonological Analysis

There are several important abilities involved in the use of human language, one of these being the ability to organize speech sounds. The system that the brain uses to accomplish this task is the subject matter of phonology. This course explores phonology from several perspectives within generative linguistics, including both traditional rule-based and current Optimality Theoretic approaches. Topics discussed include phonological features, lexical phonology, prosodic morphology, tone, and metrical stress. Assignments help students learn to analyze phonological problems in a variety of languages and to evaluate the consequences of using different analytic approaches. Prerequisite: Ling 170D or permission of instructor.

Same as L44 Ling 313

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L64 PNP 315 Philosophy of Mind

An introduction to philosophical analyses of the nature of mind, especially those developed by contemporary philosophers. The focus will be on questions such as the following: What is a mind? How does it relate to a person's brain? How does it relate to a person's body and the external world? Can a mind exist in a very different kind of body (e.g., a computer or a robot)? Does thinking require a language-like code? If so, can non-linguistic species think? What is it to have a mental image or to experience pain? Prerequisite: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP.

Same as L30 Phil 315

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L64 PNP 3151 Introduction to Social Psychology

Social psychology is the scientific study of how people think, feel, and act in social situations. This course will cover topics such as the self, conformity, aggression & altruism, prejudice & stereotyping, romantic relationships, person perception, persuasion, and applications to health and law. PREREQ: Psych 100B.

Same as L33 Psych 315

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L64 PNP 316 Mind and Morals

This course explores a number of issues at the intersection of ethics and cognitive science. Possible topics include: Are we rational? Do we know our own thoughts and motivations? Can one believe that one ought to do something without being

motivated to do it? Do emotions impair or enhance our ability to reason? How do moral beliefs develop through childhood? Are traits such as intelligence and character unchangeable, and what implications follow if they are (or are not)? Does retaining my identity over time require having the same mind, and, if so, am I the same person now as I was as a child? Are non-human animals worthy of moral consideration? If brain activity is determined by causal laws, can we have free will? Prerequisite: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP. Same as L30 Phil 316

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L64 PNP 3171 Introduction to Computational Linguistics

Use of computers to analyze, understand, and generate human language. Emphasis on appreciating practical applications such as text analysis, search and creation of dictionaries and corpora, information retrieval, machine translation, and speech interfaces. Survey of rule-based and statistical techniques. Students acquire programming skills appropriate for solving small- to medium-scale problems in linguistics and text processing, using a language such as Python. Students have regular programming assignments and complete a semester project. No previous knowledge of programming required. Prerequisite: L44 Ling 170D.

Same as L44 Ling 317

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L64 PNP 320 Historical and Comparative Linguistics

Historical linguistics focuses on how languages change over time. Comparative linguistics focuses on their similarities and differences. In this course we trace some of the differences and changes in sound (phonetics and phonology), word formation (morphology), sentence structure (syntax), and meaning (semantics). Topics include linguistic universals, the structural and genetic classification of languages, the techniques of reconstructing proto-languages, and the causes of language change. Examples from Indo-European languages (for example, Greek, English, and Spanish) and from Native American languages (for example, Quechua and Mayan) are emphasized. Prerequisite: Ling 170D.

Same as L44 Ling 320

Credit 3 units. A&S IQ: LCD, SSC Art: HUM BU: HUM EN: S

L64 PNP 321 Philosophy of Science

Pivotal concepts common to empirical sciences are examined and clarified. These include: explanation, confirmation, prediction, systematization, empirical significance, and the relationship of all these concepts to the structure of scientific theory. Examples may be drawn from both contemporary and historical science, including the social, biological, and physical sciences. Students with a background in science are particularly encouraged to consider this course. Priority given to majors in philosophy and PNP.

Same as L30 Phil 321G

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L64 PNP 3211 Developmental Psychology

This course concentrates on the cognitive and social development of the person from conception to adolescence. Topics covered include: infant perception, attachment, cognitive development from Piagetian and information processing perspectives, aggression and biological bases of behavior.

Prerequisite: Psych 100B.

Same as L33 Psych 321

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L64 PNP 3221 Music Cognition

An introduction to modern research on music perception and cognition. The course covers four main topics: the perception of key, the psychoacoustics of dissonance, the relationship between attention and musical meter, and the process by which melodies establish, fulfill, and deny expectations. Students read and discuss research from both cognitive science and music theory, in addition to completing several projects.

Same as L27 Music 3221

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: HUM

L64 PNP 330 Sensation and Perception

What's involved in seeing and hearing? This course will cover perception from the physical stimuli (light and sound) that impinge upon the sensory receptors through the higher-level percepts that the stimuli generate. Demonstrations and illusions will be used as we learn about the anatomy and physiology of the sensory systems and study the brain mechanisms that are involved in vision and audition. Prerequisite: Psych 100B.

Same as L33 Psych 330

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA, SCI

L64 PNP 3401 Biological Psychology

An introduction to biological mechanisms underlying behavior. Topics will include the physiology of nerve cells, anatomy of the nervous system, control of sensory and motor activity, arousal and sleep, motivation and higher mental processes. Prerequisite: Psych 100B.

Same as L33 Psych 3401

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L64 PNP 3411 Principles of the Nervous System

This course will provide a broad introduction to neuroscience, starting at the level of cellular and molecular neuroscience and ultimately ending at systems and theoretical neuroscience, with emphasis on the organization of the mammalian central nervous system. Topics will include neuronal structure, the action potential, information transmission between neurons, sensory/motor systems, emotion, memory, disease, drugs, behavior, and network dynamics. A fundamental goal of this course is to provide students with the ability to approach complex problems using the scientific method and to understand the limits of knowledge. This course will also expose students to some of the neuroscience community at Washington University. Prerequisites: Biol 2960, Biol 2970 (recommended) and Biol 3058 (recommended) or Psych 3401 and permission of instructor.

Same as L41 Biol 3411

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L64 PNP 3451 Genes, Environment, and Human Behavior

This class will examine how genetic influences impact various dimensions of human behavior, ranging from traits (e.g., personality) to psychiatric disorders. Topics to be covered include methods used to study genetic influence, how genetic predispositions interact with the environment, and ethical implications. Modern methods for gene-identification, such as genomewide association studies, polygenic risk scores and epigenetic experiments will be examined in detail. Emphasis will be placed on understanding core concepts (e.g., what is identity-by-descent) as well as application (e.g., calculate heritability, interpretation of results from published studies). Prerequisite: Psych 100B.

Same as L33 Psych 345

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: SCI EN: S

L64 PNP 350 Physics of the Brain

Concepts and techniques of physics are applied to study the functioning of neurons and neuronal circuits in the brain. Neurons and neural systems are modeled at two levels: (1) at the physical level, in terms of the electrical and chemical signals that are generated and transmitted; and (2) at the information-processing level, in terms of the computational tasks performed. Specific topics include: neuronal electrophysiology, neural codes, neural plasticity, sensory processing, neural network architectures and learning algorithms, and neural networks as dynamical and statistical systems. Course grade is based primarily on an individualized term project. Prerequisites: Phys 191-192 or Phys 193-194 or Phys 197-198 or Phys 205-206, or permission of the instructor.

Same as L31 Physics 350

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI EN: BME T, SU, TU

L64 PNP 3531 Psychology of Personality

Review of basic theoretical orientations to the understanding of personality and complex human behavior. Overview of related techniques, procedures, and findings of personality assessment and personality research. Discussion of critical issues in evaluation of personality theories. Prerequisite: Psych 100B.

Same as L33 Psych 353

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L64 PNP 3541 Abnormal Psychology

This is an introductory course in psychopathology or the scientific study of mental health disorders. The course includes definitions, theories and classification of abnormal behavior. Content focuses on symptoms, classification, prevalence, etiology, and treatment of mental health disorders, including mood, anxiety, eating, schizophrenia spectrum, substance use and personality disorders. Prerequisite: Psych 100B.

Same as L33 Psych 354

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L64 PNP 355 Physics of Vision

How do the eyes capture an image and convert it to neural messages that ultimately result in visual experience? This lecture and demonstration course covers the physics of how we see. The course is addressed to physics, pre-medical, and life-sciences students with an interest in biophysics. Topics include physical properties of light, evolution of the eyes, image formation in the eye, image sampling with an array of photoreceptors, transducing light into electrical signals,

color coding, retinal organization, computing with nerve cells, compressing the 3-D world into optic nerve signals, inferring the 3-D world from optic nerve signals, biomechanics of eye movement, engineered vision in machines. The functional impact of biophysical mechanisms for visual experience are illustrated with psychophysical demonstrations. Corequisite: Physics 117A, Physics 197 or permission of instructor.
Same as L31 Physics 355
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI EN: BME T, TU

L64 PNP 3581 Conceptual Foundations of Modern Science

Where does modern science come from? This course examines the winding paths by which the dominant scientific worldviews of the 20th century became established. We will discuss a variety of broad themes: scientific method or methods, revolutionary science, the relationship between science and society, and the aims of science. This course is not intended to be a comprehensive survey of the history of science. Instead, we will focus upon a few key figures -- Galileo, Newton, Darwin -- and we will read both primary and secondary literature on their significance to these broad themes. Prerequisites: one course in Philosophy at the 100 or 200 level, or permission of instructor. Priority given to majors in Philosophy and PNP.
Same as L30 Phil 358
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L64 PNP 360 Cognitive Psychology

Introduction to the study of thought processing from an information-processing approach. Emphasis will be placed on theoretical models that are grounded in empirical support. Topics include pattern recognition, attention, memory, reasoning, language processes, decision making, and problem solving. Prerequisite: Psych 100B.
Same as L33 Psych 360
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

L64 PNP 361 Psychology of Learning

The experimental analysis of behavior is presented with examination of operant and Pavlovian conditioning, aversive control, theories of reinforcement, choice behavior, behavioral economics, and so on. Theoretical and experimental approaches to the study of behavior as developed in the laboratory are emphasized. Consideration is given to applications from the laboratory to everyday behavior. Prerequisite: Psych 100B. Enrollment limited to 30.
Same as L33 Psych 361
Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L64 PNP 362 The Biological Basis of Human Behavior

Infidelity, marriage customs, inner city violence, infanticide, intelligence...Are the behavioral patterns we see genetically fixed and racially variable? What is the evolutionary and biological basis of human behavior? This course offers a critical evaluation of these from an anthropological perspective.
Same as L48 Anthro 362
Credit 3 units. A&S IQ: LCD, NSM, SD Arch: NSM Art: NSM BU: BA

L64 PNP 363 The Neuroscience of Movement: You Think, So You Can Dance?

Although humans have expressed themselves through movement throughout time, only recently have neurophysiological investigative techniques allowed us to glimpse the complex neural processes that allow the coordination and integration of thought, action, and perception. This course introduces students to the nascent yet growing field of dance neuroscience. In part one of this course, we explore fundamental concepts of motor control, including how our central nervous system integrates information to allow us to maintain posture and balance, to coordinate our limbs to external rhythms, and to move our bodies gracefully and expressively through space and time. In part two, we explore theoretical frameworks of motor learning as they pertain to movement. We delve into the neuromechanisms underlying common tools that dancers and athletes use to improve motor performance and how dance training induces neuroplasticity in brain structure and function. In part three, we explore the neural underpinnings of aesthetic appreciation while watching dance, including the action observation network and affective responses to art. Required work includes short assignments, a final project and presentation on a topic of your choice related to the course focus, and a few movement workshops (for which dance training is not required). Prerequisite: introductory course in dance, biology, or neuroscience, or permission from the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L64 PNP 366 Art and the Mind-Brain

In recent years, there has been a growing interest in the bearing of cognitive science on the perception and understanding of art. This interest has roots in tradition: historically, art, aesthetics, and vision science have often been linked. However, the growth of knowledge in cognitive science has opened up new opportunities for understanding art and addressing philosophical questions. The converse is also true. The production, perception, and understanding of art are human capacities that can shed light on the workings of the mind and brain. This course considers questions such as the following: What is art? How do pictures represent? Does art express emotion? Why does art have a history? Prerequisites: one course in philosophy at the 100 or 200 level or permission of the instructor. Priority given to majors in philosophy and PNP.
Same as L30 Phil 366
Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L64 PNP 3662 Primate Biology

This course takes a multifaceted introductory approach to the primates, the closest relatives of human beings, by investigating anatomy, growth and development, reproduction, behavioral adaptations, ecology, geographic distribution, taxonomy and evolution. Emphasis is placed not only on the apes and monkeys, but also on the lesser-known lemurs, lorises, bushbabies, tarsiers and many others. The importance of primate biology to the discipline of anthropology is discussed. Intended for students who have already taken Anthro 150A, and recommended for students who wish to take the more advanced 400-level courses on primates. Prerequisite: Anthro 150A or permission of instructor.
Same as L48 Anthro 3661
Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L64 PNP 3701 Introduction to Hispanic Linguistics

An introduction to the scientific study of the Spanish language, this course focuses on each of the major linguistic subsystems, including the sound system (phonetics and phonology), word formation (morphology), formation of phrases and sentences (syntax), and the use of the language to convey meaning (semantics and pragmatics). At each level of analysis, selected comparisons are made between Spanish and English and between Spanish and other languages. The course also examines different historical, regional and social varieties of Spanish and situations of Spanish in contact with other languages.

Same as L38 Span 370

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L64 PNP 380 Human Learning and Memory

A survey of issues related to the encoding, storage and retrieval of information in humans. Topics include memory improvement strategies, people with extraordinary memories, memory illusions and distortions, among other topics. Limited to 25 students.

Prerequisite: Psych 100B.

Same as L33 Psych 380

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

L64 PNP 390 PNP Reading Class

Each time this course is offered a book is selected that does an exemplary job of bringing together insights and results from multiple disciplines in targeting an important topic. We read and discuss the book and possibly a small amount of supplementary reading. A short presentation and paper are required. Prerequisite: PNP major standing.

Credit 2 units. A&S IQ: SSC EN: S

L64 PNP 396 Linguistics Seminar: Pragmatics in Second Language Learning

Readings on a selected topic in theoretical linguistics with an emphasis on discussion, presentation and writing. Prerequisite: varies with topic.

Same as L44 Ling 396

Credit 3 units. A&S IQ: SSC EN: S

L64 PNP 402 The Physiology and Biophysics of Consciousness

This course will explore the questions surrounding the search to understand the biophysical substrate of consciousness. Some areas to be explored: 1. Can consciousness be addressed like any other biological property in the sense that it has evolved by natural selection and that some elements of it are present in simple model systems, such as the fruit fly? Can insight be gained studying simple model systems? 2. Where in the brain is consciousness? What is the pattern of neurological events that occurs during consciousness? Is brain activity generating consciousness localized or distributed? Does it involve interacting brain regions? Does brain activity generating consciousness migrate to different brain regions? 3. How does the dynamic core hypothesis of Edelman relate to these questions? What can functional brain imaging add to these questions? Are Gamma waves involved in higher mental activity, and do they promote synchronized firing of neurons from different brain areas? How does this relate to the binding problem? 4. How does the brain's ability to function as a computer relate to consciousness? In many respects the brain functions as a computer using electrical signals called Action

Potentials. Action potentials in neuronal networks function in an analogous way as DC electrical impulses function in computer circuits. What is the output of computation in an electrical device? What are the theoretical limitations regarding what computation can achieve and ask whether electrical activity in the brain also has a fundamentally different purpose in addition to computation. 5. Is our knowledge of the physical world too primitive and incomplete to understand consciousness? The brain is an electronic device and consciousness clearly depends on its electrical activity. Yet, electrical forces are poorly understood, both in the context of classical physics and quantum physics. Will understanding consciousness have to wait for a unified theory that more accurately describes electrical forces? Taught in the medical school: McDonnell Science Building 983. Prerequisites: Bio3411 or equivalent. College-level physics, some knowledge of computers.

Credit 2 units. A&S IQ: NSM Arch: NSM Art: NSM

L64 PNP 404 Laboratory of Neurophysiology

Neurophysiology is the study of living neurons. Students record electrical activity of cells to learn principles of the nervous system including sensory transduction and coding, intercellular communication and motor control. The course meets for 9 hours each week. Students may leave the lab for up to 2 hours. Prerequisites: Biol 3411 or Psych 4411 and permission of Student Coordinator, Erin Gerrity. Biol 3411 may be taken concurrently.

Same as L41 Biol 404

Credit 4 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L64 PNP 4041 Math Logic II

Godel's Incompleteness Theorem: its proof, its consequences, its reverberations. Prerequisite: Philosophy 403 or a strong background in mathematics.

Same as L30 Phil 404

Credit 3 units. A&S IQ: HUM Art: HUM

L64 PNP 406 Primate Ecology and Social Structure

Survey of the ecology, individual and social behavior, adaptations, and interactions of the major groups of primates. Emphasis on studies designed to examine the relationships among ecology, morphophysiology, and behavior. Methods used in collecting data on primates in the field. Prerequisite: Anthro 150A or one 100-level biology course.

Same as L48 Anthro 406

Credit 3 units. A&S IQ: NSM Art: NSM

L64 PNP 4065 Advanced Philosophy of Language

An advanced-level treatment of basic topics in the philosophy of language as this discipline is understood in the analytic tradition. The main positions and the problems they pose are surveyed; focal themes include meaning, reference and truth. The aim of the course is to help students develop effective expository techniques and to provide them with the necessary conceptual resources to analyze and criticize different theoretical views. Prerequisite: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Same as L30 Phil 4065

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L64 PNP 408 Psychology of Language

This course surveys current research and theory in psycholinguistics, covering the biological bases, cognitive bases and learning of language. We consider studies of normal children and adults, the performance of individuals with various types of language disorders, and computer simulations of language processes. Topics range from the perception and production of speech sounds to the management of conversations. Each student carries out an original research project on some aspect of psycholinguistics. Prerequisites: Ling 170D and Psych 100B. Same as L33 Psych 433

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L64 PNP 4141 Advanced Epistemology

An advanced survey of selected issues in contemporary epistemology. Careful attention will be given to one or more specific epistemological topics, such as skepticism, certainty, coherence, perception, induction, virtue epistemology, testimony, formal epistemology, the nature and value of understanding, or epistemic normativity. Prerequisite: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor. Same as L30 Phil 4141

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L64 PNP 4142 Advanced Metaphysics

Through readings from both classical and contemporary sources, a single traditional metaphysical concern will be made the subject of careful and detailed analytic attention. Possible topics include such concepts as substance, category, cause, identity, reality and possibility, and such positions as metaphysical realism, idealism, materialism, relativism and irrealism. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor. Same as L30 Phil 4142

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L64 PNP 418 Current Controversies in Cognitive Science

An advanced survey of current debates in cognitive science with an emphasis on the philosophical issues raised by these debates. Topics may include: evolutionary psychology; innateness and neural plasticity; perception and action; consciousness; connectionism; robotics; embodied cognition; moral reason; emergence and artificial life; concepts and content; animal cognition. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Credit 3 units. A&S IQ: HUM EN: H

L64 PNP 419 Philosophy of Psychology

An investigation of the philosophical presuppositions and implications of various traditions in psychology, including behaviorism, Gestalt and cognitivism, with a special emphasis on the development of the information processing approach of contemporary cognitivism. The conception of psychological phenomena, data and explanation central to each of these traditions are examined, and typical topics include the debates between propositional and imagistic models of representation, different accounts of concepts and categorization, and the relation of psychology to ethics. Prerequisite: one previous course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Same as L30 Phil 419

Credit 3 units. A&S IQ: HUM Art: HUM

L64 PNP 4190 Primate Behavior

Discussion and analysis of recent research on the social behavior of nonhuman primates. Data from both field and laboratory study. Prerequisite: Anthro 406, or permission of instructor.

Same as L48 Anthro 419

Credit 3 units. A&S IQ: NSM Art: NSM BU: BA

L64 PNP 4192 Primate Cognition

This course investigates historical and current views regarding the cognitive capacities of nonhuman primates, and the extent to which these abilities are shared with humans. Topics for this class include: social cognition, problem-solving, tool use, culture, communication, theory of mind, deception, self-recognition, imitation, and numerical cognition. The classes involve discussion and critical evaluation of theory and methods in this challenging and exciting area of primate cognitive research.

Same as L48 Anthro 4191

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L64 PNP 4210 Topics in Advanced Philosophy of Science: Scientific Explanation

This course will vary in topics related to Philosophy of Science from semester to semester. Prerequisites: one course in Philosophy at the 300-level, graduate standing, or permission of the instructor.

Same as L30 Phil 4210

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L64 PNP 426 Theories of Concepts

Concepts are the building blocks of thought. They are implicated in just about every cognitive task. Beyond that, there is little consensus. What information do concepts encode? How are they acquired? How are they combined to form thoughts? How are they related to perception and imagery? Each of these questions has been answered in numerous ways. In this course, we will explore competing theories of concepts that have been proposed by philosophers, psychologists, and other cognitive scientists. No prior acquaintance with these issues is required. Prerequisites: one previous course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Same as L30 Phil 426

Credit 3 units. A&S IQ: HUM Art: HUM

L64 PNP 4302 Cognitive Psychology Applied to Education

This course is intended to cover topics in the cognitive psychology of human memory, conceptual learning and comprehension with special focus on areas, theory and research that have potential application to education. Thus, the course provides selective coverage of theoretical and empirical work in cognitive psychology that provides potential to inform and improve educational practice. The applicability of these themes is explicitly developed and evaluated through the primary research literature using educationally oriented experimental paradigms. The course is of interest and benefit to education majors and to psychology majors interested in cognitive psychology and its applications. Prerequisites: junior/senior status, 9 units in psychology and Psych 100B or junior/senior status, 9 units in education and Psych 100B.

Same as L33 Psych 4302

Credit 3 units. A&S IQ: SSC EN: S

L64 PNP 4332 Cognition and Computation

This course introduces students to some of the key frameworks for thinking about the mind in computational terms. We look at some basic topics in the theory of computation, in addition to considering philosophical issues raised by computational models of cognitive processes. This course is required for graduate students in the PNP PhD program. Prerequisites: at least two 400-level PNP courses cross-listed in Philosophy.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L64 PNP 4488 The Cognitive Neuroscience of Film

To understand complex events in real life depends on perception, action and memory. To understand movies, people probably depend on similar psychological and neural mechanisms. This seminar uses results from psychology and neuroscience to try to better understand the experience of a movie viewer, and uses theory and practice to explore psychological hypotheses about perception. Prerequisite: Psych 360 or Psych 3604, or Psych 4604, or graduate standing in psychology.

Same as L33 Psych 488

Credit 3 units. A&S IQ: NSM

L64 PNP 466 Second Language Acquisition

There are many ways in which a second language can be learned: from infancy as the child of bilingual parents, or later through formal instruction, immersion in a new culture, or in a particular work or social situation. This class is an inquiry into the processes by which acquisition occurs. Topics include the nature of language learning within the scope of other types of human learning; the relationship between first- and second-language acquisition; the role of linguistic, cognitive and sociocultural factors; insights gained from analyzing learners' errors; key concepts such as interlanguage and communicative competence; bilingualism; the optimal age for second-language acquisition; and a critical appraisal of different theories of second-language acquisition. Both theoretical and instructional implications of second-language acquisition research are considered. This course can be used toward certification in TESOL and is a required course for the Graduate Certificate in Language Instruction. Prerequisite: Ling 170D or equivalent is recommended, especially for undergraduates, but is not required.

Same as L44 Ling 466

Credit 3 units. A&S IQ: HUM EN: H

L64 PNP 467 Grammar and Vocabulary Acquisition

This course examines theoretical and instructional implications of research on grammar and vocabulary acquisition. Topics include making form-meaning connections during language learning; developmental stages; the role of input and input processing; explicit and implicit methods of grammar instruction; pertinent factors in vocabulary acquisition, such as a learning context and processing resource allocation; and comparisons of incidental and direct vocabulary instruction techniques. Major theories of language acquisition (e.g., nativism, emergentism) are critically examined in light of the research presented, and research findings are applied to instructional practices.

Same as L38 Span 467

Credit 3 units. A&S IQ: LCD BU: BA EN: H

L64 PNP 4691 Second Language Reading and Writing:**Theory, Research and Practice**

This course, taught in English, extends issues in second language literacy beyond pedagogy by examining the wide range of theoretical and research issues, both historical and current. Literacy acquisition among second language learners involves a number of variables including both cognitive and social factors. Topics discussed in class include literacy and social power, universal cognitive operations, individual learner differences, text types and literary forms, and the extent to which reading and writing are interrelated. Students discuss how to bridge research and practice, and they create reading and writing activities driven by theory and empirical investigations. This course is a required course for the undergraduate minor in applied linguistics and an elective for the Graduate Certificate in Language Instruction.

Same as L38 Span 4691

Credit 3 units. A&S IQ: SSC EN: S

L64 PNP 494 Behavioral Psychology Readings Group

This weekly journal-style readings class provides the opportunity for students to read and discuss seminal as well as current papers on the conceptual aspects of behavioral psychology and relevant research. Points of contact among behaviorism, cognitivism, and neuroscience and the natural lines of fracture will be examined. Prerequisite: Psych 100B and one of the following: Psych 361, Psych 360, or a Philosophy course.

Same as L33 Psych 494

Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L64 PNP 495 PNP Seminar

Subject varies per semester. Not always offered as writing-intensive, refer to individual semester listing. Prerequisites: a 300-level philosophy course (Phil/PNP 315 is recommended) and PNP major standing or approval of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L64 PNP 495W PNP Seminar: Writing Intensive

Subject varies per semester. Fulfills Writing Intensive (WI) requirement. Prerequisites: a 300-level philosophy course (Phil/PNP 315 is recommended); and PNP major standing or approval of instructor.

Credit 3 units. A&S IQ: SSC, WI EN: S

L64 PNP 496 PNP Seminar

Subject varies each semester. Prerequisites: One 300-level philosophy course (Phil 315 or PNP 315 is recommended) as well as PNP major standing or approval of instructor.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L64 PNP 499 Study for Honors

Prerequisites: Visit the PNP Honors webpage (<http://pnp.artsci.wustl.edu/undergraduate/honors/prerequisites/>).

Credit 3 units. EN: S

Physical Education

Undergraduate students may take both lecture-laboratory and performance courses through the Department of Athletics. A total of 12 performance units may be included in the 120 units required for graduation. All courses are offered only on a credit/no credit basis.

Majors

Students may take both lecture-laboratory and performance courses through the Department of Athletics; however, there is no major in this area.

Minors

Students may take both lecture-laboratory and performance courses through the Department of Athletics; however, there is no minor in this area.

Courses

Visit online course listings to view semester offerings for L28 P.E. (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L28&crslvl=1:4>).

L28 P.E. 115 Topics In Physical Education: Beginning Weight Training

Major emphasis is on strength development. First class will meet in the Burmesiter Lounge, Summers Recreation Center.
Credit 1 unit.

L28 P.E. 1201 Fundamentals of Rowing for Fitness

This eight-week course will focus on the effective use of Concept II Rowing as tools to learn the rowing stroke as well as to maintain aerobic fitness and develop strength. Emphasis will be placed on the correct use of technique to decrease risk of injury; varying duration and intensity of work on the machine to develop different energy systems; and using these new skills in developing lifetime fitness. Instruction will include the use of videotape and video monitoring. Athletic shoes and clothes that are not baggy are needed to participate. There will be a minimum amount of running and light, low-impact aerobic activity required as a warm-up.
Credit 1 unit.

L28 P.E. 131 Topics in Physical Education: Group Fitness

This 10-week course is designed to give students the unique experience of a group fitness class catered just to them. Using various formats of group exercise, Group Fitness will provide a fun and dynamic way to motivate participants to reach their desired results. Topics will include cycling, bootcamp, pilates, yoga, cardio, strength training, TRX suspension training, and a variety of other formats specific to the group, helping students to improve their overall fitness and wellness. A \$40 course activity fee is required. First class meets in the Olympic Studio, Summers Recreation Center.
Credit 1 unit.

L28 P.E. 132 Topics in Physical Education: High-Intensity Conditioning

This eight-week course offers a varied program of high-intensity conditioning techniques specifically designed for individual needs. Supervised areas covered are cardiovascular and strength testing; weight training; plyometric training; flexibility and stretching; and aerobic and anaerobic training. There will be an organizational meeting in the Burmeister Lounge, Summers Recreation Center.
Credit 1 unit.

L28 P.E. 136 Fitness and Conditioning

Students complete fitness testing at the beginning and end of the semester. Individual workout schedules are followed outside of class time. Orientation sessions will take place in the Burmeister Lounge, Summers Recreation Center.
Credit 1 unit.

L28 P.E. 139 Topics in Physical Education: Intermediate/Advanced Tennis

Intermediate/advanced tennis.
Credit 1 unit.

L28 P.E. 140 Topics in Physical Education: Beginning Tennis

Beginning tennis.
Credit 1 unit.

L28 P.E. 148 Topics in Physical Education: Individual Physical Education

This course is intended for students who have a physical or medical condition that prohibits them from participating in any other P.E. class. The student must have a medical referral from their physician or the student health service. P.E.148 is an independent study class that requires three 30-minute meetings with the instructor (first week, mid-semester, final week). An exercise program is designed based on the student's goals and limitations. The student keeps a written log that is reviewed periodically and turned in at the end of the semester.
Credit 1 unit.

L28 P.E. 155 Topics In Physical Education: Life Skills for Scholar Champions

Participation includes informal leadership tasks under the direction of Washington University Athletic Department personnel. The selection of the task and the scope of work is to be determined before enrollment by conference with the instructor. Prerequisite: permission of the department. Credit 1 unit.

L28 P.E. 160 Fundamentals of Fitness: Personal Training

This course is designed to provide students with the foundational knowledge and skills needed to pass the American College of Sports Medicine's (ACSM) Certified Personal Trainer exam. Classes will be a fusion of lecture and practical application to ensure an environment of applied knowledge. The primary emphasis will include basic human anatomy, physiology, bioenergetics, biomechanics, nutrition and their relationship with exercise. Using the guidelines provided by the ACSM and the accreditation standards of the National Commission for Certifying Agencies (NCCA), students will familiarize themselves with industry standards. Specifically, this course will refer to guidelines provided by the ACSM regarding health screening, scope of practice, client safety, behavior change strategies, program design, fitness assessments and legal issues. At the conclusion of this course, students will take a final comprehensive written and practical exam as their final evaluation. A \$90 course activity fee is required. Credit 1 unit.

L28 P.E. 220 Topics in Physical Education: Varsity Sports

Prerequisite: Permission of department. Credit 1 unit.

L28 P.E. 225 Topics in Physical Education: Varsity Sports Training

Through sports performance training, team practices, and meetings, this course prepares varsity student athletes for their return to a competitive season. Prerequisite: Permission of the Athletic Department and varsity athlete status. Credit 1 unit.

L28 P.E. 232 Topics in Physical Education: High-Intensity Conditioning

High-intensity conditioning. Varied program of high-intensity conditioning techniques designed for individual needs. Supervised areas covered are cardiovascular and strength testing, weight training, plyometric training, flexibility and stretching, and aerobic and anaerobic training. Credit 1 unit.

L28 P.E. 234 Topics in Physical Education: Lifeguard Training

This course provides skill instruction and knowledge needed to prevent and respond to aquatic emergencies in a pool setting. Successful completion of requirements results in certification in American Red Cross Lifeguard Training for swimming pools, CPR and First Aid. Prerequisite: swimming test given during the first week of class. Course materials fee: \$100. Summers Rec Center/Millstone Pool. Eight-week course. Credit 1 unit.

L28 P.E. 236 Topics in Physical Education: Fitness and Conditioning

Students complete fitness testing at the beginning and end of the semester. Individual workout schedules are followed outside of class time. Credit 1 unit.

L28 P.E. 239 Topics in Physical Education: Beginning Tennis

Eight-week course. Summers Rec/tennis courts. Credit 1 unit.

L28 P.E. 240 Topics in Physical Education: Intermediate Tennis

Eight-week course. Summers Rec Center/TAO Tennis Courts. Credit 1 unit.

L28 P.E. 248 Topics in Physical Education: Individual Physical Education

Individual physical education. Prerequisite: medical referral needed. Credit 1 unit.

L28 P.E. 255 Topics in Physical Education: Practicum in Sports Leadership

Practicum in sports leadership. Participation in formal leadership tasks under the direction of the Washington University Athletic Department personnel. Selection of task and scope of work is determined before enrollment by conference with instructor. Prerequisite: permission of the department. Credit 1 unit.

L28 P.E. 258 Indoor Cycling

Indoor cycling is a high-energy cardiovascular workout performed on stationary bikes. All levels welcome; the workout can be tailored to the student's personal fitness goals and needs. A water bottle and towel are required. There will be a \$45.00 fee for a heart-rate monitor for this class. Credit 1 unit.

L28 P.E. 291 Fundamentals of Athletic Training

Study of the duties of the athletic trainer in relation to physical education classes, competitive sports, and recreation, including the study and practice of first-aid care and the prevention of injuries. Credit 3 units.

Physics

Physics is the discipline that deals with the most fundamental aspects of our universe, such as the properties of atoms, nuclei and elementary particles; the nature of the forces between them; and the collective behavior of atoms in solids, liquids and gases. It deals with the entire universe, from its birth to its ultimate fate. At the same time, physics provides the tools that help us to understand extremely complex everyday things, like the behavior of sand piles, the strength of materials, or processes in the brain. Physics seeks to discover and understand the mathematical

rules that govern the behavior of things. Its early successes in comprehending motion, thermodynamics, electricity and magnetism provided a foundation upon which other physical sciences have grown.

For students planning a career in science and technology or intending to pursue graduate studies in physics, astronomy, earth sciences, environmental sciences, medical physics, meteorology or oceanography, a major in physics provides a solid foundation. The program is sufficiently flexible to allow students to combine a physics major with a second major in chemistry, mathematics or engineering; with pre-medical studies; or with other disciplines in the humanities and social sciences. In addition to the fundamentals of physics, the program is designed to give students a broad range of skills in laboratory techniques, critical thinking, computer use, and teamwork, which will serve them well in their chosen careers. In consultation with a faculty advisor, students may design a program of study to meet individual goals and interests. Physics majors are strongly encouraged to participate in physics research projects directed by faculty members.

Introductory Physics: The Physics 191–Physics 192 and Physics 191L–Physics 192L sequence is a calculus-based introduction to physics intended for adequately prepared students interested in majoring in science or engineering or undertaking pre-medical studies. Physics 191 fulfills the requirements for the Sam Fox School. The sequence uses interactive, active-learning techniques. Calculus I (Math 131) is a corequisite, although previous or concurrent enrollment in Calculus II (Math 132) is strongly recommended.

Focused Physics: The Physics 193–Physics 194 and Physics 193L–Physics 194L sequence is an advanced calculus-based introduction to physics for students with previous or concurrent enrollment in Calculus II (Math 132). This sequence is particularly addressed to students considering a physics- or mathematics-heavy science or engineering major.

The department also offers several other courses of general interest to the nonscience student. In most cases, these courses have no prerequisites.

Majors

The Major in Physics

Required introductory courses: Majors in physics are required to complete a series of introductory courses.

They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1

or (recommended for majors):

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	4
Physics 194L	Focused Physics II Laboratory	1

Required courses: In addition, majors in physics are required to complete the following courses:

Code	Title	Units
Physics 217	Introduction to Quantum Physics	3
Physics 322	Physical Measurement Laboratory	3
Physics 411	Mechanics	3
Physics 421	Electricity and Magnetism	3

One additional upper-level laboratory course, chosen from the following:

Code	Title	Units
Physics 316	Optics and Wave Physics Laboratory	3
Physics 321	Electronics Laboratory	3
Physics 360	Biophysics Laboratory	3
Physics 435	Nuclear and Radiochemistry Lab	3
Physics 427	Introduction to Computational Physics	3

Upper-level courses: Majors are required to complete a minimum of 21 units of advanced courses (300 level or higher) in Physics, excluding Physics 341, Physics 342, Physics 441, Physics 442, Physics 499 and Physics 500. These 21 units may include courses listed above and may also include *one* upper level engineering class chosen from the following:

Code	Title	Units
ESE 351	Signals and Systems	3
ESE 429	Basic Principles of Quantum Optics and Quantum Information	3
ESE 436	Semiconductor Devices	3
ESE 438	Applied Optics	3
ESE 441	Control Systems	3
ESE 482	Digital Signal Processing	3
ESE 531	Nano and Micro Photonics	3
ESE 532	Introduction to Nano-Photonic Devices	3
ESE 582	Fundamentals and Applications of Modern Optical Imaging	3
MEMS 3410	Fluid Mechanics	3

Students must receive letter grades for these advanced courses, and the course must be completed with a grade of at least a C-.

Math courses required for the physics major:

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Math 217	Differential Equations	3

Students who have completed Math 203 Honors Mathematics I and Math 204 Honors Mathematics II will have fulfilled the requirement for Math 131 Calculus I, Math 132 Calculus II, and Math 233 Calculus III.

Math courses recommended for the physics major:

- Math 308 Mathematics for the Physical Sciences **or** ESE 318 Engineering Mathematics A (We recommend that this course precede Physics 421.)
- Math 309 Matrix Algebra (We recommend that this course precede Physics 471.)
- Physics 501/Math 501 and Physics 502/Math 502 also are recommended.

Science-breadth requirement: Majors must select three of the following courses to satisfy the science-breadth requirement. One of the three courses must be Chem 103, Chem 104, Chem 105, Chem 106, Chem 111A, Chem 112A, Chem 401 or Chem 402.

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
Chem 103	Advanced Placement Chemistry I	3
Chem 104	Advanced Placement Chemistry II	3
Chem 105	Introductory General Chemistry I	3
Chem 106	Introductory General Chemistry II	3
Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 445	Instrumental Methods: Physical Chemistry	3
CSE 131	Introduction to Computer Science	3
CSE 132	Introduction to Computer Engineering	3
CSE 247	Data Structures and Algorithms	3
EPSc 201	Earth and the Environment	4

Students who have received credit for Chem 103 Advanced Placement Chemistry I and Chem 104 Advanced Placement Chemistry II can use them toward the science-breadth requirement.

Biophysics Track

Physics majors may concentrate in the subfield of biophysics by taking the following (as part of their distribution requirement):

Physics requirement:

Code	Title	Units
Physics 463	Statistical Mechanics and Thermodynamics	3

One of the following:

Code	Title	Units
Physics 350	Physics of the Brain	3
Physics 450	Physics of the Brain	3
Physics 355	Physics of Vision	3
Physics 455	Physics of Vision	3

One of the following:

Code	Title	Units
Physics 354	Physics of Living Systems	3
Physics 453	Topics in Theoretical Biophysics	3
Physics 454	Physics of Living Systems	3
Physics 481	Critical Analysis of Scientific Data	3
Physics 509	Nonlinear Dynamics	3
Physics 563	Topics in Theoretical Biophysics	3

Biology requirements:

Code	Title	Units
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4

Note: Students who want to have the biophysics track displayed on their transcript must inform the Department of Physics (<https://physics.wustl.edu/biophysics-track-declaration-form/>) at least one semester before their graduation date. Contact the Director of Undergraduate Studies (dus@physics.wustl.edu) with any questions.

The Major in Astrophysics

Required introductory courses: Majors in astrophysics are required to complete a series of introductory courses.

They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1

or (recommended for majors):

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	4
Physics 194L	Focused Physics II Laboratory	1

Required courses: In addition, majors in astrophysics are required to complete the following courses:

Code	Title	Units
Physics 217	Introduction to Quantum Physics	3
Physics 312	Introduction to Astrophysics	3
Physics 322	Physical Measurement Laboratory	3
Physics 411	Mechanics	3
Physics 421	Electricity and Magnetism	3

One additional laboratory course must be chosen from the following:

Code	Title	Units
Physics 316	Optics and Wave Physics Laboratory	3
Physics 321	Electronics Laboratory	3
Physics 427	Introduction to Computational Physics	3
Physics 435	Nuclear and Radiochemistry Lab	3

Required advanced courses: In addition to the above requirements, students who are earning the astrophysics major are required to complete three advanced electives (300 level and above). Students who declare an astrophysics major *and* who complete both Physics 125A Solar System Astronomy and Physics 126A Stars, Galaxies and Cosmology will be required to complete two advanced electives (300 level and above). They will choose courses from the following list. Students must receive letter grades for these advanced courses, and the course must be completed with a grade of at least a C-.

Code	Title	Units
Physics 446	Galactic Astrophysics	3
Physics 456	Stellar Astrophysics	3
Physics 460	X-Ray & Gamma-Ray Astrophysics	3
Physics 476	Astrophysics	3
Physics 478	From Black Holes to the Big Bang	3

They must also complete one additional course from the preceding list of five courses or one from the following list of courses:

Code	Title	Units
Physics 422	Electricity and Magnetism II	3
Physics 474	Introduction to Particle Physics	3
Physics 477	Physics of Finite and Infinite Nuclear Systems	3
Physics 547	Intro to Elementary Particle Physics	3
Physics 558	Relativistic Astrophysics	3
EPSc 352	Earth Materials	5
EPSc 353	Earth Forces	4
EPSc 407	Remote Sensing	3
MEMS 3410	Fluid Mechanics	3

Math courses required for the astrophysics major:

Code	Title	Units
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Math 217	Differential Equations	3

Students who have completed Math 203 Honors Mathematics I and Math 204 Honors Mathematics II will have fulfilled the requirement for Math 131 Calculus I, Math 132 Calculus II, and Math 233 Calculus III.

Science-breadth requirement: Majors must select one of the following courses to satisfy the science-breadth requirement:

Code	Title	Units
Chem 105	Introductory General Chemistry I	3
Chem 106	Introductory General Chemistry II	3
Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 445	Instrumental Methods: Physical Chemistry	3
CSE 131	Introduction to Computer Science	3
CSE 132	Introduction to Computer Engineering	3
CSE 247	Data Structures and Algorithms	3
EPSc 201	Earth and the Environment	4

Students who have received credit for Chem 103 Advanced Placement Chemistry I and Chem 104 Advanced Placement Chemistry II can use them toward the science-breadth requirement.

Additional Information

Senior Honors: Students are encouraged to work toward Latin honors (p. 1100) (i.e., cum laude, magna cum laude, and summa cum laude). To qualify, students must meet the academic requirements of the college and successfully complete a suitable project under the supervision of a faculty member in the department. The project, whether experimental or theoretical, should demonstrate the student's capacity for independent work. Honors candidates must apply to the Undergraduate Studies Committee no later than the first day of classes of their senior year. The application should include a description of the proposed project, co-signed by the supervising professor. A written report of the completed work must be submitted to the committee by a March deadline. By enrolling in Physics 499, students may earn up to 6 units of credit for the honors project.

The physics department also offers physics majors the possibility to earn departmental distinctions. These distinctions require the same grade-point average cutoffs as Latin honors (p. 1100) but are calculated exclusively from the grades in physics courses (i.e., all courses with the prefix L31). Three levels of distinction are offered: 1) highest distinction; 2) high distinction; and 3) distinction. The highest and high distinctions require at least one semester of undergraduate research and a senior thesis describing the results; these distinctions are limited to the top 15% (highest distinction) and the top 15% to 50% (high distinction) of the physics majors in their senior year as ranked by their GPA in the physics courses. Students who meet the GPA cutoff but who do not undertake undergraduate research and a senior thesis may only receive the third level of distinction.

Minors

The Minor in Physics

Required introductory courses: Minors in physics are required to complete a series of introductory courses.

They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1

or:

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	
Physics 194L	Focused Physics II Laboratory	

Required courses: In addition, minors in physics are required to complete the following courses:

Code	Title	Units
Physics 217	Introduction to Quantum Physics	3
Physics 318	Introduction to Quantum Physics II	3

Elective courses: Minors must take at least one additional course at the 300 level or above (with the exception of Physics 303, Physics 304, Physics 341, Physics 342, Physics 441, Physics 442, Physics 499 and Physics 500) with a grade of C- or better.

The Minor in Astrophysics and Astroparticle Physics

Required introductory courses: Minors in astrophysics and astroparticle physics are required to complete a series of introductory courses.

They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1

or:

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	
Physics 194L	Focused Physics II Laboratory	

Required courses: In addition, minors in astrophysics and astroparticle physics are required to complete the following courses:

Code	Title	Units
Physics 217	Introduction to Quantum Physics	3
Physics 312	Introduction to Astrophysics	3

Minors must also take two of the following seven courses:

Code	Title	Units
Physics 318	Introduction to Quantum Physics II	3
Physics 446	Galactic Astrophysics	3
Physics 456	Stellar Astrophysics	3
Physics 460	X-Ray & Gamma-Ray Astrophysics	3
Physics 474	Introduction to Particle Physics	3
Physics 476	Astrophysics	3
Physics 478	From Black Holes to the Big Bang	3

The Minor in Biomedical Physics

Required Courses: Minors in biomedical physics are required to complete a series of introductory courses.

They may take either:

Code	Title	Units
Physics 191	Physics I	3
Physics 191L	Physics I Laboratory	1
Physics 192	Physics II	3
Physics 192L	Physics II Laboratory	1

or:

Code	Title	Units
Physics 193	Focused Physics I	4
Physics 193L	Focused Physics I Laboratory	1
Physics 194	Focused Physics II	
Physics 194L	Focused Physics II Laboratory	

Elective courses: Minors must take two of the following four courses:

Code	Title	Units
Physics 350	Physics of the Brain	3
Physics 354	Physics of Living Systems (or Physics 454)	3
Physics 355	Physics of Vision	3
Physics 481	Critical Analysis of Scientific Data	3

One of the following four laboratory courses:

Code	Title	Units
Physics 316	Optics and Wave Physics Laboratory	3
Physics 321	Electronics Laboratory	3
Physics 322	Physical Measurement Laboratory	3
Physics 360	Biophysics Laboratory	3

Additional Information

This is a minor for students interested in the discussion and application of methods and techniques from physics to topics in the area of biology and medicine. The program may be of interest to the pre-medicine student or the research-oriented science major.

Courses

Visit online course listings to view semester offerings for L31 Physics (<https://courses.wustl.edu/CourseInfo.aspx?scl=L&dept=L31&crslvl=1:4>).

L31 Physics 1001 First-Year Seminar: All About Black Holes

Black holes are the Universe's most extreme objects: they are so massive and compact that gravity bends space and time into a knot. The signature property of a black hole is that you can get in, but not out. In this first-year seminar, we discuss what is currently known about black holes, starting from Einstein's theories about space, time, and gravity, through the first observational evidence for black holes, to the latest images of the shadows cast by black holes taken with the largest telescopes on earth. This class is designed to bend your mind when figuring out why clocks run slower when approaching the edge of a black hole, what could be at the center of a black hole or even at the other side. At the same time, we will discuss the inner workings of the most advanced telescopes that astronomers have developed to study black holes, and the strategies astronomers employ to develop ever more sensitive instruments. Also expect a fair bit of astronomy in this class, when we discuss how black holes form, when and how they grow, and which roles they play in cosmic eco-systems such as the Milky Way Galaxy. This first-year seminar adopts a flipped class/socratic discussion structure. The students are asked to read a wide variety of texts, including texts from the current literature, and to present and to discuss some of the material in class. The class assumes no background in math; at the same time, we will discuss some of the math that brings Einstein's theories of space and time to life.

Credit 3 units. A&S: FYS A&S IQ: NSM, AN

L31 Physics 125A Solar System Astronomy

Designed for the nonscience major, this course deals with the planets, their moons and rings, comets, meteorites and interplanetary dust particles. In order to understand both classical astronomy and the results obtained from modern telescopes and the space program, basic scientific ideas (including optics and the laws of motion) are reviewed first. There also is some discussion of astronomical history to show how we have arrived at our present ideas of the structure and evolution of the solar system. Prerequisites: high school algebra and trigonometry or concurrent enrollment in Math 131.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L31 Physics 126A Stars, Galaxies and Cosmology

Intended as a general survey for the nonscience major. Topics include the structure and evolution of stars, such as red giants, white dwarfs, neutron stars, pulsars and black holes; galaxies and quasars; cosmology and the Big Bang theory. Prerequisites: high school algebra and trigonometry, or concurrent enrollment in Math 131.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L31 Physics 130 Introduction to Mathematical and Computational Methods in Physics

This is a learning by doing course whose objective is for the students to learn practical methods for solving physics problems using mathematical and computational tools. The course gives an introduction to applied mathematics and basic computational tools and techniques used in contemporary scientific fields of research. The format of the course is highly interactive. Each course unit will be devoted to a specific activity, including a lecture from the instructor, working groups on solving analytical problems, and working groups on coding with Python. Prerequisite: Previous or concurrent Calculus I is recommended.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L31 Physics 141 Selected Topics in Physics I

Topics of special interest (e.g., superconductivity, quasicrystals, neural networks, chaos) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form (<https://physics.wustl.edu/independent-study/>).

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L31 Physics 142 Selected Topics in Physics I

Topics of special interest (e.g., holography, relativity, nuclear power, computer applications in physics) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form (<https://physics.wustl.edu/independent-study/>). Credit variable, maximum 3 units. A&S IQ: NSM Art: NSM BU: SCI

L31 Physics 173 Physics of Sustainable Energy

Introduction to the physics of climate change and sustainable energy. This course is intended for students with little previous exposure to science or math. We will learn about the value of rough estimates and simple calculations. We will apply this approach to energy and power; atoms and heat; the history and basic modeling of earth's climate; energy sources including fossil fuels, nuclear, and renewables. No prerequisites.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L31 Physics 191 Physics I

This is a calculus-based introduction to the concepts, laws, and structure of physics. Topics include kinematics, Newton's laws, energy, linear momentum, angular momentum, the conservation laws, gravitational force, harmonic motion, wave motion and interference, sound, and special relativity. A daily regimen of homework and reading as well as weekly homework assignments, small-group problem-solving exercises, and active class participation are integral parts of this course. Prerequisite: Previous or concurrent enrollment in Calculus I (Math 131) is required; previous or concurrent enrollment in Calculus II (Math 132) is strongly recommended. Students may not receive credit for more than one of Physics 117A, Physics 191, and Physics 197.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L31 Physics 191F Physics I — First-Years Only

This section of Physics 191 is for rising first-year students only. Any non-first-year students enrolled in this section will be removed from the course. Non-first-year students should enroll in Physics 191U. This is a calculus-based introduction to the concepts, laws, and structure of physics. Topics include kinematics, Newton's laws, energy, linear momentum, angular momentum, the conservation laws, gravitational force, harmonic motion, wave motion and interference, sound, and special relativity. Two evening exams are required, followed by a required final exam. Prerequisite: Previous or concurrent enrollment in Calculus I (Math 131) is required; previous or concurrent enrollment in Calculus II (Math 132) is strongly recommended. A combination of Physics 191 and Physics 191L is a replacement for Physics 197. Students may not receive credit for more than one of Physics 117A, Physics 191, and Physics 197.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L31 Physics 191L Physics I Laboratory

Laboratory experience is an integral component of introductory physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Prerequisite/corequisite: Physics 191. Students may not receive credit for Physics 191L if they have already received credit for Physics 117A or 197.

Credit 1 unit. Arch: NSM

L31 Physics 191U Physics I — Sophomores, Juniors, and Seniors Only

This section of Physics 191 is for rising seniors, juniors, and sophomores only. Any first-year student enrolled in this section will be removed from the course. First-year students should enroll in Physics 191F. This is a calculus-based introduction to the concepts, laws, and structure of physics. Topics include kinematics, Newton's laws, energy, linear momentum, angular momentum, the conservation laws, gravitational force, harmonic

motion, wave motion and interference, sound, and special relativity. Two evening exams are required, followed by a required final exam. Prerequisite: Previous or concurrent enrollment in Calculus I (Math 131) is required; previous or concurrent enrollment in Calculus II (Math 132) is strongly recommended. A combination of Physics 191 and Physics 191L is a replacement for Physics 197. Students may not receive credit for more than one of Physics 117A, Physics 191, and Physics 197.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L31 Physics 192 Physics II

Continuation of Physics 191. Calculus-based introduction to concepts, laws, and structure of physics. Topics include electromagnetic forces and fields, direct current circuits, capacitance and inductance, electromagnetic radiation, light, physical optics, interference and diffraction, early quantum theory, and nuclear physics. A daily regimen of homework and reading as well as weekly homework assignments, small-group problem-solving exercises, and active class participation are integral parts of this course. Prerequisite: Physics 191, Physics 193 and Calculus I (Math 131); previous or concurrent enrollment in Calculus II (Math 132) is very strongly recommended. Students may not receive credit for more than one of Physics 118A, Physics 192, and Physics 198.

Credit 3 units. A&S IQ: NSM, AN BU: SCI

L31 Physics 192L Physics II Laboratory

Laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Prerequisite/ Corequisite: Physics 192. Students who have taken Physics 118 or Physics 198 may not receive credit for Physics 192L.

Credit 1 unit.

L31 Physics 193 Focused Physics I

Physics 193 is the first part of a two-semester calculus-based introduction to physics. The course is an advanced first-year course in classical mechanics, taught at a more sophisticated level than Physics 191. The approach is that of an upper-division physics course, with more emphasis on underlying formal structure rather than breadth of topics. The main goal is to provide in-depth coverage of the physical laws that govern the motion of objects, forces, and forms of energy in mechanical systems as well as an introduction to special relativity. The course is particularly addressed to students considering a physics- or mathematics-heavy science or engineering major.

Corequisite: Math 132 or equivalent.

Credit 4 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L31 Physics 193L Focused Physics I Laboratory

Laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Required prerequisite or co-requisite: Physics 191. Students may not receive credit for Physics 191L if they have already received credit for 117A or 197.

Same as L31 Physics 191L

Credit 1 unit. Arch: NSM

L31 Physics 194 Focused Physics II

Physics 194 is the second part of a two-semester calculus-based introduction to physics, with a co-requisite of Calculus III (Math 233 or its equivalent). The course is an advanced first-year course in electricity and magnetism, taught at a more sophisticated level than Physics 192. The approach is that of an upper-division physics course, with more emphasis on the underlying formal structure, rather than breadth of topics. The main goal is to provide an in-depth coverage of electromagnetism, DC and AC circuits using complex variables, and optics. The course is particularly addressed to students considering a physics or mathematics heavy science/engineering majors

Credit 4 units. A&S IQ: NSM, AN BU: SCI

L31 Physics 194L Focused Physics II Laboratory

Laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Prerequisite/ Corequisite: Physics 192. Students who have taken Physics 118 or Physics 198 may not receive credit for Physics 192L.

Same as L31 Physics 192L

Credit 1 unit.

L31 Physics 205 General Physics I

This course is the first semester of a two-semester, calculus-based introductory physics course. In this semester, we will study the principles of Newtonian mechanics and their application to various physical systems. The material we learn this semester will serve as a basis for topics we will study in the second semester, such as electromagnetism. The aim of this course is to give you a robust introduction to the fundamentals of physics. Studying physics will also give you a better insight into other subjects like chemistry. The analytic techniques we develop will have a wide range of availability. Prerequisite: previous or concurrent enrollment in Calculus I.

Credit 3 units. A&S IQ: AN BU: SCI

L31 Physics 205L General Physics I Lab

The laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Prerequisite or Corequisite: Physics 205.

Credit 1 unit.

L31 Physics 206 General Physics II

Phys 206 is the second semester of a two semester, calculus-based introductory physics course. In this semester, we build on what we learned in the first semester to explore more advanced topics like electromagnetism and optics. A strong understanding of the topics covered in Phys 205 is essential for this semester. The aim of this course is to give you a robust introduction to the fundamentals of physics. Studying physics will also give you a better insight into other subjects like chemistry. The analytic techniques we develop will have a wide range of availability. Prerequisite - Physics 205. Previous or concurrent in Calc II is recommended.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L31 Physics 206L General Physics II Lab

Laboratory experience is an integral component of Introductory Physics. It is designed to provide a hands-on opportunity to explore concepts introduced in the lecture course and to develop careful measurement and documentation skills. Required prerequisite or co-requisite: General Physics II.

Credit 1 unit. Arch: NSM Art: NSM BU: SCI

L31 Physics 216 Introduction to Relativity: The Special Theory

Introduction to the special and general theories of relativity. Einstein's postulates of the principle of relativity and the constancy of the speed of light. Simple kinematics and dynamics: simultaneity, time dilation, space-time diagrams, twin and other "paradoxes," $E = mc^2$, laws of motion. Elements of general relativity; curved spacetime, experimental tests, black holes, gravitational waves. Prerequisite: Phys 191, Phys 193, Phys 197, or permission of instructor.

Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L31 Physics 217 Introduction to Quantum Physics

Theoretical and experimental basis for quantum mechanics, following the historical development of 20th-century physics. Failure of classical physics; the Bohr theory of the atom; the Heisenberg uncertainty principle; the Schrödinger equation; atomic and molecular structure. Prerequisites: Phys 191-192 or Phys 193-194 or Phys 197-198 or Phys 205-206.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L31 Physics 242 Selected Topics in Physics II

Topics of special interest (e.g., holography, relativity, nuclear power, computer applications in physics) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure the instructor's consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form (<https://physics.wustl.edu/independent-study/>).

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: IS

L31 Physics 312 Introduction to Astrophysics

This course covers the physics needed for higher level astrophysics courses, and is a requirement for those courses. Furthermore, it gives a first introduction to several topics in modern astrophysics, including stars (stellar structure and evolution), compact objects (neutron stars and black holes), galaxies (galactic structure), and cosmology. The course should be taken by everybody interested in astrophysics. Prerequisites: Physics 191 and 192 or Physics 193 and 194 or Physics 197 and 198 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L31 Physics 316 Optics and Wave Physics Laboratory

Introduction to optics and to treatment of experimental data. Experiments and lectures on refraction, interference, diffraction, polarization and coherence properties of waves with emphasis on light. Data analysis using statistical methods. Prerequisites: Physics 117A-Physics 118A or Physics 197-Physics 198.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L31 Physics 318 Introduction to Quantum Physics II

Application of elementary quantum principles to atomic and molecular physics, solid-state physics, and nuclear and particle physics. Prerequisite: Physics 217.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI

L31 Physics 321 Electronics Laboratory

Elements of linear and nonlinear circuits, amplifiers, feedback, with applications in experimental physics. Prerequisite: Phys 192, Phys 194, Phys 198, Phys 206, or permission of instructor. Two three-hour laboratories and two one-hour lectures per week.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI EN: BME T, DU, SU, TU

L31 Physics 322 Physical Measurement Laboratory

A variety of classical and modern experiments in physics, including five experiments in nuclear radiation. Use of computers in experiment control, data acquisition, and data analysis. Development of skills in writing lab notebooks and formal reports and giving short oral presentations on experiments. Two laboratory periods each week. Prerequisites: Physics 217 or permission of instructor; junior- or senior-level standing.

Credit 3 units. A&S IQ: NSM, AN, WI Arch: NSM Art: NSM BU: SCI EN: TU

L31 Physics 341 Selected Topics in Physics III

Topics of special interest (e.g., superconductivity, quasicrystals, neural networks, chaos) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form (<https://physics.wustl.edu/independent-study/>).

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L31 Physics 342 Selected Topics in Physics III

Topics of special interest (e.g., holography, relativity, nuclear power, computer application in physics) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure the instructor's consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form (<https://physics.wustl.edu/independent-study/>).

Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L31 Physics 350 Physics of the Brain

Concepts and techniques of physics are applied to study the functioning of neurons and neuronal circuits in the brain. Neurons and neural systems are modeled at two levels: (1) at the physical level, in terms of the electrical and chemical signals that are generated and transmitted; and (2) at the information-processing level, in terms of the computational tasks performed. Specific topics include neuronal electrophysiology, neural codes, neural plasticity, sensory processing, neural network architectures and learning algorithms, and neural networks

as dynamical and statistical systems. Course grade is based primarily on an individualized term project. Prerequisites: Phys 191-192 or Phys 193-194 or Phys 197-198 or Phys 205-206, or permission of the instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI EN: BME T, SU, TU

L31 Physics 351 Introduction to Biomedical Physics

Principles and application of key physical methods used in the diagnosis and treatment of diseases, and in biomedical research. Topics include interaction of radiation with living systems; fundamentals of optical and electron microscopy; imaging via X-rays, magnetic resonance, and ultrasound; and electrical properties of organs and cells. Prerequisites: Physics 191-192 or Phys 193-194 or Physics 197-198 or Phys 205-206.

Credit 3 units. Arch: NSM Art: NSM BU: SCI EN: BME T, TU

L31 Physics 352 Physics of Biomolecules

This course emphasizes the application of physical laws and concepts in understanding biomolecules and their interactions, and in developing tools to investigate their biological properties and functionalities. Topics include (1) a general introduction to biomolecules and cells, (2) physics of biopolymers as modeled by stochastic analyses, (3) transport processes in biological systems including diffusion, reaction kinetics, and "life at low Reynolds number," and (4) the physics of fluorescence and its contemporary applications to dynamics of biomolecules, such as optical tweezers. Prerequisite: Prerequisites: Physics 191-192 or Phys 193-194 or Physics 197-198 or Phys 205-206. Some familiarity with thermodynamics and Chemistry 111A-112A recommended.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM

L31 Physics 354 Physics of Living Systems

One of the grand challenges in contemporary biophysics is placing our understanding of cellular systems on a firm quantitative footing. How does the collective activity of molecules enable the cell to sense its environment, make decisions, grow and develop? This course, aimed at physical and life science students, will serve as an introduction to the physical principles and mathematical techniques underlying the analysis of systems and synthetic biology. Topics will include modeling gene and signaling networks, the regulation of intracellular structures, and pattern formation in development. Students in this course can expect to learn both analytical and computer simulation approaches to fundamental problems in biology, biophysics, and biotechnology. Graduate students will explore the subject in more depth. Prerequisites: Physics 191-192 or Phys 193-194 or Physics 197-198 or Phys 205-206, or Math 217 or Math 309, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM BU: SCI EN: BME T, TU

L31 Physics 355 Physics of Vision

How do the eyes capture an image and convert it to neural messages that ultimately result in visual experience? This lecture and demonstration course covers the physics of how we see. The course is addressed to physics, premedical and life-sciences students with an interest in biophysics. Topics include physical properties of light, evolution of the eyes, image formation in the eye, image sampling with an array of photoreceptors, transducing light into electrical signals, color coding, retinal organization, computing with nerve cells, compressing the 3-D world into optic nerve signals, inferring the 3-D world from optic nerve signals, biomechanics of eye

movement, engineered vision in machines. The functional impact of biophysical mechanisms for visual experience is illustrated with psychophysical demonstrations. Corequisite: Physics 117A, Physics 197 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI EN: BME T, SU, TU

L31 Physics 360 Biophysics Laboratory

This laboratory course consists of "table-top" experiments in biological physics that are designed to introduce the student to concepts, methods, and biological model systems in biophysics. Most experiments combine experimentation with computer simulations. The list of available experiments includes electrophysiology, human bioelectricity, optical tweezers, ultrasonic imaging, mass spectrometer, and viscosity measurements. Prerequisites: Physics 191-192 or Phys 193-194 or Physics 197-198 or Phys 205-206 or permission of instructor. Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L31 Physics 400 Physical Science in 12 Problems

Exercises related to general chemistry, classical mechanics, quantum mechanics, statistical mechanics, thermodynamics, and kinetics, will be solved with numerical software. Each exercise will be accompanied by a lecture, a software template solving a problem and presenting a related take-home problem. The software will allow us to focus on, and treat in a transparent fashion, physical problems without the unwieldy idealizations and contrivances found in textbooks. Prerequisites: General Chemistry and/or Physics, and prior or concurrent enrollment in either Chem 401 or Phys 217. The lectures will be in person; however, a complete set of taped lectures will also be available. A remote help session will be scheduled at a mutually agreed-upon time. There are no quizzes, exams or a final. Same as L07 Chem 400

Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 411 Mechanics

Motion of a point particle, rotational motion, oscillation, gravitation and central forces, Lagrangian and Hamiltonian formulation. Prerequisites: Physics 191-192 or Phys 193-194 or Physics 197-198 or Phys 205-206, Math 217, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 421 Electricity and Magnetism

Starting from Coulomb's law, the Biot-Savart law, and Faraday's law, the electrical and magnetic fields are defined and applied. Maxwell's equations are derived and their consequences, such as electromagnetic waves and relativity, are explored. Prerequisites: Physics 191-192 or Phys 193-194 or Physics 197-198 or Phys 205-206, Math 217, or permission of instructor. Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM BU: SCI EN: BME T, DU, SU, TU

L31 Physics 422 Electricity and Magnetism II

The second course in a two-part series covering the classical theory of electricity and magnetism leading to the derivation and application of Maxwell's equation. Topics in electrodynamics including Faraday's law, the displacement current and Maxwell's equations in vacuum and in matter are covered. Electromagnetic waves and radiation, special relativity and relativistic electrodynamics also are discussed. Prerequisite: Physics 421 or permission of instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM EN: BME T, DU, SU, TU

L31 Physics 427 Introduction to Computational Physics

What does it mean to solve a research problem using a computer? What is the difference between "someone ran a simulation" and an interesting research result? And what skills does it take? Familiarity with a programming language is, of course, essential, but that is only the beginning. This course will focus on the methodology of computational research, touching also on topics in numerical analysis, statistics and visualization. The format will combine lectures and hands-on experience, with emphasis on research-style small-group projects. Prerequisites: Physics 191-192 or Phys 193-194 or Physics 197-198 or Phys 205-206, Calculus, and familiarity with a programming language. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 435 Nuclear and Radiochemistry Lab

Application of radiochemistry to problems in chemistry, physics, and nuclear medicine, with emphasis on particle detectors and experimental techniques. Prerequisites: 3 units of physical chemistry or quantum mechanics, or permission of instructor. One lecture hour and five hours of laboratory a week. Same as L07 Chem 435. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 436 Introduction to the Atomic Nucleus

Introduction to the production and decay of radioactive nuclides, the structure and properties of nuclei, and the applications of nuclear and radiochemical techniques to current scientific problems. Prerequisites: one year each of chemistry, mathematics and physics. Same as L07 Chem 436. Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 441 Selected Topics in Physics IV

Topics of special interest (e.g., holography, relativity, nuclear power, computer applications in physics) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure the instructor's consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form (<https://physics.wustl.edu/independent-study/>). Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L31 Physics 442 Selected Topics in Physics IV

Topics of special interest (e.g., holography, relativity, nuclear power, computer applications in physics) may be studied under the supervision of a faculty member, variously by lectures, seminars, or individual study or research. Students hoping to arrange such a course must prepare a proposal and secure the instructor's consent to undertake direction of the course from a faculty member and apply for approval using the Physics independent study web form (<https://physics.wustl.edu/independent-study/>). Credit variable, maximum 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 446 Galactic Astrophysics

In these lectures, the focus is on the dynamics and statistical mechanics of a collection of stars, which is treated as a collisionless system. The course begins with a discussion of potential theory and proceeds to discuss the density and phase distributions of stars in star clusters and galaxies, thus leading to an understanding of the equilibria and stability of these systems. Topics such as Chandrasekhar's dynamical friction, galaxy formation, and dark matter will constitute the final topics of discussion.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L31 Physics 450 Physics of the Brain

Contents are the same as Phys 350. Also intended for graduate students. Includes a more sophisticated term project than Phys 350. Prerequisites: Physics 191-192 or Phys 193-194 or Physics 197-198 or Phys 205-206 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI EN: BME T, SU, TU

L31 Physics 453 Topics in Theoretical Biophysics

Application of a range of physical models to biological systems. Topics include protein folding, self-assembling molecular systems, and mechanical properties of biological materials. Background material will be provided, but some exposure to statistical mechanics or thermodynamics is necessary. Prerequisite: experience with ordinary differential equations (as in Mathematics 217).

Credit 3 units. A&S IQ: NSM BU: SCI

L31 Physics 454 Physics of Living Systems

Contents are the same as Phys 354. Graduate students will explore the subject in more depth. Prerequisites: Physics 191-192 or Phys 193-194 or Physics 197-198 or Phys 205-206, or Math 217 or Math 309, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM EN: TU

L31 Physics 455 Physics of Vision

Contents are the same as Phys 355. Also intended for graduate students. Includes a more sophisticated term project than Phys 355. Prerequisite: Physics 191, Phys 193, Phys 197, Phys 206, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 456 Stellar Astrophysics

The course Stellar Astrophysics discusses the physical processes that play a role inside stars. Relevant physical processes include emissions and absorption processes, radiation transfer, convective transfer, the weak and strong interactions, nuclear processes and nuclear burning, and the thermodynamics of equilibrium and non-equilibrium processes in stellar interiors. Subsequently, these processes are used to explain the structure and evolution of stars of different mass ranges. Finally, the course discusses endpoints of stellar evolution including white dwarfs, neutron stars, black holes, supernova explosions and gamma-ray burst. Prerequisites: Physics 312, Physics 318, or permission of instructor. Same as L31 Physics 556

Credit 3 units.

L31 Physics 460 X-Ray & Gamma-Ray Astrophysics

Observers started to use X-ray and gamma-rays in the '60s and '70s to explore the cosmos with high-energy photons. The sky looks dramatically different at these energies with bright flares from mass accreting black holes and gamma-ray bursts and large diffuse emission from supernova remnants and cosmic rays interacting with galactic matter and magnetic fields dominating the emission. This course gives a comprehensive overview of the underlying physics and observable phenomenology. Topics covered include the history of X-ray and gamma-ray astronomy, high-energy radiation processes, particle heating and acceleration, accretion physics, blast waves and shocks, black holes, neutron stars, supernova remnants, gamma-ray bursts, and galaxy clusters. Prerequisite: L31 Physics 312.

Credit 3 units. A&S IQ: NSM Arch: NSM

L31 Physics 463 Statistical Mechanics and Thermodynamics

Basic methods of classical and quantum statistical mechanics, thermodynamics and transport theory. Prerequisite: Physics 217 or permission of instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L31 Physics 471 Quantum Mechanics

Origins of quantum theory, wave packets and uncertainty relations, Schrodinger's equation in one dimension, step potentials and harmonic oscillators, eigenfunctions and eigenvalues, Schrodinger's equation in three dimensions, the hydrogen atom, symmetry, spin and the periodic table, approximation methods for time independent problems, quantum statistics. Prerequisite: Math 217, Physics 217, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM EN: BME T, SU, TU

L31 Physics 472 Solid State Physics

Crystal structures, binding energies, thermal properties, dielectrics, magnetism, free electron theory of metals, band theory, semiconductors, defects in solids. Prerequisite: Physics 471.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 474 Introduction to Particle Physics

Introduction to the standard model of particle physics, including symmetries, conservation laws, the weak interaction, the strong interaction, quark confinement, and some more exotic ideas such as grand unified theories. Prerequisite: Physics 217.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L31 Physics 476 Astrophysics

This Astrophysics course focuses on cosmic rays. Victor Hess discovered in 1912 that ionizing radiation impinges on the top of Earth's atmosphere. Even though physicists have been studying cosmic rays (the ionizing radiation) for more than 100 years now with a fantastic repertoire of experimental and theoretical tools, cosmic rays never stop to surprise us, and cosmic ray physicists are still pushing the frontier of cosmic exploration in many ways. This course gives an introduction into this exciting topic covering historical and recent cosmic ray measurements at all energies, particle and antiparticle observations, and neutrino observations. The presently favored models of cosmic ray acceleration and transport are discussed in detail, and some topics of current interest are highlighted (including the production of particles

and antiparticles by dark matter). The course also covers radio astronomy and highlights the clues about the origin of the cosmic rays that can be obtained from radio observations. Prerequisite: Physics 312 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 477 Physics of Finite and Infinite Nuclear Systems

Quantum mechanics of finite and infinite systems of protons and neutrons. Interaction between nucleons. Independent-particle model of nuclei and shell structure. Contrast with atomic shell model. Isospin symmetry. Information from weakly and strongly interacting probes of nuclei. Nuclear decay properties and some historical context. Many-particle description of nuclear systems. Single-particle versus collective phenomena. Properties of excited states. Bulk properties of nuclei. Nuclear and neutron matter. Role of different energy scales in determining nuclear properties: influence of long-range, short-range, and medium-induced interactions. Pairing correlations in nuclear systems. Relevance of nuclear phenomena and experiments for astrophysics and particle physics. Prerequisites: Physics 318 or Physics 471, or permission of instructor

Credit 3 units. A&S IQ: NSM Arch: NSM

L31 Physics 478 From Black Holes to the Big Bang

An introduction to general relativity. The goal is to illustrate important features of general relativity without the full-blown mathematics of Einstein's equations by restricting attention to spherically symmetric spacetimes. Topics include: principle of equivalence; curved spacetime; spherical stars and black holes; the Big Bang model, observational cosmology. Prerequisite: Physics 411 or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 481 Critical Analysis of Scientific Data

Data science is most commonly associated with topics in computer science. However, efficient algorithms, specific software packages, neural nets, and so on are only tools, and they are easily misused. In a research setting, working with data is primarily an exercise in critical thinking. The purpose of this interactive, hands-on course is to learn from mistakes by making them in a safe environment. After covering/reviewing probability theory, Bayesian inference, elements of information theory, and random matrix theory, the course will focus on case studies of real-world biological data, such as quantitative imaging data, nextgeneration sequencing (metagenomics), and neural recordings. These modules will involve the critical reading of research papers and working through puzzle-based assignments. The primary modules will be supplemented by shorter presentations on topics chosen by students. Fair warning: This is explicitly not a course on "big data" or machine learning, although students may choose to explore some of these topics in their presentations (required for credit). Experience with MatLab or Python strongly encouraged or will need to be acquired during the course. Open to undergraduates with prior programming experience and a quantitative background (Phys 197/198, Math 203 or similar; contact instructor if unsure). Experience with data or statistics not required. Course mimics a research environment, and undergraduates considering an academic research track are especially encouraged.

Credit 3 units. Arch: NSM Art: NSM BU: SCI

L31 Physics 482 Research Seminar

Designed to introduce students to current developments in physics and to research carried out by faculty. Topics vary each year. Each member of the department addresses their particular specialty. Interested undergraduates may take this seminar in their junior or senior year. Must be taken pass/fail.

Credit 1 unit. A&S IQ: NSM Arch: NSM Art: NSM

L31 Physics 499 Honors Program

Prerequisites: junior standing, an average grade of B or better, and apply for approval using the Physics independent study web form <https://physics.wustl.edu/independent-study>. Program and credit to be determined; maximum 6 units.

Credit variable, maximum 3 units.

Political Science

The Department of Political Science offers undergraduates the opportunity to study all aspects of politics using cutting-edge technical and theoretical tools. Our courses are animated by long-standing problems related to the use of power, its rightful exercise by governments and individual actors, and the institutions that affect how that power is exercised. Reflecting the breadth of the discipline, we offer a range of classes, including courses on elections and electoral politics; international political economy; justice and the state; and comparative analyses of political institutions across states.

A major in political science thus exposes students to the primary themes of the discipline: American politics, comparative politics, international politics, judicial politics, political methodology and political theory. A major in political science can prepare students well for professional training and advanced study in law, business, education, journalism, policy analysis, political science, public administration, social work and urban planning. Political science graduates enter careers in business; federal, state and local government; the media; and nonprofit organizations.

Because political science is a broad discipline, students often choose to combine the major with such related fields as African and African-American studies; American culture studies; anthropology; economics; environmental policy; history; international studies; Jewish, Islamic, and Middle Eastern studies; Latin American studies; philosophy; psychology; and women, gender and sexuality studies.

Majors

The Major in Political Science

Total units required: Students who major in political science are required to complete 30 graded units (10 courses) in political science with a C or better, distributed as follows:

Required courses:

- **Substantive Introductory Courses:** 6 graded units must come from two introductory courses. (**Note:** Students scoring a 4 or 5 on a relevant AP exam may place out of the associated introductory course and replace it with an upper-level course in a related subfield.)
- **Methodology Course:** 3 graded units must come from either Data Science for Politics or Pol Sci 363 Quantitative Political Methodology. All majors are urged to complete this requirement during their sophomore year. (**Note:** Some statistics courses offered in other departments will allow students to opt out of this class, but those credits will not count toward their political science major. See the department website (<https://polisci.wustl.edu/>) for more information.)

Elective courses:

- **Distribution Requirement:** 18 graded units must come from any six 300- or 400-level courses, including at least one 400-level Capstone course (see below). Of these 18 units, students must complete at least one 3-unit course in three of the following fields: American politics, comparative politics, international politics, political methodology or political theory.
- **Other courses:** A student's remaining graded units may be earned by any political science course or independent study. However, credits given for writing a senior thesis (detailed in the Senior Thesis section below) do not count toward the major.
- **Capstone:** All majors must complete at least one 400-level class, home-based in Political science, as a capstone experience. Students writing a senior thesis satisfy this requirement by completing Pol Sci 495 Research Design and Methods.

Limitations

No more than 6 units from the following may count toward the major: internship, directed reading, directed research, or teaching practicum.

No more than 6 units from the following may count toward the major: study abroad, summer school, University College, or transfer credit.

Additional Information

Concentrations: Political science majors may concentrate in a subfield of political science by taking (as part of their distribution requirement) three upper-level courses in any one of the five subfields (American politics, comparative politics, international politics, political methodology or political theory) and submitting a subfield concentration form. Students may earn concentrations in up to two subfields. The successful completion of a subfield concentration will be listed on the student's transcript.

Senior Thesis: The department encourages serious students to pursue independent research by working toward a senior thesis. Students admitted to this program work closely with a faculty advisor for a full calendar year, beginning at the end of their junior year. Students writing a senior thesis receive 6 units of college credit for two semesters of work by enrolling in Pol Sci 415 Senior Thesis Research; however, this credit does not count toward the completion of the political science major. Although there is no grade-point average requirement for writing a senior thesis, an application is required. For more information, contact the department office. All majors may apply.

To qualify to write a senior thesis, students must do the following:

- Complete the methodology course requirement by the fall of their junior year (all majors are strongly urged to complete this requirement during their sophomore year).
- Complete Pol Sci 495 Research Design and Methods during the spring semester of their junior year.
- Complete a subfield concentration (detailed in the Concentrations section above) by the end of the fall of their senior year in the subfield appropriate for their senior thesis. At least two thirds of the concentration must be completed by the end of their junior year.
- Apply during their junior year for admission into the program.

Senior Honors: To graduate with Latin Honors, students must successfully complete a senior thesis and have a minimum grade-point average of 3.65, as specified by the College of Arts & Sciences.

The Major in Environmental Policy

Required units: 40

Students who major in environmental policy will be required to complete 40 graded units (13 courses), distributed as follows:

- 16 units from required foundation courses
- 9 units from research methods requirements
- 9 units from the list of upper-division courses in political science
- 3 units from a social science breadth requirement
- 3 units from a substantive distribution requirement

At least 24 of the total units must be at the 300 or 400 level.

We also strongly recommend that students complete a capstone experience. Possible options include a senior honors thesis, the environmental law clinic or an appropriate internship.

For additional information about this major, send an email to Jessica Droege (jdroege@wustl.edu).

Minors

The Minor in Political Science

Total units required: 15

Required courses: Students must complete a minimum of 15 graded units of course work with a C or better, including at least 9 advanced units.

Additional Information

No more than 3 units may be counted from among the following: Pol Sci 412 Directed Readings, Pol Sci 413 Directed Research, Pol Sci 419 Teaching Practicum in Political Science, summer school, University College courses, or credits from another institution (including study abroad).

Courses

Visit online course listings to view semester offerings for L32 Pol Sci (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L32&crslvl=1:4>).

L32 Pol Sci 101B American Politics

In a polarized era of American politics, it is critical to have a working knowledge of the American political process and the analytical skills with which to interpret contemporary events. This course is designed to accomplish these dual objectives. In the first few weeks of the semester, we will explore both the key principles of social scientific thinking and trace the evolution of the fundamental characteristics of American government. We will use this foundation throughout the remainder of the semester to assess the contemporary challenges to American institutions and the context in which they, and the general public, make decisions. At the end of the semester, students should be able to understand and critically engage with information about American politics as well as to actively engage with the American political system (should they choose to do so).
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S UColl: PSA

L32 Pol Sci 1021 The Business of Elections

This course will focus on understanding the primary and presidential elections — particularly the 2020 election — through a multidisciplinary approach that primarily involves political science and business. Campaigns are start-ups that rely on strategy, branding, influencing consumers (voters), financing and other concepts to achieve the election of their candidate. At the same time, American politics is highly polarized, with voters who are increasingly hostile to listening to the other side. Given this context, how does a campaign succeed as an entrepreneurial venture? This course will allow students to compare and contrast how different candidates' policies and platforms may affect different constituencies/sectors of the business/labor world as well as the economy, how the media portrays them, and what role they will play in the general election. This course is for first-year (non-transfer) students only. Students who are not first-year students will be automatically unenrolled from this course. Same as I60 BEYOND 102
Credit 3 units. Arch: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 102B Introduction to Comparative Politics

One of the primary goals of a course in comparative politics is to familiarize students with a broad array of political systems. The approach taken in this course can best be characterized as the active acquisition and use of a set of tools for looking at the political world. In other words, instead of putting emphasis on what textbook writers think political scientists know, in this course the emphasis is on "how we know what we know" and on building knowledge. This approach equips students with a set of tools to use long after the course is over. These comparative tools are focused on historical, recent and current events, and students are provided the opportunity to delve more deeply into a study of the parts of the world they find most interesting.
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA, IS EN: S UColl: PSC

L32 Pol Sci 103B International Politics

This is an introductory survey course. Its goal is to familiarize students with the basic concepts of International Relations (IR) as a subfield of political science and to introduce them to important issues, such as cooperation and conflict, independence, in the era of globalization, human rights and human development, and the environment.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

L32 Pol Sci 1041 First-Year Seminar: Introduction to Political Theory I

Why is democracy a good form of government? What if a benevolent dictator arose who wrote and enforced laws that were just and equitable? What if she honored the sanctity of human life and its flourishing, guaranteed a full range of liberties to her citizens — including political ones, such as the right of free speech and organization (but not including the right to rule)? Given the problems of most living democracies, why wouldn't this be a better regime than a democratic one? And are people really capable of governing themselves anyway? Why should we trust them so? In short, what's so special about "democracy" and its corresponding idol, "public opinion," that people bow to them as hallowed virtues of a good society? In this class we provide a framework in which these and other central questions of political theory have been and can be addressed. This course is designed to introduce students to the main theoretical issues of Western political theory, including but not limited to the following concepts: justice, legitimacy, equality, democracy, liberty, sovereignty and the role of history in the political and social world. In short, the questions are meant to explore the underlying assumptions and themes of contemporary politics and political science research today. The course is designed around the careful reading of primary text materials and engagement with contemporary problems of politics available on the front pages of any daily newspaper. Although designed as a two-semester class, students may enroll in either one or both. In this first semester, we lay out the fundamental themes of political theory in Plato's *Republic* and Aristotle's *Politics* asking, among other things, what justice is and what place democracy has among other forms of government. Passing briefly onto Augustine and Aquinas' struggles with religion and civil society, we emerge in modernity with Machiavelli's *Prince* and question whether the "good" and the "political" are or ought to be different aims. We conclude the semester with the social contract theory of Hobbes and Locke in which political legitimacy is based on the terms familiar to citizens of modernity: the right to rule is somehow related to a citizen's consent to be governed. In the spring semester, we turn to the struggle that modernity and

the Enlightenment raised for issues of politics, including that of history, nature, institution building and economics, guided by the texts of Rousseau, Hamilton and Madison, Tocqueville, Mill, Marx, Nietzsche, and Weber.

Credit 3 units. A&S: FYS EN: S

L32 Pol Sci 106 Introduction to Political Theory

This course offers an undergraduate level introduction to the field of political theory. We will focus on three major themes—social justice, power and freedom, and democracy—reading some canonical texts, such as Bentham's Introduction to the Principles of Morals and Legislation and Marx's Capital, but emphasizing contemporary works, such as those of John Rawls, Michael Walzer, Michel Foucault, and Robert Dahl.

Credit 3 units. A&S IQ: SSC Art: FAAM BU: BA EN: S

L32 Pol Sci 2010 Introduction to Environmental Policy

This course provides an introduction to and overview of environmental policy. Subjects covered include the policy process, the behavior of interest groups and political parties, and the actions of policymakers like Congress and the President. We will also examine issues such as pollution control, climate change, and biodiversity.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 2121 Topics: Sophomore Seminar in Ethnic Violence

This course is intended primarily for first-year and sophomore students. The topic of this course varies by semester, dependent on faculty and student interests.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, ETH EN: S

L32 Pol Sci 226 The Immigrant Experience

This course explores the history and politics of immigrant groups in the 19th and 20th century United States. Topics include legislation, patterns of migration, comparisons of different waves of immigration, and changing social attitudes.

Same as L98 AMCS 202

Credit 3 units. A&S IQ: LCD, SSC, SC, SD Arch: SSC Art: SSC BU: BA, HUM EN: S

L32 Pol Sci 227 Just Do It! Skills That Turn Passion Into Policy

The course focuses on skills related to the democratic expression of political rights and responsibilities. The course balances background knowledge of the issues with application. Students explore how to use coalition building and advocacy skills to relate to personal issues to public issues. Students research a current Missouri bill, create a strategic plan for its passage or failure, and prepare to give testimony on such bill in a mock House of Representatives committee hearing. Students also learn about ethical dilemmas in policy and politics and create a plan for turning their passions into policy.

Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L32 Pol Sci 240 Jewish Political Thought

This course uses the concepts of political theory to explore the diverse Jewish political tradition. While this tradition includes writing from and about the three historical periods of Jewish self-rule (including the modern state of Israel), most of the Jewish political tradition comes from the understanding of politics as

viewed from outsiders to mainstream communities. Additionally, Jewish political thought can be found through a Jewish community's self-understanding based on its interpretation of Jewish text and law by which it bound itself. Because we span over 2,000 years of recorded history, we will not attempt to discern a single "Jewish political thought" but rather look at JPT through the lens of familiar concepts of political theory. The fundamental questions we will explore are the relationship of the Jewish tradition to concepts such as authority, law, consent, sovereignty and justice. We will ask how the Jewish tradition views government and the relationship between the authority of God and the authority of temporal powers. We will explore these questions through a range of materials that include both primary and secondary literature.

Same as L57 RelPol 240

Credit 3 units. A&S IQ: HUM BU: BA EN: H

L32 Pol Sci 2500 Zionism

Zionism is often thought of as a commitment to the principle that the Jewish People, as a distinct "people," has a right to self-determination in its own historical land of the biblical Palestine. Yet the history of the term and the set of ideologies show a much more complex understanding. In this course we trace the emergence of a number of different "Zionisms" that would lead to the creation of the modern state of Israel. And we explore how the political principles at the core of these ideologies have fared in the 65 years since the founding of the modern Jewish state. The course is at its heart applied political theory: a case study of the way that ideas emerge from historical events, take on a life of their own, and then shape real outcomes in the world. The readings will weave together history, philosophy, literature and government.

Same as L57 RelPol 250

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 258 Law, Politics and Society

This course is an introduction to the functions of law and the legal system in American society. The course material stresses the realities of the operation of the legal system (in contrast to legal mythology), as well as the continuous interaction and feedback between the legal and political systems. There are four specific objectives to the course: (1) to introduce legal concepts and legal theories; (2) to analyze the operation of the appellate courts, with particular emphasis on the U.S. Supreme Court; (3) to analyze the operation of American trial courts, especially juries and the criminal courts; and (4) to examine the linkages between culture and law. Not open to students who have previously taken Pol Sci 358.

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 260 Game Theory in Science and Culture

Introduces the major intellectual insights of game theory in a nontechnical fashion, and examines the influence game theory has had on geopolitics, social philosophy, psychology, art and the humanities. In addition to covering the basic machinery of the theory, the class participates in numerous illustrative classroom games; examines game theory in film, literature and literary criticism; sees how game theory has contributed to social theory; and learns about the background of game theory and its history and perception as a hoped-for tool in the Cold War. Grades based on problems, short essays, two short essay exams and participation.

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 263 Data Science for Politics

We are on the doorstep of a new era of social science. Never before have political scientists had access to so much data about the attitudes and actions of individuals, institutions, and nations. Data on everything from the votes of members of the U.S. Senate in 1855 to terrorist attacks from around the globe are only a few clicks away. This class is designed to make you an active participant in this new data-rich world. The goal is to introduce you to the methods and practices by which you can use this data to answer questions that are important to us as political scientists and citizens. How many citizens currently approve of the president, and how do we know? What policies are most effective at reducing poverty? Which campaign ads are most effective at persuading voters? Can we affect the behavior of our Facebook friends just by sharing our opinions?

Credit 3 units. A&S IQ: SSC, AN BU: BA EN: S

L32 Pol Sci 3010 Gender, Politics, and Policy in the United States

This course surveys central topics in the study of gender and politics, covering such issues as women's participation in political parties and social movements, women as voters and candidates in political elections, feminism and the state, and gender and international politics. It draws on examples from various world regions and time periods to analyze similarities and differences across cases around the globe.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 3011 Computational Modeling in the Social Sciences

This course introduces students to the theory and practice of computational modeling in social science. Computational modeling allows us to explore topics — including complexity, emergence and dynamics — that are difficult to study using traditional analytic methods. This course covers the theoretical foundations behind computational modeling in addition to offering an introduction to the design and programming of such models.

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 3012 Advanced Modeling in the Social Sciences

This course explores advanced topics and issues in the building and validation of models in the social sciences. The principal component of the course is the design and development of an individual research project by each student. The conclusion of the course involves a public research symposium with a poster session in which all students present their models and findings to the broader campus community. Prerequisite: Pol Sci 3011 Computational Modeling in Social Science.

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 3024 International Organizations

This course surveys in an historically and theoretically informed fashion the role of various international institutions in international relations. It addresses the fundamental question of the contribution of international institutions to world order. The course first traces the historical evolution of international organizations before turning to international institutions since World War II. It then focuses on the following: the most important regional international organization, the European Union; the

most important international organizations dealing with the issues of peace and security, the United Nations and NATO; and the major international economic institutions, the WTO, the IMF, and the World Bank. Prerequisite: L32 103B.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS EN: S

L32 Pol Sci 3031 Race and Ethnicity in American Politics

This seminar discusses the continuing importance of race and ethnicity in American politics and the politics of racial minority groups in America. It examines the disadvantage minorities have in the American political structure, including problems with political participation. It examines how the structure and functions of the branches of government and its bureaucracy affect the aspirations of minorities. The role of pressure groups on political structure is discussed. Additional discussion focuses on urban politics and tensions.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 3044 Foundations of American Democracy

Since its founding, the United States of America has been strongly identified with principles of democratic rule. This course provides an introduction to some philosophical and historical foundations of American democracy. Over the course of the semester, we ask what democracy means and what it requires. We examine thinking about political rights and liberty at the American founding. We ask what democratic inclusion and political equality entail. We ask what democracy means, and what it should mean, in the American context, and whether and to what extent American institutions embody democratic ideals.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 3055 The Comparative Study of Legislative Institutions

This course focuses on understanding the variation in legislative institutions around the world.

Credit 3 units. A&S IQ: SSC BU: IS EN: S

L32 Pol Sci 306 American Political Thought

This is a course on American political and constitutional thought. The main theme is the problem of freedom: how it should be understood, and the constitutional and other conditions which sustain it. We also touch on questions of leadership, class and foreign policy as they relate to the main theme. We begin with the political thought of the American colonists, then turn to the Federalist/Anti-Federalist debate on the constitution, and trace these lines of thinking to a point just before the outbreak of the Civil War. Apart from writings of prominent American political thinkers such as Madison, Jefferson, Adams, Hamilton and Calhoun, we also consider the work of the foreign observer of American life and honorary American, Alexis de Tocqueville.

Credit 3 units.

L32 Pol Sci 3070 Politics and Policymaking in the American States

The American federal system is often overlooked in discussions about politics in the United States; however, state governments unquestionably touch the lives of Americans every day. As such, an education in American politics is not complete without serious examination of state governments and their political institutions. This course illuminates the importance of the American states

in U.S. politics and policymaking by critically examining topics such as intergovernmental relations; the historical evolution of American federalism; the organization and processes associated with state legislative, executive and judicial branches; state elections; political parties; interest groups; and specific state policy areas such as budgeting, welfare, education and the environment. Prerequisite: Pol Sci 101B.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 3073 Global War on Terrorism

This course presents an historical assessment of the Global War on Terrorism (GWOT) from the perspective of its major participants: militant Sunni Islamist jihadists, especially the Al-Qaeda network, and the nation-states that oppose them, particularly the United States and its allies. The course then concludes by analyzing the current state and future of Islamist jihad and the GWOT.

Same as L22 History 3073

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L32 Pol Sci 3090 Civil War and Peace

This course examines the causes and consequences of intrastate conflict as well as the potential solutions to it, drawing on examples from countries throughout the world, including Bosnia-Herzegovina, India, Iraq, Russia, Rwanda, Spain, etc. We consider many potential causes of intrastate violence, including ethnic and religious identities, economic and security concerns, elite manipulation, and international diffusion. In order to understand the challenges countries face recovering from violence, we subsequently examine different ways in which conflicts are conducted, as well as their consequences, including economic underdevelopment, rape, child soldiers and disease. Finally, using what we have learned about the causes and consequences of conflict, we analyze the utility of different tools for managing intrastate conflict, including, but not limited to, minority representation, consociationalism, decentralization and partition.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, IS EN: S

L32 Pol Sci 3093 Politics of the European Union

This course is designed to introduce undergraduates at the junior and senior level to the history and politics of the European Union (EU) and European integration. In the first part of the course, students will learn about the interplay of theory and practice in the history of European integration. In the second part, they will study the institutions and decision-making processes with reference to the theoretical concepts developed earlier in the course. From there, we will examine some of the key EU policies and their implementation during the third part of the course. In the final two sections of the course, we will look at constitutional politics and some of the more recent policies and developments.

Credit 3 units. A&S IQ: LCD, SSC BU: IS EN: S

L32 Pol Sci 3103 Topics

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 3171 Topics in Politics

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Credit 3 units. A&S IQ: SSC BU: ETH, IS EN: S

L32 Pol Sci 3180 Democracy: Causes and Consequences

This course examines the major international and domestic causes and consequences of democracy worldwide.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 3199 Teaching Practicum in Political Science

This course is an opportunity for students to assist in course instruction, tutoring, and preparation of problems, readings, and exam materials with permission and under supervision of instructor. Class hours to be arranged. Prerequisite: permission of instructor. Must be enrolled through department. See department for approval form.

Credit 3 units.

L32 Pol Sci 321 Comparative European Politics

This course is designed to provide students with an introduction to politics in Europe, with a focus on national politics. The course has two main goals. One goal is that students acquire a general understanding of the institutions of democratic governance and how they affect how voters' preferences are translated into government policy. As most European states are variations of parliamentary democracies, we pay particular attention to the connection between voters and policymakers through parliamentary institutions. The second goal is that students achieve a basic understanding of specific political systems in Europe and appreciate current political issues particularly those related to democratic transitions in Eastern Europe. Prerequisites: Pol Sci 102B Intro to Comparative Politics; Pol Sci 363 Quantitative Political Methodology (can be taken concurrently).

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, IS

L32 Pol Sci 3211 Public Opinion and American Democracy

This course is about the salience of public opinion and its influence on American Politics. Topics covered include many of the theories developed to explain how public opinion is formed, if and why it changes, and the relationship between public opinion and the political behavior of citizens and elites. Therefore, the course describes and analyzes many of the factors that influence the formation, structure and variation in public opinion: information processing, education, core values, racial attitudes, political orientation (ideology and party identification), political elites, social groups, the media and religion. Additional topics include presidential approval, congressional approval and the relationship between public opinion and public policy. The course also trains students in several concepts of statistical analysis (assuming no prior knowledge) so that students can use these tools as part of their own research projects. Prerequisite: previous course work in American politics or communications.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 3240 The Political Economy of Public Goods

This course explores the nature of public goods by investigating the economic and political rationales for providing them. We explore the endogenous creation of public goods, such as the formation of mutually agreed upon constitutions to protect property rights and the exogenous imposition of public goods,

such as the regulatory framework that provides clean air. Through the use of efficiency analysis, we explore the costs and benefits to alternative institutional arrangements, such as private property or market exchanges, to the government or voluntary provision of public goods.
Credit 3 units.

L32 Pol Sci 3255 Development of the American Constitution

The U.S. Constitution has been so long maintained because it has adapted to new circumstances. Contrary to common mythology, this adaptation goes far beyond formal amendment and court interpretation. But past performance is no guarantee of future results. The course examines the processes through which American constitutional democracy has developed, considers its successes and failures, and assesses some of its most pressing challenges. In doing so the course treats topics such as: the Electoral College; the justice system; executive powers in war and peace; Congress versus the president; regulation and taxation; civil rights and Reconstructions; amendment politics; and constitutional rhetoric and beliefs.
Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 326B Latin-American Politics

This course is an introduction to the politics in Latin America, focusing on the trend toward the establishment of democracy. We examine the impact of political culture, economic development, and the legacy of authoritarian regimes on contemporary politics. The course also reviews many of the most pressing challenges confronting governments Latin American governments: the role of the military in politics, the reform of political institutions, threats from radical guerrillas and drug traffickers, debt and economic restructuring, and relations with the United States. Country studies focus on Argentina, Brazil, Chile, Peru, Mexico, and Nicaragua. Prerequisites: 100-level introductory course in Political Science or its equivalent in History or IAS.
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS EN: S

L32 Pol Sci 327B African Politics

Credit 3 units. A&S IQ: SSC Art: SSC BU: IS EN: S

L32 Pol Sci 3292 Topics in Politics: Modern South Asian Politics

This course focuses on the recent political history and development of South Asia. It begins with a review of the British colonial period and the Independence movement. The remainder of the course examines different political issues in India, Pakistan, Bangladesh and Sri Lanka. Topics include political mobilization; land reform; law and politics; social movements; religious and caste politics; the rise of religious nationalism; and political control of the economy.
Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS

L32 Pol Sci 3296 Race and Ethnicity in the United States

This course is designed to explore relations within and between the racial and ethnic groups of the United States. Students examine the social, economic, and political similarities and differences of African Americans, Asian Americans, Latinos, and new immigrants that distinguish their American experience. Of particular interest are their respective experiences in relation to one another and the majority population for understanding the origins of conflict and unanimity within and between the

different groups. Students will pay specific attention to events in Ferguson, Missouri, and the tensions between political leaders, policing, and minorities more generally; the disproportionate levels of poverty experienced by African Americans and Mexican Americans; and the vilifying of certain minorities by the majority population.

Same as L98 AMCS 3296

Credit 3 units. A&S IQ: HUM, SD BU: BA, HUM EN: H

L32 Pol Sci 330 Topics in Politics

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.
Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 3302 Politics and Policies of Immigration in the United States

This class examines the history and politics of American immigration from colonial times to the present. It begins with an overview of the colonial period, then discusses the immigration waves of the 19th and early 20th centuries, and concludes with an examination of current topics and debates about immigration. Issues include racial, ethnic and class relations among groups; changes in immigration policies over time; comparative group experiences; transnational issues in immigration; and the impact of immigration on other American social and political processes and events. This class is a writing-intensive and modified version of Pol Sci 226/AMCS 202. Students who have taken that course should *not* take this course. Because this is a writing-intensive class, we also spend time studying research paper design and writing.
Credit 3 units. A&S IQ: SSC, WI EN: S

L32 Pol Sci 331 Topics in Politics: Theories of Social Justice

This course is intended primarily for sophomores and juniors. The topic varies by semester, dependent on faculty and student interests.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: ETH, HUM EN: S

L32 Pol Sci 331B Gender and American Politics

This course examines the ways in which issues pertaining to gender are salient in U.S. politics. The course is divided into four parts. First, we examine theoretical approaches to the study of gender and politics, including the use of gender as an analytical category and the relationship between gender, race, ethnicity and power. Second, we study gender-based social movements, including the suffrage and women's rights movements, women's participation in the Civil Rights Movement, the contemporary feminist and anti-feminist movements, the gay rights/queer movement and the women's peace movement. Third, we examine the role of gender in the electoral arena, in terms of how it affects voting, running for office and being in office. Finally, we examine contemporary debates about public policy issues, including the integration of women and gays in the military, sexual harassment, pornography and equal rights.

L32 Pol Sci 3323 The Democracy Lab

The U.S. states are often called laboratories of democracy because the lessons learned from an "experiment" in one state or city can inform other governments. This course embraces the idea that we can act as scientists in the laboratories of local government. The course teaches students about research design. We also help them design their own experiments and then give students the opportunity to work with local officials to help design, conduct and analyze an experiment relating to governance.

L32 Pol Sci 3325 Topics in Politics

This is a topics course in Political Science.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 3326 Topics in Politics: Legal and Political

This course is designed to be a readings and discussion course in Supreme Court decisions. The focus is on extensive coverage of the court's decisions in particular subject areas and their relationship to political and social factors and to public policies. The purpose of the course is to expose students in the social sciences to the decisions of the U.S. Supreme Court as indicators of political and sociological phenomena. PREREQUISITE: PERMISSION OF INSTRUCTOR ONLY.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 332B Environmental and Energy Issues

This course considers the major issues in these increasingly important areas of public policy. We will discuss the importance of political processes and actors on such phenomenon as pollution, global warming and wilderness protection. This course emphasizes the American experience but also considers international implications. Two lectures and one section meeting each week.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 333B Individual and Community

What social, political, and cultural forces shape the individuality of people and yet make them part of not just one community but many, each of which is greater than the sum of the individuals that comprise it? What role do families and friends fill in this process? Students explore answers to these questions by reading theories and case studies that try to explain the foundations of individuals' sense of self and the interdependence and responsibilities of individuals, families, and communities to

one another. Cases students read highlight (1) how family and communal experiences (like school) influence individuals and (2) how virtual (online) and non-virtual communities are structured and sustained as social entities. In addition to readings, the class will rely on guests from the "real world" as well as field trips into virtual and non-virtual communities. AMCS Majors may count this course for Fieldwork credit with permission of instructor; a supplemental assignment might be required.

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 335A International Organizations

The students participating in this course will have an opportunity to answer some of the most pressing questions about governance in the international system today. Why did the U.K. leave the European Union, and what does it mean for the remaining members? Is there a chance for international governance to address the climate crisis? How does NGO advocacy affect the behavior of nations? The course will resemble a graduate-level seminar; we will spend most of the class period in discussion of the weekly readings. Students will have an opportunity to independently study an issue or organization of their choosing, thus gaining a measure of expertise in an area of personal interest.

L32 Pol Sci 3363 Interchangeables, Influentials, and Essentials

Do you want to know how to obtain power? How to influence the powerful? Or even how to unseat those in power? In this course, we focus on how leaders, of all types, get and keep their jobs. Regardless of setting — democratic or dictatorial (or corporate, for that matter) — it is all about those whom the leader finds to be interchangeable, those the leader finds influential, and those who are essential. Students learn the "Rules to Rule By" and why, when leaders follow them, they often behave badly causing those they govern to suffer.

L32 Pol Sci 3400 Social and Political Philosophy

Study of certain fundamental issues concerning government, society and culture. For example: What are the nature and limits of legitimate political authority? Are ordinary human beings capable of governing themselves justly? Do citizens have a duty to obey the state? If so, to what extent, if at all, is that duty grounded in consent or contract? Should the state limit or regulate the personal relationships of citizens, such as marriage, family and sexuality? How should social institutions rectify a history of political or social injustice against oppressed groups? Readings from historical and contemporary sources. Prerequisite: one course in Philosophy at the 100 or 200 level, or permission of the instructor. Priority given to majors in philosophy and PNP.

Same as L30 Phil 340F

L32 Pol Sci 3403 The Politics of Congressional Elections

This course introduces students to the study of American legislative elections. The first part of the course focuses on congressional election campaigns, in which we discuss who runs for office, the incumbency advantage, campaign finance, congressional primaries, electoral competition, voter turnout, and vote choice. The second part of the course examines how electoral factors affect legislative politics, focusing on questions involving representation, accountability and lawmaking.

Prerequisite: L32 Pol Sci 101B Intro to American Politics.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 3411 Topics in Politics

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Credit 3 units. BU: BA

L32 Pol Sci 342 The American Presidency

Consideration of part played by the president in American politics and public policy. The powers of the president; the staffing and organization of the executive office; the relations of the president with Congress, the bureaucracy and other participants in American politics; presidential elections. Recommended: Pol Sci 101B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 3431 Constitutional Law

Introduction to constitutional law and practice in the United States. Emphasis on the role of the U.S. Supreme Court as an interpreter of the Constitution.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 344 Courts and Civil Liberties

This course focuses on constitutional law principles in the Bill of Rights, and examines how Supreme Court decisions influence these principles in everyday life. We explore how the courts, and particularly the Supreme Court, have interpreted these rights in light of changing times and emerging issues. Topics include the First Amendment; free exercise of religion and the establishment clause; freedom of speech, assembly and association; freedom of the press; the Fourth Amendment and the rights of those accused and convicted of crimes; the right to privacy, including reproductive freedom and the right to die; equal protection and civil rights, including race, gender, sexual orientation; immigrants' rights and voting rights; and civil liberties after September 11. Recommended for the Liberal Arts and Business (LAB) Certificate.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA, ETH, HUM

L32 Pol Sci 3441 Defendant's Rights

This course explores the operations of the American criminal justice system. Substantial emphasis on the constitutional rights accorded to the criminally accused. Readings consist primarily, but not exclusively, of Supreme Court cases.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA, ETH EN: S

L32 Pol Sci 345 The Legislative Process

Structure and behavioral patterns of American legislative bodies. Primary emphasis on the U.S. Congress, with attention to state legislatures for comparative purposes. Representation, internal patterns of influence, and policy-making processes. Prerequisite: junior standing.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 3462 The Politics of Privacy in the Digital Age

This course explores the changing nature of privacy in contemporary society.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: ETH EN: S
UColl: PSA, PSC

L32 Pol Sci 349 Politics in Bureaucracies

Focuses on politics and political conflicts involving bureaucratic organizations, primarily but not exclusively those of the federal government. Attention given to the characteristics of bureaucratic organizations and their members; their relations with one another as well as with other participants in policymaking also

considered. Major activities within bureaucracies — planning, program development, organizing, budgeting and service delivery — discussed with a view to clarifying their political implications and consequences; problems associated with controlling and changing bureaucracies.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 3507 Legal Conflict in Modern American Society

Thousands of lawsuits are filed daily in the state and federal courts of the United States. The disputes underlying those lawsuits are as messy and complex as the human, commercial, cultural and political dynamics that trigger them, and the legal processes for resolving those disputes are expensive, time-consuming and, for most citizens, seemingly impenetrable. At the same time, law and legal conflict permeate public discourse in the United States to a degree that is unique in the world, even among the community of long-established democracies. The overarching objective of the course is to prepare our undergraduate students to participate constructively in that discourse by providing them with a conceptual framework for understanding both the conduct and resolution of legal conflict by American legal institutions, and the evolution of — and values underlying — the substantive law American courts apply to those conflicts. This is, at core, a course in the kind of legal or litigation "literacy" that should be expected of the graduates of first-tier American universities. Some of the legal controversies that are used to help develop that "literacy" include those surrounding the permissible use of lethal force in self-defense, the constitutionality of affirmative action in university admissions, contracts that are unconscionably one-sided, sexual harassment in the workplace, the duty of landlords to prevent criminal assaults on their tenants, groundwater pollution alleged to cause pediatric cancers, and warrantless searches of cellphone locator data by police.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA

L32 Pol Sci 3551 The Welfare State and Social Policy in America

How can we understand the recent debate about fundamental health care reform? Should social security be partially or wholly privatized? Was the 1996 welfare reform a success? Contemporary political questions frequently focus on the American welfare state and the social policies that compose it. The first half of this course describes the American welfare state broadly construed, places it in a comparative context, and elucidates major political science explanations for the size and scope of American social policy. We touch on several areas of social policy while constructing the generalized lenses through which particular political outcomes can be understood. The second part of the course then focuses on three major aspects of the American welfare state: health care, old age pensions and policies related to work, poverty and inequality.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 3552 Political Economy of Democracy

In the past few years, a number of important books have appeared that combine elements of economics reasoning and political science, in an effort to understand the wide variation in economic development in the world. This course deals with the logic apparatus underpinning these books. In addition, the course introduces the student to the theoretical apparatus that can be used to examine democratic institutions in the developed world, and the success or otherwise of moves to democratization in the less-developed world.

L32 Pol Sci 3575 U.S. Foreign Policy: Theory and Practice

In this course, we will focus on the procedures and institutions that shape U.S. foreign policy decisions. This is neither a course on international relations theory nor a history of U.S. foreign policy. Rather, this course examines the domestic politics surrounding U.S. foreign policy decisions. How do public opinion, electoral politics, and interest groups shape foreign policy? Which branch controls foreign policy -- the president, Congress, the courts? Or is it ultimately the foreign affairs bureaucracy that pulls the strings? We will examine these topics through reading and writing assignments, class discussions, and simulations to promote deeper understanding and to build practical skills.

Same as L97 GS 3575

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 358 Law, Politics and Society

This course is an introduction to the functions of law and the legal system in American society. The course material will stress the realities of the operation of the legal system (in contrast to legal mythology) as well as the continuous interaction and feedback between the legal and political systems. There are four specific objectives of this course: (1) to introduce students to legal concepts and legal theories; (2) to analyze the operation of the appellate courts, with particular emphasis on the U.S. Supreme Court; (3) to analyze the operation of American trial courts, especially juries and the criminal courts; and (4) to examine the linkages between culture and law.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 358A Conscience and Religion in American Politics

Conscience is as American as apple pie and baseball, but its meaning and implications are deeply contested in American religion and politics. What is conscience? To what extent is conscience laden with theological — and, more specifically, Christian — commitments? What role should conscience, whether religious or ethical, play in political life? By considering what conscience means and what vision of politics it implies, we will reflect on what it means to be American: how religion should relate to politics, how individuals should engage with democratic laws and norms, and how religious and political dissenters might oppose American politics. We will focus on key moments in the history of American religion and politics through the lens of conscience, from the Interwar Period, the perceived threat of

communism during the Cold War, the Civil Rights Movement, and the Vietnam War to the "culture wars" on abortion, marriage equality, LBGQT rights, and the death penalty. This course draws on interdisciplinary sources from religious studies, political theory, law, and history in 20th- and 21st-century American politics.

L32 Pol Sci 359 The Mathematics of Elections

Voting procedures provide the most common means of aggregating the preferences of individuals into societal outcomes. These procedures play an integral role in our daily lives, from having a show of hands to decide which type of pizza to order for a club meeting, to electing a president. This course examines the effects that different voting procedures have on how groups make decisions. We evaluate electoral systems mathematically, by considering the various properties that procedures may or may not satisfy. A classic example is Arrow's Impossibility Theorem, which tells us that every electoral system must fail to satisfy one or more criteria of fairness or sensibility. In addition to Arrow's claim, we examine other legislative paradoxes and learn why the choice of electoral procedure is critical to our understanding of how "good" and "bad" decisions can be made. We also discuss the comparative properties of electoral systems in operation, such as fairness, proportionality, representativeness and legitimacy.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 3610 Legislative Politics

This course is an introduction to the politics of the U.S. Congress and the federal lawmaking process. We focus on the behavior of individual legislators and the role they play in crafting federal legislation in policy areas such as health care, civil rights and the environment. In general we examine questions such as: Why do legislators behave as they do? Whose interests are being represented?

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 362 Politics and the Theory of Games

This course is intended to cover through analytical discussion and illustrations the basic concepts and major achievements of Game Theory in different subfields of research in the social sciences today. We discuss examples of the usefulness of cooperative and noncooperative game theory to the study of human behavior in general and political science and political economy in particular.

Credit 3 units. A&S IQ: SSC, AN Arch: SSC Art: SSC BU: BA
EN: S

L32 Pol Sci 363 Quantitative Political Methodology

This is an introduction to research methodology and quantitative analysis for social scientists. Students are introduced to the logic of social scientific inquiry, and to the basic statistical tools used to study politics. Students learn and apply the following to answer substantive questions: measurement, descriptive analysis, correlation, graphical analysis, hypothesis testing, confidence intervals, analysis of variance and regression analysis. Major components of the course include learning how to collect, manage and analyze data using computer software, and how to effectively communicate to others results from

statistical analyses. Students work collaboratively on research projects in which they pose their own questions, design a study, collect and analyze the data, and present their findings in a research paper.

Credit 3 units. A&S IQ: SSC, AN Arch: SSC Art: SSC EN: S

L32 Pol Sci 3690 Politics of International Trade

In this course we study the relationship between international trade and domestic politics. We cover the basic models of international trade, the distributional consequences of international trade, the relationship between trade and economic development, an analysis of the trade protectionism (causes and consequences) and an analysis of international organizations related to international trade (special focus on the World Trade Organization). Prerequisite: Pol Sci 103B.

L32 Pol Sci 373 International Political Economy

Analysis of the interplay of economics and politics in the world arena, focused primarily on the political basis of economic policies in both advanced and less-developed societies. Treating differing perspectives on the international economy, production, trade and finance, and international economic relations. Prerequisite: junior standing or permission of instructor.

Credit 3 units. BU: IS

L32 Pol Sci 374 Contemporary American Foreign Policy

This course surveys post-war American foreign policy in historical perspective. It begins by evaluating the rise of the United States as a world power during the 20th century, its current position of primacy and its consequences in the post-Cold War period, and the distinctive traditions and institutions shaping the making of American foreign policy. It then examines the origins of the strategy of containment in the early Cold War period before considering how these debates animated the changing course of American foreign policy through the various phases of the Cold War conflict. The course concludes by analyzing American foreign policy since the end of the Cold War, up to and including debates about the consequences of September 11, 2001, for the United States' position of primacy, the Bush Doctrine and the American-led intervention in and subsequent occupation of Iraq.

L32 Pol Sci 381 The Politics of Electoral Systems

It is impossible to appreciate the variety of electoral systems used to select legislative bodies without taking a comparative perspective. We begin this course with a brief consideration of what goals political founders and reformers are pursuing when they design an electoral system. Then we define the conceptual dimensions along which electoral rules can vary. With these basic concepts in hand, we then study specific national cases to assess the impact of electoral laws on party systems, legislator behavior, and interbranch relations. After completing a series of case studies, we return to a comparative perspective to discuss recent scholarly research in this field. This research conceives of electoral systems as incentive structures for voters, candidates, parties and politicians. To wrap up the course, we return to the question of what founders and reformers can hope to achieve when selecting electoral systems.

Credit 3 units. A&S IQ: SSC, WI BU: BA EN: S

L32 Pol Sci 3881 The Politics of Electoral Systems

It is impossible to appreciate the variety of electoral systems used to select legislative bodies without taking a comparative perspective. L32 Pol Sci 391 History of Political Thought I: Justice, Virtue, and the Soul

This course offers a critical introduction to the main issues and debates in western political theory, including but not limited to the topics of justice, legitimacy, equality, democracy, liberty, sovereignty, and the role of history in the political and social world. This course is designed to be the first in a three-semester sequence on the history of political thought, and students are encouraged, but not required, to take the courses in chronological sequence. The first semester begins with ancient Greek political thought, and follows its development up to the early 16th century.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S UColl: ML

L32 Pol Sci 391A Democracy and Citizenship Seminar II

What does it mean to be a citizen in a democratic society? What are the rights of citizenship and what are its responsibilities? How are the answers to these questions different for citizens of the United States of America, with its particular history, values and status in the world? Enrollment in this seminar is limited to freshmen who have been admitted to the Democracy and Citizenship Amersand Program.

Credit 1 unit.

L32 Pol Sci 392 History of Political Thought II: Legitimacy, Equality, and the Social Contract

Government is often justified as legitimate on the grounds that it is based on the consent of the governed. In History of Political Thought II: Legitimacy, Equality, and the Social Contract, we examine the origins of this view, focusing our attention on canonical works in the social contract tradition, by Thomas Hobbes (1588-1679), John Locke (1632-1704), Jean-Jacques Rousseau (1712-1778), David Hume (1711-1776), and Immanuel Kant (1724-1804). This course is the second in a three-semester sequence on the history of political thought. Students are encouraged but not required to take all three courses. Prerequisite: one previous course in political theory or political philosophy.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 393 History of Political Thought III: Liberty, Democracy and Revolution

How, if at all, should the political institutions of the modern state express and secure the liberty and equality of citizens? What is the political significance of private property? Is world history to be understood as progress toward one best form of government — capitalist democracy, perhaps, or communism? What forces drive history? We address these and other timeless political questions through close reading and rigorous analysis of classic texts in the history of Western political thought. Authors studied include Kant, Hegel, Marx, Tocqueville, John Stuart Mill and Nietzsche. Prerequisite: one previous course in political theory or political philosophy. The course is designed to be the third in a three-semester sequence on the history of political thought, and students are encouraged but not required to take the courses in chronological sequence.

This course is part of the Semester in DC Program.

Credit 3 units. EN: S

L32 Pol Sci 4010 Pluralism, Liberalism and Education

How should liberal democratic states respond to religious and cultural pluralism? In what ways is pluralism different from mere disagreement, and what normative implications does pluralism have for public policy? How can liberal states justify using their coercive power against a background of pluralism and in ways that systematically disadvantage certain religious and cultural groups in society? In particular, what is to be done when religious parents and the liberal state make conflicting judgments about the proper education of children? When should the state defer to parental judgments and what are the grounds for legitimately refusing to do so? Readings are taken from contemporary political philosophy. Prerequisites: Pol Sci 106, Pol Sci 107, Phil 340 or permission of instructor.

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 4013 Negotiating Major Legislation in Congress

This course examines the outcomes of the legislative process in the United States. The first third of the course examines key concepts and major determinants of the negotiation process: majority rule instability, agenda control, political parties, the amendment process and the uncovered set. The rest of the course examines the negotiations that led to some of the most significant legislation in the past 100 years, from the Federal Reserve Act of 1913 through the Voting Rights Act of 1965 to the immigration bill of 2006. Along with other assignments, each student writes several drafts of a major research project on a

major piece of legislation. Each research project examines the amendments offered, the strategic intentions of the amendments' sponsors, the agenda process and the role of party. Prerequisite: Pol Sci 101B.

Credit 3 units. A&S IQ: SSC, WI EN: S

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 4024 The Meaning of National Security in the 21st Century

The 21st century has brought with it new challenges to national security. Standard assumptions about nations and the borders that separate them have been brought into question, and one of the results of this is that the very meaning of national security is undergoing change. Instead of threats to security coming from outside national boundaries, they now often exist within and across borders. This course focuses on contemporary ideas about these issues. It includes a brief overview of current discussions of national security, but it is primarily devoted to examining the conceptual resources we have for making sense of national security in a new world.

L32 Pol Sci 4025 Experiments in Politics

This will be a lab-style seminar in which we will design, field, and analyze an experimental study on political attitudes or political behavior. Our ultimate goal will be to publish a scholarly article in a peer-reviewed journal in political science. Prerequisite: L32 363 Quantitative Political Methodology or L32 263 Data Science for Politics (can be taken concurrently).

Credit 3 units. BU: BA

L32 Pol Sci 4030 Political Theory of Education

This course explores issues of authority, legitimacy, citizenship, freedom and equality through contemporary readings in the political theory of education. What is to be done when parents, citizens and educational experts make conflicting judgments about the proper education of children? When should the state defer to parental judgments and what are the grounds for legitimately refusing to do so? How should public schools aim to equip their students for the responsibilities of citizenship in a diverse liberal democratic state? What do the concepts of equality and equality of opportunity mean in the context of education, and (how) should governments pursue these values through education policy? We explore these issues through contemporary works of political theory as well as through considering a number of important U.S. court cases, including those dealing with the schooling of children from minority religious and cultural groups, affirmative action in university admissions, and school desegregation plans. Prerequisite: one previous course in political theory or political philosophy.

Credit 3 units. A&S IQ: SSC BU: ETH EN: S

L32 Pol Sci 4035 Chinese Politics

China, one the few remaining communist states in the world, has not only survived, but also become a global political actor of consequence with the fastest growing economy in the world. What explains China's authoritarian resilience? Why has the CCP thrived while other communist regimes have failed? How has the Chinese Communist Party managed to develop markets and yet keep itself in power? What challenges have the 1978

market reforms brought to the CCP regime? How has China been handling thorny issues such as corruption, pollution, instability in multiethnic border regions, Internet usage in the face of technological change, and COVID-19 pandemic? This course will explore these questions in three parts. It will prepare students with the political economic foundation to conduct research and/or analyze policies in contemporary China. Same as L97 GS 4035
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS

L32 Pol Sci 4040 Capstone Seminar in International Politics: Public Policy Responses to Global Poverty

This course is designed for senior political science majors with a background in international politics (refer to prerequisites). In this course we examine the theoretical and empirical literature on the causes of global poverty and evaluate public policy responses from the international community. Topics include: foreign aid (including micro finance), debt relief, trade reform, global health initiatives and private-public partnerships. Students are expected to have a strong theoretical background in the tools and concepts in political science and a strong interest in development topics. As a capstone class, the teaching style focuses on a student-centered classroom, where students run the class and help moderate discussions with outside speakers. Prerequisites: Pol Sci 103B, one advanced course in international politics, and a second advanced course in either international or comparative politics.
Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 4043 Public Policy Analysis, Assessment and Practical Wisdom

This course provides an introduction to the study, professional practice, ex-ante and ex-post assessment of public policy and the professional practice of public analysis. We rely heavily on David L. Weimer and Aidan R. Vining's text, *Policy Analysis: Concepts and Practice*. This course covers a series of critical concepts in the understanding of practicing, analyzing and assessing public policy.
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L32 Pol Sci 405 Topics in Political Thought

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: ETH

L32 Pol Sci 4050 Political Representation

In this class we study the concept of representation. Historically, how has representation been conceived? Conceptually, what should count as political representation, and must it always be democratic? As a normative problem, what should representatives do? And how should institutions be designed to foster these normative ends? Readings provide a broad overview of the subject and address enduring questions, including problems of minority representation, voting rights and redistricting. Prerequisite: Pol Sci 106 or Pol Sci 107.
Credit 3 units. A&S IQ: SSC BU: ETH EN: S

L32 Pol Sci 4053 Citizenship: Historical, Cross-Cultural, and Interdisciplinary Perspectives

Although some have posited that citizenship may become obsolete in an increasingly globalizing and interconnected world, citizenship has never been more relevant. Discussions of migration, statelessness, naturalization policies, borders, and so many other contemporary topics hinge on questions of citizenship. In this course, we will be taking an interdisciplinary

approach to the study of citizenship, drawing on a wide range of work from historians, social scientists, journalists, and writers. This is an interdisciplinary and transnational course intended for advanced undergraduate and graduate students. Examples will draw from around the world and from a variety of disciplines. Assigned materials include the work of historians, anthropologists, political scientists, sociologists, and journalists as well as novels, films, and audio and visual sources.
Same as L93 IPH 4052

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA EN: H

L32 Pol Sci 406 Topics in Political Thought

Credit 3 units. A&S IQ: SSC Art: SSC BU: HUM EN: S

L32 Pol Sci 4070 Global Justice

This course examines contemporary debates and controversies regarding global justice. Seminar discussions are arranged around significant issues in the current literature. For example: What (if anything) do we owe to the distantly needy? Do we have special obligations to our compatriots? Do political borders have normative significance? And so on. This course is of interest not only to political theorists, but also students in other fields interested in social justice or international relations generally.
Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L32 Pol Sci 4080 Voting Rights

This course will study legal concepts of voting rights and election law that impact the ability of citizens to access and participate in the democratic process. It will include the opportunity for students to directly engage in observing, monitoring, or advancing the right to vote during the 2008 elections. Election law changes rapidly and is the subject of legal and political dispute in a number of areas that will affect the franchise during the 2008 elections. This course will examine federal constitutional and statutory law governing the right of suffrage and assess current controversies in these areas. While there is no specific "right to vote" explicitly stated in the U.S. Constitution, over time, it has been amended or interpreted to protect the right of franchise from being abridged based on race, gender, property ownership, age and other qualifications. Legislative enactments have also established rights with respect to voting. Each extension of voting rights has been a product of and resulted in social and political change. This course will examine the interplay of law and politics in the right to vote. The course will begin with the study of constitutional foundations, statutory protections and case law. We will then apply these principles to current issues in voting rights, including voter registration, voter identification, provisional ballots, voting machines, access for people with disabilities, felony disenfranchisement, voter suppression and voter fraud. Students will apply this knowledge to voting rights during the 2008 elections through hands-on involvement in voter education, monitoring or advocacy. The course will conclude with an assessment of the current issues in light of observations made by students during the 2008 elections, with an eye toward the advancement of election law and full enfranchisement in the future. The course involves the study of fundamental Supreme Court cases, interactive discussion of contemporary debates, and review of current litigation and legislative proposals. The course will be supplemented by occasional guest visits by election officials, lawyers, legislators, voting rights advocates or others.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 412 Directed Readings

This is a course of readings in political science taken under the direction of an instructor in the department.
Credit variable, maximum 3 units.

L32 Pol Sci 413 Directed Research

Research activities or project in political science done under the direction of an instructor in the department.
Credit variable, maximum 3 units.

L32 Pol Sci 4131 Intolerance and Prejudice

Consideration of selected contemporary topics in social psychology. Participation in a research project of appropriate scope. Prerequisite: Psych 315.
Same as L33 Psych 413
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC

L32 Pol Sci 414 Directed Fieldwork

This course is a fieldwork project carried out under the direction of an instructor in the department.
Credit variable, maximum 9 units.

L32 Pol Sci 415 Senior Thesis Research

Intensive research. To be conducted under the supervision and guidance of a faculty sponsor of the thesis.
Credit 3 units.

L32 Pol Sci 419 Teaching Practicum in Political Science

This course is an opportunity for undergraduates to assist in course instruction, tutoring and preparation of problems, readings and exam materials with permission and under supervision of instructor. This course counts toward up to 6 hours of credit in an advanced field for the political science major.
Credit variable, maximum 3 units.

L32 Pol Sci 4212 Elections

This course examines how politicians and policies are selected by citizens in democracies. The literature exploring the rules and procedures that govern elections is perhaps the most theoretically and empirically sophisticated body of knowledge in the study of politics. We explore how differences in these institutional rules across a variety of democracies shape the types of strategic choices voters make, the coalitions that legislators form, whose interests are represented, the structure of parties, the career paths of politicians, and the policies that governments pursue. We further investigate how, when and why electoral rules are changed with reference to several recent cases of electoral reform.
Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 4231 Contemporary Issues in Latin America

How do the institutional designs of contemporary democratic governments help us understand the nature and quality of representation? We concentrate on variations in the powers granted presidents by constitutions as well as the institutional determinants of whether executives are likely to find support for their policies in the legislature. In addition, we explore how incentives established by electoral laws influence the priorities of members of congress. Given all these variations in democratic

institutional design, can voters go to the polls with the confidence that politicians will implement the economic policies for which their parties have long stood or which they promised in their campaigns?

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS

L32 Pol Sci 4241 Topics in American Politics: Race and Politics

From the moment enslaved Africans were brought to American shores, race and racism has been central to the American political project. In this class we examine how notions of race and racism inform conceptions of citizenship, the allocation of state resources, the development of political parties, and political participation. We also examine the way that race and racism influence public opinion.
Credit 3 units.

L32 Pol Sci 425 Law, Religion, and Politics

What is the role of religious argument in politics and law? What kinds of arguments are advanced, and how do they differ from one another? Are some of these arguments more acceptable than others in a liberal democracy? This course will explore these questions through the work of legal scholars, theologians and political theorists. Our topics include the nature of violence and coercion in the law, constraints on public reason, the relationship between religion and government, and the nature of religious practice and tradition.
Same as L57 RelPol 425

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH EN: H

L32 Pol Sci 426 Topics in American Politics:

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests. Prerequisite: Pol Sci 101B.
Credit 3 units. A&S IQ: SSC, SD Art: SSC EN: S

L32 Pol Sci 4260 Writing about Civil Rights

The substantive goal of this course is to study the civil rights movement in order to learn more about the role of social movements, federalism, the legislative process, the presidency, political parties and the courts in American politics. This is a writing-intensive seminar, limited to 18 students, each of whom write three essays. Each student submits an early draft of each essay, which is edited and returned to the student for polishing. There are review sessions on grammar, punctuation, word usage and paragraph construction. The readings for the course include some of the best essays on the subject of civil rights by W.E.B. DuBois, Malcolm X, Martin Luther King Jr. and others. Prerequisite: Pol Sci 101B.
Credit 3 units. A&S IQ: SSC, SD, WI EN: S

L32 Pol Sci 4271 Topics in Politics:

Credit 3 units. BU: BA

L32 Pol Sci 428 Topics in Comparative Politics: Politics and Identity

In this course, we will examine the relationship between politics and identity and the consequences for political stability and cohesion as a result of those relationships. We will consider different cases and explanations for the United States and, in comparative perspective, for how identity works with respect

to gender, race, ethnicity, class and sexual orientation in the pursuit of political or social goals. How do these different identities impact social and political conflict, local and national cohesiveness, and political participation?

Credit 3 units. A&S IQ: SSC, WI EN: S

L32 Pol Sci 4280 Political Intolerance in World Politics

This course is an investigation into the meaning, causes and consequences of political intolerance. Our goal is to expose students to contemporary research on: a) how political intolerance is conceptualized and understood, especially within the context of theories of democracy; b) how political intolerance can be measured, both at the level of the individual and the institution/society; c) where intolerance originates, both in terms of individual psychology and system-level politics; and d) what consequences flow from intolerance, especially in terms of legal and extra-legal political repression, as well cultural consequences (e.g., a "culture of conformity"). The course makes little distinction between American politics and politics in other parts of the world (although no knowledge of specific non-U.S. systems is required as a prerequisite).

Credit 3 units. A&S IQ: SSC Arch: SSP Art: SSP BU: BA EN: S

L32 Pol Sci 4281 Comparative Political Parties

An introduction to theories and concepts used in the analysis of political parties in democratic regimes, with emphasis on the classic literature covering West European advanced industrial democracies and the more recent scholarship on Latin American party systems. The course illuminates the complex aims, consequences and characteristics of modern party politics.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L32 Pol Sci 4291 Topics in Politics: Polarization in American Politics

This course examines the political polarization of the American political parties and explores its effects on the mass public and American democracy more generally. We examine what exactly is polarization, how it is measured, historical changes, potential causes, and its potential effects on the mass public and governance. Prerequisites: L32 Pol Sci 101B Intro to American Politics, L32 Pol Sci 363 Quantitative Political Methodology or equivalent.

Credit 3 units.

L32 Pol Sci 4299 Feminist Political Theory

This course asks how feminist thinkers from various political and intellectual traditions critique, adopt and transform political theories of justice, citizenship, property and the state. To uncover how different feminist theories have been adopted in the struggle for political transformation and social justice, we will pursue two main lines of inquiry. The first asks how feminist thinkers from various traditions critique and engage the history of political thought within the social contract tradition. We will ask, in particular, how gender, race, slavery, colonialism and empire shape conceptions of citizenship and property. We will also examine transnational feminist critiques of the public/private division in the Western political theory canon as it impacts the role of women and the social construction of women's bodies. During the second half of the semester, we will ask how various transnational social movements have engaged and adopted feminist theories in efforts to resist state violence, colonialism, labor exploitation and resource extraction. In following these lines of inquiry we will draw from postcolonial, decolonial, liberal, Black, radical, Marxist and Chicana feminist perspectives. Part

of our goal will be to uncover how various feminist theories treat the relationship between politics and embodied experience, how gendered conceptions of family life affect notions of political power and how ideas about sexuality and sexual conquest intersect with empire-building. Majors and minors in WGSS receive first priority. Other students will be admitted as course enrollment allows.

Same as L77 WGSS 429

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L32 Pol Sci 4331 Topics in Politics: The Two Dimensions of Electoral Politics

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 4373 Immigration, Identity and the Internet

This class examines a critical issue in contemporary societies: How do changes in technology affect the process of immigration and how immigrant identity is shaped?

Credit 3 units. A&S IQ: LCD, SSC, SC, SD, WI Arch: SSC Art: SSC EN: S

L32 Pol Sci 4400 Advanced Social and Political Philosophy

A selective investigation of one or two advanced topics in the philosophical understanding of society, government and culture. Readings may include both historical and contemporary materials. Possible topics include: liberalism, socialism, communitarianism, citizenship, nationalism, cosmopolitanism, social contract theory, anarchism, and the rights of cultural minorities. Prerequisites: one course in philosophy at the 300 level, graduate standing, or permission of the instructor. Same as L30 Phil 4400

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L32 Pol Sci 4402 Topics in Political and Social Theory: Constitutionalism

This course is intended primarily for sophomores and juniors. The topic of this course varies by semester, dependent on faculty and student interests.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L32 Pol Sci 440A Religion, Politics, and the University

This course explores in depth current issues related to pluralism, difference, and belonging in matters pertaining to religion and other important issues, with a particular focus on how these play out in the university context. The instructors, John Inazu and Eboo Patel, are two of the leading national commentators on these issues. Prerequisite: Students enrolling in this class must submit a brief statement of interest (<http://law.wustl.edu/COURSES/INAZU/seminar1/summaries/>) to Professor John Inazu.

Same as L57 RelPol 440

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L32 Pol Sci 4451 Contemporary Politics in India

This seminar examines current topics and controversies in contemporary Indian politics. The course has three main foci: the links between politics and economic liberalization over the past two decades; the links between ascriptive identities such as religion, caste and gender and contemporary political processes, including ethnic and gender quotas; and the changes in party

politics at the national and state levels that have accompanied the decline of Congress party dominance. Specific topics include the role of caste and religion in contemporary politics; the rise of state parties and its effects on federal relations; the effects of economic reform and globalization on economy and society; urbanization and migration flows; the rise of modern Hindu nationalism; and the links between collective violence and electoral politics.

Credit 3 units. A&S IQ: LCD, SSC BU: IS EN: S

L32 Pol Sci 450 Topics in American Politics:

Credit 3 units.

L32 Pol Sci 4504 Contemporary Democratic Theory

Contemporary debates in democratic theory have produced a number of challenging and provocative accounts of how democratic institutions can and should work. In this course we analyze a number of competing theories of democracy and assess the similarities and differences among them. Although the course focuses primarily on theoretical issues, special attention is given to how empirical research in the social sciences on democratic institutions and procedures informs and clarifies these debates.

Credit 3 units.

L32 Pol Sci 4505 American Political Parties

This seminar introduced students to core literature on political parties with a strong bias toward recent research.

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 451 Topics in American Politics: Supreme Court

This seminar has two purposes: to introduce students to the state of the art in studies of the Supreme Court and to cover a series of particular topics with emphasis on the major controversies within the field of law and the courts.

Credit 3 units.

L32 Pol Sci 4513 Topics in Politics: Criminal Law and Criminal Justice: Homicide

Seminar investigates current controversies surrounding the homicide laws. Topics include the definitions of homicide and claims of self-defense, the controversies about admissions of evidence at various stages of prosecution, and the debates about the use of capital punishment (including the capital punishment of youths). Includes general academic readings, readings of recent court opinions, and guest discussants from the legal community.

Credit 3 units. A&S IQ: SSC, WI Art: SSC BU: BA

L32 Pol Sci 4522 Topics in American Politics

This course is intended primarily for sophomores and juniors. The topic varies by semester, dependent on faculty and student interests.

Credit 3 units.

L32 Pol Sci 4551 Seminar in Political Economy

This research seminar introduces the student to recent work on the political economy of democracy. We start with a historical account of the development of democratic institutions in Britain and the United States, and then continue with recent work on modeling elections. We compare elections in countries that make use of proportional electoral systems, such as Israel,

with those like the United States and Britain that are highly majoritarian. Finally, we discuss the forces of democratization and globalization. The required work for the seminar is a research paper approximately 20 pages (double-spaced) in length.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L32 Pol Sci 4552 Comparative Political Economy

This seminar introduces the student to aspects of social choice theory, applied to themes to do with the economic origins of democracy, democratization and the stability of social orders. We read and discuss a number of recent books: Acemoglu and Robinson on *Economic Origins*; North, Weingast and Wallis on *Violence and Social Order*; Przeworski on *Democracy and Development*; Ferguson on *Money*; Collier on *Wars, Guns and Votes*. If time permits, we discuss recent work by Stern on the *Economics of Climate Change*. Students are expected to work on two short research papers, either empirically or theoretically based, and make a presentation of their work near the end of the semester.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L32 Pol Sci 4621 Politics and the Theory of Games

This course covers basic primitives and more sophisticated tools of game theory as they are used in contemporary political science. It covers some issues of the forefront of contemporary research in game theory as the central analytical tool in studying the science of politics. The main substantive issues are the emergence of law and order in society, markets vs. political mechanisms, and the distinctive characteristics of parliamentary vs. presidential democratic systems. The course also includes some real case studies, basic experiments and, in general, a lot of fun.

Credit 3 units. A&S IQ: SSC Art: SSC

L32 Pol Sci 4625 Topics in Politics

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L32 Pol Sci 464 Topics in American Politics: The United States in Vietnam: Origins, Developments and Consequences

This course focuses on America's involvement in Vietnam from the era of French colonialism through the collapse of United States intervention. Special attention is given to political, military, economic, and cultural aspects, as well as to international relationships, and the significance of the experience and subsequent developments upon both American and Vietnamese societies.

Same as L22 History 4894

Credit 3 units. A&S IQ: HUM, LCD EN: H

L32 Pol Sci 4646 Democracy: Theory and Practice

What does it mean to govern democratically? Why value democratic government? What role, if any, should notions of rights, representation, and deliberation play in theorizing about and empirical research into problems of democratic governance? What lessons can we learn about democracy from scholars writing in the traditions of feminist theory and critical race theory? What is the relation between democracy and knowledge? Should democracy extend beyond the boundaries that define the nation-state? Should (some aspects of) the economy be democratized? During the fall of 2018, we will have the opportunity to ask these

and related questions in the context of the U.S. midterm election. We will engage in debates about contemporary democratic theory while we follow developments in the campaigns leading up to the November election.

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 4731 Global Political Economy

This course will borrow on the insights of international relations scholarship and economic theory to develop a broad understanding of international economic relations. Specifically, this course attempts to address the following two sets of questions: 1) How do global economic relations fit into the broader category of international relations? How do the existing theories in international relations (liberalism, realism and Marxism) help us understand international economic relations between nation-states? 2) What are the effects of these international economic forces (trade, finance and multinational production) on domestic governments and societies?

Credit 3 units. A&S IQ: LCD, SSC Art: SSC BU: IS EN: S

L32 Pol Sci 4761 Politics of International Finance

In this course we examine the complex relationship between international finance, economic development, and domestic politics by drawing on the recent scholarly literature in economics, political science and finance. The focus is on the theoretical literature on both the determinants of international financial flows and its effects on domestic societies. Specially, we focus on five forms of international finance: (1) international equity markets (stocks), (2) flows of foreign direct investment (multinational corporations), (3) currency markets (with a special focus on currency crisis), (4) international debt and (5) international aid.

Credit 3 units. EN: S

L32 Pol Sci 480 Topics in International Politics: Growth and Development

Credit 3 units. A&S IQ: SSC Art: SSC EN: S

L32 Pol Sci 4861 Seminar on American Election and Voting

Survey of major contributions to the study of American elections and voting behavior; patterns of voting through time as well as contemporary cross-sectional patterns.

Credit 3 units.

L32 Pol Sci 489 Politics of Regulation

Events such as the Gulf oil spill and the economic meltdown have dramatized the importance of regulation in the United States, and at the same time called into question the most fundamental beliefs about the nature of the regulatory process. This course reviews the notion of market failure as basic to understanding the rationale for government regulation; it also examines theories of governmental failure as a source of skepticism and concern regarding impediments to effective regulation. Much of the course reviews the development of regulatory machinery in the 20th century. We examine the political forces that have resulted in expansion of the institutions of regulation — interest groups, partisan conflict, legislative negotiation, and executive leadership. We examine these forces in detail in examining the political and legislative response to recent financial and environmental crises.

Credit 3 units. A&S IQ: SSC, WI EN: S

L32 Pol Sci 491 Collection and Analysis of Qualitative Data

This course covers basic techniques for collecting, interpreting and analyzing qualitative data. Students select a research project, collect appropriate qualitative data and conduct a preliminary analysis. Students learn how to gather several types of qualitative data, including participant observation and open- and closed-ended interviews. In addition, they evaluate and analyze primary data collected by others including oral histories, archival records, interview transcripts. We consider the advantages and disadvantages of non-randomly collected data, such as those gathered through ethnographic and archival methods. We assess the utility of building statistical datasets from such data, and students learn the basic techniques of using computer programs such as Nvivo and Atlas.ti for qualitative data. Biweekly assignments that focus on different aspects of collection and analysis are designed to help students produce a research paper as a final project.

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 495 Research Design and Methods

This course provides an introduction to qualitative and quantitative research methods in political science. Topics address issues related to theory building as well as theory testing. Technical issues related to these methods are not the focus of this course, as are theoretical issues regarding the advantages and disadvantages of the different approaches. Ultimately, the goal of this course is twofold: (1) to instruct students to critically analyze scholarly articles with particular attention to research design; and (2) to guide students in how to design an original research project. Both the reading assignments, including methodological and applied readings, and the written assignments are directed toward these goals.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L32 Pol Sci 496 Game Theory and Collective Choice

An introduction to models of collective choice important in political science, including game theory, the spatial voting model and axiomatic social choice theory. The course concentrates primarily on noncooperative game theory, whose main topics include: strategic and sequential forms, Nash equilibrium, solution by backward induction, imperfect information, repeated games; and applications to voting, campaigning, public goods, agenda design, bargaining and collective action. With noncooperative games as a foundation, the course then examines cooperative game theory (games in coalition form), voting as a social choice mechanism (including the median voter theorem and global cycling theorems), and social-choice possibility theorems (such as Arrow's Theorem). Prerequisite: Math 131 Calculus I or Pol Sci 5052 Mathematical Modeling, or equivalent.

Credit 3 units. A&S IQ: SSC EN: S

L32 Pol Sci 49PK The Founding Fathers' Government in an Electronic Age

This is a research seminar that examines how Americans sought to translate their notions of government into a realistic set of priorities and a functioning set of public institutions. Extending from 1789 through the 1820s, this course investigates how the federal government came into being, what it did, and who populated the civilian and military rank of American officialdom. This is also a course in digital history. Students create new knowledge through their own contributions to an ongoing digital

project that seeks to reconstitute the early federal workforce. In the process, students learn a variety of digital techniques, ranging from encoding languages to electronic systems to software packages.

Same as L22 History 49PK

Credit 3 units. A&S IQ: HUM EN: H

Portuguese

Portuguese is the sole official language of seven countries spanning three continents: Angola, Brazil, Cape Verde, Guinea-Bissau, Mozambique, Portugal, and São Tomé and Príncipe. In addition, Portuguese enjoys co-official language status in East Timor, Equatorial Guinea and Macau. It is the sixth most spoken language worldwide and the fifth most spoken on the internet.

Among the countries where Portuguese is an official language, Brazil stands out as a formidable emerging 21st-century economic power. With a population of more than 190 million people, it is one of the 10 largest markets in the world.

Students learning Portuguese are often initially attracted by the array of vibrant Lusophone cultures, but the language is also appealing for pragmatic reasons to increasing numbers of business, economics, political science, anthropology and environmental studies majors. Many students are interested in Latin American Studies or globalization, or they are curious about Brazil's rich natural resources and booming technology industry.

Portuguese is an outstanding supplement to any student's education. For those already fluent in Spanish or other Romance languages, Portuguese represents the chance to take a fast-paced course sequence and be fluent more quickly in multiple languages.

At Washington University, Portuguese classes are marked by the same joyful, positive environment that is characteristic of many Lusophone cultures. Outside the classroom, students can improve their fluency at cultural events, the *bate-papo* (conversation) group, and Lusophone movie nights, in addition to choosing from study abroad programs affiliated with the university, either for the summer or for an entire semester.

Bem-vindos!

Phone: 314-935-5175
Email: eliza.williamson@wustl.edu
Website: <http://rll.wustl.edu>

Faculty

For a list of affiliated faculty, please visit the Department of Romance Languages and Literatures faculty (p. 1015) page.

Majors

The Department of Romance Languages and Literatures offers two years of intensive course work in Portuguese. Although there is not yet an official major in this area, students can opt to include Portuguese as one of their three languages of concentration in the pursuit of a Romance languages major. For more information about this option, please email Eliza Williamson (eliza.williamson@wustl.edu).

Minors

The Department of Romance Languages and Literatures offers course work in Portuguese; however, there is not yet a minor in this area.

Courses

Visit online course listings to view semester offerings for L37 Portug (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L37&crslvl=1:4>).

L37 Portug 101 Portuguese I

Introduction to Portuguese language. The course emphasizes acquisition of communicative ability. It also covers basic grammar points through reading and writing activities. Classes are taught entirely in Portuguese. No prior experience in the language is required.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L37 Portug 102A Portuguese II

Introduction to Portuguese language. This second course in the Portuguese program emphasizes acquisition of communicative ability. It also covers basic grammar structures through reading and writing activities. Classes are taught entirely in Portuguese. Prerequisite: Portug 101 or permission of instructor.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L37 Portug 103 Portuguese for Romance Language Speakers I

Intensive and accelerated course especially designed to take advantage of students' knowledge of Spanish and to promote a more rapid learning of Portuguese. Classes are entirely taught in Portuguese and stress oral communication, basic use of grammar, reading and writing skills. Intermediate online placement exam in Spanish is required.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L37 Portug 104 Portuguese for Romance Language Speakers II

This course intends to offer a sequence in the learning process initiated in Portug 103. It is a fast-paced class, designated for Spanish speakers with the objective of improving conversational, writing and reading skills. Prerequisite: Portug 103 or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L37 Portug 215 Reading and Conversation I

The goal of this course is to review and enhance the content learned at the basic level. Through culturally relevant readings and related conversational activities, students are expected to enrich their vocabulary, gain fluency, and improve both reading comprehension and writing skills. Prerequisites: two college semesters of Portuguese or permission of instructor.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L37 Portug 220 Reading and Conversation II: Intermediate Portuguese

This course is a continuation of Portug 215, therefore an intermediate level in the Portuguese section. Its main goal is to improve students' reading proficiency, as well as to provide a class environment in which conversational skills can be practiced and made into a solid foundation. In addition, the class provides tools to expand vocabulary and promote a cultural understanding of Brazil. Prerequisite: Portug 215 or permission of instructor.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L37 Portug 399 Undergraduate Independent Study

Prerequisite: permission of the department.

Credit 3 units.

L37 Portug 400 Independent Study

Credit variable.

Psychological & Brain Sciences

Psychological & Brain Sciences allows students to examine in depth the study of behavior in the following areas:

- Aging and development
- Biological bases of behavior
- Clinical and psychopsychology
- Cognition
- Cognitive neuroscience
- Learning and memory
- Personality
- Sensation and perception
- Social interactions

The Department of Psychological & Brain Sciences at Washington University has particular strengths in the following areas:

- Aging
- Behavioral economics
- Human development
- Diversity science
- Cognitive neuroscience
- Emotion
- Judgment and decision making
- Learning and operant conditioning
- Neuropsychology

- Personality and individual differences
- Adult psychopathology
- Sensory processes in vision and audition
- Social theories of self and social processes
- Human emotion

There are also many opportunities for undergraduates in this department:

- Research involvement with faculty members
- Supervised internships with community service agencies
- Practicum in Applied Behavior Analysis: Autism Spectrum Disorder
- Study abroad
- Concentrations within the major
- Senior honors
- Membership in Psi Chi, the national honor society in psychology

Majors

The Major in Psychological & Brain Sciences

The field of psychology encompasses a large and diverse area of study that is empirical, theoretical and practical. As the science concerned with the study of behavior, psychology includes such areas as the biological bases of behavior; brain-behavior interactions; learning; memory; cognition; motivation; emotion; sensation and perception; the study of social interactions, persuasion and attitudes; aging and development; personality; clinical, psychopathology and health psychology; and leisure and work experiences. Psychology is a valuable multipurpose discipline in which to major. It has relevance for those considering careers in law, medicine, the health professions, education and business. In addition, it provides important skills and knowledge for those who may not be planning additional schooling.

Total units required: 34 units, of which at least 25 must be at the 300 level or above

Required courses:

- Psych 100B Introduction to Psychology is a prerequisite for all upper-level courses (300 level and above). Exemption from Psych 100B is possible in the following circumstances:
 - Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
 - An Advanced Placement (AP) psychology test score of 5, an International Baccalaureate (IB) score of 6 or 7, or a British A-Level grade of A. (**Note:** The AP, IB, or British A-Level earns an exemption from Psych 100B but no units of credit toward the major.)
- Psych 300 Introduction to Psychological Statistics
 - Math 2200, Math 3200, or DAT 120 may substitute for Psych 300 but earn no units of credit toward the major. No AP math course can substitute for Psych 300.
- Psych 301 Experimental Psychology or Psych 3011 Experimental Psychology

Core requirements: At least one course* from each of the following five categories:

Social/Personality:

Code	Title	Units
Psych 305	Health Psychology	3
Psych 315	Introduction to Social Psychology	3
Psych 353	Psychology of Personality	3
Psych 367	Positive Psychology: The Science of Happiness	3
Psych 395	Prejudice, Stereotyping & Discrimination	3
Psych 396	Psychological Dynamics of Empathy	3
Psych 4099	Human Evolutionary Psychology	3

Mental Health/Affective:

Code	Title	Units
Psych 3195	Abnormal Child Psychology	3
Psych 354	Abnormal Psychology/ Psychopathology and Mental Health	3
Psych 3501	Psychotherapy: Introduction to Practice and Research	3
Psych 3645	Understanding Emotions	3
Psych 367	Positive Psychology: The Science of Happiness	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

Biological/Neurological Bases of Behavior:

Code	Title	Units
Psych 330	Sensation and Perception	3
Psych 3401	Biological Psychology	3
Psych 345	Genes, Environment, and Human Behavior	3
Psych 3604	Cognitive Neuroscience	3
Psych 4046	Developmental Neuropsychology (Writing Intensive)	3
Psych 4182	Perception, Thought and Action	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

Behavior and Cognition:

Code	Title	Units
Psych 360	Cognitive Psychology	3
Psych 361	Psychology of Learning	3
Psych 358	Language Acquisition	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 433	Psychology of Language	3

Lifespan Development:

Code	Title	Units
Psych 219	The Infant Mind: Sophomore Seminar (this course can fulfill the core area, but units are counted as part of the "6 units rule" described below)	3
Psych 321	Developmental Psychology	3
Psych 325	Psychology of Adolescence	3
Psych 326	Introduction to the Psychology of Aging	3
Psych 358	Language Acquisition	3
Psych 4046	Developmental Neuropsychology (Writing Intensive)	3
Psych 427	Social Gerontology	3

* If a course falls into more than one category, it can only be used to fulfill one of those categories (i.e., no double-counting).

Elective courses: An additional 9 units of course work

6 Units Rule: No more than 6 units from the following course types may be used to satisfy the minimum requirements for the Psychology & Brain Sciences (P&BS) major:

- 100-/200-level courses (other than Psych 100B)
- Psych 333 Independent Study in Psychological & Brain Sciences
- Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences

- Psych 498 Study for Honors and Psych 499 Study for Honors
- Approved University College psychology classes
- Cross-listed courses not home-based in P&BS
- Transfer credits (students transferring from another college should refer to the Transfer Credit section below)

The Major in Psychological & Brain Sciences: Cognitive Neuroscience

How does the brain think? Cognitive neuroscience refers to the scientific study of the linkage between mental functions and the operation of the brain and nervous system. The goal of cognitive neuroscience is to provide an understanding of psychological processes such as attention, memory, thinking and emotion in terms of physical principles and biological components. At the same time, it aims to provide an understanding of the psychological constraints on how the brain functions, computes and generates behavior. Students who pursue the undergraduate major in cognitive neuroscience will gain a strong foundation in how to study the brain and mind at various levels of analysis, including cellular biology, brain systems, cognitive and affective function, and neural computation. In addition, they will gain an appreciation of the relationship between healthy cognitive and brain function and its breakdown in various disease states and disorders. The cognitive neuroscience major provides excellent preparation for a career in health and medical professions, scientific research, computer fields, education and law.

Total units required: 36-37 units/12 courses (plus prerequisites)

Prerequisites outside of Psychological & Brain Sciences (7 units):

Code	Title	Units
Math 132	Calculus II	3
Biol 2960	Principles of Biology I	4
Total Units		7

Note: Each of these prerequisites has its own prerequisites: Math 132 requires Math 131; for Biol 2960, taking Chem 111A and Chem 112A (concurrently) is strongly recommended. These are biology and pre-med prerequisites as well, and they are typically completed during a student's first year. They may alternatively be satisfied through AP credit or any other mechanism approved by the respective department or the college.

Core requirements(19 units):

Code	Title	Units
Psych 100B	Introduction to Psychology	3
Psych 300	Introduction to Psychological Statistics	3
Psych 301 or Psych 3011	Experimental Psychology	4
Psych 3401 or Psych 344	Biological Psychology Principles of the Nervous System	3
Psych 360	Cognitive Psychology	3
Psych 3604	Cognitive Neuroscience	3
Total Units		19

Note: The first three requirements (i.e., Psych 100B, 300, and 301/3011) are the same as those for the regular P&BS major. L33 Psych 344 is home-based in Biology; students should register under the cross-listed Psych L33 course designation, not L41 Biol 3411.

Exemption from Psych 100B is possible in the following circumstances:

- Completion of an equivalent course transferred from another institution, if approved by the director of undergraduate studies.
- An AP psychology test score of 5, an IB score of 6 or 7, or a British A-Level grade of A. (**Note:** The AP, IB, or British A-Level earns an exemption from Psych 100B but no units of credit toward the major.)

Math 2200 or Math 3200 or Marketing Statistics DAT 120 may substitute for Psych 300 but earn no units of credit toward the major. No AP math course can substitute for Psych 300.

Additional Biological & Cognitive Distributions (two courses — one each from Distribution A and B lists):

Distribution A eligible courses:

Code	Title	Units
Psych 321	Developmental Psychology	3
Psych 330	Sensation and Perception	3
Psych 358	Language Acquisition	3
Psych 361	Psychology of Learning	3
Psych 380	Human Learning and Memory	3
Psych 4099	Human Evolutionary Psychology	3
Psych 4182	Perception, Thought and Action	3
Psych 433	Psychology of Language	3

Note: Language Acquisition and Psychology of Language have an outside prerequisite of Ling 170D.

Distribution B eligible courses:

Code	Title	Units
Biol 3058	Physiological Control Systems	2
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains and Behavior	3
Psych 345	Genes, Environment, and Human Behavior	3
Physics 350	Physics of the Brain	3

Computation requirement (one course):

Code	Title	Units
CSE 131	Introduction to Computer Science	3
Psych 4175	Applied Statistical Analysis with R	3
Psych 5007	Statistics and Data Analysis in MATLAB	2

With prior approval, another course involving a significant computational/programming component may be substituted.

Capstone/depth requirement (9 units — one course each* from Groups A, B, and C):

Capstone/Depth A eligible courses:

Code	Title	Units
Psych 4046	Developmental Neuropsychology (Writing Intensive)	3
Psych 4048	Neuropsychology of Dementia	3
Psych 4182	Perception, Thought and Action	3
Psych 4413	Advanced Cognitive Neuroscience (Writing Intensive)	3
Psych 4450	Functional Neuroimaging Methods	3
Psych 4512	Neurobiology of Learning & Memory	3
Psych 4631	Introduction to Computational Cognitive Science	3
Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3
Psych 488	The Cognitive Neuroscience of Film	3

or an appropriate 400-level course from outside of the department, such as the following:

Code	Title	Units
Biol 4030	Biological Clocks	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4580	Principles of Human Anatomy and Development	3
Phil 4212	Philosophy of Neuroscience	3

Capstone/Depth B eligible courses (for capstone research/writing-intensive experience):

Code	Title	Units
Psych 4046	Developmental Neuropsychology (Writing Intensive)	3
Psych 4413	Advanced Cognitive Neuroscience (Writing Intensive)	3
Psych 444B	Independent Study for the Major in Psychological & Brain Sciences: Cognitive Neuroscience	3
Psych 498	Study for Honors (Writing Intensive)	3

Capstone/Depth C eligible courses: An additional 3 units from the Capstone/Depth A or B lists or, with prior approval, MBB 300/FYP 3001 (two consecutive semesters must be completed), Psych 333 (all 3 units must be completed in one semester and in one lab to be considered for approval), or Psych 498.

* If a course falls into more than one category, it can only be used to fulfill one of those categories (i.e., no double-counting).

Acceptance into the Psychological & Brain Sciences: Cognitive Neuroscience Major

Acceptance into the major is contingent upon an application and then approval by the major committee. As part of this application, the student will meet with an appropriate advisor, who will carefully review the requirements and oversee the student's progress. A brief one-page statement from the student about why they feel that the cognitive neuroscience major is appropriate for them will be requested as part of the application.

Washington University students will be considered for admission to the cognitive neuroscience major no sooner than during their third semester (sophomore year). Decisions are based on the student's statement and academic record as well as the interview with the major advisor.

Additional Information

Transfer Credit: If accepted by the College of Arts & Sciences, transfer credits will be evaluated by the director of undergraduate studies in the P&BS department for their applicability toward either major in P&BS.

Senior Honors Program in Psychological & Brain Sciences

Senior Honors: The primary goal of the honors program in P&BS is to provide students who have achieved a superior academic record with the opportunity to conduct a comprehensive empirical investigation under the direction of a faculty member.

To be admitted into the honors program, students must meet the following requirements:

- Have overall and P&BS grade-point averages of at least 3.65
- Complete both Psych 300 and Psych 301 (or Psych 3011)
- Have an approved honors research advisor

Concentrations in Psychological & Brain Sciences

To augment the broadly based P&BS major, the department offers concentrations for students who wish to engage more intensively with a specific area within the discipline. The concentrations are meant as an enrichment of the major, but only 3 units for the concentrations may be part of the regular P&BS major requirements.

A concentration requires a minimum of 12 units, which include required and elective courses (one of which must be at the 400 level). In addition, to complete a concentration, students will have to undertake an approved research assistantship (Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences) or an approved internship, practicum or honors thesis.

A concentration will be a valuable experience for students planning on graduate study in psychology or related fields or for those who have a particular interest or want to gain expertise in one of the approved concentrations. Each concentration will have a member of the faculty as the contact person who will meet with and advise students in the concentration.

Courses taken for a concentration may be used to fulfill no more than one of the core categories or distribution requirements of a P&BS major. No more than 3 units of course work taken for a concentration may be applied toward a P&BS major. None of the units for a concentration can be counted for any other major or minor (i.e., there is no double counting). For those pursuing the cognitive neuroscience major, the cognitive neuroscience concentration is not an option.

The Six Concentrations

Cognition in Children

This concentration allows students to acquire deeper knowledge of cognitive and social-cognitive processes that occur during infancy and early childhood. The courses for this concentration consider child development more generally and then explore in more depth the development of cognitive, conceptual, linguistic and social abilities.

Advisor/coordinator: Professor Lori Markson

Course work required:

Code	Title	Units
Psych 321	Developmental Psychology	3

Electives (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 219	The Infant Mind: Sophomore Seminar	3
Psych 358	Language Acquisition	3
Psych 4046	Developmental Neuropsychology (Writing Intensive)	3
Psych 4099	Human Evolutionary Psychology	3
Psych 4591 or Psych 4592	The Development of Social Cognition Development of Social Cognition (Writing Intensive)	3

Research mentorship: Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 444C or Psych 498/499)

Relevant faculty: Lori Markson, Rebecca Treiman and Desirée White

Cognitive Neuroscience

This concentration allows students to acquire deeper knowledge of the relationship between mind and brain. The courses for the concentration consider the neurobiological basis of psychological function at a more general level and then explore in greater depth specialized topics related to how higher cognitive processes (e.g., memory, attention, perception, emotion) emerge from brain function.

Advisor/coordinator: Professor Todd Braver

Course work required:

Code	Title	Units
Psych 3604	Cognitive Neuroscience	3

Electives (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 330	Sensation and Perception	3
Psych 3401	Biological Psychology	3
Psych 345	Genes, Environment, and Human Behavior	3
Psych 4046	Developmental Neuropsychology (Writing Intensive)	3
Psych 4048	Neuropsychology of Dementia	3
Psych 4182	Perception, Thought and Action	3
Psych 4413	Advanced Cognitive Neuroscience (Writing Intensive)	3
Psych 4450	Functional Neuroimaging Methods	3
Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3
Psych 488	The Cognitive Neuroscience of Film	3

Research mentorship: Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 444C or Psych 498/499)

Relevant faculty: Deanna Barch, Ryan Bogdan, Todd Braver, Ian Dobbins, Denise Head, Wouter Kool, Kathleen McDermott, Zachariah Reagh, Desirée White and Jeff Zacks

Reading, Language and Language Acquisition

This concentration provides students with a deep and broad knowledge of linguistic development. The courses take an in-depth look at the development of written and spoken language.

Advisor/coordinator: Professor Rebecca Treiman

Course work required:

Code	Title	Units
Ling 170D	Introduction to Linguistics	3

Electives (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 234	Introduction to Speech and Hearing Sciences and Disorders	3
Psych 358 or Psych 358W	Language Acquisition	3
Psych 433	Psychology of Language	3
Psych 4351 or Psych 4352	Reading and Reading Development (Writing Intensive)	3

Research mentorship: Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 444C or Psych 498/499)

Relevant faculty: Rebecca Treiman, David Balota, Lori Markson, Mitchell Sommers and Kristin Van Engen.

Lifespan Development

Many introductory courses in developmental psychology focus on the changes that occur from birth to adolescence. The concentration in lifespan development provides students with an understanding of the cognitive and physiological changes that occur over the lifespan, with a primary focus on older adulthood. A major goal of the concentration is to provide students with an understanding of the similarities and differences in development at different stages of the lifespan.

Advisor/coordinator: Professor Mitchell Sommers

Course work required:

Code	Title	Units
Psych 326 & Psych 427	Introduction to the Psychology of Aging and Social Gerontology	6

Electives (must include one of the following courses):

Code	Title	Units
Psych 321	Developmental Psychology	3
Psych 4048	Neuropsychology of Dementia	3
Psych 4301	Contemporary Topics in Cognitive Development	3

Research mentorship or internship experience: Students can complete this aspect of the concentration with either a prior approved research mentorship or an approved internship related to older adults (e.g., Psych 225, Psych 444C, or Psych 498/499). Successful completion of a paper is required in either case.

Relevant faculty for research mentorship: Mitchell Sommers, David Balota, Brian Carpenter, Sandra Hale, Denise Head, Lori Markson and Rebecca Treiman.

Possible internships: Students may work in an assisted-living facility or another community-based program designed to assist older adults. Other internships are available; contact Dr. Denise Head for opportunities.

Experimental Psychopathology

This concentration allows students to acquire more advanced knowledge of the ways in which psychologists study mental disorders. Current research demonstrates the importance of integrating psychological and biological variables to better understand the classification, etiology, and treatment of a wide variety of mental disorders, including schizophrenia, mood

disorders, anxiety disorders, substance use disorders and eating disorders. Students who pursue this concentration will develop a broad-based appreciation for conceptual and methodological issues that are central to research in psychopathology.

Advisor/coordinator: Professor Deanna Barch

Course work required:

Code	Title	Units
Psych 354	Abnormal Psychology/ Psychopathology and Mental Health	3

Electives (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Psych 374	Drugs, Brain, and Behavior	3
Psych 4541	Personality and Psychopathology	3
Psych 4557	Biopsychosocial Aspects of Eating Disorders and Obesity	3
Psych 4746	Biological Pathways to Psychopathology: From Genes and the Environment to Brain and Behavior	3
Psych 4765	Inside the Disordered Brain: Biological Bases of the Major Mental Disorders	3

Research mentorship: Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (e.g., Psych 225, Psych 444C, or Psych 498/499)

Relevant faculty: Deanna Barch, Ryan Bogdan, Josh Jackson, Tom Oltmanns, Tom Rodebaugh, Renee Thompson and Denise Wilfley

Personality and Individual Differences

This concentration allows students to acquire deeper knowledge of how and why individuals differ from one another and the ways in which individual (e.g., personality) and group (e.g., gender) differences influence behavior, emotion, experience, identity and psychopathology. The core course for the concentration (Psych 353) considers personality more generally. The seminars explore in depth specific aspects of personality and individual differences, including biological bases of individual differences (i.e., genetics), the interpersonal processes associated with personality and personality judgment, individual differences in self and identity, group differences and personality pathology.

Advisor/coordinator: Professor Tammy English

Course work required:

Code	Title	Units
Psych 353	Psychology of Personality	3

Electives (must include two courses, at least one of which is at the 400 level):

Code	Title	Units
Psych 345	Genes, Environment, and Human Behavior	3
Psych 3645	Understanding Emotions	3
Psych 367	Positive Psychology: The Science of Happiness	3
Psych 413	Contemporary Topics in Social Psychology	3
Psych 4541	Personality and Psychopathology	3
Psych 4555	Emotion Regulation	3

Research mentorship: Prior approved research mentorship with a relevant faculty member and successful completion of a research paper (i.e., Psych 225, Psych 444C, or Psych 498/499)

Relevant faculty: Tammy English, Patrick Hill, Josh Jackson, Tom Oltmanns, Michael Strube and Renee Thompson

Minors

The Minor in Psychological & Brain Sciences

Units required: 15

Required course:

Code	Title	Units
Psych 100B	Introduction to Psychology	3

Elective courses:

Four additional courses (i.e., a minimum of 12 units of additional course work) in P&BS, all of which must be at the 300 level or above

Additional Information

Students may receive exemption from the Psych 100B requirement only if an AP psychology score of 5, an IB score of 6 or 7, or a British A-Level grade of A is received. For exemption, no credit will be given; therefore, five applicable courses must be completed. No more than 3 units of an approved cross-listed course originating outside of P&BS, an approved psychology course taken in University College, an approved psychology course taken at another university, or an independent study-type course (e.g., Psych 333) may count toward the minor. (Transfer students must complete at least 9 advanced units of home-based P&BS courses at Washington University.)

For those who have a broad or general interest in P&BS, we recommend taking several courses from the five core areas of psychology (i.e., Social/Personality; Mental Health/Affective; Biological/Neurological Bases of Behavior; Behavior and Cognition; and Lifespan Development).

For those students who want to concentrate in a more specialized area, courses can reflect such specialization. For example, a student interested in the helping professions or counseling may wish to select from such courses as Psych 353 Psychology of Personality, Psych 354 Abnormal Psychology/ Psychopathology and Mental Health, Psych 361 Psychology of Learning and Psych 321 Developmental Psychology. A student wishing to pursue a specialization in experimental psychology/ neuroscientific bases of behavior may select from such classes as Psych 3401 Biological Psychology, Psych 361 Psychology of Learning, Psych 330 Sensation and Perception, Psych 360 Cognitive Psychology and Psych 3604 Cognitive Neuroscience and may also consider doing independent study (Psych 333).

Courses

Visit online course listings to view semester offerings for L33 Psych (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L33&crslvl=1:4>).

L33 Psych 100B Introduction to Psychology

survey and analysis of concepts, theory, and research covering the areas of biological psychology, human development, learning, memory, social psychology, and mental disorders and their treatment.. This is a general survey course designed to introduce students to the diversity of areas, approaches, and theories that comprise the study of mind and behavior. Psych 100B is required of all majors and is prerequisite to all upper-level courses in Psychology. Open to freshmen. Note: For first-year students with AP/IB exemption and for first-year students and sophomores concurrently enrolled in Psych 100B who are interested in exploring a few areas of psychology within a seminar format, see Psych 102 First-Year Opportunity: Contemporary Issues in Psychology.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 102 First-Year Opportunity: Contemporary Issues in Psychology

This seminar enables students to explore several of the ideas and issues in contemporary psychology. Each week a different issue is discussed, and students familiarize themselves with critical aspects of the issue and discuss and critically evaluate the pros and cons of each side. Open to First-Year students who are concurrently enrolled in or who have completed (or are exempt from) Psych 100B. Also open to Sophomores who are concurrently enrolled in Psych 100B. Sections are limited to 15 students

Credit 1 unit. A&S: FYO A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 105 First-Year Opportunity: Psychology of Young Adulthood

This course will cover selected topics relevant to the developmental, social, personal, and cognitive issues that young adults confront during their college years. Material will be drawn mainly from the field of psychology, and the emphasis will be on the scientific basis of concepts and on empirically supported strategies for growth and development. The knowledge gained may contribute to academic success, personal development, and a more rewarding social and academic experience over the course of college and beyond. This 1-unit course is only open to first-year students. Credit/no credit only.

Credit 1 unit. A&S: FYO

L33 Psych 107 The Science of #Slaying It! in College

You have spent the last 12 or so years "slaying it" as a student. You likely have developed lots of effective strategies for succeeding in school. Recently, our understanding of what those successful strategies are has greatly expanded. But, how do we know what skills are particularly helpful to do well academically? From psychological research! In this class students will learn about the psychological research that has illuminated which strategies are most helpful when studying, when in the classroom, and when asking for help. We will focus on how to most effectively study but will discuss other strategies as well. Students will also be asked to apply these skills in the other classes that they're taking this semester, with the hope that they develop and refine the skills they already have and continue slaying it as a student. Prerequisite: open only to freshmen and sophomores. Permission of instructor required. Credit/No Credit option only.

Credit 1 unit.

L33 Psych 109 First-Year Opportunity: Research in Psychology

Weekly presentations by various members of the psychology faculty; introduces students to research areas and current issues. Attendance at all lectures required. Open to freshmen and sophomores only. Prerequisite: Psych 100B. Credit/no credit only.

Credit 1 unit. A&S: FYO A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 111 First-Year Opportunity: Mindfulness Science & Practice

Mindfulness is a term that is becoming increasingly used in popular culture to refer to a set of skills associated with increased attentional focus, successful stress-management, and improved health, sleep, and emotional well-being. This course will expose students to the various facets of mindfulness from both an applied and scientific perspective, by teaching mindfulness skills through a set of easy-to-learn practices and exercises, and by surveying of empirical research regarding mindfulness effects on cognition, emotion, brain function, and health. The goal of the seminar will be to provide practical skills that can contribute to personal development, emotional well-being, and academic success, while also developing critical thinking skills in learning how to read and evaluate primary scientific literature on mindfulness. Open to first-year students only.

Credit 1 unit. A&S: FYO

L33 Psych 185 First-Year Seminar: Race and Racism

This first-year seminar aims to introduce students to theoretical and empirical research on race and racism. It will provide an overview of historical, sociological, political, epidemiological, and especially social psychological perspectives on racial bias. We will examine mechanisms that contribute to prejudice, stereotyping and discrimination. We will review how bias uniquely affects particular groups, including Native, Asian, Latino, white and Black Americans. We end the course with discussions about interracial interactions.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 221 First-Year Seminar: Introduction to Memory Studies

This course focuses on memory not only as an individual phenomenon but also how our memories for historical events can be determined by the groups to which we belong. We will survey such topics as experimental methods and findings in the study of individual memory; questions of accuracy and vividness of memory; false and illusory memories; eyewitness memory reports that are used in trials; methods to greatly enhance learning and memory; and people with extraordinary memories. We then transition to the study of collective memory, or how our memories and identities are shaped by the groups to which we belong. The topics will include transmission of memories and identity through narratives; shared historical memories; battles over how the past is to be remembered; and revision of the memories of the past to meet concerns of the present. We also consider how memory is used in political arguments. Enrollment is restricted to 19 first-year students.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 225 Internship in Psychology

This course provides an opportunity for students to gain practical, applied experience in a non-academic, community service agency. For a description of prerequisites, course goals, agency selection, registration policies, and course requirements, students should obtain a copy of "Internships in Psychology," which is available in room 207B of Somers Family Hall or on the Psychological & Brain Sciences website (<http://psychweb.wustl.edu/undergraduate>). This course can be taken only once, and it is open to junior and senior Psychological & Brain Sciences majors only. Credit/no credit only. Prerequisite: Permission of instructor.

Credit 3 units.

L33 Psych 235 Practicum in Applied Behavior Analysis: Autism Spectrum Disorder

This is an opportunity for students to be trained in applied behavior analytic techniques and to work with a child with autism/pervasive developmental disorder. Training and supervision will be arranged and coordinated by the family of the child and their consultant. To receive credit, students must undertake a year's work with the child, complete the minimum number of hours of training and therapy, and attend regular therapy meetings. In addition, students must meet with the practicum coordinator for the discussion of assigned readings and presentations on autism and therapy. The completion of a paper during the second semester is also required. For further information and a copy of the petition form, students should pick

up the practicum brochure from the department. This course can only be taken once for credit, and it is offered as credit/no credit only. Enrollment is only available through the practicum coordinator.

Credit 3 units.

L33 Psych 246 Mindfulness in Psychology and Eastern Philosophies: Sophomore Seminar

This course explores the concept of mindfulness in psychology and in Eastern philosophies. We will discuss the scientific literature on mindfulness, as well as mindfulness as presented by Buddhist scholars. We will engage in several different mindfulness practices throughout the semester. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L33 Psych 261 Applying the Science of Learning

This course is intended to cover the science of human learning, with special focus on areas, theory, and research that have potential to improve how students learn. Thus, the course will provide selective coverage of theoretical and empirical work in the science of learning that can inform and improve student learning. The applicability of these themes to the students in this course will be explicitly developed through students' explicit translation of the experimental findings from the literature to their own learning challenges. The course will be organized around three major integrated goals. First, the relevant basic theory and findings in select topics in the science of learning will be covered. Second, the implications of this work for improving learning outcomes in authentic educational contexts will be considered. Third, together we will develop concrete techniques and examples of how the principles that emerge can be adopted to significantly enhance outcomes of lifelong learning challenges. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 300 Introduction to Psychological Statistics

Descriptive statistics including correlation and regression. Inferential statistics including nonparametric and parametric tests of significance through two-way analysis of variance. Course emphasizes underlying logic and is not primarily mathematical, though knowledge of elementary algebra is essential. Psych 300 is required of all P&BS majors. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L33 Psych 301 Experimental Psychology

This course provides training in the logic and techniques of psychological research so as to provide students with experience in the design of psychology experiments and the interpretation of results. Topics include experimental design and control, library research, quantitative treatment of data, graphical presentation of results, and clarity of scientific writing. Lectures focus on general principles of experimentation, whereas the laboratory sections provide an introduction to a range of psychological phenomena through hands-on experience in experimentation. Each student also completes an independent research project. Declared psychology & brain sciences majors will have priority. Limited to 15 students per section. Prerequisites: Psych 100B and Psych 300.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L33 Psych 3011 Experimental Psychology

Psych 3011 is limited to students who have not taken Psych 300 and who want to enroll in Psych 300 and Experimental Psychology concurrently. Therefore, students who enroll in Psych 3011 must also register for Psychology 300. Psych 3011 fulfills the Psychology 301 requirement for the major. Topics in the two courses (i.e., Psych 300 and Psych 3011) will be coordinated in order to integrate the concepts from Statistics with those from Experimental Psychology. Experimental Psychology provides training in the logic and techniques of psychological research so as to provide students with experience in the design of psychology experiments and the interpretation of results. Topics include experimental design and control, library research, quantitative treatment of data, graphical presentation of results, and clarity of scientific writing. Lectures focus on general principles of experimentation, while the laboratory component provides an introduction to a range of psychological phenomena through hands-on experience in experimentation. Each student also completes an independent research project of their own design under the supervision of a faculty member. Enrollment limited to 15 students. Declared psychology & brain sciences majors will have priority. Prerequisites: Psych 100B and concurrent enrollment in Psych 300.

Credit 4 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA, SCI

L33 Psych 304 Educational Psychology

This is a course in psychological concepts relevant to education that is organized around four basic issues: (1) how humans think and learn; (2) how children, adolescents, and adults differ in their cognitive and moral development; (3) the sense in which motivation and intention explain why people act as they do; and (4) how such key human characteristics as intelligence, motivation, and academic achievement can be measured. Offered fall and spring semesters.

Same as L12 Educ 304

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 305 Health Psychology

Review and discussion of psychobiological approaches to health, as well as psychological aspects of physical illness. Topics: stress and coping, psychosocial factors in the etiology and progression of chronic illness, and psychological sequelae of chronic illness. There will be an emphasis on research methodology and results. PREREQ: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 315 Introduction to Social Psychology

Social psychology is the scientific study of how people think, feel, and act in social situations. This course will cover topics such as the self, conformity, aggression and altruism, prejudice and stereotyping, romantic relationships, person perception, persuasion, and applications to health and law. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 321 Developmental Psychology

This course concentrates on the cognitive and social development of the person from conception to adolescence. Topics covered include: infant perception, attachment, cognitive development from Piagetian and information processing perspectives, aggression and biological bases of behavior. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 3211 Music Cognition

An introduction to modern research on music perception and cognition. The course covers four main topics: the perception of key, the psychoacoustics of dissonance, the relationship between attention and musical meter, and the process by which melodies establish, fulfill, and deny expectations. Students read and discuss research from both cognitive science and music theory, in addition to completing several projects.

Same as L27 Music 3221

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: HUM

L33 Psych 325 Psychology of Adolescence

This course concentrates on brain, cognitive, and social development during adolescence. This period of development is marked by transition and change. Special topics will include the vulnerability of the adolescent brain and the development of sexual orientation. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 326 Introduction to the Psychology of Aging

Study of the processes of aging in the individual in terms of their behavioral effects. Age changes in biological functions, sensation, perception, intelligence, learning, memory and creativity are studied to understand the capacities and potentials of the mature and older person. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 330 Sensation and Perception

What's involved in seeing and hearing? This course will cover perception from the physical stimuli (light and sound) that impinge upon the sensory receptors through the higher-level percepts that the stimuli generate. Demonstrations and illusions will be used as we learn about the anatomy and physiology of the sensory systems and study the brain mechanisms that are involved in vision and audition. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA, SCI

L33 Psych 333 Independent Study in Psychological & Brain Sciences

Prerequisites: Psych 100B and permission of a member of the faculty of the department (or other approved supervisor) who agrees to supervise the student's work. Credit to be arranged. A maximum of 6 units may be applied toward the major. The electronic Petition for Supervision of Independent Study form is available online (<http://eyes.wustl.edu/psych333/>). Students will be enrolled only after their form is approved by the faculty supervisor and forwarded to the undergraduate coordinator.

Credit/no credit only.

Credit variable, maximum 3 units.

L33 Psych 3401 Biological Psychology

An introduction to biological mechanisms underlying behavior. Topics will include the physiology of nerve cells, anatomy of the nervous system, control of sensory and motor activity, arousal and sleep, motivation and higher mental processes. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: NSM Art: NSM BU: SCI

L33 Psych 344 Principles of the Nervous System

This course will provide a broad introduction to neuroscience, starting at the level of cellular and molecular neuroscience and ultimately ending at systems and theoretical neuroscience, with emphasis on the organization of the mammalian central nervous system. Topics will include neuronal structure, the action potential, information transmission between neurons, sensory/motor systems, emotion, memory, disease, drugs, behavior, and network dynamics. A fundamental goal of this course is to provide students with the ability to approach complex problems using the scientific method and to understand the limits of knowledge. This course will also expose students to some of the neuroscience community at Washington University. Prerequisites: Biol 2960 and Biol 2970 recommended; Biol 3058 recommended or Psych 3401 and permission of the instructor. Same as L41 Biol 3411

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L33 Psych 345 Genes, Environment, and Human Behavior

This class will examine how genetic influences impact various dimensions of human behavior, ranging from traits (e.g., personality) to psychiatric disorders. Topics to be covered include methods used to study genetic influence, how genetic predispositions interact with the environment, and ethical implications. Modern methods for gene-identification, such as genomewide association studies, polygenic risk scores and epigenetic experiments will be examined in detail. Emphasis will be placed on understanding core concepts (e.g., what is identity-by-descent) as well as application (e.g., calculate heritability, interpretation of results from published studies). Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: SCI EN: S

L33 Psych 3501 Psychotherapy: Introduction to Practice and Research

This is an introductory course in psychotherapy: The treatment of psychological problems through the application of interventions grounded in psychological theory and focusing on behavior or mental processes. Students become familiar with the more popular schools of psychotherapy, including their historical context, characteristic techniques, theoretical underpinnings and current research support. Students also gain an appreciation of the problems and solutions in researching psychotherapy, as well as emerging variations on psychotherapy procedures. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L33 Psych 353 Psychology of Personality

Review of basic theoretical orientations to the understanding of personality and complex human behavior. Overview of related techniques, procedures and findings of personality assessment and personality research. Discussion of critical issues in evaluation of personality theories. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 354 Abnormal Psychology/Psychopathology and Mental Health

This is an introductory course in psychopathology or the scientific study of mental health disorders. The course includes definitions, theories and classifications of abnormal behavior. Content focuses on symptoms, classification, prevalence, etiology and treatment of mental health disorders, including mood, anxiety, eating, schizophrenia spectrum, substance use and personality disorders. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 357 Introduction to Clinical Psychology

A survey of clinical psychology. Emphasis is placed on historical and recent developments in the field (e.g., managed care), as well as the consideration of the roles, functions and techniques of clinical psychologists including psychological testing and psychotherapy. Prerequisites: Psych 100B and either Psych 353 or Psych 354.

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L33 Psych 358 Language Acquisition

This course examines the development of language skills in children, asking how children so rapidly learn their first language. Topics include; biological bases of language development; development of phonology, syntax, and morphology; language development in atypical populations; childhood bilingualism; and development of written language skills. Prerequisites: Psych 100B and Ling 170D.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 358W Language Acquisition

This course examines the development of language skills in children, asking how children so rapidly learn their first language. Topics include: biological bases of language development; development of phonology, syntax and morphology; language development in atypical populations; childhood bilingualism; and development of written language skills. Prerequisites: Psych 100B and Ling 170D and junior or senior standing. Writing-intensive.

Credit 3 units. A&S IQ: SSC, WI EN: S

L33 Psych 360 Cognitive Psychology

Introduction to the study of thought processing from an information-processing approach. Emphasis will be placed on theoretical models that are grounded in empirical support. Topics include pattern recognition, attention, memory, reasoning, language processes, decision making, and problem solving. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

L33 Psych 3604 Cognitive Neuroscience

A general introduction to the underlying principles and mechanisms of brain function that give rise to complex human cognitive behavior. Emphasis is placed on how emerging methods and approaches from both neuroscience and cognitive psychology have been integrated to yield new insights into the organization and structure of higher mental processes. Topics include perception, attention, memory, language and executive control. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L33 Psych 361 Psychology of Learning

The experimental analysis of behavior is presented with examination of operant and Pavlovian conditioning, aversive control, theories of reinforcement, choice behavior, behavioral economics, and so on. Theoretical and experimental approaches to the study of behavior as developed in the laboratory are emphasized. Consideration is given to applications from the laboratory to everyday behavior. Prerequisite: Psych 100B. Enrollment limited to 30.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L33 Psych 3645 Understanding Emotions

Emotions both shape and are shaped by our subjective experiences, physiology, behaviors, cognitions, social interactions, and health. Their complexity and significance make the study of emotions particularly exciting and challenging. This course offers an overview of theory and research on emotions with content stretching across psychological disciplines, including personality, social, clinical, developmental, and neuropsychology. Course content will include definitions of emotions, physiological changes associated with emotions, and individual differences in emotional experience. The course will also examine how culture, cognitions, and relationships affect and are affected by emotions and how emotion is related to physical and mental health. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L33 Psych 367 Positive Psychology: The Science of Happiness

Historically, the field of psychology has placed a lot of attention on what's wrong with people and what we can do to treat disorders of the mind. More recently, the field has broadened its scope to give more attention to what's right with people and what we can do to optimize our potential for psychological health. This course focuses on this latter development by examining scientific research relevant to the pursuit of happiness and well-being. Topics include the nature and measurement of happiness, the biological basis of positive emotions, an overview of positive trait theories, self-esteem, gratitude, mindset, the mind-body connection, physical activity, emotional intelligence, resilience, prosocial behavior, decision-making, willpower, mindfulness meditation, and the characteristics of successful relationships. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 380 Human Learning and Memory

A survey of issues related to the encoding, storage and retrieval of information in humans. Topics include memory improvement strategies, people with extraordinary memories, memory illusions and distortions, among other topics. Limited to 25 students. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

L33 Psych 3885 The Mental Health Crisis in Higher Education

During the last decade, college campuses have seen unprecedented increases in the proportion of students suffering from mental health problems. Many institutions have responded by increasing the number of mental health counselors available in student health centers, making the accommodations at disability resource centers more robust, and providing safe spaces for students to process incidents and events that have triggered them. Are such interventions improving the well-

being of today's students, or might they actually be further encumbering students' psychological health? This discussion-based course will explore arguments made on all sides of this provocative debate and examine research on the nature of today's college students and what resources and services most contribute to their psychological health and well-being. Enrollment is limited to 15 students. Prerequisite: at least 6 units of advanced home-based psychology courses.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 395 Prejudice, Stereotyping, & Discrimination

This course will trace prejudice, stereotyping, and discrimination from its ordinary origins in social cognition to its most extreme consequences in war and genocide. Topics include prejudice, the causes of stereotyping and discrimination, the development of prejudice in children, subtle and overt prejudice and stereotyping, group conflict, the role of social norms, the experience of being a target of discrimination, and interventions to reduce prejudice and discrimination. Areas covered include racism, sexism, ageism, homophobia, ableism, colorism, and religious discrimination. Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU:

BA EN: S

L33 Psych 396 Psychological Dynamics of Empathy

In this course, we will explore the antecedents and consequences of empathic motivation, defined broadly. Along the way, we consider answers to several interesting questions: Why are some people generally more empathic than others? Are there cultural differences in levels of this trait? To what extent is empathy an "emotional" or "cognitive" phenomenon? We will also consider the conditions under which empathy is associated with prosocial outcomes (e.g., reducing racial prejudice) but with recognition that empathy has a "darker" side, one that can ironically exacerbate people's preexisting biases. The approach to empathy will be highly interdisciplinary as we consider research and theory within several fields within psychology (e.g., social, personality, cognitive) as well as areas that draw from other scholarly disciplines (e.g. social neuroscience, social anthropology). Prerequisite: Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L33 Psych 4046 Developmental Neuropsychology (Writing Intensive)

Discussion will focus on early development and disorders affecting the brain, such as cerebral palsy, sickle cell disease, and autism. Writing Intensive. Open only to advanced undergraduates, and declared psychology majors will be given preference. Limited to 15 students. Prerequisites: Psych 100B and one of the following: Psych 321, Psych 360, Psych 3604, Psych 4604, or Psych 3401.

Credit 3 units. A&S IQ: NSM, WI Art: NSM

L33 Psych 4048 Neuropsychology of Dementia

The primary goal of this course is to acquaint students with the basic features of common dementia subtypes, such as Alzheimer's disease, frontotemporal dementias, vascular dementia, Lewy body disease, Huntington's disease and Parkinson's disease. The course will cover the clinical manifestations (cognitive and behavioral symptoms, course, prognosis), neuroanatomical signatures, pathophysiology, intervention and treatment, and current research directions. Students will gain a detailed understanding of the major dementia subtypes as manifestations of underlying brain

pathology and anatomical patterns of brain damage. Upon completion of the course, the student should be able to (1) identify and distinguish the most common dementia subtypes based on knowledge of clinical presentation and disease mechanisms; (2) understand how underlying brain changes may be linked to specific clinical manifestations; (3) understand how therapeutic strategies are linked to pathophysiology; (4) engage in scholarly discussion about the topics; and (5) read and critique empirical research papers. Prerequisite: Psych 326 and either Biol 3411, Psych 344, or Psych 3401.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

L33 Psych 4075 Advanced Research Methods & Design

This course is an advanced foray into research design and methods used in psychological science. This course is project-based, writing-intensive, and will be supplemented heavily with readings and discussions of topics of broad importance to psychological research (e.g., reliability, validity, signal detection theory, philosophy of science). These readings will enhance students' abilities to think critically about psychological research design and methods, as both a consumer and creator of psychological research. During the course of the semester they will complete two original research projects (e.g., an observation study and an experimental study). Together with their classmates they will devise research questions, design studies to test their research questions, collect data, and statistically analyze their results. Individually, students will write-up, and then revise, each research project in an APA-style paper. The writing requirements for this course build on the skills students acquired in Experimental Psychology and will further their abilities to communicate scientific ideas more skillfully, clearly and accurately. Prerequisite: L33 Psych 301 or 3011.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM BU: BA

L33 Psych 4099 Human Evolutionary Psychology

How did evolution by natural selection shape the way human beings think and behave? Does evolution explain human cooperation and friendship, human morality, reproductive decisions and social interactions? What sex differences in cognition or behavior are caused by evolution? This course introduces the concepts and findings of evolutionary psychology, mostly through reading of primary sources -- articles from psychology and biology journals -- and discussion and presentation of empirical cases. Prerequisites: At least 6 units of upper-level, home-based Psychology course work, or Anthro 3383.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 413 Contemporary Topics in Social Psychology

Consideration of selected contemporary topics in social psychology. Participation in a research project of appropriate scope. Prerequisite: Psych 315.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC

L33 Psych 4175 Applied Statistical Analysis with R

This course is designed to introduce R as both a means of applied statistical analysis as well as a window into data organization and programming. The goal of the course is to teach the tools needed to take a raw dataset and not only perform a statistical test in R, but also to learn how to arrange the dataset to perform a variety of tests, to choose the appropriate test, and to visualize the results. Students will gain practical

knowledge of how to use statistics in research. Please note that this is an introductory course and knowledge of R prior to enrollment is not expected. Prerequisite: Psych 300, graduate standing, or permission of instructor.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L33 Psych 4182 Perception, Thought and Action

This course focuses on current topics in visual perception, visual attention, and the control of action. Readings consist of recent journal articles. Class meetings emphasize presentation and discussion of the material in the readings. Limited to 15 students. Prerequisites: Psych 100B and one of the following: Psych 301, Psych 330, Psych 3401, Psych 344, Psych 360, Psych 361, Psych 3604, Psych 380, Psych 433 or Psych 4604.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

L33 Psych 4226 The Psychology of Social Stigma

This seminar aims to introduce students to theoretical and empirical social psychological research on prejudice and social stigma. The topics covered will include examinations of why individuals stigmatize by exploring cognitive, evolutionary, self and system justification explanations. The course will examine the effects of stigmatization for low-status groups (stereotype threat, dis-identification, compensation and health outcomes). We will explore the role of stigma in intergroup interactions as well as variations in the experience of stigma. Finally, we will examine high-status groups' perceptions of bias (e.g., perceptions of anti-white discrimination). Prerequisite: Social Psychology (Psych 315) or Prejudice (Psych 395).

Credit 3 units. A&S IQ: SSC, SC Arch: SSC Art: SSC BU: BA
EN: S

L33 Psych 427 Social Gerontology

This course provides an introduction to aging and growing old, from an interdisciplinary perspective. Specific attention is paid to demographics, physical health and illness, mental health, interpersonal relations, work issues, living arrangements, ethics, and death and dying. Prerequisites: junior or senior standing and completion of 6 advanced units in Psych.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 4301 Contemporary Topics in Cognitive Development

Cognitive Developmental topics include: Piagetian abilities (e.g., conservation, formal reasoning), basic cognitive abilities (e.g., processing speed), executive functions (e.g., working memory), and other current topics (e.g., processing facial stimuli). Prerequisite: Psych 321 or 360.

Credit 3 units.

L33 Psych 4302 Cognitive Psychology Applied to Education

This course is intended to cover topics in the cognitive psychology of human memory, conceptual learning and comprehension with special focus on areas, theory and research that have potential application to education. Thus, the course provides selective coverage of theoretical and empirical work in cognitive psychology that provides potential to inform and improve educational practice. The applicability of these themes are explicitly developed and evaluated through the primary research literature using educationally oriented experimental paradigms. The course is of interest and benefit to education

majors and to psychology majors interested in cognitive psychology and its applications. Prerequisites: junior/senior status; 9 units in psychology and Psych 100B or junior/senior status; 9 units in Education and Psych 100B.

Credit 3 units. A&S IQ: SSC EN: S

L33 Psych 4305 Psychological Science: Fact and Fiction

Skeptical analysis of psychological science as practiced and popularized in the media. Analysis of discrepancies between media and scientific claims regarding areas such as repressed memory, brain imaging, heritability and psychotherapy. Additional examination of scientific career demands such as peer review, journal publication and research funding. These topics are interwoven with a review of common errors in reasoning particularly with respect to probabilistic reasoning and the public misperception of the practice and principles of scientific psychology. Prerequisite: junior or senior standing and completion of 6 advanced units in psychology.

Credit 3 units. A&S IQ: SSC, WI Arch: HUM Art: SSC EN: S

L33 Psych 433 Psychology of Language

This course surveys current research and theory in psycholinguistics, covering the biological bases, cognitive bases and learning of language. We consider studies of normal children and adults, the performance of individuals with various types of language disorders, and computer simulations of language processes. Topics range from the perception and production of speech sounds to the management of conversations. Each student carries out an original research project on some aspect of psycholinguistics. Prerequisites: Ling 170D and Psych 100B.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 4351 Reading and Reading Development

This seminar surveys current research on reading and spelling skills and their development. Students will read and discuss journal articles that examine the cognitive and linguistic processes involved in reading, reading disorders, and educational issues. Prerequisite: Permission of instructor and previous course work in experimental psychology or psychology of language.

Credit 3 units. A&S IQ: SSC EN: S

L33 Psych 4352 Reading and Reading Development (Writing Intensive)

This writing-intensive seminar surveys current research on reading and spelling skills and their development. Students read and discuss articles and chapters that examine the cognitive and linguistic processes involved in reading, reading disorders, and educational issues. Prerequisites: Psych 100B and Ling 170D and junior or senior standing.

Credit 3 units. A&S IQ: SD, WI EN: S

L33 Psych 4355 Personality Development Across the Life Span

This seminar examines how individual differences develop over the life span -- or, in other words, how we become who we are. The scope of the course covers a multitude of individual differences constructs (e.g., happiness, intelligence, goals), but a particular focus will be on personality traits. Questions that will be examined include the following: How early in the life span does one's personality emerge? How much do parents matter in

shaping who you become? Does your personality change across the life span? Readings will cover theories of development at different life stages and empirical research from childhood to older adulthood.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L33 Psych 4413 Advanced Cognitive Neuroscience (Writing Intensive)

This course presents an intensive, case-study based approach to the underlying principles and mechanisms of brain function that give rise to complex human cognitive behavior. Emphasis will be placed on understanding and evaluating cutting-edge neuroscience research that has yielded new insights into the organization and structure of higher mental processes. Students will develop critical thinking and writing skills via a strong class participation component and a writing-intensive format. Topics include perception, attention, memory, language, emotion, and executive control. Writing Intensive. Declared psychology majors will be given priority over others to enroll. Prerequisite: Psych 3401, Psych 344/Biol 3411, or Psych 3604.

Credit 3 units. A&S IQ: NSM, WI Arch: NSM Art: NSM

L33 Psych 444B Independent Study for the Major in**Psychological & Brain Sciences: Cognitive Neuroscience**

Students in this course must be accepted into the Psychological & Brain Sciences (P&BS) Cognitive Neuroscience major. Also required is the permission of a member of the faculty of the department (or another approved supervisor) who agrees to supervise the student's work. In addition to the approved research in the area of cognitive neuroscience, an APA-style research paper must be satisfactorily completed to obtain credit. Petition for Supervision of P&BS 444B forms are available in Somers Family Hall, room 207B. Students will be enrolled only after they have completed the petition and returned it to the Undergraduate Coordinator in Psychology, room 207B.

Credit 3 units. A&S IQ: SSC EN: S

L33 Psych 444C Independent Study for a Concentration in Psychological and Brain Sciences

Students in this course must be accepted into a concentration in Psychological & Brain Sciences (P&BS). Written permission (Petition for Supervision of P&BS 444C) from a member of the faculty of the department (or another approved supervisor) who agrees to supervise the student's work is also required. In addition to the approved research for the concentration, an APA-style research paper must be satisfactorily completed to obtain credit. Petition for Supervision of P&BS 444C forms are available in Somers Family Hall, room 207B. Students will be enrolled only after they have completed both the Petition for a Concentration in P&BS and the Petition for Supervision of P&BS 444C and returned them to the Undergraduate Coordinator in room 207B.

Credit 3 units.

L33 Psych 4450 Functional Neuroimaging Methods

In this course, you will learn neuroimaging methods in the context of accurate, reproducible, and open science. There is no substitute for wrestling with data yourself, and so this is a hands-on course. Students will need to bring a laptop on which to install Matlab and conduct analyses. Some background in neuroimaging or programming will be helpful but is not required. Topics covered include experimental design, accounting for artifacts, single-subject models, and group models. By the end of the course, students will have used a computer script to

analyze an fMRI dataset and have a good understanding of preprocessing and statistical analyses in fMRI. Limited to 24 students. Prerequisite: Psych 3604, Psych 4413, or graduate standing.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 4512 Neurobiology of Learning & Memory

The brain is the most complex object in the known universe, and among its most incredible attributes is its ability to acquire and store vast amounts of information to guide behavior. Over a lifetime, our experiences shape our brains and our behavior, ultimately making each of us unique. What "information" is encoded by the brain? How is it stored? How is it retrieved? How does this occur at different spatial and temporal scales? Does stored information change over time? How do learning and memory change across the lifespan, and with neurological disorders? Can you trust your memories?

Credit 3 units. A&S IQ: NSM BU: BA

L33 Psych 4541 Personality and Psychopathology

This course is an advanced seminar in the study of personality disorders. It will cover a range of conceptual and methodological issues involved in scientific efforts to understand ways in which pathological personality features disrupt people's lives. Students will learn about the similarities and distinctions between normal and pathological features of personality as well as the role that personality may play with regard to the causes and treatment of other kinds of mental disorder. A laboratory component of the class will focus on the development of practical skills in conducting research interviews designed to elicit information about personality and social adjustment. Prerequisite: Psych 354 and junior or senior standing.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 4557 Biopsychosocial Aspects of Eating Disorders and Obesity

This seminar examines the epidemiology, etiology, prevention, and treatment of body image, eating disorders, and obesity. An emphasis will be placed on understanding the characteristic symptoms of excessive dieting, body image disturbance, and binge eating, not only as formal psychiatric syndromes but also as a representation of dysregulatory processes reflecting social-cultural, psychological, and biological disturbances. Students will also learn about the clinical characteristics, medical sequelae, and physical aspects of eating disorders and obesity. Prerequisites: Psych 100B and junior/senior standing plus 6 units of advanced home-based psychology courses.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 4591 The Development of Social Cognition

This course explores what is known about the development of social cognition. Our starting point is infants' capacity to navigate the social world, for instance, detecting agents, identifying social partners and learning from those around us. We consider what happens when the human ability to reason about others breaks down (as with autism), and what this can teach us about typical development. Each week we cover one topic and a related set of readings. Class meetings are devoted to active discussion and debate about the content of the readings. Students are required to write a weekly reaction paper to the readings to promote class discussion and give an in-class presentation on a novel research topic at the end of the semester. Graduate students may have additional course requirements. Prerequisites: Psych 100B and one of the following: Psych 315 or Psych 321 or Psych 360.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L33 Psych 4592 Development of Social Cognition (Writing Intensive)

This course explores current issues in social cognitive development. We will examine the critical issues in the field, beginning with the roots of attachment in infancy and the human propensity to connect with others. We will then consider contemporary research concerning infants' ability to navigate the social world. We will also consider what happens when the human capacity to reason about others breaks down, as in autism. Additional topics will include children's reasoning about social groups, the development of bias and prejudice, and aspects of morality. We will look at these issues in the context of innate knowledge and the effects of one's environment on children's development. Each week we will cover a topic by reading a background chapter and a set of two journal articles. Class time will be devoted to active discussion of these readings, with lecture and class activities as needed, to complement the readings and set the stage for class discussion. This is a writing intensive course, thus a second goal is to improve your writing. There will be several writing assignments of varying length, some of which you will receive extensive feedback on from the instructor, and then prepare an improved final version. You will also give two presentations to the class: one that directly addresses writing and another on a research topic of your choice relevant to social cognitive development. Prerequisites: Psych 100B and either Psych 315, Psych 321, or Psych 360.

Credit 3 units. A&S IQ: SSC, WI Arch: SSC Art: SSC EN: S

L33 Psych 461 Seminar in Selected Topics in Learning & Memory: Collective Memory

This course provides an overview and analysis of phenomena of people remembering as part of a group -- one's country, one's state, one's university, one's family. Collective memories are critical for one's identity, for knowing who we are and how to interpret the world around us. We will consider narcissistic tendencies of group memories in specific contexts (e.g., the Russian vs. American interpretation of world events; views of Trump supporters vs. Biden supporters on events in the United States). The course will range from humanistic, anthropological, psychological, and sociological perspectives on memory. Prerequisite: Psych 100B and either Psych 221, Psych 360, or Psych 380, or permission of instructor.

Credit 3 units. BU: BA

L33 Psych 4612 False Memory

It is well-accepted that our visual systems can sometimes lead us astray, leading to visual illusions. It can be harder to realize how readily our memories can also lead us astray, resulting in illusory memories or false memories. This course will focus on the many ways in which false memories are exhibited and what we can learn from them about memory more generally. Topics will range from eyewitness memory and flashbulb memories to more everyday conversational false memories. We will also learn about how imagination and remembering interact. Many false memory controversies exist, and we will explore some of them. Finally, we will consider how false memories might be considered an adaptive feature of a flexible cognitive system, which usually serves us well but, in the right circumstances, can also lead us astray. PREREQ: Psych 100B and EITHER Psych 221, OR Psych 360, OR Psych 380.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L33 Psych 4615 The Science of Paying Attention

What processes underlie humans' ability to "pay" attention? This course will introduce students to theories of attention and cognitive control. Students will develop an understanding of empirical approaches to studying the control of attention, and examine factors that facilitate and impair humans' ability to pay attention. A final section will examine attention and cognitive control challenges that accompany aging and select psychological disorders such as ADHD, and applications of attention and cognitive control research to the classroom, driving, and other contexts. Prerequisites: Psych 100B and Psych 301.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 462 Psychology of Memory and Cognition

This course will explore the core readings that have shaped the way scientists tackle fundamental aspects of memory and cognition. These include cognitive methods, pattern recognition, attention, working memory, episodic memory, semantic memory, language acquisition and comprehension, decision making, problem solving, and expertise. Each week we will explore at least three "classic" readings on a given topic along with some more recent papers. The goal is to expose students to this foundational literature, and develop a better understanding of the zeitgeist that set the stage for these papers to change how researchers tackled specific problems. Prerequisite: Psych 360 or Psych 380.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 4631 Introduction to Computational Cognitive Science

How does the mind work? Over the last few decades, cognitive psychologists have become increasingly interested in using computational models. These models are designed to describe cognitive processes and the behavior that is produced by them. This computational approach has several advantages. Computational theories of cognition are more specific than verbal theories. Therefore, they do not only afford precisely quantifying certain aspects of cognition, but they also make it possible to simulate cognitive processes. This course provides an introduction to several leading computational methods for understanding cognition, including model fitting and comparison, reinforcement learning, neural networks and Bayesian modeling. These methods will be applied to a wide range of cognitive phenomena, such as short-term memory, reinforcement learning, decision making, cognitive control, concept learning and visual perception. Prerequisites: Psych 100B and Psych 301/3011.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM BU: BA

L33 Psych 4651 History and Modern Systems of Psychology

An introduction to the history of psychology. This course begins with a brief consideration of forces leading to the development of psychology in the mid-1800s. It then examines the birth of modern psychology in Germany and the schools of psychology that emerged early in the 20th century. Newer orientations and ideas are considered in the final segment of the course. We also consider the impact of psychology on American public life during the 20th century. Prerequisite: Psych 100B, junior or senior standing, and 6 units of advanced home-based psychology courses.

Credit 3 units. A&S IQ: HUM Art: HUM EN: H

L33 Psych 4746 Biological Pathways to Psychopathology:**From Genes and the Environment to Brain and Behavior**

This seminar will introduce students to methods and recent empirical literature evaluating links between genes, brain, and behavior. This research is beginning to illuminate specific biological pathways shaping risk for psychopathology. In particular, the course focuses on the design, analysis, and interpretation of multimodal research (e.g., fMRI, PET, EEG, pharmacology, molecular genetics, environmental assessment/manipulation) examining the biological underpinnings of behavior relevant to psychopathology. Primary journal articles, reviews, and book chapters are the readings for this seminar. Prerequisite: Psych 100B and one of the following: Genes, Environment, and Human Behavior (Psych 345), Biological Psychology (Psych 3401), or Principles of Biology II (Biol 2970); or graduate standing. Prior course work in psychology, neuroscience, and genetics is advised.

Credit 3 units. A&S IQ: NSM Arch: SSC Art: SSC

L33 Psych 4765 Inside the Disordered Brain: Biological Bases of the Major Mental Disorders

How do subtle disturbances in brain circuits lead to abnormal behavior and psychopathology? This course provides students with a working knowledge of our rapidly evolving understanding of brain circuits that create order in our social, emotional, and cognitive worlds and how disorder within these circuits leads to a broad range of psychopathology, including depression, anxiety, phobias, PTSD, OCD, addiction, schizophrenia, psychopathy, and violence. Prerequisites: Psych 100B and either Psych 3401, Psych 354, or a basic biology/neuroscience course.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L33 Psych 488 The Cognitive Neuroscience of Film

To understand complex events in real life depends on perception, action and memory. To understand movies, people probably depend on similar psychological and neural mechanisms. This seminar uses results from psychology and neuroscience to try to better understand the experience of a movie viewer, and uses theory and practice to explore psychological hypotheses about perception. Prerequisite: Psych 360 or Psych 3604 or Psych 4604, or graduate standing in Psychology.

Credit 3 units. A&S IQ: NSM

L33 Psych 494 Behavioral Psychology Readings Group

This weekly journal-style readings class provides the opportunity to read and discuss seminal as well as current papers on the conceptual aspects of behavioral psychology and relevant research. Points of contact among behaviorism, cognitivism, and neuroscience and the natural lines of fracture will be examined. Prerequisites: Psych 100B and either Psych 360, Psych 361, or a philosophy course.

Credit 1 unit. A&S IQ: SSC Arch: SSC Art: SSC EN: S

L33 Psych 498 Study for Honors

Acceptance into the Honors Program is based on superior performance as evidenced by the student's record in undergraduate course work and the written agreement (Petition for Permission to Enroll) of a member of the faculty of the department (or other approved supervisor) to supervise an Honors project. The student must complete 6 units of Honors work (3 units of Psych 498 and 3 units of Psych 499), submit an acceptable written thesis, and be recommended by the

department. Recommendation for an Honors degree is based on the evaluation of the written thesis and the student's overall performance as an undergraduate. Students in the Honors Program meet regularly in the Honors Seminar to discuss their research and become acquainted with the work of the other students. Psych 498 is a writing-intensive course. All students must meet with Dr. Sommers prior to registering. Prerequisite: Psych 301 or equivalent and permission of instructor. Credit 3 units. A&S IQ: SSC, WI EN: S

L33 Psych 499 Study for Honors

Acceptance into the Honors program is based on superior performance as evidenced by the student's record in undergraduate course work; the written agreement (Petition for Permission to Enroll) of a member of the faculty of the department (or another approved supervisor) to supervise an Honors project; and approval of the Honors Coordinator. The student must complete 6 units of Honors work (3 units of Psych 498 and 3 units of Psych 499), submit an acceptable written thesis, and be recommended by the department. Recommendation for an Honors degree will be based on the evaluation of the written thesis and the student's overall performance as an undergraduate. All students must meet with the Honors Coordinator prior to registering. Students in the Honors Program will meet regularly in the Honors Seminar to discuss their research and become acquainted with the work of the other students. Prerequisite: Psych 498. Credit 3 units. A&S IQ: SSC Art: SSC EN: S

Religion and Politics

The John C. Danforth Center on Religion and Politics serves as an open venue for fostering rigorous scholarship and informing broad academic and public communities about the intersections of religion and U.S. politics.

The Center's programs include the following:

- Public lectures, conferences and symposia (<http://rap.wustl.edu/events/>) relating to issues at the many intersections of religion and U.S. public life
- New courses (<http://rap.wustl.edu/courses-type/courses/>) on American religion and politics that can contribute to an interdisciplinary undergraduate minor in religion and politics for Washington University students
- American Religion, Politics and Culture Colloquium for scholars and students to discuss cutting-edge research
- *Religion & Politics*, an award-winning online journal engaging a diverse array of scholars, journalists and public leaders

The Center offers a minor in religion and politics that provides an opportunity for sustained exploration of the ways in which religion and politics have intersected in American culture, in both historical and contemporary terms. As part of the minor, students may examine any number of issues, including church-state relations, religion's role in shaping gender and sexuality debates, religion and electoral politics, public conflicts over the nexus of religion and science, and religion's entwining with reform movements (from abolition to environmentalism). The Center's

interdisciplinary minor attracts students from many disciplines, including natural sciences, social sciences, and humanities. Whether students are pre-med, pre-law, or pursuing futures in education, business, or the arts, they report their studies are enriched by our curriculum.

Majors

The Center does not offer a major. Interested students are encouraged to explore the minor in religion and politics. Please refer to the Minors section (p. 980) for more information.

Minors

The Minor in Religion and Politics

Total units required: 15 units of course work, including the following:

- **One required course:** Select one course from the following list. This should be completed prior to the second semester of the junior year.

Code	Title	Units
RelPol 201	Religion and American Society	3
RelPol 210	The Good Life Between Religion and Politics	3
RelPol 225	Religion and Politics in American History	3
BEYOND 120	Religious Freedom in America (This is a course in the selective Beyond Boundaries Program.)	3

- 12 additional units, 9 of which must be at the 300 or 400 level and 9 of which, at any level, must be taught by Center faculty.

Required activities:

Attendance at five events sponsored by the Center on Religion and Politics (e.g., lectures, colloquia, lunch discussions, film screenings) is required. Students must inform the director of undergraduate studies of the events they attend so that this information can be recorded.

Courses

Visit online course listings to view semester offerings for L57 RelPol (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L57&crslvl=1:4>).

L57 RelPol 120A Religious Freedom in America

The intersection of religion and law in American society has sparked some of the fiercest cultural engagements in recent memory: Should a for-profit religious corporation have a right not to fund birth control for its employees? Can a public college expel campus religious groups whose membership is not open to all students? May a Muslim in prison grow a beard for religious reasons? Should a cake baker or a florist be permitted to refuse services for a gay wedding? Can a church hire and fire its ministers for any reason? These current debates and the issues that frame them are interwoven in the American story. This course introduces students to the major texts and historical arguments underlying that story. Drawing from the respective expertise of the instructors, the course will expose students to a variety of scholarly methods related to the issue: legal history and case law, intellectual history and canonical texts, social history and narrative accounts, and political philosophy and contemporary analyses. This course is for first-year (non-transfer) students only.

Same as I60 BEYOND 120

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: ETH, HUM EN: H

L57 RelPol 201 Religion and American Society

This course explores religious life in the United States. We will focus our study on groups and movements that highlight distinctive ways of being both "religious" and "American," including the Americanization of global religions in the U.S. context. Major themes will include religious encounter and conflict; secularization, resurgent traditionalism, and new religious establishments; experimentalism, eclecticism, and so-called "spiritual" countercultures; the relationship between religious change and broader social and political currents (including clashes over race, class, gender, and sexuality); and the challenges of religious multiplicity in the United States. Students will do the following: (1) acquire knowledge of the disparate religions practiced in North America during the 20th century and beyond; (2) examine some of the chief conflicts as well as alliances between religion and the American social order in a global context; and (3) develop interpretive tools for understanding religion's present and enduring role in the United States and the world.

Credit 3 units. A&S IQ: HUM, SC, SD BU: ETH EN: H

L57 RelPol 203 Religions of St. Louis: The Intersection of Faith and Politics Across the Region

The St. Louis region is home to a diverse array of global religious communities, many with strong political leanings. This course directly introduces students to some of this religious and political variety by coordinating weekly fieldtrips to living institutions and interacting with religious leaders across traditions. In any given semester, our visits may include organizations that identify as Catholic, mainline Protestant, Evangelical, Jewish, Muslim, Hindu, Buddhist, Vedantist, Scientological, progressive Baptist, or secular humanist, among others. We will also visit the International Institute of St. Louis and study the politics of immigration and refugee resettlement that have helped shape the city. Through our visits and conversations, the multiplicity of each religious community will become apparent as we encounter adherents across the political spectrum, embodying different ethnicities and committed to different degrees of "orthodoxy" or traditional belief and practice. Students should emerge from the course able to analyze the complex intersections of religion and politics in the St. Louis metropolitan area, illustrative of the United States as a whole. Note: All required site visits will take place during the regular class time.

L57 RelPol 209 Scriptures and Cultural Traditions: Text and Traditions

When we think of the word "scripture" in antiquity, we might think of the texts that have been compiled in the different holy books that we currently have today. Yet the function of "scriptures" within a community, and the status given to different texts treated as "scriptural," has changed in different times and places. In this course, we will consider texts that would eventually come to be part of the Hebrew Bible, New Testament, and the Qu'ran as well as several of the exegetes and reading communities that shaped their various interpretations. We will explore how non-canonical sources played a role in the formation of the various canons we have today, comparing the authoritative status given to these texts to that given to other works from antiquity, such as the epics of Homer. Special attention will be played to the role of the receiving community in the development of "scripture," and the variety of the contexts in which scripture can function in the construction of and opposition to religious authority.

L57 RelPol 210 The Good Life Between Religion and Politics

What constitutes a life well lived? How do we imagine answers to that question? Who gets to answer that question for us? Do we ask it as an "us" or as an individual? This course considers the way religious and political thought has shaped considerations of the classical ethical question of how we should live and the way that ethics has often served to connect religion and politics in thought and practice. Do we need a religious basis to answer ethical questions, or can we determine how to live without religious sources of authority? Is ethics a project of an individual or of communities? If the latter, are these political communities, religious ones, or something else? On what basis or with what capacities can we imagine new answers to ethical questions, either in community or on our own? We will discuss these questions and more through a consideration of a range of answers to the question of how we should live.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L57 RelPol 215 Performing Religion, Ritualizing Gender

What's the difference between a wink and a blink? What the difference between graduation, a sacrament, and the electric slide? We make fine-grained distinctions every day in our own enactment and interpretation of these different kinds of practices. This class will introduce students to key academic approaches to "ritual," "practice" and "performance," and will ask whether these distinctions are important or arbitrary. Ritual studies (based in religious studies) also happens to center around the very same questions that gave birth to gender and queer studies (is gender a performance?), thus a parallel examination of ritual and performance studies necessarily brings religious identity into conversation with broader questions of identity (gender, race, class).

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L57 RelPol 225 Religion and Politics in American History

The United States has been imagined, by turns, as a deeply Christian nation and a thoroughly secular republic. These competing visions of the nation have created conflict throughout American history and have made the relationship between religion and politics quite contentious. Are there shared national symbols and ideals that have held the country together? Is there a discernible "civil religion" in American public life—a shared faith in freedom, democratic citizenship, and patriotic sacrifice? Or, is there instead a set of competing, irreconcilable visions—say, a white Christian nationalism versus a pluralistic cosmopolitanism? This course examines such issues through a range of speeches and addresses by such generative figures as George Washington, Thomas Jefferson, Frederick Douglass, Abraham Lincoln, Elizabeth Cady Stanton, Franklin Delano Roosevelt, John F. Kennedy, Martin Luther King Jr., Ronald Reagan, Barack Obama, and John McCain. Through sustained discussion of their canonical speeches, as well as other monuments, rites, and declarations that have hallowed the nation, the class explores what ideals Americans have held sacred.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L57 RelPol 230 Black-Jewish Relations in the United States

The relationship of blacks and Jews in the United States is at once intimate and strained, mutually beneficial and antagonistic. This course examines this uneasy alliance from a number of perspectives including anthropology, politics and identity politics, history, religion and class. Beginning with American anthropology's Jewish founding father, Franz Boas, challenging the concept of race, the course traces the relations of blacks and Jews throughout the 20th century and in our contemporary moment. We will pay particular attention to the civil rights era, which is commonly upheld as the golden age of black-Jewish relations, as well as to this alliance's unraveling in the post-civil rights era. The course then moves to a unit focused on more recent ruptures and collaborations including the 1991 Crown Heights race riots, during which Orthodox Jews clashed with their black neighbors, and Jewish involvement in the Black Lives Matter movement. The course concludes with a unit on identity and identity politics focused on the complexity and fluidity of the categories "white," "black" and "Jewish."

Credit 3 units. A&S IQ: HUM, SC, SD BU: BA EN: H

L57 RelPol 235 Puritans and Revolutionaries: Religion and the Making of America

This course introduces students to the history of religion and politics in America from the English settlements of Virginia and Massachusetts Bay during the early 17th century through the constitutional debates of the 1780s. It pays attention to both formal legal issues regarding religious establishments and wider matters concerning political sentiments and their relationship to religious ideas or values. The course does not advocate a defining argument or single ideological "point"; rather, it facilitates a series of observations of how different positions on the role of religion in early America made sense in their respective historical contexts. Social, political, and intellectual variables made for shifting understandings of what religious ideas mattered to public life in America and how those ideas ought to shape civil affairs.

Credit 3 units. A&S IQ: HUM BU: BA EN: H

L57 RelPol 240 Jewish Political Thought

This course uses the concepts of political theory to explore the diverse Jewish political tradition. While this tradition includes writing from and about the three historical periods of Jewish self-rule (including the modern state of Israel), most of the Jewish political tradition comes from the understanding of politics as viewed from outsiders to mainstream communities. Additionally, Jewish political thought can be found through a Jewish community's self-understanding based on its interpretation of Jewish text and law by which it bound itself. Because we span over 2,000 years of recorded history, we will not attempt to discern a single "Jewish political thought" but rather look at JPT through the lens of familiar concepts of political theory. The fundamental questions we will explore are the relationship of the Jewish tradition to concepts such as authority, law, consent, sovereignty and justice. We will ask how the Jewish tradition views government and the relationship between the authority of God and the authority of temporal powers. We will explore these questions through a range of materials that include both primary and secondary literature.

Credit 3 units. A&S IQ: HUM BU: BA EN: H

L57 RelPol 244 Religion and Music in American Culture

In this course, students will examine public discourse on popular music as a way of understanding questions of religious identity and community formation. Through case studies ranging from the Pueblo Indian dance controversy of the 1920s to post-9/11 disputes about the Islamic call to prayer, students will consider how debates over what "counts" as sacred or secular music reveal disputes over notions of religious authority and authenticity in American culture.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM

L57 RelPol 245 Love and Reason

Love often seems dramatically unreasonable, and reason can seem coldly rational in a way that excludes any emotion, passion, or affiliation even akin to love. The supposed opposition between love and reason has been used by Christian and secular thinkers throughout modernity to organize ways of knowing and judging, and to criticize claims of faith, belief, and desire. But are love and reason really so distinct? What does it mean to say so, and why might someone make this claim? Can love be reasoned, and even reasonable? Can reason be aided by love, and even driven by it? How might different answers to these questions affect our understanding of other possibly unreasoned categories like faith, belief, and piety? This course offers an introduction to modern Christian thought and Western philosophy through these questions and themes.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

L57 RelPol 248 Religion, Health, and Wellness in Modern America

Religion, Health, and Wellness in Modern America will examine changing conceptions of health and wellness in America from the late nineteenth-century to the present. With media, artifacts, and literature drawn from the histories of medicine, religion, and capitalism, this class will cover the proliferation of alternative health regimens, the rise of the medical establishment, claims of divine healing, and the impact of market forces on wellness cultures. Course topics include the raced and gendered dynamics of care, socioeconomic status, technological innovation and media, the role of nature, health activism and radical self-care, and New Age spirituality and mental health. Special attention will be paid to how the politics of the body and its regulation intersect with religious and consumer practices in the modern wellness industry.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM

L57 RelPol 250 Zionism

Zionism is often thought of as a commitment to the principle that the Jewish People, as a distinct "people," has a right to self-determination in its own historical land of the biblical Palestine. Yet the history of the term and the set of ideologies show a much more complex understanding. In this course we trace the emergence of a number of different "Zionisms" that would lead to the creation of the modern state of Israel. And we explore how the political principles at the core of these ideologies have fared in the 65 years since the founding of the modern Jewish state. The course is at its heart applied political theory: a case study of the way that ideas emerge from historical events, take on a life of their own, and then shape real outcomes in the world. The readings will weave together history, philosophy, literature and government.

L57 RelPol 254 Topics in AMCS: A Year in Review:

Hindsight is 2020: Piety, Pandemic, and Politics

What was 2020? This course examines a year that will be remembered alongside 2001, 1968, 1945, 1929, 1865, 1800, and 1776 as one of the most consequential in American history and culture. We will consider how the COVID-19 global pandemic, the bitterly contested 2020 Presidential election, and a summer of renewed protest for social justice reverberated through spheres of American arts, culture, education, energy, health care, labor, religion, sports, the university, technology and more. A series of guest experts from Washington University and around the country will provide instruction via lecture once per week, with students sharing their own experiences and analysis in discussion sections during the other weekly course meeting. The course is open to all, but it is geared toward first-year students and sophomores. It fulfills the Intro course requirement in the AMCS major. This is a variable topics course for courses best suited to the reviewing of a significant year in American Culture Studies. Topics vary by semester, so please see the current course listing.

Same as L98 AMCS 254

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, HUM EN: H

L57 RelPol 255 Religion, Environmentalism, and Politics

This course explores the intersections of anthropology, theology, economic interests, and activism. We will draw on a range of sources including social-scientific theories about religion and ritual, discussions of disenchantment and re-enchantment, and indigenous claims to land. These theoretical frameworks will provide context for discussing contemporary religious responses to ecological disaster, including both environmentalist and anti-environmentalist movements.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA EN: H

L57 RelPol 260 Religion in the African-American Experience: A Historical Survey

This course introduces students to important themes in the history of African-American, and thus in American, religious history, among them slavery, emancipation, urbanization, migration, consumer culture, sexuality, politics and media technologies. Primary attention is given to Afro-Protestantism in North America and the cultural, social and religious practices and traditions of these black communities. However, students will also be introduced to specific expressions of religious diversity and varying religious traditions and practices in African-American communities.

Credit 3 units. A&S IQ: HUM, SC, SD BU: ETH EN: H

L57 RelPol 280 African-American Religions

This course is an introduction to African-American religions. This course attends to change wrought in indigenous African religions by enslavement, the adoption of Christianity (and severe critiques of it) by slaves themselves, the building of African-American denominations, the rise of new black religious movements, and the role of religion in contemporary African-American life. At every stage of the course, religion is discussed with reference to key political developments in broader African-American history African diasporic history. The course proceeds in three parts. The course begins with a brief introduction to key themes and problems in the study of African-American religions.

For example, is there such thing as a "black church," and how does the study of African-American religion differ from the study of other religious groups or traditions? The second part, the bulk of the course, moves chronologically and situates African and African-American religions in their shifting cultural and political contexts from the beginning of the European slave trade to the present. We will discuss African-Americans' practice of several religious traditions: creole African religions, Islam, Protestant and Catholic Christianity, and new religious movements. The final part of the course focuses on several key issues and debates that are informed by the study of African-American religions and that have important connections with contemporary American life.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

L57 RelPol 285 Islam in America

Muslims have long been an embedded part of American culture since their forced arrival through the Transatlantic slave trade and later waves of immigration throughout the 18th-21st centuries from various regions. In this course, we attend to the history of Islam in the U.S. and analyze the heterogeneity of American Muslim experiences across race, ethnicity, and gender. We consider how American Muslims both shape and are shaped by U.S. society as autonomous religious actors and as a marginalized outgroup.

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

L57 RelPol 288 Muslims in the Media and Popular Culture

In the post 9/11 context of the United States, Muslims have been a constant presence in news media, typically cast in a negative light as political others who are backwards, threatening, and inherently prone to violence. This pattern has long been replicated in films in which Muslims serve as static and dehumanized perpetrators of violence and/or as symbols of a backwards and depraved culture, antithetical to U.S. values and interests. In recent years, however, Muslims have become increasingly visible in the entertainment industry as protagonists and producers of their own media, including G. Willow Wilson's "Ms. Marvel," Hulu's "Ramy," and Netflix's "Man Like Mobeen." This course explores a selection of recent media projects created by Muslim writers, actors, musicians, and comedians. We will be pairing films, television shows, music, and comics with scholarship on Islam and religion in the media to analyze Muslim representation and storytelling in contemporary popular culture. We will evaluate these works on their own terms, noting the ways in which gender and racial hierarchies dictate who gets to represent American Muslims while also assessing how these new media both disrupt and further reify Muslims' construction as religious and political outsiders.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, ETH

L57 RelPol 290 Islamophobia & U.S. Politics

The presence of Muslim minorities in the West is increasingly divisive as political leaders appeal to voters' fear of the 'Other' to promote Islamophobic agendas that reshape immigration and asylum policies and redefine Western identity as Christian. Politicians further exploit the rise of extremist groups like ISIS to justify anti-Muslim rhetoric and critique multiculturalism, claiming that Islam and the West are inherently antithetical. In this course we examine the phenomenon of Islamophobia as a form of anti-Muslim racism that parallels hostility towards

other religious and racial minorities in the US. We explore how while the post-9/11 context gave way to an increase in incidents of anti-Muslim violence, contemporary manifestations of Islamophobia are deeply rooted in state level anti-black racism from the early twentieth century, as well as in anti-Muslim attitudes that date back to the colonial period. By examining academic literature, political speeches, and news media sources, we situate Islamophobia within its historical context and also analyze how US anxieties about Islam and Muslims are not only gendered and racialized, but also exist across the political spectrum.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH, HUM EN: H

L57 RelPol 305 Between Malcolm X and Martin Luther King, Jr.: Race, Religion, and the Politics of Freedom

This course focuses on the political and spiritual lives of Martin and Malcolm. We will examine their personal biographies, speeches, writings, representations, FBI files, and legacies as a way to better understand how the intersections of religion, race, and politics came to bear upon the freedom struggles of people of color in the United States and abroad. The course also takes seriously the evolutions in both Martin and Malcolm's political approaches and intellectual development, focusing especially on the last years of their respective lives. We will also examine the critical literature that takes on the leadership styles and political philosophies of these communal leaders, as well as the very real opposition and surveillance they faced from state forces like the police and the FBI. Students will gain an understanding of what social conditions, religious structures and institutions, and personal experiences led to first the emergence and then the assassinations of these two figures. We will discuss the subtleties of their political analyses, pinpointing the key differences and similarities of their philosophies, approaches, and legacies; we will then apply these debates of the mid-20th century to contemporary events and social movements in terms of how their legacies are articulated and what we can learn from them in struggles for justice and recognition in 21st-century America and beyond.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: BA EN: H

L57 RelPol 307 Solidarity and Silence: Religious Strategies in the Political Sphere

Although political action is often considered a problem of making oneself heard, religious practices of silence, self-effacement, and withdrawal from certain worldly struggles have guided many significant political and social movements, particularly forms of non-violent resistance. This course considers the role of religious thought and practice in such movements in the twentieth century. The history of these movements presents an apparent paradox: how can political action emerge from the supposedly "private" realm of religion in the modern era, particularly its most individualistic formations in contemplative and mystical practices? Does the historical role of these practices in the political sphere complicate their portrayal in some scholarship as private, individual, and depoliticizing? With these questions animating our investigations, we will consider the work of authors and activists including Leo Tolstoy, Mahatma Gandhi, Dietrich Bonhoeffer, Martin Luther King, Jr., Simone Weil, and William Barber, as well as the history of movements associated with their work. Toward the end of the semester, we will turn to contemporary movements against economic inequality, intimate

violence, racially motivated violence, and discrimination toward transgender persons to discuss the use of religious strategies or religiously-derived strategies in current political and social activism.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH

L57 RelPol 3081 City on a Hill: The Concept and Culture of American Exceptionalism

This course examines the concept, history, and culture of American exceptionalism — the idea that America has been specially chosen, or has a special mission to the world. First, we examine the Puritan sermon that politicians quote when they describe America as a "city on a hill." This sermon has been called the "ur-text" of American literature, the foundational document of American culture; learning and drawing from multiple literary methodologies, we will re-investigate what that sermon means and how it came to tell a story about the Puritan origins of American culture — a thesis our class will reassess with the help of modern critics. In the second part of this class, we will broaden our discussion to consider the wider (and newer) meanings of American exceptionalism, theorizing the concept while looking at the way it has been revitalized, redefined and redeployed in recent years. Finally, the course ends with a careful study of American exceptionalism in modern political rhetoric, starting with JFK and proceeding through Reagan to the current day, ending with an analysis of Donald Trump and the rise of "America First." In the end, students will gain a firm grasp of the long history and continuing significance — the pervasive impact — of this concept in American culture.

Same as L98 AMCS 3081

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L57 RelPol 310 Religion and Violence

Is religion intrinsically connected with violence or merely manipulated to justify political positions and incite supporters? How has religion been the motivation and justification behind violent conflict, aggression and persecution? Does religion have a greater power to make war or peace? People have debated these questions for centuries as believers waged war in the name of their god(s). We'll study several critical theories about religion and violence and test them on historical and recent "religious" conflicts. Our investigation will be organized around five types of violence: 1) martyrdom and redemptive suffering, 2) claims on sacred space, 3) the violence of social stratification and "othering," 4) war and 5) apocalyptic and spiritual warfare. Case studies ranging from early Christian martyrs and crusades to attacks on abortion clinics and Tokyo subways will help clarify patterns and types of religious violence.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: FAAM, HUM BU: ETH EN: H

L57 RelPol 3105 American Holidays: Civic and Religious Celebrations in American Culture

This seminar examines a variety of religious holidays and civic rituals in American history and culture. Topics include: public conflicts over Christmas, African-American emancipation celebrations, the Fourth of July, Thanksgiving, Roman Catholic street festivals dedicated to the Virgin Mary, modern renderings of Hanukkah, as well as the memorialization of the Union and the Confederacy. Various interpretive approaches are explored, and

the intent is to broach a wide range of questions about history and tradition, gender and race, public memory and consumer culture, religion and nationalism, through this topical focus on holidays and holy days.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH

L57 RelPol 314 Global Circuits: Religion, Race, Empire

This seminar explores how American entanglements of race and religion shape and are part of larger global processes. Over the course of the semester, we will investigate these entanglements through conceptual, historical, and ethnographic questions about and insights into the remapping of religious traditions and communal experiences onto imperial terrain. We will examine this through a range of problem spaces, including colonial rule and racial hierarchies; religious difference and migration; the racialization of religion; diaspora and empire; persecution and power; and global geographies of the War on Terror. This course is not an exhaustive account of the enmeshment of race and religion in the United States or globally. Rather, this course aims to critically unpack formations of religion and race and their contemporary mediation by American geopolitics.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA, ETH

L57 RelPol 315 Virtues, Vices, Values: Regulating Morality in Modern America

This course takes morality and the question of "what's right" seriously as a lens through which to understand and assess modern American history. "Morality" is, of course, a devilishly flexible rhetoric, a language invoked to tell people how to act and how to be good, or, conversely, to criticize and to shame. When the state or a community wants its citizens or members to be "good," it crafts laws and creates customs to encourage or inhibit behaviors. Yet "good" is a contested concept, especially in a diverse, multiracial society. Thus this class examines a) how state and non-state actors, including religious leaders, have attempted to regulate the lived experiences of Americans and b) the conflicts that emerge over what, exactly, is correct, or right, or good for individuals, society, and the state. To what degree does calling something moral or immoral articulate or obstruct policy solutions? What do political coalitions oriented around "values" accomplish? Is it possible to hew to moral frames and remain inclusive and tolerant? Topics may include marriage, abortion, immigration, alcohol, incarceration, disease, money, and medical care.

Credit 3 units. A&S IQ: HUM, SD BU: ETH EN: H

L57 RelPol 321 American Religion, Gender, and Sexuality

Religious beliefs about gender and sexuality have long played a vital role in American politics, and this is vividly evident in debates over such issues as birth control, pornography, funding for AIDS research, abstinence-only sex education, sexual harassment, same-sex marriage, abortion, and more. Educated citizens need to understand the impact of these religiously inflected debates on our political culture. This course explores the centrality of sex to religion and politics in the United States, emphasizing Christianity (both Protestant and Catholic forms) and its weighty social and political role regulating the behavior of adults and children as well as its uses in legal and judicial decisions. Alongside scholarly readings in gender and sexuality, we will discuss popular devotional texts on gender and sexuality with a political bent. Students will leave the course able to analyze how religious beliefs about sex shape specific gender norms central to U.S. politics and the law.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU:
ETH EN: H

**L57 RelPol 330 Native American/Euro-American Encounters:
Confrontations of Bodies and Beliefs**

This course surveys the history and historiography of how Native Americans, Europeans and Euro-Americans reacted and adapted to one another's presence in North America from the 1600s to the mid-1800s, focusing on themes of religion and gender. We will examine the cultural and social implications of encounters between Native peoples, missionaries and other European and Euro-American Protestants and Catholics. We will pay particular attention to how bodies were a venue for encounter — through sexual contact, through the policing of gendered social and economic behaviors, and through religiously-based understandings of women's and men's duties and functions. We will also study how historians know what they know about these encounters, and what materials enable them to answer their historical questions.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM
EN: H

**L57 RelPol 334 Religion, Race, and Migration: Borders of
Difference?**

This seminar is an experiment in studying the intersections of religion, race, and migration through the idea of difference. We discuss how particular understandings of religion, race, and migration inform contemporary scholarship and shape national and international legal and governmental practices. Specifically, this course explores how difference-of community, body, and place-produces conditions of possibility. Over the semester, we will investigate various borders of difference, using binaries to guide our analysis. We will examine this through a range of problem spaces including: religion/secularism; race/ethnicity/sect; terrorist/citizen; and refugee/migrant. Ultimately, this course aims to critically unpack the relations of power by which people, places, and ideas are differentially constructed, maintained, and transformed

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: BA,
ETH

**L57 RelPol 340 Pilgrims and Seekers: American Spirituality
from Transcendentalism to the Present**

This seminar focuses on the formation of "spirituality" in American culture from the Transcendentalist world of Ralph Waldo Emerson on through more recent expressions of the "spiritual-but-not-religious" sensibility. How did "spirituality" come to be seen as something positively distinct from "organized religion"? What are the main contours of spiritual seeking in American culture, especially among those who claim no specific religious affiliation? The course also explores the social, political, and cultural consequences of this turn to the spiritual over the religious: for example, the consecration of liberal individualism, the relationship of religious exploration to both environmentalism and consumerism, the politics of cultural appropriation, the negotiation of religious pluralism, and the pursuit of the spiritual in art.

Credit 3 units. A&S IQ: HUM BU: ETH EN: H

L57 RelPol 345 Religion and Race in the United States

Race and ethnicity are central to how religious pluralism is worked out in America. How do the categories of race and religion intersect to produce concepts of a normative American identity? In this course, we examine the construct of race across various American congregational communities in order to understand debates on American identity and belonging. We also explore the idea of an American civil religion, and we engage with the boundaries of inclusion and exclusion of particular religious groups within this category based upon racialized criteria.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH,
HUM EN: H

**L57 RelPol 354 Christian Theology and Politics in the
Modern West**

This course engages students in the reading and analysis of influential religious texts from the Western Christian world from the mid-16th century to the present. The course also examines these texts in their historical context, raising questions about the relationship between theology and politics in the West. The course pursues such questions chronologically, with the first weeks devoted to Catholic and Calvinist contests over revelation and political authority during the 16th century to Puritan ruminations during the 17th century on the nature of worldly calling and personal eschatology. The next weeks concern 18th-century views of reason as a critique of traditional Christianity and Protestant responses centered on true virtue as a hedge against worldly loyalties. We then examine 19th-century discussions of the relationship between ethics, tradition, and religious experience. For the 20th century, we discuss texts that address Christian conceptions of redemption to issues of hypernationalism and race. The final weeks are devoted to recent theologies that have to do with the self and one's identity and current political crises. Juniors and seniors only. Sophomores by permission.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH,
HUM EN: H

L57 RelPol 355 The FBI and Religion

This seminar examines the relationship between the Federal Bureau of Investigation (FBI) and religion (i.e., faith communities, clerics, and religious professionals) as a way to study and understand 20th-century religion and politics. The course will investigate the history of the FBI as well as the various ways in which the FBI and religious groups have interacted. The course will pay particular attention to what the professor calls the four interrelated "modes" of FBI-religious engagement: counter-intelligence and surveillance, coordination and cooperation, censorship and publicity, and consultation.

Credit 3 units. A&S IQ: HUM BU: BA, ETH EN: H

L57 RelPol 357 God in the Courtroom

The U.S. Constitution holds a promise to secure freedom of religion through its First Amendment. Its two religion clauses declare unconstitutional any prohibition on the free exercise of religion and laws respecting the establishment of religion. The consequence is that, whenever a group demands to be recognized as religious and to be granted the right to exercise its religion, a court, a legislature, or an administrative official must determine whether the religious practice in question is legally religious. This means that law plays a uniquely important role in defining religion in the United States. In this seminar, we will explore the relation between law and religion in America. We

will study the religion clauses in the First Amendment to the United States Constitution, the histories of their interpretations by American courts in landmark cases, and the ways that religious studies scholars have understood and critiqued these cases. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH, HUM EN: H

L57 RelPol 358 Conscience and Religion in American Politics

Conscience is as American as apple pie and baseball, but its meaning and implications are deeply contested in American religion and politics. What is conscience? To what extent is conscience laden with theological — and, more specifically, Christian — commitments? What role should conscience, whether religious or ethical, play in political life? By considering what conscience means and what vision of politics it implies, we will reflect on what it means to be American: how religion should relate to politics, how individuals should engage with democratic laws and norms, and how religious and political dissenters might oppose American politics. We will focus on key moments in the history of American religion and politics through the lens of conscience, from the Interwar Period, the perceived threat of communism during the Cold War, the Civil Rights Movement, and the Vietnam War to the "culture wars" on abortion, marriage equality, LGBTQ rights, and the death penalty. This course draws on interdisciplinary sources from religious studies, political theory, law, and history in 20th- and 21st-century American politics.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH EN: H

L57 RelPol 360 Religion and the Modern Civil Rights Movement, 1954-1968

The modern Civil Rights Movement is a landmark event in the nation's political, civic, cultural and social history. In many contexts, this movement for and against civil and legal equality took on a religious ethos, with activists, opponents and observers believing that the net result of the marches, demonstrations and legislative rulings would redeem and/or destroy "The Soul of the Nation." This seminar examines the modern Civil Rights Movement and its strategies and goals, with an emphasis on the prominent religious ideologies and activities that were visible and utilized in the modern movement. The course pays particular attention to the Protestant, Catholic, Jewish, and Islamic traditions, figures and communities that were indifferent, combative, instrumental and/or supportive of Civil Rights legislation throughout the mid-20th century.

L57 RelPol 362 Islam, Gender, Sexuality

In this course, we examine major themes and debates around gender and sexuality in Islamic contexts, investigating how gender informs social, political, religious, and family life in Muslim cultures. We employ a chronological approach to these topics, beginning with the status of women in seventh century Arabia, to the period of Islamic expansion across Asia, North Africa, and the Iberian Peninsula, to the colonial period ending with the contemporary US contexts, wherein debates over the status of Muslim women in society have emerged with renewed vigor.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: BA, HUM, IS EN: H

L57 RelPol 365 Slavery, Sovereignty, Security: American Religions and the Problem of Freedom

The goal of this course is to think critically about freedom as an ideology and institution. What does it mean to be free? What are the relationships among individual liberties, national sovereignty, and civil rights? In what ways has freedom been defined in relation to — and materially depended on — unfreedom? At the same time, this course will treat American "religions" in a similar critical fashion: as a historically contingent category that has been forged and inflected within the same context of white Christian settler empire. Religion and freedom have intertwined throughout American history, including in the ideal of religious freedom. Our critical interrogation of freedom should help us think carefully about power, working with but also beyond tropes of domination and resistance.

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: BA, ETH EN: H

L57 RelPol 368 Theories and Methods in the Study of Religion

What is religion, and how can we study it? Do we need an answer to the first question to pursue the second? Why, and toward what ends, might we undertake such study? This course considers these questions through the investigation of significant attempts to study religion over the past century, paying particular attention to the methods, motivations, and aims of these works. Is the study of religion an effort to disprove or debunk it, or perhaps to support it? What would each mean? Is it an effort to describe the indescribable, or perhaps to translate complex beliefs and practices into a language in which they can be discussed by others? Why would such a translation be helpful, and to whom? Is the study of religion an investigation of a social phenomenon, an organization of communities, a specific formation of individuals, or perhaps a psychosis or illusion, evidence of the workings of power on our lives and the difficulty of bearing it? What is at stake in defining religion in these ways, and then in undertaking its study?

L57 RelPol 370 Religion and the Origins of Capitalism

This course examines the relationship between religion and the development of a capitalist economy in Europe, England, and America from 1550 to 1800. It relies on intellectual, social, and economic histories. We cover major thinkers from the early mercantilist thinkers such as William Petty to Adam Smith.

Credit 3 units. A&S IQ: HUM BU: ETH EN: H

L57 RelPol 385 Jesus, Jazz, and Gin: The 1920s and the History of Our Current Times

This course is a historical survey of the dynamic relationship between religion and politics during the 1920s. The 1920s were a tipping point for a great deal of the fundamental issues that shaped the 20th century in the U.S. This course seeks to investigate how religious activism, evangelism, discourse, practice and reinvention contributed to and was shaped by such change.

L57 RelPol 390 Mormon History in Global Context

The focus of this seminar is Mormonism, meaning, primarily, the Church of Jesus Christ of Latter-day Saints, which is the largest Mormon body. Mormons in the United States have gone from being one of the most intensely persecuted religious groups in the country's history to the fourth largest religious body in the U.S., with a reputation for patriotism and conservative family values. In addition to introducing who the Mormons are, their beliefs and religious practices, this seminar will explore issues raised by Mormonism's move toward the religious mainstream alongside its continuing distinctiveness. These issues include: What is the religious "mainstream" in the U.S.? How did conflicts over Mormonism during the 19th century, especially the conflict over polygamy, help define the limits of religious tolerance in this country? How have LDS teachings about gender and race, or controversies about whether or not Mormons are Christian, positioned and repositioned Mormons within U.S. society?
Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: ETH EN: H

L57 RelPol 395 Topics in Religion and Politics: The Abuse Crisis in Modern Christianity

For over a quarter-century, journalists have broken story after story about sexually abusive clergy in the U.S., many of them serial abusers of children and adolescents. While most accounts have focused on Catholic priests, many have also emerged of abusive evangelical and other Protestant ministers. The stories have illuminated how church bureaucrats have consistently protected abusers and subverted the efforts of victims and their families to seek recompense, accountability, and justice. These protections have often succeeded because of churches' political connections to law enforcement and legislators who have helped hide perpetrators and stymie survivors. Together we will analyze this cautionary tale about religion and politics by contextualizing it within the broader history of Christianity in the United States and beyond. Is this a case simply of a few bad apples or of institutional corruption? How has the church's response been shaped by fear of scandal, antipathy toward secularism, and theological teachings on gender and homosexuality? How does sexual abuse fit into the history of the church as a hierarchical institution? What challenges has the crisis posed to people of faith who are committed to the church, and can trust be repaired? Readings include legal case studies, internal church correspondence, victims' statements and criminal justice reports, documentary films and memoirs, and both journalistic and scholarly analysis of the clergy sex abuse crisis in the U.S. church.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L57 RelPol 407 Solidarity and Silence: Religious Strategies in the Political Sphere

Although political action is often considered a problem of making oneself heard, religious practices of silence, self-effacement and withdrawal from certain worldly struggles have guided many significant political and social movements, particularly forms of nonviolent resistance. This course considers the role of religious thought and practice in such movements in the 20th century. The history of these movements presents an apparent paradox: How

can political action emerge from the supposedly "private" realm of religion in the modern era, particularly its most individualistic formations in contemplative and mystical practices? Does the historical role of these practices in the political sphere complicate their portrayal in some scholarship as private, individual and depoliticizing? With these questions animating our investigations, we will consider the work of authors and activists including Leo Tolstoy, Mahatma Gandhi, Dietrich Bonhoeffer, Martin Luther King Jr., Simone Weil, and William Barber, as well as the history of movements associated with their work. Toward the end of the semester, we will turn to contemporary movements against economic inequality, intimate violence, racially motivated violence, and discrimination toward transgender persons to discuss the use of religious strategies or religiously-derived strategies in current political and social activism.

Credit 3 units. A&S IQ: HUM EN: H

L57 RelPol 410 The FBI and Religion

This seminar examines the relationship between the Federal Bureau of Investigation (FBI) and religion (i.e., faith communities, clerics, and religious professionals) as a way to study and understand 20th-century religion and politics. The course will investigate the history of the FBI as well as the various ways in which the FBI and religious groups have interacted. The course will pay particular attention to what the professor calls the four interrelated "modes" of FBI-religious engagement: counter-intelligence and surveillance, coordination and cooperation, censorship and publicity, and consultation.
Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L57 RelPol 4121 American Religion, Politics, and Culture: Historical Foundations

This seminar offers a wide-ranging overview of the leading historical scholarship concerning the busy intersections of American religion and politics. Topics include: church-state relations, religion and foreign policy, religion and social justice, religion and the science wars, the rise of the Religious Right, and the role of religion in public life. Prerequisites: advanced undergraduate or graduate standing in a related field or permission of instructor.

Credit 3 units. A&S IQ: HUM EN: H

L57 RelPol 4122 American Religion, Politics & Culture: Commentary from Alexis de Tocqueville to Contemporary Pundits

This research-oriented seminar involves in-depth historiographical investigation of leading scholarship at the busy intersections of American religion, politics and culture. The second semester focuses on classic and contemporary commentaries on the American religious and political scene from Alexis de Tocqueville through today's leading pundits. Some sessions will include a visiting scholar engaged in cutting-edge research — a feature that will allow seminar members to work with important scholars from beyond the university. Possible topics include: church-state relations, religion and foreign policy, religion and civil rights, religion and the science wars, the rise of the Religious Right, and the role of religion in national elections. The seminar is taught under the auspices of the John C. Danforth Center on Religion and Politics and is offered in two complementary parts (though enrollment in either one of the two is certainly possible). Its ambition is to build up a community

of inquirers engaged in the core questions that animate the Danforth Center. Prerequisites: advanced undergraduate or graduate standing in AMCS, History, or Religious Studies or permission of instructor.

Credit 3 units. A&S IQ: HUM

L57 RelPol 425 Law, Religion, and Politics

What is the role of religious argument in politics and law? What kinds of arguments are advanced, and how do they differ from one another? Are some of these arguments more acceptable than others in a liberal democracy? This course will explore these questions through the work of legal scholars, theologians and political theorists. Our topics include the nature of violence and coercion in the law, constraints on public reason, the relationship between religion and government, and the nature of religious practice and tradition.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: BA, ETH EN: H

L57 RelPol 430 Spiritual But Not Religious: The Politics of American Spirituality

What does it mean to claim to be "spiritual but not religious"? What are the social and political consequences of foregrounding spiritual seeking and religious experimentation over the "organized religion" of churches, synagogues, mosques, and temples?? The seminar focuses on a series of debates that have arisen over this "new spirituality" in American culture: the religious blessing of consumer culture, the rise of therapeutic models of meditation and mindfulness, the politics of Euro-American appropriations of Native American and Buddhist religious practices, the negotiation of religious pluralism, and the relationship between spiritual seeking and social justice.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L57 RelPol 435 Sabbath Politics: Rest and Refusal in Religion and Politics

The Jewish Sabbath arrives every week to disrupt ordinary life with a wholly different way of living, abstaining from some activities in divinely commanded rest. Is this different way of life strictly a break from the ordinary, or also a guide to it-and to how it might require disruption, reformation, and repair? Sabbath traditions have inspired radical political action including movements against debt, income inequality, environmental destruction, and racial injustice. This course will consider the ways that 20th and 21st century American Jews have practiced Shabbat and thought about its significance in political life. Students will read a range of Jewish texts including Abraham Joshua Heschel's classic 1951 book *The Sabbath*, and consider them in relation to movements of contemporary radical politics that have been inspired by Sabbath traditions, including Strike Debt, reparations for African-Americans, and agonistic democratic politics.

Credit 3 units. A&S IQ: HUM

L57 RelPol 440 Religion, Politics, and the University

This course explores in depth current issues related to pluralism, difference, and belonging in matters pertaining to religion and other important issues, with a particular focus on how these play out in the university context. The instructors, John Inazu and Eboo Patel, are two of the leading national commentators

on these issues. Prerequisite: Students enrolling in this class must submit a brief statement of interest (<http://law.wustl.edu/COURSES/INAZU/seminar1/summaries/>) to Professor John Inazu.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L57 RelPol 4491 American Unbelief from the Enlightenment to the Present

This seminar examines American secularism, humanism, and atheism from the Enlightenment forward to the present. Topics to be explored include the tensions between secular and Christian conceptions of the republic, the civil liberties of atheists and nontheists, the battles over religion in the public schools, the culture wars over secular humanism and science, and the contemporary growth of the religiously disaffiliated or religious "nones." The course considers not only the intellectual dimensions of skeptical critiques of religion but also the underlying politics of secularism (and anti-secularism) in a nation routinely imagined as "under God."

Credit 3 units. A&S IQ: HUM Arch: SSP Art: SSP EN: H

L57 RelPol 4564 American Pragmatism

This course examines the history of American pragmatism through three of its primary founders, the philosophers Charles Peirce, William James and John Dewey. It considers pragmatism as a response to the experience of uncertainty brought on by modernity and contextualizes it amid late 19th- and early 20th-century thought and politics, namely, scientific methodology, evolutionary theory, the probabilistic revolution, Transcendentalism, the rise of secularism, slavery, Abolitionism and the Civil War. Major essays by each thinker are read as well as three intellectual biographies and one critical survey. Same as L22 History 4564

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L57 RelPol 480 Readings in African-American Religious History

This course is an introduction to the history and variety of African-American religions in the New World diaspora. The approach will be chronological, from the earliest years to the New World to contemporary expressions. We will also explore some of the major historiographical themes that have catalyzed current scholarship, the purpose and effectiveness of black nationalist movements, issues of class and gender, the persistence of African elements of New World religious practice, performance and popular culture.

Credit 3 units. A&S IQ: HUM EN: H

L57 RelPol 485 Christian Nation, Secular Republic

The United States has often been imagined as both a deeply Christian nation and a thoroughly secular republic, and those conjoined framings have created recurrent conflict throughout American history. This seminar is designed to introduce advanced undergraduates and graduate students to current discussions of religion, secularism, and unbelief in American religious and political history. The course also places a complementary emphasis on close readings of crucial primary works, say, about the rise of deistic toleration or the persisting political power of Christianity-in textual particularities. The course takes as its starting point Charles Taylor's monumental account *A Secular Age* and works from there through various episodes of the Enlightenment and its long aftermath.

Credit 3 units. A&S IQ: HUM EN: H

L57 RelPol 495 Religion and the State: Global Mission, Global Empire

This course explores the complex intersections among U.S. political power on a global stage, and religious institutions and identities. Readings and discussions are organized around two very broad questions. First: How has this nation's history been shaped by religious "others" both inside and outside its borders? Second: How have perceptions of those others in turn affected U.S. responses to circumstances of global consequence — including, for example, foreign policy and diplomacy, missionary activity, and economic practices?

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

Religious Studies

If I headed back to college today, I would major in comparative religions rather than political science.

John Kerry, "Religion and Diplomacy" (<http://americamagazine.org/issue/religion-and-diplomacy/>)

Religion is a major source of inspiration, meaning and controversy in human societies. Fast-moving forces of globalization, migration and technology continue to bring diverse communities into closer proximity, often creating new religious communities in the process. The Religious Studies program at Washington University gives students the opportunity to learn about diverse religions as well as to study past and current events with a critical but open mind.

Religious Studies covers a wide range of subjects. It could include religion and American or international politics, religion and music, unbelief, religion and literature, issues of race or climate change, or scriptural studies. As such, Religious Studies embraces research in all its disciplinary and interdisciplinary complexity. Courses offered by our program are thus taught by faculty from a variety of disciplines and areas, including the Danforth Center on Religion and Politics; Anthropology; Classics; East Asian Languages and Cultures; English; History; Jewish, Islamic, and Middle Eastern Studies; Music; and Political Science.

Pursuing a major in Religious Studies will help students to understand and appreciate the complex ways in which religious traditions inform human thought and behavior. A double major or a minor will also enhance a broad range of studies, from politics and law to business and medicine. If a student is preparing for the advanced academic study of religion, seeking to complement another area of study, or simply feeling the need to acquire a greater knowledge of religions, a major or minor in Religious Studies is excellent preparation for living and working in a pluralistic society and global culture.

Majors

The Major in Religious Studies

Total units required: 30 units; 24 must be at the 300 level or higher

Required courses (6 units):

Code	Title	Units
Re St 102	Thinking About Religion	3
Re St 368	Theories and Methods in the Study of Religion	3
Total Units		6

Senior Capstone Experience (3 units): During their senior year, religious studies majors are required to take Re St 479 Senior Seminar in Religious Studies. Alternatively, students can fulfill the capstone requirement by writing a Senior Honors thesis.

Elective courses (21 units; 18 must be at the 300 level or higher): All majors must take at least seven courses chosen in consultation with their major advisor and that fulfill the following requirements:

- Broad coverage of religious traditions: Majors explore various religions by taking at least one course in four different traditions (e.g., Judaism, history of Christianity, Islam, Buddhism, East Asian religions, South Asian religions, religion in the Americas).
- Course concentrations: Majors focus their interests on a single religious tradition or theme by creating two course concentrations: a three-course series and a two-course series.

Note: An elective course can count toward the fulfillment of both A and B.

Additional Information

Senior Honors: Qualified majors are encouraged to apply for Senior Honors. Applications are available on the Religious Studies website (<https://religiousstudies.wustl.edu/senior-honors/>) and are due prior to the end of the junior year. Students wishing to pursue this option need to meet the minimum honors requirements stated in this *Bulletin* and to satisfactorily complete, during their last two semesters, Re St 498 Independent Work for Senior Honors I and Re St 499 Independent Work for Senior Honors II. Full guidelines are available on the Religious Studies website.

Transfer Credit: A maximum of 6 units of course work completed elsewhere — whether at another college or university or through a Washington University–approved study abroad program — may be applied toward the major. Credit will be awarded only for those courses that have been approved by the Religious Studies program.

Minors

The Minor in Religious Studies

Total units required: 18 units; 12 must be at the 300 level or higher

Required courses (6 units):

Code	Title	Units
Re St 102	Thinking About Religion	3
Re St 368	Theories and Methods in the Study of Religion	3
Total Units		6

Elective courses (12 units; 9 must be at the 300 level or higher): Students pursuing the minor may choose their electives based on individual interest and in consultation with their minor advisor.

Additional Information

Transfer Credit: A maximum of 3 units of course work completed elsewhere — whether at another college or university or through a Washington University–approved study abroad program — may be applied toward the minor. Credit will be awarded only for those courses that have been approved by the Religious Studies program.

L23 Re St 102 Thinking About Religion

Nearly everyone has had some experience with something they would call "religion," from at least a passing familiarity through the media to a lifetime of active participation in religious communities. But what do we actually mean when we use the word? What is a religion? What does it mean to call something a religion, or "religious"? And what does it mean to study religion, given the slipperiness of the concept itself? This course offers an introduction to the academic study of religion through a consideration of these questions: What is religion, and how can we study it? Do we need an answer to the first question to pursue the second? Why, and toward what ends, might we undertake such study? We will also consider what is at stake in our investigation and inquiry into religion — for the inquirers, for the subjects of inquiry, and for society more broadly — and what kind of lens the study of religion offers us on ourselves, our neighbors, and society, in turn. To these ends, we will discuss major theoretical approaches to the study of religion and significant work on religions and religious phenomena, toward a better understanding of what "religion" might be and how it might be studied today. No prior knowledge or experience of religion, religions, or anything religious is expected or required. This course is required for religious studies majors and minors. Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L23 Re St 1200 Religious Freedom in America

The intersection of religion and law in American society has sparked some of the fiercest cultural engagements in recent memory: Should a for-profit religious corporation have a right not to fund birth control for its employees? Can a public college expel campus religious groups whose membership is not open to all students? May a Muslim in prison grow a beard for religious reasons? Should a cake baker or a florist be permitted to refuse services for a gay wedding? Can a church hire and fire its ministers for any reason? These current debates and the issues that frame them are interwoven in the American story. This course introduces students to the major texts and historical arguments underlying that story. Drawing from the respective expertise of the instructors, the course will expose students to a variety of scholarly methods related to the issue: legal

history and case law, intellectual history and canonical texts, social history and narrative accounts, and political philosophy and contemporary analyses. This course is for first-year (non-transfer) students only.

L23 Re St 180 First-Year Seminar in Religious Studies

This course is for freshmen only. The topic varies from semester to semester. Recent topics include Miracles; Sexuality in Early Christianity; and The Self in Chinese Thought.

Credit 3 units. A&S: FYS A&S IQ: HUM Art: HUM BU: ETH EN: H

L23 Re St 189 Beginning Coptic II

After completing the remaining grammar lessons from Beginning Coptic I, we will build skill and confidence as translators by reading selections from a variety of Coptic texts: the Sahidic Gospel of Mark, the hagiographic "Life of John the Monk," selections from the Gospels of Mary and Thomas, and a unique Coptic translation of Plato's "Republic." In our readings from the Bible and Plato, those who read Classical Greek will also have the opportunity to study how ancient translators chose to render the Greek texts into Egyptian and how, in the process of translation, they changed the meaning of the originals. Prerequisite: Classics 188 or permission of instructor.

Same as L08 Classics 189

Credit 4 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L23 Re St 2010 Religion and American Society

This course explores religious life in the United States. We will focus our study on groups and movements that highlight distinctive ways of being both "religious" and "American," including the Americanization of global religions in the U.S. context. Major themes will include religious encounter and conflict; secularization, resurgent traditionalism, and new religious establishments; experimentalism, eclecticism, and so-called "spiritual" countercultures; the relationship between religious change and broader social and political currents (including clashes over race, class, gender, and sexuality); and the challenges of religious multiplicity in the United States. Students will do the following: (1) acquire knowledge of the disparate religions practiced in North America during the 20th century and beyond; (2) examine some of the chief conflicts as well as alliances between religion and the American social order in a global context; and (3) develop interpretive tools for understanding religion's present and enduring role in the United States and the world.

Same as L57 RelPol 201

Credit 3 units. A&S IQ: HUM, SC, SD BU: ETH EN: H

L23 Re St 2030 Arch City Religion: Global Religion & Public Life in St. Louis

The St. Louis region is home to a diverse array of global religious communities, many with strong political leanings. This course directly introduces students to some of this religious and political variety by coordinating weekly fieldtrips to living institutions and interacting with religious leaders across traditions. In any given semester, our visits may include organizations that identify as Catholic, mainline Protestant, Evangelical, Jewish, Muslim, Hindu, Buddhist, Vedantist, Scientological, progressive Baptist, or secular humanist, among others. We will also visit the International Institute of St. Louis and study the politics of immigration and refugee resettlement that have helped shape the city. Through our visits and conversations, the multiplicity of each religious community will become apparent as we encounter adherents across the political spectrum, embodying different ethnicities and committed to different degrees of "orthodoxy" or traditional belief and practice. Students should emerge from the course able to analyze the complex intersections of religion and politics in the St. Louis metropolitan area, illustrative of the United States as a whole. Note: All required site visits will take place during the regular class time.

L23 Re St 207 Scriptures and Cultural Traditions: Text & Tradition

When we think of the word "scripture" in antiquity, we might think of the texts that have been compiled in the different holy books that we currently have today. Yet the function of "scriptures" within a community, and the status given to different texts treated as "scriptural," has changed in different times and places. In this course, we will consider texts that would eventually come to be part of the Hebrew Bible, New Testament, and the Qu'ran as well as several of the exegetes and reading communities that shaped their various interpretations. We will explore how non-canonical sources played a role in the formation of the various canons we have today, comparing the authoritative status given to these texts to that given to other works from antiquity, such as the epics of Homer. Special attention will be played to the role of the receiving community in the development of "scripture," and the variety of the contexts in which scripture can function in the construction of and opposition to religious authority.

L23 Re St 208F Introduction to Jewish Civilization: History and Identity

The anthropologist Clifford Geertz once famously invoked Max Weber in writing that "man is an animal suspended in webs of significance he himself has spun. I take culture to be those webs." The main goal of this course — designed as an introduction to Jewish history, culture, and society — is to investigate the "webs of significance" produced by Jewish

societies and individuals, in a select number of historical periods, both as responses to historical circumstances and as expressions of Jewish identity. Over the course of the semester, we focus on the following historical settings: seventh-century BCE Judah and the Babylonian exile; pre-Islamic Palestine and Babylonia (the period of the Mishnah and the Talmud); Europe in the period of the Crusades; Islamic and Christian Spain; Europe in the 18th and 19th centuries; North America in the 20th century; and the modern State of Israel. For each period, we investigate the social and political conditions of Jewish life; identify the major texts that Jews possessed, studied, and produced; determine the non-Jewish influences on their attitudes and aspirations; and explore the efforts that Jews made to define what it meant to be part of a Jewish collective.

L23 Re St 210 The Good Life Between Religion and Politics

What constitutes a life well lived? How do we imagine answers to that question? Who gets to answer that question for us? Do we ask it as an "us" or as an individual? This course considers the way religious and political thought has shaped considerations of the classical ethical question of how we should live and the way that ethics has often served to connect religion and politics in thought and practice. Do we need a religious basis to answer ethical questions, or can we determine how to live without religious sources of authority? Is ethics a project of an individual or of communities? If the latter, are these political communities, religious ones, or something else? On what basis or with what capacities can we imagine new answers to ethical questions, either in community or on our own? We will discuss these questions and more through a consideration of a range of answers to the question of how we should live.

L23 Re St 225 Religion and Politics in American History

The United States has been imagined, by turns, as a deeply Christian nation and a thoroughly secular republic. These competing visions of the nation have created conflict throughout American history and have made the relationship between

religion and politics quite contentious. Are there shared national symbols and ideals that have held the country together? Is there a discernible "civil religion" in American public life—a shared faith in freedom, democratic citizenship, and patriotic sacrifice? Or, is there instead a set of competing, irreconcilable visions—say, a white Christian nationalism versus a pluralistic cosmopolitanism? This course examines such issues through a range of speeches and addresses by such generative figures as George Washington, Thomas Jefferson, Frederick Douglass, Abraham Lincoln, Elizabeth Cady Stanton, Franklin Delano Roosevelt, John F. Kennedy, Martin Luther King Jr., Ronald Reagan, Barack Obama, and John McCain. Through sustained discussion of their canonical speeches, as well as other monuments, rites, and declarations that have hallowed the nation, the class explores what ideals Americans have held sacred.

L23 Re St 2300 Black-Jewish Relations in the United States

The relationship of blacks and Jews in the United States is at once intimate and strained, mutually beneficial and antagonistic. This course examines this uneasy alliance from a number of perspectives including anthropology, politics and identity politics, history, religion and class. Beginning with American anthropology's Jewish founding father, Franz Boas, challenging the concept of race, the course traces the relations of blacks and Jews throughout the 20th century and in our contemporary moment. We will pay particular attention to the civil rights era, which is commonly upheld as the golden age of black-Jewish relations, as well as to this alliance's unraveling in the post-civil rights era. The course then moves to a unit focused on more recent ruptures and collaborations including the 1991 Crown Heights race riots, during which Orthodox Jews clashed with their black neighbors, and Jewish involvement in the Black Lives Matter movement. The course concludes with a unit on identity and identity politics focused on the complexity and fluidity of the categories "white," "black" and "Jewish."

L23 Re St 236F Introduction to East Asian Religions

This introductory course provides a basic, yet systematic, overview of certain major religious traditions that evolved in East Asia, particularly in China and Japan, but also in Korea. We begin with the classical Chinese traditions of Confucianism and Daoism, then turn our attention to Buddhism, which originated in India (ca. 500 BCE) and was later introduced into China (first century CE), Korea (fourth century CE) and Japan (sixth century CE). We then examine the Japanese tradition of Shinto, and focus more specifically upon the development of new Japanese forms of Buddhism. The course ends with a brief look at the coming of some of these religions to the West, and in particular the United States.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L23 Re St 2400 Jewish Political Thought

This course uses the concepts of political theory to explore the diverse Jewish political tradition. While this tradition includes writing from and about the three historical periods of Jewish self-rule (including the modern state of Israel), most of the Jewish political tradition comes from the understanding of politics as

viewed from outsiders to mainstream communities. Additionally, Jewish political thought can be found through a Jewish community's self-understanding based on its interpretation of Jewish text and law by which it bound itself. Because we span over 2,000 years of recorded history, we will not attempt to discern a single "Jewish political thought" but rather look at JPT through the lens of familiar concepts of political theory. The fundamental questions we will explore are the relationship of the Jewish tradition to concepts such as authority, law, consent, sovereignty and justice. We will ask how the Jewish tradition views government and the relationship between the authority of God and the authority of temporal powers. We will explore these questions through a range of materials that include both primary and secondary literature.

L23 Re St 2401 First-Year Seminar: Sex and the Bible

What does the Bible say about sex and sexual desire? Gender and gender identity? Bodies and bodily pleasure? This class critically examines sex, gender, and sexuality as they are constructed in the Bible. We will consider biblical ideas of sexuality and desire, laws regulating sex and the body, homoeroticism and homosexuality, trans representation, the portrayal of women, and queer characters and moments in the Bible. We will also explore how key biblical texts about gender and sexuality (Adam and Eve, Sodom and Gomorrah, the Whore of Babylon, etc) have been interpreted over time. Our methods of interpretation will include feminist, womanist, postcolonial, queer, and trans reading strategies; biblical texts will come from both the Hebrew Bible and the New Testament. This class is for first-year, non-transfer students only.

L23 Re St 2450 Love and Reason

Love often seems dramatically unreasonable, and reason can seem coldly rational in a way that excludes any emotion, passion, or affiliation even akin to love. The supposed opposition between love and reason has been used by Christian and secular thinkers throughout modernity to organize ways of knowing and judging, and to criticize claims of faith, belief, and desire. But are love and reason really so distinct? What does it mean to say so, and why might someone make this claim? Can love be reasoned, and even reasonable? Can reason be aided by love, and even driven by it? How might different answers to these questions affect our understanding of other possibly unreasonable categories like faith, belief, and piety? This course offers an introduction to modern Christian thought and Western philosophy through these questions and themes.

L23 Re St 2500 Zionism

Zionism is often thought of as a commitment to the principle that the Jewish People, as a distinct "people," has a right to self-determination in its own historical land of the biblical Palestine. Yet the history of the term and the set of ideologies show a much more complex understanding. In this course we trace the emergence of a number of different "Zionisms" that would lead to the creation of the modern state of Israel. And we explore how the political principles at the core of these ideologies have fared in the 65 years since the founding of the modern Jewish state. The course is at its heart applied political theory: a case study of the way that ideas emerge from historical events, take on a life of their own, and then shape real outcomes in the world. The readings will weave together history, philosophy, literature and government.

L23 Re St 280 African-American Religions

This course is an introduction to African-American religions. It attends to the changes wrought in indigenous African religions by enslavement, the adoption of Christianity (and severe critiques of it) by slaves themselves, the building of African-American denominations, the rise of new Black religious movements, and the role of religion in contemporary African-American life. At every stage of the course, religion is discussed with reference to key political developments in broader African-American history and African diasporic history. The course proceeds in three parts. It begins with a brief introduction to key themes and problems in the study of African-American religions. For example, is there such thing as a "Black church," and how does the study of African-American religion differ from the study of other religious groups or traditions? The second part, which makes up the bulk of the course, moves chronologically and situates African and African-American religions in their shifting cultural and political contexts from the beginning of the European slave trade to the present. We will discuss African-Americans' practice of several religious traditions: creole African religions, Islam, Protestant and Catholic Christianity, and new religious movements. The final part of the course focuses on several key issues and debates that are informed by the study of African-American religions and that have important connections with contemporary American life.

L23 Re St 288 Muslims in the Media and Popular Culture

In the post-9/11 context of the United States, Muslims have been a constant presence in news media, typically cast in a negative light as political others who are backwards, threatening, and inherently prone to violence. This pattern has long been replicated in films in which Muslims serve as static and dehumanized perpetrators of violence and/or as symbols of a backwards and depraved culture, antithetical to U.S. values and interests. In recent years, however, Muslims have become increasingly visible in the entertainment industry as protagonists and producers of their own media, including G. Willow Wilson's "Ms. Marvel," Hulu's "Ramy," and Netflix's "Man Like Mobeen." This course explores a selection of recent media projects created by Muslim writers, actors, musicians, and comedians.

We will be pairing films, television shows, music, and comics with scholarship on Islam and religion in the media to analyze Muslim representation and storytelling in contemporary popular culture. We will evaluate these works on their own terms, noting the ways in which gender and racial hierarchies dictate who gets to represent American Muslims while also assessing how these new media both disrupt and further reify Muslims' construction as religious and political outsiders.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM BU: BA, ETH

L23 Re St 290 Islamophobia & U.S. Politics

The presence of Muslim minorities in the West is increasingly divisive as political leaders appeal to voters' fear of the 'Other' to promote Islamophobic agendas that reshape immigration and asylum policies and redefine Western identity as Christian. Politicians further exploit the rise of extremist groups like ISIS to justify anti-Muslim rhetoric and critique multiculturalism, claiming that Islam and the West are inherently antithetical. In this course we examine the phenomenon of Islamophobia as a form of anti-Muslim racism that parallels hostility towards other religious and racial minorities in the US. We explore how while the post-9/11 context gave way to an increase in incidents of anti-Muslim violence, contemporary manifestations of Islamophobia are deeply rooted in state level anti-black racism from the early twentieth century, as well as in anti-Muslim attitudes that date back to the colonial period. By examining academic literature, political speeches, and news media sources, we situate Islamophobia within its historical context and also analyze how US anxieties about Islam and Muslims are not only gendered and racialized, but also exist across the political spectrum.

L23 Re St 303 Daoist Traditions

This course offers an introduction to the history, practices and worldviews that define the Daoist traditions. Through both secondary scholarship and primary texts, we consider the history of Daoism in reference to the continuities and discontinuities of formative concepts, social norms, and religious practices. Our inquiry into this history centers on consideration of the social forces that have driven the development of Daoism from the second century to the modern day. Special consideration is given to specific Daoist groups and their textual and practical traditions: the Celestial Masters (Tianshi), Great Clarity (Taiqing), Upper Clarity (Shangqing), Numinous Treasure (Lingbao), and Complete Perfection (Quanzhen). Throughout the semester we also reflect on certain topics and themes concerning Daoist traditions. These include constructions of identity and community, material culture, the construction of sacred space, and cultivation techniques.

L23 Re St 3030 Love Songs and Laptops: Rediscovering Medieval Music in the Digital Age

Using our laptops as portals into the past, students will gain first-hand experience as historical detectives. In this course, we will explore the world of medieval love — from the chivalrous and courtly to the bodily and obscene — as represented in books of songs from the 15th century. Scrumptiously decorated and preserved, five interrelated songbooks from central France, known as the "Loire Valley Chansonniers" contain the majority of love songs from this period. Working from digitized versions of the songbooks, online editions, and modern audio recordings, we will address the following questions: What do the songbooks tell us about the culture in which they were created? How do the graphic decorations that frame each song interact with its music and lyrics? Lastly, by contextualizing these digital sources with respect to the growing interest in the interface between the humanities and digital technology, we will discuss what we can gain from these developments and what — if anything — we stand to lose. (Ability to read music not required.)

L23 Re St 3044 Humors, Pox, and Plague: Medieval and Early Modern Medicine

This course examines how people thought about, experienced and managed disease in the medieval and early modern periods. Students will consider developments in learned medicine alongside the activities of a diverse range of practitioners — e.g., surgeons, empirics, quacks, midwives, saints, and local healers — involved in the business of curing a wide range of ailments. Significant attention will be paid to the experiences of patients and the social and cultural significance of disease. Major topics include: the rise and fall of humoral medicine; religious explanations of illness; diseases such as leprosy, syphilis and plague; the rise of anatomy; herbs and pharmaceuticals; the experience of childbirth; and the emergence of identifiably "modern" institutions such as hospitals, the medical profession, and public health. The focus will be on Western Europe but we'll also consider developments in the Islamic world and the Americas.

L23 Re St 3050 Between Malcolm X and Martin Luther King, Jr.: Race, Religion, and the Politics of Freedom

This course focuses on the political and spiritual lives of Martin and Malcolm. We will examine their personal biographies, speeches, writings, representations, FBI files, and legacies as a way to better understand how the intersections of religion, race, and politics came to bear upon the freedom struggles of people of color in the United States and abroad. The course also takes seriously the evolutions in both Martin and Malcolm's political approaches and intellectual development, focusing especially on the last years of their respective lives. We will also examine the critical literature that takes on the leadership styles and political philosophies of these communal leaders, as well as the very real opposition and surveillance they faced from state forces like the police and the FBI. Students will gain an understanding of what social conditions, religious structures and institutions, and personal experiences led to first the emergence and then the assassinations of these two figures. We will discuss the subtleties of their political analyses, pinpointing the key differences and similarities of their philosophies, approaches, and legacies; we will then apply these debates of the mid-20th century to contemporary events and social movements in terms of how their legacies are articulated and what we can learn from them in struggles for justice and recognition in 21st-century America and beyond.

L23 Re St 3051 Orthodoxy and Heresy in Early Christianity

From the time Jesus of Nazareth preached in the rural countryside of Judea, his followers interpreted his words differently and wrote varied accounts of what he said and did. As time passed and as Jesus' movement grew into a world religion — Christianity — disagreement among Christians only continued to increase, leading to the need to define and enforce correct beliefs and practices to create a Christian "orthodoxy" embodied in the now-familiar institutions of creed, canon, and clergy. Yet in the process of creating an orthodoxy, what was left out? Whose voices were suppressed? Through the careful study of ancient texts that were long-ago deemed heretical and virtually lost until the 20th century, this course examines the wide varieties of Christianity in its nascent years and discusses how the framers of orthodoxy defined themselves against these alternatives.

ETH, HUM EN: H

L23 Re St 3065 Voice, Language and Power: Late Medieval Religious Writing

In the later Middle Ages, there is a flowering throughout Christian Europe of religious writings that offer a new voice in which personal religious experience can be pursued and expressed. Their voices are mainly intended to be communal ones, to be contained within the Church and regulated by it. But in each case the fact that it is a voice may offer a mode of resistance, or of difference. Such writing is often aimed at lay people, sometimes exclusively at women; and sometimes the intended auditors become the authors, and propose a version of religious experience that claims a new and more intimate kind of power for its readers. This course looks at a wide range of such writing in vernacular languages read in translation (English, French and German), including the work of Meister Eckhart, Marguerite Porete, Margery Kempe, Julian of Norwich, Eleanor Hull, the anonymous writer of *The Cloud of Unknowing* and the perhaps pseudonymous William Langland, author of *Piers Plowman*. Whether such writing seeks to be orthodox or conducive to heresy, it presents a challenge to the power of clergy — a challenge that is written in the vernacular language of lay people, rather than clerical Latin, and in doing so offers distinctively new voices for religious experience. The course will also look at ways in which such work might have been influenced, if only oppositionally or at times indirectly, by contact with Muslim and Jewish writing (including Jewish exegesis of the Psalms).

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN:
H

L23 Re St 3071 Solidarity and Silence: Religious Strategies in the Political Sphere

Although political action is often considered a problem of making oneself heard, religious practices of silence, self-effacement, and withdrawal from certain worldly struggles have guided many significant political and social movements, particularly forms of non-violent resistance. This course considers the role of religious thought and practice in such movements in the twentieth century. The history of these movements presents an apparent paradox: how can political action emerge from the supposedly "private" realm of religion in the modern era, particularly its most individualistic formations in contemplative and mystical practices? Does the historical role of these practices in the political sphere complicate their portrayal in some scholarship

as private, individual, and depoliticizing? With these questions animating our investigations, we will consider the work of authors and activists including Leo Tolstoy, Mahatma Gandhi, Dietrich Bonhoeffer, Martin Luther King, Jr., Simone Weil, and William Barber, as well as the history of movements associated with their work. Toward the end of the semester, we will turn to contemporary movements against economic inequality, intimate violence, racially motivated violence, and discrimination toward transgender persons to discuss the use of religious strategies or religiously-derived strategies in current political and social activism.

L23 Re St 3074 Hinduism and the Hindu Right

We are witnessing a global rise in rightwing politics, and India is no exception. In May 2019, Narendra Modi and his "Hindu Nationalist" party were elected to power for a second term. Observers in the United States and Europe may be stunned by what seems to be a new development, but observers in India have been following the rise of the Hindu Right since the early 1990s. In its wake, the Hindu Right has brought violence against minorities; curbs on free speech; and moves toward second-class citizenship for Indian Muslims. This course will track the history of the Hindu Right in India from its 19th-century roots to the present. The struggle to come to grips with the Hindu Right is of immediate political relevance. It also raises big questions about the history of religion and the politics of secularism.

L23 Re St 307F Introduction to the New Testament

What can be known — from an historical perspective — about the life and teachings of Jesus and his earliest followers? How did Jesus see himself and how did his followers see him? How did the lives, teachings and deaths of Jesus and his followers come to form the heart of a new movement? If Jesus and the apostles were all Jews, how did Christianity emerge as a distinct "religion"? This course investigates these questions through a focus on the earliest sources for Jesus and his first followers, including and extending beyond the canonical books of the Christian New Testament. Our approach in this course is historical and literary, rather than theological or confessional: We ask what Jesus, his first followers, and their Jewish and "pagan" contemporaries did and believed, and we try to catch glimpses of the worlds in which they lived and the cultures which they took for granted.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM

L23 Re St 3080 City on a Hill: The Concept and Culture of American Exceptionalism

This course examines the concept, history, and culture of American exceptionalism — the idea that America has been specially chosen, or has a special mission to the world. First, we examine the Puritan sermon that politicians quote when they describe America as a "city on a hill." This sermon has been called the "ur-text" of American literature, the foundational document of American culture; learning and drawing from multiple literary methodologies, we will re-investigate what that sermon means and how it came to tell a story about the Puritan origins of American culture — a thesis our class will reassess with the help of modern critics. In the second part of this class, we will broaden our discussion to consider the wider (and newer)

meanings of American exceptionalism, theorizing the concept while looking at the way it has been revitalized, redefined and redeployed in recent years. Finally, the course ends with a careful study of American exceptionalism in modern political rhetoric, starting with JFK and proceeding through Reagan to the current day, ending with an analysis of Donald Trump and the rise of "America First." In the end, students will gain a firm grasp of the long history and continuing significance — the pervasive impact — of this concept in American culture.

L23 Re St 3082 From the Temple to the Talmud: The Emergence of Rabbinic Judaism

This course offers a survey of the historical, literary, social and conceptual development of Rabbinic Judaism from its emergence in late antiquity to the early Middle Ages. The goal of the course is to study Rabbinic Judaism as a dynamic phenomenon — as a constantly developing religious system. Among the topics explored are: How did Judaism evolve from a sacrificial cult to a text-based religion? How did the "Rabbis" emerge as a movement after the destruction of the Second Temple and how could they replace the old priestly elite? How did Rabbinic Judaism develop in its two centers of origin, Palestine (the Land of Israel) and Babylonia (Iraq), to become the dominant form of Judaism under the rule of Islam? How did Jewish ritual and liturgy develop under Rabbinic influence? How were the Rabbis organized and was there diversity within the group? What was the Rabbis' view of women? How did they perceive non-Rabbinic Jews and non-Jews? As Rabbinic Literature is used as the main source to answer these questions, the course provides an introduction to the Mishnah, the Palestinian and Babylonian Talmuds, and the Midrash collections — a literature that defines the character of Judaism down to our own times. All texts are read in translation.

L23 Re St 3090 Chinese Thought

This course offers an introduction to Chinese thought through a study of thinkers from arguably one of the most vibrant periods of religious-philosophical discourse in China. We will examine early classical texts from the Daoist, Confucian, Mohist, and Legalist traditions, and we will follow arguments in which the thinkers expand upon, dispute, and respond to each other in regard to questions that are still important to us today. We will explore issues such as notions of the self, conceptions of the greater cosmos, the role of rituals, ideas about human nature, and the subjects of freedom and duty. Motivating the course will be the underlying question, "What is the good life?"

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L23 Re St 3091 Confucian Thought

This course is designed to introduce students to the history and teachings of one of the world's major religious traditions: Confucianism. We will examine how Confucianism developed in ancient China and afterwards spread throughout East Asia and beyond. In particular, we will pay attention to the issue of ritual and how Confucians attempted to ritualize social interactions and the world at large. In order to do so, we will engage in the writings of Confucius, Mengzi, and Xunzi, three early Chinese writers whose basic ideas about ritual heavily informed myriad cultural practices that are formative for large portions of East Asia today. Hence, this course on ancient thinkers not only introduces thoughts and practices prevalent

throughout premodern China, Japan and Korea. It also functions as a catalyst that helps us understand some of the reasons and motivations behind these communities' recent efforts to renegotiate and question "the colonialist flavor" of human rights and democracy.

Credit 3 units. A&S IQ: HUM, LCD BU: ETH EN: H

L23 Re St 3100 Religion and Violence

Is religion intrinsically connected with violence or merely manipulated to justify political positions and incite supporters? How has religion been the motivation and justification behind violent conflict, aggression and persecution? Does religion have a greater power to make war or peace? People have debated these questions for centuries as believers waged war in the name of their god(s). We'll study several critical theories about religion and violence and test them on historical and recent "religious" conflicts. Our investigation will be organized around five types of violence: 1) martyrdom and redemptive suffering, 2) claims on sacred space, 3) the violence of social stratification and "othering," 4) war and 5) apocalyptic and spiritual warfare. Case studies ranging from early Christian martyrs and crusades to attacks on abortion clinics and Tokyo subways will help clarify patterns and types of religious violence.

L23 Re St 3101 The Problem of Evil: The Holocaust and Other Horrors

The question of how God can allow evil to occur to the righteous or innocent people has been a perennial dilemma in religion and philosophy. We study the classic statement of the problem in the biblical book of Job, the ancient Near Eastern literature on which Job is based, and traditional Jewish and Christian interpretation of Job. We study the major approaches to the problem of evil in Western philosophical and religious thought.

L23 Re St 3102 Defense Against the Dark Arts: An Anthropological Approach to the Study of Religion and Health

This class is a comparative survey of religion, magic, and witchcraft as they are related to concepts of the body, health, healing and death across cultures. As such, students in this class will be expected to simultaneously learn details from particular magical and healing traditions studied in class, as well as to relate these details to theories about within the discipline of Anthropology (medical, cultural, psychological) and the field of Religious Studies. Special themes addressed in the class are the reasonableness of belief in magic, religion and religious practice as "magical," the body and definitions of health, healing, and illness and disease as symbolically, culturally, even magically constructed and experienced.

L23 Re St 311 Buddhist Traditions

This course examines the historical development of Buddhism from its origins in South Asia in the sixth to fifth century BCE, through the transmission of the teachings and practices to East Asia, Southeast Asia and Tibet, to contemporary transformations of the tradition in the modern West. In the first third of the

course, we focus on the biographical and ritual expressions of the historical Buddha's life story, the foundational teachings attributed to the Buddha, and the formation and development of the Buddhist community. In the second third, we examine the rise of the Mahayana, the development of the Mahayana pantheon and rituals, and the spread of Mahayana in East Asia. In the final third, we explore the Theravada tradition in Sri Lanka and Thailand, then Tantric Buddhism in India, Tibet and East Asia. We close the course with an overview of Buddhism in the modern West.

L23 Re St 3110 Sacred Architecture of the Indian Subcontinent

The built structure remains a principal visible record of the evolution of a civilization and its culture. Through this interdisciplinary course on culture, design, religion and society, students will be introduced to and gain a deeper insight into the rich diversity of South Asia through the study of the architecture of its significant sacred places. We will take a journey through the Hindu, Jain and Buddhist Temples; the Islamic Mosque; the Sikh Gurudwara; the Zoroastrian Fire Temple; the Jewish Synagogue; and the Christian Church, tracing the evolution of these places of worship from the Indus Valley Civilization to Pre-Colonial times. Through visuals, readings, and discussions, students will learn about the different architectural styles and motifs used in sacred buildings and how they came about. We will explore the inter-relationships between the design elements through the lens of political, social, religious, regional and technological influences and understand the ways in which evolving design principles reflect these influences overtime. This course will be of interest to students of languages and cultures, architecture, archeology, art history, history, preservation, religion, and South Asian culture, among others. Please note: At the end of the semester, students will go on a field trip to experience the diverse sacred architecture in the St. Louis region. No prior knowledge of architecture or the history of this region is required.

L23 Re St 312 South Asian Religious Traditions

In this course we will learn the basic vocabulary (conceptual, ritual, visual) needed to become conversant with the various religious traditions that are important to personal, social, and political life on the Indian subcontinent and beyond. We will first encounter each tradition through narrative, with the support of visual media. We will then explore how contemporary adherents make these traditions meaningful for themselves — in their everyday lives, in their struggles for social change, and in their political statements and contestations. Students will also become familiar with the analytical categories and methodologies that make up the basic toolkit of the religion scholar. Prior knowledge of India or Pakistan is not required. First year students are welcome to enroll in this course.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H UColl: CD

L23 Re St 3130 Sexuality in Early Christianity

What did Jesus of Nazareth and his early followers teach about sexuality in terms of marriage, adultery, divorce, the virtues of procreation and celibacy, same-sex relationships, and erotic desire? How and why did ancient Christians take different

stances on these issues, and how do these traditions continue to inform sexual ethics and gender roles today? In this course, we will study these questions by examining key passages from the teachings of Jesus in the Gospels, Paul's letters, writings of early church leaders, martyr propaganda, monastic literature, and apocryphal books deemed heretical. We will also consider the interpretations of contemporary historians of religion informed by recent trends in sexuality and gender theories.

L23 Re St 3140 Global Circuits: Religion, Race, Empire

This seminar explores how American entanglements of race and religion shape and are part of larger global processes. Over the course of the semester, we will investigate these entanglements through conceptual, historical, and ethnographic questions about and insights into the remapping of religious traditions and communal experiences onto imperial terrain. We will examine this through a range of problem spaces, including colonial rule and racial hierarchies; religious difference and migration; the racialization of religion; diaspora and empire; persecution and power; and global geographies of the War on Terror. This course is not an exhaustive account of the enmeshment of race and religion in the United States or globally. Rather, this course aims to critically unpack formations of religion and race and their contemporary mediation by American geopolitics.

Same as L57 RelPol 314

L23 Re St 314C Islamic History 1200-1800

An introduction to Islamic politics and societies from the Mongol conquests to the 13th century to the collapse and weakening of the colossal "gunpowder" empires of the Ottomans, Safavids and Mughals in the early 18th century. Broadly speaking, this course covers the Middle Period (1000-1800) of Islamic history, sandwiched between the Early and High Caliphal periods (600-100) on the one hand and the Modern Period (1800-present) on the other hand. Familiarity with the Early and High Caliphal periods is not assumed. The course is not a "survey" of this period but a series of "windows" that allows students to develop both an in-depth understanding of some key features of Islamic societies and a clear appreciation of the challenges (as well as the rewards!) that await historians of the Middle Period. Particular attention is given to the Mamluk and Ottoman Middle East, Safavid Iran and Mughal India.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM, IS

L23 Re St 315 Virtues, Vices, Values: Regulating Morality in Modern America

This course takes morality and the question of "what's right" seriously as a lens through which to understand and assess modern American history. "Morality" is, of course, a devilishly flexible rhetoric, a language invoked to tell people how to act and how to be good, or, conversely, to criticize and to shame. When the state or a community wants its citizens or members to be "good," it crafts laws and creates customs to encourage or inhibit behaviors. Yet "good" is a contested concept, especially in a diverse, multiracial society. Thus this class examines a) how state and non-state actors, including religious leaders, have attempted to regulate the lived experiences of Americans and b) the conflicts that emerge over what, exactly, is correct, or right, or good for individuals, society, and the state. To what degree does calling something moral or immoral articulate or obstruct policy solutions? What do political coalitions oriented around "values" accomplish? Is it possible to hew to moral frames and remain inclusive and tolerant? Topics may include marriage, abortion, immigration, alcohol, incarceration, disease, money, and medical care.

L23 Re St 3160 Beauty & Aesthetics In Islam: Islamicate Literature, Material Art, & Architecture

This course provides an introduction to beauty and aesthetics in Muslim societies from across the world. The course focuses on Islamicate literature (e.g., poetry, narrative, biography), material art (e.g., textiles, ceramics, decorated manuscripts), and architecture (e.g., palaces, built gardens, mosques, mausoleums). Some attention is also given to performing arts (e.g., dance, music, plays, puppetry). Various types of material will be considered, ranging from religious to non-religious. Material will be drawn from across the Muslim world, including the Middle East, Sub-Saharan Africa, Central Asia, South Asia, and Southeast Asia. Although the course is primarily concerned with the premodern period, it will also consider the impact of modernity on Muslim literature, art, and architecture.

L23 Re St 3171 Religion and Culture in South and Southeast Asia

Although it is now common to differentiate between South and Southeast Asia, historically these regions have often been conceptualized as part of a single geographical area. Known as the "(East) Indies", this area is marked by a rich history of (earlier) Hindu and Buddhist influences, as well as (later) Islamic and Christian influences. The present course will take an in-depth look at the four aforementioned religious traditions, and examine how they have shaped local forms of culture in premodern and modern times. Students will be introduced to host of phenomena in South and Southeast Asian societies, including religious worship, education, law, traditional governance, colonial governance, art, architecture, economic production, kinship, gender, and sexuality. Countries to be studied in the course include India, Pakistan, Sri Lanka, Thailand, Myanmar, Indonesia, Malaysia, the Philippines, and Papua New Guinea.

L23 Re St 3183 The Jews of North Africa

This course examines the colonial and postcolonial experiences of Jews living in North Africa (mainly Algeria, Morocco, Tunisia, Libya and Egypt) in the context of the region's connections with and relationships to the European powers in the 19th and 20th centuries. We will focus on how the intrusion of foreign powers disrupted and shifted long-standing relationships between Jews and their non-Jewish neighbors, particularly the Muslim populations. We will also explore changes that occurred within the Jewish community as Jews negotiated their place within the new European Imperial system and its subsequent dismantling. Students will have the opportunity to engage with European ideas of "regenerating" North African Jews living under Ottoman Rule, the changing political and social statuses of Jews throughout the French and British regions, the changing relationship between Jews and their non-Jewish neighbors, the rupture caused by both World Wars, and how Jews coped with and responded to the dismantling of European empires and the birth of nation-states in the region, including Israel.

L23 Re St 3192 Modern South Asia

This course covers the history of the Indian subcontinent in the 19th and 20th centuries. We look closely at a number of issues including colonialism in India; anticolonial movements; the experiences of women; the interplay between religion and national identity; and popular culture in modern India. Political and social history are emphasized equally.

Same as L22 History 3192

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM, IS EN: H

L23 Re St 321 American Religion and the Politics of Gender and Sexuality

Religious beliefs about gender and sexuality have long played a vital role in American politics, and this is vividly evident in debates over such issues as birth control, pornography, funding for AIDS research, abstinence-only sex education, sexual harassment, same-sex marriage, abortion, and more. Educated citizens need to understand the impact of these religiously inflected debates on our political culture. This course explores the centrality of sex to religion and politics in the United States, emphasizing Christianity (both Protestant and Catholic forms) and its weighty social and political role regulating the behavior of adults and children as well as its uses in legal and judicial decisions. Alongside scholarly readings in gender and sexuality, we will discuss popular devotional texts on gender and sexuality with a political bent. Students will leave the course able to analyze how religious beliefs about sex shape specific gender norms central to U.S. politics and the law.

Credit 3 units. A&S IQ: HUM, SC, SD Arch: HUM Art: HUM BU: ETH EN: H

L23 Re St 323 Jews and Christians in the Premodern World

In modern times, it is common to think of Judaism and Christianity as two distinct, if historically connected, "religions." Increasingly, however, historians of ancient religions have thought more deeply about the implications of taking Christianity and Judaism in antiquity as more fluid and porous than we

tend to think of them. In this upper-division course, we will explore the ways in which the boundaries that early Christians attempted to draw between Christianity and Judaism remained unstable and incomplete. While the various efforts to establish early Christian identity led to the production of a variety of hermeneutical representations of the Judaeoi, these literary representations nevertheless often reflected, to various degrees, engagement with actual historical Jews/Judeans, who shared political, economic, and intellectual worlds with Christians. We will consider how early Christian discourse about Jews and Judaism informed and was informed by intra-Christian disputes and their negotiations of their relationships with the wider Greco-Roman culture. We will explore how Christian efforts to establish both continuity and difference between Judaism played a role in the construction of "orthodoxy" and "heresy," as well as the way in which Christians re-appropriated Jewish texts, rituals and ideas in their efforts to construct a Christian identity. We will also explore how this continued dynamic of difference and continuity continued into the Middle Ages.

Credit 3 units. A&S IQ: HUM, LCD BU: ETH EN: H

L23 Re St 3232 Religion & Nationalism in the Middle East & South Asia

How does religion shape national identity? How and why do some religious traditions become intertwined with the identities of national communities, often at the expense of others? In this course we explore how Islam, Judaism, Hinduism, and Christianity have interacted with modern nationalism to shape the nation-states of the Middle East and South Asia in profound ways. Throughout the course, we examine a range of case studies to compare and contrast, for example, the complex interaction between religion and nationalism in the creation of Pakistan and Israel in 1947 and 1948 as Muslim and Jewish national homes, the rise of the Hindu Right in India, religion and race in Iran, or the significance of Christianity and Islam for Palestinians and Iraqis. As we do so, we investigate how national movements have selectively and creatively engaged religious traditions over time in order to redefine communal boundaries, narrate new histories, exclude minorities, and reread sacred texts to draw the borders of their national homelands, which have often overlapped at great cost.

L23 Re St 3262 The Early Medieval World 300-1000

This course begins with the crisis of the Roman Empire in the third century and the conversion of the Emperor Constantine to Christianity in 312. We will study the so-called "barbarian invasions" of the fourth and fifth centuries and the collapse of the Roman Empire in the West. The Roman Empire in the East (and commonly known as the Byzantine Empire after the seventh century) survived intact, developing a very different style of Christianity than in the lands of the former western empire. Apart from examining Christianization in the deserts of Egypt or the chilly North Sea, we will discuss the phenomenon of Islam in the seventh century (especially after the Prophet Muhammad's death in 632) and the Arab conquests of the eastern Mediterranean and north Africa. In the post-Roman world of the West we will read about the Anglo-Saxons, the Carolingians, and the Vikings. In exploring these topics we will have to think about the relationship of kings to popes, Emperors to patriarchs, of missionaries to pagans, of cities to villages, of the sacred to the profane. Our attention will be directed to things as various as different forms of monasticism, the establishment

of frontier communities, the culture of the Arabian peninsula, magic, paganism, military tactics, Romanesque churches, sea travel, manuscript illumination, the architecture of mosques, early medieval philosophy, the changing imagery of Christ, holiness, and violence as a redemptive act.

L23 Re St 3300 Native American/Euro-American Encounters: Confrontations of Bodies and Beliefs

This course surveys the history and historiography of how Native Americans, Europeans and Euro-Americans reacted and adapted to one another's presence in North America from the 1600s to the mid-1800s, focusing on themes of religion and gender. We will examine the cultural and social implications of encounters between Native peoples, missionaries and other European and Euro-American Protestants and Catholics. We will pay particular attention to how bodies were a venue for encounter — through sexual contact, through the policing of gendered social and economic behaviors, and through religiously-based understandings of women's and men's duties and functions. We will also study how historians know what they know about these encounters, and what materials enable them to answer their historical questions.

L23 Re St 3341 Religion, Race, and Migration: Borders of Difference

This seminar is an experiment in studying the intersections of religion, race, and migration through the idea of difference. We discuss how particular understandings of religion, race, and migration inform contemporary scholarship and shape national and international legal and governmental practices. Specifically, this course explores how difference-of community, body, and place-produces conditions of possibility. Over the semester, we will investigate various borders of difference, using binaries to guide our analysis. We will examine this through a range of problem spaces including: religion/secularism; race/ethnicity/sect; terrorist/citizen; and refugee/migrant. Ultimately, this course aims to critically unpack the relations of power by which people, places, and ideas are differentially constructed, maintained, and transformed

Credit 3 units. A&S IQ: HUM, SC Arch: HUM Art: HUM BU: BA, ETH

L23 Re St 334C Crusade, Conflict, and Coexistence: Jews in Christian Europe

This course will investigate some of the major themes in the history of the Jews in Europe, from the Middle Ages to the eve of the French Revolution. Jews constituted a classic, nearly continuous minority in the premodern Christian world — a world that was not known for tolerating dissent. Or was it? One of the main purposes of the course is to investigate the phenomenon of majority/minority relations, to examine the ways in which the Jewish community interacted with and experienced European societies, cultures and politics. We will look at the dynamics of boundary formation and cultural distinctiveness; the limits of religious and social tolerance; the periodic eruption of persecution in its social, political, and religious contexts; and the prospects for Jewish integration into various European societies during the course of the Enlightenment era.

L23 Re St 3354 Vienna, Prague, Budapest: Politics, Culture, and Identity in Central Europe

The term "Central Europe" evokes the names of Freud and Mahler; Kafka and Kundera; and Herzl, Lukács, and Konrád. In politics, it evokes images of revolution and counter-revolution, ethnic nationalism, fascism, and communism. Both culture and politics, in fact, were deeply embedded in the structures of empire (in our case, the Habsburg Monarchy), which both balanced and exacerbated ethnic, religious, and social struggles; in modern state formation; and in the emergence of creative and dynamic urban centers, of which Vienna, Budapest, and Prague were the most visible. This course seeks to put all of these elements into play -- empire, nation, urban space, religion, and ethnicity -- to illustrate what it has meant to be modern, creative, European, nationalist, or cosmopolitan since the 19th century. It engages current debates on nationalism and national identity; the viability of empires as supra-national constructs; urbanism and modern culture; the place of Jews in the social and cultural fabric of Central Europe; migration; and authoritarian and violent responses to modernity.

Same as L22 History 3354

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: HUM, IS EN: H

L23 Re St 335C Becoming "Modern": Emancipation, Antisemitism and Nationalism in Modern Jewish History

This course offers a survey of the Jewish experience in the modern world by asking, at the outset, what it means to be — or to become — modern. To answer this question, we look at two broad trends that took shape toward the end of the 18th century — the Enlightenment and the formation of the modern state — and we track changes and developments in Jewish life down to the close of the 20th century with analyses of the (very different) American and Israeli settings. The cultural, social, and political lives of Jews have undergone major transformations and dislocations over this time — from innovation to revolution, exclusion to integration, calamity to triumphs. The themes that we will be exploring in depth include the campaigns for and against Jewish "emancipation;" acculturation and religious reform; traditionalism and modernism in Eastern Europe; the rise of political and racial antisemitism; mass migration and the formation of American Jewry; varieties of Jewish national politics; Jewish-Gentile relations between the World Wars; the destruction of European Jewry; the emergence of a Jewish nation-state; and Jewish culture and identity since 1945.

L23 Re St 336C History of the Jews in Islamic Lands

This course is a survey of Jewish communities in the Islamic world, their social, cultural, and intellectual life from the rise of Islam to the Imperial Age. Topics include: Muhammad, the Qur'an and the Jews; the legal status of Jews under Islam; the spread of Rabbinic Judaism in the Abbasid empire; the development of new Jewish identities under Islam (Karaites); Jewish traders and scholars in Fatimid Egypt; the flourishing of Jewish civilization in Muslim Spain (al-Andalus); and Sephardi (Spanish) Jews in the Ottoman empire. On this background, we will look closely at some of the major Jewish philosophical and poetical works originating in Islamic lands. Another important source to be studied will be documents from the Cairo Genizah, reflecting social history, the status of women, and other aspects of daily life.

L23 Re St 3401 Pilgrims and Seekers: American Spirituality from the Transcendentalists to the Millennials

This seminar focuses on the formation of "spirituality" in American culture from the Transcendentalist world of Ralph Waldo Emerson on through more recent expressions of the "spiritual-but-not-religious" sensibility. How did "spirituality" come to be seen as something positively distinct from "organized religion"? What are the main contours of spiritual seeking in American culture, especially among those who claim no specific religious affiliation? The course also explores the social, political, and cultural consequences of this turn to the spiritual over the religious: for example, the consecration of liberal individualism,

the relationship of religious exploration to both environmentalism and consumerism, the politics of cultural appropriation, the negotiation of religious pluralism, and the pursuit of the spiritual in art.

L23 Re St 3421 Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World

From child saints to child scholars and from child crusaders to child casualties, the experience of childhood varied widely throughout the European Middle Ages. This course will explore how medieval Jews, Christians and Muslims developed some parallel and some very much divergent concepts of childhood, childrearing, and the proper cultural roles for children in their respective societies. Our readings will combine primary and secondary sources from multiple perspectives and multiple regions of Europe and the Mediterranean World, including a few weeks on the history and cultural legacy of the so-called Children's Crusade of 1312. We will conclude with a brief survey of medieval childhood and its stereotypes as seen through contemporary children's books and TV shows. This course fulfills the Language & Cultural Diversity requirement for Arts & Sciences.

L23 Re St 343C Europe in the Age of the Reformation

How should people act toward each other, toward political authorities and toward their God? Who decided what was the "right" faith: the individual? the family? the state? Could a community survive religious division? What should states do about individuals or communities who refused to conform in matters of religion? With Martin Luther's challenge to the Roman Catholic Church, the debates over these questions transformed European theology, society and politics. In this class we examine the development of Protestant and Radical theology, the Reformers' relations with established political authorities, the response of the Catholic Church, the development of new social and cultural expectations, the control of marginalized religious groups such as Jews, Muslims and Anabaptists, and the experiment of the New World.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: HUM, IS

L23 Re St 3451 Religion and Race in the United States

Race and ethnicity are central to how religious pluralism is worked out in America. How do the categories of race and religion intersect to produce concepts of a normative American identity? In this course, we examine the construct of race across various American congregational communities in order to understand debates on American identity and belonging. We also explore the idea of an American civil religion, and we engage with the boundaries of inclusion and exclusion of particular religious groups within this category based upon racialized criteria.

L23 Re St 3461 Zen Buddhism

This course is designed to introduce students to the history, teachings, and practice of Zen Buddhism in China (Chan), Japan (Zen), Korea (Sôn), and the United States. We will discuss how Zen's conception of its history is related to its identity as a special tradition within Mahayana Buddhism, as well as its basic teachings on the primacy of enlightenment, the role of practice, the nature of the mind, and the limitations of language. We will also look at Zen Buddhism and its relation to the arts, including poetry and painting, especially in East Asia. Finally, we will briefly explore the response of Zen teachers and practitioners to questions of war, bioethics, the environment and other contemporary issues. Prerequisites: Re St 203 or Re St 311.

L23 Re St 3465 Islamic Law

This course will present a general overview of Islamic law and an introduction to the study of religious legal authority, which values consensus. It will then explore the formation of the major schools of law. Next, it will debate the notions of "ijtihad" and "taqlid" and discuss how open and independent legal decisions have been in the Islamic world. It will also trace the transmission of legal knowledge in religious institutions across time and place by focusing on medieval Muslim societies and by closely examining the education of a modern-day Ayatollah. Note: L75 546 is intended for graduate students only.

L23 Re St 3513 Muhammad: His Life and Legacy

This course intends to examine the life and representations of the Prophet Muhammad from the perspective of multiple spiritual sensibilities as articulated in various literary genres from medieval to modern periods. The course is divided roughly into two parts. One part deals with the history of Muhammad and the related historiographical questions. The second part deals with the representations of Muhammad in juristic, theological, Sufi, etc., literature. Because of the availability of primary sources in English translation, there is a healthy dose of primary source reading and analysis throughout the semester. Those students with advanced Arabic (and Persian and Turkish) skills are encouraged to engage sources in their original language.

L23 Re St 3540 Anthropological and Sociological Study of Muslim Societies

This course introduces students to anthropological and sociological scholarship on Muslim societies. Attention will be given to the broad theoretical and methodological issues which orient such scholarship. These issues include the nature of Muslim religious and cultural traditions, the nature of modernization and rationalization in Muslim societies, and

the nature of sociopolitical relations between "Islam" and the "West." The course explores the preceding issues through a series of ethnographic and historical case studies, with a special focus on Muslim communities in the Middle East, Southeast Asia, and Europe. Case studies address a range of specific topics, including religious knowledge and authority, capitalism and economic modernization, religion and politics, gender and sexuality, as well as migration and globalization. Please note: L75 554 is intended for graduate students only.

L23 Re St 3542 Christian Theology and Politics in the Modern West

This course engages students in the reading and analysis of influential religious texts from the Western Christian world from the mid-16th century to the present. The course also examines these texts in their historical context, raising questions about the relationship between theology and politics in the West. The course pursues such questions chronologically, with the first weeks devoted to Catholic and Calvinist contests over revelation and political authority during the 16th century to Puritan ruminations during the 17th century on the nature of worldly calling and personal eschatology. The next weeks concern 18th-century views of reason as a critique of traditional Christianity and Protestant responses centered on true virtue as a hedge against worldly loyalties. We then examine 19th-century discussions of the relationship between ethics, tradition, and religious experience. For the 20th century, we discuss texts that address Christian conceptions of redemption to issues of hypernationalism and race. The final weeks are devoted to recent theologies that have to do with the self and one's identity and current political crises. Juniors and seniors only. Sophomores by permission.

L23 Re St 3551 The FBI and Religion

This seminar examines the relationship between the Federal Bureau of Investigation (FBI) and religion (i.e., faith communities, clerics, and religious professionals) as a way to study and understand 20th-century religion and politics. The course will investigate the history of the FBI as well as the various ways in which the FBI and religious groups have interacted. The course will pay particular attention to what the professor calls the four interrelated "modes" of FBI-religious engagement: counter-intelligence and surveillance, coordination and cooperation, censorship and publicity, and consultation.

L23 Re St 3571 God in the Courtroom

The U.S. Constitution holds a promise to secure freedom of religion through its First Amendment. Its two religion clauses declare unconstitutional any prohibition on the free exercise of religion and laws respecting the establishment of religion. The consequence is that, whenever a group demands to be recognized as religious and to be granted the right to exercise its religion, a court, a legislature, or an administrative official must determine whether the religious practice in question is legally religious. This means that law plays a uniquely important role in defining religion in the United States. In this seminar, we will explore the relation between law and religion in America. We will study the religion clauses in the First Amendment to the United States Constitution, the histories of their interpretations by American courts in landmark cases, and the ways that religious studies scholars have understood and critiqued these cases. L23 Re St 358 Conscience and Religion in American Politics

Conscience is as American as apple pie and baseball, but its meaning and implications are deeply contested in American religion and politics. What is conscience? To what extent is conscience laden with theological -- and, more specifically, Christian -- commitments? What role should conscience, whether religious or ethical, play in political life? By considering what conscience means and what vision of politics it implies, we will reflect on what it means to be American: how religion should relate to politics, how individuals should engage with democratic laws and norms, and how religious and political dissenters might oppose American politics. We will focus on key moments in the history of American religion and politics through the lens of conscience, from the Interwar Period, the perceived threat of communism during the Cold War, the Civil Rights Movement, and the Vietnam War to the "culture wars" on abortion, marriage equality, LGBTQ rights, and the death penalty. This course draws on interdisciplinary sources from religious studies, political theory, law, and history in 20th- and 21st-century American politics. Same as L57 RelPol 358

L23 Re St 359 Travelers, Tricksters, and Storytellers: Jewish Travel Narratives and Autobiographies

Jewish literature includes highly fascinating travel accounts and autobiographies that are still awaiting their discovery by a broader readership. In this course, we will explore a broad range of texts originating from the Middle Ages to the 19th century. They were written by both Ashkenazi and Sephardi Jews hailing from countries as diverse as Spain, Italy, Germany, and the Ottoman Empire. Among the authors were pilgrims, rabbis, merchants, and one savvy businesswoman. We will read their works as responses to historical circumstances and as expressions of Jewish identity, in its changing relationship to the Christian or Muslim environment in which the writers lived or traveled. Specifically, we will ask questions such as: How do travel accounts and autobiographies enable their authors and readers to reflect on issues of identity and difference? How do the writers produce representations of an "other," against which and through which they define a particular sense of self? This course is open to students of varying interests, including

Jewish, Islamic, or Religious Studies, medieval and early modern history, European or Near Eastern literatures. All texts will be read in English translation. Please note: L75 559 is intended for graduate students only.

L23 Re St 360 Religion and the Modern Civil Rights Movements, 1954-1968

The modern Civil Rights Movement is a landmark event in the nation's political, civic, cultural and social history. In many contexts, this movement for and against civil and legal equality took on a religious ethos, with activists, opponents and observers believing that the net result of the marches, demonstrations and legislative rulings would redeem and/or destroy "The Soul of the Nation." This seminar examines the modern Civil Rights Movement and its strategies and goals, with an emphasis on the prominent religious ideologies and activities that were visible and utilized in the modern movement. The course pays particular attention to the Protestant, Catholic, Jewish, and Islamic traditions, figures and communities that were indifferent, combative, instrumental and/or supportive of Civil Rights legislation throughout the mid-20th century. L23 Re St 365 The Bible as Literature

The Bible is one book among many; the Bible is a book like no other; the Bible is not one book but many. The course will debate such positions and the different histories and practices of reading they involve. We shall read extensively in English translations of the Bible, both Jewish and Christian, with emphasis on literary form and ideas. We shall look at the Bible's material forms, and the history of its interpretation and translation. The aim is not to adjudicate its meaning but to explore what over time it has been

taken to mean, attempting to locate within the book the potential for different interpretations. The course requires, and should foster, attentive reading, vigorous yet courteous argument, and respect for the readings of others.

L23 Re St 3650 Slavery, Sovereignty, Security: American Religions and the Problem of Freedom

The goal of this course is to think critically about freedom as an ideology and institution. What does it mean to be free? What are the relationships among individual liberties, national sovereignty, and civil rights? In what ways has freedom been defined in relation to — and materially depended on — unfreedom? At the same time, this course will treat American "religions" in a similar critical fashion: as a historically contingent category that has been forged and inflected within the same context of white Christian settler empire. Religion and freedom have intertwined throughout American history, including in the ideal of religious freedom. Our critical interrogation of freedom should help us think carefully about power, working with but also beyond tropes of domination and resistance.

L23 Re St 366 Approaches to the Qur'an

The place of the Qur'an in Islamic religion and society. Equal emphasis on text: the Qur'an's history, contents, and literary features; and context: the place of the Qur'an in everyday life, its oral recitation, artistic uses, and scholarly interpretation. Knowledge of Arabic not required.

Credit 3 units. A&S IQ: HUM, LCD BU: ETH

L23 Re St 3660 The Sephardic Experience: 1492 to the Present

This course explores the history and culture of the Sephardic diaspora from the expulsion of Spanish and Portuguese Jewry at the end of the 15th century to the present. We will start with a brief introduction into the history of Iberian Jews prior to 1492, asking how this experience created a distinct subethnic Jewish group: the Sephardim. We will then follow their migratory path to North Africa, Italy, the Ottoman Empire, the Netherlands and the Americas. The questions we will explore include: In what sense did Jews of Iberian heritage form a transnational community? How did they use their religious, cultural, and linguistic ties to advance their commercial interests? How did they transmit and transform aspects of Spanish culture and create a vibrant Ladino literature? How did the Sephardim interact with Ashkenazi, Greek, North African, and other Jewish, Muslim, and Christian communities? How did Jewish emigres from Spain and Portugal become intermediaries between Christian Europe and the Ottoman Empire? What was the role of Sephardim in Europe's transatlantic expansion? How did conversos (converts to Christianity) return to Judaism and continue to grapple with their ambiguous religious identity? How did Ottoman and North African Jews respond to European cultural trends and colonialism and create their own unique forms of modern culture? How did the Holocaust impact Sephardic Jewry? The course will end with a discussion of the Sephardic experience in America and Israel today.

L23 Re St 3670 Gurus, Saints and Scientists: Religion in Modern South Asia

Many long-standing South Asian traditions have been subject to radical reinterpretation, and many new religious movements have arisen, as South Asians have grappled with how to accommodate their traditions of learning and practice to what they have perceived to be the conditions of modern life. In this course we consider some of the factors that have contributed to religious change in South Asia, including British colonialism, sedentarization and globalization, and new discourses of democracy and equality. We consider how new religious organizations were part and parcel with movements for social equality and political recognition; examine the intellectual contributions of major thinkers like Swami Vivekananda, Sayyid Ahmad Khan and Mohandas Gandhi; and explore how Hindu, Islamic and other South Asian traditions were recast in the molds of natural science, social science and world religion.

Credit 3 units. A&S IQ: HUM, LCD BU: ETH EN: H

L23 Re St 368 Theories and Methods in the Study of Religion

What is religion, and how can we study it? Do we need an answer to the first question to pursue the second? Why, and toward what ends, might we undertake such study? This course considers these questions through the investigation of significant attempts to study religion over the past century, paying particular attention to the methods, motivations, and aims of these works. Is the study of religion an effort to disprove or debunk it, or perhaps to support it? What would each mean? Is it an effort to describe the indescribable, or perhaps to translate complex beliefs and practices into a language in which they can be discussed by others? Why would such a translation be helpful, and to whom? Is the study of religion an investigation of a social phenomenon, an organization of communities, a specific formation of individuals, or perhaps a psychosis or illusion, evidence of the workings of power on our lives and the difficulty of bearing it? What is at stake in defining religion in these ways, and then in undertaking its study?

L23 Re St 374 Of Dishes, Taste, and Class: History of Food in the Middle East

This course will cover the history of food and drink in the Middle East to help us understand our complex relationship with food and to look at our lives from perspectives we intuitively feel or by implication know but rarely critically and explicitly reflect on. Food plays a fundamental role in how humans organize themselves in societies; differentiate socially, culturally, and economically; establish values and norms for religious, cultural, and communal practices; and define identities of race, gender, and class. This course does not intend to spoil, so to speak, what is undeniably one of the most pleasurable human needs and activities; rather, the goal is to make students aware of the social meaning of food and to reflect on how food shapes who we are as individuals and societies. We will study the history of food and drink in the Middle East across the centuries up to the present time, but we will be selective in choosing themes, geographic regions, and historical periods to focus on. Student should consult the instructor if they have not taken any courses in the humanities. Enrollment priority given to seniors and juniors.

L23 Re St 377 History of Slavery in the Middle East

This course examines slavery and its abolition in the Middle East and North Africa from 600 C.E. to the 20th Century. It addresses slavery as a discourse and a question of political economy. We begin with an overview of slavery in late antiquity to contextualize the evolution of this practice after the rise of Islam in the region. We then examine how it was practiced, imagined, and studied under major empires, such as the Umayyads, the Abbasids, the Fatimids, the Mamluks, the Ottomans, and the Safavids. In addition to examining the Qur'anic discourse and early Islamic practices of slavery, to monitor change over time we address various forms of household, field, and military slavery as well as the remarkable phenomenon of "slave dynasties" following a chronological order. We discuss, through primary sources, theoretical, religious, and moral debates and positions on slavery, including religious scriptures, prophetic traditions, religious law, and a plethora of narratives from a range of genres. We highlight a distinct theme each week to focus on until we conclude our discussion with the abolition of slavery in the 19th and 20th centuries. Topics of discussion include various forms of male and female slavery, Qur'anic and prophetic discourse on slavery, legal and moral views on slavery, slavery as represented in religious literature, political, military, and economic structures of slavery, issues of race and gender as well as slave writings to reflect on the experiences of slavery from within. The goal is to enable students to understand the histories of slavery in the Middle East and eventually compare it to that of other regions and cultures, such as European and Atlantic slavery. No second language required.

L23 Re St 379 Gender, Religion, and Secularism

This course considers how gender is constructed in the processes of distinguishing between religion and secularism. Students will be exposed to a variety of case studies that examine the specific dynamics of producing an oppositional

difference between religion and secularism through attitudes toward gender roles, values, and commitments. This course is designed to help students examine how the assumptions about secularism as necessarily more freeing and equalizing for women become normative and make many religious women's claims to freedom, equality, and agency illegible.

Credit 3 units. A&S IQ: HUM, LCD, SC Arch: HUM Art: HUM EN: H

L23 Re St 3801 Religion in the Kitchen

The kitchen is home to food preparation and everyday conversations, not a privileged place of formal religious rites. But much can be learned about religion by focusing our analytical gaze on this seemingly benign space. By expanding the focus of where, and how, we study religion, the kitchen is revealed as a remarkably unstable social space. In this course we will consider questions such as: Is the kitchen constructed as a sacred, profane, or an in-between space? How is the kitchen gendered? Is it perceived as a dominantly female (or male) space, and under what conditions of power? How is food used to construct religious or racial identity, and why is it so powerful? Are kitchen practices cultural or religious activities? And who identifies kitchen work as an authentic (or inauthentic) religious practice? To answer these questions, we will consider a variety of religious, and not-so-religious, traditions within North America.

L23 Re St 3831 Magicians, Healers and Holy Men

Magic is perhaps not one of the first words one associates with Greco-Roman antiquity. Yet for most individuals living in the ancient Mediterranean, including philosophers, businessmen, and politicians, magic was a part of everyday life. Casting spells, fashioning voodoo dolls, wearing amulets, ingesting potions, and reading the stars are just some of the activities performed by individuals at every level of society. This course examines Greco-Roman, early Christian, and Judaic "magical" practices. Students read spell-books which teach how to read the stars, make people fall in love, bring harm to enemies, lock up success in business, and win fame and the respect of peers. Students also look at what is said, both in antiquity and in contemporary scholarship, about magic and the people who practiced it, which helps illuminate the fascinating relationship between magic, medicine, and religion.

L23 Re St 3900 Mormon History in Global Context

The focus of this seminar is Mormonism, meaning, primarily, the Church of Jesus Christ of Latter-day Saints, which is the largest Mormon body. Mormons in the United States have gone from being one of the most intensely persecuted religious groups in the country's history to the fourth largest religious body in the U.S., with a reputation for patriotism and conservative family values. In addition to introducing who the Mormons are, their beliefs and religious practices, this seminar will explore issues raised by Mormonism's move toward the religious mainstream alongside its continuing distinctiveness. These issues include: What is the religious "mainstream" in the U.S.? How did conflicts over Mormonism during the 19th century, especially the conflict over polygamy, help define the limits of religious tolerance in this country? How have LDS teachings about gender and race, or controversies about whether or not Mormons are Christian, positioned and repositioned Mormons within U.S. society?

L23 Re St 393 Medieval Christianity

This course surveys the historical development of Christian doctrine, ecclesiastical organization, and religious practice between the fifth century and the 15th, with an emphasis on the interaction of religion, culture, politics and society. Topics covered include: the Christianization of Europe; monasticism; the liturgy; sacramental theology and practice; the Gregorian reform; religious architecture; the mendicant orders and the attack on heresy; lay devotions; the papal monarchy; schism and conciliarism; and the reform movements of the 15th century.

L23 Re St 396 Islamic Philosophy, Mysticism, and Theology

How does an individual achieve access to knowledge and access to God? To what extent is such access dependent upon scripture? To what extent is such access dependent upon reason? Are there forms of truth and experience that only reveal themselves through mysticism? Questions of this sort are central

to the interrelated disciplines of Islamic philosophy, Islamic theology, and Islamic mysticism (i.e., Sufism). This course examines how these three disciplines have shaped various aspects of social life within premodern Muslim communities.

L23 Re St 3977 The Making of the Modern Catholic Church

This course examines the work of three church councils that put their stamp on the Catholic Church at key moments in its history, making it what it is today. The first section is dedicated to the Fourth Lateran Council (1215), which defined the high medieval church as an all-encompassing papal monarchy with broad powers over the lives of all Europeans, Christian and non-Christian alike. In the second section we turn our attention to the Council of Trent (1545-1563), which responded to the threat posed by the Protestant Reformation by reforming the Catholic Church, tightening ecclesiastical discipline, improving clerical education, and defining and defending Catholic doctrine. We conclude with a consideration of the largest church council ever, Vatican II (1962-1965), which reformed the liturgy and redefined the church to meet the challenges of the modern, multicultural, postcolonial world.

Credit 3 units. A&S IQ: HUM, LCD EN: H

L23 Re St 404 Material Religion

This seminar examines contemporary theories and approaches to materiality in the study of religion. Particular attention is given to how scholars envision the relationship between bodies, rituals, religious objects, and the human ability to think, know, and act in the world. By attending to a variety of "things" -- prints, icons, ritual clothes, food, incense -- and to the history of their use within such traditions as Islam, Buddhism, Candomble, Lucumi, and Christianity, this course seeks to provide students with an opportunity to familiarize themselves with contemporary studies that take seriously the power of material objects to make and sustain religion. This course is simultaneously designed to allow students to practice utilizing material culture as a method in their own research.

L23 Re St 405 Diaspora in Jewish and Islamic Experience

Tensions between center and periphery; migration and rest; power and powerlessness; and exile, home, and return are easily found in the historical record of both Jews and Muslims. For Muslims, it can be said that it was the very success of Islam as a world culture and the establishment of Muslim societies in all corners of the globe that lay at the root of this unease. However, the disruptions of the post-colonial era, the emergence of minority Muslim communities in Europe and North America, and the recent tragic flow of refugees following the Arab Spring have created a heightened sense of displacement and yearning for many. Of course, the very term "diaspora" -- from the ancient Greek, meaning "dispersion" or "scattering" -- has most often been used to describe the Jewish condition in the world. The themes of exile and return and of catastrophe and redemption are already woven into the Hebrew Bible, and they continued to be central motifs in Rabbinic Judaism in late antiquity and the Middle Ages. This occurred despite the fact that more Jews lived outside the borders of Judea than within the country many years before the destruction of Jewish sovereignty at the hands of the Romans. In the 20th century, European imperialism, nationalisms of various types, revolution, and war -- including the Israeli-Palestinian conflict -- have done much to underscore the continuing dilemmas of diaspora and home in both Jewish and Islamic identity. The goal of this course is to offer a comparative historical perspective on the themes of migration and displacement, center and periphery, home and residence, and exile and return and to give students the opportunity to examine in depth some aspect of the experience of diaspora. Note: This course fulfills the capstone requirement for Jewish, Islamic, and Middle Eastern Studies. The course also counts as an Advanced Seminar for history. (Students wishing to receive history Advanced Seminar credit should also enroll in L22 491R section 19 for 1 unit.) The course is open to advanced undergraduate and graduate students.

L23 Re St 4060 Convivencia or Reconquista? Muslims, Jews, and Christians in Medieval Iberia

This seminar will explore various facets of the coexistence (convivencia) of Muslims, Jews, and Christians in medieval Spain. Its horizon stretches from the Muslim conquest of Iberia (al-Andalus) up to the turn of the 16th century when Spanish Jews and Muslims were equally faced with the choice between exile and conversion to Christianity. Until about 1100, Muslims dominated most of the Iberian Peninsula; from then onward, Christians ruled much and eventually all of what would become modern Spain and Portugal. Through a process known as reconquista (reconquest), Catholic kingdoms acquired large Muslim enclaves. As borders moved, Jewish communities found themselves under varying Muslim or Christian dominion. Interactions between the three religious communities occurred throughout, some characterized by shared creativity and mutual respect, others by rivalry and strife. The course focuses on these cultural encounters, placing them in various historical contexts. It will explore the ambiguities of religious conversion, and the interplay of persecution and toleration. Last not least, the

course will address the question of how the memory of medieval Spain's diversity reverberates and is utilized in modern popular and academic discourse. All sources will be read in English translation; however, students are encouraged to make use of their linguistic and cultural expertise acquired in previous classes. This course serves as the capstone seminar for Jewish, Islamic, and Middle Eastern Studies majors, Arabic majors, and Hebrew majors. Graduate students, minors, and other interested undergrads are likewise welcome.

L23 Re St 407 Solidarity and Silence: Religious Strategies in the Political Sphere

Although political action is often considered a problem of making oneself heard, religious practices of silence, self-effacement and withdrawal from certain worldly struggles have guided many significant political and social movements, particularly forms of nonviolent resistance. This course considers the role of religious thought and practice in such movements in the 20th century. The history of these movements presents an apparent paradox: How can political action emerge from the supposedly "private" realm of religion in the modern era, particularly its most individualistic formations in contemplative and mystical practices? Does the historical role of these practices in the political sphere complicate their portrayal in some scholarship as private, individual and depoliticizing? With these questions animating our investigations, we will consider the work of authors and activists including Leo Tolstoy, Mahatma Gandhi, Dietrich Bonhoeffer, Martin Luther King Jr., Simone Weil, and William Barber, as well as the history of movements associated with their work. Toward the end of the semester, we will turn to contemporary movements against economic inequality, intimate violence, racially motivated violence, and discrimination toward transgender persons to discuss the use of religious strategies or religiously-derived strategies in current political and social activism. L23 Re St 408 Nuns

Nuns — women vowed to a shared life of poverty, chastity and obedience in a cloistered community — were central figures in medieval and early modern religion and society. This course explores life in the convent, with the distinctive culture that developed among communities of women, and the complex relations between the world of the cloister and the world outside the cloister. We look at how female celibacy served social and political, as well as religious, interests. We read works by nuns: both willing and unwilling; and works about nuns: nuns behaving well, and nuns behaving scandalously badly; nuns embracing their heavenly spouse, and nuns putting on plays; nuns possessed by the devil, and nuns managing their possessions; nuns as enraptured visionaries, and nuns grappling with the mundane realities of life in a cloistered community.

L23 Re St 4080 Sacred Ways and Holy Spaces: Athenian Religion and Topography

From seashore to mountain top, ancient Athens was famous for being a landscape rich with myth and religion. In order to worship their gods with processions, sacrifices, and other acts of devotion, Athenians moved through, across, and within space as defined by such things as sacred roads, monumental gateways and altars, and even places considered so holy that one was forbidden to enter. This course will introduce students to the study of place (topography) and to the methods and evidence by which we can determine where specific buildings and sites were, how they were used, and what they signified. We will explore major sites like the Acropolis as well as a variety of other temples, shrines, and holy sites across urban and rural landscapes alike, each of which structured space in its own way. By examining a wide range of archaeological and textual evidence (c. 800 BC-AD 400), we will develop an integrated understanding of Athenian religious belief and ritual in the context of architecture and space. While this course will concentrate on the topography of architecturally definable religious sites, we will also explore religious practices (e.g., magic, early Christianity) that employed the landscape in fundamentally different ways than other parts of the Athenian religious system.

L23 Re St 4118 The Good Cause: Psychological Anthropology of Moral Crusades

Why do people join moral crusades? These are social movements based on powerful moral institutions, ranging from the abolitionist and suffragette movements to witch hunts, insurgency and ethnic riots. Such movements are extremely diverse, yet their unfolding and the dynamics of recruitment show remarkably common properties. We will examine a series of empirical cases, including recent events, and assess the relevance of models based on individual psychological dynamics, intuitive moral capacities, and human motivation for participation in collective action.

L23 Re St 4122 American Religion, Politics & Culture: Commentary from Alexis de Tocqueville to Contemporary Pundits

This research-oriented seminar involves in-depth historiographical investigation of leading scholarship at the busy intersections of American religion, politics and culture. The second semester focuses on classic and contemporary

commentaries on the American religious and political scene from Alexis de Tocqueville through today's leading pundits. Some sessions will include a visiting scholar engaged in cutting-edge research — a feature that will allow seminar members to work with important scholars from beyond the university. Possible topics include: church-state relations, religion and foreign policy, religion and civil rights, religion and the science wars, the rise of the Religious Right, and the role of religion in national elections. The seminar is taught under the auspices of the John C. Danforth Center on Religion and Politics and is offered in two complementary parts (though enrollment in either one of the two is certainly possible). Its ambition is to build up a community of inquirers engaged in the core questions that animate the Danforth Center. Prerequisites: advanced undergraduate or graduate standing in AMCS, History, or Religious Studies or permission of instructor.

L23 Re St 413 Topics in Islam

This course aims to study political thought and practice in Islamic history through a close reading of a selection of primary sources in translation (and in their original language, if language proficiency is satisfactory). Particular attention will be given to the historical contexts in which thoughts are espoused and texts written. We plan to examine the development of political concepts and themes as articulated in diverse literary genres (e.g., legal, theological, political) from the eighth through the 13th centuries. We hope to engage various theoretical models to analyze the relationship between politics and religion and to tease out the role of power in determining sociopolitical relations, distinctions, and structures. We hope to have a better grasp on the historicity of ideas presented in timeless categories in political discourse. Advanced knowledge of Arabic preferred but not required.

Same as L75 JIMES 445

Credit 3 units. A&S IQ: HUM BU: IS EN: H

L23 Re St 418 Sexuality and Gender in East Asian Religions

In this course we will explore the role of women in the religious traditions of China, Japan and Korea, with a focus on Buddhism, Daoism, Shamanism, Shinto and the so-called "New Religions." We will begin by considering the images of women (whether mythical or historical) in traditional religious scriptures and historical or literary texts. We will then focus on what we know of the actual experience and practice of various types of religious women — nuns and abbesses, shamans and mediums, hermits and recluses, and ordinary laywomen — both historically and in more recent times. Class materials will include literary and religious texts, historical and ethnological studies, biographies and memoirs, and occasional videos and films. Prerequisites: This class will be conducted as a seminar, with minimal lectures, substantial reading and writing, and lots of class discussion. For this reason, students who are not either upper-level undergraduates or graduate students, or who have little or no background in East Asian religion or culture, will need to obtain the instructor's permission before enrolling.

**L23 Re St 419 Of Zombies, Ghosts, and Ancestors:
Interactions of the Living and the Dead in Chinese Religions**

This course introduces a basic aspect of the multifaceted history of Chinese religions, culture and civilization by centering on the practice of taking care of the dead. In particular, we will observe how various religious texts, short stories, and plays from China's earliest times until the 16th century depicted the interactions of the living and the dead. Despite the distinct genres, time periods and topics, one important aspect will regularly appear: Apparently people perceived the boundaries between the living and the dead to be quite porous in premodern China. In other words, the dead seemed to have played as much of a role in society and everyday life as living family members, friends and government officials.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L23 Re St 4250 Law, Religion, and Politics

What is the role of religious argument in politics and law? What kinds of arguments are advanced, and how do they differ from one another? Are some of these arguments more acceptable than others in a liberal democracy? This course will explore these questions through the work of legal scholars, theologians and political theorists. Our topics include the nature of violence and coercion in the law, constraints on public reason, the relationship between religion and government, and the nature of religious practice and tradition.

L23 Re St 4300 Spiritual But Not Religious: The Politics of American Spirituality?

What does it mean to claim to be "spiritual but not religious"? What are the social and political consequences of foregrounding spiritual seeking and religious experimentation over the "organized religion" of churches, synagogues, mosques, and temples?? The seminar focuses on a series of debates that have arisen over this "new spirituality" in American culture: the religious blessing of consumer culture, the rise of therapeutic models of meditation and mindfulness, the politics of Euro-American appropriations of Native American and Buddhist religious practices, the negotiation of religious pluralism, and the relationship between spiritual seeking and social justice.

L23 Re St 432 Early Christianity and Classical Culture

This course explores the development of Early Christianity from the Apostolic fathers (late first century CE) to Augustine in the fifth century. We will be focused on contextualizing these early Christian communities within the classical Greek and Roman worlds through which they spread, examining their engagement with Greco-Roman models of rhetoric, philosophy and literature. Prerequisites: L23 307F Introduction to the New Testament or previous work in Classical Studies recommended but not required.

Credit 3 units. A&S IQ: HUM EN: H

L23 Re St 435 Sabbath Politics: Rest and Refusal in Religion and Politics

The Jewish Sabbath arrives every week to disrupt ordinary life with a wholly different way of living, abstaining from some activities in divinely commanded rest. Is this different way of life strictly a break from the ordinary, or also a guide to it-and to how it might require disruption, reformation, and repair? Sabbath traditions have inspired radical political action including movements against debt, income inequality, environmental destruction, and racial injustice. This course will consider the ways that 20th and 21st century American Jews have practiced Shabbat and thought about its significance in political life. Students will read a range of Jewish texts including Abraham Joshua Heschel's classic 1951 book *The Sabbath*, and consider them in relation to movements of contemporary radical politics that have been inspired by Sabbath traditions, including Strike Debt, reparations for African-Americans, and agonistic democratic politics.

Same as L57 RelPol 435

L23 Re St 4357 The Holocaust in the Sephardic World

The course provides students with a comprehensive understanding of the Holocaust, of its impact on the Sephardic world, of present-day debates on the "globalization" of the Holocaust, and of the ways in which these debates influence contemporary conflicts between Jews, Muslims and Christians in Southern Europe and North Africa. We will turn to the history of these conflicts, and study the Sephardic diaspora by focusing on the consequences that the 1492 expulsion had within the Iberian Peninsula, in Europe, and in the Mediterranean world. We will study Sephardic communities in Europe and North Africa and their interactions with Christians and Muslims before World War II. Once we have examined the history of the Holocaust and its impact on the Sephardic world in a more general sense, our readings will focus on the different effects of the Holocaust's "long reach" into Southeastern Europe, the Balkans, and North Africa, paying close attention to interactions among Jews, local communities, and the Nazi invaders. Finally, we will address the memory of the Sephardic experience of the Holocaust, and the role of Holocaust commemoration in different parts of the world. We will approach these topics through historiographies, memoirs, novels, maps, poetry and film.

L23 Re St 4366 Europe's New Diversities

Since the late 1980s, three major upheavals have transformed European senses of identity. The demise of the Soviet Union has forced citizens of new "post-socialist" nations to forge new senses of belonging and new strategies of survival. The rise of a new public presence of Islam and the growth of children of Muslim immigrants to adulthood have challenged notions that Europe is a secular or post-Christian space. Finally, the heightened authority of European institutions has challenged the nation-state from above, and the granting of new forms of subnational autonomy to regions and peoples has challenged it from below. The new Europe is increasingly constituted by way of regional identifications, transnational movement(s), and umbrella European legal and political organizations; these new realities occasion new rhetorics of secularism, nationalism, and ethnic loyalties. We examine these forms of diversity, movement, and debate by way of new works in anthropology, sociology and political science.

L23 Re St 444 The Mystical Tradition in Judaism

What is Jewish "mysticism"? What is its relationship to the category of "religion"? Is Jewish mysticism just one form of a general phenomenon common to a variety of religious traditions or is it a specific interpretation of biblical, rabbinic, and other Jewish traditions? Taking the above questions as a starting point, this course aims at a systematic and historically contextualized analysis of a broad range of Jewish texts that are commonly classified as "mystical." (All primary texts are read in translation.) At the same time, we explore such overarching themes as: the interplay of esoteric exegesis of the Bible and visionary experiences; the place of traditional Jewish law (halakhah) within mystical thought and practice; the role of gender, sexuality, and the body in Jewish mystical speculation and prayer; the relationship between mysticism and messianism; Ashkenazic and Sephardic traditions and their mutual impact on Jewish mysticism; the "absence of women" from Jewish mystical movements; esoteric traditions of an elite vs. mysticism as a communal endeavor; and the tension between innovation and (the claim to) tradition in the history of Jewish mysticism.

Romance Languages and Literatures

Romance Languages and Literatures offers vibrant programs in French, Italian, Portuguese and Spanish. Our language courses have long been popular with undergraduates, including those interested in international travel and those who anticipate a global dimension to their future careers. All of our classes focus on culture writ large: we study great texts, and we do so with an eye toward gender roles, traditions, communities, individual freedom, social obligations and many other topics of critical importance today. We offer concentrations in French, Italian, Spanish, applied linguistics, and introductory Portuguese.

Our undergraduate programs in French, Italian, and Spanish include a compelling series of language, literature, culture, and civilization courses that introduce students to the global Hispanic, Francophone, and Italoophone communities. The curriculum affords students the opportunity to become fluent in a foreign language, enrich their historical and cultural understanding, and acquaint themselves with influential intellectual, literary, and artistic traditions.

Students also benefit from linguistic and cultural immersion opportunities through our many summer, semester, and year-long study abroad programs. These programs offer unique possibilities to combine foreign language training with other interests, including participating in business internships in Paris; pursuing fieldwork in Cameroon; or studying art history in Italy, literature in Madrid, or Andean culture in Ecuador.

These experiences lead to a variety of career paths, including international law, international business, medicine, journalism, and graduate studies in political science, international relations, history, anthropology, art history, comparative literature, French, and film studies. To prepare our students to take full advantage of such opportunities, our faculty provides an innovative range of courses that combine the study of literature with contemporaneous developments in philosophy, science, music, art, and theory.

For undergraduates interested in cross-language study, we offer two programs. Students may elect to major in Romance languages and literatures. This major requires advanced course work in French, Italian, and Spanish, with one of the three languages as the focus of primary emphasis. Alternatively, students may minor in applied linguistics, studying the theoretical, empirical, and practical foundations of teaching and learning languages. This minor is available to all majors on campus, but it is particularly suited to language majors.

Majors

Prospective Romance languages majors should consult with the director of undergraduate studies of the chosen language as early as possible.

For the French major, please visit the French (p. 599) page.

For the Italian major, please visit the Italian (p. 767) page.

For the Spanish major, please visit the Spanish (p. 1032) page.

The Major in Romance Languages and Literatures

Like our other majors, the Romance languages major requires a writing-intensive course and a capstone experience. Further details are available on the department's website (<http://rll.wustl.edu>).

Total units required: A minimum of 42 units at the 300 and 400 level, distributed among French, Italian, and Spanish

Required courses:

- Language I: Courses through the 400 level, including French 307 and French 321 or French 322 for French, Ital 307 and Ital 308 for Italian, and Span 302 and Span 303 for Spanish; two literature surveys (French: Thinking-It-Through courses; Italian: Ital 323W and Ital 324W; or Spanish: Debating Cultures or Researching Cultures courses); and two 400-level courses (in Italian, two literature courses; in French, either two Thinking-It-Through courses or one Thinking-It-Through course and one In-Depth course; in Spanish, either two literature courses or one literature course and one linguistics course)
- Language II: Courses through the 400 level, including French 307 and French 321 or French 322 for French, Ital 307 and Ital 308 for Italian, and Span 302 and Span 303 for Spanish; at least two literature surveys (French: Thinking-It-Through courses; Italian: Ital 323W and Ital 324W; or Spanish: Debating Cultures or Researching Cultures courses); and one 400-level course (in Italian and French, a literature course; in Spanish, either literature or linguistics)
- Language III: Courses through and including one literature survey (French 307 and French 321 or French 322 for French, Ital 307 and Ital 308 for Italian, and Span 302 and Span 303 for Spanish) plus, depending on the language, a Thinking-It-Through course in French; Ital 323W or Ital 324W in Italian; or a Debating Cultures or Researching Cultures course in Spanish

- One writing-intensive course in either Spanish or Italian or via a French In-Depth course
- A capstone experience, either by completing Latin honors or by completing a senior undergraduate seminar during the junior or senior year with a grade of B+ or better. We encourage students to consider doing an honors thesis, perhaps combining French and Spanish. The 6 units of 495 (honors) would be above and beyond the requirements listed above for each language.

Students need to take these classes for a letter grade and earn a B- or better, with a B average overall, per departmental requirements of all majors.

Students need approval from directors of undergraduate studies for Italian, French, and Spanish for this major.

Additional Information

Students who plan to teach or pursue graduate study should consider taking a second foreign language, as well as linguistics courses. In all departmental courses for the major, the student must receive a grade of B- or better. Each student's progress toward achieving the objectives of the major will be assessed on a regular basis and by a variety of means. More information is available in the departmental mission statement.

Spanish Honors in Linguistics: To qualify for Spanish Honors in Linguistics in the major by thesis, a student must complete linguistic research and prepare and orally defend an honors thesis, which is judged by an honors faculty committee. The honors thesis in linguistics may include scientific experiments conducted in Spanish. The written thesis will include several drafts, all of which will be written in Spanish.

Study Abroad: Students are encouraged to participate in a study abroad program. Programs are available in France, Italy, Spain, Ecuador, Mexico, and Chile.

Senior Honors: Students who have maintained at least a 3.65 overall cumulative grade-point average through the end of the junior year are encouraged to work toward Latin honors (i.e., cum laude, magna cum laude, or summa cum laude). To qualify for Latin honors in the major by thesis, a student must complete special literary research and prepare and orally defend an honors thesis, which is judged by an honors faculty committee. To qualify for Latin honors by course work, the student must complete four literature courses at the 400 level (including two in literature before 1800) and present two critical essays written for those courses to be judged by an honors faculty committee. Recommendations for honors are based on performance, the quality of the thesis or critical essays, and the cumulative GPA.

Russian Language and Literature

Students who want to achieve a high level of proficiency in the Russian language and study Russian literature can pursue a minor in Russian language and literature. The program offers elementary through third-year language courses and a number of courses on 19th- and 20th-century Russian literature (in translation) on a wide variety of topics. Students are strongly encouraged to study abroad.

Russian language and literature (<https://artsci.wustl.edu/russian-language-and-literature-minor/>) is an independent minor administered by Global Studies. Students undertaking this minor are encouraged to consider a major in Eurasian studies (p. 682) (through Global Studies), comparative literature (p. 456) or history (p. 720), all of which can be pursued with a focus on Russia and the former Soviet Union.

Majors

There is no major in Russian language and literature. Students interested in Russian are encouraged to consider a major in Eurasian studies (p. 682), comparative literature (p. 456) or history (p. 720), all of which can be pursued with a focus on Russia and the former Soviet Union.

Minors

The Minor in Russian Language and Literature

Total units required: 20

Prerequisites:

Code	Title	Units
Russ 101D	Elementary Russian I	5
Russ 102D	Elementary Russian II	5

Requirements:

Code	Title	Units
Russ 211D	Intermediate Russian I	4
Russ 212D	Intermediate Russian II	4
Russ 322D	Third-Year Russian I	3
Russ 324D	Third-Year Russian II	3
One 300- or 400-level course in Russian literature		3
One elective course: either another Russian literature course or a Russian subject course taught in such departments as history or political science		3
Total Units		20

Regulations:

- Students can earn up to 6 credits from a semester or summer study abroad program, with the approval of the Russian language and literature advisor.
- All advanced units must be unique to the Russian language and literature minor (i.e., not counted toward any other major or minor).
- Students must earn at least a B- in language courses in order to continue to the next level. They must also maintain at least a B- average in all courses taken to fulfill the minor requirements. Students who do not meet this requirement may either repeat the course or courses in question or earn at least a B- in an approved equivalent course or courses (either during the summer or in a study abroad program).

Additional Information

Study Abroad: The Russian Language and Literature minor program encourages students to study abroad in Russia and other post-Soviet countries. Washington University offers summer, semester, or year-long study in St. Petersburg, Russia, under the auspices of the Council on International Educational Exchange (CIEE (<https://www.ciee.org/>)). Students can also petition for an alternative study abroad program by filling out the Washington University Petition Packet. Students may count up to 6 units from study abroad toward the Russian Language and Literature minor: 3 units for a literature or culture course and 3 units for a language course.

Semester options include both language and area studies programs. Although the summer program is language-focused only, there are programs available for students at any language level, including beginning.

Financial aid may be available for these programs through both Washington University and the CIEE.

Courses

Visit online course listings to view semester offerings for L39 Russ (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L39&crslvl=1:4>).

L39 Russ 101D Elementary Russian I

Interactive multimedia course designed to emphasize spoken language; includes the very latest video materials geared toward situations in contemporary post-Soviet Russian life. Also provides thorough understanding of fundamental grammar and develops reading and writing skills. Five class hours per week, plus an additional hour for conversation, review and testing.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L39 Russ 102D Elementary Russian II

Continuation of Russ 101D. This is an interactive multimedia course designed to emphasize spoken language. It includes the very latest video materials geared toward situations in contemporary Russian life, it provides a thorough understanding of fundamental grammar, and it develops reading and writing skills. Five class hours per week are required, plus an additional hour for conversation, review, and testing. Prerequisite: Russian 101D or equivalent.

Credit 5 units. A&S IQ: LCD, LS BU: HUM EN: H

L39 Russ 211D Intermediate Russian I

Designed to solidify students' command of Russian grammar and advance conversational, reading and writing skills. Includes video materials produced in Russia and conveying an up-to-the-minute picture of contemporary Russian life.

Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L39 Russ 212D Intermediate Russian II

Continuation of 211D, completes comprehensive review of Russian grammar and further advances conversational, reading, writing and listening skills. Revised textbook with new audio and video materials that convey an up-to-the-minute picture of contemporary Russian life.

Credit 4 units. A&S IQ: LCD, LS BU: HUM EN: H

L39 Russ 322D Third-Year Russian I

Designed to develop students' abilities in the contemporary spoken language. Conversational practice is combined with a review of grammatical concepts. Students also work with newspapers, read literary texts and write compositions. Prerequisite: Russ 212D or equivalent.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L39 Russ 324D Third-Year Russian II

Designed to develop students' abilities in the contemporary spoken language. Conversational practice is combined with a review of grammatical concepts. Students also work with newspapers, read literary texts and write compositions. Prerequisite: Russ 322D or equivalent.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L39 Russ 332 Russian Theater, Drama and Performance: From Swan Lake to Punk Prayer

This course explores performance in Russia from the wandering minstrels of medieval times to protest art of the present day. Genres include tragedy and comedy (Griboedov, Pushkin Gogol), drama (Ostrovsky, Turgenev, Chekhov), experimental theater (Stanislavsky, Evreinov, Meyerhold), ballet (Imperial, Soviet, Ballets Russes), opera (Tchaikovsky, Mussorgsky, Shostakovich), and performance art (Futurists, Pussy Riot, Pavlensky). We also consider performativity in rituals, public events, and everyday life. Our discussions center on the analysis

of short and full-length plays, critical theory, specific productions and performers, and the role that performance has played in shaping Russian culture. All readings are in English translation. No prerequisites.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L39 Russ 350C The 19th-Century Russian Novel (Writing Intensive)

The 19th-century "realistic" novel elevated Russian literature to world literary significance. In this course we do close readings of three major Russian novels: Alexander Pushkin's *Eugene Onegin*, Fyodor Dostoevsky's *Crime and Punishment* and Lev Tolstoy's *Anna Karenina*. While we consider a variety of formal and thematic concerns, special emphasis is placed on the social context and on questions of Russian cultural identity. Readings and discussions are supplemented by critical articles and film. This is a writing-intensive course: workshops are required. All readings are in English translation. No prerequisites.

Credit 3 units. A&S IQ: HUM, LCD, SD, WI Arch: HUM Art: HUM BU: HUM EN: H

L39 Russ 3559 Socialist and Secular? A Social History of the Soviet Union

This class explores daily life and cultural developments in the Soviet Union, 1917 to 1999. Focusing on the everyday experience of Soviet citizens during these years, students learn about the effects of large-scale social and political transformation on the private lives of people. To explore daily life in the Soviet Union, this class uses a variety of sources and media, including scholarly analysis, contemporaneous portrayals, literary representations and films. Students receive a foundation in Soviet political, social and cultural history with deeper insights into select aspects of life in Soviet society.

Same as L22 History 3559

Credit 3 units. A&S IQ: HUM, LCD, SD BU: HUM, IS EN: H

L39 Russ 364 Anarchism: History, Theory, and Praxis

This course analyzes the origins, historical trajectories and influence of anarchism from its classical period (1860s-1930s) until the present. It examines the major personalities, complex ideas, vexing controversies and diverse movements associated with anarcho-collectivism, anarcho-communism, individualist anarchism, anarcho-syndicalism, anarchist feminism, green anarchism, lifestyle anarchism and poststructuralist anarchism. In doing so, it explores traditional anarchist concerns with state power, authority, social inequality, capitalism, nationalism, imperialism and militarism. It also analyzes anarchism's conception of individual and collective liberation, mutual aid, workers' organization, internationalism, direct democracy, education, women's emancipation, sexual freedom and social ecology. Special attention is given to past and contemporary globalizing processes and their relation to the dissemination and reception of anarchism in the global South.

Same as L97 GS 364

Credit 3 units. A&S IQ: LCD, SSC, SD Arch: SSC Art: SSC BU: BA EN: S

L39 Russ 372 Dostoevsky's Novels

In this discussion-based course we focus on two of Dostoevsky's major novels: *Demons* (also translated as *The Possessed and Devils*) and *The Brothers Karamazov*. Our close readings of the novels are enriched by literary theory and primary documents providing socio-historical context. All readings are in English translation. No prerequisites.

Credit 3 units. A&S IQ: HUM, LCD, WI BU: IS EN: H

L39 Russ 375 Topics in Russian Lit and Culture: (WI)

The words "Russian Literature" might conjure up long, sprawling, "loose and baggy monsters." However, the short story is arguably the most significant genre in the Russian literary tradition. In this course we do close readings of some of the greatest Russian short stories, mostly from the 19th and 20th centuries. Authors might include Pushkin, Lermontov, Gogol, Dostoevsky, Tolstoy, Turgenev, Chekhov, Gippius, Teffi, Tsvetaeva, Platonov, Bunin, Nabokov, and others. Some of the questions we explore: Is a short story (rasskaz) just a shorter piece of fiction or does it aim to do something very different from a novel? How did the Russians develop-and maybe change-the genre? In what ways are these stories connected to the place and time in which they were written? We will read one or two short stories a week. This is a Writing Intensive course. No knowledge of Russian is required. All readings are in English translation.

Same as L97 GS 3750

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM BU: IS EN: H

L39 Russ 3866 Interrogating "Crime and Punishment"

Whether read as psychological thriller, spiritual journey, or social polemic, Dostoevsky's 1866 novel *Crime and Punishment* has inspired diverse artistic responses around the world. From the 19th century to the present day, writers and filmmakers have revisited (and often subverted) questions that Dostoevsky's novel poses: What internal and external forces cause someone to "step over" into crime? What are the implications of a confession? To what extent can the legal system provide a just punishment? Are forgiveness and redemption possible, or even relevant? What role does grace — or luck — play in the entire process? This course begins with our close reading of Dostoevsky's novel and then moves on to short stories, novels, literary essays and movies that engage in dialogue with the Russian predecessor. A central concern of our intertextual approach is to explore the interplay between specific socio-historical contexts and universal questions. All readings are in English. No prerequisites.

Same as L97 GS 3866

Credit 3 units. A&S IQ: HUM, LCD, SD Arch: HUM Art: HUM BU: BA EN: H

L39 Russ 396 Comintern: The Communist International's Global Impact

The Communist International was the third of the global left-wing organizations aimed to develop communist organizations around the globe to aid the development of a proletarian revolution. Begun in 1919, hosted in Moscow, and closely tied to the developing USSR, the Comintern hosted seven World Congresses and 13 Enlarged Plenums before Stalin dissolved it in 1943. This course examines the history of the nearly 25 years of the Comintern, paying particular attention to engagement with countries outside of the Soviet sphere. Class texts provide a general historical overview and interrogate

central ideological arguments/debates across several countries and political systems. Course materials look at the Comintern's engagement with Fascism and the Spanish Civil War, ideas of Nationalism and Internationalism, and Self-Determination in the Colonial World. Class units are designed to highlight regional similarities and differences, taking a global approach to the study of Communism. Students gain an understanding of the global political complexities developing after World War I and leading to World War II. Reflecting on the critique of imperialist capitalism offered by the Comintern, students explore liberation struggles and ideological dictatorships around the globe.

Same as L97 GS 396

Credit 3 units. A&S IQ: HUM EN: H

L39 Russ 404 Fourth-Year Russian I

Further develops students' abilities in all spheres of the language: speaking, listening, reading, writing. Vocabulary building, conversation practice and student compositions based on materials from the Russian mass media, contemporary films and readings in modern Russian literature. Prerequisite: three years of college Russian or equivalent.

Credit 3 units. A&S IQ: LCD, LS

L39 Russ 405 Fourth-Year Russian II

Further develops students' abilities in all spheres of the language: speaking, listening, reading, writing. Vocabulary building, conversation practice and student compositions based on materials from the Russian mass media, contemporary films and readings in modern Russian literature. Prerequisite: three years of college Russian or equivalent.

Credit 3 units. A&S IQ: LCD, LS

L39 Russ 4442 The Jewish Experience in Eastern Europe

A study of Jewish culture, society and politics in Poland-Lithuania, Hungary, the Czech lands, Russia, Romania and the Ukraine, from the 16th century through the 20th century. Among the topics covered are: economic, social and political relations in Poland-Lithuania; varieties of Jewish religious culture; Russian and Habsburg imperial policies toward the Jews; nationality struggles and anti-Semitism; Jewish national and revolutionary responses; Jewish experience in war and revolution; the mass destruction of East European Jewish life; and the transition from Cold War to democratic revolution.

Same as L22 History 4442

Credit 3 units.

L39 Russ 4869 Reading War and Peace

What is it like to enter into a fictional world for a semester? In this course we read Leo Tolstoy's *War and Peace* in its entirety. Set during the Napoleonic wars (1805-1812), *War and Peace* takes the reader on a panoramic journey from the battlefield to the hay field, from the war room to the ballroom. It is a vivid portrayal of 19th-century Russian society as well as a penetrating examination of the causes and consequences of violence and the nature of love and family dynamics. In our discussions, we explore philosophies of history, issues of social injustice and gender inequality, the psychology of human suffering and joy, questions of literary form and genre, and the very experience of reading a long work of fiction. We begin with a selection of Tolstoy's early works that laid the foundation for *War and Peace* and conclude with a few of Tolstoy's late works that had an enormous influence on, among others, Mahatma Gandhi. Primary texts are supplemented with literary theory and film. All readings are in English.

H

Sociology

The Department of Sociology strives to understand the origins and reproduction of social inequality, especially as it relates to issues of pressing public concern. Our particular areas of focus include race/ethnicity, gender, the sociology of work and the workplace, immigration, social movements and economic inequality.

Sociological analysis begins from theoretical perspectives that explain how the structures that organize and govern social systems emerge and change. Our curriculum and research emphasize an understanding of social processes that is well grounded in empirical data related to how societies actually function. We also seek to engage with social policies and social institutions to better understand the world in which we live and to help guide social change.

Re-established in 2015 after a hiatus of more than two decades, the department offers undergraduate major and minor programs with wide-ranging course offerings every semester. The curriculum provides students with research tools to examine critical social issues and to apply their understanding of sociology to activities outside of the university.

Majors

The Major in Sociology

The major in sociology provides students with a rigorous understanding of the ways in which social relations and settings shape individual and group experiences and outcomes, with an emphasis on how various forms of inequality are created

and propagated through time. Reflecting the diversity of social settings that motivate sociological inquiry, students will enroll in multiple introductory-level courses. We intend that these first courses will help students develop a sociological lens through which they can better understand the baseline determinants of inequality, social order and change. Because the discipline draws on diverse theoretical and methodological tools to engage with these core issues, required course work ensures that students develop expertise in classical and contemporary theoretical concepts as well as both quantitative and qualitative research methods. Upper-level seminars provide majors and minors with opportunities to apply these substantive, theoretical, and methodological perspectives to a focused and deep study of specific sociological topics. The major additionally features a capstone experience, which enables students to deploy sociological tools to undertake original work connected with a research project, internship or honors thesis.

The sections that follow provide a detailed overview of the sociology major, with an emphasis on providing answers to many of the questions likely to arise at each stage as well as serving as a guide to related opportunities available to our majors and minors.

Requirements:

The major requires the successful completion of 10 courses, distributed as specified below. Courses that satisfy major requirements must be completed with a letter grade of C- or better. (Courses taken on a pass/fail basis do not satisfy requirements.)

- a. **Introductory requirement** (6 credits total): Any two 200-level sociology courses (Students may substitute an upper-level sociology course for one of their two introductory courses with the written approval of their major advisor.)
- b. **Theory requirement** (3 credits): SOC 3001 Social Theory
- c. **Methods requirement** (6 credits): SOC 3030 Introduction to Research Methods and SOC 3050 Statistics for Sociology
Because SOC 3050 draws on specific sociological applications of statistical analyses, we strongly encourage students to enroll in our department's Statistics for Sociology course. However, with the written approval of their major advisor, students may substitute Math 2200, Math 3200, or a disciplinary statistics course from another social science for SOC 3050. Majors who receive approval to fulfill this requirement with a course from another department or university are required to take an additional upper-level sociology course in lieu of SOC 3050.
- d. **Upper-level sociology electives** (15 credits): Any five 300- or 400-level seminar courses. An independent learning course (i.e., independent research or an internship) can fulfill one of these five elective course requirements.
- e. **Capstone:** Majors will choose to complete any one of the following options:

- i. **Capstone paper tied to an upper-level course** (at least 1 credit): Students electing this option may align the research paper with any upper-level sociology course taken during or prior to the semester in which they undertake this accompanying capstone paper. Capstone research papers typically are 10 to 15 pages in length and represent some application of course content to a related topic developed by the student in consultation with the instructor. Students interested in this option should register for the section of SOC 4900 Capstone Paper for Sociology Majors assigned to the relevant instructor, who will then do the following: (1) approve the capstone paper topic at the outset of the semester; (2) be available for consultation at all stages of the project; (3) assign a final grade for this 1-credit course; and (4) upon completion of the paper, certify the final product as fulfilling the capstone requirement. Students should schedule a meeting with the relevant instructor prior to or at the start of the semester (i.e., well before the add/drop period) to obtain the required approval for enrollment in SOC 4900 and to discuss the paper.
- ii. **Internship** (at least 2 credits): Students electing to complete a field internship are able, in consultation with their internship advisor, to identify and select a position with an organization of their choosing. For help identifying options in St. Louis, we recommend that students reference the Gephardt Center's internship opportunities listings (<https://gephardt.institute.wustl.edu/for-students/>) as well as the Career Center's CAREERlink database (<https://careercenter.wustl.edu/tools/careerlink/Pages/Students.aspx>). Over time, our department website will also provide resources for connecting with local organizations in need of student interns with a background in sociology. Capstone internships are intended to integrate and apply the knowledge gained in the classroom to community and organizational settings. As such, students are required to identify a faculty advisor of their choosing to approve and oversee the experience in consultation with the on-site internship manager. (Note that the internship advisor need not be the same as the student's major advisor.) To receive credit for the internship, students should first obtain approval for the proposed experience in advance of the internship start date from their selected faculty advisor, who will then provide the required permission to enroll in the advisor's assigned section of SOC 4910 Internship in Sociology. Students must complete and file an Internship Learning Agreement (PDF) (http://bulletin.wustl.edu/undergrad/artsci/sociology/Learning_Agreement_Form_SOC_FL2019_.pdf) with the department no later than two weeks after the first day of the internship. The university stipulates 45 hours of work for each academic credit earned, so students will need to complete at least 90 internship hours — along with a

series of reflective assignments arranged in consultation with their advisor — to fulfill the capstone requirement. Although only 2 credit units are required, students can register for up to 3 credit units, which would require a minimum of 135 internship hours to be completed.

- iii. **Honors thesis** (6 credits): The sociology honors thesis program is a two-semester sequence that students complete during their final year of study. In the fall, students will enroll in the honors thesis seminar, which will aid them in developing their research questions and their thesis proposals. In the spring, students will undertake independent research under faculty mentor supervision through an independent study-style course. Honors students must successfully defend their thesis in front of a faculty committee, and they will be expected to share their work by participating in department- and university-level research forums. Students who choose the thesis capstone option can apply 3 of their thesis credits toward their major elective requirement (part d in the list above). This means that, in addition to their thesis project, they would need to complete four (rather than five) additional 300- or 400-level seminar courses. Students must complete both fall and spring offerings of the honors sequence to receive this dual credit. *To be eligible for Latin honors in sociology, students must complete an honors thesis.* For more information about honors work in the department, please visit our Undergraduate FAQ & Policies page (<https://sociology.wustl.edu/undergraduate-faq-policies/>).
- iv. **InVisible St. Louis** (3 credits): This course collaboration between the Sam Fox School of Design & Visual Arts and the Department of Sociology provides a unique, hands-on opportunity to fulfill the capstone requirement in a formal classroom experience. As the class collectively works with St. Louis community partners to further their missions through student projects, those who enroll will learn about inequalities of power and place within the city and region. *Although first-year and sophomore students may enroll in this course, only juniors and seniors will earn capstone credit for their work.*

Minors

The Minor in Sociology

Requirements:

- a. **Introductory requirement** (3 credits total): One 100- or 200-level sociology course
- b. **Theory requirement** (3 credits): SOC 3001 Social Theory (offered every year)

- c. **Methods requirement** (3 credits): Either SOC 3030 Introduction to Research Methods **or** SOC 3050 Statistics for Sociology
- d. **Additional upper-level sociology electives** (6 credits): Any two 300- or 400- level courses

Courses taken pass/fail and courses in which a student earns less than a C- do not fulfill minor requirements.

Courses

Visit online course listings to view semester offerings for L40 SOC (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L40&crslvl=1:4>).

L40 SOC 106 Social Problems and Social Issues

This course explores and analyzes contemporary American social problems and social issues using sociological tools. The sociological perspective provides the overarching framework for analyses of social issues, along with the application of sociological theory and research. Topics include aging, alcoholism, drug abuse, crime, violence, poverty, discrimination, health care, family, globalization, and environmental degradation. This course will be valuable to students pursuing graduate work and careers in sociology, medicine and health care, and social services. The content is also useful for MCAT, LSAT, and GRE preparations. No prerequisites.

Credit 3 units. A&S IQ: SSC, SC Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 144 First-Year Seminar: Monumental Anti-Racism

As sources of national memory and identity, public monuments, place names, historical markers, and other elements of commemorative landscapes are potential sites of cultural violence (e.g., alienation, disrespect, and erasure) contributing to broader conflict and inequality; they are therefore important considerations in movements for equal opportunity and justice. Some contend that memory sites are "the new lunch counters," where our racial politics are worked out. This course examines the racial politics of commemorative objects and practices as well as commemorative intervention as a strategy of anti-racist activism. We begin with an historical survey of various ways that racism has been inscribed on the commemorative landscape, and readings in history, political theory, cultural studies, and other fields will be used to gain insight into these contested commemorative objects, their development, and social significance. We then turn to a critical assessment of efforts to remove and recontextualize commemorative objects and to erect new objects commemorating neglected figures and issues. We consider how these reparative efforts relate to what political theorists call "remedies of recognition" and specifically how they might aid in advancing equal opportunity and justice. Through our study and engagement with contested commemorative landscapes (including local, national, and global cases), students will become familiar with the burgeoning interdisciplinary field of memory studies, diverse forms and sites of commemoration, local and global efforts to advance what has been termed "commemorative justice," and the challenges being faced.

Credit 3 units. A&S: FYS A&S IQ: HUM, SC Arch: HUM Art: CPSC, HUM BU: BA EN: H

L40 SOC 2010 The Roots of Ferguson: Understanding Racial Inequality in the Contemporary U.S.

An overview of sociological understandings of race, with a particular focus on race relations in the contemporary United States. The course begins by inquiring how sociologists understand racial distinctions, asking: What comprises a racial group? What constitutes a "group" in the social sense? The course then shifts to explore patterns of racial inequality in the U.S., particularly through investigating the intersections of economic, political, and racial stratification. After analyzing national trends in racial stratification, the course narrows its focus to particular regions and metropolitan areas, including St. Louis, to shed light on pressing public concerns such as the interrelationships between race and the criminal justice system. The course ends by looking beyond U.S. borders to compare the way that race is understood in other countries. Are there common patterns of racial classification shared by many societies? What makes the U.S. system of racial stratification distinctive?

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 2020 Order and Change in Society

This course identifies and analyzes processes that create social order and forces that generate social change. What kinds of structures make social life coherent so that people can navigate a wide range of social settings? How do societies sometimes mobilize to alter the status quo, and what kinds of barriers limit those efforts to change social systems? This course engages with such core issues through a sociological lens. Specific topics include: the emergence of social roles and status systems; how social networks matter in communities, schools, and other groups; and the performance, reproduction, and subversion of privilege and inequality.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 2030 Social Movements

Social movements are collective efforts to produce political, economic, and/or cultural change. This course draws on a range of historical and contemporary case studies to analyze such collective actions by interrogating distinctive aspects of movements and their associated campaigns. Key questions include: when and where do movements occur, who participates and why, how do protest strategies and tactics develop, how do police and other movement targets react to challenges to the status quo, and how can we assess the direct and indirect impacts of contention?

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 2110 Social Inequality in America

Americans face different challenges and opportunities that depend on a variety of characteristics, including race, class, gender, and sexual orientation. This class examines these intersecting categories from a sociological perspective - not simply as ways to classify people, but as social constructions that help to explain social inequality. Students will examine these systems in a variety of institutional contexts, such as popular culture, family life, education, the criminal justice system, and the labor force.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 2510 Sociological Approaches to American Health Care

A sociological exploration of how health, illness, and health care delivery in the United States are influenced by the social structure in which they are embedded. With the backdrop of the ongoing crisis of health care in the United States and the controversy surrounding the Affordable Care Act, we focus on the intersections of diversity factors including such as race, social class, gender, and sexuality that predict risks in navigating the health care system. Professionals representing a variety of health-oriented settings who serve the needs of a diverse constituency will share their perspectives.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 2511 Juvenile Justice in the Black Experience

This course examines the sociolegal past, present, and future of American juvenile justice, with a focus on the Black American experience. The course is organized in three parts. Part I surveys the late 19th- and early 20th-century development of the "parental state," including its institutional centerpiece (the juvenile court), its principle legal subjects ("dependents" and "delinquents"), and how these took shape alongside the contemporaneous rise of American Apartheid. Part II examines several key changes and challenges in contemporary juvenile justice, including the transformation of this institution in the wake of the Civil Rights Movement and the endurance of racialized juvenile social control in the post-Civil Rights period. Finally, Part III considers possible futures of youth justice in the United States and beyond as well as practical strategies for achieving equal protection within and beyond the law. For AFAS majors, this course counts as Area Requirement 2.

Same as L90 AFAS 251

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 2520 Inequality By Design: Understanding Racial/Ethnic Health Disparities

This course critically examines health status and health care disparities among racial/ethnic minority groups in the United States. The course will utilize sociological, demographic, epidemiological, and psychological concepts to introduce students to racial/ethnic health disparities research. Students will be exposed to the descriptive demography and epidemiology of health indicators across population groups, as well as to the theories used to understand and explain racial/ethnic health disparities. In particular, the course will examine the ways in which multiple forms of interpersonal and institutional discrimination, neighborhood and community factors, and inequalities in socioeconomic status influence health behaviors, access to health care services, and health status outcomes across racial/ethnic groups. Concepts such as acculturation, patient preferences, provider congruence and cultural competence will also be explored in this course. Finally, students will be challenged to use the theories and frameworks introduced in this course to develop and present policy approaches to address racial/ethnic disparities in health and health care in the United States.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 2530 Punishment and Inequality

This course examines the institutions and policies that shape punishment in the United States, with a particular focus on mass incarceration. The U.S. incarceration rate has more than quadrupled since the early 1970s. In this course, students examine how the United States became the world's leader in incarceration and how racial and class disparities in imprisonment became so large. The course next investigates the consequences of incarceration, both in terms of its high rates and intense social concentration. The course concludes by assessing recent attempts to reform the criminal justice system. Credit 3 units. A&S IQ: SSC, SC BU: BA EN: S

L40 SOC 2580 Families and Social Inequality

Families have changed dramatically in recent decades in the United States. Dual-earner families, single parents, cohabiting families, and blended families are now common in the contemporary family landscape. The prevalence of increasingly diverse and complex family configurations varies substantially by social class, race and ethnicity, and gender. Men's and women's work and family lives have also become more similar over time, but gender inequalities in child care remain significant. Drawing on insights from sociology, demography, and economics, this course aims to understand the causes and consequences of social inequalities in family life. The course focuses primarily on the contemporary U.S. context, but also explores historical and cross-national variation in families. The course also considers the role of social policy in affecting inequalities.

Credit 3 units. A&S IQ: SSC, SC Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 2710 First-Year Seminar: Beyond the Melting Pot: Life in Immigrant America

This course uses a sociological lens to explore contemporary immigration to the United States. The more than 43 million immigrants living in the United States today come from across the globe. Their reasons for migrating to the United States are complex, as are the laws, policies, and social structures they must navigate before and after their arrival. In the first half of the course, students will get to know Mexican immigrants who split their lives between Brooklyn and their small hometowns in Mexico; fourth-generation Chinese Americans who are still asked, "Where are you from?"; and West Indian immigrants forced to confront a U.S. racial order where they are defined by their Blackness. In the second half of the course, students will learn about Iranian-American youth navigating life in post-9/11 America and the challenges of becoming a young adult when one learns that they lack any legal status. Who are these immigrants? Why and how did they come here? How well are they and their children integrating into American society? Readings will be drawn from sociological research that opens windows into the lives of immigrants in America. Students will also conduct their own hands-on research to better understand life in immigrant America. Open to first-year students only.

Credit 3 units. A&S: FYS A&S IQ: LCD, SSC, SC BU: BA, IS EN: S

L40 SOC 2910 Alternative Facts: An Introduction to the Social Construction of Reality

This course acts as an introduction to the concept of social construction: the idea that an "objective" reality is shaped by one's social positions and through social interactions. Recent political events and social conflicts highlight deep divisions in American society, raising critical questions about the media and

objectivity (e.g., "alternative facts" and "fake news"), networks and segregation (e.g., who talks to whom), who gets to decide what is viewed as "truth," and the role of researchers and academia in combating (or contributing to) misinformation. This course explores these questions through a sociological lens. Students will use foundational sociological theories to learn how to recognize the existence of multiple realities, and they will consider the implications of social constructionism for key domains of everyday life, American politics, and the production of knowledge. Students will also evaluate the ways that cutting-edge technological innovations and academic research can -- or cannot -- help people distinguish facts from "alternative" facts." Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 3001 Social Theory

An overview of major theoretical frameworks used by sociologists to understand social behavior and group patterns. This course explores classical theories, including those developed by Marx, Weber, and Durkheim, along with contemporary perspectives such as functionalist, interactionist, and conflict theories. Class discussions and writing assignments emphasize students' application of theory to understand current social experiences and structures. The course has no specific prerequisites, but students should be prepared for intensive study of challenging ideas and the application of these ideas in new contexts relevant to modern society. All Sociology majors and minors must complete this core course to fulfill degree requirements.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 3002 Black Feminist Thought

What makes Black feminist theory unique? Whose theorizing is considered "theory" worthy of canonizing? What are the different strands of Black feminist thought? What has Black feminist thought contributed to academic and popular culture? Through engaging with primary text and producing your own text, students in this seminar will develop answers to these questions through exploration of (contemporary) Black feminist thought. Credit 3 units. A&S IQ: SSC, SC

L40 SOC 3006 Global Health and Language

Long before COVID-19, scholars across the globe postulated that language in health care is one of the most significant, and yet underexplored, social determinants of health in underserved linguistically diverse communities. This new course attempts to harmonize work across the disciplines of Global Public Health and Applied Linguistics by analyzing studies that examine language acquisition and language use across contexts with populations that experience serious health disparities- immigrants, refugees, indigenous peoples, racial and ethnic minority groups- and the course offers corresponding implications for health equity. Broadly speaking, this course addresses global health literacy issues, in both spoken and written communications, and its relationship to public health. As part of the seminar, students will apply the theory and research they learn to help meet the local language health needs of a changing population of refugees and immigrants in St. Louis community.

Same as L97 GS 3006

Credit 3 units. A&S IQ: LCD, SSC, SC Arch: SSC Art: SSC BU: BA, ETH, IS

L40 SOC 301B Individual and Community

What social, political, and cultural forces shape the individuality of people and yet make them part of not just one community but many, each of which is greater than the sum of the individuals that comprise it? What role do families and friends fill in this process? Students explore answers to these questions by reading theories and case studies that try to explain the foundations of individuals' sense of self and the interdependence and responsibilities of individuals, families, and communities to one another. Cases students read highlight (1) how family and communal experiences (like school) influence individuals and (2) how virtual (online) and non-virtual communities are structured and sustained as social entities. In addition to readings, the class will rely on guests from the "real world" as well as field trips into virtual and non-virtual communities. AMCS Majors may count this course for Fieldwork credit with permission of instructor; a supplemental assignment might be required.

Same as L98 AMCS 301B

Credit 3 units. A&S IQ: SSC, SD BU: BA, ETH, IS EN: S

L40 SOC 3030 Introduction to Research Methods

An overview of research methods commonly used to investigate sociological phenomena, including experiments, surveys, ethnographic field research, and analysis of existing data. The course explores general issues in sociological research, such as research design, conceptualization and measurement, reliability, validity, sampling, and ethical conduct. Students will also review applications of research methods in specific sociological studies and analyze how research results are communicated. This is a core course within the Sociology program and is required of all Sociology majors; Sociology minors are encouraged to take this course to fulfill their Methods requirement within their course of study. The course has no specific prerequisites, but some familiarity with sociological analysis is recommended.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 3050 Statistics for Sociology

An introduction to descriptive and inferential statistical techniques used in sociological research. Topics addressed include: probability distributions, data presentation and visualization, confidence intervals, hypothesis testing, and linear regression. Students will learn to design and evaluate statistical analysis drawn from sociological research and other social science data sources, such as polling and economic data. Students will use statistical software to complete lab assignments. Prerequisite: successful completion of an introductory Sociology course or consent of the instructor.

Credit 3 units. A&S IQ: NSM, AN Arch: NSM Art: NSM

L40 SOC 3212 The Social Construction of Race

An examination of race, ethnicity, and racism from a sociological perspective to understand race as a socially-constructed phenomenon manifested in a wide range of social institutions. The course focuses on how race and racism impact contemporary social problems and public policy issues including immigration, affirmative action, education, media representation, and work. Students will learn to apply sociological analysis to understand current race-related events. This course has no specific prerequisites, but the completion of an introductory sociology course is recommended prior to enrollment.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 329 SOCIOLOGY OF RELIGION

Credit 3 units. A&S IQ: SSC, SC

L40 SOC 3310 The New Inequality

An exploration of recent trends of economic inequality in the United States that have reached levels not seen since before the Great Depression. Students will examine factors that account for the decades-long increase in economic disparities, paying particular attention to patterns in educational attainment, political developments, and the role of technological change. Students will also compare recent movements in economic inequality and macroeconomic performance in the U.S. to other advanced industrialized nations. This course has no specific prerequisites but successful completion of an introductory Sociology course is recommended prior to enrollment.

Credit 3 units. A&S IQ: SSC, SC, SD, WI Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 3320 Getting Paid: A Sociological Investigation of Wages and Salaries

A Burger King worker in the United States today performs the same duties and requires the same skills as a Burger King worker in Denmark. However, the worker in Denmark earns two-and-a-half times as much money. Why? A full-time construction worker in the United States today earns \$10,000 less per year (adjusted for inflation) than a worker with the same job in 1973. Construction work cannot be shipped overseas, so why the decline? What determines one's pay? Are people paid fairly? How might one know? This course seeks to answer these questions. Students will draw on a range of comparative, historical, and contemporary case studies to explore changes in the ways in which American workers get paid. Key areas of focus include: employer strategies to prevent workers from realizing their market value, the role Wall St. plays in influencing pay, and ongoing efforts to measure and reward individual productivity. The ultimate goal of the course is to upend students' taken-for-granted assumptions about pay-setting, and to provide students with a richer and more complex understanding of the contemporary world of wage and salary determination.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: ETH EN: S

L40 SOC 3350 Poverty and the New American City

This course is an exploration of the structural changes that are transforming the American urban landscape, especially for low-income populations. The course begins with a review of classic theories of urban poverty and considers their relevance in the modern context. Students will then analyze key political, economic, demographic, and geographic shifts in how urban poverty is organized and reproduced, including gentrification, immigration, social policy reform, and the credit crisis. Special attention will be devoted to exploring the social and political implications of changing urban policy approaches as well as the "suburbanization" of poverty. The course will conclude by discussing how urban poverty interfaces with broader social structures, including law, markets, and the state. Prerequisite: Successful completion of an introductory sociology course or permission of instructor.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 3410 Gender in Society

This course acts as an introduction to the sociological study of gender. The primary focus of the course will be on U.S. society, but we will also discuss gender in an international context. From the moment of birth, boys and girls are treated differently. Gender structures the experiences of people in all major social institutions, including the family, the workplace, and schools. Students will explore how gender impacts lives and life chances. The central themes of the course are historical changes in gender beliefs and practices; socialization practices that reproduce gender identities; how race/ethnicity, class, and sexuality shape the experience of gender; and the relationship between gender, power, and social inequality. Prerequisite: Successful completion of an introductory sociology course or permission of instructor.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 351 Topics in Sociology

This is an intermediate- to advanced-level seminar focused on various topics and subject areas within -- and adjacent to -- the field of sociology. The themes and content of the course will vary by offering and instructor. Prerequisite: Successful completion of an introductory sociology course or permission of instructor. Credit 3 units.

L40 SOC 352 Topics in Sociology: Growing Up Poor Across America — An Application of Sociological Reasoning to Data

This is an advanced seminar on poverty in America, with a special focus on applying and analyzing data pertaining to its study. The American Dream is built around the idea that anyone, regardless of their origins, can have a fair start in life. However, recent research shows that the promise of the American Dream is uneven across the nation. Poor children growing up in San Jose, Calif., are three times more likely to escape poverty than those in Charlotte, N. Car. What might be driving these geographic differences in opportunities for low-income youth? This course will investigate the factors that may influence these differences by working with engaging real-world data. Students will explore cutting-edge research on poverty and mobility in America to develop their own research questions. Students will also develop the computational and statistical skills to put their ideas into practice by learning to analyze data and construct data representations that communicate their findings effectively. The ultimate goal of this course is to learn to connect sociological reasoning and an understanding of poverty and inequality with data analysis. Prerequisite: Successful completion of an introductory sociology course or permission of instructor. Completion of or concurrent enrollment in SOC 3030 and/or an introductory statistics course (SOC 3050 or equivalent) is strongly encouraged.

Credit 3 units. BU: BA

L40 SOC 3550 Sociology of Work

This course is an overview of the sociological understandings of work and, in particular, how work reduces or replicates inequality. It will cover classic and contemporary sociological theories of work; how work in the United States has changed over time; and how workers are matched to "good" and "bad" jobs. Threaded throughout the course is the exploration racial, gender, and class barriers to inclusion and advancement at

work. Students will explore how organizational structures, policies, and practices can increase or decrease those barriers. Prerequisite: Successful completion of an introductory sociology course or permission of instructor.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 3660 Social Conflict

This course is a comparative and historical examination of conflict between social groups, including groups defined by race, ethnicity, and class. Course readings will combine classical and contemporary perspectives on collective conflict with in-depth analyses of historical and contemporary episodes. The course will discuss the various ways in which conflicts can manifest, including the formation and hardening of divisive attitudes; discriminatory lawmaking and criminal justice practices; riots and collective violence; residential segregation; and sustained social movement activity. Prerequisite: Successful completion of an introductory sociology course or permission of instructor.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 3710 Sociology of Immigration

This course reviews theoretical and empirical research on how and why people migrate across international borders, and the consequences of international migration for immigrants and natives in the United States. While immigration is one of the most controversial issues in the contemporary United States, these contentious debates are not new. Americans once voiced the same concerns about the economic and social impact of Southern and Eastern European immigrants that today are aimed at immigrants from Latin America, Asia, Africa, and the Caribbean. In this course, students will compare historical (1880-1920) and contemporary (1965-present) waves of immigration to the United States. In this, students will explore why and how people migrate; immigrant integration; the impact of immigration on native-born Americans; and how government policies — at the national, state, and local level — shape immigrant assimilation and what it means to be considered truly "American" in a social as well as a legal sense. Prerequisite: successful completion of an introductory Sociology course or consent of the instructor.

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 3810 Film and the City

What makes a city a city? Is there something unique about urban life, in comparison to the way life is lived in rural areas and small towns? Only recently has over half of the world's population started to live in urban centers. What issues, if any, might have arisen from this development? In this course, students will think about and explore how sociology and related disciplines have approached the study of cities. Students will read classic and contemporary theorists on urban life and consider how cities shape the human experience. Then, they will apply what they learn to consider the city as portrayed in film. Movies will become the lab where students grapple with the good, the bad, the ugly, and also the beauty of cities.

Credit 3 units. A&S IQ: SSC, SC Arch: SSC Art: SSC BU: BA

L40 SOC 3910 Economic Realities of the American Dream

Exploration of the realities of economic life in the U.S. and how they correspond to the American Dream. Interdisciplinary perspectives from economics, sociology and other areas of social inquiry. Emphasis on the consistency between empirical data and different concepts of the American Dream. Specific topics to include sources of economic growth and changing living standards, unemployment, impact of globalization on U.S. citizens, economic mobility, poverty and inequality, and social justice. Prerequisites: Econ 1011 and Econ 1021, or consent of the instructors.

Same as L11 Econ 348

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 3920 Philanthropy Lab

This course is designed to give students a theoretical and practical understanding of contemporary philanthropic efforts. First, the course will lay out the sociological and historical roots of philanthropy in the United States, including where philanthropic funds come from, how they are used, and the inherent tension between capitalism and philanthropy. The role of government in funding non-profits and new philanthropic tools, such as donor-advised funds, will also be reviewed. The course will also look at philanthropy's role in addressing social issues, including new approaches that go beyond simply giving money — such as the growing interest in and need for advocacy among institutional givers. Attendance on the first day is required for secured enrollment in the course.

Credit 3 units. A&S IQ: SSC BU: BA, HUM EN: S

L40 SOC 4036 Children of Immigrants: Identity and Acculturation

This seminar takes an interdisciplinary approach to children of immigrants as an analytical subject. The course texts are in sociology, anthropology, and cultural studies, and a significant number of our case studies focus on 1.5- and second-generation Asian Americans and Latinx. Identity and identity politics are main topics; in addition, the course will critically examine theories on acculturation and assimilation. Our discussions cover a wide range of topics from culture, ethnicity, and race, to bilingualism, education, family, school, ethnic community, and youth culture. Students are required to conduct an individual research project among a selected group of children of immigrants.

Credit 3 units. A&S IQ: HUM, LCD, SC, SD Arch: HUM Art: HUM BU: HUM EN: H

L40 SOC 4110 Applied Sociological Research

This course is an advanced seminar that aims to connect sociological reasoning with practical data analysis. Course instructors will select current issues in contemporary sociology and identify relevant data that students will use to explore a range of related research questions. The course develops computational and statistical skills in order to put sociological ideas into practice by learning to analyze and evaluate data, in addition to presenting study results in ways that communicate one's research findings effectively. Topics and subject areas covered will vary by offering and instructor. Prerequisite: successful completion of an introductory Sociology course or consent of the instructor. Completion of — or concurrent enrollment in — Introduction to Research Methods (SOC 3030) and/or an introductory statistics course (SOC 3050 or equivalent) is strongly encouraged.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L40 SOC 4210 Land of Dollars: Race, Money, and the Politics of Equity

This course will explore how racialized meanings and structures shape the circulation and accumulation of money throughout the market economy.

Credit 3 units. A&S IQ: SSC, SC BU: BA

L40 SOC 423 Political Sociology

In this course we will be discussing politics, the way that people interact with politics, and the way that politics shape our lives. Why do individuals participate in politics (e.g., vote) or become engaged in their communities (e.g., join a voluntary association, protest, etc.)? What role do our social connections play in political and civic engagement? What does political competition in the US look like today? What accounts for increasing political partisanship in the United States? Who has access to political institutions? How amenable is our political system to change? Who has the power to impact policy and institutions? How do shifts in political participation, civic engagement, and partisanship all shape policymaking? How does policy shape participation? In this class we will engage with these questions through course discussion, group work, class data collection and analysis, and more.

Credit 3 units. A&S IQ: SSC EN: S

L40 SOC 4260 Memory for the Future

The year-long Studioblab "Memory for the Future" (M4F) will create spaces and practices of humanities education, practical public history, and collaboration in the spirit of "multidirectional memory." This concept tries to address the interlinked histories and legacies of the Holocaust, slavery, apartheid, and colonialism and create opportunities for dialogue between communities impacted by and implicated in these forms of violence. Our principal aims are to explore, enrich, and sustain the global and local focus of "reparative memorial practices" in St. Louis. Focusing on commemorative efforts through public memorials, monuments and especially museums, M4F will engage survivors, activists, institutional leaders, and scholars (students and faculty) in the development of educational materials, artistic representations, exhibitions, and other approaches to bringing the past into the present. We strive to support the efforts of local and regional initiatives and venues to end racism, antisemitism, and homophobia and their related violence through innovative and inclusive memory work. Alongside classroom-based instruction focusing on discussing scholarship and acquiring practical, curatorial, and pedagogical skills, students will work with area institutions and initiatives to apply their study of multidirectional memory. This practicum is an integral part of the course and requires students to leave campus and regularly work with one of our partners (The Griot Museum of Black History, George B. Vashon Museum, St. Louis Kaplan Feldman Holocaust Museum, The Mildred Lane Kemper Art Museum, Reparative Justice Coalition of St. Louis, St. Louis Community Remembrance Project). Participants of the Studioblab are expected to attend regular weekly meetings and engage in self-directed and collaborative project work. We are also preparing study trips to regional sites of memory and education. The M4F Studioblab will convene at the Lewis Collaborative, a living-learning-commercial space at the west end of the Delmar Loop. All A&S graduate students and advanced undergraduates are invited to participate. Undergraduate enrollment by permission of the instructors. For

History majors, this course fulfills the capstone requirement as an Advanced Seminar. As a year-long course, students are expected to enroll in both the fall and spring sections. For more information, please consult <https://www.m4f.community/>

L40 SOC 4289 Neighborhoods, Schools, and Social Inequality

A major purpose of the course is to study the research and policy literature related to neighborhoods, schools and the corresponding opportunity structure in urban America. The course will be informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis will be placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups will complement the course foci.
Same as L12 Educ 4289
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L40 SOC 4410 Borders and Boundaries of Belonging: Citizens, Immigrants, Refugees

This course examines ideas, policies, and practices around migration and inclusion in global comparison. We will focus heavily on key issues for inclusion, including access to the labor market, housing, education, language policy, and political rights. Throughout the course, we examine the role of INGOS, states, and municipal organizations in resettlement and inclusion. Students will have the chance to develop a project focused on a case of their choosing and hone writing skills for applied research settings.

Credit 3 units. A&S IQ: HUM

L40 SOC 451 Topics in Sociology: Politics and Polarization

Democracies are strengthened by diversity of participation. However, some events can create, further, and expose deep differences in trust about the legitimacy of political and social institutions. What binds people together, and what fosters trust in sociopolitical institutions after ruptures? In addition to theory, students will also gain skills in communicating research to broader audiences.
Credit 3 units. BU: BA

L40 SOC 4510 Race, Ethnicity, and Migration

This course will explore theoretical and empirical analyses of race, ethnicity and migration through a sociological lens, focusing on children of immigrants and later-generation descendants of migrants in the United States. Students will compare the experiences and outcomes of various racial and ethnic "groups," including whites/Europeans, Blacks/African-Americans, Latinos/Hispanics, and Asians, investigating how migration processes and patterns shape racial/ethnic group formations and inequalities. Examples of specific topics related to these issues include: assimilation; ethnic and racial identities; multiraciality; language; legality; intergroup relations; and education. This course will be taught in a seminar style where student engagement within class discussions is required and one's participation is central to the learning process.
Credit 3 units. A&S IQ: LCD, SSC, SC Arch: SSC Art: SSC BU: BA, IS EN: S

L40 SOC 4511 Sick Society: Social Determinants of Health and Health Disparities in the United States

Improving the health of the U.S. population and reducing disparities in health are national priorities. To reach these goals, much research has sought to determine the factors that influence health status beyond health care quality and access. This course explores the broad area of study termed the "social determinants of health" while placing special emphasis on the exploration of health disparities in the United States. The course will examine the social conditions that relate to the health of populations, paying particular attention to how patterns of health vary by social class, race/ethnicity, and gender. The course will also consider mechanisms that produce and maintain these differences. In addition to sociology, students will draw upon the work of multiple disciplines, including public health, demography, anthropology, public policy, economics, and medicine to understand what makes our populations sick and what might make them better. The class will be taught through an active learning approach, with class discussions, small group work, presentations, and critical writing assignments being central to the learning process. Student participation through reading and discussions is essential for both the success of the class and individual student learning.
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA

L40 SOC 4515 Migration and Health

This course explores the complex relationship between migration and health. Topics include the immigrant health paradox; social determinants of health; access to health care; cultural competence in health care; and immigration enforcement and health. This seminar will be taught as an upper-level course intended for advanced sociology majors, advanced sociology minors, and graduate students. Prerequisite: Successful completion of an introductory sociology course or permission of instructor.
Credit 3 units. A&S IQ: SSC, SC BU: BA

L40 SOC 4601 Historical Racial Violence: Legacies & Reckonings

There is growing awareness of the legacies of historical racial violence in the United States and a related increase in reckoning efforts. Area histories of enslavement, lynching, and other racial terror and dispossession relate to inequality, conflict, and violence in the same places today. These 'haunting legacies' include heart disease and other health disparity, homicide rates,

white supremacist mobilization, and corporal punishment in schools. Meanwhile, many communities and institutions are moving to acknowledge and address legacies of historical racial violence in various ways. This course combines seminar-style readings and writing on legacies of racial violence with a practicum component, where individual students or groups of students will conceptualize and develop interventions intended to clarify and disrupt legacies of racial violence, facilitating contemporary reckoning. The practicum will explore and support a broad range of interventive efforts, including public policy measures, original research projects, archival development, commemorative efforts, and a related array of mediums, including visual art, design, film, digital projects, and other creative approaches.

BA EN: S

L40 SOC 4610 Seminar in Selected Topics in Learning & Memory: Collective Memory

This course provides an overview and analysis of phenomena of people remembering as part of a group - one's country, one's state, one's university, one's family. Collective memories are critical for one's identity, for knowing who we are and how to interpret the world around us. We will consider narcissistic tendencies of group memories in specific contexts (e.g., the Russian vs. American interpretation of world events; views of Trump supporters vs. Biden supporters on events in the United States). The course will range from humanistic, anthropological, psychological, and sociological perspectives on memory.

Prerequisites: Psych 100B and either Psych 221, Psych 360, or Psych 380, or permission of the instructor.

Same as L33 Psych 461

Credit 3 units. BU: BA

L40 SOC 470 Interdisciplinary Topics: Modeling Cultural Systems

Various interdisciplinary topics are explored that may include the humanities, social sciences and data sciences.

Same as L93 IPH 470

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L40 SOC 4720 Race, Reproduction, and Justice

Reproduction is biological, economic, political, and social. Of course, individuals reproduce, but when, how, why, and with whom we do (or do not) is also a matter of public policy and social concern. Drawing on readings from sociology, law and other fields we engage continually with these key questions: Why is reproduction an important site through which to understand sociology? How do statuses such as race, class, gender, sexuality, and ability influence people's reproductive possibilities? How have communities supported or resisted efforts at reproductive control? Why is reproductive justice central to these answers? We review theoretical pieces, empirical research, media and more to explore the answers. This course primarily focuses on the US but will expose students to global reproductive concerns. Class sessions include lecture, in-class discussion and online discussion, media analysis and other activities. This upper-level seminar presumes an understanding of the basic concepts in sociology such as sociological imagination and social construction.

Credit 3 units. A&S IQ: SSC, SC

L40 SOC 4810 Global Structures and Problems

This course examines social problems around the world and their relationship to globalization — that is, the increasing connectedness of social and economic life across borders. Students will investigate a range of these problems — such as environmental degradation, labor exploitation, human rights abuses, ethnic conflict, poverty, and inequality — and these issues' links to both personal experiences and larger social structures. The course is premised on the idea that to understand current global social problems, one must understand the evolution of markets, states, civil society and social movements, gender hierarchies, ethnic categories, and global governance over the past century.

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC, SSP BU: BA, IS EN: S

L40 SOC 4900 Capstone Paper for Sociology Majors

This course requires students to carry out an independent research and writing project pertaining to the material covered within the student's choice of an associated 300- or 400-level class that they have successfully completed prior to this Capstone course — or such a course in which the student is currently enrolled. Student work will be supervised and evaluated by the faculty member who instructed or is instructing the course on which this paper is written. Registration may be concurrent with the associated course or after the course is completed. Successful completion of this paper satisfies the capstone requirement for the Sociology major. Students will normally enroll in the minimum one credit required to fulfill the capstone requirement, but students may register for up to three credits with the approval of their faculty supervisor. This course is open to Sociology majors only. Students should obtain faculty approval for their sponsorship and proposed paper topic well in advance of course registration. Students will register for the section assigned to their respective faculty supervisor. Prerequisite: approval of faculty supervisor and upper-level class standing at the time of enrollment.

Credit variable, maximum 3 units.

L40 SOC 4901 Sociology Honors Thesis

The Honors Thesis program is a two-semester sequence of coursework that aids students in developing, designing, executing, and producing original research within the field of sociology. Successful completion of this sequence and the thesis product is required for a student to be eligible for Latin Honors in Sociology. In the fall term, students will participate in a seminar-style course centered upon research design and obtaining needed approvals for carrying out their proposed project. In the spring term, students will be supervised by faculty mentors in an independent study as they carry out their research, analyze their findings, construct the thesis document, and defend their work in a formal defense. Students may be required to share their work in additional venues, such as departmental symposiums or institution-wide undergraduate research events. Successful completion of both terms of coursework and completion of a defensible thesis paper satisfies the capstone requirement for the sociology major. Additionally, students may count three of the six-credit sequence's hours toward the major's upper-level requirements. Open to sociology majors only. Students who are interested in the thesis program should contact the department's Director of Undergraduate Studies and/or the Academic Coordinator — as well as their planned faculty mentor(s) — prior to their planned enrollment. Prerequisite: consent of instructor and faculty mentor(s).

Credit 3 units. A&S IQ: SSC EN: S

L40 SOC 4910 Internship in Sociology

Students may receive up to 3 units of credit for an approved, faculty-sponsored internship that relates to the study and application of sociological material. To fulfill the major's capstone requirement, students must enroll in no less than 2 credit units and complete at least 90 approved hours at their internship site, in addition to constructing an academic product to be submitted to and evaluated by their faculty advisor. Specific academic and work requirements will be set by the faculty supervisor in consultation with the student's supervisor at the organization where the internship work is completed. Students must complete and submit an Internship Learning Agreement prior to their course enrollment and no less than two weeks after beginning at their internship site. This course is open to sociology majors and minors only. Student should register for the section assigned to their faculty supervisor. Prerequisites: The completion and submission of the department's Internship Learning Agreement and the approval of faculty and internship site supervisors. Credit variable, maximum 3 units.

L40 SOC 4920 Teaching Practicum in Sociology

Students may receive up to 3 units of credit for work assisting in course instruction, tutoring, and preparation of course materials under the supervision of a faculty member. This course may fulfill sociology major requirements with the permission of one's advisor and/or the Director of Undergraduate Studies. Students may enroll in this course multiple times, but may only receive program credit once. Register for the section assigned to the faculty supervisor. Open only to students who have been approved and assigned to work as a departmental course assistant. Please contact the department's Academic Coordinator for additional details. Credit variable, maximum 3 units.

L40 SOC 4930 InVisible St. Louis: People, Place, and Power in the Divided City

This course approaches the study of segregation and inequality in St. Louis as deeply relational and contextual — that is, embedded in a particular space and place and constituted through social-political relations. Students will be immersed in the history, theory and contemporary academic debates surrounding inequality, segregation, and social justice initiatives in urban cities across the United States. The course pairs this theoretical base (conceiving of segregation as multifaceted and durable, historical, spatial, and interpersonal) with intensive research experiences drawing on the methodological tools available across sociology, urban design, and architecture (archival research, data collection, mapping, diagramming, interviewing, field observation). Students will initiate collaborative research projects aligning with the needs of local organizations that serve the city's historically disadvantaged populations. Local guest speakers (scholars, community leaders, residents) will enhance students' classroom learning, as will site visits and other discussion formats. This interdisciplinary course bridges the Department of Sociology and the Sam Fox School of Design and Visual Arts, a collaboration supported by The Divided City initiative.

Same as ISU INTER D 4930

Credit 3 units. A&S IQ: SSC, SC BU: BA EN: S

L40 SOC 4950 Research in Sociology

Students will conduct independent research on a sociological topic as directed by a faculty member within the Department of Sociology. The student and the supervising professor will agree in writing on the course goals, requirements, readings, assignments, meeting schedule, and evaluation criteria. The written agreement must be submitted to the department's academic coordinator and approved by the director of undergraduate studies before registration will be authorized. Students may take the course for up to 3 credit units, and, with the approval of the supervising faculty member, the course may be repeated. However, this course may be taken for program credit no more than twice (for a maximum of 6 credit units), depending on the student's status as a major or minor. Credit variable, maximum 3 units.

Spanish

Speaking Spanish is the key to unlocking the cultures, traditions and experiences of 20 different countries throughout the world. From the medieval knights and Don Quixote to the modern novels by prize-winning authors and the world of film, the Spanish faculty of the Department of Romance Languages and Literatures guides Spanish students into the unexpected territories of Europe and Latin America, which are as rich geographically as they are culturally. Students who major and minor in Spanish graduate with top-notch communication skills. Our students speak Spanish and they speak culture, both of which are valuable professional skills today. The exponential growth of the Spanish-speaking population in the United States, the constant presence of Latin America at the top of America's political and business agenda, and the continued lure of Spain as a gateway to Europe and parts of Africa make speaking Spanish and the ability to interpret the cultures of Spanish-speaking countries two of the most profitable and enjoyable skills that one can acquire.

Study abroad opportunities complement our courses in St. Louis, and these include summer programs in Peru and Spain and semester programs in Chile and Spain. In addition, our Spanish program is linked to volunteer opportunities with the Latino community in St. Louis. For more information about the Spanish major and minor (<https://rl.wustl.edu/spanish/>), visit our website.

Faculty

For a list of affiliated faculty, please visit the Department of Romance Languages and Literatures faculty page (p. 1015).

Majors

The Major in Spanish

Total units required: 30

The Spanish major requires a minimum of 30 units at the 300 level or above, 24 units of which must be taken in residence. Study within Washington University's own study abroad programs in Spain or Chile is considered "in residence."

Required Courses

The following courses must be included in the 30 units:

Cultures and Communications in the Spanish-Speaking World

- Span 302 Cultures and Communication in the Spanish-Speaking World (Heritage speakers of Spanish must be certified by the director of undergraduate studies and enroll in Span 3021 Language and Culture for Heritage Speakers of Spanish.)
- Span 303 Cultures and Communication in the Spanish-Speaking World II

For students in the older sequence, Span 307D is equivalent to Span 302, and Span 308E is equivalent to Span 303. Students who completed Span 307D but not Span 308E must take Span 303. Students who completed Span 308E must proceed to the "Debating Cultures" courses.

Span 303 is a prerequisite for any other 300-level literature course in Spanish.

Two "Debating Cultures" Courses (6 units)

- Courses designated as Spanish 32xx
- Study abroad options*:

Code	Title	Units
Span 354	A View from the Southern Cone: Perspectives on Art, Literature and Culture	3
Span 3341	Literatura Espanola	3
Span 3361	Spanish-American Literature II in Chile/Spain	3
Span 350	Topics in Spanish Literature	3

* One literature course taken in the Chile or Spain semester abroad program offered by Romance Languages and Literatures, designated as an acceptable substitute, may be used as one of the 32xx-level courses.

Two "Researching Cultures" Courses (6 units)

- Courses designated as Spanish 36xx
- Study abroad options*:

Code	Title	Units
Span 3181	Spanish Culture and Civilization	3
Span 311	Hispanic Culture and Civilization I	3
Span 313	Chilean Contemporary Culture	3

* 32xx and 36xx designations indicate sequential levels. Once a student takes a course at one level, they may not take a course at the previous level.

Two 400-Level Seminars (6 units)

Code	Title	Units
Span 405W	Major Seminar	3
Span 410	Major Seminar	3

- Other 400-level literature and/or culture courses taught in Spanish
- One of the following linguistics seminars may be substituted for one of the two 400-level literature seminars:

Code	Title	Units
Span 411	Advanced Grammar and Syntax	3
Span 417	Spanish Phonetics, Phonology and Dialectology	3

- Prerequisites for 400-level courses include the completion of at least two of the following courses: Span 341, Span 342, Span 343, Span 370, and Span 380; or the completion of at least one "Researching Cultures" class.
- Study abroad:
 - One 400-level seminar taken on campus
 - An approved 400-level course from the Madrid or Chile program (refer to the study abroad guidelines (<https://rl.wustl.edu/study-abroad-opportunities/>) on the Romance Languages and Literatures website)

Two Elective Courses (6 units)

Code	Title	Units
Span 202	Intermediate Spanish II	3
Span 324	Conversation in Cinema (Span 324 is the only University College course that can count as elective credit for the major and minor)	3
Span 331	Hispanic Art/Arte Hispano	3
Span 351	Business Spanish	3

Span 353	Medical Spanish	3
Any other advanced 300- or 400-level Spanish (L38) class taught by a Romance Languages and Literatures faculty member		

- Only one elective course taught in English may be taken, when available, for the major.
- Study abroad:
 - Span 322 Advanced Conversation in Spain
 - Elective credit from semester programs in Santiago or Madrid
 - Elective credit from Petitioned, Organization for Tropical Studies, School for International Training, or Comparative Literature programs (refer to the study abroad guidelines (<https://rl.wustl.edu/study-abroad-opportunities/>) on the Romance Languages and Literatures website)
 - Elective credit from the Latin American Studies summer program in Peru (either "Governance, Ethnicity, and Development in the Andean Region" or "Public Health, Healing, and Traditional Medicine in the Andean Region")
 - Spanish courses completed (and approved) from study abroad programs other than those offered at Washington University may be used for Spanish elective credit only.
 - All study abroad credit requires authorization from the director of undergraduate studies.

Other Requirements

To declare the Spanish major, a student must first file an "Intent to Major" form on WebStac. The student must then request an appointment with the director of undergraduate studies in Spanish for review and approval of their major program.

- Major requirements have been revised as of 2021. Students in the graduating class of 2024 or earlier may follow the previous requirements listed at the end of this section or opt to follow the new requirements.
- Under the new requirements, to major in Spanish, students must take a minimum of 30 units, starting with Spanish 202; 24 of these units must be taken in residence at Washington University, with Washington University's study abroad programs in Spain or Chile being considered "in residence."
- Under the old requirements, to major in Spanish, students must take a minimum of 30 units (double majors: 27 units) at the 300 level or above, 21 units of which must be taken in residence. Study in Washington University's study abroad programs in Spain or Chile is considered "in residence."

- Students must complete all courses with grades of B- or above and maintain a B average or better overall in Spanish. Courses taken credit/no credit (pass/fail) do not count toward the Spanish major.
- Transfer students with an advanced level of Spanish and native/heritage speakers need to be certified by the director of undergraduate studies prior to declaring the major.

Recommended for prospective teachers:

1. A second language
2. Span 466, Span 467, Span 469, Span 413, Span 417 and Span 411
3. A semester or year in Spain or Chile

Recommended for prospective graduate students:

1. A second language related to the student's area of interest
2. Advanced work in other literatures, literary criticism and theory, and related course work in other literature or film programs
3. A year in Spain or Chile
4. Senior honors by thesis or course work (refer to the honors requirements (<https://rl.wustl.edu/degree-details-and-requirements/>) on the Romance Languages and Literatures website). Students who have maintained a minimum cumulative grade-point average of at least of 3.65 through the end of the junior year are encouraged to work toward Latin honors (i.e., cum laude, magna cum laude, or summa cum laude).

Minors

The Minor in Spanish

Total units required: 18

The Spanish minor requires the completion of 18 units, 12 of which must be taken in residence. Students must complete courses with a grade of B- or higher and maintain a B average or better overall in Spanish. Courses taken on a pass/fail basis do not count toward the Spanish minor.

Required Courses

Cultures and Communications in the Spanish-Speaking World (6 units)

- Span 302 Cultures and Communication in the Spanish-Speaking World (Heritage speakers of Spanish must be certified by the director of undergraduate studies and enroll in Span 3021 Language and Culture for Heritage Speakers of Spanish.)
- Span 303 Cultures and Communication in the Spanish-Speaking World II

Spanish 303 is a prerequisite for all 300-level literature and culture courses in Spanish. For students in the older sequence, Span 307D is equivalent to Span 302, and Span 308E is equivalent to Span 303. Students who completed Span 308E must proceed to the "Debating Culture" courses (32xx).

Three "Debating Cultures" and/or "Researching Cultures" Courses

One or two "Debating Cultures" courses (3-6 units):

- Courses designated as Spanish 32xx
- Study abroad options*:

Code	Title	Units
Span 354	A View from the Southern Cone: Perspectives on Art, Literature and Culture	3
Span 3341	Literatura Espanola	3
Span 3361	Spanish-American Literature II in Chile/Spain	3
Span 350	Topics in Spanish Literature	3

* One literature course taken in the Chile or Spain semester abroad program offered by Romance Languages and Literatures, designated as an acceptable substitute, may be used as one of the 32xx-level courses.

One or two "Researching Cultures" courses (3-6 units):

- Courses designated as Spanish 36xx
- Study abroad options*:

Code	Title	Units
Span 3181	Spanish Culture and Civilization	3
Span 311	Hispanic Culture and Civilization I	3
Span 313	Chilean Contemporary Culture	3

* 32xx and 36xx designations indicate sequential levels. Once a student takes a course at one level, they may not take a course at the previous level.

One 400-Level Seminar

Code	Title	Units
Span 405W	Major Seminar	3
Span 410	Major Seminar	3

- Other 400 level literature and/or culture class taught in Spanish
- One of the following linguistics seminars may be substituted for one of the two 400-level literature seminars:

Code	Title	Units
Span 417	Spanish Phonetics, Phonology and Dialectology	3
Span 4111	Advanced Grammar and Syntax in Spain	-4

- Prerequisites for 400-level courses include the completion of at least two of the following courses: Span 341, Span 342, Span 343, Span 370, and Span 380; or the completion of at least one "Researching Cultures" class.
- Study abroad:
 - One 400-level seminar taken on campus
 - An approved 400-level course from the Madrid or Chile program (refer to the study abroad guidelines (<https://rl.wustl.edu/study-abroad-opportunities/>) on the Romance Languages and Literatures website)

Courses

Visit online course listings to view semester offerings for L38 Span (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L38&crslvl=1:4>).

L38 Span 101 Elementary Spanish I

Beginning language program stressing acquisition of spoken ability together with attention to the development of reading, writing and listening skills. In addition to three hours of class, students complete weekly, assessed independent learning activities with multimedia resources.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L38 Span 102 Elementary Spanish II

Second semester of the beginning language program stressing acquisition of spoken ability together with attention to the development of reading, writing and listening skills. In addition to three hours of class, students complete weekly, assessed independent learning activities with multimedia resources. Prerequisite: Span 101D or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L38 Span 201E Intermediate Spanish I

The first half of a two-semester intermediate-level sequence. Reviews basic knowledge and introduces advanced skills in grammar, reading, writing, culture and vocabulary. Prerequisite: Span102D, or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L38 Span 202 Intermediate Spanish II

The second half of a two-semester intermediate-level sequence. This class continues to review basic knowledge and to introduce advanced skills in grammar, reading, writing, culture and vocabulary. Prerequisite: Span201E or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L38 Span 223 Intermediate Spanish Conversation and Culture

Practice of spoken Spanish and expansion of vocabulary in a wide range of topics. Discussion and role play based on short readings, music and film. Use of the World Wide Web for up-to-date news and culture. Oral presentations and limited writing. Prerequisite: 201D or equivalent. Concurrent enrollment in Span 307D recommended.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L38 Span 299 Undergraduate Independent Study

Prerequisites: Span 201D and permission of the department. Credit variable, maximum 3 units.

L38 Span 302 Cultures and Communication in the Spanish-Speaking World

This course is the first part of a two-semester advanced-level sequence. Through the study of a variety of media (i.e., written, visual, aural, and digital), students will develop linguistic and cultural competence and gain a general understanding of contemporary issues of interest in Spain, Latin America, and the United States. Discussion of a wide array of cultural and linguistic materials will serve as the basis for an exploration of the diversity of the Spanish-speaking world. The course focuses primarily on speaking skills. It is designed to prepare students to proceed to higher-level Spanish courses and to build written and oral proficiency. This course replaces Span 307D and is a prerequisite for several study abroad programs. Prerequisite: Span 202 or placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM, IS EN: H

L38 Span 3021 Language and Culture for Heritage Speakers of Spanish

This course offers an approach to the linguistic and historical study of different cultural productions in various Spanish-speaking communities in the United States and other Spanish-speaking countries. The materials and structure of the course are designed for students whose cultural roots are, to some degree, Latin and who have grown up in Spanish-speaking environments, so course materials focus on autobiography and identity. This course offers students a multidisciplinary way of working at points where linguistic and literary analysis runs parallel to other forms of cultural production and to the historical narrative of Latinx culture in the United States. Prerequisite: placement by examination.

Credit 3 units. A&S IQ: LCD, LS BU: HUM, IS EN: H

L38 Span 303 Cultures and Communication in the Spanish-Speaking World II

This course is the second part of a two-semester advanced-level sequence. Through the study of a variety of media (written, visual, aural, and digital), students will develop linguistic and cultural competence and gain a general understanding of contemporary issues of interest in Spain, Latin America, and the US. Discussion of a wide array of cultural and linguistic materials will serve as the basis for an exploration of the diversity of the Spanish-speaking world. Course content is organized thematically into five units: Youth Cultures, Food Culture, New Indigeneity, Environment, and Public Health. The course focuses primarily on writing skills. It is designed to prepare students to proceed to higher-level Spanish courses and to build written and oral proficiency. Prerequisite: Spanish 302, 3021 or 307D. Fromm Ayoroa in charge.

Credit 3 units. A&S IQ: LCD, LS BU: IS EN: H

L38 Span 308E Advanced Reading and Writing

In depth study of the process of advanced reading and writing designed to prepare the Spanish major for upper-level courses. Literary texts studied as examples of writing styles. Regular compositions. Prerequisite: Span 307D or placement by examination. Conducted in Spanish.

Credit 3 units. A&S IQ: LCD, LS BU: HUM EN: H

L38 Span 310 Advanced Intermediate Spanish in Spain

Continued study of Spanish grammar and syntax at Washington University's Madrid Carlos III University Program. A course designed for non-native speakers of Spanish, to refine communicative abilities in all four skills. Prerequisite: placement by exam at Carlos III.

Credit variable, maximum 4 units.

L38 Span 311 Hispanic Culture and Civilization I

Study of aspects of the political, social and cultural life of contemporary Spain and Portugal and their historical development. Class discussion; readings with compositions. Conducted in Spanish. May be repeated for credit. Prerequisite: Span 201D.

Credit 3 units. A&S IQ: HUM, LCD Art: HUM BU: BA EN: H

L38 Span 313 Chilean Contemporary Culture

This two-week course provides a panoramic view of Chilean contemporary culture, focusing on the years from 1988 to the present. We examine the representation of current issues in literature, the arts and the media, and study topics such as governmental institutions, the constitution of 1980, the economy, the role of the Catholic Church, public policy concerning culture, etc. The course meets three hours a day, and there are several guest lecturers. Conducted in Spanish. Requirements: two short papers, short reports in class of the news or a cultural activity students have attended, and participation in class discussions. Course includes an all-day cultural excursion on Saturday, which features a visit to one of Neruda's houses, a history museum, etc.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L38 Span 317 Advanced Spanish Language in Chile/Spain

Continued study of Spanish grammar and syntax at Washington University's program in Chile or Spain. A course designed for non-native speakers of Spanish to refine mastery of difficult uses and structures in all four skills. Prerequisite: placement by exam or program director.

Credit variable, maximum 4 units.

L38 Span 3181 Spanish Culture and Civilization

This course is intended to acquaint students with important aspects of Spanish culture, including history, civilization, society, politics and the arts, dating from the first invasions of the Peninsula to the present. Students gain an awareness of the ethnic, cultural and aesthetic diversity of Spain as a country of multiple autonomous regions, by working with written texts and other media and by visits to various locations. The broader aim of the course is to enable students to engage with and to analyze Spanish culture from an intellectually critical perspective and knowledge of its sociohistorical distinctiveness. Requirements

include active participation within all classes and excursions, presentations and various written assignments. This course is taught in Madrid, as part of the Washington University Carlos III Program. Conducted in Spanish.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM BU: IS EN: H

L38 Span 3200 Debating Cultures: Latin(x) America in the Streets

So much of life in Latin America -- and in many Latinx communities across the United States -- happens in public space: in the streets, to be precise. Picture street food vendors in Mexico City, outdoor produce markets lining squares across Lima, Rio de Janeiro's world-famous carnival celebrations, or politicians addressing thousands in Buenos Aires's Plaza de Mayo. Economic transactions, social interactions, political legends and mass political movements, religious processions, festivals and spectacles, and public art all depend on the streets. In this course, we will focus on the incredible diversity of activities that define and give meaning to public life in Latin America and the Latinx diaspora. This course will have a strong, mandatory and graded oral communications component, and it is taught in Spanish. Prerequisite: Span 303 or Span 308D. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, LS, SC Arch: HUM Art: HUM BU: IS EN: H

L38 Span 3202 Debating Cultures: How Spanish Works

This course offers an introduction to the study of the Spanish language as a science. It focuses on the main linguistic subsystems: the sound system (phonetics and phonology), the formation and use of words (morphology), and the formation and structure of sentences (syntax). When working with each linguistic subsystem, students are provided with opportunities to reflect on and improve their own abilities in Spanish, such as with regard to how mood (indicative versus subjunctive) and aspect (preterit versus imperfect) work in the Spanish verbal system. Similarities and differences between Spanish and other languages, such as English, are highlighted. The course also provides students with an introduction to the history of Spanish in its evolution from Latin as one of many Romance languages (a diachronic view) and an exploration of various regional varieties of Spanish today (a synchronic view). The goals of the course include understanding linguistics and Hispanic linguistics as cognitive sciences; understanding language acquisition and use as neural processes; disentangling linguistic rules and linguistic variation from pedagogical rules and stigmatization; and applying one's knowledge of linguistics in general and Hispanic linguistics in particular to practical issues and challenges. This course will have a strong, mandatory and graded oral communications component, and it is taught in Spanish. Prerequisite: Span 303 or Span 308D. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: IS EN: H

L38 Span 3203 Debating Cultures: Extraordinary Lives

This course studies Latin America through the lives of its people. We will take biographies as sites where individual dreams and struggles intersect with global, national, and local structures of power and cultural flows. Through various cultural objects and media (film, literature, music, and social media),

we will approach the extraordinary yet everyday *luchas* of Latin Americans in cities and rural areas. We will contextualize each life within the region's political, economic, racial, and gender historicities. The biographies we will discuss may include but are not limited to domestic workers, taxi drivers, street vendors, wrestlers, musicians, folklore dancers, college students, rural teachers, political and ecological activists, influencers, indigenous YouTubers and filmmakers, LGBTQIA+ communities, and transnational immigrants. This course will have a strong, mandatory and graded oral communications component, and it is taught in Spanish. Prerequisite: Span 303 or Span 308D. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, LS, SC Arch: HUM Art: HUM BU: IS EN: H

L38 Span 320Y Debating Cultures: Mediated Politics in Argentina, Chile, and Uruguay

This course explores the intertwined history of media, culture and political struggle in the region known as the Southern Cone, which encompasses Argentina, Chile and Uruguay. We will discuss the role that media have had in shaping the experience of modernity as well as fostering nation formation in these countries. The course will address the political uses of different types of media, covering a wide spectrum of cultural production (literature, music, comic, political cinema, television, internet) and following a long-term chronological approach, from 19th-century print media to recent YouTube production. In doing so, the course engages with questions of technology, identity, memory, gender, indigenous, and working-class cultures, and it draws special attention to the possibilities and limits that grassroots movements found in different types of media. Course materials may include the Argentine comic "Mafalda," the Afro-Uruguayan newspaper "Nuestra Raza," and Rodolfo Walsh's non-fiction literature, as well as telenovelas and indigenous radio. As part of the course, students will engage in active research on the interplay of media and political struggle in the region. This course will have a strong, mandatory and graded oral communications component, and it is taught in Spanish. Prerequisite: Span 303 or Span 308D. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, LS, SC BU: BA, IS EN: H

L38 Span 3210 Debating Cultures: Representations of Gender Violence in Modern Iberian Literatures and Cultures

The landmark law against gender violence in Spain, which was passed under the Socialist government in 2004, became the rallying point for feminist activists, even as it generated a vigorous backlash from among conservative sectors of Spanish society. More recently, the "La Manada" gang rape case in Pamplona in July 2016 provoked national outrage, and, together with the #MeToo and the #NiUnaMenos movements in the United States and Latin America, a global feminist movement was mobilized to protest sexual assault, femicide, and all other forms of gender-based violence. We will consider the works of 19th-century through present-day Spanish women writers, journalists, and filmmakers, including Emilia Pardo Bazan, Carmen de Burgos, Rosa Montero, Carme Riera, Lucia Etxebarria, Isabel Coixet, Iciar Bollain, and Roser Aguilar, who have spoken out against gender violence in a variety of fora. Their works will serve as points of departure for exploring the social and cultural causes and dynamics of gender-based

violence as well as the ways in which Spanish women have responded to this problem in their writings, film, and other forms of representation. Our analysis will be informed by the larger historical framework of the development of feminism in Spain as well as by the recent global movement against gender-based violence. Course assignments will consist of daily readings, film viewings, group oral presentations, quizzes, discussion forum posts, and a final project that is orally based; students are also expected to engage actively in class discussions and in small group work. This course will have a strong, mandatory and graded oral communications component, and it is taught in Spanish. Prerequisite: Span 303 or Span 308D. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, LS, SC Arch: HUM Art: HUM BU: BA, IS EN: H

L38 Span 3211 Debating Cultures: Inclusion & Expulsion, Memory, and Erasure in the Hispanic World

In this course, we will analyze and discuss the ways in which the Hispanic world has lived, regulated and represented its great religious and cultural diversity. As we progress in our understanding of these multifaceted and varied responses, we will examine the two most important ethical choices that the Hispanic peoples of both sides of the Atlantic Ocean have had in front of them at different points in time: (1) the choice between inclusion and exclusion; and (2) the concerted decision to either memorialize or forget history and the consequences of having chosen to exclude or include certain individuals, ideas, religions or cultural aspects of society. The consideration of these two choices -- as they appear represented in laws, texts and images -- will help us acquire the ability to better understand the challenges and dilemmas that the various Hispanic peoples have encountered in the past and the decisions they continue to make in the present moment when confronted with diversity. Each module of this course will be anchored by an official document or policy that rubber stamped the decision to include, exclude, remember, or forget those who were different because of their origins, their religion, their language, their way of living, or their political choices. Examples of these laws or decrees are the Capitulations of Granada, the Edict of Expulsion of 1492, the New Laws of the Indies, the laws of land confiscation of the 19th century, the persecutions and censorship of the dictatorial regimes in both Spain and Latin America, and the recent Spanish law for the recovery of historical memory. Also, each module will begin in the past and end in the present, with an exploration of the contemporary consequences of those laws and policies. These diachronic studies will contribute to inform the analysis of both social issues and cultural artifacts, and they will enrich the class presentations and discussions. This course will have a strong, mandatory and graded oral communications component, and it is taught in Spanish. Prerequisite: Span 303 or Span 308E. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, LS, SC Arch: HUM Art: HUM BU: ETH, IS EN: H

L38 Span 3212 Debating Cultures: Latin American Soundscapes

This course explores Latin America through its sound cultures from the beginning of the 20th century to the present. Diving into aural, literary, and scientific archives, we will discuss how sound produces meaning beyond visual and written cultures, articulates experience, and mobilizes political and cultural change. We will study sound, beats, speech, music, and noise through various cultural objects and media (novels, poems, essays, anthropological studies, journalism, films, radio, records, and digital cultures). We will contextualize these objects in the region's political, economic, racial, and gender historicities. We will examine the interplay of national identity, popular culture, aurality, and modernity in a variety of case studies: folklore (national and American folkloric missions), indigenista operas, indigenous radio and shamanism, the Latin American new song movement (the 1960s and 1970s), rock and youth cultures, cumbia, reggaeton, avant-garde and slam poetry, and the noises of Latin American megacities and protests. This course will have a strong, mandatory and graded oral communications component, and it is taught in Spanish. Prerequisite: Span 303 or Span 308D. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, LS, SC Arch: HUM Art: HUM BU: IS EN: H

L38 Span 3213 Debating Cultures: Redes/ Networks: Digital Cultures in 21st-Century Spain

This is a discussion-based course that examines from interdisciplinary and collaborative perspectives the new digital cultures emerging in Spain during the first two decades of the 21st century. Shaping and connecting an innovative series of creative, political, artistic, and social "redes" or networks, the emergence of new digital media has radically changed the cultural forms produced and circulated in Spain today. How do these different digital networks function, in what ways are these redes formed, and to what extent have they changed the material, ideological, and social ramifications of culture in the 21st century? The course explores a wide range of cultural materials specifically connected to particular redes or digital networks emerging in Spain in the last two decades. The materials studied will range from digital literatures--such as poetry (Alex Saum-Pascual), graphic novels (Fernandez Mallo), alternative forms of literary and cultural journalism--to music (Rosalía), visual arts (Varvara & Mar), cinema (Chus Gutierrez, digital shorts from notodofilmfest), as well as the generation of new forms of social activism (such as the #8M feminist movement) and alternative political communities (15-M). We will also examine in particular the role of new media platforms (YouTube, WhatsApp, Facebook) in the contemporary production and circulation of digital culture. Students will have a strong, mandatory and graded oral component. Course taught in Spanish. Prereq. Spanish 303 or 308D. Students who have already taken more than two Spanish culture or literature classes (at the SPA 320 level) must proceed to a Researching Cultures class (SPA 360 level).

Credit 3 units. A&S IQ: HUM, LCD BU: BA

L38 Span 3214 Debating Cultures: Migration in the Spanish-Speaking World

In this course we will study how migration shapes and transforms societies, cultural products and practices in the Spanish-speaking world. We will explore questions pertaining to border crossing, displacement, identity, and community in different historical periods and in diverse geographical contexts. We will move chronologically and thematically and also pay close attention to the different ways in which our authors choose to tell their stories. The course is divided into 10 sections that correspond to specific places, both real and imagined. Prereq: Span 303 or Span 308E. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class. 3 units.

Credit 3 units. A&S IQ: HUM, LCD, SC BU: IS

L38 Span 3215 Debating Cultures: Love, Actually: (Re)Imagining Love in Latin American and Latinx Literature

If you are inclined to trust the polls, according to a worldwide survey conducted by Gallup in 2014, Latin Americans are the most emotional people on the planet. In this course we will test this assertion by critically exploring one of the most intense and complex of human emotions: love. We will look at multidimensional and contradictory facets of love—from passion, desire, and happiness to solitude, betrayal and revenge, from family blood ties to bonds of community and patriotism, from motherhood to miscegenation—as they are reimagined in a wide range of 20th and 21st century literary works, performances, films, artwork, music, and popular culture from across Latin American and Latinx diasporic communities. Love as affect and existential experience invariably intersects and becomes interwoven with such important dimensions of the socio-historical framework as ethnicity, class, gender, sexual identity, nationality, exile, and spirituality. In addition to poems, essays and short narratives by authors representing several Latin American countries and their diasporas (Neruda, Mistral, Quiroga, Storni, Benedetti, Garro, Castellanos, Fuentes, Morejón, Poniatowska, Ocampo, Borges, Cortázar, Bobes, Bahr, Vega Serova, Paz Soldán, Obejas, and Meruane, among others), we will examine academic research on the subject of love, blending insights from psychology, sociology, history, anthropology, religion studies, neuroscience, and philosophy. This focus on interdisciplinary approaches will encourage students to seek their own insights grounded in their experiences and areas of expertise and to perceive love as a complex human condition that encompasses a plurality of socio-cultural expressions and unique individual relationships. This course is conducted in Spanish and has a strong, mandatory and graded oral component. Prereq. Spanish 303 or 308E. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, SC BU: BA, IS

L38 Span 3216 Debating Cultures: Afro-Latin Americans in Film and Television

This course explores the representation and self-representation of Latin Americans of African descent in film and television. We will discuss, among other things, slavery, race, politics of representation, agency, and Afro-Latin American culture, history, and religion. Students will learn to analyze filmic art. The course will have a strong, mandatory and graded oral component. Students will watch two films and have two short

readings per week. Prerequisite: Spanish 303 or 308E. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, SC BU: BA

L38 Span 3217 Debating Cultures: Unveiling the Secrets of Fantasy, Magic, Mystery in Latin America

In this course we will explore a variety of Spanish American discourses (short fiction, essays, films, artwork) built around the unveiling of secrets, mystery, fantasy, and magic through the art of detection, whereby the reader or a viewer becomes engaged in the process of sleuthing, either alone or alongside the fictional figure of a detective. We will explore the creative and versatile ways in which Spanish American writers and artists make use of existing aesthetic paradigms—such as magical realism, literary gothic, fairy tales, science fiction, surrealism, film noir, and detective fiction, among others—as they adapt them to the diverse political, economic and socio-cultural realities of their countries. In many of these discourses, overarching themes of imagination, dreams, madness, criminality, and metaphysical search become intertwined with gendered sensibilities and heterogeneous perspectives profoundly embedded in socio-political realities. Some of the mysteries and crimes that often elude detection and punishment have to do with corruption and state-sanctioned violence, as it happens in the cases of systemic violence in Colombia, of the plight of the “disappeared” persons under the dictatorial regimes of the Southern Cone (Argentina, Chile), or the systemic corruption surrounding narcotrafficking. Authors to be studied include Borges, Ocampo, Cardenal, Casey, Quiroga, Valenzuela, Cortázar, Rulfo, Paz Soldán, Téllez, García Márquez, Schwablin, Dávila, Vega Serova, Benítez Rojo, Bahr, and Enríquez, among others. This course is conducted in Spanish and has a strong, mandatory and graded oral component. Prereq. Spanish 303 or 308D. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, SC BU: BA

L38 Span 3218 Debating Cultures: Youth and Counterculture in South America

This course will explore South American cultures from their most provocative and insurgent expressions, lifestyles, and identities. Focusing on the Andes (Peru, Colombia, and Bolivia) and the South Cone (Chile, Argentina and Uruguay) regions, we will study a conjunction of cultural producers that used their rebellious nature as part of their art. How did they represent the youth of their societies? How did they respond to the status quo? How have they used the flows of globalization, media, and revolution? By exploring literature, music, cinema, and performance, we will discuss the sociopolitical impact of these works, which includes poetry performances to punk albums. In addition, we will emphasize the role of the youth as producers and consumers, as opposed to the politics of adults and institutions. By covering the long sixties to the present, this course will discuss the transformation of these movements and subcultures and how they impacted the sociocultural processes of their regions, both nationally and transnationally. Prereq. Spanish 303 or 308D. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class.

Credit 3 units. A&S IQ: HUM, LCD, LS, SC Arch: HUM Art: HUM BU: BA, IS

L38 Span 3219 Debating Cultures: Broken Promises and Resilient Bregas: Snapshots of Puerto Rican Culture

The end of WWII and the advent of the Cold War brought heightened global attention to the Caribbean. While Cubans rid themselves of the Batista dictatorship, embraced socialism, and entered the USSR's realm of influence, Puerto Rico's importance for the U.S. as a showcase of capitalist modernization increased exponentially. Bad Bunny and reggaeton, Lin Manuel Miranda, and JLo wouldn't exist without the events and policies set in motion in Puerto Rico in the 1950s and 60s. This course will offer entry points into Puerto Rico's complex and often contradictory culture, with the goal that students develop a critical understanding of the leading social, political, and historical processes that have shaped the island's cultural production over the past 70 years. We will explore topics such as colonialism and neocolonialism, migration and diasporic communities, environmental and social justice, globalization and neoliberalism, and the intersection of race, class, gender, and identity formation. We will study works from island-born and Puerto Rican Diaspora cultural producers. Materials will include short stories and poems, films, podcasts, pop culture and sports icons, comics, performances, and historical essays. Prereq. Spanish 303 or 308D. Students who have taken more than two Spanish culture or literature classes are not allowed in this course and must proceed to a Researching Cultures class. Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: BA, HUM

L38 Span 322 Advanced Conversation in Spain

Designed to offer students with advanced skills in Spanish an opportunity to refine their ability to discuss a variety of topics. Various media such as films, television, newspapers and other modes of communication are used for oral presentations and some writing. Prerequisite: Span 301, 307D or 308E, or multiple 300-level courses. Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L38 Span 3220 Debating Cultures: How Spanish is Used

This course examines how the Spanish language is used in context with emphasis on variation across linguistic subsystems: the sound system (phonetics and phonology), vocabulary (lexis), sentences (morphosyntax), meaning (semantics), and language in use (pragmatics)-and Spanish applied linguistics. Module 1 includes a concise overview and review of basics about linguistics, Hispanic linguistics, the nature of each linguistic subsystem, the history of the Spanish language, and characteristics of present-day regional varieties of Spanish. Module 2 focuses on semantics and pragmatics, complemented by an exploration of variation in vocabulary throughout the Spanish-speaking world, such as how the English word "popcorn" may translate as palomitas, canguil, cancha, pochoclo, among various other options, depending on the Spanish-speaking region in question. Module 3 introduces students to sociolinguistics as applied to the Spanish-speaking world, beginning with key concepts such as sociolinguistic variable and concluding with student-led analyses of samples of Spanish day-to-day interactions, emphasizing the legitimacy and value of variation in light of what might be relegated as "standard." Module 4 explores a selection of other areas of Spanish applied linguistics, which include teaching Spanish as a second or heritage language and dual immersion programs with Spanish and English in the United States. Students in the course

are provided with opportunities to improve their own abilities in Spanish, such as regarding context-appropriate usage, and to apply their knowledge in practical ways to a range of issues and challenges related to the Spanish language today.

Credit 3 units. A&S IQ: LCD, SSC, SC Arch: SSC Art: SSC BU: HUM

L38 Span 3221 Debating Cultures: Media, Materiality and Cultural Production in Greater Mexico and the U.S.-Mexico

This course is an invitation to explore the complex mediatic landscape of Greater Mexico and the U.S.-Mexico borderlands throughout the nineteenth and twentieth century. What did an early Spanish-language press look like in the United States? What are the connections it holds with the United Farm Workers publications later in the twentieth century? How did these publications interact with other platforms, such as Spanish-language radio? What are the political and cultural implications of hearing or seeing in the present-day militarized border zone? These are just some of the questions that we will collectively attempt to answer as we approach the cultural and artistic practices of the region. The course will deal with print, visual and aural culture, and you will have the chance to explore material such as Spanish-language newspapers, border ballads, radio, performance art, digital art and activism, among many others. We will discuss issues like ethnic identity, language, race, citizenship and gender, as they intersect with cultural production and its mediativity. Moreover, you will become familiar with transnational frameworks for the study of culture, critically engaging with the work of border studies exponents such as Gloria Anzaldú and Américo Paredes. This overarching approximation of the nineteenth and twentieth centuries is meant to encourage a comprehensive understanding of the cultural processes of the borderlands: its fluctuations, as well as the continuities it maintains with present-day border culture.

Credit 3 units. A&S IQ: HUM, LCD, SC BU: IS

L38 Span 331 Hispanic Art/Arte Hispano

This course focuses on the most important movements, artistic expressions and its representatives of the art history of Latin America and Spain. From the Pre-Columbian art of the Mayas, Aztecs and Incas, to the syncretism of Post-colonial Latin American art, the Mexican Muralism and the self-reconstruction portraits of Mexican artist Frida Kahlo to the Chicano Art in the U.S.A. From the Medieval paintings of religious Spain, to the criticism of the Spanish nobility by Diego Velázquez, the Spanish Civil War of "Guernica" by Pablo Picasso, to the Surrealism of Salvador Dalí and Antonio Gaudí. The students will visit the St. Louis and the Kemper Art Museums. Prerequisites: Span 303 or Span 308E. In Spanish.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L38 Span 3361 Spanish-American Literature II in Chile/Spain

A survey of major Spanish-American literary works from the end of the 19th century to the contemporary period at Washington University's program in Chile or Spain. Prerequisite: Span 308E or the equivalent.

Credit 3 units. Art: HUM

L38 Span 341 Literary and Cultural Studies in Spanish

This course is an introduction to cultural and literary analysis within Iberian and Latin American cultures. The course covers a wide variety of materials that span different countries, historical periods, and various cultural and literary forms. The main objective of the course is to introduce students to key historical, geographical, and political aspects of these cultures, while at the same time applying different approaches of cultural analysis. The course is structured around key central concepts as they are particularly related to the cultures of the Iberian Peninsula and Latin America, such as nation; colonialism and postcolonialism; modernity and postmodernity; popular and visual media; and gender, race, migration, and social class. The course combines literary texts, films, and other cultural forms with the examination of introductory critical works related to the key concepts that will be explored throughout the semester. Prerequisite: Span 308E or concurrent enrollment in Span 303. Taught in Spanish. Credit 3 units. A&S IQ: HUM, LCD, LS, SD Arch: HUM Art: HUM BU: IS EN: H

L38 Span 342 Iberian Literatures and Cultures

Which cultures have shaped what Spain is today? This course explores the diversity of the Iberian Peninsula through its literatures and cultures. As part of both Mediterranean and Western Europe, the Iberian Peninsula has been shaped through a dynamic of conflict and negotiation among various cultures, languages, and religions. Students will engage themes such as internal colonization, imperialism, multiculturalism, regional identities, nation formation, migration, media and popular culture, modernization, and gender and race relations as they relate to our understanding of the country today. Topics may include but are not limited to the following: multiculturalism of the Middle Ages; the Muslim and Jewish presence in Spain; identity narratives and power relations; stage and performance traditions; and authors and artists like Cervantes, Galdós, García Lorca, Picasso, and Almodóvar. Prerequisite: Span 308E or concurrent enrollment in Span 303. Taught in Spanish. Credit 3 units. A&S IQ: HUM, LCD, LS, SD Arch: HUM Art: HUM BU: IS EN: H

L38 Span 343 Latin American Literatures and Cultures

How did Latin America become Latin America? This course explores the different inventions and reinventions of the region through its literatures and cultures. Beginning with the encounter of Europeans with America, students will engage themes like colonization and colonialism, urban and rural cultures, nation formation, modernization, media and popular culture, and gender and race relations. Authors studied may include Colón, Sor Juana, Sarmiento, Neruda, Borges, García Márquez, and Morejón. Prerequisite: Span 308E or concurrent enrollment in Span 303. Taught in Spanish. Credit 3 units. A&S IQ: HUM, LCD, LS, SD Arch: HUM Art: HUM BU: IS EN: H

L38 Span 351 Business Spanish

Study of language and structures used in conducting business in the Hispanic world. We use actual materials from various businesses — advertising, marketing, real estate, accounting. Particular stress on speaking and writing. Prerequisite: Span 308E or permission of instructor. Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L38 Span 353 Medical Spanish

Designed for future medical professionals, this course will provide students with a complete vocabulary and the cultural sensitivity necessary for treating Spanish-speaking patients. While the main focus is oral/aural communication, written exams, varied readings, and some research are required. Volunteer work is recommended for enrolled students. Advanced students will be given priority. Prerequisite: Span 307D or Span 302. Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L38 Span 354 A View from the Southern Cone: Perspectives on Art, Literature and Culture

This course deals with current issues of cultural, social, political and literary importance related to the Southern Cone. We study selected texts from Argentina, Chile and Uruguay as well as contemporary films and drama productions. This course seeks to determine what specifically can be expressed about national identity, globalization and the environment as these countries face the 21st century. Course requirements include four short essays and a final exam. This course is taught in Santiago, Chile, as part of the Washington University Chile Program. May be repeated for credit. Conducted in Spanish. Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH EN: H

L38 Span 355 Spanish for the Social Sciences

This is an advanced Spanish language course designed to develop conversational, writing, and listening skills for students in the social sciences. Students will learn and use the language in a content-based format, guided by culturally sensitive readings, discussions, and activities. Prerequisite: Span 307D or Span 302. Taught in Spanish. Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: HUM EN: S

L38 Span 360 Literature Topics Course in Spain

Taught through the Humanidades program of Carlos III University. Topics vary each semester. May be repeated for credit. Prerequisite: approval of Washington University's Madrid Program director and Carlos III. Credit variable, maximum 3 units. Art: HUM

L38 Span 3600 Researching Cultures: Film and Dictatorship in Argentina and Chile

In this course, we will explore the methods by which filmmakers from the Southern Cone of Latin America used film to engage, document, and remember the military dictatorships of the 1970s and 1980s. We will look at the development of protest cinema in the area, the use of documentary filmmaking and resistance, navigating censorship, and the use of film as a nation's memory as we study films for which directors and actors risked (and sometimes lost) their lives. We will accompany our study of film with historical readings, reports on human rights abuses, and theories on memory and trauma. This course will have a strong, mandatory and graded written communications component, and it is taught in Spanish. It also fulfills the Writing Intensive (WI) requirement for Arts & Sciences students. Prerequisite: Span 303 or Span 308D, and one (or preferably two) of the following: Span 341, Span 342, Span 343, Span 370, Span 380 or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar.

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM BU:
IS EN: H

L38 Span 3601 Cultural Studies Topics Course in Spain

Taught through the Humanidades program of Carlos III University. Topics vary each semester. May be repeated for credit. Prerequisite: approval of Washington University's Madrid Program director and Carlos III.
Credit variable, maximum 3 units.

L38 Span 3604 Researching Cultures: Making Latin America Popular

"Despacito," futbol, telenovelas: All of these are forms of Latin American popular culture that are increasingly part of our everyday reality here in the United States. All are also inseparable from stories of inequality, ethnic tensions and celebrations, understandings of gender relations, and notions of hope that blend ideas of nation with cultural consumption. While popular culture in Latin America is often considered a contemporary phenomenon linked to the 20th century and the mass production of cultural goods -- film, books, and music -- it has deeper roots. We can trace these back to the 19th century, where people, cultural processes, and phenomena literally began making Latin America popular. This course will survey the emergence and variety of modern popular culture in Latin America, from the 1800s to the present. Readings may include best sellers, gaucho poetry, stories of urban life and folk heroes, and materials engaging themes from dictatorship to contemporary Latinx experiences. We will learn about the intersections between race, nation, and music; explore the emotional and political power of futbol, along with the intense gender divisions it reveals; and delve into the appeal of telenovelas across socioeconomic divides. Historical and anthropological essays will also guide us throughout the semester. This course will have a strong, mandatory and graded written communications component, and it is taught in Spanish. It also fulfills the Writing Intensive (WI) requirement for Arts & Sciences students. Prerequisite: Span 303 or Span 308D, and one (or preferably two) of the following: Span 341, Span 342, Span 343, Span 370, Span 380, or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar.

Credit 3 units. A&S IQ: HUM, LCD, SC, WI Arch: HUM Art: HUM BU: ETH, IS EN: H

L38 Span 360Y Researching Cultures: Latin American Women Travelers

When we talk about "adventurers," "explorers," or "travelers," we tend to imagine them embodied in a masculine figure. In this course, we will focus on the limits of this idea of travel, analyzing travel as a gendered and racialized experience. Throughout the semester, we will study different types of mobility, travel, and travel literature created by Latin American women from the 19th century to the present, debunking the stereotypes of female immobility and immanence. From the Peruvian rabinos to the Mexican Revolution's soldaderas, from pleasure trips to forced exiles, we will read and examine the writings of Flora Tristan, Clorinda Matto de Turner, Victoria Ocampo, Clarice Lispector, Circe Maia, Cristina Peri Rossi, Samanta Schweblin, Cristina Rivera Garza, and Valeria Luiselli, among others. These different travelogues will serve as the basis for discussing the complexities of gender, race and social class in relation to travel, nation and literature. We will also discuss different theoretical

approaches, seeking to deepen and enrich our academic writing in the Spanish language. In this course, students will write two short compositions and a final research composition on the topic of their choice related to the course content. This course will have a strong, mandatory and graded written communications component, and it is taught in Spanish. It also fulfills the Writing Intensive (WI) requirement for Arts & Sciences students. Prerequisites: Span 303 or Span 308D, and one (or preferably two) of the following: Span 341, Span 342, Span 343, Span 370, Span 380, or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar.

Credit 3 units. A&S IQ: HUM, LCD, SC, WI Arch: HUM Art: HUM BU: BA, IS EN: H

L38 Span 3611 Researching Cultures: Urban Iberian Cultures -- Barcelona and Madrid

In this course, we will explore the various urban cultures of two paradigmatic cities in the Iberian Peninsula: Barcelona and Madrid. This is a research-focused course that examines from interdisciplinary and collaborative perspectives the urban spaces and cultures that have shaped the life of the dwellers of these two key cities, both across time and with a focus on the contemporary moment. While the founding of the city of Barcelona, the capital of Catalonia, dates back to the Roman empire (i.e., the first century BCE), the city of Madrid, the capital of Spain, was established during the 15th century around a small fortification developed during Al-Andalus, soon becoming the political center of the Spanish Empire during the 16th century. Through an examination of the urban development of both cities across time and the various contemporary urban spaces and cultures of the 21st century, this course will explore the ways in which writers (Jorge Carrion, Belen Gopegui, Julio Llamazares), musicians (Joan Manuel Serrat, Rosalia), visual artists (Pablo Picasso, Cristina Garcia Rodero, Angeles Santos Torroella), filmmakers (Jose Luis Guerin, Isabel Coixet, Chus Gutierrez) and architects (Juan de Villanueva, Antoni Gaudi) have reflected on and explored through their work in both cities. We will also explore the political and social relevance of both cities today as related to their own urban planning and development as well as their political relevance in both Catalonia and Spain as a whole. This course will have a strong, mandatory and graded written communications component, and it is taught in Spanish. It also fulfills the Writing Intensive (WI) requirement for Arts & Sciences students. Prerequisites: Span 303 or Span 308D, and one (or preferably two) of the following: Span 341, Span 342, Span 343, Span 370, Span 380, or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar.

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM BU: ETH, IS EN: H

L38 Span 3612 Researching Cultures: Afterlives, Ghosts, and Haunted Places

In this course, we will examine the historical, cultural and aesthetic implications of how different artists, filmmakers, and writers approach the afterlife in the Spanish-speaking world. We will explore experiences and emotions that can be deeply personal and intimate as well as shared and lived out in public. We will discuss how practices and beliefs vary widely across the Spanish-speaking world and explore how traditions and rituals are invented and how these change over time. While our readings will include a few works from earlier periods, most of the texts stem from the 20th and 21st centuries, allowing us also

to examine a number of historical events and their depiction in history and memory. We will discuss the ways in which grief, mourning, and trauma relate to identity and belonging, and we will also pay close attention to coping mechanisms that range from forgetting to humor. The last section of the course will focus on a specific case study of public mourning and remembrance: the Spanish Civil War and its multiple afterlives. This course will have a strong, mandatory and graded written communications component, and it is taught in Spanish. It also fulfills the Writing Intensive (WI) requirement for Arts & Sciences students. Prerequisites: Span 303 or Span 308D, and one (or preferably two) of the following: Span 341, Span 342, Span 343, Span 370, Span 380, or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar. Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM BU: IS EN: H

L38 Span 3613 Researching Cultures: The Paradoxes of Contemporary Cuba: The Good, the Bad, and the In-Between

In the wake of such momentous events as president Obama's visit to Cuba (March 2016), Fidel Castro's death (November 2017) and the end of Raul Castro's presidency (April 2018), for many Americans the island has advanced from the category of a forbidden and exotic fruit to a full-fledged reality. Now is a good time to ask not only "What is next for Cuba?" but also "What can we learn from Castro's revolutionary experiments"? This course explores from interdisciplinary perspectives the paradoxes of Cuban lives on the island and in the diaspora—the good, the bad and the in-between—along with the intertwined histories of the United States and Cuba. Using a combination of literary texts (Carpentier, Cabrera Infante, Ponte, Bobes, Obejas, Morejón, Padura), films ("Strawberry and Chocolate," "Guantanamo," "The Promise," "The New Art of Making Ruins"), artwork (Mendieta, Bruguera, Garaicoa), political speeches, and unique visual materials compiled by the instructor throughout her many research trips to Cuba, we will look at the island's contemporary reality through the lens of its colonial and postcolonial past. Topics include ethnic and gender identities, the history of slavery and plantation economy, the "myths" of Che Guevara and Fidel Castro, African-Cuban spirituality, popular music, political oppression and dissent, and the interplay of migration and exile, along with multiple perspectives on everyday life (foreign tourism, food rationing, dual-currency economy, restoration of colonial Cuba). Course description: Havana, education, and healthcare). Due to the interdisciplinary perspectives inherent to this course, students will have an opportunity to engage their knowledge of and interest in disciplines outside the humanities (including but not limited to: public health, law, political science, urban studies, anthropology) in the exploration of Cuba's past, present, and future. This course will have a strong, mandatory and graded written communications component and is taught in Spanish. It also fulfills the Writing Intensive (WI) requirement for Arts and Sciences students. Prereq. Spanish 303 or 308E, and one (or preferably two) of the following: 341, 342, 343, 370, 380 or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar. Credit 3 units. A&S IQ: HUM, LCD, SC, WI BU: HUM, IS

L38 Span 3614 Researching Cultures: Iberian Feminisms

This course will examine the development and transformations of feminist thought in the Iberian Peninsula, from the Enlightenment to the present, considering a diverse array of literary and cultural production (narrative fiction, poetry, essay, press accounts, film and visual culture) by women. We will consider not only the challenges faced by women cultural producers, given their social, legal, and historical circumstances, but also the strategies they used to negotiate their participation in the public sphere as writers, intellectuals, social reformers and activists. We will explore, from an intersectional perspective, the unique perspectives these women brought to their work, as they address pressing social, political, and cultural issues pertaining to their place in society, such as citizenship, suffragism, equal rights, divorce, gender violence, personal and political freedom, racial justice, among others. We will consider works of Enlightenment thinkers such as Josefa Amar y Borbón, representing the beginnings of a modern feminist consciousness in Iberia; Romantic writers (Coronado, Gómez de Avellaneda), who, under the impact of liberalism, were key to shaping new models of subjectivity for women; nineteenth-century (proto)feminists and social reformers of the fin-de-siècle (Pardo Bazán, Gimeno de Flaquer, Arenal); early twentieth-century suffragists and freethinkers (Carmen de Burgos, Campoamor, Hildegart); and feminist writers and filmmakers of the post-Franco era (Montero, Riera, Bollaín, Taberna) and women representing the diverse diasporic communities of 21st-century Spain (El Hachmi, Bela-Lobedde, Mbomio Rubio, Quanzhou Wu). Course assignments will consist of short essays, a book report, and a final project. Prerequisites: Spanish 308D or 303 and two of the following (341, 342, 343, 370, 380, or Debating Cultures).

Credit 3 units. A&S IQ: HUM, LCD, SC, WI Arch: HUM Art: HUM BU: BA, IS

L38 Span 3615 Researching Cultures: Leisure and Urban Entertainment in Latin America

How do we define leisure or free time? Who can experience it? Can we choose which activities to perform in our free time? By establishing a dynamic dialogue between leisure/free time and other notions such as play, labor, inequality, alienation, and consumption, we will approach Latin America's urban entertainment scene from the end of the nineteenth century to the present. Beginning with the incorporation of the region into the global economic networks, we will trace the trajectory of the concept of leisure/free time to reflect on socio-political issues such as migration, gender, race, and social class. We will examine historical landmarks alongside examples of urban entertainment: from street celebrations, mass media, and soccer games, to social networks and virtual platforms in a pandemic scenario. Even though this course is mainly focused on Argentina and Uruguay, we will also have the opportunity to study cases from other parts of Latin America. This course will have a strong, mandatory and graded written communications component and is taught in Spanish. It also fulfills the Writing Intensive (WI) requirement for Arts and Sciences students. PreReq: Spanish 308D or 303 and at least one Spanish survey (341, 342, 343, 370, 380, or Debating Cultures). There are no exceptions to the prerequisite. Students who have completed four or more Spanish surveys (including Researching Cultures and the ones mentioned before) may not take this class and must proceed to the 400-level.

Credit 3 units. A&S IQ: HUM, LCD, LS, SC, WI Arch: HUM Art: HUM BU: IS

L38 Span 3616 Researching Cultures: Imagining the Andes

Taking Peru and Bolivia as case studies, this course explores the Andean region's cultures by examining the interactions between global, national, and indigenous cultures. We will study six main topics: indigenous peoples and state-formation; peasant revolutions; internal and transnational migration; memory and political violence; racialization and coloniality; and extractive capitalism and indigenous thinking (Buen Vivir). We will explore these issues while learning about the region's major historical transformation between the 1900s and the present. Course materials include oral histories, myths, literature, film, photography, music, and social media. Authors studied include Jose Maria Arguedas, Claudia Llosa, Yuyachkani, Anibal Quijano, Jorge Sanjines, and Silvia Rivera Cusicanqui. This course fulfills the Writing Intensive (WI) requirement for Arts and Sciences students. Prereq. Spanish 303 or 308E, and one (or preferably two) of the following: 341, 342, 343, 370, 380 or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar. In Spanish. Credit 3 units. A&S IQ: HUM, LCD, LS, SC, WI Arch: HUM Art: HUM BU: IS

L38 Span 3617 Researching Cultures: Representations of Childhood in the Spanish-speaking World

This course examines the construct of childhood in the Spanish-speaking world from an interdisciplinary perspective. We will explore the aesthetic, cultural, sociopolitical, and legal implications of a variety of media, about and/or for children. The course is divided into three thematic units. The first will delve into the pedagogical, nation-building and moral projects that underpin the development of children's literatures in the Hispanic world. The second focuses on children in the midst of crises, where we will turn our attention to issues of child labor, migration, poverty, public health, the environment, as well as economic and political crises that lay bare the inherent vulnerabilities of children. We will also familiarize ourselves with the work of a variety of organizations that aim to mitigate child suffering and develop social awareness about the treatment and living conditions of children. The third unit centers around media and the child consumer, where we will explore the effects of social media, the advertising and marketing of food, games and toys, as well as a variety of other issues that affect children's emotional and psychosocial development. Some of the texts and films we will study include *Ismaelillo* and a selection of *La edad de oro* by José Martí, *Cuentos pintados y morales* by Rafael Pombo, *Perico trepa por Chile* by Alicia Morel, a selection of poems by Rubén Darío, *Sólo un pie descalzo* by Ana María Matute, *Los herederos* by Eugenio Polgovsky, *Voces inocentes* by Luis Mandoki and *Entre nos* by Gloria La Morte and Paola Mendoza. Additional materials include newspaper articles, podcasts and songs. This course fulfills the Writing Intensive (WI) requirement for Arts and Sciences students. Prereq. Spanish 303 or 308E, and one (or preferably two) of the following: 341, 342, 343, 370, 380 or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar. In Spanish. 3 units. Credit 3 units. A&S IQ: HUM, LCD, LS, SC, WI Arch: HUM Art: HUM BU: IS

L38 Span 3618 Researching Cultures: Cultural Revolutions in Central America

Central American region has been invisible and stigmatized as the most violent and unequal of the continent. Nevertheless, these seven countries (Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica, Panamá and Belice) have a complicated history of creativity and cultural struggles related to indigenous people, national identity, revolution, Cold War, postwar and peace times, and transnational migration. This course will explore some of these topics through the lenses of cultural revolutions in Guatemala, El Salvador, and Nicaragua, in the context of the Cold War. Attention will be given to the articulation of culture and politics. We will study a wide range of media products and performances, such as rock songs, painting, folkloric music, radio streaming, street theater, testimony genre, literature, and film. In addition, we will discuss the engagement of writers and public intellectuals such as Ernesto Cardenal, Daysi Zamora, Roque Dalton, and Gioconda Belli to the revolutionary process in Latin America and the interplay between political mass mobilization and radical resistance. This course fulfills the Writing Intensive (WI) requirement for Arts and Sciences students. Prereq. Spanish 303 or 308E, and one (or preferably two) of the following: 341, 342, 343, 370, 380 or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar. In Spanish. Credit 3 units. A&S IQ: HUM, LCD, LS, SC, WI Arch: HUM Art: HUM BU: BA, IS

L38 Span 3619 Researching Cultures: Graphic Latin America

This course examines the visual, affective and linguistic registers that graphic novels, comics and illustrations have used in Latin America to represent popular desire, enjoyment and resistance. We will challenge traditional perceptions of graphic formats as "minor literature" and we will delve into the relationship between popular consumption and structural changes in Latin American countries. Some of the questions that would lead the units are: Is there a specific storytelling attached to graphic narratives? What are the cognitive and perceptual challenges that graphic texts pose to the readers? What do we mean when we talk about "Latin America Graphic Fiction"? What does it mean to read "massive texts"? Can reception have a transformative power in Latin American societies? The genres analyzed include memoirs, political satire, parodies, science fiction and radical zines. This course fulfills the Writing Intensive (WI) requirement for Arts and Sciences students. Prereq. Spanish 303 or 308E, and one (or preferably two) of the following: 341, 342, 343, 370, 380 or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar. In Spanish. 3 units. This course fulfills the Writing Intensive (WI) requirement for Arts and Sciences students. Prereq. Spanish 303 or 308D, and one (or preferably two) of the following: 341, 342, 343, 370, 380 or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar. Credit 3 units. A&S IQ: HUM, LCD, SC, WI Arch: HUM Art: HUM BU: IS

L38 Span 361Y Researching Cultures: The Black Parade: Black Social Movements in Columbia & Peru, 1960s to Present

This course is a conceptual and thematic exploration of Black social movements in Colombia and Peru from the 1960s to present. Learners will explore topics such as Black Consciousness, Black Women's Rights, civil conflicts and drug conflicts, land rights, environmental justice, genocides against Black activists, Black Lives Matter, forced and quasi-voluntary displacements, as well as COVID-19, among others. The course not only highlights the widespread resistance by Blacks against systemic racism and inequality but also movements that celebrate Blackness and the curation of Black representation in countries that have intentionally made Black bodies invisible. Through an interdisciplinary and intersectional approach in an inclusive and co-collaborative environment, learners will analyze, understand, and juxtapose multiple (trans)national movements centering on the dimensions of race, gender, and class in order to productively discuss Afro-Latin American history, culture, and politics. Although this course is focused on writing, research and instructor feedback, learners will have the opportunity to engage bi-weekly with articles, videos, music, children's books, poetry, performances, films, and much more. This course will have a strong, mandatory and graded written communications component, and it is taught in Spanish. It also fulfills the Writing Intensive (WI) requirement for Arts & Sciences students. Prerequisites: Span 303 or Span 308D, and one (or preferably two) of the following: Span 341, Span 342, Span 343, Span 370, Span 380, or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar. Credit 3 units. A&S IQ: HUM, LCD, SC, WI Arch: HUM Art: HUM BU: BA, ETH, IS EN: H

L38 Span 362O Researching Cultures: Politics of Melodrama in Latin America: From Serialized Novels to Telenovelas

This course explores the social and political history of melodrama in Latin America. We will discuss the role that melodrama has had within Latin American media following a long-term chronological approach that begins with nineteenth-century serialized novels (folletín) and ends with recent streaming television. As a language of emotions and familiarity, Latin American melodrama has been a key tool to reflect on the most important social and political issues, from mid-twentieth century populisms to globalization, from modernization to the human rights abuses of the 1970s' dictatorships. Thus, in this course we will delve into the political power of tears and smiles. The course will address the uses of melodrama in print media, radio, cinema, and television, in order to explore how the melodramatic imagination shaped the experience of modernity in the region and allowed Latin American audiences to deal with issues of class inequality, gender roles, sexuality, national identities, and racism. Course materials may include tango albums, 1940's Argentine and Mexican films, Cuban radionovela *El derecho de nacer*, Manuel Puig's novel *El beso de la mujer araña* [Kiss of the Spider Woman], as well as telenovelas from Colombia, Mexico, and Argentina. As part of the course, students will engage in active research on the interplay of politics and melodrama in contemporary Latin American media. This course fulfills the Writing Intensive (WI) requirement for Arts and Sciences students. Prereq. Spanish 303 or 308E, and one (or preferably two) of the following: 341, 342, 343, 370, 380 or Debating Cultures. Students who have taken more than four Spanish culture or literature classes are not allowed in this course and must proceed to a Major Seminar. In Spanish.

Credit 3 units. A&S IQ: HUM, LCD, SC, WI BU: BA, IS

L38 Span 370 Introduction to Hispanic Linguistics

An introduction to the scientific study of the Spanish language, this course focuses on each of the major linguistic subsystems, including the sound system (phonetics and phonology), word formation (morphology), formation of phrases and sentences (syntax) and the use of the language to convey meaning (semantics and pragmatics). At each level of analysis, selected comparisons are made between Spanish and English and between Spanish and other languages. The course also examines different historical, regional and social varieties of Spanish and situations of Spanish in contact with other languages.

Credit 3 units. A&S IQ: LCD BU: HUM EN: H

L38 Span 380 Topics in Hispanic Cultures

This course surveys cultures in specific contexts (Latin America and Spain) and in different historical periods, from the Middle Ages to the present. The course provides students with critical and methodological tools in order to carry out an articulate and informed cultural analysis. Prerequisite: Span 308E or concurrent enrollment in Span 303. In Spanish. Topics vary from semester to semester; see section description for current offering.

Credit 3 units. A&S IQ: HUM, LCD, LS Arch: HUM Art: HUM BU: ETH EN: H

L38 Span 400 Intensive Translation for Graduate Students I

Designed to help graduate students in the humanities, social and natural sciences fulfill their PhD language requirement, this is the first part of a two-semester course sequence in reading and translating Spanish. Non-graduate students may enroll with permission of the department. Must be followed by Span 401.

Credit 3 units. A&S IQ: LCD EN: H

L38 Span 401 Intensive Translation for Graduate Students II

Designed to help graduate students in the humanities, social and natural sciences fulfill their PhD language requirement, this is the second part of a two-semester course sequence in reading and translating Spanish. Non-graduate students may enroll with permission of the department. Credit for Span 400 is contingent on completion of Span 401.

Credit 3 units. A&S IQ: LCD EN: H

L38 Span 4013 Second-Language Acquisition and Technology

This seminar for undergraduate and graduate students will transform research and theory about second-language acquisition into practice while focusing on technology-driven applications. The course fosters professional development as participants formulate critical skills for evaluating, creating, and integrating technology into the language classroom and other language learning contexts, including business, engineering, and law. Course formats include readings, discussions, and demonstrations with technologies. The course counts for the minor in applied linguistics, the PhD in applied linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors.

Same as L92 APL 4023

Credit 3 units. A&S IQ: SSC

L38 Span 405 Undergraduate Seminar: Special Topics

An undergraduate seminar. Prerequisites: Span 307D, 308E, and either 333C-334C or 335C(Q)-336C(Q).

Credit 3 units.

L38 Span 405W Major Seminar

An undergraduate seminar. Topics vary. This is a writing-intensive course, which requires a minimum of three papers of approximately four to five pages in length, with rewrites; 50 percent of the grade must come from written work. Prerequisites: Span 307D and Span 308E and at least two 300-level literature courses taught in Spanish. In Spanish.

Credit 3 units. A&S IQ: HUM, LCD, WI Arch: HUM Art: HUM EN: H

L38 Span 410 Major Seminar

An undergraduate seminar. Topics vary. Prerequisites: Span 307D and Span 308E and at least two 300-level literature/culture surveys taught in Spanish. In Spanish.

Credit 3 units. A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L38 Span 411 Advanced Grammar and Syntax

This course presents a detailed study of Spanish syntax. Different theories (including generative theory) as well as the relationship between (morpho) syntax and other linguistic subsystems are considered. Special attention is also given to Spanish/English contrasts of particular interest to language learners and teachers. PreReq. At least two of the following classes: 341, 342, 343, 370 or 380, or the completion of at least one Researching Cultures class.

Credit 3 units. A&S IQ: LCD EN: H

L38 Span 4111 Advanced Grammar and Syntax in Spain

Detailed study of contemporary Spanish syntax. Special attention to fine points of grammar and syntax necessary for communication at the advanced level, taught at Washington University's Carlos III Program in Madrid. Prerequisite: placement by exam.

Credit variable, maximum 4 units.

L38 Span 4112 Bilingual Advanced Grammar and Syntax in Spain

Detailed study of contemporary Spanish syntax for bilingual students, taught at Washington University's Carlos III Program in Madrid. Prerequisite: placement by exam or program director.

Credit 3 units.

L38 Span 413 Linguistics and Language Learning

This course, taught in English, is a foundation for students who will work with linguistically and culturally diverse people in the USA and around the world, whether this work is in the courtroom, hospital, classroom, office and more. The class will help prepare students for the diverse range of twenty-first century occupations that have language and linguistics at their center, including machine learning and translation studies. The class utilizes a survey format and covers both internal and external factors related to language acquisition and language use, such as language and the brain, language aptitude, age, gender, memory, prior knowledge, etc. Theoretical and research dimensions of both linguistics and foreign / second language learning are treated. Corresponding implications of the readings

focus on action- on making decisions for language policies and debates around the world that are informed by linguistic and language knowledge. The course is required for the minor in applied linguistics, the PhD in Applied Linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors such as Global Studies and Educational Studies. Prereq: Ling 170 is recommended but not required. Same as L92 APL 4111

Credit 3 units. A&S IQ: SSC BU: BA, ETH EN: S

L38 Span 416 Introduction to Hispanic Linguistics

An introduction to the scientific study of the Spanish language, this course focuses on each of the major linguistic subsystems, including the sound system (phonetics and phonology), word formation (morphology), formation of phrases and sentences (syntax), and the use of the language to convey meaning (semantics and pragmatics). At each level of analysis, selected comparisons are made between Spanish and English and between Spanish and other languages. The course also examines different historical, regional and social varieties of Spanish and situations of Spanish in contact with other languages. Preceptorial for undergraduates only.

Credit 3 units. A&S IQ: LCD EN: H

L38 Span 417 Spanish Phonetics, Phonology and Dialectology

This course, conducted in Spanish, explores the linguistic varieties of the 21 Spanish-speaking countries from both a historical and a synchronic perspective. The course begins with a traditional look at Spanish phonetics and phonology, with all students memorizing and utilizing the International Phonetic Alphabet. Course readings and discussions extend beyond the descriptive and include a search for the sources of language variation within the Spanish-speaking world. Particular attention is devoted to language contact and bilingualism. Students read in areas such as history, sociolinguistics, dialectology and sociology, as well as traditional linguistic studies, in designing their projects concerning phonetics, phonology and dialect diversification.

Credit 3 units. A&S IQ: LCD BU: IS EN: H

L38 Span 466 Second-Language Acquisition

There are many ways in which a second language can be learned: from infancy as the child of bilingual parents, or later through formal instruction, immersion in a new culture, or in a particular work or social situation. This class is an inquiry into the processes by which acquisition occurs. Topics include the nature of language learning within the scope of other types of human learning; the relationship between first- and second-language acquisition; the role of linguistic, cognitive and sociocultural factors; insights gained from analyzing learners' errors; key concepts such as interlanguage and communicative competence; bilingualism; the optimal age for second-language acquisition; and a critical appraisal of different theories of second-language acquisition. Both theoretical and instructional implications of second-language acquisition research are considered. This course can be used toward certification in TESOL and is a required course for the Graduate Certificate in Language Instruction. Prerequisite: Ling 170D or equivalent is recommended, especially for undergraduates, but is not required.

Same as L44 Ling 466

Credit 3 units. A&S IQ: HUM EN: H

L38 Span 467 Grammar and Vocabulary Acquisition

This course examines theoretical and instructional implications of research on grammar and vocabulary acquisition. Topics include making form-meaning connections during language learning; developmental stages; the role of input and input processing; explicit and implicit methods of grammar instruction; pertinent factors in vocabulary acquisition, such as a learning context and processing resource allocation; and comparisons of incidental and direct vocabulary instruction techniques. Major theories of language acquisition (e.g., nativism, emergentism) are critically examined in light of the research presented, and research findings are applied to instructional practices.

Credit 3 units. A&S IQ: LCD BU: BA EN: H

L38 Span 469 Reading and Writing in a Second Language

This course, taught in English, extends issues in second language literacy beyond pedagogy by examining the wide range of theoretical and research issues, both historical and current. Literacy acquisition among second-language learners involves a number of variables including both cognitive and social factors. Topics discussed in class include literacy and social power, universal cognitive operations, individual learner differences, text types and literary forms, and the extent to which reading and writing are interrelated. Students discuss how to bridge research and practice, and they create reading and writing activities driven by theory and empirical investigations. This course is a required course for the undergraduate minor in Applied Linguistics and an elective for the Graduate Certificate in Language Instruction.

Credit 3 units. A&S IQ: HUM, LCD

L38 Span 4691 Second Language Reading and Writing: Theory, Research and Practice

This course, taught in English, extends issues in second language literacy beyond pedagogy by examining the wide range of theoretical and research issues, both historical and current. Literacy acquisition among second-language learners involves a number of variables including both cognitive and social factors. Topics discussed in class include literacy and social power, universal cognitive operations, individual learner differences, text types and literary forms, and the extent to which reading and writing are interrelated. Students discuss how to bridge research and practice, and they create reading and writing activities driven by theory and empirical investigations. This course is a required course for the undergraduate minor in applied linguistics and an elective for the Graduate Certificate in Language Instruction. This course carries the Social and Behavioral Sciences attribute.

Credit 3 units. A&S IQ: SSC EN: S

L38 Span 4692 Reading Across Languages and Cultures: Theory, Research, and Practice

The United Nations has declared that literacy is a fundamental human right. This course, which is taught in English, connects to the mission of UNESCO and examines the wide range of theoretical and research issues -- both historical and current -- related to reading and writing across languages and cultures. Literacy acquisition among second-language learners involves a number of variables, including both cognitive and social factors. Topics to be discussed include universal cognitive operations, individual learner differences, text types and literary forms, literacy and social power, and the extent to which reading and writing are interrelated. Students will discuss how to bridge scientific research in the laboratory to practice, and they will be involved in St. Louis community outreach projects with refugees

and immigrants at the International Institute, where they will create and implement reading and writing activities driven by theory and empirical investigations. Students will take the theory and research they learn, and they will help meet the local reading and writing needs of a changing population with a variety of backgrounds, values, and educational preparations. The course is required for the minor in applied linguistics, the PhD in applied linguistics, and the graduate certificate in language instruction. This course carries the Social and Behavioral Sciences attribute and can be taken for different majors, such as Global Studies and Educational Studies.

Same as L92 APL 4692

Credit 3 units. A&S IQ: SSC EN: S

L38 Span 495 Honors

Students who meet the requirements work closely with a member of the faculty on an individual basis on a project of mutual interest. Emphasis on a tutorial on a regular basis. Prerequisite: permission of director of undergraduate studies. Preregistration not permitted.

Credit variable, maximum 3 units.

L38 Span 4951 Honors

Students who meet the requirements work closely with a member of the faculty on an individual basis on a project of mutual interest. Emphasis on a tutorial on a regular basis. Prerequisite: permission of director of undergraduate studies. Preregistration not permitted. Pass/fail.

Credit 3 units. EN: H

Speech and Hearing

The minor in speech and hearing sciences is offered by the Program in Audiology and Communication Sciences (PACS) in the School of Medicine, and it is designed for students interested in exploring topics related to typical and disordered human communication. The required course work provides an overview of the fields of hearing, deafness, language and speech, with opportunities to explore related topics in more depth. This minor is especially valuable for students in fields such as psychological and brain sciences, education, philosophy-neuroscience-psychology (PNP) and linguistics, but it has broad applicability for many fields of study. Courses completed as part of this minor can also be used to fulfill the total unit requirements for graduation and as prerequisites for graduate studies in audiology, deaf education and speech-language pathology. However, the minor may not be used as an Integration in Arts & Sciences Integrated Inquiry (IQ) curriculum, and it does not otherwise fulfill any Arts & Sciences distribution requirements.

Majors

There is no major in this area. The minor in speech and hearing sciences is offered by the Program in Audiology and Communication Sciences (<http://pacs.wustl.edu/>) at Washington University School of Medicine. The program also offers graduate study in the fields of audiology, deaf education, and speech and hearing sciences, which lead to the following degrees: Doctor of Audiology (AuD), Master of Science in Deaf Education (MSDE), and Doctor of Philosophy (PhD)—Speech and Hearing Sciences.

Minors

The Minor in Speech and Hearing

Total units required: 15

Required course:

Code	Title	Units
Educ 234	Introduction to Speech, Language, and Hearing Sciences	3

Elective courses:

At least four of the following, totaling at least 12 units:

Code	Title	Units
Ling 170D	Introduction to Linguistics	3
Ling 312	Phonetics	3
PACS 324	Acoustics and Speech Perception	3
PACS 344	Observation and Methods in Speech-Language Pathology	3

PACS 360	Introduction to Audiology	3
PACS 401	Anatomy and Physiology of Speech and Hearing	-3
PACS 4301	Sign Language I	2
PACS 4302	Sign Language II	2
PACS 434	Typical Language Development	3
PACS 443	Speech and Language Disorders	3

Additional Information

This minor is composed of a minimum of 15 units that focus on the study of speech, language and hearing. Of the 15 units, 3 units must be Educ 234; at least 9 units must be at the 300 level or higher; and at least 9 units must be offered by the department (M89). Courses to count toward the minor must be selected from the courses listed above or approved in advance by the minor advisor.

For students who intend to pursue graduate studies in audiology, speech-language pathology, or deaf education, we recommend meeting with the minor advisor to develop a course of study that will fulfill prerequisite requirements for the intended area of study.

Because the minor in speech and hearing sciences is offered by the Program in Audiology and Communication Sciences (PACS) in the School of Medicine, it may not be used as an Integration and does not otherwise fulfill any Arts & Sciences distribution requirements.

Courses

Visit online course listings to view offerings for M89 PACS (<https://courses.wustl.edu/CourseInfo.aspx?scho=M&dept=M89>). Please visit the Minors (p. 1047) tab for courses that are open to undergraduate students.

Urban Studies

The interdisciplinary major in urban studies is ideal for students drawn to serious examination of the profound issues confronting urban/metropolitan America. Urban Studies seeks to prepare students — who are indeed our nation's future leaders — for the challenge of solving these issues. We help students to research and investigate such issues as the evolving patterns of metropolitanism and the necessity for central city reconstruction; the problems associated with regentrification, urban sprawl and affordable housing; the crises confronting newly emerging immigrant communities and the social cleavages of urban marginalized communities; unemployment and underemployment; law and justice; HIV/AIDS and issues of public health; the economic underdevelopment of poor communities; race and inequality; the paradox of declining welfare rolls amidst escalating poverty rates; underperforming urban schools; and the in-migration and out-migration of the city and its schools. All available social indices suggest that such domestic issues in our central cities will only increase in

significance during the years ahead. The fact that many of the aforementioned issues are deeply embedded in the cities of the world allows students in the Urban Studies program to focus not just on domestic cities but on global cities as well.

Urban studies is a stand-alone major. Current students in the program are jointly pursuing study in pre-law, pre-medicine, public health, political science, educational studies, environmental studies, economics, global studies, philosophy-neuroscience-psychology, architecture and comparative arts, among others. Our purpose is to prepare students to critically engage with the social, political and economic dilemmas facing the world's cities with intellectual rigor, integrity, sensitivity and compassion. The program draws faculty and course work from various academic units, including Arts & Sciences, the Brown School (social work and public health), the School of Law, and the College of Architecture at the Sam Fox School of Design & Visual Arts. To complement our course work, the Urban Studies program accepts internships that are based locally, nationally, or internationally, with appropriate support documents.

Majors

The Major in Urban Studies

Total required units: 33 units, 21 of which must be at the 300 level or above. Of these 21 advanced units, no more than 6 units may be from independent study courses. All courses for the major must be taken for a letter grade, and students must obtain a passing grade of B or better.

Required courses:

- URST 299 The Study of Cities and Metropolitan America
- One introductory course in math or applied statistics
- One 400-level independent study or an internship located locally, nationally, or internationally
- A senior thesis (or senior seminar, if offered)

Elective courses: There are five subject area concentrations in Urban Studies: neighborhoods and community development; urban education; cities of the world; public policy/social policy; and public health. Once a student declares a major in urban studies, they will be assigned a major advisor who will help the student formulate the area concentration.

Because of the nature of the major and the requirements of the nonresidential components, majors are strongly encouraged to declare by their third semester in residency.

Additional Information

Study Abroad: The program offers study abroad opportunities in conjunction with the International Urban Scholars Study Abroad Program through Oxford University, the London School of Economics and Political Science, the University of Cape Town in South Africa, and Fudan University in Shanghai, China, among others.

Senior Honors: Urban studies majors are encouraged to work for Senior Honors, for which they may apply during the junior year. Acceptance into the program is based on the student's previous academic performance and a proposal to a core (not affiliated) faculty member in Urban Studies who agrees to supervise the honors research. The honors candidate must complete honors thesis research, which is evaluated by a three-member faculty committee. Meritorious theses can be awarded the Senior Thesis in Urban Studies with Distinction award.

Upsilon Sigma: Upsilon Sigma is an international multidisciplinary honor society that was established by the Urban Affairs Association in 1918. Upsilon Sigma is dedicated to recognizing and encouraging excellence in scholarship, leadership, and engagement in urban studies and related fields. The mission of this organization is to promote academic excellence and enrich the educational experience of undergraduate and graduate students pursuing degrees related to urban studies.

Minors

The Minor in Urban Studies

Total required units: 15

Required course (3 units):

Code	Title	Units
URST 299	The Study of Cities and Metropolitan America	3

Elective courses (12 units):

Students must complete 12 units at the 300 level or above. All courses for the minor must be taken for a letter grade, and students must obtain a passing grade of B- or better. These courses must be home-based in three different departments or programs and may not include courses in the student's major field. A complete list of general courses that count toward the Urban Studies minor is published each semester in WUCRSL. No more than 3 units may be counted from among the following: directed readings, independent study, internships, University College, or credits from another institution, including study abroad.

Additional Information

The minor in Urban Studies facilitates the study of urbanization across the globe from multiple disciplinary perspectives. It is designed to complement any major field of study. Students are encouraged to pursue course work, in companion with their major field of interest, that is distinctive yet complementary to the study of urbanization, which impacts all fields of inquiry. Courses must be selected in consultation with the program director/advisor in Urban Studies.

Courses

Visit online course listings to view semester offerings for L18 URST (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L18&crslvl=1:4>).

L18 URST 101 First-Year Seminar: Introduction to Urban Studies

This course provides a survey of the field of Urban Studies, utilizing the city of St. Louis as a field site. The major purpose of the course is to gradually reveal how a city operates internally, and how it operates externally with its sister cities, surrounding metropolitan areas and neighboring states, amidst competing and often contradictory interests. Utilizing historical analysis as a guide, the course will briefly revisit the experiences of previous waves of ethnic groups to the St. Louis metropolitan area, as a lens for understanding the current social, political and economic dilemmas which many urban dwellers in St. Louis now face. The course will reveal to students the intricacies of social welfare issues and policies among high density populations, in St. Louis, that are homogeneous and heterogeneous, at the same time. Visits and discussions with various governmental and nongovernmental agencies, and how such agencies function or dysfunction for various constituencies allow students to ask crucial questions regarding equality of opportunity in a democratic society. Students will also encounter diverse communities and neighborhoods and the intended and unintended consequences of social welfare policies designed to ameliorate urban dilemmas such as poverty and inequality, homelessness, educational underachievement, gentrification, migration and immigration, development, health care, fiscal issues, the informal economy, and issues concerned with crime and social justice, among others. Readings are reinforced and challenged through visits, interactions and observations with broad constituencies and institutions, ranging from city officials to community residents. As such, this course offers a survey discussion of the rich interdisciplinary field of Urban Studies for those who may be interested in pursuing a stand alone major in the field of Urban Studies. This course is for first-year, non-transfer students only.

**L18 URST 124 Bridging London: An interdisciplinary
Exploration of One of the World's Great Cities**

This course provides a multi-disciplinary perspective on the past, present, and future of London. Topics include the historic roots of the city, the development of the British urban system, transportation and the shaping of the city; social, political, and economic dynamics of the Greater London Area; urban growth, decline, and revitalization; suburbanization; and the challenges facing the city in the 21st Century.

Credit 3 units. A&S: FYS A&S IQ: SSC Arch: SSC Art: SSC BU: IS

**L18 URST 163 Freedom, Citizenship, and the Making of
American Culture**

This course offers a broad survey of American history from the era before European settlement of North America to the late 20th century. The course explores the emergence and geographic expansion of the United States and addresses changes in what it meant to be an American during the nation's history. Tracing major changes in the nation's economic structures, politics, social order and culture, the course chronicles, among other issues, changes in the meanings of freedom, citizenship and American identity. Introductory course to the major and minor.

**L18 URST 2091 First-Year Seminar: The City in Early Modern
Europe**

From the city-states of Renaissance Italy to the 18th-century boomtowns of London and Paris, cities functioned as political, economic, and cultural centers, creating unique opportunities and challenges for their diverse inhabitants. Using a wide variety of primary and secondary sources, this course will examine how men and women, rich and poor, and established citizens and marginal groups tried to understand and manage life in the city. Their conflicting experiences and expectations created not only social and economic unrest but also a resilient social infrastructure, a tradition of popular participation in politics, and a rich legacy of cultural accomplishment. Topics studied include urban political and economic organization; the creation and use of public spaces; religion as a source of community and conflict; and urban crime and public punishment.

Same as L22 History 2091

Credit 3 units. A&S: FYS A&S IQ: HUM, LCD, SD BU: HUM, IS

**L18 URST 230 Topics in Urban America: The Sensory
Landscape of the American City**

This course foregrounds the interpretive and analytical approaches used in the study of American cities. The city is a crucial frame for understanding the nation's cultural, economic, social, political and ecological concerns and evolution. Employing multiple perspectives, we interpret urban space as a product of culture, explore the city's importance in shaping American society, and investigate the ongoing evolution of the built environment. This course lays the basis for interdisciplinary thinking and research in American culture studies. The topic varies by semester. Please consult course listings for a description of the current offering. The course is ideal for AMCS majors and minors, but others are welcome. This course fulfills the introductory course requirement for AMCS students.

Same as L98 AMCS 230

Credit 3 units. BU: BA, HUM

L18 URST 233 Biomedical Ethics

A critical examination, in the light of contemporary moral disagreements and traditional ethical theories, of some of the moral issues arising out of medical practice and experimentation in our society. Issues that might be discussed include euthanasia, genetic engineering, organ transplants, medical malpractice, the allocation of medical resources, and the rights of the patient.

Same as L30 Phil 233F

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM BU: ETH EN: H

L18 URST 258 Law, Politics and Society

This course is an introduction to the functions of law and the legal system in American society. The course material stresses the realities of the operation of the legal system (in contrast to legal mythology), as well as the continuous interaction and feedback between the legal and political systems. There are four specific objectives to the course: (1) to introduce legal concepts and legal theories; (2) to analyze the operation of the appellate courts, with particular emphasis on the U.S. Supreme Court; (3) to analyze the operation of American trial courts, especially juries and the criminal courts; and (4) to examine the linkages between culture and law. Not open to students who have previously taken Pol Sci 358.

Same as L32 Pol Sci 258

Credit 3 units. A&S IQ: SSC EN: S

L18 URST 298 Practicum in Urban Studies

Practicum with an urban studies-affiliated faculty. All proposals for practicum must be submitted for review and approved by the urban studies advisor. Enrollment by permission of the instructor. Credit variable, maximum 3 units.

L18 URST 299 The Study of Cities and Metropolitan America

This course serves as the introductory course analyzing the forces shaping America's cities and surrounding metropolitan areas. It examines strategies for dealing with many of the profound social issues affecting urban/metropolitan America. Emanating from a historical perspective, it examines the ways in which industrialization and deindustrialization shaped Northern American cities and the consequences of deindustrialization on urban citizenry. It further surveys the demographic and spatial

transformation of American cities, examining the consequences of urban transformation on federal, state and local politics on society and on her institutions. Similarly, the course focuses on the origin and societal changes and emerging goals of urban development, gentrification and evolving patterns of metropolitanism and the necessity for central city as well as neighborhood reconstruction. The dynamics of racial residential segregation; crime and punishment; issues of academic achievement and under-achievement; and the social cleavages of urban marginalized communities, family structure, urban homelessness, urban sprawl and health care among others, are viewed from the perspective of social justice by exploring social, political, economic, racial and ethnic factors that impact on access, equity and care. Various theoretical perspectives and philosophies are introduced that have dominated the discourse on race and urban poverty. A field-based component complements the course work, and is designed to build interest, awareness and skills in preparation for outreach to urban communities. Prerequisite: sophomore standing.
Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: CPSC, SSC BU: BA EN: S

L18 URST 301C The American School

In this course, we examine the development of American schooling. Our focus is on three general themes: (1) the differing conceptions of schooling held by some American political, social, and cultural thinkers; (2) the changing relationships among schools and other educational institutions, such as the church and the family; and (3) the policy issues and arguments that have shaped the development of schooling in America.
Same as L12 Educ 301C
Credit 3 units. A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA, ETH, HUM EN: H

L18 URST 3025 Sports & Culture: Empire of Hoop: Basketball as American Culture

This is a topics course that focuses on instances of identity and culture within the American scope, and the topic varies by semester. See the course listings for a description of the current semester's offering.
Same as L98 AMCS 3025

L18 URST 3066 The American City in the 19th and 20th Centuries

This course will explore the cultural, political, and economic history of U.S. cities in the 19th and 20th centuries. The course will focus on New York, Chicago, St. Louis, Los Angeles and Atlanta, although other cities may be included. Students will conduct significant primary research on sections of St. Louis, developing a detailed history of one of the city's neighborhoods. Much of the course readings address broad themes such as immigration, industrialization, deindustrialization, and race and gender relations in American cities.
Same as L22 History 3066
Credit 3 units. A&S IQ: HUM, SD Art: HUM BU: HUM

L18 URST 308 Human Variation

A survey of human biological diversity, considering its adaptive and taxonomic significance from the perspective of origins and distribution of traits and adaptation. Prerequisite: Anthro 150A or introductory biology.
Same as L48 Anthro 307A
Credit 3 units. A&S IQ: NSM, AN, SD Arch: NSM Art: NSM BU: SCI

L18 URST 3091 Poverty and Social Reform in American History

This course explores the history of dominant ideas about the causes of and solutions to poverty in American society. We will investigate changing economic, cultural, and political conditions that gave rise to new populations of impoverished Americans and to the expansion or contraction of poverty rates at various times in American history. However, we will focus primarily on how various social commentators, political activists, and reformers defined poverty, explained its causes, and struggled to ameliorate its effects. The course aims to highlight changes in theories and ideas about the relationship between dependence and independence, personal responsibility and social obligation, and the state and the citizen.
Same as L22 History 3091
Credit 3 units. A&S IQ: HUM, SD BU: BA EN: H

L18 URST 313B Education, Childhood, Adolescence and Society

This course examines the social and developmental experiences of children and adolescents at the national and international level. Readings will focus on the development of children and adolescents from historical, sociological, psychological, and political perspectives. Students will examine how both internal and external forces impact the developmental stages of children and adolescents. Students will investigate the issues that impact children and adults such as poverty, war, media, schooling, and changes in family structure. Students will explore some of the issues surrounding the education of children such as the effects of high quality preschool on the lives of children from low income families and the connection between poverty and educational achievement. Students will focus on the efficacy of the "safety nets" that are intended to address issues such as nutrition, health, violence, and abuse. Throughout the course, students will review and critique national and international public policy that is designed to address the needs of children and their families throughout the educational process.
Same as L12 Educ 313B
Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L18 URST 3141 Sociolinguistics, Literacies, Schools, and Communities

Literacy learning and development within a thriving community require attention to the linguistic, cultural, and economic diversity of students. Within an era of state standardization and accountability, it is imperative to use a systems approach in education that unites homes, schools, and communities. Differentiating instruction to meet the needs of all students, including English language learners and other traditionally marginalized groups of students, is essential. This course will introduce students to sociocultural theories of literacy across settings. It will prepare students to analyze how race, ethnicity, class, gender, and language influence the development of literacy skills. We will develop a multifaceted view of literacy that is embedded within culture and that acknowledges the influences of social institutions and conditions. We will incorporate strategies for individual student needs based on students' backgrounds and prior experiences to deliver differentiated instruction and to teach students to set learning goals. Offered in fall semester only.

Same as L12 Educ 314

L18 URST 315 Introduction to Social Psychology

Social psychology is the scientific study of how people think, feel, and act in social situations. This course will cover topics such as the self, conformity, aggression and altruism, prejudice and stereotyping, romantic relationships, person perception, persuasion, and applications to health and law. Prerequisite: Psych 100B.

Same as L33 Psych 315

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L18 URST 3206 Global Gender Issues

This course compares the life experiences of women and men in societies throughout the world. We discuss the evidence regarding the universal subordination of women, and examine explanations that propose to situate women's and men's personality attributes, roles and responsibilities in the biological or cultural domains. In general, through readings, films and lectures, the class provides a cross-cultural perspective on ideas regarding gender and how gendered meanings, practices, performances serve as structuring principles in society.

L18 URST 3211 Introduction to Colonial Latin America until 1825

This course surveys the history of Latin America from the pre-Columbian civilizations through the Iberian exploration and conquest of the Americas until the Wars of Independence (roughly 1400-1815). Stressing the experiences and cultural contributions of Americans, Europeans and Africans, we consider the following topics through primary written documents, firsthand accounts and excellent secondary scholarship, as well as through art, music and architecture: Aztec, Maya, Inca and Iberian civilizations; models of conquest in comparative perspective (Spanish, Portuguese and Amerindian); environmental histories; consolidation of colonialism in labor, tributary and judicial systems; race, ethnicity, slavery, caste and class; religion and the Catholic Church and Inquisition; sugar and mining industries, trade and global economies; urban and rural

life; the roles of women, gender and sexuality in the colonies. Geographically, we cover Mexico, the Andes and, to a lesser extent, Brazil, the Southwest, Cuba, and the Southern Cone. Premodern, Latin America.

Same as L22 History 321C

Credit 3 units. A&S IQ: HUM, LCD, SC, SD BU: HUM EN: H

L18 URST 326 American Economic History

Basic theoretical concepts applied to analyze the changing structure and performance of the American economy from colonial times to the present. Prerequisites: Econ 1011 and Econ 1021.

Same as L11 Econ 326

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L18 URST 3283 Introduction to Global Health

This course provides a general introduction to the field of public health. It examines the philosophy, history, organization, functions, activities and results of public health research and practice. Case studies include infectious and chronic diseases, mental health, maternal and reproductive health, food safety and nutrition, environmental health, and global public health. Students are encouraged to look at health issues from a systemic and population-level perspective, and to think critically about health systems and problems, especially health disparities and health care delivery to diverse populations. No background in anthropology or public health is required.

Same as L48 Anthro 3283

Credit 3 units. A&S IQ: SSC Art: SSC BU: BA EN: S

L18 URST 3352 China's Urban Experience: Shanghai and Beyond

The course studies the history of Chinese cities from the mid-19th century to the late 20th century. It situates the investigation of urban transformation in two contexts: the domestic context of modern China's reform and revolution; and the global context of the international flow of people, products, capitals and ideas. It chooses a local narrative approach and situates the investigation in one of China's largest, complex, and most dynamic and globalized cities — Shanghai. The experience of the city and its people reveals the creative and controversial ways people redefined, reconfigured and reshaped forces such as imperialism, nationalism, consumerism, authoritarianism,

liberalism, communism and capitalism. The course also seeks to go beyond the "Shanghai model" by comparing Shanghai with other Chinese cities. It presents a range of the urban experience in modern China.

L18 URST 343 Understanding the Evidence: Provocative Topics of Contemporary Women's Health and Reproduction

Contemporary topics of women's health and reproduction are used as vehicles to introduce the student to the world of evidence-based data acquisition. Selected topics span and cross a multitude of contemporary boundaries. Issues evoke moral, ethical, religious, cultural, political and medical foundations of thought. Students are provided introductory detail to each topic and subsequently embark on an independent critical review of current data and opinion to formulate their own said notions. Examples of targeted topics for the upcoming semester include, but are not limited to: Abortion, Human Cloning, Genetics, Elective Cesarean Section, Fetal Surgery, Hormone Replacement, Refusal of Medical Care, Medical Reimbursement, Liability Crisis and Gender Bias of Medical Care.

L18 URST 3472 Global Energy and the American Dream

This lecture course explores the historical, cultural and political relationship between America and global energy, focusing on oil, coal, natural gas, biofuels and alternatives. Through case studies at home and abroad, we examine how cultural, environmental, economic and geopolitical processes are entangled with changing patterns of energy-related resource extraction, production, distribution and use. America's changing position as global consumer and dreamer is linked to increasingly violent contests over energy abroad while our fuel-dependent dreams of boundless (oil) power give way to uncertainties and new possibilities of nation, nature and the future. Assuming that technology and markets alone will not save us, what might a culturally, politically and socially minded inquiry contribute to understanding the past and future of global energy and the American dream?

Same as L48 Anthro 3472

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: CPSC, SSC BU: ETH, IS EN: S

L18 URST 348 Economic Realities of the American Dream

Exploration of the realities of economic life in the U.S. and how they correspond to the American Dream. Interdisciplinary perspectives from economics, sociology, and other areas of social inquiry. Emphasis on the consistency between empirical data and different concepts of the American Dream. Specific topics to include sources of economic growth and changing

living standards, unemployment, impact of globalization on U.S. citizens, economic mobility, poverty and inequality, and social justice. Prerequisites: Econ 1011 and Econ 1021, or consent of the instructors.

Same as L11 Econ 348

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L18 URST 3551 The Welfare State and Social Policy in America

How can we understand the recent debate about fundamental health care reform? Should social security be partially or wholly privatized? Was the 1996 welfare reform a success? Contemporary political questions frequently focus on the American welfare state and the social policies that compose it. The first half of this course describes the American welfare state broadly construed, places it in a comparative context, and elucidates major political science explanations for the size and scope of American social policy. We touch on several areas of social policy while constructing the generalized lenses through which particular political outcomes can be understood. The second part of the course then focuses on three major aspects of the American welfare state: health care, old age pensions and policies related to work, poverty and inequality.

Credit 3 units. A&S IQ: SSC BU: BA EN: S

L18 URST 360 Religion and the Modern Civil Rights Movement, 1954-1968

The modern Civil Rights Movement is a landmark event in the nation's political, civic, cultural and social history. In many contexts, this movement for and against civil and legal equality took on a religious ethos, with activists, opponents and observers believing that the net result of the marches, demonstrations and legislative rulings would redeem and/or destroy "The Soul of the Nation." This seminar examines the modern Civil Rights Movement and its strategies and goals, with an emphasis on the prominent religious ideologies and activities that were visible and utilized in the modern movement. The course pays particular attention to the Protestant, Catholic, Jewish, and Islamic traditions, figures and communities that were indifferent, combative, instrumental and/or supportive of Civil Rights legislation throughout the mid-20th century.

Same as L57 RelPol 360

L18 URST 3612 Population and Society

This review of population processes and their social ramifications begins with an introduction to the basic terminology, concepts, and methods of population studies, followed by a survey of human population trends through history. The course then investigates biological and social dimensions of marriage and childbearing, critically examines family planning policies, deals with the social impacts of epidemics and population ageing, and looks at connections between population movements and sociocultural changes. The overall objective of the course is to understand how population processes are not just biological in nature, but are closely related to social, cultural, political, and economic factors.

L18 URST 3626 Adventures in Nosology: The Nature and Meaning of Disease

What is a "disease" and how do you diagnose one? What are "medicines" and how, when, and for what purpose should they be used? These questions reflect universal human concerns, but the answers given to these questions have varied enormously in different times and places. The course considers the nature of health, illness, disease and its treatment, beginning with a detailed examination of the traditional ethnomedical system of the Hausa people of northern Nigeria. Using this West African medical system as a baseline for comparison, the course then explores the nature of "nosology" (the classification of diseases) and the underlying logic of different therapeutic systems in different times and cultures, including our own. The course draws on ethnography, the history of medicine, bioethics and human biology to understand how these questions are asked and answered in different societies, times and places.

Same as L48 Anthro 3626

L18 URST 3670 The Long Civil Rights Movement

The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically and thematically. It pays special attention to struggles fought in the North, West and Southwest; it seeks to question binaries constructed around "confrontational" and "accommodationist" leaders; it reveals how Latinos, Native Americans and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics.

L18 URST 375 Topics in Urban Studies

Prerequisites: URST 299 and junior standing.

Credit 3 units.

L18 URST 3755 Disability, Quality of Life & Community Responsibility

The increasing prevalence of disability presents major challenges for American society. Social participation can be a challenge for people with disabilities, while resources to address these needs tend to be limited. This course will begin by critically analyzing concepts of disability, Quality of Life, health and social participation. We will construct a framework for examining social participation and community resources across the lifespan. Public health, educational and environmental theories and methods will be applied to programs and services that aim to enhance quality of life with disabilities. We will analyze ecological approaches to enhancing social participation. Upon completion of this course, students will be equipped to analyze challenges and prioritize resources for individual and population health.

L18 URST 380 Applications in GIS

This introductory course in Geographic Information Systems (GIS) is designed to provide you with the knowledge, skills, and confidence to be an independent user of GIS. The course will use the latest version of ESRI ArcGIS. The course is taught using a combination of lectures, demonstrations, and hands-on, interactive tutorials in the classroom. You will also explore the scientific literature to understand how GIS is being used by various disciplines to address spatial questions. The course takes a multidisciplinary approach that is focused on learning the tools of GIS versus working with data from a particular field. The goal is to establish a solid foundation you can use to address spatial questions that interest you, your mentor, or your employee. The first weeks of the course will provide a broad view of how you can display and query spatial data and produce map products. The remainder of the course will explore the power of GIS with a focus on applying spatial analytical tools to address questions and solve problems. As the semester develops, more tools will be added to your GIS toolbox so that you can complete a final independent project that integrates materials learned during the course with those spatial analyses that interest you the most. Students will have the choice of using a prepared final project, a provided data set, or designing an individualized final project using their own or other available data.

Credit 3 units. A&S IQ: NSM Arch: NSM Art: NSM

L18 URST 3874 International Public Health

This course explores current topics in international public health using a case-study-based approach, emphasizing public health issues affecting low- and middle-income countries; introduction to the tools and methods of international public health research and programs; in-depth examination and critique of the roles of local and national governments, international agencies and third-party donors in international public health work; and the contributions of anthropology to the international public health agenda.

Same as L48 Anthro 3874

Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L18 URST 389A Power, Justice and the City

This course examines normative theoretical questions of power and justice through the lens of the contemporary city, with a particular focus on American urban life. It explores urban political economic problems, questions of racial hierarchy and racial injustice in the modern metropolis, and the normative and practical dilemmas posed by "privatism" in cities and their suburbs.

Same as L32 Pol Sci 389A

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L18 URST 400 Urban Education in Multiracial Societies

This course offers students an analysis of the historical development and contemporary contexts of urban education in English-speaking, multiracial societies. It examines legal decisions, relevant policy decisions, and salient economic determinants that inform urban systems of education in Western societies including, but not limited to, the United States, Canada, Great Britain, and South Africa. The course draws on quantitative, qualitative, and comparative data as an empirical foundation to provide a basis for a cross-cultural understanding of the formalized and uniform system of public

schooling characteristic of education in urban settings. Given the social and material exigencies that shape urban school systems in contemporary societies, special attention is given in this course to the roles of migration, immigration urbanization, criminal justice, industrialism, de-industrialism, and globalization in shaping educational outcomes for diverse students in the aforementioned settings. Prerequisite: junior standing or permission of instructor.

Credit 3 units. A&S IQ: SSC, WI EN: S

L18 URST 4001 Interrogating Health, Race, and Inequalities: Public Health, Medical Anthropology, and History

Interrogating Health, Race, and Inequalities is intended for graduate students in the School of Social Work and in Arts & Sciences as well as advanced undergraduates in Arts & Sciences who have previous coursework in medical anthropology, public health, or urban policy. The fundamental goal of the course is to demonstrate that health is not merely a medical or biological phenomenon but more importantly the product of social, economic, political, and environmental factors. To meet this goal the course is designed to examine the intersection of race/ethnicity and health from multiple analytic approaches and methodologies. Course readings will draw from the fields of public health, anthropology, history, and policy analysis. Teaching activities include lectures, group projects and presentations, videos, and discussions led by the course instructors. These in-class activities will be supplemented with field trips and field-based projects. By the end of the course it is expected that students will have a strong understanding of race as a historically produced social construct as well as how race interacts with other axes of diversity and social determinants to produce particular health outcomes. Students will gain an understanding of the health disparity literature and a solid understanding of multiple and intersecting causes of these disparities.

Same as I50 INTER D 4001

Credit 3 units.

L18 URST 4002 Internship in Interrogating Health, Race, and Inequalities

Internship in Interrogating Health, Race, and Inequalities is intended for advanced undergraduates who are enrolled in the course L48-4003 (Interrogating Health, Race, and Inequalities) and who have previous coursework in (medical) anthropology, public health, urban policy, or African and African-American Studies. The internship experience is designed to facilitate students' familiarity with research and evaluation strategies that **both **address structural factors shaping health outcomes and are sensitive to community needs and socio-cultural contexts. The internship experience will contribute to students' in-class understanding of the ways that race as a historically produced social interacts with other axes of diversity and social determinants to produce particular health outcomes. The course requires **permission from the instructor** and L48-4003 is the co-requisite.

Same as I50 INTER D 4002

Credit 1 unit.

L18 URST 403 Directed Study in Urban Studies

Directed study with an urban studies-affiliated faculty. All proposals for practicum must be submitted for review and approved by the urban studies advisor. Enrollment by permission of the instructor.

Credit variable, maximum 3 units.

L18 URST 4033 Video Microanalysis: Methods and Tools

The purpose of this course is to explore video microanalysis as a methodological tool for studying and valuing unconscious aspects of culturally diverse settings. Utilizing social cultural theoretical lens, this type of analysis will reveal fleeting actions, subtle movements, peripheral events, and non-verbal communication that are not easily identified in real time viewing. Specifically we may look at facial expressions, direction of gaze, hand movements, body position, and use of material resources as micro techniques to expand our capacity to explore minute aspects and alternative interpretations of social interactions. Prerequisite: Junior standing or permission of the instructor. Same as L12 Educ 4033

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC EN: S

L18 URST 404 Directed Readings in Urban Studies

This course consists of readings in urban studies that deal with a range of contemporary issues, focusing on cities and the surrounding metropolitan regions. It can be taken only under the direction of the director of the urban studies program. Prerequisite: permission of instructor. The student must be a declared major in urban studies. Consult program approval form. Credit 3 units.

L18 URST 4041 Islam and Politics

Blending history and ethnography, this course covers politics in the Islamic world in historical and contemporary times. Topics include history of Islam, uniformity and diversity in belief and practice (global patterns, local realities), revolution and social change, women and veiling, and the international dimensions of resurgent Islam. Geographical focus extends from Morocco to Indonesia; discussion of other Muslim communities is included (Bosnia, Chechnya, sub-Saharan Africa, U.S.).

Same as L48 Anthro 4041

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: IS

L18 URST 4070 Global Justice

This course examines contemporary debates and controversies regarding global justice. Seminar discussions are arranged around significant issues in the current literature. For example: What (if anything) do we owe to the distantly needy? Do we have special obligations to our compatriots? Do political borders have normative significance? And so on. This course is of interest not only to political theorists, but also students in other fields interested in social justice or international relations generally. Same as L32 Pol Sci 4070

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L18 URST 4101 Metropolitan Finance

This course is an interdisciplinary examination of fiscal policies in metropolitan regions and the related public policies that can make them better or worse places for living and working. A particular focus is on the financial structures and arrangements — both public and private — that support or hinder quality of life in urban spaces. Core topics of study include the potential impact of decentralized governments on metropolitan economic development, determination of optimal arrangements for sharing fiscal responsibilities among levels of government, evaluation of local revenue and expenditure decisions, and assessment of prospects and options for intergovernmental fiscal reform. The course is consistent in its approach to policy. Drawing on literature in sociology, education, public finance, community development, political economy and other related

fields, the course readings and experiences explore how fiscal policies can and do affect urban dwellers and their well-being. This is a departure from many public finance courses. Such an approach leads to very different questions: How do liquor zoning regulations influence minority and nonminority children in schools? Should whites be paid to move into minority neighborhoods or vice versa? This approach to the study of metropolitan finance puts an emphasis on topics such as child care, public transportation, minimum wage, housing codes, street behavior, homelessness, incarceration, alcohol, sports stadiums, illicit drugs, tax abatements, water service, garbage collection, schools, higher education, sprawl and technological change, with consideration given to political, institutional and cultural factors. Students are required to attend hearings, meetings and other relevant functions associated with the development of public financial policy. Prerequisites: URST 299 and either junior standing or permission of the instructor. Credit 3 units. A&S IQ: SSC EN: S

L18 URST 4102 Latin America and the Rise of the Global South

The rise of the global south — and the reordering of global geopolitics, economics and cultural imaginaries — is characterized by progressive change and intense conflict. Economic growth coincides with the impacts of global warming, the assault on natural resources, the rise of new consumers and the entrenchment of deep inequalities. We also see the emergence of cultural and political formations that range from the horrific to the inspiring. Latin America is a central node of the new global south. Here history takes unpredictable turns in the face of declining U.S. hegemony, the economic growth of Brazil, legacies of militarism and political violence, a feverish attack on nature, resurgent economic nationalism, and defiant "anti-globalization" movements. Through close reading of contemporary ethnographies of Latin America we explore emergent cultural and political-economic processes in the region; we consider south-south articulations (theoretical, cultural, political-economic) between Latin America, China, Africa and India; and we reflect on the changing role, meaning and relationships of the United States in the region. Same as L48 Anthro 4102
Credit 3 units. A&S IQ: LCD, SSC Art: SSC EN: S

L18 URST 418 Studying the City: Approaches to Social Research

In this course we explore social science/social scientific research methods. The course is designed primarily for students majoring in urban studies. However, the research skills that students acquire can be applied to any substantive topic in the social sciences. The main goal of this course is that students develop the skills to independently design and execute high-quality social research, regardless of their substantive interests. To develop these skills we read about methods, assess published research from a methodological perspective, and complete original research projects. Credit 3 units. A&S IQ: SSC EN: S

L18 URST 4261 The Political Economy of Urban Education

Defining a political economy of urban education involves the examination of power and wealth and the manner in which they operate in urban settings. It requires analysis of the larger urban social and economic context and consideration of historical forces that have brought the schools to their present state. In this course, we consider various political and economic factors

that have influenced and shaped urban education in the United States, drawing upon the extant literature on urban education and related social science disciplines to characterize and discuss them. A particular focus of this course is on the dynamic interrelationships among the political economy, urban education and social stratification.

Same as L12 Educ 4621

Credit 3 units. A&S IQ: LCD, SSC Arch: SSC Art: SSC EN: S

L18 URST 4280 History of Urban Schooling in the United States

More than ever, schooling in urban areas is researched, and it is at the center of debates for improving U.S. schooling. This course, which is framed by contemporary issues, focuses on the history of urban schooling and policy to deepen our understanding of the contemporary landscape. We will focus on particular cities and their school districts; these may include New York, Boston, Chicago, Detroit, St. Louis, Los Angeles, San Francisco, and Atlanta. In this course, students will develop a strong contextual understanding of the conditions of urban schooling; the history of urban school reform; and the debates over the purposes of urban schools, past and present.

Same as L12 Educ 4280

Credit 3 units. A&S IQ: HUM BU: HUM EN: H

L18 URST 4289 Neighborhoods, Schools, and Social Inequality

A major purpose of the course is to study the research and policy literature related to neighborhoods, schools and the corresponding opportunity structure in urban America. The course is informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis is placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups complement the course foci.

Same as L12 Educ 4289

Credit 3 units. A&S IQ: SSC, SC, SD Arch: SSC Art: SSC BU: BA EN: S

L18 URST 4361 Culture, Power and the State

This seminar surveys anthropological theory and ethnography of the nation-state. We will discuss how culture and power are interrelated in the formation of state institutions and ideologies, governance and violence, social and spatial inequalities, and citizen identities, daily lives, and movements for change. We'll read key theoretical works (Weber, Marx, Foucault, Gramsci, liberal political theory, feminism, and post-structuralism, among others) and contemporary ethnographies of the state. Anthropology's place in public debates on "culture" and violent crises of the state — from Iraq to the U.S. heartland — will be addressed at the end of the semester.

Same as L48 Anthro 4361

Credit 3 units. A&S IQ: SSC EN: S

L18 URST 4511 Race, Ethnicity, and Culture: Critical Qualitative Understandings of Urban Education

This course examines educational institutions as spaces where children are asked to comply to the norms, expectations, and values of the culture of power. We will study how forces -- such as de facto segregation, the disproportionate hyper-disciplining of students, punitive school climates, and the devaluing of certain forms of cultural and social capital -- can contribute to cycles of social reproduction among the marginalized. To address such challenges, this course introduces sociocultural theories and critical qualitative inquiry methods as mechanisms by which urban educational institutions can be positively transformed. Specifically, restorative practices, cogenerative dialogues, and participatory/co-researcher models are explored as methods that honor the voices of marginalized stakeholders and lead to catalytic, transformational impact. Leaving this course, students will have an understanding of the inequitable terrain of urban education institutions as well as a repertoire of theories and methods to assist with the conducting of critically grounded, culturally responsive, humane, and transformative research. In addition to lectures, readings, discussions, films, and actual classroom footage, students will conduct a school experience project to practice using the theories and methods introduced in this course. Junior standing or permission of the instructor.

Same as L12 Educ 4511

Credit 3 units. A&S IQ: SSC, SD Arch: SSC Art: SSC BU: BA EN: S

L18 URST 4512 Environmental Policy

Course examines the relationship between environmental economics and environmental policy. The course focuses on air pollution, water pollution and hazardous wastes, with some attention given to biodiversity and global climate change. The course examines critically two prescriptions that economics usually endorses: (1) "balancing" of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; and (2) use of market incentives (e.g., prices, taxes or charges) or "property rights" instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011.

Prerequisites: URST 299 and senior standing.
Credit 3 units.

L18 URST 4601 Urban Economics

Economic function of the city and the role of the city in a national economy. Local decision making; financing of local government expenditures. An analysis of selected urban problems, such as causes and effects of housing market segregation; decay and abandonment, landlord-tenant relations, crime, and urban transport systems. Prerequisite: Econ 4011.

L18 URST 4607 Education of Black Children and Youth

This course provides an overview of the education of Black children and youth in the United States. Covering both pre- and post-Brown eras, students in this course offers a deep examination of the research focused on Black education. The social, political, and historical contexts of education, as essential aspects of American and African-American culture and life, will be placed in the foreground of course inquiries.

L18 URST 461B Construction and Experience of Black Adolescence

This course examines the construct of black adolescence from the general perspectives of anthropology, sociology and psychology. It begins by studying the construct of black adolescence as an "invention" of the social and behavioral sciences. The course then draws upon narrative data, autobiography, literature and multimedia sources authored by black youth to recast black adolescence as a complex social, psychological, cultural and political phenomenon. This course focuses on the meaning-making experiences of urban-dwelling black adolescents and highlights these relations within the contexts of class, gender, sexuality and education.

L18 URST 4622 Labor and Labor Movements in Global History

Focusing on the period from mid-19th century (industrial revolution) until the present neoliberal capitalist era, this course analyzes working class formation, organization, collective action, and politics on a worldwide scale. It seeks to explore the connections between historical and contemporary workers' movements in the global North and global South, eschewing national perspectives and global/local dichotomies. Special attention is given to Latin American workers and labor movements. In particular, it examines the influence of immigration, the role of export workers, the impact of radical ideologies, the development of labor relations systems, the nature of informal work, and recent struggles for workers' control. The principal aim of this course is to introduce students to the key topics and themes pertaining to global labor history. These themes are varied and complex and range from workers' struggles.

L18 URST 465A Cities, Race and Development in Latin America

This course offers a multi-disciplinary approach to the study of the Latin American city: its history, development and inherent economic, social, cultural, ethnic, and political tensions. Lectures, readings, and class debates will explore interactions between the materiality and structure of Latin American modern cities and the social and cultural phenomena related to urban life in multicultural societies. Particular attention will be devoted to the effects of internal/external migration, and to the development of public spaces and sites of memory. Patterns of social segregation, marginalization, inequality, and the like, will be analyzed in order to elaborate on the contemporary challenges of the city in a globalized yet traditional world. In addition to the analysis of living, institutional, and commercial spaces, the course will cover social dynamics that break the discipline of the city through different forms of transgression, including crime, informal housing, and underground movements. The goal of the course is to expose students to historical and social developments as exemplified in a variety of urban environments, and to encourage reflection on issues of social justice related to the living conditions of rural, disadvantaged, and indigenous populations. The course will be conducted in English. Mandatory readings will be in English. Additional readings in Spanish will be required for those students fluent in the language. Prereq. None. L18 URST 472 Topics in Growth and Development

This course highlights important empirical facts concerning growth and development in various countries at different development stages. Fundamental growth theory is then provided for explaining these facts systematically and for evaluating the consequences of commonly adopted development policies. Topics vary, but may include population, human capital and labor market development, R&D and innovation, finance and growth, modernization and industrial transformation, world income disparities and poverty problems, institutions and political economy issues, environmental and social factors, and international trade and economic integration. Prerequisites: Econ 4011 and Econ 4021.

L18 URST 476 The City in American Arts and Popular Culture, 1910-1940

From the mid-19th century forward, artists, writers, sociologists, and cultural critics have identified the city as the primary site of a vast array of historical changes associated with modernization. This course will explore the range of cultural responses to the new 20th-century city up to World War II. The American city was seen as both an incubator of difference, and of mass conformity and manipulation; a dynamic space in which to form fluid networks that catalyzed new forms of creativity, and a place of strangers and social alienation. We will trace the history of these polarized responses in the 20th-century arts and literature of the city, looking at the vibrant popular culture of film, vaudeville, and cross-dressing; new aesthetic forms such as collage and expressionism; and new urban subjects. Prerequisites: 300-level course in American 20th-century cultural history, American art, literature, or permission of instructor.

L18 URST 482 Senior Thesis in Urban Studies

This course is required for students to complete the degree requirements in urban studies. Students discuss research methods and make regular research reports both to the instructor and for other students.

Credit 3 units.

L18 URST 4872 Colonial Cities and the Making of Modernity

Massive urban growth has been a central result of the incorporation of many areas — both central and peripheral — into the global economy in the 19th and 20th centuries. Scholars have long theorized urbanization as a key component of modernity, but they have usually done so by looking at urbanization and modernization from the perspective of the West. This course investigates the character of cities in the colony and then uses these empirical and analytical entry points to examine critically some theories of modernity. The geographical focus of the course is primarily on cities in the Middle East, North Africa and South Asia.

L18 URST 4883 The Political Economy of Health

This course reviews social science contributions to understanding health as a function of political and economic influences. Considers the ways in which personal health is affected by macrosocial processes. Examines effects of globalization, international development and political instability on the health of individuals. Examples drawn from the U.S. and international contexts. Prerequisite: junior standing or above. Same as L48 Anthro 4883

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L18 URST 4891 Education and Public Policy in the United States

This course takes a triangulated approach to the field of public policy as it relates to education and social problems. First, the course emphasizes theories of public policy that frame the field of policy studies. Second, the course emphasizes the skills related to the exercise of policy analysis. Third, this course simulates the policymaking context through students' participation in mock congressional testimonies. Educational opportunity, achievement inequality, and social change will be the primary interests that link these course features.

L18 URST 4991 Senior Honors Thesis in Urban Studies

This course is required for students seeking college honors through urban studies. Students discuss research methods and make regular research reports, both to the instructor and for other students. Prerequisites: satisfactory standing as a candidate for senior honors and permission of thesis director.

Credit 3 units. EN: S

L18 URST 4992 The Business of Us All: In/equality in Theory and Practice

This course uses a transdisciplinary approach to discuss in/equality and its interrelated topics of inequality, inequity and social justice. While the focus is on the U.S. predominantly, lessons learned from our global partners are important components of our discussions. The course will emphasize the implications of our findings for other ethnic/racial minorities around the world. Equality speaks to issues of priority, fairness and impartiality. On the other hand, inequality is defined as marked difference among individuals or groups of individuals in the distribution of social goods. Inequity, which considers bias, discrimination and injustice in distributive systems, pushes the discussion further. As the various forms of social, political and economic inequalities are mutually reinforced, we examine economic inequality, residential segregation and housing quality; dis/investment in neighborhoods and communities; resource allocation to low income, city and predominantly ethnic minority schools; academic underachievement of minority youth; access to and provision of appropriate health care; curtailment of social welfare programs; the presentation of stereotypical images of persons of color in the media and school curricula; morbidity, mortality, and longevity rates for persons of color; environmental hazards; the surge in incarceration related to substance abuse and escalating criminal prosecution, as well as discriminatory behavior of police and judges. All of the foregoing is made worse by race and gender status variables. Such factors cannot be considered inconsequential to social im/mobility and equality in the larger society. The collateral damage borne by the intergenerational transfer of social im/mobility and in/equality to future generations are integral to course discussions.

Women, Gender, and Sexuality Studies

Faculty and students in the Department of Women, Gender, and Sexuality Studies use an interdisciplinary approach to examine the construction of women, gender, and sexuality throughout the world. The interdisciplinary research and training in our department position our students to be thought leaders and agents in addressing inequality in all of its forms. Our graduates have gone on to work in fields such as business, entertainment, law, medicine, and social work. This community of scholars and activists is committed to doing the critical work of reimagining and producing a more inclusive future.

Among the first of its kind in the nation (est. 1972), the Department of Women, Gender, and Sexuality Studies at Washington University has emphasized the importance of gender and sexuality to such disciplines and interdisciplinary programs as philosophy, psychology, history, education, law, architecture, art history and archaeology, anthropology, political science, international studies, American culture studies, and studies in culture and languages.

Women, Gender, and Sexuality Studies students are often leaders in campus organizations that deal with issues concerning women, gender relations, sexuality, and health.

Majors

The Major in Women, Gender, and Sexuality Studies

A Bachelor of Arts degree with a major or second major in Women, Gender, and Sexuality Studies (WGSS) requires a total of 27 credits, 21 of which must be taken in courses numbered 300 or higher. At least 18 of the 21 upper-level credits required for the major may only count for the WGSS major and may not

be double-counted toward another major. Courses that count for the major should be registered as WGSS courses (i.e., with the WGSS designation, L77). All courses taken for the major must be taken for a grade, and students must earn a grade of C- or higher.

The following six requirements must be fulfilled through WGSS home-based or cross-listed courses taken at Washington University, unless otherwise indicated. The theory and methods/service learning requirements must be completed at Washington University. Students requesting an exception and who wish to transfer credits in the theory or methods/service learning category must petition the department chair or the director of undergraduate education, who will consider the request.

Only one course may fulfill two requirements (i.e., one class may double count for two of the six required areas). Students on approved study abroad programs may petition for one course to count toward one of these six requirements.

1. 3 credits of an introductory-level course: WGSS 100B Introduction to Women, Gender, and Sexuality Studies. Students must file a copy of a paper from this course with the WGSS office (McMillan Hall, Room 210).
2. 3 credits of a theory course
3. 3 credits of a feminist research methods course or a community-engaged learning course. **Note:** Students who write an honors thesis must take WGSS 417W Feminist Research Methodologies and enroll in WGSS 499 Honors Thesis: Research and Writing to fulfill this requirement. Students who take L77 417W must submit a copy of their final paper from this course to the WGSS office (McMillan Hall, Room 210).
4. 6 credits at the 400 level (courses taken in any of the above categories will satisfy this requirement) or an honors thesis. One of the 3-credit courses must be a home-based WGSS course; the second may be either home-based or cross-listed. Students should consult with their WGSS advisors for approval of their chosen courses and to ensure that one of the courses is home-based.
5. 3 credits of a historical context course. This is a course that is home-based or cross-listed in WGSS that examines gender in a historical context. **Note:** A course that satisfies one of the previous four requirement areas in this list may also fulfill this requirement.
6. 3 credits of an ethnic/global/racial context course. This is a course that is home-based or cross-listed in WGSS that examines gender in an ethnic, global, or racial context. **Note:** A course that satisfies one of the first four requirement areas in this list may also fulfill this requirement.

Optional WGSS Major Concentrations

A student majoring in WGSS may choose one of the following two concentrations within the major if the student's interests lie within these areas. The concentrations do not require additional courses; rather, the courses outlined in each track fulfill the WGSS requirements through a concentration of courses in one of the two tracks. One course can be double-counted for two of the following requirements. Only 6 units may be taken at the 100 or 200 level.

Politics Concentration

Introduction (3 credits); required for all majors:

Code	Title	Units
WGSS 100B	Introduction to Women, Gender, and Sexuality Studies	3

Race/Ethnicity/Politics (3 credits); choose one of the following (these courses can also be electives):

Code	Title	Units
WGSS 3002	Feminist Fire!: Radical Black Women in the 20th Century	3
WGSS 383A	Topics in Women, Gender, and Sexuality Studies	3
WGSS 39SC	Imperialism and Sexuality: India, South Asia, and the World: Writing-Intensive Seminar	3
WGSS 421	From Mammy to the Welfare Queen: African-American Women Theorize Identity	3

Sexuality and Politics (3 credits); choose one of the following (these courses can also be electives):

Code	Title	Units
WGSS 206	Sexuality and the State: Introduction to Sexuality Studies	3
WGSS 3014	Queering Citizenship	3
WGSS 3103	Sex and Money: Economies of Desire	3
WGSS 3141	The Racial and Sexual Politics of Public Health	3
WGSS 3172	Queer Histories	3
WGSS 3211	American Religion, Gender, and Sexuality	3
WGSS 323A	Sex Trafficking	3

Non-U.S. Course (3 credits); choose one of the following:

Code	Title	Units
WGSS 312	Globalization and Gender	3
WGSS 3416	War, Genocide and Gender in Modern Europe	3
WGSS 3548	Gender, Sexuality & Communism in 20th-Century Europe	3
WGSS 362A	Islam, Gender, Sexuality	3
WGSS 39SC	Imperialism and Sexuality: India, South Asia, and the World: Writing-Intensive Seminar	3
WGSS 437	Transnational Feminisms	3
WGSS 49SC	Incredible India!	3

Theory (3 credits); choose one of the following:

Code	Title	Units
WGSS 3203	Bodies Out of Bounds: Feminist and Queer Disability Studies	3
WGSS 371	Confronting Capitalism: Feminism, Work and Solidarity	3
WGSS 4102	Everyday Unruliness: Feminist and Queer Resistance	3
WGSS 421	From Mammy to the Welfare Queen: African-American Women Theorize Identity	3
WGSS 429	Feminist Political Theory	3
WGSS 437	Transnational Feminisms	3

History (3 credits):

Choose from the WGSS course offerings in this area.

Methods (3 credits); choose one of the following:

Code	Title	Units
WGSS 417W	Feminist Research Methodologies	3
WGSS 444 & 444B	Sex and Gender in Public and Sex and Gender in Public (These are 1.5-credit courses that meet once a week during both semesters of the senior year and that will result in a capstone project exploring gender and/or sexuality and politics broadly conceived.)	3

Electives (6 credits); choose any WGSS courses, but one of the courses listed below is encouraged:

Code	Title	Units
WGSS 3012	Gender and Politics	3
WGSS 3203	Bodies Out of Bounds: Feminist and Queer Disability Studies	3
WGSS 3211	American Religion, Gender, and Sexuality	3
WGSS 3410	Gender in Society	3

WGSS 348	Revolutionize It!: Second-Wave Feminism and the Struggle for a Radical Movement	3
WGSS 3561	Law, Gender, & Justice	3
WGSS 393	Gender Violence (If a student wants to take WGSS 3942 Community-Engaged Learning: Projects in Domestic Violence, this course must be taken first.)	3
WGSS 396	Gender and Social Class	3
WGSS 4363	Sex, Gender, and Power	3

Note: 6 credits for this concentration must be taken at the 400 level.

Health Concentration

Introduction (3 credits); required for all majors:

Code	Title	Units
WGSS 100B	Introduction to Women, Gender, and Sexuality Studies	3

Theory (3 credits); required for all majors:

Code	Title	Units
WGSS 3203	Bodies Out of Bounds: Feminist and Queer Disability Studies	3

History (3 credits); choose one of the following:

Code	Title	Units
WGSS 3041	Making Sex and Gender: Understanding the History of the Body	3
WGSS 310	From Hysteria to Hysterectomy: Women's Health Care in America	3
WGSS 414	Gender, Religion, Medicine and Science	3
WGSS 4990	History of the Body	3

Race or Non-U.S. Course (3 credits); choose one of the following:

Code	Title	Units
WGSS 3141	The Racial and Sexual Politics of Public Health	3
WGSS 3201	Gender, Culture, and Madness	3
WGSS 389	The Global History of HIV/AIDS	3
WGSS 402	Transnational Reproductive Health Issues: Meanings, Technologies, Practices	3
WGSS 4134	The AIDS Epidemic: Inequalities, Ethnography, and Ethics	3

Required Health Elective (3 credits); choose one of the following:

Code	Title	Units
WGSS 316	Contemporary Women's Health	3
WGSS 360	Trans* Studies	3
WGSS 393	Gender Violence	3

Methods (3 credits); choose one of the following:

Code	Title	Units
WGSS 417W	Feminist Research Methodologies	3
WGSS 444 & 444B	Sex and Gender in Public and Sex and Gender in Public (These are 1.5-credit courses that meet once a week during both semesters of the senior year and that will result in a capstone project exploring gender and/or sexuality and politics broadly conceived.)	3

Other Electives (6 credits):

Choose any WGSS courses.

Note: 6 credits for this concentration must be taken at the 400 level.

Additional Information

We strongly encourage and support students who wish to study abroad and will accept up to 9 credits from approved programs. Please contact Barbara Baumgartner, the WGSS Study Abroad Faculty Advisor about this option.

Current students who wish to take courses at other universities during the summer may transfer up to 6 credit units. However, these credits cannot be used to fulfill the introductory, theory, or methods/service learning requirements.

Students transferring to Washington University who wish to complete a major in WGSS may transfer no more than 9 credits of WGSS course work taken elsewhere.

Minors

The Minor in Women, Gender, and Sexuality Studies

Units required: 18 units, 12 of which must be taken in courses numbered 300 or higher. All minor courses must be home-based or cross-listed in Women, Gender, and Sexuality Studies (WGSS). All courses taken for the minor must be taken for a grade, and students must earn a grade of C- or higher.

We strongly encourage and support students who wish to study abroad and will accept up to 6 credits from approved programs. Please contact Barbara Baumgartner, WGSS Study Abroad Supervisor (bbaumgar@wustl.edu), about this option.

Required Courses

Individual programs are designed in consultation with an advisor in light of each student's interests and abilities, major course of study, and plans for the future. All courses must be home-based or cross-listed in WGSS.

Visit online course listings to view semester offerings for L77 WGSS (<https://courses.wustl.edu/CourseInfo.aspx?sch=L&dept=L77&crslvl=1:4>).

L77 WGSS 100B Introduction to Women, Gender, and Sexuality Studies

This course will provide an introduction to the major and concepts in the interdisciplinary field of women, gender and sexuality studies. We will examine the meanings attached to terms such as "man," "woman," "gay," and "sex." Topics discussed may include the history of feminist movements, masculinity, biological frameworks for understanding gender, intimate violence, sexual identities, and intersectionality. In each section, five seats are reserved for first-year students and sophomores, four seats are for juniors, and five seats are for seniors. Note: Section 1 is reserved for first-year and sophomore students only. Attendance on the first day of class is mandatory to reserve class enrollment.

L77 WGSS 102 Women in Science: An Introduction

Throughout the centuries, women were interested and involved in the sciences. Their scientific contributions, however, have often been overlooked and their abilities questioned. The 2005 proposition by Harvard's President Larry Summers that women's innate differences explain why fewer women succeed in math and science suggests that women continue to face assumptions about their scientific competence. In addition to examining the history of women's participation in science, this class explores the continuing cultural and economic barriers to women interested in science. Starting with a historical overview of women in science, we look at the contributions of women scientists. We review the numbers of women in various fields with good representation, such as biology, and those with few women, such as physics and computer science. Like the prestigious journal *Science*, we also explore whether women do science differently. This course is restricted to Women in Science Ampersand Program participants.

L77 WGSS 103 First-Year Seminar: Sex & Gender in the Gutter: An Introduction to Gender and Sexuality Studies Through Comics

This freshman seminar serves as an introduction to some of the history and concepts important in the field of gender and sexuality studies through graphic storytelling. Topics include the history of feminism in the United States, violence against girls and women, queer theory, intersectionality, and transnational feminism. Please be advised that while we will read comics —

most of these texts are not for kids. We discuss traumatic issues and will look at some disturbing images. Please spend some looking at descriptions of the required texts and think about whether or not this class is for you.

L77 WGSS 104 First Year Seminar: Gender, Sexuality and Settler Colonialism

This course examines settler colonial societies through the lens of gender and sexuality. Central questions of the course include: How is colonialism a fundamentally gendered process? What is settler colonialism and how is it different from/similar to "extractive" or "franchise" colonialism? How does the social construction of "indigeneity" intersect with other social categories such as race, gender, class and sexuality? How have feminists responded to land dispossession from South Africa to Australia, the United States and Canada? How can queer and feminist subjects think about and respond to gender oppression in ways that account for Native sovereignty and ongoing forms of anti-Blackness? To answer these questions, we will examine how indigenous feminist scholars and organizers respond to historical and ongoing resource extraction, state violence, and land dispossession. Drawing on decolonial, queer, indigenous feminist, two-spirit and transnational feminist theories, we will compare settler colonial regimes and modes of social movement organizing across economic, cultural, political, and environmental spheres.

L77 WGSS 1135 First-Year Seminar: The World of Cleopatra

Cleopatra, the last queen of ancient Egypt, captivated her contemporaries and has fascinated the Western world ever since her famous suicide by asp in 31 BCE. She was a woman of contrasts: Pharaoh of Egypt and Greco-Macedonian queen; seductive woman and shrewd political strategist; a ruthless monarch using every means available to consolidate her position in the face of the encroaching power of the Roman Empire. Through texts and material culture, the seminar seeks to understand Cleopatra in the context both of her native Egypt and of the wider Mediterranean world. We thus examine the traditions of Pharaonic Egypt; the historical events that brought Egypt under the control of the Macedonian Ptolemies (Cleopatra's dynasty); the wider stage of East-West tension and conquest in which Cleopatra struggled to maintain her power; her relationships (political and personal) with famous men of her day (Caesar, Herod, Mark Antony); her capital city of Alexandria, the largest metropolis of its day; Cleopatra's brilliant court and its luxury arts; and finally the many Cleopatras that have populated art and literature of later times. We emerge with a sense of Cleopatra, both as a unique individual and as a product of her time.

L77 WGSS 2001 Doctors and Terrorists: The Fictions of South Asian America

South Asians have always played an integral role in the culture, history and politics of the United States. However, for complex reasons, their presence has either been concealed, or dismissed through dangerous stereotypes, or just as inaccurately, excessively celebrated for proving the generosity of American

liberalism and multiculturalism. Racially misrecognized, this large and heterogeneous group has nonetheless shaped American categories of race, sexuality, and citizenship in intriguing and powerful ways. South Asian Americans have reached to fiction, music and popular culture to craft deeply intimate and original assessments of mainstream desires. In doing so they have sought to resist the dictates of whiteness, to question US imperialism, to garner acceptance and mobility, to build solidarity with other US minorities. In this course we learn about the complex history and cultural productions of South Asians in America. How did "South Asia" become a category of identification, and who benefitted from that designation? What role have South Asians played in the economic, cultural and global ascendancy of the United States? How do South Asians connect with, and control, their countries of origin? Why do discourses of sex and intimacy rise to the surface in this history, and what is the significance of story-telling in building the archive and questioning the fiction of South Asian America? Course enrollment is limited to first-year and sophomore students. Same as L46 AAS 200

L77 WGSS 205 Introduction to Queer Studies

This course offers an introduction to the topics, questions, and approaches that characterize the rapidly growing field of lesbian/gay/bisexual/trans/queer studies. Using an interdisciplinary approach, we will explore such topics as the relation between gender and sexual identity, the history of same-sex relations, homophobia and heterosexism, queer cultures, and LGBTQ politics, particularly in the United States. Our focus will be on asking whether and how "LGBTQ" functions as a coherent category of analysis or identity, and we will pay particular attention to differences (of race, age, gender, sexual practice, class, national origin, temperament, and so on) that are contained within and that often disrupt that category. This course is not open to students who have taken L77 203 or L77 3031.

Credit 3 units. A&S IQ: HUM, SC, SD Art: HUM BU: BA EN: H

L77 WGSS 206 Sexuality and the State: Introduction to Sexuality Studies

Taking Michel Foucault's idea of biopolitics as a starting point. This course examines the ways in which sexuality has been produced and regulated by the state. Drawing on history, theory, and literature, we will look at contemporary examples of the relationship between the state and sexuality. What assumptions lie behind our ideas of sexuality? How are bodies linked by the prevailing logic of sexuality? How does sexuality inform the way that we see bodies as gendered, raced, or able-bodied. In addition to looking at the relationship between sexuality and capitalism, religion, and nation, this course asks how these ideas are embodied in particular raced and gendered ideologies.

L77 WGSS 207 Constructions of Black Womanhood and Manhood in the Black Community

This course introduces students to everyday and representational experiences of Black women and men. We will explore different understandings of Black gender through engaging scholarly work and creative texts/performances/visual representations. How is the construction of gender informed by race and other categories of difference (e.g., sexuality, class)?

How might we gain a better understanding of how gender is (re)constructed within American society? What role does gender play in Black community politics and issues? This course is for first-year and sophomore students only.

L77 WGSS 2118 First Year Seminar: Angels, Prostitutes and Chicas Modernas: Women in Latin American History

Women have been active players in the construction of Latin American nations. In the last two decades, leading scholars in the field have taken up the challenge of documenting women's participation. This research explosion has produced fruitful results to allow for the development of specialized courses. This course looks at the nation-building process through the lens of Latin American women. Students will examine the expectations, responsibilities and limitations women confronted in their varied roles from the Wars of Independence to the social revolutions and dictatorial regimes of the 20th century. Besides looking at their political and economic lives, students will explore the changing gender roles and relations within marriage and the family, as well as the changing sexual and maternal mores. Same as L22 History 2118

L77 WGSS 270A Sophomore Seminar: Globalization and its Discontents

The metanarrative of globalization and global inter-connections privileges the story of markets, growth, and mobility. That story is relentlessly optimistic, and simultaneously, devoid of an understanding of gender, sexual difference or race. In this course, we take a different approach. We discard the more conventional "metrics" of globalization by focusing instead on another equally global story: the manner by which human beings have been gendered and racialized over time. Doing so allows us to revisit globalization through its own deceptions, its interconnected secrets. We confront a different set of questions: how has intimacy shaped global mobility, what is the relationship between caste and MAMAA, between custom and the movement of capital, between "slums" and scale, between outsourcing and incarceration, how does the normative family propel global racial regimes? Most crucially, how and why is the emotional and intimate story of globalization concealed? The seminar class utilizes a wide array of sources, historical documents, scholarly critiques, novels and film and largely considers the longer, global history of India as the case study. Our specific focus will be on the secretive interconnections of slavery, seclusion, settlers, servitude, surrogacy, and scholarship, as we take a deep dive into the disguises, and the more hidden aspects, of globalization.

L77 WGSS 299 Independent Study: Internships

This course number is to be used for internships only.
Credit variable, maximum 3 units.

L77 WGSS 2991 Undergraduate Teaching Assistant

In this course an advanced undergraduate can assist a faculty member in the teaching of an introductory-level Women, Gender, and Sexuality Studies course. Students can enroll in one course only after having obtained permission from a faculty member who is willing to supervise. Students do not engage in any grading but may serve in a variety of other capacities — as discussion leaders, in providing logistical support, or in otherwise assisting with the transmission of course material.
Credit variable, maximum 3 units.

L77 WGSS 3002 Feminist Fire!: Radical Black Women in the 20th Century

Black women have been at the forefront of the Black radical tradition since its inception. Often marginalized in both the scholarship and the popular memory, there exists a long unbroken chain of women who have organized around the principles of anti-sexism, anti-racism, and anti-capitalism. Frequently critical of heterosexist projects as well, these women have been the primary force driving the segment of the Black radical tradition that is commonly referred to as Black Feminism. Remaining cognizant of the fact that Black Feminist thought has also flourished as an academic enterprise -- complete with its own theoretical interventions (e.g., standpoint theory, intersectionality, dissemblance) and competing scholarly agendas -- this course will think through the project of Black Feminism as a social movement driven by activism and vigorous political action for social change. Focusing on grassroots efforts at organizing, movement building, consciousness raising, policy reform, and political mobilization, this course will center Black Feminists who explicitly embraced a critical posture toward capitalism as an untenable social order. We will prioritize the lives and thoughts of 20th-century women like Claudia Jones, Queen Mother Audley Moore, Frances Beal, Barbara Smith, Audre Lorde, and Angela Davis as well as organizations like the Combahee River Collective, the Chicago's Black Women's Committee, and the Third World Women's Alliance. At its core, this course aims to bring the social movement history back into the discourse surrounding Black Feminism.

L77 WGSS 3013 On Love and Intimacy: Theorizing Kinship in the Multiple

Love and intimacy are terms that have a lot of cultural cache. In this course, we analyze the ways in which intimacy has been embedded within certain discourses of privacy, rights and individuality. In addition to the couple form, we examine friendship, celibacy, therapy and relationships people form with pets and with objects to flesh out intimacy's multiplicities to see how these forces impact these affective tides. This course brings together history, critical theory and film to think through various expressions of intimacy and what it means to relate to the other. Prerequisites: any 100- or 200-level Women, Gender, and Sexuality Studies course or permission from the instructor.
Credit 3 units. A&S IQ: HUM, SC, SD Art: HUM BU: BA, ETH EN: H

L77 WGSS 3014 Queering Citizenship

"Queering Citizenship" explores the fundamental question: is queer citizenship possible? The contestation of citizenship in the U.S. and transnationally makes this question unavoidable for queer and feminist scholars. Provincializing European political history and Western liberal democracy, students will use queer theory to consider the costs of exclusion from, as well as inclusion in, citizenship. We will consider how 'queerness' as a concept and queer theory as a method of analysis can inform our understanding of nationalism, democratic formations, citizenship, transnational labor flows, colonialism and capitalism. Students will also get at questions of the cultural specificity of queer's anti-normative critique. Topics of discussion include the ways gender and sexuality constitute the role of the citizen; the relationship between citizenship and labor; how citizenship is "performed"; grassroots organizing through alternative citizenships; the politics of transgender recognition; homonationalism; and queer complicity in settler colonial state violence and the ascendancy of global whiteness. We will also examine case studies of queer politics to compare different constructions of gender/sexuality/race across citizenship regimes. By the end of the course, students will be able to evaluate the strengths and weaknesses of citizenship regimes on multiple continents and identify political alternatives to existing, state-centric solutions to violence and marginalization. Pre-Requisite: L77 100B or consent of instructor.

Credit 3 units. A&S IQ: LCD, SSC, SD Arch: SSC Art: SSC BU: BA EN: S

L77 WGSS 303 Gender and Education

An examination of educational experiences, practices, and institutions across multiple levels (PK-university) using gender as a critical lens. Key topics include common beliefs, practices, and expectations related to gender in educational spaces, as well as the intersections between gender and other identities that may influence educational experiences and outcomes. Readings are drawn from multiple disciplines, including sociology, history,

psychology, and philosophy. Students should be prepared to analyze their own gendered educational experiences in the context of the scholarship explored in the course, while also listening respectfully and reflecting on the experiences shared by classmates.

Same as L12 Educ 303

Credit 3 units. A&S IQ: SSC, SD Arch: SSC BU: BA EN: S

L77 WGSS 3031 Queer Theory

This course provides students with an interdisciplinary examination of the history, politics, and cultural expressions of gay and lesbian communities in American culture. It explores the ways lesbians, gay men, and bisexual and transgender people construct, participate in, and resist various constructions of gender and sexuality. We question desire and social/cultural power, the nature and power of social change, and so on. Particular attention is paid to examining the roots and effects of heterosexism and homophobia, the call for hate crime legislation, the ethics of "outing" and "passing," the impact of AIDS, partnership recognition, and domestic violence in LGBT communities. Throughout the course, students are encouraged to examine the intersections of gender, race, ethnicity, and social class with sexual orientation.

EN: H

L77 WGSS 3041 Making Sex and Gender: Understanding the History of the Body

This course provides an overview of the history of the body from antiquity to modern times using an interdisciplinary approach. By exploring selections from medical texts, literature, fashion, art, accounts of "new world" exploration, legal records, self-help books and contemporary media representations of human bodies, we consider the changing historical perception of the body. The intersection of gender, race and class factor significantly in our discussions of how the body has been construed historically and how it is currently being constructed in contemporary American culture. This course also provides an introduction to feminist/gender methodologies that apply to understanding the history of the body. This course is not open to students who have taken WGSS 204. Prerequisite: any 100- or 200-level WGSS course or permission of instructor.

L77 WGSS 308 Masculinities

This course critically examines the subject of masculinity through a number of themes including history, society, politics, race, gender, sexuality, art and popular culture. Interdisciplinary readings are drawn from the fields of sociology, anthropology, literature, history, art history and cultural studies. We will examine the challenges presented to "masculinity" (and a variety of responses) by the late 20th-century emergency of gender studies. Our goal is to come to a working definition of masculinity/ies and gain an understanding of some past, current and possible future masculine behaviors, mythologies,

ideologies, experiences and identities. Previous course work in Women, Gender, and Sexuality Studies strongly recommended but not required. *Attendance mandatory first day in order to reserve your class enrollment.*

L77 WGSS 310 From Hysteria to Hysterectomy: Women's Health Care in America

This course examines issues surrounding women's health care in America. While the scope is broad, the major emphasis will be on the 19th and 20th centuries. Through an examination of popular writing, scientific/medical writing, letters, diaries and fiction, we will look at the changing perceptions and conceptions of women's bodies and health in America.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L77 WGSS 3101 An Intellectual History of Sex and Gender

When did sexuality begin? Is it safe to assume that gender constructions are universal and timeless? In this course, we will engage with a broad range of readings that serve as primary texts in the history of sexuality and gender. Our aims are threefold: (1) to analyze the literary evidence we have for sexuality and gender identity in Western culture; (2) to survey modern scholarly approaches to those same texts; and (3) to consider the ways in which these modern theoretical frameworks have become the most recent set of primary texts on sexuality and gender.

BU: BA EN: H

L77 WGSS 3103 Sex and Money: Economies of Desire

This interdisciplinary course explores the connections between sexuality and money. First, we investigate the role of money in sexual life that appears to exist outside of the market. How does heterosexuality reproduce capitalism, and are there sexual formations that escape capitalism's reach? Can there be meaningful consent so long as there is rent to pay? How do economics, race, and colonialism shape desire? What is the role of money in dating and marriage, and should these be understood as forms of legalized prostitution, as Marxist feminists and sex workers have long suggested? Next, we turn to sex work to explore how explicit economic exchange shapes sexuality. What power dynamics does money engender, and how do sex workers navigate and subvert them? Is sex work merely an extension of the "work we do as women," as sex worker activists wrote in a 1977 manifesto? Finally, we close with the question of whether women have better sex under socialism. What economic systems make way for sexual liberation, and how might projects for economic justice center demands for better sexual futures?

Same as L14 E Lit 316W

Credit 3 units. A&S IQ: HUM, WI Arch: HUM Art: HUM BU: HUM

EN: H

L77 WGSS 312W Topics in American and English Literature:

Starting with Allan Bloom's *The Closing of the American Mind*, a book that helped re-ignite the Culture Wars, this course will consider the debates and problems that pervaded American culture during the 1990s. From the end of the Cold War to the sexual scandals that rocked Bill Clinton's presidency, from the emergence of the Internet to the rise of grunge and rap, the 1990s were a time of vast change in American culture. It was a period when we, as a nation, reconsidered the legacy of the 1960s, the Reagan revolution, and the end of the Cold War, a time of economic expansion and cultural tension. In our consideration of this period, we will take a multidisciplinary approach when tackling a variety of materials—ranging from literary fiction (Philip Roth's *The Human Stain*, Jonathan Franzen's *The Corrections*) and popular films (Spike Lee's *Do the Right Thing* and *The Cohen brothers' The Big Lebowski*) to the music of Nirvana and Public Enemy—in an attempt to come to a better understanding of our recent history. Throughout the semester, we will pursue the vexed cultural, political, and historical questions that Americans faced in the years between the fall of the Berlin Wall and the terrorist attacks of September 11th, 2001, and consider how literary texts imagined this period of American history.

L77 WGSS 3130 Sexuality in Early Christianity

What did Jesus of Nazareth and his early followers teach about sexuality in terms of marriage, adultery, divorce, the virtues of procreation and celibacy, same-sex relationships, and erotic desire? How and why did ancient Christians take different stances on these issues, and how do these traditions continue to inform sexual ethics and gender roles today? In this course, we will study these questions by examining key passages from the teachings of Jesus in the Gospels, Paul's letters, writings of early church leaders, martyr propaganda, monastic literature, and apocryphal books deemed heretical. We will also consider the interpretations of contemporary historians of religion informed by recent trends in sexuality and gender theories.
